**Appendix A: Toyota SUA Incidents Resulting in Fatalities Included in SRS Analysis**

The attached appendix is comprised of Toyota SUA incidents reported from January 1, 1999 to September 7 that resulted in fatalities and were included in the SRS analysis.

Sources of these reports include:

- Consumer complaints to NHTSA
- Toyota-submitted claims from several NHTSA investigations into SUA
- Incidents reported by media organizations
- incidents in litigation
- Consumer contacts made to SRS and other organizations who are reporting incidents that they have received.

***Update Report: Toyota Sudden Unintended Acceleration: Appendix A***

**Toyota ID Number:**  
**NHTSA ODI Number:** 10304888 , 10121117  
**Date of Incident:** 19920303  
**Vehicle:** 1992 TOYOTA 4RUNNER  
**Location of Incident:** LAUREL, MD

**NHTSA Summary:**

A 1992 TOYOTA 4-RUNNER WAS PURCHASED AND WE ONLY HAD IT FOR TWO WEEKS. THE TRUCK WAS DRIVEN TO WEST VIRGINIA. THE NEXT DAY THE TRUCK SUDDENLY ACCELERATED AT A HIGH SPEED AND WHEN THE BRAKES WERE APPLIED IT WOULD NOT STOP. IT CRASHED AND FLIPPED OVER. MY HUSBAND DIED IN THAT TRUCK. THERE WAS A LAW SUITE BUT IT NEVER WENT TO COURT AFTER FIVE YEARS. MY LAWYERS GAVE UP. TOYOTA NEVER SETTLED WITH ME AND ONLY SAID IT WAS DRIVER ERROR. THE ENGINEER WHO WAS ON THE CASE SAID THERE WAS A DESIGN DEFECT BUT THEY COULD NOT PROVE IT. SEE ALSO ODI 10121117 \*DSY \*TR , MY HUSBAND, STANLEY W. SIRNIK BOUGHT A 1992 TOYOTA 4-RUNNER. HE ONLY HAD IT FOR TWO WEEKS WHEN HE DECIDED TO TRAVEL TO WEST VIRGINIA. STANLEY, MY BROTHER -IN-LAW AND MY YOUNG SON WAS COMING BACK FROM SHOPPING THE NEXT DAY. STANLEY PUT THE TRUCK INTO CRUISE CONTROL AT 40 MPH. HE WAS TRAVELING ALONG AT 40 MPH WHEN ALL OF SUDDEN THE TRUCK STARTED TO ACCELERATE UP TO A VERY HIGH SPEED. HE TRIED TO TAKE IT OUT OF CRUISE CONTROL BUT HE COULD NOT. HE APPLIED THE BRAKES, BUT THE BRAKES WOULD NOT WORK. TO KEEP FROM GOING OVER A CLIFF, HE RAN UP AN EMBANKMENT AND THE TRUCK FLIPPED OVER. STANLEY WAS KILLED INSTANTLY. HIS BROTHER WAS BADLY INJURED AND MY SON WAS IN THE BACK SEAT IN SHOCK. I RETAINED TWO LAW FIRMS. THE ENGINEERS SAID THE CRUISE CONTROL CAUSED THE ACCIDENT BECAUSE OF A DEFECT IN THE DESIGN. RIGHT BEFORE IT WAS TIME TO GO TO COURT IN JANUARY OF 1996, MY BIG LAWYERS ASKED THE COURT TO WITHDRAW FROM THE CASE. THE COURT GRANTED THEIR WISH. I NEVER KNEW WHAT WAS GOING ON WITH MY CASE AND WHY MY LAWYERS WANTED TO WITHDRAW AFTER KEEPING AND WORKING ON THE CASE FOR FOUR YEARS. THE LAWSUITE WAS FILED IN THE STATE OF MARYLAND. IT WAS ALL SET TO GO TO COURT WITH A JURY TRIAL. THIS ACCIDENT HAPPENED MARCH 2. 1992. THE LAW FIRMS WERE MCCARTHY, BACON, COSTELLO, WASHINGTON BUSINESS PARK SUITE 300, 4640 FORBES BOULEVARD, LANHAM, MD 20706 AND SCOTT W. ROONEY, ESQUIRE, CHARFOOS & CHRISTENSEN, P.C. DETROIT, MICHIGAN 48202.

**Additional Summary:**

THE ORIGINAL LEAD TO THIS INCIDENT COMES FROM DIGG DIALOGUE:

I was a General Manager of one of your largest dealerships in the US. I was aware that this problem dates back to 2004. In fact, there was a death involved in a sudden acceleration incident at an Atlantic City Hotel in a Camry that our dealership sold. At this point is Toyota's position going to change as to the dates involved?

THE FOLLOWING IS A NEWS ARTICLE REGARDING THIS CRASH:

**DEADLY N.J. CASINO CRASH**

New York Post - New York, N.Y.

Author: BRAD HUNTER and ZACH HABERMAN

Date: Apr 12, 2002

Start Page: 017

Section: News

Text Word Count: 171

Document Text

A car crash at an Atlantic City casino killed a woman and injured four other people yesterday. Cops say the accident occurred in front of Harrah's at 1:22 p.m. when Irene Ralston, 66, of Ft. Lee, N.J., drove her new Toyota Avalon into the hotel's entranceway.

Witness Candy Schwartz, 52, was just leaving the casino when the tragedy occurred. "It was boom! One guy went flying into the air, and then suddenly there were people lying injured all over the place," Schwartz said. "She didn't stop until she hit the wall. She came barreling in." Schwartz's husband, Alan, 42, said one victim bounced off the hood of the car "like a rag doll." He added that the carnage could have been worse.

"If she had her wheel turned more to the right, she would have gone all the way through the casino," Alan said. Two of the injured were hotel employees. The dead woman, who was 48, was not immediately identified. Police were investigating the cause and no charges were filed.

ABC 7 News reports

In April 2002, Kathleen Kelly was sitting on a bench outside Harrah's casino when an out of control Toyota Avalon shot across the road, tossing one person into the air before plowing into Ms. Kelly, killing her instantly.

---

The driver was never charged, so for years, the cause of this horrific fatal accident remained a mystery to her family, until all the recent news about Toyota recalls.

"They're saying gas peddle sticking. This is too weird, you know, that's what the woman said that hit my sister. I was flabbergasted," said Teore. That's when the sister contacted Eyewitness News and we started investigating, but because of the age of the case, police and court records had been purged.

The driver declined to talk Eyewitness News, as did the injured casino worker.

Then Eyewitness News uncovered the Medical Examiner's report on the death of Kathleen Kelly.

Inside the report, the Medical Examiner states that the driver "Told police the car suddenly accelerated" and even more troubling, he says she told police "She had just gotten the car back from the dealership" where it had been checked for "Unexpected Acceleration" but was told the "Vehicle was fine."

WHILE IN A PARKING LOT AND BACKING OUT OF A PARKING SPACE VEHICLE ACCELERATED, HITTING A PEDESTRIAN. \*AK

**Additional Summary:**

Per news article in the Palm Beach Post dated March 17, 2004

"A Boynton Beach woman hit by a vehicle at a suburban Delray Beach shopping center died Monday, the Palm Beach County sheriff;s Office said. Blossom S. Malick, 79, sustained serious injuries when a 2003 Toyota hit her in the parking lot of the Lakeside Shoppes at 5869 West Atlantic Ave. according to a report. Malick was getting into her parked 2004 Chrysler about 5:55 p.m. when Leonard H. Rubin, 87, of Delray Beach ran into her as he pulled out of his parking space, a report stated. The sheriff's office is investigating."

According to Rubin's family: he was never charged in the incident and Malick's family never sued. Rubin's son-in-law Marvin Cohen reported crash to NHTSA, received a call back and was told that the evidence in the crash as "inconclusive" and that they would keep it on file.

USA TODAY News Article "They died in Toyotas, leaving many questions" -

"Leonard Rubin, then 88, was backing out of a handicap parking spot outside 3 G's Deli on Atlantic Avenue in Delray Beach, when his car accelerated and pinned Malick against her car. She died the same day.

Rubin told police that the car malfunctioned and accelerated on its own. He also said the brakes wouldn't work. He managed to move the car away from Malick after the crash and park about 20 feet away.

Rubin, who was issued a citation by Palm Beach County officers, had purchased the car the previous summer. It had just 2,100 miles on it. He refused to drive it again and returned it to the Massachusetts dealer.

Rubin died in April 2008."

**NHTSA Summary:**

WITNESSES SAW MY PARENTS VEHICLE (A 2002 TOYOTA CAMRY) COMING TO A STOP AND THEN SUDDENLY ACCELERATE.\*AK

**Additional Summary:**

Crash happened in Las Vegas, NV

Per USA Today news article "They died in Toyotas, leaving many questions":

"George Yago was attempting to park his car on the fourth floor of a casino parking lot when the car accelerated off the side of the parking deck and fell to the ground. He and his wife of 49 years died, and the crash left their only son wondering whether his father had suffered from a heart attack moments before the crash.

According to newspaper reports, witnesses saw the Camry stop, then accelerate. It jumped a curb and then plowed through a wall. It landed on its roof.

The son, George Yago III, did not respond to requests for an interview. But he filed a complaint about his parents' car with NHTSA in April 2004, just a few months after his parents' crash, and years before the recalls."

MY FATHER WAS DRIVING A 2006 CAMRY. HE WAS BACKING INTO A PARKING SPOT AT A SUPERMARKET SHOPPING CENTER IN PALISADES PARK, NJ. HE DECIDED TO GO FORWARD AND THEN BACK UP AGAIN. WHEN HE ATTEMPTED TO GO FORWARD SLOWLY AND BRIEFLY, THE ACCELERATOR OPENED FULL-THROTTLE. HE ATTEMPTED TO BRAKE AS HARD AS HE COULD BUT THE CAR KEPT ACCELERATING. HE HIT TWO PEOPLE WHILE TRYING TO BRING THE CAR UNDER CONTROL AND THEN SLAMMED INTO A LONG ROW OF SHOPPING CARTS. THE CAR SHUT OFF ONCE IT COLLIDED WITH THE CARTS. ONE OF THE PERSONS WAS KILLED. THE OTHER SUSTAINED A BROKEN ARM. THE CAR WAS EXAMINED BY THE PALISADES PARK POLICE AND FOUND TO HAVE NO OBSERVABLE DEFECT WITH THE ACCELERATOR. MY FATHER HAD THE CAR FIXED AND ENDED UP SELLING IT, SO IT IS STILL ON THE ROAD. I WOULD HAVE TO SEARCH HIS FILES AND SEE IF ANY INFORMATION WA SAVED ABOUT THE CAR. PERHAPS HIS VIN # WOULD BE TRACEABLE THROUGH HIS FORMER INSURANCE COMPANY, ALL-STATE, OR THE PALISADES NJ POLICE DEPT. \*TR UPDATED 03/14/10 \*BF

**Additional Summary:**

FROM NEWS ARTICLE "THEY DIED IN TOYOTAS,

"A pedestrian killed outside ShopRite Place: Palisades Park, N.J."

Date: Oct. 16, 2006

Deceased: Florence Dembek, 79 (pedestrian)

Vehicle: 2005 Toyota Camry (recalled)

Details: Myron Leeds, 79, from neighboring Cliffside Park, was trying to pull into a parking spot outside the ShopRite supermarket when he lost control.

His Camry slammed into one car, spun around, hit another car, then crashed into a motorcycle. It kept going at up to 25 mph, slamming into a stand of shopping carts and two elderly sisters, Florence and Helen Dembek. Florence Dembek died three days later.

---

The police report says Leeds was yelling out the window at people to get out of the way. He told police he doesn't know what had happened.

The anonymous complainant to NHTSA says mechanics could find nothing wrong with Leeds' Camry. Leeds was ticketed for careless driving. He had the care repaired and sold it, so family members say they worry it could still be on the road somewhere."

**Date of Incident:** 20070205  
**Vehicle:** 2005 Toyota CAMRY  
**Location of Incident:** BAKERSFIELD, CA

**NHTSA Summary:**

**Additional Summary:**

"SAN LUIS OBISPO, CA – On February 5, 2007, Bulent and Anne Ezal were headed to lunch at the Pelican Point Restaurant in Pismo Beach, California. The restaurant is nestled on the edge of a cliff, affording dramatic views of the Pacific Ocean below. The parking lot was downhill of the restaurant, so Ezal rode the brakes of his 2005 Camry as he approached a parking space. He was at a complete stop, when the Camry suddenly accelerated, jumping a small curb, crashing through a fence and over the bluff. The vehicle fell 70 feet to the rocks below, and turned over once, coming to rest in the surf. Anne Ezal died of her injuries in the crash. Bulent Ezal later recovered."

**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** YUKON, OK

**NHTSA Summary:**

**Additional Summary:**

"One woman was killed and another injured in a one-car collision Thursday night about three miles north of town. According to the Oklahoma Highway Patrol, Jean Bookout, 76, of Yukon was driving a 2005 Toyota Camry south on U.S. 69 at a high rate of speed at about 6:20 p.m. Thursday. Bookout, the OHP report states, failed to negotiate a curve and her car careened into a ditch on Texanna Road. Bookout was transported by helicopter to St. John Medical Center in Tulsa, where she was treated for head injuries. Bookout was listed in serious condition Friday. A passenger, Barbara Schwarz, 70, also of Yukon, was transferred from Muskogee Regional Medical Center by helicopter to St. John Medical Center, where she later died. The OHP report states safety belts were in use by both occupants. The air bag did not deploy."

**Additional Summary:**

FROM NEW ORLEANS METRO NEWS ARTICLE "ONE KILLED, THREE INJURED IN I-55 CRASH" DATED APRIL 21, 2008

"The accident occurred shortly before 9 p.m. near milepost 14 when George's 2007 Toyota, traveling northbound on I-55 in the left lane, struck the rear of a vehicle that was among several stopped in the left lane because of an earlier crash that was in the process of being investigated and cleared in the State Police Troop L area, Piglia said." (State Police Troop B spokesman Joseph Piglia)

"George's vehicle struck the rear of a 1997 Nissan Pathfinder driven by Martin Davison, Piglia said. The impact forced the Nissan into the rear of a 2004 Chevrolet S-10 pick up driven by Monteleone and forced that vehicle into a 1998 Ford Expedition driven by Pittman, he said.

After the impact, the Toyota and the Nissan became engulfed in flames, Piglia said. The occupants of both vehicles were removed by several bystanders.

Martin Davison, 43, of Kenner, was pronounced dead at the scene, Piglia said."

NEWS ARTICLE FROM USA TODAY - "They died in Toyotas, leaving many questions" dated March 18, 2010:

"State Trooper Melissa matey says George was charged with vehicular homicide because his blood alcohol content was above the 0.08% state limit. The case is still being tried, Matey says.

However, the anonymous complaint filed with NHTSA alleges the Camry's floor mat trapped the accelerator pedal, causing the car to accelerate into the Pathfinder.

**Location of Incident:** CORTLANDT MANOR, NY

**NHTSA Summary:**

**Additional Summary:**

NBC NEWS REPORT:

""It was a sunny Tuesday morning in July and Jake was excited that he was going to a birthday party that afternoon."

That's how Nancy Murtha of Cortlandt Manor remembers the day her 5-year-old son Jake was killed in a car accident.

Now, Murtha and her husband, Daniel, are suing Toyota, claiming a sudden acceleration problem with the company's 2008 Lexus RX350 is to blame for Jake's death.

The crash happened July 29, 2008, on Watch Hill Road in Westchester County.

Nancy Murtha says the car crashed after she tried to slow down and pull over to help Jake with something.

---

"As I hit the brake, the car wouldn't stop. It just kept on going," she says in a prepared statement. Instead of stopping, the Lexus slammed into a wall.

Jake was rushed to Westchester County Medical Center, but he died several hours later. According to the lawsuit filing, Murtha also suffered severe injuries to her neck, back, right knee and right hip, and doctors removed her spleen and part of her intestines. She was in a coma for six days."

**Toyota ID Number:**

**NHTSA ODI Number:** 10240599

**Date of Incident:** 20080826

**Vehicle:** 2006 LEXUS ES330

**Location of Incident:** CHICAGO, IL

**NTHSA Summary:**

TL\*THE CONTACT OWNS A 2006 LEXUS ES330. WHILE MERGING INTO THE RIGHT LANE AT APPROXIMATELY 25 MPH, THE VEHICLE SUDDENLY ACCELERATED. THE CONTACT WAS UNABLE TO BRAKE AND STRUCK A PEDESTRIAN. THE PEDESTRIAN DIED DUE TO INJURIES. THE CONTACT ALSO REAR ENDED TWO OTHER VEHICLES AND DROVE THROUGH A FENCE. THE VEHICLE CAME TO A STOP WHEN IT CRASHED INTO A GUARD RAIL. THE MANUFACTURER STATED THAT THE CAUSE OF THE FAILURE COULD HAVE BEEN THE FLOORMAT. THE INSURANCE COMPANY CLAIMED THAT THE VEHICLE WAS DESTROYED. THE CONTACT RECEIVED INJURIES TO HER BACK, NECK, AND LEG. TWO OTHERS WERE ALSO INJURED. STATE POLICE REPORT NUMBER 5271887 WAS FILED. THE FAILURE AND CURRENT MILEAGES WERE 26,286.

**Additional Summary:**

"When I started applying my brake, it got faster. It was like possessed...runaway. All I could see is red lights," said Willette Green. Green recalls that horrifying day on August 28, 2008 when she says she thought she was going to die. She says her 2006 Lexus ES 330 wouldn't stop as she was exiting the ramp on 22nd Street in Chicago. "I plowed through 22nd Street and there were pedestrians...there was a newspaper guy there. I plowed through there and went through fences. I ended up on the guardrail and I just knew it was over with for me," said Green. Green survived with minor injuries but a pan handler was killed. Green was ticketed for hitting a pedestrian and cited for driving too fast and failure to reduce speed to avoid an accident. Green says her insurance company Allstate and Toyota inspected the car and found nothing wrong. But a letter from Toyota dated September 18, 2008 stated it is possible that the floor mat was not properly secured and could have interfered with the brake and throttle operation. Green says she knew it was something else and filed reports with the National Highway Traffic Safety Administration."

**Toyota ID Number:**

**NHTSA ODI Number:**

**Date of Incident:** 20081031

**Vehicle:** 2005 TOYOTA SIENNA

**Location of Incident:** , TX

**NTHSA Summary:**

**Additional Summary:**

On or about October 31, 2008, a 2005 Toyota Sienna XLE being operated by Gerald L. Simmons and occupied by rear seat passengers Cathy Simmons and Sandy Simmons accelerated suddenly and unexpectedly. Mr. Simmons steered the vehicle around cars, curbs and other obstructions while the vehicle continued to accelerate through a parking lot. Attempts to brake the vehicle were futile. The vehicle eventually hit a curb which deflated a tire, then continued through a chain-link fence and a field and into a portable building, finally coming to a stop. Gerald Lee Simmons was injured in the unintended acceleration incident and later died.

FROM CHICAGO TRIBUNE NEWS ARTICLE - "Crash reports tell of horror":

"Jose Madrigal, a Mexican immigrant and devoted Catholic, made the sign of the cross each time he took a drive.

"My father was not very comfortable getting in a car," Adelina Aguilera, his daughter, said recently.

On March 9, 2009, Madrigal was a passenger in a 2009 Corolla driven by his wife of 50 years, Adelina Madrigal.

His wife said she was driving on Florence Avenue when the car suddenly accelerated, even as she applied pressure to the brakes. In order to avoid approaching cars, she swerved onto the wrong side of the road, struck a car and then crashed into a concrete wall beneath the 605 Freeway, according to a Downey police accident report.

Jose Madrigal, 89, was critically injured. He died March 25 from internal injuries.

"My dad was in wonderful health. He still mowed the lawn, had a great appetite, was very active," Aguilera said. "I expected to have my father around for a long, long time."

Downey police Officer Sean Penrose did not believe Adelina Madrigal's account of the accident. He issued the 71-year-old woman a ticket for speeding and wrote in his report that she must have applied the gas pedal instead of the brakes.

On April 15, three weeks after her husband's death, she paid a fine for speeding and the case was closed, according to DMV records. It was the first ticket Madrigal ever received, her daughter said."

**Additional Summary:**  
FROM USA TODAY NEWS ARTICLE "The died in Toyotas, leaving many questions"

"During the past 12 months, Alfred Anzalone has had to cope with two losses. His daughter, Nancy, died in a car crash in May. His wife, Helen, passed away in January. She had a heart attack the morning of her daughter's funeral and never recovered, Anzalone says.

The NHTSA complainant, an anonymous relative, acknowledged in the filing that Nancy Anzalone suffered from bipolar disorder and was on the way to the hospital but insisted she was not suicidal.

Her father, who says he is convinced his daughter died because of Toyota's sudden-acceleration problems, disagrees with the complaint. He says his daughter was heading to work that morning and that witnesses say she sped through a red light with her emergency flashers on. A truck driver who saw the crash in his rearview mirror says the car swerved to miss him and crashed into a tree.

Police found the car burning and in two pieces."

**Additional Summary:**

Excerpt from USA Today news article "They died in Toyotas, leaving many questions" - Jane Zakutansky's incident

"As she and her daughter drove through downtown Scotch Plains that Friday afternoon, she decided to pull over and have her daughter drop some letters into a blue postal box by the side of the road. But as she tried to slow down, the car wouldn't stop.

"My daughter said, 'Mom, slow down!' And I said, 'I'm trying, I'm trying,' " recalls Zakutansky, then 58.

When the engine began revving, Zakutansky did the only thing she could think of: With her foot on the brake, she tried putting the car into park. That didn't work. The car slammed into reverse and sped backward, finally stopping 50 feet down the road when it hit a utility pole.

Zakutansky had no idea that in those few seconds, she'd struck someone. Ledzian, who was trying to cross the street, had been pinned between his own car and Zakutansky's. Her car then dragged him. He died a week later."

**Additional Summary:**

On, August 28, 2009, my mother (Noriko Uno) was killed in a sudden unintended acceleration accident when her 2006 Toyota Camry careened out of control, flipped over and crashed into a tree.

Excerpt from news article "Grieving family sues Toyota to expand recall" by John Guenther, University of Southern California

---

"The accident that killed Uno happened on Aug 28, 2009, the same day an off-duty CHP officer and his family were killed in a now-famous sudden acceleration crash in San Diego involving a Lexus.

On that day, Uno was traveling on Euclid Ave in the City of Upland when witnesses say her Camry suddenly accelerated and quickly reached speeds close to 100mph.

Bystanders say Uno swerved to avoid other cars and veered onto the wrong side of the road. The traffic report concluded Uno then entered the median to avoid an oncoming truck and collided with a telephone pole. The car went airborne and finally smashed into a tree.

Uno was declared dead at the scene of the crash.

The complaint filed by the plaintiff says Uno tried to stop the car with the brake pedal and the hand brake, which was found pulled up all the way."

**NHTSA Summary:**

**Additional Summary:**

"On August 28, 2009, four occupants of a 2009 Lexus ES350 tragically and unnecessarily died in Santee, California in San Diego County following a high speed loss of control and rollover event. The vehicle in question was a loaner car from Bob Baker Lexus in El Cajon, California. Driving the vehicle was Mark Saylor, 45, a 19 year veteran of the California Highway Patrol. Saylor had obtained the vehicle that day after dropping off his Lexus for service.

Witnesses report that Officer Saylor was maneuvering the Lexus in and out of traffic at high rates of speed on State Route 125, honking his horn with the hazard lights on, prior to the highway ending at an intersection. Officer Saylor attempted to negotiate a turn but could not avoid striking another vehicle and losing control because of his high rate of speed. The vehicle lost control, rolled several times, and caught fire. All four occupants are reported to have died almost immediately.

Prior to entering the intersection, an occupant of the vehicle called 911 emergency to report that the accelerator was stuck. He reported that the vehicle was traveling 120 miles per hour and that they were approaching an intersection. Occupants are heard telling each other to pray before a woman screams and the call suddenly ends.

Mark Saylor, his wife Cleofe Saylor, 45, and their 14 year old daughter Mahala all died in the crash. Cleofe's brother, Chris La Stella, 38, also died."

FROM NEWS ARTICLE "TOYOTA SUED IN FATAL CRASH" FROM BOSTON GLOBE BY ERIN AILWORTH, DATED FEBRUARY 27, 2010

A State Police account at the time of the Medford family's accident indicated that Gerald Murphy was driving on Interstate 93 in Medford near Roosevelt Circle when the vehicle crashed in the early hours of Oct. 18.

The car veered right and slammed into a guardrail, police said, then swept across four traffic lanes and hit a concrete median barrier. That impact apparently sent the sedan back across the roadway, where it stopped in the breakdown lane.

According to court records, the Murphys were driving home with their children after visiting a Halloween display in southern New Hampshire and were “only minutes” from their house when the crash occurred about 12:15 a.m. Gerald Murphy, the record said, was trying to exit the interstate and had removed his foot from the car’s accelerator.

“The Camry, rather than slowing down, suddenly surged, accelerated, and picked up speed,” the court filing said. “Gerald Murphy stepped on the brake pedal in an attempt to control the vehicle. Despite his application of the brakes, the vehicle continued to surge.”

Marianne Murphy was taken to the hospital and later died. Gerald Murphy was seriously injured, though it is unclear what type of injuries he incurred. Neither was wearing a seat belt. An unidentified teen had minor injuries, while the Murphys’ adult daughter, Rhonda, was unharmed. Both sat in the back seat and wore seat belts.

NBC ACTION NEW REPORT -"Exclusive: ‘Operator Error’ Caused Fatal Crash"

GRANDVIEW, Mo. – Crash reports indicate “operator error” caused a deadly crash at a Grandview car wash last November.

Documents, photos, and surveillance video from the car wash, owned by U.S. Congressman Emanuel Cleaver, II, explains how investigators came to their conclusion.

On Nov. 5, 2009, John Page, 65 at the time, was driving his wife’s 2002 Toyota Land Cruiser through the car wash.

The video shows Page’s SUV exit a washing bay then quickly swerve to the right. He hit a car and two people sitting on a bench. Witnesses scrambled to help. However, Rosland Watson, 40, died.

The reports, obtained exclusively by NBC Action News, say Page was not impaired. He told investigators “his accelerator stuck.”

To test Page’s claim, Grandview police towed his SUV to a garage in December. Toyota representatives asked and were allowed to assist in the investigation.

In front of Watson’s family, their attorney, Page, his attorney, and police, a Toyota engineer tested the Land Cruiser’s brakes and accelerator several times.

He found no malfunctions or problems with the accelerator sticking, the reports said.

As a result, police closed the case. They did not file any criminal charges.

However, in light of Toyota’s recent struggles with sticking accelerator pedals in other vehicles, Watson’s grieving family still has questions and concerns over what caused the crash.

“The family is investigating all potential causes of the accident and their investigation continues,” said Eric Dirks, one of the attorneys representing the Watson family. “We will be engaging several experts to determine the cause. We’re also closely following what’s happening with Toyota and recalls with other models.”

George Fitts and his family were on their way to watch a University of Texas Longhorns football game on November 6, 2009, in his 2007 Lexus ES350. They were traveling southbound on US 70, just outside of Hearne, Texas, when the Lexus crashed into a pickup truck that was stopped and preparing to turn.

The 72-year-old Geore Fitts suffered fatal injuries and passengers in the Lexus, William and Billy C. fitts, suffered serious injuries.

According to the lawsuit, the trooper who investigated the accident said Fitts apparently failed to see the other vehicle bu the family claims that the Lexus suddenly accelerated out of control and could not be stopped. The family says the vehicle's cruise control was engaged at the time of the crash, the suit states.

KVAL 13 - EUGENE, OREGON - TOYOTA SUED IN CALIF. OVER ACCELERATION DEATHS

Jacquelyn Donoghue of Holder, Neb., said in the lawsuit that her 2006 Toyota Prius suddenly sped up and went out of control in December, slamming into another vehicle, killing her husband John and seriously injuring her. Her attorney, Robert Nelson, said Toyota vehicles weren't equipped with a brake-to-idle safety feature which allows drivers to override the electronic throttle and control the vehicle in case of a sudden unintended acceleration.

Other manufactures include this safety feature, and Toyota's failure to include it on their models played a "direct role" in the death of John Donoghue, he said.

Jacquelyn Donoghue, a 67-year-old nurse, had to move out of her home after the accident so she could live closer to family members who could help take care of her.

Floor mats ruled out as cause in fatal Southlake wreck, police say

Posted Wednesday, Jan. 06, 2010

BY BILL MILLER

wmiller@star-telegram.com

Defective floor mats did not contribute to the Dec. 26 wreck in Southlake that killed four people who were conducting religious work in the area, a police spokesman said.

They drowned when a 2008 Toyota Avalon crashed through a metal fence and then landed in a pond near Lonesome Dove Road and Burney Lane, police have said.

Officers have not yet determined why the car suddenly sped out of control.

Toyota last year recalled the Avalon and other models because of concerns about the gas pedal getting stuck on the floor mat, causing sudden acceleration.

But Lt. Ben Brown, a Southlake police spokesman, said Wednesday that investigators have ruled out the floor mats because they were not inside the car.

The victims were Monty Hardy, 56, of Southlake, the driver; Hadassah Vance, 35, of Euless; Wendy Akion, 38, of Irving; and Sharon Ransom, 56, of Grapevine.

Hello, I write to consult an issue I feel strongly important about Toyota cars with problems on the accelerator. In November my grandparents died in an accident that seemed inexplicable, accelerator locked and the car fell off a cliff. A few days ago I found several articles that speak about a construction defect in these cars (in this case it was a rav4), saying that in the U.S., Europe and China they have withdrawn many cars, but Toyota sells in many other countries! In Mexico (where the accident happened) there is no initiative and people die for no reason, by the negligence of a large company. My question was, do you know if there are other cases in Mexico and in the world?, how can I do to report this fact? In the meanwhile you can add three others died people to the 18 "Le Monde" mentions citing your association as source ... I thank you so much in advance for any kind of information, I apologize for my English ...

**NTHSA Summary:**

ON JUNE 23, 2001 MY FATHER WAS DRIVING A TWO-WEEK-OLD 2001 TOYOTA AVALON ON WV ROUTE 2 NEAR HUNTINGTON, WV. ACCORDING TO EYE WITNESS ACCOUNTS, MY FATHER WAS DRIVING NORTH AT AN ACCELERATING SPEED AND QUICKLY CAME UPON ANOTHER NORTHBOUND CAR FROM THE REAR. HE CUT OVER IN THE ONCOMING LANE, PASSED THE CAR, RETURNED TO THE NORTHBOUND LANE AND CONTINUED OUT OF SIGHT. THE DRIVER OF THE CAR ESTIMATED MY FATHER WAS TRAVELING PROBABLY 90 MPH. AT THE INTERSECTION OF THREE MILE AND WV ROUTE 2, MY FATHER'S CAR LEFT THE RIGHT SIDE OF THE ROADWAY, CONTINUING AT A HIGH RATE OF SPEED ACROSS A GRASSY YARD AND OVER A KNOLL, WHERE THE CAR BECAME AIRBORNE AND FLIPPED MULTIPLE TIMES ACCORDING TO A SECOND WITNESS. THE CAR TORE THROUGH SOME TREE LIMBS, THEN SHEARED A TELEPHONE POLE AND CAME TO REST IN THE DITCH NEXT TO THE HIGHWAY. MY FATHER WAS KILLED INSTANTLY. AFTER LEAVING THE HIGHWAY, THE VEHICLE TRAVELLED 250' ACROSS THE GRASSY AREA, THEN WENT AIRBORNE AND TRAVELLED ANOTHER 278' BEFORE LANDING IN THE DITCH NEXT TO THE HIGHWAY. THERE WAS NEVER ANY GOOD EXPLANATION FOR WHY HE WAS TRAVELLING THAT FAST PRIOR TO THE ACCIDENT, BUT IN LIGHT OF THE RECENT NEWS ABOUT THE TOYOTA SUDDEN ACCELERATION PROBLEMS, WE NOW BELIEVE MY FATHER'S DEATH WAS THE RESULT OF A FAULTY VEHICLE. I HAVE THE ETCS (ELECTRONIC THROTTLE CONTROL SYSTEM) MODULE FROM THE CAR IN MY POSSESSION.

**Additional Summary:**

PHOTOS AND SHERIFF'S REPORT ARE IN FOLDER TOYSUA4205

Per Sheriff's report - Vehicle was travelling north on WV Rt 2 in the 5200 block. Driver left roadway edge on right side near the intersection of 3 Mile Road. Vehicle travelled approximately 250' through grassy area then vaulted over a small embankment. Vehicle became airborne striking a telephone pole and came to rest on the east roadway edge of WV Rt 2. There was no evident on roadway or grass surfaces to indicate driver applied brakes.

FROM LA TIMES ARTICLE - "TOYOTA FOUND TO KEEP TIGHT LID ON POTENTIAL SAFETY PROBLEMS" DATED 12/23/09

In September 2005, Toyota recalled nearly 1 million vehicles in the U.S. to replace the part, its second-largest campaign.

It came too late for Zackary Audulewicz of Ila, Ga., relatives said. The 20-year-old was driving his Toyota 4x4 to work in August 2003 when the pickup lost control. A witness said she heard a pop and saw a spark just before the pickup careened off the road, flipped into the air and rolled on its roof. Audulewicz was killed instantly.

"I feel like they knew about the problem long before the recall," said Don Audulewicz, Zackary's father and one of the plaintiffs in the suits. "I can't understand why whoever was making decisions at Toyota would do that."

Toyota declined to discuss the case, citing its policy not to comment on pending litigation. In a written statement, Toyota explained that its own investigation of the defective steering component part led it to broaden the recall to include the T100 truck.

**Date of Incident:** 20030904  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** WILMINGTON, MA

**NHTSA Summary:**

MAKIA CAFUA, DRIVING HER 2002 TOYOTA CAMRY, VIN 4TIE32K92U636868, WAS ENTERING I-93 AT EXIT 39 AT 5:30 IN THE MORNING WHEN HER CAR SUDDENLY SHOT ACROSS THREE LANES OF TRAVEL AND WAS HIT, BROAD SIDE, BY ANOTHER VEHICLE TRAVELING IN THE HIGH SPEED (3RD) LANE. TRAFFIC AT THE TIME OF THE ACCIDENT WAS LIGHT. IT IS BELIEVED THAT THE CAMRY EXPERIENCED AN UN-COMMANDED ACCELERATION CAUSING MRS. CAFUA TO LOSE CONTROL RESULTING IN THE ACCIDENT AND HER DEATH. THE CAMRY HAS BEEN STORED SINCE THE ACCIDENT AND NO CHANGES HAVE BEEN MADE TO ITS POST ACCIDENT CONDITION. VEHICLE IS AVAILABLE FOR INSPECTION/TESTING BY NHTSA. \*AK

**Additional Summary:**

Excerpt from USA Today News Article "They died in Toyotas, leaving many questions":

"In the pre-dawn hours, three cars converged on I-93 near Boston in a mess of confusion that may have blurred the rel cause of the crash.

Cafus entered the highway at Concord Street, and the crash happened almost immediately. The Escort, driven by Jamal Dayek of New Hampshire, the Camry and a Ford pickup, driven by Thomas Galvin of Methuen, Mass., collided.

Cafus was thrown from her car. She died seven months later from her injuries.

The complaint to NHTSA says witnesses saw Cafua's car shoot across three lanes before it was broadsided by one of the other vehicles."

**NHTSA Summary:**  
**Additional Summary:**  
The Providence Journal, March 17, 2004

ATTLEBORO - An 83-year-old South Attleboro man died of an apparent heart attack after he drove into a tree.

The police are withholding the man's name until his next of kin are notified.

The man's car slid off Westminster Avenue, near the Bacon Street intersection, and hit a tree around 5 p.m. yesterday. The police believe he got out of his car to inspect the damage and then collapsed. He fell between his car and the tree, leading one passerby to believe he was pinned between the Toyota Camry and the tree, said Sgt. Kyle Heagney.

An autopsy will be performed, Heagney said.

From The Sun Chronicle, March 17, 2004

In South Attleboro, police say they believe Mathew Rarus, 83, of 135 Westminster Ave., may have suffered a heart attack while moving his car in his driveway around 5 p.m. Tuesday and struck a tree.

Rescue workers gave Rarus cardiopulmonary resuscitation and took him to Sturdy Memorial Hospital where he was pronounced dead, according to police.

Driver involved in 2 separate car crashes  
Honolulu Advertiser - Honolulu, Hawaii  
Author: Ohira Rod  
Date: May 14, 2004

Document Text

By Rod Ohira, ADVERTISER STAFF WRITER

A 68-year-old woman motorist involved in two separate auto crashes in Waipahu yesterday, including one in which a pedestrian was killed and a woman in a van was critically injured, may have suffered a "medical condition" that caused her car to speed out of control, police said today.

The pedestrian, identified as a man in his 20s or 30s, suffered fatal injuries when struck as he stood outside a van peddling snacks.

Honolulu Police Lt. Bennett Martin said investigators have not been able to question the woman, who is in critical condition at The Queen's Medical Center but hope to talk with her physician to determine if a "medical condition" contributed to her erratic driving.

The woman was driving a 2002 Toyota Camry that hit the wall of a store and another vehicle on Waipahu and Paiwa streets, near Hans L`Orange Park, before triggering a chain-reaction crash involving five other vehicles minutes later.

The Camry sped off from the scene of the first accident, in which there were no reported injuries. The car was headed east on Paiwa Street when it drifted to its right near Waipahu Recreation Center and rear-ended a parked 1993 Nissan sedan at 2:25 p.m.

After hitting the parked car, the Camry veered to its left and sideswiped a moving 1998 Kia. The Kia then hit a man standing next to a 1984 Chevy van, which was peddling snacks. The Kia also struck the van and forced it into a parked 1991 Mazda pickup.

The woman vendor, 52, tried to drive off in her van and hit the pickup a second time. An 11-year-old boy, who was a passenger in the Camry, was treated for injuries at the scene and released, police said.

The death is O`ahu's 28th traffic fatality of the year, compared with 33 on the same date in 2003.

**Additional Summary:**

Excerpt from story in USA Today "They dies in Toyotas, leaving many questions":

Lon and Ella Mae Braswell were on their way north from Florida to Virginia, planning to attend their great-grandson's graduation and their granddaughter's wedding. Their plans included a side trip to Athens, Ga. To visit a family member.

Instead, Ella Mae drove their Camry off Route 24 and into a stand of tree. The police report says there were no skid marks on the road, and no indication the driver tried to stop. The car was going about 80 mph.

"It was a real shocking accident," says Henry Braswell, their son. "It was shocking to me that my mother would've been driving a car that fast."

Braswell says his mother was a good driver. She'd spent her younger years driving everything from dump trucks to tractor trailers. The family owned a truck stop and a tow truck and would tow stranded 18-wheelers when needed.

"This whole thing has never made sense," says Braswell, who filed his complaint with NHTSA after reports on Toyota's problems began. He says he wished his parents had been driving something else, such as the Lincoln they'd owned for years before leasing the Toyota."

I WOULD LIKE TO REPORT MY SON'S FATAL 2000 TOYOTA SOLARA CRASH. HIS CAR WENT INTO FULL SPEED AND HIT THE TREES WITH SPEED CLOSE TO 100MPH ON RESIDENTIAL STREET WITH 20MPH LIMIT. UPDATED 03/10/10 \*BF \*TR

**Additional Summary:**

PER LA TIMES ARTICLE "TOYOTAS' SUDDEN ACCELERATION BLAMED FOR MORE DEATHS" - MARCH 26, 2010:

"One recent complaint was made Feb. 16 by Barbara Green of Stamford, Conn. She said her son, Blazej Ignatowicz, was killed Dec. 1, 2006, when his 2000 Toyota Solara raced to 100 mph in a New Britain, Conn., residential neighborhood, causing him to lose control and crash into some trees.

"I knew from the beginning there was something wrong with the car," Green said in an interview. "As soon as I heard the news [about sudden acceleration complaints] I was like, 'Here we go. Now I know what happened.' "

The 2000 Solara did not have the electronic throttle system that some have suggested is responsible for sudden acceleration. That model has not been subject to any of the Toyota recalls."

APR 4, 2007 4:06 AM US/PACIFIC 3 KILLED IN SINGLE-CAR CRASH IN WHITTIER, CALIFORNIA THREE PEOPLE WERE KILLED WHEN A CAR LOST CONTROL IN WHITTIER AND SLAMMED INTO A TREE. POLICE SAID WEDNESDAY THAT THE VICTIMS OF A SOLO-VEHICLE CRASH IN WHITTIER THAT LEFT THREE PEOPLE DEAD AND TWO OTHERS HOSPITALIZED RANGED IN AGE FROM 18 TO THEIR EARLY 20S. THE CRASH OCCURRED ABOUT 7 P.M. TUESDAY ON COLIMA ROAD NORTH OF MAR VISTA STREET, WHITTIER POLICE OFFICER DIANA SALAZAR SAID. JENNIFER UNZUETA, ALBERT VELASQUEZ AND JOSH GUTIERREZ WERE KILLED, SALAZAR SAID. UNZUETA WAS AN 18-YEAR-OLD WHITTIER RESIDENT; VELASQUEZ, 19, WAS FROM WHITTIER; AND GUTIERREZ WAS A 19-YEAR-OLD PICO RIVERA RESIDENT, ACCORDING TO THE CORONER'S OFFICE. THE DRIVER, AN 18-YEAR-OLD WOMAN IDENTIFIED AS XENIA GUERRA, REMAINED HOSPITALIZED IN STABLE CONDITION AT UCI MEDICAL CENTER, SALAZAR SAID. HECTOR SAENZ, IN HIS EARLY 20S, WAS AIRLIFTED TO COUNTY-USC MEDICAL CENTER, AND WAS HOSPITALIZED IN STABLE CONDITION, SALAZAR SAID. GUERRA, WHO HAD

FOUR PASSENGERS IN THE TOYOTA SCION, TOLD POLICE SHE LOST CONTROL OF THE COMPACT CAR. THERE WERE NO WITNESSES, BUT SALAZAR SAID THE TOYOTA WAS COMING DOWN A HILL FROM A WILDERNESS AREA WHEN THE ACCIDENT OCCURRED. IT WAS NOT CLEAR WHAT CAUSED THE CRASH, BUT DRIVERS OFTEN COME DOWN THE HILL AT DANGEROUSLY HIGH SPEEDS, SALAZAR SAID. THE SCENE WAS CLEARED AROUND 3:10 A.M. WEDNESDAY, WHITTIER POLICE SGT. A. RUIZ SAID.

**Additional Summary:**

XENIA GUERRA, 18 YRS OLD, WAS HOSPITALIZED AND HECTOR SAENZ WAS AIRLIFTED TO COUNTY-USC MEDICAL CENTER. PASSENGERS JENNIFER UNZUETA, ALBERT VELASQUEZ AND JOSH GUTIERREZ WERE KILLED IN THE CRASH.

XENIA GUERRA WAS CHARGED WITH DRIVING TO ENDANGER, AND THE DEATH OF 3 PASSENGERS. SHE PLEADED GUILTY AND WAS TO BE SENTENCED ON APRIL 24, 2008.

**Date of Incident:** 20070409

**Vehicle:** 2001 TOYOTA AVALON

**Location of Incident:** ABILENE, TX

**NHTSA Summary:**

LET ME EXPLAIN FIRST, I CAN'T SUBSTANTIATE THE CLAIM I AM MAKING ABOUT THE POSSIBLE CAUSE OF THE ACCIDENT THAT KILLED MY WIFE WHEN DRIVING A 2001 TOYOTA AVALON. THE REASON THE ACCIDENT OCCURRED IS THAT SHE DID NOT STOP AT AN INTERSECTION CONTROLLED WITH A STOP SIGN. THE ACCIDENT OCCURRED IN CALLAHAN COUNTY, TEXAS AT THE INTERSECTION OF FM 1750 AND HIGHWAY 36 ON APRIL 9, 2007 AT APPROXIMATELY 8:30PM. SHE DROVE UNDER THE TRAILER OF AN 18 WHEELER, WAS KILLED INSTANTLY AND DRAGGED UNDER THE TRAILER FOR 800 TO 900 FEET. IT TOOK THE ABILENE FIRE DEPARTMENTS EXPERTISE TO REMOVE HER BODY FROM THE WRECKAGE. THE LOCAL VOLUNTEER FIRE DEPARTMENTS DID NOT WANT TO ATTEMPT IT. THERE WERE NO SKID MARKS. SHE HAD DRIVEN THIS ROUTE COUNTLESS TIMES AND WAS AWARE OF THE STOP SIGN. I CHECKED CELL PHONE RECORDS AND THERE WAS NO EVIDENCE THAT SHE COULD HAVE BEEN ON THE PHONE. ADMITTEDLY SHE WAS UPSET. SHE WAS DRIVING FROM ABILENE TO MEXIA, TEXAS TO BE WITH HER ELDERLY MOTHER WHO WAS IN A DIABETIC COMA WHEN SHE LAST SPOKE TO SOMEONE. HOWEVER RAY ANN WAS A GOOD DRIVER. I CAN'T BELIEVE THAT SHE WAS SO DISTRACTED TO ALLOW THIS TO HAPPEN. IN LIGHT OF THE RECENT RECALL BY TOYOTA, I BELIEVE THAT HER AVALON SUDDENLY ACCELERATED OUT OF CONTROL. NO SKID MARKS WERE AT THE SCENE ONLY CUTOUTS IN THE PAVEMENT THAT WERE CAUSED BY HER CAR AS IT WENT UNDER THE TRAILER. WHY NO SKID MARKS? AS SHOWN ON CONSUMER REPORT INTERNET VIDEO, THE BRAKES ARE NOT ABLE TO SLOW THE CAR DOWN AS IT IS ACCELERATING AND SKID MARKS WOULD NOT HAVE BEEN POSSIBLE. THERE IS NO OTHER EXPLANATION IN MY MIND AS TO HOW RAY ANN COULD HAVE MISSED THE STOP SIGN. THE CAR WAS OUT OF HER CONTROL AND IT KILLED HER. IF YOU WOULD LIKE TO HAVE THE VIN, PLEASE CONTACT ME. I WILL PULL IT OUT OF THE RECORDS I HAVE. THANK YOU FOR YOUR CONSIDERATION AND ANY RESPONSE. THIS IS SUCH A TRAGEDY THAT UNTIL THE RECALL LEFT ME WITHOUT ANY EXPLANATION THAT WAS BELIEVABLE. I NOW BELIEVE I KNOW WHAT HAPPENED. \*TR

**Additional Summary:**

Excerpt from the USA Today News Article "They died in Toyotas, leaving many questions" dated 3/18/10:

Dennis Gloyna describes the fatal crash that claimed the life of his wife, Ray Ann Gloyna, on April 9, 2007. "Dennis says he filed a complaint with NHTSA about three months ago, after hearing the reports about Toyota's sudden-acceleration cases. He hasn't heard back from the safety agency."

"I wrote that thinking this is like going to a dead-letter office," he said. "I might as well write Santa Claus."

"While he's waiting for a response and for some sort of investigation, he at least now feels like he has an answer to the mystery of his wife's death."

"The only way this could have happened is if she could not have stopped the car," he says.

**NHTSA Summary:**

MAY 28 2008, DRIVER AND 1 PASSENGER KILLED IN 2000 CAMRY CAUSED BY SEAT BELTS AND AIR BAGS AND DETACHED SEATS IN A RUNAWAY TOYOTA THAT LURCHED AND BECAME UNCONTROLLABLE AND HIT A TREE (GOING UNDER 35MPH). BECAUSE DRIVER WORE A MEDIC-ALERT BRACELET SAYING, "SEIZURE DISORDER", ALL ASSUMED THIS WAS THE CAUSE OF THE ACCIDENT. DRIVERS (ME) LIFE WAS RECOVERED IN EMERGENCY HOSPITAL, PASSENGER HAD CHEST CRUSHED BY FORCE OF AIR BAG AND SEAT BELTS WHEN SEAT BROKE LOOSE., BLED TO DEATH INTERNALLY. I , THE DRIVER ,HAVE A PERMATE CRUSHED LARYNX PAIN FROM BROKEN CHEST BONES AND PERMANENT SMASHED FEET FROM SEAT BREAKING LOOSE AND ME BEING SHOVED UNDER THE DASHBOARD.. 48 HOSPITAL OBSERVATION AND WEEKS OF FOLLOW UP REPORTED NO SEIZURES. BLOOD TESTS SHOWED NO ALCOHOL OR DRUGS WERE INVOLVED. LAST PREVIOUS SEIZURE PRIOR TO THE ACCIDENT WAS SOME 5 YEARS PRIOR. I NOW HAVE PERMANENT LEG AND /FOOT DAMAGE AND MUST WALK WITH A WALKER AND CANNOT WEAR REGULAR SHOES, NOR CAN SIT FOR MORE THAN 1 HOUR AND HAS TO SLEEP IN A RECLINER DUE TO THE PAIN AND INABILITY TO BREATHE LYING DOWN IN A BED. USES CANE IN APARTMENT. LIVES ALONE (AGE 77) TOYOTA CLAIMS REFUSES ANY RESPONSIBILITY BECAUSE CAR INSURER TOTALED CAR BEFORE TOYOTA COULD INSPECT TO SEE THE USED AIRBAGS, FRONT SEATS BLOOD AND CUT AWAY SEAT BELTS TO GET PERSONS INTO AMBULANCES. FRONT WAS TOO SMASHED TO DETERMINE ANY STEERING ISSUES. TIRES IN GREAT SHAPE... 34 DVD PHOTOS AND FULL POLICE REPORT AVAILABLE UPON REQUEST. REGARDLESS OF LOSS OF CAR CONTROL. SEAT BELTS AND AIR BAGS AND SEATS BREAKING LOOSE ARE THE MAJOR ISSUES OF RESPONSIBILITY FOR 1 DEATH AND 1 PERMANENT PHYSICALLY DAMAGED DRIVER. \*TR UPDATED 06/03/10\*BF

**Location of Incident:** CLARKSVILLE, TN

**NHTSA Summary:**

**Additional Summary:**

A \$10 million lawsuit filed against Toyota from a Clarksville family is the latest development in a two-year investigation by the Channel 4 I-Team into cases of sudden acceleration by Toyota Tacoma pickup trucks.

The Tacoma is among of the 3.8 million vehicles recalled by Toyota, as is the Camry.

When Dustin Ricardo's 2007 Camry crashed, he left behind his girlfriend and their then-1½-year-old daughter. "Adalynn wants to know about her daddy, where her daddy is," said Chrissy Ricardo, Dustin Ricardo's girlfriend. It is in Adalynn's name that her family is suing Toyota for \$10 million, alleging, among other defects, the Camry was equipped with an unsecured all-weather floor mat. According to the lawsuit filed two months ago, that floor mat jammed underneath the pedal and caused Dustin Ricardo to accelerate off Needmore Road in Clarksville, crash into a tree and die.

"What I believed happened is that Dustin Ricardo, when he got in and out of his car, unbeknownst to him, what he was actually doing, he was scooting the floor mat up toward the gas pedal," said Mike Rowan, an attorney suing Toyota.

**Date of Incident:** 20090713

**Vehicle:** 2004 TOYOTA COROLLA

**Location of Incident:** WEST SPRINGFIELD, MA

**NHTSA Summary:**

MY DAUGHTER HAD A HEAD-ON COLLISION WITH A MOTORCYCLE, WHILE DRIVING HER 2004 TOYOTA COROLLA. THE MOTORCYCLE RIDER WAS KILLED. THE AIRBAG IN THE COROLLA DEPLOYED AND SAVED MY DAUGHTER'S LIFE. UNFORTUNATELY, SHE STILL HAS LITTLE, OR NO MEMORY OF THE ACCIDENT. WE DON'T KNOW WHAT HAPPENED, OR WHY? THE POLICE BELIEVE SHE LOST CONTROL OF HER VEHICLE, CROSSED THE LANE INTO ONCOMING TRAFFIC AND STRUCK THE MOTORCYCLE. A WITNESS STATED HER CAR WAS GOING FAIRLY FAST. WHY WAS IT GOING SO FAST IN A RESIDENTIAL AREA? A TRAFFIC LIGHT WAS RIGHT IN FRONT HER (ABOUT 100 FEET AHEAD). AT THAT LIGHT, SHE WOULD HAVE TAKEN A SQUARE RIGHT HAND TURN, ENROUTE TO HER HOME. I DON'T UNDERSTAND WHY SHE WAS GOING SO FAST. AND I DON'T UNDERSTAND WHY SHE LOST CONTROL OF HER CAR. SHE WAS 90% OF THE WAY HOME. IT WAS ABOUT 6:15 IN THE AFTERNOON IN THE MIDDLE OF SUMMER. A SUNNY DAY, NO CLOUDS OR PRECIP. THE CAR IS BEING HELD BY THE WEST SPRINGFIELD, MA POLICE DEPARTMENT. CAN YOU INSPECT THE VEHICLE? SHE HAD COMPLAINED TO ME ABOUT THE VEHICLE PREVIOUS TO THIS. SHE ONCE ASKED ME ADD POWER STEERING FLUID. WHEN I CHECKED, THE RESERVOIR WAS ALREADY UP TO THE FULL MARK. BEING A DAD, MY ONLY JOB WAS TO MAINTAIN THE CAR (CHANGE OIL, ETC). I VERY, VERY RARELY DROVE THE CAR. AND WHEN I DID DRIVE, IT WAS FINE. THIS COROLLA WAS REGISTERED IN MY NAME. I BOUGHT IT IN 2007 FOR MY DAUGHTER (HER FIRST CAR). I BOUGHT COROLLAS FOR BOTH OF MY CHILDREN. I GAVE MY SON A 2001 COROLLA YEARS AGO. I'M A BIG BELIEVER IN TOYOTA QUALITY. I OWN A TACOMA MYSELF. BUT, SOMETHING ISN'T RIGHT ABOUT THIS ACCIDENT. I THINK THE STEERING AND ACCELERATION SHOULD BE CHECKED, AS A MINIMUM.

**Additional Summary:**

Per News Article from USA Today "They died in Toyotas, leaving many questions":

Joseph Mele and Adam Palmer were driving home to Mendon, MA after spending a day painting an apartment in Cape Cod, when the accident occurred. The car which was allegedly set on cruise control at 70 mph, hit a guardrail going about 100 mph. Mele escaped the fiery wreckage, but Palmer did not.

Christopher Loconto, Mele's attorney, says he felt from the beginning that there may have been something wrong with the car.

"We've got a kid here with no history of things like this. His best friend is dead, and he's devastated about the whole thing," Loconto says. "There's so much information that we don't have, and it takes awhile to put it all together."

But the district attorney's office in Dedham, Mass, says it knows exactly what happened: drunken driving.

In court documents, the district attorney's office says it has witnesses who say they pleaded with Mele not to drive because he had been drinking. Two groups of friends drove home from Cape Cod that night, one with a designated driver. The other was Palmer and Mele.

THE CONTACT DOES NOT KNOW WHAT THE MILEAGE WAS ON THE VEHICLE WHEN THE CRASH OCCURRED.

**Additional Summary:**

The lengthy investigation into a crash that killed four people in Peterborough in October has ended with few answers.

Investigators have determined that the Oct. 12 crash on Route 202 near the Jaffrey town line was caused by a Toyota Highlander sport utility vehicle that crossed the center line and collided head-on with an oncoming sedan, Peterborough Police Chief Scott M. Guinard said.

Stephen W. Lagakos, a 63-year-old Harvard professor, was at the wheel of the SUV, which carried his wife, Regina, 61, and his mother, Helen, 94, all of Wellesley, Mass.

The Lagakos family was killed instantly, along with Stephen Krause, 56, of Keene, who was driving the sedan.

In investigating the crash, police followed various tips that led to dead ends, Guinard said.

A newspaper reporter (not affiliated with The Sentinel) ignited speculation that Stephen Lagakos was driving to Monadnock Community Hospital in Peterborough before the crash, Guinard said. He declined to identify the reporter, but said the information was erroneous.

“That cost us three days of investigation,” he said.

Police also investigated a tip from a television reporter who indicated that a faulty sun visor may have interrupted Stephen Lagakos’ view of the road before the crash, Guinard said.

“We secured a search warrant for the vehicle and found no signs of excessive wear or loose movement with the sun visor,” he said.

Finally, police checked whether the SUV’s floor mat jammed the gas pedal, causing it to accelerate into oncoming traffic. Toyota Motor Corp. recently recalled 3.8 million vehicles because of problems associated with floor mats.

The Lagakos’ SUV did not have a defective floor mat, Guinard said. And there is no evidence that Stephen Lagakos had any medical conditions that played a role in the crash, he said.

“The long and the short of it is that we know the SUV crossed over the center line,” he said, “but we don’t know why, and we may never know why.”

**Date of Incident:** 20091017  
**Vehicle:** 2005 LEXUS LS430  
**Location of Incident:** MIAMI, FL

**NTHSA Summary:**

ON 10/17/09 AT ABOUT 5:40 PM, AFTER DRINKING A VODKA WITH ICE, MY HUSBAND AND I WENT TO DINNER IN OUR 2005 LS430 LEXUS. WE INTENDED TO GO TO DINNER A

RELATIVELY SHORT DISTANCE AWAY. I TURNED ON MILITARY TRAIL, PROCEEDED TO THE LEFT LANE TRAVELING SOUTHBOUND TOWARDS NORTHLAKE BLVD, PALM BEACH GARDENS, FLORIDA. AS I APPROACHED A TRAFFIC LIGHT MY LEXUS UNEXPECTEDLY SPED UP. I TRIED TO APPLY THE BRAKE. THERE WERE CARS STOPPED IN FRONT OF ME AT THE RED LIGHT. DESPITE MY EFFORTS MY CAR CONTINUED TO ACCELERATE. I TOOK EVASIVE MANEUVERS TO AVOID THE STOPPED VEHICLES IN FRONT OF ME. THE LEFT TIRES OF MY LEXUS WENT UP ON THE CENTER MEDIAN AND MY CAR CONTINUED TO ACCELERATE THROUGH THE INTERSECTION. I MISSED THE VEHICLES STOPPED AT THE TRAFFIC LIGHT AND TRAVELLING THROUGH THE INTERSECTION. MY CAR WOULD NOT STOP ACCELERATING. I STRUCK A CORVETTE STOPPED IN THE LEFT NORTHBOUND LANE OF MILITARY TRAIL. AFTER STRIKING THE CORVETTE, I CONTINUED THROUGH THE SOUTHBOUND LANES UNTIL I INTENTIONALLY DROVE MY CAR INTO A FIRE HYDRANT IN ORDER TO STOP AND AVOID STRIKING GAS PUMPS AT A SHELL STATION. MY HUSBAND AND I WERE INJURED IN THIS CRASH. THE DRIVER OF THE CORVETTE PASSED AWAY. MY LEXUS IS STILL IN POLICE CUSTODY. NO REPAIRS HAVE BEEN MADE AT THIS TIME. I WAS CHARGED WITH DRIVING UNDER THE INFLUENCE (MANSLAUGHTER), AND 3 OTHER CHARGES. I AM VIGOROUSLY FIGHTING THOSE CHARGES AS I WAS NOT IMPAIRED AND, AS EVIDENCED BY MY EVASIVE MANEUVERS, HAD CONTROL OF MY CAR. BUT FOR THE SUDDEN ACCELERATION, THIS ACCIDENT AND DEATH WOULD HAVE NOT OCCURRED. IN NOV. 2008, MY HUSBAND WAS DRIVING THE SAME LEXUS AND AS HE PULLED INTO OUR GARAGE THE CAR WOULD NOT STOP AND HIT CABINETS IN OUR GARAGE. LOOKING BACK AND COMPARING WHAT HAPPENED IN MY ACCIDENT ON 10/17/09 IT IS CLEAR THAT MY HUSBAND'S EARLIER ACCIDENT WAS THE RESULT OF SOME SORT OF MALFUNCTION OF OUR LEXUS ACCELERATOR SYSTEM. NO REPAIRS WERE MADE TO THE VEHICLE AT THAT TIME.

**Additional Summary:**

On Nov 26, 2009 my daughter was killed in a single car accident while driving a 2006 Pontiac Vibe. The accident is unexplained but clearly could have been caused by a sticking acceleration pedal.

She apparently ran of the edge of the road on the right then inexplicable the car crossed the highway at high enough speed hitting a tree to demolish the car and kill my daughter instantly.

Fatal Houston crash leads to lawsuit against Toyota

By MARY FLOOD

Copyright 2010 Houston Chronicle

Feb. 1, 2010, 10:40PM

The family of a Houston woman whose car sped through a stop sign and smashed into a cement wall, killing her on impact a week before Christmas, filed what is likely the third acceleration-related wrongful death lawsuit against Toyota in the nation Monday.

Trina Renee Harris, a 34-year-old mother of two, died on impact when her 2009 Toyota Corolla slammed into an East Hardy Toll Road cement divider at Barry, leaving no skid marks, Houston police reported.

Her husband, Michael Harris, filed a lawsuit Monday against Toyota Motor Sales U.S.A., gas pedal maker CTS Corp. and Fred Haas Toyota World, which leased her the car. Lawyers involved in the lawsuit said it's likely the third such case filed in response to acceleration problems that prompted Toyota to recall millions of vehicles and halt some production.

"I want those who were negligent to be held responsible. This problem was there before Dec. 18 when she died," Michael Harris said. The U.S. Navy petty officer first class had recently completed a stint on an aircraft carrier in the Middle East and was in San Diego when he learned of his wife's death. He returned to Houston, where the family opened Christmas gifts Trina Harris had bought.

"I have a whirlwind of emotions. I'm extremely angry for my children. She won't be there for the prom. When they get married, she won't be there," Harris said in an interview at the offices of his Houston attorneys, Ken and Judy Mingledorff.

'Mama Trina'

The man, who met the love of his life as they giggled during driver's education at Forest Brook High School, said her death was avoidable. "If there's a problem, you don't put it off," he said.

"This is about people's lives. Money should not outweigh people's lives."

His wife worked in a school cafeteria so she would be home by the time her teenage girls got there, Harris said. "She was just Mama Trina and everyone knew they had a place to sleep or a meal if they needed it when she was around."

Harris said he finds himself dialing his wife's cell phone to tell her about his day.

Toyota issued a voluntary recall related to floor mats and the accelerators in some 3.8 million vehicles in November. Last month it recalled 2.3 million cars, including many 2009 Carollas, to fix a mechanical problem with the accelerators.

Toyota issued a voluntary recall related to floor mats and the accelerators in some 3.8 million vehicles in November. Last month it recalled 2.3 million cars, including many 2009 Carollas, to fix a mechanical problem with the accelerators.

Harris said the crash didn't make sense to him and he recalled his wife saying the leased car's accelerator sometimes seemed to move on its own.

He went to the accident scene and then called Toyota before the January recall to tell them there was something wrong.

He said he never heard back from Toyota. But when he heard about the latest recall, he sought out the lawyers and sued, asking for \$200 million in actual and punitive damages for what he alleged is gross negligence.

“Toyota is building death traps and they know it and they need to stop it,” said lawyer Ken Mingledorff.

**Additional Summary:**

Per news article in the Republican American:

"A Hamden man died Thursday when his 2007 Toyota Camry left Route 8, struck guard rails and flipped.

Norman Shankman, 77, whose last address in state licensing files was listed as 900 Mix Ave., died of injuries suffered when he was thrown from the car.

According to police, Shankman was northbound approaching the Winsted town line at 11:57 a.m. when his car inexplicably left the westbound shoulder. After striking guard rails, the car crossed the roadway and continued into a ditch where it came to rest on its roof.

The crash remains under investigation by police who expect to submit the car to mechanics for a thorough mechanical inspection in accordance with protocol in fatal crashes. The car is among the models recently recalled by Toyota Motor Sales, USA Inc. for repairs to avoid possible problems with a sticky accelerator."

MONTEREY PARK -- A YOUNG WOMAN WAS KILLED AND A YOUNG MAN WAS BADLY INJURED LATE THURSDAY IN A SINGLE CAR CRASH ON ATLANTIC BOULEVARD, POLICE SAID. JASMINE ALEXI GARCIA, 19, OF LOS ANGELES DIED IN THE CRASH, LOS ANGELES COUNTY DEPARTMENT OF CORONER ASSISTANT CHIEF ED WINTER SAID. THE CRASH OCCURRED JUST BEFORE MIDNIGHT IN THE 700 BLOCK OF ATLANTIC BOULEVARD, MONTEREY PARK POLICE OFFICIALS SAID IN A WRITTEN STATEMENT. GARCIA WAS A PASSENGER IN THE CAR, OFFICIALS SAID, AND THE DRIVER, A 19-YEAR-OLD MAN, WAS HOSPITALIZED IN AN INTENSIVE CARE UNIT. THE INVESTIGATION WAS ONGOING, HOWEVER OFFICIALS SAID IT INITIALLY APPEARED THE 2007 SCION WAS SOUTHBOUND AT HIGH SPEED JUST PRIOR TO THE CRASH. "THE DRIVER LOST CONTROL OF THE VEHICLE, CAUSING THE VEHICLE TO TRAVERSE ALL THE LANES OF TRAFFIC IN AN EASTBOUND DIRECTION," ACCORDING TO THE POLICE STATEMENT. "THE VEHICLE THEN COLLIDED WITH A TREE." MONTEREY PARK FIREFIGHTERS USED THE "JAWS OF LIFE" TO FREE GARCIA AND THE DRIVER FROM THE WRECKAGE, POLICE SAID. THE WOMAN WAS PRONOUNCED DEAD AT THE SCENE, AUTHORITIES SAID, AND THE DRIVER WAS TAKEN TO LOS ANGELES COUNTY--USC MEDICAL CENTER FOR TREATMENT. THE TRAFFIC INVESTIGATORS HANDLING THE INVESTIGATION COULD NOT BE REACHED FOR COMMENT FRIDAY.

INFO FROM NEWS ARTICLES

**KENS5 SAN ANTONIO REPORTS:**

"Traffic investigators say speed was a contributing factor in a deadly accident on North Tarrant Parkway in Fort Worth Thursday morning.

Donna Casey, 33, had carefully strapped her two young children into car seats in the back of her new 2010 Toyota Highlander sport utility vehicle.

It was 8 a.m. and she was driving to her job at a local church where she teaches two-year-olds, but witnesses said Casey was driving fast erratically, and passing other cars in the eastbound lanes of North Tarrant Parkway when and she lost control.

She swerved into the median and then back across to the right shoulder at a speed estimated between 50 and 60 mph.

"Kind of corrected itself, and I thought maybe she'd be okay," said Kellie Mayhew. All of a sudden, it just started going fast again."

The vehicle struck a concrete culvert and rocketed into the air.

"Kinda looked like something out of a movie," said Mayhew, who manages a nearby apartment complex. "Flipped about five times and landed on its side."

The mangled SUV ended up about 60 yards from the roadway. Donna Casey was killed.

Casey's little boy and girl — ages one and three — dangled from their car seats, but were apparently unhurt."

Email sts: cust dissat in the eng noise and creaking noises he hears from under the dash. Cust sts spk to dlr  
who adv these encls are normal. Cust would like to doc cncls about winter mats, cust sts there is a  
tendency for the accelerator to get stuck in full down position.

\*\*\* PHONE LOG 03/13/2007 03:47:42 PM RAbenes2 Action Type: Incoming call  
Email revd:  
I leased a es 350 in may 2006. After a month i noticed that the engine noise was more than would be  
expected from a Lexus. I was told this is normal for the 350. Then after a few months I noticed creaking  
noises from under the dash. always happens on even slightly rough roads. Its so annoying and in any case  
not something I would expect from the best car maker ever (till now that is). The dealer mentioned that this  
was also a very common problem they were seeing (lexus of brookfield,WI. Another problem Id like to  
inform you about is that on 7 or 8 occasions now, and this can be very serious, whenever the winter mats  
are on, there is a tendency for the accelerator to get stuck in the full down position. Its purely a mechanical  
issue where the rubber just flexes enough to allow the accelerator to get stuck beneath it. I have tried to re-  
arrange the mats but sooner or later it tends to ride back up again. I have subsequently removed the mat,  
however when this happens the engines rev's up and unless one shuts of the car in the middle of the  
highway or places it in neutral, an accident is a real threat. I just thought I would mention this because it  
could lead to someone getting hurt.

**Toyota ID Number:**  
**NHTSA ODI Number:** 757818  
**Date of Incident:**  
**Vehicle:** 2002 TOYOTA RAV4  
**Location of Incident:** COLUMBUS, OH

**NHTSA Summary:**  
RE: FUEL THROTTLE LINKAGE FAILURE: HIGH IDLE SPEED; UNPREDICTABLE IDLE SPEED OSCILLATION / SURGES, UNPREDICTABLE ACCELERATION / DECELERATION (PARTICULARLY WHEN ENGINE IS COLD). CAR WILL SOMETIMES FAIL TO DECELERATE AFTER TAKING FOOT OFF GAS WHEN AT LOW SPEEDS (10-25 MPH), FOR EXAMPLE, WHEN TURNING A CORNER OR DRIVING DOWN A RESIDENTIAL STREET. THIS MANUAL TRANSMISSION CAR WILL SOMETIMES DRIVE/LURCH FORWARD ON ITS OWN WITHOUT PRESSING ON THE GAS PEDAL WHEN IN 2ND OR 3RD GEAR, ONCE RPM'S DROP TO ABOUT 1500. TOLD BY THE DEALER AND TOYOTA THAT THIS IS THE RESULT OF A NEW EMISSIONS CONTROL COMPUTER, AND THAT THE CAR IS OPERATING AS DESIGNED. RE: STRUCTURE - ROOF RACK: PIECE OF THE COVERING TO THE ROOF RACK FELL OFF WHEN DRIVING DOWN THE FREEWAY. COULD HAVE BEEN DANGEROUS IF THERE WOULD HAVE BEEN A CAR DRIVING BEHIND ME AT THE TIME.\*AK

VEHICLES. THIS PROBLEM RECURRED ON THREE OTHER OCCASIONS. CURRENTLY THE GEARSHIFT BEGUN TO GIVE THE CONSUMER PROBLEMS. \*SC  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10287371  
**Date of Incident:**  
**Vehicle:** 2009 TOYOTA COROLLA  
**Location of Incident:** CENTREVILLE, VA

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2009 TOYOTA COROLLA. WHILE ATTEMPTING TO PROCEED AT A TRAFFIC LIGHT, THE VEHICLE SUDDENLY ACCELERATED. HE WAS UNABLE TO CONTROL THE VEHICLE SPEED AFTER ENGAGING THE BRAKE PEDAL. HE WAS FORCED TO PLACE THE VEHICLE IN NEUTRAL AND SHUT THE ENGINE OFF. WHEN HE RESTARTED THE VEHICLE, HE NOTICED THAT THE RPMs WERE RAPIDLY INCREASING AND THAT THE ACCELERATOR PEDAL WAS STUCK BETWEEN THE FLOOR MAT. HE NOTIFIED THE MANUFACTURER AND WAS ADVISED THAT HIS YEAR, MAKE AND MODEL VEHICLE WAS NOT A PART OF THE EXISTING RECALL. THE FLOOR MAT WAS REPLACED. THE VIN WAS NOT AVAILABLE. THE FAILURE MILEAGE WAS 5,900 AND THE CURRENT MILEAGE WAS 6,000.

**Vehicle:** 2009 TOYOTA TACOMA  
**Location of Incident:** TN

**NHTSA Summary:**  
**Additional Summary:**  
Owner states that he experienced "full throttle acceleration out-of-the-blue by itself" while driving along a stretch of highway he had to downshift from 5th to 4th when the engine suddenly surged to about 4,000+ RPM. He did not complete the downshift but went to neutral instead and placed both feet under the front seat. He then reached under the accelerator pedal with his hand to pull it up - no good. He then took his right foot and placed it under the pedal and pulled up as hard as he could - no effect. The Tacoma was starting to slow because of gravity but the engine was beginning to increase its RPMs. He looked for possible carpet interferences - nope. The traffic is still light so he has time to examine things and since he cannot find anything wrong he decides to leave neutral and complete the downshift. "Now the fun begins." Full open throttle by itself with both feet on the floor, started to get concerned because he wanted to stay in control, but as the truck neared the top of the hill and 75+/- mph, he upshifted to allow the vehicle to stay in neutral, kill the engine and coast to a safe stop. "When Audi owners first reported this problem, the company did the wrong thing and decided to trash the owners. It almost ruined Audi. What will Toyota do? I will give them a chance to see me. But imagine being somewhere in bumper-to-bumper traffic in first or second gear and your throttle goes wide open by itself. How many cars would you domino before you got the clutch in or shifted to neutral or killed the engine? Sorry, placing the blame on driver error is NOT going to work on this guy."

**Date of Incident:**  
**Vehicle:** 2008 TOYOTA COROLLA  
**Location of Incident:** WATERTOWN, WI

**NHTSA Summary:**  
ON 8/29/08 I WAS SLOWLY ACCELERATING AS I PULLED ONTO THE HIGHWAY WHEN I EXPERIENCED WHAT I HAVE COME TO UNDERSTAND WAS AN SUA. A SUDDEN UNINTENDED ACCELERATION. WITH HEAD-ON TRAFFIC COMING AT ME FAST I HAD NO CHOICE BUT TO TURN SHARPLY TO GET OFF THE ROAD. MY REAR AXLE WAS CAUGHT ON A BERM OF DIRT AT THE EDGE OF A CORNFIELD. BRAKING HAD NO EFFECT. AS I SAT THERE I REALIZED THE ENGINE WAS RACING WILDLY. THERE WAS NO OBSTRUCTION TO THE GAS PEDDLE, SO I HAD TO CUT OFF THE ENGINE BY TURNING THE KEY OFF. MY CAR IS A 2008 TOYOTA COROLLA. THE ROAD WAS DRY, HOWEVER, IT WAS A DAMP MORNING AND CHILLY. I HAVE HAD NO RECURRENCES. I AM A SAFETY COMPLIANCE OFFICER WITH OSHA SO I IMMEDIATELY BEGAN INVESTIGATING THE ELECTRONIC THROTTLE SYSTEM. I DO NOT FEEL THE ADDITION OF THE PLATE BEHIND THE GAS PEDAL IS THE SOLUTION. TOYOTA TOLD ME AT THE TIME OF THE ACCIDENT THAT IT WOULD DO NO GOOD TO REPLACE THE THROTTLE SENSOR. SO I REALIZED THAT THEY HAD A DEFECT PROBLEM. I AM LOOKING INTO ADDING A SMART THROTTLE SOFTWARE PLUG-IN TO PROVIDE AN OVERRIDE TO THE THROTTLE. TOYOTA REFUSED TO TELL ME WHO MADE THE PART OR FROM WHOM THEY PURCHASED IT. PLEASE PROVIDE ME THAT INFORMATION IF POSSIBLE. PLEASE CONTINUE YOUR INVESTIGATION, AND I WOULD SUGGEST WIDENING IT TO INCLUDE ALL DRIVEBY-WIRE SYSTEMS.

**Additional Summary:**

I have a 2008 Toyota which wrecked when the accelerator "stuck" in the open position. The dealer said there were no codes and would do nothing but refer me to the help desk. I made a report out to them, but never heard anything. I asked for replacement of the throttle position sensor/accelerator pedal position sensor but the service man said it would do no good. They also inquired if it happened when it was cold, which it was. Since the weather has gotten colder I am having a lurch upon first pushing in the accelerator pedal when it has not been driven for several hours. Second incident at fast food place (3/27/10), put it into reverse the engine raced. Foot on brake held the car in place. Then kicked down after a couple of seconds. Then put e-brake on - foot on brake - then roaring up again - just like what happened when she had the crash. Sounded like full throttle. Car was warm at the time this occurred.

**Location of Incident:**  
**NHTSA Summary:**

**Additional Summary:**  
From Houston Press article dated April 23, 2009 - Kevin McGuire experienced SUA while test driving a new Prius at Dorschel Toyota in Rochester, NY.

The weather was crisp and sunny, and with the saleswoman along for the ride, McGuire drove the Prius away from the city to a hillside road without much traffic. As he recalls the conversation: "What do you think?" the saleswoman asked.

"I like this feel," McGuire said. "Well, go ahead and jump on it and see what you think about the acceleration." McGuire stomped on the gas pedal and the Prius zipped forward, but when he took his foot off the accelerator, the car kept going faster. He turned to the saleswoman. "This is all well and good, but there's one problem," McGuire told her. "What?"

"It's not stopping." "What?!" "Look it, we're still going." "Take your foot off the accelerator," she told him. "I did!"

"Pull over!" McGuire hesitated to steer the car off the road, because he was slamming on the brake with all his weight, and the Prius wouldn't stop. Smoke poured from the tires, and finally the car shut down and he pulled to the shoulder. "She was scared and I was scared, too. We just sat there for a couple of minutes and caught our breath, and then she said, 'Okay, start it up.'" McGuire says. "You could hear the engine rev up, and when I put it in drive - boom! The car took off again."

This time, the car died almost immediately and McGuire pulled over again. After starting it a third time, all was okay, and he cautiously drove back to the dealership. The saleswoman asked a technician to look at the Prius. "Oh, people put in too many floor mats," the technician said. "So the accelerator gets stuck." McGuire responded, "Wait, this is not my car, this is your car. I haven't done anything. It's not me, there's something wrong with this car."

**Location of Incident:**  
**NHTSA Summary:**  
**Additional Summary:**

From Houston Press article dated April 23, 2009 - "The Houston Press found just one person currently in litigation with Toyota concerning unintended acceleration. Art Robinson, the man involved in that crash, wouldn't talk to the Press (saying his lawyer has advised him not to), but a Toyota spokeswoman confirmed the lawsuit, declining to comment further. Apparently, hours after Robinson purchased his 2005 Prius in Tacoma, Washington, the car began to handle funny, and as he was driving back to the dealership, the car took off. Robinson stomped on the brake and the emergency brake, but the car wouldn't slow down. He exited the freeway and shot through an intersection safely, but then lost control and drove through a convenience store. Robinson escaped before the Prius and the building burst into flames. "It happened so fast I didn't have time to be scared then," Robinson told a Seattle news station."

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C* C-23

I was told (condescendingly) by our local toyota service dept. That my sudden and terrifying out-of-control acceleration in our toyota camry was due to a floor mat sticking. That felt entirely bogus, and almost as if they were blaming me for not having the mat in perfect placement. It felt as if the throttle stuck open, and the car just kept up this out of control as fast as possible acceleration. It happened when I pushed the throttle down for a very brief moment to do an evasive maneuver (away from an aggressive driver who actually killed someone a few months later in another aggressive driving stunt). It was as if my car thought I had stomped on the accelerator. It took off, tires squealing. I ended up standing on the brake pedal with all my weight, tires squealing and laying rubber, and still the car was accelerating at a rate I'd never experienced before. I was terrified! With all the noise and smoke, with the car about to go completely out of any control, I said a quick prayer and shifted into neutral. That saved my life. The remembered fear is actually blanking my mind temporarily as to the model year, but it was a few years ago, and it was a Toyota Camry all-trac. To be told, and dismissed, that this was caused by a floor mat was the ultimate in being brushed under the rug. We sent the car to the crusher. For Toyota to continue to claim this problem is being caused by floor mats is the ultimate in ridiculous reasoning. I wish they'd put some Toyota executives and engineers in some of these cars - they'd experience the real thing, and know it wasn't a stupid mat. If a mat is bunched up, it's because the driver is bracing as hard as humanly possible doing everything to get the car under control and stopped. Heck, that might move a floor mat a bit, but it certainly is not the cause!

**Toyota ID Number:**

**Date of Incident:**  
**Vehicle:** 2004 TOYOTA CAMRY  
**Location of Incident:** ,  
**NHTSA Summary:**  
**Additional Summary:**  
I was the owner of three Toyota Camry's (2001, 2004 and 2007) until we had an issue with the 2004 model on January 18 when my daughter totaled the 2004.

We also believe that the sudden acceleration issue has nothing to do with either the accelerator or the floor mat. Returning from work that Monday morning, my daughter was traveling at less than 30 mph with her foot not on neither the accelerator nor brake. The car suddenly and violently accelerated and pulled to the right. She rear ended a parked car and continued forward until the front axle broke away from the drive train.

Luckily, she was not seriously injured in the accident, but we do have both a collision and property damage claims to deal with along with an assured increase in insurance rates.

**Date of Incident:**

**Vehicle:** 2005 TOYOTA 4RUNNER

**Location of Incident:** BROOKFIELD, WI

**NHTSA Summary:**

**Additional Summary:**

She purchased a new 2005 Toyota Solara back in 2005. The gas pedal was balky in response. She had several accidents where she was rear ended because the pedal wouldn't be able to pushed down easily. That, along with other problems (bad suspension, tires worn out in 3000 miles) caused her to file a lemon law claim. She was successful and received a new 2005 Solara. As she was driving home that day after picking it up, she again experienced this balky accelerator. She immediately returned to the dealer and traded it for a 2005 4Runner. Since then, she's had fifteen or more incidents of unwanted acceleration, especially when she pushes aggressively on the accelerator, such as passing a car on a two lane road. The vehicle doesn't slow, and the brakes are unresponsive. She's complained multiple times to the dealer, and has records of the same. She once had it towed when it accelerated to 80 mph on a commercial boulevard where the speed limit is around 40. The dealer told her it was floor mats. All these complaints (documented) took place before the recent publicity. It sounds to me like she may have a sticky accelerator pedal.

**Vehicle:** 2007 TOYOTA TACOMA

**Location of Incident:** ASHBURN, VA

**NHTSA Summary:**

**Additional Summary:**

I finally traded my 2007 Tacoma 4 cyl automatic pickup in late 2008 after Toyota failed on three attempts to fix the sudden unintended acceleration I was experiencing. When Toyota lawyered-up then I filed a report with NHTSA and their investigator confirmed my truck model was being studied by their people for what they called "hysteresis", but that the inquiry would be halted if they could not pinpoint the cause. He told me they knew the problem was not with the engine control module because no one ever reported a "check engine" light associated with an unintended sudden accelerations - but strongly suspected the cabling or external circuitry associated with the throttle (pedal) control. My symptoms always occurred when I was letting up on the pedal after having just accelerated and reached my desired speed and usually on a hill - which on several occasions created full throttle events even though the pedal was full up (back). I suspect it was related to the air conditioning compressor cutting back on after the vehicle reached desired speed - and from that was either an induced voltage into the wires carrying the pedal voltage to the engine control module or was ground loop current due to the compressor cutting on. I am an electronics technician but never studied the problem any further.

**Location of Incident:** HAYFIELD, MN

**NHTSA Summary:**

**Additional Summary:**

Cory Black of Hayfield, Minnesota has experienced sudden unintended acceleration in this 2008 Toyota Tundra on two occasions.

"I was driving down 52 going toward Wal-Mart North and the truck decided to accelerate on its own and scared the living tar out of me," says Black.

Black says the truck went from 55 miles per hour to 80.

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

"When it started accelerating it just threw you back in the seat and it just took off it was just way too fast," says black.

He tried the breaks, but says that didn't work. Instead, he shifted into neutral and watched as he, his wife and his three-month-old baby slowed to a stop.

A few months later, he says it happened again.

**NHTSA Summary:**

**Additional Summary:**

I bought a used 1999 Toyota Camry LE in 2003. It was in a very good condition and had only 30K miles. Up until last year, I've never had any unintended acceleration problems. However, about six or seven months ago after I stopped on a STOP sign, my car began to accelerate even with my foot being off the gas pedal. I didn't understand at first what had happened. The car was making a huge roar, and it tried to drive forward regardless of my foot pushing on the brake pedal. It actually moved slowly, but it did in fact drag me a few yards past the STOP sign mark. Thanks God it wasn't a busy intersection! Frankly, I freaked out... I looked at my gas pedal and saw that it was in normal (not depressed) position. By the way, I don't have any floor mats in my car. The next thing I tried was letting my foot off the break pedal. The car jolted and jumped forward very fast as soon as I released the breaks. It seemed like I was drag racing without me accelerating at all! I was so scared, so I pushed the breaks again and shifted the gear to Park position, yet the car kept on making the roar as if it was still accelerating. If I remember correctly, I even tried to turn off the ignition, but after restarting the car it kept on doing the same thing (accelerating wildly).

My next move was to press the gas pedal several times while being in park gear. It worked... The car stopped doing the acceleration.

Since then, I had a couple of more episodes of the same problem. Based on my first experience, I would slightly press the gas pedal several times instead of trying to break. It works.

#### Safety Research & Strategies

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

All this time, I assumed that it was a gas pedal sticking somewhere and it's my car's only problem. After reading and hearing recent news, however, I realized that I am not alone.

**Toyota ID Number:**  
**NHTSA ODI Number:**  
**Date of Incident:**  
**Vehicle:** 1993 TOYOTA LAND CRUISER  
**Location of Incident:** FAIRBANKS, AK  
**NHTSA Summary:**

**Additional Summary:**  
I owned a 1993 Toyota Land Cruiser since new until 2008. On several occasions it exhibited unintended acceleration, usually when my wife was > driving. It occurred only once when I was driving and at extremely low ambient temperatures (<-40 F.) which is not uncommon here. My wife said she experienced unintended acceleration on the Land Cruiser about five or six times, not always during extreme cold weather. In one instance, she pulled the vehicle to the side of the road and called the dealership. They came out to help.

We believed that the throttle assembly on the Land Cruiser was mis-designed and that the return spring(s) would fail to operate sufficiently to "pull back" the throttle lever if it got iced or otherwise very cold.

**Toyota ID Number:**  
**NHTSA ODI Number:**  
**Date of Incident:**  
**Vehicle:** 2005 TOYOTA COROLLA  
**Location of Incident:**  
**NHTSA Summary:**

**Additional Summary:**  
I OWN A 2005 Toyota Corolla with only 10,500 miles on it. Almost like new. The last 4 mos. it has accelerated when I have been pulling out of a driveway or adjusting the car at slow speed in a drive way. At first I thought it was my fault but the last time I realized it wasn't. My car is not on the recall list but I read somewhere that 2005 was the first year Toyota used the ESC-i in the Corolla.

**Toyota ID Number:**  
**NHTSA ODI Number:**  
**Date of Incident:**  
**Vehicle:** LEXUS ES330  
**Location of Incident:**  
**NHTSA Summary:**

**Additional Summary:**  
Five or six years ago, my husband and I had a Lexus ES-300. (Prior to that, we had had a Lexus RX-300). On several occasions, at least 5, I experienced brief periods of excessive acceleration while driving the Lexus ES-330. Most if not all occurred when I was at an intersection and then pressed on the gas pedal. On 1 of these occasions at least, the acceleration continued for possibly 30 seconds to a minute and was quite unnerving.

At least 2 times when we were going to take the Lexus for scheduled maintenance to the dealer (and possibly 3 times), I had my husband tell them that there was a problem with the acceleration electronics. Notice I did NOT say stuck gas pedal, I specifically told my husband to tell them the problem was with their electronics. It never even occurred to me the problem was a "stuck gas pedal".

C-29

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

On the first occasion, Lexus suggested I was pressing down on the pedal too forcefully. On the second occasion, they suggested there might be rocks in the intersection and I was therefore causing the wheels to spin by accelerating too quickly, given the rocks. (I never noticed rocks before, and never saw them after this comment).

To me, it was very clear that the problem was with the electronics controlling the acceleration. When I worked, I sometimes had jobs where I programmed specialized chips that controlled electronics. I also was for a short time a testing manager at Intel, and my group tested communications chips.

**Toyota ID Number:**  
**NHTSA ODI Number:**  
**Date of Incident:**  
**Vehicle:** 2008 TOYOTA 4RUNNER  
**Location of Incident:**  
**NHTSA Summary:**

**Additional Summary:**  
Just a note that I've had the same problem with my 08 4runner. What was slightly different is that the acceleration problem occurred when passing on the freeway. The vehicle downshifted into 3rd gear and remain under full acceleration to 100 mph and still in 3rd gear. I tried the brakes and that didn't work so I threw the vehicle in neutral and was then able to slow down to traffic speed. I then shifted the vehicle back in to drive and it started acting normal again. Dealer told me that it was the mat. Not a chance since I use weathertech aftermarket mats and they lock in the door sill when the door is closed.

**Toyota ID Number:**  
**NHTSA ODI Number:**  
**Date of Incident:**  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** SAN RAFAEL, CA  
**NHTSA Summary:**

**Additional Summary:**  
Back in 2002 my daughter who lives in California purchased a new 2002 Toyota LE Camry in California which within the next couple of years experienced two unintended acceleration events. (During the first event which occurred in Folsom, CA my wife was in the car with her--the event lasted several seconds and she narrowly avoided an accident by roaring through a gas station!) (During the second event which occurred at the Galleria Shopping Center in Roseville, CA both my wife and I were in the car with her--the event again lasted several seconds and she only avoided ramming the car in front of her because the car moved just in time to avoid an accident.) Both times we reported the unintended acceleration to the Toyota dealer that had sold her the car (in Folsom, CA) and staff there said they were unaware of any problems of this nature. The second time they inspected the car. Subsequently, the car has not had a recurrence of the unintended acceleration problem, but it is still not trusted since it is not known if Toyota performed a "silent fix" on it.

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

She was slowly accelerating from a complete stop in a small line of traffic. She could see ahead of her that there were many pedestrians in the area and that the cars in front of her were starting to slow again. She went to apply the brakes but they did not stop the car. The car kept moving forward and there was nothing she could do to stop the car. She was pressing on the brakes as hard as she could and no time during the entire event did she ever pull her foot off of the brakes.

Our 12 year old daughter called out to her saying "Mom, you had better stop the car or you are going to hit the car in front of us!" My wife replied, "I'm pushing as hard as I can but the car won't stop!"

Faced with the rapidly developing situation, my wife avoided 3 pedestrians and slammed into the back of a van, stopped at the crosswalk. During this entire episode they never traveled more than 20 miles per hour. There was an injury to a person in the van that she rear ended.

**Additional Summary:**  
6 INCIDENTS OF SUA

3/24/09 On Santa Monica in BH, a car coming toward me veered in my lane; I tried to go right, but there were cars, of course, put on brakes, but car surged causing a bigger accident. I found this very confusing, but didn't pay a lot of attention to it because I had no idea why that would happen. The car was taken in and fixed.

4/2 /09 Driving down Burton way, coming to a red light stop behind an SUV. (I do not tailgate, in fact the opposite.) Okay, so as I'm slowing down with foot on brake, the woman has now come to a complete stop at light. My car surges very fast and I go under her car. I'm in shock, stuck under this SUV, and having NO idea why this would happen. She gets out of her car (on phone) and starts yelling at me, as she needed to go to NYC and now this inconvenience. Then she started asking things like, are you wearing high heels (no) did you step on the gas (no) this goes on and on and I am still in my car. If it had gone a few more feet, inches? Perhaps my legs would have been crushed. Finally someone from a store front, brings me water, and helps me get my car out from under hers which is all she wanted. Then she called police to make sure it was recorded that I was at fault. They arrived, were very kind to me, and told her to leave me alone and they were not taking a report because no one was hurt. My car looked utterly totaled, she had scratches on her bumper. My car was towed back to Western Collision. They tell me it's no big deal, they can fix it. I find this odd as it seems impossible as the entire engine was dripping all kinds of fluids, the entire front of car was accoridationed.

9/20 Pulling into a parking space, I slow down, maybe 1-2 miles an hour to maneuver into space, the car surges! And hits the left back light of a very large car. (I think it was a Cadillac) I immediately turn the engine off. There is a woman in the passenger seat, who gets out and starts screaming at me, how she will be able to work again. She rants and raves, then a man appears, I am assuming the driver, and tells her, "Do what you have to do." I back the car up and park. We exchange info. This case is still open as I am assuming she is going to for a lawsuit. (There was a small scratch to my car, front bumper.)

10/22 100 feet from my house. Going North on Arden Blvd, slowing down behind a Highlander SUV as the light is red. The car surges, I hit her. She has, again, a few scrapes. The front of mine is crumpled. She is Asian, can't speak much English, I give her all of my info, then she takes off without giving me hers. That night her husband (also little English) threatens me and tries to extort money. I told him I gave his wife all of my insurance info. He then says he wants to get me in trouble and demands to talk to my husband. I find this beyond bizarre. I hang up. They are suing. Again my car was towed away and fixed.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

1/14/2010 Going East on Willoughby. Full stop at a four way stop. I let the man to my left go, he speeds across, clearly in a hurry because he barely stopped at sign. I wait then take foot off brake, just put my foot on accelerator and it SURGED, so I clipped the back of his car. He was enraged. (The girls are in car.) He is screaming, my daughters are hysterical, I get out and implore him to stop yelling as he is scaring the girls (he also terrified me); but he keeps yelling, so I leave and call police. They come over, all is straightened out and then he apologized to the police (who were incredibly kind) for having acted so angrily.

Toyota Owners Barrage Dealers as Pedal Fixes Shipped (Update1)  
February 01, 2010 08:43 PM EST  
(Add's dealer's comment in the 10th paragraph.)

By Mike Ramsey

Feb. 2 (Bloomberg) -- Camry owner John Fallon will be among the first Toyota customers to get his car fixed: He says it's taken off on him five times with unintended acceleration. Dealers have been fielding calls -- some more than 100 a day -- as customers try to find out when they can bring in their Toyota models for a gas-pedal repair that Toyota Motor Corp. is shipping to its U.S. dealers this week. Many retailers are extending service hours as 2.3 million vehicles are set to be repaired at the company's expense.

The world's largest automaker is trying to restore consumers' confidence after halting sales and production of eight popular models in North America including the top-selling Camry and Corolla sedans because the accelerator pedals could stick or return slowly from a depressed position, leading to unintended acceleration. Fallon said he still drives his 2007 sedan because he has experience handling it.

"I had my foot firmly on the brake and all of a sudden the engine went racing like crazy," said Fallon, a 56-year-old computer-systems engineer in Oak Park, Illinois. "The last time it happened was in December." The Toyota City, Japan-based company said yesterday it is shipping a "field remedy" to its 1.234 U.S. dealers of Toyota brand vehicles. Dealers will install steel plates made in Japan to prevent sticking, said John Hanson, a company spokesman. The repair takes about 30 minutes, Toyota has said.

"We know what the problem is," said Jim Lentz, president of Toyota's U.S. sales unit. "We have the fix. The kits are in shipment to the dealerships as we speak. They'll be arriving in the next day or so."

300 Calls  
Elmhurst Toyota in Illinois, about 20 miles west of Chicago, has received almost 300 phone calls over the past week, said Kurt Schiele, vice president.

"Most of them were just, like, 'When is the fix coming?'" he said. Customers who call Rice Toyota in Greensboro, North Carolina, are "asking if my car is safe," said Elmon Dale, general sales manager. "I tell them, yeah. My mother drives a Camry. There is no need to take her out of that car."

Dale and other dealers, which have had to halt sales of eight vehicles with possibly defective accelerator pedals, are extending their service departments' hours and trying to reassure customers that their vehicles won't have problems.

"Fear Factor"  
"Obviously, there's a fear factor out there" said Tom Ryan, general manager of Metroplex Toyota in Dallas where he said sales were off. "Our family members are still driving their vehicles, and we don't think they're in harm's way."

Pedal assemblies in models that were recalled have a gap that the steel plate is designed to fill, Hanson said.

The new piece relieves friction that can develop in some pedals as a result of wear and tear and condensation, and allows the pedal to spring back without sticking, he said.

C-32

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

"We're a little concerned about the volume," said Tamara Darvish, vice president of Darcars Automotive in Silver Spring, Maryland. She estimated as many as 13,000 customers might bring their vehicles to the dealership for the pedal repair. She pulled about 200 Toyotas off her lot until they could be fixed. The U.S. sales and assembly suspension, announced Jan. 26, cover Toyota's Camry, Corolla and Avalon sedans; Matrix hatchback; Highlander, RAV4 and Sequoia sport-utility vehicles; and Tundra pickups. The top-selling Toyota models not halted are the Tacoma pickup, Sienna minivan and Prius hybrid.

"100-Year Flood" "This is perhaps a once-in-a-lifetime, 100-year-flood experience," said Richard Howard, 67, a retired Houston resident who owns an 8-year-old Toyota Highlander SUV and a 10-year-old Lexus ES 300 sedan. "It's heightened my awareness, to say, 'OK, this is a possibility this might happen' -- probably very low."

Some customers are steadfast in their support of Toyota despite the recalls. "I couldn't be prouder of Toyota, and I'll continue buying Toyotas," said Cynthia Perry, 56, who was at Metroplex Toyota for routine service on her 2008 Sienna minivan. "Because they told us. As far as I'm concerned they improved their reputation."

Customer Concerns  
Other customers are afraid the "fix" may not actually address the problem. Toyota had already announced recalls covering 5.4 million vehicles because floor mats could slip and cause unintended acceleration. Then last month, the company said it would recall 2.3 million vehicles for sticky gas pedals, 2.1 million of which were covered by the first safety action.

Fallon, who said he had the five episodes of unintended acceleration, thinks the problem is a software glitch, and unrelated to either recall. "I told the dealer that to his face. He gave me a tight smile and didn't do anything."

Fallon said he will take his Camry in for the recall fixes because the one related to the floor mats involves a change that will cause the accelerator to cut off when the brake is depressed.

Toyota has said the brake-override will become standard in all new models.

Owns/leases two Lexus vehicles - experienced SUA on 2006 GS300 and a 2007 GS350.

The GS300 had sudden acceleration issues. I took it in for service and they tried to make feel as if I imagined this. They claimed they could not find anything wrong or repeat what I reported. After numerous visits to the Mission Viejo dealership and my nagging persistence, the service manager, went on a test drive with me and I pointed out the instances it was occurring. He told me in a personal tone, to remove the battery for five minutes and the computer would reset itself. I did this often until I sold the vehicle. I did tell the buyer to disconnect the battery if he felt the surge.

Flash forward to 2010 and now 2011. I began to experience surges on the 2007 GS350. As I started the engine in different climates and it would surge backwards out of the garage with high RPM's. I needed to step on the brake before setting it gear for fear it would it backup uncontrolled. While driving in the city the automobile would increase speed and felt like an uncontrolled fierce animal with a mind of it's own. In addition, the cruise control would increase speed from where it was set.

**Date of Incident:**  
**Vehicle:** 2010 TOYOTA PRIUS  
**Location of Incident:** SAN JOSE, CA  
**NHTSA Summary:**  
**Additional Summary:**  
from BusinessWeek news article:

Count Apple Inc. co-founder Steve Wozniak among Toyota Motor Corp. car owners who say their vehicles accelerate unintentionally.

Wozniak's 2010 Toyota Prius can unintentionally accelerate to as much as 97 miles (156 kilometers) per hour when he uses cruise control to increase his speed, he said in an interview yesterday. Toyota and the U.S. National Highway Traffic Safety Administration haven't responded to his complaints in the past two months on what may be a software-related glitch, he said.

"It's scary when it happens," Wozniak, 59, said from San Jose, California. "I've had trouble getting both the government safety agency and getting Toyota to listen to me."

Wozniak, who owns four Priuses, said he took his car to a dealership, contacted Toyota and called the NHTSA about the issue. He said he believes the acceleration may be caused by a software glitch because the issue occurs in cruise control. Wozniak said he would buy another Prius.

From article on www.infoworld.com:

When Apple co-founder Steve "Woz" Wozniak noticed a reproducible problem with the cruise control [1] on his Toyota Prius that caused the car to accelerate in unexpected ways, he was understandably concerned. His Prius, it seemed, was falling prey to a software bug -- a potentially dangerous one.

Word of Wozniak's complaint spread far and wide, eventually reaching the ears of Toyota president Jim Lentz, who offered the legendary hacker his private phone number. But while Woz's story has a happy ending, the full chronicle of how Toyota has responded to the acceleration issue is a troubling one. Unfortunately, it represents a pattern that will seem all too familiar to software users everywhere.

Yet that's the whole trouble. Toyota's handling of Wozniak's complaint only underscores the automaker's mismanagement of the acceleration issue from the very beginning. There are software issues in Toyota cars, but Wozniak's isn't one of them. Wozniak, by virtue of his fame, had access to the press. Because of that, Toyota was forced to listen -- even though the complaint was an insignificant one. But if Toyota had weighed complaints on their merits from the start, it might have uncovered some of the defects that are now triggering recalls of vehicles

C-36

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

from as far back as 2001. Instead, it waited until a looming public relations disaster forced its hand.

Word of Wozniak's complaint spread far and wide, eventually reaching the ears of Toyota president Jim Lentz, who offered the legendary hacker his private phone number. But while Woz's story has a happy ending, the full chronicle of how Toyota has responded to the acceleration issue is a troubling one. Unfortunately, it represents a pattern that will seem all too familiar to software users everywhere.

So should Steve Wozniak feel vindicated? Not really. Ironically, it turns out Woz's problem wasn't a software issue at all, but a simple case of user error. According to John Voelcker of GreenCarReports.com, Wozniak didn't understand that the cruise control system on his Prius [10] works differently than the systems on many other cars. After speaking with Toyota's Lentz, the two were able to settle the matter.

From the LA Times:

Thanks to a media blitz Tuesday — including an appearance on CNN — Toyota engineers are going to borrow Wozniak's car for a week to diagnose the problem, he said. A Toyota spokesman confirmed that the automaker has reached out to Wozniak.

Mark Pinnock purchased this vehicle in 2003. He has experienced three SUA incidents resulting in crashes. After those incidents he "took off the insurance, and I parked it."

Only when a Globe reporter traced the Braintree car to Mark Pinnock through its VIN number did Pinnock learn it that it had a history of sudden acceleration that led previous owner Peter Boddart to get rid of the car and complaint about it to federal safety regulators which triggered one of the key first federal investigations of Toyota and Lexus sudden acceleration problems.

contact info - from white pages, cellphone lookup

I have a 2002 Toyota 4Runner and was parking my car (about 1-1/2 yrs. ago) against the curb and just about ready to turn off the ignition when it lunged forward hitting a parked Mercedes and then flew off that car into a U.S. Post Office building. This was a short distance at a high rate of speed. I felt as though someone else was driving the car and I was just hanging on trying not to hit any pedestrians. There was a woman injured in the parked Mercedes while her husband was in the post office. I can tell you 100% something went wrong with my Toyota. I have a police report with all my information on it (my statement of the vehicle acting on its' own) and 5 witnesses all saying that they thought I was having a heart attack because this was such a crazy out of control accident. I'm a healthy guy and got right out to make sure everyone was OK, which the police report states.

**NHTSA Summary:**

**Additional Summary:**  
PER ARTICLE IN LA TIMES - "For Toyota, the crucial question is the electronics"

"Many consumers are also not convinced by Toyota's assurances. (that electronics is not the problem)

Harold Watkins, a Studio City owner of a 2007 Avalon, said he finds Toyota's explanations "ludicrous."

"My Avalon's sudden acceleration problem . . . had absolutely nothing to do with a sticky accelerator pedal nor a floor mat," Watkins said. Like many Toyota owners, he suspects the computer-controlled throttle system.

And though Toyota maintains that there are no bugs hiding in its wiring, the complexity of today's onboard computer systems, which now run everything from skid control to windshield wipers, has proved thorny for Toyota and other automakers when it comes to recalls and other safety issues, a review of government records shows."

**Additional Summary:**  
From LA Times news article "Toyota response to complaints takes on a confrontational tone"

"SMART team may have helped Toyota's adversaries on March 12, when it inspected a 2007 Camry after an alleged sudden acceleration event.

Linda Tang, an Orange County resident who is suing Toyota over alleged defects in the Camry electronics, said her vehicle suddenly accelerated after she had taken it to a dealership for repairs under recall.

Toyota initially did not inspect the vehicle. It was only after Tang's attorney enlisted congressional investigators to contact the Department of Transportation that the inspection was scheduled.

C-39

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

At a sophisticated Toyota facility in Orange County, a large team of company technicians spent nearly seven hours going over the vehicle. Two federal safety investigators flew in from Washington to oversee the inspection. They were joined by an automotive electronics expert hired by Tang's attorney.

Near the near the end of the day, the Toyota technicians acknowledged a major error.

A shim that was supposed to have been installed in the gas pedal assembly under the recall to prevent sticking was missing, according to federal officials and allegations in Tang's suit. "It was shocking," said William Rosenbluth, the automotive electronics expert who works for Tang's attorney, Michael Lewis Kelly. "It wasn't there and the paperwork says it was put in." Toyota officials declined to discuss the inspection. ralph.vartabedian

C-40

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

Port Coquitlam resident Shirley MacDonald, 76, wants compensation after her 2004 Toyota Echo suddenly accelerated when she was out for a drive last summer.

"It was Sunday morning, and I was on my way to church," she told CBC News. "When I stepped on the gas, I just went zoom across the street. It was so frightening."

Toyota has recently issued recall notices for more than eight million vehicles worldwide, acknowledging there were problems with brakes and sudden acceleration, but the Echo is not among the models recalled. Toyota no longer manufactures the Echo.

Standing near the crash site this week, MacDonald recalled how she hit the brakes and nothing happened. The vehicle continued to accelerate. As the car sped along, MacDonald managed to steer it away from a busy intersection and hoped she could stop the car by crashing into a nearby chain-link fence. Before that could happen, however, she lost control and crashed into a tree in the front yard of a family home.

"That tree is what stopped me, right, because when I put my foot on the brake nothing happened," she said.

MacDonald's car was totalled. The impact and the exploding airbag slammed her into her seat, deeply bruising her chest and smashing her glasses.

What really hurt was the insistence by police that MacDonald caused the crash herself by stepping on the accelerator instead of the brake she said.

Police took this position despite pictures taken by her son showing the accelerator pedal flat on the floor after the crash, as if all of the spring had come out of it. But investigators never examined the car after the crash because it was deemed a writeoff, she said.

To add further insult, the B.C. government took away MacDonald's licence, saying her age contributed to the crash. "Some type of cognitive or functional decline contributed to the crash," the government told her in a letter. "That was nasty," said MacDonald, who got her licence back last month. "It was devastating to get this letter. It was an insult."

Not being allowed to drive made it harder to care for her housebound husband, who has Parkinson's disease.

Denied her insurance claim, MacDonald had to pay for damage and other crash-related expenses as well as the cost of a new car.

MacDonald, who got her licence back after her doctor said she was medically fit, still can't believe how a simple Sunday drive turned her life upside down."

**Toyota ID Number:**  
**NHTSA ODI Number:**  
**Date of Incident:**  
**Vehicle:** 2010 TOYOTA CAMRY  
**Location of Incident:** CHATHAM, ONTARIO CA  
**NHTSA Summary:**  
**Additional Summary:**  
THIS IS A CANADIAN OSI - THE AUGER EXPERIENCED THREE INCIDENTS OF SUA WITH THEIR 2010 CAMRY. TOYOTA INSPECTED THEIR VEHICLE AND DETERMINED IT TO BE OPERATING NORMALLY. THE AUGER FILED A FORMAL COMPLAINT WITH TRANSPORT CANADA TO HAVE THE DEPARTMENT INSPECT THEIR VEHICLE. TRANSPORT CANADA FINDING NO MECHANICAL OR ELECTRICAL ISSUES TO CAUSE THE SUA PROBLEM POINTS TO DRIVER ERROR AS THE LIKELY CAUSE IN THE THREE CASES THEY'VE INVESTIGATED (ALL COMPLAINTS WERE MADE IN ONTARIO).

DAVE AUGER SAID THE FIRST OCCASION THE VEHICLE SURGED FORWARD WAS WHEN HIS WIFE WAS IN A LOCAL MALL PARKING LOT. HE SAID, "WE DIDN'T BRING IT IN, WE THOUGHT MAYBE IT'S A LITTLE GLITCH."

THE SECOND TIME IT HAPPENED, HE WAS DRIVING THE VEHICLE IN THE U.S. AND WAS ADJUSTING TO TRAFFIC AND TOOK HIS FOOT OFF THE GAS WHEN THE CAR SURGED FORWARD.

AFTER THIS, AUGER SAID HE BROUGHT THE VEHICLE TO CAMPBELL TOYOTA AND THE ACCELERATOR PEDAL WAS REPLACED. HE ALSO FILLED OUT A FORM ABOUT SUA FROM TOYOTA CANADA, IN CONNECTION WITH AN IN-HOUSE RECALL PROGRAM.

THE THIRD INCIDENT HAPPENED AFTER THE PEDAL WAS CHANGED. DAVE AUGER HAD THE VEHICLE TOWED TO THE DEALERSHIP. HE WANTED THEM TO TAKE THE VEHICLE BACK WITHOUT WANTING THE COMPANY TO ACKNOWLEDGE ANY LIABILITY. HE WAS REFERRED TO TOYOTA FINANCE WHERE HE WAS ESSENTIALLY TOLD THAT "IF YOU LEAVE THE CAR WE WILL CONSIDER IT ABANDONED AND IT WILL AFFECT YOUR CREDIT RATING." AUGER WAS ALSO ANGERED THAT TOYOTA'S ROADSIDE ASSISTANCE, WHICH HE PAYS FOR WITH THE LEASE, REFUSED TO TOW HIS VEHICLE BACK HOME, STATING IT DOESN'T HAVE A MECHANICAL PROBLEM.

AUGER QUESTIONS WHY TOYOTA CANADA HAS A FORM ON SUDDEN ACCELERATION IF THIS IS NOT A PROBLEM.

DOCUMENTS ARE SAVED IN FOLDER TOYSUA4322.

**NHTSA Summary:**  
**Additional Summary:**  
PER NEWS ARTICLE -

INSURANCE COMPANY SAYS IT CAN'T HELP SIENNA DRIVER

"A Goodlettsville Toyota driver said she's experienced sudden acceleration, but her car hasn't been recalled. She said she isn't getting any help from her insurance company or Toyota.

When Stacey Stuhrenberg drove down one Goodlettsville street in February, something unexpected happened, she said.

"My van shot off," said Stuhrenberg, who crashed into the truck in front of her. "I didn't know how to describe it. It had so much power it startled me."

Her story of sudden acceleration sounds like so many others detailed by the Channel 4 I-Team, except that in Stuhrenberg's case, her Sienna hasn't been recalled by Toyota. Because it hasn't been recalled, her insurance company said there's little it can do.

"You almost feel like you're fighting big bullies, because you have these two large corporations that say, 'You're going to play by our rules. You're going to do what we say and how we say to do it.'" Stuhrenberg said.

Stuhrenberg said she knows the criticism facing drivers of unrecalled Toyota vehicles: that they're just blaming sudden acceleration because they drive a Toyota when they may have just accidentally pressed the gas pedal.

"I'm 43. I know the difference between the gas pedal and the brake," said Stuhrenberg."

recall. He is an older gentleman and of course when he first reported an incident in late 2008, he was dismissed by the dealer as old man confused by his brake and gas pedals. However, he is quite intelligent and took it upon himself to contact Toyota and have a claim opened as to his car. The 2008 incident occurred as he was driving at low speed in a parking lot. The engine revved, car accelerated and before he could do anything he crashed into two cars. Toyota found no issues with the car and Nationwide had the car fixed. He had another event in 2009 prior to floor mat recall in which the car revved and raced downhill. He was able to get it into neutral and stand on the brake to stop the car. He specifically recalls looking down and having both feet on the brake. He took it to the dealer with no action. Finally, he had a third event in January in which the car accelerated while he was stopped with the transmission in drive but with his foot on the brake. He had been completely stopped for several seconds and never moved his foot from the brake pedal. The engine revved, the car took off despite his braking and before he could get the car in neutral or do anything else it crashed into the side of a condominium.

\*\*\* SUBCASE 200309160998-1 CREATED 09/16/2003 01:41:52 PM AMoore  
CUST'S EMAIL:  
Dear Toyota:  
I thought someone should know what happened to us when we took a test drive in your new 2004 Seinna. We went to "Classic" in Round Rock, Texas and we took a test drive. The Salesman "Robert Ross" took the van off the premisis and I was the first one to test drive it. Everything was going fine and I really thought that this vehicle had a possibility of being purchased. I wanted a van that would have some get-up and go if ever I needed and your van did just that. I was impressed! We drove around for a few minutes and then I wanted my husband to drive it. We switched drivers and we decided to go into a commercial area, since it was a saturday and everything was closed. We drove for a while and my husband who is not a mini van lover was kind of taking interest. The salesman knowing that I had tested the vans power said to my

C-45

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

husband hey Dan go ahead and check out the power this van has! And when he did the van took off! and off and off. All of the sudden the accelerator got stuck to the floor! We are talking all the way down to the floor board!

We were flying down the road when my husband asked the salesman what to do! The salesman in the back seat was in shock! And speechless! Since we were coming up on a busy intersection and the van was not stopping even though my husband had his foot on the break and was arching his body out of the seat to get more weight on the brakes but we were not stopping. When my husband looked at me with a gostly look and asked what do we do? I remembered that the salesman had told us about the Kill Switch. So we killed the engine! But the brakes were still not stopping the van very much, because of the high speed. And we came into the intersection and made a fast right turn without hitting anyone else then we came to a complete stop. While the van was off, my husband had to hit the accelerator hard twice, before it popped up!

It is a good thing that we did not have our 3 yr. old with us.  
I know Toyota thinks they have the market on mini-vans, but I hope it is not at the expense of anyones life or lives. Thought you should know this in case it becomes a real problem with this van.

Thanks

**Toyota ID Number:**

**NHTSA ODI Number:** 10317554  
**Date of Incident:** 19010101  
**Vehicle:** 1986 TOYOTA CAMRY  
**Location of Incident:** EAGAN, MN

**NHTSA Summary:**

1986 TOYOTA CAMRY UNINTENDED ACCELERATION ONCE\*CW THE CONSUMER STATED THE UNINTENDED ACCELERATION HE EXPERIENCED WAS DUE TO ELECTRONICS NOT THE PEDAL. THE CONSUMER STATED HE WAS ON A STEEP UPHILL CLIMB ON MN HIGHWAY 52 WITH THE CRUISE CONTROL ENABLED. THE VEHICLE WAS SLOWING BECAUSE OF THE HILL. HE PUSHED ON THE ACCELERATOR PEDAL AND ALL OF A SUDDEN, IT STARTED ACCELERATING OUT OF CONTROL. HE REMOVED HIS FOOT FROM THE PEDAL, BUT THE SPEED CONTINUED TO INCREASE. THE CONSUMER PULLED THE PEDAL UP WITH HIS FOOT WHICH HAD NO EFFECT. HE HIT THE BRAKE TO DISENGAGE THE CRUISE CONTROL, BUT IT DIDN'T STOP ACCELERATING. HE TURNED OFF THE CRUISE CONTROL VIA THE ON/OFF BUTTON AND THE LIGHT WENT OUT, BUT IT STILL DID NOT STOP ACCELERATING. AS THE CONSUMER CRESTED THE HILL, THE VEHICLE BEGAN TO ACCELERATE EVEN MORE. HE TURNED THE KEY TO THE OFF POSITION AND THE VEHICLE COASTED TO A STOP WHILE HE PRESSED ON THE BRAKE MUCH HARDER THAN WAS NORMALLY NECESSARY. THE CONSUMER NO LONGER OWNS THE VEHICLE. \*JB

**Additional Summary:**

**Date of Incident:** 19010101  
**Vehicle:** 9999 TOYOTA TOYOTA  
**Location of Incident:** LAWRENCEVILLE, NJ

**NHTSA Summary:**

TOYOTA VEHICLE. CONSUMER STATES THAT HE HAS IDENTIFIED THE CAUSE OF THE VEHICLE SURGE OR AT LEAST ONE OF THE CAUSES. \*TGW THE CONSUMER STATED HE OWNS FOUR TOYOTA'S AND HAS REPORTED THE SUDDEN ACCELERATION PROBLEM TO TOYOTA ON MORE THAN ONE OCCASION. THE CONSUMER STATED WHEN TRAVELING AT LOW SPEEDS, ONE CAN USE THE BRAKE PEDAL ALONE TO ALLOW THE FORWARD MOTION OF THE VEHICLE BY RELIEVING THE PRESSURE SLIGHTLY AND THEN PRESSING DOWN AGAIN TO STOP, SUCH AS IN STOP AND GO TRAFFIC. IN THOSE CIRCUMSTANCES THE PLANE OF THE BRAKE PEDAL WILL DESCEND BELOW THE PLANE OF THE GAS PEDAL. IN THIS CIRCUMSTANCE, IF ONE'S FOOT IS PARTIALLY ON THE BRAKE PEDAL AND PARTIALLY OVER THE GAS PEDAL, IT WILL CAUSE THE GAS PEDAL TO DESCEND AND THE VEHICLE TO ACCELERATE. THE NATURAL TENDENCY WHEN THIS OCCURS IS TO PRESS FURTHER ON THE BRAKE PEDAL WHICH ACTUALLY FURTHER ENGAGES THE GAS PEDAL AS WELL AS THE BRAKE PEDAL AND CAUSE THE VEHICLE TO LURCH FORWARD. THE SOLUTION FOR THE PROBLEM FROM A DRIVER'S POINT OF VIEW, IS TO BE MORE CAREFUL ABOUT FOOT PLACEMENT. THE SOLUTION FOR THE PEDALS WOULD BE TO MAKE CERTAIN THAT THE BRAKE PEDAL IS ALWAYS HIGHER THAN THE GAS PEDAL. \*JB

**Vehicle:** 2005 TOYOTA CAMRY

**Location of Incident:** CHEVY CHASE, MD

**NHTSA Summary:**

2003 AND 2005 TOYOTA CAMRY WITH UNINTENDED ACCELERATION. \*KB WHILE PULLING OUT OF A PARKING SPACE, THE 2003 CAMRY SUDDENLY ACCELERATED. ALTHOUGH THE CONSUMERS HUSBAND APPLIED THE BRAKE HARD, THE VEHICLE WOULD NOT SLOW DOWN. THE VEHICLE CRASHED THROUGH A WOODEN BARRIER OF THE PARKING LOT AND THEN HIT A FIRE HYDRANT, WHICH STOPPED THE VEHICLE. THE AIR BAGS DID NOT DEPLOY AND THE CONSUMER AND HER HUSBAND SUFFERED INJURIES. THE CONSUMER NO LONGER OWNS THE 2003 WHICH WAS TOTALED BY THE INSURANCE COMPANY. THE CONSUMER PURCHASED A 2005 CAMRY TO REPLACE THE 2003. ON TWO SEPARATE OCCASIONS, SUDDEN ACCELERATION WAS EXPERIENCED WITH THE 2005 CAMRY WHEN THE CONSUMER SLOWLY MADE A TURN INTO A PARKING SPACE. THE CONSUMER SWIFTLY APPLIED THE BRAKES BOTH TIMES TO AVOID CRASHING INTO HER HOUSE. \*JB

**Vehicle:** 2007 TOYOTA PRIUS  
**Location of Incident:** FOUNTAIN VALLEY, CA

**NHTSA Summary:**  
2007 TOYOTA PRIUS. CONSUMER STATES UNINTENDED ACCELERATION. \*TGW THE CONSUMER STATED HE WAS PARKING THE VEHICLE AND WHEN HE SHIFTED THE GEAR FROM DRIVE TO NEUTRAL, WITH HIS FOOT ON THE BRAKE, THE RPM ACCELERATED TO APPROXIMATELY 4000, SO HE PUSHED THE POWER OFF BUTTON TO TURN THE VEHICLE OFF.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10323172  
**Date of Incident:** 19010101  
**Vehicle:** 2010 LEXUS ES350  
**Location of Incident:** FLAGSTAFF, AZ

**NHTSA Summary:**  
2010 LEXUS ES350. CONSUMER STATES UNINTENDED ACCELERATION. \*TGW THE CONSUMER STATED HE ENGAGED THE CRUISE CONTROL, BUT DUE TO SPEED RESTRICTIONS WHERE HE WAS DRIVING, HE APPLIED THE BRAKE AND DROVE TO THE TOP. ONCE ON LEVEL GROUND AND WITH A CLEAR LANE AHEAD, HE ENGAGED RESUME. TO HIS SURPRISE THE VEHICLE LURCHED FORWARD WITH SUCH FORCE THAT HE FELT HE HAD BEEN PUSHED BACK INTO THE SEAT VERY HARD. HE APPLIED THE BRAKE AND DISENGAGED THE CRUISE CONTROL. THE DEALERS EXPLANATION WAS THAT THE VEHICLE WAS POWERFUL. THE CONSUMER ALSO STATED THERE WAS POOR VISIBILITY IN THE REAR OF THE VEHICLE. HE STATED HE IS 5' 10" TALL, BUT SITTING IN THE DRIVERS SEAT, HE COULD NOT SEE THE BACK OF THE CAR, THE END OF THE TRUNK LID, OR THE TAIL LIGHTS. THE REAR HEAD RESTS COVERED MUCH OF THE CORNERS OF THE REAR WINDOW AND THE MIDDLE WAS ALSO BLOCKED BY THE BRAKE LIGHT. ALSO, JUST AFTER THE REAR PASSENGER SEAT, THE COVER OVER THE TRUNK WAS SLANTED AT AN ANGLE UPWARD, AND HE COULD NOT SEE WHERE THE TRUNK ENDED. AN OBJECT OR A CHILD WHO IS 4' 5" TALL COULD NOT BE SEEN UNTIL HE DROVE AWAY. THE DOOR MIRROR SHOWED THE HANDLE OF THE REAR PASSENGER'S DOOR, AFTER WHICH SINCE THE BODY WAS SLANTED INWARDLY, THERE WAS NO WAY TO SEE THE TAIL LIGHTS AND THUS GAUGE WHERE THE CAR ENDED. THE CONSUMER STATED HE WAS FORCED TO BACK AWAY VERY SLOWLY IN PARKING LOTS, ON ROADS AFTER A SNOWFALL, THE VEHICLE SKIDDED AND FISH-TAILED UN-LIKE AN ORDINARY REAR-WHEEL DRIVE VEHICLE. IT KEPT GOING, AND DRIVING BECAME UNEASY. DURING THE FIRST WEEK OF DRIVING, ANYTIME THE HEAT WAS ON, THERE WAS A STRONG SMELL OF BURNING PLASTIC COMING FROM THE VENTS. THE PASSENGER'S DOOR DID NOT FIT THE BODY OF THE VEHICLE. THEY WERE SNUG AT THE TOP, BUT WHEN THEY REACH THE DOOR HANDLE, THERE WAS AT LEAST ONE/THREE OF AN INCH GAP BETWEEN THE DOOR AND THE BODY.

THE FIRST INCIDENT HAPPENED WHEN HE APPROACHED AN INTERSECTION WITHIN AN ENCLOSED PARKING LOT BUILDING. WHEN HE APPLIED THE BRAKE, THE VEHICLE SUDDENLY ACCELERATED FORWARD AT AN INCREDIBLE SPEED AND CRASHED INTO THREE PARKED CARS. THE OTHER TWO INCIDENTS OCCURRED ON CHRISTMAS DAY 2009. THE CONSUMER WAS AT A STREET INTERSECTION NEAR HIS HOME WHERE HE NARROWLY MISSED A CAR. THE SECOND TIME, HIS VEHICLE DRASTICALLY ACCELERATED WHICH CAUSED HIM TO CRASH INTO HIS GARAGE. THE DEALER ADVISED THE CONSUMER TO REMOVE ALL OF THE FLOOR MATS. \*JB

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10332768  
**Date of Incident:** 19010101  
**Vehicle:** 2005 TOYOTA SIENNA  
**Location of Incident:** LONE TREE, IA

**NHTSA Summary:**  
LETTER FROM CONGRESSMAN LOEBSACK'S OFFICE ON BEHALF OF CONSTITUENT RE SUDDEN ACCELERATION OF TOYOTA SIENNA \*TGW. THE CONSUMER STATED THE VEHICLE SUDDENLY ACCELERATED WHILE TRAVELING WITH HER HUSBAND AND TWO CHILDREN. THE BRAKES DID NOT STOP THE VEHICLE, NOR DID SHIFTING THE GEAR INTO NEUTRAL, PARK OR REVERSE. THE RPM NEEDLE WENT ALL THE WAY TO THE RIGHT AND THERE WAS A LOUD ROAR COMING FROM THE ENGINE. THE CONSUMER PULLED THE KEY FROM IGNITION AT ABOUT 75 MPH IN THE MIDDLE OF RUSH HOUR TRAFFIC. THE CONSUMER STATED THE SUDDEN ACCELERATION OCCURRED TWICE BEFORE. TOYOTA CLAIMED THE FLOOR MATS WERE THE CAUSE, HOWEVER THE CONSUMER'S HUSBAND CHECKED THE FLOOR MATS AND THEY WERE NOT THE PROBLEM. \*JB

**Additional Summary:**

**Date of Incident:** 19010101  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** WOODINVILLE, WA

**NHTSA Summary:**  
2007 TOYOTA CAMRY WITH UNINTENDED ACCELERATION. THE CONSUMER STATED HIS WIFE WAS DRIVING THE VEHICLE. SHE GENTLY APPLIED PRESSURE TO THE ACCELERATOR AND IT INEXPLICABLY WENT TO THE FLOOR. SHE FRANTICALLY TRIED TO PULL THE ACCELERATOR UP FROM THE FLOOR WITH HER FOOT, BUT WAS UNSUCCESSFUL. THE VEHICLE WAS PICKING UP SPEED AND RACING UNCONTROLLABLY DOWN THE FREEWAY. SHE ATTEMPTED TO SLOW IT DOWN BY PRESSING FIRMLY ON THE BRAKES, BUT TO NO AVAIL. LUCKILY, SHE THREW THE GEAR INTO NEUTRAL AND PULLED OFF TO THE SIDE OF THE FREEWAY. THE CONSUMER STATED THE FLOOR MATS WERE ANCHORED IN PLACE WITH FACTORY CLIPS AND INSTALLED CORRECTLY AT THE TIME HE TOOK POSSESSION OF THE VEHICLE. THE CONSUMERS WIFE ENTERED THE VEHICLE AND THEN PROCEEDED TO DRIVE, WHEN A SHORT WHILE LATER, THE ACCELERATOR SLAMMED TO THE FLOOR. AGAIN, THE VEHICLE BEGAN TO ACCELERATE DOWN THE FREEWAY. SHE THREW THE GEAR INTO NEUTRAL AGAIN AND BRAKED AND PULLED OVER TO THE SIDE OF THE FREEWAY. THE CONSUMER HAS SINCE SOLD THE VEHICLE. \*JB

**Date of Incident:** 19870615  
**Vehicle:** 1987 TOYOTA COROLLA  
**Location of Incident:** SEBRING, FL

**NHTSA Summary:**  
I AM NOT LOOKING FOR DAMAGES AND HAD NEVER OFFICIALLY REPORTED THIS, BUT ABOUT 23 YEARS AGO I BOUGHT A NEW TOYOTA COROLLA THAT SUDDENLY ACCELERATED UP TO 90-100 MPH LIKE RESENT COMPLAINTS ABOUT TOYOTA VEHICLES ARE DOING IN SPIE OF STANDING ON THE BRAKE, TRYING TO GET THE CAR INTO NEUTRAL AND PUTTING MY TOE UNDERNEATH THE GAS PEDAL TO SEE IF IT WAS STUCK I WAS IN DANGER OF RUNNING UNDER THE REAR OF A SEMI. MY 15 YEAR OLD SON REACHED OVER AND TURNED OFF THE ENGINE. I HAD ENOUGH MOMENTUM GOING TO GET OFF THE ROAD. RECENTLY DIVORCED, I WAS SCARED TO DRIVE THE CAR AGAIN AND RETURNED IT TO THE DEALER WHO INSISTED NOTHING WAS WRONG WITH THE CAR! I TRADED IT IN AND TOOK A BIG MONETARY LOSS BECAUSE THE CAR WAS NEW. I WAS ABSOLUTELY TERRIFIED AT THE TIME. NOW I AM WONDERING IF TOYOTA HAS BEEN COVERING UP THESE INCIDENTS A VERY LONG TIME AND IF ANYONE ELSE EXPERIENCED THIS PROBLEM AS LONG AGO AS I DID AND WHETHER OR NOT THE INCIDENTS WERE REPORTED. I DO NOT BELIEVE TOYOTA INCIDENTS ARE NEW, NOR DO I BELIEVE IT IS A GAS PEDAL PROBLEM. IT HAS TO BE A COMPUTER ELECTRICAL THING. AFTER OVER 20 YEARS OF NOT BUYING TOYOTA, JUST THIS THANKSGIVING BOUGHT A NEW TOYOTA HIGHLANDER AND NOW ALL THIS!!! GOT THAT ONE FIXED YESTERDAY, HOPEFULLY, BUT I STILL FEAR AN ELECTRICAL/COMPUTER PROBLEM.

**Date of Incident:** 19920303  
**Vehicle:** 1992 TOYOTA 4RUNNER  
**Location of Incident:** LAUREL, MD

**NHTSA Summary:**  
A 1992 TOYOTA 4-RUNNER WAS PURCHASED AND WE ONLY HAD IT FOR TWO WEEKS. THE TRUCK WAS DRIVEN TO WEST VIRGINIA. THE NEXT DAY THE TRUCK SUDDENLY ACCELERATED AT A HIGH SPEED AND WHEN THE BRAKES WERE APPLIED IT WOULD NOT STOP. IT CRASHED AND FLIPPED OVER. MY HUSBAND DIED IN THAT TRUCK. THERE WAS A LAW SUITE BUT IT NEVER WENT TO COURT AFTER FIVE YEARS. MY LAWYERS GAVE UP. TOYOTA NEVER SETTLED WITH ME AND ONLY SAID IT WAS DRIVER ERROR. THE ENGINEER WHO WAS ON THE CASE SAID THERE WAS A DESIGN DEFECT BUT THEY COULD NOT PROVE IT. SEE ALSO ODI 10121117 \*DSY \*TR. MY HUSBAND, STANLEY W. SIRNIK BOUGHT A 1992 TOYOTA 4-RUNNER. HE ONLY HAD IT FOR TWO WEEKS WHEN HE DECIDED TO TRAVEL TO WEST VIRGINIA. STANLEY, MY BROTHER-IN-LAW AND MY YOUNG SON WAS COMING BACK FROM SHOPPING THE NEXT DAY. STANLEY PUT THE TRUCK INTO CRUISE CONTROL AT 40 MPH. HE WAS TRAVELING ALONG AT 40 MPH WHEN ALL OF SUDDEN THE TRUCK STARTED TO ACCELERATE UP TO A VERY HIGH SPEED. HE

C-75

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TRIED TO TAKE IT OUT OF CRUISE CONTROL. BUT HE COULD NOT. HE APPLIED THE BRAKES, BUT THE BRAKES WOULD NOT WORK. TO KEEP FROM GOING OVER A CLIFF, HE RAN UP AN EMBANKMENT AND THE TRUCK FLIPPED OVER. STANLEY WAS KILLED INSTANTLY. HIS BROTHER WAS BADLY INJURED AND MY SON WAS IN THE BACK SEAT IN SHOCK. I RETAINED TWO LAW FIRMS. THE ENGINEERS SAID THE CRUISE CONTROL CAUSED THE ACCIDENT BECAUSE OF A DEFECT IN THE DESIGN. RIGHT BEFORE IT WAS TIME TO GO TO COURT IN JANUARY OF 1996, MY BIG LAWYERS ASKED THE COURT TO WITHDRAW FROM THE CASE. THE COURT GRANTED THEIR WISH. I NEVER KNEW WHAT WAS GOING ON WITH MY CASE AND WHY MY LAWYERS WANTED TO WITHDRAW AFTER KEEPING AND WORKING ON THE CASE FOR FOUR YEARS. THE LAWSUITE WAS FILED IN THE STATE OF MARYLAND. IT WAS ALL SET TO GO TO COURT WITH A JURY TRIAL. THIS ACCIDENT HAPPENED MARCH 2, 1992. THE LAW FIRMS WERE MCCARTHY, BACON, COSTELLO, WASHINGTON BUSINESS PARK, SUITE 300, 4640 FORBES BOULEVARD, LANHAM, MD 20706 AND SCOTT W. ROONEY, ESQUIRE, CHARFOOS & CHRISTENSEN, P.C. DETROIT, MICHIGAN 48202.

**Date of Incident:** 19930505  
**Vehicle:** 1987 TOYOTA CRESSIDA  
**Location of Incident:** NEW ORLEANS, LA

**NHTSA Summary:**  
RAPID & UNCONTROLLABLE ACCELERATION IN TOYOTA MODELS TOYOTA CRESSIDA MODEL SHOULD BE ADDED TO RECALL LIST. HERE IS MY EXPERIENCE. HAVING JUST FINISHED PULLING INTO A PARKING SPOT, I ATTEMPTED TO SHIFT THE CAR INTO PARK, BUT INSTEAD, THE CAR RAPIDLY ACCELERATED TO TOP SPEED. THE CAR WAS BLOCKED FROM MOVEMENT BY THREE OBJECTS. THESE WERE IN ORDER OF CONTACT: A TALL CURB, A LANDSCAPED MEDIUM ABOUT 4 FEET DEEP, WITH A SMALL TREE AND FINALLY, ACROSS THE MEDIUM (ON THE OPPOSITE SIDE OF MY PARKING SPOT, FACING MY FRONT) A PARKED VOLVO SEDAN. IT WAS AN OLDER MODEL, WHICH HAD A LARGE AND PROTECTIVE FRONT METAL GRILL (PROBABLY A 1970S MODEL). MY CAR'S WHEELS WERE MADLY SPINNING IN PLACE, BURNING RUBBER ON THE CONCRETE. THE FRONT WHEELS JUMPED THE TALL CURB AND PUSHED DOWN ONE OF THE PARTS OF THE TREE, THEN WAS STOPPED IN PLACE BY THE HEAVY GULL OF THE VOLVO SEDAN. I EXITED THE CAR BEFORE IT JUMPED THE CURB, THEN GOT BACK IN WHEN IT WAS BLOCKED BY THE VOLVO, AND TURNED OFF THE IGNITION. AT THAT POINT THE CAR STOPPED AND THE WHEELS STOPPED SPINNING. IT WAS AN EXCEEDINGLY DANGEROUS SITUATION, AND FURTHER DAMAGE WAS CONTAINED ONLY BECAUSE OF THE OBJECT IN FRONT OF THE CAR. NO ONE WAS INJURED, AND THE ONLY DAMAGE WAS TO THE CAR FRONT AND THE LANDSCAPING. I SOLD THE CAR, SOON AFTER, BUT DID TELL THE BUYER ABOUT

C-76

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THE INCIDENT. THIS WAS A TOYOTA CRESSIDA, APPROXIMATELY A 1987 YEAR MODEL. CRESSIDA MODELS WERE DISCONTINUED, BUT THEY ARE STILL BEING DRIVEN TODAY, AND SHOULD BE ON THE RECALL LIST!!! IT IS MY OPINION THAT THE RAPID ACCELERATION PROBLEM GOES BACK MUCH FURTHER THAN IS BEING CURRENTLY INVESTIGATED BY THE SENATE

**Additional Summary:**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** CHICO, CA

**NHTSA Summary:**  
I WAS DRIVING A 92 TOYOTA TERCEL. I WAS GOING UP A STEEP HILL ON I-5 IN OREGON. ALL OF A SUDDEN THE GAS PEDAL LOST PRESSURE AND FELL TO THE FLOOR WITH THE ENGINE AT FULL ACCELERATION. LUCKILY I WAS GOING UP A HILL. I REACHED DOWN AND WIGGLED THE GAS PEDAL AND IT WAS TOTALLY LOOSE AND JUST DROPPED TO THE FLOOR. AS I CAME TO THE NEXT EXIT I PULLED OFF, PUT THE CAR IN NEUTRAL AND TURNED OFF THE KEY. I STARTED IT BACK UP AND THE PRESSURE CAME BACK TO THE GAS PEDAL. IT SEEMED TO DRIVE FINE AFTER THAT EXCEPT IT MADE A DEEPER MUFFLED NOISE WHEN ACCELERATING. I BROUGHT IT IN TO A MECHANIC AND THEY COULDN'T FIND ANYTHING WRONG. THEY LUBED THE ACCELERATOR AND THE NOISE WENT AWAY AND THERE WERE NO MORE PROBLEMS.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10323844  
**Date of Incident:** 19960615  
**Vehicle:** 1989 TOYOTA CAMRY  
**Location of Incident:** WALLACE, CA

**NHTSA Summary:**  
I HAVE A FRIEND THAT IS A LADY THAT HAD A 1989 TOYOTA CAMRY THAT WOULD REFUSE TO USE THE CRUISE CONTROL BECAUSE THE GAS PEDAL WOULD GET STUCK. I TRIED IT AND SURE ENOUGH IT DID GET STUCK WHEN YOU HAD THE CRUISE CONTROL ON AND YOU ACCELERATED. APPLYING THE BRAKES DID NOT UNSTICK THE PEDAL. I OPENED UP THE HOOD AND THE CHAIN FOR THE CRUISE CONTROL THAT PULLED ON THE THROTTLE WOULD GET STUCK ON THE THROTTLE BODY. I DISCONNECTED IT AND AFTER THAT THERE NO MORE PROBLEMS BUT NO CRUISE CONTROL. SHE CAN BE REACHED BY DIALING 209-951-7423 AND ASKING FOR TONI.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10293660  
**Date of Incident:** 19960629  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** HOUSTON, TX

**NHTSA Summary:**  
TOYOTA'S LATEST RECALL SHOULD NOT BE A FLOOR MAT OR STUCK ACCELERATOR PROBLEM. MY 2007 CAMRY HAS EXPERIENCED THIS SCENARIO AT LEAST SEVERAL TIMES A YEAR (EVEN THOUGH I KNOW IT EXISTS). THE PROBLEM IS THE DESIGN OF THE BRAKE PEDAL AND ACCELERATOR PEDAL. THE BRAKE PEDAL (WHEN BRAKING) IS CLOSER TO THE FLOOR THAN THE HEIGHT OF THE UN-DEPRESSED ACCELERATOR PEDAL. IF THE DRIVER HAS BIG FEET OR IS NOT PRECISE WHEN PLACING THE FOOT, IT IS POSSIBLE TO DEPRESS BOTH PEDALS AT THE SAME TIME. THE HARDER ONE TRIES TO STOP, THE FASTER THE ENGINE WANTS TO RUN. IN MY VEHICLES FROM THE PAST, THE ACCELERATOR PEDAL, WHEN NOT DEPRESSED, WAS CLOSER TO THE FLOOR THAN THE POSITION OF THE BRAKE PEDAL DURING A VERY HARD (EMERGENCY) BRAKING ACTION. TOYOTA'S FIRMWARE FIX OF NOT ALLOWING THE ACCELERATOR SIGNAL TO OVERRIDE THE BRAKING SIGNAL IS NOT A GOOD FIX FOR THE PROBLEM. SOMETIMES IT IS DESIRABLE TO INCREASE THE SPEED OF THE ENGINE BEFORE RELEASING THE BRAKE TO PREVENT ROLLING BACKWARDS WHEN STARTING ON A GRADE. PAYING ATTENTION TO THE ERGONOMICS OF HOW THE PEDALS AND THE HUMAN DRIVER INTERFACE AND PROPER ENGINEERING DESIGN IS THE SOLUTION. \*TR

**NHTSA ODI Number:** 10310661  
**Date of Incident:** 19970501  
**Vehicle:** 1989 TOYOTA SUPRA  
**Location of Incident:** CARMEL, IN

**NHTSA Summary:**  
I OWNED A 1989 TOYOTA SUPRA TURBO FROM 1989 TO 1999. IN THE MID- TO LATE-1990'S I EXPERIENCED ONE INSTANCE IN WHICH MY GAS PEDAL GOT PINNED TO THE FLOOR BY AN AFTERMARKET FLOOR MAT THAT HAD SHIFTED OUT OF POSITION. THIS OCCURRED AT A LARGE INTERSECTION ON THE FAR NORTH SIDE OF INDIANAPOLIS, AS I WAS APPROACHING A LEFT-TURN ARROW. WHEN I TOOK MY FOOT OFF THE ACCELERATOR TO MAKE THE TURN, THE VEHICLE CONTINUED TO ACCELERATE FULL-THROTTLE. I QUICKLY DETERMINED THAT I WAS NOT GOING TO BE ABLE TO MAKE THE LEFT TURN SAFELY, SO I VEERED TO THE RIGHT AND WENT STRAIGHT THROUGH THE INTERSECTION. THEN I TURNED THE KEY OFF AND COASTED INTO A PARKING LOT, VERY FRIGHTENED BY WHAT HAD JUST HAPPENED. I GOT OUT OF THE VEHICLE AND LOOKED DOWN, AND IMMEDIATELY SAW THAT THE FLOOR MAT HAD SHIFTED FORWARD AND SNAGGED THE BOTTOM OF THE GAS PEDAL WHEN I PRESSED IT DOWN TO ACCELERATE. THROUGH SHEER LUCK THERE WERE NO OTHER CARS IN THE INTERSECTION AT THE TIME, AND MY QUICK REACTION AVOIDED ANY ACCIDENT. I THREW THE FLOOR MATS AWAY, AND MADE SURE TO REPLACE THEM WITH ONES THAT WERE FASTENED DOWN. I NEVER EXPERIENCED THE PROBLEM AGAIN. \*TR  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10323919  
**Date of Incident:** 19970713  
**Vehicle:** 2003 TOYOTA RAV4  
**Location of Incident:** NEW YORK, NY

**NHTSA Summary:**  
ON OCT. 5, 2002, I BOUGHT A BRAND NEW 2003 TOYOTA RAV4 FROM STAR TOYOTA OF BAYSIDE INC. AS OF THIS WRITING, THE AUTOMOBILES MILEAGE IS ONLY 15, 782 MILES. ON JULY 13, 2009 (8 1/2 MONTHS AGO), I HAD TAKEN MY 2003 TOYOTA RAV4 FOR SERVICE IN REGARDS TO THE LIGHTING ON THE INSTRUMENT PANEL CHECK ENGINE. ADDITIONALLY, I STATED THAT PRIOR TO THE ENGINE LIGHT TURNING ON, I HAD NOTICED THAT THE CAR WOULD STALL AS I HIT THE GAS PEDAL AFTER A RED LIGHT, AND THAT IT WOULD SURGE WITH FORCE ONCE IT ACCELERATED; IT FELT LIKE A REAR-ENDED COLLISION. THE VEHICLE ONLY HAD 12,894 MILES WHEN THE SUV WAS TAKEN IN FOR A DIAGNOSTIC TEST. I WAS CHARGED \$664.87 FOR A SENSOR AND A V-RIPPED BELT. LAST WEEK, ON MAR. 24, 2010 AT 15,757 MILES, THE SERVICE ENGINE LIGHT CAME BACK ON. THIS PROBLEM RECURRED FOR THE 2ND TIME IN JUST 8 1/2 MONTHS OF PRIOR WORK RENDERED, AND AFTER ONLY 2,863 MILES. WHILE RESEARCHING THE INTERNET IN REGARDS TO CHECK ENGINE LIGHT ON 2003 TOYOTA RAV4, I STUMBLED UPON HUNDREDS OF CONSUMERS COMPLAINTS FOR THE EXACT PROBLEMS. I HAVE BEEN HAVING TROUBLE WITH HARSH SYMPTOMS BEFORE THE ENGINE LIGHT AND, UNSAFE AND HARSH DRIVING CONDITIONS. AS I CONTINUED MY RESEARCH EFFORTS, I IMMEDIATELY LINKED INTO A FEW TOYOTA TSBS CONCERNING A DEFECTED ECM/PCM REPLACEMENT PROCEDURE TO THE FAILING COMPONENTS AS TRANSMISSION CONTROL MODULE & POWER TRAIN CONTROL MODULE W/THE DIAGNOSTIC TROUBLE CODES. I HAVE SERVICED THE VEHICLE THROUGHOUT THE YEARS, AND NEVER INFORMED OF ANY OF THE NUMEROUS TOYOTA TSBS. IT'S DISHONEST, AND LACKS INTEGRITY NOT TO FORMALLY INFORM THE LOYAL CONSUMERS OF THE DEFECTION AND THE SAFETY ISSUES & TRANSMISSION FAILURE. IN WRITTEN FORMAT, I AM JUSTIFIABLY AND LEGITIMATELY REQUESTING PROPER AND HONEST RAMIFICATION TO THIS

C-81

**Safety Research & Strategies**

**Vehicle:** 1997 TOYOTA CAMRY  
**Location of Incident:** PROVIDENCE, RI

**NHTSA Summary:**  
WHILE SITTING IN THE PASSENGER SEAT OF A MOVING 1996 OR 1997 TOYOTA CAMRY THE DRIVER TURNED TO ME AND ASKED HOW I LIKED HIS MOM'S NEW CAR. I SAID I LIKED IT. AT THAT MOMENT THE VEHICLE BEGAN ACCELERATING EASTWARD ON RT. 105 IN HOPE, MAINE. THINKING MY FRIEND (THE OPERATOR OF THE VEHICLE) WAS IN CONTROL I FAILED TO PULL THE E-BRAKE SITUATED TO MY LEFT. THE DRIVER THEN LOOKED AT ME IN FEAR AS THE CAR CONTINUED ACCELERATING. DRIVER THEN JAMMED ON THE BRAKES, THE VEHICLE SWERVED TO THE RIGHT AND EXITED THE PAVED ROAD TRAVELLING EXTREMELY FAST (ABOUT 150 MPH'S). IMMEDIATELY BEFORE SLAMMING HEAD-ON INTO THE TREES LINING ME RT. 105 THE VEHICLE LAUNCHED INTO THE AIR FLIPPING END OVER END 2 FULL ROTATIONS BEFORE HALTING ON ITS BASE. DRIVER'S MOM'S 1996, OR 1997 TOYOTA CAMRY WAS COMPLETELY TOTALLED DURING THIS ACCIDENT. POLICE AND RESCUE EVENTUALLY ARRIVED AND REMOVED US FROM THE VEHICLE AFTER A PASSERBY PHONED FOR HELP.

**Vehicle:** 1998 TOYOTA SIENNA  
**Location of Incident:** WEST PALM BEACH, FL  
**NHTSA Summary:**  
WHAT HAPPENED TO THE PRIUS IN CALIFORNIA THE SAME DID HAPPEN TO US BACK IN 1999 WITH OUR TOYOTA SIENNA VAN. MY WIFE WAS DRIVING ON I-5 IN OREGON. SHE PRESSED THE GAS PEDAL TO OVERTAKE A CAR AND THEN WHEN SHE PRESSED THE BRAKE TO SLOW DOWN THE BRAKES DIDN'T WORK. SHE DROVE INTO THE HWY MEDIAN FENCE TO STOP THE CAR. WHEN WE CONTACTED TOYOTA, THEY DIDN'T ADMIT ANY FAULT WITH THEIR CAR (THE SAME WHAT THEY ARE DOING NOW) AND TOLD US IT WAS OUR FAULT THAT WE DO NOT KNOW HOW TO USE THEIR BRAKES. WE HAVE SEVERAL CARS BUT WE DIDN'T HAVE A PROBLEM WITH OTHER CARS. I DIDN'T BUY A TOYOTA AFTER THAT CRASH BUT I AM ALSO WORRIED WHO ELSE THE PART SUPPLIER HAS BEEN SUPPLYING PARTS TO. I CAN BE REACHED AT OREGONVC@HOTMAIL.COM.

**Date of Incident:** 19990727  
**Vehicle:** 1999 TOYOTA 4RUNNER  
**Location of Incident:** SALINE, MI  
**NHTSA Summary:**  
AT THE TIME OF THE ACCIDENT, I WAS DRIVING 70MPH ON A MAJOR HIGHWAY ATTEMPTING TO SWITCH LANES WHEN THE CAR LOST COMPLETE CONTROL. THE CAR SWERVED SEVERELY LEFT AND THERE WAS NO FUNCTIONING OF THE BRAKES OR STEERING. I WAS THEN HIT DRIVER SIDE BY A SEMI-TRACTOR TRAILOR WHO KNOCKED ME INTO A CONCRETE WALL. THE CAR WAS DEMOLISHED. THE MECHANICAL EXPERT REPORT SHOWED THAT THE THROTTLE WAS OPEN AND IT APPEARED THAT THE CRUISE CONTROL HAD CAUSED THE CAR TO ACCELERATE ALTHOUGH THE CRUISE CONTROL WAS NOT TURNED ON AT THE TIME. MY CONCERNS RELATE TO THE INABILITY TO STEER THE CAR OR INITIATE THE BRAKES IF IT WAS IN FACT A TIRE BLOW-OUT AND ALSO I AM CONCERNED AT TO WHY THE THROTTLE WAS OPEN WHEN THE CRUISE CONTROL WAS NOT ON. IMMEDIATELY PRIOR TO THE ACCIDENT, I FELT AS THOUGH THE CAR WAS ACCELERATING INDEPENDENTLY OF MY UTILIZING THE GAS PEDAL. IN CONCLUSION, I AM NOT CERTAIN AS TO WHAT CAUSED THE CAR TO GO OUT OF CONTROL, HOWEVER, IF IT WAS A TIRE BLOW-OUT, I THINK THAT IT WAS UNBELIEVABLY UNSAFE TO NOT BE (DOT NUMBER: )

**NHTSA Summary:**  
DURING A VERY HEAVY RAIN, I WAS DRIVING THE VEHICLE UP A MODERATELY STEEP HILL AT 40MPH. WITH A CONSTANT PRESSURE TO THE ACCELERATOR, THE VEHICLE SUDDENLY BEGAN LOSING POWER AND SLIGHTLY DECELERATED. I INCREASED THE FOOT PRESSURE ON THE ACCELERATOR. THE ENGINE THEN 'WOUND UP' AND A HIGH PITCHED, CONSTANT WHINE CAME FROM IT. AT THE CREST OF THE HILL, THE RPM'S DROPPED, THE WHINE CEASED, AND THE VEHICLE RESUMED ITS NORMAL ACCELERATION. IMMEDIATELY AFTER THAT, I HEARD A RATTLING NOISE FROM THE UNDERCARRIAGE AROUND THE FRONT DRIVER SEAT AREA. IT SOUNDED LIKE METAL BANGING ON METAL. IT STOPPED AFTER A FEW SECONDS. EARLIER IN THE EVENING, MY WIFE HAD DRIVEN THE VEHICLE IN THE SAME HEAVY RAIN AND NOTED THE SAME PROBLEMS WHILE DRIVING ON THE INTERSTATE AT APPROXIMATELY 50 MPH ON A LEVEL ROADWAY. THE VEHICLE WAS CHECKED BY THE DEALER ON 2/14, BUT THEY WERE UNABLE TO DUPLICATE THE ENGINE PROBLEM, NOR SAW ANY LOOSE COMPONENTS ON THE UNDERCARRIAGE. \*AK

**Date of Incident:** 20000315  
**Vehicle:** 1998 TOYOTA COROLLA  
**Location of Incident:** TYLER, TX

**NHTSA Summary:**  
JUST MINUTES AFTER DRIVING IN HEAVY DALLAS TRAFFIC, STOPPED AT A GROCERY STORE AND WAS PULLING INTO AN ANGLED PARKING SPACE WITH MY FOOT ON THE BRAKE AND ALMOST STOPPED, WHEN CAR SURGED FORWARD (REPEAT-WITH MY FOOT ON BRAKE). THE BRAKE PEDAL WENT COMPLETELY TO THE FLOOR AND WOULD NOT STOP VEHICLE. I HIT THE VEHICLE PARKED IN FRONT OF ME; VERY LITTLE DAMAGE AS MY CAR WAS ALMOST STOPPED WHEN IT SURGED FORWARD AND BRAKE FAILED. THIS WAS THE SECOND TIME THIS HAD HAPPENED. THE FIRST TIME WAS ONLY A COUPLE OF MONTHS AFTER I BOUGHT THE CAR NEW. THE SAME THING HAPPENED AS I WAS PULLING INTO MY CAR PORT. THE BRAKE WENT TO THE FLOOR AND CAR SURGED FORWARD. THAT TIME I COULDN'T BELIEVE WHAT HAD HAPPENED AND JUST THOUGHT MY FOOT MUST HAVE SLIPPED. THIS TIME, I HAD TWO OTHER PEOPLE IN THE CAR AND WE ALL WITNESSED THE SURGE AND THE BRAKE PEDAL ON THE FLOOR OF THE CAR (USELESS). AS SOON AS THE VEHICLE HAS STOPPED (BY HITTING SOMETHING EACH TIME), THE BRAKE GOES BACK TO ITS USUAL POSITION. I TOOK THE CAR TO CLASSIC TOYOTA HERE IN TYLER THE NEXT DAY WHEN I DROVE BACK HERE. THEY SAID THEY INSPECTED IT AND COULD FIND NOTHING WRONG. I WAS VERY UPSET AND IT WAS ANNOTATED ON THE JOB TICKET. I CONTACTED MY INSURANCE COMPANY AND TOLD THEM WHAT HAD HAPPENED AND LEFT MY NAME AND PHONE NUMBER WITH THE DRIVER OF THE CAR I HIT IN THE GROCERY STORE LOT. IF THIS HAD HAPPENED JUST MINUTES BEFORE AS I STOPPED FOR THE NUMEROUS RED LIGHTS IN DALLAS, MY CAR WOULD HAVE BEEN PROPELLED OUT INTO THE INTERSECTION AND WOULD HAVE BEEN HIT. AS FAR AS I AM CONCERNED, THIS IS A VERY DANGEROUS PROBLEM, AND THE CAR IS A POTENTIAL DEATH TRAP FOR ME AND MY PASSENGERS OR THE VEHICLE I MIGHT HIT BECAUSE OF THE BRAKE FAILURE AND SURGE PROBLEM. THERE WAS A TWO-YEAR LAPSE BETWEEN THE TWO INCIDENTS, WHICH IS WHY THE DEALER COULDN'T TEST DRIVE THE VEHICLE AND FIND THE PROBLEM. THEY SUGGESTED MY FOOT HAD SLIPPED OFF THE BRAKE AND HIT THE ACCELERATOR. THIS ABSOLUTELY WAS NOT WHAT HAPPENED. \*AK

IN SUMMER OF 2000, I HAD AN ACCIDENT IN A 99 TOYOTA SIENNA AND MY ACCELERATOR STUCK CAUSING ME TO HAVE TO PUT THE CAR IN REVERSE TO STOP FORWARD MOTION AFTER IMPACT. I REPORTED THE STUCK ACCELERATOR TO DEALER.

C-97

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AND STATE FARM.MY CAR WAS TOTALED. THE ACCIDENT OCCURRED AT AN INTERSECTION AND ANOTHER DRIVER HIT ME FROM THE RIGHT - HE RAN A RED LIGHT AND WAS CITED AS AT FAULT, BUT AFTER THE IMPACT, MY CAR CONTINUED TO GO FORWARD AND ALTHOUGH I HAD MY FOOT ON MY BRAKE ALL THE WAY TO THE FLOOR THE CAR WOULD NOT STOP. I HAD MY TWO YOUNG CHILDREN IN THE CAR WHO WERE SCREAMING IN FEAR AND PAIN, AND THERE WERE TWO ROWS OF CARS IN EVERY DIRECTION STOPPED AT THE INTERSECTION. I LOOKED AT A CONCRETE PILLAR IN A PARKING LOT AND THOUGHT ABOUT RUNNING MY CAR INTO IT TO STOP. INSTEAD, I REACHED FOR THE GEARS AND TRIED TO SHIFT TO PARK. IT WENT INTO REVERSE, AND BY SOME TRUE MIRACLE, I WAS ABLE TO MISS ALL THE SITTING TRAFFIC AND STER INTO A CHAIN LINK FENCE. BY YET ANOTHER MIRACLE, THERE WAS ONLY ONE SPOT ON THE FENCE THAT WAS NOT TREE LINED. I BACKED BETWEEN TWO TREES INTO THE FENCE AND THAT STOPPED MY CAR, WHICH I LEFT RUNNING AS I GOT MY TWO CHILDREN OUT. A BYSTANDER WAS ABLE TO REACH IN AND REMOVE THE KEYS AND STOP THE CAR. THE FENCE BELONGED TO A CATHOLIC CHURCH WHICH LATER SENT A BILL TO MY INSURANCE COMPANY FOR THE DAMAGE. THIS OCCURRED IN MEMPHIS, TN, AND I HAVE ALWAYS BEEN SURE THAT THE ACCELERATOR WAS STUCK IN THAT INCIDENT. I WAS TOLD TO REPORT IT TO THE NHTSA, BUT FRANKLY, THOUGHT THAT SOUNDED LIKE REDTAPE. I DON'T THINK THE TOYOTA PROBLEM IS MECHANICAL OR RECENT, BUT A MASSIVE, LONG-STANDING COMPUTER-BASED ISSUE COVER-UP AND TOYOTA DRIVERS SHOULD BE COMPENSATED BY COMPANY.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10302578  
**Date of Incident:** 20000701  
**Vehicle:** 2000 TOYOTA CAMRY  
**Location of Incident:** CHAPEL HILL, NC

**NHTSA Summary:**  
WE BOUGHT OUR CAMRY 2000 10 YRS AGO WHEN IT WAS BRAND NEW. AFTER 2-3 YEARS, WE STARTED TO EXPERIENCE THE GAS PEDAL STICKING ONCE EVERY FEW MONTHS, SOMETHING LIKE SUDDENLY LOST THE POWER WHEN DRIVING ON THE HIGH WAY. SINCE LAST YEAR, THE GAS PEDAL STARTED TO GET MUCH WORSE AND STICKS ALMOST EVERY TIME WE STOP/RESTART THE CAR BEFORE TRAFFIC LIGHT AND DURING HEAVY TRAFFIC. NOW MY WIFE AND I ARE VERY AFRAID TO DRIVE THIS CAR AND BELIEVE IT WILL CAUSE HUGE PROBLEM SOONER OR LATER. I JUST READ THE NEWS ABOUT TOYOTA'S RECALL FOR THE SAME ISSUE, AND NOW I BELIEVE IT IS DUE TO THE VEHICLE DESIGN WHICH HAS CAUSED THIS SAFETY ISSUE. I JUST CALLED THE LOCAL DEALER AND THEY TOLD ME ONLY CAMRY 2007 TO 2010 MODELS WERE COVERED. BUT I BELIEVE OUR CAR HAS EXACT SAME PROBLEM AS THE LATER MODEL, AND I WOULD REQUEST YOUR ADMINISTRATION TO ADVISE TOYOTA TO ISSUE THE RECALL CERTIFICATE FOR PREVIOUS MODELS ALSO BEFORE ANY UNFORTUNATE ACCIDENT HAPPENS DUE TO ITS FAULTY DESIGN. \*CN

**Location of Incident:** MANCHESTER, WA  
**NHTSA Summary:**  
MY FOLKS HAPPEN TO OWN A 2000 TOYOTA TACAMA PICKUP, 4-CYL WITH/AUTO TRANSMISSION SINCE IT WAS NEW. WHEN THE AIR CONDITIONER IS IN USE AND THE DRIVER APPLIES THE BRAKE, THE VEHICLE WILL LURCH FORWARD. ALSO, THE VEHICLE WILL LURCH FORWARD WHEN THE FAN IS TURNED-ON, WITH THE AIR-CONDITIONER SWITCH ALREADY ON WHICH ACTIVATES THE AIR-CONDITIONER IMMEDIATELY. I ASSUME THIS CONDITIONS EXITS TO COMPENSATE FOR THE AIR CONDITIONER LOAD ON THE ENGINE. HOWEVER, I'VE DRIVEN MANY OTHER VEHICLES THAT FUNCTION JUST FINE WHEN THE AIR CONDITIONER IS ACTIVATED WITHOUT HAVING TO LURCH THE VEHICLE FORWARD, ESPECIALLY WHEN THE BRAKE IS APPLIED. THE PROBLEM HAS SEVERAL TIMES NEARLY CAUSED AN ACCIDENT WITH PEDESTRIANS AND OTHER VEHICLES - NEAR MISSES. MY FOLKS HAVE TAKEN THE VEHICLE TO THE TOYOTA DEALER SEVERAL TIMES AND THE DEALER KEEPS CLAIMING THAT THE VEHICLE IS FUNCTIONING AS DESIGNED. SO IT APPEARS THAT TOYOTA HAS ACKNOWLEDGED THAT

C-107

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THEY PURPOSEDLY DESIGNED A VEHICLE THAT WILL LURCH FORWARD WHEN THE BRAKE IS APPLIED AND THE AIR CONDITIONER IS ON. I HAD TO CHECK THIS OUT FOR MYSELF BECAUSE IT SEEMED TOO RIDICULOUS TO BE BELIEVED AND I WAS SURPRISED WHEN IT HAPPEN TO ME. IT TAKES AN ABRNML AMOUNT OF PRESSURE ON THE BRAKE PEDAL TO KEEP THE VEHICLE STILL WHEN THE AIR CONDITIONER IS ACTIVATED AND THE SLIGHTEST RELEASE CAUSES THE VEHICLE TO LURCH FORWARD. THIS HAS BEEN A GOING ON SINCE THE VEHICLE WAS NEW SO THE DATE BELOW ONLY A FORMALITY TO FILE THIS COMPLIANT. IF THERE IS ANY INTEREST IN THIS COMPLAINT THE VEHICLE IS AVAILABLE FOR REVIEW.

**Location of Incident:** APEX, NC  
**NHTSA Summary:**  
WHILE TRAVELING BETWEEN 55 AND 65 MPH A VIBRATION OCCURS IN VEHICLE UNDER NORMAL OPERATION. DEALERSHIP COULD NOT DUPLICATE PROBLEM, AND COULD NOT ASSIST CONSUMER. DURING THE WEEK OF JUNE 11TH, ACCELERATOR STUCK WHILE VEHICLE WAS IN OPERATION. DEALERSHIP AGAIN STATED THEY COULD NOT FIND ANYTHING WRONG WITH VEHICLE. \*AK CONSUMER NOTICED CRUISE CONTROL WAS NOT WORKING PROPERLY SHORTLY AFTER PURCHASE. IT WOULD CUT IN AND OUT AND JERK VEHICLE, DEALER ADJUSTED TERMINAL OF JUMPER SWITCH WIRE TO ENSURE

C-110

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

GOOD CONTACT AND ADJUSTED CABLE OF THE CRUISE CONTROL A COUPLE MONTHS LATER, NOW CONSUMER EXPERIENCES PROBLEMS WITH THE ACCELERATOR STICKING WITHOUT THE CRUISE CONTROL TURNED ON, CRUISE IS STILL EXPERIENCING PROBLEMS WHILE ON. RPMs ARE RUNNING HIGH WHILE AT STOPS, AND ACCELERATOR IS STICKING. WHILE APPLYING BRAKES WHEN THEY ARE HEATED UP, THEY GET HARD AND CAUSE VEHICLE TO VIBRATE. \*SLC

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Date of Incident:** 20010817  
**Vehicle:** 1997 TOYOTA COROLLA  
**Location of Incident:** ST. LOUIS, MO

**NHTSA Summary:**  
IN MY 1997 TOYOTA COROLLA, I WAS AT A STOPLIGHT WAITING FOR THE LIGHT TO TURN GREEN, WHEN IT TURNED GREEN, I TOOK MY FOOT OFF THE BRAKE AND ALL OF SUDDEN THE ACCELERATOR PEDAL AUTOMATICALLY TOOK OFF ON ITS OWN. I DIDNT KNOW WHAT WAS HAPPENING IT HAPPENED SO QUICKLY THAT THE ONLY THING THAT I COULD DO WAS TRY TO STEER AWAY FROM TRAFFIC AND ONTO THE SHOULDER. THE ONLY SAFE PLACE TO GO WAS OVER THE SIDEWALK AND HITTING THE SIDE OF A CHURCH BUILDING ENDING UP IN A DITCH WHEN IT FINALLY STOPPED. I REPORTED THE INCIDENT TO THE POLICE AT THE TIME OF THE ACCIDENT AND MY INSURANCE COMPANY TOTTLED MY CAR. IT IS ONLY BY THE GRACE OF GOD, THAT MY HUSBAND AND I WERE NOT SERIOUSLY INJURED. IT NEEDS TO BE KNOWN, THAT THIS ACCELERATOR PROBLEM WITH TOYOTA HAS BEEN GOING ON AT LEAST SINCE 1997. SINCE THEN, I HAVE ENCOUNTERED OTHER PEOPLE WHO HAVE HAD ACCIDENTS DUE TO THEIR TOYOTA VEHICLE RUNNING OUT OF CONTROL. SHORTLY AFTER OUR ACCIDENT IN 2001, I HEARD REPORTS ABOUT TOYOTA CARS HAVING PROBLEMS WITH THE ACCELERATOR PEDAL. I WILL NOT BE BUYING ANOTHER TOYOTA CAR EVER AGAIN. IF YOU NEED ANY ADDITIONAL INFORMATION, I WILL BE GLAD TO PROVIDE IT. THIS IS A SERIOUS PROBLEM AND THIS RECALL SHOULD BE EXTENDED TO EVERY TOYOTA VEHICLE NOT JUST THE MORE RECENT MODELS.

**Vehicle:** 2001 TOYOTA RAV4  
**Location of Incident:** ELK GROVE VILLAGE, IL

**NHTSA Summary:**  
VEHICLE EXHIBITS INTERMITTENT HESITATION UPON ACCELERATION FROM STOP OR LOW SPEED.HESITATION HAS OCCURRED SINCE SHORTLY AFTER VEHICLE PURCHASE DATE, WITH INCREASED FREQUENCY DURING LAST 60-90 DAYS. HESITATION OCCURS BOTH WITH AIR CONDITIONONG ON AND OFF, AND WITH 4-SPEED AUTOMATIC TRANSMISSION OVERDRIVE ON AND OFF. 2-3 OCCURRENCES PER WEEK ARE CURRENTLY EXPERIENCED. MOST FREQUENT WHEN VEHICLE IS MAKING SLOW TURN (BOTH RIGHT AND LEFT) AND LASTS 5-10 SECONDS EVEN IF ACCELERATOR IS NEARLY FULLY DEPRESSED. HESITATION HAS ALSO OCCURRED WHEN MOVING STRAIGHT AHEAD FROM STOP OR FROM LOW SPEED (5-10 MPH) STOP AND GO TRAFFIC. DEALER HAS BEEN NOTIFIED AND COULD NOT REPLICATE PROBLEM OR OFFER A SOLUTION, HOWEVER VEHICLE WAS DRIVEN FOR ONLY A SHORT TIME BY DEALER'S SERVICE TECHNICIANS. DEALER INDICATES NO REPORT OF SIMILAR PROBLEMS EITHER AT THIS DEALERSHIP OR TO TOYOTA USA ALTHOUGH I KNOW OF OTHER 2001 RAV4 OWNERS WHO HAVE REPORTED A HESITATION PROBLEM TO THEIR DEALERS AND HAVE NOT HAD THE PROBLEM RESOLVED. WHILE THIS PROBLEM IS INTERMITTENT, THIS IS,IN SOME WAYS, WORSE THAN IF IT HAPPENED EVERY TIME BECAUSE THERE IS NO WAY TO PREDICT THE EVENT AND COMPENSATE FOR IT.\*AK

**NHTSA ODI Number:** 10303576  
**Date of Incident:** 20010830  
**Vehicle:** 2001 TOYOTA RAV4  
**Location of Incident:** FREDERICKSBURG, TX

**NHTSA Summary:**  
EVENT #1: 1. SHORTLY AFTER BUYING CAR, NOTED ENGINE REVS WOULD SOAR BY 700 TO 800 RPM BETWEEN GEARS WHILE SHIFTING MANUAL TRANSMISSION. FOUND THIS HAPPENED BY JUST DISENGAGING THE CLUTCH WITHOUT SHIFTING EVEN WITH FOOT NOT ON THE ACCELERATOR PEDAL. 2. THE REV SOARING HAPPENED CONSISTENTLY. NO CONSEQUENCES EXCEPT FOR AN UNPLEASANT DRIVING EXPERIENCE. 3. COMPUTER WAS REPROGRAMMED BY THE DEALER FROM WHOM I BOUGHT THE CAR. REV JUMPS REDUCED TO ABOUT 400 RPM. A SECOND REPROGRAMMING REDUCED IT TO ABOUT 200 RPM. THIS BEHAVIOR STILL EXISTS. EVENT #2: 1. ABOUT SIX MONTHS AFTER PURCHASING THE CAR, NOTED THAT WHEN CRUISING WITH RPM'S ABOVE 2800 RPM IN 5TH GEAR WITH CRUISE CONTROL ENGAGED AND FOOT NOT ON ACCELERATOR PEDAL, ON DISENGAGING THE CLUTCH, THE ENGINE REVS WOULD SOAR TO 3,200 RPM TO 3,500 RPM AND REMAIN THERE FOR PERIODS RANGING BETWEEN 5 SECONDS TO OVER A

C-114

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

MINUTE. THIS OCCURRED WHILE THE CAR WAS COASTING AND SLOWING WHILE NOT UNDER POWER. 2. THIS BEHAVIOR FREQUENTLY OCCURRED UNDER THE ABOVE CONDITIONS. NO CONSEQUENCES EXCEPT AS A PROFESSION ENGINEER AND FORMER SPORTS CAR RACING DRIVER, I KNEW THIS BEHAVIOR WAS NOT NORMAL. 3. BEHAVIOR EXAMINED BY MY LOCAL TOYOTA DEALER. MECHANIC HOOKED UP RECORDING BOX TO CAR, BUT I WAS UNABLE TO REPLICATE THE BEHAVIOR ON THIS OCCASION. DATA EXAMINED BY A TOYOTA ENGINEER WHO PRONOUNCED THERE WAS NOT A PROBLEM. LATER, I WAS AGAIN ABLE TO REPLICATE THE BEHAVIOR. AFTER YET ANOTHER COMPUTER REPROGRAMMING, THIS BEHAVIOR OF REMAINING AT A HIGH RPM SEEMS TO HAVE STOPPED. HOWEVER, THE ENGINE REVS STILL WILL SURGE TO ABOUT 3,400 RPM BEFORE DROPPING OFF. \*TR

**Toyota ID Number:**  
**NHTSA ODI Number:** 10315912  
**Date of Incident:** 20011002  
**Vehicle:** 1996 TOYOTA CELICA  
**Location of Incident:** VANDALIA, OH

**NHTSA Summary:**  
THIS INCIDENT OCCURRED WHEN MY 1996 TOYOTA CELICA MALFUNCTIONED WHILE I WAS TRAVELING ON I-75 SOUTH NEAR PIQUA, OHIO. MY LANE OF TRAFFIC (PASSING LANE) WAS SLOWING DOWN DUE TO CONSTRUCTION, SO I ATTEMPTED TO SLOW DOWN. TO MY SURPRISE, MY BRAKE PEDAL WOULD NOT RESPOND (EITHER DUE TO A MALFUNCTION OF EITHER THE CRUISE CONTROL OR ACCELERATOR--OR BOTH), AND I HAD TO MOVE TO THE MEDIAN. UNFORTUNATELY, WHEN I TRIED TO BRAKE AGAIN, THE BRAKES WOULD NOT ENGAGE AND THE MEDIAN ENDED. MY CAR TRAVELED AIRBORNE OFF THE MEDIAN AND PLUMMETED TO THE ROAD BENEATH I-75. MY CAR TOOK OUT A SET OF CABLE WIRES, JUMPED A FENCE, BEFORE LANDING ON THE BUSY ROAD BELOW AND STOPPED WHEN IT HIT A CONCRETE BRIDGE SUPPORT. AN AMBULANCE WAS CALLED AS WELL AS THE OHIO STATE HIGHWAY PATROL. EVERYONE INVOLVED WAS SURPRISED THAT MY PASSENGER AND I WERE NOT INSTANTLY KILLED! WE DID SUFFER SOME MINOR INJURIES AND THE CAR WAS TOTALED. I DISTINCTLY REMEMBER STEPPING ON THE BRAKE PEDAL SEVERAL TIMES TO NO AVAIL. I REPORTED THIS TO TOYOTA AND THEY WERE INITIALLY VERY COOPERATIVE AND UNDERSTANDING. THEY WOULD NOT PROMISE ANYTHING, BUT ASKED WHAT I EXPECTED. I TOLD THEM I THOUGHT THAT TOYOTA SHOULD AT LEAST REPLACE MY CAR. THEY DID NOT SEE A PROBLEM WITH THIS. THEY LATER ASSUMED NO LIABILITY AND REFUSED TO DO ANYTHING. TO FOLLOW UP, I WOULD HAVE NEEDED TO COME UP WITH \$25,000 TO HIRE AN ACCIDENT RECONSTRUCTIONIST. I DID NOT HAVE THAT AMOUNT OF CASH, SO I DROPPED IT. I RECENTLY HAVE BEEN AMAZED IN READING SEVERAL COMPLAINTS VERY SIMILAR TO MINE AND THINK THAT THE TIME IS RIGHT FOR TOYOTA TO RIGHT WHAT WAS OBVIOUSLY A WRONG IN THE CONSTRUCTION OF MY CAR. MY PASSENGER HAS SWELLING TO HER LEFT EYE THAT HAS HEALED, BUT I HAVE HAD PAIN IN MY EMBL AND SHOULDERS EVER SINCE. THANKS FOR LISTENING. I WOULD APPRECIATE ANYTHING YOU CAN DO TO ASSIST. I CAN NOT PROVIDE THE VIN #, AS THE CAR WAS TOTALED SEVERAL YEARS AGO. I LEFT THE NUMBER XXXXXXXXXXXXXXX0000 AS THE VIN NUMBER. THANKS, MICHAEL SEAMAN

**NHTSA Summary:**

ON NOVEMBER 11TH, 2001 I EXPERIENCED A TERRIFYING AND POTENTIALLY LIFE-THREATENING INCIDENT WITH MY CAR. ON THAT EVENING, I WAS APPROACHING A STOP SIGN AT A BUSY INTERSECTION, AND WHEN I PRESSED ON THE BRAKE THE CAR WOULDNT T STOP AND INSTEAD A SUDDEN ACCELERATION FORCED ME INTO THE MIDDLE OF THE INTERSECTION. I WAS ABLE TO STOP THE VEHICLE BY USING THE EMERGENCY BRAKE. SINCE THIS HAS NEVER HAPPENED BEFORE, I THOUGHT IT WAS AN ISOLATED INCIDENT, SO I CONTINUED TO DRIVE THE VEHICLE. IT SEEMED TO BE OPERATING PROPERLY FOR THE NEXT WEEK OR SO, WHEN IT OCCURRED AGAIN, ON THE EVENING OF NOVEMBER 21ST, 2001 I WAS DROPPING A FRIEND OFF AT HOME WHEN I PROCEEDED INTO A PARKING SPACE. AS I PULLED FORWARD, OUT OF NOWHERE, A SUDDEN ACCELERATION OCCURRED AND FORCED THE CAR OVER THE CURB AND UP A HILL. THE PASSENGER IN MY CAR PULLED ON THE EMERGENCY BRAKE AND WAS ABLE TO STOP THE CAR. ANOTHER WITNESS SAW THE REAR TIRES SPINNING AS THE CAR TOOK OFF OVER THE CURB AND UP THE HILL. OBVIOUSLY THERE ARE SOME SERIOUS PROBLEMS WITH THIS CAR.\*AK

**NHTSA ODI Number:** 10311102  
**Date of Incident:** 20020101  
**Vehicle:** 2001 LEXUS LS430  
**Location of Incident:** PITTSBURGH, PA  
**NHTSA Summary:**  
 I OWNED A 2001 LEXUS LS430 FROM 2001 TO 2004. DURING THAT TIME, THE CAR WOULD ACCELERATE BY ITSELF WHEN GOING SLOWLY - DOWN MY DRIVEWAY, INTO MY GARAGE, OUT OF MY GARAGE, PULLING UP THE DRIVEWAY. IT ONLY HAPPENED WHEN GOING VERY SLOWLY - SAY FIVE MILES AN HOUR OR LESS - BUT IT CONSISTENTLY HAPPENED. I TOOK IT TO THE LOCAL DEALER A COUPLE OF TIMES AND THEY SAID, "WE DID NOT NOTICE ANYTHING." I WASN'T REALLY CONCERNED SINCE I WAS USUALLY ONLY GOING AROUND FIVE MILES AN HOUR, AND I WOULD DEPRESS THE BRAKE FIRMLY TO NOT GO FASTER, BUT IT HAPPENED OFTEN. I EVENTUALLY SOLD THE CAR. I WONDER IF THAT CAR HAD PROBLEMS LIKE THE RECALLED ONES? DON'T KNOW IF THE GAS PEDAL WAS STICKING OR IF THE SOFTWARE RUNNING THE ENGINE WAS REVVING IT UP. IT SEEMED LIKE THE GAS PEDAL WOULD ACTUALLY DEPRESS ON ITS OWN WHEN THIS HAPPENED. \*TR

**Vehicle:** 2001 TOYOTA SEQUOIA  
**Location of Incident:** TRUCKEE, CA

**NHTSA Summary:**  
 WE HAVE A TOYOTA SEQUOIA, THE PROBLEMS ARE THE 4 WHEEL DRIVE IS NOT OPERATING ALL THE TIME. IT DOES NOT ENGAGE, WHEN IT DOES SOMETIMES IT DOES NOT STAY IN 4 WHEEL DRIVE. ONE EXAMPLE IS WHEN MY WIFE HAD SIX FRIENDS IN THE VEHICLE THE 4 WHEEL DRIVE DID NOT STAY ENGAGED AND THE VEHICLE SKID CONTROL MADE THE ENGINE LOOSE POWER SO SHE SLID BACKWARDS DOWN A HILL. NO ONE WOULD RIDE IN OUR 4 WHEEL DRIVE AGAIN. THE VEHICLE SKID CONTROL ACTIVATES AT RADOM ON DRY PAVEMENT. THE SKID CONTROL MAKES THE ENGINE LOOSE POWER WHILE IN TRAFFIC. THERE IS ALSO A HESITATION IN THE ENGINE WHEN ACCELERATING FROM A COMPLETE STOP. ANOTHER PROBLEM IS THE BRAKING SYSTEM IS ANOT ADEQUATE FOR THE VEHICLE. THE ENTIRE FRONT BRAKES HAD TO BE

C-126

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

REPLACED. THE VEHICLE HAS BEEN IN FOR THE SAME REAIRS AT LEAST FIVE TIMES AND IS STILL NOT WORKING THE WAY IT SHOULD. WE HAVE ALL THE DOCUMENTATION FOR SERVICE ON OUR SEQUOIA, WE HAVE DONE INTERNET RESEARCH THROUGH THE NHTSA AND HAVE FOUND THE SAME PROBLEM WITH OTHER TOYOTA SEQUOIAS.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** HOUSTON, TX

**NHTSA Summary:**  
LEXUS ISSUE TO ABC NEWS ON JANUARY 29, 2010. \*TR I OWNED A LEXUS GS NOT TOO LONG AGO THAT HAD A SUDDEN ACCELERATION PROBLEM. LEXUS DID EVERYTHING TO CORRECT THE PROBLEM...BUT THEY JUST HAD NO FIX FOR IT. IT WAS NOT A PETAL PROBLEM.....IT WAS IN THE ELECTRONIC ACCELERATION CONTROL UNIT. HOW DID I KNOW THIS....AFTER I GOT RID OF THE CAR I MET A TECHNICIAN THAT HAD WORKED FOR STERLING MCCALL LEXUS IN HOUSTON TX. HE TOLD ME THAT THE PROBLEM WAS IN THE CONTROL UNIT AND MAIN COMPUTER AND THAT LEXUS NEVER WAS ABLE ADDRESS THE PROBLEM. I HAD THE COMPUTER REPLACED BY THE DEALER. THAT DIDN'T WORK EITHER. I GUARANTEE THAT THE LEXUS/TOYOTA ISSUE IS NOT A GAS PETAL ISSUE....IT IS IN THAT ELECTRONIC ACCELERATION MODULE. THEIR FIX WON'T WORK AND THERE WILL STILL BE WRECKS, INJURIES AND DEATHS AFTER EVERY RECALLED UNIT IS FIXED. IF YOU WOULD LIKE TO REPLY PLEASE DO SO AT JUSIOSH4937@ATT.NET.I DO HAVE CONVERSATIONS AND LETTERS SENT TO THE NHTSA AND I ACTUALLY HAD THEM SEND ME COPIES OF ALL THEIR COMPLAINTS ON MY MODEL. THERE WERE PLENTY OF COMPLAINTS ABOUT SUDDEN ACCELERATION. I COULD NEVER CONVINCE THE NHTSA TO INVOKE AN INVESTIGATION, BUT I WAS UNABLE TO GET THEIR INTEREST. OH....BY THE WAY I STILL DRIVE A LEXUS...A LX470. THEIR BIG UTILITY VEHICLES HAVE A TOTALLY DIFFERENT WIRING HARNESS...DIFFERENT COMPUTER...AND DIFFERENT ACCELERATION MODULE. IT HAS BEEN A WONDERFUL VEHICLE ALTHOUGH RATHER PRICEY. I DO KEEP MY CARS FOR QUITE A WHILE THOUGH.

**Vehicle:** 1999 LEXUS RX300  
**Location of Incident:** BALTIMORE, MD

**NHTSA Summary:**  
3 EPISODES OF SEVERE ACCELERATION TERMINATED BY SHIFTING TO NEUTRAL. IN EACH CASE THE RPM CYCLED FROM 3000 TO 8000 AND THEN SPONTANEOUSLY RETURNED TO NORMAL AFTER ABOUT A MINUTE IN NEUTRAL GEAR. I WAS UNABLE TO OVERCOME ACCELERATION BY BRAKING. THE GAS PETAL FELL TO FLOOR EACH TIME BUT WAS NOT STUCK AND RETURNED TO NORMAL AFTER THE EPISODE WAS OVER. THESE 3 EVENTS OCCURED IN A SINGLE WEEK. I FELT THERE WAS SOME MALFUNCTION OF THE CRUISE CONTROL--WHICH I NEVER USE. I HAD THE CRUISE CONTROL

C-129

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

DISCONNECTED AT A LOCAL GARAGE AND NEVER HAD ANOTHER PROBLEM. WHEN I TOLD THE LEXUS DEALER ABOUT THIS AT THE NEXT ROUTINE SERVICE VISIT, THEY SAID THEY HAD NEVER HEARD ANYTHING LIKE THIS AND DID NOT SUGGEST FURTHER ACTION. I NEVER RECONNECTED THE CRUISE CONTROL. I REPORT THIS NOW BECAUSE OF THE CURRENT CONCERNS. THIS WAS CLEARLY ELECTRONIC IN SOME FASHION AND I BELIEVE INVOLVED THE CRUISE CONTROL MECHANISM.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I was a General Manager of one of your largest dealerships in the US. I was aware that this problem dates back to 2004. In fact, there was a death involved in a sudden acceleration incident at an Atlantic City Hotel in a Camry that our dealership sold. At this point is Toyota's position going to change as to the dates involved?

THE FOLLOWING IS A NEWS ARTICLE REGARDING THIS CRASH:

DEADLY N.J. CASINO CRASH  
New York Post - New York, N.Y.  
Author: BRAD HUNTER and ZACH HABERMAN  
Date: Apr 12, 2002  
Start Page: 017  
Section: News  
Text Word Count: 171  
Document Text

A car crash at an Atlantic City casino killed a woman and injured four other people yesterday. Cops say the accident occurred in front of Harrah's at 1:22 p.m. when Irene Ralston, 66, of Ft. Lee, N.J., drove her new Toyota Avalon into the hotel's entranceway.

Witness Candy Schwartz, 52, was just leaving the casino when the tragedy occurred. "It was boom! One guy went flying into the air, and then suddenly there were people lying injured all over the place," Schwartz said. "She didn't stop until she hit the wall. She came barreling in."  
Schwartz's husband, Alan, 42, said one victim bounced off the hood of the car "like a rag doll." He added that the carnage could have been worse.

"If she had her wheel turned more to the right, she would have gone all the way through the casino," Alan said. Two of the injured were hotel employees. The dead woman, who was 48, was not immediately identified. Police were investigating the cause and no charges were filed.

ABC 7 News reports

In April 2002, Kathleen Kelly was sitting on a bench outside Harrah's casino when an out of control Toyota Avalon shot across the road, tossing one person into the air before plowing into Ms. Kelly, killing her instantly.

The driver was never charged, so for years, the cause of this horrific fatal accident remained a mystery to her family, until all the recent news about Toyota recalls.

"They're saying gas peddle sticking. This is too weird, you know, that's what the woman said that hit my sister. I was flabbergasted," said Teore. That's when the sister contacted Eyewitness News and we started investigating, but because of the age of the case, police and court records had been purged.

The driver declined to talk Eyewitness News, as did the injured casino worker.

Then Eyewitness News uncovered the Medical Examiner's report on the death of Kathleen Kelly.

Inside the report, the Medical Examiner states that the driver "Told police the car suddenly accelerated" and even more troubling, he says she told police "She had just gotten the car back from the dealership" where it had been checked for "Unexpected Acceleration" but was told

**Date of Incident:** 20020521  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** SAN DIEGO, CA  
**NHTSA Summary:**  
THIS IS IN REFERENCE TO THE RECENTLY ANNOUNCED TOYOTA RECALL FOR INCREASED UNINTENDED ACCELERATION OF THE VEHICLE. I BELIEVE THIS IS AN ISSUE DATING BACK TO 2002 TOYOTA MODEL CARS. I WOULD LIKE TO ADD THAT I BELIEVE TOYOTA WAS AWARE OF THE POTENTIAL PROBLEM. LET ME EXPLAIN: MY MOTHER PURCHASED A NEW 2002 TOYOTA CAMRY IN 2001, AND WITHIN 3-6 MONTHS OF DRIVING THE VEHICLE SHE EXPERIENCED THE UNINTENDED INCREASED ACCELERATION WITH COMPLETE BRAKING FAILURE PROBLEM MORE THAN ONCE. I WAS A PASSENGER ON ONE INCIDENT, SITTING IN THE BACK SEAT, AND THE CAR ACCELERATED ON ITS OWN FROM 25MPH TO 45 MPH, HAND BRAKE, PEDAL BRAKE ALL FAILED WHEN APPLIED. CAR KEPT MOVING. IF I HAD NOT REACHED ACROSS FROM THE BACK SEAT AND JAMMED THE CAR GEAR FROM DRIVE INTO THE PARK POSITION, THERE WOULD HAVE BEEN AN ACCIDENT WITH INJURIES OR WORSE. MY MOM REFUSED TO DRIVE THE VEHICLE AFTER THIS INCIDENT ON MAY 21, 2002. SHE TRIED TO TRADE IT IN AND GET HER MONEY BACK FROM THE DEALER IN DALLAS/FT WORTH AREA, BUT THE TOYOTA DEALER REFUSED. SHE HAD TO GO THRU AN OFFICIAL ARBITRATION BOARD HEARING WITH THE EXECUTIVES AT TOYOTA BECAUSE SHE DID NOT WANT TO DRIVE THE VEHICLE AND WANTED TO RETURN IT. THE TOYOTA BOARD HEARING OUTCOME WAS NOT IN HER FAVOR. GO FIGURE. BUT ON THE WAY OUT OF THE HEARING THE LEAD TOYOTA MECHANIC TOOK HER ASIDE AND TOLD HER "OFF" THE RECORD "THAT THIS ACCELERATION PROBLEM WAS GOING TO BE A BIG PROBLEM IN THE FUTURE" AND THAT HE WAS SORRY. THAT SAME WEEK MY MOM TRADED HER NEW 2002 TOYOTA CAMRY IN FOR A NEW HONDA AT THE HONDA DEALER. MY MOM SINCE HAS PASSED AWAY. ANYWAY, I JUST THOUGHT THAT DUE TO THE IMPORTANCE OF THIS ISSUE I WOULD SHARE OUR STORY WITH YOU. IN ADDITION MY SISTERS ACCOMPANIED MY MOM TO HER ARBITRATION HEARING AT TOYOTA IN DALLAS FT WORTH AREA ALONG WITH MY BROTHER IN LAW WHO IS A FORD MECHANIC, AND I AM SURE THEY CAN PROVIDE MORE INFORMATION REGARDING THE HEARING EVENTS IF NEEDED. WE THINK FURTHER INVESTIGATION MAY BE WARRANTED.

**NHTSA Summary:**

WHEN THE NEWS CAME OUT REGARDING THE ACCELERATION PROBLEMS WITH THE TOYOTAS, I RECALLED HAVING A SIMILAR PROGRAM WITH MY 2000 RAV 4. ON JULY 8, 2002 I EXPERIENCED AN ACCELERATION PROBLEM WHILE ON MY WAY TO WORK. I WAS GOING AROUND 55 MPH ON FREEWAY. WHEN SUDDENLY MY CAR STARTED TO ACCELERATE ON ITS OWN. DESPITE APPLYING THE BRAKES, THE CAR CONTINUED TO ACCELERATE TO ABOUT 70MPH FROM 55MPH. I TRIED PUTTING MY FOOT UNDER THE THROTTLE TO PULL IT UP WITHOUT SUCCESS. I ALSO TRIED PUSHING BACK ON THE MAT, THINKING THE MAT WAS IN THE WAY, BUT THE MAT WAS NOT STUCK UP AGAINST THE THROTTLE. I ALSO PUT ON MY FLASHERS TO TRY AND WARN OTHER DRIVERS THAT I WAS HAVING A PROBLEM. I KEPT THINKING, "WITH A GAS TANK HALF FULL, I WOULD NEED TO TRY AND DRIVE TO SEATTLE IN ORDER FOR THE GAS TO RUN OUT, WHICH WOULD THEN STOP THE CAR". MEANWHILE, I CONTINUED TO KEEP TRYING TO PUSH THE THROTTLE UP WITH MY FOOT AND APPLY THE BRAKES. AFTER WHAT SEEMED LIKE AN ETERNITY, BUT WAS PROBABLY ONLY A FEW MINUTES, BECAUSE I DROVE PASS MY USUAL EXIT, THE CAR STOPPED ACCELERATING ON ITS OWN AND I HAD CONTROL OF THE CAR AGAIN. I DON'T KNOW IF MY PUSHING UNDER AND UP ON THE THROTTLE DID IT. I TOOK IT TO THE TOYOTA DEALER AND THEY "DID NOT FIND ANYTHING WRONG WITH IT". I STILL HAVE THE SERVICE INVOICE, WHICH DOCUMENTS MY PROBLEM. NATURALLY I WAS FRIGHTENED BY THE WHOLE SITUATION AND IT TOOK ME AWHILE TO FEEL COMFORTABLE DRIVING THE CAR AGAIN. HOWEVER, I ALSO HAVEN'T HAD ANY PROBLEMS WITH THE ACCELERATION SINCE. IT SEEMS THOUGH THAT TOYOTA'S ACCELERATION PROBLEM STARTED WAY BACK. MAYBE THERE ARE OTHER OLDER RAV4S OUT THERE THAT HAD THE SAME PROBLEM. I TEND TO KEEP ALL MY CAR INVOICES, SO LIKE I SAID I HAVE THE ORIGINAL INVOICE. THANK YOU.

**Location of Incident:** KNOXVILLE, TN

**NHTSA Summary:**  
CONSUMERS 23 YEAR OLD DAUGHTER WAS INVOLVED IN AN INCIDENT ALONG WITH HER FRIEND, WHERE THEY WERE ATTEMPTING TO TAKE AN EXIT, WHEN THE VEHICLE WOULD NOT ALLOW HER TO SLOW DOWN. VEHICLE ACCELERATED ON ITS OWN, CAUSING THEM A LIFE THREATENING EXPERIENCE. THE TWO RAN OF THE ROAD IN ORDER TO BLOCK FROM HITTING OTHER VEHICLES, AND IN ORDER TO NOT HIT A TREE WHEN THEY RAN OF THE ROAD, THEY HAD GOTTEN BACK ONTO THE ROAD AFTER THE PASSENGER HAD INFORMED THE DRIVER THAT THE ROAD WAS CLEAR ENOUGH TO GET BACK ON. THEY DID SO, LUCKILY NOT HITTING ANYONE, THEY ENDED UP IN A VACANT PARKING LOT WHERE THE DRIVER HAD TAKING THE KEYS OUT OF THE IGNITION. DURING THE ACCIDENT THE DRIVER TRIED TO BRAKE AND EVEN PULL THE EMERGENCY BRAKE AND THE VEHICLE REJECTED THAT. VEHICLE WAS TOWED BACK TO THE SERVICE CENTER, WHERE THREE WEEKS PRIOR, THE CONSUMER HAD AN OIL CHANGE, LUBRICATIONS, AND THE TIRES ROTATED. THEY TESTED THE VEHICLE, AND REPORTED THAT THEY FOUND NOTHING. THE SERVICE CENTER SUGGESTED THAT THEY COULD CLEAN THE THROTTLE LINKAGE AND LUBRICATE A SPECIFIC CABLE (NAME NOT AVAILABLE). VEHICLE WAS THEN INSPECTED AT A TOYOTA DEALER WHO DID NOT SEE A PROBLEM EITHER AND EVEN ALLOWED ONE OF THE EMPLOYEES TO TAKE THE VEHICLE HOME FOR FURTHER INSPECTION AND HE FOUND NO PROBLEMS AS WELL. CONSUMER STATED THAT THE DEALER HAD BEEN ABLE TO CLEAR THE AIRBAG SIGN THAT WAS DISPLAYED ON THE DASHBOARD.\*SCC

**Date of Incident:** 20020900  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** STATEN ISLAND, NY

**NHTSA Summary:**

ON MY 2002 TOYOTA CAMRY XLE WHEN I PRESSED ON THE BRAKE THE OTHER DAY (I HAVE BEEN DRIVING FOR OVER 40 YEARS) MY CAR KEPT GOING INSTEAD OF STOPPING!! IT TURNED OUT THAT I WAS PRESSING ON THE BRAKE AS WELL AS THE ACCELERATOR PEDAL SINCE THEY ARE ALMOST ON THE SAME LEVEL AS WELL AS BEING CLOSE TO EACH OTHER. ACTUALLY, WHEN THE BRAKE IS DEPRESSED THE ACCELERATOR PEDAL IS ACTUALLY HIGHER WHICH ALLOWS FOR THE CAR TO MOVE FORWARD WHILE STILL DEPRESSING THE BRAKE PEDAL! THIS SEEMS TO BE AN INCREDIBLY DANGEROUS SITUATION, WHILE GETTING ACCUSTOMED TO DRIVING THIS NEW CAR I FOUND IT UNCOMFORTABLE AT TIMES TO GET MY RIGHT FOOT IN THE PROPER POSITION TO DRIVE SAFELY. MAYBE IT'S BECAUSE OF THIS DEFECT. WHAT DO YOU THINK? \*AK

**Date of Incident:** 20020901  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** LOMPOC, CA

**NHTSA Summary:**

I HAVE HEARD ABOUT THE PROBLEM THE TOYOTA CAMRY HAS WITH SPEED SURGES. I HAVE HAD A PROBLEM BUT IDENTIFIED THE CAUSE QUITE READILY. THE BRAKE PEDAL IS LOCATED TOO CLOSE TO THE THE GAS PEDAL AND AT ABOUT THE SAME LEVEL. AFTER CATCHING MYSELF SEVERAL TIMES STEPPING ON THE GAS PEDAL WHEN I INTENDED TO STEP ON THE BRAKE I HAVE LEARNED TO BE VERY CAREFUL WHEN SWITCHING FROM ONE TO THE OTHER. IN THE CASES WHERE THE MISTAKE DID OCCUR I WAS QUICKLY AWARE OF WHAT WAS HAPPENING AND THERE WAS NO INCIDENT OR ACCIDENT INVOLVED. AM SUBMITTING THIS AS IT MAY BE WHAT HAS OCCURED IN SOME OF THE INSTANCES OF UNANTICIPATED DRIVE SURGE. I HAVE FILLED IN A DATE OF OCCURANCE BUT IT OCCURED A FEW TIMES AFTER I BOUGHT THE VEHICLE AND I DONT REMEMBER THE EXACT DATES. \*AK

**NHTSA Summary:**

FOR ABOUT THE FIFTH TIME IN THE PAST TWO YEARS, I HAVE EXPERIENCED AN UNINTENDED ACCELERATION. AS I WAS PULLING INTO A 7-11 PARKING LOT, THE ENGINE REVVED WITHOUT MY FOOT ON THE ACCELERATOR AND SURGED FORWARD AT WHICH TIME I APPLIED THE BRAKE HARD. THE CAR CONTINUED TO SURGE FORWARD, RESTRAINED, SLOWER BY THE BRAKING BUT STILL MOVING TOWARD PEDESTRIANS AND THE STORE. I MOVED THE SHIFTER INTO PARK AND THE REVVING CEASED IN ABOUT A SECOND OR TWO. THE PRIOR FOUR TIMES I WAS IN TRAFFIC MOVING AHEAD SLOWLY--STOP AND GO. WHILE STOPPED, THE ENGINE BEGAN TO REV AND THE CAR TRIED TO SURGE FORWARD WITH MY FOOT ALREADY ON THE BRAKE. I DEPRESSED THE PEDAL HARDER AND THE REVVING STOPPED IN ABOUT 5-10 SECONDS. REPORTED TO THE DEALER FIRST ON 01/03/2002. NPF \*AK

**NHTSA Summary:**

CHECK CRUISE CONTROL WIRING/ELECTRONICS TOYOTAS!! I HAD FAILED CRUISE CONTROL CAUSING RPM 7,000-8,000; COULD NOT SHUT OFF; STOMPED ON BRAKES TO SHUT CRUISE OFF. PULLED PARKING BRAKE; DOWNSHIFTED TO NEUTRAL; TURNED CAR

C-146

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

OFF. TURNED IT BACK ON WHEN RECOVERED FROM HYSTERIA AND CRUISE HAD ROTATIONS GOING INTO RED ZONE, THOUGH THE ACCELERATOR PEDAL WAS PULLED UP AND CAR WASNT GOING FORWARD - IT WAS GUNNING ENGINE. TURNED CRUISE OFF TURNED CAR OFF/ON/OFF/ON. FINALLY STOPPED. TOOK BACK TO DEALER. THEY HAD ADDED TOYOTA CRUISE TO 2003 NEW MODEL COROLLA, 5 SPEED MANUAL AFTER FACTORY. DEALERS WERENT AUTHORIZED TO DO IT - TOYOTA WANTED CRUISE CONTROL ONLY ADDED AT FACTORY. BUT DEALER GOT AHOLD OF ONE - THEY PROBABLY WERENT SURE HOW TO WIRE AND CONNECT IT IN. TOOK IT BACK. DEMANDED NEW ONE BE INSTALLED. HAS BEEN OKAY. STILL DRIVING 2003, 5 SPEED MANUAL TRANSMISSION. BUT IT WAS FRIGHTENING TO HAVE CRUISE STUCK ON WIDE OPEN LIKE GAS PEDAL WAS DOWN STOCK. IT WOULDNT STOP HITTING BRAKES OR ANYTHING. CHECK THE CRUISE CONTROL WIRING AND ELECTRONICS ON THESE RECALL TOYOTAS!!!!!!

 RNW#030127-000103>>>CUST STS "I BOUGHT A NEW 2002 CAMRY LE (4 CYL) IN SEPTEMBER OF 2002. I CURRENTLY HAVE 3600 MILES ON THE CAR. I HAVE AN INTERMITTENT PROBLEM WITH THE CAR. AT TIMES, WHEN I AM COMING TO A STOP THE CAR STARTS TO ACCELERATE. I HAVE TO DROP IN INTO NEUTRAL AND PRESS THE ACCELERATOR PEDAL DOWN TO CLEAR IT. IT HAS REVVED UP AS HIGH AS 6200RPM. THIS HAS HAPPENED BETWEEN 12 TO 15 TIMES. IT IS A VERY DANGEROUS SITUATION AND MY WIFE IS AFRAID TO DRIVE THE CAR.

**Additional Summary:**

\*\*\* NOTES 01/31/2003 05:37:56 PM KFARDOOST  
 >>>THE LOCAL TOYOTA DEALERSHIP HAS BEEN VERY COOPERATIVE. THE HAVE CHECKED EVERYTHING BUT CANT DUPLICATE THE PROBLEM BECAUSE IT IS SO INTERMITTENT.

 NCR REPLIED TO CUST " -<AS HTML>  
 THANK YOU FOR CONTACTING TOYOTA MOTOR SALES, U.S.A., INC.<P>  
 WE APOLOGIZE FOR THE CONCERNS WITH YOUR 2002 CAMRY.<P>  
 IN ORDER TO PROPERLY ASSESS YOUR CONCERNS, WE HAVE CONTACTED THE CUSTOMER RELATIONS NMANAGER AT NORM WAGNER TOYOTA TO FURTHER EVALUATE YOUR 2002 CAMRY.<P>  
 OUR DEALERSHIP TECHNICIANS ARE SPECIALIZED IN THE DIAGNOSIS AND REPAIR OF TOYOTA VEHICLES. THEY ARE PROVIDED WITH EXTENSIVE TRAINING AND HAVE ACCESS TO STATE-OF-THE-ART EQUIPMENT TO HELP IN THE ACCURATE DIAGNOSIS OF YOUR VEHICLE. ALSO, IF NECESSARY, WE PROVIDE ADDITIONAL SUPPORT TO ASSIST OUR TECHNICIANS IN RESOLVING UNUSUAL VEHICLE CONCERNS.<P>  
 PLEASE BEAR IN MIND THAT IF THE DEALERSHIP IS UNABLE TO DUPLICATE THE CONDITION, IT MAKES IT VERY DIFFICULT TO DIAGNOSE WHETHER OR NOT YOUR 2002 CAMRY HAS ANY TYPE OF CONCERN. IT MAY BE ADVANTAGEOUS FOR YOU TO TAKE THE VEHICLE TO THE DEALERSHIP AS SOON AS THE CONDITION OCCURS. HOWEVER THIS IS SOMETHING THAT YOU WOULD HAVE TO OBVIOUSLY DISCUSS WITH THE DEALERSHIP. THE CUSTOMER RELATIONS MANAGER WILL CONTACT YOU BY THE END OF THE BUSINESS DAY, 02/05/03. IN THE EVENT YOU DO NOT RECEIVE ANY CONTACT FROM THE DEALERSHIP BY THIS DATE, PLEASE <A HREF = '

**NHTSA ODI Number:** 10314178  
**Date of Incident:** 20021109  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** WALTHAM, MA  
**NHTSA Summary:**  
ON THE DATE BELOW, I WAS DRIVING ON A HIGHWAY WHEN MY BRAND NEW CAMRY WENT OUT OF CONTROL AND SPED UP, SENDING THE CAR THROUGH A GUARD RAIL. MY CAR ENDED UP ON THE OTHER SIDE OF THE HIGHWAY GOING IN THE OPPOSITE DIRECTION. I HAVE A PERFECT DRIVING RECORD, AND HAVE NEVER EVEN HAD A TICKET. I BELIEVE THAT MY CAR HAD THE ACCELERATION PROBLEM THAT I'VE BEEN READING ABOUT. I HAD CONTACTED TOYOTA WHEN THE ACCIDENT FIRST OCCURRED. THEY SENT SOMEONE OUT WHO CHECKED THE TIRES AND THE STEERING, AND A FEW MINOR THINGS. NO ONE TESTED ANYTHING TO DO WITH ACCELERATION. THE CAR WAS TOTALED, AND I WAS TAKEN BY AMBULANCE TO A TRAUMA CENTER, WHERE I WAS HOSPITALIZED. I AM NOW DRIVING A 2003 CAMRY, AND I FEEL LIKE I'M DRIVING A TIME BOMB, SINCE I READ THAT THE PROBLEM MAY EXIST IN BOTH THE 02 AND 03 MODELS. \*AK SEE VOQ 10063318.  
\*DSY: WHILE DRIVING VEHICLE SUDDENLY ACCELERATED. DRIVER LOST CONTROL AND HIT A GUARD RAIL. THE VEHICLE WAS TOTALED. \*AK THE DRIVER SUFFERED FROM POST CONCUSSION SYNDROME AND STILL EXPERIENCES DIZZINESS, PROBLEMS WITH BALANCE, TREMORS, HEADACHES, NECK AND BACK PAIN AND MEMORY LOSS. THE CONSUMER IS STILL UNDER THE CARE OF SEVERAL MEDICAL PROFESSIONALS AND CONTINUES TO UNDERGO TESTING. \*NM SEE VOQ 10062561. \*DSY, TL\*THE CONTACT OWNS A 2002 TOYOTA CAMRY PURCHASED BRAND NEW. WHILE TRAVELING AT SPEEDS OF 50 MPH, SHE SWITCH LANES TO AVOID A CONSTRUCTION AREA. THE VEHICLE THEN ABNORMALLY ACCELERATED WITHOUT WARNING OR DRIVER INTENT. SHE ATTEMPTED TO DEPRESS THE BRAKES, HOWEVER THE BRAKES WERE NOT RESPONSIVE TO DRIVER INPUT. SHE ALSO ATTEMPTED TO MAINTAIN CONTROL OF THE VEHICLE BUT THE STEERING WHEEL WAS ALSO NON-RESPONSIVE AND THE VEHICLE CONTINUED TO ACCELERATE IN AND OUT OF TRAFFIC. THE VEHICLE THEN SWAYED TO THE LEFT AND CRASHED THROUGH A METAL GUARD RAIL. THE CONTACT WAS HOSPITALIZED AND SUFFERED NECK INJURIES AND WAS DIAGNOSED WITH AMNESIA SYMPTOMS AND POST-TRAUMATIC STRESS DISORDER. THE CAUSE OF THE FAILURE WAS INCONCLUSIVE. VEHICLE WAS DESTROYED. THE FAILURE MILEAGE WAS 2700. THE VIN WAS NOT AVAILABLE. TL\*THE CONTACT OWNED A 2002 TOYOTA CAMRY. WHILE DRIVING ON THE HIGHWAY AT 50 MPH, THE DRIVER STATED THAT SHE SWITCHED LANES AND THE ACCELERATOR PEDAL BECAME STUCK AND ACCELERATED ON ITS OWN. THE VEHICLE MADE A U-TURN ON ITS OWN AND THE DRIVER CRASHED INTO 2 GUARD RAILS. THE VEHICLE WAS DESTROYED. THE DRIVER WAS ALSO INJURED AND TAKEN BY AMBULANCE TO THE HOSPITAL. THE VIN WAS NOT AVAILABLE. THE FAILURE MILEAGE WAS 2,000.  
Additional Summary:  
The accident was on Nov. 9, 2002 during the day time. It was a sunny, dry day. I was driving north on rt. 93, which is a three or 4 lane highway (each direction). The car was a 2002 Toyota Camry. There were work trucks in the left lane, where I was driving, so I moved over to the next lane. Everything was fine for a few minutes, but suddenly, with no warning, my car took control of itself. It sped up and was weaving back and forth across the lanes, and eventually turned left and went through the guard rail (there may have been 2 guard rails, I can't remember). I was conscious until the point where I hit the guard rail and saw the car hood crumple up. The next time thing I remember was being on the south bound side of rt. 93 with my car facing south. The car was at a complete stop. All the things that should have been under the hood, were hanging outside the car. The whole back was smashed in as well as the front. The rear windshield was completely broken.

State Trooper told the witnesses to leave without questioning them.

**NHTSA ODI Number:** 10314801  
**Date of Incident:** 20021109  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** ERLANGER, KY  
**NHTSA Summary:**  
WE PURCHASED A NEW 2002 TOYOTA CAMRY 7-16-02 AND THE ACCELERATOR SURGED WHILE BACKING OUT OF THE DRIVEWAY 11-9-02 CAUSING IT TO STRIKE ANOTHER PARKED VEHICLE AND STOPPED 6 INCHES FROM STRIKING A HOUSE. THE TOTAL DAMAGE WAS ALMOST \$10000. WE TOLD THE TOYOTA DEALERSHIP AND THEY SAID IT HAD TO BE AN OPERATOR ERROR BECAUSE THEY NEVER HEARD OF ANOTHER ACCELERATION PROBLEM. THE DEALER NEVER OFFERED TO DO A DIAGNOSTIC CHECK AND THEY TOLD US TO GO TO A DEALER CLOSER TO OUR HOME IF IT HAPPENED AGAIN. IN 2004 WE READ AN ARTICLE ABOUT SUDDEN ACCELERATION PROBLEMS WITH THE CAMRY AND LEXUS VEHICLES. WE LOOKED ON THE NHTSA WEB SITE AND UNDER SPEED CONTROL COMPLAINTS WE SAW A COMPLAINT OF A 2002 OR 2003 CAMRY ACCIDENT EXACTLY LIKE THE ONE WE EXPERIENCED. WE SENT A LETTER TO TOYOTA INC. 4-18-04 AT P.O. BOX 2991 IN TORRANCE, CA 90509 AND TOYOTA NEVER RESPONDED BACK. WE NEVER EXPERIENCED SUDDEN ACCELERATION IN THE 2002 CAMRY AGAIN AND EVENTUALLY SOLD IT. WE HAVE A COPY OF THE TOYOTA LETTER. THERE WAS A NEIGHBOR THAT WITNESSED THE ACCIDENT AND SAID THE CAMRY MADE A LOUD ACCELERATION NOISE. MY WIFE PUT BOTH FEET ON THE BRAKES TO BRING IT TO A STOP.

**NHTSA Summary:**  
UNCONTROLLABLE ACCELERATION IN A 1998 TOYOTA COROLLA. MERGING ONTO 35W S AT COUNTY C. ACCELERATED FOR MERGE. TOOK FOOT OFF ACCELERATOR AFTER MERGING. CAR KEPT ACCELERATING. PRESSED ON BRAKE AND PUT ON HAND BRAKE. THIS ONLY SLOWED ACCELERATION. I GOT OVER TO THE FAST LANE. CAR WAS DOING MORE THAN 70 MPH AT THIS STAGE. I DECIDED TO TAKE FOOT OFF BRAKE, RELEASE HAND-BRAKE AND PRESS DOWN ACCELERATOR PEDDLE. THIS INCREASED ACCELERATION, BUT ON TAKING FOOT OFF ACCELERATOR, THE CAR SLOWED. AT THIS STAGE I HAD MISSED MY EXIT FOR HIGHWAY 280. I WAS VERY FORTUNATE THAT THE HIGHWAY WAS NOT BUSY AT THE TIME. DATE IS VERY APPROXIMATE. INCIDENT OCCURRED DURING WINTER OF 2001 OR WINTER OF 2002 OR WINTER OF 2003. I STILL DRIVE THE SAME CAR AND HAVE NOT HAD ANY INCIDENT SIMILAR SINCE. AT THE TIME OF THE INCIDENT, I HAD PRESSED THE ACCELERATOR AS FAR AS THE FLOOR. SINCE THAT TIME, I HAVE BEEN MORE RESTRAINED WITH PRESSING THE ACCELERATOR PEDAL.

**Date of Incident:** 20030101  
**Vehicle:** 2002 TOYOTA HIGHLANDER  
**Location of Incident:** AT. THOMAS, VI  
**NHTSA Summary:**

I BOUGHT A NEW TOYOTA HIGHLANDER IN 2002. I'M NOT SURE ABOUT THE EXACT YEAR, BUT I'M GUESSING IN 2004-5. I ALSO EXPERIENCED THE SUDDEN RACING ACCELERATOR PROBLEM AROUND 4 TIMES. EACH TIME I WAS ABLE TO PULL OVER AND PUT THE CAR IN NEUTRAL WHILE THE ENGINE RACED. I TURNED THE ENGINE OFF, AND IT WORKED PROPERLY AFTER RESTARTING. IT HASN'T HAPPENED IN THE LAST MAYBE 5 YEARS. I REPORTED THIS TO THE TOYOTA DEALER, AND THEY TOLD ME IT WAS A FLOOR MAT PROBLEM. I DIDN'T BELIEVE IT, BECAUSE I EXPERIENCED THIS, AND THE FLOOR MAT HAD NOTHING TO DO WITH IT. AS I SAID, IT HASN'T HAPPENED SINCE, SO I DIDN'T FOLLOW UP ON IT. THERE WAS NO ACCIDENT, AND NO ONE HURT, BUT I SEE THAT TOYOTA HAS NOT INCLUDED THE 2002 HIGHLANDER AS A PROBLEM CAR, BUT I KNOW THAT IT IS. I DON'T WANT ANYONE BEING HURT BY THIS YEAR AND MODEL CAR EITHER. I STILL DRIVE THIS CAR. THANKS FOR ANYTHING YOU CAN DO TO FIX THE PROBLEM.

**NHTSA Summary:**  
FOLLOWUP TO ODI #10256120. INFORMED BY TOYOTA REP THAT YOUR AGENCY PERFORMED TWO INVESTIGATIONS F THE 2003 CAMRY RESPECTING ACCELERATION SURGES BUT RETURNED NO FINDINGS OF VEHICLE FAILURE.YOUR WEBSITE RECOUNTS ABOUT 130 REPORTS OF SUCH 2003 CAMRY FAILURES MOSTLY (102) UNDER VEHICLE SPEED CONTROL , SOME UNDER POWER TRAIN AUTO TRANS & VSC ACCELERATOR PEDAL. FOR FORD TAURUS I COUNTED 12; HONDA ACCORD AND CHEVROLET MALIBU 20+ - ALL FOR MODEL YEAR 2003. AS % OF CARS SOLD QUITE SMALL EVEN FOR CAMRY BUT AS AN OCCURENCE RATIO OF 6-1 OR 10-1 VS. THE OTHER MODELS QUITE IMPRESSIVE. THE FACT YOU CONDUCTED TWO INVESTIGATIONS OF CAMRY IS TELLING IN AND OF ITSELF. HOW MANY ACCELERATOR INVESTIGATIONS DID YOU CONDUCT FOR THE 2003 TAURUS, ACCORD & MALIBU? ABSENT AN AIRPLANE LIKE RECORDER. HOW CAN YOU BE ASSURED THAT THERE WAS NO VEHICULAR FAILURE? THE ALTERNATIVE IS TO IMPLY THAT CAMRY OPERATORS ARE LESS COMPETENT THAN DRIVERS OF OTHER MAKES... \*TR HARVEY MILLER

**Location of Incident:** ALLENWOOD,, NJ  
**NHTSA Summary:**  
THIS LETTER IS TO REPORT A VERY UNSAFE CONDITION THAT EXISTS WITH MY 1998 LEXUS GS 300. ON 2/02/03 I WAS WAITING AT A CAR WASH IN A LINE OF TRAFFIC WITH MY FOOT ON THE BRAKE, WHEN ALL OF THE SUDDEN MY ENGINE ADVANCED TO WHAT SEEM LIKE FULL THROTTLE. THE REAR TIRES BEGAN TO SPIN ON THE WET PAVEMENT BUT MY FULL PRESSURE ON THE BRAKE KEPT THE CAR FROM LUNGING FORWARD. MY WIFE LEANED OVER TO SEE WHAT WAS GOING ON AND SAW MY FOOT ON THE BRAKE AND NOT ON THE GAS! AT THAT TIME I STARTED TO SHIFT THE CAR INTO NEUTRAL BUT DECIDED IT WOULD BE BEST TO TURN OF THE IGNITION. BEFORE I GOT MY HAND ON THE KEY THE ENGINE WENT BACK TO IDLE! THIS WHOLE EVENT LASTED 5 TO 10 SECONDS. MY FOOT WAS DEFINITELY NOT ON THE GAS! AT THAT TIME MY WIFE TOLD ME WHAT HAPPENED TO HER THE WEEK BEFORE THIS SCARY EVENT. SHE WAS DRIVING DOWN THE ROAD AT ABOUT 55 MPH WHEN THE CAR BEGAN TO ACCELERATE RAPIDLY WITH OUT PRESSING ON THE GAS PEDDLE. SHE SAID SHE HAD TO APPLY A LOT OF

C-175

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BRAKE PRESSURE TO KEEP THE CAR FROM ACCELERATING OVER THE SPEED LIMIT. THIS ALSO LASTED ABOUT 5 TO 10 SECONDS! SERVICE FROM THE LEXUS DEALER IS GREAT BUT THEY TOLD ME MY CAR COULDN'T DO THAT, AND THAT ALL COMPUTERS CHECKED OUT OK! ALSO A FACTORY SERVICE REP SAID THIS SAME THING! I EXPLAINED TO THEM THAT IT DID HAPPEN AND THAT I WAS AFRAID TO DRIVE A CAR THAT HAD A MIND OF ITS OWN. THEIR ANSWER WAS, NO ERROR CODES IN THE CARS COMPUTER SO NOTHING IS WRONG! THIS COULD HAVE BEEN A DEADLY SITUATION BOTH TIMES! SOMETHING MUST GET DONE BEFORE SOMEONE GETS SERIOUSLY HURT OR KILLED.

**NHTSA Summary:**  
CAMERY GAS PEDAL SELF-ACCELERATING. WE HAD A TOYOTA CAMERY 1998 (BOUGHT IN TOYOTA, MORRISTOWN, NJ IN FEB, 1998). BY ABOUT 2003, THE GAS PEDAL BEHAVED A LITTLE FUNNY. WHEN THE CAR WAS STANDING STILL, THE GAS PEDAL WOULD NOT RESPOND WHEN YOU PRESS ON IT, BUT IT WOULD HURK AND SUDDENLY SPEED UP WHEN YOU KEEP PRESSING ON IT. THE PROBLEM WAS NOT LIKE THE 'POPULAR GAS PEDAL STUCK' THING DESCRIBED. WE LIVED WITH THE PROBLEM FOR A FEW YEARS BEFORE THE CAR GET CRASHED AND TOTALED (NOT FOR THE PEDAL REASON). IT WAS MY HUSBAND'S CAR. WHEN I OCCASIONALLY DROVE IT, IT'S UNSAFE WHEN I STOP FOR TRAFFIC LIGHTS, SINCE IT SUDDENLY SPED UP. BUT MY HUSBAND WAS USED TO IT.

**NHTSA Summary:**  
MY COMPLAINT IS ON THE USE OF THE CRUISE CONTROL DEVICE AND THE HIDDEN DANGERS OF IT'S USAGE, ESPECIALLY ON SLICK/POOR ROAD SURFACES. IF USED AND THE RESUME BUTTON IS ENGAGED THE CAR ATTEMPTS TO ACCELERATE TO THE SET SPEED WHILE THE TIRES HAVE NO TRACTION ON THE ROAD, CAUSING THE CAR TO SPIN OUT OF CONTROL, A SERIES OF 360S. THIS IS A VERY SERIOUS UNPREDICTABLE SITUATION NO MATTER WHAT YOUR EXPERIENCE IS AS A DRIVER. WE CAN SAVE LIVES IF A WARNING WAS IN FULL VIEW IN ALL VEHICLES, SIMILAR TO THE AIRBAG AND SEATBELT WARNINGS. I AM AWARE OF SEVERAL INCIDENTS BUT HAVE FOUND THAT THERE IS NOT ENOUGH ACTION BEING TAKEN TO INFORM DRIVERS. IN ADDITION TO SOME TYPE OF WARNING LABEL, MY QUESTION IS, CAN ANY ACTION BE TAKEN BY ALL CAR MANUFACTURERS, TO DESIGN THE CRUISE CONTROL OPTION TO DISENGAGE IF THERE IS INADEQUATE ROAD TRACTION? \*AK

**NHTSA Summary:**  
SIMPLY PUT, THE GAS PEDAL STICKS. MY WIFE HAS FOUND THE GAS PEDAL TO STICK WHILE SHE IS DRIVING. IN THE PAST, THE GAS PEDAL WOULD COME UP IN A SECOND OR SO. SHE DID NOT REALIZE WHAT WAS HAPPENING. SHE THOUGHT HER SHOE WAS GETTING IN THE WAY OR SOMETHING. BUT ON THE EVENING OF MARCH 12TH THE PEDAL WAS STICKING DOWN FOR ABOUT 5-10 SECONDS AS SHE WAS TRYING TO SLOW DOWN FOR AN INTERSECTION. IT FINALLY CAME UP AND SHE COULD COME TO A STOP. SHE CALLED ME IMMEDIATELY AND I INDICATED THAT THE CAR NEEDS TO GO IN IMMEDIATELY. THE EARLIEST THE DEALER WOULD TAKE THE CAR WAS THE MORNING OF MARCH 14TH. WHEN I EXPLAINED IT TO THE SERVICE GUY, HE KNEW EXACTLY WHAT WAS WRONG. HE EXPLAINED TO ME THAT THE AIR INTAKE FOR THE ENGINE IS CONNECTED TO THE THROTTLE BODY. THE AIR INTAKE FLAP HAS A BUILD UP AROUND 15,000 AND IT WILL NOT CLOSE PROPERLY. THIS WILL CAUSE THE GAS PEDAL TO STICK. HE TOLD ME THAT I NEED TO HAVE THIS SERVICED EVERY 15,000 MILES FROM HERE ON IN. HE WROTE ON THE SERVICE SLIP "ENGINE MINOR". I CALLED TOYOTA CONSUMER SERVICE AND THEY INDICATED THAT THIS IS AN USUAL INCIDENT. HOWEVER, HE SAID IN THE SAME CONVERSATION THAT THIS PROBLEM HAS OCCURRED WITH THE SAME YEAR MODEL ON OTHER CARS. THE GENERAL EMPHASIS ON HIS PART WAS I WAS OVER REACTING AND INDICATED THIS PROBLEM WILL NOT HAPPEN AGAIN. THIS CAR HAS ONLY 50,000 MILES. TOYOTA'S STANCE WAS THAT THIS PROBLEM HAS HAPPENED ON OTHER CARS BESIDES TOYOTA. I AM PLEADING WITH THIS ORGANIZATION TO INVESTIGATE THIS MATTER. I FEEL MY WIFE'S CAR IS NOT COMPLETELY SAFE UNLESS

**NHTSA Summary:**

ABS BRAKING SYSTEM ON 2003 TOYOTA CAMRY LE. AFTER READING THE NHTSA'S FEBRUARY 4, 2010 RELEASE ABOUT YOUR INVESTIGATION INTO TOYOTA PRIUS' ALLEGATIONS OF MOMENTARY LOSS OF BRAKING CAPABILITY WHILE TRAVELING OVER AN UNEVEN ROAD SURFACE, POTHOLE OR BUMP, I FINALLY LEFT VINDICATED, ALBEIT I STILL HAVE A PROBLEM. MY 2003 TOYOTA CAMRY LE HAS HAD THE SAME TYPE OF BRAKING PROBLEM SINCE I PURCHASED IT APRIL 2003 FROM THE TOYOTA DEALERSHIP IN DELTA, CO. WHENEVER I WAS BRAKING TO TURN A CORNER OR SLOW DOWN GOING STRAIGHT AHEAD, IF I HIT A BUMP OR POTHOLE THE BRAKE PEDAL WOULD SHUDDER, THE PEDAL DECREASES AND I LOSE MY BRAKES! I HAVE TO START PUMPING THE BRAKE PEDAL IMMEDIATELY TO GET THE BRAKES TO WORK. ONE TIME RECENTLY, MY BRAKE PEDAL WENT TO THE FLOOR AND I HAD TO SLOW DOWN WITH THE HELP OF MY EMERGENCY BRAKE WHICH DIDN'T REALLY WORK THAT WELL. AND I WAS GOING SLOWLY AT THE TIME. I TOOK THE CAR BACK TO THE DELTA, COLORADO TOYOTA DEALERSHIP SHORTLY AFTER MY PURCHASING THE CAR, HOWEVER, AS YOU CAN IMAGINE, THEY FOUND NO PROBLEM WITH THE ABS BRAKING SYSTEM. CAN YOU GUYS HELP ME? I AM NOT LOOKING FOR REVENGE AGAINST TOYOTA, MY WHOLE FAMILY SAVE ONE PERSON, DRIVES TOYOTAS. I JUST WANT BRAKES THAT WORK CORRECTLY. THANK YOU FOR ANY HELP YOU CAN PROVIDE ME.

**Date of Incident:** 20030516  
**Vehicle:** 2003 LEXUS ES300  
**Location of Incident:** PACIFIC PALISADES, CA  
**NHTSA Summary:**  
 SINCE I PURCHASED THE CAR, I HAVE BEEN COMPLAINING ABOUT A HESITATION AND STUTTERING WHEN ACCELERATING AFTER A SLOW-DOWN OR A STOP. I WAS TOLD THERE WAS NOTHING WRONG SEVERAL TIMES AND MORE RECENTLY HAVE BEEN TOLD IT IS A DESIGN FLAW IN THE COMPUTER-CONTROLLED ACCELERATOR AND CANNOT BE FIXED. I HAVE SEVERAL TIMES HAD A CLOSE CALL ON THE FREEWAY WHEN I NEEDED TO ACCELERATE QUICKLY AND THE CAR HESITATED BEFORE ACCELERATING. I HAVE NOT HAD AN ACCIDENT, BUT HAVE BEEN VERY FRIGHTENED BY THE DELAY IN

**Vehicle:** 2004 LEXUS RX330  
**Location of Incident:** WALNUT, CA  
**NHTSA Summary:**  
I AM LEASING A 2004 LEXUS RX 330 FWD WITH ABOUT 20,000 MILES ON IT. WHEN I TRY TO APPLY THE THROTTLE AFTER SLOWING DOWN THERE IS A SEVERE HESITATION, USUALLY FOLLOWED BY A SUDDEN SURGE IN POWER. AT TIMES THERE IS AN ADDITIONAL HESITATION WHILE THE TRANSMISSION IS DECIDING WHAT GEAR IT SHOULD BE IN. THIS IS ESPECIALLY NOTICEABLE WHILE MAKING A TURN AT AN INTERSECTION, AND ESPECIALLY DANGEROUS IF THERE ARE PEDESTRIANS IN THE INTERSECTION. I HAVE HAD IT TO THE LEASING DEALER (LONGO LEXUS) AND THEY REPROGRAMMED THE TRANSMISSION, WHICH PROVIDED A TEMPORARY AND PARTIAL FIX. AFTER A FEW WEEKS, APARENTLY THE TRANSMISSION REPROGRAMMED ITSELF AND THE PROBLEM RETURNED. I TOOK THE CAR TO A SECOND DEALER AND HE SAID THAT THEY HAD MANY SIMILAR COMPLAINTS ABOUT THAT DRIVELINE, BUT THERE WAS NO FACTORY FIX. I CALLED LEXUS CUSTOMER SERVICE AND THEY SAID THE SAME. THIS PROBLEM BEGAN SHORTLY AFTER I GOT THE CAR IN APRIL 2003 AND STILL EXISTS. IF LEXUS TRULY WANTED TO FIX THIS PROBLEM, IT WOULD HAVE ALREADY BEEN DONE. THEY NEED A PUSH. \*AK

**NHTSA Summary:**  
THREE TIMES CONSUMER WENT TO TOYOTA TO TELL THEM THAT SOMETHING WAS WRONG WITH MY BRAKES. THE FIRST TIME, (MAY 3,03) WAS BRAKING SLOWLY AND 2002 CAMRY JUMPED AHEAD, THE BRAKES DID NOT WORK. THE SECOND TIME (MAY 28,03) I CONSUMERWENT IN, TOLD THEM BRAKE PEDAL WENT SLOWLY DOWN TO THE FLOOR WHEN STOPPING FOR A LIGHT. 1993 CAMRY NEVER DID THAT. ALSO NO OTHER CAR I HAD DID THAT. THEY TESTED, SAID NOTHING WAS WRONG. THE THIRD TIME ON JULY 3, CONSUMERTOLD THEM, DO NOT TELL ME NOTHING WAS WRONG WITH BRAKES, DID NOT WANT TO HEAR IT! HE DROVE THE CAR AND SAID NOTHING WAS WRONG. NOW ON JULY 11, 2003, WHILE PARKED AT MACY'S MALL AT CROSS COUNTY, I AM BACKING UP SLOWLY OUT OF MY SPACE, AND ALL OF A SUDDEN, CONSUMER'S VEHICLE JUMPED AHEAD FLYING AND HIT TWO PARKED CARS FACING HER. ALL THE VEHICLES HAD DAMAGE. CONSUMER WILL NEVER DRIVE THAT CAR AGAIN, COULD HAVE KILLED SOMEONE.\*AK

**Location of Incident:** BIRMINGHAM, AL

**NHTSA Summary:**  
SUDDEN ACCELERATION AFTER TURNING A CORNER. I SLOWED DOWN TO TURN A CORNER TO APPROXIMATELY 10-15 MPH AND AFTER NEGOTIATING THE TURN ACCELERATED MODERATELY TO ABOUT 20-25 MPH. AT THAT INSTANT THE MOTOR STARTED TO RACE. THE CAR ACCELERATED RAPIDLY IN A FEW SECONDS TO APPROXIMATELY 35-40 MPH. I APPLIED THE BRAKES AND GOT THE CAR TO SLOW DOWN TO 20-25 MPH. WHEN THE BRAKE WAS RELEASED THE ENGINE STARTED TO RACE AGAIN AT AN ACCELERATING RATE. I THE DECIDED TO ABORT THE ACCELERATION AND STOP THE CAR THIS TIME BY THROWING THE SHIFT INTO "PARK." WHEN I ATTEMPTED TO DO THAT THE AUTOMATIC SHIFT WENT ONLY AS FAR AS NEUTRAL. I QUICKLY REALIZED THAT BEING IN NEUTRAL WAS OK AND APPLIED THE BRAKE AND PULLED OVER TO THE SIDE OF THE ROAD AND CALLED THE DEALER. THE DEALER PICKED UP THE CAR. THE DEALER TOLD ME IT WAS/MUST HAVE BEEN CAUSED BY THE FLOORMAT SLIDING UNDER THE ACCELERATOR. I DID NOT BELIEVE THAT BECAUSE THE FLOORMAT IF IT GOT UNDER THE ACCELERATOR PEDAL WOULD HAVE CAUSED A CONSTANT ACCELERATION. IN BOTH CASES THE THE CAR ACCELERATED AT AN ACCELERATING RATE. I ASKED THE DEALER TO CALL LEXUS TO SEE WHAT THEY SAID ABOUT THIS. EVENTUALLY WHEN I SPOKE TO THEM THEY TOLD ME LEXUS CONFIRMED THEIR DIAGNOSIS. THEY KNEW OF NO OTHER CAUSE FOR THE PROBLEM.

**Date of Incident:** 20030804  
**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** CALGARY, 00

**NHTSA Summary:**

OUR FAMILY PURCHASED A BRAND NEW 2004 TOYOTA SIENNA AWD AND HAD COUNTLESS ISSUES WITH IT. THE MOST SERIOUS ISSUE WAS - RANDOM UNPREDICTABLE ACCELERATION RESPONSES. WE CONTACTED TOYOTA CANADA & JAPAN IN 2003. THERE IS ABSOLUTELY 100% NO DOUBT IN MY MIND, OR MY WIFE'S MIND, THAT THE TOYOTA PRODUCT LINE HAS SOMETHING WRONG ELECTRONICALLY IN THEIR ACCELERATOR PEDAL OR TRANSMISSION SENSORS - OR THE SOFTWARE THAT INTERFACES WITH THEM. WE DID NOT HAVE STICKY GAS PEDALS OR FLOOR MAT ISSUES - WE HAD A VEHICLE THAT DIDN'T OPERATE THE WAY WE WERE ASKING IT TO. THE VEHICLE NEVER CONSISTENTLY RESPONDED TO THE ACTUAL PRESSURE BEING PLACED ON THE ACCELERATOR PEDAL. A LIGHT PRESS IN PARKING LOT DRIVING WOULD SOMETIMES RESULT IN WHAT FELT LIKE FULL THROTTLE ACCELERATION AND WHEN TRYING TO TURN ACROSS TRAFFIC AT AN INTERSECTION, OR DURING MERGING - THE VEHICLE WOULD HESITATE AND THEN MOVE THE VEHICLE WHEN IT WAS NO LONGER SAFE TO DO SO. TOYOTA SAID "THEY DID NOT CONSIDER THIS BEHAVIOUR A SAFETY ISSUE" IT WAS ONLY "A NUISANCE PROBLEM". FIRST OUR DEALERSHIP IGNORED THE PROBLEM. THEN THEY SAID "MY WIFE DIDN'T TEACH THE VEHICLE TO DRIVE PROPERLY" - IT HAD A SMART LEARNING TRANSMISSION YOU KNOW. THEY FINALLY ADMITTED THERE WAS A PROBLEM AFTER WE CONTINUED TO VOICE OUR CONCERN OVER SEVERAL NEAR MISS INCIDENTS WITH THE VEHICLE. IN ONE INCIDENT, WHILE ON THE HIGHWAY USING CRUISE CONTROL - THE VEHICLE UNEXPECTEDLY ACCELERATED FULL THROTTLE INTO A CORNER AT OVER 140 KPH FORCING US ONTO THE SHOULDER AND ALMOST OFF THE ROAD. IT WAS A NERVE SHATTERING EXPERIENCE. OUR TOYOTA DEALER FINALLY ADMITTED A SIMILAR ACCELERATION PROBLEM EXISTED IN THE CAMRY / COROLLA LINES AND THAT IT WAS TRANSMISSION SOFTWARE RELATED. AFTER SEVERAL MONTHS OF THE RUN AROUND FROM TOYOTA WITH NO FIX IN SIGHT - BEING TOLD BY THE OWNER OF THE DEALERSHIP TO DRIVE THE VEHICLE IN 3RD GEAR TO MINIMIZE THE SURGES UNTIL A SOFTWARE FIX WAS CREATED - WE WALKED AWAY FROM THE VEHIC

**Date of Incident:** 20030806  
**Vehicle:** 2002 TOYOTA HIGHLANDER  
**Location of Incident:** MANHATTAN BEACH, CA

**NHTSA Summary:**

AFTER ONLY HAVING MY NEW 2002 TOYOTA HIGHLANDER FOR APPROX. 8 MONTHS, THE ACCELERATOR IN THE CAR STUCK AND I ENDED UP RUNNING INTO A CAR. I COMPLAINED TO TOYOTA AND HAD THE DEALER LOOK AT THE CAR NUMEROUS TIMES, BUT THEY KEPT TELLING ME THERE WAS NOTHING WRONG. WELL 8 YEARS LATER AND THEY STILL HAVEN'T RECALLED MY CAR, EVEN THOUGH THEY HAVE OTHER YEARS.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10313789  
**Date of Incident:** 20030815  
**Vehicle:** 2004 LEXUS RX330  
**Location of Incident:** CHICAGO, IL

**NHTSA Summary:**

PURCHASED A NEW 2004 LEXUS RX 330 IN AUGUST OF 2003 AND REPEATEDLY BROUGHT THE CAR TO DEALERSHIPS COMPLAINING OF A DISCONNECT BETWEEN THE ELECTRONIC ACCELERATOR AND THE TRANSMISSION. WHEN ATTEMPTING TO ACCELERATE IN AN INTERSECTION OR ON A FREEWAY ENTRANCE RAMP, THE CAR WILL HESITATE FOR A FEW SECONDS AND THEN CATAPULT FORWARD. ALSO, WHEN DRIVING AT LOW SPEEDS, THE TRANSMISSION WILL ERRATICALLY JUMP BETWEEN DIFFERENT GEARS, AS IF LOOKING FOR THE OPTIMAL GEAR. I CAN BEST DESCRIBE THIS TRANSMISSION AS SCHIZOPHRENIC. I HAVE CONTACTED MULTIPLE LEXUS DEALERS OVER THE YEARS FROM MINNEAPOLIS, TO CHICAGO TO SALT LAKE CITY AND THEY ALL TOLD ME THEY ARE AWARE OF THE PROBLEM AS MANY CUSTOMERS HAVE COMPLAINED. HOWEVER, LEXUS HAS NEVER OFFERED SERVICE OR A RECALL TO FIX THE PROBLEM. THEY HAVE REPROGRAMMED MY TRANSMISSION ON 2 OCCASIONS AND TOLD ME TO USE PREMIUM FUEL. NONE OF THESE ACTIONS CORRECTED THE SITUATION. I FEEL THAT IN A BUSY INTERSECTION, THE UNPREDICTABLE ACCELERATION OF MY VEHICLE PROVIDES NO ASSURANCE THAT MY CAR WILL MOVE FORWARD WHEN THE ACCELERATOR IS PRESSED. THIS CAN LEAD TO COLLISION AND INJURY.

**Date of Incident:** 20030827

**Vehicle:** 2003 TOYOTA CAMRY

**Location of Incident:** GREENWICH, CT

**NHTSA Summary:**

2003 TOYOTA CAMRY XLE WHILE STOPPED WITH FOOT ON THE BRAKE IN A LINE OF CARS WAITING FOR THE TRAFFIC LIGHT TO TURN GREEN, CAR SUDDENLY ACCELERATED AND CRASHED INTO THE REAR OF THE CAR IN FRONT CAUSING SIGNIFICANT FRONT-END DAMAGE TO OUR CAR. AGAIN, THE DRIVER'S FOOT WAS ON THE BRAKE. THE FLOOR MAT (1) WAS ALL THE WAY BACK AGAINST BASE OF THE SEATS AND NOT IN THE AREA OF THE ACCELERATOR PEDAL AND (2) THE MAT IS BY DESIGN, CUT BACK 3 TO 4 INCHES SHORT OF THE CARPETED AREA UNDER, NEAR AND AROUND THE ACCELERATOR PEDAL, AND (3) THE BASE AND REAR OF THE ACCELERATOR PEDAL ARE SUSPENDED 2 1/2 TO 3 INCHES AWAY FROM THE CARPETED FLOOR AND IT IS VERY DIFFICULT TO PRESS THE ACCELERATOR TO A POSITION CLOSE TO THE FLOOR--AND IT DEFINITELY BEYOND THE PEDAL TRAVEL DISTANCE THAT DRIVERS WOULD/COULD PRESS ON THE ACCELERATOR PEDAL. PROBLEM WAS REPORTED TO TOYOTA DEALER SERVICE ASSOCIATE WHO SAID "NO PROBLEM FOUND" PROBLEM CONTINUES TO OCCUR PERIODICALLY, BUT WE NOW KNOW TO PRESS DOWN HARDER THAN NORMAL WHEN STOPPED AT TRAFFIC LIGHTS AND IN STOP AND GO TRAFFIC. (WE ALSO NOTED A SIMILAR PROBLEM WITH OUR 2006 TOYOTA CAMRY XLE--BUT THE PROBLEM HAPPENS WHEN CAR IS IN REVERSE. WHEN STARTING UP IN THE MORNING AND BACKING OUT OF THE GARAGE WITH FOOT COVERING THE BRAKE (AND NOT ON THE ACCELERATOR PEDAL), THE ENGINE RPM'S SUDDENLY ACCELERATE AND IF YOU AREN'T AWARE OF THE PROBLEM AND DON'T HAVE YOUR FOOT ON THE BRAKE, THE CAR CAN SPEED UP SIGNIFICANTLY AND GO OUT OF CONTROL. THIS PROBLEM WAS ALSO REPORTED TO TOYOTA DEALER SERVICE ASSOCIATE WHO ALSO SAID: "NO PROBLEM FOUND.") \*TR

**NHTSA ODI Number:** 10037542

**Date of Incident:** 20030907

**Vehicle:** 2002 LEXUS ES300

**Location of Incident:** RALEIGH, NC

**NHTSA Summary:**

I WAS DRIVING AT ABOUT 35 MPH ON HIGHWAY. WHEN THE TRAFFIC SLOWED DOWN, I APPLIED THE BRAKE TO BRING DOWN THE SPEED OF THE CAR TO ABOUT 3-7 MPH. AFTER FOLLOWING THE CAR IN FRONT OF ME FOR ABOUT 5 SECONDS AT ABOUT 3/4 CAR DISTANCE, I SAW THE CAR IN FRONT OF ME SPEED UP SLOWLY AND I DECIDED TO FOLLOW UP BY PRESSING THE ACCELERATOR MODERATELY. THE CAR FIRST SHUDDERED, THEN PAUSED FOR ABOUT 1 SECOND, AND FINALLY ACCELERATED AT ALMOST MAXIMUM POWER. THIS WAS A NEAR MISS. BEFORE THIS HAPPENED, I BROUGHT OUR CAR TO LEXUS DEALER TO COMPLAIN ABOUT SHUDDERING/PAUSING WHEN ACCELERATING FROM LOW SPEED AFTER THE CAR WAS UPDATED WITH TSB-TC004-03; THE CHIEF TECHNICIAN DROVE THE CAR AND REPRODUCED THE KIND OF PROBLEMS THAT WE HAD. HOWEVER, HE SAID THAT HE COULD NOT DO ANYTHING ABOUT IT AND WAS GOING TO WRITE A REPORT TO TOYOTA CORP BECAUSE IT WAS A SOFTWARE PROBLEM. ON THE OTHER HAND, THE RECEIPT FROM THE DEALER SAID THAT THEY DID NOT FIND ANY ABNORMAL TRANSMISSION SHIFT DURING TEST DRIVING, BUT WOULD FILE A REPORT. WHAT A CONTRADICTION! THE DANGER OF THIS TRANSMISSION PROBLEM WAS FURTHER MAGNIFIED BY THE FACT THAT 2002 ES300 RUNS VERY SMOOTHLY AT MOST TIMES (>98%). THIS SHUDDER/PAUSE/ACCELERATION OR PAUSE/ACCELERATION THAT ONLY OCCURS SPORADICALLY UNDER VERY SPECIAL CONDITIONS GIVES DRIVERS SURPRISE THAT IS THE LAST THING THEY WANT DURING DRIVING. FOR CURIOSITY, I TESTED DRIVING THE CAR FOR ABOUT 50 MINUTES BY REPEATLY SLOWING DOWN TO ABOUT 5 - 10 MPH BY APPLYING BRAKE, THEN ALLOWING THE CAR TO ROLL FOR ABOUT 3 SECONDS WITHOUT PRESSING GAS PADDLE, AND THEN ACCELERATING MODERATELY TO ABOUT 20 - 30 MPH. THE PROBABILITY FOR THE SHUDDER/PAUSE/ACCELERATION IS ABOUT 5%, WHILE THAT FOR PAUSE/ACCELERATION

C-212

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ABOUT 15%. IT SEEMED THAT THIS PROBLEM HAPPENDED MORE OFTEN ON DOWN/UP

HILL. \*AK

**Toyota ID Number:**  
**NHTSA ODI Number:** 10081145  
**Date of Incident:** 20030908  
**Vehicle:** 2003 TOYOTA MATRIX  
**Location of Incident:** FRANKLIN, TN

**NHTSA Summary:**

I TOOK THE MATRIX IN TWICE SHORTLY AFTER I BOUGHT IT BECAUSE THE CAR WOULD UNEXPECTEDLY LUNGE FORWARD WHILE AT A COMPLETE STOP. I ALSO COMPLAINED THAT THE BRAKES FELT "LOOSE" AND DID NOT "CATCH" AS THEY SHOULD. I WAS ADVISED BOTH TIMES BY THE SERVICE MANAGER THAT THEY COULD NOT DUPLICATE THE PROBLEM AND THAT NOTHING ABNORMAL WAS FOUND WITH CAR. WHILE I WAS AT A STOP LIGHT WITH THE BRAKE PEDAL FULLY ENGAGED. DUE TO MY PREVIOUS EXPERIENCES WITH THE CAR LUNGING FORWARD, I WOULD KEEP SEVERAL FEET BETWEEN ME AND THE CAR IN FRONT OF ME TO AVOID AN ACCIDENT. THIS TIME THE CAR NOT ONLY LUNGED FORWARD, BUT IT WAS LIKE THE ACCELERATOR STUCK-I HAD MY FOOT ON THE BRAKE BUT COULD NOT STOP THE CAR AFTER IT LUNGED FORWARD AND I HIT A CAR THAT WAS IN FRONT OF ME AT THE LIGHT. MY CAR DID NOT STOP UNTIL I WAS ALMOST PARALLEL WITH THE OTHER CAR ON THE PASSENGER SIDE! I HAVE HAD THE CASE LOOKED AT BY TOYOTA, AND THEIR LEGAL DEPARTMENT HAS ADVISED THAT NOTHING IS WRONG WITH THE CAR-THEIR ONLY EXPLANATION IS THAT THE VEHICLE OPERATES TO "NORMAL" SPECIFICATIONS. THEY HAVE ADVISED THAT THE CAR WILL LUNGE FORWARD WHILE THE AIR CONDITIONER IS AS WHEN THE AC COMPRESSOR CYCLES, IT INCREASES THE ENGINE RPM AND THE VEHICLE WILL MOVE FORWARD. MY AIR CONDITIONER WAS NOT ON AT THE TIME OF THIS ACCIDENT, HOWEVER. \*LA

**Location of Incident:** WATAGA, IL

**NHTSA Summary:**

WHILE DRIVING ON TOLLWAY IN OUR 2000 SIENNA WITH CRUISE SET TO 70 MPH I PUSHED THE ACCELERATOR A LITTLE TO INCREASE SPEED A FEW MPH. IT INSTANLY TOOK OFF AS IF I HAD HIT THE "RESUME" ON THE CRUISE CONTROL (CC) AND HAD IT SET FOR 120 MPH. AFTER A FEW SECONDS OF PANIC I HIT THE BRAKES TO SLOW THE VAN AND RELEASE THE CC. NO LUCK. WITH NO TRAFFIC NEAR ME I LOOKED TO SEE IF THE ACC. PEDAL WAS STUCK, FLOOR MAT WAS INTERFERING, OR SOMETHING ELSE HOLDING THE PEDAL DOWN - NOTHING WAS. I TURNED OFF THE CC, PUMPED THE ACCELERATOR PEDAL, STOMPED ON THE BRAKES AND WAS JUST ABOUT TO PUT VAN IN NEUTRAL WHEN WE WENT BACK TO NORMAL CONTROL. WE TOOK VAN TO TOYOTA DEALER NEXT DAY, BUT THEY COULD FIND NOTHING WRONG. THEY CALLED TOYOTA AND WERE TOLD IT WAS NOT A KNOWN PROBLEM, SO NO FIX. WE STILL DRIVE IT DAILY, BUT DO NOT USE THE CC IN TRAFFIC, OR ACCELERATE WITH THE CC ON. THIS WAS NOT A STUCK PEDAL, NOR A FLOOR MAT PROBLEM. BECAUSE WE HAVE NOT USED THE CC IN THE SAME MANNER AS WHEN THE SUDDEN ACCELERATION HAPPENED, I WOULD THINK IT IS CC RELATED.

**Vehicle:** 2004 TOYOTA CAMRY SOLARA  
**Location of Incident:** HILTON HEAD ISLAND, SC

**NHTSA Summary:**  
MY 2004 TOYOTA SOLARA SLE V6 EXHIBITS SEVERE THROTTLE LAG AT SPEEDS LOWER THAN 50 MPH. THE LAG IS AT ITS WORST WHILE DECELERATING AND THEN ACCELERATING, WITH A LAG OF UP TO 1-2 SECONDS. THE LAG IS ALSO SEVERE FROM A STOP OR FROM A ROLLING SPEED OF 10 MPH OR LESS; TO COMPENSATE FOR THE LAG, IT IS NATURAL FOR THE DRIVER TO PRESS THE GAS PEDAL EVEN FURTHER AND WHEN THE VEHICLE FINALLY DECIDES TO RESPOND, IT RESPONDS WITH RAPID ACCELERATION. THIS IS A SAFETY ISSUE AND HAS NEARLY CAUSED SEVERAL ACCIDENTS THROUGHOUT MY 3 YEARS OF OWNERSHIP. TOYOTA ISSUED A TSB FOR NEW PROGRAMMING FOR THE ECU/ECT AND IT HAS FAILED TO FIX THE PROBLEM.\*NM

**NHTSA Summary:**  
I WAS DRIVING DOWN THE 91 FREEWAY IN CA AND ALL OF A SUDDEN MY ACCELERATOR STUCK. I WAS FRANTIC TRYING TO STOP MY CAR. I PRESSED ON MY BRAKES AS HARD AS I COULD. IN THE MEANTIME I GOT OVER TO THE SIDE OF THE FREEWAY AND EXITED THE NEAREST OFF RAMP (CARMENITA). I DROVE THE STREETS FOR AWHILE AND CAME TO A RESIDENTIAL NEIGHBORHOOD. SOMETIME DURING THIS TIME THE PROBLEM SEEMED TO GET BETTER. I PULLED OVER TO A HOUSE WITH TWO WOMEN STANDING IN FRONT AND I WAS ABLE TO STOP AND ASKED THEM FOR HELP. ONCE I TURNED OFF THE ENGINE AND BACK ON AGAIN THE PROBLEM WAS GONE. I WAS ABLE TO CONTINUE TO MY DESTINATION WHICH WAS TO VISIT MY DAUGHTER IN THE HOSPITAL. IT WAS ONE OF THE SCARIEST MOMENTS OF MY DRIVING EXPERIENCES. IT IS AMAZING THAT I

**Toyota ID Number:**  
**NHTSA ODI Number:** 10045944  
**Date of Incident:** 20031110  
**Vehicle:** 2002 LEXUS ES300  
**Location of Incident:** ROCKVILLE, MD

**NHTSA Summary:**  
1. WHILE PULLING INTO A PARKING SPACE, AT 2-4 MPH, WITH MY FOOT ON THE BRAKE, THE CAR SUDDENLY ACCERATED AT FULL SPEED, JUMPING THE CURB AND HITTING A TREE WITH FULL FORCE. BECAUSE OF PREVIOUS CONCERNS WITH THROTTLE PROBLEMS NOTED WITH THE DEALERSHIP AT 1000 AND 5000 MILE CHECK, I IMMEDIATELY CALLED THE LEXUS DEALERSHIP. AFTER A CONFERENCE CALL WITH LEXUS ROADSIDE ASSISTANCE AND THE DEALERSHIP, MY CAR WAS FLAT BEDDED TO THE DEALERSHIP. THE FRONTAL CRASH RENDERED THE VEHICLE UNDRIVABLE. RADIATOR DAMAGE WITH LEAKAGE OF FLUID COVERED A PORTION OF THE PARKING LOT. THE LEXUS DEALERSHIP SAID THEY WAS NO PROBLEM WITH THE CAR. I COULD HAVE BEEN KILLED OR SOMEBODY ELSE LIVE COULD HAVE BEEN IN DANGER. 2. THE FRONT AIR BAGS DID NOT INFLATE. 3. THE BRAKE ROTORS HAD TO BE CORRECTED AT 1500 MILES AND A "PART" WAS ORDERED AND PUT ON THE CARE TO CORRECT THIS PROBLEM. 4. THE CAR WHEN DRIVING AT ABOVE 50 PULLS TO THE LEFT AND FROM THE BEGINNING IT FELT AS THO THE CAR WAS UNEVEN EVEN WHEN NOT MOVING. AT THAT TIME I REQUESTED A WRITTEN EXPLANATION OF THIS PROBLEM AND TOLD MY RECORD AT THE DEALERSHIP WOULD SUBSTANTIATE THIS. ON THE NIGHT OF THE ACCIDENT I LEARNED BY REVIEWING COMPLAINTS FROM THE OFFICE OF DEFECT INVESTIGATIONS ON THE NHTSA WEB SITE THAT THE PROBLEMS HAVE BEEN KNOWN BY THE COPORATE OFFICE OF LEXUS FROM AS EARLY AS JANUARY, 2002 IN REGARDS TO ALL OF THE ABOVE PROBLEMS. I ALSO FOUND OUT THERE HAVE BEEN TWO RECALLS ON THIS VEHICLE THAT I WAS NOT INFORMED ABOUT. I WILL BE REQUESTING AN INVESTIGATION WITH THE LEXUS EAST REGIONAL OFFICE AND DISCUSSING THIS WITH THE ROCKVILLE LEXUS OFFICE. I BELIEVE THAT THIS CAR IS UNSAFE TO DRIVE. I BROUGHT THE LEXUS VEHICLE EVEN WITH ITS PRICE TAG BECAUSE OF ITS REPUTATION AND TO DRIVE MY 3 YEAR OLD GRANDSON AND 1 YEAR OLD GRANDDAUGHTER IN THE SAFEST MANNER I COULD FACILITATE. I AM SURE THAT MY SON AND DAUGHTER-IN-LAW WILL NOT ALLOW THIS AFTER THIS CRASH!!!!\*AK

**Vehicle:** 1996 TOYOTA COROLLA  
**Location of Incident:** NILES, MI

**NHTSA Summary:**  
I NO LONGER OWN THIS VEHICLE, BUT IT WAS A 1996 TOYOTA COROLLA, AND I HOPE THE INFORMATION I PROVIDE HERE CAN HELP SOMEHOW WITH ANY CURRENT INVESTIGATIONS. AROUND 100,000 MILES, I TOOK MY CAR TO A NON-DEALER MECHANIC TO REPLACE MY TIMING BELT AS A MATTER OF MAINTENANCE. AFTER THIS REPLACEMENT MY CRUISE CONTROL NEVER WORKED AGAIN, AND I NOTICED THAT IN MOMENTS OF DECELERATION (EITHER IN BRAKING OR COASTING) THAT THE ENGINE WOULD SUDDENLY RACE AND I COULD FEEL THE GAS PEDAL PULL FROM ITS RESTING POSITION. PLEASE NOTE THAT THE MODEL I'VE INDICATED IS INACCURATE -- I DON'T RECALL WHAT THE MODEL WAS AS I NO LONGER OWN THE VEHICLE. I'VE BEEN AS SPECIFIC AS I CAN BE. I JUST THOUGHT IT MIGHT PROVE USEFUL. THE INCIDENT DATE IS ALSO INACCURATE AS THIS OCCURRED FREQUENTLY ENOUGH TO NOTICE, BUT NOT OFTEN ENOUGH OR SEVERELY ENOUGH TO WARRANT MY TAKING TO A DEALER.

**Vehicle:** 2004 LEXUS ES330  
**Location of Incident:** CENTREVILLE, VA

**NHTSA Summary:**  
VEHICLE DOES NOT ALWAYS RESPOND PROPERLY TO DRIVER DEPRESSING ACCELERATOR. IN SOME CASES, WHEN COASTING SLOWLY (E.G. UNDER 10 MPH), SUDDENLY PRESSING THE ACCELERATOR SHARPLY WILL HAVE NO EFFECT FOR ABOUT 1.5 SECONDS. DURING THE DELAY, THE ENGINE WILL CONTINUE TO IDLE AND VEHICLE SPEED DO NOT INCREASE. AFTER THE DELAY, THE ENGINE AND VEHICLE SPEED INCREASE IN ACCORDANCE WITH THE ACCELERATOR PEDAL POSITION. THIS CAN LEAD TO AN ACCIDENT IF THE DRIVER IS MAKING A LEFT TURN WHEN THERE IS ONCOMING TRAFFIC. THERE IS ANOTHER POSSIBLY RELATED ANOMALY WITH THE CAR: WHEN DRIVING, UNDER SOME CIRCUMSTANCES, WHEN THE DRIVER SHARPLY PRESSES THE ACCELERATOR, THE ENGINE AND VEHICLE SPEED WILL NOT CHANGE FOR ABOUT 1.5 SECONDS. AFTER THE DELAY, THE TRANSMISSION DOWN SHIFTS AND THE ENGINE SPEED INCREASES. \*AK

**Date of Incident:** 20031209  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** GENESEO, IL

**NHTSA Summary:**  
SOMETIME IN OCT. WHILE PULLING OFF OF I-74 ONTO 53RD ST. IN DAVENPORT, IA, WAS THE FIRST TIME THAT WHEN THE BRAKE WAS APPLIED THE CAR SPED UP RATHER THAN SLOWED DOWN. THIS HAPPENED AGAIN TOWARDS THE END OF NOVEMBER WHILE TRAVERSING FROM US-6 ONTO I-80 IN GENESEO. BOTH TIMES I HAD BEEN USING THE CRUISE CONTROL, DISENGAGED IT BY APPLYING THE BRAKE AND AS THE CAR SLOWED DOWN REAPPLICATION OF THE BRAKE CAUSED THE CAR TO SPEED UP. BY TAKING MY FOOT OFF THE BRAKE AND THEN REAPPLYING THE BRAKE CAR SLOWED NORMALLY ABOUT THE MIDDLE OF DECEMBER I HAD A MORE SERIOUS INCIDENT WHILE PULLING INTO A CONVENIENCE STORE OFF OF WOLF ROAD IN GENESEO. I DISENGAGED THE CRUISE AND PULLED INTO A PARKING PLACE. THE CAR SLOWED NORMALLY AND WAS ALMOST TO A STOP WHEN IT BEGAN TO ACCELERATE WHILE THE BRAKE WAS APPLIED. I TURNED THE CAR TO THE RIGHT, AND JUST MISSED THE BUILDING, BUT TOOK OUT A 4X4 SUPPORT FOR THE ROOF OVERHANG. DAMAGE WAS LIMITED TO DENTS ON THE CAR AND THE 4X4. NO PERSONAL INJURIES WERE INVOLVED. AFTER THE FIRST OCCURANCE I THOUGHT IT WAS MY MISTAKE, I APPLIED THE ACCELERATOR WHEN I MEANT TO APPLY THE BRAKE. THE SECOND TIME I FELT IT WAS PROBABLY A PROBLEM WITH THE CAR, AND WOULD BRING IT UP WITH TOYOTA NEXT TIME I BROUGHT THE CAR IN. THE THIRD TIME I WAS SURE THAT IT WAS A PROBLEM FOR TOYOTA AND I TOOK THE CAR INTO THE TOYOTA

**Additional Summary:**  
Per correspondence with Jordan Ziprin, this complainant states that she has had two different Camrys, two different years and experienced SUA with both of them. First incident in early 2004, when pulling into a parking space at work the vehicle "fell over seven feet into a usually busy street" causing \$14,000 worth of damage to the vehicle. "Then in the Fall of 2005 I parked in the exact same spot again for the first time in a year (2005 Camry) only this time the steering had not frozen, and I could aim for the building. It was close, and this time I did not have any serious injuries like the first time."

Per news article in the Palm Beach Post dated March 17, 2004

"A Boynton Beach woman hit by a vehicle at a suburban Delray Beach shopping center died Monday, the Palm Beach County sheriff's Office said. Blossom S. Malick, 79, sustained serious injuries when a 2003 Toyota hit her in the parking lot of the Lakeside Shoppes at 5869 West Atlantic Ave. according to a report. Malick was getting into her parked 2004 Chrysler about 5:55 p.m. when Leonard H. Rubin, 87, of Delray Beach ran into her as he pulled out of his parking space, a report stated. The sheriff's office is investigating."

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

According to Rubin's family, he was never charged in the incident and Malick's family never sued. Rubin's son-in-law Marvin Cohen reported crash to NHTSA, received a call back and was told that the evidence in the crash as "inconclusive" and that they would keep it on file.

USA TODAY News Article "They died in Toyotas, leaving many questions" -

"Leonard Rubin, then 88, was backing out of a handicap parking spot outside 3 G's Deli on Atlantic Avenue in Delray Beach, when his car accelerated and pinned Malick against her car. She died the same day.

Rubin told police that the car malfunctioned and accelerated on its own. He also said the brakes wouldn't work. He managed to move the car away from Malick after the crash and park about 20 feet away.

Rubin, who was issued a citation by Palm Beach County officers, had purchased the car the previous summer. It had just 2,100 miles on it. He refused to drive it again and returned it to the Massachusetts dealer.

Rubin died in April 2008."

WITNESSES SAW MY PARENTS VEHICLE (A 2002 TOYOTA CAMRY) COMING TO A STOP AND THEN SUDDENLY ACCELERATE.\*AK  
**Additional Summary:**  
Crash happened in Las Vegas, NV

Per USA Today news article "They died in Toyotas, leaving many questions":

"George Yago was attempting to park his car on the fourth floor of a casino parking lot when the car accelerated off the side of the parking deck and fell to the ground. He and his wife of 49 years died, and the crash left their only son wondering whether his father had suffered from a heart attack moments before the crash.

According to newspaper reports, witnesses saw the Camry stop, then accelerate. It jumped a curb and then plowed through a wall. It landed on its roof.

The son, George Yago III, did not respond to requests for an interview. But he filed a complaint about his parents' car with NHTSA in April 2004, just a few months after his parents' crash, and years before the recalls.\*

Toyota Camry 2002 Model: Sudden Acceleration Problem A sudden acceleration problem happened to my Toyota Camry 2002 model on February 5, 2004, when I was going to my office around 7:30 AM. As I was coming to a complete stop at the 1st Stop sign in my neighborhood, and just a few seconds before I was to take a left turn at the intersection, suddenly my car made some noise and accelerated by itself and started zooming fast and went straight ahead. I pressed the break, but it didn't work, and then I put the car on neutral, it didn't work, and then pulled the hand break and even that did not stop the car. The car continued its race for about a quarter mile and finally I had to dash it against a snow bank in the front yard of a house

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

in the cul de sac. Fortunately, there were no persons or cars on the street. Otherwise, when the car was going out of control at such a speed, it could have hit someone. Likewise, luckily, there was no injury for me, and there was no damage to the car either. Later in the afternoon I towed the car to the nearest Toyota dealer and after they inspected the car, they told me that there was no malfunctioning in the car. They refused to believe that the car would have accelerated by itself unless I had pressed the gas. They said, it is impossible for the car to have picked up self-acceleration. I am absolutely sure that I did not press the gas by mistake. Why should I keep on pressing the gas for about a quarter mile, when my intention is to stop the car and save my life and others' lives too? I have taken up the matter with the Toyota's product liability department. And they said they will get the car inspected once again. But my concern is that, where is the guarantee that the car will not behave erratically again in the future, even though Toyota mechanics are not able to pinpoint this problem.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10079871  
**Date of Incident:** 20040207  
**Vehicle:** 2004 TOYOTA 4RUNNER  
**Location of Incident:** RENO, NV  
**NHTSA Summary:**  
PROBLEMS WITH THE BOTTOM OF THE SEATS MOVING AROUND AS IF NOT IN THE LOCKED POSITION. THE VEHICLE ACCELERATED UP TO 5 MPH ALTHOUGH THE CONSUMER'S FOOT WAS NOT ON THE ACCELERATOR. AT TIMES WHILE SHIFTING FORM DRIVE TO NEUTRAL AND THEN REVERSE, THE ENGINE COULD BE HEARD REVVING UP THEN THE VEHICLE WOULD JERK BACKWARDS. THE VEHICLE WAS TAKEN TO A LOCAL DEALER WHO TEST DROVE THE VEHICLE. THE TECHNICIAN CONCLUDED THAT THE VEHICLE WAS PERFORMING AS DESIGNED AND REFUSED TO PROVIDE FURTHER ASSISTANCE. \*NM

**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** CATONSVILLE, MD  
**NHTSA Summary:**  
THERE HAVE BEEN A NUMBER OF INCIDENTS OF POSSIBLE UNEXPLAINED ACCELERATION OF MY 2003 CAMRY, WHERE CAR SEEMS TO SURGE FORWARD WITHOUT ME DOING ANYTHING.\*AK  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10058176  
**Date of Incident:** 20040214  
**Vehicle:** 2001 TOYOTA PRIUS  
**Location of Incident:** SAN JOSE, CA  
**NHTSA Summary:**  
THE 2001 TOYOTA PRIUS HAS A FAULTY ACCELERATOR PEDAL AND SHOULD BE COVERED UNDER THE 8-YEAR HYBRID SYSTEM WARRANTY. NOT ONLY ARE THERE SAFETY ISSUES WITH THIS PROBLEM (E.G. SUDDEN LOSS OF ACCELERATION THAT COULD CAUSE ACCIDENTS, INCORRECT COMMUNICATION BETWEEN THE ACCELERATOR AND THE HYBRID SYSTEM, ETC.) BUT THERE IS A LACK ON TOYOTA'S PART TO ADMIT THAT THE ACCELERATOR IS A CRITICAL COMPONENT OF THE HYBRID SYSTEM. WHEN THE ACCELERATOR FAILS, IT CAUSES THE "CHECK HYBRID SYSTEM" LIGHT TO APPEAR ON THE DASHBOARD AND CAN MAKE THE CAR DANGEROUSLY UNRESPONSIVE (ESPECIALLY ON THE FREEWAY). THE HYBRID SYSTEM IS EXPECTING INFORMATION FROM THE ACCELERATOR, AND WHEN IT DOESN'T RECEIVE IT, EITHER THE GAS ENGINE, OR THE ELECTRIC ENGINE, OR BOTH ENGINES FAIL TO OPERATE. EVEN THOUGH TWO TOYOTA DEALERS (STEVENS CREEK TOYOTA AND CAPITOL TOYOTA) AGREE THAT THIS IS A SERIOUS SAFETY ISSUE, BOTH CLAIM THAT THIS REPAIR IS NOT COVERED UNDER THE 8-YEAR HYBRID SYSTEM WARRANTY. HOWEVER, IF THIS ACCELERATOR PROBLEM IS NOT DIRECTLY RELATED, THEN WHY DOES THE WARNING LIGHT COME ON WHEN THE ACCELERATOR SENSOR FAILS? ALSO, WHY DID THE DEALER WHO PERFORMED THE \$654.52 REPAIR TELL ME THAT THE COMPLETE ACCELERATOR ASSEMBLY PART HAD JUST BEEN RECENTLY REVISED BY TOYOTA? (I MIGHT ADD THAT AN INDEPENDENT ELECTRICAL ENGINEER ANALYZED THE PART AND CONCLUDED THAT THE ACCELERATOR HAS AN MTBF OF 1500 HOURS. HE CONCLUDED THAT EVERY PRIUS OWNER WOULD BE SUBJECT TO THIS SAME HAZARDOUS PROBLEM SEVERAL TIMES

C-244

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

DURING THE LIFETIME OF THE CAR!!) I HAVE SUBSTANTIAL EVIDENCE FROM OTHER PRIUS OWNERS WHO ARE EXPERIENCING THE SAME PROBLEMS AND WOULD BE HAPPY TO SHARE THIS INFORMATION WITH YOUR INVESTIGATION TEAM. IN MY OPINION, THESE PROBLEMS ARE SERIOUS ENOUGH TO MERIT CONSIDERATION FOR EITHER A RECALL OR A REVISION OF TOYOTA'S "HYBRID SYSTEM" WARRANTY POLICIES. I APPRECIATE ANY ASSISTANCE YOU CAN PROVIDE ME IN THIS MATTER AND I HOPE THAT TOGETHER WE CAN PREVENT NEEDLESS DEATHS FROM THIS UNSAFE ACCELERATOR. \*AK

**NHTSA Summary:**  
2002 TOYOTA CAMRY XLE - ENGINE SURGE UNEXPECTED ACCELERATION I HAVE BEEN OPERATING THIS VEHICLE FOR TWO YEARS WITHOUT INCIDENT. HOWEVER, IN THE LAST TWO MONTHS I HAVE EXPERIENCED THE ENGINE SURGE/RACING PROBLEM. THE FIRST EPISODE TOOK PLACE 2 MONTHS AGO AS I WAS IN REVERSE AND BACKING OUT OF A DRIVEWAY. I WAS ABLE TO STOP BY APPLYING THE BRAKES. THE SECOND INCIDENT TOOK PLACE AS I WAS BEGINNING TO ACCELERATE FROM A STOP LIGHT; THE VEHICLES AHEAD OF ME WERE SLOWING DOWN AS I APPLIED THE BRAKES TO SLOW DOWN THE ENGINE BEGAN TO RACE. I WAS ABLE TO STOP THE CAR WITH THE BRAKES BUT DID LIGHTLY HIT THE CAR IN FRONT OF ME. THERE WAS NO DAMAGE TO EITHER VEHICLE OR ANY INJURIES. I TOOK THE CAR TO MY DEALER THIS MORNING AND REPORTED THE INCIDENTS. THE DEALERSHIP TEST DROVE THE CAR AND COULD NOT DUPLICATE THE PROBLEM. I DID HAVE PASSENGER IN CAR DURING THE MOST RECENT EPISODE WHO CAN ATTEST TO THE PROBLEM. \*AK

**NHTSA Summary:**  
THERE IS A DANGEROUS AND UNPREDICTABLE TENDENCY FOR THE VEHICLE ENGINE/TRANSMISSION COMBINATION TO ACCELERATE SUDDENLY AND

C-259

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

UNEXPECTEDLY. THIS IS AN INTERMITTENT PROBLEM WHICH MAKES IT ESPECIALLY UNNERVING. IT IS MOST NOTICEABLE AT SPEEDS BELOW 40 MPH, WHEN FIRST SLOWING, FOLLOWED BY ACCELERATION. IT APPEARS TO BE EXACERBATE BY UNCERTAIN TRANSMISSION "HUNTING" FOR PROPER GEAR/ENGINE SPEED COMBINATIONS. THE SUDDEN ACCELERATION CAUSES A RAPID AND JERKY THROTTLE RESPONSE TO MILD ACCELERATOR PEDAL INPUT. I HAVE TAKEN THE CAR TO THE DEALER ON AT LEAST TWO OCCASIONS FOR THIS ISSUE. THE FIRST TIME, THE DEALER REPROGRAMMED THE TRANSMISSION. THE SECOND TIME, THE TECHNICIAN TESTED THE VEHICLE AND NOTE "NO PROBLEM FOUND". AT CURRENT MILEAGE OF 32,000, THE PROBLEM SEEMS TO BE WORSENING. THIS IS A DANGEROUS CONDITION THAT, IF LEFT UNDRRESSED, IS LIKELY TO BE THE CAUSE OF AN ACCIDENT, SERIOUS INJURY OR MUCH WORSE. \*JB

**NHTSA Summary:**

MY MOTHER AND FRIEND STARTED OUT FOR CHURCH, THE FRIEND HAD COME TO PICK HER UP WHEN THE 2004 TOYOTA CAMRY WITH LESS THAN 3000 MILES ON IT WAS HAVING DIFFICULTY SHIFTING INTO REVERSE, THEN WHEN SHE SHIFTED INTO DRIVE THE CAR ACCELERATED UNCONTROLLABLY EST SPEED ON 80 - 92 MILE A HOUR IN LESS THAN 250 FT WHEN THE CAR HIT A MOBILE HOME. THEY HIT SO HARD IT MOVED DOUBLE WIDE ALMOST A FOOT. KILLING MY MOTHER THE PASSENGER AND INJURY TO HER FRIEND THE DRIVER. NO AIR BAG DEPLOYED AND WHEN TOYOTA WAS CONTACTED THEY REFUSED TO SPECK TO US. ATTORNEYS HAVE SAID THAT TOYOTA IS SO BIG, NOT COST AFFECTIVE...SO I WATCH AND IN TWO YEARS THERE ARE MANY MANY MORE NOW...HOW MANY MORE HAVE TO DIE BEFORE SOMETHING IS DONE. SEE ALSO 10074472. \*DSY \*NM, \*DIFFICULTY SHIFTING FROM PARK TO REVERSE, THEN UPON SHIFTING INTO DRIVE THE CAR ACCELERATED UNCONTROLLABLY, WOULD NOT STOP, COLLIDED WITH A MOBILE HOME, AIR BAGS DID NOT DEPLOY, RESULTING IN THE DEATH OF ONE PASSENGER AND INJURY OF DRIVER. \*LA

**Additional Summary:**

FROM NEWS ARTICLE DATED MARCH 15, 2004

"A 67-year-old Phoenix woman on her way to church died Sunday when a car driven by her 86-year-old friend crashed into the front of a mobile home.

Ethyl Marlene Foster died at the scene of the 9:02 a.m. accident at 3761 S. Pacific Highway, Unit 17, Jackson County Sheriff Mike Winters said.

Foster lived just a couple of doors down from the crash site, in Unit 21. Her friend, Amy Marie Roarty, 101 Boiz Road, Phoenix, had just picked up Foster to attend services at Rogue Valley Fellowship church.

Roarty was driving a white, 2004 Toyota four-door sedan, which swerved unexpectedly and wound up on the porch of the mobile home. Foster's husband, Clarence Foster, said Roarty apparently lost control of the car as she left the mobile home park."

WHEN COMING OUT OF A PARKING LOT ACCELERATOR STUCK, CAUSING THE VEHICLE TO ACCELERATE OUT OF CONTROL. VEHICLE GRAZED ANOTHER VEHICLE, WENT ACROSS A STREET, GRAZED A BUILDING, AND DROVE STRAIGHT INTO ANOTHER BUILDING. DRIVER WAS CONSCIOUS WHEN PARAMEDIC ARRIVED. THEY FOUND THE DRIVER WITH BOTH FEET STILL ON THE BRAKE PEDAL. DRIVER WAS TRANSPORTED TO THE HOSPITAL, AND LATER DIED DUE TO FATAL INJURIES FROM THE CRASH. THE INSURANCE COMPANY PRESERVED THE VEHICLE AS EVIDENCE. THE POLICE REPORT STATED THE CRASH WAS DUE TO A MECHANICAL DEFECT.\*AK \*NM  
**Additional Summary:**  
Excerpt from USA Today News Article "The died in Toyotas, leaving many questions":  
"When emergency rescue workers reached Grossman, whose car shot out of a drive-through pharmacy lane, grazed a building and then crashed into the offices of Statewide Realty, she was still conscious.  
She told family members her car shot across the road and that she had no idea why. Both feet were jammed on the brake.  
"I fully believed her," says her son, Bill Grossman. "She was a very bright individual, and she was very particular. Especially about driving."  
She died a few days later from her injuries, about 10 minutes after the family decided to take her off life support, says Courtney Cox, her sister.

**Date of Incident:** 20040319  
**Vehicle:** 2003 TOYOTA 4RUNNER  
**Location of Incident:** TALLAHASSEE, FL  
**NHTSA Summary:**  
REGARDING MY 2003 TOYOTA 4-RUNNER, LIMITED, 4-WHEEL DRIVE WITH A V-8 ENGINE AND 5 SPEED AUTOMATIC TRANSMISSION. SINCE I'VE OWNED THE VEHICLE (SEPTEMBER 28, 2003) THE ENGINE HAS PERIODICALLY ACCELERATED SUDDENLY BY ITSELF, WHILE AT A STOP, SUCH AS AT A STOP LIGHT, WITH THE AC ON AND THE TRANSMISSION IN DRIVE. SOMETIMES THIS RESULTS IN AN ABRUPT ACCELERATION SIMILAR TO BEING HIT BY ANOTHER CAR IN THE REAR. IF I DIDN'T HAVE MY FOOT FIRMLY ON THE BRAKE IN THESE INSTANCES, I WOULD HAVE SHOT INTO THE INTERSECTION. THIS PROBLEM IS NOT ONLY A SERIOUS SAFETY PROBLEM, BUT HAS TO BE DOING DAMAGE TO THE TRANSMISSION. I TOOK IT IN FOR REPAIR AND AS PREDICTABLE THE DEALER SAID THEY FOUND NO PROBLEM. ALL THEY DID WAS CONFIRM ITS IDLE, THEY DID NOT DRIVE IT IN TRAFFIC. THIS IS A SERIOUS PROBLEM AND COULD RESULT IN A SERIOUS INCIDENT. I'VE NOTED OTHER COMPLAINTS HAVE BEEN MADE TO NHTSA ON THE SAME PROBLEM. I BELIEVE THIS PROBLEM SHOULD BE INVESTIGATED BEFORE SERIOUS INJURIES ARE INCURRED BY SOMEONE.\*AK

**NHTSA ODI Number:** 10064261  
**Date of Incident:** 20040401  
**Vehicle:** 2001 LEXUS LS430  
**Location of Incident:** ROHNERT PARK, CA  
**NHTSA Summary:**  
THIS CAR HAS A "DRIVE-BY-WIRE" THROTTLE CONTROL SYSTEM IN WHICH THE THROTTLE IS NOT DIRECTLY CONNECTED TO THE ENGINE BUT IS DIGITIZED AND SENT TO A COMPUTER FOR ANALYSIS PRIOR TO CONTROLLING THE ENGINE SPEED. THE SPEED CONTROL COMPUTER ANALYZES THE THROTTLE INPUT OVER TIME AND "LEARNS" THE DRIVERS THROTTLE CONTROL HABITS AND ADJUSTS THE ENGINE RESPONSE TO THROTTLE INPUT BASED ON THE LONG-TERM DRIVING HISTORY OF THE DRIVER. IF THE DRIVER DRIVES AGGRESSIVELY ALL OF THE TIME THEN THE THROTTLE RESPONSE IS GOOD. HOWEVER IF THE DRIVER DRIVES CONSERVATIVELY MOST OF THE TIME THEN THE THROTTLE RESPONSE IS POOR. I NORMALLY DRIVE CONSERVATIVELY AND I HAVE FOUND ON MANY OCCASIONS THAT THIS CAR DOES NOT RESPOND IN A TIMELY MANNER IN CASE OF EMERGENCY ACCELERATION. THAT IS, WHEN I DRIVE CONSERVATIVELY AND THEN NEED TO ACCELERATE QUICKLY TO AVOID ANOTHER VEHICLE, THIS CAR HESITATES FOR SEVERAL SECONDS BEFORE DECIDING TO SPEED UP, EVEN WHEN I STOMP ON THE ACCELERATOR. I DO NOT FEEL SAFE IN THIS CAR. I BELIEVE THAT THIS IS A SERIOUS SAFETY FLAW IN THE DESIGN OF THIS CAR. I HAVE REPORTED THIS PROBLEM TO MY LEXUS DEALER ON EVERY VISIT TO THE SERVICE DEPARTMENT SINCE I PURCHASED THE CAR NEW IN 2000, YET THEY HAVE FAILED TO ADDRESS THE PROBLEM. I WAS TOLD BY THE SERVICE DEPARTMENT THAT LEXUS WAS AWARE OF THE ISSUE AS SEVERAL CUSTOMERS HAVE COMPLAINED ABOUT THE PROBLEM. ON ONE OCCASION I WAS TOLD THAT THE ENGINEERS HAD AN EXPERIMENTAL FIRMWARE UPGRADE THAT THEY WERE TESTING WITH SOME CUSTOMERS. I HAVE CONTACTED LEXUS CUSTOMER SERVICE, BUT THEY JUST REFERRED ME BACK TO THE DEALERSHIP.\*AK

**NHTSA Summary:**  
I WAS TRAVELING WITH MY FATHER, MING SUEN ON I-95 SOUTH BOUND NEAR I-15 INTERCHANGE IN MY 2000 LEXUS GS400(30900 MILES). THE ACCELERATOR GOT STUCKED(NOT BY CARPET OR FLOOR MAT) MECHANICALLY, AND MY CAR DOWNSHIFTED ITSELF AND WENT INTO FULL POWER ACCELERATION AT THE ENGINE SPEED OF OVER 5000 RPM. I TRIED TO BRAKE WITH FULL FORCE, BUT FAILED TO STOP THE VEHICLE, AND THE CAR WAS GOING AT 85MPH AND GAINING SPEED! THE WHOLE INCIDENT LAST FOR ABOUT 3-5 MINUTES, AND I DIALED "911" AND TRIED TO ASK FOR HELP. BEFORE THE CALL WAS CONNECTED, I MAGICALLY REGAIN CONTROL OF MY LEXUS. THE ACCELERATOR DIS-ENGAGED AND THE ENGINE SPEED RETURNED TO NORMAL. I FELT THE BRAKE WAS LOSING POWER AND BECAME VERY WEAK. I GOT OUT AT THE NEAREST EXIT AND PULLED INTO A GAS STATION. AS I GOT OUT MY CAR, I COULD SMELL THE BRAKES WERE

C-269

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BURNING, AND THE FRONT RIGHT BRAKE WAS FRIED. MY FATHER AND I WAS VERY LUCKY, BECAUSE IT WAS LATE AT NIGHT AND TRAFFIC WAS LIGHT ON THE FREEWAY. OTHER WISE, TRAVELING AT 85 MPH WITH FULL BRAKE AND NO CONTROL OF MY VEHICLE, WOULD DEFINATELY CAUSE SOME SERIOUS INJURY OR EVEN DEATH! MY LEXUS IS CURRENTLY LOCATED AT THE LOCAL FLECHER JONES LEXUS, AND I AWAIT THE DEALERSHIP TO INPECT AND FOUND OUT THE PROBLEM. I WOULD HOPE THERE IS SOMETHING THIS ORGANIZATION COULD DO TO PREVENT SIMILAR INCIDENT TO HAPPEN IN THE FUTURE ON ANY OTHER LEXUS OWNERS.\*AK

**NHTSA Summary:**  
FOLLOWING ARE THE DESCRIPTIONS OF TWO SIMILAR COMPLAINTS INVOLVING THE SAME VEHICLE: 1. VEHICLE, 2004 TOYOTA CAMRY V-6, ACCELERATED UNEXPECTEDLY WHILE BEING DRIVEN INTO A HEAD-IN PARKING SPACE. VEHICLE DID NOT RESPOND TO BRAKING, OVERSHOT PARKING SPACE, HIT AND PUNCHED HOLE IN BUILDING WALL APPROXIMATELY 6 FEET AHEAD OF PARKING SPACE. OVER \$1,000 DOLLARS DAMAGE TO CAR AND UNKNOWN AMOUNT TO BUILDING. 2. ABOUT TWO YEARS LATER, VEHICLE ACCELERATED WHILE COASTING SLOWLY TO STOP AT A STOP LIGHT. DID NOT RESPOND TO BRAKING, REAR-ENDED STOPPED VEHICLE IN FRONT. SIMILAR FRONT END DAMAGE TO THE TOYOTA AND SOME DAMAGE TO FORWARD VEHICLE.

**Vehicle:** 2003 TOYOTA TACOMA  
**Location of Incident:** SAN JOSE, CA  
**NHTSA Summary:**  
FIRST INSTANCE 4/25/04 SLOWLY PULLING INTO A PARKING PLACE WITH A LIGHT TOUCH ON THE ACCELERATOR, THE ENGINE REVVED SO FAST THE TRUCK CLEARED THE PARKING STRIP AND CRASHED INTO A PILLAR ON THE SIDEWALK (PICTURE AVAILABLE) \$5000.00 DAMAGE TO TRUCK & \$6000.00 DAMAGE TO THE PILLAR. SECOND INSTANCE 10/09/06 STOPPED AT A RED LIGHT. ENGINE REVVED UP, PUT IT IN NEUTRAL & ENGINE REVVED FASTER. SHIFTED BACK INTO DRIVE AND ENGINE RETURNED TO NORMAL IN A COUPLE SECONDS. THIRD INSTANCE 02/05/07 JUST STOPPED AT A RED LIGHT. ENGINE REVVED UP AND WENT BACK TO NORMAL BEFORE I COULD TURN OFF THE KEY. IF THERE HAD BEEN A CAR IN FRONT OF ME I WOULD HAVE CRASHED. FIRST TWO TIMES I TOOK THE TRUCK TO THE DEALER. EACH TIME THEY COULD NOT FIND ANYTHING AND GENTLY MENTIONED THAT MAYBE THE ACCELERATOR & BRAKE WERE BOTH ENGAGED AT THE SAME TIME. FIRST TIME MY FOOT WAS ON THE ACCELERATOR & THE OTHER TIMES IT WAS ONLY ON THE BRAKE. THAT WAS THE FIRST THING I CHECKED. THE SERVICE MGR. ADVISED ME NOT TO DRIVE IT SO I RENTED A CAR FOR A COUPLE DAYS. THEY HAD SOMEONE FROM TOYOTA COME TO CHECK IT OUT. COULD NOT FIND ANYTHING WRONG. LAST TIME WAS JUST THE OTHER DAY. HAVE NOT CALLED THEM YET. 2003 TOYOTA TACOMA FOUR DOOR DBL CAB. PURCHASED 07/29/03 CAPITOL TOYOTA. \*JB

**Location of Incident:** POCATELLO, ID  
**NHTSA Summary:**  
I RAN INTO A BIG PROBLEM WITH MY 4 MONTH OLD 2004 TOYOTA SIENNA XLE. I WAS TURNING ONTO A HILL AND WANTED TO SEE HOW IT WOULD ACCELERATE UP THE HILL SO I FLOORED IT. THE CAR ACCELERATED WELL AND I TOOK MY FOOT OFF THE GAS PEDAL AT ABOUT 35 MPH. THE PROBLEM WAS THAT THE CAR KEPT GOING AT FULL ACCELERATION. THERE WAS NO ONE IN FRONT OF ME SO I STARTED TRYING TO FIGURE OUT HOW TO STOP IT INSTEAD OF JUST TURNING OFF THE CAR (I NEEDED TO GET TO THE TOP OF THE HILL AND I COULD COAST TO WHERE I WAS GOING). I PUT IT INTO NEUTRAL BUT ALL IT DID WAS REV TO 6000 RPM, I CHECKED TO MAKE SURE I SOMEHOW HADN'T GOTTEN THE CRUISE CONTROL ON AND I HADN'T, I DOWNSHIFTED INTO 3RD AND KEPT PRESSING ON AND LETTING OFF THE BRAKE PEDAL SINCE I DIDN'T WANT RUIN MY BREAKS (I WAS ABLE TO KEEP THE SPEED BETWEEN 40 AND 50). AS I NEARED THE TOP OF THE HILL (IT IS ABOUT 1/3 OF A MILE LONG) I FIGURED I WOULD TURN THE CAR OFF AT THE TOP. JUST AS I WAS ABOUT TO CREST THE HILL, THE VAN STOPPED ACCELERATING AS THE CAR LEVELED OUT AND THEN RAN NORMAL. THERE IS AN INITIAL LEVEL PORTION GOING TO THE TOP OF THE HILL AND THE VAN DID NOT STOP ACCELERATING AT THE LEVEL SPOT. IT WASN'T UNTIL THE SECOND LEVEL SPOT THAT IT STOPPED ACCELERATING. \*AK

**Date of Incident:** 20040509  
**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** PEARLAND, TX  
**NHTSA Summary:**  
2004 TOYOTA SIENNA EXHIBITS POOR LOW SPEED DRIVABILITY WHEN ACCELERATING FROM SLOW SPEED. THROTTLE DOES NOT RESPOND TO PEDAL ACTION WHICH RESULTS IN UNPREDICTABLE ACCELERATION TIME AND AMOUNT. POOR, OR NO, ENGINE RESPONSE IS FOLLOWED BY LURCH FORWARD AS THROTTLE (OVER) REACTS AND TRANSMISSION SEARCHES FOR THE PROPER GEAR. MANY "NEAR MISSES" IN TRAFFIC MERGING SITUATIONS. THE PRIMARY DRIVER, MY WIFE, WILL NO LONGER USE THIS VEHICLE. SEVERAL DEALERS HAVE REVIEWED THIS ISSUE AND STATE THAT TOYOTA CLASSIFIES THIS PERFORMANCE AS A 'CHARACTERISTIC' OF THE 3.3L PLATFORM. THIS PERFORMANCE IS NOT ACCEPTABLE TO ME AND VEHICLE WILL BE REPLACED IF NOT REPAIRED SOON \*AK

**Location of Incident:** ELLENWOOD, GA  
**NHTSA Summary:**  
ON MAY 15, 2004 I WAS INVOLVED IN A 1 PERSON AUTO ACCIDENT IN MY 2003 TOYOTA CAMRY LE. I HAD JUST PURCHASED THE VEHICLE LESS THAN 30 DAYS FROM THE TIME OF THE ACCIDENT FROM A CERTIFIED USED TOYOTA DEALERSHIP (STONE MOUNTAIN TOYOTA). MY CAR SPUN OUT OF CONTROL AS I PRESSED THE ACCELERATOR TO PULL OUT OF A STORE PARKING LOT. I WAS UNABLE TO STOP THE CAR BY BRAKING AND ENDED UP ROLLING OVER AN EMBANKMENT AND ON TO RAILROAD TRACKS. I WAS WEARING MY SAFETY BELT AT THE TIME. I WAS ABLE TO GET OUT OF THE CAR AND AWAY FROM IT AS I FEARED IT WAS GOING TO BLOW UP. I HAD NO IDEA OF WHAT WENT UP AS IT ACCELERATED SO FAST. OBVIOUSLY, I WAS TERRIFIED AND REMAIN EMOTIONALLY AND PHYSICALLY DAMAGED FROM THIS EVENT. I WAS TRANSPORTED TO THE ER VIA AMBULANCE AND WAS EVALUATED FOR INJURIES. MY MAIN INJURIES WERE GENERAL BODY, HEAD, NECK, AND BACK PAIN. SUBSEQUENTLY, A LUMBAR FRACTURE WAS FOUND YEARS LATER ON A SCAN FOR ANOTHER MEDICAL ISSUE. I STILL SUFFER FROM LOW BACK PAIN AND THE EVENT HAUNTS ME. ESPECIALLY SINCE I TOLD THE POLICE, AMBULANCE WORKERS, INSURANCE COMPANY, AND THE MANAGERS AT THE DEALERSHIP ABOUT WHAT HAPPENED. NO ONE INVESTIGATED THE ACCIDENT FURTHER AS IF I WAS NOT MAKING ANY SENSE. I ALSO MISSED A FEW DAYS OF WORK AND WAGES BECAUSE I AM AN RN AND COULDN'T PERFORM MY JOB DUE TO THE PAIN. I AM REALLY UPSET ABOUT THE RECALLS BECAUSE IT DOESN'T INCLUDE EARLIER TOYOTA MODELS AND I REPORTED THIS INCIDENT 6 YEARS AGO WHEN I HAD MY ACCIDENT AND NOTHING WAS DONE. THANKS FOR YOUR TIME. JENNIFER OWENS

**Location of Incident:** MINNETONKA, MN

**NHTSA Summary:**

THREE EVENTS OCCURRED WHERE MY 2000 LEXUS 400 ACCELERATED ON ITS OWN IN BEGINNING TO START MOVING BY RELEASING MY FOOT FROM THE BRAKE. THE FIRST INCIDENT OCCURRED IN CANNON FALLS MN. WE HAD COME TO A STOP AT A STOP LIGHT AND WHEN THE TRAFFIC STARTED MOVING I LIFTED MY TOE FROM THE BRAKE AND THE CAR LEAPED FORWARD -- I IMMEDIATELY SLAMMED ON THE BRAKE AGAIN SINCE MY TOE WAS STILL ON THE BRAKE. IT LURCHED SEVERAL TIMES AND THEN QUITE. I BARELY STOPPED IT BEFORE HITTING THE CAR IN FRONT OF ME. IT HAPPENED AGAIN THE SAME WAY SEVERAL WEEKS LATER BUT NOT AS VIOLENT. THE THIRD TIME HAPPENED AS I WAS BRINGING MY CAR INTO LEXUS TO DIAGNOSIS THE PROBLEM. THIS TIME IT VIOLENTLY LEAPT FORWARD CAUSING ME TO BRACE MYSELF ON THE STEERING WHEEL TO GET MORE LEVERAGE ON THE BRAKE. IT LURCHED FORWARD WHAT SEEMED TO BE IN JUMPS OF SIX INCHES TO A FOOT WITH ME PUSHING AS HARD AS I COULD ON THE BRAKE. FINALLY I HAD THE PRESENCE OF MIND TO SHIFT INTO NEUTRAL. AGAIN I BARELY WAS ABLE TO STOP IT BEFORE HITTING THE CAR IN FRONT OF ME. THIS IS A HIGHLY DANGEROUS CONDITION AND I HAVE TOLD LEXUS I WILL NOT DRIVE THE CAR AGAIN UNTIL IT IS FIXED. LEXUS IS LOOKING AT IT AND SO FAR CLAIMS THAT NOTHING IS WRONG. IE NOTHING CAN BE FOUND WITH THE DIAGNOSTICS. I AM WILLING TO LET NHTSA HAVE THE CAR FOR TESTING IF I CAN GET REPLACEMENT TRANSPORTATION DURING THE TESTING. NORM TALSOE. \*AK

**Location of Incident:** ATLANTIC BEACH, FL

**NHTSA Summary:**

AS WE WERE PULLING OUT OF OUR PARKING SPACE ON THIS DAY. OUR 2003 TOYOTA CAMRY SEEMED TO ACCELERATE WHILE THE BRAKE WAS PRESSED. IN TURN WE SLAMMED INTO A PARKED CAR WHICH THEN HIT ANOTHER CAR, THAT HIT ANOTHER CAR. LUCKILY NONE WAS CRITICALLY INJURED THOUGH SOME MINOR INJURIES OCCURRED TO MY WIFE UPON IMPACT. ALSO, EVER SINCE WE HAVE BOUGHT THE CAR IT HAS DONE THIS FROM TIME TO TIME OR WE HAVE HAD TROUBLE WITH THE BRAKES. UPON TAKING TO THE DEALERSHIP NUMEROUS TIMES, THEY ASSURED ME THAT NOTHING WAS WRONG WITH THE BRAKES OR ANYTHING ELSE. I FEEL THAT THIS NEEDS TO BE THOROUGHLY INVESTIGATED BEFORE SOMEONE IS KILLED OR CRITICALLY INJURED. IN MY EYES THIS IS A MAJOR SAFETY CONCERN. NOT TO MENTION THE

**Vehicle:** 1998 TOYOTA TACOMA  
**Location of Incident:** MARICOPA, AZ

**NHTSA Summary:**

MY 1998 TOYOTA TACOMA EXPERIENCE UNEXPECTED ACCELERATION IN 2004. THE VEHICLE WAS TOTALLED (WORTH ABOUT \$12K AT THE TIME) DUE TO THE BENT FRAME CAUSED BY HITTING A CONCRETE WALL, THEN ANOTHER CAR IN A PARKING LOT. MY WIFE, A TOYOTA EMPLOYEE, WHO WAS DRIVING THE TRUCK, SUFFERED BUMPS AND BRUISES DUE TO THE FACT THE TRUCK ONLY WENT ABOUT 30 FEET BEFORE IMPACT. THE INSURANCE INVESTIGATOR FOUND NO PROBLEMS WITH THE VEHICLE, AND POSTULATED MY WIFE HAD HER FOOT ON THE ACCELERATOR. SHE GUARANTEED HER FOOT HAD BEEN ON THE BRAKE. THE VEHICLE WAS SHRINK WRAPPED UNTIL A TOYOTA REP COULD READ THE ELECTRONICS. HIS RESPONSE WAS THE SAME. SO WAS HERS. GUESS WHAT MODEL YEAR TOYOTA BEGAN USING THEIR ELECTRONIC THROTTLE CONTROL SYSTEM (ETCS)? 1998 - WHAT A SURPRISE. MY WIFE HAS BEEN VINDICATED. TOYOTA'S PROBLEM IS NOT WITH FLOOR MATS OR GAS PEDALS THAT STICK. IT IS WITH THE ETCS.

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2003 LEXUS ES300 PURCHASED APRIL 2004. SHE IMMEDIATELY BEGAN EXPERIENCING FAILURES WHEN THE VEHICLE SURGED AND VIOLENTLY LUNGED FORWARD WHILE IT WAS IDLE. THE DEALER STATED THAT THE VEHICLE WAS A "SMART CAR" AND WAS AWARE WHEN THERE WAS A DRIVER, OTHER THAN HERSELF BEHIND THE WHEEL, WHICH WOULD "CONFUSE" THE VEHICLE. NO DIAGNOSTIC TEST WERE PERFORMED. THE FAILURE PROGRESSED AND THE VEHICLE WAS TAKEN BACK TO DEALER A SECOND TIME. ALTHOUGH THE DEALER BECAME FAMILIAR WITH THE FAILURE; THEY STATED THAT SHE NEEDED TO WAIT A YEAR UNTIL THE "NEW PROGRAMMING" WAS AVAILABLE. ONE YEAR LATER, THE VEHICLE WAS TAKEN BACK TO THE DEALER FOR THE SOFTWARE REPROGRAMMING AND THE FAILURE BECAME PROGRESSIVELY WORSE. THE VEHICLE CONTINUED TO LUNGE VIOLENTLY WHILE SITTING IDLE, DRIVING AT SPEEDS OF UNDER 35 MPH OR WHILE COASTING. WHEN THE VEHICLE LUNGED IT FELT AS IF SHE WAS BEING STRUCK FROM THE REAR BY ANOTHER VEHICLE. THERE WERE NO ADDITIONAL REPAIRS MADE TO THE VEHICLE. THE VIN WAS NOT AVAILABLE. THE FAILURE AND CURRENT MILEAGES WERE APPROXIMATELY 78,000.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** BOWIE, MD

**NHTSA Summary:**  
ON SATURDAY, JULY 7, 2004, I DROVE THE 2002 TOYOTA CAMRY IN BOWIE, MARYLAND HEADING SOUTH ON ROUTE 197, LAUREL-BOWIE ROAD. WHILE GOING UP A HILL, AT APPROXIMATELY 65 MPH, I PRESSED ON THE ACCELERATOR PEDAL. IMMEDIATELY, I LOST CONTROL OF THE CAR, AS IT SWERVED FIRST TO THE LEFT. HOWEVER, A CAR WAS TO MY LEFT, AND TO AVOID HITTING IT, I STEERED THE CAR RIGHT, TOWARDS THE CURB. FORTUNATELY I DID NOT HIT THE CAR. AS I STEERED TOWARDS THE RIGHT, THE CAR SPED AHEAD OF ME, AND I TRIED STEERING BACK TOWARDS THE LEFT TO AVOID THE CURB. TO CREATE FRICTION TO STOP THE CAR, I MADE A BIG ARC AND CROSSED FOUR LANES TO THE LEFT, WITH THE CAR FINALLY FACING NORTHBOUND. AFTER MAKING SURE NO CARS WERE COMING IN EITHER DIRECTION OF THE ROAD, I MADE A U-TURN AND HEADED STRAIGHT TO MY HOUSE (-2 MILES AWAY). \*JB

**Date of Incident:** 20040715  
**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** COLUMBIA, MD

**NHTSA Summary:**  
I NOTICED AN ARTICLE RECENTLY ABOUT A PROBE INTO TOYOTA'S (CAMRY AND LEXUS) THAT SURGE. MY 2004 TOYOTA SIENNA SURGES FORWARD WHEN BRAKING AND THOUGH IT DOES NOT DO THIS CONSISTENTLY, IT HAPPENS EVERY SO OFTEN AND COULD POTENTIALLY CAUSE AN ACCIDENT. I HAVE REPORTED THIS TO THE DEALER AND THEY HAVE EXAMINED THE VEHICLE AND SAID THAT THERE IS NOTHING WRONG. MY PERSONAL EXPERIENCE WITH THE ELECTRONIC THROTTLE CONTROL IS THAT NOT ONLY DOES IT SURGE WHEN BRAKING, THERE IS ALSO A DELAY IN THE SIGNAL WHEN ACCELERATING THAT EITHER CAUSES AN UNSAFE DELAY IN ENTERING INTO TRAFFIC AND CAN ALSO CAUSE THE VEHICLE TO "PEEL OUT" FROM A STOPPED POSITION. I BASICALLY FEEL UNSAFE IN THIS VEHICLE, YET MY CONCERNS VOICED TO THE DEALER HAVE BEEN DISMISSED. THIS DEFECT NEEDS TO BE SERIOUSLY MONITORED IN SIENNAS AS WELL AS OTHER TOYOTAS WITH THE ELECTRONIC THROTTLE CONTROL. \*AK

**Location of Incident:** SAN JUAN CAPISTRANO, CA

**NHTSA Summary:**  
OUR CAR IS A 2002 TOYOTA CAMRY LE WITH THE 4-CYLINDER ENGINE, AUTOMATIC TRANSMISSION, AND CRUISE CONTROL BUT IT DOES NOT HAVE ABS. I PURCHASED THE CAR FROM THE ORIGINAL OWNER IN OCTOBER 2003 AND, AT THE TIME OF THE ACCIDENT, HAD ABOUT 35,000 MILES ON IT. BASED ON THE ORIGINAL OWNER'S [REDACTED] RECORDS AND MY OWN, NO ELECTRICAL WORK HAD EVER BEEN DONE ON THE CAR AND THE BATTERY WAS THE ORIGINAL. THE ACCIDENT OCCURRED ON JULY 22, 2004 IN MISSION VIEJO, CALIFORNIA IN BROAD DAYLIGHT AND IN CLEAR WEATHER. COLLEEN WAS ALONE IN THE CAR AND WAS NOT HURT. THE AIR BAG DID NOT DEPLOY. THERE WAS ABOUT \$3,500 IN DAMAGE. THE ACCIDENT OCCURRED AS MY WIFE WAS PARKING THE CAR WHEN SHE ARRIVED AT HER DOCTOR'S [REDACTED] OFFICE FOR AN APPOINTMENT. AS SHE MADE A LEFT TURN INTO A PARKING STALL, SHE SLOWED TO ALMOST A STOP HALF WAY INTO THE PARKING SPACE. THE GEAR LEVER WAS IN THE NORMAL DRIVE POSITION AND HER FOOT WAS ON THE BRAKE. SUDDENLY, THE CAR LURCHED FORWARD JUMPING OVER THE CEMENT PARKING SPACE BUMPER, OVER THE CURB AT THE END OF THE PARKING SPACE, AND SQUARELY INTO A BLOCK WALL JUST A FOOT BEYOND THE CURB.

**Date of Incident:** 20040801  
**Vehicle:** 2004 LEXUS ES330  
**Location of Incident:** LONG VALLEY, NJ  
**NHTSA Summary:**  
AT MOST SPEDS, ESPECIALLY WHEN STOPPED OR AT SPEEDS BELOW 40 MPH, MY LEXUS ES330 HAS A SEVERE HESITATION/ACCELERATION DELAY THAT WHEN DEPRESSING THE ACCELERATOR PEDAL, ACCELERATION IS DELAYED AT LEAST 1.5 SECONDS, IS UNPREDICTABLE AND COMPROMISES SAFETY AND PLACES THE DRIVER AT RISK IN MOST DAY TO DAY DRIVING SCENARIOS. IT IS ALSO IMPOSSIBLE TO MATCH THE SPEED OF A VEHICLE IN FRONT WHEN IN BUMPER TO BUMPER TRAFFIC. WHEN THE ACCELERATOR PEDAL IS PRESSED, THE ES330 WILL CONTINUE TO ROLL FORWARD FOR A FEW SECONDS THEN ACCELERATE. IT WILL NOT "CREEP" AT THE SPEED OF TRAFFIC. I AM TOLD BY LEXUS THAT THIS IS NORMAL AND IS INHERENT IN THE VEHICLE DESIGN. IF THIS IS TRUE, ONE WOULD THINK THIS DESIGN FLAW WILL SOON ECLIPSE THE FIRESTONE/FORD EXPLORER INJURIES OF THE PAST.\*AK

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THIS COMPLAINT IS REGARDING A PROBLEM WITH ACCELERATION THAT I HAVE BEEN EXPERIENCING WITH MY 2004 TOYOTA CAMRY V6. AFTER APPLYING THE ACCELERATOR PEDAL, THE ENGINE HESITATES FOR A COUPLE OF SECONDS BEFORE RESPONDING ABRUPTLY. I PURCHASED THE CAR NEW ABOUT SIX MONTHS AGO, BUT THE ACCELERATION TROUBLE DID NOT BEGIN UNTIL AFTER I HAD BEEN DRIVING IT FOR ABOUT THREE MONTHS. WHEN I BROUGHT THE CAR IN FOR INSPECTION BY THE DEALERSHIP AFTER THE PROBLEM BEGAN, I WAS SIMPLY TOLD THAT THE COMPUTER HAD NOT FOUND ANYTHING. SINCE THEN, THE PROBLEM HAS GOTTEN WORSE AND I HAVE BECOME INCREASINGLY RELUCTANT TO DRIVE THE CAR.\*AK

**Location of Incident:** PALATINE, IL  
**NHTSA Summary:**  
I OWN A LEXUS 2004 ES 330, PURCHASED NEW. FROM DAY ONE THERE HAS BEEN A HESITATION IN ACCELERATION. THIS HAS PUT ME IN POSSIBLE DANGER MANY MANY TIMES. IN TALKING WITH THE DEALER, THEY WERE/ARE AWARE OF THIS PROBLEM AND SAID IT IS A SOFTWARE PROBLEM THAT THEY HOPE WILL BE FIXED. NOTHING TO DATE. I HAVE COMPLAINED ABOUT THIS NUMEROUS TIMES AND THEY AGREE THAT THIS COULD BE A VERY DANGEROUS SITUATION, AND THAT ALL THE ES 330S HAVE THIS PROBLEM. UNFORTUNATELY, LEXUS HAS NOT TAKEN THE TIME OR WANTED TO SPEND THE MONEY TO FIX THIS. THE DANGER IS REAL. CAN YOU HELP? THANKS. JANE ROBINS.\*B

**NHTSA ODI Number:** 10086362  
**Date of Incident:** 20040805  
**Vehicle:** 2001 TOYOTA CELICA  
**Location of Incident:** WATERBURY, CT  
**NHTSA Summary:**  
AFTER ONLY 32000 MILES, I HAD A SUDDEN AND SEVERE LOSS OF POWER IN ENGINE ALMOST LEADING TO STALLING. THE ENGINE WENT TO HIGH REVVING ABOUT 8K RPM'S AND A BURNING OIL SMELL. WITH THIS, CLIMBING HILLS, EVASIVE MANUEVERS, AND OTHER ACCELERATION ISSUES ALMOST CAUSED CRASHES BECAUSE THEY WERE SO SUYDDEN AND SEVERE. THE DEALER SIAD THE CLUTCH WAS BURNT, BUT IT WAS SO SUDDEN AND WITHOUT ANY WARNING.\*AK  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10091195  
**Date of Incident:** 20040808  
**Vehicle:** 2002 LEXUS ES300  
**Location of Incident:** WHITESTONE, NY  
**NHTSA Summary:**  
IN AUGUST I WENT TO PARK MY CAR (2002 ES300) IN MY DRIVEWAY WHEN ALL OF A SUDDEN IT PICKED UP SPEED, CRASHING THROUGH MY BRAND NEW FENCE AND SIDE PORCH. IT MUST BE NOTED THAT I HAD MY FOOT ON THE BRAKE. THE CAR WAS STOPPED AND ALL OF A SUDDEN IT TOOK OFF ON ME. MY FOOT NEVER MOVED OFF THE BRAKE THE WHOLE TIME. THE CAR CAME TO A STOP WHEN IT HIT THE PORCH. THE DAY BEFORE I WAS DRIVING WITH MY MOM AND AS I STARTED TO SLOW THE CAR DOWN B/C I WAS COMING TO A STOP SIGN THE CAR ALL OF A SUDDEN PICKED UP SPEED, BUT THANKFULLY AT THAT TIME I HAD TIME TO PRESS THE BRAKES DOWN HARDER AND STOP THE CAR. WHEN I PARK MY CAR IN THE DRIVEWAY IT IS ONLY A COUPLE OF INCHES FROM THE GATE AND FROM THE GATE IT IS ABOUT 2-3 FEET TO THE PORCH SO THERE WAS NO WAY TO AVOID THIS ACCIDENT. WHEN LEXUS INSPECTED THE CAR THEY FOUND NOTHING WRONG WITH THE DBW (ELECTRONIC THROTTLE CONTROL). I FIND THIS TO BE A COVERUP OF SOME SORTS B/C I'VE BEEN DRIVING FOR YEARS AND NEVER HAD THIS HAPPEN TO ME BEFORE. I KNOW FIRST HAND THAT IS IS NOT A DRIVER ERROR IT IS A MANUFACTOR'S DEFECT. I KNOW IT WENT INTO INVESTIGATIONS AND THEY ARE NOT RECALLING THE CARS B/C THERE WAS NOT ENOUGH EVIDENCE THAT THIS REALLY HAPPENS. SINCE I'VE BEEN BRINGING THIS ISSUE TO LIGHT I RECENTLY FOUND OUT THAT THE SAME THING HAPPENED TO MY HUSBANDS FRIENDS WIFE LAST YEAR. HER CAR TOOK OFF ON HER AND WENT THROUGH HER GARAGE. THIS IS VERY DANGEROUS AND I DO NOT FEEL SAFE DRIVING MY CAR. I FEEL THAT LEXUS IS REALLY IN A POSITION WHERE THEY DON'T HAVE TO DO ANYTHING BECAUSE THE NHTSA DEEMED THERE WAS NOTHING WRONG WITH THE CAR CAUSING THE UNINTENDED ACCELERATION. BOTH THE DEALERSHIP AND MANUFACTURER DID NOT WANT TO TAKE ANY RESPONSIBILITY WHAT SO EVER FOR THIS INCIDENT. THEY WERE VERY HELPFUL

**NHTSA ODI Number:** 10104409  
**Date of Incident:** 20040810  
**Vehicle:** 2004 TOYOTA HIGHLANDER  
**Location of Incident:** BRANDON, FL

**NHTSA Summary:**  
MY 2004 TOYOTA HIGHLANDER MAKES A TERRIBLE HUMMING / MOANING SOUND ON ACCELERATION THAT RESONATES WITHIN THE VEHICLES AND DISTURBS THE DRIVER. THE PROBLEM TYPICALLY OCCURS DURING SPEEDING UP FROM 0 MPH. IT IS TERRIBLY FRUSTRATING THAT A BRAND NEW CAR MAKES SUCH A ANNOYING SOUND. IT IS ALSO HESITATES A LOT DURING 20-40 MPH SPEED RANGE. THE VEHICLE DOES NOT RESPOND AS IT SUPPOSED TO ON ACCELERATION AND THAT TOO SPECIALLY WHILE DRIVING WITHIN THE CITY. ON CANTACTING THE DEALER AND TOYOTA'S NATIONAL CUSTOMER SERVICE THAY SAID IT IS DESIGNED TO BE LIKE THAT AND THE HESITATION IS A BY-PRODUCT OF COMPUTER CONTROLLED AUTOMATIC TRANSMISSION. CURRENTLY THERE IS NO FIX FOR THIS. AM TERRIBLY FRUSTRATED NOW AND PROMISE TO NEVER BUY ANY VEHICLE FROM TOYOTA IN FUTURE. I WOULD ALSO MAKE SURE THAT MY FRIENDS AND RELATIVES DOES NOT GO NEAR A TOYOTA DEALER. I AM DESPERATE IN GETTING RID OF THIS VEHICLE. \*AK

**NHTSA Summary:**  
ACCELERATOR FAILS TO RESPOND FOR 1-2 SECONDS IN AN EMERGENCY ACCELERATION SITUATION. WHEN ENTERING A ROAD FROM A STOP SIGN, I HESITATED THINKING THERE WAS NO ROOM. A VEHICLE LET ME IN. WHEN I HIT THE ACCELERATOR TO MAKE IT SAFELY, THE VEHICLE FAILED TO RESPOND FOR 1-2 SECONDS. THE CAR LETTING ME SLOWED DOWN TO LET ME IN, BUT NOT ENOUGH TO ALLOW FOR THIS DELAY AND HE NEARLY REAR-ENDED ME. IT WAS SCARY TO NOT HAVE THE CAR RESPOND. I HAVE SEEN MANY OTHER COMPLAINTS FILED ABOUT THIS AND THE DEALER RESPONSE ALWAYS SEEMS TO BE THAT THIS IS HOW THE ELECTRONIC THROTTLE CONTROL PERFORMS. I BELIEVE THIS NEEDS TO BE RECALLED SO THAT TOYOTA CAN MAKE THIS ELECTRONIC DEVICE RESPOND IMMEDIATELY AS OPPOSED TO TAKING 1-2 SECONDS.\*AK

**Date of Incident:** 20040911  
**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** ATLANTA, GA

**NHTSA Summary:**  
THERE IS A DISTINCT DELAY IN THE ACCELERATION OF MY 2004 TOYOTA SIENNA VAN WHEN THE ACCELERATOR PEDAL IS DEPRESSED QUICKLY. THIS DELAY IS NOT NOTICEABLE UNLESS THE DRIVER IS ALREADY MOVING AND THE ACCELERATOR IS DEPRESSED IN SITUATIONS SUCH AS PASSING OR SOME OTHER ACTIVITY THAT REQUIRES QUICK ACCELERATION. I WAS TRYING TO SPEED UP WHILE DRIVING IN THE RIGHT HAND LANE OF A HIGHWAY BECAUSE THE LEFT LANE WAS ALREADY OCCUPIED AND A VEHICLE WAS ATTEMPTING TO MERGE ONTO THE ROADWAY. MY VAN DID NOT SPEED UP UNTIL IT WAS TOO LATE AND THE VEHICLE ATTEMPTING TO MERGE ONTO THE HIGHWAY DROVE OFF OF THE ROAD TO AVOID AN ACCIDENT. DURING ANOTHER OCCASION REQUIRING QUICK ACCELERATION A TRUCK LOCKED UP ITS BRAKES TO AVOID HITTING ME FROM BEHIND WHEN I MERGED INTO HIS LANE AS I DEPRESSED THE ACCELERATOR ONLY TO HAVE THE VAN FAIL TO SPEED UP FOR TWO SECONDS. TOYOTA PERSONNEL FROM THE DEALERSHIP WHERE I PURCHASED THE VAN (WORLD TOYOTA OF CHAMBLEE, GA) INFORMED ME THAT THEY HAVE RECEIVED SIMILAR COMPLAINTS BUT THEY ARE UNABLE TO CORRECT THE PROBLEM BECAUSE IT IS THE RESULT OF A DESIGN FLAW IN THE VEHICLE IN THAT TOYOTA INSTALLED A LASER CONTROL ON THE ACCELERATOR IN LIEU OF AN ACCELERATOR CABLE THAT COULD BE ADJUSTED. \*NM

**Location of Incident:** SUGAR GROVE, IL

**NHTSA Summary:**  
WHILE STOPPED AT AN INTERSECTION, THE ENGINE SUDDENLY AND UNEXPECTEDLY BEGAN TO REV UNCONTROLLABLY WITHOUT ANY INPUT FROM ME. DUE TO THE HIGH REVOLUTIONS OF THE ENGINE THE BRAKES WERE INCAPABLE OF PREVENTING THE CAR FROM MOVING FORWARD EVEN THOUGH THE BRAKE PEDAL WAS FULLY DEPRESSED. THE ONLY WAY TO PREVENT MY CAR FROM HITTING THE CAR IN FRONT OF ME WAS TO SHUT OFF THE ENGINE. TWO SUBSEQUENT ATTEMPTS TO RE-START THE ENGINE RESULTED IN A REPEAT OF THE OVER-REVING SITUATION. ONLY AFTER THE THIRD ATTEMPT DID THE ENGINE RESUME NORMAL OPERATION. A PASSENGER IN THE CAR AT THE TIME VERIFIED THAT THE ACCELERATOR WAS NOT ENGAGED AT ANY TIME DURING THE INCIDENT. THE CAR WAS IMMEDIATELY DRIVEN TO THE DEALER WHO INSPECTED IT AND FOUND NO FAULT WITH THE ETC SYSTEM AND NO STORED CODES THAT WOULD VERIFY MY COMPLAINT. THE CAR WAS SUBSEQUENTLY RETURNED TO US AND WAS DRIVEN WITHOUT INCIDENT FOR THE NEXT NINETEEN MONTHS BEFORE THE PROBLEM ONCE AGAIN PRESENTED ITSELF. AS WE WERE PULLING INTO A PARKING SPACE WHILE MY FOOT WAS ON THE BRAKE PEDAL THE ENGINE ONCE AGAIN BEGAN TO OVER-REV WITHOUT ANY INPUT FROM ME. AGAIN, THE PASSENGER IN THE CAR WHO HAD WITNESSED THE FIRST INCIDENT IMMEDIATELY LOOKED TO SEE IF THE ACCELERATOR WAS ACCIDENTALLY BEING DEPRESSED. IT WAS NOT. AGAIN, THE ONLY MEANS OF PREVENTING MY CAR FROM STRIKING THE VEHICLE IN FRONT OF ME WAS TO SHUT OFF THE ENGINE. \*NM

**Date of Incident:** 20041001  
**Vehicle:** 2003 LEXUS ES300  
**Location of Incident:** LAKE MARY, FL

**NHTSA Summary:**  
I HAVE NOW SENT MY CAR IN FOR SERVICE TWICE TO LEXUS OF ORLANDO ABOUT UNEXPECTED SURGING OF THE VEHICLE AND VEHICLE HESITATION WHEN THE ACCELERATOR IS PRESSED. THIS IS AN INTERMITTENT AND DANGEROUS PROBLEM, AS I DO NOT KNOW WHEN IT WILL OCCUR. WHEN IT DOES OCCUR THE UPSHIFT IS HARSH, THE DOWNSHIFT DELAYED AS IF THE TRANSMISSION IS CONFUSED ABOUT THE DRIVER'S INTENTION, AND THERE IS PRONOUNCED HESITATION WHEN THE ACCELERATOR IS PRESSED. THIS LACK OF RESPONSIVENESS LEAVES BOTH THE VEHICLE AND PASSENGERS EXPOSED TO ACCIDENT AND INJURY. ON MY FIRST VISIT, I WAS TOLD THE VEHICLE COMPUTER WOULD BE RESET, AS THE VEHICLE LEARNS YOUR DRIVING STYLE IN THE FIRST 30 OR SO MILES, AND I MUST HAVE DRIVEN THE VEHICLE HARSHLY. THIS SO CALLED RESET DID NOTHING TO FIX THE PROBLEM; LESS THAN A WEEK LATER, I NARROWLY ESCAPED A CRASH AFTER MY CAR HESITATED WHILE CROSSING AN INTERSECTION. I PROMPTLY RETURNED THE VEHICLE TO THE DEALER FOR SERVICE. UPON COMPLETION OF THE SECOND SERVICE, WHICH INCLUDED A DRIVE WITH THE TECHNICIAN, LEXUS SERVICE NOW SAYS THESE PROBLEMS ARE INHERENT TO THE MODEL AND THEY CAN'T FIX THEM. IN ADDITION, I AM AWARE THAT NUMEROUS OWNERS FREQUENTLY COMPLAIN OF HESITATION AND SURGING IN 2002, 2003, AND 2004 MODELS AND MANY COMPLAINTS (OVER 100) OF THE SAME NATURE HAVE BEEN FILED WITH THE NHTSA. THIS STATEMENT IS TO ISSUE NOTICE THAT I AM NOT SATISFIED, AND THE PROBLEM HAS NOT BEEN FIXED.\*AK  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10135075

**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** KENNESAW, GA

**NHTSA Summary:**  
2004 TOYOTA SIENNA XLE LIMITED- UNCONTROLLED CRUISE CONTROL ACCELERATION/DECELERATION. THE PROBLEM HAS CONTINUOUSLY OCCURRED SINCE PURCHASE IN SEPTEMBER 2004. DEALERSHIP DENIES PROBLEMS. DYNAMIC CRUISE CONTROL SYSTEM CAUSES MY CAR TO DANGEROUSLY ACCELERATE AND DECELERATE. WHEN LASER DETECTS NEARBY VEHICLE, THE CAR WILL BRAKE ABRUPTLY. LIKEWISE, ONCE THE NEARBY CAR IS NO LONGER IN LASER RANGE, THE CAR WILL ACCELERATE ABRUPTLY TO RETURN TO THE SET CRUISE CONTROL SPEED. I HAVE ALMOST BEEN HIT FROM BEHIND MULTIPLE TIMES ON FREEWAYS BECAUSE OF THE ABRUPT DECELERATION. I HAVE BEEN CAUGHT OFF GUARD SEVERAL TIMES BY THE ACCELERATION AND NEARLY LOST CONTROL OF THE VEHICLE. THE ONLY WAY TO STOP THE RAPID ACCELERATION AND DECELERATION IS TO PRESS THE BRAKE IN ORDER TO DISENGAGE THE CRUISE CONTROL SYSTEM. I HAVE NEVER DRIVEN A CAR WITH SUCH A DANGEROUS CRUISE CONTROL SYSTEM. I NO LONGER USE MY CRUISE CONTROL SYSTEM BECAUSE I FEAR THAT I'LL BE UNABLE TO DISENGAGE THE SYSTEM AND LOSE CONTROL OF THE VEHICLE. \*TR

**Toyota ID Number:**  
**NHTSA ODI Number:** 10313409  
**Date of Incident:** 20041009  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** NEW PORT NEWS, VA

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2005 TOYOTA CAMRY. OCCASIONALLY WHEN THE CONTACT ATTEMPTED TO BRAKE AT ANY SPEED, HE NOTICED THAT THE VEHICLE SUDDENLY SURGED FORWARD WITHOUT WARNING. THE VEHICLE WAS TAKEN TO THE DEALER WHO STATED THAT THE COMPUTER NEEDED TO BE REPLACED. THE CURRENT AND FAILURE MILEAGES WERE 23,000.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10310065  
**Date of Incident:** 20041013  
**Vehicle:** 1999 TOYOTA CAMRY  
**Location of Incident:** BAY SAINT LOUIS, MS

**NHTSA Summary:**  
I PURCHASED A NEW TOYOTA CAMRY IN NOVEMBER 1999. IN 2004 (THE CAR HAS FEWER THAN 45,000 MILES ON IT), WHILE TRAVELING ON A LOCAL HIGHWAY, THE ACCELERATOR BECAME "STUCK". LUCKILY, WE WERE TRAVELING AT A LOW RATE OF SPEED, BECAUSE WE HAD JUST ACCELERATED AFTER LEAVING A RED LIGHT. THE DRIVER (A FRIEND) KEPT HER WITS AND PUT THE CAR IN NEUTRAL, THEN STEERED INTO AN EMPTY LOT WHERE SHE SHUT OFF THE ENGINE. AT THIS POINT THE CAR'S RPM'S WERE "REDLINING" WHEN I CALLED TOYOTA TO REPORT THE INCIDENT I WAS TOLD THAT I WAS AT FAULT - THAT I SHOULD HAVE HAD THE ACCELERATOR SERVICED. I ASKED IF THERE WERE INSTRUCTIONS IN THE OWNERS MANUAL THAT WARNED OWNERS TO HAVE THE ACCELERATOR SERVICED DID THE OWNERS MANUAL DISCLOSE THAT THE ACCELERATOR WOULD STICK? THE ANSWER WAS NO. I THEN CONTACTED TOYOTA BY EMAIL AND FULLY DESCRIBED WHAT HAD HAPPENED. THEY ASSIGNED ME A CASE NUMBER AND SENT ME A COUPON FOR \$500 OFF MY NEXT TOYOTA. NEEDLESS TO SAY I GOT RID OF THE CAR. UNTIL 2005 I KEPT ALL THE INFORMATION, BUT MY HOME WAS FLOODED IN KATRINA AND I NO LONGER HAVE THE DOCUMENTS. WHEN I HEARD ABOUT THE RECALLS I FELT THAT SOMEONE SHOULD KNOW THAT THIS ACCELERATOR PROBLEM HAS EXISTED FOR A VERY LONG TIME AND TOYOTA WAS VERY AWARE OF IT. THE TOYOTA DEALERSHIP DID REPAIR WORK FOR THE PROBLEM.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10313051  
**Date of Incident:** 20041013  
**Vehicle:** 2000 TOYOTA CAMRY  
**Location of Incident:** ARLINGTON, TX

**NHTSA Summary:**  
MY ACCIDENT/INJURIES BECAUSE THE DEFECTS/FLAWS OF MY CAR: BRAKE SYSTEMS, ACCELERATOR PEDAL, UNINTENDED ACCELERATION, SPEED OUT OF CONTROL, CRUISE CONTROL SYSTEMS, ELECTRONIC THROTTLE SYSTEMS...I HAVE THE CAR FIXED, REPAIRS SOMETIMES (RECORDS AT DEALERSHIP). THEY REPLACED COMPUTER BOARD...BUT STILL HAVE A PROBLEMS... MY ISSUES ARE ABOUT MY TOYOTA CAMRY/MODEL 2000 GOT ACCIDENT/INJURIES ON OCT. 2004 BECAUSE THE CAR HAD MANY PROBLEMS ARE:

C-313

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ROUGH OF CRUISE CONTROL SYSTEMS, ROUGH SPEED/RPM, GAS PEDAL, BRAKE, ROUGH IDLE, SUDDENLY ACCELERATED - WITHOUT PRESSING A GAS PEDAL. I HIT THE CAR AND MY FRONT BUMPER IS ALMOST FELT OFF. IT COSTS OVER A THOUSAND DOLLARS TO REPLACE BUT MY INJURIES IS NO MONEY TO REPLACE ITS BACK TO NORMAL, MY AUTO INSURANCE NOT PAYING MY MEDICAL BILLS ANY MORE...

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10100023  
**Date of Incident:** 20041014  
**Vehicle:** 2004 LEXUS ES330  
**Location of Incident:** HOUSTON, TX

**NHTSA Summary:**  
ELECTRONIC GAS PEDAL - WHEN AT LOW SPEED OR IMMEDIATELY AFTER COMING TO A STOP THE GAS PEDAL IS DEPRESSED THE CAR HESITATES FOR 1.5 SECONDS OR MORE BEFORE RESPONDING AND THEN ACCELERATES VERY FAST. THIS PRESENTS A SERIOUS SAFETY HAZARD WHEN TRYING TO ENTER OR CROSS BUSY HIGHWAYS. THE DEALER SAYS ALL THE 2004 7 2005 MODELS DO IT. IT IS A CONSTANT COMPLAINT. LEXUS CUSTOMER SERVICE SAYS THEY ARE AWARE OF IT BUT HAVE NO CURE. A SAFETY WARNING AND RECALL SHOPULD BE ISSUED.\*AK  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10103145  
**Date of Incident:** 20041014  
**Vehicle:** 2002 TOYOTA ECHO  
**Location of Incident:** OCEAN VIEW, DE

**NHTSA Summary:**  
VEHICLE WOULD INTERMITTENTLY JUMP OUT OF DRIVE INTO NEUTRAL WHEN APPLYING THE ACCELERATOR PEDAL FROM A STOP/SLOW MOTION OR FROM INCREASING THE SPEED TO HIGH LEVELS. VEHICLE HAD BEEN TO THE DEALER ON THREE OCCASIONS, AND THEY WERE UNABLE TO DUPLICATE THE PROBLEM.\*AK  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10095986  
**Date of Incident:** 20041016  
**Vehicle:** 1998 LEXUS GS300  
**Location of Incident:** SPRAGUE, AL

**NHTSA Summary:**  
AFTER STOPPING AT AN INTERSECTION, THE CAR WOULD TRAVEL FORWARD VERY SLOWLY WHILE DEPRESSING THE ACCELERATOR PEDAL NORMALLY. IT WOULD SUDDENLY "CATCH" AND LURCH FORWARD IF THE ACCELERATOR PEDAL WAS DEPRESSED. CAR WOULD THEN HANDLE NORMALLY FOR A FEW MOMENTS BUT UPON STOPPING WOULD REPEAT THE PROBLEM. VEHICLE WAS SHUT OFF AND RESTARTED SEVERAL TIMES IN AN EFFORT TO "REBOOT" THE CAR'S ELECTRONIC ACCELERATION SYSTEM BUT THE PROBLEM PERSISTED. CAR WAS TOWED TO THE LOCAL LEXUS DEALER. AFTER SITTING ON THE LOT FOR 1 DAY, VEHICLE STARTED AND OPERATED NORMALLY IN THE DEALER'S SERVICE LOT. DEALER HAS REPORTED THAT THE PROBLEM CALLS FOR THE REPLACEMENT OF THE VEHICLE'S THROTTLE BODY AND GASKET. \*AK  
**Additional Summary:**

C-314

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Toyota ID Number:**  
**NHTSA ODI Number:** 10096006  
**Date of Incident:** 20041018  
**Vehicle:** 2004 TOYOTA HIGHLANDER  
**Location of Incident:** JONESBOROUGH, TN

**NHTSA Summary:**  
MY 2004 TOYOTA HIGHLANDER EXHIBITS A SIGNIFICANT HESITATION AT THE START OF RAPID ACCELERATION THAT I BELIEVE IS A POTENTIAL SAFETY HAZARD. WHEN THE VEHICLE IS MOVING AT A SLOW SPEED AND THE ACCELERATOR IS DEPRESSED TO BEGIN A RAPID ACCELERATION (PASSING A SLOWER VEHICLE OR MERGING INTO TRAFFIC), A SIGNIFICANT HESITATION IS PRESENT BEFORE THE VEHICLE BEGINS TO ACCELERATE. THIS DELAYED RESPONSE TO THE ACCELERATOR INPUT CAN PLACE THE VEHICLE IN DANGEROUS SITUATIONS WHERE THE VEHICLE CANNOT GET OUT OF THE WAY OF OTHER TRAFFIC. I BELIEVE THIS BEHAVIOR COULD RESULT IN A TRAFFIC ACCIDENT AND POTENTIAL INJURY TO PEOPLE. \*AK  
**Additional Summary:**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

2004 TOYOTA CAMRY. CONSUMER STATES RAPID ACCELERATION. \*TGW THE CONSUMER STATED AS SHE SLOWLY TURNED INTO A PARKING SPACE AND BEGAN TO APPLY THE BRAKE, THE VEHICLE SUDDENLY LURCHED FORWARD, SENDING THE VEHICLE OVER A YELLOW CONCRETE BARRIER AND INTO A SMALL RETAINING WALL. THE VEHICLE CAME TO A STOP WHEN IT HIT THE RETAINING WALL. A FEW MONTHS LATER, THE SAME THING HAPPENED. AS THE CONSUMER WAS BACKING OUT OF A PARKING SPACE, THE VEHICLE SUDDENLY LURCHED BACKWARDS AND STARTED TO GO IN A SMALL SPIN. SHE APPLIED THE BRAKE AND THE VEHICLE STOPPED. THE THIRD INCIDENT HAPPENED WHEN THE CONSUMER WAS PROCEEDING UP A DRIVEWAY TO A HOSPITAL. AS SHE WAS SITTING WAITING TO PROCEED WITH HER FOOT ON THE BRAKE, THE VEHICLE ALL OF A SUDDEN LURCHED FORWARD. SHE IMMEDIATELY BRAKED HARDER AND THE VEHICLE STOPPED AFTER GOING ABOUT 3 OR 4 FEET FORWARD. \*JB

\*\*\* PHONE LOG 11/03/2004 09:35:45 AM JFewel  
RNW#041102-000147  
Email states: "2005 Tacoma RPM  
I just bought a 2005 Tacoma with a 4cyl, 5 speed. When I am at freeway speeds, and shifting up or down from 4th gear to 5th gear, the engine RPMs hang around 2,500 to 3,000. It seems like my foot is still on the accelerator. I find it very bothersome that when I up shift, I have to leave the clutch pushed in much longer than I normally would to allow the RPMs to fall..."  
\*\*\* NOTES 11/03/2004 09:36:17 AM JFewel  
... otherwise when I let the clutch out as I normally would, I get a clunk because the engine speed is too high.  
I took the truck to my dealer, was told this was probably normal, and in fact drove another truck. It had the same condition as mine. I would hope you can work this out of my truck. Maybe a little more mileage will help?  
Thanks,  
Randy Lyle"

\*\*\* SUBCASE 200411030416-1 CREATED 11/03/2004 09:38:12 AM JFewel  
<as-html>  
Thank you for contacting Toyota Motor Sales, U.S.A., Inc.<p>  
We apologize for your concern regarding the RPMs of your 2005 Tacoma.<p>  
In order to properly assess your concerns, we have contacted the Customer Relations Manager at Toyota Of El Cajon to further evaluate your Tacoma.<p>  
Toyota dealership technicians are specialized in the diagnosis and repair of Toyota vehicles. They are provided with extensive training and have access to state-of-the-art equipment to help in the accurate diagnosis of your vehicle. Also, if necessary, we provide additional support to assist Toyota dealership technicians in resolving unusual vehicle concerns.<p>  
The Customer Relations Manager will contact you by the end of the business day, Monday, November 8, 2004. In the event you do not receive any contact from the dealership by this date, please <a href = 'http://toyota.custhelp.com/cgi-bin/toyota.cfm/php/enduser/std\_adp.php?p\_faqid=164'TARGET=\_BLANK >contact us</a> with file #Sincidents.csclearifcasenumber.<p>

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

WHILE BACKING OUT OF A DRIVEWAY AND SHIFTING FROM REVERSE INTO DRIVE VEHICLE SUDDENLY ACCELERATED OUT-OF-CONTROL INTO ADJACENT NEIGHBOR'S YARD. IMMEDIATE AND CONTINUAL APPLICATION OF BRAKES DID NOTHING -- ENGINE CONTINUED TO REV AND I NARROWLY AVOIDED STRIKING A HOUSE. INSTEAD, I WAS FORCED TO STRIKE A ROW OF TREES TO STOP RUN-AWAY VEHICLE. FRONTAL AIR BAGS FAILED TO DEPLOY ON EITHER SIDES. HAD IT NOT BEEN FOR THE TREES, I WOULDVE STRUCK A 500 GALLON PROPANE TANK, 2 PARKED PICKUP TRUCKS, AND THE ORIGINAL HOUSE FROM WHICH I WAS DEPARTING FROM. MY LONE PASSENGER AND I WILL BE EMOTIONALLY SCARRED FOREVER BY THIS INCIDENT. PLEASE FORCE TOYOTA TO ISSUE A RECALL HERE! PLEASE DON'T WAIT FOR A DEATH... PLEASE!!!!\*AK

**Vehicle:** 2004 TOYOTA CAMRY  
**Location of Incident:** AUSTIN, TX

**NHTSA Summary:**  
I WAS STOPPED IN TRAFFIC ON IH-35 IN AUSTIN DUE TO AN ACCIDENT AHEAD. I HAD AN OPPORTUNITY TO MOVE TO AN EXIT LANE AND AFTER MOVING TO THAT LANE, NOTICED A VEHICLE COMING TOWARD ME AT HIGH SPEED. MY WAY WAS CLEAR TO ACCELERATE AND I DID SO, PRESSING THE ACCELERATOR ABOUT 1/2 THE WAY DOWN. NOTHING HAPPENED AND I PRESSED THE ACCELERATOR THE REMAINDER TO THE FLOOR. AFTER A SHORT TIME, THE ENGINE FINALLY ACCELERATED. THREE DAYS LATER, ON DEC. 7, I TOOK THE CAR TO THE DEALER AND EXPLAINED WHAT HAD HAPPENED. AFTER EXAMINING THE CAR, THE DEALER CALLED TO EXPLAIN THAT THEY HAD CHECKED THE CAR OVER AND EVERYTHING WAS FINE. HE FURTHER EXPLAINED THAT THE 2004 CAMRY WAS EQUIPPED WITH A "DRIVE-BY-WIRE" ACCELERATOR. NO ONE WAS INJURED, NO DAMAGE WAS DONE, BUT I AM CONCERNED THAT THIS CAR WILL NOT RESPOND QUICKLY IN A DANGEROUS SITUATION. NOR DO I BELIEVE THAT THIS IS AN ISOLATED SITUATION. WE HAD DRIVEN A DEMONSTRATOR, A 4 CYLINDER CAMRY, ABOUT SIX MONTHS BEFORE WE PURCHASED OURS. MY WIFE WAS DRIVING AND PRESSED HARD ON THE ACCELERATOR TO GET IT TO MOVE UP AN ENTRANCE RAMP AND IT ALSO DID NOT RESPOND. AT THAT TIME, I DIDN'T PLACE ANY SIGNIFICANCE TO THE CAR NOT

C-325

**Safety Research & Strategies**

**Date of Incident:** 20041208  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** LOS ANGELES, CA

**NHTSA Summary:**  
I'M CONCERNED THE TOYOTA BRAKING ISSUES GO DEEPER THAN LATE MODEL PRIUS. MY 2005 CAMRY LE V6 EXHIBITS SIMILAR CHARACTERISTICS AS BEING DESCRIBED TODAY - BRAKE FAILURE WHEN DRIVING OVER UNEVEN, IRREGULAR OR ROUGH PAVEMENT. WHEN THIS OCCURS, THE BRAKE PEDAL STIFFENS AND BRAKING ACTION CEASES. I'VE LEARNED TO PRESS DOWN V-E-R-Y HARD ON THE PEDAL DURING THIS INTERMITTENT BEHAVIOR. HAD TAKEN TO THE DEALER MORE THAN ONCE. THE COMPLAINT ALONG WITH HARSH SHIFTING OF THE TRANSMISSION WHICH MANIFESTS IN THE ENGINE OVER-REVING WHILE NOT ACTUALLY ENGAGING INTO ANY GEAR, THEN THE TRANSMISSION FINALLY ENGAGES MAKING THE VEHICLE GO FURTHER/FASTER THAN DESIRED/ANTICIPATED. TOYOTA INDICATED THE ISSUES WERE "AN OPERATIONAL CHARACTERISTIC OF THE VEHICLE", BEING DISMISSIVE IN THEIR RESPONSE DEMONSTRATING A CORPORATE CULTURE OF ARROGANCE. HAVE SPOKEN WITH TOYOTA SERVICE MANAGERS IN HENDERSON, NV, SANTA MONICA AND THOUSAND OAKS, CA RE: THE TRANSMISSION AND THEY ALL HAVE SIMILAR RESPONSES... ROLLING THEIR EYES TOWARD THE SKY AND LAMENTING, "OHHH, THAT V6 CAMRY TRANSMISSION" AS IF SOME SORT OF FACTORY "INSIDE JOKE". THESE ARE CLEARLY KNOWN ISSUES THE FACTORY HAS CHOSEN TO DO NOTHING ABOUT, THUS THE SERVICE MANAGER'S HANDS ARE TIED. (HAD BEEN EXTREMELY PLEASED WITH MY FORMER '95 CAMRY TO THE TUNE OF 300,000 MILES.) IT'S DISAPPOINTING TOYOTA HAS CEASED TO BE THE HONORABLE COMPANY THEY ONCE WERE.

\*\*\* PHONE LOG 12/01/2007 01:31:38 PM JFewel  
RNT#07123-000110  
Email states: "engine idle on a V6 2005 tacoma  
When starting truck engine idle rev,s up to 1500 rpm. This seems a bit excessive to me. Is this normal for this truck my dealer says its normal we think not. backing out or going forward is hard have to touch brakes to keep from going too fast."

\*\*\* SUBCASE 200712010344-1 CREATED 12/01/2007 01:36:19 PM JFewel  
Thank you for contacting Toyota Motor Sales, U.S.A., Inc.  
We apologize for your concern regarding your Toyota's idle speed.

While we cannot diagnose your Toyota based on your email, and as you have not mentioned any warning lights coming on, your concern may be related to the way the engine alters its idle speed when cold, to allow the emissions system to warm up faster, which becomes more pronounced as the weather turns colder. By way of background, each year the government slightly tightens emissions standards so that vehicles emit less pollution.

C-328

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

Modern vehicles have a very sophisticated emissions system that only works when hot or warm. If the vehicle is cold, more emissions are produced. The only way to heat the emissions components quickly up so they work properly is to run the engine faster when it is cold. The government wants engines and emissions systems to warm up as soon as possible so the emissions control systems work efficiently as soon as possible after a cold start. You will notice that the engine will run fast when cold, (engine RPM higher) until the emissions components are properly warmed. By forcing the idle speed to stay higher, the engine turns faster and warms up more quickly than if it is allowed to idle normally as it does when it is warmed up. To accommodate the higher RPMs when the engine is cold, Toyota specifies the following engine oil, which aids cold start-up and high RPM in the cold engine:

Oil grade:  
API grade SL "Energy/Conserving" or ILSAC multigrade engine oil Recommended viscosity:  
SAE 5W/30  
SAE 5W/30 is the best choice for good fuel economy and good starting in cold weather.  
In order to assess if the cold idle speed of your Tacoma is normal, your vehicle will need to be inspected by your local Toyota dealership <http://www.toyota.com/dealers>, as their technicians are specifically trained in the diagnosis and repair of Toyota vehicles.  
If your Toyota dealership has already inspected your vehicle and found it to be operating normally, we would concur with their findings.  
In addition, we apologize for the concerns you experienced with your recent service at McGee Toyota. You can be sure that Toyota is committed to providing the best possible service at Toyota dealerships and to making the service experience a favorable one. We encourage each dealership to maintain a professional level of performance at all times, and we were sorry to learn that you felt the service you received was less than satisfactory.  
In the interest of customer satisfaction, we have contacted the Customer Relations Manager at McGee Toyota to assist you with your concerns. The Customer Relations Manager will contact you by the end of the business day Wednesday, December 5, 2007.  
In the event you do not receive contact from the dealership by this date, please contact us <http://toyota.custhelp.com/cgi-bin/toyota.cfm?php/enduser/std\_adp.php?p\_faqid=4164> with file #Sincidents.c\$clarifycasenumber.  
It is through correspondence such as yours that we are able to continue to improve Toyota dealership services, and we sincerely appreciate the time you have taken to bring this matter to our attention.  
Toyota Customer Experience

\*\*\* PHONE LOG 08/09/2005 01:52:27 PM CMarshall  
cust sts purch 05 tacoma. sts noticed high rpm up to 2400. sts dlr adv condition is normal, adv cust that dlr checked w/ other tacoma. sts happens every morning.

\*\*\* CASE CLOSE 08/09/2005 01:52:36 PM CMarshall  
apol and adv(per ccc tech) revs high b/c emission standards  
\*\*\* NOTES 08/16/2005 10:53:41 AM Cteveno  
Cust c/b sts took after call survey and was informed a sup would c/b. Sts one week later, still has not recvd a c/b. Ncr apol adv there is no documented request for a sup so a sup may not have gotten a notice. Ncr adv higher revs are due to engine warming up and is safe as long as the tach does not reach the redline. Cust still demands a sup c/b, not satisfied w/answer or survey, wants another opinion.  
\*\*\* NOTES 08/16/2005 03:15:03 PM MSakima  
==== SUPV ==== TS MSakima called cust, apologized he was not called sooner. cust indicates dlr kept veh overnight, found at start-up next day that veh did rev/idle fast but dropped down and dlr advsd was

C-332

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

characteristic of the veh and was emissions related. cust sts there are times veh will fluctuate between 2,400 - 1,800 rpms at start-up. Cust sts when passerbys are near veh they sometimes appear concerned b/c of the revving. cust sts veh not near redline but he is >>>>

\*\*\* NOTES 08/16/2005 03:17:17 PM MSakima  
>>> concerned. cust sts to know from tms what the published info on veh indicates, is it as the dlr states? ncr plsd cust on hold and researched with tce tech who indicated #s cust seeking not available in published source. ncr apologized to cust that info not immediately available but will research further and get back to him on 8/17/05.

\*\*\* NOTES 08/17/2005 10:32:38 AM MSakima  
ts msakima called dlr, spk to joe. svc advsr and mike/svcmgr regarding cust issue. ncr advsd will be opening case to dlr for diagnosis as cust is bothered by cond and we would like to have it looked at again and dlr findings doc'd in case. dlr would like to have veh overnight, joe indicated if left overnight would provide loaner. ncr to call cust back to advise.

\*\*\* NOTES 08/17/2005 10:33:46 AM MSakima  
ncr clld cust and advsd will open file to dlr for more diagnosis. cust sts this morning at start up veh idle fluctuated from 2400 rpm to 1500 rpm and back up to 2400. cust is very concerned with fluctuation and cond.

\*\*\* CASE CLOSE 08/17/2005 10:34:23 AM MSakima  
tms open in error, new case created for issue  
\*\*\* NOTES 08/23/2005 11:55:31 AM CVargas  
Cust sts would like to spk to Marion, NCR adv she is unavailable and will call cust back.  
\*\*\* NOTES 08/23/2005 02:23:07 PM JMarvrdin  
cust c/b & asked to speak w/MSakima. ncr checked case notes & warm transferred to MSakima.  
\*\*\* NOTES 08/29/2005 10:40:39 AM EValdez  
cust sts would like to spk w/MSakima, MSakima sts will c/b as earliest availability, ncr advd cust will rev a c/b from Marion, cust understood.

cust sts"  
I have a 2005 Tacoma PreRunner double cab V6. I have some issues with the behavior of the automatic transmission while braking and while stationary when the AC cycles. I think a TSB is warranted. While braking the transmission continues to push to the point that it feels like you have a trailer. It is also a little erratic due to the downshifting of the transmission while braking and the push surges when the rpms rise on these downshifts. The problem while stationary causes the vehicle to actually surge forward several inches and sometimes push hard enough to continue rolling forward. These problems should be able to be dealt with through software changes. Please let me know if you have additional questions."  
END VERBATIM

\*\*\* SUBCASE 200511160030-1 CREATED 11/16/2005 05:53:54 AM QHolmes  
cust sts "I bought a 2005 Tacoma regular cab 4 x 2 back in late July, and I love the truck. The performance of the 2.7 is outstanding. My only concern is that during a cold start, the engine will rev to 2000, sometimes as high as 2200 rpm, and remain there for a considerable time. It takes at least 30 seconds for it to idle down to about 1500 rpm, particularly in cooler weather, at which point I feel comfortable shifting it into gear (it is an automatic). The owner's manual says nothing about the fast idle, only that you can start driving gently once the engine is running smoothly. I have just been using common sense since I don't feel it is good for an automatic to be shifted above 1500 rpm. Truthfully, I would rather have the engine running at 1000 rpm before shifting, but don't have all day to wait. As it is, it is bad enough if I am going out to lunch or to a meeting at work and following someone whose engine idles down right away, because there I sit waiting. Everyone knows that neutral-drops are bad for an automatic, and that is essentially what one is doing if they put it in gear at 2000 rpm.  
I spoke to the dealer about this, and he said it is normal - even the big Tundras do it - and that it cannot be adjusted even if they wanted to because the computer is pre-set and cannot be adjusted. The only thing your FAQ page mentions is that a fast idle is used to warm up the catalytic converter and engine quickly. This makes sense, but I am concerned that 2000+ rpm is a bit extreme on a cold engine with aluminum head and iron block, especially if it is sub-zero temperatures.  
Bottom line question: are the RPM numbers I'm giving you what you would "normally" see for this engine? And, what are your recommendations for the RPM that it should be running at before it is shifted into gear? I assume I just have to live with it, but want to make sure I'm not doing any damage.

Thanks,  
Ron Vaughan"

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

++INCOMING DLR CALL++ call from Dave (SM), dlr sts toyota tech told him RPM's wont drop when touching the brake unless veh is moving less than 19 mph. dlr sts he will call me to let me know if vibration was resolved with changing tires  
 \*\*\* NOTES 12/29/2005 12:51:39 PM PTImberlake  
 ++OUTGOING DLR CALL++spoke to Dave (SM), dlr sts tires have come in yet. ncr adv i will call dlr by 1/3 to see if Bridgestone tires resolved the vibration issue.  
 \*\*\* NOTES 01/03/2006 11:21:14 AM PTImberlake  
 ++OUTGOING DLR CALL++ left v/m for Dave to call me back  
 \*\*\* NOTES 01/03/2006 01:18:02 PM PTImberlake  
 ++INCOMING DLR CALL++spoke to Dave (SM), sts he put Bridgestone tires on veh on 12/30/05, dlr sts cust sts vibration is much better. dlr sts cust is still unhappy about RPM problem.  
 \*\*\* NOTES 01/03/2006 01:26:37 PM PTImberlake  
 ++OUTGOING REGION EMAIL++ sent email to Mario to how he wants to handle RPM issue.  
 \*\*\* NOTES 01/04/2006 03:17:57 PM MChaves130  
 RCR called DSPM today and request he follow up with SM at dealership to determine if the RPM issue has been addressed. RCR requested call back from DSPM.  
 \*\*\* NOTES 01/05/2006 10:08:01 AM MChaves130  
 RCR received call from DSPM and he states issue with vibration has been addressed and corrected. The DSPM reviewed the issue with the RPM with the service manager and the vehicle has been inspected thoroughly. At this time the condition is considered normal. The DSPM advises no further action required at this time frame.  
 \*\*\* NOTES 01/05/2006 10:26:22 AM PTImberlake  
 ++OUTGOING CUST CALL++ i/m for cust to call me back (ncr will adv cust RPM issue is normal)  
 \*\*\* NOTES 01/06/2006 02:30:55 PM PTImberlake  
 survey sent per cust request

\*\*\* CASE CLOSE 01/06/2006 02:35:33 PM PTImberlake  
 1)Summary - veh vibrates and cust feels RPM too high when leaving clutch in between 4th-5th gear.  
 2)Action Taken - dlr switch tire to Bridgestone to resolve vibration. region/dlr adv RPM issue is normal  
 3)Resolution - dlr switch tire to Bridgestone to resolve vibration. region/dlr adv RPM issue is normal  
 4)Cust Satisfied - no  
 5)Root Cause - tires causing vibration issue. nothing wrong with RPM issue  
 \*\*\* SUBCASE 200512161018-1 CLOSED 01/06/2006 02:36:17 PM PTImberlake  
 dlr fixed vibration issue by changing to Bridgestone tires. RPM issue normal

RNW #050203-000052

cust sts "Hello, Toyota!  
I purchased a 2005 Toyota Tacoma a couple weeks ago and wanted to provide some comments:  
Vehicle: Toyota Tacoma Access Cab 4x4 V6 (TRD Off-Road Package #2)  
Year/Model: 2005/7554A  
Color: Silver Streak Mica  
VIN: STEUU42N85Z034801  
PORT/PLANT: Fremont, CA/NUMMI  
Positive Comments:

1.  
Very impressive engine  
2.  
Beautiful design, outside and inside  
3.  
Full-size spare  
4.  
Outstanding headlights/fog lights  
5. >>>

\*\*\* NOTES 02/03/2005 12:52:48 PM KWoods  
<<<Unbelievable radio reception...can hear stations further away than any other vehicle I own. (I own 4)  
6.  
Good MPG for such a large vehicle (I'm getting about 21 mpg even with some 4WD)  
Areas for Improvement:  
1. Cruise control a little to quick to downshift 2 gears for hills that's aren't even severe (wastes gas)  
2. Nowhere to put my garage door opener (visor is too thick to clip it to)  
3. No locking gas cap  
4. No noise when I lock the doors with the remote. (I >>>  
\*\*\* NOTES 02/03/2005 12:53:00 PM KWoods  
<<<-have to watch for the lights to blink...kinda annoying)  
5. Owners Manual: Not written for those of us who like to do our own minor maintenance (i.e.: Oil changes)  
6. Vehicle tends to "lurch" while idling at stop signs or stop lights, while in drive...we have to keep firm pressure on brake peddle  
7. No light on dial to switch from 2wd to 4wd...impossible to see at night.  
8. Push button to turn on fog lights right next to button to activate rear differential...bad>>>  
\*\*\* NOTES 02/03/2005 12:53:34 PM KWoods  
<<<-bad choice off location  
9. Outside mirror controls. I can't find it unless I actually look to find it...bad location  
10. No auto-dimming rear view mirror...why does it cost over \$200 to buy one?  
11. No available lockable gas cap. (That I've found.) "

Email Response

<as-html>  
Thank you for contacting Toyota Motor Sales, U.S.A., Inc.<p>  
Congratulations on the purchase of your 2005 Tacoma.<p>

C-353

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

We have documented your comments about the Tacoma at our National Headquarters where they will remain available for review by the appropriate departments.<p>  
We apologize; we do not market a locking gas cap for the Tacoma. So if you find one, it will not be a Toyota product.<p>  
We also understand your concern about the price of the auto-dimming mirror. We make every effort to use quality vendors for our accessories which does result in a higher cost of items like the auto-dimming mirror.<p>  
In regards to the <i>Owner's Manual</i>, for liability purposes we are unable to include items such as oil changes or maintenance to the transmission fluid. Our maintenance information is now only available in the <i>Technical Repair Manual</i> which is available at our Material Distribution Center (1-800-622-2033).<p>  
Thank you again for taking the time to email Toyota.<p>  
Your feedback is appreciated. It is through comments such as yours that we are able to review and improve our products.<p>  
Your email has been documented at our National Headquarters under file # 200502030715. If we can be of further assistance, please feel free to <a href="http://toyota.custhelp.com/cgi-bin/toyota.cfm?enduser/std\_adp.php?p\_faaid=164TARGET=\_BLANK">contact us</a>.<p>

nrc called cust @ the day # listed & left a message & toll-free# w/ receptionist naomi.

\*\*\* NOTES 07/11/2005 01:24:56 PM RABola  
OUTGOING CUST CALL  
nrc called the cust (Greg Foote) @ 1:24pm pst. ncr spoke w/ receptionist terry who adv that greg foote was not available. ncr left a toll-free# for c/b.

\*\*\* NOTES 07/11/2005 02:21:57 PM BGarduno  
cust c/b wanting to spk w/RABola. NCR called RABola and did not answer. NCR left message and adv cust that RABola will contact @phonet# in case. NCR adv cust that will be contacted by end of bus day tomorrow.

\*\*\* NOTES 07/13/2005 09:49:37 AM RABola  
OUTGOING CUST CALL  
nrc called greg foote @ 9:28am pst. sts one of his employees took veh to dlr last week (tues or wed) for a mudflap issue. sts is not sure if dlr wanted to discuss the trans concern. ncr placed cust on hold & contacted svc mnggr ron ryan & left a voicemail, direct#, & case#.

\*\*\* NOTES 07/13/2005 09:56:35 AM RABola  
INCOMING DLR CALL  
nrc revd a c/b from svc mnggr ron ryan. svc mnggr sts cust's concern was that the eng was revving too high when shifting trans. sts dlr test drove veh and found that the rpm needle remains stationary when shifting gears. sts dlr spoke w/ TAS who adv that this was a normal characteristic of veh. sts he also spoke w/ fts (MHoughtling) who confirmed this answer. sts there was no fls inspection @ the time. sts when case was opened, he assumed that there-

\*\*\* NOTES 07/13/2005 09:56:41 AM RABola  
<would be an fls inspection. however, sts spoke w/ the dspm (CForeman) who adv that there is no need to further involve fts/asregion as concern is a normal characteristic of veh.

\*\*\* NOTES 07/13/2005 03:50:30 PM RABola  
OUTGOING CUST CALL  
nrc called greg foote @ 3:47pm pst. ncr adv that based on the region, dlr, and tech rep, the concern is a normal characteristic of veh & that there was nothing more than could be done. greg understood & adv will have the owner (walt pathucki) c/b. ncr understood.

\*\*\* NOTES 07/15/2005 01:02:23 PM RABola  
RESEARCH  
nrc has not revd a c/b. ncr will close case pending c/b from owner walter pathucki.

\*\*\* NOTES 07/15/2005 01:04:57 PM RABola  
1)SUMMARY: Over-revving when shifting between 4th & 5th gear  
2)REGION OPEN: Yes, DSPM & FTS involved  
3)RESOLUTION: No, as DSPM & FTS finds that the veh is operating as designed  
4)CUSTOMER SATISFIED: No  
5)DAYS TO CLOSE: 42 Days

\*\*\* SUBCASE 200505231520-1 CLOSED 07/15/2005 01:05:13 PM RABola  
nrc closing subcase.  
\*\*\* NOTES 07/21/2005 02:47:45 PM ABaker1  
Walt Pachucki called for prev rep, sts has a question for him about the case. Ncr apol & adv RABola not avail, will l/m requesting him to call cust back. Ncr sent screenshot to RABola.

\*\*\* NOTES 07/25/2005 04:02:12 PM RABola  
OUTGOING CUST CALL  
nrc called the cust @ the day # listed (3:55pm pst) & spoke w/ owner, walter pathucki. sts would like a letter stating that this concern is normal. ncr adv that the r/o stating tms' position is sufficient. ncr asked if he had the ppwrk w/ him. sts will have greg foote search for the info & will c/b. ncr understood.

\*\*\* NOTES 07/25/2005 04:08:32 PM TSmith

prev case 200505271041

Cust letter addresses the same issues as the previous case. No new developments. Working from case number 200505271041. Will provide close to both cases, duplicate contact.

\*\*\* CASE CLOSE 06/01/2005 05:08:34 PM EKovacs

Customer states: When the engine is cold, the transmission is in park, and the key is turned to start the engine instantly revs up to over 2200 RPM.

Customer seeks: To have the concern with the high idle repaired.

Executive office: Contacted the DSPM and a FTS come out to inspect the vehicle. The region did not find a concern with the vehicle. ER spoke to tech & was advised the high idle after a cold start is normal for this vehicle. The customer's repair orders all indicate the vehicle is operating as designed.

Customer satisfied: No

Root cause: Engine design - High idle after cold start

\*\*\* NOTES 06/09/2005 01:04:18 PM EKovacs

Mr. John Nestor

11832 Gladstone Dr

Santa Ana, Ca 92705-2938

RE: Letters to Toyota Motor Corp. Japan

Dear Mr. Nestor:

Thank you for contacting us regarding your 2005 Tacoma.

In Toyota's continuing commitment to provide quality service, we provide our dealerships with the necessary training, technical information, and additional support personnel to aid them in unusual situations. We regret to hear of your dissatisfaction with the operation of your Tacoma and

\*\*\* NOTES 06/02/2005 01:51:50 PM EKovacs

have reviewed your situation. We note that your vehicle was thoroughly inspected and tested for the condition you described and that it was determined that it has been set to all proper specifications and that all components are functioning properly. As your Tacoma meets Toyota's manufacturer's specifications, there is no further repair or action to be taken at this time.

\*\*\* NOTES 06/02/2005 01:52:14 PM EKovacs

Toyota values you as a customer and we appreciate this opportunity to further review your situation.

Sincerely,

Elizabeth Kovacs

Toyota Executive Office

Date of Incident: 20050101

Vehicle: 1999 TOYOTA CAMRY

Location of Incident: PORT ORANGE, FL

NHTSA Summary:

TL\*THE CONTACT OWNS A 1999 TOYOTA CAMRY. WHILE DRIVING (MPH UNKNOWN) THE ACCELERATOR PEDAL WOULD STICK. THE DEALER REPAIRED THE SPEED CONTROL ACTUATOR; HOWEVER, THE FAILURE CONTINUED TO OCCUR. THERE IS A RECALL FOR THE VEHICLE SPEED CONTROL (NHTSA CAMPAIGN ID #01V012000). THE DEALER STATED THAT HER VIN WAS NOT INCLUDED. THE CURRENT MILEAGE WAS 30,000 AND THE FAILURE MILEAGE WAS UNKNOWN.

Additional Summary:

Toyota ID Number:

NHTSA ODI Number: 10305211

Date of Incident: 20050101

Vehicle: 2002 TOYOTA 4RUNNER

Location of Incident: DENVER, CO

NHTSA Summary:

READING ABOUT THE PROBLEM WITH THE BRAKING SYSTEMS OF THE TOYOTA PRIUS, I LEARNED THAT THE BRAKING SYSTEM MIGHT NOT WORK WHEN THE VEHICLE HITS A POTHOLE, UNEVEN PAVEMENT, OR BUMP. I'VE HAD THE SAME PROBLEM IN MY '02 4RUNNER. IF THE BRAKES ARE APPLIED AND THE VEHICLE HITS A BUMP, THE BRAKES FEEL AS IF THEY ARE NOT WORKING. (BRAKE PEDAL GOES STRIGHT TO THE FLOOR W/NO PRESSURE). THIS ISSUE GOES AWAY IF YOU RELEASE THE BRAKE PEDAL AND REAPPLY PRESSURE TO THE BRAKE. (PUMP). I ALWAYS THOUGHT THIS WAS "NORMAL" UNTIL I READ ABOUT THE PRIUS ISSUES WITH IT'S BRAKING SYSTEM. THE ISSUES WITH THE PRIUS SOUND TOO SIMILAR TO DISMISS THE ISSUE AS JUST A PROBLEM WITH THE CAR'S ELECTRIC ENGINE.

Additional Summary:

Toyota ID Number:

NHTSA ODI Number: 10310900

Date of Incident: 20050101

Vehicle: 2004 TOYOTA HIGHLANDER

Location of Incident: LAKEWOOD, WA

NHTSA Summary:

EVER SINCE I PURCHASED MY HIGHLANDER, NEW, I INFREQUENTLY EXPERIENCE AN UNEXPECTED SURGE IN ACCELERATION WHILE BEGINNING TO ACCELERATE FROM A STOP, OR AFTER SLOWING TO TURN A CORNER. THIS HAS HAPPENED SEVERAL TIMES WHILE TURNING A CORNER. I HAVE BROUGHT THIS UP TO TWO DIFFERENT TOYOTA DEALERSHIPS, IN THE PAST, AND WAS TOLD THAT THEIR ELECTRONIC TRANSMISSION WAS THEIR BIGGEST COMPLAINT, BUT THERE WAS NOTHING THEY COULD DO ABOUT IT.

C-375

Safety Research & Strategies

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

Toyota ID Number:  
NHTSA ODI Number: 10316348  
Date of Incident: 20050101  
Vehicle: 2005 TOYOTA TUNDRA  
Location of Incident: PLEASANTON, CA

NHTSA Summary:

LONG DELAY BETWEEN DEPRESSING "DRIVE-BY-WIRE" GAS PEDAL AND ENGINE RESPONDING. MY 2005 TOYOTA TUNDRA HAS AN ELECTRONIC GAS PEDAL. ITS UNACCEPTABLE BEHAVIOR MAY EXPLAIN SOME OF THE CURRENT "SURGING" PEOPLE ARE SEEING IN OTHER TOYOTAS. THIS IS A 100% SOFTWARE PROBLEM (I AM AN ELECTRONIC ENGINEER). DESCRIPTION: WHEN THE ENGINE IS AT IDLE, OR EVEN WORSE, WHEN YOU ARE DECELERATING AT IDLE POWER, AND YOU INCREASE THE THROTTLE POSITION OF THE GAS PEDAL, THERE IS A NEARLY 1-SECOND DELAY BEFORE THE ENGINE RESPONDS TO THE THROTTLE INPUT. IF THE DRIVER, NOT SENSING ANY RESPONSE TO THROTTLE, APPLIES MORE AND MORE THROTTLE DURING THAT ONE SECOND DELAY, WHEN THE ENGINE ELECTRONIC THROTTLE FINALLY DOES RESPOND IT WILL IMMEDIATELY GO TO THE HIGHEST THROTTLE SETTING THE DRIVER WAS SELECTING, CAUSING A HUGE LURCHING FORWARD ACTION OF THE VEHICLE. FOR EXAMPLE, IF THE DRIVER APPLIED THROTTLE IN THIS FASHION: 0SEC=5% THROTTLE; 0.25SEC=10% THROTTLE; 0.5 SEC=20% THROTTLE; 0.75SEC=35% THROTTLE; 1.0SEC=50% THROTTLE. THE ENGINE'S ELECTRONIC THROTTLE WILL RESPOND LIKE THIS: 0SEC=0% THROTTLE; 0.25SEC=0% THROTTLE; 0.5 SEC=0% THROTTLE; 0.75SEC=0% THROTTLE; 1.0SEC=50% THROTTLE. CAUSING THE HUGE LURCH AT 1.0 SECOND. THIS HAS BEEN ESPECIALLY DANGEROUS WHILE CHANGING LANES DURING STOP-AND-GO TRAFFIC IN THE SAN FRANCISCO BAY AREA. PLEASE NOTE THAT IF I AM RUNNING AT PARTIAL POWER/THROTTLE, THIS BEHAVIOR DOES NOT HAPPEN, AND THE GAS PEDAL RESPONSE IS PROPER. ONLY FROM IDLE OR DECELERATING. I HAVE COMPLAINED NUMEROUS TIMES TO MY TOYOTA DEALER, TO WHICH THE SERVICE MANAGER FINALLY REPLIED TO ME "YOU THINK THE TUNDRA IS BAD.. YOU SHOULD TRY DRIVING THE SIENNA! IT'S WORSE!" SO APPARENTLY THE FOLKS AT TOYOTA KNOW ABOUT THIS AND THINK IT'S FUNNY. I CAN DEMONSTRATE THIS DEFECT AT ANY TIME. I HAVE CHANGED MY DRIVING STYLE TO PROTECT ME FROM THE VEHICLE'S DEFECT.

Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10306407  
Date of Incident: 20050102  
Vehicle: 1998 TOYOTA COROLLA  
Location of Incident: BALTIMORE, MD

NHTSA Summary:

I OWN A 1998 TOYOTA COROLLA. 3 OR 4 YEARS AGO I THREW AWAY MY DRIVER SIDE FLOOR MAT BECAUSE I HAD PROBLEMS WITH IT SLIDING UNDER GAS PEDAL AND THE PEDAL WOULD THEN STICK. AS OF NOW I HAVE NO FLOOR MAT AND THAT HAS RESOLVED THE PROBLEM

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I BOUGHT A 2006 TOYOTA CAMRY LE SEDEN IN NOVEMBER OF 2004. AFTER I START TO DRIVE THE CAR I NOTICED ALMOST EVERY TIME I SAW THE RED LIGHT AND TOOK MY FOOT FROM GAS PEDAL BUT DID NOT PUSH ANY BREAK, THE CAR WILL SLOW DOWN. BUT WHEN THE SPEED AT ABOUT 28 MILES/ HOUR THE CAR WILL SUDDENLY SPEED UP TO 29-30 MILES WITHOUT EVEN TOUCH THE GAS PEDAL. I BROUGHT THE CAR TO THE TOYOTA DEALER IN EL MONTE CA, LONGO TOYOTA IN JAN. 2005. AFTER THE MACHNIC DRIVED WITH ME HE ALSO NOTICED THE PROBLEM. HE TOLD ME THAT THERE MAY BE A PROBLEM WITH THE SOFT WEAR THAT CONTROL THE GAS. BUT WHEN WE GOT BACK HE TOLD ME THAT THE PROBLEM IS NOT THE SAME AS THE LEXUS WHICH HAD A SIMILAR PROBLEM. I BROUGHT THE CAR BACK AGAIN AFTER I ALMOST INVOLVE AN ACCIDENT DUE TO SUDDEN ACESARY. BUT WAS TOLD THAT THERE WAS NO ISSUE AND NO RECALL REGARDING THIS MODEL. THOUGH I STILL KEEP THE CAR AND I HAVE TO BE VERY CAREFUL DUE TO THIS SUDDEN ACESARY ISSUE. I DEFINITLY THINK THIS IS THE SAME PROBLEM ALL THE CARS WERE RECALLED. MY CAR VIN # 4T1BE32K35U394521.

COMPLAINT VIA E-MAIL. HAD LEARNED THAT NHTSA INVESTIGATED SUDDEN ACCELERATION IN THE 2002 AND 2003 TOYOTA CAMRY. I EXPERIENCED THIS EFFECT RECENTLY WITH MY 1999 CAMRY. THE INCIDENT TOOK PLACE INSIDE THE GARAGE OF MY APARTMENT BUILDING. ALTHOUGH NO INJURIES OCCURRED, MY CAR AND ANOTHER CAR SUFFERED SOME BODY DAMAGE. I TOOK THE CAR TO A TOYOTA SERVICE CENTER, BUT THE TECHNICIANS WERE UNABLE TO FIND ANYTHING THAT WOULD EXPLAIN THE SUDDEN ACCELERATION. \*AK THE CONSUMER WAS BACKING INTO HIS PARKING SPACE WHEN THE VEHICLE SUDDENLY LURCHED FORWARD. THE BRAKES DID NOT SLOW THE VEHICLE. THE CONSUMER HIT A POST, BOUNCED OFF IT AND HIT A PARKED VEHICLE. THE AIR BAG DID NOT DEPLOY. \*SC

Cust sts "the dealer told me that they can not adjust the cold start engine speed on my 05 tacoma, this thing cranks up at 2500 rpm's when cold, the engine bearings are starved for oil and rattle and squeal for a minute or more every morning. this CAN NOT be good. I am very concerned about the longevity of this engine

\*\*\* SUBCASE 200502140729-1 CREATED 02/14/2005 11:01:54 AM SDom  
Thank you for contacting Toyota Motor Sales, U.S.A., Inc.  
We apologize for your concerns with the cold start rpm speed.  
In order to properly assess your concerns, we have contacted the Customer Relations Manager at Don McGill Toyota to further evaluate your Tacoma.  
Toyota dealership technicians are specialized in the diagnosis and repair of Toyota vehicles. They are provided with extensive training and have access to state-of-the-art equipment to help in the accurate diagnosis of your vehicle. Also, if necessary, we provide additional support to assist Toyota dealership technicians in resolving unusual vehicle concerns.  
The Customer Relations Manager will contact you by the end of the business day, Thursday, February 17th. In the event you do not receive any contact from the dealership by this date, please contact us < [http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enduser/std\\_adp.php?p\\_faqid=164](http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enduser/std_adp.php?p_faqid=164) with file #Sincidents.c&clarifycasenumber.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

DT: THE CONTACT OWNS A 2005 LEXUS ES330. THE CONTACT STATED THAT UPON ACCELERATION AFTER SLOWING DOWN THE VEHICLE WILL SURGE FORWARD. THE DEALERSHIP REPLACED A TRANSMISSION CHIP THAT WAS RECOGNIZED IN A TECHNICAL SERVICE BULLETIN. THE PROBLEM DIMINISHED FOR A WHILE, BUT THE CORRECTION DID NOT REMEDY THE PROBLEM. THE CONTACT STATED THAT THIS DID NOT HAPPEN EVERY TIME WHILE DRIVING THE VEHICLE, BUT ENOUGH TIMES TO CAUSE THE CONTACT TO BE CONCERNED ABOUT THE VEHICLE. THE MANUFACTURER STATED THAT THEY WERE DECLINING TO OFFER ADDITIONAL ASSISTANCE BECAUSE THE VEHICLE WAS PERFORMING UNDER NORMAL OPERATING CHARACTERISTICS FOR A VEHICLE WITH ECTI.

\*AK

**Date of Incident:** 20050201  
**Vehicle:** 2005 TOYOTA TACOMA  
**Location of Incident:** CLINTON, SC  
**NHTSA Summary:**

TL\* THE CONTACT OWNS A 2005 TOYOTA TACOMA. WHEN HE SETS THE CRUISE CONTROL AT 65MPH THE RPM'S WILL INCREASE FROM 2,000 TO 5,000. HE TOOK THE VEHICLE TO THE DEALER FOR THE FAILURE SEVERAL TIMES. THE DEALER STATED THEY DID NOT LOCATE A FAILURE AND NOTHING WAS WRONG WITH THE VEHICLE. THE MANUFACTURER TOOK A REPORT AND SENT AN INSPECTOR TO THE DEALER AND THE INVESTIGATOR CONCLUDED THE VEHICLE WAS BUILT THAT WAY AND THE VEHICLE WAS NORMAL. THE FAILURE MILEAGE WAS 1,000 AND THE CURRENT MILEAGE WAS 52,000.

**Additional Summary:**

**Date of Incident:** 20050212  
**Vehicle:** 2004 TOYOTA CAMRY  
**Location of Incident:** DARNESTOWN, MD  
**NHTSA Summary:**

WHILE MY WIFE AND I WERE AT A COMPLETE STOP IN A LINE OF TRAFFIC, OUR ELEVEN MONTH-OLD CAMRY LE SUDDENLY ACCELERATED UNEXPECTEDLY AND WITHOUT WARNING WHILE MY FOOT WAS SQUARELY AND FIRMLY ON THE BRAKE PEDAL. WITHIN A FEW SECONDS: A) THE CAR VIOLENTLY LURCHED FORWARD, AND I INSTINCTIVELY PRESSED HARDER ON THE BRAKE TO KEEP FROM PLOWING INTO THE LINE OF VEHICLES IN FRONT OF ME; B) WE HEARD THE ENGINE ACCELERATING; AND, C) I CHECKED THE TACHOMETER AND OBSERVED IT STEADILY INCREASING FROM A NORMAL IDLE SPEED TO ALMOST THE MAXIMUM. I MAINTAINED CONTROL OF THE VEHICLE AND PREVENTED THE ENGINE SPEED FROM CONTINUING TO ITS PEAK BY QUICKLY SHIFTING THE CAR INTO PARK AND TURNING IT OFF. AFTER APPROXIMATELY 20-30 SECONDS I RESTARTED THE CAR, AND THE IDLE WAS ONCE AGAIN NORMAL. I DROVE THE CAR TO THE NEAREST DEALERSHIP, APPROXIMATELY 3 BLOCKS AWAY. THE CAR HAS NOW BEEN IN THE POSSESSION OF THE TOYOTA DEALER FOR OVER TWO MONTHS, AND THEIR MECHANICS HAVE BEEN UNABLE TO REPLICATE THE EVENT OR FIND ANY RECORD OF THE INCIDENT IN THE ON-BOARD COMPUTER.\*AK

Date of Incident: 20050301
Vehicle: 2001 LEXUS IS300
Location of Incident: HUNTINGTON STATION, NY

NHTSA Summary:

SINCE I HAVE OWNED THE VEHICLE, I HAVE HAD TWO INCIDENTS, WHICH BOTH OCCURED RANDOMLY WITH NO PRIOR ENGINE PROBLEMS OR INDICATIONS OF ISSUES WITH THE CAR, IN WHICH AS I WAS ACCELERATING, THE GAS PEDAL WOULD CONTINUE TO PRESS DOWN AND PIN ITSELF TO THE FLOOR. BOTH TIMES, THE GAS PEDAL WAS LITERALLY STUCK TO THE FLOOR AND NOT ABLE TO BE LOOSENED. THE FIRST TIME IT OCCURED, I PULLED THE EMERGENCY BRAKE AND JAMMED ON MY BRAKE PEDAL UNTIL THE GAS PEDAL POPPED BACK UP AFTER ABOUT A MINUTE PINNED TO THE GROUND. THE SECOND TIME, I LUCKILY HAD SOMEONE WITH ME WHO INSTRUCTED ME TO PUT THE CAR IN NEUTRAL AND QUICKLY TURN OFF THE ENGINE ONE CLICK SO THAT I COULD BRAKE AND STEER MYSELF TO SAFETY. THANK GOD NO ONE WAS INJURED IN THESE INCIDENTS, BUT BOTH OCCURENCES COULD HAVE BEEN HORRIBLE ACCIDENTS. THE CAR IS A 2001 LEXUS IS 300. MILEAGE AT TIME OF INCIDENTS: 1ST INCIDENT-ABOUT 65-70,000 MILES 2ND INCIDENT-ABOUT 80-85,000 MILES. BOTH INCIDENTS OCCURED WITHIN ABOUT 2-4 MONTHS OF EACH OTHER AND THE LAST INCIDENT FROM TODAY WOULD HAVE OCCURED ABOUT 1 1/2-3 MONTHS AGO. I HAVE ONLY OWNED THE CAR SINCE OCTOBER 2003. I DO NOT KNOW THE PREVIOUS OWNER OR IF THERE WERE ANY OF THESE INCIDENTS REPORTED BEFORE MY OWNERSHIP OF THE VEHICLE, AND THE VEHICLE WAS NOT PURCHASED FROM A LEXUS CERTIFIED PRE-OWNED VEHICLE LOT. I DO HAVE A SCHEDULED APPOINTMENT WITH MY LOCAL LEXUS DEALER COMING UP THIS MONTH.

**Date of Incident:** 20050326  
**Vehicle:** 2004 TOYOTA MATRIX  
**Location of Incident:** HERNDON, VA

**NHTSA Summary:**  
MY 2004 TOYOTA MATRIX HAS EXPERIENCED SUDDEN ACCELERATION WHILE MY FOOT WAS ON THE BRAKE SEVERAL TIMES SINCE I HAVE PURCHASED IT. I HAVE ALWAYS BEEN ABLE TO STOP THE CAR FROM MOVING FORWARD BY FURTHER DEPRESSING THE BRAKE. BUT ON SATURDAY MARCH 26 WHILE AT A STOP SIGN, THE SUDDEN ACCELERATION HAPPENED AGAIN AND I WAS UNABLE TO IMMEDIATELY STOP MY CAR FROM LURCHING FORWARD. I MOVED SEVERAL INCES INTO ONCOMING (PERPENDICULAR) TRAFFIC BEFORE I FINALLY THREW IT INTO PARK AND PULLED THE EMERGENCY BRAKE TO STOP IT. NO ACCIDENT OCCURRED BUT IT CAME CLOSE, AND I HAD MY TODDLER IN THE BACK SEAT. SO I CONSIDER THIS A SERIOUS MATTER. I TOOK IT TO MY DEALERSHIP (OURISMAN TOYOTA IN CHANTILLY, VA) THAT MONDAY, AND THEY KEPT IT FOR TWO DAYS. THEY RAN ALL DIAGNOSTIC TESTS POSSIBLE AND FOUND NO PROBLEM. NOTHING WAS FIXED BECAUSE NO TEST SHOWED A PROBLEM BUT I AM SCARED TO DRIVE MY CAR -- THE SUDDEN ACCELERATION HAPPENS ONLY RANDOMLY AND CANNOT BE PREDICTED. I DRIVE WITH ONLY ONE FOOT SO THIS IS NOT A CASE OF TWO-FOOTED DRIVING AND ACCIDENTALLY STEPPING ON THE ACCELERATOR. IN EACH CASE MY FOOT WAS OFF THE ACCELERATOR AND ON THE BRAKE. \*AK

**Date of Incident:** 20050401

**Vehicle:** 2005 SCION XA

**Location of Incident:** JEFFERSON, CO

**NHTSA Summary:**

GAS PEDAL PROBLEM. MY GAS PEDAL HAS STUCK MULTIPLE TIMES. I DO NOT HAVE THE FREE MOVING FLOOR MATS. I HAVE HAD THE CAR SINCE EARLY 2005. THE FIRST TIME IT HAPPENED WAS SHORTLY THEREAFTER. IT STICKS ONLY WHEN DRIVING AT HIGH SPEED (UP TO 65 MPH) ON HIGHWAY. NEVER AT LOWER SPEED IN TOWN. IT HAS PROBABLY STUCK UP TO TEN DIFFERENT TIMES. OCCURS FREQUENTLY WHEN PASSING ANOTHER CAR. NO CRASHES, YET. I HAVE MANAGED TO GET IT UNSTUCK EACH TIME, HOWEVER IT IS EXTREMELY SCARY. NOTHING DONE TO FIX IT. SCION SAYS NOTHING IS WRONG WITHOUT EVEN LOOKING AT IT.

**Vehicle:** 2002 TOYOTA CAMRY

**Location of Incident:** ROSEVILLE, CA

**NHTSA Summary:**

I WAS TURNING INTO THE PARKING AREA AT MY COMPLEX I ATTEMPTED TO SLOW DOWN AND APPLIED THE BRAKES AS I NORMALL WOULD TO TURN INTO MY PARKING SPACE. AS I STARTED TO BRAKE, THE CAR STARTED TO ACCELERATE. I MADE A CONSCIOUS EFFORT TO LIFT MY FOOT OFF BOTH PEDALS TO BE SURE I WAS NOT PRESSING THE ACCELERATOR INSTEAD OF THE BRAKE. THE VEHICLE KEPT ACCELERATING. I IMMEDIATELY STARTED TO APPLY THE BRAKE, WHICH DID NOT SLOW THE VEHICLE. WHEN I REALIZED THAT I WAS NOT SLOWING DOWN, I ABORTED THE TURN INTO THE PARKING SPACE AND STRAIGHTENED OUT THE VEHICLE TO AVOID HITTING OTHER PARK CARS AND TO GIVE MORE TIME AND DISTANCE TO SAFELY BRAKE. THE VEHICLE WOULD NOT SLOW, AND KEPT ACCELERATING, CAUSING IT TO GO UP AND OVER THE CONCRETE CURB/SIDEWALK, AND RIGHT INTO A SET OF STAIRS AT THE COMPLEX. NO ONE WAS INJURED, MYSELF INCLUDED, BUT THE STAIRCASE, NEEDLESS TO SAY, IS DEMOLISHED, AS IS THE ENTIRE FRONT END OF MY CAMRY. VEHICLE IS AT BODY SHOP AS OF NOW, NO ASSESSMENT HAS BEEN DONE. I DID, HOWEVER, EARLIER THIS EVENING SIMPLY LOG ONTO GOOGLE WHERE I TYPED IN "TOYOTA CAMRY ACCELERATOR STICKING" AND CAME UP WITH THE FOLLOWING LINK: HTTP://SUBSCRIPT.BNA.COM/SAMPLES/PLD.NSF/0/33A2947408D24D5185256E5300035CAC?OP=ENDOCUMENT. \*AK

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

STOP AT A TRAFFIC LIGHT BEFORE MAKING A LEFT TURN TO GET ON A PARKWAY. I DID NOT NOTICE ANYTHING UNUSUAL. A FEW MINUTES LATER, WHEN I ATTEMPTED TO SLOW DOWN IN ANTICIPATION OF THE END OF THE PARKWAY AND THE TRAFFIC LIGHT AT THE INTERSECTION, I NOTICED THAT THE BRAKE WAS NOT WORKING. I TRIED SQUEEZING (TO THE FLOOR) AND TAPPING. I HAD NO EFFECT. THERE WAS NO ACCELERATION (KEPT THE SAME SPEED), BY THE TIME I REACHED THE INTERSECTION, THE LIGHT WAS RED AND ALL THREE LANES HAD VEHICLES IN FRONT OF ME. I STEERED MY CAR BETWEEN TWO LANES TO GET THROUGH THE TRAFFIC (WITH ONLY THE MIRRORS SCRAPED OFF). ONCE THE TRAFFIC WAS BEHIND ME, I TOOK THE VEHICLE TO THE RIGHT TO GRIND AGAINST THE CURB WHICH BROUGHT IT TO A HALT. THE VEHICLE WAS PRONOUNCED TOTAL. THREE OTHER VEHICLES WERE AFFECTED WITH VARYING DEGREES OF DAMAGE (DUE TO DIRECT IMPACT ON THE SIDE OR REACTION TO THE SUDDEN TRAFFIC MOVEMENT). I INFORMED TOYOTA AND REQUESTED THEIR INSPECTION. TOYOTA LATER RESPONDED STATING THAT THEY FOUND NO "DESIGN OR MANUFACTURING DEFECT". I AM NOT SURE IF THEY TOOK MY REPORT SERIOUSLY. THEY MAY HAVE LOST THE OPPORTUNITY TO INVESTIGATE A POTENTIAL PROBLEM.

**Additional Summary:**

**Location of Incident:** BRIARCLIFF MANOR, NY

**NHTSA Summary:**  
 I BOUGHT MY NEW 2005 TOYOTA CAMRY XLE V6 FROM GEIS TOYOTA, YORKTOWN HEIGHT, NY. I HAVE NOTICED THAT THE RPM METER ON THE DASHBOARD DISPLAY KEEPS GOING UP WHILE RUNNING THE CAR. ALTHOUGH THE ACCELERATOR PEDAL IS NOT DEPRESSED. I HAVE COMPLAINED THIS TO THE DEALERSHIP. THEY TOLD ME THAT THE VEHICLE NEED BREAK IN PERIOD, AND THE PROBLEM WILL GO AWAY. BUT THE PROBLEM PERSISTED. I DO VEHICLE MAINTENANCE REGULARLY AS PER FACTORY RECOMMENDATION. LAST YEAR I TOOK THE CAR TO FORDHAM TOYOTA SERVICE, MANHATTAN, NY FOR SAME PROBLEM. THE DEALERSHIP TOLD ME THAT THE VEHICLE NEED A COMPLETE TUNE-UP WHICH THEY DID FOR A CHARGE. BUT THE PROBLEM REMAINED AND I GOT USED TO PRESS BRAKE PEDAL TO SLOW DOWN THE CAR TO TAKE CARE OF THIS PROBLEM.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10124522  
**Date of Incident:** 20050425  
**Vehicle:** 2005 TOYOTA PRIUS  
**Location of Incident:** WEST HOLLYWOOD, CA

**NHTSA Summary:**  
2005 TOYOTA PRIUS - FLOORMAT BECOMES LODGED BETWEEN PEDALS. -- WHILE DRIVING AT HIGH SPEEDS (60-70 MPH) ON THE FREEWAY, I NOTICED A LOSS OF SENSITIVITY ON BOTH THE BRAKE AND GAS PEDALS. I HAD TO PRESS VERY HARD TO GET A REACTION FROM EITHER PEDAL. AS A RESULT I WAS UNABLE TO KEEP DRIVING AT THE SAME SPEED AS THE SURROUNDING CARS. EVERYTHING ELSE SEEMED TO BE OPERATING NORMALLY. THE SENSATION CONTINUED FOR A FEW MINUTES UNTIL I COULD SAFELY PULL OFF OF THE FREEWAY. UPON INVESTIGATION, I REALIZED THAT THE FLOORMAT HAD COME UNHOOKED FROM ITS RESTRAINTS AND STUCK BETWEEN THE PEDALS AND THE FLOOR. I SECURED THE FLOORMAT TO ITS HOOKS ONCE AGAIN AND CONTINUED DRIVING WITHOUT TROUBLE. THIS HAS HAPPENED A COUPLE TIMES SINCE, BUT I RECOGNIZE THE SYMPTOMS AND FIX IT PROMPTLY. HOWEVER, I FEAR THAT ANOTHER OWNER MIGHT EXPERIENCE THIS WHEN THEY NEED TO BRAKE OR ACCELERATE SUDDENLY TO AVOID AN ACCIDENT. (I NOTICED ANOTHER POSTING THAT DESCRIBED THE SAME PROBLEM). PERHAPS TOYOTA SHOULD INSTALL LOCKING HOOKS RATHER THAN THE CURRENT ONES THAT EASILY TWIST AND UNHOOK FROM THE MATS.

 Email reply sts "<as-html>  
 Thank you for contacting Toyota Motor Sales, U.S.A., Inc.<p>  
 Mr. Knepper, we are sorry to hear of the concern you are experiencing with your 2005 <a href="http://www.toyota.com/tacoma/index.html?target=blank">Tacoma</a>.<p>  
 We apologize; because we are not a technical center and we are unable to inspect your vehicle, we are not in a position to provide an accurate diagnosis for your concerns.<p>  
 In order to properly assess your concerns, we recommend you contact the Customer Relations Manager at your <a href="http://www.toyota.com/dealers/TARGET=BLANK">local Toyota dealership</a> to further evaluate your Tacoma.<p>  
 Your dealership technicians are specialized in the diagnosis and repair of Toyota vehicles. They are provided with extensive training and have access to state-of-the-art equipment to help in the accurate diagnosis of your vehicle. Also, if necessary, we provide additional support to assist Toyota dealership technicians in resolving unusual vehicle concerns.<p>  
 So you are aware, each Toyota dealership has, on site, a Customer Relations Manager, our corporate contact, to oversee the various operations and address any inquiries or concerns a customer may have, including sales/product concerns.<p>  
 We recommend contacting the Customer Relations Manager at your <a href="http://www.toyota.com/dealers/TARGET=BLANK">local Toyota dealership</a> for further assistance as necessary.<p>  
 We wish to express our appreciation for your interest in our products and would like to thank you for taking the time to email us.<p>  
 We apologize again for any inconvenience this may have caused.<p>  
 Your email has been documented at our National Headquarters under file #Sincidents.c\$clarifycase\$number. If we can be of further assistance, please feel free to <a href="http://toyota.custhelp.com/cgi-bin/toyota.cfg?php/enduser/std\_adp.php?p\_faaid=164">TARGET=BLANK >contact us</a>.<p>

**Date of Incident:** 20050501  
**Vehicle:** 2000 TOYOTA CAMRY  
**Location of Incident:** YONKERS, NY  
**NHTSA Summary:**  
 2000 TOYOTA CANRY XLE, PURCHASED FROM NEW ROCHELLE TOYOTA, NEW ROCHELLE, NY AS CERTIFIED PRE-OWNED WITH 40K MILES. ON 4 SEPARATE OCCASIONS OVER THE COURSE OF 5 YEARS BEGINNING IN 2005 - I HAVE EXPERIENCED ACCELERATOR REVVING OR STICKING, AND SOMETIMES BOTH TOGETHER. SOMETIMES JUST KICKING IT STOPPED IT, ANOTHER TIME I HAD TO THROW THE CAR INTO NEUTRAL AND PULL UP THE

C-410

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

PEDAL WITH MY FOOT UNDER IT, ANOTHER TIME I THREW IT INTO NEUTRAL AND IT EASED UP. EACH TIME I RULLED OVER, SHUT OFF THE CAR AND RESTATED AND IT DIDN'T HAPPEN AGAIN FOR QUITE SOME TIME. MENTIONED IT TO TOYOTA AND THEY MORE OR LESS BLAMED ME. TOLD MY INDEPENDENT MECHANIC WHO AT LEAST CHECKED THE BRAKES AND SNESORS, BUT HE DIDN'T KNOW WHAT TO TELL ME BECAUSE THERE WAS NO SERVICE WARNING. NO REPAIR WAS EVER DONE.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10325388  
**Date of Incident:** 20050501  
**Vehicle:** 2005 TOYOTA PRIUS  
**Location of Incident:** WATKINSVILLE, GA  
**NHTSA Summary:**  
 2005 TOYOTA PRIUS--EXPERIENCES BRAKING AND HANDLING FAILURES WHEN BRAKING ON UNEVEN OR WET SURFACES. WHEN WE ARE BRAKING AND HIT A POTHOLE, GRAVEL, RAILROAD TRACKS OR WET SURFACES, THE CAR FEELS AS IF WE ARE LOSING CONTROL OF IT, AND BRAKING SEEMS TO TEMPORARILY STOP. THE "SKID DANGER" LIGHT COMES ON, EVEN AT VERY LOW SPEEDS. THIS HAPPENS NEARLY EVERY TIME WE BRAKE UNDER THESE CONDITIONS. ALSO, AT IDLE (IE. STOPLIGHTS), THE CAR WILL FREQUENTLY LURCH FORWARD SLIGHTLY, EVEN WITH THE BRAKE PEDAL FULLY DEPRESSED, ESPECIALLY WHEN ENGINE TRANSFERS FROM ELECTRIC TO GAS. WE WERE TOLD EARLY IN OUR OWNERSHIP THAT THIS IS NORMAL "DIESELING". THESE HAVE BEEN ON-GOING PROBLEMS, SINCE WE PURCHASED THE CAR IN 2005 (NEW), THAT WE THOUGHT WE WERE "IMAGINING" UNTIL HEARING ALL OF THE REPORTS OF SIMILAR PROBLEMS.TOYOTA CLAIMS THAT THE PRIUS BRAKING ISSUES ONLY AFFECT THE 2010 PRIUS, BUT WE SEE IT FIRSTHAND ON AN ON-GOING BASIS.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10136278  
**Date of Incident:** 20050515  
**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** ST. LOUIS, MO  
**NHTSA Summary:**  
REFERRING TO OUR 2004 TOYOTA SIENNA PURCHASED IN AUG, 2004, THREE TIMES, WHEN USING THE CRUISE CONTROL AND ENGAGING THE "RESUME" FUNCTION, THE VEHICLE ACCELERATED AT FULL THROTTLE AND CONTINUED DOING SO PAST THE SET SPEED UNTIL STEPPING ON THE BRAKE TO DISENGAGE THE CRUISE CONTROL. THIS RESULTED IN THE SPEED INCREASING TO 5 TO 10 MILES OVER THE SET SPEED. THIS IS VERY DANGEROUS AND COULD RESULT IN A CRASH IF ANOTHER VEHICLE SUDDENLY PULLED OUT IN FRONT OF MY VEHICLE. \*NM  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10127613  
**Date of Incident:** 20050516  
**Vehicle:** 2005 TOYOTA SIENNA  
**Location of Incident:** PLAINFIELD, IL  
**NHTSA Summary:**  
OWNER OF 2005 TOYOTA SIENNA LE MINIVAN PURCHASED IN DECEMBER 2004. 1. NOTICED THAT THIS PROBLEM STARTED TO OCCUR OVER THE LAST TWO MONTHS AND THE OCCURENCE HAS INCREASED IN FREQUENCY. 2. DESCRIPTION OF PROBLEM: WHEN DEPRESSING THE ACCELERATOR PEDAL TO ACCELERATE FROM A STOP, THE THROTTLE WILL OCCASIONALLY FAIL TO RESPOND TO THE INITIAL PRESSURE BEING APPLIED TO THE PEDAL, CONTINUING TO DEPRESS, OR APPLYING ADDITIONAL PRESSURE TO, THE ACCELERATOR PEDAL WILL EVENTUALLY CAUSE THE THROTTLE ON THE ENGINE TO ENGAGE AND THIS RESULTS IN AN UNANTICIPATED SURGE IN ENGINE OUTPUT AND ACCELERATION. MY CONCERN IS THAT THIS UNANTICIPATED ENGINE SURGE AND ACCELERATION COULD LEAD TO AND/OR CAUSE A TRAFFIC ACCIDENT. 3. BROUGHT THIS PROBLEM/ISSUE TO THE ATTENTION OF THE SERVICE DEPARTMENT AT LOMBARD TOYOTA (LOMBARD, ILLINOIS). SPOKE WITH TWO DIFFERENT SERVICE WRITERS AT LOMBARD TOYOTA AND THEY BOTH MENTIONED THAT THIS WAS A KNOWN ISSUE BY BOTH TOYOTA AND THE DEALERSHIP. LOMBARD TOYOTA MENTIONED THAT THEY ARE CURRENTLY UNABLE TO DO ANYTHING TO CORRECT THIS PROBLEM/ISSUE AT THIS TIME.

I WAS BACKING OUT OF A PARKING SPACE IN A PARKING LOT. I PUT THE CAR IN REVERSE, PLACE MY FOOT ON THE BRAKE, PUT THE CAR INTO DRIVE, LIFTED MY FOOT OFF OF THE BRAKE AND THE CAR IMMEDIATELY BEGAN TO ACCELERATE WITHOUT MY FOOT EVEN TOUCHING THE ACCELERATOR. WHEN I PUT MY FOOT ON THE BRAKE, THE BRAKE PEDAL WENT ALL THE WAY DOWN TO THE FLOOR WITHOUT STOPPING THE VEHICLE. THE VAN STRUCK ANOTHER VEHICLE THAT WAS PARKED IN THE PARKING LOT, WENT OVER THE CURB OF THE PARKING LOT, DOWN AN EMBANKMENT INTO A Ravine AND HEADED TOWARDS A TREE. THE PASSENGER THAT WAS IN THE FRONT SEAT THEN REACHED OVER AND PUT THE CAR INTO PARK, WHICH BROUGHT THE CAR TO A STOP. THE WHOLE TIME THE CAR WAS MOVING I WAS TRYING TO STOP THE CAR BY PUMPING THE BRAKES, BUT THEY DID NOT WORK. THE CAR WAS ACCELERATING THE ENTIRE TIME UNTIL THE PASSENGER STOPPED IT BY SHIFTING INTO PARK. THE AIRBAGS DID NOT DEPLOY. DAMAGE WAS DONE TO THE FRONT PASSENGER BUMPER AND SIDE OF THE CAR, THE DRIVER'S SIDE FRONT TIRE EXPLODED. AFTER THE ACCIDENT, THE BRAKES DID FUNCTION.

**NHTSA Summary:**

DT: 2005 TOYOTA HIGHLANDER V6- THE CONSUMER DROVE OFF THE LOT ON JUNE 3, 2005; THE CRUISE CONTROL BEHAVED ERRATICALLY AND IT OFTEN FELT AS IF IT WAS ACCELERATING A COUPLE OF MILES BEHIND THE DESIRED SPEED. THE CONSUMER REQUESTED TO PASS THIS TURKEY WHICH YIELDED DIFFERENT RESULTS. THERE IS SOMETIMES AWKWARD DOWN SHIFTING AND RAPID ACCELERATION WHICH IS PRECEDED BY HESITATION. THE CONSUMER APPROACHED A VILLAGE INTERSECTION, DOWNHILL WITH HIS FOOT ON THE BRAKE. THE CONSUMER TOOK HIS FOOT OFF OF THE BRAKE AND BEGAN TO MAKE A LEFT TURN ONTO DESIRED STREET. THE CONSUMER TRIED TO APPLY A BIT OF GAS AND NOTHING HAPPENED. THE CONSUMER TRIED TO APPLY A BIT MORE GAS AND AGAIN NOTHING HAPPENED. THE THIRD TIME THE CONSUMER ADDED A BIT MORE GAS AND THE VEHICLE ACCELERATED TOO FAST CAUSING THE DRIVER'S AND PASSENGER'S HEADS TO TIP BACK. THIS WAS A NARROW MAIN STREET IN A MAIN VILLAGE. THERE WERE LOTS OF POSSIBLE TARGETS, CARS/ KIDS BIKES, AND OTHERS. THEN THERE WAS THE UNANTICIPATED DOWN SHIFTING FOR BRAKING EFFECT THAT TIPPED HEADS FORWARD, BUT THAT WAS ANOTHER STORY FOR ANOTHER DAY, AND NOT QUITE AS ANNOYING OR NEARLY OF THE SAME CONCERN. THE DEALER'S SERVICE MANAGER FIRST ASSERTED THAT THERE WERE NO ADJUSTMENTS ACCESSIBLE FOR THE MECHANICS. INABILITY TO DO SOMETHING. AFTER APPLYING MORE GAS AND VEHICLE HESITATION CONSUMER SEARCHED FOR A TECHNICAL SERVICE BULLETIN (TSB) AND FOUND NONE. BUT FOUND ONE FROM JUNE 3, 2005 THAT RELATED TO RECALIBRATING OF THE TRANSMISSION. ABSOLUTELY NO MENTION OF EXPRESSIONS OF CONCERN OR EARLIER TSBS. \*AK \*MR

BEEN ABLE TO FIX. ACCELERATOR STICKS AT A STAND STILL POSITION, OR IT STICKS WHEN DRIVING AT THE SAME CONSTANT SPEED FOR LONGER AMOUNTS OF TIME. TO HELP THE PROBLEM FIX, I TAP FIRMLY ON THE ACCELERATOR A FEW TIMES TO UNSTICK IT. I HAVE CHECKED ON THE TOYOTA WEBSITE RECALL LIST SEVERAL TIMES BUT MY 2000 TOYOTA IS STILL NOT ON THE LIST. I STILL HAVE THE PROBLEM AND AM WORRIED. WHAT IS MY NEXT STEP OF ACTION? I THOUGHT THAT SINCE MY CAR WAS ONE YEAR OLD WHEN I BOUGHT IT THAT IT WOULDN'T BE COVERED, BUT I KNOW MY CAR WAS IN A PREVIOUS ACCIDENT BEFORE I PURCHASED IT BECAUSE THERE WAS DAMAGE TO THE DRIVER'S SIDE DOOR & THE REAR WINDOW. COULD IT HAVE BEEN BECAUSE OF THE STICKING ACCELERATOR. I'D HAVE TO CHECK CARFAX AND MAYBE SOME RESEARCH FROM THERE ON. BUT I DID BUY THE CAR BEFORE IT WAS ONE YEAR OLD. PLEASE HELP ME OUT HERE. I DRIVE MY GRANDCHILD IN MY TOYOTA CAMRY & AM WORRIED.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SINCE PURCHASING THE AVALON IN EARLY JUNE, I HAVE BEEN FRUSTRATED WITH HOW THE CAR OPERATES BETWEEN 30 AND 40 MILES PER HOUR. THE CAR DOES NOT ALWAYS KNOW WHAT GEAR IT NEEDS TO SHIFT INTO. IT WILL FREQUENTLY RACE 1000 RPM AHEAD WITHOUT ANY CHANGE IN SPEED. THEN SUDDENLY IT WILL ACCELERATE AND THE RPM'S WILL DROP BACK TO NORMAL RPM. IT SEEMS TO HAPPEN MOST OFTEN IN RUSH TRAFFIC WHEN TRYING TO CHANGE LANES. THE HESITATION IN ACCELERATION WILL CAUSE ME TO LOSE MOST OF MY MARGIN OF SAFETY IN THE PROCESS OF CHANGING LANES. IN THIS REGARD, THE CAR IS NOT SAFE. THERE IS NO WAY TO PREDICT WHEN THE PROBLEM WILL OCCUR, AND THEREIN, LIES THE SAFETY HAZARD. IT WOULD SEEM THAT THE LAST EFFORT BY THE SERVICE DEPARTMENT TO UPDATE MY COMPUTER PROGRAMMING FAILED TO ACHIEVE ANY LEVEL OF IMPROVEMENT TO MY SATISFACTION WITH ONE EXCEPTION. SINCE THE FIRST COMPUTER UPGRADE, I HAVE NOT EXPERIENCED THE COMPLETE LOSS OF GEAR AT HIGH SPEEDS. IS THIS A PROBLEM IN ALL 2005 AVALONS? IS TOYOTA AWARE OF THE PROBLEM AND DO THEY HAVE PLANS TO RESOLVE IT? SERVICED ON FRIDAY, OCTOBER 21, TOYOTA RESET THE COMPUTER LEARNING BACK TO FACTORY DEFAULT. TECHNICAL SUPPORT IN CA EXPLAINED THAT THERE ARE NO CURRENT PLANS TO ADDRESS THE ISSUE. ONCE THE LEARNING PROCESS DEVELOPS A BAD PATTERN, IT MUST BE RESET BACK TO FACTORY DEFAULT AND THE RELEARNING STARTED OVER. THE PROBLEM STARTED ALL OVER AGAIN AND THERE IS NO "UNLEARNING" THE PROBLEM. \*JB

**Date of Incident:** 20050607

**Vehicle:** 2005 TOYOTA COROLLA

**Location of Incident:** LAGUNA HILLS, CA

**NHTSA Summary:**

DT\*: THE CONTACT STATED WHILE DRIVING 25 MPH ON NORMAL ROAD CONDITIONS THE VEHICLE MAINTAINED THE SAME SPEED WITHOUT DEPRESSING THE ACCELERATOR PEDAL. THE PROBLEM PERISTED AT ANY SPEED THERE AFTER. THERE WERE NO WARNING LIGHTS ILLUMINATED PRIOR THE INCIDENT. THE VEHICLE WAS TAKEN TO THE DEALERSHIP WHO OBSERVED NO ABNORMALITIES AFTER A DIAGNOSTIC CHECKUP AND ROAD TEST. THE DEALER ALSO STATED THERE WAS NOT A MECHANISM TO SLOW DOWN THE SPEED AS THERE USED TO BE IN OLDER MODELS. THE VEHICLE WAS TAKEN TO A DIFFERENT DEALERSHIP FOR A SECOND OPINION WHO DETERMINED THERE WAS A VALVE STUCK OPEN IN THE FUEL SYSTEM AND REPAIR IT. BUT THE PROBLEM WAS PERSISTED. THE MANUFACTURER WAS CONTACTED WHO REFERRED THE CONTACT TO A DEALERSHIP. THE CONTACT EXPRESSED CONCERN BECAUSE THE ONLY WAY TO REDUCE THE SPEED WAS BY DEPRESSING HARD ON THE BRAKE PEDAL TO PREVENT A COLLISION. UPDATED 12/5/2006 - \*NM

**Date of Incident:** 20050622  
**Vehicle:** 2001 TOYOTA COROLLA  
**Location of Incident:** HUDSONVILLE, MI

**NHTSA Summary:**  
ENTERED FREEWAY DRIVING 2001 TOYOTA COROLLA. ACCELERATED TO 70 MPH AND WHILE MOVING INTO THE LEFT-HAND LANE, GAS PEDAL WOULD NOT RELEASE AND TRIED BRAKING BUT THEY WOULD NOT ENGAGE AND STEERING WOULDNT RELEASE. WENT INTO THE MEDIAN AND ROLLED OVER THREE TIMES. COMPLETELY TOTALED THE CAR AND I WAS TAKEN BY AMBULANCE TO NEARBY HOSPITAL. WHEN I WAS EVALUATED AND RELEASED, HAVE HAD 10 SURGERIES SINCE ACCIDENT INCLUDING A TOTAL HIP REPLACEMENT AND NOW A 3RD TOTAL KNEE REPLACEMENT. I ALSO SUFFERED A CONCUSSION. POLICE DOCUMENTATION ON TRAFFIC CRASH REPORT VERIFIES THAT GAS PEDAL/BRAKE NOT ENGAGING WAS CAUSE OF ACCIDENT. \*TR

**NHTSA ODI Number:** 10127859  
**Date of Incident:** 20050630  
**Vehicle:** 2004 TOYOTA COROLLA  
**Location of Incident:** REDDING, CA

**NHTSA Summary:**  
I WAS BRAKING FOR A STOPLIGHT. AFTER COMING TO A COMPLETE STOP THE ENGINE BEGAN TO RACE WITH THE RPM'S RISING ABOVE 4000 BEFORE I TURNED OFF THE IGNITION. I HAD TO PRESS DOWN ON THE BRAKE PEDAL AS HARD AS I COULD AND WAS BARELY ABLE TO HOLD THE CAR AT THE INTERSECTION. THIS WAS THE SECOND TIME THIS HAD HAPPENED. THE FIRST TIME OCCURRED APPROXIMATELY 2 MONTHS EARLIER. DURING THAT INCIDENT, THE ENGINE RACED TO OVER 6,000 RPM'S BEFORE I SHUT OFF THE IGNITION. AFTER BOTH INCIDENTS, I TOOK THE CAR TO LITHIA TOYOTA IN REDDING, CA. BOTH TIMES THEY SAID THAT NO ERROR CODES WERE SET AND SINCE THE CAR ENGINE DID NOT RACE DURING THE TEST DRIVES, THERE WAS NOTHING WRONG WITH IT. THEY STATED THA THEY HAD NEVER HEARD OF ANY OTHER TOYOTA VEHICLES BEHAVING IN THIS MANNER, YET I FOUND 25 SIMILAR COMPLAINTS REGARDING THE 2004 CAMRY ON THIS WEBSITE, AND 21 SUCH COMPLAINTS FOR 2002 THROUGH 2005 MODEL YEAR COROLLAS.

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I HAD PURCHASED A BRAND NEW 2005 LEXUS ES330 IN 2005. THE CAR STARTED EXHIBITING TRANSMISSION HESITATION PROBLEMS ALMOST IMMEDIATELY. I BROUGHT IT TO THE LEXUS DEALER IN CERRITOS, CA MANY TIMES, AND ASKED THEM ABOUT THIS BEHAVIOR AS SOMETHING THEY SHOULD LOOK AT AND FIX. I WAS TOLD IT IS HOW THE COMPUTERS ARE IN THE CAR AND THEY REFUSE TO ACKNOWLEDGE THIS PROBLEM. THE CAR HESITATES TO PICK UP SPEED WHILE YOU AR ON STOP SIGN OR MORE IMPORTANTLY WHEN CHANGING LANES ON FREEWAY OR AT TIMES YOU NEED TO ACCELERATE THE CAR SUDDENLY. YOU WILL GET A JOLT AND LACK OF POWER FOR A SECOND AND THEN QUICK SPEED. NOW WITH ALL OF THE PROBLEMS COMING OUT OF THIS COMPANY, I THINK IT IS IMPORTANT FOR ME TO BRING THIS ISSUE AND I AM SURE THERE ARE MANY PEOPLE WHO HAVE COMPLAINED ABOUT IT. I USE THIS CAR BUT TRY TO USE SPARINGLY AS MUCH AS POSSIBLE. \*CN

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10304379  
**Date of Incident:** 20050701  
**Vehicle:** 1998 TOYOTA COROLLA  
**Location of Incident:** KNOX, PA

**NHTSA Summary:**  
MY 1998 TOYOTA CORROLA WILL NOT ALWAYS SHUT DOWN THE THROTTLE ON CRUISE CONTROL BY HITTING THE BRAKE OR THE CRUISE CONTROL OFF BUTTON. IT WILL PUSH YOU STRAIGHT THROUGH A STOP SIGN. I ENDED UP TAKING THE FUSE OUT OF THE CRUISE CONTROL. FIXED THE PROBLEM BUT I NO LONGER HAVE CRUISE. I TRIED TO TELL TOYOTA THIS BUT THEY MAKE IT NEXT TO IMPOSSIBLE TO EMAIL THEM TO REPORT THIS SYMPTOM. I THINK THEY DO NOT WANT TO KNOW.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10310834  
**Date of Incident:** 20050701  
**Vehicle:** 2005 TOYOTA SEQUOIA  
**Location of Incident:** LOMITA, CA

**NHTSA Summary:**  
THE BRAKE LIGHT CONSTANTLY GOES ON AND OFF. I NOTICE THE LIGHT PERMANENTLY STAYS ON AFTER LEAVING THE FREEWAY WHEN THE ENGINE SLOWS DOWN (NOT EVEN STEPPING ON THE BRAKES YET). THEN, THE LIGHT DOESN'T DISAPPEAR UNTIL AFTER THE ENGINE IS POWERED OFF. WE BROUGHT THE VEHICLE IN WHEN IN WARRANTY AND STATED THE PROBLEM. THE FIRST 3 YEARS, ALL THEY DID WAS INSPECT THE BRAKE SYSTEM BUT NOTHING WAS DONE. WE WERE VERBALLY GIVEN AN EXAMPLE WHAT THEY DID FOR A PREVIOUS CUSTOMER (CHANGED ALL THE SENSORS AND THE SYSTEM BOARD) BUT STILL NO FIX. AT THE LAST SERVICE CHECK, ANOTHER SERVICE REP SAID, DON'T WORRY ABOUT IT BECAUSE WE CHECKED THE BRAKES AND THEY'RE OKAY AND THIS IS A COMMON PROBLEM. THESE LAST TWO WEEKS (OFF AND ON) AT THE INTERSECTION WAITING FOR THE RED LIGHT TO TURN GREEN, I NOTICE THE BRAKE LIGHTS ARE ON AND SUDDENLY THE ENGINE IS TRYING TO ACCELERATE AND THEN IT STOPS. \*TR

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Vehicle:** 2004 TOYOTA COROLLA  
**Location of Incident:** PORTLAND, ME

**NHTSA Summary:**  
MY 2004 COROLLA LE IS THE FIRST VEHICLE I HAVE OWNED THAT HAS CRUISE CONTROL. WHEN I AM DRIVING AT HIGHWAY SPEEDS AND ENGAGE THE CRUISE CONTROL, IT HOLDS A STEADY SPEED. WHEN THE VEHICLE ENCOUNTERS AN INCLINE, SUCH AS A BRIDGE OR A HILL, IT WILL DOWNSHIFT AND CONTINUE TO ACCELERATE WELL BEYOND THE SPEED SET. EVEYR INSTANCE THAT THIS HAS HAPPENED I HAVE BEEN ABLE TO SIMPLY DISENGAGE THE CRUISE CONTROL WITHIN 5 TO 10 MPH ABOVE THE SET SPEED, BUT IT SEEMS AS THOUGH THE VEHICLE WOULD CONTINUE TO ACCELERATE AS LONG AS IT WAS ON THE INCLINE. THINKING THIS IS HOW CRUISE CONTROL WORKED, NOT HAVING USED IT BEFORE, I NEVER TOOK IT TO A DEALER AND SIMPLY TURN IT OFF WHEN ENCOUNTERING AN INCLINE. IN LIGHT OF THE RECENT TOYOTA ACCELERATION ISSUES, I THOUGHT THIS INFORMATION WOULD BE USEFUL TO NHTSA.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10127662  
**Date of Incident:** 20050703  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** KELSO, WA

**NHTSA Summary:**  
DT: 2005 TOYOTA CAMRY XLE, CRUISE CONTROL DOES NOT HOLD VEHICLE BACK. THIS IS NOT A PROBLEM ON LEVEL GROUND OR UP HILL. IF THE VEHICLE IS GOING DOWN HILL, THE CRUISE CONTROL WILL NOT STAY, CAUSING THE VEHICLE TO ACCELERATE AT A FASTER SPEED THAN IS SAFE UNDER THE CIRCUMSTANCES. AFTER THE CONSUMER PURCHASED THE VEHICLE, THE DEALER AND THE MANUFACTURER TOLD CONSUMER THAT WAS THE WAY THE VEHICLE PERFORMED. CONSUMER CONSIDERS THIS IS A SAFETY ISSUE, AND IT IS NOT ACCEPTABLE. CONSUMER FILED A COMPLAINT # 20050706 ON JULY 6, 2005 WITH TOYOTA. THERE ARE NO OTHER KNOWN PROBLEMS WITH THIS VEHICLE AND IT IS STILL UNDER WARRANTY. \*AK

**Additional Summary:**

**NHTSA ODI Number:** 10331465  
**Date of Incident:** 20050715  
**Vehicle:** 2004 TOYOTA PRIUS  
**Location of Incident:** ALBUQUERQUE, NM

**NHTSA Summary:**  
WITHIN THE FIRST YEAR OF OWNING MY 2004 PRIUS I EXPERIENCED UNINTENDED ACCELERATION. IN THE OLD DAYS (IM 71) IF YOU EXPERIENCED UNINTENDED ACCELERATION YOU WOULD RIGHT OFF CHECK YOUR GAS PEDAL AND FLOOR MATS. THAT KIND OF PROBLEM WASN'T ALL THAT UNCOMMON WHEN YOU OWNED OLD CARS. IF YOU DIDN'T FIND A PROBLEM IN THE AREA OF THE GAS PEDAL YOU WOULD PULL OFF THE SIDE OF THE ROAD AND USUALLY FIND THE THROTTLE SPRING ON THE CARBURETOR MESSED UP IN SOME WAY OR SOMETHING ALONG THOSE LINES. WELL, WHEN IT HAPPENED ON MY PRIUS GOING ABOUT 40 MPH ON A STRETCH OF ROAD NOT SO FAR FROM MY HOME I INSTINCTIVELY CHECKED MY FLOOR MATS AND THROTTLE SHAFIT FOR INTERFERENCE OR STICKING. NO PROBLEMS FOUND. I GOT THE CAR STOPPED - DON'T REMEMBER HOW (WITH YEARS OF DRIVING EXPERIENCE YOU INSTINCTIVELY TRY THINGS UNTIL YOU FIND SOMETHING THAT WORKS). ANYHOW, AFTER THAT I WENT DIRECTLY TO MY TOYOTA DEALER WHERE THEY CHECKED IT OUT BUT FOUND NOTHING. THE PROBLEM NEVER OCCURRED AGAIN. NOW I SEE THIS CLAIM THAT IT'S NOT AN ELECTRONIC PROBLEM ON THIS DRIVE-BY-WIRE CAR. I DON'T BELIEVE IT. IF YOU THINK ABOUT IT, IF IT HAPPENS JUST ONE TIME ON MY ONE PRIUS IN THOUSANDS OF MILES OF DRIVING, THAT MAKES AN INCIDENT OF THIS SORT PRETTY RARE, RARE ENOUGH TO WHERE IT'S UNLIKELY TO OCCUR UNDER CONTROLLED TESTS (IT WOULD BE INFINITELY EASIER TO FIND THE PROVERBIAL NEEDLE IN A HAYSTACK). VIRTUALLY EVERY

C-428

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

MICROPROCESSOR CONTROLLED PRODUCT I'VE EVER USED HAS REQUIRED A RESET NOW AND THEN. USUALLY THERE'S NO INDICATION OF WHY THE PRODUCT LOCKED UP (OR WHATEVER). IF YOU USE SATELLITE TV, A DSS MODEM, OR OWN A PC I'M SURE YOU'VE EXPERIENCED IT. WHY IT SHOULD BE ANY DIFFERENT WITH CAR MICROPROCESSORS IS BEYOND ME. THE ANSWER IS FOR THE GOVERNMENT TO REQUIRE SOME KIND OF FAIL-SAFE APPARATUS ON EVERY DRIVE-BY-WIRE CAR IN THE FUTURE (I SEE TOYOTA IS ALREADY IMPLEMENTING THIS CONCEPT INTO THEIR 2011 CARS). HECK, MY LIFE OR THE LIFE OF MY CHILDREN OR GRANDCHILDREN MIGHT VERY WELL DEPEND ON IT.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10129267  
**Date of Incident:** 20050717  
**Vehicle:** 2004 LEXUS ES330  
**Location of Incident:** ANTIOCH, CA

**NHTSA Summary:**  
2004 LEXUS ES 330 HAS SEVERE HESITATION AND SURGING PROBLEMS WHEN TRYING TO ACCELERATE UNDER TRAFFIC CONDITIONS SUCH AS MERGING ONTO FREEWAY WHERE YOU MIGHT NEED TO SLOW AND THEN ACCELERATE. WE EXPERIENCED DANGEROUS SITUATIONS DUE TO HESITATION AND THEN SUDDEN SURGE. SECOND TRIP TO DEALER AND THEY SAY IT'S A KNOWN PROBLEM AND THERE IS NOTHING THEY CAN DO. I BELIEVE IT IS A SAFETY ISSUE AND A RECALL SHOULD BE ENFORCED. LEXUS SEEMS TO THINK IT IS ONLY AN INCONVENIENCE.

**Additional Summary:**

**NHTSA ODI Number:** 10315893  
**Date of Incident:** 20050718  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** MORENO VALLEY, CA

**NHTSA Summary:**  
WE PURCHASED A 2005 TOYOTA CAMRY IN 2005. THE FIRST DAY I DROVE IT THE CAR HESITATED ON ACCELERATION TO CHANGE LANES IT WAS LUCKY THAT IT DIDN'T CAUSE A WRECK. I TOOK THE CAR BACK TO THE DEALERSHIP (I DON'T REMEMBER WHY) BUT I ASKED THEM TO CHECK IT AND THE GUY I TALKED TO JUST SAID IT WAS BECAUSE OF THE FUEL INJECTION. THE GUY DIDN'T OFFER TO CHECK IT, HE JUST MADE THAT STATEMENT. THE HESITATION HAPPENS ANY TIME AND IT ALWAYS FEELS LIKE SOMEONE IS GOING TO REAR END US WHILE THE CAR IS DECIDING WHAT IT WANTS TO DO. ON THE FREEWAYS IN CALIFORNIA PEOPLE GO 70 MILES AN HOUR THAT MAKES IT A HAZARD TO DRIVE A TOYOTA ON THE FREEWAY. THE TOYOTA ALSO HAS A MIND OF ITS OWN. SOMETIMES WHEN I HAVE MY FOOT ON THE BREAK PREPARING TO STOP THE ENGINE SEEMS TO BE TRYING TO OVERRIDE THE BREAK TO KEEP GOING. IT FEELS LIKE THE CAR IS TRYING TO INCREASE THE SPEED WHEN I AM TRYING TO SLOW DOWN. I HAVE BEEN CONCERNED ABOUT IT BUT I JUST FIGURED TOYOTA WAS NOT GOING TO DO ANYTHING ABOUT IT. NOW MY HUSBAND DOES NOT WANT ME TO DRIVE THE TOYOTA.

cust sts"

I have recently purchased a 05 Tacoma 4x4 with a 4 cylinder engine. I have noticed that when I am driving at or above 50 mph and I shift up from 4th gear to 5th gear the throttle is "sticking". The engine will rev 500 rpm's then drop down. This happens every time and has me concerned that something is wrong with the engine. I took the truck into the dealership I purchased it from and they have told me that this is a normal function for the 4 cylinder engine. I have a hard time believing this to be true and want to know if this is a normal function for this vehicle."

END VERBATIM

<as-html>

Thank you for contacting Toyota Motor Sales, U.S.A., Inc.<p>

We apologize for your concerns with your 2005 Tacoma.<p>

Because we are not in a position to physically inspect your vehicle, we are not able to advise you whether or not the condition with your particular vehicle is normal or abnormal. If your rpm needle does not go into the red area of the tachometer, then no damage is occurring to your vehicle as a result of the transmission shifting gears.<p>

Your email has been documented at our National Headquarters under file #200508310302. If we can be of further assistance, please feel free to <a href = "http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enduser/std\_adp.php?p\_faqid=164"TARGET= "\_BLANK ">contact us</a>.<p>

**NHTSA Summary:**  
 I PULLED INTO A PARKING LOT AND MADE A RIGHT TURN TO PULL INTO A PARKING SPACE. I WAS HALFWAY INTO THE SPACE, MY FOOT WAS ON THE BRAKE PEDAL, WHEN I FELT THE VAN JERK-IT THEN SUDDENLY ACCELERATED, WENT OVER THE RAISED CURB IN FRONT ONTO THE EXIT LANE OF THE SHOPPING CENTER, TURNED AROUND BACK INTO THE PARKING LOT (THE WHEEL WAS TURNED TO THE RIGHT STILL), HIT THE BUILDING BREAKING A COUPLE OF WINDOWS, AND THEN CAME TO A STOP AFTER HITTING A BARRICADED DUMPSTER ALONG THE WAY. ALL THE WHILE I WAS HITTING THE BRAKES, BUT THEY DIDN'T SEEM TO WORK. THE AIRBAG DEPLOYED IN THE PROCESS, THE FRONT OF THE VAN WAS BADLY DAMAGED. THANKFULLY THERE WERE NO PEDESTRIANS IN THE LOT AND I DIDN'T HIT ANY OTHER VEHICLE AND MY SON AND I WALKED AWAY WITH MINOR INJURIES. I HAVE CONTACTED TOYOTA. THEY INSPECTED THE VAN LAST WEEK AND I AM WAITING TO HEAR THEIR REPORT. THE VAN HASN'T BEEN FIXED YET- I AM WAITING TO HEAR FROM TOYOTA AS TO THE NEXT COURSE OF ACTION. ABOUT AN HOUR BEFORE THIS INCIDENT OCCURRED, I WAS PULLING OUT OF ANOTHER PARKING SPACE IN REVERSE, WHEN THE VAN JUST STOPPED AND DIDN'T MOVE. I RESTARTED IT, PUT IT ON REVERSE AND THEN IT MOVED ALRIGHT, WAS BUMPY- I THOUGHT A TIRE WAS FLAT- STOPPED AND CHECKED TO SEE ALL OF THEM- THEY WERE FINE, AND AFTER THAT ALL WAS SMOOTH AND WELL UNTIL THE CRASH. \*JB

**Vehicle:** 2004 TOYOTA HIGHLANDER  
**Location of Incident:** ELDRIDGE, IA  
**NHTSA Summary:**  
 WE HAVE A 2004 TOYOTA HIGHLANDER, AND WE HAVE HAD SURGES ON THE GAS SINCE WE BOUGHT IT IN 2004. IT USUALLY IS SOMETHING THAT WE CAN CONTROL, AS YOU WILL BE DRIVING ALONG, AND IT WILL SURGE FORWARD A BIT, BUT WE HAVE ALWAYS BEEN ABLE TO APPLY BRAKE AND CONTROL IT. THERE HAS ONLY BEEN ONE INSTANCE WHERE IT SURGED STRONGLY, AND I HAD TO SLAM ON THE BRAKES TO AVOID HITTING THE CAR IN FRONT OF ME. WE TRIED TO SELL THE CAR A COUPLE OF YEARS AGO, BUT THE BUYER TEST DROVE IT, AND NOTICED THE SURGING, ASKED ABOUT IT, AND THEN

C-433

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

DECIDED NOT TO BUY IT - SO WE KEPT IT AFTER THAT. WE WERE THINKING IT IS A SOFTWARE PROBLEM, OR SOMETHING... WE HAVE NEVER TAKEN IT INTO A SHOP TO HAVE IT DIAGNOSED, BUT THOUGHT MAYBE IT WAS IMPORTANT TO MENTION IT, IN CASE OTHER HIGHLANDERS HAVE HAD THE SAME ISSUE. I DIDN'T THINK IT WAS THE GAS PEDAL STICKING, BUT JUST THE GAS SURGING SOMEHOW, BUT MAYBE IT IS RELATED. \*TR

**Vehicle:** 2001 TOYOTA HIGHLANDER  
**Location of Incident:** COVINGTON, GA  
**NHTSA Summary:**  
 I OWN A 2001 TOYOTA HIGHLANDER AND HAVE HAD THE SAME EXACT PROBLEM HAPPEN TO ME SEVERAL TIMES IN THE PAST SEVEN YEARS. THE FIRST TIME I EXPERIENCED A SERIOUS PROBLEM WAS ABOUT FOUR YEARS AGO AND MY SON AND I COULD HAVE BEEN KILLED HAD IT NOT BEEN FOR SOME FAST THINKING ON MY PART. I WAS TRYING TO STOP AT A RED LIGHT AND MY CAR ACCELERATED FOR NO REASON. AT FIRST, I THOUGHT MY BRAKES HAD FAILED SINCE WHEN I STOMPED ON THE BRAKE, MY CAR WOULD NOT STOP, EVEN THOUGH I HAD BOTH FEET PRESSING DOWN ON IT. AT THIS POINT, WITH CARS IN FRONT OF ME THAT I WAS GOING TO HIT, I SWERVED INTO THE TURN LANE AND THEN ALL I COULD SEE WAS AN 18 WHEELER COMING AT ME. I WAS SO LUCKY THERE WERE NO CARS ON THE SIDE ROAD THAT I TURNED ONTO AND ALL THE WHILE I WAS STEADILY TRYING TO GET MY VEHICLE UNDER CONTROL. I ENDED UP THROWING IT INTO PARK AS I MADE THE TURN. IT TOOK TURNING MY CAR OFF TO BRING IT TO A COMPLETE STOP. AT THAT TIME, I THOUGHT MY FLOOR MAT HAD SOMEHOW GOTTEN STUCK ON THE ACCELERATOR, SO I TOOK ALL MY FRONT FLOOR MATS OUT. UNFORTUNATELY, I HAVE HAD THE SAME PROBLEM OF THE CAR "REVING" FOR NO REASON WHILE DRIVING IT SEVERAL TIMES AND/OR UPON STARTING IT. IT WOULD JUST IDLE HIGH IN THE 68 RPM RANGE. WE JUST THOUGHT IT WAS COLD. HOWEVER, ONE DAY I WAS DRIVING THE CAR AND IT KEPT SHOOTING FORWARD AT EVERY STOP. I'D HAVE TO STOMP ON THE BRAKES WITH BOTH FEET. I'D PULL OFF, STOP MY CAR, TURN IT OFF, RESTART IT, AND THE RPM'S WOULD SHOOT BACK UP TO 8. I KEPT PRAYING THAT I WOULDN'T HAVE TO STOP. IT WAS THE MOST FRIGHTENING 15 MILE RIDE BACK HOME THAT I EVER TOOK AND SERIOUSLY, I WANTED TO JUST LEAVE THE VEHICLE ON THE SIDE OF THE ROAD. I REFUSED TO DRIVE IT AND I TOOK IT TO MY MECHANIC WHO CHANGED AN RPM SENSOR. THIS HAS NOT STOPPED THE PROBLEM EITHER. PERIODICALLY, MY CAR'S RPM'S WILL SHOOT UP TO 4 OR 6 WHILE I AM DRIVING IT OR UPON STARTING THE CAR. \*TR

**Vehicle:** 1999 TOYOTA AVALON  
**Location of Incident:** WASHINGTON, DC  
**NHTSA Summary:**  
 1999 TOYOTA AVALON. UNINTENDED ACCELERATION CAUSING AN ACCIDENT. \*TGW THE CONSUMER STATED SHE WAS AT A CAR WASH WHICH WAS NEARING THE END OF THE WAS ON THE CONVEYOR BELT WITH THE VEHICLE IN NEUTRAL GEAR AS REQUIRED. AT THE END OF THE WASH CYCLE, THE GREEN LIGHT CAME ON WHICH WAS HER SIGNAL TO PUT THE VEHICLE IN DRIVE AND EASE OFF THE BELT ONTO THE LOT. AT THE GREEN LIGHT, THE CONSUMER PUT HER FOOT ON THE BRAKE TO CHANGE THE GEAR FROM NEUTRAL TO DRIVE. ONCE IN DRIVE GEAR, THE VEHICLE SUDDENLY AND INSTANTLY ACCELERATED AT A TREMENDOUSLY HIGH SPEED. THE CONSUMER STOMPED ON THE BRAKES CONTINUOUSLY WITH NO RESULT. THE VEHICLE CROSSED THE EAST SIDEWALK AND THREE EMPTY SOUTHBOUND LANES. IT THEN COLLIDED INTO THE THREE NORTHBOUND-LANE CARS, CROSSED THE WEST SIDEWALK AND CRASHED THROUGH A SIX FOOT COMMERCIAL CHAIN LINK FENCE; HIT A PARKED PICK UP TRUCK AND CRASHED INTO A WALL. THE WALL WAS THE FINAL OBJECT THAT STOPPED THE VEHICLE WHICH HAD MAINTAINED EXCESSIVE SPEED. PRIOR TO THE ACCIDENT, THE CONSUMER COMPLAINED TO THE DEALER ABOUT A STRONG SMELL OF GAS. \*JB

**NHTSA Summary:**

**Additional Summary:**

I bought a new 2005 Toyota Sienna in Dec. '04. On Aug. 1st, it was involved in a crash. I was pulling into a parking space, foot on the brake, expecting the van to come to a halt, when I felt a jerk and it suddenly accelerated, went over the raised curb in front, onto the exit lane of the shopping center, back into the parking lot, hit the side of the building breaking windows there, hit a barricaded dumpster and then came to a stop. All the while my foot was on the brakes and they didn't seem to work. All this happened within a few seconds. The airbag deployed. Thankfully my son and I walked away with minor injuries and there were no pedestrians in the lot at the time and I did not hit any other vehicle. Earlier that day, the van stalled when I was pulling out of a parking space; I restarted it and put it on reverse and it was fine, though it seemed to be a bit bumpy-I checked all the tires and they were fine. After that it was smooth until the incident of the crash. I informed Toyota-they did an inspection and said all was well-'the vehicle performed as designed'. Currently it is being fixed.

**Location of Incident:** NAPERVILLE, IL

**NHTSA Summary:**

I HAD MY NEW 2005 CAMRY INTO THE DEALERSHIP (LONGO TOYOTA, EL MONTE, CA) THREE TIMES IN THE FIRST MONTH AFTER I PURCHASED IT. I EXPLAINED THAT THERE WAS A MAJOR SURGE IN ACCELERATION WHILE BREAKING. I ALSO HAD PROBLEMS WITH MY CAR "JUMPING" FORWARD WHILE AT A COMPLETE STOP, AND ANOTHER ISSUE WITH A LAG IN ACCELERATION. ALL THREE OF THESE ISSUES HAVE HAPPENED MORE TIMES THAN I CAN COUNT. THERE HAVE BEEN MANY TIMES THAT I HAVEN'T BEEN ABLE TO ACCELERATE AT FIRST, ONLY TO FIND MYSELF TRYING TO BRAKE (AND NOT SUCCEEDING) AS SOON AS THE ACCELERATOR KICKS IN SECONDS LATER, SENDING THE CAR SURGING FORWARD. I'VE TAKEN THE CAR IN TO THE DEALERSHIP, AND EACH TIME I WAS TOLD THAT THERE WAS NO PROBLEM - THAT WHATEVER MY ISSUE MIGHT BE, IT COULD NOT BE REPLICATED, AND THAT ANY "TIMING" CONCERN WAS ONLY THE ELECTRONIC THROTTLE ? AND THAT THIS WAS COMPLETELY NORMAL. THE ISSUES WITH THE CAMRY'S ACCELERATION & ELECTRONIC THROTTLE ARE INCREDIBLY DANGEROUS, AND WERE ALMOST THE CAUSE OF A MAJOR ACCIDENT (MY 3 YEAR OLD SON WAS IN THE CAR AT THE TIME), AND COUNTLESS OTHER MINOR NEAR-ACCIDENTS. I AM A SAFE, 33 YEAR OLD FEMALE DRIVER WITH 17 YEARS OF DRIVING-EXPERIENCE, AND ONLY ONE ACCIDENT ON MY RECORD (A MAN REAR-ENDED ME ON THE FREEWAY IN 2003). TOYOTA IS SUCH A POPULAR BRAND, AND IF THERE ARE OTHER CAMRY OWNERS, THEN NONE OF US ARE SAFE. HOW MANY PEOPLE HAVE TO BE INJURED OR DIE BEFORE TOYOTA OWNS UP TO THEIR MISTAKE? I CONTINUE TO SEE RECALLS FOR OTHER TOYOTA CARS, AND HOPE BEYOND HOPE THAT ONE DAY MY 2005 CAMRY SE WILL ALSO BE RECALLED.\*CW

**Date of Incident:** 20050913  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** SOUTH JORDAN, UT  
**NHTSA Summary:**

I WAS DRIVING WITH MY FAMILY SOUTH BOUND ON I-5 WHEN WE EXITED THE FREEWAY AND PULLED INTO THE TILLCUM CHEVRON STATION. THE CRUISE CONTROL WAS ON BUT DISENGAGED. I TURNED RIGHT INTO A PARKING SPOT AT A LOW RATE OF SPEED (3 TO 5 MPH). I WAS ALMOST AT A COMPLETE STOP AND HAD JUST ENOUGH TIME TO REALIZE THAT I COULD NOT STOP!!! I COULD HEAR THE CAR'S ENGINE ROAR AND A MOMENT LATER FOUND THAT I HAD DRIVEN OVER A CONCRETE CURB, UP A TWO FOOT CONCRETE RETAINING WALL, AND THROUGH A CHAIN-LINK FENCE. I DON'T KNOW HOW A CAR COULD DO THIS!! THE TOTAL SPACE FOR THIS TO HAPPEN WAS ONLY ABOUT 3 LINEAR FEET!! I WAS NOT PUSHING THE ACCELERATOR!! THERE WAS INDEED AN ACCELERATION SURGE IN MY 2002 CAMRY V6. THE CAR STOPPED, STRADDLING THE CONCRETE WALL, THE FRONT DRIVE WHEELS WERE OFF THE GROUND. I GOT OUT OF THE CAR AND ASKED THE MECHANIC ON-SITE IF THERE WERE ANY RECALLS ON THE 2002 CAMRY. I SWEAR THIS IS THE VERY FIRST THING I SAID BECAUSE I KNEW THAT I DID NOT CAUSE THE ACCIDENT. THE ACCIDENT WAS CAUSED BY A DEFECT IN THE TOYOTA CAMRY. A TOW TRUCK REMOVED MY VEHICLE FROM THE RETAINING WALL. I THEN DROVE THE CAR DIRECTLY TO THE TITUS WILL TOYOTA DEALERSHIP. THEY COULD NOT DUPLICATE THE PROBLEM WITH THE VEHICLE AND INDICATED IT WAS SAFE TO DRIVE. DAMAGE TO THE CAR INCLUDED THE FRONT BUMPER, SEVERAL MAJOR SCRATCHES, AND SEVERAL SMALL DENTS. I EXPLAINED THAT WE WERE VERY CONCERNED ABOUT SAFETY AND ASKED ABOUT RECALLS. THEY INDICATED THAT THERE WERE NONE FOR MY VEHICLE. THEY DID ADMIT AFTER SOME QUESTIONING THAT THEY WOULD NOT KNOW HOW MANY TIMES THIS HAS HAPPENED IN THE PAST DUE TO THE FACT THAT THE DEALERSHIPS DO NOT SHARE INFORMATION AND TOYOTA CORPORATE DOES NOT SHARE THIS INFORMATION WITH THE DEALERSHIPS. THE YOUNG LADY (EMPLOYEE) AT THE PAYMENT DESK VOLUNTEERED THAT SHE HAD ALSO HAD UNEXPECTED ACCELERATION WITH HER TOYOTA CAMRY. I REQUEST THAT A FORMAL INVESTIGATION BE LAUNCHED AND A RECALL PLACED FOR 2002 TOYOTA CAMRYS. \*JB

**Toyota ID Number:**  
**NHTSA ODI Number:** 10310910  
**Date of Incident:** 20050914  
**Vehicle:** 2003 TOYOTA TUNDRA  
**Location of Incident:** KAAAWA, HI  
**NHTSA Summary:**

MY WIFE WAS DRIVING HER 2003 TOYOTA TUNDRA ON THE H3 FREEWAY, CHANGING FROM THE RIGHT LANE TO THE LEFT LANE, WHEN THE CAR SUDDENLY ACCELERATED, CRASHED INTO THE CENTER CONCRETE HIGHWAY DIVIDER, AND CONTINUED TO CRASH INTO THE DIVIDER UNTIL IT STOPPED RUNNING. SHE STEPPED ON THE BRAKE THE WHOLE TIME BUT THE TRUCK WOULD NOT SLOW DOWN OR STOP UNTIL THE ENGINE DIED. WHEN OUR INSURANCE COMPANY INSPECTED THE TRUCK IT FOUND THAT THE REPEATED IMPACT INTO THE CONCRETE BARRIER HAD BENT THE FRAME OF THE TRUCK AND THEN DECLARED THE TRUCK A TOTAL LOSS. AFTER THEY INSPECTED THE TRUCK

C-442

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

OUR LOCAL TOYOTA DEALER SAID THERE WAS NOTHING WRONG WITH THE TRUCK TO CAUSE IT TO SUDDENLY SPEED UP AND GO OUT OF CONTROL. \*TR

**Date of Incident:** 20050919  
**Vehicle:** 1998 TOYOTA AVALON  
**Location of Incident:** FULLERTON, CA  
**NHTSA Summary:**

ON OR ABOUT SEPTEMBER 19, 2005. I PULLED INTO A PARKING SPOT ASIDE OF A SHOE SHOP AND APPLIED MY BRAKE TO STOP. THE 1998 TOYOTA AVALON WHICH I WAS DRIVING REFUSED TO STOP AND CONTINUED ON INTO THE SIDE OF THE BUILDING AT MAYBE 30 MPH. I WAS SURE THAT I HAD APPLIED EXTREME PRESSURE TO THE BRAKE BUT COULD NOT STOP THE CAR. I WAS SO DISTRAGHT THAT I ASSUMED THAT MY FOOT SLID OFF THE BRAKE ONTO THE ACCELERATOR. AS I THINK BACK I AM SURE THAT I WAS ON THE BRAKE AND NOT ON THE ACCELERATOR. IF I WAS ON THE ACCELERATOR I WOULD HAVE HAD A JOLT FORWARD WITH EXTREME ACCELERATION. IT WAS LIKE I WAS IN A SLOW MOTION DREAM WORLD AND THE AVALON WAS UNDER ITS OWN CONTROL. I REPORTED IT TO MY INSURANCE COMPANY AS BEING MY FAULT SINCE I HAD NO OTHER REASONABLE EXPLANATION. I AM NOW SURE THAT THE AVALON WAS UNDER ITS OWN CONTROL AND NOT MINE. UPDATED 03/24/10

**NHTSA Summary:**

I HAVE A 2005 TOYOTA HIGHLANDER LIMITED W/V6 ENGINE. WHEN I ACCELERATE AT LOW SPEEDS, THEN TAKE MY FOOT OFF THE GAS AND THEN TRY TO ACCELERATE AGAIN, THERE IS A PROLONGED HESITATION BEFORE THE VEHICLE STARTS TO ACCELERATE. THE SAME PROBLEM EXISTS WHEN YOU MAKE A TURN AND THEN TRY TO ACCELERATE AGAIN. THE OTHER DAY I WAS TRYING TO PULL OUT ONTO A WELL TRAVELED ROAD. I MOVED OUT INTO THE FIRST LANE AND THEN TOOK MY FOOT OFF THE GAS TO CHECK TO MAKE SURE THE NEXT LANE WAS CLEAR. I SAW THERE WERE CARS COMING AROUND THE CURVE TOWARDS ME IN BOTH LANES. I HIT THE GAS AND THE CAR HESITATED. THEN FINALLY IT STARTED TO MOVE. I BARELY MISSED BEING BROADSIDED. I'VE BEEN DRIVING FOR OVER THIRTY YEARS AND HAVE DRIVEN A NUMBER OF DIFFERENT VEHICLES. I HAVE NEVER EXPERIENCED THIS PROBLEM AND AM VERY CONCERNED FOR MY FAMILY'S SAFETY. I HAVE CONTACTED THE DEALER AND TOYOTA AND THEY SAY THIS IS NORMAL OPERATION. AS FAR AS I'M CONCERNED THIS IS ANYTHING BUT NORMAL AND NEEDS TO BE ADDRESSED. \*NM

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I HAD JUST LEFT ONE AREA OF A PARKING LOT AND WAS TRAVELING TO ANOTHER AT A LOW RATE OF SPEED (5 TO 15 MPH) SO MY 2002 TOYOTA PRIUS WAS RUNNING UNDER ELECTRICAL POWER. I TURNED RIGHT TO PULL INTO A PARKING SPACE BETWEEN TWO SUVs, COASTING IN WITH MY FOOT OVER THE BRAKE PEDAL. WHEN I WAS MORE THAN HALFWAY INTO THE PARKING SPACE, THE CAR SUDDENLY SHOT FORWARD JUMPING THE CURB AND STOPPING ONLY WHEN IT HIT A STONE PILLAR. WHEN I LOOKED DOWN (AFTER CHECKING TO SEE IF MY 13 YEAR OLD SON WAS ALRIGHT, I SAW THAT MY FOOT WAS ON THE BRAKE PEDAL. FORTUNATELY NO PEDESTRIAN WAS IN THE WALKWAY, AND I DID NOT HIT THE SUV TO MY RIGHT OR LEFT. HOWEVER, THE UNEXPECTED ACCELERATION WAS NOT A RESULT OF PRESSING ON THE GAS PEDAL. \*JB

**Location of Incident:** ORANGE CITY, FL

**NHTSA Summary:**  
WE OWN "TWO" 2005 TOYOTA TUNDRA DOUBLE CABS THAT ARE EQUIPPED THE SAME. BOTH OF THESE VEHICLES EXHIBIT THE SAME SAFETY ISSUE. THE ISSUE: WHEN DRIVING WITH CRUISE CONTROL "ON" AT SPEEDS OF 70 MPH, ON SLIGHTLY UPHILL TRACK, THE CRUISE CONTROL WILL COMMAND THE VEHICLE TO MAXIMUM THROTTLE, SHIFTING THE TRANSMISSION INTO PASSING GEAR. THIS ACTION ON THE 287 HORSEPOWER VEHICLE, CAUSES THE REAR TIRES TO BREAK LOOSE ON WET ROADS AND CAN CAUSE LOSS OF CONTROL OF THE VEHICLE, SENDING IT OFF THE ROAD OR INTO A SPIN. BOTH VEHICLES WE OWN EXHIBIT THIS BEHAVIOR AND IT HAS BEEN REPORTED TO TOYOTA CASE # 200510040775. \*NM

C-447

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ACCELERATOR WILL KICK IN IN A FULL OPEN AND UNCONTROLLED ACCELERATION MODE CAUSING THE NEED TO DISENGAGE THE CRUISE CONTROL TO PREVENT FROM RUNNING IN TO SOMETHING IN FRONT OF ME. THIS HAPPENS OFTEN AND ROUTINELY WHEN USING THE CRUISE CONTROL AND HITTING AN UPHILL STRETCH OF ROAD. I HAVE REQUESTED SERVICE FROM THE TOYOTA DEALER IN KNOXVILLE, TN SEVERAL YEARS AGO (APPROX. 2006-2007 TIME FRAME. HOWEVER, THEY DISMISSED THE CLAIM AS THE "PASSING GEAR" OF THE TRANSMISSION KICKING IN WITHOUT EVEN DRIVING THE VEHICLE AND TESTING IT. HOWEVER, THE CHARACTERISTIC OF THE EVENT WHEN IT HAPPENS IS THAT THERE IS IMMEDIATE UNCONTROLLED ACCELERATION THAT IS EQUIVARIANT TO THE ACCELERATOR BEING FULLY DEPRESSED WHICH REQUIRES INTERVENTION TO INTERRUPT. THE INCIDENTS HAVE BEEN GOING ON SINCE 2005 AND CONTINUE UNDER USE OF THE CRUISE CONTROL IN THIS MODEL.

**NHTSA ODI Number:** 10140820  
**Date of Incident:** 20051001  
**Vehicle:** 2006 TOYOTA TUNDRA  
**Location of Incident:** DELAND, FL

**NHTSA Summary:**  
 2006 TUNDRA 4 DOOR OVERSPEED WHEN DRIVING IN CRUISE CONTROL. WHEN DRIVING AT HIGHWAY SPEED WITH CRUISE CONTROL ON AND APPROACHING A SLIGHT INCLINE, THE VEHICLE WILL DROP INTO PASSING GEAR AND THE THROTTLE WILL GO TO FULL THROTTLE. THIS WILL CAUSE THE OPERATOR TO LOSE CONTROL OF THE VEHICLE, ESPECIALLY ON A RAIN SLICK ROAD. THIS HAS HAPPENED MANY TIMES, AND ALTHOUGH I AM AWARE THAT IT COULD HAPPEN, IT STILL STARTLES ME WHEN IT OCCURS. IF CLOSE BEHIND ANOTHER VEHICLE, THIS COULD LEAD TO AN REAR END ACCIDENT. THE NORMAL PROGRESSION SHOULD BE DRIVING OUT OF OVERDRIVE, WITH A GRADUAL ACCELERATION TO MAINTAIN SET SPEED, AND THEN BACK TO OVERDRIVE WHEN SET SPEED IS OBTAINED. DEALER CALLED TOYOTA AND THEY CLAIMED THIS IS NORMAL OPERATION. DOCUMENTED WITH TOYOTA DEALER, AND NOW WITH NHTSA. WHEN ACCIDENT OCCURS AS A RESULT OF THIS OVERSPEED, HOPEFULLY TOYOTA WILL RESET THE COMPUTER CONTROL MODULE TO FIX PROBLEM. \*JB

**NHTSA Summary:**  
 PROBLEMS WITH 2002 TOYOTA CAMRY. AUGUST 2003 - DRIVING ALONG, HUSBAND BEGAN TO STOP SLOWLY TO PULL UP TO A LIGHT AND IT FELT LIKE IT WAS NOT BREAKING BUT CAR CONTINUED TO ACCELERATE SO HUSBAND LET OFF BRAKE AND REAPPLIED THE BRAKE AND IT FINALLY STOPPED THE SURGING. 2. WHILE GETTING GAS WE WERE DRIVING AROUND IT TO FIND AN PUMP, WE WERE PRESSING THE BRAKE AND CAR WAS TRYING TO ACCELERATE AGAINST THE BRAKE AS IT WAS APPLIED. LET OFF BRAKE AND REAPPLIED QUICKLY AND CAR STOPPED NORMALLY. JANUARY 2004 HUSBAND BEGAN TO PULL INTO A PARKING SPACE AND AS HE STARTED TO BRAKE AGAIN THE CAR WAS TRYING TO ACCELERATE AND SO HE LET OFF THE BRAKE, REAPPLIED IT (ALL VERY QUICKLY) AND WAS ABLE TO PARK BARELY MISSING HITTING VEHICLE BESIDE HIM. MARCH 27, 2004, WE TOOK OUR VEHICLE ONCE AGAIN TO DEALERSHIP STATING THE VEHICLE WAS SURGING WHILE DRIVING. OCTOBER 2004 ON A TRIP TO GATLINBURG, TENNESSEE- HUSBAND APPLIED THE BRAKES, CAR CONTINUED TO ACCELERATE-REAPPLIED THE BRAKES- SURGING/ACCELERATION STOPPED. OCTOBER 3, 2005 TRIP TO NORTH CAROLINA ON 7 SEPARATE OCCASIONS THE CAR ENGINE STARTED RACING AND THE CAR HAD TO BE PUT IN NEUTRAL AND THE BRAKE HELD TIGHTLY. ON ONE OCCASION AS WHILE ATTEMPTING TO STOP BEHIND A SCHOOL BUS FULL OF CHILDREN, ALMOST HIT THE BUS FROM BEHIND BECAUSE ACCELERATOR WENT TO FULL ACCELERATION AS WE APPLIED THE BRAKES. FORTUNATELY, MY HUSBAND PUT THE CAR IN NEUTRAL AND IT WAS REVVING AT FULL THROTTLE. HE HIT ACCELERATOR PEDAL AS WE WAS IN NEUTRAL, AND ACCELERATION WENT BACK TO IDLE SPEED. DECEMBER 5, 2005 WHILE IN WE WERE STOPPED IN A LINE OF TRAFFIC WAITING AT A LIGHT THE ENGINE ONCE AGAIN STARTED RACING HAD TO PUT IT IN NEUTRAL, AND AGAIN IT REVVED AT FULL THROTTLE WHILE HOLDING BRAKE PEDAL DOWN TIGHTLY-T-T-T-T- OTHERWISE WOULD HAVE REAR ENDED CARS IN FRONT OF US. PUT CAR IN NEUTRAL, RELEASED BRAKE PEDAL AND THEN PRESSED DOWN ON THE ACCELERATOR- ENGINE SPEED WENT TO IDLE SPEED. \*JB

**Location of Incident:** RICHMOND, 00

**NHTSA Summary:**  
 MY 2002, LEXUS IS300 HAD A CASE OF SUDDEN UNINTENDED ACCELERATION THAT LED TO A CRASH CAUSING OVER \$10,000 WORTH OF DAMAGES TO BOTH MY CAR AND THE OTHER PERSONS CAR. I HAVE SEEN OTHER REPORTS OF OTHER PEOPLE WONDERING IF THE ELECTRONIC THROTTLE IS SUSPECT IN THESE CASES, HOWEVER I PERSONALLY

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

C-452

BELIEVE THAT THE REAL PROBLEM IS ONLY PARTLY TO BLAME ON THE ELECTRONIC THROTTLE. IN MY OPINION, THE PROBLEM IS THE LIKELIHOOD OF THE PEDAL GETTING STUCK UNDER FLOOR MATS IS TOO HIGH, COMBINED WITH THE RELATIVELY "LIGHT" SPRING FORCE ON THE GAS PEDAL BECAUSE IT IS A THROTTLE-BY-WIRE SYSTEM WHICH LEADS TO THE FLOOR MAT EASILY HOLDING THE PEDAL DOWN TO FULL THROTTLE CAUSING AN ACCIDENT. I SAY THAT THIS IS "NEGLIGENT PEDAL DESIGN ON THE PART OF THE CAR MANUFACTURER". I ALSO BELIEVE THAT THEY KNEW THIS WAS AN ISSUE BECAUSE THEY MAKE REFERENCE TO THIS IN THE OWNERS MANUAL ON PG.76 WHERE THERE IS A CAUTION THAT STATES "MAKE SURE THE FLOOR MAT IS PROPERLY PLACED ON THE FLOOR CARPET. IF THE FLOOR MAT SLIPS AND INTERFERES WITH THE MOVEMENT OF THE PEDALS DURING DRIVING, IT MAY CAUSE AN ACCIDENT." NO MANUFACTURER SHOULD BE ALLOWED TO USE THAT CAUTION AS A DISCLAIMER TO GET AWAY WITH NEGLIGENT PEDAL DESIGN. THEY FULLY WELL KNOWING THAT THIS IS A SAFETY ISSUE, SHOULD HAVE RECALLED THOSE CAR MODELS WITH A PEDAL DESIGN THAT HAS A HIGH RISK OF GETTING JAMMED AND REDESIGNED THE PEDAL SO THAT IT CANNOT GET STUCK BY A FLOOR MAT. IN ALL THE CARS THAT I'VE OWNED IN THE PAST, IF A MAT SLIPS IT JUST PREVENTS YOU FROM APPLYING FULL GAS PEDAL, NOT THE OPPOSITE OF APPLYING FULL PEDAL. I STRONGLY MOVE THAT TOYOTA COMPANY RECALLS ALL THESE CARS WITH THIS POTENTIAL PROBLEM AND FIX IT PROPERLY BEFORE SOMEONE GET FATALLY INJURED OR CRIPPLED FOR LIFE. \*NM

**Vehicle:** 2000 TOYOTA CAMRY  
**Location of Incident:** CAMANO ISLAND, WA

**NHTSA Summary:**  
 I WAS BRAKING TO PULL INTO A HEAD-IN PARKING SPOT. EVEN THOUGH I HAD MY FOOT ON THE BRAKE, THE CAR JUMPED THE PARKING GUARD, PROCEEDED OVER THE SIDEWALK AND RAN INTO A BUILDING. THIS IS THE ONLY TIME ANYTHING LIKE THIS HAS HAPPENED, BUT WITH ALL THE TOYOTA TROUBLES, I THOUGHT I'D BETTER REPORT IT.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10139780  
**Date of Incident:** 20051010  
**Vehicle:** 2005 LEXUS ES  
**Location of Incident:** FALLBROOK, CA

**NHTSA Summary:**  
 DEPRESSING THE ACCELERATOR PEDAL CAUSES THE VEHICLE TO HESITATE FOR ONE-HALF TO ONE FULL SECOND AND THEN LURCH FORWARD. SUDDENLY, THIS IS A SAFETY RISK WHEN CHANGING LANES OR ACCELERATING TO AVOID A COLLISION. THE DEALER'S MECHANIC INDICATED (TWICE) THAT THEY HAVE HAD PROBLEMS WITH THIS MODEL'S "ELECTRONIC ACCELERATOR," AND THAT AN INTERNAL COMPUTER IS SUPPOSED TO "LEARN FROM THE DRIVERS' HABITS AND ADJUST THE ACCELERATION ACCORDINGLY." AN ACCIDENT CAN EASILY OCCUR WHEN EXPECTED POWER IS DENIED UPON DEPRESSING THE ACCELERATOR. \*NM

**Location of Incident:** FALLS CHURCH, VA

**NHTSA Summary:**  
 MY 2002 LEXUS 3000 SUDDENLY ACCELERATED AS I WAS PULLING FORWARD INTO A PARKING SPACE AND CRASHED INTO A BUILDING. WHEN IT HAPPENED, MY FOOT WAS RESTING LIGHTLY ON THE BRAKE, PREPARING TO BRAKE TO A STOP, AND LETTING THE CAR IDLE INTO THE SPOT. I HAD A SIMILAR THING HAPPEN ABOUT 4 MONTHS AGO. \*JB

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10303734  
**Date of Incident:** 20051015  
**Vehicle:** 1998 TOYOTA COROLLA  
**Location of Incident:** DODGE CITY, KS

**NHTSA Summary:**  
 IN LIGHT OF THE RECENT TOYOTA RECALLS REGARDING STICKING GAS PEDALS, I FELT I SHOULD REPORT THAT THIS HAPPENED TO ME WITH MY 1998 TOYOTA COROLLA ABOUT FOUR YEARS AGO. THE PEDAL STUCK THREE DIFFERENT TIMES AND I DISCOVERED THAT BRAKING DID NOTHING. HOWEVER, I WAS ABLE TO GET IT TO RELEASE ALL THREE TIMES BY PUMPING THE GAS PEDAL REPEATEDLY. WHEN I TOOK MY CAR TO THE TOYOTA DEALERSHIP, THEY REFUSED TO CONSIDER MY COMPLAINT SERIOUSLY AND SAID IT MUST BE DRIVER ERROR AS IT COULD NOT POSSIBLY BE THEIR VEHICLE. AT THE TIME, I ASKED THEM TO CHECK DIRECTLY WITH THE MANUFACTURER REGARDING WHAT WAS POTENTIALLY A VERY SERIOUS PROBLEM, AND WAS SIMPLY BLOWN OFF AND TREATED LIKE I WAS NUTS. I AM REPORTING THIS TO YOU NOW, BECAUSE IN LIGHT OF MY EXPERIENCE, I FEEL THAT THIS PROBLEM HAS BEEN GOING ON A LOT LONGER THAN ANYONE REALIZES. I HAVE BEEN A TOYOTA CUSTOMER SINCE 1983 BUT I FEEL LIKE I

**C-454**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

WILL NEVER BUY ANOTHER ONE. I THINK TOYOTA HAS BEEN SWEEPING THIS ONE UNDER THE RUG FOR A LONG TIME AND THEY SHOULD BE HELD ACCOUNTABLE. I AM SURE THERE ARE A LOT MORE OLDER MODELS OUT THERE LIKE MINE. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10310607  
**Date of Incident:** 20051015  
**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** SODDY DAISY, TN

**NHTSA Summary:**  
 IN 2005, I WAS DRIVING EAST ON U.S. HWY 74 BETWEEN I-26 AND SHELBY, NC IN MY 2003 CAMRY. THE CRUISE CONTROL WAS SET FOR 65 MPH, THE SPEED LIMIT. A FEW MINUTES LATER, THE CAR BEGAN INCREASING SPEED TO 75 MPH. I STEPPED ON THE BRAKE AND TURNED OFF THE CRUISE CONTROL TO SLOW DOWN THE VEHICLE. THIS WAS THE ONLY TIME THIS HAPPENED. I REPORTED THIS TO A SERVICE REPRESENTATIVE AT MY TOYOTA DEALERSHIP WHEN I RETURNED TO CHATTANOOGA. HE SAID TO LET HIM KNOW IF IT EVER HAPPENED AGAIN. THIS YEAR, I SENT MY DEALERSHIP AND TOYOTA E-MAILS REMINDING THEM OF THE PROBLEM ENCOUNTERED IN 2005. NEITHER RESPONDED. THEN, I WENT TO THE DEALERSHIP AND TALKED WITH A SERVICE REPRESENTATIVE. THE GENTLEMAN SAID THAT TOYOTA HAD BEEN HAVING THIS PARTICULAR PROBLEM WITH ITS CRUISE CONTROL FOR MANY YEARS (HE MENTIONED A SPECIFIC PIECE THAT WAS CAUSING THE MALFUNCTION), BUT IT WAS NOT REGARDED AS A SAFETY ISSUE SINCE TAPPING ON THE BRAKE DISCONNECTED THE CRUISE CONTROL. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10143194  
**Date of Incident:** 20051019  
**Vehicle:** 2005 TOYOTA AVALON  
**Location of Incident:** CHESTERFIELD, MO

**NHTSA Summary:**  
 CONSUMER BRAKES DID NOT WORK ON TOYOTA AVALON 2005. \*TS (11/17/05) THE VEHICLE ALSO WOULD EXPERIENCE SUDDEN ACCELERATION WHEN THE BRAKES WERE APPLIED. ON ONE OCCASION, THE VEHICLE JUMPED 6 FEET BEFORE COMING TO A HALT. \*SC

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10200404  
**Date of Incident:** 20051020  
**Vehicle:** 2005 TOYOTA 4RUNNER  
**Location of Incident:** MAHOPAC, NY

**NHTSA Summary:**  
 CRUISE CONTROL GOES CRAZY ON HILLS. IT WAITS TOO LONG TO ACCELERATE AND THEN IT FLOORS THE GAS AND THE AUTO TRANSMISSION DOWNSHIFTS AT LEAST TWO GEARS AND RACES THE ENGINE WAY PAST THE SPEED YOU WANT AND THEN IT FINALLY LETS UP AND THE SPEED DROPS TOO LOW AND EVERYTHING REPEATS. DANGEROUS AND ABSOLUTELY WORTHLESS! HAS BEEN HAPPENING EVER SINCE I PURCHASED THE CAR NEW IN 2005. \*TR

**Additional Summary:**

**C-455**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Toyota ID Number:**  
**NHTSA ODI Number:** 10146927  
**Date of Incident:** 20051021  
**Vehicle:** 2005 TOYOTA PRIUS  
**Location of Incident:** BATTLE CREEK, MI

**NHTSA Summary:**  
 THE CRITICAL SAFETY CONCERN IS NOTED AS FOLLOWS: ON OCTOBER 21, 2005, I WAS TRAVELING WITH THE CRUISE CONTROL ACTIVE AT 55 MILES PER HOUR. UPON APPROACHING A SLOWER VEHICLE AND CHECKING TRAFFIC, I PROCEEDED TO ACCELERATE THE VEHICLE IN AN ATTEMPT TO QUICKLY PASS THE VEHICLE DRIVING BEFORE ME. UPON SUCCESSFUL PASSAGE OF THE VEHICLE, I LET OFF THE ACCELERATOR AND PRESSED THE BRAKES SEVERAL TIMES, BUT THE VEHICLE CONTINUED TO ACCELERATE UNDER FULL POWER. UNDER THE CONDITIONS, I TRIED TO QUICKLY DISRUPT THIS SAFETY CRITICAL ISSUE. TO THE BEST OF MY RECOLLECTION I TRIED TO SLOW THE VEHICLE BY PUSHING THE POWER BUTTON, MANIPULATING THE CRUISE CONTROL LEVER, AND PUTTING THE VEHICLE IN NEUTRAL. ALL ATTEMPTS WERE UNSUCCESSFUL. UNDER CONSIDERABLE DISTRESS, TRAVELING APPROXIMATELY 20 MILES OVER THE POSTED SPEED LIMIT AT THIS POINT, AND CONTINUING TO ACCELERATE, I ELECTED TO APPLY FULL BRAKING FORCE TO THE PRIUS WHILE "LABORING" THE VEHICLE TO A STANDSTILL ON THE GRAVEL SHOULDER OF THE ROAD. REGAINING MY COMPOSURE, I PUSHED THE POWER BUTTON, AND THE VEHICLE SHUTDOWN. THE CABIN OF THE MOTOR VEHICLE EXHIBITED A STRONG ODOR REMINISCENT OF ELECTRICAL MOTOR SMELL. NO ROOT CAUSE HAS BEEN FOUND TO DATE. VEHICLE WAS DRIVEN BY DEALER AND ISSUE WAS RE-CREATED DURING INITIAL TEST-DRIVE FROM PORTER. \*JB

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10144922  
**Date of Incident:** 20051022  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** MIAMI LAKES, FL

**NHTSA Summary:**  
 I STARTED THE CAR, AND I RELEASED THE BRAKE AND STARTED IN REVERSE. AFTER A FEW SECONDS, THE CAR SUDDENLY SPED UP TO ABOUT 45 MPH IN REVERSE. THE CAR WOULD NOT STOP EVEN AS I PRESSED THE BRAKE, AND IT THEN HIT TWO CARS. THAT IS WHEN IT STOPPED. I TRIED TO PUT THE CAR IN DRIVE TO GO BACK INTO THE PARKING SPACE, BUT IT JOLTED FORWARD AND SKIPPED TWO PARKING BUMPERS. AT THAT TIME, I HIT ANOTHER CAR. AT THAT POINT, I LEFT THE CAR ALONE SEEING AS THERE WAS SOMETHING CLEARLY WRONG. IN THE END, MY CAR SUSTAINED DAMAGE TO THE FRONT AND TO THE BACK TOTALING \$10,111.60. THIS DOES NOT INCLUDE THE DAMAGE TO THE THREE OTHER CARS, THE TOTALS OF DAMAGE OF WHICH I AM NOT AWARE OF ALTHOUGH THEY ARE CLAIMING MY INSURANCE. I TOOK THE CAR TO A LOCAL TOYOTA DEALER HAVING CONDUCTED RESEARCH ON WHAT HAPPENED TO ME. I FOUND THAT THERE HAVE BEEN CLAIMS AGAINST TOYOTA FOR PROBLEMS WITH ELECTRONIC THROTTLE WHERE THERE IS A SUDDEN, INVOLUNTARY ACCELERATION. I SHOWED THE SERVICE DEPARTMENT ALL THE RESEARCH I HAD GATHERED FROM THE INTERNET. THE DEALER CHECKED THE CAR'S COMPUTER, AND THEY CLAIMED THEY FOUND NOTHING WRONG WITH THE ELECTRONIC THROTTLE OR WITH THE CAR'S COMPUTER. THEY CLAIMED THAT AIR POCKETS BETWEEN THE ACCELERATION AND THE BRAKE CAUSED THE PROBLEM. AS A RESULT, THEY FIXED THE STRUCTURAL DAMAGE TO MY CAR, BUT

**C-456**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THEY MAINTAINED THAT NOTHING WAS WRONG WITH THE ELECTRONIC COMPONENTS, SPECIFICALLY THE THROTTLE, OF THE CAR. \*NM

NHTSA Summary:  
I REPORTED THIS TO COMPLAINTS.COM ON 11/12/2005 BUT WANTED TO ALSO SUBMIT IT TO YOU DUE TO ALL OF THE NEWS LATELY. IN NOVEMBER 2005, MY PARENTS WERE DRIVING THEIR 1999 CAMRY AND PULLING SLOWING INTO A PARKING SPOT. JUST AS THEY WERE ABOUT TO COMPLETE PARKING AND ONLY GOING LESS THAN A MILE PER HOUR, THEIR CAR ACCELERATED VERY FAST, LEFT THE CURB AND CRASHED INTO A BUILDING. WE ASKED ABOUT IF SUDDEN ACCELERATION COULD BE INVESTIGATED AT THIS TIME BUT WERE TOLD IT COULDN'T. THE CAR WAS TOTALED. MY MOM WAS INJURED (BLUNT FORCE TRAUMA TO HER CHEST) BUT RECOVERED FAIRLY SOON AFTER. SHE DID GO TO THE ER. MY DAD, WHO WAS DRIVING, WAS OK BUT FOLLOWING THE ACCIDENT WAS STRESSED DUE TO WORRY ABOUT MY MOM'S INJURY AND HAVING THEIR CAR TOTALED SINCE HE WAS SURE HE HADNT DONE ANYTHING WRONG. THE AIRBAG DID NOT DEPLOY. MY DAD IS SURE HE DID NOT HIT THE GAS BY MISTAKE AND MY MOM AGREES THAT HE DIDNT HIT THE GAS EITHER.

Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10142695  
Date of Incident: 20051114

**Toyota ID Number:**  
**NHTSA ODI Number:** 10303792  
**Date of Incident:** 20051115  
**Vehicle:** 2005 TOYOTA TUNDRA  
**Location of Incident:** FORT BENNING, GA

**NHTSA Summary:**  
2005 TOYOTA V8 TUNDRA. BOUGHT NEW IN 2005. WHEN GOING UP HILL/INCLINE WITH CRUISE CONTROL ENGAGED, VEHICLE DANGEROUSLY ACCELERATES CAUSING THE TIRES TO LOOSE TRACTION ON WET OR LOOSE SURFACES. I NOTICED THIS PROBLEM SHORTLY AFTER I PURCHASED IT. I NO LONGER USE THE CRUISE CONTROL FEATURE ON MY TUNDRA. I PREVIOUSLY OWNED A 2000 TUNDRA AND THE SAME THING OCCURRED WITH THE CRUISE CONTROL ON THAT VEHICLE. SEEMS TO BE A MAJOR/DANGEROUS PROBLEM WITH THE TUNDRA. \*TR

**Vehicle:** 2001 TOYOTA AVALON  
**Location of Incident:** ORLAND PARK, IL

**NHTSA Summary:**  
ON 11/26/2005 I EXPERIENCED AN ACCELERATION PROBLEM WITH MY 2001 TOYOTA AVALON WHILE BACKING MY CAR INTO OUR GARAGE. WHILE SLOWLY BACKING IN, THE CAR ACCELERATED & I BACKED INTO OUR FAMILY ROOM WALL. I PUT THE CAR IN DRIVE, THE ENGINE CONTINUED TO REV UP AND THE CAR SHOT OUT OF THE GARAGE LIKE A BULLET (ONE NEIGHBOR WITNESSED IT). I QUICKLY TURNED TO AVOID A 2ND NEIGHBOR'S BRICK HOUSE ACROSS THE STREET. BRAKING DIDN'T SEEM TO HELP. I HIT A 3RD NEIGHBOR'S CAR PARKED IN HIS DRIVE AND ENDED UP IN A 4TH NEIGHBOR'S DRIVE ON MY SIDE OF THE STREET!. AS I GOT OUT OF THE CAR, I REMEMBER SAYING TO THE 1ST NEIGHBOR THAT I COULDN'T STOP THE CAR. IT'S A MIRACLE I DIDN'T HIT NEIGHBOR #2 WHO IS ALWAYS OUT IN HIS YARD. ANY ONE OF A NUMBER OF KIDS OR PEOPLE WHO WALK THEIR DOGS IN THE NEIGHBORHOOD OR ANOTHER VEHICLE COMING DOWN THE STREET. I WAS ALSO NOT INJURED. THERE WAS DAMAGE TO OUR HOUSE, MY CAR AND MY NEIGHBOR'S CAR. I WAS TOLD BY SOMEONE AT TOYOTA ORLAND PARK, IL (WHERE MY 2008 CAMRY IS BEING SERVICED TODAY) THAT THE ACCELERATION PROBLEM IN THE 2001 AVALON IS OF A DIFFERENT NATURE THAN THE CURRENT PROBLEMS.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10156708  
**Date of Incident:** 20051130  
**Vehicle:** 2006 TOYOTA AVALON  
**Location of Incident:** MONROEVILLE, PA

**NHTSA Summary:**  
RE: TOYOTA 2006 AVALON I RECENTLY BOUGHT A TOYOTA AVALON. IT NOW HAS 3800 MILES ON IT. IN THE SECOND WEEK AFTER THE PURCHASE, I WAS DRIVING ON A RAMP TO ENTER A LIMITED ACCESS HIGH WAY. SPEED WAS ABOUT 50 MPH AS I BLENDED IN WITH THE FLOW OF TRAFFIC. THE LANE I WAS IN STARTED TO SLOW DOWN AND THE LANE TO MY LEFT HAD AN OPEN SPACE. I PRESSED ON THE ACCELERATOR TO GAIN SPEED AND TURNED THE STEERING WHEEL TOWARD THE LEFT LANE. THE CAR, INSTEAD OF ACCELERATING, APPEARED TO GO INTO NEUTRAL, THE TACHOMETER REACHED ALMOST 7000 RPM, THEN THE TRANSMISSION SHIFTED INTO THE PASSING GEAR AND LEAPED FORWARD. I ALMOST HIT THE REAR END OF THE CAR IN FRONT OF ME, BUT SINCE MY CAR HAD SLOWED DOWN A LITTLE I WAS ABLE TO STEER AROUND AND GET INTO THE LEFT LANE. I HAVE GONE INTO THIS DETAILED EXPLANATION TO DEMONSTRATE THE DANGER, AND POTENTIAL TERRIBLE ACCIDENT AT 50MPH THAT THE +|-??BUILT IN+|-?? HESITATION OF THE 2006 TOYOTA AVALON COULD HAVE CAUSED. AFTER THIS EXPERIENCE, I WENT BACK TO THE DEALER, GOT THE EXPLANATION THAT THE HESITATION WAS NORMAL FOR 2006 TOYOTA AND NOTHING COULD BE DONE ABOUT IT. I TOLD THE DEALER I DID NOT WANT THE CAR AND WANTED MY MONEY BACK. OF COURSE THAT WAS REFUSED. SO I+|-??M STILL DRIVING A CAR I THINK IS DANGEROUS. I THINK TOYOTA SHOULD MAKE A RETRO FIT TO CORRECT THE HESITATION PROBLEM.

**Date of Incident:** 20051206  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** RALEIGH, NC  
**NHTSA Summary:**  
 I HAD NEW CAR BATTERY INSTALLED BY LOCAL TOYOTA DEALERSHIP LATE ON 12/2/05. THE CAR SEEMED TO SHIFT AND SOUND MARKEDLY DIFFERENTLY AFTER DRIVING THE CAR OFF THE LOT WITH THE NEW BATTERY. THREE DAYS LATER MY 4 CYLINDER, AUTOMATIC 2002 4D'S TOYOTA CAMRY WAS LEFT IN "D" WITH THE OVERDRIVE BUTTON REMAINED ENGAGED. MY FOOT WAS ON THE BRAKE PEDAL. I DID NOT DRIFT. IT BEEN STOPPED FOR A WHILE AT A "T" INTERSECTION FOR A WHILE AND NOT MOVING. NOR WERE ANY OTHER VEHICLES MOVING. THIS PARTICULAR INTERSECTION IS CONTROLLED BY A LONG SIGNAL LIGHT. I WAS AIMED STRAIGHT AHEAD, BUT WAS THE THIRD CAR BACK FROM THE STOP LINE, SIGNALING TO TURN LEFT. ALL OF A SUDDEN I HEARD WHAT SOUNDED LIKE AN AIRPLANE ENGINE ROARING, GETTING EVER LOUDER. MY FOOT WAS STILL ON THE BRAKE. THE ENGINE RACED, SURGED ABRUPTLY CAUSED MY CAR TO ACCELERATE FORCEFULLY INTO THE STOPPED CAR IN FRONT OF ME. THE CAR IN FRONT OF ME WAS PUSHED INTO AN SUV IN FRONT OF IT. THE FORCE OF IMPACT CAUSED MY ENGINE TO SHUT DOWN. THE DRIVER IN FRONT OF ME APPEARED TO HAVE A WHIPLASH INJURY. ALL TOLD, THERE WAS ABOUT \$1500.00 WORTH OF DAMAGE TO MY CAR AND IT WAS ESTIMATED THE SMALLER AND OLDER CAR IN FRONT OF ME SUSTAINED ABOUT \$2500.00 WORTH OF DAMAGE. I HAD THE CAR TOWED TO THE DEALER. THE LOCAL TOYOTA DEALER INFORMED ME THEY "FOUND NOTHING WRONG WITH THE CAR." THE CAR WAS THEN TOWED TO A SHOP FOR BODY REPAIRS. UPON THE RETURN OF MY CAMRY, IT STILL HAD A BIT OF A VIBRATORY AND AUDITORY DISTORTION THAT WAS ATYPICAL FOR THE 3 PREVIOUS YEARS. I ALSO REALIZED THAT THE BRAKES WERE BARELY WORKING. AT A RETURN VISIT TO THE DEALER, I WAS TOLD MY BRAKES WERE ALMOST "COMPLETELY GONE" AND THAT I NEEDED NEW BRAKES. HOWEVER, I AM CERTAIN THAT THE MARKED AND SUDDEN DECLINE IN MY BRAKE FUNCTION WAS A

C-468

Safety Research & Strategies

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

RESULT OF THE BRAKES ATTEMPTING TO HOLD MY CAR BACK AS THE ENGINE SURGED FORWARD. \*JB  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10145642  
Date of Incident: 20051212  
Vehicle: 2004 TOYOTA CAMRY  
Location of Incident: PHILADELPHIA, PA

**NHTSA Summary:**  
DT\*THE CONTACT STATED THE ACCELERATOR PEDAL WAS STUCK. SHE WAS PULLING OUT ONTO THE ROAD. AS SHE LIGHTLY PRESSED THE ACCELERATOR PEDAL THE VEHICLE WENT ACROSS THE ROAD AND CRASHED INTO A METAL POLE. THE FRONT END OF THE VEHICLE WAS PUSHED UNDERNEATH THE WINDSHIELD. THE CONTACT WAS WEARING THE SEAT BELT. THE AIR BAGS DEPLOYED. HOWEVER, SHE WAS TAKEN TO THE HOSPITAL WITH CHEST PAINS AND BRUISING. THE VEHICLE WAS TOWED TO A REPAIR SHOP FOR INSPECTION. A REPRESENTATIVE FROM THE MANUFACTURER WAS COMING TO THE REPAIR SHOP TO DETERMINE THE CAUSE OF THE INCIDENT. NO REPAIRS HAVE BEEN MADE. A POLICE REPORT WAS TAKEN AT THE SCENE OF THE ACCIDENT. \*AK  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10310978  
Date of Incident: 20051213  
Vehicle: 1999 LEXUS RX300  
Location of Incident: POTTSVILLE, PA

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 1999 LEXUS RX300. WHENEVER THE CONTACT WOULD ATTEMPT TO STOP THE VEHICLE AT A LOW SPEED THE CONTACT NOTICED THAT THE VEHICLE WOULD SUDDENLY SURGE FORWARD BEFORE THE BRAKES WOULD ENGAGE. THE VEHICLE WAS TAKEN TO THE DEALERSHIP WHERE THE CONTACT WAS INFORMED THAT THE VEHICLE WAS WORKING PROPERLY. THE CONTACT HAS NOTICED THE FAILURE SINCE THE DAY THE VEHICLE WAS PURCHASED. THE CURRENT AND FAILURE MILEAGES WERE 91000.  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10213267  
Date of Incident: 20051215  
Vehicle: 2004 TOYOTA TACOMA  
Location of Incident: SAINT SIMONS ISLAND, GA

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2004 TOYOTA TACOMA. WHILE DRIVING AT VARIOUS SPEEDS, THE VEHICLE WOULD DRAMATICALLY ACCELERATE WITHOUT WARNING. ALSO, WHEN APPLYING PRESSURE TO THE ACCELERATOR PEDAL, THE VEHICLE WOULD NOT ACCELERATE UNLESS THE PEDAL WAS COMPLETELY DEPRESSED TO THE FLOOR. THE DEALER STATED THAT THE MAFF AIR SENSOR WAS CAUSING THE FAILURE. THE DEALER CLEANED THE SENSOR. THE CONTACT RETURNED TO THE DEALER A WEEK LATER AND THEY STATED THAT THE CATALYTIC CONVERTER WAS MELTED AND WAS THE CAUSE OF THE FAILURE. AFTER CAREFUL INSPECTION, IT WAS DETERMINED THAT THE CONVERTER WAS NOT MELTED. A PROFESSIONAL MECHANIC STATED THAT THE

C-469

Safety Research & Strategies

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

SUPERCHARGER FOR THE ACCELERATOR PEDAL POSITIONING SENSOR WAS CAUSING THE FAILURE. THE FAILURE MILEAGE WAS 9,000 AND CURRENT MILEAGE WAS 17,000.

Toyota ID Number:  
NHTSA ODI Number: 10305222  
Date of Incident: 20051215  
Vehicle: 2005 TOYOTA SIENNA  
Location of Incident: MIDDLETOWN, DE

**NHTSA Summary:**  
TOYOTA SIENNA 2005. INTERMITTENTLY THE CAR ACCELERATES ON ITS OWN. HAS BEEN HAPPENING SINCE I BOUGHT IT. NEVER THOUGHT MUCH ABOUT IT, BECAUSE IT WOULD SLOW DOWN WHEN I BRAKED. IN LIGHT OF THE RECENT PROBLEMS WITH OTHER MODELS, I THINK THIS IS PART OF THE PROBLEM. THE CAR FEELS AS IF IT WAS ON CRUISE CONTROL, GETTING UP TO SPEED. HOWEVER, I HAVE NEVER USED CRUISE CONTROL AS I DON'T LIKE IT. IS THERE A LINK BETWEEN THE CRUISE CONTROL AND THESE PROBLEMS?  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10316841  
Date of Incident: 20051219  
Vehicle: 2005 TOYOTA AVALON  
Location of Incident: PITTSBURGH, PA

**NHTSA Summary:**  
TL\*THE CONTACT OWNS S 2005 TOYOTA AVALON. THE CONTACT WAS DRIVING APPROXIMATELY 25 MPH ON NORMAL ROAD CONDITIONS. THERE WAS A SUDDEN INCREASE OF ACCELERATION. THE DRIVER WAS ABLE TO GAIN CONTROL OF THE VEHICLE, AND CONTINUED NORMAL OPERATION. THE FAILURE OCCURRED INTERMITTENTLY AT ANY GIVEN SPEED. THE VEHICLE WAS TAKEN TO AN AUTHORIZED DEALER FOR INSPECTION. THE TECHNICIAN WAS UNABLE TO LOCATE THE PROBLEM. THE FAILURE MILEAGE WAS UNKNOWN.  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10147498  
Date of Incident: 20051222  
Vehicle: 2004 TOYOTA COROLLA  
Location of Incident: WATERTOWN, MA

**NHTSA Summary:**  
WHEN PARKING THE CAR THE CAR ATTEMPTED TO ACCELERATE ON ITS OWN. I LOOKED DOWN TO MAKE SURE MY FOOT WAS NOT ON THE GAS - MY FOOT WAS PLANTED ON THE BRAKE. I HAD TO BRAKE AS HARD AS I COULD TO KEEP THE CAR FROM REAR ENDING THE VEHICLE IN FRONT AS THE ENGINE ALL ON ITS OWN DRAGGED THE CAR FORWARD. THE CAR WAS MOVING AT ABOUT TWO MILES AN HOUR WHEN THIS TOOK PLACE. THE ENGINE REVVED UP TO 4000 RPMS WITHOUT ANY PRESSURE ON THE GAS AND SIMPLY DRAGGED THE CAR FORWARD. \*JB

Date of Incident: 20051223  
Vehicle: 2004 LEXUS ES330  
Location of Incident: SAN DIEGO, CA

**NHTSA Summary:**  
THE ACCELERATOR IN MY 2004 LEXUS ES 330 STUCK IN A CROWDED PARKING LOT AND CAUSED A COLLISION. \*NM  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10310457  
Date of Incident: 20051223  
Vehicle: 2002 TOYOTA CAMRY  
Location of Incident: NORTH KINGSTOWN, RI

**NHTSA Summary:**  
TL\*THE CONTACT PREVIOUSLY OWNED A 2002 TOYOTA CAMRY. WHILE DRIVING APPROXIMATELY 5 MPH IN REVERSE OUT OF A PARKING SPACE AND SHIFTING TO DRIVE, UNEXPECTEDLY, THERE WAS A FORCEFUL ACCELERATION. THE VEHICLE FAILED TO SLOW DOWN AND CRASHED INTO TWO UNOCCUPIED PARKED VEHICLES. THE DRIVER SUSTAINED NO INJURIES. THE POLICE WAS CALLED TO THE SCENE. THE VEHICLE WAS TOWED TO AN AUTO BODY SHOP AND REPAIRED FOR THE DAMAGES. THE CONTACT NO LONGER OWNS THE VEHICLE. THERE WAS CONCERN REGARDING THE SAFETY OF THAT YEAR, MAKE AND MODEL VEHICLE. THE FAILURE MILEAGE WAS UNKNOWN. UPDATED 03/10/10. \*LJ  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10148115  
Date of Incident: 20051227  
Vehicle: 2005 TOYOTA CAMRY  
Location of Incident: GODFREY, IL

**NHTSA Summary:**  
DT\*THE CONTACT STATED WHILE ATTEMPTING TO PULL IN A PARKING SPACE AT 2 MPH, THE VEHICLE SURGED AND SUDDENLY ACCELERATED WITHOUT WARNING. THE BRAKE PEDAL WAS DEPRESSED AT THE TIME OF THE INCIDENT. THE VEHICLE WENT THROUGH AN INTERSECTION AND OVER A PUBLIC SIDEWALK BEFORE CRASHING INTO A FIRE HYDRANT. THE CONTACT AND PASSENGER WERE WEARING SAFETY RESTRAINTS. THE VEHICLE IMPACTED THE FIRE HYDRANT WITH SUCH FORCE THAT THE FIRE HYDRANT WAS EXTRACTED 3 FEET ABOVE GROUND. THE VEHICLE WAS TOWED TO THE LOCAL DEALERSHIP WHERE DIAGNOSTIC TESTING WAS PERFORMED. THE LOCAL SERVICE DEALER COULD NOT DETERMINE THE CAUSE OF THE ACCIDENT; HOWEVER THE DEALER ADDITIONAL TESTING WILL BE PERFORMED BEFORE THE VEHICLE IS REPAIRED. THE POLICE FILED A REPORT AT THE SCENE AND THE CONTACT'S INSURANCE COMPANY ALSO FILED A REPORT. THERE WAS ADDITIONAL PROPERTY DAMAGE TO THE SIDEWALK, FIRE HYDRANT AND A CHILDREN'S MUSEUM THAT WAS FLOODED BY THE WATER FROM THE FIRE HYDRANT. \*NM. UPDATED 2/27/2006 - THE AIR BAGS ALSO FAILED TO DEPLOY. \*NM

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

C-471

Location of Incident: HAYMARKET, VA

**NHTSA Summary:**  
EVER SINCE I PURCHASED THE CAR IN LATE 2005, MY 2006 LEXUS RX 400H HYBRID SUV WILL LOSE BRAKING EFFORT WHEN GOING OVER A BUMP. I HAVE PRESS HARDER ON THE BRAKE PEDAL TO MAINTAIN BRAKING FORCE TO STOP THE CAR WHEN THIS HAPPENS. THIS HAPPENS EVERY TIME YOU GO OVER A CERTAIN TYPE OF BUMP WHEN THE BRAKES ARE BEING APPLIED. THERE IS NO LIGHT OR WARNING SOUND ASSOCIATED WITH THE LOSS OF BRAKING EFFORT. IF IT POSSIBLE TO SAFELY REMOVE YOUR FOOT FROM THE BRAKE PEDAL OR A SECOND, AND THEN RE-APPLY THE BRAKES, THE BRAKES ARE RESTORED TO NORMAL OPERATION. VILIGINCE IS REQUIRED IN INCREASING BRAKE PEDAL PRESSURE WHEN THIS HAPPENS TO AVOID A CRASH. I HAVE TO COMPLAINED TO SEVERAL LEXUS DEALERS AND TO LEXUS CENTRAL CUSTOMER SERVICE ABOUT THIS ISSUE. I WAS TOLD THE COMPANY NEVER RECIEVED ANY COMPLAINTS ABOUT THE PROBLEM AND/OR WAS NEVER ABLE TO REPRODUCE THE PROBLEM IN MY CAR.  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10308489  
Date of Incident: 20051228  
Vehicle: 2006 TOYOTA AVALON  
Location of Incident: OMAHA, NE

**NHTSA Summary:**  
THE FIRST WEEK I OWNED THE CAR I NOTICED A HESITATION IN THE ACCELERATOR FOLLOWED BY A LURCHING FORWARD. TOOK IT TO DEALER WHO SAID IT WAS CAUSED BY THE DRIVE BY WIRE SYSTEM AND WOULD ADJUST TO MY DRIVING IN TIME. NO ADJUSTMENT OCCURRED. I CONTINUED TO MAKE COMPLAINTS TO NO AVAIL UNTIL I THREATENTED WRITE TO NHTSA. THEY THEN SAID "WAIT, DON'T DO THAT. WE'LL TALK TO THE SERVICE MANAGER TO SEE IF HE HAS A FIX. WITHIN 30 MINUTES THEY HAD RECALIBRATED THE ENGINE CONTROL MODULE/ECM (SAE TERM. POWERTRAIN CONTROL MODULE/PCM). WARRANTY INFORMATION WAS: OP CODE EG7023; DESCRIPTION RECLIBRATE EMC (PCM); TIME 0.9; OEP 89661-####; T1 26; T2 99. THE RESULTS WERE GOOD ALTHOUGH I SOMETIMES STILL FEEL ALMOST UNDETECTABLE SMALL SURGES WHEN I AM DRIVING AS IF I AM NOT REALLY CONTROLLING THE SPEED WITH THE ACCELERATOR. BY THE WAY, I HAD REPORTED THIS TWICE BEFORE AND WHEN I READ THROUGH ALL OF THE 2006 AVALON REPORTS MINE WAS NOT THERE. ARE THE REPORTS DELETED AFTER A PERIOD OF TIME?  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10146714  
Date of Incident: 20051229  
Vehicle: 2004 TOYOTA TACOMA  
Location of Incident: SARATOGA, CA

**NHTSA Summary:**  
AFTER SHIFTING FROM SECOND GEAR TO THIRD GEAR, THE GAS PEDAL STOPPED WORKING COMPLETELY. SECONDS LATER IT FUNCTIONED NORMALLY, AND AS IF NOTHING HAD HAPPENED. THIS HAS HAPPENED BEFORE, AND I HAVE IDENTIFIED THE PROBLEM AS A FAILURE OF THE THROTTLE BODY MOTOR/SENSOR. I WILL BE ASKING THE TOYOTA DEALERSHIP TO FIX THE PART. \*JB

**NHTSA ODI Number:** 10303212  
**Date of Incident:** 20051229  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** STOCKTON, NJ

**NHTSA Summary:**  
WHILE DRIVING TO WORK IN A TOYOTA CAMRY 2002, THE CAR IN FRONT OF ME SLOWED DOWN AND STOPPED FOR A RED LIGHT. BELIEVING THAT I HAD ENOUGH ROOM TO STOP MY TOYOTA CAMRY SAFELY I APPLIED MY BRAKES BUT THE CAR DID NOT SLOW DOWN AND HIT THE CAR IN FRONT OF ME. THERE WAS MINOR DAMAGE TO THE VEHICLE THAT WAS STRUCK BUT MY TOYOTA CAMRY WAS TOTALED. THE ROAD CONDITION WAS WET FROM RAIN BUT NOT UNSAFE TO DRIVE. I FULLY BELIEVE THAT I WAS APPLYING THE BRAKES WITH ENOUGH PRESSURE TO SAFELY STOP THE CAR BEFORE HITTING THE VEHICLE IN FRONT OF ME BUT MY TOYOTA CAMRY VEHICLE DID NOT STOP OR SLOW DOWN. PLEASE NOTE THAT TRAFFIC ACCIDENT HAPPENED ON DECEMBER 29, 2005. A POLICE REPORT WAS FILED AND ON FILE. I DID NOT RECEIVE A TICKET. ORIGINALLY I THOUGHT IT WAS JUST AN ACCIDENT UNTIL THE JANUARY 2010 RECALL OF CERTAIN MODEL YEAR TOYOTAS WITH THE ACCELERATOR STICKING. \*TR  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10146664; 10146657  
**Date of Incident:** 20051230  
**Vehicle:** 2004 TOYOTA TACOMA  
**Location of Incident:** DOTHAN, AL

**NHTSA Summary:**  
2004 TOYOTA TACOMA 4X4 WITH 3.4L ENGINE AND MANUAL TRANS. HAVING THROTTLE BODY ISSUES. THE ACCELERATOR POSITION SENSOR IS FAILING CAUSING THE TRUCK TO STALL FOR A SECOND AND THEN PICK BACK UP. TRUCK DOES NOT THROW A CHECK ENGINE CODE WHEN THIS OCCURS, SO DEALER HAS INFORMED ME ON DIFFERENT OCCASIONS THAT NOTHING IS WRONG. I WAS ALMOST RAN OVER THE OTHER DAY TRYING TO PULL OUT INTO TRAFFIC WHEN THE THROTTLE BODY FAILED. THIS IS A SAFETY CONCERN AND TOYOTA NEEDS TO ADDRESS IT IMMEDIATELY!!!!!! WHAT'S IT GOING TO TAKE, SOMEONE GETTING SERIOUSLY INJURED OR A HEALTHY LOW SUIT FOR TOYOTA TO TAKE ACTION? \*JB; I HAVE A 2004 TOYOTA TACOMA 4X4 WITH A 3.4 LITER V6. I HAVE ALREADY FILED 1 COMPLAINT BUT IN FRUSTRATION WILL TRY THIS AGAIN. THE ELECTRONIC THROTTLE BODIES THAT COME ON 2003 AND 2004 TOYOTA TACOMAS ARE FLAWED AND NEED TO BE INVESTIGATED AND RECALLED DUE TO SAFETY CONCERNS. THE PROBLEMS THAT THE ACCELERATOR POSITION SENSORS ON THESE THROTTLE BODIES ARE GOING OUT, CAUSING THE ACCELERATOR TO BECOME USELESS UNLESS DEPRESSED GREATER THAN 60%. I HAVE ALL MOST BEEN IN 2 ACCIDENTS WHILE PULLING OUT INTO TRAFFIC AND HAVING THIS OCCUR. WHEN THE SENSOR FAILS THE THROTTLE VALVE CLOSES LEAVING THE PERSON DRIVING THE VEHICLE WITHOUT ENOUGH ACCELERATION TO GET OUT OF THE WAY OF ON COMING TRAFFIC. IN VEHICLES WITH MANUAL TRANSMISSION IT IS ESPECIALLY DANGEROUS WHEN ON AN INCLINE (VERY DIFFICULT NOT TO ROLE BACKWARDS AND HIT SOMETHING BEHIND YOU). ALSO, NO CHECK ENGINE LIGHT HAS CAME ON WHEN THIS HAS OCCURRED. I HAVE READ HUNDREDS OF LETTERS ON THE INTERNET FROM PEOPLE HAVING THE SAME PROBLEM. IS IT GOING TO TAKE SOMEONE GETTING KILLED OR A HEALTHY LAW SUIT TO MAKE TOYOTA TAKE ACTION? \*NM

**NTHTSA Summary:**  
\*\*\* PHONE LOG 06/19/2006 02:44:04 PM KTran  
Caller (ANdrew, husband) states: when purchased veh at 1500 mi. veh experienced vibration problem. Sts took to dlr & dlr balanced tire. Sts had to take back to dlr b/c veh still vibrated, dlr put in new tires. At 1800-2K mi., transmission made whining noise & when veh came to stop, it made a gurgling rumbling sound. Caller took to dlr & dlr replaced w/reconditioned transmission. Next morning, caller sts veh smelled like fluid leaking. >>>  
\*\*\* NOTES 06/19/2006 02:44:37 PM KTran  
<<<Caller went back to dlr - dlr fixed loose line & checked fluid. 3 days afterwards, caller went on 200 mi. vacation. Sts experiencing issue w/transmission. When veh comes to dead stop & brakes are applied, it feels like it jumps in & out of gear but it doesn't come out of gear in selector. Veh lunges forward so that wife thought veh was hit from behind. Also, intermittently as it jumps in & out of gear, it makes a crunching, clankity noise in transmission. >>>  
\*\*\* NOTES 06/19/2006 02:46:01 PM KTran  
<<<Caller sts: Came back home & brought to dlr, dlr sts weird & called Toy tech service. Toy said do a reverse flush. They did that & it was okay at first but it made some hissing noise in between gears but it was okay for a couple of weeks - now jumping & lunging out of gears again, but worse than 1st time. Veh at dlr now. Dlr sts will probably have to put in another transmission but GM & SM out of town. >>>  
\*\*\* NOTES 06/19/2006 02:47:55 PM KTran  
<<<Caller sts: Roger, service personnel rode in truck & experienced issue. Caller sts would like Toy to take truck back & get new one. Sts they are a Toy family - has owned 1993 & owns 1999 Camry & used 1997 Camry. Sts wanted to buy less expensive Chevy truck but wife knew he wanted the Toy truck &

If the customer is seeking additional recourse, please have him contact TMS executive office of CEC at 310-468-2442. Please let the customer know NOT to e-mail the DOM or FTS any longer. They can not offer any assistance.

\*\*\* PHONE LOG 08/31/2006 04:28:47 PM JFewel  
 RNT#060830-000310  
 Email states: "On Sunday, 8/27/2006, I was driving on I385 at 70 mph and on cruise control in my 2006 Tacoma Access Cab. When I crossed the US 276 bridge with its very slight incline and curve, the engine surged to 4500+ RPM. The surge was so abrupt that the vehicle almost went out of control by swerving and headed toward the bridge railing."  
 ...  
 \*\*\* NOTES 08/31/2006 04:32:17 PM JFewel  
 ...I was able to regain control by tapping the brakes and disconnecting the cruise control. Had the road been slightly wet, it is any one's guess if I would have been able to avoid an accident. Since that incident, I do not think it is safe to use the cruise control.  
 I have been told that this condition occurs normally on the 2006 Tacoma and Matrix models with 4 cylinders engines, it is hard to believe that Toyota would build vehicles that can induce a skid and would  
 \*\*\* NOTES 08/31/2006 04:32:39 PM JFewel  
 ...go to two gears lower at 70 MPH. The potential for a catastrophic accident is very high. As a Professional Engineer who spent many years concerned with industrial safety in my many projects involving industrial operations, I would classify this as an extremely hazardous situation.  
 Additionally, the potential for severe damage to the engine and drive train is also unacceptable when an engine and gear train turning 2100 RPM suddenly accelerate to 5100 RPM. I have  
 \*\*\* NOTES 08/31/2006 04:32:56 PM JFewel  
 ...personally observed this to occur on my Tacoma. As a Physics teacher, I can only speculate the pressures the automatic transmission and torque loads the engine and drive train will see.  
 This over speed condition does not occur when I drive the truck manually on the same road and at the same speed. Since you say it occurs on all Tacoma and Matrix 4 cylinder models under cruise control, I can only conclude that the electronic programming is at fault.  
 Currently there  
 \*\*\* NOTES 08/31/2006 04:33:18 PM JFewel  
 ...are six late model Toyotas in my extended family. This includes 2 Corollas, 3 Camrys and the Tacoma. All have 4 cylinder models and none, except the Tacoma, exhibits this sudden surge phenomena. Even in the Tacoma, this sudden surge phenomenon does not occur below 60 mph.

C-481

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

At this point, I must state that I fully believe that the dealer that sold me the vehicle has made a bona fide effort to correct the problem. The fault, therefore, must be at the factory and I  
 \*\*\* NOTES 08/31/2006 04:33:44 PM JFewel  
 ...fully believe that the dealer that sold me the vehicle has made a bona fide effort to correct the problem. The fault, therefore, must be at the factory and I fully expect to discuss this situation with The Tacoma Factory Representative when she comes in the next few weeks as you and Tommy Norris promised. This is the ninth Toyota dating back to a 1972 used one, which my wife and I have owned in the past several years. It is the first one where the engineering  
 \*\*\* NOTES 08/31/2006 04:33:59 PM JFewel  
 ...quality has disappointed me. I trust that Toyota will resolve this problem."

\*\*\* SUBCASE 200608311374-1 CREATED 08/31/2006 04:35:40 PM JFewel  
 Thank you for contacting Toyota Motor Sales, U.S.A., Inc.  
 We apologize for your concern regarding the cruise control of your 2006 Tacoma.  
 In order to properly assess your concerns, we have contacted the Customer Relations Manager at Toyota Of Easley to further evaluate your Tacoma.  
 Toyota dealership technicians are specialized in the diagnosis and repair of Toyota vehicles. They are provided with extensive training and have access to state-of-the-art equipment to help in the accurate diagnosis of your vehicle. Also, if necessary, we provide additional support to assist Toyota dealership technicians in resolving unusual vehicle concerns.  
 The Customer Relations Manager will contact you by the end of the business day, Wednesday, September 6, 2006. In the event you do not receive any contact from the dealership by this date, please contact us < http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enuser/std\_ad.php?p\_faqid=4164+ with file #Sincidents.c&clarifycasenumber.

\*\*\* NOTES 11/27/2006 02:00:31 PM AParks500  
 Customer wrote letter to Ken Czubay at SET Region. I called customer today on behalf of Mr. Czubay and the conversation was as follows:

C-482

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

Here is a brief summary of the conversation that we had today. I called you this afternoon and advised that I was calling on behalf of Mr. Czubay whom you had sent a letter to here at Southeast Toyota. I advised that I had read through your letter to and saw the testing that you had done on your 2006 Tacoma. You advised that you had  
 \*\*\* NOTES 11/27/2006 02:01:10 PM AParks500  
 already spoke with the executive offices there with no results and that you would write to Mr. Czubay at his home address if something would get done. I advised you again that Mr. Czubay had forwarded the letter to me and the result would be the same. You repeatedly said that we have a "smoking gun" on our hands and that someone will get hurt if Toyota does not change the design of this vehicle. You also advised that you know the vehicle is operating as designed but  
 \*\*\* NOTES 11/27/2006 02:01:27 PM AParks500  
 believe that there is a flaw in the design that needs to be changed. I advised you that this cannot be done at the distributor level and that you need to address this with Toyota Motor Sales and their technical or legal departments. You advised you will be writing a letter to Jim Press before the end of the week and will be filing a complaint to NHTSA on January 4. You said that he cannot let this go and have someone get hurt as nothing is being done - the Code of Ethics  
 \*\*\* NOTES 11/27/2006 02:01:43 PM AParks500  
 for Professional Engineers requires you to do so. I confirmed the Toyota's corporate address with you and our conversation ended.  
 \*\*\* NOTES 12/19/2006 06:05:38 AM MZimmerman  
 ATF--letter dated 11/30/06, letter received 12/18/06  
 Mr. Eaton sts the same concerns as above. Mr. Eaton sts he is not satisfied with the cruise control in his vehicle and feels it is dangerous. Mr. Eaton sts when the cruise control engages it causes the rpm's to increase and the vehicle tends to swerve from the force. Mr. Eaton sts the DSPM and FTS have inspected his vehicle and determined there is no concern and the vehicle is operating as designed. Mr. Eaton sts he  
 \*\*\* NOTES 12/19/2006 06:05:38 AM MZimmerman  
 understands that his vehicle is operating as designed and feels the design of the vehicle is flawed. Exec Offices is not responding to Mr. Eaton at this time since his concerns have already been addressed by Exec Offices.,

 Previous case # 200706270019. Mr. Eaton sts concern with the cruise control in his vehicle. Mr. Eaton sts he spoke with Exec Offices after vehicle was inspected by dealer and was advised the vehicle is operating as designed and no repair can be performed. Mr. Eaton sts he understands that the vehicle is operating as designed, but feels the design should be modified. Mr. Eaton sts the cruise control in his vehicle

\*\*\* PHONE LOG 11/13/2007 11:52:03 AM MZimmerman Action Type: Incoming call  
 downshifts between 60 and 78 mph. Mr. Eaton sts he feels the cruise control is unsafe, increases fuel consumption, places a heavy load on the drivetrain components, and creates a noisy and uncomfortable ride. Mr. Eaton sts he has rented several US brand vehicles and none of them have a concern with the cruise control, although their quality is not as good as his vehicle.

\*\*\* PHONE LOG 11/14/2007 03:00:51 PM MZimmerman Action Type: Outgoing call  
 Exec Offices spoke with CEC tech who advised there are no updates to the cruise control and it is operating as designed. Exec Offices recommended Mr. Eaton bring the vehicle back to the dealer if he feels the concern worsens. Mr. Eaton sts he understands that the vehicle is operating as designed and feels Toyota should change the design. Mr. Eaton seeks to know Toyota's position in regards to his concern. Exec Offices advised Mr. Eaton that Toyota's position has not changed and no repair or modification can be performed because the vehicle is operating as designed. Mr. Eaton understood, but advised he is still dissatisfied. Mr. Eaton sts he plans to contact Consumer Affairs and the BBB.

\*\*\* CASE CLOSE 11/14/2007 03:04:22 PM MZimmerman  
 ===SUMMARY OF TMC MANAGEMENT-KATSUAKI WATANABE-0033985-03===  
 1) States concern with vehicle downshifting hard when cruise control is engaged.

C-483

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

2) Seeks permanent repair of cruise control concern.  
 3) Exec Offices connected with Mr. Eaton after speaking with CEC tech. Exec Offices advised Mr. Eaton that, per CEC tech, there are no updates or modifications that can be made to his cruise control at this time. Exec Offices recommended Mr. Eaton bring his vehicle back to the dealer if he feels the concern is getting worse  
 4) Customer satisfied: No  
 5) Root cause: Product--vehicle downshifts hard when cruise control is engaged.

\*\*\* PHONE LOG 06/04/2007 08:38:30 AM MZimmerman  
 ===TMC MANAGEMENT-KATSUAKI WATANABE-0033985-01===  
 Previous case # 200608311374. Mr. Eaton sts he has owned Toyota vehicles for 30 years. Mr. Eaton sts he has been happy with all of his vehicle except for the most recent Tacoma. Mr. Eaton sts he feels the vehicle is unsafe and feels Toyota should do something to improve the design. Mr. Eaton sts the vehicle will downshift as low as 2nd gear when in cruise control. Mr. Eaton sts he has been traveling at 70 mph and the

\*\*\* PHONE LOG 06/04/2007 08:38:33 AM MZimmerman Action Type: Incoming call  
 vehicle will downshift causing it to swerve. Mr. Eaton sts she has almost lost control of his vehicle because of the shift feel. Mr. Eaton sts he is also dissatisfied that the locks do not lock on their own. Mr. Eaton sts he feels this is a safety concern and feels it makes it easier for carjackers to steal his vehicle.

\*\*\* PHONE LOG 06/04/2007 08:40:08 AM MZimmerman Action Type: Outgoing call  
 Exec Offices called Mr. Eaton and l/m with Mrs. Eaton for her husband to call back.

\*\*\* PHONE LOG 06/04/2007 02:05:13 PM MZimmerman Action Type: Outgoing call  
 Exec Offices returned call from Mr. Eaton who advised he is very dissatisfied with the way his vehicle operates when in cruise control. Mr. Eaton sts he feels the vehicle is unsafe. Mr. Eaton sts he rented 3 American made vehicles and the cruise control was very smooth. Mr. Eaton sts his son purchased an 07 Tacoma and he advised the cruise control is smooth. Mr. Eaton sts he feels the design of the cruise control in his vehicle is bad. Mr. Eaton sts he doesn't feel there is a manufacturing caused issue with the vehicle and understands the concern is design related. Mr. Eaton sts he feels the technology in the 07 should be applied to his vehicle. Mr. Eaton sts the last time the vehicle was inspected was in October 2006. Mr. Eaton sts he feels the concern has gotten worse since the last inspection. Exec Offices apologized and advised Mr. Eaton that as of 10/2006 and DSPM and FTS inspected the vehicle and determined it was operating as designed. Exec Offices recommended Mr. Eaton bring his vehicle back to the dealer if he feels the concern is getting worse. Mr. Eaton sts he plans to bring the vehicle to the dealer at the end of the week and will follow-up with Exec Offices to advise of the outcome.

\*\*\* PHONE LOG 06/06/2007 07:07:05 AM MZimmerman Action Type: Incoming call  
 Exec Offices received the following email from Mr. Eaton:  
 Thank you for your call at 4:24 today, 6/4/2007  
 Please let me reiterate my notes from the conversation.  
 The conversation started with me getting the impression that Toyota Motor Sales was not going to do much, if anything, about the design problem with the factory installed cruise control. I pointed out that the following conditions still exist:  
 1. The cruise control is abrupt, and exceedingly rough when going up slight hills at speeds above 60 mph (96.54 Km/hr).  
 2. The way the system is designed, it will allow the transmission to downshift as far as 2nd gear at speeds above 60 mph (96.54 Km/hr).  
 3. Engine RPM can surge to as high as 5,100 during this process.  
 4. In my opinion, the resultant surge can cause excess torque loads on the drive train components.  
 5. The resultant surge can, and has, caused my truck to swerve.  
 6. There is no question that the truck behaves according to design. Therefore it can be concluded that the design if faulty.  
 7. A trace of the computer control shows that the vehicle downshifts before fuel is added.

C-484

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

8. Discussions with other owners indicate that this condition has existed on Tacomas since at least 2004 and the Tundra. While I have not personally checked this out, owners of those vehicles have told me they have the same problem.

9. Two copies of all the correspondence on this has been provided to Toyota Motor Sales without action.

10. The surge also increases fuel consumption when under cruise control.

11. The problem has become worse. I used to overcome it by adding fuel before the hills but this has become more difficult.

12. The doors will still not lock automatically as in other vehicles.

I have rented 3 different US branded vehicles recently, a Ford Fiesta, a Chrysler Grand Caravan and a Chevrolet Cobalt. None can match the mechanical quality or features of my Toyota's. All had better cruise controls than my Tacoma's. I have been driving for many years and have never used a cruise control as bad as this one in the Tacoma. Come to think about it, I can not even remember riding in any vehicle with a cruise control as bad as this.

My son-in-law owns a 2007 Tacoma SR5 with the same engine and drive train. He tells me that he has not experienced the surge. Why cannot the software be loaded on the 2006 models? He also gets better fuel economy.

You asked that I take my truck to Toyota of Easley again to see if they had ant bulletins on the subject. I called Tommy Norris, the owner, to make an appointment. He requested that you tell him what to do before I make the 40 mile roundtrip. Please do so by return email to us both.

As I stated, this matter will not go away. You do have a smoking gun out there if the surge causes a Tacoma operator to lose control and a large pileup occurs.

Again thank you for calling and your prompt reply to this email.

\*\*\* PHONE LOG 06/06/2007 07:07:07 AM MZimmerman Action Type: Outgoing call  
Exec Offices called the dealer and I/m for Thomas Norris, DP, to call back.

\*\*\* PHONE LOG 06/06/2007 07:09:10 AM MZimmerman Action Type: Outgoing call  
Exec Offices sent the following email to Mr. Eaton:  
Hi Mr. Eaton,  
I have left a message for Tommy to call me back so we can discuss the concerns you are having with your vehicle. I will follow-up with you after speaking with him.

\*\*\* PHONE LOG 06/06/2007 08:58:54 AM MZimmerman Action Type: Outgoing call  
Exec Offices returned call from the DP, Tommy Norris. Tommy sts he doesn't believe there is a fix for the concern Mr. Eaton is experiencing. Tommy sts he has been able to duplicate the shift feel, but has been advised by Toyota it is a normal characteristic of the vehicle. Tommy recommended Exec Offices speak with the service manager, Mike Bishop. Mike sts he has been in contact with the DSPM and TAS and they have both advised there are no updates that can be performed on the vehicle. Mike sts the vehicle downshifts very hard when cruise control is engaged. Mike sts he has experienced a similar feel in other 06 Tacomas. Mike sts there doesn't appear to be a repair for the shift feel and according to the DSPM and FTS it is a normal characteristic of the vehicle. Mike sts if Exec Offices needs to connect with him in the future he can be reached at 864-505-1291. Exec Offices thanked Mike for the info and assistance.

\*\*\* PHONE LOG 06/06/2007 11:02:43 AM MZimmerman Action Type: Outgoing call  
Exec Offices spoke with CEC tech who advised there are no updates for a hard downshift when cruise control is engaged. CEC tech advised it is normal for the vehicle to downshift hard when going uphill because the vehicle will do what it needs to in order to maintain the speed set by cruise control.

\*\*\* PHONE LOG 06/06/2007 11:03:56 AM MZimmerman Action Type: Outgoing call  
Exec Offices called the dealer and spoke with the service manager, Mike. Mike confirmed that Mr. Eaton experiences the downshifting concern when traveling up hill. Mike recommended Mr. Eaton bring the vehicle back in for an inspection if he feels the concern has gotten worse.

\*\*\* PHONE LOG 06/06/2007 11:04:09 AM MZimmerman Action Type: Outgoing call  
Exec Offices called Mr. Eaton and I/m on v/m for call back.

C-485

**Safety Research & Strategies**  
*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

\*\*\* PHONE LOG 06/06/2007 02:14:12 PM MZimmerman Action Type: Incoming call  
Exec Offices received the following email from Mr. Eaton:  
I have made an appointment with Toyota of Easley to have my 2006 Tacoma inspected again next Friday, 4/8/2007.  
In the meantime, I strongly suggest that you take this matter up with the Toyota Engineering Department and not some person in your department.  
I will advise you when I have results of any testing. I would also test drive a 2007.  
I still cannot believe your answer was from Toyota. I would expect it from Ford, Chrysler or General Motors.

\*\*\* PHONE LOG 06/06/2007 02:45:28 PM MZimmerman Action Type: Incoming call  
Exec Offices received the following email from Mr. Eaton:  
Ms Zimmerman:  
I am absolutely incredulous that Toyota will allow your statement to be the final answer.  
Nor can I believe that a company that advertises so heavily on its engineering expertise would actually design in the rough action by a factory installed accessory. I will personally test a 2007 Tacoma to see if the problem exists there. If it does not, then it either has been engineered out or my vehicle is defective. I will again call Toyota of Easley and make an appointment to get my vehicle checked.  
In my opinion your company has either sold me a defective vehicle and failed to fix it under warranty or is in breach of contract in selling a vehicle with a mis-designed component while promising a smooth, efficient operation. I would urge you to contact your Engineering Division for a fix.  
This problem will not go away.  
Again, thank you for your prompt response.

\*\*\* PHONE LOG 06/12/2007 06:03:44 AM MZimmerman Action Type: Incoming call  
Exec Offices received the following email from Mr. Eaton:  
On Friday, 6/8/2007, I took my 2006 Toyota to Toyota of Easley for a further check as you requested. Again the service personnel there did their usual, very professional job. The vehicle was driven over the same road as before with the following results:  
1. The same surge caused by the downshift into 2nd gear remains but can no longer be overridden by adding gas if the cruise control is already in the act of downshifting and the sudden surge to 5100 RPM occurs. Formally I could override to prevent the surge.  
2. A brand new 2007 Tacoma with the same engine drive train does the same thing as mine under the exact same conditions.  
3. The downshift to second gear does not occur at below 60 Mph (96 Km/Hr) or above 78 mph (125 Km/Hr) and the cruise control is much smoother then in the 60 mph (96 Km/Hr) to 78 mph (125 Km/Hr) range.  
4. A check of the computer shows that all system components were within design limits.  
I have read your emails and listened to the voice message you left on my answering machine. I am getting the impression that you are trying to tell me that since the vehicle is operating as Toyota designed it, you can do nothing. I sincerely hope that I am misunderstanding what you are trying to say. I cannot believe that a major automotive company cannot correct their own mistakes. The design is bad. If you, personally, cannot do anything then I suggest that you send the problem to someone in your organization that can. Toyota created the problem so they should be able to correct it.  
The design is defective in the following areas:  
1. The sudden surge to 5100 rpm can cause catastrophic loss of control. Does someone have to die or be seriously injured before Toyota does something about the problem?  
2. Fuel consumption is increased greatly when these surges occur.  
3. No power train components can withstand the very high torque loads generated by these surge loads for very long without some damage. It amazes me that any Automotive Design Engineer would automatically have a transmission downshift to second gear at any speed above 40 mph (64 Km/Hr) unless it was being used manually as a brake on a very steep down grade.  
4. The surges cause a very uncomfortable ride with very high noise levels to the operator.

C-486

**Safety Research & Strategies**  
*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

As I have stated before, this series of Toyota has the worst cruise control I have ever used since they became popular in the 70's. In the last three months I have personally compared it with the ones available in the Ford Fiesta, Chrysler Grand Caravan and Chevrolet Cobalt driven over the same roads as my vehicle. I consider these vehicles inferior to any Toyota except in the cruise control. There they are all far superior. Please advise me as to what Toyota is going to do to correct their own design problem.

\*\*\* PHONE LOG 06/12/2007 06:54:12 AM MZimmerman Action Type: Outgoing call  
Exec Offices called Mr. Eaton and I/m on v/m for call back.

\*\*\* PHONE LOG 06/13/2007 01:18:51 PM MZimmerman Action Type: Outgoing call  
Exec Offices returned call from Mr. Eaton. Exec Offices advised Mr. Eaton that it appears the dealer has inspected his vehicle and determined it is operating as designed. Mr. Eaton sts he is dissatisfied with Toyota's response and plans to contact the news and newspapers. Mr. Eaton sts he will continue to pursue his case until Toyota chooses to redesign the cruise control to meet his satisfaction.

\*\*\* CASE CLOSE 06/13/2007 01:21:43 PM MZimmerman  
—SUMMARY OF TMC MANAGEMENT-KATSUAKI WATANABE-0033985-01—  
1) States concern with a hard downshift when cruise control is engaged and he is traveling up hill.  
2) Seeks permanent repair of cruise control concern.  
3) Exec Offices arranged for the dealer to inspect Mr. Eaton's vehicle again. Exec Offices connected with Mr. Eaton after the inspection and advised it appears the vehicle is operating as designed and all systems were within specs. Mr. Eaton sts he plans to continue to pursue his case outside Toyota.  
4) Customer satisfied: No  
5) Root cause: Product—rough downshift when cruise control is engaged.

+++OUTGOING CUSTOMER CALL+++  
CM called & spoke with Mr. & Mrs. Schultz, who advised as previously noted, no collision or injuries, & advised no previous or subsequent occurrences. Customer states took vehicle in to dlr#1 & was advised no concerns with vehicle. Customer extremely concerned & seeks further assistance from Toyota to identify cause of occurrence. CM apologized & advised CM will research with dealer & Region & contact customer after 2:00 PM on Friday, per customer's request, to discuss further recommendations. Customer agreed & thanked. CM advised CM's name, working hours & 800-331-4331 x73090. CM offered CM email survey after case completed, customer declined. CM understood & thanked. Customer thanked.

\*\*\* PHONE LOG 10/05/2006 11:10:02 AM KSides Action Type: Outgoing call  
+++OUTGOING DEALER CALL+++  
CM called John Elway's Crown Toyota, dlr#1, & spoke with Nancy King, Service Manager, who advised customer in to dlr#1 for self-acceleration concerns as follows:  
9/30/06 (ROI#519994) at 13.216 miles, concerned that vehicle self-accelerated while driving. SM advised dealer unable to duplicate & feels possibly driver error.

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

C-494

SM advised customer's vehicle still at dlr#1, advised FTS will be at dlr#1 tomorrow & SM will ensure FTS inspects/road-tests customer's vehicle personally. CM understood & thanked, advised CM will follow up with SM tomorrow PM to verify outcome of FTS inspection. SM understood & thanked. CM thanked.  
+++OUTGOING CUSTOMER CALL+++  
CM called & spoke with Mr. Raymond Schultz, advised CM spoke with SM & FTS will be inspecting vehicle tomorrow in an attempt to duplicate or identify concern. CM advised if FTS has not further recommendations based on his findings, Toyota would concur. Customer states if unable to determine cause of concern, customer will no longer want vehicle. CM understood & advised ARB for manufacturer's defects that have been duplicated or identified, however customer can opt to file for ARB for arbitrator to review case & make their independent recommendations. Customer understood & thanked, advised will wait until tomorrow to determine further customer seeks. CM understood. Customer states wishes to add that the back-seat passengers reported feeling a jerking motion just prior to self-acceleration experience. CM thanked & advised documented for case reference. CM advised will follow up with dealer & customer by eob tomorrow with status.  
\*\*\* NOTES 10/05/2006 11:12:21 AM BWilson  
Mr. Schultz called for KSides, but unavail. Ncr adv will revc w/in 1 bus day.

\*\*\* PHONE LOG 10/05/2006 11:17:31 AM KSides Action Type: Outgoing call  
+++OUTGOING CUSTOMER CALL+++  
CM called & spoke with Mr. Raymond Schultz, who advised seeks to know how many cases like customer's have come in. CM apologized & advised all cases are documented & coded, & are then made available for query to technical & other divisions within TMS. CM advised if any division determines a commonality or need for adjustment or ssc, they will issue that. CM confirmed no TSB's or SSC's have been issued on customer's model & MY of vehicle, but advised customer's experience is available for query as noted above. Customer understood & thanked. CM thanked.

\*\*\* PHONE LOG 10/06/2006 04:06:47 PM KSides Action Type: Incoming call  
+++INCOMING CUSTOMER CALL+++  
CM received a call from Mr. Raymond Schultz, who advised had left a message a few hours ago for Danny, who he was told was taking care of customer's vehicle, but has not received a call back & seeks status. Customer states also seeks for dealer to wash & detail vehicle prior to returning it to customer. Customer seeks return call from CM with status at home# 951-277-4197. CM apologized & advised CM will research status & contact customer shortly. Customer thanked.  
+++OUTGOING DEALER CALL+++  
CM called dlr#1 & was advised SM no longer at dealer today & was transferred to ASM, Jeff Wade. CM spoke with ASM, who advised personally spoke with customer about 1 hour ago. FTS advised floor mat out of the hook & not secured, no other concerns determined after 26 miles of road-testing, no trouble codes in system & vehicle working as designed. CM understood & thanked, advised CM will provide Toyota's position to customer & advise customer that if symptoms return & dealer is able to duplicate them, then at that time they will address further. ASM understood, agreed & thanked. CM thanked & advised customer seeks for dealer to wash & detail his vehicle prior to returning it to customer. ASM advised dealer will wash customer's vehicle, as all serviced vehicles, but will not be providing detailing services. CM understood & thanked. ASM thanked.  
+++OUTGOING CUSTOMER CALL+++  
CM called & spoke with Mr. Raymond Schultz at home#, advised as per ASM & FTS, advised at this time, as no codes or duplications, Toyota unable to provide any further recommendations. CM advised if any further symptoms or questions, customer can contact CM directly or have vehicle towed to dlr#1 for inspection & further assistance. Customer understood & thanked. CM thanked.

\*\*\* PHONE LOG 02/16/2006 12:24:21 PM LCastillo Action Type: Outgoing call  
 OUTGOING CUSTOMER CALL:  
 Customer at times vehicle rpms flare in between shifts as soon as there is no load on the engine, in between shifts it also hangs 250-300 rpm, vehicle also bulks & shatters. Customer states concern has only been written 1x at dlr but the 1st he took veh to dlr nothing was ever written down. Dlr adv cust to give veh some time so that ecu gets used to customer's driving style. Cust sts when veh is cold and starts engine the engine rpm drops but as soon as the temp gauge comes up and all functions take place the rpms begin to hang. Cust sts at 3k miles took veh to dlr and Steve adv that are some parameters that they can change on manual trans and dlr reset every thing back to zero which is the baseline parameter. Customer states this weekend will be driving other competitors with fly-by wire. Customer seeks for flaring, shattering and hanging of RPMS repaired, also if he tries to shift hard the vehicle will buck and surge, head jerks back and forth this concerns occurs all the time.  
 customer states spoke with C.J. SM Ncr adv cust will need to research further with dealer and regional office and will f/u by tomorrow. Customer understood.

 \*\*\* PHONE LOG 08/02/2006 07:40:36 AM DHoffman1  
 RNT: 060724-000015  
 EMAIL VERBATIM: I am writing to express my overall displeasure with your product and overall customer experience. I originally purchased my 2005 Toyota Tacoma largely based on Toyota's reputation for overall quality. So far during my 6 months of ownership, I have failed to see the quality in either the

C-503

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

product or the customer service. What I find most annoying is how readily your dealerships ? my only gateway to you ? ....  
 \*\*\* NOTES 08/02/2006 07:41:03 AM DHoffman1  
 ...dismiss many of my major concerns as "normal" for this model, and generally will do all they can to not write the problem up. More interestingly is how well-documented the problems I'm having are throughout Internet forums, yet your service managers have never seen or heard of these problems. Is it through style of ignoring customers that Toyota has been able to attain their reputation for quality?  
 I have reported the problems below to my dealer, ....  
 \*\*\* NOTES 08/02/2006 07:41:45 AM DHoffman1  
 ...but the first one is explained away as "I don't? feel anything I wouldn't? expect from a truck". The second is explained as normal for all Toyotas despite the fact that the 2002 Tacoma I used as loaner had much tighter tolerances. The dealership has requested the regional representative to look at 'Problem 3', but said they have no idea when the representative will show up. It's been over a month now, so I have to assume that the representative will not show up. ...  
 \*\*\* NOTES 08/02/2006 07:42:14 AM DHoffman1  
 ...Problem 1: Loud clunk when I stop or start, especially with the air conditioning on. Related: vibration around 18-22 mph when transmission shifting 2nd to 3rd, and vibration ~65-70 mph. Shortly after I complained about this to my dealer ("feels normal for a truck to me" response), I searched Internet forums and found people having identical problems to my truck that are yet to be addressed by Toyota. ...  
 \*\*\* NOTES 08/02/2006 07:42:36 AM DHoffman1  
 ...(http://www.tundrasolutions.com/forums/tacoma/66233-toyota-addresses-tacoma-transmission/). Do you ever plan to actually address this, or will this continue to be explained away as 'normal' by your dealership network?  
 Problem 2: The cruise control allows the vehicle to lose 3 mph before it even starts to bring the vehicle back to speed....  
 \*\*\* NOTES 08/02/2006 07:43:12 AM DHoffman1  
 ...Every other vehicle I've driven for the past 10 years, even a Hyundai, keeps the vehicle within 1 mph and as the vehicle begins to lose speed gradually applies power to keep it at the set speed. My Tacoma, however, waits until it loses 3 mph and accelerates abruptly to get it back to speed. I asked my dealer about this, and he would not write it up since "it's normal for Toyota cruise control to have a very loose tolerance". What I found interesting is that the 2002...  
 \*\*\* NOTES 08/02/2006 07:43:34 AM DHoffman1  
 ...Tacoma the dealership gave me as a loaner acted like every other vehicle I've owned. Which is it ? do all new Toyotas have a 'dis-improved' cruise control when compared to older models, a much lower quality cruise control when compared to other manufacturers, or is this decreased accuracy and extreme compensation going to be the new industry standard (the 'norm' as described by the dealers)?...  
 \*\*\* NOTES 08/02/2006 07:44:02 AM DHoffman1  
 ...Problem 3: Tailgate is bowing in the middle and falling below 90 degrees when open. As I reported to my dealer, I was using my truck to transport wood to build a deck of mostly 8' x 10' boards, and took great care not to overload the truck and to distribute the load across the width of the bed (although it's supposed to be a ?-ton truck, anything over 600 pounds seems to bottom out the rear, but that's a whole other story about insufficient suspension that fails...  
 \*\*\* NOTES 08/02/2006 07:44:48 AM DHoffman1  
 ...to meet the expectation of a ?-ton truck that I expect I will have to fix by installing higher quality springs/shocks than Toyota is apparently able to offer). After unloading the boards, I went to close the tailgate and noticed it was becoming increasingly difficult to get both sides to close correctly. I looked closer and noticed it was bowing (downward when viewed with the tailgate lowered) in the center where I had 2 ? 2X10 boards (~65 lbs each)...  
 \*\*\* NOTES 08/02/2006 07:45:10 AM DHoffman1  
 ...Upon further inspection, I saw marks in the plastic liner from sliding the boards out that correspond with the bow. When I took my truck to the dealer to properly align the passenger door (1/4-inch gap at the bottom), I asked him to look at the tailgate and explained the situation just as I have written in this letter. His response, after looking at it after I dropped it off, was to opine that the tailgate had been struck or otherwise hit in a collision. ...

**Location of Incident:**

**NHTSA Summary:**

\*\*\* PHONE LOG 04/03/2006 04:34:53 PM JFewel

Caller states when you come to a stop the motor will race, and the dealer advises that it is caused by a computer relay chip to the transmission, and it happened in the caller's garage and caused vehicle to hit the wall, scratching the vehicle. Caller states dealer states concern is normal.

\*\*\* SUBCASE 200604031611-1 CREATED 04/04/2006 07:13:45 AM CVargas

\*\*\* NOTES 04/04/2006 08:36:12 AM CVargas

====OUTGOING CALL====

NCR called dlr and spk to SM Pat Petty. SM advd callers last visit to dlr was on 12/06 for oil change. SM advd transmission will come up a little when a/c is on. NCR thanked.

\*\*\* NOTES 04/04/2006 10:19:16 AM CVargas

====OUTGOING CALL====

NCR spk to caller advd veh currently at dlr. Sts was inching up into garage and veh surged into stucco wall and minor chips. Caller sts picking up veh today from dlr. NCR advd will research concerns and follow up on 4/5.

\*\*\* NOTES 04/04/2006 10:22:07 AM CVargas

====OUTGOING CALL====

NCR called and lvm for SM Pat Petty. NCR advd veh currently at dlr and provided ncr's direct line for call back.

\*\*\* NOTES 04/04/2006 12:18:18 PM CVargas

====INCOMING CALL====

NCR recvd call from SM Pat Petty advd veh at dlr now. SM advd caller sts eng idle surges with a/c on which is normal. SM advd cleaned and adjusted brakes, and did not duplicate window or dash squeak. SM advd no DSPM or FTS involvement at this point. NCR thanked.

\*\*\* NOTES 04/05/2006 01:16:43 PM CVargas

====OUTGOING CALL====

NCR spk to caller advd understands that veh idles higher when a/c is on but concerns he is having is beyond this. Sts driver side window squeaks and doors make noise. Sts also has noise in dash. Sts understands is difficult to duplicate some of the noises in such a short time but would like further inspected. NCR advd will research further and follow up 4/6.

\*\*\* NOTES 04/05/2006 01:36:02 PM CVargas

====REGION EMAIL====

NCR sent email to DSPM Soojie Kuroda advd caller sts that when coming to a stop the motor will race with the a/c on. Dlr advd this is normal but the caller feels this is more than just a high idle when a/c is on. He was inching up into the garage and bumped the wall causing a few minor scratches to the bumper. He advd window, door and dash squeaks and advd after starting veh when driving for first 5 seconds would like to know if DSPM wants to inspect.

\*\*\* NOTES 04/06/2006 10:16:40 AM CVargas

====REGION CALL====

DSPM Soojie Kuroda called ncr and advd available 4/10 for inspection. DSPM advd to have veh at dlr by 2pm. NCR advd will contact caller and adv.

\*\*\* NOTES 04/06/2006 10:23:24 AM CVargas

====OUTGOING CALL====

NCR spk to caller advd DSPM can inspect veh on 4/10. Caller sts will be on vacation until 4/17. NCR apol and advd will research with regional office for next avail inspection date. Caller thanked.

\*\*\* NOTES 04/06/2006 10:30:14 AM CVargas

**NHTSA Summary:**

\*\*\* PHONE LOG 08/28/2006 01:05:51 PM JFWel

RNT#060819-000245

Email states: "Cruise control on '05 Tacoma

I recently completed a 3500+ mile trip in my '05 Tacoma that included extended intervals of driving on interstates. During the trip I became completely dissatisfied with the operation of the cruise control system to the point where I stopped using it.

Mid-way on the trip I took the vehicle to the Toyota dealer in Olympia WA. to try and correct the issue.

...

\*\*\* NOTES 08/28/2006 01:07:28 PM JFWel

...I was informed by that dealer that there were no error codes from the computer and that during a test drive the system performed as expected. Upon return to Phoenix I took the vehicle to the dealership where purchased and asked to have the system re-evaluated. Again, the service advisor reported that the system was working as expected. They further referred me to the owners manual where there is very general warning about not using the cruise control on steep

\*\*\* NOTES 08/28/2006 01:07:46 PM JFWel

...grades since part of my issues was the performance on hilly sections of hi-way.

Specifically when the control system determines that increase in speed in needed the vehicle executes a torque converter unlock and then a down shift. It is this eagerness to down shift that is the issue. While the down shift would be expected while negotiating a steep grade (i.e. 4, 5 or 6%) the vehicle executed it whether was on a slight grade (overpass), the bank of a curve, in the

\*\*\* NOTES 08/28/2006 01:08:06 PM JFWel

...wind wash from a passing semi-tractor or in other numerous instances. I even experienced this shifting behavior while going down a grade. Another characteristic is that the control system has a fairly wide tolerance for maintaining speed. The vehicle usually has to drop about 4 MPH before the system decides to do anything, and then over shoots by 2-3 MPH before up shifting and settling. I do not know if it is the computer being programmed to favoring transmission

C-525

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

\*\*\* NOTES 08/28/2006 01:08:25 PM JFWel

...shifts over throttle adjustment or the wide tolerance on speed resulting in the need to make up the difference quickly that is root of the issue.

Either way the operation is not satisfactory. On many occasions I could disable the cruise control, let the transmission up shift, then accelerate back up to the desired speed, maintain that speed and not have the transmission down shift. I routinely use other Toyota products during business travel and none of your other

\*\*\* NOTES 08/28/2006 01:08:43 PM JFWel

...vehicles exhibit this same style / preference of down shift over wider throttle adjustment to maintain speed while using cruise.

I believe this is a design / programming issue. The technicians at the dealerships not finding any issues indicates the control system does not recognize it is working in a poor manner.

What is the process to resolve?

Regards,

James Irvine"

\*\*\* SUBCASE 200608281390-1 CREATED 08/28/2006 01:10:02 PM JFWel

Thank you for contacting Toyota Motor Sales, U.S.A., Inc.

We apologize for your concern regarding the cruise control of your 2005 Tacoma.

In order to properly assess your concerns, we have contacted the Customer Relations Manager at Power Toyota Tempe to further evaluate your Tacoma.

Toyota dealership technicians are specialized in the diagnosis and repair of Toyota vehicles. They are provided with extensive training and have access to state-of-the-art equipment to help in the accurate diagnosis of your vehicle. Also, if necessary, we provide additional support to assist Toyota dealership technicians in resolving unusual vehicle concerns.

The Customer Relations Manager will contact you by the end of the business day, Thursday, August 31, 2006. In the event you do not receive any contact from the dealership by this date, please contact us <

http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enduser/std\_adp.php?p\_faqid=4164> with file #Sincidents.cSclarifycasenumber.

 \*\*\* PHONE LOG 10/24/2006 10:51:05 AM KSides Action Type: Outgoing call  
 +++OUTGOING DEALER CALL+++  
 CM called Bill Wright Toyota, dlr#1, & spoke with Elias, Service Manager, who advised customer in to dlr#1 for high idle concerns as follows:  
 10/19/06 (RO#502424) at 9650 miles, customer concerned vehicle idles up to 2300rpm upon start-up especially when cold outside. SM advised dealer technician inspected & road-tested vehicle cold & was unable to duplicate 2300rpm as customer had indicated during previous experience. SM advised will pull hard-copy RO for specific readings documented during road-test & inspection by dealer tech & advised will fax to CM by eob today at 310-381-5106. SM advised no check engine light has illuminated & confirmed if any abnormal idling, check engine light will illuminate to identify concern. SM advised symptoms seem to occur when vehicle is cold, after sitting, idle will fluctuate & vehicle's engine will idle high & will drop off, states normal operating condition & characteristic of vehicle. SM advised customer was seeking specific normal range that Toyota has identified for this vehicle's engine idle & SM advised not available in TIS, unable to provide to customer. CM understood & thanked, advised CM will await fax to document fully, & will contact customer to verify specifications for engine idle unavailble & that if any concerns to vehicle, check engine light will illuminate. SM understood, agreed & thanked. CM thanked.  
 \*\*\* NOTES 10/24/2006 10:55:25 AM KSides  
 ...CM had advised SM of customer's positive comments regarding SM. SM thanked.

\*\*\* PHONE LOG 10/24/2006 11:01:53 AM KSides Action Type: Outgoing call  
 +++OUTGOING REGION CALL+++  
 CM called & spoke with Tomo Ohira, DSPM covering for district 8, advised vehicle model/MY, customer's claims & SM information, advised dealer technician unable to duplicate up to 2300 rpm, but advised CM awaiting hard-copy of RO to verify exact rpms duplicated by tech. DSPM understood & thanked, advised feels most likely normal, but will check with FTS to confirm. CM understood & thanked, advised 310-468-8640. DSPM thanked.  
 +++INCOMING REGION CALL+++  
 CM received call from Tomo Ohira, DSPM, who advised spoke with FTS regarding case. DSPM states FTS confirmed 2300rpm normal condition for 4cyl, states due to catalytic converter cold being cold & letting off the most emissions when cold, the engine is designed to run higher at cold start to heat up the catalytic converter in a shorter time to lessen emissions. DSPM confirmed if any concerns arise, check engine light will illuminate, states at this time DSPM recommends educate customer fully. CM understood & thanked. DSPM thanked.

\*\*\* PHONE LOG 10/24/2006 03:25:43 PM KSides Action Type: Outgoing call  
 +++OUTGOING CUSTOMER CALL+++  
 CM called day# & spoke with Mrs. Taylor, advised CM seeking to speak with customer regarding case. Mrs. Taylor advised customer is out of town today, but offered to take hard-copy message from CM. CM accepted & thanked, advised CM's name, working hours & 800-331-4331 x73090.  
 \*\*\* NOTES 10/25/2006 04:52:12 PM KWebster  
 Mr Taylor called in req to speak w/ CM KSides who is not avail; NCR apol & adv that he should receive a c/b w/in 1 bus day. Cllr sts he can be reached at this cell as well 661-703-4716  
 \*\*\* PHONE LOG 10/26/2006 05:38:49 PM KSides Action Type: Outgoing call  
 +++OUTGOING CUSTOMER CALL+++  
 CM called & spoke with Kenneth Taylor, advised CM reviewed with SM & DSPM, FTS consulted, & advised FTS confirmed 2300rpm normal condition for 4cyl, states due to catalytic converter cold being cold & letting off the most emissions when cold, the engine is designed to run higher at cold start to heat up the catalytic converter in a shorter time to lessen emissions. DSPM confirmed if any concerns arise, check engine light will illuminate. Customer understood & thanked, seeks letter from CM confirming such. CM accepted & advised CM can send generic letter confirming. Customer accepted. Customer states seeks for CM to research one additional concern that customer brought up to dlr#1 previously. Customer states while shifting between 4th-5th gear & accelerating, rpms go up from 2900 rpm when customer firsts pushes in the clutch to shift to 3200 rpm sustained until vehicle is fully shifted into 5th gear, states then normal, drop down to normal when customer lets the clutch out in 5th gear. Customer states dealer advised normal, but customer seeks for CM to confirm with SM & advise customer. CM understood, agreed & thanked, advised will follow up with customer by eob Monday. Customer understood, agreed & thanked. CM offered CM email survey, customer declined. CM understood & thanked.

\*\*\* PHONE LOG 10/30/2006 10:30:04 AM KSides Action Type: Incoming call  
 +++OUTGOING DEALER CALL+++  
 CM called & spoke with Andy Pappas, Service Manager, advised as per customer's description additional question, as noted (Customer states while shifting between 4th-5th gear & accelerating, rpms go up from 2900 rpm when customer firsts pushes in the clutch to shift to 3200 rpm sustained until vehicle is fully shifted into 5th gear, states then normal drop down to normal when customer lets the clutch out in 5th gear), and CM seeking to verify whether normal operating condition. SM confirmed has experienced the same & advised due to shifting too quickly with electronic throttle. SM advised if shifting too quickly, engine revs up & when clutch grabs, drops back down, states due to getting extra amount of gas. SM advised recommends customer shift more slowly, verified customer needs to let off gas a bit earlier prior to engaging the clutch, then symptoms will not occur. CM understood & thanked, advised will advise & educate customer. SM understood, agreed & thanked.  
 +++OUTGOING CUSTOMER CORRESPONDENCE+++  
 CM sent NT05 (Normal Condition, Vehicle Meets Specifications)

\*\*\* PHONE LOG 10/30/2006 01:51:40 PM KSides Action Type: Outgoing call  
 +++OUTGOING CUSTOMER CALL+++  
 CM called day# & spoke with Mrs. Taylor, who took CM's name & 800-331-4331 x73090 & advised will pass on to customer this evening, as customer is at work. CM verified work# as alternate# in Clarify case & advised CM will attempt to contact customer at alternate# as well. Mrs. Taylor understood & thanked. CM thanked.  
 CM called alternate# & spoke with Kenneth Taylor, advised CM reviewed additional question with SM & advised confirmed normal operating condition & educated customer as per SM. CM advised if concern arises, check engine light will illuminate to advise concern exists. Customer states doesn't agree & states will check around to confirm Toyota's position. CM understood & advised CM sent customer generic letter, as previously discussed, to verify factory representative confirmed operating as designed. CM advised Toyota's position has been provided. Customer understood & advised seeks to verify whether options available through Toyota or California. CM advised ARB & verbal Lemon Law demand available to customer's within warranty whose vehicle has defect, advised Toyota has confirmed vehicle is operating as

Caller requesting case mgr. NCR adv will locate rep. NCR transferred cust to case mgr with rep clk. Cldr thanked.

\*\*\* NOTES 06/19/2006 01:41:21 PM LEspinoza  
+INCOMING CUST CALL+  
Ncr spk w/ region who advd cust to have tech test drive. Cust sts Robert Accuff called cust and cust tech drove w/ tech and RAccuff. Dlr provided a loaner veh. Sts one week later Robert advd computer chip was rplcd. Cust p/up veh on Fri 6/16 and concern is still present. Cust sks to know how to proceed.  
OUTGOING REGION CALL  
Ncr spkw / CElias who advd FTS to inspect veh on 6/20. Cust to drop off veh and p/up loaner.  
\*\*\* NOTES 06/19/2006 02:10:46 PM KWashburn  
Cldr asked to speak with CM. CM unavailable. He is at the dlr right now and would like her to c/b as soon as possible. Dlr doesn't have an appointment for him. NCR apol and advd that CM would c/b at earliest convenience.  
\*\*\* NOTES 06/19/2006 02:52:39 PM LEspinoza  
+OUTGOING DLR CALL+  
Ncr spk w / Leslie in svc, sts will schedule appt w/ dlr for FTS visit. Sts cust is set up for visit and rental on 6/20

\*\*\* NOTES 06/20/2006 10:05:45 AM LEspinoza  
+OUTGOING FLR CALL+  
Ncr spkw / Mark in svc. Dlr sts FTS inspected veh and advd dlr to balance tires, align veh, and rplc the exhaust manifold per TSB. FTS adv shifting and accelerating feeling are normal operating characteristics. Sts will return once manifold arrives - for install  
\*\*\* NOTES 06/21/2006 06:03:07 AM CElias500  
Per the FTS: The customer had a new list of concerns:  
1. Vibration in the steering.  
2. Pulling right.  
3. Rattle or ticking sound while driving.  
4. Slush after ECM was replaced.

\*\*\* NOTES 06/21/2006 06:03:38 AM CElias500  
FTS Findings:  
The dealer personnel had repaired the transmission concern during the pervious visit.  
The vehicle was driven for evaluation. There was a slight vibration in the steering, the vehicle did drift to the right. This vehicle is a per countermeasure vehicle for steering wheel flutter per TSB ST004-06. A TSB does cover the ticking sound while driving TSB EG021-06.  
The vehicle needs to be driven aggressively to retrain the ECM.

\*\*\* CASE CLOSE 06/21/2006 06:04:14 AM CElias500  
REG closing case as FTS indicates veh is now repaired.

\*\*\* PHONE LOG 01/04/2006 01:19:15 PM RBrowning

RNT 051229-000030 -- What solution has Toyota Engineering found to eliminate the revving up of RPM for my new 4 cylinder Tacoma truck while shifting between 4th and 5th gears? I fear this a safety concern and may cause damage to engine, clutch over time or vehicle control when engine rev's up to 3200 rpm and hold for 3 seconds or more before returning to 2200 which is more appropriate for a gear change.

\*\*\* CASE CLOSE 01/04/2006 01:21:31 PM RBrowning

We are sorry to hear of your concerns with the engine rpm performance of your Tacoma, and apologize this aspect of the vehicle did not meet your expectations. We do not show a Special Service Campaign or recall for the condition you described, and thus do not have specific insight to provide. If you feel you have a

**Date of Incident:** 20060104  
**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** LA CONNER, WA

**NHTSA Summary:**  
DT\*: THE CONTACT STATED THE VEHICLE SURGES FORWARD WHILE THE ACCELERATOR  
PEDAL IS BARELY BEING TOUCHED. THIS IS AN INTERMITTENT PROBLEM AND OCCURS  
WHEN THE VEHICLE IS ACCELERATING FROM A STOPPED POSITION. THE DEALERSHIP IS  
UNABLE TO DUPLICATE THE PROBLEM. \*AK THE CONSUMER STATED WHEN ON A LEVEL  
HIGHWAY, WITH THE CRUISE CONTROL ENGAGED, IT WILL ACTIVATE AND DEACTIVATE  
ON ITS OWN. UPDATED 02/07/06. \*JB

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10166246  
**Date of Incident:** 20060108  
**Vehicle:** 2006 TOYOTA RAV4  
**Location of Incident:** CUMMING, GA

**NHTSA Summary:**  
THERE IS A PROBLEM IN ACCELERATION DELAY/THROTTLE LAG IN THE 2006 TOYOTA  
RAV4. AFTER TAKING DELIVERY JAN 06 AND WHILE DRIVING 12K MILES, WE HAVE  
EXPERIENCED ERRATIC ACCELERATION PROBLEMS. FROM COMPLETE STOPS OR ROLLING  
STARTS, WHEN TURNING CORNERS IN EITHER DIRECTION, ON UPHILL GRADES, OR  
ATTEMPTED PASSING, THERE IS A SIGNIFICANT DELAY IN DELIVERING FORWARD SPEED  
REGARDLESS OF HOW MUCH PRESSURE IS PUT ON THE FOOT FEED. AFTER THE DELAY,  
FORWARD SPEED IS DELIVERED SUDDENLY, CAUSING THE CAR TO LURCH FORWARD  
AND THE ENGINE TO RACE. THE FORWARD SPEED LAGS CONTINUOUSLY UP HILLS,  
DEPENDENT ON THE GRADE. UNDER THESE CONDITIONS, EVERYDAY DRIVING IS  
HAZARDOUS AND I HAVE HAD MANY CLOSE CALLS. THE TOYOTA DEALER DISMISSED  
OUR INITIAL COMPLAINTS, STATING THAT THIS PROBLEM WAS 'NORMAL', AND WE PUT  
UP WITH THIS FOR TOO LONG BEFORE INSISTING THE VEHICLE BE CHECKED OUT. THE  
DEALER SAID NO ERROR CODES WERE GENERATED AND NO TSB'S HAD BEEN ISSUED AND  
THAT THEY WOULD HAVE TO BE ABLE TO DUPLICATE THE PROBLEM IN ORDER TO FIX IT,  
AS THOUGH WE'RE THE ONLY PEOPLE WITH THIS COMPLAINT. AFTER SOME PERSISTENCE  
ON OUR PART, THEY GAVE THE IMPRESSION THAT THEY'RE WELL AWARE OF A PROBLEM,  
BUT SEEM TO BE STONE WALLING WHILE LAYING THE BLAME ON TOYOTA TO ISSUE A  
FIX. THIS IS A VERY DANGEROUS FAULT IN THE NEW RAV4. MY ONLINE RESEARCH HAS  
NOW REVEALED THAT THERE ARE NUMEROUS COMPLAINTS OF THIS SAME PROBLEM ON  
CONSUMER WEBSITES SUCH AS TOYOTA NATION AND EDMUNDS. FOR TOYOTA DEALERS  
TO PRETEND THIS IS AN ISOLATED, INSIGNIFICANT PROBLEM IS, AT THE VERY LEAST,  
DECEPTIVE AND MAY PROVE TO BE CRIMINAL, AS THIS ACCELERATION PROBLEM COULD  
WELL LEAD TO AN ACCIDENT. TOYOTA MUST FIX THIS PROBLEM ASAP. \*JB

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10155629  
**Date of Incident:** 20060109  
**Vehicle:** 2006 TOYOTA CAMRY  
**Location of Incident:** BROOKFIELD, WI

**NHTSA Summary:**  
I TERMINATED A LEASE ON A 2006 TOYOTA CAMRY ON FEB. 28. I ONLY DROVE IT FROM  
NOV. 1 TO JAN. 9 WHEN FOR THE THIRD TIME IN THOSE TWO MONTHS IT SURGED AHEAD  
WHEN I WAS PARKING. THE SURGE WAS SO POWERFUL, THAT THE CAR FLEW THRU THE  
AIR AND DAMAGED ANOTHER CAR IN THE PARKING LOT. MY FOOT WAS ON THE BRAKE.  
THE CAR SUFFERED \$6000 WORTH OF DAMAGES. I CONTACTED THE DEALER TO SAY I  
WOULD HAVE THE DAMAGED CAR TOWED TO THEIR SHOP AND THEY SAID THE BODY  
HAD TO BE REPAIRED BEFORE THEY WOULD CHECK TO SEE WHY IT MALFUNCTIONED. I  
WAS TOLD THAT A REGIONAL ENGINEER FROM TOYOTA WOULD INSPECT THE CAR. I  
HAD GREAT HOPES THAT THEY WOULD FIND THE PROBLEM AND FIX IT BUT THE REPORT  
SAID THERE WAS NOTHING WRONG WITH THE CAR. OF COURSE THERE IS SOMETHING  
VERY WRONG WHEN THE CAR WILL NOT STOP BUT RATHER SURGES AHEAD WHEN YOU  
ARE BRAKING. THEY IMPLIED THAT AFTER 45 YEARS OF ACCIDENT FREE DRIVING, I PUT  
MY FOOT ON THE ACCELERATOR INSTEAD OF THE BRAKE. I TERMINATED THE LEASE.  
BUT I AM VERY FEARFUL AND VERY PERPLEXED THAT TOYOTA IS UNCONCERNED  
ABOUT THE SAFETY OF THEIR CARS. TOYOTA MUST ADDRESS THIS PROBLEM--IT IS  
VERY WRONG TO IGNORE THIS SAFETY HAZARD. I AM FILING THIS COMPLAINT ABOUT A  
CAR I NO LONGER HAVE BECAUSE IT HAS BEEN SOLD TO AN UNSUSPECTING PERSON.  
THE NEW OWNER WAS NOT TOLD OF THE PROBLEM BECAUSE THEY SAY THERE IS NO  
PROBLEM. I DON'T KNOW HOW TO CONTACT THE NEW OWNER. I THOUGHT THE DEALER  
WOULD DO THE RIGHT THING AND SEND THE CAR BACK TO THE FACTORY TO BE FIXED.  
\*NM

**Toyota ID Number:**  
**NHTSA ODI Number:** 10305338  
**Date of Incident:** 20060110  
**Vehicle:** 2006 TOYOTA HIGHLANDER HEV  
**Location of Incident:** RYE, NY

**NHTSA Summary:**  
DURING CONSTANT BRAKING OF MY 2006 TOYOTA HIGHLANDER HYBRID (SUCH AS WHEN  
APPROACHING A RED LIGHT), THERE IS SOMETIMES A MOMENTARY, BUT NOTICEABLE  
FAILURE OF THE BRAKES (WHICH CAUSES SLIGHT ACCELERATION), BEFORE THE  
CONDITION RESOLVES ITSELF ON ITS OWN. AT THE MOMENT OF FAILURE, IT FEELS AS IF  
THE BRAKES ARE RELEASED FOR A SPLIT SECOND AND THEN THE CONDITION SELF-  
CORRECTS BEFORE THERE IS TIME TO REACT. I HAVE NOTICED THIS PERHAPS 30 TIMES IN  
THE NEARLY THREE YEARS THAT I HAVE DRIVEN THE VEHICLE. MY WIFE HAS ALSO  
NOTICED THIS CONDITION. ABOUT A YEAR AGO I RECEIVED A SERVICE LETTER FROM  
TOYOTA WHICH, I THOUGHT, WAS INTENDED TO ADDRESS THIS ISSUE. I TOOK THE CAR  
TO THE DEAL TO HAVE IT SERVICED, BUT THE PROBLEM PERSISTS.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Vehicle:** 2005 TOYOTA CAMRY SOLARA  
**Location of Incident:** DUBLIN, OH

**NHTSA Summary:**  
DT\*: THE CONTACT STATED WHILE IN A PARKING LOT THE VEHICLE SUDDENLY  
ACCELERATED CRASHING INTO A CURB. THE PASSENGER SIDE RIM, SUSPENSION, WHEEL  
ASSEMBLY AND TIRE WERE DAMAGED AS A RESULT OF THE ACCIDENT. THE VEHICLE  
WAS TOWED TO A BODY SHOP WHERE NO REPAIRS HAVE BEEN MADE.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10303572  
**Date of Incident:** 20060112  
**Vehicle:** 2006 TOYOTA SIENNA  
**Location of Incident:** METHUEN, MA

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2006 TOYOTA SIENNA. WHILE DRIVING 40 MPH AND  
REMOVING HER FOOT OFF OF THE ACCELERATOR PEDAL IT BECAME STUCK AS IT WAS  
RELEASED. SHE HAD TO PUMP THE BRAKES SO THAT THE VEHICLE COULD SLOW DOWN.  
THE DEALER WAS CONTACTED AND STATED THAT THEY WERE UNAWARE OF ANY  
RELATED FAILURES. THERE WERE NO REPAIRS MADE TO THE VEHICLE. THE FAILURE  
MILEAGE WAS 12 AND THE CURRENT MILEAGE WAS 42,484.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10147997  
**Date of Incident:** 20060113  
**Vehicle:** 1999 TOYOTA AVALON  
**Location of Incident:** HUTCHINSON, KS

**NHTSA Summary:**  
DT\*: THE CONSUMER STATED THE CRUISE CONTROL ENGAGED WITH THE CONTROL  
SWITCH IN THE OFF POSITION; HOWEVER THE CRUISE CONTROL LAMP ILLUMINATED.  
THE VEHICLE'S SPEED RAPIDLY INCREASED TO OVER 70 MPH, ALTHOUGH THE BRAKE  
PEDAL WAS BEING DEPRESSED. THE CONSUMER DISENGAGED THE CRUISE CONTROL BY  
SHUTTING THE ENGINE OFF. THE VEHICLE WAS TOWED TO THE LOCAL DEALERSHIP FOR  
INSPECTION WHERE THEY REPLACED THE CRUISE CONTROL SWITCH. UPDATED 02/13/06.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10306436  
**Date of Incident:** 20060115  
**Vehicle:** 2006 TOYOTA HIGHLANDER  
**Location of Incident:** LIBERTYVILLE, IL

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2006 TOYOTA HIGHLANDER HYBRID. WHILE DRIVING 20 MPH  
OVER A BUMP IN THE ROAD AND APPLYING THE BRAKE PEDAL, THE VEHICLE  
ACCELERATED. THE BRAKES BEGAN OPERATING NORMALLY IMMEDIATELY AFTER  
DRIVING OVER THE BUMP. THE FAILURE HAS OCCURRED APPROXIMATELY 50 TIMES. THE  
DEALER WAS CONTACTED AND STATED THAT WAS A NORMAL RESPONSE FOR A HYBRID  
VEHICLE. NO REPAIRS HAVE BEEN MADE TO THE VEHICLE. THE FAILURE MILEAGE WAS  
500 AND THE CURRENT MILEAGE WAS 51000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10311842  
**Date of Incident:** 20060115  
**Vehicle:** 2006 TOYOTA HIGHLANDER HV  
**Location of Incident:** LAKE BLUFF, IL

**NHTSA Summary:**  
WE BOUGHT A NEW 2006 TOYOTA HIGHLANDER HYBRID IN 2005 AND, FROM TIME TO  
TIME SINCE WE BOUGHT IT, THE ACCELERATOR PEDAL KIND OF STICKS OR SURGES IN  
CERTAIN DRIVING CONDITIONS. WHEN YOU TRY TO REDUCE SPEED BY TAKING YOUR  
FOOT OFF THE GAS PEDAL. IT SOMETIMES DOES NOT IMMEDIATELY RESPOND, IT TAKES  
A FEW SECONDS TO REDUCE SPEED AND SOMETIMES ACTUALLY SURGES A LITTLE,  
WHICH IT ALSO DOES SOMETIMES WHEN YOU ARE DRIVING AT A CONSISTENT SPEED. I  
THOUGHT IT HAD TO DO WITH THE HYBRID FEATURE AND JUST SORT OF LEARNED TO BE  
SENSITIVE TO IT AND HIT THE BRAKES IF IT NEEDED IT, BUT THIS SOUNDS LIKE WHAT IS  
GOING ON WITH OTHER MODELS SUBJECT TO THE RECALL AND, AS OUR MODEL IS NOT  
SUBJECT TO THE RECALL, I AM CONCERNED ABOUT IT. PLEASE ADVISE. \*TR

EMAIL RESPONSE

<as-html>  
Thank you for contacting Toyota Motor Sales, U.S.A., Inc.<p>  
We are sorry to hear of your dissatisfaction with the design of your 2005 Tacoma. <p>  
The 2005 Tacoma is designed to idle at a higher rate during cold starts so your engine can quickly achieve its optimal operating temperature. A cold vehicle will produce a significantly higher amount of emissions than a vehicle which has been warmed up. By designing the vehicle to idle high when it is cold, Toyota is able to greatly reduce the amount of harmful emissions released into the environment. We apologize, but this feature is a design characteristic of the vehicle and cannot be altered. Doing so would likely violate federal emissions guidelines. <p>

To learn more about Toyota's commitment to the environment, we invite you to visit our <a href="http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enduser/std\_adp.php?p\_faqid=4277&p\_created=000985984176" TARGET="BLANK">Environmental Technologies</a> and <a href="http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enduser/std\_adp.php?p\_faqid=4281&p\_created=000985989198" TARGET="BLANK">Hybrid Technology Availability for Other Toyotas</a> FAQ's (Frequently Asked Questions). <p>  
Your email has been documented at our National Headquarters under file #200601170847. If we can be of further assistance, please feel free to <a href="http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enduser/std\_adp.php?p\_faqid=4164" TARGET="\_BLANK">contact us</a>. <p>

Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10149242  
Date of Incident: 20060120  
Vehicle: 2005 LEXUS ES330  
Location of Incident: RESEDA, CA

NHTSA Summary:  
DT\*: THE CONTACT STATED WHILE APPLYING PRESSURE TO THE ACCELERATOR PEDAL TO BACK UP, THE VEHICLE HESITATED AND THEN LURCHED FORWARD CAUSING THE VEHICLE TO HIT THE GARAGE DOOR. THE DRIVER WAS WEARING A SEATBELT AND RECEIVED NO INJURIES. THE VEHICLE WAS TAKEN TO THE DEALERSHIP FOR INSPECTION AND THE PROBLEM COULD NOT BE DUPLICATED. THE MANUFACTURER WAS NOTIFIED.  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10320371  
Date of Incident: 20060120  
Vehicle: 2006 TOYOTA CAMRY  
Location of Incident: WORCESTER, MA

NHTSA Summary:  
I PURCHASE A 2006 CAMRY IN DEC. 2005. WITHIN WEEKS THE OXYGEN SENSOR NEEDED REPLACEMENT. JAN 2006 AS I ENTERED 290W IN NORTHBORO MA THE CAR ACCELERATED FROM 10M-H TO 80 +MPH WITHOUT WARNING. AS TRAFFIC WAS BUMPER TO BUMPER THE CAR SLAMMED INTO THE BACK OF A SEMI TRAILER. WHEN THE CAR WAS REPAIRED OF COURSE I WAS TOLD I HAD STEPPED ON THE GAS NOT THE BRAKE. THIS WAS NOT TRUE!!! HOWEVER, HAVING NO OTHER EXPLANATION I ACCEPTED THE CAUSE. HOWEVER, AS MANY AS 2 DOZEN TIMES THE CAR ACCELERATED WHEN PARKING INTO A SPOT. I HAD BEEN INSTRUCTED TO SHIFT THE CAR INTO NEUTRAL IF THIS EVER HAPPENED AGAIN, AND I DID. I DROVE THE CAR FOR 3 YEARS, TOOK IT TO DEALERS, TRIED FO FILE A LEMON LAW COMPLAINT, BUT TO NO AVAIL. I HAVE FINALLY TRADED IN THE AUTO AND WANT TO RECOUP MY \$4000.00 OF DEDUCTIBLES AND SURCHARGES THAT I PAID FOR NO FAULT OF MINE. HOW DO I DO THIS. THANK YOU, MRS. SHEA

Toyota ID Number:  
NHTSA ODI Number: 10303987  
Date of Incident: 20060121  
Vehicle: 2005 TOYOTA CAMRY  
Location of Incident: ALBURN, NY

NHTSA Summary:  
TL\* THE CONTACT OWNS A 2005 TOYOTA CAMRY. WHILE DRIVING 25 MPH WITH HIS FOOT ON THE BRAKE PEDAL, THE VEHICLE ACCELERATED ON ITS OWN BETWEEN 70 AND 80 MPH. HE THEN APPLIED A LOT OF PRESSURE TO THE BRAKE PEDAL WHICH ONLY FUNCTIONED WHEN THE CONTACT SHIFTED INTO NEUTRAL GEAR. THE DEALER STATED THAT THERE WAS NOTHING WRONG WITH THE VEHICLE SINCE THEY COULD NOT DUPLICATE THE FAILURE WHICH OCCURRED APPROXIMATELY 10 TIMES. PREVIOUSLY THE CRUISE CONTROL WAS REPAIRED WHEN THE FAILURE OCCURRED. THE FAILURE MILEAGE WAS 5311 AND THE CURRENT MILEAGE WAS 21825.  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10149898; 10157329  
Date of Incident: 20060124  
Vehicle: 2002 TOYOTA CAMRY  
Location of Incident: LINCOLN, RI

NHTSA Summary:  
CAR ACCELERATED WITHOUT DRIVER INPUT ON TWO SEPARATE OCCASIONS. THE LAST EVENT RESULTED IN SMASHING THROUGH A PLATE GLASS WINDOW OF A TRAVEL AGENCY, INJURING ONE EMPLOYEE. THE CAR ENDED UP TOTALLY IN THE AGENCY, HALTED BY AN INTERIOR WALL. THE POLICE REPORTED SKID MARKS ON THE SIDEWALK IN FRONT OF THE AGENCY, AS WELL AS WITHIN THE AGENCY AS I ATTEMPTED TO BRAKE THE CAR. THERE IS ALSO EVIDENCE THAT THE RIGHT FRONT TIRE WAS ROTATING VERY RAPIDLY, SO MUCH SO THAT WHEN THE CAR STOPPED THE TIRE BURNED A HOLE IN THE CARPET. CARPET THREADS ARE EMBEDDED IN THE RIGHT FRONT WHEEL TIRE. ON THE ONE HAND, THE MARKS ON THE CARPET AND SIDEWALK INDICATE THAT SKID MARKS WERE MADE BY ALL THREE WHEELS, WHILE THE RIGHT FRONT WHEEL OBVIOUSLY WAS BURNING RUBBER. \*JB UPDATED 03/01/06; RESPONSE TO LETTER RECEIVED FROM CLAIMS ADMINISTRATOR, FOR TOYOTA, ALLEGING THAT ALL SYSTEMS WERE FUNCTIONING PROPERLY FOR 2002 TOYOTA CAMRY. \*TS THE MANUFACTURER CLAIMED THAT ALL SYSTEMS WERE FUNCTION PROPERLY WHEN THE CONSUMER'S VEHICLE SUDDENLY ACCELERATED AND ENDED UP INSIDE A TRAVEL AGENCY. \*NM

NHTSA ODI Number: 10149327  
Date of Incident: 20060127  
Vehicle: 2006 TOYOTA TACOMA  
Location of Incident: LANSING, NC

NHTSA Summary:  
CRUISE CONTROL SET AT 67 MPH, TRAVELING IN THE LEFT HAND LANE OF HIGHWAY. CAR IN FRONT SLOWED DOWN AND I MOVED TO THE RIGHT LANE AS ANOTHER CAR WAS TAILGATING ME. STEPPED ON THE GAS WHEN THE CAR I WAS TRYING TO GET BY ACCELERATED. TRUCK ACCELERATED RAPIDLY TO 75-90 MPH, STEPPED ON THE BRAKE TO RELEASE CRUISE CONTROL BUT TRUCK CONTINUED ACCELERATION. IN FRONT OF TRUCK WAS SEMI, I HIT THE BRAKES TO CONTROL SPEED, BRAKES DID NOT WORK AS AUTOMATIC BRAKES BUT LIKE OLD BRAKES, PUT BOTH FEET ON BRAKES BUT TRUCK

C-555

Safety Research & Strategies

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

DID NOT SLOW DOWN AND CONTINUED AT 55 TO 65 MPH. WENT INTO THE EMERGENCY LANE, PUT ON FLASHERS, BRAKES WERE SMELLING AT THIS POINT. PUT TRUCK INTO NEUTRAL AND TRUCK CONTINUED MOVING FORWARD AT EXCESSIVE SPEED. PUT IT BACK IN DRIVE AND CONTINUED TO EXIT RAMP WHICH WAS VERY LONG. FINALLY GOT OFF HIGHWAY AND TURNED THE KEY OFF. TRUCK SMELLED BADLY FROM THE BRAKES, WAITED ABOUT 10 MINUTES, CALLED SON WHO CALLED TOYOTA. I CAREFULLY PUT THE TRUCK IN DRIVE AND CRUISED INTO A GAS STATION, TURNED TRUCK OFF, EXITED VEHICLE. SON CALLED BACK AND SAID TOYOTA SAID "DO NOT DRIVE THE TRUCK". THEY SENT A TOW TRUCK TO PICK IT UP. SON AND PARTNER GOT TO VEHICLE AND THE HUB CAPS WERE BURNING HOT FROM BRAKES BEING APPLIED. TOYOTA DROVE VEHICLE FOR 111 MILES AND CHECKED EVERYTHING OUT AND FOUND NOTHING. I CALLED TOYOTA AND HAVE STARTED ARBITRATION FOR THEM TO BUY BACK MY BRAND NEW TRUCK. \*JB  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10334005  
Date of Incident: 20060203  
Vehicle: 2006 TOYOTA COROLLA  
Location of Incident: BALTIMORE, MD

NHTSA Summary:  
TL- THE CONTACT OWNS A 2006 TOYOTA COROLLA. HE STATED THAT ON FEBRUARY 3, 2006 WHILE THE VEHICLE HAD COME TO A COMPLETE STOP THERE WAS AN ACCELERATION AND THE VEHICLE CRASHED INTO ANOTHER VEHICLE IN FRONT. THERE WAS NO DAMAGE TO THE OTHER VEHICLE BUT THE CONTACT VEHICLE SUSTAINED DAMAGES TO THE DRIVER'S SIDE OF THE BUMPER. NO INJURIES AND NO POLICE REPORT WAS FILED. THE VEHICLE WAS TAKEN TO THE DEALER AND BODY REPAIRS WERE DONE BUT WAS INFORMED THAT THEY COULD NOT FIND ANYTHING WRONG WITH THE VEHICLE AFTER EXAMINING IT FOR A FEW DAYS. HE CONTACTED THE MANUFACTURER AND HE DID NOT GET A RESPONSE. HE STATED THAT AFTER TAKING IT BACK FOUR TIMES BEFORE THEY INFORMED HIM THAT THEY REPAIRED THE THROTTLE WHICH HAD CAUSED THE FAILURE. THE FAILURE MILEAGE WAS 200 AND CURRENT MILEAGE WAS 36,000. MR  
Additional Summary:

**Vehicle:** 2004 TOYOTA AVALON  
**Location of Incident:** FLORAL PARK, NY

**NHTSA Summary:**  
DT\* THE CONTACT STATED WHILE BACKING OUT OF A PARKING SPACE THE VEHICLE ACCELERATED WITHOUT WARNING. AS A RESULT, TWO OTHER VEHICLES WERE DAMAGED. HOWEVER, NO INJURIES WERE SUSTAINED. A POLICE REPORT WAS TAKEN AT THE SCENE. THE VEHICLE WAS TOWED TO AN INDEPENDENT REPAIR SHOP AND THEN TAKEN TO THE DEALER. THE DEALER WAS UNABLE TO DUPLICATE THE PROBLEM. THE MANUFACTURER WAS CONTACTED. REPAIRS TO THE REAR END TOTALED \$7014.00 PLUS SALES TAX

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10312210  
**Date of Incident:** 20060212  
**Vehicle:** 2004 TOYOTA MATRIX  
**Location of Incident:** DALLAS, TX

**NHTSA Summary:**  
I OWNED A 2004 TOYOTA MATRIX THAT WAS TOTALLED IN A CAR ACCIDENT IN 2006. I PURCHASED THE CAR NEW AND WAS THE ONLY OWNER. AT THE TIME OF THE ACCIDENT MY SISTER WAS DRIVING, AND I WAS THE PASSENGER. BASICALLY, WE WERE DRIVING ON CRUISE CONTROL IN THE LEFT LANE OF THE HIGHWAY, A SEMI CUT US OFF, AND WHEN MY SISTER PRESSED THE BRAKE PEDAL, THE CRUISE CONTROL WOULD NOT DISENGAGE AND THE CAR WOULD NOT SLOW DOWN. I WITNESSED HER PRESSING THE BRAKE, AND NOTHING WAS HAPPENING. MY SISTER SWERVED INTO THE RIGHT LANE TO AVOID REAR-ENDING THE SEMI, LOST CONTROL OF THE CAR, SPUN INTO THE SIDE OF THE SEMI, AND THEN BOUNCED OFF THE SEMI AND RAN OFF THE HIGHWAY. THE ENGAGEMENT OF THE ENGINE, THE SPEED, AND ACCELERATION OF THE CAR DID NOT CHANGE THROUGHOUT THE ENTIRE COURSE OF THE ACCIDENT. WHEN THE POLICE

C-557

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

CAME OUT, BOTH MY SISTER AND I DESCRIBED THESE EVENTS TO THE POLICE OFFICERS. I ALSO EXPLAINED THIS TO MY INSURANCE COMPANY. AT THE TIME, I BELIEVED SO STRONGLY THAT THE CAR MALFUNCTIONED IN SOME WAY THAT I TRIED TO INVESTIGATE FURTHER, BUT THE INSURANCE COMPANY WAS NOT INTERESTED. AT THE TIME I DID SOME RESEARCH TO SEE IF OTHER DRIVERS WERE HAVING THE SAME PROBLEMS, BUT I COULD FIND NOTHING. SINCE THE CAR WAS TOTALLED, I COULD NOT KEEP THE CAR TO HAVE IT EXAMINED AND I HAD LITTLE CHOICE BUT TO LET THE MATTER GO. NOW IT IS FOUR YEARS LATER AND THERE IS A MASSIVE TOYOTA RECALL, BUT THE 2004 MATRIX IS NOT ON THE RECALL LIST. I FEEL OBLIGATED TO FILE A COMPLAINT, NOT FOR GAIN ON MY PART, BUT BECAUSE I STRONGLY FEEL THAT THE MECHANICAL MALFUNCTIONS IN TOYOTA CARS HAVE BEEN GOING ON FAR LONGER THAN TOYOTA WILL ADMIT, AND THE MALFUNCTIONS ARE MUCH MORE WIDESPREAD THAN THE YEARS AND MODELS CURRENTLY LISTED. I ALSO OWN A 2006 MATRIX THAT IS NOT ON THE RECALL LIST. I AM BEGGING THAT THERE BE A WIDESPREAD INVESTIGATION TO MAKE SURE THAT ALL THE AFFECTED YEARS AND MODELS ARE ADDED TO THE RECALLS. THIS MUST BE DONE TO SAVE LIVES

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10322334  
**Date of Incident:** 20060212  
**Vehicle:** 2003 TOYOTA MATRIX  
**Location of Incident:** AKRON, OH

**NHTSA Summary:**  
TL-2003 TOYOTA MATRIX. THE CONTACT STATED THE RPM'S RACE HIGH WHILE THE VEHICLE IS PARK AND WILL MOVE FORWARD WHILE THE BRAKES ARE APPLIED. THE CONTACT TOOK THE VEHICLE TO A DEALER TO INSPECT THE IDLE. THE DEALER INFORMED THE CONTACT THAT THE IDLE WAS LOW. THREE YEARS AGO THE CONTACT STATED THE DEALER WHERE THE VEHICLE WAS PURCHASED STATED THEY WILL LOWER THE IDLE. THE CONTACT IS UNSURE IF THE IDLE WAS LOWERED BY THE DEALER. THE CONTACT FEELS THE VEHICLE COULD LUNG FORWARD AND CAUSE A CRASH. THE FAILURE MILEAGE WAS 91,000

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 20060213  
**Date of Incident:** 20060212  
**Vehicle:** 2006 TOYOTA CAMRY  
**Location of Incident:** VICTORIA, TX

**NHTSA Summary:**  
**Additional Summary:**  
As of Monday my wife was involved in a sudden acceleration incident in the Wal-Mart parking lot here in Victoria, Texas.  
• She finished shopping  
• Walked to the car  
• Placed the key in the ignition and started the car up.  
• Placed her foot on the brake (foot must be on brake to shift into reverse)  
• Placed the car in reverse and lifted her foot slightly on the brake to back up.  
• The ground was level so no need for her to touch the accelerator pedal  
• With her foot lightly on the brake, the engine took off  
• Although she was attempting to break the car, it quickly impacted the next isle of parked vehicles.  
• The first vehicle was a 1500 series chevy truck.  
• The chevy truck (light in the back end) pivoted around and struck 2 other vehicles.

C-558

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I believe that my wife had her foot on the brake pedal since there were NO skid marks. If she had not been attempting to brake, and instead pushing on the accelerator, there would have been skid marks from the front

tires while pushing the truck around.  
Our car has \$5,000 damage to the trunk and rear quarter panels. We are waiting for Toyota to do a formal "inspection". However, from what I have read I doubt that they will actually find anything. Our vehicle has 6,100 mileage and had no symptoms of anything amiss before the accident.  
We were very lucky nobody was injured, this is a very busy Wal-Mart since Victoria's K-mart closed down a couple years back (population 60,000).  
Bottom line, I don't think Toyota has owned up to a having a sudden acceleration problem and since they have no problem there isn't a need for a fix. Sincerely, Edward A Faxlanger JR.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316956  
**Date of Incident:** 20060217  
**Vehicle:** 2000 TOYOTA CAMRY  
**Location of Incident:** STOCKTON, CA

**NHTSA Summary:**  
I PURCHASED A USED 2000 TOYOTA CAMRY FROM A FRIEND 2 YRS. AGO. MY FRIEND, ORIGINAL OWNER, HAD PROBLEMS WITH THE CAR ACCELERATING ON ITS OWN & EVEN WENT AS FAR AS TO BUY A NEW ACCELERATOR CABLE ASSY. ON THE RECOMMENDATION OF THE TOYOTA DEALER 3/17/06. THEY SAID THAT WOULD FIX THE PROBLEM. I HAVE ALSO HAD THE SAME PROBLEM SINCE I HAVE OWNED THE CAR. SINCE THE PUBLICITY ABOUT THIS PROBLEM NEITHER MY FRIEND NOR I HAVE PUT THE CABLE ASSY. ON FOR FEAR OF MORE PROBLEMS. TOYOTA DOESN'T SEEM TO KNOW HOW TO FIX THE PROBLEM. I STILL HAVE THE ACCELERATOR CABLE ASSY. IN THE ORIGINAL SEALED BAG & I STILL HAVE THE PROBLEM.

**Date of Incident:** 20060220  
**Vehicle:** 2004 TOYOTA TACOMA  
**Location of Incident:** CARLSBAD, CA

**NHTSA Summary:**  
2004 TOYOTA TACOMA VIN STEW7N2X4Z378748 ELECTRONIC THROTTLE CONTROL SYSTEM (ETCS). ON 26 FEB 2005, 14 APR 2005, 17 APR 2005 AND 20 FEB 2005 AFTER PROLONGED DRIVING AT HIGHWAY SPEEDS WHEN STEPPING OFF THE GAS PEDAL TO MAKE A STOP THE ENGINE SPEED WOULD NOT DECREASE AND I WOULD HAVE TO APPLY BOTH FEET TO THE BRAKE PEDAL TO TRY TO SLOW DOWN, AND SWERVE TO THE SIDE TO AVOID HITTING VEHICLES IN FRONT OF ME. AFTER APPROXIMATELY 5-10 SECONDS THE ENGINE SPEED WOULD SUDDENLY DECREASE AND I COULD REGAIN CONTROL. WHILE STRUGGLING TO KEEP CONTROL DID NOT SHIFT FROM DRIVE TO NEUTRAL. IN EACH INSTANCE NO WARNING LIGHTS. BEFORE THESE 4 EVENTS OCCURRED THE ENGINE SUFFERED A CATASTROPHIC FAILURE ON 11 APR 2004 WITH ONLY 1,111 MILES. TOYOTA OF CARSON CITY NEVADA EFFECTED THE REPAIRS TO THE CATASTROPHIC ENGINE FAILURE BY REPLACING THE LOWER BLOCK AND THE CYLINDER HEADS AMONG OTHER COMPONENTS. I TOOK THE CAR TO TOYOTA OF CARLSBAD, CALIFORNIA ON 1 MAR 2005, 20 APR 2005, 5 MAY 2005 AND 23 FEB 2006 FOR THE SPEED CONTROL PROBLEM BUT THEY COULD NOT DUPLICATE IT AND WOULD NOT REPLACE ANY COMPONENTS. APPARENTLY THE COMPUTER DID NOT REGISTER/STORE ANY DIAGNOSTIC FAILURE CODES. I KNOW BY HAVING READ THE TOYOTA SERVICE MANUAL THAT THE ELECTRONIC CONTROL MODULE DOES NOT RECORD ALL FAILURES. I CANNOT TELL IF THIS PROBLEM WAS PRESENT WHEN THE CAR WAS BUILT OR WHETHER IT WAS INDUCED BY REPAIRS FOR THE CATASTROPHIC ENGINE FAILURE. WHAT I DO KNOW IS THAT I HAVE A SERIOUS SAFETY ISSUE. I AM VERY CONCERNED ABOUT NOT BEING ABLE TO AVOID HITTING A PEDESTRIAN OR ANOTHER VEHICLE. I HAVE EXHAUSTED ALL CONSUMER SUPPORT AVENUES WITH TOYOTA. REFERENCE NUMBER 20060224017 WITH ELOISE TOYOTA CUSTOMER SUPPORT 1-800-331-4331 TODAY 24 FEB 2006 INDICATES THAT THEY WILL NOT DO ANYTHING ELSE. I STRONGLY SUSPECT THAT THERE ARE TWO FAILURES. FIRST, THE THROTTLE BODY IS MALFUNCTIONING INTERMITTENTLY CAUSING THE PROBLEM. SECOND, THE ECM IS FAILING TO DETECT AND RECORD THE EVENT. \*NM

**Date of Incident:** 20060221  
**Vehicle:** 2006 TOYOTA AVALON  
**Location of Incident:** PIKESVILLE, MD

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2006 TOYOTA AVALON. THE CONTACT STATED THAT WHEN DRIVING, HIS VEHICLE SUDDENLY ACCELERATED APPROXIMATELY 60 MPH. HE DEPRESSED THE BRAKES BUT THE VEHICLE CONTINUED TO ACCELERATE. HE KEPT PRESSING THE BRAKES AND SHIFTED GEARS INTO NEUTRAL. UNTIL EVENTUALLY THE VEHICLE BEGAN TO DECELERATE. HE TOOK THE VEHICLE TO THE DEALER AND WAS INFORMED THAT THE CAUSE MAY HAVE BEEN THE FLOOR MATS. HE DID NOT HAVE ANY MORE PROBLEMS AFTER THAT FAILURE OCCURRED IN MARCH 2006. HE CALLED THE MANUFACTURER IN 2009 ABOUT THE FLOOR MAT RECALL 09V388000 AND WAS TOLD TO GO TO THE DEALER TO HAVE THE FLOOR MATS REMOVED. THE CONTACT STATED THAT THE CURRENT MILEAGE WAS APPROXIMATELY 64,900. THE FAILURE MILEAGE WAS APPROXIMATELY 5,000.

**NHTSA ODI Number:** 10157743  
**Date of Incident:** 20060224  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** VERNON HILLS, IL

**NHTSA Summary:**  
I WAS SLOWLY TURNING LEFT INTO A PARKING SPACE AT ABOUT 3:30 P.M. WHEN MY 2005 TOYOTA CAMRY SUDDENLY, AND QUITE RAPIDLY, ACCELERATED WITHOUT ANY INPUT FROM ME. IT JUMPED A CURB, CROSSED A SIDEWALK, AND A TREE STOPPED THE CAR. IT FELT LIKE I HAD NO CONTROL OF THE CAR. ALSO, THE STEERING WAS EXTREMELY DIFFICULT. SOMEHOW, I MANAGED TO STEER THE CAR AWAY FROM THE APARTMENT BUILDING AND MY NEIGHBOR GLASS SLIDER. THE CAR TRAVELED ABOUT 30 PLUS FEET IN ITS ACCELERATION, WHEN A TREE STOPPED IT. IT LEFT ABOUT 20 FEET OF SKID MARKS. I WAS NOT HURT IN THE CRASH. THE CAR SUSTAINED DAMAGE, MAINLY TO THE FRONT BUMPER, COOLANT SYSTEM, AND HOOD, FOR APPROXIMATELY \$5,400. I FILED A COMPLAINT WITH TOYOTA CORPORATION, TORRANCE, CALIFORNIA, AND THEY INVESTIGATED THE CAR. THEY REPORTED THEY COULD FIND NOTHING WRONG WITH THE CAR, AND THERE WERE NO DESIGN FAULTS. THE TOYOTA DEALER WHERE I HAD BOUGHT THE CAMRY ADDITIONALLY TESTED THE CAR COMPUTERS, AND ALSO CALLED IN A TOYOTA FACTORY REPRESENTATIVE TO TEST THE CAR. THEY COULD FIND NOTHING WRONG WITH THE CAR. I SOLD THE CAMRY BACK TO THIS DEALER. THE CAR HAD ABOUT 5,400 MILES ON IT AT THE TIME OF THE CRASH. THE CAR HAD BEEN RUNNING WELL UNTIL THIS SUDDEN, UNEXPLAINED ACCELERATION THAT RESULTED IN A CRASH. \*JB

**Vehicle:** 2006 TOYOTA RAV4  
**Location of Incident:** NASHVILLE, TN

**NHTSA Summary:**  
I PURCHASED A 2006 TOYOTA RAV4 LIMITED 4 CYL IN JANUARY/FEBRUARY OF 2006. I NOTICED A PROBLEM IN ACCELERATION/HESITATION AFTER DRIVING THE VEHICLE FOR ABOUT A WEEK. I HAVE EXPERIENCED ACCELERATION PROBLEMS ON A DAILY BASIS. STEADY PRESSURE ON THE ACCELERATOR YIELDS NO RESPONSE, OR A STUTTER AS

C-561

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THOUGH THE CAR IS ABOUT TO STALL. WHEN THIS OCCURS, THE ONLY WAY TO GET THE CAR MOVING IS TO PUSH THE PEDAL ALL THE WAY TO THE FLOOR, AT WHICH POINT THE ENGINE RACES AND THE CAR SPEEDS UP. THIS HESITATION HAPPENS THROUGHOUT THE DAY. THE FIRST TIME THIS OCCURRED I WAS PULLING ONTO A MAJOR HIGHWAY FROM A SIDE STREET AND WAS NEARLY REAR-ENDED BECAUSE THE CAR SIMPLY WOULD NOT GO (UNTIL I SLAMMED THE PEDAL TO THE FLOOR). THIS IS VERY UNSAFE FOR EVERYDAY DRIVING. I REPORTED THE PROBLEM TO THE TOYOTA DEALER WHO STATED THAT THIS PROBLEM WAS 'NORMAL' FOR TOYOTAS AND SOMETHING I NEEDED TO GET USED TO. THEY DID CHECKOUT THE CAR AND SAID NO ERROR CODES WERE GENERATED AND THEY WERE UNABLE TO DUPLICATE THE PROBLEM. \*NM

**NHTSA ODI Number:** 10305396  
**Date of Incident:** 20060301  
**Vehicle:** 2005 TOYOTA HIGHLANDER  
**Location of Incident:** VISTA, CA

**NHTSA Summary:**  
MY 2005 TOYOTA HIGHLANDER HAS CHRONIC TRANSMISSION PROBLEMS. WHEN ACCELERATING, THE ENGINE REVS BUT THE TRANSMISSION HESITATES NOTICEABLY BEFORE GONG INTO GEAR. SOMETIMES THE HESITATION LASTS SO LONG THAT IT INTERFERES WITH MY ABILITY TO MERGE ONTO THE FREEWAY AND THOSE ARE VERY SCARY SITUATIONS. SOMETIMES THE TRANSMISSION CANNOT DECIDE WHAT GEAR TO BE IN AND WHEN IT DOES ENGAGE THE WHOLE CAR BUCKS OR SHUDDERS. EVERYONE WHO DRIVES MY CAR EXPERIENCES THE SAME PROBLEM. EVEN THE PASSENGERS NOTICE. THE TOYOTA DEALER CLAIMS THAT THERE IS NO PROBLEM WITH THE VEHICLE AND THAT THE PROBLEM IS MY DRIVING AND THAT I HAVE NOT ADJUSTED TO THE CAR'S "DRIVE BY WIRE" SYSTEM. ONE MECHANIC DID ADMIT THAT THERE WERE ISSUES WITH THE TRANSMISSION'S COMPUTER FOR THIS MODEL YEAR. OTHER THAN THAT, TOYOTA INSISTS THAT THERE IS NO PROBLEM AND THAT I HAVE TO LEARN HOW TO DRIVE THE CAR.

**Vehicle:** 2004 TOYOTA COROLLA  
**Location of Incident:** ST. THOMAS, VI

**NHTSA Summary:**  
DROVE CAR TO WORK ON DAY OF ACCIDENT WITH NO INCIDENTS. PARKED VEHICLE FOR ABOUT 5 HOURS THEN DROVE IT AGAIN FOR ABOUT 1 HALF HOUR THEN PARK. AT 5:00 P.M. LEFT THE OFFICE TO GO HOME. ON THE WAY HOME I MADE TOW STOPS, ONE AT THE POST OFFICE AND ANOTHER AT MY SISTER'S HOUSE. UPON LEAVING MY SISTERS, I PROCEEDED TO GO UP HILL. WHEN I GOT TO THE TOP OF THE HILL WITH MY FOOT ON THE BRAKE PEDAL I PROCEEDED TO PUT THE VEHICLE IN LOW GEAR AS I AM ACCUSTOMED TO WHEN GOING DOWN A HILL WHICH I WAS ABOUT TO DO. AS I PUT THE VEHICLE IN GEAR, IT ACCELERATED TO TOP SPEED GOING DOWN THE HILL. I LOOKED DOWN TO MAKE SURE MY FOOT WAS ON THE BRAKE PEDAL...IT WAS. THE VEHICLE BEGAN RACING DOWN HILL. I APPLIED THE EMERGENCY BRAKES BUT IT DID NOT HOLD. I DECIDED TO TRY TO STEADY THE VEHICLE WITH BOTH HANDS ON THE STEERING WHEEL AS I LOST CONTROL OF THE VEHICLE TO NO AVAIL. I CRASHED INTO A PARKED VEHICLE. BOUNCED FROM SIDE TO SIDE THEN HIT A BUMP IN THE ROAD AND BECAME AIRBORNE. THE VEHICLE DROPPED IN A DITCH BOUNCED AGAIN THEN CRASHED INTO A DIRT EMBANKMENT ON THE OTHER SIDE OF THE STREET AT WHICH TIME BOTH THE DRIVER'S AND PASSENGER'S AIRBAGS DEPLOYED. ON JANUARY 6, 2006 I TOOK THE VEHICLE TO THE TOYOTA DEALER HERE ON ISLAND FOR FULL SERVICE. THE FRONT BRAKES WERE CHANGED AS INDICATED ON MY WORK ORDER AND THE BACK BRAKES WERE CLEANED AND ADJUSTED. ON MARCH 6, 2006, I WENT IN TO THE SERVICE DEPARTMENT TO REPORT THE ACCIDENT DESCRIBING WHAT HAPPENED. I WAS TOLD THAT THE BRAKES WERE NOT THE PROBLEM. WHEN I ASKED WHAT WOULD CAUSE THE VEHICLE TO DO SOMETHING LIKE THAT, THEY TOLD ME THEY DID NOT KNOW AND THAT THEY WOULD HAVE A SPECIALIST FROM PUERTO RICO FLY IN TO LOOK AT THE VEHICLE. I AM WAITING TO HEAR FROM THEM. \*NM

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10313949  
**Date of Incident:** 20060308  
**Vehicle:** 2005 TOYOTA PRIUS  
**Location of Incident:** MINNEAPOLIS, MN

**NHTSA Summary:**  
I OWN A 2005 PRIUS AND HAVE 3 UNINTENDED ACCELERATION INCIDENTS IN 5 YEARS, TWO SEPARATE DRIVERS. CITY DRIVING AT 35 MPH. PEDAL DID NOT STICK, IT WAS SUCKED TO THE FLOOR WE TURNED OFF ENGINE BEFORE SPEED GOT TO 50MPH. NO ACCIDENT OR INJURY, NOTE THIS: EACH TIME I ASKED THE DEALER REPAIR SHOP ABOUT IT, THEY DISMISSED IT AS FLOOR MATS AND "COULD NOT REPRODUCE IT!". INTERESTINGLY, THE REPAIR REQUEST DID NOT SHOW UP ON DEALER'S ACTION LIST (2 DIFFERENT DEALERS) EVEN THO EVERY TIME I ASKED ABOUT A SQUEAK OR RATTLE DID SHOW UP ON THE RECORDS. DID TOYOTA GIVE INSTRUCTIONS TO DEALERS ON HOW TO DOWNPLAY IT AND NOT RECORD THE COMPLAINT?

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10157263  
**Date of Incident:** 20060309  
**Vehicle:** 1999 LEXUS ES  
**Location of Incident:** CONWAY, SC

**NHTSA Summary:**  
THE FOLLOWING LETTER TO LEXUS & THEY DENIED FAULT OR OBLIGATION TO ASSIST ME. I SPOKE WITH HEATHER STAFFORD WHO ASKED ME TO CALL 800-348-2788 TO GET MY CAR INSPECTED BY A LEXUS IN CHARLESTON SC. I WAS TOLD NOTHING COULD BE DONE SINCE THE CAR HAD ALREADY BEEN FIXED. THEY TOLD ME THAT THE SERVICE MNGR. DARYL WOULD CALL ME BACK BUT I NEVER HEARD FROM ANYONE. LIFE-THREATENING EXPERIENCE INVOLVED THE CRUISE CONTROL MALFUNCTIONING ON MY 1999 LEXUS ES300, THURSDAY, 3/9/06. I HAD SET MY CRUISE ON 50 MPH AND IT SUDDENLY ACCELERATED ON ITS OWN UP TO 88 MPH. I DEPRESSED THE CRUISE TO TURN IT OFF WHILE PRESSING THE BRAKES TO STOP THE CAR. I PUT THE CAR IN NEUTRAL AND HELD THE BRAKES DOWN, THE ENGINE REVVED HIGH AND THE CAR STILL WOULDN'T STOP. FEARING FOR MY LIFE AND LOSING CONTROL OF THE CAR, I TURNED THE IGNITION OFF AND HEARD THE ENGINE MAKE A LOUD, DISTRESSING NOISE. THE

C-565

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

VEHICLE COASTED TO A STOP AND WOULDN'T RESTART, SO I CALLED THE ONLY TOW TRUCK IN THE AREA. TOWED TO CONWAY, BUMPER TO BUMPER IMPORT AUTOS AND THE MECHANIC: DALE SAID I HAD BLOWN THE MOTOR. I ASKED HIM, WHAT CAUSED IT, HE SAID IT+---?S OBVIOUSLY RELATED TO THE OVER-STRESSED ENGINE BEING STOPPED SO ABRUPTLY WHEN I TURNED THE IGNITION OFF. HE MENTIONED THAT THE CRUISE CONTROL SHOULD NOT HAVE DONE THAT AND HE ADDED HIS STATEMENT ON THE INVOICE: +---?CRUISE CONTROL WIRING CAUSED STICKING THROTTLE+---?. LEXUS VEHICLES HAD REPORTED PROBLEMS IN NY TIMES FOR RECALLS FOR THE SAME MALFUNCTION, SO MY CAR SHOULD BE RECALLED. THEREFORE, I EXPECT LEXUS TO REFUND ME THE TOTAL EXPENSES BELOW INCURRED DUE TO THIS OBVIOUS CRUISE CONTROL DEFECT: CAR INFO-VIN#JTBFB28G3X0173900ENGINE: V6 MOTOR REPLACED \$2400.00 LABOR/ADDITIONAL PARTS \$1500.00 RENTAL CARS \$ 288.00 TIME LOSS FROM WORK 3DAYS X 8HRS = 24HRS @ 31.84 = \$ 764.00 TOTAL REFUND REQUESTED=\$4952.00.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10311429  
**Date of Incident:** 20060310  
**Vehicle:** 2006 TOYOTA SIENNA  
**Location of Incident:** CINCINNATI, OH

**NHTSA Summary:**  
I AM ASSUMING YOU HAVE SEEN THE ARTICLE ABOUT STEVE WOZNIAK COMPLAINING ABOUT HIS CRUISE CONTROL ON HIS TOYOTA PRIUS. IT IS AN ISSUE OF USING CRUISE CONTROL WITH THE SONAR ACTIVATED TO SLOW THE CAR DOWN TO MAINTAIN A SAFE DISTANCE BETWEEN THE CAR IN FRONT OF YOU. WHEN THE CAR IN FRONT MOVED OUT OF YOUR LANE, YOUR CAR TAKES OFF LIKE A ROCKET TO REGAIN THE PROGRAMMED SPEED. I HAVE A TOYOTA SIENNA MINI VAN THAT DOES THE SAME THING HE DESCRIBED. WHEN I COMPLAIN TO THE DEALER THEY TELL ME IT WORKS AS DESIGNED. I ASK THEM IF THEY WANT TO DRIVE THEIR KIDS AROUND ON THE INTERSTATES USING THE CRUISE CONTROL WITH THE SONAR ACTIVATED OR PAY MY SPEEDING TICKET WHEN I GET PULLED OVER WHEN IT DOES THIS. AFTER ACCELERATING AT SUCH A HIGH SPEED THE BRAKING MECHANISM KICKS IN TO SLOW THE CAR DOWN. SO YOU KNOW YOU HAVE GONE ABOVE THE SPEED YOU SET THE CRUISE CONTROL. A CAR SHOULDN'T TAKE OFF LIKE A ROCKET AND CAUSE YOU TO SPEED WHEN THE CAR IN FRONT OF YOU MOVES OUT OF YOUR LANE. IT ALSO DOES THIS WITH THE SONAR OFF AND HITTING THE "RESUME SPEED" SWITCH ON THE CRUISE. I HAVE NOT HAD AN ACCIDENT WITH THIS ISSUE, BUT IT SURE IS SCARY WHEN IT DOES THIS. AS A RESULT, I DON'T USE MY CRUISE CONTROL VERY OFTEN AND IF I DO, USUALLY KICK IT OFF BY TAPPING THE BRAKE WHEN THE SONAR SLOWS THE CAR DOWN SO IT DOESN'T TAKE OFF LIKE A ROCKET. I AM SURE IT IS A PROGRAMMING ISSUE BUT IT SURE ISN'T SAFE OR COMFORTING THE WAY IT CURRENTLY WORKS. \*TR

**Toyota ID Number:**  
**NHTSA ODI Number:** 10152553  
**Date of Incident:** 20060312  
**Vehicle:** 2004 TOYOTA PRIUS  
**Location of Incident:** PORTAGE, MI

**NHTSA Summary:**  
DT\*: THE CONTACT STATED UPON ENTERING A HIGHWAY AT 60MPH, THE VEHICLE ACCELERATED RAPIDLY. BRAKE PRESSURE WAS APPLIED, BUT THE VEHICLE DID NOT STOP ACCELERATING. EACH TIME BRAKE PRESSURE WAS APPLIED; THERE WAS A LOUD GRINDING NOISE. ALTHOUGH THE CRUISE CONTROL WAS NOT ENGAGED, THE CRUISE CONTROL WAS MANUALLY ACTIVATED IN AN ATTEMPT TO STOP THE ACCELERATION. WITH BRAKE PRESSURE APPLIED, THE CONTACT MANAGED TO EXIT THE FREEWAY USING THE EXIT RAMP. WHEN THE VEHICLE SLOWED, THE PARK BUTTON OPTION WAS PRESSED AND THE VEHICLE STOPPED. THERE WAS NO FURTHER ACCELERATION OR GRINDING NOISE. THE VEHICLE WAS TOWED TO THE DEALER AND IS AWAITING INSPECTION OF THE PROBLEM.

NHTSA ODI Number: 10348813  
Date of Incident: 20060313  
Vehicle: 2006 TOYOTA TACOMA  
Location of Incident: CHICAGO, IL

NHTSA Summary:

WHILE I WAS DRIVING AND APPROACHING AN INTERSECTION I HEARD CELLULAR PHONE INTERFERENCE THROUGH MY VEHICLE SPEAKERS. THE TRAFFIC LIGHT CHANGED TO RED. I PLACED MY FOOT ONTO THE BRAKE PEDAL WHICH WAS NOT EFFECTIVE DUE TO THE CONTINUED ACCELERATION OF MY VEHICLE, AND SIMULTANEOUSLY HEARING LOUD ENGINE NOISE DUE TO THE ACCELERATION. IN ATTEMPT TO AVOID VEHICLES I STRUCK AND KNOCKED OVER TWO CEMENTED POSTS, AVOIDED TO DRIVE INTO A BUILDING, I STILL CONTINUING TO ACCELERATE AND DRIVE ONTO A SIDEWALK WHERE I WAS ABLE TO PLACE MY VEHICLE INTO NEUTRAL TO STOP THE ACCELERATION AND TURNING OFF MY VEHICLE. I HAVE HAD TWO OTHER SITUATIONS WITH ACCELERATION PROBLEMS APPROXIMATELY 12 MONTHS APART. ONE INVOLVED STRIKING TWO VEHICLES ONTO ONCOMING TRAFFIC WHEN LOSING CONTROL OF MY VEHICLE. SECOND WAS WHEN MERGING ONTO AN INTERSTATE MY VEHICLE CONTINUED TO ACCELERATE, I HAD TIME TO CHECK MY FLOOR MATS FOR POSSIBLE PEDAL OBSTRUCTION WHICH WAS CLEAR. I PLACED MY CAR INTO NEUTRAL WHEN THE RPM GAUGE OF MY VEHICLE WENT TO THE RED FOR SEVERAL SECONDS AND THEN CORRECTED ITSELF TO THE IDLE POSITION WHERE I WAS ABLE TO PLACE THE VEHICLE BACK INTO DRIVE AND WAS ABLE TO CONTINUE AS NORMAL WITHOUT ANY INCIDENT.

Safety Research & Strategies

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

Vehicle: 2005 TOYOTA CAMRY  
Location of Incident: KING CITY, OR

NHTSA Summary:

>RE: TOYOTA CAMRY ISSUES AUGUST 2005 I PURCHASED A 2005 TOYOTA CAMRY FROM BEAVERTON TOYOTA WITH ODOMETER READING OF 9 MILES. I DROVE WORKDAYS APPX 24 MI ROUNDTRIP. MARCH 20, 2006 (5300 MILEAGE) I COMPLAINED TO TOYOTA DEALERSHIP OF A RAW GAS SMELL THAT WAS IN MY GARAGE (WITH GAS FURNACE PRESENT) AND SO STRONG WHEN DRIVING, I ALMOST PASSED OUT AT THE WHEEL. I DROVE WITH WINDOWS DOWN. I INITIALLY THOUGHT I WAS INHALING EXHAUST FUMES FROM COMMUTER TRAFFIC. I ALSO COMPLAINED AT THAT TIME THAT MY ACCELERATOR "LURCHED" FROM A STOP. DIAGNOSIS & REPAIR: DEALERSHIP COULD NOT VERIFY MY "LURCH" BUT NOTICED A "SLIGHT HESITATION CAUSED BY THE FLY BY WIRE THROTTLE. THIS IS NORMAL. NO TSBS." AS FOR THE RAW GAS ODOR, THERE WAS FLUID DRIPPING BEHIND THE RT FRONT WHEEL WITH THE TEXTURE OF "OIL" BUT FUEL DRIPPING FROM BEHIND THE FR TIRE, WHICH WAS "CURED" BY PUTTING IN A NEW INJECTOR. AUGUST 24, 2006 (7000 MILEAGE) I COMPLAINED THAT VEHICLE WAS "LEAKING OIL" AND AGAIN SMELLING OF RAW GAS. DIAGNOSIS & REPAIR: DEALERSHIP "VERIFIED RR STRUT IS LEAKING, THROUGH THE SEAL, REPLACED RR STRUT." NOTE: BOTH TIMES I WAS INSTRUCTED NOT TO DRIVE MY CAR INTO THEIR SERVICE AREA, BUT TO LEAVE MY CAR OUTSIDE. ALTHO THE GAS FUME ISSUE WAS RESOLVED IT HAS ALWAYS JERKED OR LURCHED FROM A DEAD STOP. I HAVE JUST ADAPTED MY DRIVING TO ACCOMMODATE THIS. IN LIGHT OF THE CURRENT TOYOTA RECALL AND SITUATION (MY 05 CAMRY IS NOT ON THE LIST OF RECALLS TO MY KNOWLEDGE.) I AM PASSING ALONG THIS INFORMATION TO SEE IF MY SITUATION WAS UNUSUAL, OR IF THERE ARE ADDITIONAL PROBLEMS WITH TOYOTA CAMRY AND AS FAR BACK AS 2005-06?  
Additional Summary:

**Toyota ID Number:**  
**NHTSA ODI Number:** 10153507  
**Date of Incident:** 20060323  
**Vehicle:** 2005 TOYOTA AVALON  
**Location of Incident:** SCOTTSDALE, AZ  
**NHTSA Summary:**  
DT\*: THE CONTACT STATED WHILE DRIVING SPEEDS OF 5MPH OR LESS IN STOP AND GO TRAFFIC, THERE WAS A DELAYED ACCELERATION FOLLOWED BY A SUDDEN ACCELERATION FORWARD. THE VEHICLE WAS SEEN BY AN AUTHORIZED DEALER. A FACTORY REPRESENTATIVE INSPECTED THE VEHICLE AND REPROGRAMMED THE ELECTRONIC CONTROL MODULE.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10160844  
**Date of Incident:** 20060323  
**Vehicle:** 1999 LEXUS ES  
**Location of Incident:** CONWAY, SC  
**NHTSA Summary:**  
SUDDEN ACCELERATION - CRUISE CONTROL MALFUNCTIONED, IT WOULD NOT TURN-OFF BUT INSTEAD THE VEHICLE ACCELERATED ON ITS OWN FROM 55 TO 90 MPH. \*NM  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10154294  
**Date of Incident:** 20060325  
**Vehicle:** 2004 TOYOTA CAMRY  
**Location of Incident:** BROAD RUN, VA  
**NHTSA Summary:**  
SUDDEN ACCELERATION OF OUR 2004 TOYOTA CAMRY XLE AFTER SLOWING DOWN AND MAKING A 100 DEGREE RIGHT TURN INTO THE GARAGE. THE CAR ACCELERATED ON ITS OWN FOR 90 FEET, SIDE-SWIPED OUR JEEP PARKED IN THE GARAGE, AND THEN TOOK OUT THE LOAD BEARING WALL AT THE REAR RIGHT OF THE GARAGE. CAR HAS 16K MILES ON IT AND HAS BEEN GARAGED AT ALL TIMES. INSURANCE ADJUSTER SAYS THERE APPEARS TO BE A PROBLEM, BUT CANNOT FIGURE IT OUT SINCE THIS IS CAR RELIES ON ELECTRONIC CONTROL THROUGHOUT. \*NM  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10319427  
**Date of Incident:** 20060325  
**Vehicle:** 2006 TOYOTA MATRIX  
**Location of Incident:** PITTSBURGH, MA  
**NHTSA Summary:**  
MY COMPLAINT WAS FIRST FILED ON 3/25/2006 (ODI # 10153679). THIS IS THE 2ND COMPLAINT ABOUT THE DEFECTIVE TOYOTA MATRIX THAT I DROVE IN 2006. I WAS DRIVING A 2006 TOYOTA MATRIX AND LOST TOTAL CONTROL OVER THE VEHICLE. I WAS DRIVING ON RT 2 WEST BOUND OUT OF BOSTON DURING EVENING RUSH HOUR. I WAS TRYING TO CHANGE LANE TO MY RIGHT AND FOUND THERE WAS A CAR APPROACHING AND HONKED AT ME. I HAD NOT LEFT MY LANE YET AND TRIED TO PULL MY CAR

C-573

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

STRAIGHT BACK. THE CAR REACTED BY SHIFTING TOO MUCH TO THE LEFT AND I TRIED ONLY TO ADJUST IT, KEEPING IN MIND THAT THAT WAS A POWER-STEERED SYSTEM, TO KEEP IT STRAIGHT. THERE WAS A 1-2 SECONDS AFTERWARDS THE CAR SEEMED TO BE ON TRACK AND I WAS DRIVING FINE. AFTER THAT 2 SECONDS, THE CAR ACCELERATED ALL OF A SUDDEN, GAS PADDLE WAS DOWN TO THE FLOOR, THE CAR VEERED TOWARD THE LEFT ON ITS OWN. I TRIED TO MAINTAIN IT STRAIGHT BUT IN VAIN AND COMPLETELY LOST CONTROL OVER IT. THE WHEEL WAS SO SOLID AND IT WAS IMPOSSIBLE TO STEER THE CAR EVEN JUST A LITTLE BIT. IT SPUN COUNTERCLOCKWISE OVER 3 LANES TOWARD MY LEFT AND HIT THE CENTRAL GUARDRAIL AND STOPPED. THE VEHICLE WAS TOTALLED. THE POLICE ISSUED ME A TICKET ON THE SPOT. OTHER THAN COMPLAINT ODI # 10153679 FILED AT THIS WEBSITE AFTER THE INCIDENT, I ALSO FILED A COMPLAINT AT TOYOTA'S WEBSITE ON THE SAME DAY (3/25/2006). THE MATRIX MODEL WAS STOPPED IN 2007 AND CONTINUED IN 2008 WITH AN ADVERTISEMENT THAT IT WAS A COMPLETE NEW DESIGN. I LATER CHECKED THE INTERNET AND FOUND A VERY SIMILAR ACCIDENT HAPPENED IN NEW YORK STATE ON 10/9/2005. A WOMAN NAMED JEAN M. NAPLES, 55 OF WEST HARVERSTRAW WAS DRIVING A MATRIX. HER CAR SPUN OFF ROUTE 287 IN HARDING AND SHE WAS HOSPITALIZED AFTERWARDS.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10153776  
**Date of Incident:** 20060326  
**Vehicle:** 2004 TOYOTA COROLLA  
**Location of Incident:** MERRIAM, KS  
**NHTSA Summary:**

DT\*: THE CONTACT STATED WHILE PLACING THE ENGINE INTO DRIVE, THE ENGINE REVVED HIGH AND THE VEHICLE SUDDENLY ACCELERATED. THE BRAKE PEDAL WAS DEPRESSED WHEN THE VEHICLE CRASHED INTO A BRICK GARAGE WITH NO PRIOR WARNING. THE VEHICLE SUSTAINED DAMAGE TO THE FRONT WITH ADDITIONAL DAMAGE TO THE GARAGE. THE POLICE WERE NOT CONTACTED SINCE THIS HAPPENED ON PRIVATE PROPERTY. THE VEHICLE REMAINS AT THE SCENE OF THE INCIDENT AND HAS NOT BEEN INSPECTED.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10310704  
**Date of Incident:** 20060329  
**Vehicle:** 2005 TOYOTA PRIUS  
**Location of Incident:** ST CHARLES, MO  
**NHTSA Summary:**

I WAS INVOLVED IN AN ACCIDENT WITH MY 2005 PRIUS ON 3/29/2006. THE CAUSE OF THE ACCIDENT REMAINS A MYSTERY. I WAS SITTING AT AN INTERSECTION, WAITING FOR TRAFFIC TO CLEAR. WITNESSES REPORTED THAT I PULLED OUT INTO THE ONCOMING TRAFFIC, RESULTING IN A COLLISION WITH ANOTHER VEHICLE. DUE TO THE INJURIES I SUFFERED (A MINOR CONCUSSION RESULTING IN RETROGRADE AMNESIA), I HAD NO RECOLLECTION OF THE PERIOD PRIOR TO ARRIVING AT THE INTERSECTION UP UNTIL THE PARAMEDICS REMOVED ME FROM THE VEHICLE. AS SUCH, I CAN'T EXPLAIN EXACTLY WHAT HAPPENED. WHILE I HAVE NO PROOF OF THIS, IT SEEMS THAT A POSSIBILITY WOULD BE AN ISSUE WITH THE STUCK ACCELERATOR THAT'S BEING REPORTED RELATING TO THE PRIUS. I'VE BEEN AT A LOSS TO EXPLAIN WHY I WOULD HAVE PULLED OUT IN FRONT OF ONCOMING TRAFFIC AT AN INTERSECTION THAT I WAS VERY FAMILIAR WITH. WHEN I HEARD OF THE ACCELERATION ISSUES WITH THE PRIUS, I WONDERED IF THAT COULD HAVE BEEN THE CAUSE. SINCE THE VEHICLE WAS

C-574

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TOTALLED, IT'S NO LONGER AVAILABLE FOR INSPECTION. I THOUGHT I'D SUBMIT THIS REPORT TO ADD TO THE SUSPECTED CASES OF ACCELERATOR ISSUES. \*TR

**Vehicle:** 2005 TOYOTA PRIUS

**Location of Incident:** BERKELEY, CA

**NHTSA Summary:**

I HAVE REVIEWED MY SERVICE RECORDS AND IT IS QUITE CLEAR THAT I HAVE HAD PROBLEMS WITH THE "ELECTRICAL" SYSTEM IN MY CAR SINCE APRIL 2006 @ 3,370 MILES. THIS WAS ALSO THE SAME TIME IT BEGAN TO ACCELERATE FROM A STOPPED POSITION FOR THE FIRST TIME. WHEN I NOTICED THAT THE BRAKING SYSTEM BEGAN TO "FEEL" DIFFERENT, WHEN THE CAR BEGAN "SLIPPING" ON PERFECTLY DRY ROADS, AND WHEN MY STEERING WHEEL WOULD LOCK UP. I FIND IT DIFFICULT TO BELIEVE THAT THE FAILURE OF MY BRAKES AND MY INTERMITTENT ACCELERATION ISSUES ARE NOT SOMEHOW RELATED TO THE CAR'S "COMPUTER" SYSTEM AND NOT MECHANICAL ISSUES. I HAVE FILED COMPLAINTS WITH TOYOTA FOR THESE ISSUES (CASES # 200807100210, 200811030088). I EXPERIENCED MY FIRST BRAKING ISSUE ON 27-JUN-2008 (25,133 MILES). WHILE I WAS ABLE TO BRING THE CAR TO A STOP EVENTUALLY, THE SLOWING OF MY CAR WAS A VERY GRADUAL PROCESS REQUIRING HEAVY PRESSURE ON THE BRAKE WITH MINIMAL BRAKING RESPONSE. I WENT TO THE TOYOTA DEALERSHIP. THE DTC CODE AT THE TIME WAS C1247 WITH "CODE 179" STORED. THERE WAS "NO BRAKE ASSIST." THE DEALERSHIP RESET THE MEMORY AND REINITIALIZED THE LINEAR SOLENOID VALVE AND CALIBRATION. THE BRAKES WERE REPORTED TO HAVE

C-580

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

RETURNED TO "NORMAL." ON 09-JUL-2008 (25,551 MILES), I RETURNED TO THE DEALERSHIP BECAUSE MY BRAKES FAILED AGAIN. THIS TIME MY BRAKE FAILURE RESULTED IN A CAR ACCIDENT (THE PERSON I HIT STATED AT THE TIME OF THE ACCIDENT HE HAD WHIPLASH BUT HE NEVER CONTACTED ME AFTERWARDS). TOYOTA REPLACED THE SKID CONTROL ECU AND RECHECKED OPERATION REASSURING ME ONCE AGAIN THAT THE BRAKES HAD RETURNED TO "NORMAL." ON 03-NOV-2008 (29,575 MILES) AS I WAS DRIVING OVER 65 ON A MAJOR HIGHWAY MY BRAKES AGAIN FAILED (DTC C1247, CODE 179). TOYOTA CASE #08300402. AT THIS POINT THE REPAIR SHOP REPLACED THE BRAKE STROKE SENSOR. I AM CONCERNED BECAUSE MY CAR HAD AN ACCELERATION ISSUE ON 13-FEB-2010 AND I FIND IT TO BE "SLIPPING" AGAIN ON DRY ROADS. SIMILAR PROBLEMS TO THOSE I HAD BEFORE MY BRAKES FAILED. PLEASE HELP. UPDATED IV0Q 04/02/10

**NHTSA ODI Number:** 10154549  
**Date of Incident:** 20060403  
**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** BOYNTON BEACH, FL

**NHTSA Summary:**

I WAS PARKED IN A STRIP MALL WHERE I HAD JUST PICKED UP SOME DRY CLEANING. I ENTERED MY CAR, A 2003 TOYOTA CAMRY XLE, AND STARTED THE ENGINE. I THEN PUT THE CAR IN REVERSE GEAR, AND REMOVED MY FOOT FROM THE BRAKE. THE CAR SUDDENLY ACCELERATED IN REVERSE, AND WENT TOTALLY OUT OF CONTROL, HITTING ANOTHER CAR PARKED ACROSS FROM MINE AND CONTINUED IN A SOMEWHAT CIRCULAR PATH UNTIL I WAS ABLE TO APPLY THE BRAKE AND COME TO A STOP. I HAVE CALLED NHTSA TODAY AND WAS TOLD THAT THERE HAVE BEEN 83 PREVIOUS COMPLAINTS FOR THIS VEHICLE UNDER "VEHICLE SPEED CONTROL," AND 15 COMPLAINTS UNDER "VEHICLE SPEED CONTROL, ACCELERATOR PEDAL." I HAVE ALSO CALLED TOYOTA MOTOR SALES (1 800 331-4331) AND WAS TOLD THAT THEY WOULD MAKE AN APPOINTMENT WITH A NEARBY TOYOTA DEALER TO HAVE MY CAR INSPECTED FOR ANY DEFECTS. I HAVE ALSO GONE TO A AUTO BODY SHOP WHERE THE DAMAGES TO MY CAR HAVE BEEN ESTIMATED AT \$3,879.13. IN ADDITION, THE POLICE ARRIVED AT THE SCENE AND I WAS CITED FOR "CARELESS DRIVING," AND PAID A FINE OF \$107.70. I AM ALSO BEEN REQUIRED TO ATTEND A 4 HOUR TRAFFIC SCHOOL WHERE THE FEE IS \$35.95. I WISH TO HAVE THIS MATTER INVESTIGATED.

**Location of Incident:** IRONTON, OH

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2007 TOYOTA CAMRY. WHILE DRIVING 50 MPH, THE VEHICLE ABNORMALLY ACCELERATED. THE CONTACT APPLIED EXTREME FORCE TO THE BRAKE PEDAL UNTIL THE VEHICLE CAME TO A STOP. THE CONTACT STATED THAT THE VEHICLE HAD PREVIOUSLY BEEN DIAGNOSED BY THE DEALER APPROXIMATELY 8 TIMES IN REFERENCE TO THE FAILURE. THE DEALER WAS UNABLE TO DUPLICATE THE FAILURE EIGHT TIMES. THE CONTACT RECEIVED THE RECALL NOTICE TO CORRECT THE UNINTENDED ACCELERATION; (NHTSA CAMPAIGN ID NUMBER 09V388000: VEHICLE SPEED CONTROL: ACCELERATOR PEDAL); HOWEVER, THE CONTACT WAS UNCOMFORTABLE HAVING THE ACCELERATOR PEDAL MODIFIED TO A SMALLER LENGTH. THE VEHICLE WAS NOT REPAIRED AND THERE WERE NO RECALL REPAIRS PERFORMED ON THE VEHICLE. THE FAILURE MILEAGE WAS 25 AND THE CURRENT MILEAGE WAS 18,000.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10174608  
**Date of Incident:** 20060416  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** DUNN, NC

**NHTSA Summary:**  
I BOUGHT THE 2007 TOYOTA CAMRY LE AT THE END OF MARCH 06. MY COMPLAINT WITH THE ACCELERATION IS THE SAME COMPLAINT THAT OTHER CAMRY OWNERS HAVE. WHEN I ATTEMPT TO ACCELERATE FROM A COMPLETE STOP OR ACCELERATING TO A HIGHER SPEED TO PASS THE CAR TAKES A FEW SECONDS TO CATCH UP WITH THE ACCELERATOR. \*NM

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Vehicle:** 2006 LEXUS LS  
**Location of Incident:** CRANFORD, NJ

**NHTSA Summary:**  
TL\* THE CONTACT OWNS A 2006 LEXUS LS 430. WHILE PARKING THE VEHICLE IN REVERSE AND SWITCHING TO DRIVE THE VEHICLE ACCELERATED ON ITS OWN AND HIT A CEMENT PILLAR, BENCHES AND THEN A BUILDING. HE SUSTAINED MAJOR INJURIES TO HIS CHEST AND FRACTURED HIS NECK. THE PASSENGER SUSTAINED MAJOR INJURIES TO HER CHEST AND BOTH WERE HOSPITALIZED. THERE IS A POLICE REPORT AVAILABLE. THE VEHICLE WAS DESTROYED. THE DEALER HAD NOT BEEN CONTACTED AT THE TIME OF THE COMPLAINT. THE FAILURE AND CURRENT MILEAGE WAS 8000.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10155810  
**Date of Incident:** 20060420  
**Vehicle:** 1999 LEXUS LS  
**Location of Incident:** LITTLE ROCK, AR

**NHTSA Summary:**  
I WAS DRIVING AND THE VEHICLE IN FRONT OF ME STOPPED. I TOOK MY RIGHT FOOT OFF THE ACCELERATOR AND PLACED IN ON THE BREAK. WHEN I APPLIED PRESSURE TO THE BREAK, THE CAR CONTINUED TO ACCELERATE AND HIT THE CAR IN FRONT OF ME. THE DAMAGE TO MY CAR IS PROBABLY IN THE \$10,000 RANGE. \*NM  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10162826  
**Date of Incident:** 20060420  
**Vehicle:** 2006 TOYOTA RAV4  
**Location of Incident:** TAMPA, FL

**NHTSA Summary:**  
VEHICLE SPEED CONTROL: THE RAV4 HAS SOME SPEED CONTROL PROBLEMS. SOMETIMES, IT DOES NOT DOWN-SHIFT PROPERLY. THEN, SUDDENLY IT DOWN SHIFTS AND ACCELERATES EXTREMELY. THERE IS NO CERTAIN WAY OF CONTROLLING THE SHIFT. IT MAY CREATE HAZARDOUS SITUATIONS ESPECIALLY MERGING TO THE TRAFFIC. \*NM  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10264135  
**Date of Incident:** 20060422  
**Vehicle:** 2006 TOYOTA CAMRY SOLARA  
**Location of Incident:** CHANDLER, AZ

**NHTSA Summary:**  
I OWN A 2006 SOLARA SLE 6CY. AND THE CAR HESITATES WHEN ACCELERATING (SUCH AS MERGING INTO TRAFFIC). TOYOTA HAS KNOWLEDGE OF THIS VERY PROBLEM ALONG WITH THE DEALERSHIPS AND ALL THAT NEEDS TO BE DONE IS A REFLASH. THE PROBLEM HAS TO DO WITH THE CARS ONBOARD COMPUTER. SO WHEN THEY PUT AN UPDATE IN THE COMPUTER IT IS CALLED REFLASHING. IF ENOUGH PEOPLE COMPLAIN OR IF SOMEONE IS KILLED THEY MIGHT FIND THE TIME TO TAKE CARE OF THIS. SO WHEN I AND MANY OTHERS TAKE THE TIME TO ADVISE TOYOTA AND THE DEALERSHIPS, I FEEL THEY SHOULD TAKE THE TIME TO ADDRESS THIS PROBLEM. PLEASE HELP ADDRESS THIS PROBLEM BY FILING A COMPLAINT AND ALSO BY CALLING TOYOTA.

**Date of Incident:** 20060422  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** MAYS LANDING, NJ

**NHTSA Summary:**  
I PURCHASED MY 2007 TOYOTA CAMRY IN 2006 WHEN THE NEW MODEL FIRST CAME OUT. IMMEDIATELY AFTER BUYING THE CAR I CONTACTED THE DEALERSHIP ABOUT A HESITATION AND ACCELERATION PROBLEM. I WANTED TO RETURN THE CAR AND THEY TOLD ME NO IT WAS NOW A USED CAR. I CONTACTED TOYOTA HEADQUARTERS AS WELL AND IN 2007 I WAS TOLD IT IS PROBABLY AND ELECTRONICS PROBLEM BUT HAS NOT BEEN RECALLED YET. MY VEHICLE WAS INVOLVED IN THE RECALL, I TOOK IT IN FOR THE SERVICE AND THE CAR IS STILL HAVING PROBLEMS. TOYOTA HAS DISMISSED MY COMPLAINTS. I HAVE FELT FROM DAY ONE THAT THIS VEHICLE IS UNSAFE AND CONTINUES TO BE UNSAFE. TOYOTA REFUSES TO GIVE ME MY MONEY BACK. I HAVE LOST RESALE VALUE AND CANNOT EVEN SELL THE CAR NOW. I AM VERY FRUSTRATED AND ANGRY OVER THIS SITUATION. I HAVE TO CONTINUE TO PAY MY CAR LOAN EVEN THOUGH I REFUSE TO DRIVE THIS CAR.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10273487  
**Date of Incident:** 20060424  
**Vehicle:** 2004 TOYOTA COROLLA  
**Location of Incident:** SIMMIL, CA

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2004 TOYOTA COROLLA. THE CONTACT STATED THAT THE VEHICLE ACCELERATED ON ITS OWN. THE CONTACT TOOK THE VEHICLE TO THE DEALER AND THEY KEPT IT OVERNIGHT. THEY FOUND NO FAILURES WITH THE VEHICLE. THE FAILURE RECURRED AND THE VEHICLE WAS TAKEN BACK TO THE DEALER. ONCE AGAIN, NO FAILURES WERE FOUND. ON ONE OCCASION, THE VEHICLE ACCELERATED AND STRUCK ANOTHER VEHICLE. THE OCCUPANTS IN THE OTHER VEHICLE WERE INJURED AND THE CONTACT SUSTAINED CHEST PAIN FROM THE SEAT BELT. A POLICE REPORT WAS FILED. THE VEHICLE WAS TAKEN TO THE DEALER AND THEY MADE REPAIRS. THE CONTACT DID NOT FEEL SAFE DRIVING THE VEHICLE; THEREFORE, IT WAS REPLACED WITH A 2006 COROLLA. CURRENTLY, THE 2006 COROLLA IS EXPERIENCING THE SAME FAILURES AS THE 2004 MODEL. THE DEALER STATED THAT SHE COULD BRING IN THE VEHICLE AND PAY \$98 PER HOUR FOR A DIAGNOSTIC. THE CONTACT IS AFRAID TO DRIVE THE VEHICLE. THE FAILURE AND CURRENT MILEAGES WERE 22,000.  
**Additional Summary:**

**Toyota ID Number:**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ON 4/26/2006 MY WIFE WAS DRIVING OUR 2003 TOYOTA COROLLA INTO A PARKING SPOT AT HER EMPLOYMENT. THE CAR DID NOT STOP WHEN BRAKES WERE APPLIED. SHE PRESSED THE BRAKES HARD ENOUGH TO LEAVE TIRE TRACKS ON THE CONCRETE AND DUG THROUGH GROUND AFTER JUMPING THE CURB. THE CAR DID FINALLY STOP AFTER HITTING A SMALL TREE AND BARELY MISSING A LIGHT POLE. AT THE TIME WE BELIEVED THAT THE FLOOR MATS HAD GOT TANGLED UP AND THE HARDER SHE PRESSED ON THE BRAKES THE CAR WENT FASTER. WITH ALL THE MEDIA COVERAGE ABOUT PROBLEMS WITH STUCK GAS PEDALS AND FLOOR MATS. WE ARE NOT SURE THAT IT WAS NOT A PROBLEM WITH THE CAR. \*TR  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10156567  
**Date of Incident:** 20060427  
**Vehicle:** 2003 TOYOTA COROLLA  
**Location of Incident:** TRUJILLO ALTO, PR

**NHTSA Summary:**  
ON APRIL 27, 2006 MY DAD STARTED THE ENGINE TO GO TO CHURCH AND THE CAR ACCELERATED IN PARKING POSITION. CAR WAS TURNED OFF AND STARTED AGAIN, ONCE STARTED IT DROVE FINE. THE SAME DAY WHEN MY DAD WAS COMING FROM CHURCH HE STARTED THE CAR AND WHEN HE PUT IT IN DRIVE THE CAR ACCELERATED ITSELF AND IT BOLTED OUT AND WENT OVER A PILE OF SAND THAT WAS ON THE SIDE ON THE ROAD. THE CAR FLIPPED AND STOPPED AGAINST THE FENCE OF A HOUSE. THE AIR BAGS DID NOT DEPLOY. MY DAD WAS TAKEN TO THE HOSPITAL AND THE CAR WAS A TOTAL LOSS. HE WAS LUCKY TO HAVE HIS SEAT BELT ON. I'VE REVIEWED OTHER COMPLAINTS AND IT SEEMS TO ME THAT THIS HAS HAPPENED TOO MANY TIMES TO JUST BE A RANDOM DEFECT. I HOPE THIS ACCIDENT IS INVESTIGATED TO AVOID UNNECESSARY DEATHS DUE TO THIS PROBLEM. \*JB  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10170192  
**Date of Incident:** 20060427  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** FALLS CHURCH, VA

**NHTSA Summary:**  
I PURCHASED A 2007 TOYOTA CAMRY LE ON LATE APRIL OF 2006. SINCE THEN, I HAVE EXPERIENCED NUMEROUS TIMES THE PRESENCE OF ACCELERATION PROBLEM. VEHICLE HESITATES WHEN PRESSING THE GAS PEDAL AT LOW SPEEDS. WHEN PRESSING THE PEDAL ALL THE WAY, THE CAR "SITS" ON THE ROAD AT THE CURRENT SPEED, AND AFTER A FEW SECONDS, IT KICKS FORWARD. THIS IS VERY DANGEROUS WHEN DRIVING IN TRAFFIC, WHICH FOR ME IS EVERYDAY LIVING IN THE DC METROPOLITAN AREA. THERE HAVE BEEN TIMES THAT I HAVE TO MOVE OUT OF THE TRAFFIC BECAUSE BY THE TIME MY CAR STARTED ACCELERATING, THE CAR IN FRONT IS BRAKING. OTHER CARS HAVE HAD TO MOVE AROUND ME BECAUSE OF THIS PROBLEM AS WELL. THIS SEEMS TO BE A COMMON PROBLEM READING THE POSTINGS IN THIS WEBSITE AND OTHERS. \*JB  
**Additional Summary:**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

Location of Incident: SANTA ROSA, CA

**NHTSA Summary:**

ON THURSDAY, APRIL 27, 2006, MY 2002 TOYOTA CAMRY HAD UNINTENDED ACCELERATION AT THE SHERTON PALO ALTO. WHEN ENTERING HE PARKING LOT, THE CAR ACCELERATED WITH ENGINE RACING AND CRASHED THROUGH THE PARKING LOT BARRIER. THE HOTEL GRACIOUSLY REPAIRED THE BARRIER AT THEIR EXPENSE. THIS INCIDENT HAS NOT BEEN REPORTED PREVIOUSLY. THIS IS THE ONLY INCIDENT TO DATE. A SECOND SAFETY ISSUE IS THE TRANSMISSION "LURCH" MY CAR HAS. I TRIED TO HAVE IT CORRECTED BY TOYOTA, BUT THEY REFUSED, SAYING THAT IT WOULD BE TOO COSTLY FOR TOYOTA TO FIX THE TRANSMISSION PROBLEM. WENT TO MEDIATION WHO AGREED WITH TOYOTA. THE PROBLEM CONTINUES.

**Additional Summary:**

**Location of Incident:** ANN ARBOR, MI

**NHTSA Summary:**

WHEN FIRST DRIVING MY NEW 2006 TOYOTA RAV4, I NOTICED AT SLOW SPEEDS IT WOULD SOMETIMES ACCELERATE WHEN I HIT THE BRAKE. I ATTRIBUTED THIS TO BIG FEET AND A NEW CAR WHERE I DID NOT YET MASTER THE RELATIVE POSITIONS OF THE PEDALS. I STARTED DRIVING WITH TWO FEET, JUST AS I WAS TAUGHT AS A TEENAGER IN DRIVERS ED. OCCASIONALLY, THIS HAS HAPPENED AGAIN IN THE ENSUING 3 YEARS. UNTIL THIS UNINTENDED ACCELERATION PROBLEM CAME TO LIGHT IN 2010, I THOUGHT IT WAS JUST "OPERATOR ERROR." NOW, I AM BEGINNING TO THINK THERE IS SOME DEFECT - MAYBE IT'S HARDWARE LINKAGES, BUT I SUSPECT THERE IS A SOFTWARE

C-589

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

PROBLEM IN THE ELECTRONIC COMPUTER OF THE CAR. I ALSO HAD THE STEERING MID-SHAFT PROBLEM AFTER WARRANTY AND SCREAMED UNTIL THEY FIXED IT UNDER WARRANTY FOR \$50. THERE WAS ALSO A "RUNAWAY" FUEL PUMP SERVICE BULLETIN I MADE THEM COVER AS WELL. I HAVE WORKED WITH TOYOTA QUALITY ENGINEERS SINCE THE 1980S AND AM DISGUSTED BY THEIR RESPONSES REPORTED IN THIS ODI SITE. TOYOTA'S CLAIM TO FAME WAS THERE QUALITY AND CUSTOMER FOCUS. LOOKS LIKE THE CURRENT GENERATION OF TOYOTA PEOPLE HAVE LOST THIS, AND THAT POINTS DIRECTLY TO TOP MANAGEMENT THERE. SHAME, SHAME, SHAME. AS THEY SAY IN JAPANESE, THEY ARE "ON SHIRAZU" (DO NOT UNDERSTAND THEIR OBLIGATION TO THEIR CUSTOMERS).

Thank you for contacting Toyota Motor Sales, U.S.A., Inc->

We apologize for your concerns with the RPM readings at start up and for the delay in responding to your concerns ->

We contacted the service manager at Toyota Of Melbourne on July 25, 2006. At that time the service manager advised that your vehicle had not been evaluated at their dealership and was uncertain as to whom you spoke to regarding your concerns.->

In order to properly assess your concerns, a diagnosis by your local Toyota dealership is required. Based on this information we have once again contacted the Customer Relations Manager at Toyota Of Melbourne to further evaluate your Tacoma.->

The Customer Relations Manager will contact you by the end of the business day, Tuesday August 1, 2006. In the event you do not receive any contact from the dealership by this date, please <a href = 'http://toyota.custhelp.com/cgi-bin/toyota.cfm?ph/enduser/std\_adp.php?p\_faig=4164'TARGET=\_BLANK'>contact us</a> with file #incidents.cslarifcasenumber.->

**Date of Incident:** 20060501

**Vehicle:** 2008 TOYOTA RAV4

**Location of Incident:** CORDOVA, TN

**NHTSA Summary:**

I PURCHASED A NEW TOYOTA RAV4 (2008 LS) IN THE SUMMER OF 2008. I QUICKLY REALIZED THAT THERE SEEMED TO BE A PROBLEM WITH ACCELERATION. I REPORTED IT THEN AND THE FIRST SEVERAL TIMES IT WENT IN FOR SCHEDULED MAINTENANCE. THE RESPONSE HAS BEEN THE SAME - THAT'S JUST WHAT TOYOTAS DO. THE PROBLEM -

C-594

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

WHEN ACCELERATING FROM A STOP WHEN THE CAR HAS BEEN IDLING, THE CAR HESITATES. THERE IS A SECOND OR 2 DURING WHICH THERE IS NO POWER. THEN, THE POWER KICKS IN AND THE CAR JUMPS FORWARD, NOT BECAUSE THE PEDAL IS STICKING BUT BECAUSE THE CAR SUDDENLY "CATCHES UP" WITH THE GAS PEDAL. THE EXPLANATION GIVEN BY TWO DEALERS IS THIS: IN THE TOYOTA, THERE IS A DELAY BETWEEN WHEN THE PEDAL IS PRESSED DOWN AND WHEN THE CAR'S COMPUTER SENDS THE INFORMATION TO THE CARBORATOR, OR WHATEVER PASSES FOR IT IN NEW ENGINES. THAT CAUSES THE SEQUENCE - PRESS THE GAS PEDAL, HESITATION, THEN SURGE. THIS IS MOST DANGEROUS WHEN TRYING TO MERGE INTO HEAVY, FAST MOVING TRAFFIC. OPENINGS IN THE TRAFFIC ARE USUALLY SMALL BUT ADEQUATE IF THE CAR RESPONDS. HOWEVER, WHEN THE CAR HESITATES, THEN SURGES, THE OPENING CAN BE MISSED AND THE CAR AND DRIVER ARE AT RISK FOR A SIGNIFICANT ACCIDENT. THE PROBLEM IS ALSO INTERMITTENT SO THAT THE DRIVER CAN BE CAUGHT OFF GUARD, EVEN WHEN EXPERIENCED WITH THE CAR. I'M FILING THIS BECAUSE I SEE THAT YOUR DEPARTMENT HAS GONE PAST THE STICKING PEDAL TO LOOK AT POSSIBLE PROBLEMS WITH THE ELECTRONICS AND COMPUTER SYSTEMS IN THE CARS. SO I THOUGHT THIS MIGHT BE HELPFUL. PS-I HAVE BEEN FORTUNATE THAT THE PROBLEM HAS NOT CAUSED AN ACCIDENT. HOWEVER, THERE HAVE BEEN SITUATIONS WHERE A LITTLE LUCK AND A QUICK FOOT TO THE BRAKE PEDAL WAS ALL THAT PREVENTED ONE. PPS-I WILL GLADLY PROVIDE THE VIN # BUT I DO NOT HAVE IT AVAILABLE NOW.

\*\*\* PHONE LOG 08/16/2006 11:48:14 AM JFewel  
RNT#060807-000354

Email from states: "Tacoma cruise control  
My name is Dale Dix. I am the president of TMP of NC, a small company in Yadkinville, NC. My company recently purchased (2) new 2006 Tacoma pick up trucks from Toyota West of Statesville, NC., an investment on our part of approx. \$60,000.00.  
After purchasing the pick ups, it has come to my attention that the cruise control feature on both vehicles operates so poorly that it is not economical to operate.

\*\*\* NOTES 08/16/2006 11:49:30 AM JFewel

...The cruise control on both vehicles constantly runs the engine RPM up and down in an effort to control the speed, which it regulates poorly. This causes a great increase in fuel consumption and is also very annoying to the driver. When I brought this problem to the dealer for a solution, I was told that this was the normal operation of the cruise control on a Tacoma, and it can not be repaired.  
Cruise control is a very important feature on a vehicle for my company...

\*\*\* NOTES 08/16/2006 11:52:52 AM JFewel

...Had I known that a Tacoma cruise control operated so poorly, I would have made the purchase of new vehicles with some other company.

If it is possible, I would like for the cruise control feature on both trucks to be repaired or replaced as soon as possible. This problem is causing an unfair expense on my company resulting from an error on the part of Toyota. If it cannot be repaired or replaced, I would like a written explanation of why it can not be.

\*\*\* SUBCASE 200608160927-1 CREATED 08/16/2006 11:57:49 AM JFewel

Thank you for contacting Toyota Motor Sales, U.S.A., Inc. We apologize for the concerns you experienced with your recent service at Toyota West. Toyota dealership technicians are specialized in the diagnosis and repair of Toyota vehicles. They are provided with extensive training and have access to state-of-the-art equipment to help in the accurate diagnosis of your vehicle. Also, if necessary, we provide additional support to assist Toyota dealership technicians in resolving unusual vehicle concerns.

You can be sure that Toyota is committed to providing the best possible service at Toyota dealerships and to making the service experience a favorable one. We encourage each dealership to maintain a professional level of performance at all times, and we were sorry to learn that you felt the service you received was less than satisfactory.

In the interest of customer satisfaction, we have contacted the Customer Relations Manager at Toyota West to assist you with your concerns. The Customer Relations Manager will contact you by the end of the business day Monday, August 21, 2006.

In the event you do not receive contact from the dealership by this date, please contact us < [http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enuser/sid\\_adp.php?\\_fauid=4164-](http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enuser/sid_adp.php?_fauid=4164-) with file #Sincidents.e\$claritycasenumbr.

It is through correspondence such as yours that we are able to continue to improve Toyota dealership services, and we sincerely appreciate the time you have taken to bring this matter to our attention. Check out our Online Toyota Technical Information <<http://techinfo.toyota.com/>> available by short- and longer-term subscription as a lower-cost alternative to purchasing a repair manual, and at no charge, recommended service intervals <<http://www.toyotapartsandservice.com/smg/main.php>>.

For more Toyota information, please see Toyota Express Lube <<http://www.toyota.com/html/shop/dealers/lube/index.html>>, ToyotaOwnersOnline.com <<http://toyotaownersonline.com/>>, our Glossary <<http://www.toyota.com/html/help/glossary.html>> and printable Do-It-Yourself Instructions <<http://www.toyotaownersonline.com/parts-service/diy.php>>.

Toyota manuals <[http://smg.toyotapartsandservice.com/pubs.php?v=&y=&int\\_id=&done=1](http://smg.toyotapartsandservice.com/pubs.php?v=&y=&int_id=&done=1)> are available for purchase.

\*\*\* PHONE LOG 03/31/2007 08:03:24 AM APowe  
RNW#070329-000102  
Email States: This is my third letter to you regarding problems with my vehicle. Your regional representative, Craig (?), contacted me by telephone, saying that I would have to bring my vehicle to Grappone Toyota and leave it there to be checked by the inspector. I told him I needed the inspector to come to my residence because he would be at a variety of dealerships and would have time to come to my residence.....  
\*\*\* NOTES 03/31/2007 08:03:59 AM APowe  
...Since my main complaint was the vehicle idling at 1500 rpm's first time it is started in the morning after being garaged all night, and, having hit a tree backing out of my driveway because of it, I believe it is necessary to see the vehicle in the "accident" or normal situation when it is first started. The response was that the inspector could not come and I should leave my vehicle at Grappone in the morning and he would check it out later at the dealership.....

\*\*\* NOTES 03/31/2007 08:04:26 AM APowe

...My response was that I cannot leave my vehicle to be checked at their convenience since it is my only transportation and that the inspector needed to see it in the situation where the greatest problem occurs. This went back and forth a few more times and my final response was the same, except that I additionally stated that Craig could tell Toyota I am really impressed at their customer service. I'm...

\*\*\* NOTES 03/31/2007 08:04:46 AM APowe

...sure he reported that I was uncooperative and I wanted to give you my side of the story. So far, I still like the truck, but am still disturbed by leaving my garage and driveway with my foot on the brake at 1500 rpm's and I am still unimpressed with both your and Grapone's customer service. I have attached my previous correspondence for your information.

Thank you.  
MJ Turcotte, 603-746-2966...

...I have written to you before regarding these problems with my Toyota truck and I assume you referred it back to Grapone Toyota, since their PR person called me to take a look at the problem. She made an appointment, at which the Service Manager would be present, and I arrive on time. She was 20 minutes late and we waited another 10-15 minutes for the Service Manager who never appeared. After showing her the problems and receiving the same answers as in the past,....

\*\*\* NOTES 03/31/2007 08:05:38 AM APowe

....I told her she was wasting my time yet again and I left. The circumstances are reiterated below. I hope you have some answers, or can at least be good enough to warn others before they purchase this truck! I have a Toyota Tacoma TRD off road truck, with towing package. I purchased it new the last part of May 2006. I have had the following problems with it and took it to the Grapone service Dept. in Concord, NH. I will put their explanation after the problem....

\*\*\* NOTES 03/31/2007 08:06:01 AM APowe

....1. First thing in the morning it idles so fast that I have to use the brake, not the accelerator, to back out of my garage safely. I have rolled into a tree and dented the rear bumper after taking my foot off the break to shift! The left bumper is dented and the tailgate is slightly out-of-line. This also occurs when stopped at a light, intersection, etc. If my foot is not firmly on the break when stopped, when the engine, automatically and with no action by me, ...

\*\*\* NOTES 03/31/2007 08:06:44 AM APowe

...up shifts, I am in danger of hitting a vehicle ahead of me or rolling into an intersection. Grappone solution: It's a factory setting and it is set like that to warm the engine up faster. Can't fix 2. Each day, the first time I pull out of the garage and I apply the brakes (because I'm moving so fast from problem 1), the brakes squeak ? enough that my neighbor laughs at my ?new? truck! Grappone solution: All vehicles? brakes squeak in the morning due to ...

\*\*\* NOTES 03/31/2007 08:07:05 AM APowe

...condensation. Sorry! This is my 13th vehicle and none have squeaked, even when the vehicle was not garaged, as this one is. 3. The drivers? seat will not move (or adjust) when the handle at the front of the seat is pulled from either side. Grappone solution: The seat cover is in the way. I removed the seat cover and asked that it be checked again. Still did not move! After some tinkering, the serviceman said it could only be moved by pulling in the middle of the bar....

\*\*\* NOTES 03/31/2007 08:07:32 AM APowe

...Never! Never heard of this before. Try this when you are 5?2? and up to the steering wheel. Can't be done. 4. The black molded bed, rear bumper and tubular running boards are turning white on a new 2006 3 month old vehicle. Grappone solution: This is a manufacturing problem. Can't fix. I really like this truck but have totally lost patience with the dealership's excuses. Can you help?\*

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THE 2007 TOYOTA CAMRY LE 4CYL AUTOMATIC SEDAN EXPERIENCED HESITATION, UNINTENDED ACCELERATION AND COMPLETE LACK OF RESPONSE TO THE DEPRESSION OF THE ACCELERATOR PEDAL; TWO TIMES CREATING SITUATIONS THAT EASILY COULD HAVE CAUSED AN ACCIDENT. THE FIRST TIME I WAS TRYING TO MERGE ONTO A HIGH-SPEED LANE OF A HIGHWAY. I PUSHED THE ACCELERATOR PEDAL AND THE CAR DID ABSOLUTELY NOTHING, THEN ROARED TO LIFE, BUT TOO LATE. I HAD TO BRAKE BECAUSE I DIDN'T HAVE ENOUGH TIME TO MAKE IT. THEN, ABOUT A YEAR LATER THE ACCELERATOR STUCK AND THE ENGINE REVVED TO 6000 RPMs, AND WOULD NOT COME DOWN. I WAS FORCED TO PULL OVER AND SHUT IT DOWN. BOTH OF THESE TIMES I BROUGHT IT TO THE LOCAL TOYOTA DEALER AND THEY COULDN'T FIND ANYTHING. THE MOST RECENT TIME, AFTER THE STUCK ACCELERATOR PEDAL INCIDENT, THEY HAD IT ALL DAY AND SENT IT HOME WITH A SERVICE MAN WHO COULD NOT DUPLICATE THE SITUATION. I SERIOUSLY FEAR BODILY INJURY OR DEATH IN THE FUTURE IF THIS ISN'T FIXED AND FIXED RIGHT. \*AK

**Date of Incident:** 20060523  
**Vehicle:** 2006 TOYOTA AVALON  
**Location of Incident:** ROCKVILLE, MD

**NHTSA Summary:**

CAR DID NOT START FOR SEVERAL TRIES. ON ABOUT THE 5TH TRY, THE MOMENT I SHIFTED INTO REVERSE, THE THROTTLE STUCK AND THE CAR HURTTLED OUT OF THE GARAGE. IT VEERED TO THE LEFT (AS YOU FACE THE GARAGE) IMMEDIATELY AFTER CLEARING THE GARAGE, CUT UNDER THE BRANCHES OF A BIG SPRUCE TREE ON THE CORNER OF MY NEIGHBOR'S LOT, CROSSED HIS DRIVEWAY, ACROSS A SMALL DRAINAGE DITCH AND SLAMMED INTO THE TRUNK OF A HUGE SPRUCE TREE. CAR STOPPED THEN, WITH EXTENSIVE DAMAGE TO REAR, AND ENGINE DIED. CAR WAS DRIVABLE AND I DROVE IT TO THE DEALER, WHO CHOSE TO NOT EXAMINE ANYTHING. DURING THE EVENT, I HAD MY FOOT ON THE BRAKE PEDAL BUT THE ANTI-LOCK BRAKES KEPT IT FROM LOCKING THE WHEELS AND I TRIED TO KILL THE ENGINE BY HITTING THE START BUTTON (THERE IS NO KEY ON THIS MODEL CAR). THAT DID NOT WORK AND I HIT THE TREE BEFORE I COULD THINK OF ANYTHING ELSE TO DO. I WAS NOT HURT. \*JB

**NHTSA ODI Number:** 10305611  
**Date of Incident:** 20060527  
**Vehicle:** 2003 TOYOTA AVALON  
**Location of Incident:** WILMINGTON, NC

**NHTSA Summary:**

IN 2006 MY WIFE EXPERIENCED UNINTENDED ACCELERATION IN OUR 2003 TOYOTA AVALON. THIS HAPPENED IN A PARKING GARAGE, AS SHE WAS SLOWLY EASING INTO A PARKING SPACE, THE CAR SUDDENLY SPEEDED UP AND CRASHED INTO THE WALL OF THE PARKING GARAGE, CAUSING EXTENSIVE DAMAGE TO THE FRONT OF THE CAR. SHE CLAIMED SHE DID NOT HAVE HER FOOT ON THE ACCELERATOR, BUT ON THE BRAKE. AFTER HAVING THE CAR REPAIRED BY A COLLISION BUSINESS, THE TOYOTA DEALER SAID THERE WAS NOTHING WRONG WITH THE ACCELERATOR. IT HAPPENED A COUPLE OF YEARS LATER, BUT THIS TIME A CONCRETE PARKING STRIP STOPPED HER AFTER SHE MOVED IT ABOUT THREE FEET. HER FRIEND THAT WAS WITH HER WAS REALLY SCARRED.

\*\*\* NOTES 08/01/2006 02:49:48 PM RGandy320

FTS Rick Vierke inspected and test drove the vehicle on 8/1/06. FTS drove the veh 20-25 miles with the cruise control set. The FTS was able to deactivate the cruise control by several methods: 1) placing the vehicle in neutral, 2) applying the brakes, 3) selecting cancel on the cruise control lever. The FTS also connected the scan tool and found no codes pending or in history.

\*\*\* NOTES 08/01/2006 02:51:02 PM RGandy320

(cont) The FTS spoke with the service manager, who advised that when the concern was first reported, the customer had all weather mats installed on top of the carpeted floor mats, so the all weather mats were not secured in the driver's foot well. The service manager removed the carpet floor mats and installed the all-weather mats by themselves in the footwell.

\*\*\* NOTES 08/01/2006 02:51:29 PM RGandy320

(cont) While the service manager could not say so conclusively, there is some possibility that the unsecured second layer of mats could have interfered with the travel of the brake pedal or accelerator pedal, causing the customer's concern.

**Location of Incident:** LA MESA, CA  
**NHTSA Summary:**

APPROX 20 TIMES OVER APPROX THE LAST 2 TO 4 YEARS, MY 1994 TOYOTA CAMRY EXPERIENCED EITHER SUDDEN ACCELERATION OR LACK OF APPROPRIATE DECELERATION. FORTUNATELY, I REALIZED THE FLOOR MAT WAS PRESSING ON THE ACCELERATOR PEDAL. PULLING BACK THE MAT WITH MY FOOT INSTANTLY RESOLVED THE PROBLEM IN EVERY INSTANCE. AFTER THE PUBLICITY REGARDING LATER YEAR MODELS, I FINALLY REMOVED THE FLOOR MAT ENTIRELY AND HAVE HAD NO FURTHER EPISODES. I AM CONCERNED THAT THIS HAPPENED IN MY 1994 TOYOTA CAMRY. BUT THE RECALL HAS INVOLVED ONLY 2007 AND LATER MODELS. THE FLOOR MAT SAYS "CAMRY" ON THE FRONT. ON THE BACK IT SAYS "LEFT HAND." UNDER THAT IT SAYS "00208" WITH A SPACE, FOLLOWED BY "32921". TO THE RIGHT OF THIS IS A GRID WITH YEARS 94, 95, AND 96 EACH FOLLOWED BY 12 SQUARES. THE YEAR 94 WITH THE FIRST BOX HAS A DOT IN THE MIDDLE, PRESUMABLY MADE IN JANUARY 1994. BELOW THIS IT SAYS "GB 6" THE MAT HAS BECOME STIFF OVER THE YEARS SO THAT THE RIGHT SIDE, INCLUDING THE AREA NEAR THE GAS PEDAL, DOES NOT LIE FLAT ON THE FLOOR, ALLOWING IT TO EASILY RIDE ON TOP OF AND PRESS DOWN ON THE GAS PEDAL.

**Vehicle:** 2002 TOYOTA HIGHLANDER  
**Location of Incident:** DOWNERS GROVE, IL

**NHTSA Summary:**  
SOMETIME IN 2006, MY 2002 TOYOTA HIGHLANDER EXPERIENCED UNINTENDED ACCELERATION. I WAS STANDING ON THE BRAKE TO MAKE THE CAR STOP AND IT WOULDN'T. I PULLED INTO A PARKING LOT THROUGH THE CAR INTO NEUTRAL, HIT THE BRAKE, THEN THROUGH IT INTO PARK WHILE IT WAS STILL MOVING. I CALLED JIFEY LUBE WHO JUST HAD PERFORMED AN OIL CHANGE. THEY SENT A TECHNICIAN OVER TO LOOK AT IT. WHEN I STARTED THE CAR FOR THE TECH THE ENGINE CONTINUED TO RACE. WE BOTH LOOKED TO SEE IF THERE WAS SOMETHING STUCK UNDER THE ACCELERATOR. THERE WAS NOT. WE BOTH PULLED UP ON THE ACCELERATOR AND IT DID NOT APPEAR TO BE STUCK. THE TECH COULDN'T EXPLAIN IT. I CAN'T RECALL IF I HAD THE CAR TOWED TO TOYOTA OR IF THE PROBLEM STOPPED SUDDENLY AND I DROVE MYSELF. TOYOTA IS ONE MILE FROM WHERE THE INCIDENT OCCURED. TOYOTA TOLD ME THEY COULDN'T REPLICATE THE PROBLEM AND ASSURED ME THAT IT WOULDN'T HAPPEN AGAIN. I DROVE HIM WITHOUT INCIDENT UNTIL I PULLED IN MY DRIVEWAY, THE CAR ACCELERATED AND I AGAIN HAD TO THROW THE CAR INTO PARK WHILE MOVING. THE CAR WAS THEN TOWED TO TOYOTA AND WE WERE TOLD THE PROBLEM WAS "FIXED" AND GIVEN SOME EXCUSE THAT DIDN'T MAKE SENSE. IT NEVER HAPPENED AGAIN AND WE TRADED THE CAR FOR A NEW ONE IN 2008. THE DEALERSHIP WAS BOB ROHRMAN TOYOTA IN WESTMONT, IL. I THINK THE RECALL NEEDS TO GO BACK FURTHER TO INCLUDE 2002 VEHICLES.

**NHTSA ODI Number:** 10160863  
**Date of Incident:** 20060607  
**Vehicle:** 2001 TOYOTA CAMRY  
**Location of Incident:** ELMWOOD PARK, IL

**NHTSA Summary:**  
AT APPROXIMATELY 2:30 PM, MY SON WAS BACKING OUT OF OUR DRIVEWAY IN OUR 2001 4 CYLINDER CAMRY. HE PLACED THE CAR IN REVERSE AND THE CAR SHOT BACKWARD AT VERY HIGH SPEED, COMPLETELY OUT OF CONTROL. THE CAR TRAVELED ABOUT 65 FEET ACROSS OUR NARROW SIDE STREET, WHERE THE CAR SIDE-SWIPE A CEMENT WORKERS TRUCK AND SUBSTANTIALLY SLOWED DOWN FOR ABOUT 1 SECOND DUE TO THE CONTACT. MY SON WAS ATTEMPTING TO PULL THE ACCELERATOR UP WITH HIS FOOT WHILE THE CAR WAS SIDE-SWIPE, THINKING THAT THE ACCELERATOR HAD JAMMED, WHEN THE CAR BROKE AWAY FROM THE SIDE-SWIPE AND AGAIN SHOT OUT AT UNCONTROLLABLE SPEED. THE CAR HAD BEEN STEERED SLIGHTLY TO THE DRIVER'S LEFT, SO THE CAR PROCEEDED IN A SEMI-CIRCLE ANOTHER 75 FEET, BACK ACROSS THE CURB OVER OUR LAWN THROUGH AND OVER APPROXIMATELY 1 FOOT HIGH LANDSCAPING STONE AND CAME TO A REST INCHES FROM OUR HOUSE, ONLY AFTER MY SON PULLED UP THE PARKING BRAKE AND SOMEHOW THREW THE CAR INTO PARK. I'VE GONE THROUGH TOYOTA REGIONAL IN AURORA, IL - THEY SENT THEIR ENGINEER WHO PERFORMED A NON-ROAD TEST ON THE CAR AT THE BODY SHOP, FOUND NOTHING WRONG. THEREAFTER, ONE OF MY CO-WORKERS DID SOME WEB SEARCH AND DISCOVERED THE CONCEPT OF "SUDDEN ACCELERATION", THE RECALL ON THE 2001 6 CYLINDER TOYOTAS AND THE NHTSA INQUIRIES ON THE 2002-04 MODELS. TOYOTA REFUSES TO DO ANYTHING OTHER THAN HAVE THEIR ENGINEER MEET ME TO DO A ROAD TEST AFTER THE BODY WORK IS FIXED. I AM SHOCKED AND STUNNED AT TOYOTA'S LACK OF CONCERN ON SUCH AN OBVIOUS SAFETY ISSUE. I HAVE MORE, BUT HAVE EDITED THIS TO COMPLY WITH THE 2000 CHARACTER REQUIREMENT. PLEASE CONTACT ME. \*NM

FROM NEWS ARTICLE IN TWINCITIES.COM  
Lawyer says Toyota defect could have caused 2006 crash that killed 3, seeks to free convicted St. Paul owner  
By Emily Gurnon - UPDATED 02/10/2010

On June 10, 2006, a 29-year-old driver exited eastbound Interstate 94 at Snelling Avenue in St. Paul, traveling about highway speed, he testified in court.

By the time he reached Snelling, his car was going as fast as 90 mph.

"Like it was shot out of a rocket," a Ramsey County prosecutor said at the man's trial.

The car hit an Oldsmobile stopped at the red light, killing a St. Paul father and his 10-year-old son. His 7-year-old niece was left a quadriplegic and died a year and a half later.

C-616

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

Koua Fong Lee — who insisted throughout his trial that he was desperately trying to stop — was convicted of criminal vehicular homicide and sentenced in 2008 to eight years in prison.

The St. Paul man's car: a 1996 Toyota Camry.

The National Highway Transportation Safety Administration issued a limited recall of the 1996 Camry that year for cruise control systems that "fail to hold the speed set by the driver and can accelerate above the intended set speed." It is unclear whether the Camry involved in the accident was one of those recalled under that order.

Koua Fong Lee testified at his trial in 2007 that he was returning home from a church event on the day of the accident. His pregnant wife, their 4-year-old daughter, his father and his brother were in the car with him.

He had no criminal history and had not been drinking or on drugs. He said he was not talking on a cell phone or distracted by anything else. But as he pulled off the freeway, something suddenly went wrong.

"I stepped on my brakes. For some reason, the brakes did not work," he testified. "And then I was very afraid. I began to think that my family is all in this car and I was worried I was going to crash into the other vehicles."

A city mechanic who inspected the car testified that he found no problems with the brakes. A much shorter portion of his testimony centered on the accelerator; mechanic Michael Churchich said the throttle was stuck open about 15 to 20 percent. He speculated that could have been caused by the impact of the crash itself.

Killed in the St. Paul crash were Javis Adams Sr., 33; his son, Javis Adams Jr., 10; and, later, Adams' niece, Devyn Bolton, 7. Jassmine Adams, Javis Adams Sr.'s daughter, 13, had permanent leg damage; and his father, Quincy Adams, 57, suffered a head injury.

**NHTSA ODI Number:** 10313467  
**Date of Incident:** 20060618  
**Vehicle:** 2006 TOYOTA CAMRY  
**Location of Incident:** ONTARIO, CA

**NHTSA Summary:**  
I BOUGHT MY 2006 CAMRY IN OCTOBER 2005 AND HAVE BEEN COMPLAINING TO CLAREMONT TOYOTA, THE DEALERSHIP WHERE I BOUGHT THE CAR, OF THE SUDDEN ACCELERATION AND BRAKING PROBLEM SINCE ABOUT 2006. IT'S AN INTERMITTENT PROBLEM THAT I HAVE HAD TO DEAL WITH SINCE I BOUGHT THIS CAR. MY COMPLAINTS HAVE BEEN THAT THE BRAKE PEDAL DROPS TO THE FLOOR AND THEN THE CAR ACCELERATES FORWARD AND THAT THE CAR ACCELERATES ON ITS OWN. THE SERVICE WRITERS HAVE DISMISSED MY COMPLAINTS AND GIVEN MANY EXCUSES SUCH AS: WHEN I LEFT THE CAR THERE TO HAVE THEM CHECK OUT THE PROBLEM THEY SAID THAT THE PROBLEM COULD NOT BE REPEATED SO THE CAR WAS FINE. ANOTHER TIME I WAS TOLD THAT THE NEW CARS HAVE ABS BRAKES THAT DROP DOWN TO THE FLOOR, AND AT A DIFFERENT TIME THEY SAID THAT WITH THESE NEW CARS THE REAR BRAKES HAD TO BE ADJUSTED AT EVERY OIL CHANGE AND ETC. THERE WAS AN INCIDENT IN 2006 WHEN I WAS AT A STOP AND SOME PEDESTRIANS WERE WALKING ACROSS THE STREET. THE CAR DID STOP BUT ALL OF THE SUDDEN THE BRAKE PEDAL HIT THE FLOOR AND THE CAR STARTED TO MOVE FORWARD. I HAD TO PUMP THE BRAKE PEDAL A FEW TIMES IN ORDER FOR IT WORK AGAIN. THANKFULLY THE PEDESTRIANS HAD NOT PASSED INFRONT OF MY CAR YET. I DON'T REMEMBER THE SPECIFIC DATE BUT I DO KNOW IT WAS IN 2006. ON 2/20/2010 I HAD MY HUSBAND TAKE THE CAR TO GET AN OIL CHANGE AT CLAREMONT TOYOTA. I HAD MY HUSBAND TAKE THE CAR BECAUSE I DO NOT WANT TO LIE TO OR GIVEN ANOTHER EXCUSE BECAUSE I DON'T KNOW MUCH ABOUT CARS. MY HUSBAND

C-620

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

MENTIONED THE PROBLEM ABOUT THE BRAKE PEDAL GOING DOWN TO THE FLOOR AND SOMETIMES HAVING TO DOWNSHIFT OR USE THE PARKING BRAKE TO SLOW DOWN THE CAR AND WAS TOLD THAT THIS CONDITION EXISTS DUE TO THE ABS SYSTEM SENSING THE ROTATION OF THE TIRES AND THAT THE CAR WOULD EVENTUALLY STOP. MY HUSBAND THEN MENTIONED WHAT WE HAD BEEN TOLD ABOUT THE REAR BRAKES AND THE SERVICE WRITER GRINNED AND SAID THAT THE BRAKES DO NOT NEED ADJUSTMENT. I DO NOT FEEL SAFE DRIVING THIS CAR BECAUSE IT FEELS AS IF IT HAS A MIND OF ITS OWN.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10160264  
**Date of Incident:** 20060619  
**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** POTOMAC, MD

**NHTSA Summary:**  
DT\*: THE CONTACT STATED THAT THE BRAKE PEDAL AND THE ACCELERATOR WERE TOO CLOSE TOGETHER, AND THE BRAKE PEDAL MOVES DOWN TOO FAR. THE POSITION OF THE BRAKE PEDAL AND ACCELERATOR CAUSED A COLLISION WHILE BACKING OUT OF A PARKING SPOT. THE ACCELERATOR WAS ACCIDENTALLY DEPRESSED CAUSING THE VEHICLE TO INCREASE IN SPEED AND COLLIDE WITH ANOTHER PARKED VEHICLE WHICH SUBSEQUENTLY PUSHED THAT VEHICLE INTO A THIRD. THERE WERE NO INJURIES. A POLICE REPORT WAS FILED, AND THERE WERE NO MECHANICS CONSULTED.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10305703  
**Date of Incident:** 20060620  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** PORTLAND, OR

**NHTSA Summary:**  
WE BOUGHT A 2007 CAMREY FROM GRESHAM TOYOTA IN JUNE 2006. WE IMMEDIATELY HAD THROTTLE PROBLEMS. PROBLEMS INCLUDED: 1. STEPPING ON THE GAS PEDAL AND HAVING THE ENGINE REV UP TO HIGH RPM'S BUT NOT GOING ANYWHERE. THIS CONDITION HAS HAPPENED ON 2-3 OCCASSIONS PER WEEK. THIS CONDITION WOULD HAPPEN ACROSS A VAST ARAY OF CONDITIONS. YOU WOULD START TO MERGE INTO HIGHWAY TRAFFIC AND IT SEEMED THE TRANSMISSION WOULD DISENGAGE. NEARLY CAUSING MANY ACCIDENTS(NEAR MISSES).AT OTHER TIMES YOU WOULD PULL AWAY FROM STOP SIGN AND AS YOU ENTERED THE INTERSECTION THE ENGINE WOULD REV AT HIGH RPM'S AND THE CAR WOULD GO NO WHERE. LEAVING YOU SITTING IN THE INTERSECTION WITH TRAFFIC BEARING DOWN ON YOU. UNABLE TO DO ANYTHING. NO RESPONSE FROM THE CAR! 2. OTHER TIMES YOU WOULD BE DRIVING ALONG AT 30-40-50 MPH AND THE CAR WOULD WILDLY ACCELERATE. OUT OF CONTROL FOR NO REASON. AGAIN MANY HARROWING LIFE THREATENING EVENTS SINCE WE HAVE OWNED THE CAR. UPON REPORTING THESE SAFETY ISSUES TO OUR LOCAL GRESHAM TOYOTA THEY DENIED THEIR WAS A PROBLEM. AFTER NUMEROUS COMPLAINTS TO THE ASSISTANT SERVICE DEPT MANAGER HE ADMITTED TOYOTA HAD A SOFTWARE PROBLEM WITH THEIR ELECTRONIC SYSTEM AND WERE WORKING ON FIXING IT. TO DATE TOYOTA HAS DONE NOTHING TO FIX OUR CAR. IT IS SCARY TO EVEN DRIVE TO THE STORE. YOU ARE N EVER SURE WHEN THE NEXT LIFE THREATENING EVENT WILL RANDOMLY OCCURE. TOYOTA HAS PUT ALL CUSTOMERS IN HARMS WAY AND NEEDS TO BE PUNISHED SEVERLY FOR THEIR CARELESS DISREGARD FOR HUMAN LIFE.CONTINUES TO THIS DAY!

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TOYOTA CAMRY 2006 MODEL PURCHASED 2/28/2006. COULD IT BE THAT THIS MODEL WAS ALSO BRAKE OR ACCELERATION DEFECTIVE? MY WIFE TRIED TO PARK THE CAR BUT IT DID NOT STOP. IT MOUNTED THE CURB, DROVE OVER OUR LAWN, CONTINUED TOWARD A DITCH WHEN SHE MANAGED TO STEER IT TO A TREE WHICH IT KNOCKED DOWN. SHE CONTINUED TO ANOTHER STREET, WENT DOWN THE CURB AND REGAINED CONTROL. OUR NEIGHBORS SAW IT AND CARRIED HER HOME. SHE WAS CLEARLY CONFUSED AND NEVER DROVE THE REPAIRED CAR AGAIN. SUBSEQUENTLY HAD A SEVERE PARTIALLY DISABLING CEREBRAL BRAIN HEMORRHAGE. AMBULANCE. LOCAL HOSPITAL COULD NOT TREAT IT AND SHE WAS PICKED UP BY A NY PRESBYTERIAN AMBULANCE. WAS TAKEN TO NEUROSCIENCEOPERATIONICU. AFTER 1 MONTH IN HOSPITAL AND 3 MONTHS REHAB IS BACK HOME BUT DEFINITELY IMPAIRED. WE ONLY A FEW DAYS REALIZED THIS MIGHT BE PART OF THE TOYOTA CAMRY PROBLEM. THANK YOU. \*TR

**Toyota ID Number:**  
**NHTSA ODI Number:** 20060625  
**Date of Incident:** 20060625  
**Vehicle:** 2004 LEXUS ES330  
**Location of Incident:** SCRANTON, PA

**NHTSA Summary:**  
Car was in the shop for a month. Came out of Price Shopper grocery store. Put in gear and it accelerated. Had foot on brake, car continued to accelerate. Swerved to avoid cars. Hit a concrete curb, car spun and stopped. Police showed up and investigated. Was sent by ambulance for check. Went to Motor World Lexus -- had the car for 1 month. Claimed that the problem was due to the aftermarket floor mats. Requested report from Toyota - they refused. Got letter from Lexus that said that it was inspected by field tech and that electronics and mechanicals were examined - no DTCs or anything else. Floor mat was found on top of the standard mat. Toyota claimed that the mats were pushed forward causing the incident. No defect found.

**NHTSA ODI Number:** 10314703  
**Date of Incident:** 20060625  
**Vehicle:** 2001 TOYOTA HIGHLANDER  
**Location of Incident:** BRIDGEWATER, NJ

**NHTSA Summary:**  
MY 2001 HIGHLANDER HAS CAUSED ME SO MUCH STRESS. ON JUNE 25, 2006 I BROUGHT THE HIGHLANDER IN TO TOYOTA CRYSTAL IN GREENBROOK, NJ AFTER HAVING HAD TWO EPISODES IN WHICH THE CAR KEPT ACCELERATING EVEN THOUGH MY FOOT WAS

C-623

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

OFF THE GAS PEDAL AND THE BRAKES DID NOT HELP IN SLOWING THE CAR DOWN, ON BOTH OCCASIONS I HAD PUT THE CAR IN NEUTRAL TO SLOW IT DOWN. IT IS THE SAME EXACT SCENARIO THAT HAS BEEN IN THE NEWS THIS PAST MONTH. THE TOYOTA DEALER WAS UNABLE TO HELP US IN RESOLVING THE PROBLEM AT THAT TIME. I STILL HAVE A COPY OF THE LETTER I GAVE TO THE DEALER ON THAT DATE DESCRIBING THE PROBLEM. WHEN THE NEWS BROKE ABOUT THE ACCELERATION PROBLEM I CALLED CRYSTAL TOYOTA. THEY OFFERED TO CHECK THE CAR AGAIN BUT WAS TOLD WE WOULD HAVE TO PAY FOR THE ANALYSIS SINCE IT WAS NOT UNDER THE RECALL. SO I CALLED TOYOTA IN MORRISTOWN NJ WHERE I HAD PURCHASED THE CAR IN 2001. THE MANAGER TOLD ME TO CALL TOYOTA CORPORATE AT 800-331-4331. I DID SO AND AFTER DESCRIBING THE CAR PROBLEM, WAS GIVEN CASE #1001138288 AND ASSURED THAT I WOULD RECEIVE A CALL BACK WITHIN ONE BUSINESS DAY. THE CALL NEVER CAME SO MY HUSBAND CALLED TOYOTA BACK. THE REASON GIVEN TO US FOR NOT CALLING BACK WAS THAT OUR CAR WAS NOT IN THE RECALL. THE TOYOTA REPRESENTATIVE ALSO TOLD MY HUSBAND THAT THE PARTS UNDER RECALL WERE NOT INSTALLED IN THE 2001 HIGHLANDER AND TO CALL CUSTOMER RELATIONS AT CRYSTAL TOYOTA. THIS TIME CRYSTAL OFFERED TO TEST DRIVE THE CAR FOR NO CHARGE BUT SAID THEY WOULDN'T KNOW HOW TO GO ABOUT REPAIRING IT SINCE NO SUBSTITUTE PIECE FOR THE 2001 EXISTS. SO THE PROBLEM REMAINS UNRESOLVED. THIS IS A DANGEROUS SITUATION AND I AM SURE THAT THERE MUST BE OTHER 2001 HIGHLANDERS WITH THE SAME PROBLEM. SINCE THOSE TWO EXPERIENCES I ONLY DRIVE THE CAR WHEN IT IS ABSOLUTELY NECESSARY. PLEASE INVESTIGATE THIS MATTER. UNFORTUNATELY I DID NOT KNOW ABOUT NHTSA UNTIL THIS WEEK. OTHERWISE I WOULD HAVE CONTACTED NHTSA AT AN EARLIER DATE. I AM LOOKING FORWARD TO HEARING FROM YOU.

**Location of Incident:** STANARDSVILLE, VA

**NHTSA Summary:**  
LET ME START BY SAYING I AM A DIE-HARD TOYOTA OWNER. MY CURRENT VEHICLE BEING THE 3RD TOYOTA WE OWN. I OWN A 2004 TOYOTA HIGHLANDER, V6, 5 SPEED AUTOMATIC WITH AWD. THIS VEHICLE HAS A VERY SERIOUS HESITATION PROBLEM WHICH IS DANGEROUS. UPON ACCELERATION FROM A STOP OR AT SPEED, THERE IS A VERY SERIOUS LAG IN THROTTLE RESPONSE. MANY TIMES LEAVING A STOP OR ACCELERATING FROM A SLOW SPEED LE. PARKING LOT DRIVING, THE VEHICLE WILL LAG WITH NO RESPONSE, THEN LURCH & ACCELERATE SUDDENLY. MERGING INTO TRAFFIC, SAFE PASSING, STARTS AT LIGHTS AND SAFE DRIVING IN PARKING LOTS AND AROUND PEDESTRIANS CAN BE HAZARDOUS. THOUSANDS OF OWNERS ACROSS THE NATION ARE AFFECTED BY THIS DEFECT. FROM MY RECENT RESEARCH IT APPARENTLY IS NOT RESTRICTED TO THE HIGHLANDER, BUT AFFECTS MANY TOYOTA VEHICLES WITH "DRIVE BY WIRE" AS OPPOSED TO MECHANICAL TRANSMISSION & THROTTLE LINKAGE. I TOOK THE VEHICLE BACK TO THE DEALER RIGHT AFTER MY PURCHASE IN NOVEMBER OF 2004 AND WAS TOLD THEY COULD FIND NOTHING WRONG, NOW RECENT RESEARCH TELLS ME THEY WERE WELL AWARE OF THE PROBLEM AT THAT TIME. I LOVE TOYOTA BUT THERE METHODS OF DEALING WITH PROBLEMS LIKE THIS IS DECEPTIVE AT BEST AND JUST SHORT OF CRIMINAL AT WORST. PLEASE "GOOGLE" TOYOTA HIGHLANDER HESITATION PROBLEM AND ALSO VISIT TUNDRASOLUTIONS.COM FOR MORE EVIDENCE OF WHAT I AM TALKING ABOUT. TOYOTA HAS NOT DEVOTED ENOUGH RESOURCES TO THIS PROBLEM OR A PERMANENT FIX WOULD HAVE ALREADY BEEN DEVELOPED. PLEASE CONTACT TOYOTA AND URGE THEM TO TAKE CARE OF THIS MATTER WITH ALL THE THOUSANDS OF OWNERS ACROSS THE U.S. THAT ARE HAVING TO DEAL WITH THIS MATTER. I WILL BE

C-624

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

FOLLOWING THIS MATTER WITH KEEN INTEREST TO SEE IF ANYTHING IS BEING DONE AND AM ADVISING AAA OF THE ISSUES AS WELL AS MY STATE AND FEDERAL REPRESENTATIVES. TOYOTA COMMANDS A PREMIUM PRICE FOR WHAT ARE OTHERWISE EXCEPTIONAL VEHICLES AND THEIR CUSTOMERS AND THE NATIONS DRIVERS DESERVE A BETTER MORE RESPONSIBLE RESPONSE FROM TOYOTA. \*NM

**Location of Incident:** ORINDA, CA  
**NHTSA Summary:**  
THE ENGINE SURGED IN MY 2006 TOYOTA AVALON BEGINNING JUST AFTER PURCHASE (WHEN I THOUGHT I MUST HAVE DONE SOMETHING THE FIRST FEW TIMES). THIS HAS CONTINUED SPORADICALLY --THE LAST TIME WAS IN EARLY DECEMBER, 2009--ABOUT TEN TIMES. I HAVE REACTED COUNTER-INTUITIVELY. TAPPING THE GAS PEDAL LIGHTLY, AND THE ENGINE SETTLES DOWN. BECAUSE I HAVE PUT 89,000 MILES ON THE CAR DRIVING FROM SAN FRANCISCO TO LA EACH WEEK, I HAVE PRACTICED PUTTING THE CAR IN NEUTRAL AS A FIRST RESPONSE IF MY LIGHTLY TAPPING THE PEDAL DOES NOT WORK. THE SURGE HAS FELT AS IF THERE IS A GREMLIN IN THE WORKS OF THE CAR PUSHING THE ENGINE. I DOUBT IF THIS IS CONNECTED, BUT MY EMERGENCY BRAKE SETS ITSELF PERIODICALLY--AND I NOW KNOW IF THE CAR IS RUNNING A BIT ODDLY THAT I NEED TO CHECK TO SEE IF THE BRAKE HAS SET ITSELF AGAIN. (ABOUT 30-40 TIMES SINCE I HAVE OWNED THE CAR) BUT THE DEALERS HAVE REACTED QUIZZICALLY. ONE OF MY SONS HAS BEEN ADAMANT THAT I GET RID OF THE CAR, BUT I AM CONVINCED THAT IF IT BEGAN TO GO OUT OF CONTROL, BY SHIFTING INTO NEUTRAL AND THEN TURNING OFF THE CAR IF NEED BE SHOULD THINGS SHOULD REMAIN CONTROLLED. I AM NOT NEAR THE CAR OR THE VIN INFORMATION BUT WOULD BE HAPPY TO PROVIDE THIS AT A LATER DATE.

**Location of Incident:** SIMI VALLEY, CA  
**NHTSA Summary:**  
LASER CRUISE CONTROL SYSTEM: WHEN THE SYSTEM DETECTS A VEHICLE/OBJECT WITHIN THE PROGRAMMED FOLLOWING DISTANCE IT SLOWS THE VEHICLE AS DESIGNED. WHEN THE VEHICLE/OBJECT THEN LEAVES THE DETECTION ZONE THE VEHICLE WILL, IF IT HAS SLOWED SIGNIFICANTLY, SUDDENLY DOWN SHIFT AND ACCELERATE VERY QUICKLY. THIS COULD LEAD TO LOSS OF CONTROL AND POSSIBLY CAUSE A COLLISION WITH ANOTHER VEHICLE IF YOU HAVE CHANGED LANES TO OVERTAKE THE VEHICLE THAT CAUSED YOU TO SLOW. I CANNOT THINK THAT THE MANUFACTURER INTENDED THE SYSTEM TO WORK IN THIS MANNER, BUT IT SEEMS TO BE COMMON ACROSS ALL OF THESE VEHICLES AND NOT A FAILURE. \*AK

**Additional Summary:**

**Toyota ID Number:** 200607130594  
**NHTSA ODI Number:**  
**Date of Incident:** 20060700  
**Vehicle:** 2005 TOYOTA TACOMA  
**Location of Incident:**

**NHTSA Summary:**  
\*\*\* PHONE LOG 07/13/2006 10:12:12 AM SGreen  
Caller states: twice the veh engine start to race and put cllrs life in danger cllr sts the first time cllr had to put the veh into a ditch which cllr did not take the veh to the dlr due to doctors appt and such cllr sts later that day the veh did the same thing this time cllr sts he scraped the side of the building causing addl damage to the side of the veh cllr contact at the dlr is ASM Peter Orlinski who adv cllr to contact toy cllr sts the dlr did mention a FTS.

\*\*\* NOTES 07/13/2006 10:12:13 AM SGreen  
...needs to inspect the veh but did not adv cllr they where going to make that contact cust sts he was not injured but there is damage to the right and left side of the veh which is scraps and scratches and the mirror was knocked off which cllr feels toy should cover the cost of these repairs. cllr sts b4 this the veh has never been involved in any accidents.

\*\*\* SUBCASE 200607130594-1 CREATED 07/13/2006 10:17:48 AM VWong  
\*\*\* NOTES 07/17/2006 09:22:47 AM VWong  
OUTBOUND CUSTOMER CALL:  
NCR called day# & 1m.  
\*\*\* NOTES 07/17/2006 11:43:53 AM JAshby  
Mr. Fahey c/b sts received a call from prev rev VWong & is returning their call. ncr apol & advd will check to see if rep is avail. ner advd rep is unavail. cust sts as a side comment about the automated phone system for cust call-ins. sts the phone system leaves a bad tast in their mouth because in order to speak w/ a rep it is the last option & listening to all the voice prompts takes the cust out of listening to the voice commands. ncr advd will doc cust comment.

\*\*\* NOTES 07/17/2006 12:53:28 PM VWong  
OUTBOUND CUSTOMER CALL:  
NCR called day# & spoke to cust. cust sts engine raced & veh accelerated on its own 2x in one day. sts first time, cust was driving on curvy road and engine raced. sts another veh coming from opposite direction, so

C-629

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

cust swerved into a ditch. sts hit shrubbery and right side of veh scraped and right side pass mirror broke. sts second time cust was making u turn in pharmacy parking lot and engine raced/veh accelerated. sts left side of veh scraped

\*\*\* NOTES 07/17/2006 12:53:29 PM VWong  
pharmacy and veh went through pharmacy drive thru at 60mph before jumping curb. sts pumped brakes & accelerator until engine stopped racing. sts veh is currently at dlr. sts does not know if dlr has touched veh or if repairs have started. sts sks for Toy to cover cost of repairs. NCR adv will check with svc-Peter regarding status of veh & will c/b cust. NCR adv Toy will not inspect veh unless veh in original condition.

\*\*\* NOTES 07/17/2006 12:53:39 PM VWong  
OUTBOUND DEALER CALL:  
NCR called dlr & 1m for svc-Peter.  
\*\*\* NOTES 07/17/2006 12:55:12 PM VWong  
OUTBOUND CUSTOMER CALL:  
NCR called day# & spoke to cust. NCR adv 1m for svc-Peter regarding status of veh. NCR adv once svc-Peter provides status of veh, NCR will c/b cust to let cust know if Toy can inspect. cust understood.

\*\*\* NOTES 07/17/2006 02:56:27 PM VWong  
INBOUND DEALER CALL:  
svc-Peter c/b & spoke to NCR. dlr adv check engine light on & dlr pulled code P0722. dlr adv found pins pulled out of speed sensor connectors. dlr adv put pins back in. dlr adv is unrelated concern and would not have anything to do with engine racing/accelerating by itself. dlr adv no repairs performed to veh.

\*\*\* NOTES 07/18/2006 10:48:04 AM EPolan  
Peter Service Advisor from Precision Toy c/b. Sks to know if & when FTS will be coming to dlr to inspect. NCR cld VWong. but she was not available. NCR adv cllr VWong will c/b in 1 bus day. Cllr left best number to reach: (520)471-3761. Cllr asked if dlr should leave cust in rental, NCR adv leave situation how it is until contacted by VWong.

\*\*\* NOTES 07/18/2006 02:00:08 PM VWong  
OUTBOUND REGION CALL:  
NCR called FTS-JLane (FTS-Swright on vacation) and reviewed case. FTS adv speed sensors are related to trans and would not have anything to do with veh accelerating by itself. FTS adv dlr putting pins back in sensor would not compromise inspection. FTS asked if veh has aftermarket floor mats as mats may get caught under accelerator. NCR adv will check with dlr. NCR thanked for info.

\*\*\* NOTES 07/18/2006 02:00:25 PM VWong  
OUTBOUND DEALER CALL:  
NCR called dlr & spoke with svc-Peter. svc-Peter adv will check to see if veh has aftermarket floor mats and will c/b NCR. NCR thanked.

\*\*\* NOTES 07/18/2006 02:50:56 PM VWong  
OUTBOUND DEALER CALL:  
NCR called dlr & spoke with svc-Peter. dlr adv cell phone died. dlr adv asked tech if veh has aftermarket floor mats but have not heard back yet. sts sks to know if FTS should inspect. sts cust is currently in rental veh that dlr is paying for. NCR adv FTS will inspect veh within 30bd. NCR adv cust will receive results of inspection within 30bd of inspection date. NCR adv Toy declines all costs until responsibility is determined, so cust will need

\*\*\* NOTES 07/18/2006 02:50:57 PM VWong  
to pay for any alternate transportation. dlr understood. NCR adv will call cust to advise of info. dlr adv will have mgr also call cust as well regarding rental.

\*\*\* NOTES 07/18/2006 02:54:53 PM VWong  
OUTBOUND CUSTOMER CALL:  
NCR called day# & spoke to cust. NCR adv revd confirmation from dlr that no repairs performed to veh. NCR adv will open case to region and veh will be inspected within 30bd. NCR adv cust will receive results within 30bd of inspection date. NCR adv Toy will not cover cost of rental. cust understood & adv will call dlr tomorrow.

**Date of Incident:** 20060704  
**Vehicle:** 2004 TOYOTA COROLLA  
**Location of Incident:** ST. JOSEPH, MO

**NHTSA Summary:**  
ON 4 OCCASIONS, OUR 2004 TOYOTA COROLLA ENGINE HAS RACED WHILE THE CAR WAS BEING BACKED UP AND MY FOOT WAS ON THE BRAKE PEDAL. THE MOST SERIOUS INCIDENT WAS IN A PARKING LOT WITH MANY PEOPLE MILLING AROUND TO WATCH A FIREWORKS SHOW. THE HARDER I PUSHED ON THE BRAKE PEDAL, THE FASTER THE ENGINE RAN. FORTUNATELY, THE BRAKES STOPPED THE CAR BEFORE I RAN OVER ANYONE. APPARENTLY, THE BRAKE PEDAL WENT DOWN SO FAR THAT MY FOOT COULD HIT THE GAS PEDAL AT THE SAME TIME. ALSO, THE BRAKE AND GAS PEDALS ARE VERY CLOSE TOGETHER.

**Date of Incident:** 20060707  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** HAUPPAUGE, NY

**NHTSA Summary:**

I'D LIKE TO FILE A COMPLAINT RELATED TO TOYOTA'S REFUSAL TO RESPOND TO THEIR 2007 CAMRY LE 4 CYLINDER HESITATION PROBLEMS. SYMPTOMS INCLUDE (1) POOR ACCELERATION, (2) HESITATION WHEN ACCELERATING (3) "AUTOMATIC" SHIFTING OF THE TRANSMISSION WHEN DRIVING WITH CRUISE CONTROL ON FLAT ROADS AND (4) POOR GAS MILEAGE. THE HESITATION IS VERY DANGEROUS, PULLING OUT IN FRONT OF OTHER VEHICLES OR MERGING INTO TRAFFIC COULD BE TREACHEROUS WHEN THE HESITATION OCCURS. I HAVE EXPERIENCED THIS SITUATION ON SEVERAL OCCASIONS AND FORTUNATELY HAVE NOT BEEN INVOLVED IN AN ACCIDENT YET BUT I SURE OTHERS HAVE! IN ADDITION TO THE DANGEROUS SITUATIONS, I AM VERY DISAPPOINTED THAT TOYOTA HAS FAILED TO NOTIFY CUSTOMERS OF THESE ISSUES. I CALLED TOYOTA IN JUNE, 2006, WHEN MY CAMRY LE(4 CYLINDER) HAD 1000 MILES AND QUESTIONED THE "TRANSMISSION" CONCERN BUT WAS TOLD THAT PROBLEMS ONLY RELATED ONLY TO THE 6 CYLINDER CAMRY AUTOS. SINCE THEN I HAVE STRUGGLED WITH THE HESITATING ISSUES AND AM SHOCKED THAT I WAS NOT MADE AWARE OF "KNOW" PROBLEMS WHEN MY WAS HAS BEEN SERVICED AT MY LOCAL TOYOTA DEALER. RECENTLY I WAS SURPRISED TO SEE MANY COMMENTS RELATED TO THIS ISSUE ON EDMUNDS CAMRY FORUMS. I AM NOW PROACTIVELY RESEARCHING AND WAITING FOR TOYOTA TO RESPOND BEFORE I ELEVATE THE ISSUE AS A LEMONLAW BATTLE IN NEW YORK. PLEASE, FOR SAFETY SAKE, MAKE TOYOTA INFORM INNOCENT 2007 OWNERS BEFORE SERIOUS ACCIDENTS OCCUR. REPRESENTATIVES AT MY LOCAL TOYOTA DEALER, STEVENS IN HUNTINGTON, NEW YORK, CLAIM THAT THEY ARE NOT AWARE OF THE PROBLEM AND TOYOTA (USA) APPEARS TO BE DRAGGING THEIR FEET ON NOTIFYING AND ELEVATING THE ISSUES! AFTER SEVERAL CALLS TO THE DEALER AND TOYOTA(USA) I STILL AM WAITING TO BE CONTACTED. SINCERELY JOHN FLEMING 15 HOLIDAY PARK DRIVE HAUPPAUGE NY 11788 631 360-3832. \*NM

**Date of Incident:** 20060709  
**Vehicle:** 2005 LEXUS ES330  
**Location of Incident:** NORTH CANTON, OH

**NHTSA Summary:**

ON SUNDAY JULY 9, 2006 AT APPROXIMATELY 3:30 P.M. I DECIDED TO STOP AT THE GROCERY STORE. I PULLED INTO THE PARKING LOT AND WAS DRIVING SLOWLY WITH MY FOOT ON THE BRAKE TO ENTER A PARKING SPACE I TURNED LEFT AND EASED SLOWLY INTO THE PARKING SPACE WITH MY FOOT ON THE BRAKE BRINGING THE CAR TO A STOP. THE MOMENT I STOPPED I REACHED OVER TO PUT THE CAR IN PARK AND ALL OF A SUDDEN THE CAR SURGED ENOUGH TO MOVE THE FRONT WHEELS OVER THE CAR STOP IN AN INSTANT WITH MY FOOT STILL ON THE BRAKE. I WAS SHOCKED. WHY WAS THE CAR DOING THIS? I STILL HAD MY FOOT POSITIONED ON THE BRAKE AND PUSHED DOWN. THE CAR CONTINUED TO ACCELERATE, AND THE BACK TIRES CAME OVER THE CAR STOP. AT THIS POINT I REMOVED THE FOOT TOTALLY FROM THE BRAKE TO SEE IF THE ENGINE WOULD SLOW DOWN NATURALLY WITHOUT ANY ACTION AT ALL BY ME. THE ENGINE CONTINUED TO SURGE TOTALLY ON ITS OWN. I TRIED THE BRAKE AGAIN AND THE CAR STILL DID NOT STOP. AT THIS POINT I REALIZED THAT I WAS GOING TO GO INTO THE ROAD. I LOOKED BOTH WAYS AND SAW A SILVER TOYOTA WITH A LADY DRIVING IT. A COLLISION THEN HAPPENED AND I JAMMED THE BRAKE ON AGAIN AND THE CAR FINALLY STOPPED. I WAS CITED FOR FAILURE TO CONTROL. MY BROTHER WORKED AT LEXUS. HE TOLD ME ANOTHER LADY HAD A SIMILAR ACCIDENT WHILE SHE WAS PULLING INTO THE GARAGE AND THE ENGINE SURGED AND SHE RAN INTO THE GARAGE DOOR. I DECIDED TO LOOK INTO IT FURTHER ON THE INTERNET WHEN I GOT THE INFORMATION I FOUND WAS UNBELIEVABLE. COMPLAINTS WERE STILL BEING MADE ON ONGOING BASIS. I WENT TO COURT FOR MY TICKET. I HAD TO HIRE AN ATTORNEY TO DEFEND MYSELF. THE CHARGES AGAINST ME WERE REDUCED TO DRIVING AN UNSAFE VEHICLE. AND I ENTERED A NO-CONTEST PLEA. I HAVE INCURRED PSYCHOLOGICAL TRAUMA AND OTHER PHYSICAL INJURIES AS A RESULT OF THIS ACCIDENT. I WOULD LIKE TO GET OUT OF MY LEASE WITH LEXUS, BUT LEXUS WON'T ALLOW IT. IF LEXUS ACKNOWLEDGES ANY PROBLEM WITH MY CA, THEY WILL HAVE TO ACKNOWLEDGE ALL OF THE OTHER PROBLEMS REPORTED BY LEXUS DRIVERS. \*AK; ON JULY 9, 2006 AT 3:30 P.M., I STOPPED AT FISHERS FOODS IN CANTON, OHIO. I PULLED INTO THE PARKING LOT FROM THE FRANK RD. SIDE OF FISHERS AND WAS DRIVING SLOWLY WITH MY FOOT ON THE BRAKE TO ENTER A PARKING SPACE. THE PARKING SPACE WAS LOCATED DIRECTLY ACROSS FROM THE ENTRANCE AND I TURNED LEFT AND EASED SLOWLY INTO THE SPACE WITH MY FOOT ON THE BRAKE BRINGING THE CAR TO A STOP. THE MOMENT I STOPPED, I REACHED OVER TO PUT THE CAR IN PARK AND ALL OF A SUDDEN, THE CAR ENGINE SURGED ENOUGH TO MOVE MY FRONT WHEELS OVER THE CAR STOP IN AN INSTANT WITH MY FOOT STILL ON THE BRAKE. I WAS TOTALLY SHOCKED. I STILL HAD MY FOOT POSITIONED ON THE BRAKE AND PUSHED DOWN. THE CAR CONTINUED TO ACCELERATE AND THE BACK TIRES CAME OVER THE CAR STOP. AT THIS POINT, I REMOVED MY FOOT TOTALLY FROM THE BRAKE TO SEE IF THE ENGINE WOULD SLOW DOWN NATURALLY WITHOUT ANY ACTION AT ALL BY ME. THE ENGINE CONTINUED TO SURGE JUST AS FAST TOTALLY ON ITS OWN. I TRIED THE BRAKE AGAIN AND THE CAR STILL DID NOT STOP. I LIFTED MY FOOT FROM THE BRAKE AGAIN AND AT THIS POINT REALIZED I WAS GOING TO GO INTO THE ROAD. I LOOKED TO THE LEFT AND SAW A CAR COMING DOWN THE ROAD A FAIR DISTANCE AWAY. I THEN LOOKED TO THE RIGHT AND SAW A SILVER TOYOTA WITH A LADY DRIVING IT. I KNEW I WAS GOING TO

C-636

#### Safety Research & Strategies

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

HIT HER. THE COLLISION HAPPENED AND I PUT THE BRAKE ON AGAIN AND THE CAR FINALLY STOPPED. THE POLICE CITED ME FOR FAILURE TO CONTROL. AS I WAS WAITING FOR MY HUSBAND TO PICK ME UP AFTER THE ACCIDENT, HE CALLED ME AND TOLD ME THAT HE HAD TALKED TO MY BROTHER AND THAT WHILE MY BROTHER WAS WORKING AT LEXUS, ANOTHER LADY HAD A SIMILAR ACCIDENT, ONLY HERS HAPPENED WHEN SHE WAS PULLING INTO HER GARAGE AND HER ENGINE SURGED AND HER CAR RAN INTO THE GARAGE DOOR. I THOUGHT THIS WAS KIND OF A BIG COINCIDENCE AND I DECIDED TO LOOK INTO IT FURTHER ON THE INTERNET WHEN I GOT HOME. THE INFORMATION I FOUND OUT ABOUT WAS SHOCKING, UNBELIEVABLE, AND ALSO MADE ME VERY ANGRY. THE COMPLAINTS ARE STILL BEING MADE ON AN ONGOING BASIS. \*JB, 2005 ES330, PULLING INTO PARKING SPACE READY TO STOP AND EXPERIENCED SUDDEN ACCELERATION INCIDENT RESULTING IN A CRASH INTO ANOTHER CAR. *Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

OUR 2006 TOYOTA AVALON (LIMITED) WAS IN CRUISE CONTROL SET TO HIGHWAY SPEED, ABOUT 60 TO 70 MPH. FOR A REDUCED SPEED ZONE, THE CAR WAS SLOWED BY 10 MPH USING CRUISE CONTROL. AFTER THE REDUCED SPEED ZONE, CRUISE CONTROL SETPOINT WAS INCREASED 10 MPH TO RETURN TO THE PREVIOUS HIGHWAY SPEED, AND THE CAR CONTINUED TO ACCELERATE UNCONTROLLABLY TO MORE THAN 80 MPH. THEN, THE BRAKE WAS APPLIED WHICH TOOK CAR OUT OF CRUISE CONTROL. THE CAR SLOWED, AND CRUISE CONTROL WAS RESET TO HIGHWAY SPEED. THE PROBLEM DID NOT RECUR ON THAT TRIP IN 2006, BUT THERE HAVE BEEN OTHER CASES OF UNCONTROLLED ACCELERATION SINCE THE ABOVE INCIDENT.

**NHTSA ODI Number:** 10305452  
**Date of Incident:** 20060715  
**Vehicle:** 2005 TOYOTA TACOMA  
**Location of Incident:** GLENDALE, AZ  
**NHTSA Summary:**

I WAS ON VACATION IN MY 2005 TOYOTA TACOMA 4X4 4 DOOR IN COLORADO. WITH THE CRUISE CONTROL ON AND SET FOR 65 MPH, I STARTED UP A PASS ON I-25 APPROACHING RATON, NM FROM THE NORTH. AS WE WENT UPHILL AND THE VEHICLE LUGGED DOWN, IT SHIFT DOWN AND BEGAN RAPID ACCELERATION AND AS WE ENTERED A TURN WAS ACCELERATING THROUGH 85 MPH. MY FOOT WAS NOT ON THE GAS PEDAL AND THE FLOOR MAT WAS NOT ANYWHERE NEAR THE PEDAL. I STOOD ON THE BRAKE BUT THE ACCELERATION CONTINUED. I PUSHED THE CRUISE CONTROL BUTTON ON THE STEERING WHEEL AND IT DISENGAGED. WE MADE IT THROUGH THE INCIDENT WITH NO LOSS OF ANYTHING BUT PERHAPS SOME OF MY HAIR. AFTER RETURNING FROM VACATION I TOOK THE VEHICLE TO LARRY MILLER TOYOTA IN PEORIA, ARIZONA AND COMPLAINED ABOUT THE PROBLEM WE EXPERIENCED. THE DEALERS EMPLOYEES INDICATED THEY HAVE NEVER HEARD SUCH A THING AND THEN COPIED THE OWNERS MANUAL HIGHLIGHTING THE PART THAT SAYS TO DISENGAGE THE CRUISE CONTROL WHEN GOING UPHILLS. I HAVE BEEN DRIVING THE VEHICLE FOR FIVE YEARS NOW AND HAVE LEARNED TO TURN OFF THE CRUISE GOING UPHILLS BUT HAVE STILL EXPERIENCED THE PROBLEM THREE OTHER TIMES WHEN I WAS NOT CONCIOS OF THE GRADE WE WERE ON AND IT HAPPENED AGAIN. I HAVE OWNED SEVERAL VEHICLE WITH CRUISE CONTROL IN MY LIFE AND HAVE NEVER HAD AN ISSUE WITH CRUISE CONTROL GOING UPHILLS EXCEPT THE POTENTIAL OF THE TRANSMISSION SHIFTING UP AND DOWN FROM OVERDRIVE TO ALLOW THE VEHICLE TO MAINTAIN THE SPEED SET. WE ALSO OWN A 2000 TOYOTA AVALON WHICH I DRIVE ON VACATIONS AND IF THERE IS ANY ISSUE I TURN OFF THE OVERDRIVE AND IT DOES FINE. I BELIEVE THERE IS A COMPUTER ISSUE WITH THIS MODEL THAT CREATES THE PROBLEM AND IT HAS NOTHING TO DO WITH FLOOR MATS.

**Date of Incident:** 20060728  
**Vehicle:** 2006 TOYOTA RAV4  
**Location of Incident:** LIVONIA, MI

**NHTSA Summary:**  
ACCELERATION STUMBLES & BOGS DOWN WHEN GAS PEDAL IS APPLIED. THIS SCENARIO OCCURS ALL THE TIME WHEN AFTER A NORMAL ACCELERATION IS PERFORMED AND A NEED ARISES TO ACCELERATE OCCURS. IF YOU DEPRESS ACCELERATOR IMMEDIATELY UPON TAKING OFF THIS DOES NOT OCCUR BUT, IT CAUSES YOU TO OVER CORRECT STUMBLING BY SPEEDING QUICKLY. IF YOU NEED TO ACCELERATE, THE ENGINE WILL NOT RESPOND TO A NORMAL DEPRESSION OF GAS PEDAL. YOU NEED TO DEPRESS IT QUICKLY TO CAUSE THE ENGINE TO GO INTO PASSING GEAR ETC. MY "AUTO WISE" SON HAS SUGGESTED THAT THE GAS PEDAL DRIVE BY WIRE SENSORS COULD BE FAILING OR BE BAD ETC. \*NM

**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** LOMITA, CA

**NHTSA Summary:**  
I PURCHASED THE VEHICLE IN OCT OF 2005, AND STARTED TO TAKE FREQUENT TRIPS TO ARIZONA USING HIGHWAY 40 ABOUT NINE MONTHS AFTER I PURCHASED IT. SINCE ITS NOT A DENSELY POPULATED FREEWAY, I NORMALLY SET THE CRUISE CONTROL BETWEEN 65-70MPH. SOMETIMES I NEED TO DECELERATE BY APPLYING THE BRAKE PEDAL TO CHANGE LANES AND LET SOMEONE PASS, AND WHEN I GO TO RESUME TO MY PREVIOUSLY SET SPEED, THE TACOMA DOWN-SHIFTS AT LEAST ONE TO TWO GEARS, REVS RPMs HIGH, AND ACCELERATES, NORMALLY PASSING THE ORIGINAL SET SPEED. NORMALLY, I DON'T RESUME THE CRUISE CONTROL UNTIL I AM WITHIN 3-5 MPH OF THE RATE OF SPEED IT WAS PREVIOUSLY SET FOR, BUT NEVERTHELESS, IT WILL DOWNSHIFT, ACCELERATE AND PASS THE SET SPEED. THIS IS NOT HAPPENING ON AN UPGRADE, BUT ON A REASONABLY LEVEL STRETCH OF ROAD. THE CRUISE CONTROL DOES THIS EVERY TIME, NO MATTER THE DRIVER OF THE VEHICLE. \*TR

**NHTSA Summary:**  
NOV. 2003, GOING 25 MPH IN HEAVY TRAFFIC I HIT A POT HOLE AND THE CAR SUDDENLY ACCELERATED. I HAD MY FOOT ON THE BRAKE ALREADY AS THERE WAS A RED LIGHT AHEAD AND HAD TO USE EXTREME FORCE TO STOP THE CAR. I PUT IT IN NEUTRAL AND IT STOPPED RACING. JULY 11, 2006 I WAS TRAVELING AT 75 MPH AND HEARD A NOISE AS IF THE CAR WAS RACING. IT WAS REGISTERING 5500 RPMs. I SLOWED TO 65-70 AND IT WENT DOWN TO 5000 RPMs. I GOT OFF AT THE NEXT EXIT AND WHEN I CAME TO A STOP IT RETURNED TO NORMAL. FOR THE NEXT HOUR I TRAVELED AT 75 WITH THE CAR REGISTERING APPROX 2000RPMs. JULY 31, TRAVELING APPROX. 25MPH IN HEAVY TRAFFIC I TRIED TO SLOW TO AVOID HITTING THE CAR IN FRONT OF ME AS IT TURNED RIGHT. IT WAS EXTREMELY DIFFICULT AND I WOULD HAVE HIT IT IF IT HADN'T TURNED. AGAIN I HAD TO USE SIGNIFICANT PRESSURE ON THE BRAKE TO BRING IT TO A STOP. AS IT CAME TO A STOP I NOTICED THAT IT WAS AT 3000 RPMs. WHEN IT WAS COMPLETELY STOPPED IT RETURNED TO A NORMAL 500 OR SO. AUGUST 2, 2006 AS I WAS ABOUT TO

**C-642**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ASCEND A HILL, IT SUDDENLY ACCELERATED WITHOUT MY APPLYING MORE GAS, BUT RETURNED TO NORMAL WHEN I STEPPED ON THE GAS. I DIDN'T NOTICE THE RPM READING. TODAY I TRADED THE CAR IN, RATHER THAN RISK INJURY TO MYSELF OR OTHERS BY CONTINUING TO DRIVE IT. THE TOYOTA DEALER WAS PREVIOUSLY UNABLE TO DUPLICATE THE INCIDENTS OR FIND THE SOURCE OF THE PROBLEM. THE DEALER IS GOING TO TRY TO FIND THE PROBLEM

**NHTSA Summary:**  
THE CAR'S CRUISE CONTROL BEHAVIOR ON LEVEL GROUND IS FINE, BUT ON ROLLING HILLS ITS TOTALLY EGREGIOUS, AND INDICATES TO ME THAT THIS FEEDBACK CONTROL SYSTEM MAY BE CLOSE TO INSTABILITY AND THEREFORE POTENTIALLY DANGEROUS. I THINK THAT THE CONTROL ALGORITHM USED IS DREADFULLY SUB-OPTIMAL, AND HAS SUCH LONG INTERNAL CONTROL-LOOP PROCESSING DELAYS THAT ITS REACTIONS TO CHANGING ROAD CONDITIONS ARE ALARMING. WHAT I FIND IS THE FOLLOWING BEHAVIOR: THE CAR SUBSTANTIALLY OVERSHOOTS (BY 10 MPH OR MORE) THE SET SPEED ON THE DOWNHILL PORTION OF EACH HILL, BUT THEN WAITS SO LONG BEFORE REACTING TO THE BEGINNING OF THE NEXT UPHILL PORTION, THAT IT THEN UNDERSHOOTS THE SET SPEED BY SUCH A LARGE AMOUNT (5 MPH OR MORE) THAT IT HAS TO "FLOOR" THE ACCELERATOR IN ORDER TO CATCH UP. STILL ON THE UPHILL PORTION, IT THEN PROCEEDS TO OVERSHOOT THE SET SPEED AGAIN, BEFORE FINALLY SETTLING DOWN TO THE DESIRED SPEED. THIS CYCLE OF EVENTS REPEATS OVER AND OVER AGAIN AS ONE NEGOTIATES ROLLING HILLS WITH THE CRUISE CONTROL "ON." WHY IS THE INTERNAL LOOP DELAY SO LONG? WHY IS THE CRUISE CONTROL SYSTEM NOT PROPERLY DESIGNED? (I HAPPEN TO HAVE EXPERTISE IN CONTROL SYSTEMS), THIS CONTROL SYSTEM REALLY NEEDS TO BE RE-DESIGNED AS A MATTER OF PRIORITY! THE CRUISE CONTROL'S BEHAVIOR COULD THEN BE FIXED BY A SIMPLE FIRMWARE UPDATE. \*JB

**Date of Incident:** 20060801  
**Vehicle:** 1986 TOYOTA TERCEL  
**Location of Incident:** MINNEAPOLIS, MN

**NHTSA Summary:**  
IN 2006-2007, MY 20 YEAR-OLD 1986 TOYOTA TERCEL STATION WAGON BEGAN EXHIBITING SUDDEN ACCELERATION AND/OR FAILURE TO DECELERATE, CAUSED BY A STICKING ACCELERATOR PEDAL -- CAUSING NO INJURIES BUT REQUIRING ME TO BRAKE, SHIFT TO NEUTRAL, AND/OR STOMP REPEATEDLY ON THE ACCELERATOR PEDAL TO LOOSEN IT AND ALLOW IT TO RISE BACK UP. THERE WERE AT LEAST 4-5 OCCASIONS WHEN THIS OCCURRED OVER 6 MONTHS -- WITH NONE OF THE INCIDENTS INVOLVING A FLOOR MAT. THE ACCELERATOR PROBLEM WAS CONFIRMED ON A TEST DRIVE BY MY LOCAL (NON-TOYOTA) CAR MECHANIC, WHO COULD FIND NO APPARENT CAUSE (SUCH AS RUST) OR FIX FOR THE STICKING GAS PEDAL. WE CONSEQUENTLY SIMPLY ATTRIBUTED THE PROBLEM TO THE "OLD AGE" OF THE AUTO -- WHICH I IMMEDIATELY DISCONTINUED DRIVING AND LATER JUNKED BECAUSE IT HAD BECOME UNSAFE FOR DRIVING. IN LIGHT OF THE RECENTLY-REPORTED SUDDEN ACCELERATION PROBLEMS WITH LATER TOYOTA MODELS, I'D ADVISE LOOKING INTO WHETHER THE 1980'S TOYOTA TERCEL GAS PEDAL USED THE SAME, OR A SIMILARLY SUSCEPTIBLE, TYPE OF PEDAL ASSEMBLY AS THOSE OF THESE LATER TOYOTA MODELS; IF SO, IT MAY BE POSSIBLE THAT THE PROBLEM WITH TOYOTA'S PEDAL ASSEMBLIES GOES BACK FURTHER THAN CURRENTLY PRESUMED.

**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** CYPRESS, TX

**NHTSA Summary:**

DT\*: THE VEHICLE STATED WHILE TRAVELING 65 MPH ON DRY ROAD CONDITIONS, THE VEHICLE BEGAN TO ACCELERATE UNCONTROLLABLY TO 70 MPH. THE CRUISE CONTROL WAS ACTIVATED WHEN THIS OCCURRED. THE VEHICLE WAS PLACED IN NEUTRAL, AND THE BRAKE PEDAL WAS DEPRESSED, WHICH SLOWED DOWN THE VEHICLE. ON ANOTHER OCCASION WHILE TRAVELING 20 MPH, SUDDEN ACCELERATION RECURRED. THE VEHICLE WAS SHIFTED INTO PARK AND THE IGNITION WAS TURNED OFF. THE DEALER WAS CONTACTED WHO DETERMINED THAT THE FLOORMAT COULD HAVE DEPRESSED THE ACCELERATOR PEDAL. ON 12/05/06, THE PROBLEM RECURRED WHILE TRAVELING 30 MPH. THE BRAKES WERE DEPRESSED, WHICH DID NOT STOP THE VEHICLE. THE AUTOMATIC TRANSMISSION WAS SHIFTED INTO PARK, WHICH COMPLETELY SHUT THE VEHICLE OFF. SMOKE WAS NOTICED COMING FROM THE ENGINE COMPARTMENT. ON 12/06/06, THE MANUFACTURER WAS CONTACTED, WHO PROVIDED NO ASSISTANCE.

**Vehicle:** 2006 TOYOTA RAV4  
**Location of Incident:** HUNTINGTON, NY

**NHTSA Summary:**

I PURCHASED A 2006 TOYOTA RAV4 IN APRIL AND THE VEHICLE SEEMS TO HAVE AN ISSUE NO ONE WANTS TO ADDRESS. WE ON THE FORUMS CALL IT ERRATIC ACCELERATION. THE CAR USES SOME TYPE OF ELECTRONIC SENSORS TO DETERMINE THE CHANGE IN GEARS WHEN ACCELERATING AND IT IS VERY ERRATIC. ONE TIME IT GOES SMOOTHLY AND ANOTHER IT TAKES OFF, VERY DANGEROUS AND UNSTABLE. TOYOTA WON'T ACKNOWLEDGE THIS ISSUE BUT 90% OF THE OWNERS WILL TESTIFY TO IT. TOYOTA NEEDS TO COME UP WITH A FIX BEFORE SOMEONE IS SERIOUSLY HURT. THIS HAPPENS EVERY TIME I DRIVE. \* NM

**Location of Incident:** TRURO, MA

**NHTSA Summary:**

I AM WRITING ABOUT MY CURRENT CAR, A TOYOTA 2006 CAMRY, BECAUSE IT RELATES TO AN ACCIDENT I HAD WITH MY 2005 CAMRY. I AM AWARE THAT TOYOTA HAS NOT RECALLED THE 2006 MODEL. WHEN I START UP MY 2006 CAMRY AFTER IT HAS BEEN IN PARK, WITH THE ENGINE OFF, FOR AS LITTLE AS 5 MINUTE STOP OR OVERNIGHT IN THE GARAGE, WHEN I SHIFT INTO DRIVE AND RELEASE MY FOOT FROM THE BRAKE, THE CAR MOVES BY ITSELF, FAIRLY RAPIDLY, WITHOUT MY FOOT TOUCHING THE ACCELERATOR. AFTER ABOUT 3/4 OF A MILE ALONG THE ROAD DURING WHICH I ALTERNATELY APPLY THE BRAKE AND LIFT MY FOOT FROM IT, STILL NOT TOUCHING THE ACCELERATOR, THE CAR FINALLY BEGINS TO OPERATE NORMALLY REQUIRING FOR THE FIRST MOMENT SOME PRESSURE ON THE ACCELERATOR. WHEN I RETURN HOME, REGARDLESS OF HOW FAR OR LONG I HAVE DRIVEN, AFTER PAUSING TO OPEN THE GARAGE DOOR (BY REMOTE) I EASE MY FOOT FROM THE BRAKE PEDAL AND THE CAR GLIDES INTO THE GARAGE ON IS OWN. WHILE I AM ABLE TO CONTROL THE CAR SAFELY SO FAR I AM UNCOMFORTABLE WITH THE SITUATION BECAUSE I HAD A MAJOR ACCIDENT WITH MY

C-646

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

2005 CAMRY IN AUGUST, 2006. IT HAPPENED AS I EMERGED FROM A CAR WASH. WHEN I SHIFTED INTO DRIVE FROM NEUTRAL, THE CAR ACCELERATED ITSELF AND STUCK IN HIGH SPEED, AT LEAST 80 MILES PER HOUR. I AM SURE THAT I TRIED TO STOP IT BY APPLYING THE BRAKES IMMEDIATELY AND CERTAINLY IN THE END BEFORE I PURPOSELY CRASHED INTO A TREE AFTER A TERRIFYING DRIVE DODGING PEOPLE, CARS, AND BUILDINGS. I SURVIVED ALTHOUGH SUSTAINING A BACK INJURY WHICH NECESSITATED AN OPERATION, BUT THE CAR DID NOT. I DID NOT COMMUNICATE WITH TOYOTA ABOUT IT AND DO NOT KNOW IF MY INSURANCE COMPANY DID. LAST WEEK I TOOK MY 2006 CAMRY TO MY TOYOTA DEALER AND DESCRIBED WHAT IS HAPPENING WITH THE CAR AND THEY ASSURED ME THAT THIS "INDEPENDENT" ACCELERATION IS NORMAL AND INTENDED BY THE MANUFACTURER.

**NHTSA Summary:**

2005 TOYOTA PRIUS, 10 MONTHS OLD, 14,000 MILES. MY WIFE EXPERIENCED AN UNINTENDED ACCELERATION WHILE COASTING DOWN INTERSTATE AT 65 MPH WITH FEET OFF PEDALS. VEHICLE SURGED TO 90 MPH EVEN THOUGH SHE APPLIED BOTH REGULAR AND EMERGENCY BRAKE DURING ACCELERATION. SHE CHECKED BOTH FEET ON BRAKES NOT OBSTRUCTED. SHE EXITED INTERSTATE AND CAREENED THROUGH SMALL TOWN EVENTUALLY DITCHING VEHICLE THROUGH FOREST, ENDING UP IN A RIVER AFTER SOMERSAULTING END OVER END 3 TIMES, CLIPPING OFF TREES 10 FEET ABOVE THE GROUND. STATE PATROL INVESTIGATION CONCLUDES ACCELERATOR CAUSED ACCIDENT. NUMEROUS CONTACTS WITH TOYOTA BEGINNING DAY OF ACCIDENT. NO ACTION BY TOYOTA AS OF MARCH 2007. \*JB

**Additional Summary:**

from Houston Press article dated April 23, 2009 - As Ted James from Eagle, Colorado, puts it (his Prius ended up in a river). "We're not the kind of people to go through a lawsuit, and it's not in our nature. Our concern was that no one else got hurt, that Toyota own up to its problem."

Ted James was a believer, not only in the Prius but also in Toyota. About the time the Prius was released in America, James, a middle-school math teacher from Eagle, Colorado, received a \$10,000 Toyota Time grant that was given to 35 math teachers around the country to develop inventive programs. James used his money to buy equipment to monitor the water quality of a local watershed, and his students used advanced math techniques to analyze the data they collected.

C-647

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

In 2002, Toyota paid for James, along with the other Time winners, to travel to the company's U.S. headquarters in Torrance, California, and talk about their projects. During a lunch break one day, Toyota executives introduced the group to the Prius. Each teacher was outfitted with one of the hybrids for a day of driving around Torrance. "I thought they were the coolest thing ever," James says. He and his wife Elizabeth, who teaches at an elementary school, bought their first Prius three years later. "I was very proud because we were the first teachers in the parking lot to be sporting a Prius," he says. On August 10, 2006, Elizabeth was driving the car east on Interstate 70 toward Denver to catch an early morning flight. Near the small town of Lawson, she pressed the brakes to slow down and when she let off the pedal, the Prius took off. The car wouldn't slow down "no matter how hard I pressed on the brake," so Elizabeth used her left foot to slam down the emergency brake. Nothing. The brakes squeaked blue smoke from the back of the car, and when Elizabeth glanced down, the speedometer displayed 90 mph and the Prius was rocketing towards a car in the slow lane. Gripping the steering wheel with both hands, Elizabeth whipped around that car along the shoulder of the interstate, exited the Lawson ramp, ran a stop sign, passed a couple of people walking in the road and steered into a grassy field when the feeder cut to the left.

"She said she felt like the pilot of a plane that was trying to crash-land," Ted James says. "So she was looking for a place to crash the car, and that was one of the things that were really tough: She thought she was going to die and had enough time to think about it."

The Prius sped through a wooded area, clipped a weather monitoring shed, flipped and landed in a river. Elizabeth survived the wreck, but her legs and back were banged up and she's still hobbled, despite a year's worth of physical therapy. Scar tissue on her intestines requires her to drink MiraLAX for the rest of her life to ease stomach pains. After the crash, Ted James enlisted the help of a childhood friend, attorney Kent Spangler (who practiced family law at the time and now is a magistrate in Fort Collins, Colorado), to steer the Jameses through arbitration with Toyota. They wanted Elizabeth's medical bills — about \$15,000 — paid and to have the smashed Prius examined for a cause of the wreck. "You'd think Toyota would be interested in how their car functioned in that crash," Ted James says.

"My wife's brother and sister owned Priuses, and we were really worried that this could happen to someone else. Toyota's whole reaction was really disconcerting. It was like deny everything."

Toyota's response was, in fact, minimal. In a letter to James, the company blamed the problem on excessive brake wear, stating, "We are sure she believes that her vehicle accelerated on its own; but our inspection of her vehicle did not reveal any evidence to support her allegations."

**Date of Incident:** 20060818  
**Vehicle:** 2006 TOYOTA AVALON  
**Location of Incident:** HOT SPRINGS VILLAGE, AR

**NHTSA Summary:**  
WE HAVE A 2006 TOYOTA AVALON. WHEN THAT VEHICLE IS IN CRUISE, AND ACCELERATES FOR A HILL, THE FORCE IS SO STRONG THAT ITS LIKE THE ACCELERATOR WAS PUNCHED FOR PASSING. THAT BEHAVIOR HAS EXISTED SINCE THE VEHICLE WAS NEW. SINCE WE LIVE IN THE HILLY PART OF ARKANSAS, WE NEVER USE OUR CRUISE CONTROL ON LOCAL ROADS. WE HAVE NOTED MANY RECENT REPORTS OF STICKING ACCELERATOR PEDALS, AND HAVE WONDERED IF THE RESULTANT CRASHES WERE ACTUALLY CAUSED BY A MALFUNCTIONING CRUISE CONTROL SYSTEM, IN CONJUNCTION WITH THE REPORTED PEDAL STICKING ISSUE. IF THAT IS TRUE, THEN TOYOTA'S CURRENT PLANS TO ADD SHIMS WILL NOT RESOLVE THE PROBLEM.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** MCKINNEY, TX

**NHTSA Summary:**

THIS IS TO REPORT AN ACCIDENT WE HAD IN OUR 2005 TOYOTA CAMRY. AT THE END OF AUGUST 2006 MY FAMILY, WITH MY HUSBAND DRIVING, WERE TURNING INTO THE LUBY'S PARKING LOT IN PLANO, TEXAS. AS HE TURNED INTO THE PARKING SPACE GOING APPROX. 1-2 MPH, THE CAR SUDDENLY STARTED REVVING LIKE CRAZY AND ACCELERATED AT HIGH SPEED INTO A LIGHT POLE AT THE FRONT OF THE PARKING SPACE. THE ACCELERATION HAPPENED IN A SPACE OF ABOUT 5 TO 7 FEET AND YET THE FRONT END OF THE CAR WAS DAMAGED SO BAD THAT THE PASSENGER SIDE DOOR WOULDN'T OPEN. THE LIGHT POLE HAD A CEMENT BASE AND STOPPED THE CAR FROM GOING ANY FURTHER BUT THE CAR WAS STILL ACCELERATING AFTER WE HAD STOPPED. AFTER MY HUSBAND TURNED OFF THE KEY, THE ENGINE RAN FOR A MINUTE OR TWO MORE. AT THE TIME WE HAD NO CLUE THAT IT COULD HAVE BEEN A PROBLEM WITH THE TOYOTA. ALTHOUGH WE SUSPECTED IT, OUR CAR IS ALSO NOT ON THE RECALL LIST. MY HUSBAND MADE A STATEMENT TO THE INSURANCE COMPANY AT THE TIME AND I WOULD ASSUME THEY WOULD HAVE THIS ON FILE. THE CAR WAS REPAIRED BUT WE ARE WORRIED THIS MIGHT HAPPEN AGAIN. SINCE WE DON'T KNOW WHICH IF ANY PART MALFUNCTIONED, WE DO NOT KNOW IF IT WAS REPLACED AFTER THE ACCIDENT.

**Date of Incident:** 20060828  
**Vehicle:** 2002 LEXUS IS300  
**Location of Incident:** QUINCY, CA

**NHTSA Summary:**  
ON 8/28/06, AT APPROXIMATELY 8:50 AM I WAS DRIVING TO WORK ON A TWO LANE, LEVEL, STRAIGHT PAVED COUNTY ROAD. I WAS DRIVING MY 2002 LEXUS IS 300 THAT HAD JUST REACHED 26,000 MILES. (THIS CAR HAS RECEIVED ALL REGULARLY SCHEDULED MAINTENANCE SERVICES FROM LEXUS OF RENO AND HAS NOT HAD ANY PROBLEMS WHATSOEVER. I AM THE ORIGINAL OWNER OF THIS VEHICLE) THE ROAD WAS CLEAR AND DRY. I WAS TRAVELING AT APPROXIMATELY 45 MPH WHEN I ACCELERATED TO PASS ANOTHER VEHICLE. AS I PASSED, MY CAR KEPT ON ACCELERATING EVEN AS I LET UP ON THE ACCELERATOR. I ATTEMPTED TO APPLY THE BRAKES. THE ENGINE ACCELERATION WAS SO POWERFUL, THE CAR DID NOT RESPOND WELL TO MY ATTEMPT TO BRAKE, SO I TOOK MY FOOT OFF THE BRAKE. THE SPEED ON THE DASHBOARD WAS 60 MPH AND ACCELERATING. I APPLIED THE BRAKES AGAIN WITH ALL THE STRENGTH I HAD AND WAS ABLE TO PULL THE CAR SAFELY OFF THE ROAD. THE ENGINE WAS RACING EVEN WHEN STOPPED. I MOVED THE SHIFT INTO PARK. EVEN IN PARK THE ENGINE WAS RACING. I TURNED THE ENGINE OFF. MY HUSBAND WAS FOLLOWING ME AND STOPPED. HE DROVE IT 1.5 MILES OUR OFFICE WITHOUT INCIDENT. I THEN CALLED THE RENO, NV LEXUS DEALERSHIP WHERE I PURCHASED THE CAR. THE HEAD OF THE SERVICE DEPARTMENT CALLED ME BACK AND SUGGESTED I HAVE THE CAR TOWED TO THE DEALERSHIP. I ASKED HIM IF HE WAS AWARE OF ANY OTHER RAPID ACCELERATION PROBLEMS WITH THESE VEHICLES AND HE SAID NO. HE SAID THE 4 YEAR WARRANTY WAS UP IN 706 AND I WOULD HAVE TO PAY FOR ANY REPAIRS. THAT AFTERNOON I HAD THE CAR TOWED TO THE RENO LEXUS DEALERSHIP ON THE EVENING OF 8/28/06. I SEARCHED THE INTERNET AND FOUND THAT THE NHTSA HAD INVESTIGATED 2002-2003 LEXUS ES 300 MODELS FOR FAULTY THROTTLES THAT MAY HAVE CAUSED RAPID ACCELERATION. SO FAR LEXUS HAS NOT ACKNOWLEDGED A PROBLEM. I SHARED WITH THE REP WHAT I HAD FOUND ON THE INTERNET RE: PROBLEMS WITH RAPID ACCELERATION AND THAT I WAS NOT PICKING THE CAR UP UNTIL LEXUS REPLACED THE THROTTLE. \*JB

\*\*\* PHONE LOG 08/30/2006 08:51:31 AM DPinion  
Caller states he has 07 ES 350. Cust sts that he had a scary experience today. Cust sts that he fls the accelerator stuck. He was in the veh w/ his wife & daughter. When he was on the freeway ramp, there was

C-658

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

a large semi-truck next to him. He accelerated to pass the truck, & tried to pull his foot off the accelerator, but it cont to go. Cust sts that he was traveling close to 80mph. Cust sts that the brakes were smoking.  
\*\*\* NOTES 08/30/2006 08:51:59 AM DPinion  
Cont. Cust sts that he was unable to completely stop the veh. The slowest he could get the veh was 10-15 mph. Cust sts that he pressed the start button to get the veh to turn off. The veh would not stop. Cust was forced to jam the veh into park to get it to stop. Cust sts that he finally heard a loud clicking noise that he assumed was the accelerator releasing. Cust was able to drive the veh to the airport to drop off his daughter.  
\*\*\* NOTES 08/30/2006 08:52:05 AM DPinion  
Cont. Cust sts that he contacted his selling dlr to tell them about his experience. Cust was near another Lexus dlr where he drove the veh. Cust sts that his selling dlr came & brought him a loaner veh & picked up his veh to take it to repair. Cust sts that his veh is currently at lexus of Akron/Canton where they are inspecting the veh.  
\*\*\* NOTES 08/30/2006 08:52:35 AM DPinion  
Cont. Cust sts that this is his 1st Lexus veh & he wanted to report this info to Lexus HQ. Cust sts that he is not sure if he will ever feel comfortable pushing the accelerator again. Cust sts that he would like a Lexus rep to contact him back so that he can further discuss this w/ them. Cust sts up until this point, he absolutely loved the veh.

documentation. Thanked cust for her time and patience. I will fu with cust as soon as I obtain pertinent info. Cust satisfied.

\*\*\* PHONE LOG 09/25/2006 08:26:16 AM KHirai Action Type: Outgoing call

Central Area Analyst Betsy Lesley stated FTS Rick is scheduled to inspect the veh on Thur 9/28/06.

\*\*\* PHONE LOG 09/26/2006 12:38:46 PM KHirai Action Type: Incoming call

Central Area Analyst Betsy Lesley stated the inspection isn't going to be taking place on Thur 9/28/06. Central Area Office will contact me when an update is avail.

\*\*\* PHONE LOG 10/03/2006 01:20:11 PM KHirai Action Type: Outgoing call

Central Area Analyst Betsy Lesley stated the FTS is still working on scheduling an inspection date. Customer's lawyer is now involved and the lawyer wants his inspector present.

\*\*\* NOTES 10/06/2006 11:02:25 AM KHirai

Central Area Analyst Betsy Lesley sent correspondence. FTS Rick is waiting to obtain confirmation from either the insurance company or the lawyer's inspector, regarding availability for an inspection. As previously stated, the customer's lawyer wants his inspector present when FTS Rick inspects the veh.

\*\*\* PHONE LOG 10/13/2006 09:54:20 AM KHirai Action Type: Incoming call

Clid 313-647-1569 and adv cust: I was fu to confirm if she still seeked a factory inspection. Cust stated: she would contact her adjuster to find out status and fu with me afterwards. Thanked cust and adv cust I would be waiting for her call.

\*\*\* PHONE LOG 10/13/2006 10:40:05 AM KHirai Action Type: Incoming call

Delay from USA Lexus transferred Heather (direct tel 248-799-9710), who works for customer's attorney Mr. Bob Tyler. Heather will fu with me early next week to provide an update since Mr. Tyler is not at the office today.

\*\*\* NOTES 10/18/2006 11:54:46 AM KHirai

Central Area Analyst Betsy Lesley left a voicemail stating FTS Rick is tentatively scheduled to inspect the veh tomorrow at 10 AM. However, FTS Rick rcvd a call from the insurance company regarding the appointment. Since the customer's lawyer has asked to have his inspector present, Central Area Office is inq if the inspector will be present. Central Area therefore is req asst in obtaining clarification.

\*\*\* PHONE LOG 10/18/2006 12:01:20 PM KHirai Action Type: Outgoing call

Clid 248-799-9710 (Mr. Bob Tyler, customer's attorney). Margaret stated Mr. Tyler and Heather were unavail. Margaret stated: she was aware of Mr. Tyler's request to have her inspector present. However, she was not aware the inspection was going to take place tomorrow. Margaret will make some calls to obtain clarification and then fu with me afterwards.

\*\*\* PHONE LOG 10/18/2006 12:03:33 PM KHirai Action Type: Outgoing call

Left a msg on Central Area Analyst Betsy Lesley's voicemail stating I am waiting for clarification from the customer's lawyer's office.

\*\*\* PHONE LOG 10/18/2006 12:18:20 PM KHirai Action Type: Incoming call

Central Area Analyst Betsy stated FTS Rick and the insurance company rep will be at dlr tomorrow at 10 AM. Central Area doesn't know when FTS Rick will be able to get to dlr after this month and Central Area would like to proceed with the inspection. Adv Betsy I will fu with her once I obtain a return call from cust/lawyer.

\*\*\* PHONE LOG 10/18/2006 12:28:28 PM KHirai Action Type: Incoming call

Margaret clid and stated Mr. Tyler is OK with having the insurance company's inspector present. Therefore, and cust are OK with veh being inspected tomorrow.

\*\*\* PHONE LOG 10/18/2006 12:30:01 PM KHirai Action Type: Outgoing call

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

Adv Central Area Analyst Betsy: Customer's lawyer is OK with having the insurance company's inspector present (instead of the lawyer's inspector). Therefore, cust and customer's lawyer are OK with veh being inspected tomorrow.

\*\*\* PHONE LOG 10/26/2006 11:37:55 AM KHirai Action Type: Incoming call

Central Area Analyst Betsy stated she hasn't obtained an update from FTS Rick. Betsy will fu with me when an update is avail.

\*\*\* PHONE LOG 10/30/2006 03:01:28 PM KHirai Action Type: Incoming call

Central Area Analyst Betsy stated she is currently waiting to obtain the report from FTS Rick.

\*\*\* PHONE LOG 11/02/2006 10:29:26 AM KHirai Action Type: Outgoing call

Left a msg on Central Area Analyst Betsy's voicemail req a return call to obtain an update.

\*\*\* PHONE LOG 11/03/2006 02:25:05 PM KHirai Action Type: Incoming call

Central Area Analyst Betsy stated she is still waiting to obtain the report from FTS Rick.

\*\*\* PHONE LOG 11/15/2006 10:57:39 AM KHirai Action Type: Outgoing call

Sent a correspondence to Central Area Analyst Betsy req an update.

\*\*\* PHONE LOG 11/15/2006 11:02:59 AM KHirai Action Type: Incoming call

Revd correspondence from Central Area Analyst Betsy. Based on the FCR, veh appears to be operating as designed.

\*\*\* PHONE LOG 11/15/2006 11:36:08 AM KHirai Action Type: Incoming call

Clid and adv cust I was fu to see if further asst was req from LCS. Cust asked what Lexus' findings were. Adv cust it appears the veh is operating as designed. Cust stated she would contact LCS in future if further asst is req from LCS. Case can be closed.

\*\*\* CASE CLOSE 11/15/2006 11:38:08 AM KHirai

Cust w/07 ES 350 seeked a FTS inspection. Addressed customer's concern w/Central Area Analyst Betsy. Adv cust: it appears that the veh is operating as designed. Cust stated she will fu with LCS in future if further asst is req from LCS. CASE CLOSED.

**Location of Incident:** BOURBONNAIS, IL

**NTHSA Summary:**

THIS IS NOT A COMPLAINT, BUT A FOLLOW UP TO COMPLAINTS REGARDING THE TOYOTA AUTOMOBILE THAT THEIR THROTTLE STICKS OPEN CAUSING UNWANTED ACCELERATION. MARCH 2006 I BOUGHT A NEW TOYOTA AVALON XLS FROM DAVID BRUCE, BOURBONNAIS, IL. ABOUT SIX MONTHS FOLLOWING THIS PURCHASE, I WAS PULLING AWAY FROM A RED LIGHT ACCELERATING RATHER QUICKLY. WHEN I LET UP ON THE ACCELERATOR, THE CAR CONTINUED TO ACCELERATE. WHILE APPLYING THE BRAKE WITH THE LEFT FOOT, I PUT MY RIGHT FOOT UNDER THE ACCELERATOR PETAL IN AN EFFORT TO RAISE IT. IT WAS NOT STUCK IN A DOWNWARD POSITION AND I WAS ABLE TO RAISE IT UP AND DOWN WITH MY FOOT WITH THE CAR STILL ACCELERATING. AT THIS POINT I STOMPED ON THE ACCELERATOR PETAL MANY HARD TIMES WITH MY RIGHT FOOT. FINALLY THE PROBLEM RESOLVED ITSELF AND THE ACCELERATION STOPPED. I TRIED TO DUPLICATE THIS PROBLEM MANY TIMES AFTERWARDS WITHOUT SUCCESS. I LOOKED AT THE ACCELERATOR PETAL, FLOOR MAT, AND THE AREA AROUND IT TO MAKE SURE THAT THERE WAS NOTHING THAT MIGHT HAVE CAUSED THIS PROBLEM. I TALKED TO DAVID BRUCE ABOUT IT AND FIGURED IT WAS A FREAK OCCURRENCE. OVER THE PAST TWO YEARS I NEVER THOUGHT ABOUT IT AGAIN UNTIL THE NEWS MEDIA AND TOYOTA BEGAN AN INVESTIGATION INTO THE PROBLEM. WHEN THIS PROBLEM OCCURRED, I DID NOT THINK OF USING THE START/OFF BUTTON TO SHUT OFF THE ENGINE, BUT AM AWARE OF IT NOW. THE REASON FOR THE LETTER IS THAT TOYOTA IS LOOKING AT THE DRIVER SIDE FLOOR MAT AS A POSSIBLE PROBLEM AND I FEEL THAT THIS IS NOT THE AREA WHERE THE PROBLEM IS OCCURRING. IN MY CASE I AM 95 PERCENT CERTAIN IT WAS NOT A FLOOR MAT THAT CAUSED THE ACCELERATION AS I WAS ABLE TO PUT MY FOOT UNDER THE ACCELERATOR PEDAL WITHOUT THE DECREASE ITS ACCELERATION. BUT, IN ALL FAIRNESS TO TOYOTA, THERE COULD HAVE BEEN AN UNKNOWN REASON WHY MY FLOOR MAT INTERACTED WITH THE ACCELERATOR PETAL THAT I DID NOT SEE. \*TR

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**  
THE 2006 TOYOTA TACOMA WITH AUTOMATIC TRANSMISSION CRUISE CONTROL IS VERY ERRATIC IN OPERATION, SOMETIMES SUDDENLY DOWNSHIFTING 2 GEARS AND ACCELERATING QUITE VIOLENTLY WHEN CLIMBING A GRADE. VERY STARTLING WHEN IT HAPPENS AND COULD REALLY BE DANGEROUS IF THE ROAD IS WET & SLICK WITH RAIN OR SNOW. I'VE OWNED PROBABLY 20 CARS AND TRUCKS IN MY 43 YEARS OF DRIVING AND HAVE NEVER EXPERIENCED ANYTHING LIKE IT. THIS IS A WELL DISCUSSED TOPIC ON FORUMS DEDICATED TO TOYOTA TACOMA PICKUP TRUCKS AND A LOT OF PEOPLE ARE HAVING THESE PROBLEMS. \*JB  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10312641  
**Date of Incident:** 20060903  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** CINCINNATI, OH  
**NHTSA Summary:**  
ON SUNDAY SEPTEMBER 3, 2006 I PULLED INTO A PARKING SPACE AT KROGER GROCERY STORE AFTER CHURCH TO SHOP ABOUT 10:30 OR 11:00 AM. AS I PULLED INTO THE SPACE TO PARK MY 2005 TOYOTA CAMRY, IT DID A SUDDEN ACCELERATION, JUMP THE CURB AND CRASHED INTO THE GROCERY STORE WALL. THE STORE WALL WAS NOT DAMAGED BUT MY CAMRY HAD ABOUT \$4000.00 WORTH DAMAGE. WHEN I TOLD TOYOTA WHAT HAD HAPPEN I WAS TOLD TO CONTACT TOYOTA REGIONAL OFFICE. I CONTACTED THEM AND THEY TOLD ME THAT SOMEONE WOULD BE OUT TO INVESTIGATE MY CLAIM. THEY KEPT MY VEHICLE FOR OVER THREE WEEKS, THEN THEY STARTED ON THE BODY REPAIR. TOYOTA CLAIMED THEY COULD NOT SUSTAINUATE MY CLAIM OF SUDDEN ACCELERATION, BUT I KNOW THEY REPAIRED MY VEHICLE INTERNALLY AS WELL AS THE BODY WORK BECAUSE WHEN I PICKED MY CAR UP FROM JOSEPH TOYOTA DEALERSHIP THE CAR ACCELERATION PEDAL FELT SO DIFFERENT. IT FELT REAL STIFF AND HARD TO MASH. THE BRAKES WERE CHECK AND FIXED. BECAUSE DURING THE SUDDEN ACCELERATION THEY FAIL TO STOP THE CAR. AS I PRESS THEM THE SEAT BELT CHOKED AN STRAP ME SO TIGHT THAT I HAD A LARGE WELT ACROSS MY CHEST. TOYOTA KNEW THEY HAD A PROBLEM WITH SUDDEN ACCELERATION AT LEAST SINCE I REPORTED IT IN 2006. THEY LIED AND MADE MY INSURANCE COMPANY PAY ALL OF THAT MONEY, I HAD TO STRUGGLE TO COME UP WITH ALL OF MY DEDUTIABLE, PAY FOR 4 WEEKS OF CAR RENTAL OF ABOUT \$45.00 A DAY WHILE TOYOTA REGIONAL OFFICE DRUG THEIR FEET ABOUT INVESTIGATING MY CAR. I WAS SCARE, SORE AND FRUSTRATED ABOUT HOW THIS WHOLE THING WAS HANDLE, BUT NOW I FEEL VINDICATED. HAD TOYOTA REGIONAL OFFICE TOLD THE TRUTH ABOUT THE PROBLEM WITH MY CAMRY AND DID THE RECALL IN 2006 WHEN I REPORTED THIS, THEY COULD HAVE SAVE A LOT INJURIES AND LIVES. I KNEW I COULDN'T GO UP AGAINST THIS BIG CORPORATION BY MY SELF AND I'M SORRY PEOPLE HAVE LOSS THEIR LIVES GO INJURED, BUT GLAD IT CAME OUT TO THE CONSUMERS. I FEEL TOYOTA ALSO CHANGED MY ACCELERATER PEDAL IN 2006. OR PUT THAT LITTLE STEEL CHIP IN BACK OF THE PEDAL. THE NEW 2010 FIX. MY CAR HAS LOSS VALUE.

VEHICLE TO CRASH INTO THE HIGHWAY GUARD RAIL AND GO INTO A ROLL OVER. AS A RESULT OF THE SUDDEN ACCELERATION AND ROLL OVER THE VEHICLE WAS DAMAGE BEYOND REPAIR AND I WAS INJURED WITH SERIOUS BACK, NECK AND PELVIC INJURIES. \*JB; CONSUMER REQUEST FOR INVESTIGATION ON THE 2007 ES350 SPEED CONTROL. \*TS THE CONSUMER STATED THE VEHICLE SUDDENLY ACCELERATED, AFTER ATTEMPTING TO APPLY THE BRAKES. THE UNWANTED ACCELERATION CAUSED THE VEHICLE TO CRASH INTO THE HIGHWAY GUARD RAIL AND CONSEQUENTLY THE VEHICLE ROLLED OVER. THE CONSUMER SUFFERED SERIOUS BACK, NECK AND PELVIC INJURIES. \*JB UPDATE (FEBRUARY 21, 2007): MS. HODGES SAID THAT SHE WAS TRAVELING ON I-75 FOR 15 MINUTES AND THE CRUISE CONTROL WAS NOT TURNED ON. SHE WAS MERGING ONTO ROUTE 59 AND APPLIED THE BRAKES. HOWEVER, THE VEHICLE NOT ONLY NOT SLOWED DOWN BUT ACTUALLY ACCELERATED TO WHAT SHE BELIEVE WAS 75-80 MPH. TO AVOID CRASHING THE VEHICLES AHEAD, SHE MOVED FROM THE RIGHT LANE TO THE LEFT LANE AND HIT THE GUARD RAIL. THE VEHICLE ROLLED OVER AND TOTALED. SHE WAS CTED BY THE POLICE BUT THE CITATION WAS LATER DISMISSED. TOYOTA SENT HER A LETTER SAYING THAT THEIR INVESTIGATION FOUND NOTHING WAS WRONG WITH THE VEHICLE. SEE ALSO 10174732 \*DSY.  
**Additional Summary:**  
Dear Sean:

I noticed all of the great info you've researched and collected regarding the Toyota unintended acceleration issue. We represented a woman (Diane Hodges) who had an unintended acceleration in her 2007 Lexus ES 350, back in Sept. 2006 and we recently settled with Toyota. She luckily survived without catastrophic injuries, but her story of her incident is pretty scary. She was accelerating at high speeds down a busy Detroit highway, dodging in and out of traffic, and decided she would intentionally crash her car in an attempt to stop it from accelerating before she killed someone else. Scott Yon of NHTSA did an investigation of her case and I'm attaching a copy of his investigative report, which you may already have.

I had called Mr. Yon to discuss his investigation and he told me another interesting problem: He says you can eventually bring the car to a stop, but consumers panic and don't know how to stop the car. The ignition is a push button versus a key. Because Toyota was concerned that consumers would inadvertently touch the button, they built in a different functionality, when the car in motion, you couldn't stop by touching it. You would have to touch and hold button in for 3 seconds consecutively. So, consumer in panic state, can't stop car, car accelerated, etc. I think this could be a huge warnings, instruction, and design issue and I haven't seen any further information on this issue.

At any rate, I just wanted to pass on the info and congratulate you on all of the research and investigation you're doing. We're seeing other cases come in as time goes on and I suspect we'll be seeing more, so let us know if you want us to pass on any information to you as we go along.

Thanks.

\*\*\* PHONE LOG 09/07/2006 03:07:34 PM EPartanen Action Type: Incoming call  
Cust transferred from OU/wah. Adv cust I am spec handling cust concerns. Asked cust to clarify the acctd situation w/veh. Cust sts he cldd the police & they did not respond to the scene of the acctd so there is no police report. Cust sts that when he was driving the veh he felt as though a computer took over his veh & "floored it". Cust sts he has never gone that fast before. Cust sts the veh went speeding thru the street & hit a center divider. Cust sts after he hit the center divider, it seemed to stop going on its own. Cust sts the veh was still skidding & came to a stop right at the back of a small pick up truck w/a metal bumper. Adv cust that if he would like an inspec performed on his veh, he needs to notify his ins co to leave the veh in the condition it is in order for Lexus to perform an investigation. Cust sts that he spoke w/dlr & dlr adv they would not be able to provide a loaner veh. Adv cust that dlr is correct & adv cust that loaner vehs are not avail for acctd situations & they are only avail for svw/warr situations w/dlr. Adv cust that Lexus can certainly look into reimb him for the cost of a rental veh once the inspec report is completed. Adv cust that the personnel that would perform the inspec are in Japan for training at this time & may not be able to accommodate an inspec until the end of the month. Cust sts that is completely unacceptable & wants to speak w/a Sup. Apol & adv cust that a Sup would not be able to provide any different info at this time. Adv cust I would be in contact w/him again once I have a date for the inspec. Adv cust in the mean time to pls contact his ins co & adv them a claim has been filed w/Lexus & the veh needs to remain at the location & should not be rprd. Cust thanked for info & sts will await c/b.

**Date of Incident:** 20060909  
**Vehicle:** 2001 TOYOTA PRIUS  
**Location of Incident:** HONEY BROOK, PA

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2001 TOYOTA PRIUS. WHILE DRIVING BETWEEN 65-70 MPH, THE VEHICLE DID NOT RESPOND WHEN THE ACCELERATOR PEDAL WAS DEPRESSED. ALL OF THE INSTRUMENT PANEL INDICATORS ILLUMINATED AND THE ENGINE SUDDENLY STALLED. THE VEHICLE COASTED TO THE SIDE OF THE ROAD AND THE ENGINE FAILED TO RESTART. WHILE THE GEAR SHIFTER WAS PLACED IN PARK, THE VEHICLE ACCELERATED UNEXPECTEDLY AND CRASHED INTO A GUARDRAIL. THE DRIVER SUSTAINED A WHIPLASH AND A POLICE REPORT WAS FILED. THE VEHICLE SUSTAINED SEVERE DAMAGE AND WAS TOWED TO AN AUTHORIZED DEALER. THE VEHICLE WAS REPAIRED FOR BODY STRUCTURE DAMAGES. THE TECHNICIAN PERFORMED DIAGNOSTIC TESTS, BUT WAS UNABLE TO DUPLICATE THE FAILURES. THE VEHICLE WAS TAKEN BACK TO THE AUTHORIZED DEALER ON FIVE SEPARATE OCCASIONS FOR IDENTICAL FAILURES, BUT THERE WERE NO RESOLUTIONS. THE FAILURE MILEAGE WAS 42,000 AND CURRENT MILEAGE WAS 68,000.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10177831  
**Date of Incident:** 20060911  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** HUNTSVILLE, AL

**NHTSA Summary:**  
I WAS DRIVING SLOWLY THROUGH A PARKING LOT TO LOCATE A PARKING SPACE. AS I APPROACHED A SPACE, I HAD MY FOOT ON THE BRAKE. I EASED OFF OF THE BRAKE TO COAST INTO THE PARKING SPACE AND WAS MAKING A RIGHT TURN INTO THE SPACE. SUDDENLY THE VEHICLE SURGED FORWARD WITHOUT MY FOOT BEING ON THE ACCELERATOR. I APPLIED THE BRAKE, BUT THE VEHICLE CONTINUED TO MOVE FORWARD. MY CAR WENT OVER A CONCRETE MEDIAN, AND INTO A LANE OF TRAFFIC. MY CAR STRUCK TWO CARS. IT HIT ONE OF THE VEHICLES, AN SUV, WITH SUCH FORCE THAT IT KNOCKED THE SUV UP OVER A CURB INTO A GRASSY AREA. THOUGH I HAD BOTH FEET APPLYING THE BRAKES AS HARD AS I COULD, THE VEHICLE WOULD NOT STOP. AND THERE WAS NOT TIME FOR ME TO THINK TO TURN OFF THE IGNITION. MY CAR SUSTAINED SEVERE DAMAGE TO THE RIGHT AND LEFT SIDES AND TO THE FRONT. IT DAMAGED THE FRONT OF THE SUV AND THE REAR OF THE OTHER CAR. THERE WAS A PASSENGER IN EACH OF THE VEHICLE, AND I WAS THE ONLY OCCUPANT OF MY VEHICLE. FORTUNATELY, THERE WERE NO SERIOUS INJURIES. I HAD MY CAR TOWED TO THE TOYOTA DEALERSHIP. I REQUESTED A FACTORY REPRESENTATIVE INSPECT THE CAR. THEY COULD NOT DETERMINE A CAUSE FOR THE SUDDEN ACCELERATION. THE REPRESENTATIVES WERE QUITE HELPFUL UNTIL THE INSPECTION WAS COMPLETE. I REQUESTED A COPY OF THE REPORT OF THEIR FINDINGS; HOWEVER, TOYOTA CORPORATION WILL NOT ALLOW ME TO SEE A COPY OF THE REPORT. THEY SAID I COULD CONTACT THEIR LEGAL DEPARTMENT OR GET A SUBPOENA. THE CUSTOMER RELATIONS REPRESENTATIVE AT THE DEALERSHIP SUGGESTED I FILE A CLAIM FOR ARBITRATION, BUT THE NATIONAL CENTER FOR DISPUTE SETTLEMENT STATES THAT BECAUSE THE CAR WAS WRECKED, I DO NOT QUALIFY FOR ARBITRATION. MEANWHILE, I AM LEFT WITH A VEHICLE THAT I AM AFRAID TO DRIVE. \*NM

Hi Bill,  
Would you mind reviewing the customer's concern & responding within 2 business days? Your response is greatly appreciated! My direct line is . Thank you & have a great day!!!

\*\*\* PHONE LOG 10/23/2006 10:15:02 AM RDong Action Type: Incoming call  
Cust was transferred to me. He adv he got the veh towed to Monterey Peninsula. They were able to get on the road early Saturday morning. The dlr adv that the clips were not attached properly & the carpet slid up & caused the accelerator to stick. He was very concerned that the veh did not stop. Once the cust got the veh into park, she could not start the veh again. He is concerned still. They are afraid to drive the veh. He adv that they drove the veh back b/c they wanted to have the veh inspected @ the dlr. He adv he will bring the veh in to Fremont Lexus b/c he is still unsure why this occurred. I adv that would be a good idea, to have the dlr fully inspect the veh. I also recommended that he communicate to the dlr the exact conditions

C-673

**NHTSA Summary:**  
DT\*: THE CONTACT STATED WHILE DRIVING 10 MPH IN A PARKING LOT AND ATTEMPTING TO MANEUVER INTO A PARKING SPACE THE VEHICLE ACCELERATED TO 30 MPH WITHOUT WARNING CRASHING INTO A POLE AND CAUSING DAMAGE TO A FENCE. THE AIR BAGS DID NOT DEPLOY. A POLICE REPORT WAS TAKEN AND THE DEALER WAS NOTIFIED. THE VEHICLE WAS TOTALED BY THE INSURANCE COMPANY. UPDATED 10/13/06. \*JB

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10307164  
**Date of Incident:** 20060919  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** GARRETT PARK, MD

**NHTSA Summary:**  
BECAUSE THE BRAKE PEDAL AND THE ACCELERATOR PEDAL ON MY 2005 CAMRY LE ARE CLOSE TO EACH OTHER AND ENGAGE AT THE SAME LEVEL, IT IS ALL TOO EASY FOR A FOOT TO OVERLAP THE BRAKE PEDAL AND DEPRESS THE ACCELERATOR AND BRAKE AT THE SAME TIME. UNLESS I AM UNUSUALLY VIGILANT ABOUT MY FOOT POSITION, THIS CAN HAPPEN, AND THE CAR ACCELERATES INSTEAD OF BRAKING. THIS HAS HAPPENED OFTEN, BOTH IN CITY AND HIGHWAY DRIVING. MY MECHANIC HAS TRIED HIS BEST TO RAISE THE LEVEL OF THE BRAKE PEDAL ENGAGEMENT, BUT WITHOUT SUCCESS. THERE IS NO BRAKE ADJUSTMENT ON THIS MODEL. MY TOYOTA DEALER SAYS, TOO, THAT THERE IS NO ADJUSTMENT POSSIBLE AND REFUSES TO MODIFY THE BRAKE PEDAL TO RAISE IT ABOVE THE ACCELERATOR LEVEL. THIS IS A DESIGN PROBLEM, BUT IT OCCURS TO ME THAT AT LEAST SOME OF THE INCIDENTS OF INADVERTENT ACCELERATION MAY BE DUE TO THIS FAULT. IF THE CAR ACCELETATES WHILE YOU ARE BRAKING, ONE INSTINCTIVELY PRESSES HARDER ON THE BRAKE PEDAL, WHICH ALSO FURTHER DEPRESSES THE ACCELERATOR PEADL. THIS HAS NOT RESULTED IN AN ACCIDENT IN MY CASE. IT SEEMS LIKE THE SIMPLE ALDLDITION OF A THICKER PAD ON THE BRAKE PEDAL MIGHT CORRECT THE DEFECT.

DRIVER CONCLUDED BUSINESS AT A DRIVE THROUGH ATM AT A LOCAL SHOPPING MALL. VEHICLE WAS SHIFED INTO 'DRIVE' AND AT THAT INSTANT THE ENGINE STARTED RACING AT HIGH SPEED AND THE VEHICLE ACCELERATED RAPIDLY. THE DRIVER DEPRESSED THE BRAKE PEDAL, BUT THE VEHICLE WOULD NOT STOP. THE ENGINE WAS STILL RACING AT TOP SPEED AND THE VEHICLE WAS PICKING UP MOMENTUM. THE DRIVER PUMPED THE BRAKES SEVERAL TIMES, BUT NO FEEDBACK RESPONSE COULD BE FELT. THE RAPID, UNINTENDED ACCELERATION CAUSED THE VEHICLE TO TRAVEL ACROSS THE CENTERLINE AND INTO THE OPPOSITE DIRECTION OF TRAFFIC. WITH OPPOSING TRAFFIC APPROACHING THE DRIVER TURNED THE VEHICLE SHARPLY TO THE RIGHT IN AN EFFORT TO AVOID A COLLISION. SEEING A NUMBER OF CARS STOPPED AT THE APPROACHING INTERSECTION TO THE MAIN ROAD, THE DRIVER CONTINUED TO STEER THE CAR HARD TO THE RIGHT. THE VEHICLE THEN WENT OVER AN EMBANKMENT AND STRUCK A STEEL LIGHT POLE RESULTING IN TOTAL LOSS OF THE VEHICLE AND SIGNIFICANT INJURIES TO THE DRIVER. TOTAL TRAVEL DISTANCE OF THE VEHICLE FROM ACCELERATION TO IMPACT WAS APPROXIMATELY 300 FEET. TOTAL INCIDENT TIME AND FINAL SPEED ARE UNCERTAIN. \*NM

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10190167  
**Date of Incident:** 20060921  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** MAHWAH, NJ

**NHTSA Summary:**

CAR GAINED SPEED, COULD NOT BRAKE THE CAR, WITH FOOT ON BRAKE PEDAL IT WENT EVEN FASTER, HIT OTHER VEHICLES AND SMASHED THROUGH A GARAGE DOOR, STOPPING ONLY WHEN IT RAN INTO A TREE. CAR WAS REPAIRED AT A COST OF OVER \$33,000. THE VEHICLE HAD 400 MILES ON THE ODOMETER. \*AK

**NHTSA ODI Number:** 10203116  
**Date of Incident:** 20060921  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** EASLEY, SC

**NHTSA Summary:**

I PURCHASED A 2007 CAMRY LE 4 CYLINDER AUTOMATIC TRANSMISSION IN 9/06. THE PERFORMANCE OF THIS CAR HAS BEEN DISAPPOINTING. ON THE 1ST ROAD TRIP, I NOTICED PROBLEMS WITH THE CRUISE. THE CAR DOWNSHIFTED 2 GEARS ON INCLINES AND THE ENGINE WOULD REV AT APP. 5000 RPMs. AT THE TOP OF THE INCLINE, THE CAR'S SPEED WOULD INCREASE 5-10 MILES PER HOUR CAUSING ME TO HAVE TO APPLY THE BRAKES TO DISCONNECT THE CRUISE. MY HUSBAND TOOK THE CAR TO THE TOYOTA DEALERSHIP WHERE WE PURCHASED THIS CAR AND HE WAS TOLD THIS WAS EXPECTED AND WAS DESIGNED TO DO THIS. TO CORRECT, THE PROBLEM WE COULD NOT USE THE CRUISE WHEN DRIVING UP INCLINES. THE PROBLEM WAS NOT CORRECTED. AFTER SEVERAL ROAD TRIPS AND NOTICING THE GAS MILEAGE WAS THE SAME ON THE HIGHWAY AS IN THE CITY, WE TOOK THE CAR BACK TO THE DEALER. THIS TIME, WE WERE TOLD THAT THE "COMPUTER COULD NOT SEE HILLS COMING AND TO COMPENSATE THIS PROBLEM, WE WOULD NEED TO OVERRIDE THE CRUISE ON HILLS BY USING THE ACCELERATOR AND INCREASING OUR SPEED JUST SLIGHTLY." AT THIS VISIT WE ALSO DISCUSSED A PROBLEM WITH HESITATION UPON ACCELERATING FROM A STOP. WE WERE TOLD THAT A NEW COMPUTER CHIP MAY FIX THAT PROBLEM AND THE CHIP WAS REPLACED. NOW THE PROBLEM IS INTERMITTENT--THE CAR WILL HESITATED INTERMITTENTLY WHEN ATTEMPTING TO PASS A VEHICLE OR ACCELERATING FROM A STOP-- THE PROBLEM WENT FROM ONLY SLUGGISH ACCELERATION FROM A STOP TO BEING INTERMITTENT AT ANY TIME. MY HUSBAND THEN ASKED THE TOYOTA DEALERSHIP FOR THE SOUTHEASTERN REGIONAL OFFICE FOR TOYOTA TO ADDRESS THE PROBLEM WITH THEM, HE WAS TOLD THE NUMBER COULD NOT BE GIVEN OUT TO CONSUMERS. HE THEN ASKED IF THE OFFICE COULD BE CONTACTED BY THE DEALER REQUESTING THE OFFICE TO CONTACT MY HUSBAND. HE WAS TOLD THAT COULD NOT HAPPEN EITHER. TOYOTA HAS BEEN TOTALLY UNCOOPERATIVE. IN ONE HOUR'S TIME, DECELERATED AND ACCELERATED WITH THE CRUISE 50 TIMES. THE DEALERSHIP KNEW THIS WAS A PROBLEM WITH 4 CYLINDER AND IT WAS NEVER MENTIONED TO US WHEN LOOKING AT THE VEHICLE. \*JB

**Toyota ID Number:**  
**NHTSA ODI Number:** 10315547  
**Date of Incident:** 20060922  
**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** QUINSEY, MA

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2004 TOYOTA SIENNA CE. THE CONTACT WAS DRIVING APPROXIMATELY 40 MPH. WHEN RELEASING THE FOOT FROM THE ACCELERATOR PEDAL, THE VEHICLE MOMENTARILY CONTINUED TO ACCELERATE. THE DEALER AND MANUFACTURER WERE NOT NOTIFIED OF THE FAILURE. THE CONTACT WAS UNDER THE IMPRESSION THE FAILURE WAS DUE TO DRIVER ERROR. THE FAILURE AND CURRENT MILEAGES WERE APPROXIMATELY 30,000.

**Vehicle:** 2005 TOYOTA AVALON  
**Location of Incident:** FREDERICKSBURG, VA

**NHTSA Summary:**

TL\* - ON 9/24/06 WHILE THE CONTACT WAS DRIVING VEHICLE AT 60 MPH AND IT UNEXPECTEDLY ACCELERATED TO 75 MPH. THE CONTACT HAD TO APPLY THE BRAKE WITH BOTH FEET TO DISENGAGE THE ACCELERATION ON THE VEHICLE. ON 10/09/06, WHILE DRIVING ON THE HIGHWAY AT 40 MPH THE VEHICLE ACCELERATED TO 75 MPH, HAD TO HOLD BOTH FEET ON THE BRAKE AND PULL THE VEHICLE OFF TO SIDE OF THE ROAD. AT THAT POINT THE CONTACT TOOK THE VEHICLE TO THE DEALERSHIP, AND THE DEALER STATED THAT THE GAS PEDAL WAS MOST LIKELY GETTING CAUGHT UNDER THE CARPET. THE DEALER COULDN'T FIND ANYTHING WRONG WITH THE VEHICLE. WHILE DRIVING ON 12/23/06 AT 35 MPH THE VEHICLE ACCELERATED TO 75 MPH, AFTER A QUARTER OF A MILE CONTACT WAS ABLE TO STOP THE VEHICLE BY OUTING BOTH FEET ON BRAKE. ALL THE BRAKES WERE SMOKING AND THERE WAS TRANSMISSION FLUID LEAKING. AT THAT POINT, CONTACT HAD THE VEHICLE TOWED TO ROSENER TOYOTA. \*AK UPDATED 01/29/07. \*JB
