**NHTSA ODI Number:** 10303030  
**Date of Incident:** 20090601  
**Vehicle:** 2009 TOYOTA HIGHLANDER  
**Location of Incident:** EDWARDSBURG, MI

**NHTSA Summary:**  
I PURCHASED A 2009 TOYOTA HIGHLANDER, IN FEBRUARY 2009. ON JUNE 1, 2009, I WAS NORTHEAST OF ROCKVILLE, INDIANA ON HIGHWAY 47 IN THIS TOYOTA HIGHLANDER. I APPROACHED A SLOW MOVING VEHICLE ON A STRAIGHT SECTION OF ROADWAY AND PASSED THE VEHICLE. AS I WAS PASSING I FELT LIKE THE CAR WAS GOING FASTER THAN I WAS ACCELERATING. WHEN I PULLED BACK INTO THE RIGHT LANE THE CAR WAS GOING EVEN FASTER AND I REALIZED THAT THE CAR WAS ACCELERATING ON ITS OWN. LUCKILY, I WAS STILL ON A LONG STRAIGHT SECTION OF THE ROAD AND HAD SOME TIME. I FIRST TRIED TO BRAKE BUT THE CAR KEPT GOING EVEN FASTER. I PUT THE CAR IN NEUTRAL AND STARTED BRAKING AND LUCKILY FOUND A PLACE TO PULL OFF THE ROAD. I WAS COMPLETELY SHOCKED THAT THE ENGINE WAS RACING UNCONTROLLABLY. I LOOKED DOWN AT THE ACCELERATOR AND NOTHING WAS PUSHING OR TOUCHING IT. I THEN TURNED OFF THE CAR, PUT THE CAR IN PARK, GOT OUT OF THE CAR AND LOOKED AROUND THE ACCELERATOR AGAIN TO MAKE SURE THAT NOTHING WAS PUSHING ON IT, THEN WAITED FOR ABOUT A MINUTE AND RESTARTED THE CAR. THE CAR STARTED WITH THE ENGINE RACING. I TURNED OFF THE CAR AND RESTARTED THE CAR TWO MORE TIMES AND EACH TIME THE ENGINE RACED UNCONTROLLABLY. I TURNED OFF THE CAR, LEFT A MESSAGE FOR MY HUSBAND ON HIS PHONE AND WAITED FOR FIVE MINUTES HOPING MY HUSBAND WOULD CALL BACK. HE DID NOT CALL SO I DECIDED TO START THE CAR ONE MORE TIME. WHEN I DID, THE CAR STARTED NORMALLY AND THE ENGINE DID NOT RACE. I TRIED TO CALM DOWN EMOTIONALLY AND DROVE HOME NOT KNOWING WHEN OR IF THE ACCELERATOR WOULD BE A PROBLEM. I TOOK THE HIGHLANDER IN FOR SERVICE TO JORDAN AUTOMOTIVE GROUP, MISHAWAKA, INDIANA ON 6/3/2009 AND THEY INSISTED THAT THE FLOOR MATS WERE THE PROBLEM. I DO NOT BELIEVE THIS BECAUSE I HAD CHECKED EVERYTHING AROUND THE ACCELERATOR WHEN THE ENGINE WAS RACING AND THERE WAS ABSOLUTELY NOTHING TOUCHING THE ACCELERATOR. THE PROBLEM IS ELECTRONIC. I DO NOT FEEL SAFE IN THIS VEHICLE \*CW

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**

WE OWN A 2007 TOYOTA CAMRY HYBRID WITH A "SLOW TO RETURN" GAS PEDAL. WE REPORTED THIS PROBLEM TO YUBA CITY TOYOTA (CALIFORNIA) IN EARLY TO MID 2009 (PRIOR TO THE TOYOTA RECALL). THE TECHNICIAN AT THAT TIME VERIFIED AND CONFIRMED THE "SLOW TO RETURN" GAS PEDAL AND SAID IT MUST BE COMMON WITH THE CAMRY HYBRID. WHEN THE CURRENT GAS PEDAL RECALL WAS ANNOUNCED WE CONTACTED YUBA CITY TOYOTA AND WAS TOLD THE CAMRY HYBRID WAS NOT INCLUDED IN THE RECALL EVEN THOUGH WE COMPLAINED ABOUT THE PROBLEM ON PRIOR OCCASIONS PRIOR TO THE RECALL. ON JANUARY 29, 2010 I CONTACTED TOYOTA BY USING THEIR "CUSTOMER EXPERIENCE" TELEPHONE NUMBER (1-800-331-4331) AND WAS TOLD BY "LUIS" IN CUSTOMER SERVICE THAT A "REPRESENTATIVE" WOULD CALL US WITHIN TWO DAYS. AS OF TODAY, WE HAVE NOT RECEIVED A TELEPHONE CALL BACK FROM TOYOTA AND YUBA CITY TOYOTA WILL NOT ASSIST IN ANY REPAIRS WITHOUT AUTHORIZATION FROM TOYOTA. THE TOYOTA REFERENCE # 1001148767 WAS PROVIDED TO ME BY TOYOTA ON JANUARY 29, 2010. I HAVE ATTEMPTED NUMEROUS TIMES TO CONTACT TOYOTA CUSTOMER SERVICE WITH NEGATIVE RESULTS DUE TO THE HIGH NUMBER OF CALLS TO TOYOTA. THE TOYOTA CAMRY HYBRID HAS A PROBLEM WITH THE GAS PEDAL AND SOMEONE NEEDS TO ASSIST TOYOTA CAMRY HYBRID CUSTOMERS WITH GETTING THIS ISSUE RESOLVED.

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** LEVITTOWN, NY

**NHTSA Summary:**

I OWN A 2007 TOYOTA CAMRY WHICH I BELIEVE IS ONE OF THE VEHICLES THAT IS BEING RECALLED BECAUSE A FAULTY ACCELERATOR PEDAL. BECAUSE OF THIS RECALL, I WAS WONDERING IF AN ACCIDENT THAT MY WIFE HAD LAST YEAR WAS CAUSED BY THE PROBLEM ASSOCIATED WITH THE RECALL? MY WIFE WAS DRIVING ON A LOCAL PARKWAY IN STOP AND GO TRAFFIC. THE WEATHER WAS CLEAR AND DRY. MY WIFE WAS UNABLE TO STOP THE VEHICLE (TRAVELING AT A SPEED UNDER 25 MPH) AND HIT THE VEHICLE DIRECTLY IN FRONT OF HER. MY CAR SUSTAINED DAMAGE TOTALING \$6,575.79. I WONDER IF A FAULTY ACCELERATOR WAS THE CAUSE OF MY WIFE'S ACCIDENT? \*CN

**Toyota ID Number:**  
**NHTSA ODI Number:** 10312337  
**Date of Incident:** 20090601  
**Vehicle:** 2002 TOYOTA CELICA  
**Location of Incident:** COLORADO SPRINGS, CO

**NHTSA Summary:**

TWICE WHEN COMING TO A STOP AT A STOP LIGHT, MY TOYOTA CELICA CONTINUED TO IDLE AT ABOUT 4000 RPM. I TRIED PULLING THE CAR MAT TOWARD THE SEAT TO BE SURE IT WASN'T INTERFERING WITH THE ACCELERATOR PEDAL. I ALSO TRIED GIGGLING THE ACCELERATOR PEDAL TO BE SURE NOTHING WAS STUCK. NEITHER OF THESE STOPPED THE HIGH RPM IDLE. EACH TIME THE ONLY THING THAT WOULD REDUCE THE RPM WAS TO TURN OFF THE ENGINE AND RESTART IT. THE TOYOTA HAS A MANUAL TRANSMISSION AND THE CLUTCH WAS DEPRESSED EACH TIME DURING THE HIGH RPM IDLE.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10313412  
**Date of Incident:** 20090601  
**Vehicle:** 2004 LEXUS RX330  
**Location of Incident:** SAN FRANCISCO, CA

**NHTSA Summary:**

I WAS TURNING INTO A PARKING SPACE AT WORK AND MY 2004 LEXUS RX330 SUDDENLY MADE A REVVING NOISE AND ACCELERATED INTO A TREE IN THE MEDIAN AND THEN SMASHED HEAD ON INTO THE CAR IN THE OPPOSITE SPACE. THE BMW THAT MY CAR HIT WAS COMPLETELY TOTALLED. MY FORWARD MOMENTUM WAS STOPPED BY THE BMW BECAUSE MY CAR CLIMBED ON THE TREE AND ENDED UP ON TOP OF THE BMW. I WAS NOT ON THE PHONE AND HAD NO ALCOHOL OR DRUGS IN MY SYSTEM AND THERE WAS NO PASSENGER IN THE CAR TO DISTRACT ME. I AM A 58 YEAR OLD HEALTHY WOMAN WHO HAS BEEN DRIVING FOR 42 YEARS. I TOOK THE CAR INTO MY LEXUS DEALER AND THEY CHECKED THE COMPUTER AND CLAIMED THERE WERE NO DEFECTS. THEY TOLD ME I HAD PROBABLY STEPPED ON THE GAS INSTEAD OF THE BRAKE OR THE FLOOR MAT HAD GOTTEN STUCK ON TOP OF THE ACCELERATOR PEDAL. I CHECKED THE PEDAL (AS DID A CO-WORKER) RIGHT AFTER THE ACCIDENT AND THE MAT WAS NOT ON OR NEAR THE PEDAL. IN ADDITION, I DO NOT BELIEVE I HIT THE GAS INSTEAD OF THE BRAKE AS THE PARKING SPOT HAD AN UPHILL GRADE AND I MOST LIKELY WAS NOT YET READY TO BRAKE WHEN THE ACCELERATION OCCURRED. THE WEATHER WAS CLEAR AND SUNNY. MY BROTHER, WHO IS AN AIRLINE PILOT, SUGGESTED THAT IT COULD HAVE BEEN THE DRIVE-BY-WIRE ELECTRONICS MALFUNCTIONING BUT THE LEXUS DEALER ASSURED ME THAT COULD NOT POSSIBLY HAVE BEEN THE CASE. NOW, HEARING ABOUT ALL OF THE OTHER ACCELERATION PROBLEMS I BELIEVE MY COMPLAINT SHOULD BE ADDED TO THE LIST OF LEXUS/TOYOTA UNEXPLAINED UNINTENDED ACCELERATION PROBLEMS. IF SOMEONE HAD BEEN IN FRONT OF ME OR IN THE CAR I HIT THEY WOULD HAVE BEEN BADLY INJURED OR KILLED. I HAVE PICTURES OF THE DAMAGE IF YOU WOULD LIKE TO SEE THEM.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316232  
**Date of Incident:** 20090601  
**Vehicle:** 2008 TOYOTA CAMRY  
**Location of Incident:** LOS A, CA

**NHTSA Summary:**

I PURCHASED MY CAMRY IN 2007 FROM CARSON TOYOTA IN LOS ANGELES. ON THE SECOND DAY AFTER PURCHASED MY VEHICLE I ALREADY STARTED EXPERIENCING ELECTRICAL PROBLEMS WITH MY MOON ROOF. ON SOME OCCASIONS IT WOULD NOT CLOSE PROPERLY. INSTEAD OF PUSHING THE CLOSE BUTTON, I HAD TO TAP IT TILL IT CLOSES COMPLETELY AND CAREFUL NOT TO OVER TAP OR IT WOULD OPEN ON ITS OWN AGAIN. THIS PROBLEM COMES AND GOES AND I'VE HAD THE DEALER CHECKED MY CAR BACK THEN. OVERALL, THEY GAVE ME A HARD TIME, FIRST RESPONSE I RECEIVED FROM THEIR MECHANIC WAS "THAT'S HOW IT IS" SO I ARGUED WITH HIM THAT YOU DON'T TAP A MOON ROOF BUTTON HOPING IT WOULD CLOSE PROPERLY. I ALSO SPOKE TO THE SALES AGENT WHO SOLD IT TO US AND JUST GAVE THE ANSWER "ITS A MACHINE, SOMETIMES IT BREAKS DOWN" WHICH MADE ME UPSET AS I JUST BOUGHT THE CAR A WEEK BEFORE AND IF HE TOLD ME THAT THEN, I WOULD NOT HAVE SUNK \$20,000 INTO IT IF IT WOULD START ACTING UP ON THE SECOND DAY! ANYWAY, THEY CHECKED MY MOONROOF AND COULD NOT FIND ANYTHING WRONG AND TOLD ME TO COME BACK NEXT WEEK IF IT STILL DIDN'T WORK. UNFORTUNATELY IT STOPPED AND IN THE PAST 2.8

C-1374

**Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

YEARS THIS PROBLEM KEEPS SURFACING AND DISSAPPEARING UP TO NOW. THEN AFTER LIVING WITH THIS DEFECT, I HAD THE UNFORTUNATE EXPERIENCE OF SUDDEN ACCELERATION WHEN MY GAS PEDAL GOT STUCK. I HAVE BAD BACK PROBLEMS BUT WITH SUDDEN PANIC WAS ABLE TO REACH DOWN AND GRAB THE CARPET TO LOOSEN THE PEDAL. SINCE THEN I HAVE NOT FELT SAFE IN MY CAR AND I'M AFRAID TO PRESS ON THE GAS PEDAL TO HARD. I'M CONCERNED ABOUT THE RECALL AS IT DOES NOT PREVENT THE ACCERATIONS FROM HAPPENING AND IF I HIT MY BREAKS ON A BUSY STREET AND THE CAR DIES, I'M AFRAID OF GETTING HIT FROM BEHIND OR ON THE SIDE ESPECIALLY WITH MY SON IN THE CAR. TO SUMMARIZE: I'VE HAD AN ACCELERATION AND ELECTRICAL PROBLEMS WITH THIS TOYOTA. IF I MAY PUT IN A REQUEST, TOYOTA NEEDS TO TAKE BACK THIS CAR AND REFUND IT'S CURRENT WORTH AT THE TIME TO THE RECALL, SO THAT WE CAN PURCHASE A SAFER FAMILY CAR.

**NHTSA Summary:**

WHILE MERGING ONTO I-5 I PUSHED THE RESUME SPEED SELECTION ON SPEED CONTROL. THE CAR SPED UP AND EXCEEDED THE PRESET SPEED OF 59 MPH AND REACHED 80 MPH. NEITHER APPLYING THE BRAKES OR PUSHING THE SPEED CONTROLS ON/OFF SWITCH TURNED THE SPEED CONTROL OFF. I TURNED THE KEY OFF AND ON TO CONTROL THE STEERING AND USED THE PARKING BRAKE TO GET THE CAR TO THE SHOULDER. THIS WAS A VERY FRIGHTING EXPERIENCE SO I JUST SAT THERE FOR A WHILE. I STARTED THE CAR AND THE ENGINE A COUPLE TIMES AND RPM'S WENT TO THE RED LINE. THE FLOOR MAT WAS LAYING FLAT AND HOOKED. I LOOKED UNDER HOOD AND NOTHING LOOKED UNUSUAL. I STARTED THE ENGINE AGAIN AND IT RAN NORMALLY. I PHONED THE DEALER'S SERVICE DEPT, AND THEY SAID IT WAS PROBABLY THE FLOOR MATS AND A RECALL NOTICE WAS IN THE WORKS. WE HAVE DRIVEN THE CAR ABOUT 5000 MILES SINCE INCIDENT, BUT WE DONT USE THE SPEED CONTROL. I AM SCHEDULED TO HAVE THE ACCELERATOR PEDAL REPLACED THIS WEEK.

**Location of Incident:** IRVINE, CA

C-1375

**Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C***NHTSA Summary:**

LEXUS STUCK PEDAL--I DRIVE A 1998 LEXUS GS400 WHICH I BOUGHT NEW. WHEN I FIRST BOUGHT IT, I'D PRESSED THE PEDAL ALL THE WAY DOWN("FLOORED IT") MANY TIMES AND EVERYTHING WAS FINE. HOWEVER IN MORE RECENT YEARS, I RARELY "FLOORED IT". ONE TIME LAST SUMMER, I PUSHED THE PEDAL ALL THE WAY DOWN TO PASS A CAR AND THE PEDAL STUCK. MY CAR ACCELERATED FROM 35MPH TO 70MPH IN A MATTER OF SECONDS ON A LOCAL ROAD. I HIT THE BRAKES SEVERAL TIMES BUT IT KEPT SPEEDING UP. I WAS ABLE TO PRY UP THE PEDAL UP WITH MY TOE AVERTING A NEAR-ACCIDENT. THIS WAS BEFORE ALL OF THE NEWS WITH TOYOTA'S SUDDEN ACCELERATION CAME TO LIGHT. I DIDN'T TAKE THE CAR INTO THE LOCAL LEXUS SHOP BECAUSE, THEY CHARGE AT LEAST \$2000 EVERYTIME I TAKE IT IN. I DROVE THE CAR FOR ANOTHER YEAR BUT MADE SURE NOT TO PRESS THE PEDAL ALL THE WAY DOWN. HOWEVER, I AM INTENDING ON TRADING IN THE CAR NOW AND I WANT TO MAKE SURE THE DEFECT IS FIXED BECAUSE ANY FUTURE OWNERS OF THIS CAR WILL NOT BE AWARE OF THIS PROBLEM AND IT IS A POTENTIAL HAZARD WAITING TO HAPPEN. I WANTED TO FILE A COMPLAINT WITH THE GOVERNMENT BEFORE TAKING IT IN BECAUSE (A) I WANT THE GOVERNMENT TO BE AWARE THAT LEXUS(NOT JUST TOYOTA) HAS THIS PROBLEM OF STUCK PEDAL/ACCELERATION (B) IN CASE THE GOV WANTED TO CONDUCT ANY INVESTIGATION WITH MY VEHICLE REGARDING THE STUCK PEDAL FOR EVIDENCE OR RESEARCH BEFORE LEXUS DOES ANYTHING WITH IT(IT DID NOT INVOLVE A FLOORMAT--THE PEDAL JUST STUCK AND DIDN'T COME BACK UP AFTER I RELEASED MY FOOT) (C) COMPEL LEXUS TO FIX THE PROBLEM FOR FREE BECAUSE IT IS A SAFETY DEFECT BEFORE SELLING IT TO A FUTURE OWNER. I FEEL THIS IS IMPORTANT FOR THE GOVERNMENT TO DO EXTENSIVE RESEARCH REGARDING THIS MATTER. LEXUS HAS MANAGED TO STAY OUT OF TOYOTA'S RECENT CULPABILITY ISSUES, BUT CERTAINLY MY LEXUS HAD THE SAME EXACT PROBLEM. YOU MAY ALSO WANT ENGINEERS TO EXAMINE MY PEDAL FOR MORE RESEARCH OR EVEN EVIDENCE AS TO WHY THIS OCCURS IN LEXUS/ TOYOTA VEHICLES.

**Date of Incident:** 20090604  
**Vehicle:** 2009 TOYOTA PRIUS  
**Location of Incident:** ARROWSIC, ME  
**NHTSA Summary:**

I AM WRITING TO LET YOU KNOW OF A PROBLEM I AM EXPERIENCING WITH A 2009 TOYOTA PRIUS THAT I PURCHASED NEW JUST ONE WEEK AGO AND WHICH STILL HAS LESS THAN 500 MILES ON IT. A COUPLE OF DAYS AGO I WAS APPROACHING A STOP AT AN INTERSECTION, IN TOWN WHERE MY SPEED HAD BEEN ONLY ABOUT 15 MPH. WHILE MY FOOT WAS ON THE BRAKE, JUST PRIOR TO A FULL STOP, THE CAR ACCELERATED ON ITS OWN. I KEPT MY FOOT ON THE BRAKE, PRESSING HARD, AND THE BRAKE EVENTUALLY OVERRODE THE ACCELERATOR AND STOPPED. LOOKING AT THE DASH I SAW THAT THE ABS BRAKE LIGHT FLASHED ON BRIEFLY. IT WAS A SUNNY DAY, NO RAIN, NO SLICK SURFACE, NO ONE WAS IN FRONT OF ME, SO NO DAMAGE TO ME OR ANYONE ELSE. ANOTHER INCIDENT HAPPENED THIS MORNING IN MY GARAGE. I GOT INTO THE PRIUS, FOOT ON THE BRAKE, PUSHED THE POWER BUTTON, AND THEN A MOMENT LATER, STILL IN PARK, I FELT A SURGE. THE CAR DID NOT LUNGE FORWARD, BUT I STRONGLY FELT THE REVVING AND SURGE OF POWER, AND THE CAR LIFTED FROM THE POWER. THESE INCIDENTS CAUSED ME TO SEARCH THE WEB FOR SIMILAR EXPERIENCE OF OTHERS, AND I HAVE FOUND MANY, SOME WITH SEVERE CONSEQUENCES. I WOULD ALSO LIKE TO ADD THAT IN HINDSIGHT I REALIZE THAT TWO OTHER THINGS I HAVE NOTICED ABOUT THE BRAKES MIGHT BE IMPORTANT TO RELATE. I SOMETIMES HEAR A SLIGHT GRINDING DISK SOUND WHEN I BRAKE, AND I HAVE ON A FEW OCCASIONS NOTICED THAT THE BRAKES ARE SKIPPING AND THE ABS ENGAGING, AS IF I WERE ON A SLIPPERY OR GRAVELED SURFACE. YET THAT WAS NEVER THE CASE; THE ROAD CONDITIONS WERE DRY AND TAR WAS IN GOOD CONDITION. I KNOW THIS BECAUSE I LOOKED BACK EACH TIME TO SEE WHAT MIGHT HAVE CAUSED THE BRAKES TO ACT STRANGELY. THERE WAS NO APPARENT CAUSE. IN RETROSPECT, AFTER HAVING EXPERIENCED THE ACCELERATION

**Location of Incident:** OAKLAND, CA  
**NHTSA Summary:**

TOYOTA CAMRY 2000: INTERMITTENT AND UNEXPECTED ACCELERATION OF VEHICLE (LURCHING FORWARD) EITHER JUST BEFORE, DURING, OR JUST AFTER APPLYING SUBTLE PRESSURE TO BRAKE PEDAL. ISSUE TYPICALLY OCCURS IN STOP AND GO TRAFFIC WHEN: - ATTEMPTING TO SLOW VEHICLES FORWARD MOTION IN RESPECT OF POSTED SPEED LIMITS - APPROACHING STOP SIGNS OR RED TRAFFIC SIGNALS, OR - SWITCHING BETWEEN BRAKING AND ACCELERATION IS REQUIRED (ROAD CURVES, SPEED BUMPS, PARKING LOTS, ETC.). NO ACCIDENTS OR SPECIFIC INCIDENTS HAVE OCCURRED AS A RESULT OF THIS PROBLEM THAT I AM AWARE OF. I FIRST DISCOVERED THE ISSUE DRIVING MY MOTHER'S CAMRY WHILE VISITING HER IN FLORIDA. BECAUSE THE NHTSA REQUIRES INCIDENT-SPECIFIC INFORMATION TO COMPLETE THIS FORM, I SELECTED A DATE IN EARLY JUNE 2009 WHEN I FIRST BECAME AWARE OF THE PROBLEM. THE MILEAGE REPORTED IS APPROXIMATE. NOTE: ALTHOUGH I DO NOT TYPICALLY DRIVE THIS PARTICULAR CAR, I HAVE OWNED TWO TOYOTAS AND CURRENTLY DRIVE A 2006 PRIUS. I BELIEVE THAT THIS ANOMALY IS WORTH REPORTING, GIVEN THAT TOYOTA'S CURRENT RECALL OF ITS VEHICLES FOR VERY SIMILAR ISSUES HAS NOT YET ADDRESSED THESE ISSUES FOR OLDER MODELS. \*TR

**Date of Incident:** 20090608  
**Vehicle:** 2008 LEXUS IS350  
**Location of Incident:** TUCSON, AZ

**NHTSA Summary:**

AS I WAS PARKING MY LEXUS IN A PARKING LOT, THE CAR SUDDENLY SHOT FORWARD, MOVING OVER THE PARKING CEMENT BARRIER AND CRASHING INTO A WALL. THE CAR WAS REPAIRED. AFTER I RECEIVED THE RECALL NOTICE FROM TOYOTA RELATING TO THE FLOOR MAT ISSUE, I MADE SURE THE FLOOR MATS WERE PROPERLY ATTACHED. THIS HAPPENED ONLY ONCE. I BELIEVE THAT THE ACCIDENT WAS CAUSED BY THE FLOOR MAT SLIDING AND PUSHING ON THE ACCELERATOR.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10293670  
**Date of Incident:** 20090609  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** SAN MATEO, CA

**NHTSA Summary:**

JUNE 9, 2009 MY 2007 ES 350 LEXUS TOOK OFF WITH ME REACHING A FRIGHTENING SPEED OF 95 MILES AN HR WHEN I REACHED THE MAT UNDER MY RIGHT KNEE AND YANKED THE CARPET AND AT LAST FREED THE GAS AND BRAKE PEDAL. I KNOW THE WHERE BOTH INVOLVED AS I HIT THE BRAKES TO NO AVAIL AS THE SPEED BECAME FRIGHTENING AND KEEPING IT ON THE ROAD WAS A MIRACLE. I THINK IT IS UNACCEPTABLE THAT I DID NOT RECEIVE ANY RECALL NOTICE FOR ALMOST 4 MOST AFTER THIS INCIDENT. \*TR

**NHTSA ODI Number:** 10336025  
**Date of Incident:** 20090610  
**Vehicle:** 2009 TOYOTA RAV4  
**Location of Incident:** APACHE JUNCTION, AZ

**NHTSA Summary:**

WHEN COMING TO A STOP, THE CAR INCREASES IDLE TO 1500-2000 AND THE BRAKES SOMETIMES BECOME "SQUISHY" AND THE BRAKE PEDAL WILL FEEL LIKE THERE IS NO PRESSURE. THE CAR WILL STOP, BUT THE IDLE WILL CONTINUE TO REV UP. I HAVE TO ENSURE I DO NOT RELEASE THE BRAKE UNTIL THE CAR IN FRONT OF ME IS A VERY SAFE DISTANCE AWAY. THE DEALER COULD NOT REPLICATE THE PROBLEM. THIS HAS CONTINUOUSLY OCCURED SINCE THE CAR WAS NEW, IT NOW HAS APPROXIMATELY 17000 MILES. THIS VEHICLE, PER THE VIN WAS NOT INCLUDED IN THE RECALL.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10312841  
**Date of Incident:** 20090611  
**Vehicle:** 2007 TOYOTA SEQUOIA  
**Location of Incident:** EAST BETHEL, MN

**NHTSA Summary:**

TL\* THE CONTACT OWNS A 2007 TOYOTA SEQUOIA. THE CONTACT STATED WHILE DRIVING AT 55 MPH AND RELEASING THE ACCELERATOR PEDAL THE PEDAL NEVER RELEASED. THE SPEED OF THE VEHICLE INCREASED TO 90 MPH. THE CONTACT PUT THE VEHICLE INTO NEUTRAL AND SHUT THE VEHICLE OFF. THE CONTACT WAS ABLE TO PULL THE VEHICLE OFF THE ROAD AND CHECK TO SEE IF THE FLOOR MAT CAUSED THE VEHICLE TO ACCELERATE, BUT FOUND THAT IT WASN'T THE FLOOR MAT. THE CONTACT RESTARTED THE VEHICLE WITHOUT ANY PROBLEMS. THE CONTACT CALLED THE MANUFACTURER AND THEY INFORMED THE CONTACT TO TAKE THE VEHICLE TO A DEALER. THE DEALER PERFORMED A DIAGNOSTIC TEST AND FOUND NOTHING WRONG WITH THE VEHICLE. THE CONTACT FEELS THIS YEAR SHOULD BE ADDED TO RECALL NUMBER 10V17000 REGARDING THE STICKY PEDAL. THE FAILURE MILEAGE WAS 55,000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10303543  
**Date of Incident:** 20090612  
**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** MACOMB, IL

**NHTSA Summary:**

I HAD A SUDDEN ACCELERATION EXPERIENCE IN A 2004 TOYOTA SIENNA VAN. I AM FILING THIS COMPLAINT BECAUSE I AM CONCERNED THAT THE RECENTLY ANNOUNCED TOYOTA RECALLS DO NOT INCLUDE THE SIENNA MODEL. THE INCIDENT OCCURRED WHILE I WAS PARKING MY ROOMMATE'S SIENNA VAN. I PULLED INTO A PARKING SPOT, UNHAPPY WITH THE ANGLE IN WHICH I WAS PARKED, I PUT THE VEHICLE INTO REVERSE, BACKED UP SLOWLY THEN PUT THE VEHICLE INTO DRIVE AND STARTED TO ENTER INTO THE PARKING SPOT WHILE STRAIGHTENING THE WHEEL. AS THE VEHICLE MOVED FORWARD, THE ENGINE SUDDENLY MADE A LOUD ROARING NOISE AND LEAPT

C-1384

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

FORWARD OUT OF CONTROL, JUMPING A PARKING CURB AND UP OVER THE SIDEWALK IN FRONT OF THE RESTAURANT. I PLACED BOTH FEET IMMEDIATELY ON THE BRAKE BUT COULDN'T STOP THE VEHICLE. WHAT STOPPED THE VEHICLE WAS THE BRICK WALL OF THE RESTAURANT. AFTER THE INCIDENT, WE HAD THE VEHICLE EXAMINED BY A TOYOTA DEALER WHO DID DIAGNOSTIC TESTING AND COULD NOT DETERMINE A CAUSE FOR THE SUDDEN ACCELERATION. THIS EVENT OCCURRED PRIOR TO NEWS REPORTS OF A POSSIBLE PROBLEM WITH TOYOTA VEHICLES. WHEN THE TOYOTA PROBLEM BECAME PUBLIC LAST FALL, I CONTACTED TOYOTA AND OFFICIALLY "REGISTERED" MY EXPERIENCE WITH THE SIENNA VAN (TOYOTA REFERENCE #0911107062). I ALSO CALLED MY TOYOTA DEALER IN MY TOWN (MACOMB IL) WHO ADMITTED THERE WAS ANOTHER SIENNA VAN BROUGHT TO HIM THAT ALSO EXPERIENCED A SUDDEN ACCELERATION AFTER THE ONE I WAS DRIVING. MY STATE FARM INSURANCE AGENT IS ALSO AWARE OF THAT OTHER SIENNA EXPERIENCE. I AM NOT SEEKING REIMBURSEMENT BUT I AM CONCERNED THAT THE SIENNA MODEL SHOULD ALSO BE CONSIDERED FOR THE PEDAL ASSEMBLY RECALL. AT THE TIME, THIS SIENNA HAD APPROXIMATELY 78,000 MILES ON IT. JUST FOR THE RECORD, I AM A 2007 TOYOTA CAMRY OWNER AND HAVE NOT HAD ANY ISSUES WITH SUDDEN ACCELERATION IN THIS VEHICLE (APPROXIMATELY 22,000 MILES), THANK YOU. \*TR

**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** HANSVILLE, WA

**NHTSA Summary:**

THE THROTTLE IN MY 2007 RAV4 V6 LIMITED HAS STUCK OPEN THREE TIMES IN THE LAST FEW MONTHS. IT HAPPENS AFTER I "FLOOR" THE ACCELERATOR. THE FIRST TIME OCCURRED IN MY GARAGE AS I WAS TRYING TO START THE ENGINE. I HAD TO TURN IT OFF. THE SECOND TIME WAS A WEEK LATER AS I WAS PASSING A TRUCK GOING UP A HILL ON A 3 LANE HIGHWAY. I PUT ON THE BRAKES AND TRIED TO GET THE TRANSMISSION INTO NEUTRAL AS I TRIED TO GET TO CROSS TWO LANES OF TRAFFIC TO GET TO THE SHOULDER. I WAS SUCCESSFUL WITHOUT GETTING INTO AN ACCIDENT, BUT IT WAS SCARY. I TOOK THE CAR TO A DEALER AND THEY SAID THAT THE THROTTLE BODY HAD A LEAK, SO THEY REPLACED THE SEAL. I DID NOT EXPERIENCE THE PROBLEM AGAIN FOR A COUPLE OF MONTHS UNTIL IT HAPPENED AGAIN TWO DAYS AGO. I WAS ACCELERATING TO MERGE WITH TRAFFIC ON A FREEWAY. I APPLIED THE BRAKES AND THE THROTTLE STOPPED STICKING AND QUICKLY RETURNED TO NORMAL OPERATION.

**NHTSA Summary:**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**C-1386**

2007 TOYOTA AVALON LIMITED. DEFECTIVE LASER CRUISE CONTROL. NOTE: VEHICLE HAS KEYLESS IGNITION. WHEN ACTIVATED THE UNIT WOULD REGISTER OBSTRUCTIONS THAT WERE NOT THERE OR WOULD NOT EVEN RECOGNIZE A VEHICLE DIRECTLY IN FRONT. WHEN THE UNIT RECOGNIZES THE OBJECT IT STARTS TO SLOW DOWN, APPLY THE BRAKES, AND WHEN THE OBSTRUCTION IS FAR ENOUGH AWAY IT RESUMES SPEED. THE PROBLEM IS WHEN IT RESUMES SPEED, THE ACCELERATOR IS ALMOST PUSHED TO THE FLOOR AND ACCELERATION IS RAPID. THE BEST WAY TO DISENGAGE THE SYSTEM IS FROM THE CONTROL STALK ON THE STEERING COLUMN. I HAD THIS PROBLEM FROM THE TIME I BOUGHT THE VEHICLE IN JULY OF 2007. AFTER TWO YEARS OF COMPLAINING TO THE DEALER THE UNIT WAS RECOGNIZED AS BEING DEFECTIVE AND REPLACED IN JUNE 2009. THE DEALER CLAIMED THAT HE HAD NOT RECEIVED ANY DIRECTIVE FROM TOYOTA USA CONCERNING A PROBLEM WITH THE UNIT. WITH ALL THE PUBLICITY THAT TOYOTA IS RECEIVING CONCERNING ACCELERATOR PROBLEMS, I THOUGHT THAT IN SOME CASES THE CAUSE MAY BE RELATED TO COMPUTER PROBLEM IN ADDITION TO A "JAMMED" OR STUCK ACCELERATOR. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10296326  
**Date of Incident:** 20090615  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** PROVIDENCE, RI

**NHTSA Summary:**

I WAS DRIVING DOWN AN OPEN ROAD AT A MODERATE SPEED (ABOUT 40 MPH). THE VEHICLE SUDDENLY BEGAN TO ACCELERATE. I STEPPED ON THE BRAKE PEDAL BUT THIS ONLY CAUSED THE ENGINE TO REV. I CONTINUED TO PRESS ON THE BRAKE PEDAL WITH A GREAT DEAL OF FORCE AND WAS EVENTUALLY WITH DIFFICULTY ABLE TO BRING THE VEHICLE TO A STOP EVEN THOUGH THE ENGINE CONTINUED TO BE REVVING VERY HIGH. I PUT THE CAR IN PARK AND TURNED OFF THE ENGINE. AFTER WAITING FOR A FEW SECONDS, I TURNED THE VEHICLE BACK ON AGAIN. THE ENGINE WAS STILL REVVING OUT OF CONTROL. I TURNED THE VEHICLE BACK OFF AND WAITED A FEW SECONDS THEN TRIED AGAIN. THE ENGINE WAS STILL REVVING VERY HIGH. ON THE THIRD OR FOURTH TRY OF THIS CYCLE, THE ENGINE FINALLY STARTED NORMALLY. I WAS THEN ABLE TO DRIVE AWAY AT A NORMAL SPEED. I TOOK THE VEHICLE TO A TOYOTA DEALER ON 6/18/09. THEY CHECKED IT WITH A SCAN TOOL AND DID A ROAD TEST BUT COULD NOT FIND ANYTHING WRONG WITH THE VEHICLE. THIS WAS A ONE-TIME EVENT AND HAS NEVER HAPPENED AGAIN. THE DEALER SAID THAT THE PROBLEM WAS LIKELY CAUSED BY A FLOOR MAT BUT I FIND THIS SIMPLY IMPOSSIBLE TO BELIEVE. I CHECKED THE PEDALS AFTER STOPPING THE CAR AND THEY WERE NOT OBSTRUCTED IN ANY WAY. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10301891  
**Date of Incident:** 20090615  
**Vehicle:** 2004 TOYOTA HIGHLANDER  
**Location of Incident:** BOULDER, CO

**NHTSA Summary:**

I JUST THOUGHT YOU SHOULD KNOW, LAST YEAR MY GAS PEDAL GOT STUCK. I HAVE A 2004 TOYOTA HIGHLANDER. WHEN I INVESTIGATED IT, I FOUND THAT THE PLASTIC PANEL TO THE RIGHT OF THE PEDAL HAD BROKEN LOOSE CAUSING THE PANEL TO LIFT UP SO THAT THE PEDAL COULD GET STUCK UNDER IT. THE PLASTIC SCREW HAD COMPLETELY SHEARED OFF. I WENT TO TOYOTA HERE IN BOULDER AND THEY REPLACE

**C-1387**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THE SCREW. WHY MANUFACTURERS USE PLASTIC SCREWS IS BEYOND ME. I WAS A LITTLE DISAPPOINTED THAT TOYOTA WOULD HAVE USED PLASTIC SCREWS FOR WHAT IS APPARENTLY A STRESSED AREA. IM JUST GLAD I DID NOT HAVE AN ACCIDENT. IT WAS PRETTY SCARY! \*TR

**NHTSA ODI Number:** 10310277  
**Date of Incident:** 20090615  
**Vehicle:** 2005 SCION XA  
**Location of Incident:** BOYNTON BEACH, FL

**NHTSA Summary:**  
IN JUNE 2009 I WAS COASTING INTO MY PARKING SPACE AT WORK, WHEN ALL OF A SUDDEN MY 2005 TOYOTA SCION XA ACCELERATED, DROVE OVER A PARKING BUMPER, PLOWED INTO A SMALL TREE AND DROVE INTO A BRICK WALL. THE BRAKES FAILED AND WERE TOTALLY USELESS. I HAD MY CAR TOWED TO THE TOYOTA DEALERSHIP WHERE I PURCHASED MY CAR. I REPORTED THIS INCIDENT TO THE TOYOTA DEALERSHIP AND WAS INFORMED THAT THEY NEVER HEARD OF ANY PROBLEMS, LIKE MY OWN, WITH THE SCION. THE REPAIR SHOP TOLD ME THAT I MUST HAVE HIT THE GAS PEDAL INSTEAD OF THE BRAKES. THEY ASSURED ME THEY WOULD LOOK INTO THE PROBLEM BUT UNLESS IT HAPPENS WHILE THEY WERE WORKING ON IT, THEY COULD DO NOTHING. I WROTE TO TOYOTA MOTOR SALES IN TORRANCE, CA IN SEPTEMBER 2009 DESCRIBING MY CONCERNS AND NEVER RECEIVED A RESPONSE. SINCE THIS INCIDENT, THERE HAVE BEEN SEVERAL INCIDENTS WHERE THE ENGINE HAS RACED ON ITS OWN. ALSO, VERY OFTEN WHEN THE GAS PEDAL IS DEPRESSED IT SEEMS TO FEEL LIKE IT IS "STICKING" AND/OR NOT GETTING THE MESSAGE THAT IT IS TIME TO GET INTO GEAR AND GO FORWARD.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10311266  
**Date of Incident:** 20090615  
**Vehicle:** 2009 TOYOTA CAMRY  
**Location of Incident:** BOSTON, MA

**NHTSA Summary:**  
I PURCHASED A 2009 TOYOTA CAMRY HYBRID IN MAY, 2009. FOR THE FIRST FEW MONTHS I GOT GREAT GAS MILEAGE (AROUND BETWEEN 35-45 MILES TO THE GALLON) BOTH IN THE CITY AS WELL AS ON THE HIGHWAY. IN THE LAST COUPLE MONTHS, THE ELECTRIC COMPONENT TO MY ENGINE HAS NOT BEEN WORKING LIKE IT HAS BEFORE AND MY GAS MILEAGE IN THE CITY IS NEARLY HALF (ABOUT 21-23 MILES TO THE GALLON). AT FIRST, I CHALKED IT UP TO A BAD TANK OF GAS, BUT MONTHS AND SEVERAL TANKS OF GAS LATER, THE PROBLEM STILL ENDURES. THE CAR SHOULD BE HARNESSING ELECTRIC ENERGY WHEN BREAKING AND AT STOPLIGHTS. INSTEAD, IT IS USING AN ABSURD AMOUNT OF GAS. ADDITIONALLY, THE ELECTRIC ENGINE WILL SUDDENLY KICK IN WHEN BREAKING SUDDENLY GIVING THE CAR A BOOST OF ACCELERATION WHILE I AM TRYING TO STOP THE CAR. THE WHOLE REASON I PURCHASED A HYBRID CAR WAS TO REAP THE BENEFITS OF GREAT GAS MILEAGE, BUT NOW I AM GETTING FAR LESS THAN THE REGULAR CAMRY MODEL. I ALSO FEEL THAT THE SUDDEN ACCELERATION IS A SAFETY HAZARD. GIVEN THE SERIES OF RECALLS TOYOTA HAS CURRENTLY HAD, HAVE YOU RECEIVED ANY OTHER COMPLAINS FROM CAMRY HYBRID DRIVERS? \*TR

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

DRIVING AT SLOW SPEED. TRIED TO SLOW AT AN INTERSECTION AND WHEN I HIT BRAKES, THE CAR UNEXPECTEDLY ACCELERATED AND I NARROWLY AVOIDED A HEAD ON CRASH! \*TR  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10313054  
**Date of Incident:** 20090615  
**Vehicle:** 2009 TOYOTA VENZA  
**Location of Incident:** MAPLE VALLEY, WA

**NHTSA Summary:**  
I HAVE EXPERIENCED THE ENGINE SURGE PROBLEM WITH MY 2009 TOYOTA VENZA. IN MY CASE, IT HAPPENS INTERMITTENTLY, AND HAS NOT YET CAUSED AN ACCIDENT. IN ALL OF THESE INCIDENTS, I WAS ACCELERATING TO PASS ANOTHER CAR OR TO MERGE INTO TRAFFIC WHEN THE ENGINE SURGED, CAUSING THE CAR TO MOVE MUCH FASTER THAN I HAD INTENDED. IN THE FIRST CASE OF PASSING, THE SURGE NEARLY CAUSED ME TO LOSE CONTROL OF THE CAR BECAUSE TORQUE PULLED THE STEERING WHEEL BEYOND WHERE I INTENDED TO TURN. WHEN I TOOK THE CAR INTO THE TOYOTA DEALER, THE CUSTOMER HANDLER TOLD ME THE CAR WAS DESIGNED TO DO THIS, AND EVENTUALLY HE WORKED HIS WAY AROUND TO, "ONCE THE CAR'S COMPUTER GETS USED TO THE WAY YOU DRIVE, IT WON'T HAPPEN ANY MORE." MORE RECENTLY, THE DEALER HAS SAID THE VENZA IS NOT COVERED BY THE RECALL, SO I CAN'T EVEN GET THE SHIM WHICH DOESN'T SEEM LIKELY TO SOLVE AN ENGINE SURGE PROBLEM, BUT WOULD AT LEAST HELP TO DISPROVE THE STICKING PEDAL STORY.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10336591  
**Date of Incident:** 20090615  
**Vehicle:** 2008 TOYOTA SIENNA  
**Location of Incident:** SCARSDALE, NY

**NHTSA Summary:**  
IN THE SUMMER OF 2009 MY TOYOTA 2008 SIENNA XLE AWD ENGINE SPEED SLOWLY STARTED TO CLIMB WITHOUT MY FOOT ON THE GAS PEDAL. I DON'T REMEMBER THE EXACT SEQUENCE OF EVENTS THAT FOLLOWED BUT I BELIEVE I PLACED IT INTO NEUTRAL, STOPPED, PLACED IT INTO PARK (AUTOMATIC TRANSMISSION) AND TURNED THE ENGINE OFF THEN ON AGAIN. AFTER THAT THE ENGINE RESPONDED ONLY TO MY ACTIONS ON THE GAS PEDAL. IT DID OCCUR TO ME THAT THE PEDAL COULD HAVE BEEN CAUGHT UNDER THE FLOOR MAT SO I CHECKED ITS POSITION AND IT WAS SOME DISTANCE FROM THE PEDAL AND COULD NOT HAVE BEEN THE CAUSE. I HAVE OWNED THIS VEHICLE FROM NEW IN MAY 2008 AND THIS UNDIRECTED ACCELERATION HAS ONLY OCCURED ONCE. THE CAR HAS JUST COMPLETED 20,000 MILES. I REPORTED THIS TO THE DEALER WHO SERVICED MY CAR FOR THE 20,000 MILE INTERVAL, AND VIA TOYOTA'S WEB SITE BUT I WANT TO MAKE SURE YOU ARE AWARE THAT SIENNA VANS CAN ALSO HAVE THIS PROBLEM.

C-1390

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2006 TOYOTA TUNDRA. WHILE DRIVING 60 MPH AND RELEASING THE ACCELERATOR PEDAL THE VEHICLE CONTINUED TO ACCELERATE. THE FAILURE ONLY OCCURRED ONCE. THE FAILURE MILEAGE WAS 47000 AND THE CURRENT MILEAGE WAS 55000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10307953  
**Date of Incident:** 20090616  
**Vehicle:** 2009 TOYOTA COROLLA  
**Location of Incident:** LANSING, IL

**NHTSA Summary:**  
THE 2009 TOYOTA COROLLA THAT WAS PURCHASED IN 2009 ACCELERATED, ON ITS OWN ACCORD WHILE PULLING OUT OF THE GARAGE. THIS CAUSED THE CAR TO INCREASE IN SPEED SO QUICKLY THAT THE CAR HIT THE NATURAL GAS METER LOCATED NEXT TO THE HOUSE. THE FORCE OF THIS IMPACT COMBINED WITH THE ACCELERATION CAUSED MAJOR DAMAGE. THE GAS METER BEGAN TO LEAK AND THE FORCE OF IMPACT AND CONTINUING ACCELERATION OF THE VEHICLE, LITERALLY RIPPED A GASH IN THE SIDE OF THE CAR, APPROX 5 FEET LONG. THIS GASH WAS CAUSED BY THE REGULAOR ON THE GAS METER. (THE METER IS WELL OUT OF THE WAY OF THE PATH AND HAS NEVER BEEN A PROBLEM. IT HAS BEEN IN THIS LOCATION FOR DECADES. THE VEHICLE ONLY STOPPED BECAUSE IT WAS FORCED TO, AS THE SMALL SECTION OF THE GAS METER WHICH IMPACTED THE CAR WAS UNABLE TO CONTINUE RIPPING INTO THE CAR. AS IT FINALLY CAME TO A POINT WHERE THE DOOR ENDED AND THE PASSENGER SIDE FRONT QUARTER PANEL BEGAN. THIS WAS NOT REPORTED TO THE POLICE, AS THIS HAPPENED ON OUR PRIVATE PROPERTY. IN ADDITION, WE SAW NO POINT IN REPORTING IT TO NHTSA AS WE COULD NOT FATHOM THAT IT WAS EVEN THE CAR'S FAULT. AS PERPLEXED AS WE WERE THAT THIS HAPPENED, UNTIL RECENTLY, WE HAVE NEVER BEEN ABLE TO EXPLAIN WHY SUCH DAMAGE WOULD BE CAUSED BY PULLING OUT OF THE DRIVEWAY AT SUCH A SLOW SPEED, OR EVEN HOW WE MANAGED TO HIT THE GAS METER. WITH THE GIVEN NEWS OF THE SUDDEN ACCELERATION RECALL, WE NOW HAVE A VERY CLEAR PICTURE AS TO WHAT HAPPENED. THE VEHICLE WAS NEVER REPAIRED AS THE COST OF THIS REPAIR IS GOING TO BE MORE THAN WE CAN AFFORD AT THE MOMENT. ADDITIONALLY, THE GAS METER BEGAN TO LEAK AND HAD TO IMMEDIATELY BE TURNED OFF AND AN EMERGENCY REPAIR CALL TO THE GAS COMPANY WAS MADE. THE REGULATOR ON THE METER WAS REPLACED, BUT WE WERE WITHOUT GAS IN THE HOUSE FOR A SHORT PERIOD. THANKFULLY, THE HOUSE DID NOT EXPLODE. WE ARE VERY CONCERNED ABOUT THIS AS THIS CAR IS DRIVEN 80 MILES A DAY TO GO TO WORK AND RETURN DAILY.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

C-1392

**Location of Incident:** WASHINGTON DC, DC

**NHTSA Summary:**

WAITING FOR MY HUSBAND AT HIS MOTHER'S ASSISTED LIVING RESIDENCE, I PUT MY 2009 PRIUS IN PARK MODE. DECIDING TO RETURN TO THE BLDG ENTRANCE, I PUT THE CAR IN REVERSE (OUT OF PARKING MODE) AND LET IT GO AT ITS OWN SPEED. MY FOOT NEVER TOUCHED THE ACCELERATOR. I WAS ABOUT TO TURN THE WHEEL TO REENTER THE ENTRANCE AREA, WHEN THE CAR STARTED TO ACCELERATE. I QUICKLY PUT MY FOOT ON THE BRAKE BUT THE BRAKES DIDN'T WORK. I THEN SAW A WOMAN IN THE REAR VIEW MIRROR, ABOUT A FOOT FROM ME STANDING ON THE CURB IN FRONT OF THE BLDG'S GLASS FAÇADE. I TURNED THE WHEEL JUST MISSING HER AS WELL AS THE BLDG. FRANTICALLY PRESSING THE BRAKES WHILE THE CAR CONTINUED ACCELERATING MORE, I ALMOST WENT ON TO A BUSY ST. ACROSS FROM A MALL. SOMEHOW I SAVED MYSELF & OTHERS BY TURNING THE STEERING WHEEL TO THE RT, REENTERING THE PROPERTY VIA A CURB CUT FOR WHEEL CHAIRS, ETC. I MISSED HITTING A POLE BUT RAN OVER 2 TREES, WHICH THE CAR SEVERED & WHICH ABRUPTLY STOPPED THE CAR, JUST BEFORE HITTING A BRICK WALL. THIS ALL HAPPENED AT NIGHT, IN THE DARK. IN REVERSE THE POLICEMAN & THE TOW TRUCK OPERATOR WERE INCREDULOUS HOW THE CAR GOT INTO THAT SPACE. IT WAS TOWED TO A NEARBY TOYOTA DEALER, WHERE THE BRAKES WERE PRONOUNCED "PERFECT". SO MY HUSBAND INSISTED I BE CHECKED OUT. WHILE RELATING THE INCIDENT TO THE DOCTOR, THE DR. GOOGLED "PRIUS BRAKE/ACCELERATION PROBLEMS" & FOUND MANY & PRINTED 1 OF A 2009 PRIUS WHERE THE DRIVER ENCOUNTERED 3 SUCH OCCURRENCES "DUE TO A COMBINATION OF MYSTERIOUS ACCELERATION AND LOSS OF BRAKES". THE DR. WAS CERTAIN I WAS THE VICTIM, BUT SUGGESTED I HAVE AN MRI "TO BE SURE"-- WHICH I DID & I'M FINE. THAT I WAS IN CONTROL IN A TOTALLY UNCONTROLLABLE SITUATION AT NIGHT WITH A CAR IN REVERSE, WHERE I ALMOST KILLED SOMEONE & POSSIBLY KILLED OR HURT OTHERS, INCLUDING MYSELF, AND DONE CONSIDERABLE DAMAGE ALONG THE WAY IS A MIRACLE AND THE CULPRIT, I'M CONVINCED, IS WAS A "GLITCH" IN THE CAR'S COMPUTER. \*TR

**Vehicle:** 2005 TOYOTA TACOMA  
**Location of Incident:** MARYSVILLE, CA

**NHTSA Summary:**

WE PURCHASED A 2005 TACOMA PICK-UP IN 2005. MY HUSBAND HAS HAD TWO EXPERIENCES WITH THE PICK-UP ACCELERATORING ON ITS OWN, AT FULL THROTTLE, WITHOUT HIS FOOT ON THE THROTTLE AT ALL. ONLY AFTER TURNING THE ENGINE OFF DID IT STOP. THIS TOOK PLACE IN 2006 & 2007. HE CONTACTED THE TOYOTA DEALERSHIP THAT WE PURCHASED IT FROM AND WERE TOLD THEY HAD NOT HEARD OF ANYTHING LIKE THAT HAPPENING. WE GAVE THE TRUCK TO OUR SON IN AUGUST OF 2008. IN JUNE OF 2009, THE TRUCK ACCELERATED TO FULL THROTTLE, WHILE IN REVERSE, GOING MAYBE 5MPH. HE HAD HIS FEET ON THE BRAKE AND THE TIRES WERE SMOKING. LUCKILY, HE WAS ABLE TO STOP IT. WE NOW HAVE A 2008 TACOMA PICKUP AND A 2009 COROLLA CAR IN OUR POSSESSION. WE'RE VERY CONCERNED ABOUT WHAT IS GOING ON. WE WOULD APPRECIATE YOU LOOKING AT THE TACOMA PICK-UP FOR MORE THAN THE FLOOR MAT RECALL. WE HAVE HAD THIS HAPPEN TO OUR FAMILY AND WE WANT THE PROBLEM SOLVED. I HAVE SENT AN EMAIL TO TOYOTA ON THEIR WEB SITE TELLING THEM OF OUR EXPERIENCE WITH THE TACOMA PICKUP. THANK YOU.

**NHTSA Summary:**

I HAD PULLED MY 2005 CAMRY XLE INTO MY GARAGE STALL AND WAS AT A COMPLETE STOP. I LET OFF THE BRAKE TO INCH FORWARD ANOTHER INCH OR TWO WHEN ALL OF A SUDDEN MY VEHICLE HAD A HIGH POWER SURGE. THE VEHICLE SOUNDED LIKE THE RPM'S WENT TO THE MAX IMMEDIATELY, MY CAR TOOK OFF AT FULL POWER AND ACCELERATED AT A HIGH SPEED INTO MY GARAGE WALL. I SLAMMED ON THE BRAKE AS HARD AS I POSSIBLY COULD, PRIOR TO HITTING THE GARAGE WALL. THE GARAGE WALL WAS FORCED OFF THE FOUNDATION BY THE IMPACT AND AT THAT POINT MY CAR STOPPED. THIS HAS ONLY HAPPENED ONCE, I HAD NO IDEA HOW TO EXPLAIN TO THE INSURANCE COMPANY WHAT HAD HAPPENED SINCE I WAS IN COMPLETE SHOCK AND REALLY HAD NO GOOD EXPLANATION FOR THE INSURANCE COMPANY HOW MY CAR ACCELERATED ON ITS OWN. MY VEHICLE HAD AUTO BODY DAMAGE AS WELL AS PROPERTY DAMAGE TO MY HOME. I DID NOT CONTACT TOYOTA AT THIS TIME, SEARCHED THE INTERNET TO FIND OTHER 2005 CAMRY OWNERS THAT HAVE EXPERIENCED THE SAME SITUATION, SO I ASKED THE INSURANCE COMPANY IF THEY HAVE HEARD OF THIS HAPPENING TO OTHERS AND THEY INDICATED YES. I HAD A WITNESS IN THE GARAGE WHO WAS THANKFULLY NOT STANDING IN FRONT OF MY VEHICLE WHEN IT ACCELERATED. THE WITNESS ALSO HEARD THE MASSIVE POWER SURGE OF THE VEHICLE. \*TR

**NHTSA Summary:**

TL\* THE CONTACT OWNS A 2008 TOYOTA CAMRY HYBRID. THE CONTACT STATED THAT WHEN SHE DEPRESSED THE BRAKE PEDAL, SHE FELT A JOLTING JERK AND THE PEDAL WENT DOWN TO THE FLOOR WHEN SHE APPLIED IT LIGHTLY. SHE TOOK THE VEHICLE TO THE DEALERSHIP AND THE DEALER RECALIBRATED THE STROKE SENSOR. ABOUT 8-9

C-1395

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

MONTHS LATER, THE ISSUE OCCURRED AGAIN SO SHE TOOK THE VEHICLE BACK TO THE DEALERSHIP AND THE STROKE SENSOR WAS REPLACED. SHE STATED THAT SHE NOTICED NO PROBLEMS SINCE THE LATEST REPAIR. SHE HAD NOT CALLED THE MANUFACTURER TO-DATE. THE CURRENT MILEAGE WAS APPROXIMATELY 24,000. THE FAILURE MILEAGE WAS APPROXIMATELY 20,000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10307192  
**Date of Incident:** 20090620  
**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** ELGIN, IL

**NHTSA Summary:**

I OWN A TOYOTA 2007 RAV4 WHICH AS BEEN IN THE DEALERSHIPS SHOP OVER 10 TIMES FOR THE SAME TWO ISSUES BREAKS AND GRINDING NOISE, PER TOYOTA EACH TIME IT WAS DIFFERENT, BUT I KNOW IT WAS THE SAME TWO THINGS. IT'S LIKE TOYOTA IS FALSIFYING CUSTOMER'S CAR ISSUES WITH THEIR OWN WORDS INSTEAD OF MAKING PROPER DOCUMENTATION. IT STARTED OFF WITH THE BREAKS WHEN I FIRST PURCHASED THE CAR THEY WERE MAKING A NOISE AND WHEN GOING OVER SPEED BUMPS THE CAR WOULD ACCELERATE INSTEAD OF STOPPING, BUT I THOUGH THIS WAS MAY BE AN ADDED FEATURE TO THE NEW CAR. THE FIRST REAL INCIDENT IS WHEN THE CAR WOULD STOP AND I CRASHED INTO TO A SIDE RAIL, IT DIDN'T DO MUCH DAMAGE, AND IT TOTAL ABOUT \$400.00. THE CAR IS MAKING A METALLIC NOISE IN THE SUSPENSION AND THIS WAS REPORTED, BUT EACH AND EVERY TIME TOYOTA'S TECHS DRIVES WITH ME AND MY HUSBAND WHILE WE DRIVING THE CAR TO DUPLICATE THE NOISE TOYOTA'S TECHS SAID THIS NOISE WAS NORMAL. WE KNEW THIS NOISE WASN'T NORMAL BEHAVIOR OF A BRAND NEW CAR, I TOOK IT TO ANOTHER AUTO SHOP AND THEY VERIFIED THAT THE NOISE WAS IN THE SUSPENSION SYSTEM, THAT TOYOTA WOULD NEED TO ADDRESS THE ISSUE BECAUSE THE CAR WAS STILL UNDER WARRANTY, AND IT WOULD COST ME MONEY TO LOCATE THE NOISE. WHEN I TOLD TOYOTA THEY SAID THEY GIVE A CAR UNTIL THEY COULD FIND THE ISSUE, BY LETTING THEIR FIELD TECH LOOK AT THE CAR, AND I ASKED WHEN THIS TECH WOULD BE AVAILABLE. I WANTED TO SEE THIS PERSON LOOK AT THE CAR, BUT THEY CAME UP WITH A MILLION AND ONE REASONS THAT I COULD MEET WITH THE TECH? AFTER TALKING TO PEOPLE FROM THEIR CORP OFFICE ABOUT THE METALLIC NOISE AND THE BREAKS TOYOTA SAID, SINCE WE CAN'T FIND ANYTHING WRONG WITH THE CAR IT'S UNDER WARRANTY SO IF SOMETHING HAPPENS IT WILL BE FIXED. WHAT I DON'T UNDERSTAND IS WHY SHOULD I HAVE TO WAIT FOR THIS CAR TO KILL ME OR MY FAMILY FOR THE COMPANY TO LOOK AT THERE FAULTS BECAUSE ALL WE DID WAS PURCHASED A CAR FROM THE TOP OF THE LINE AUTO MAKERS TO GET THIS KIND OF TREATMENT?

**NHTSA Summary:**  
I DID NOT NOTICE ANY MALFUNCTIONS OF MY CAR PRIOR TO THE EVENT THAT I AM REPORTING. IN JUNE OF 2009 I WAS PULLING INTO A PARKING SPACE IN A PARKING LOT. MY FOOT WAS LIGHTLY ON THE BRAKE AND I NEARLY AT A COMPLETE STOP WHEN MY CAR LURCHED FORWARD LIKE A ROCKET. MY CAR JUMPED THE CURB OF THE PARKING SPOT, SIDESWIPE A ROW OF MAILBOXES ON MY LEFT WHILE TRAVELING ACROSS AN SMALL ISLAND OF LAWN AND SHOOTING OVER ANOTHER CURB ON THE OTHER SIDE OF THE ISLAND. MY VEHICLE CAME TO A STOP ON THE OTHER SIDE OF THE PARKING LOT APPROXIMATELY 15 FEET SHORT OF RAMMING THE SIDE OF A PARKED CAR. BOTH OF MY FEET WERE ON THE BRAKE PEDAL, BOTH OF MY LEGS WERE FULLY EXTENDED WITH MY KNEES LOCKED AND MY ENTIRE BODY WAS FULLY EXTENDED WITH ALL OF MY WEIGHT APPLIED TO THE BRAKE PEDAL. I IMMEDIATELY PLACED THE CAR IN PARK AND TURNED THE ENGINE OFF. THE LEFT FRONT QUARTER PANEL OF MY CAR RECEIVED MINOR DAMAGE FROM HITTING THE MAIL BOXES. THERE WAS A WITNESS FROM THE VETERINARY CLINIC WHERE THE EVENT OCCURED WHO SAW THE ACCIDENT. BECAUSE MY FOOT WAS ON THE BRAKE AND NOT ON THE GAS PEDAL I DO NOT BELIEVE THAT THIS EVENT OCCURRED BECAUSE OF A MECHANICAL PROBLEM WITH THE ACCELERATOR PEDAL OR FLOOR MAT.

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** CHICAGO, IL

**NHTSA Summary:**  
HAD ACCIDENT IN 2007 TOYOTA CAMRY. VEHICLE HESITATED AS I HAD ACCELERATED TO GO AROUND A TRUCK TO AVOID HITTING IT. THIS CAR HESITATES ABOUT 2 TO 3 SECONDS BEFORE TAKING OFF. WHEN CAR DOES TAKE OFF IT GOES TO FAST AND CAN MAKE A DRIVER LOSE CONTROL. THIS CAR ALSO SHAKES OR VIBRATE WHEN YOU ACCELERATE TO SPEEDS OF 60 TO 65MPH. STEERING IS A PROBLEM WHEN CAR HESITATE THEN TAKES OFF. THIS IS WHEN YOU CAN LOSE CONTROL. PASSING AND CHANGING LANES CAN BE A PROBLEM WHEN ACCELERATION IS NEEDED. THIS CAR CAN BE VERY DANGEROUS. THERE'S NOTHING WRONG WITH THE SPEEDOMETER. I GUESS IT'S THE TRANSMISSION OR WHATEVER PART THAT CONTROLS THE CAR TAKE OFF SPEED. \*TR

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**

THE FIRST TIME I EXPERIENCED PROBLEMS WITH MY BRAKES OCCURRED ON APRIL 28TH, 2007. I WAS EXITING A PARKING LOT THAT HAD A DOWNWARD SLOPE AND AS I MERGED ONTO THE MAIN ROAD, I STEPPED ON MY BRAKES BUT MY CAR WOULD NOT STOP. I WAS FORCED TO USE THE EMERGENCY BRAKES, BUT EVEN THEN, THE VEHICLE DID NOT COME TO A COMPLETE STOP FOR ANOTHER 10 YARDS. ON MAY 2ND, 2007, I TOOK THE VEHICLE TO BE CHECKED AT HOLLYWOOD TOYOTA IN LOS ANGELES, CA. THE INVOICE NOTES STATE THAT THE CAUSES FOR THE BRAKE PROBLEMS ON THIS PARTICULAR OCCASION WERE THAT THE BRAKE PEDAL WAS SPONGY AND THE BRAKES WERE OUT OF ADJUSTMENT. FOR THE VEHICLE BEING BRAND NEW AND ME BEING THE FIRST OWNER, I FIND IT RATHER DISTURBING THAT THESE BRAKE PROBLEMS HAD ALREADY BECOME AN ISSUE AFTER ONLY ONE MONTH OF OWNERSHIP. ON MARCH 24TH, 2009, ANOTHER SIGNIFICANT BRAKING INCIDENT HAPPENED. AS I ENTERED THE DRIVEWAY OF MY HOME, I STEPPED ON THE ACCELERATOR TO GO UP THE DRIVEWAY'S INCLINE AND THEN TAPPED ON MY BRAKES. WHEN I TAPPED ON THE BRAKES THE VEHICLE WOULD NOT STOP. I PULLED ON THE EMERGENCY BRAKES BUT IT STILL DID NOT STOP. I WAS FORCED TO STEER MY VEHICLE IN THE DIRECTION OF MY HOUSE IN ORDER FOR THE VEHICLE TO HOPEFULLY STOP WITH THE IMPACT. THE FRONT DRIVER'S SIDE OF THE VEHICLE BROKE THROUGH A WOODEN FENCE SURROUNDING MY FRONT GARDEN BEFORE THE VEHICLE HIT THE CORNER OF MY HOUSE AND FINALLY CAME TO A HALT. THE MOST SERIOUS BRAKING FAILURE INCIDENT OCCURRED ON JUNE 25TH, 2009 IN THE KAISER SUNSET PARKING STRUCTURE. I PUT THE CAR IN REVERSE TO PULL OUT OF MY PARKING SPOT. I THEN SHIFTED TO DRIVE WHILE APPLYING MY BRAKES. SINCE THE STRUCTURE WAS AT AN INCLINE THE VEHICLE GAINED VELOCITY AS I DROVE DOWN TO THE LOWER LEVELS TO EXIT. I PRESSED ON MY BRAKES BUT IT DID NOT WORK. I THEN PULLED ON THE EMERGENCY BRAKES BUT THE VEHICLE STILL WOULD NOT STOP. I WAS FORCED TO HIT THE EXIT CROSS BAR SO THAT THE IMPACT WOULD STOP MY VEHICLE FROM MOVING.

**Vehicle:** 2006 LEXUS IS250  
**Location of Incident:** AKRON, OH

**NHTSA Summary:**  
Sean:  
Just got off the phone with Matt, the consumer who called, about the crash his wife was involved in this past July. He knows vehicles as he is a performance test driver for Goodyear.  
Wife driving 2006 Lexus IS250  
All Weather Floor Mats provided by Lexus and in vehicle for at least 18 months.  
No prior problems with floor mats  
She is driving on country road and goes to pass a dump truck. As she accelerates, the throttle sticks wide open.  
Tries to brake but doesn't help  
She presses the ignition button but it does not shut down the engine. He does not believe she held it down for the three seconds  
She pulls in front of dump truck and puts vehicle in park to stop. Dump truck hits her from behind. She is not injured but there is \$13,500 damage with the car  
She does not know if the floor mat was caught up in pedal  
Vehicle brought to Lexus dealer and photos taken (He has copies of the photos)  
Lexus engineer, Rick Vierke, flown out to look at vehicle. Spent a few hours inspection vehicle. No one representing the vehicle owner was in attendance  
Two weeks after inspection he is told that the cause of the crash was a stuck pedal in the floor mat and it is the owner's responsibility to make sure the floor mat is correctly installed.  
He was to receive a detailed report from Lexus 4 weeks later. Still has not received it and the accident was in July  
He filed a complaint with NHTSA and talked to the head investigator Steven (He could not remember his last name)  
Also filed a complaint with Lexus  
Also received a letter from Lexus legal in California telling him to send a letter regarding what compensation he is looking for.  
Does not want to get involved with Class Action or other litigation if there is one  
May be interested in talking though.

**NHTSA Summary:**  
**Additional Summary:**  
Three SUA events: Wife driving each time  
First time occurred in June / July 2009 (exact date will be provided) accelerated onto 95 in NJ - continued to accelerate - hit brakes, held and then finally "clicked" out of acceleration. Had all-weather floor mat - but not OE Toyota. Not secured with clips, but noted that it had spikes underneath and it was not interfering.

Second event happened about one month after the first. In the meantime took the AWFM out. Had regular carpeted OE mats clipped in. Was accelerating onto highway and the car kept going. Put on brake and e-brake and was able to stop by slowing and pulling onto shoulder and turning off the key. Dealer said it was the floor mat even though it was in place and carpeted.

Third time, no floor mat in the car (3 to four weeks ago). Was able to pull over without an incident. Hit about 70 or 80 then heard an audible "click" when it went to idle. Took to dealer - left with dealer. Three days later had a Toyota rep come to examine the car - nothing found. Dealer couldn't account for it. Nothing on scan, etc. Kept telling them there were no other complaints.

**Additional Summary:**  
CBS 5 SAN FRANCISCO REPORT DATED FEB. 24, 2010 (SEE DOCUMENT TOYSUA4211)

"This has affected me so much, I can't even explain it. It's just overwhelming," said Patrick Luong. He said it all began one afternoon in July, as Luong drove down Interstate 680 toward home in the 2008 Toyota Tundra he'd purchased new, earlier that year. Suddenly, he said, the car took off.  
"It accelerated from 100 mph back down to 50, 60, 70, 100 on the freeway, it was just shifting gears by itself, like it was possessed," he said.  
And in the passenger seat sat Luong's 15-year-old nephew.

"He's like 'uncle, uncle!' I am swerving and cars are swerving and I am trying not to hit them. What was going on in my mind was, you know, 'we're going to die,'" he recalled.  
He managed to put the truck in neutral and steer it to the side of the freeway:  
"It was still accelerating up and down but it wasn't moving the tires were spinning and I told my nephew 'jump! jump for your life,'" he recalled.  
Both men jumped out, uninjured. But when he took the car to this Toyota dealership, "They looked at me like I was an idiot, like I just went and made this up."  
The dealership found 'no engine or transmission malfunction codes and told him the problem was the floor mat. So he drove the truck home. But three weeks ago he said it happened again.

He said the truck sped up to 60 miles an hour in a residential neighborhood.  
"I put it in neutral, slammed on the brakes so hard to avoid hitting the truck," he said. The truck, with Luong inside, wound up in the ditch.  
Back at the dealership once again, he said a technician dismissed his fears again.

**Vehicle:** 2006 TOYOTA AVALON  
**Location of Incident:** REDLANDS, CA

**NHTSA Summary:**  
THIS IS JUST TO PASS ALONG TO YOU THAT I TOO HAVE EXPERIENCED THAT ODD SENSATION OF MOMENTARY ACCELERATION WHILE DRIVING, BUT WHILE LETTING OFF THE ACCEL PEDAL. ON THE HANDFUL OF OCCASSIONS WHEN IT HAS TAKEN PLACE, I BELIEVE I WAS ALWAYS DRIVING IN HEAVY STOP-AND-GO FREEWAY TRAFFIC. ALMOST FROM THE FIRST DAY I LEASED THE CAR, I HAVE COMPLAINED TO FRIENDS THAT I THOUGHT MY ELECTONICALLY-CONTROLLED TRANSMISSION WAS "TOO SMART"-THAT IT THOUGHT IT KNEW BETTER HOW TO DRIVE THE CAR THAN I DID. I HAVE A FEATHER TOUCH IN MY DRIVING STYLE, AND I HAVE NOT LIKED HOW THE TRANSMISSION IS CONSTANTLY TRYING TO FIGURE OUT IF IT WANTS TO BE SHIFTING UP OR DOWN IN HEAVY TRAFFIC. NOW, WITH THE RECENT MEDIA COVERAGE, I AM WONDERING IF THE ISSUE IS BROADER AND COULD BE PART OF THE UNINTENDED ACCELERATION ISSUE?  
**Additional Summary:**

**Vehicle:** 2007 TOYOTA TACOMA  
**Location of Incident:** MONTGOMERY, AL

**NHTSA Summary:**

I WAS PASSING ANOTHER VEHICLE IN MY 2007 TOYOTA TACOMA. THE ACCELERATOR STUCK WHILE PASSING. I TAPPED IT TWICE TRYING TO RELEASE IT AND APPLIED THE BRAKES. THE ACCELERATOR PEDAL WOULD NOT RELEASE AND THE VEHICLE CONTINUED TO ACCELERATE. I QUICKLY TURNED OFF THE IGNITION AND COASTED TO A STOP. THE PEDAL WAS STILL LAYING ON THE FLOOR WHEN I STOPPED SO I OPENED THE ENGINE HOOD AND LOOKED TO SEE IF I COULD SEE THE CABLE LINKAGE AND SEE WHAT WAS CAUSING THE PROBLEM. I THEN WENT BACK TO THE CAB TO SEE IF THE FLOOR MAT WAS CAUSING THE PROBLEM (IT WAS NOT). AS I CAME TO THE CAB DOOR I HEARD A POP AS THE ACCELERATOR PEDAL SNAPPED BACK UP (ABOUT TWO MINUTES AFTER COASTING TO A STOP). I THEN STARTED THE VEHICLE AND IT DROVE NORMALLY. I TOOK THE VEHICLE TO THE DEALER TO HAVE IT CHECKED OUT. THEY SAID THEY COULD FIND NO ERROR CODES AND THAT THEY COULD NOT FIND ANYTHING WRONG WITH THE ACCELERATOR. \*TR

**NHTSA Summary:**

I WAS "TI-BONED" ON MY DRIVERS' SIDE ON JULY 3, 2009 IN MY 2007 PRIUS. THE CAR HAD EXTENSIVE DAMAGE AND THE ELECTRIC MOTOR WAS DISMANTLED AND REPLACED (SAME ONE) AS PART OF THE REPAIR. AT THE TIME OF THE ACCIDENT IT WAS FINE AND I AVERAGED ABOUT 48-52 MPG. IT WAS IN THE TOYOTA REPAIR SHOP FROM JULY 7TH THROUGH LATE AUGUST AND WASN'T RETURNED UNTIL MID-SEPTEMBER. I HAVE NOT BEEN DRIVING IT SINCE I LAST PICKED IT UP BECAUSE I DID NOT FEEL SAFE IT. THE PROBLEM WAS NEVER FOUND AND I WAS TOLD "...IF WE CAN'T FIND THE PROBLEM, WE CAN'T FIX IT...IF IT HAPPENS AGAIN, BRING IT BACK, IT'S UNDER WARRANTY." YESTERDAY (NOVEMBER 4, 2009) I HAD TO DRIVE IT TO WORK (DOWNTOWN) BECAUSE MY HUSBAND HAD OUR VAN AND I FOUND THAT IT IS STILL ACCELERATING IN ODD WAYS LIKE IT DID WHEN WE GOT IT BACK IN SEPTEMBER. WHILE IN STOP AND GO

**C-1409****Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TRAFFIC AT A LOW SPEED WHEN I WENT TO ACCELERATE TO A HIGHER SPEED (APPX. 50 MPH) IT WASN'T ACCELERATING PROPERLY, THEN SUDDENLY "KICKED INTO" ACCELERATION THEN I HAD TO SLOW IT DOWN WITH THE BRAKES. THE TOYOTA HYBRID ENGINE DISMANTLING MANUAL (I FOUND ONLINE WHEN I WAS TOLD TOYOTA COULD NOT FIND THE PROBLEM) ON PAGE 1 #1-5 SHOWS HOW THE VEHICLE SHOULD BE OPERATING. AS I'VE DESCRIBED SINCE AUGUST, THE DAY I FIRST PICKED IT UP, THIS IS NOT HOW IT'S FUNCTIONING. IN LIGHT OF THE NEWS YESTERDAY, THE NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION FOUND NO DEFECT EXISTS IN VEHICLES WITH PROPERLY INSTALLED FLOOR MATS. AND IN FACT, THE NHTSA SAID, TOYOTA VEHICLES HAVE A VERY SERIOUS DEFECT. I WOULD LIKE TO KNOW WHAT TOYOTA CAN DO NOW TO GET MY PRIUS WORKING PROPERLY (OR CONSIDER IT TOTALED) BEFORE I (OR MY FAMILY) ARE IN A HORRIBLE ACCIDENT LIKE THE 16 PEOPLE WHO HAVE ALREADY DIED OR THE 200+ WHO HAVE HAD SERIOUS ACCIDENTS AS A RESULT OF THIS ISSUE! BY THE WAY, THERE ARE NO CAR MATS IN IT, BUT THERE WERE BEFORE THE ACCIDENT AND THIS ISSUE NEVER OCCURRED BEFORE TOYOTA'S "REPAIRS" TO IT! \*TR

**Date of Incident:** 20090704  
**Vehicle:** 2008 LEXUS IS350  
**Location of Incident:** OAKLAND, CA

**NHTSA Summary:**

I AM DRIVING A CAR WHICH HAS ACCELERATED UNINTENTIONALLY THREE TIMES. I WANT LEXUS TO BE RESPONSIBLE AND FIND OUT WHY MY CAR ACCELERATES RANDOMLY AND I WANT THEM TO FIX MY CAR. I ALSO WANT LEXUS TO ADMIT TO THIS SAFETY FLAW. I WISH THAT LEXUS WOULD BE PUNISHED FOR THIS SERIOUS BREACH IN CONCERN FOR PUBLIC SAFETY ALTHOUGH THAT IS NOT MY IMMEDIATE CONCERN. IN JULY OF 2009 THE CAR ACCELERATED WHEN THE BRAKES WERE APPLIED. THE CAR COULD NOT BE STOPPED BY APPLYING THE BRAKES ALONE AND ONLY STOPPED WHEN IT WAS PUT IN NEUTRAL AND HIT THE CAR IN FRONT OF US. LEXUS ATTRIBUTED THIS TO THE DRIVERS' δBIG FOOTδ. IN DECEMBER OF 2009 WHILE LEAVING A PARKING LOT, THE CAR LEAPT ACROSS A SIDEWALK WHILE THE BRAKE WAS DEPRESSED, AND DID NOT STOP UNTIL IT WAS PUT IN NEUTRAL. LEXUS ATTRIBUTED THIS INCIDENT TO A MOVING FLOOR MAT. IN APRIL OF 2010, ONE WEEK AFTER LEXUS INSTALLED A δBRAKE OVERRIDE OF ACCELERATORδ, THE CAR ENGINE ACCELERATED INTO RED RPM'S. THE OVERRIDE TOOK PLACE BUT CAR STRAINED AGAINST THE BRAKE AND ONLY STOPPED WHEN IT WAS PUT IN NEUTRAL. LEXUS SAID THE CAR DOESN'T δREGISTER THIS OCCURRENCE SO TO LEXUS, APPARENTLY NOTHING HAPPENED. WHEN THE CAR ACCELERATED IN APRIL AFTER LEXUS HAD INSTALLED THE COMPUTER PROGRAM TO CREATE A BRAKE OVERRIDE OF THE ACCELERATOR, A δFIELD TECHNICIAN CHECKED OUT THE CAR THOROUGHLY δ. I ASSUMED THAT THE COMPUTER FIX WOULD ALSO RECORD BRAKE/ACCELERATOR ACTION, BUT THAT WAS OBVIOUSLY NOT BUILT INTO THE MODIFICATION. THE FIELD TECHNICIAN SAID THAT ALL SYSTEMS IN THE CAR WERE FUNCTIONING AND THAT HE DROVE IT FOR 16 MILES AND THERE WERE NO PROBLEMS. THIS ACCELERATION HAS HAPPENED THREE TIMES IN TWO YEARS AND THE CAR HAS 25,000 MILES ON IT. IT IS INCONCEIVABLE TO ME THAT GIVEN THE SERIOUSNESS OF THE PROBLEM, A 16 MILE TEST DRIVE COULD BE CONSIDERED ADEQUATE.

**NHTSA Summary:**

UNASSISTED AND UNSAFE ACCELERATION ON FOUR OCCASIONS WITH MY 1995 TOYOTA CAMRY AND A COMPLETE ENGINE STALL-OUT WHILE DOING 15 MPH WITH MY 2009 TOYOTA CAMRY.

**Additional Summary:**

please be advised that my wife and I experienced the "acceleration problem" with our 1995 Camry on four occasions, the car was towed twice and toyota was never able to find the problem. we then traded up to a 2009 Camry LE with only 7000 miles. After three months, while driving at 15 MPH, the engine stalled out and again, the car was towed to Toyota and they found no cause for the problem. Had this incident occurred on a high speed roadway, my wife and I could very easily have become carnage. We then realized that no Toyotas were safe and bought a different brand after losing \$8000 on the 2009 Camry after only 5 months and 4000 miles. I feel compelled to let the public know that Toyota has been lying for a long time and that the acceleration problem is indeed ELECTRICAL and not mechanical and the problem stems from at least 1995.

**Toyota ID Number:**

**Toyota ID Number:** 200707121237  
**NHTSA ODI Number:** 10290289  
**Date of Incident:** 20090709  
**Vehicle:** 2007 TOYOTA YARIS  
**Location of Incident:** TUSTIN, CA  
**NHTSA Summary:**

TL\* THE CONTACT OWNS A 2007 TOYOTA YARIS. WHILE DRIVING BETWEEN 65-70 MPH SHE APPLIED PRESSURE TO THE BRAKES BUT THE VEHICLE WOULD NOT STOP. HE WAS ABLE TO DECELERATE BY SHIFTING THE VEHICLE INTO THE NEUTRAL GEAR. 2 WEEKS LATER THE VEHICLE ACCELERATED WITHOUT WARNING ONTO THE HIGHWAY. THE DEALER COULD NOT PROVIDE A REMEDY BECAUSE THE FAILURE COULD NOT BE DUPLICATED. THE CURRENT MILEAGE WAS 18,150 AND THE FAILURE MILEAGE WAS 5500.

I bought a 2007 Toyota Yaris with power package at Tustin Toyota in Tustin, CA, onj Aug. 17, 2006. I had an incident around July 12, 2007, that I reported to Toyota that day, Case #200707121237. I like to use my cruise control and in my previous Toyota Celica, I used it to accelerate while on I-5 heading south from Orange County towards San Diego. The car began to accelerate and my attempts to slow it down did not work until I downshifted to Neutral. Since the dealer could not duplicate the incident, they ignored it, and the Yaris is not on the recall list. I have also reported this to NHSTA, but they tell me unless they get several complaints, nothing can be done. I am afraid to drive my car long distances because of this issue, and only have 19,200 miles on the car.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10303068  
**Date of Incident:** 20090709  
**Vehicle:** 2004 TOYOTA CAMRY  
**Location of Incident:** ROYERSFORD, PA  
**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2004 TOYOTA CAMRY. WHILE DRIVING 10 MPH INTO A PARKING SPACE, THE VEHICLE ACCELERATED AND CRASHED INTO A POLE. THERE WAS MINOR DAMAGE TO THE FRONT OF THE VEHICLE. THE CONTACT WAS NOT INJURED. THE CONTACT DID NOT CALL THE MANUFACTURER OR A DEALER. THE CONTACT STATED THAT THE CRASH OCCURRED DUE TO THE ACCELERATOR PEDAL BEING STUCK. THE FAILURE MILEAGE WAS 55,000.

**Date of Incident:** 20090709  
**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** WORCESTER, MA  
**NHTSA Summary:**

ON SEVERAL OCCASIONS WHILE DRIVING MY WIFE'S 2007 TOYOTA RAV4, THE MOTOR REVVED MOMENTARILY WHILE I WAS BRAKING. THE LAST INSTANCE WAS IN THE SUMMER OF 09 WHILE DRIVING THROUGH A CAMPGROUND AT APPROXIMATELY 5 MPH. A PERSON CROSSED THE ROAD IN FRONT OF ME AND I APPLIED THE BRAKE TO LET HIM PASS. WHILE DRIVING THROUGH THE CAMPGROUND, THE MOTOR REVVED (I AM ESTIMATING IT REVVED FROM IDLE TO ABOUT 17-1800 RPM) AND THE VEHICLE LURCHED FORWARD, STARTLING THE PEDESTRIAN CROSSING IN FRONT OF ME. FORTUNATELY MY FOOT WAS ON THE BRAKE AND I JUST APPLIED THE BRAKE HARDER AND NO ONE WAS HURT. ON SEVERAL OTHER OCCASIONS PREVIOUS TO THESE INCIDENTS, I EXPERIENCED SIMILAR PROBLEMS, AND I HAD PREVIOUSLY DISMISSED THEM THINKING THAT PERHAPS I COULD HAVE STEPPED ON THE BRAKE AND GAS AT THE SAME TIME. I KNOW THIS NOT TO BE THE CASE IN THIS LATEST INSTANCE BECAUSE MY WIFE AND I WERE RETURNING FROM THE BEACH AND I WAS BAREFOOT, SO I KNOW DID NOT STEP ON BOTH THE GAS AND BRAKE SIMULTANEOUSLY. THE GAS PEDAL ALSO DID NOT STICK. I WAS IDLING THROUGH THE CAMPGROUND AT THE TIME WITHOUT MY FOOT ON THE GAS AT ALL. \*TR

**Date of Incident:** 20090711  
**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** ALIQUIPPA, PA

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2004 TOYOTA SIENNA. WHILE THE CONTACT WAS DRIVING 70 MPH USING THE CRUISE CONTROL THE VEHICLE SUDDENLY ACCELERATED WITHOUT WARNING. THE CONTACT HAD TO APPLY EXTREME PRESSURE TO THE BRAKES AND ENGAGE THE EMERGENCY BRAKE TO STOP THE VEHICLE. THE CONTACT NOTICED PRIOR THE FAILURE THAT THE VEHICLE WOULD SURGE WITHOUT WARNING WHENEVER TRAVELING UP AN INCLINE USING THE CRUISE CONTROL. THE VEHICLE HAS NOT BEEN DIAGNOSED BY THE DEALERSHIP. THE CURRENT AND FAILURE MILEAGES WERE 73099.

**Date of Incident:** 20090712  
**Vehicle:** 2008 TOYOTA PRIUS  
**Location of Incident:** NEW BERN, NC

**NHTSA Summary:**

I OWN A 2008 TOYOTA PRIUS. ON 12JUL2008 I WAS RETURNING HOME AND DRIVING ON HWY 70 EAST NEAR GOLDSBORO, NC. I WAS TRAVELING AT A SPEED OF APPROX 55-60 MPH. THE VEHICLE WAS IN CRUISE CONTROL. THE TRAFFIC WAS GETTING HEAVY AND I HAD TO SLOW DOWN, SO I PUT ON THE BRAKES AND THE CRUISE CONTROL DID NOT RESPOND OR DISENGAGE AT THAT TIME. SO I KEPT APPLYING PRESSURE ON THE BRAKE PEDAL AND PULLED OFF OF THE ROADWAY. WHEN I LIFTED MY FOOT OFF OF THE BRAKE PEDAL THE VEHICLE AGAIN WANTED TO ACCELERATE. I HAD TO TURN THE IGNITION SYSTEM OFF AND WAIT A SHORT TIME. I RE-STARTED THE VEHICLE AND EVERY SEEM TO BE OK. ON 13JUL09 I HAD THE VEHICLE CHECKED OUT BY A TOYOTA OF NEW BERN, AND THEY COULDN'T FIND ANYTHING WRONG WITH THE VEHICLE. THEY STATED THEY WOULD OPEN A CASE ON IT AND NOTIFY THERE COMPANY. I JUST WANTED TO WRITE THIS NOTICE IN CASE IT HAPPENS AGAIN TO ME OR SOMEONE ELSE. \*TR

**NHTSA Summary:**

I OWN A 2005 TOYOATA CAMRY SE, I WAS DRIVING ON THE HIGHWAY AT 70 MPH, FROM CHICAGO TO JOPLIN MO, AS I CAME TO THE RAMP TO EXIT THE HIGHWAY, I PUT MY FOOT ON THE BRAKE PEDAL AND STARTED TO BRAKE, THE CAR ACCELERATED AND WOULDNT

C-1419

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BRAKE. I HAD TO HIT THE BRAKE PEDAL SEVERAL TIMES BEFORE THE CAR FINALLY STOPPED ACCELERATING. IT WAS A VERY SHORT WINDING RAMP AND I NEEDED TO SLOW DOWN QUICKLY. MY FAMILY ASSUMED IT WAS ME. IT HAPPENED LAST SUMMER AND IT WAS RAINING AT THE TIME. I WAS ABLE TO AVOID AN ACCIDENT BUT I KNOW IT WASNT ME, AND MY CAR IS NOT ON THE RECALL LIST FOR A REPAIR- THAT SCARES ME. THAT WAS THE ONLY INCIDENT WITH MY VEHICLE.

**Date of Incident:** 20090712  
**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** LOS ANGELES, CA

**NHTSA Summary:**

I OWN A 2006 TOYOTA TACOMA PRERUNNER DOUBLE CAB 4X2 V6. I BOUGHT THE TRUCK NEW FROM THE DEALERSHIP AND HAVE EXPERIENCED FOUR INSTANCES WHERE AFTER PRESSING THE GAS PEDAL HARD, THUS INTO OVERDRIVE, THE TRUCK EITHER KEPT SPEEDING UP OR DID NOT REV BACK DOWN. 1ST INSTANCE - ABOUT 6 MONTHS AFTER BUYING THE VEHICLE, I WAS ENTERING THE FREEWAY AND NEEDED TO SPEED UP TO ENTER INTO TRAFFIC AT SPEED. I PRESSED THE GAS PEDAL HARD ENOUGH TO BOOST SPEED. AS I ENTERED TRAFFIC, THE TRUCK JUST KEPT SPEEDING UP. AFTER APPLYING A LIGHT BRAKE, I PUMPED THE GAS PEDAL SEVERAL TIMES AND IT THE TRANSMISSION FINALLY ENGAGED AND GEARED BACK DOWN. 2ND INSTANCE - WHILE LEAVING THE FREEWAY @ 65 MPH I SLOWED TO 45 MPH AND SWITCHED LANES TO THE LEFT. THEN I APPLIED GAS TO SPEED UP TO MERGE AND THE TRUCK DID NOT SLOW DOWN. AGAIN THE LINK BETWEEN THE THROTTLE AND THE TRANSMISSION DID NOT SEEM TO REACTION AS IN A NORMAL SITUATION. I HAD TO MERGE BACK BECAUSE THE WOULD NOT SLOW DOWN FAST ENOUGH. AFTER 4-5 SECONDS THE TRUCK SLOWED DOWN. 3RD INSTANCE - AGAIN ENTERING THE FREEWAY. I APPLIED PRESSURE TO THE GAS PEDAL TO SPEED UP ENOUGH TO ENTER THE TRAFFIC. THIS TIME THE THROTTLE OPENED FULL BORE. I PUT THE TRUCK IN NEUTRAL, LIGHTLY APPLIED THE BRAKE, AND PUMPED THE GAS PEDAL. AFTER 5 SECONDS THE TRUCK FINALLY REVVED BACK DOWN. I REACHED A SPEED OF OVER 90 MPH IN THIS INSTANCE. 4TH INSTANCE - DRIVING UPHILL THE CAR AUTOMATICALLY INCREASED THROTTLE WITH A SMALL AMOUNT OF ADDITIONAL PRESSURE TO THE PEDAL. THE TRUCK SURGED FORWARD, AGAIN FULL BORE. I USED THE SAME TECHNIQUE AND IT EVENTUALLY SLOWED. THIS PROBLEM IS DEFINITELY NOT A FLOOR MAT PROBLEM. I NOW DRIVE MY TRUCK VERY GINGERLY SO AS NOT TO REPLICATE THE ISSUE. I HAVE TAKEN THE TRUCK TO TWO DEALERSHIPS, BOTH HAVE NOT BEEN HELPFUL OR HAVE RECOGNIZED THE PROBLEM. SAYING THAT "YOUR TRUCK IS NOT ON THE RECALL LIST WE SEE HERE, CALL THIS TOYOTA NUMBER." I KNOW THAT OTHERS WITH THE SAME MODEL HAVE THIS PROBLEM.

**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** GERMANTOWN, TN

**NHTSA Summary:**

I HAD STOPPED FOR GAS MIDPOINT IN A 10 HOUR DRIVE. AFTER COMPLETING MY STOP, I ACCESSED INTERSTATE 40 E FROM THE ENTRANCE RAMP AT WHICH POINT THERE WAS A SUDDEN INDEPENDENT INCREASE SURGE IN SPEED BY THE CAR AND NOT ME. I WOULD LIKEN IT TO THE SURGE ONE EXPERIENCES WHEN THE CAR IS ON AUTO CONTROL AND IT IS ADJUSTING TO GO UP A STEEP INCLINE. I REMEMBER FEELING LIKE THE CAR WAS POSSESSED-IT HAD A MIND OF ITS OWN. I DID HAVE THE CLEAR ALL WEATHER MATS IN MY CAR WHICH WAS PURCHASED THROUGH LEXUS. SINCE I WAS ON THE INTERSTATE AND THERE WASN'T A LOT OF TRAFFIC I DIDN'T FEEL PANICKY. I TRIED TAPPING ON THE BRAKE A COUPLE OF TIMES AND THIS DIDN'T SLOW ME DOWN. I REMEMBER LOOKING AT MY CONSOLE TRYING TO SEE WHAT GEAR I WAS IN WHICH WAS INDEED DRIVE AND THEN ATTEMPTING TO LOOK AT THE ACCELERATOR. BECUASE I'M SHORT, AND MY SEAT IS PRETTY FAR FORWARD IN ORDER FOR MY FEET TO REACH THE ACCELERATOR I DIDN'T HAVE A CLEAR VIEW OF IT. AS QUICKLY AS IT STARTED IT STOPPED WITHOUT ANY HELP FROM ME. I PULLED OVER TO TAKE A LOOK AT THE FLOOR MAT TO SEE IF IT HAD SLID AND IT HAD NOT. THE ALL WEATHER MAT HAS BEEN REMOVED AND LEXUS HAS SHORTENED THE ACCELERATOR PEDAL AS WELL AS INSTALLED THE NEW OVERRIDE SOFTWARE ON MY CAR. I HAVE NOT HAD ANY FURTHER INCIDENTS OF UNEXPLAINABLE ACCELERATION SINCE THAT ONE INCIDENT.

**NHTSA Summary:**

2009 TOYOTA TACOMA 4X4 CREW PICKUP TRUCK WITH AUTO TRANSMISSION AND V6 ENGINE ACCELERATED UNEXPECTEDLY TO OVER 80 MPH, THEN LATER ON THE SAME TRIP IT HAPPENED AGAIN. I WAS ON A LONG STRAIGHT STRETCH OF INTERSTATE THE SECOND TIME SO I ALLOWED THE TRUCK TO ACCELERATE TO APPROXIMATELY 95 MPH AT WHICH TIME I STOPPED THE TRUCK AGAIN. THE FIRST TIME IT HAPPENED, I HAD DISENGAGED THE CRUISE CONTROL. DUE TO A SLOWER CAR IN FRONT OF ME AND WHEN I ENGAGED THE CRUISE CONTROL, RESUME FEATURE, THE TRUCK ACCELERATED 15 MPH PAST THE PRESET SPEED AT WHICH TIME I TURNED OFF THE CRUISE CONTROL AND REGAINED CONTROL OF THE TRUCK. THE SECOND TIME THAT IT HAPPENED THE TRUCK WAS AGAIN IN CRUISE CONTROL MODE AND WAS GOING UP A LONG HILL. WHEN THE CRUISE CONTROL SHIFTED THE TRANSMISSION DOWN AND ACCELERATED TO MAINTAIN SET SPEED THE TRUCK CONTINUED TO ACCELERATE PAST 95 MPH AND WAS ONLY STOPPED BY TURNING OFF THE CRUISE CONTROL AGAIN. I ALLOWED THE TRUCK TO GET TO THAT SPEED TO SEE IF IT WOULD DISCONTINUE ACCELERATING BUT CHICKENED OUT AT 95 MPH BECAUSE IT IS AFTER ALL A TRUCK. I TOOK THE TRUCK TO THE SELLING

**Date of Incident:** 20090715  
**Vehicle:** 2006 TOYOTA PRIUS  
**Location of Incident:** SUN VALLEY, CA

**NHTSA Summary:**

TOYOTA PRIUS 2006. I PRESSED ACCELERATOR ALL THE WAY DOWN TO ACCELERATE AND GOT STUCK THERE. I WAS ABLE TO STOP THE CAR WITH THE BRAKE. IT HAPPENS TWICE IN JULY 2009. ONCE I STOPPED THE CAR I CHECKED IF THE FLOOR MATS HAVE DONE SO. THE FLOOR MATS WERE NOT THE CAUSE. THE ACCELERATOR WAS STUCK ALL THE WAY DOWN EVEN WITH THE ENGINE OFF... AND ONLY AFTER A MINUTE OR TWO OF THE CAR STOPPED AND ENGINE OFF DID CAME THE ACCELERATOR BACK. I BROUGHT THE CAR TO THE DEALERS AND THEY TOLD ME THAT IT WAS THE MAT. I TOLD THEM THAT WAS NOT THE CASE. THE DEALER PUT SOME GREASE IN THE ACCELERATOR AND DID A FEW MORE THINGS (CLEANING AROUND AND THE FUEL INJECTION I THINK). SINCE THEN I HAVE AVOIDED PRESSING THE ACCELERATOR ALL THE WAY DOWN EVEN WHEN I NEED THE POWER TO ACCELERATE AT THE ENTRANCE OF HIGHWAYS AND HAS NOT HAPPENED AGAIN. BUT THERE IS DEFINITELY SOMETHING WRONG WITH EITHER THE MECHANICS OF THE ACCELERATOR OR THE ELECTRONICS THAT SOMEHOW GETS THE ACCELERATOR STUCK WHEN YOU PRESS ALL THE WAY DOWN. THIS SHOULD NOT HAPPEN AND NEEDS TO BE REPAIRED. \*TR

**Date of Incident:** 20090717  
**Vehicle:** 2008 TOYOTA AVALON  
**Location of Incident:** LAKE JACKSON, TX

**NHTSA Summary:**  
I WAS DRIVING MY 2008 TOYOTA AVALON IN TRAFFIC NORTH OF HOUSTON AND FLOORED IT TO GET ON AN EXIT RAMP IN FRONT OF ANOTHER CAR. WHEN I TOOK MY FOOT OFF THE ACCELERATOR, THE ENGINE CONTINUED TO RUN AT HIGH REVS AND I HAD TO PUSH HARD ON THE BRAKE TO KEEP THE CAR FROM CONTINUING TO ACCELERATE WHILE GOING UP A STEEP RAMP. AFTER ABOUT 3 SECONDS THE REVS DROPPED AND EVERYTHING CONTINUED AS NORMAL. THIS HAPPENED ON JULY 17, 2009. THEN, IN DECEMBER OF 2009 I WAS DRIVING ON A SIDE STREET WHEN A TRUCK RAN A STOP SIGN AND WAS GOING TO HIT ME. I FLOORED IT TO GET OUT OF THE WAY AND AGAIN THE CAR CONTINUED TO ACCELERATE AFTER I TOOK MY FOOT OFF THE GAS. I REMEMBERED HEARING A REPORT ABOUT THE POTENTIAL OF FLOOR MATS CAUSING THE PEDAL TO STICK SO I HIT THE BRAKES, PUT THE CAR IN NEUTRAL AND REACHED DOWN AND PULLED ON THE FLOOR MAT. THE OUT OF CONTROL ACCELERATION AGAIN LASTED ABOUT 3 TO 4 SECONDS. I DON'T KNOW IF THE FLOOR MAT WAS CAUSING IT TO STICK OR NOT. I HAD A RUBBER MAT ON TOP OF THE MAT THAT I BOUGHT WITH THE CAR THAT HOOKS INTO THE FLOOR BOARD. I DON'T THINK THAT MAT EVER INTERFERED WITH THE PEDAL. I LOOKED AT IT CLOSELY AND IT DOES NOT SEEM POSSIBLE. BUT I TOOK IT OUT ANYWAY. I HAVE A 2007 TOYOTA TUNDRRA CREW CAB AND THIS HAS NEVER HAPPENED TO IT BUT I HAVE NEVER FLOORED THAT TRUCK EITHER. THE CAR HAD ABOUT 20,000 MILES ON IT WHEN IT HAPPENED THE FIRST TIME AND ABOUT 24,000 THE SECOND TIME.

**NHTSA Summary:**  
PLEASE I NEED SOMEBODY TO HELP ME WITH MY CASE WITH TOYOTA. I HAD AN ACCIDENT BACK TO JULY IN MY TOYOTA COROLLA 2009. I HIT SOMEONE HOUSE WITH MY TOYOTA BECAUSE (ACCELERATOR AND PEDAL WERE STUCK AND I LOST THE CONTROL OF THE CAR. I DIDN'T KNOW WHAT WENT WRONG NOT ONLY IM A WOMAN AND I DON'T KNOW ANYTHING ABOUT "MECHANIC PEDAL" ETC. WHEN POLICE CAME I TRIED TO EXPLAIN TO THEM WHAT CAUSE THE ACCIDENT. THEY TOLD ME THAT IF I DON'T STOP LYING I CAN END UP TO JAIL. SO THE HOUSE OWNER SUED ME I WENT TO A LOT OF PROCEDURE OF LAWSUIT. I NEVER KNEW THAT COULD HAPPENED TO ME. THREE DAYS AFTER COURT, I RECEIVED THE RECALL LETTER FROM TOYOTA. I DROVE MY CAR TO TOYOTA I FOUND OUT MY CAR HAS 2 RECALLS ( ACCELARATOR AND PEDAL). PLEASE HELP ME. AT LEAST TOYOTA CAN PAY THE WOMAN THAT SUED ME AND MY MEDICAL EXPENSES.

**NHTSA Summary:**  
DURING A DRIVE ON US224 IN OHIO, MY HUSBAND WAS DRIVING MY 2005 TOYOTA ON CRUISE CONTROL. AFTER PASSING A VEHICLE, HE ATTEMPTED TO SLOW DOWN BY BRAKING BUT THE CAR WAS STILL TRYING TO ACCELERATE. IT TOOK FOUR ITERATIONS OF PUSHING ON THE BRAKE TO FINALLY MAKE THE CAR SLOW DOWN. WE WERE ABLE TO PULL OFF OF THE HIGHWAY AND STOP. DURING THE INCIDENT, WE COULD FEEL THE PULL OF ACCELERATION EVEN WHEN HE WAS DEPRESSING THE BRAKE. IF HE LET OFF OF THE BRAKE THE CAR WOULD BEGIN ACCELERATING AGAIN. WE DID HAVE AN AFTERMARKET FLOOR MAT ON THE DRIVER SIDE, HOWEVER IT IS A VERY HEAVY, THICK MAT THAT DOES NOT MOVE. WE ARE 100% CONVINCED THAT THE FLOOR MAT WAS NOT ON TOP OF THE ACCELERATOR PEDAL DURING THIS INCIDENT (AS PROVEN BY THE CAR FINALLY SLOWING DOWN AND STOPPING WITH OUT THE FLOOR MAT BEING ADJUSTED).

**Vehicle:** 2009 TOYOTA RAV4  
**Location of Incident:** AUBURN, NV

**NHTSA Summary:**  
I PURCHASED MY 2009 RAV4 ON JUNE 19, 2009. WITH ONLY A FEW HUNDRED MILES (LESS THAN 1000) ON THE VEHICLE, I TRAVELED TO ANNAPOLIS, MD ON JULY 20, 2009. AFTER DRIVING ON THE EXPRESSWAY FOR MOST OF THE AROUND 200 MILES, I EXITED AND UPN STOPPING FOR TRAFFIC, I EXPERIENCED THE ACCELERATOR STICKING (DID NOT COME BACK UP UPON DECELERATION). I LUCKILY WAS ABLE TO STOP THE CAR BEFORE A COLLISION, USING CONSIDERABLE FORCE ON THE BRAKES. THE ACCELERATOR DID RETURN TO A NORMAL POSITION AFTER 2-3 SECONDS. I NEVER DID EXPERIENCE THE PROBLEM AFTERWARDS AND I NOW HAVE AROUND 5400 MILES ON THE VEHICLE. I DID DISCUSS THE PROBLEM WITH THE DEALER MONTHS AFTER THIS INCIDENT AND THEY DID INSTALL THE RECALL DEVICE ON THE ACCELERATOR. I HAVE NOT NOTICED ANY PROBLEMS SINCE. I AM REPORTING THIS SINCE MY EXPERIENCE WITH THE ACCELERATOR SEEMS TO BE DIFFERENT FROM OTHERS. MY ACCELERATOR STUCK WHEN THE VEHICLE WAS NEARLY NEW AND HAD VERY LITTLE WEAR.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** EVANSTON, IL

**NHTSA Summary:**

MY 2007 LEXUS ES 350 ACCELERATED ON ITS OWN WHILE DRIVING ON AN IL HIGHWAY. EARLIER THAT DAY ONE OR TWO WARNING LIGHTS APPEARED AND I CALLED THE LEXUS SERVICE DEPT. A FEW QUESTIONS WERE ASKED BY THE RECEPTION OPERATOR AND I WAS TOLD THE CAR WAS SAFE TO DRIVE. ON MY RETURN HOME, THE ACCELERATION HAPPENED. MY BRAKES DID NOT SLOW THE CAR DOWN. I PUT THE CAR IN NEUTRAL WHILE PRESSING THE BRAKES AND WAS ABLE TO GET OUT OF THE TRAFFIC LANE ONTO THE SHOULDER. THE CAR FINALLY CAME TO A STOP AND I TURNED OFF THE ENGINE. CALLED AAA AND WAS TOWED TO THE NEAREST LEXUS DEALER. AT THE SERVICE DEPT I WAS TOLD IT WAS MY FLOOR MAT AND THE MAT WAS REPLACED. THIS DID NOT SEEM A LIKELY EXPLANATION BECAUSE THE GAS PEDAL HAD SIMPLY LOCKED AND ACCELERATED ON ITS OWN. MY BRAKES WERE CHECKED AND IT WAS DETERMINED I NEEDED NEW REAR BRAKES WHICH WAS NOT A SURPRISE SINCE IT SEEMED LIKE I WAS 'KILLING' THEM IN MY ATTEMPT TO CONTROL AND SLOW DOWN THE CAR. THE MATS WERE TO HAVE BEEN EXCHANGED EARLIER WHEN THE CAR WAS TAKEN IN FOR SERVICE APT BUT SOMEHOW THAT WAS NEGLECTED BY A DIFFERENT LEXUS DEALER. \*TR

**NHTSA Summary:**

CAR MOVING FORWARD AS I LET UP ON THE ACCELERATOR. IT ALSO JERKS WHEN I QUICKLY REMOVE MY FOOT FROM THE PEDAL FOR A FEW SECONDS AND BEFORE I PLACE MY FOOT ON THE BRAKE AND THE ALTIMETER GOES UP AND DOWN SEVERAL TIMES WHEN I DO THIS AS IF IT IS STALLING OUT. IT HAS DONE THIS EVERY TIME I DRIVE THE CAR AND I HAD IT TO THE DEALERSHIP TWICE BUT THEY COULDN'T FIND ANYTHING WRONG ACCORDING TO THE DIAGNOSTIC MACHINE SO I STILL HAVE THE PROBLEM. THIS DESCRIPTION IS CORRECTING MY DESCRIPTION I JUST FILED WITH YOU. AS SOON AS I STARTED DRIVING MY CAR UPON LEAVING THE DEALERSHIP AFTER PURCHASING THE CAR, I NOTICED IT MOVED FORWARD AS IF BEING BUMPED FROM BEHIND AS I LET UP ON THE ACCELERATOR. ALSO, IF I REMOVED MY FOOT QUICKLY FROM THE PEDAL AND WAITED A FEW SECONDS BEFORE PLACING MY FOOT ON THE BRAKE, THE CAR WOULD MAKE JERKY MOTIONS AND THE TACHOMETER (RPM) WOULD JUMP WILDLY. I DIDN'T KNOW IF THE PROBLEM WAS IN THE ACCELERATOR OR IN THE ELECTRICAL SYSTEM. I BROUGHT IT TO THE TWICE FOR THE PROBLEM BUT THEY COULDN'T FIND ANYTHING SHOWING UP ON THE DIAGNOSTIC COMPUTER CHECK THE FIRST TIME. THE SERVICE TECH DID HAVE TO RE-SET THE ORIGINAL SETTING ON SOMETHING AND HE TOLD ME TO BRING IT BACK IF THAT DIDN'T FIX IT. THE PROBLEM STILL EXISTED SO I BROUGHT IT BACK THE SECOND TIME AND THE TECH RODE WITH ME AND HE ALSO FELT WHAT I WAS EXPERIENCING. HE TRIED TO EXPLAIN IT AWAY BUT I COULDN'T BELIEVE THAT IT WAS THE CAR GETTING USED TO A NEW DRIVER AS HE SAID IT WAS BECAUSE IT IS STILL HAVING THE PROBLEM AND I HAVE DRIVEN THE CAR FOR 1,225.

**NHTSA Summary:**

TWO INCIDENTS: 7/9/09 HEADING DOWN TO THE KEYS ON US 27 ABOUT 6PM. CRUISE CONTROL SET AT 60 FOR SEVERAL MILES (HAD BEEN RAINING. SPEED LIMIT IS 65MPH). BACK END STARTS TO PASS ME ON RIGHT. I AM NOW SLIDING SOUTH BOUND FACING EAST. I CUT WHEELS TO RIGHT. THIS WORKS GREAT. IN NO TIME AT ALL, I AM SKIDDING SOUTHBOUND FACING WEST. I NOTICE I AM NOT SLOWING DOWN EVEN THOUGH MY FOOT WAS NOT ON GAS (CRUISE CONTROL). I CUT MY WHEELS TO THE LEFT AND SPUN BACK AROUND AGAIN SLIDING SOUTHBOUND FACING EAST. I WENT OFF ONTO THE SHOULDER. I COULD SEE MUD AND GRASS IN PASSENGER WINDOW UNTIL I HIT THE GUARDRAIL WITH R SIDE OF BUMPER. THIS IMPACT APPARENTLY DISENGAGED THE CRUISE CONTROL (?) AND LAUNCHED ME ACROSS BOTH SOUTH BOUND LANES OF US 27 WHERE I BEGAN TO COME TO A STOP. I STOMPED THE GAS TO GET OUT OF ON COMING TRAFFIC AND AGAIN SPUN TO THE RIGHT COMING TO REST IN THE MEDIAN AS 2 CARS PASSED ME. AT THE TIME, I THOUGHT IT STRANGE THAT THE CRUISE CONTROL DID NOT DISENGAGE WHEN THE WHEELS STARTED SPINNING ON THE WET ROAD. NONE THE LESS, I WROTE THIS OFF AS ME BEING A 11@#% FOR USING THE CRUISE CONTROL WHEN THE ROAD WAS TOO WET. NOW, IN LIGHT OF THE 7-22-09 ACCIDENT, I AM NOT SO SURE IT WAS THE CRUISE CONTROL, OR THAT I AM SUCH A 11@#%.

7/22/09 ABOUT 7:15AM AS I COMPLETED THE TURN, THE TRUCK (I NOW CALL MY TRUCK CHRISTINE) ACCELERATED. WHEN I REACHED THE DESIRED SPEED, I TOOK MY FOOT OFF GAS BUT CONTINUED TO SPEED UP. I TRIED APPLYING THE BRAKES, BUT THAT DIDN'T WORK OUT SO I STOMPED ON THE BRAKES CAUSING ME TO FISHTAIL TO THE RIGHT SO I LET UP ON THE BRAKES TO REGAIN CONTROL AND I WAS STILL ACCELERATING! AS I CONTINUED TO ACCELERATE, I HIT (PULLED THE KNOB TOWARD ME) THE CRUISE CONTROL (WHICH I HAD NOT ENGAGED PREVIOUSLY) THINKING I MIGHT BE HAVING A REPEAT OF 2 WEEKS AGO, BUT THAT DIDN'T WORK EITHER AND I CONTINUED TO ACCELERATE. I PUT GEAR SELECTOR INTO NEUTRAL (I THOUGHT) BUT CONTINUED TO ACCELERATE. I OVERTURNED IN A ... \*TR

**Date of Incident:** 20090722  
**Vehicle:** 2007 LEXUS RX400H  
**Location of Incident:** LAVEROCK, PA

**NHTSA Summary:**

MAY 2008 - PURCHASED 2007 LEXUS 400H SUV. CARE GREAT EXCEPT BRAKES. SOMETHING WAS ODD. JUNE 2008 - SENT THE CAR TO THE DEALERSHIP TO CHECK BRAKES. THEY INSISTED EVERYTHING WAS FINE. MY DISCOMFORT WAS DUE TO MY INEXPERIENCE WITH THE 6REGENERATIVE6 BRAKING SYSTEM. I TRIED TO GET USED TO IT. IT SEEMED TO GET WORSE OVER TIME. AT AROUND 10 MPH, THE BRAKING MOMENTUM CHANGES SUDDENLY. THE CAR FLOATS BRIEFLY THEN SURGES A LITTLE. IT WAS UNCLEAR IF IT HAPPENED ALL THE TIME, OR ONLY WITH GRADUAL BRAKING, OR ONLY WHEN STOPPING FROM A SLOW SPEED. JULY 22, 2009 - ACCIDENT: BRAKES SUDDENLY STOPPED WORKING AS I TURNED THE CAR INTO A PARKING SPACE BEHIND ANOTHER CAR. I PANICKED WHEN THE CAR DIDN'T STOP AT THE EXPECTED POINT. I SLAMMED ON THE BRAKES, MY FOOT SLIPPED AND I HIT THE ACCELERATOR. I HIT THE CAR IN FRONT OF ME SENDING IT TOWARD THREE OTHER CARS. THIS WOULD NOT HAVE HAPPENED IF THE BRAKES WORKED PROPERLY. AUGUST 2009 - REPORTED ACCIDENT TO THE DEALERSHIP. I WAS TOLD TO TALK WITH LEXUS HEADQUARTERS IN CALIFORNIA. THEY ARRANGED FOR A FIELD AGENT TO GO TO THE LOCAL DEALERSHIP. SEPTEMBER 30, 2009 - CAR AT THE DEALERSHIP FOR EVERYONE'S REVIEW. AFTERWARDS, TOLD BY PHONE THAT NO PROBLEMS WERE IDENTIFIED AND THE CAR WAS SAFE. I WASN'T COMFORTABLE WITH THAT DECISION. ON NOVEMBER 27, 2009, I TOOK THE CAR IN AGAIN, INSISTING THERE WAS A PROBLEM. I DROVE WITH THE SERVICE MANAGER. HE ADMITTED HE FELT THE FLOATING/SLIGHT SURGE. HE CLAIMED IT WAS THE MOMENT BETWEEN THE END OF THE "REGENERATIVE" BRAKING SYSTEM AND WHEN THE CONVENTIONAL BRAKING SYSTEM KICKED IN. NOT HAPPY WITH THE EXPLANATION. THE FLOATING/SURGE MEANS YOU'RE NOT QUITE SURE WHEN YOU WILL STOP. ON JANUARY 6, 2010, I RECEIVED A LETTER FROM LEXUS. THEIR FIELD TECHNICIAN INSPECTED MY CAR, FOUND NOTHING WRONG, AND THE ACCIDENT COULD NOT BE RELATED. I DO NOT AGREE. NOW I HEAR ABOUT LEXUS HYBRID BRAKES PROBLEMS AND I ASSUME IT'S WHAT LEVE COMPLAINED ABOUT ALL ALONG.

**NHTSA Summary:**  
 WHEN APPROACHING 4-WAY STOP, BRAKES FAILED AND CAR ACCELERATED. CHANGED LANES TO MISS 3 CARS IN FRONT. CAR CONTINUED TO ACCELERATE; BRAKES DID NOT WORK. WENT ON SIDEWALK TO MISS ANOTHER CAR. WENT OVER CROSS STREET & ONTO MEDIAN, HIT SIGNS AND SMALL TREES. CAR CONTINUED ACCELERATING, WENT OVER OTHER SIDE OF CROSS STREET. UP ON GRASS, HITTING SIGNS AND SMALL TREES, HIT BRICK WALL HOLDING SHELL STATION SIGN. CAR STOPPED. AIR BAGS DEPLOYED IN MEDIAN. CAR WAS TOTALED, EVEN SUN ROOF BROKEN, ALL TIRES FLAT. DRIVER & PASSENGERS EXPERIENCED CUTS AND SEVERE BRUISES. WITNESS SAID BRAKE LIGHTS WERE ON BUT CAR CONTINUED TO GAIN SPEED. ACCIDENT NOT CAUSED BY FLOOR MAT. MY CAR DID NOT HAVE THEM. THERE'S A PROBLEM WITH THE ELECTRONIC THROTTLE CONTROL ASSOCIATED WITH THE CRUISE CONTROL SYSTEM & COMPUTER THAT CONTROLS THE ENGINE SPEED IN THE LEXUS ES AND IS MODELS. HUNDREDS OF PEOPLE HAVE EXPERIENCED ACCIDENTS WITH THESE CARS. DISAPPOINTED THAT NHTSA SIDES WITH TOYOTA AND ACCEPTS ITS COVERUP THAT IT'S A FLOOR MAT PROBLEM! SOMEONE AT NHTSA NEEDS TO INVESTIGATE THIS SERIOUS PROBLEM BEFORE HUNDREDS OF OTHERS ARE KILLED OR INJURED. TOYOTA HAS KNOWN ABOUT THIS PROBLEM FOR AT LEAST THREE YEARS. MY CAR IS NOT INCLUDED IN THE FLOOR MAT RECALL YET IT WENT INTO THE SAME UNCONTROLLED ACCELERATION AS HUNDREDS OF OTHER LEXUS CARS HAVE IN THE PAST FEW YEARS. WHAT DO WE HAVE TO DO TO GET THE NHTSA TO DO ITS JOB? \*TR, TL\*THE CONTACT OWNS A 2006 LEXUS ES330, WHILE DRIVING ON A RESIDENTIAL STREET AT 35 MPH HE APPROACHED THE INTERSECTION, HE ATTEMPTED TO ENGAGE THE BRAKE PEDAL AND WAS UNABLE TO STOP THE VEHICLE. TO AVOID CRASHING INTO A VEHICLE HEAD ON, HE CRASHED INTO THE CENTER BARRIER AND A STOP SIGN AT THE GAS STATION. THE VEHICLE STOPPED MOVING WHEN IT CRASHED INTO THE GAS STATION BRICK SIGN. THE DRIVER AND PASSENGER AIR BAGS DEPLOYED AND A TIRE BLOW OUT ALSO OCCURRED. THERE WERE NO INJURIES. THE INSURANCE COMPANY WILL INVESTIGATE THE FAILURE. THE CURRENT AND THE FAILURE MILEAGES WERE 32,000.

**Date of Incident:** 20090724  
**Vehicle:** 2009 TOYOTA HIGHLANDER HV  
**Location of Incident:** NEW CANAAN, CT  
**NHTSA Summary:**  
 2009 TOYOTA HIGHLANDER HYBRID. WE HAVE SEVERAL SAFETY RELATED COMPLAINTS:  
 1. MY WIFE HAS NEVER HAD AN ACCIDENT & TO OUR RECOLLECTION HAS NEVER HAD A TRAFFIC TICKET. SHE HAD A MINOR UNINTENDED ACCELERATION AND SHE TAPPED THE TRUCK IN FRONT OF HER. SHE TOOK HER FOOT OFF THE BRAKE & THE CAR LURCHED FORWARD. THE DEALER SAID IT WAS NOT INVOLVED IN A RECALL, BUT THE TOYOTA WEBSITE SAYS IT IS INVOLVED IN A FLOOR MAT RECALL. IVE THROWN THE MATT IN THE REAR CARGO AREA. 2. OUR GARAGE IS ATTACHED TO OUR HOUSE WITH OUR BEDROOM ABOVE THE GARAGE. WITH 3 KIDS, BOTH MY WIFE AND I HAVE BEEN DISTRACTED LEAVING THE CAR IN THE GARAGE TO UNLOAD GROCERIES OR HELP THE CHILDREN. WHEN ON ELECTRIC POWER WE HAVE NEGLECTED TO TURN OFF THE IGNITION SINCE THE CAR IS SILENT. ONLY WHEN THE CARBON-MONOXIDE DETECTOR SOUNDED IN OUR GARAGE DID WE REALIZE THE ENGINE HAD STARTED WHILE WE WERE IN THE HOUSE. WE THINK THIS COULD BE DEADLY TO OTHER FAMILIES WITHOUT CARBON MONOXIDE ALARMS WHO MAY ALSO FORGET TO TURN OFF THE ENGINE WHEN PARKED IN AN ATTACHED GARAGE WHILE ON ELECTRIC POWER. 3. THE DRIVER'S SEAT-BELT HAS BROKEN AND YOU CAN ONLY FASTEN IT BY MAKING A SPECIAL EFFORT TO DEPRESS THE BUTTON AND HOLD IT WHILE INSERTING THE BUCKLE. NORMALLY YOU SIMPLY INSERT THE BUCKLE TO FASTEN. THE CAR HAS MANY OTHER "ISSUES" THAT ARE NOT SAFETY RELATED. UNFORTUNATELY, WE BELIEVE OUR INSURANCE COMPANY WILL SETTLE MY WIFE'S OTHERWISE UNEVENTFUL "TAPPING" OF A TRUCK FROM THE UNINTENDED ACCELERATION AND CHARGE THIS LIKELY BOGUS INJURY CLAIM BY THE TRUCK DRIVER AGAINST OUR POLICY.

**NHTSA Summary:**  
 ON JULY 25, 2009 I WAS DRIVING MY TOYOTA CAMRY (2004), I PULLED INTO THE PARKING LOT WHERE I WORK FOUND A SPOT AND PROCEEDED TO PARK AS I TURNED IN MY CAR TOOK OFF AND SLAMMED IN TO A CEMENT PILLAR AT A VERY HIGH SPEED, I AM SO THANKFUL THAT I HIT THE PILLAR, BECAUSE I WOULD HAVE GONE THROUGH THE PLATE GLASS WINDOW OF THE SHOE STORE. IT COULD HAVE BEEN A TRAGIC ACCIDENT. I BELIEVE THAT THIS HAPPENED DUE TO THE CAR ACCELERATING OUT OF CONTROL. I SENT A COMPLAINT TO CONSUMER AFFAIRS AND TOYOTA CORP. ON JULY 27TH, 2009 WITH NO RESPONSE, NOW ALL OF THIS IS COMING OUT. MY CAR WAS REPAIRED, AT A COST OF \$6439.57. MY INSURANCE HAS INCREASED BY ABOUT 40%, I NOW HAVE A CAR I DO NOT FEEL SAFE DRIVING, AND I CAN'T SELL IT, BECAUSE OF THE PROBLEMS WITH TOYOTA. I WOULD LIKE SOME HELP, ANSWERS TO WHAT TOYOTA REALLY IS DOING TO HELP? \*TR  
**Additional Summary:**  
 SUA - VEHICLE STRUCK CEMENT PILLAR. MS. O'NEAL DESCRIBED AN INCIDENT THAT OCCURRED WHEN SHE WAS PULLING INTO A PARKING PLACE AND THE VEHICLE SUDDENLY ACCERATED. THE CAR COLLIDED WITH A CONCRETE BARRIER CAUSING ABOUT \$5,000 WORTH OF DAMAGE TO THE VEHICLE. SHE SAID THERE HAVE BEEN SEVERAL OTHER OCCASIONS WHEN THE VEHICLE WOULD CONTINUE TO ACCELERATE AS SHE WAS PULLING INTO A PARKING LOT FROM THE ROADWAY. SHE SAID SHE WOULD APPLY THE BRAKES AND STOP THE ACCELERATION. SHE SAID SHE IS CERTAIN SHE IS NOT AT FAULT BECAUSE HER FOOT WAS COMPLETELY OFF THE ACCELERATOR. SHE ALSO SAID THAT A CO-WORKER WHO BORROWED HER VEHICLE REPORTED A SIMILAR INCIDENT. MS. O'NEAL SAID SHE IS STILL DRIVING THE VEHICLE AND IS UNABLE TO SELL IT BECAUSE IT WAS INVOLVED IN AN ACCIDENT AND SHE CANNOT GET A FAIR PRICE.

**Date of Incident:** 20090725  
**Vehicle:** 2005 TOYOTA 4RUNNER  
**Location of Incident:** WEST SIMSBURY, CT  
**NHTSA Summary:**  
 MY 2005 TOYOTA 4RUNNER HAD 6 UNINTENDED ACCELERATION INCIDENTS SINCE PURCHASED NEW IN NOV 2005. I HAVE MAINTAINED A LOG. THE INTENSITY OF UNINTENDED ACCELERATION VARIED, THE TACHOMETER REACHING 4000 AND ABOVE. DURATION WAS ESTIMATED FROM 3 SECONDS TO OVER 5 SECONDS. AMBIENT TEMPERATURE VARIED FROM ABOUT 73OF TO 34OF. ALL INCIDENTS OCCURRED BETWEEN EARLY JULY TO EARLY DECEMBER, AND NONE DURING VERY HIGH OR VERY LOW AMBIENT TEMPERATURES. IN ONE CASE THERE WERE SEVERAL CONSECUTIVE ACCELERATION SURGES. ALL INSTANCES WERE WITHIN 5 1/2 MILES OF MY HOME. OCCURRENCE HAS BEEN SPORADIC, INFREQUENT, AND UNEXPECTED, AND AT LOW SPEED, MOSTLY IN CLOSE QUARTER PARKING SITUATIONS AND AT ALL TIMES WITH MY RIGHT FOOT ON THE BRAKE PEDAL. ON SEP 11, 2008, I NOTIFIED TOYOTA COMPANY BY TELEPHONE OF THE INCIDENT HISTORY; I WAS GIVEN A CASE NUMBER. I COMPLIED WITH A DIRECTIVE TO REMOVE AFTERMARKET FLOOR MATS THAT COVERED THE

C-1439

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

FACTORY MATS. FYI, THE AFTERMARKET NON-FACTORY FLOOR MATS WERE NOT INTERFERING WITH OR NEAR THE ACCELERATOR, AND I HAVE HAD FURTHER UNINTENDED ACCELERATION SUBSEQUENT TO MAT REMOVAL. LIKEWISE, MY FOOT WAS NOT SIMULTANEOUSLY ON THE BRAKE AND ACCELERATOR PEDALS. IN DEC 2009 THE TOYOTA DEALER SERVICE MANAGER DROVE MY VEHICLE 144 MILES OVER A WEEK'S PERIOD WITHOUT INCIDENT. I BELIEVE THAT EVIDENCE DOES NOT POINT TOWARDS A STICKING ACCELERATOR PEDAL BECAUSE IN ALL INSTANCES MY FOOT WAS ON THE BRAKE, AND IN AT LEAST ONE INSTANCE THE ENGINE ACCELERATION SURGED MULTIPLE TIMES. THE DEALER SAID THAT THEIR COMPUTER DID NOT SHOW RELEVANT CODES. MY ASSESSMENT IS THAT THERE IS PROBABLY A MECHANICAL, ELECTRONIC, OR SOFTWARE DEFECT IN THE SPEED CONTROL SYSTEM. THIS NEEDS BE TAKEN MORE SERIOUSLY. THERE IS NO PLAN, I HAVE SUGGESTIONS: 1) TOYOTA DEALER/COMPANY DRIVE MY VEHICLE UNTIL AN INCIDENT OCCURS; 2) TOYOTA CO. ENGINEERS TROUBLE SHOOT THE PROBLEM, THIS IS BEYOND DEALER EXPERTISE; 3) TOYOTA CO. TEMPORARILY INSTALL MONITORING EQUIPMENT THAT CAN DOCUMENT FUTURE INCIDENTS.

**Vehicle:** 2004 TOYOTA CAMRY  
**Location of Incident:** CAPE CORAL, FL

**NHTSA Summary:**  
ACCELERATION ON MY 2004 TOYOTA CAMRY BEGAN TO FLUCTUATE WILDLY WHILE I WAS DRIVING DOWN THE ROAD. CAR WOULD SUDDENLY ACCELERATE, THEN DECELERATE ALMOST NON-STOP. I SHUT ENGINE OFF, CALLED TOYOTA AND HAD THE CAR TOWED IN. I WAS TOLD THAT THE ENGINE CONTROL MODULE (ECM) WAS DEFECTIVE AND WOULD BE REPLACED UNDER A FEDERALLY MANDATED WARRANTY - CAR HAD 76,000 MILES, AND WARRANTY WAS GOOD TO 80,000 MILES. HOWEVER THEY ALSO TOLD ME THAT THE ACCELERATOR PEDAL ASSEMBLY HAD SIMULTANEOUSLY FAILED. THAT WOULD COST ME \$681. TOYOTA'S OWN TECHNICIAN SAID THAT THE ECM FAILURE CAUSED THE ACCELERATOR PEDAL ASSEMBLY TO FAIL. TOYOTA CORPORATE, HOWEVER, TOLD ME THAT THE TWO INCIDENTS WERE UNRELATED. AFTER READING ABOUT THE "ACCELERATOR PEDAL STICKING" PROBLEM IN THE NEWS LATELY, I WONDER IF MY PROBLEM IS NOT PART OF A MUCH LARGER PROBLEM INVOLVING THE ECM ON TOYOTAS CARS. IF I WAS NOT WISE ENOUGH TO SHUT OFF MY ENGINE WHEN THE PROBLEM OCCURRED, A SERIOUS ACCIDENT COULD EASILY HAVE OCCURRED. PLEASE CONTINUE TO INVESTIGATE THE ECM PROBLEM, AS I BELIEVE THAT TOYOTA IS NOT FORTHCOMING WITH THE FULL STORY HERE. \*TR

**Date of Incident:** 20090728  
**Vehicle:** 2008 TOYOTA TUNDRA  
**Location of Incident:** PLEASANT VALLEY, CT

**NHTSA Summary:**  
I HAVE HAD AN ACCELERATOR PROBLEM WITH MY 2008 TOYOTA TUNDRA. LAST SUMMER MY ACCELERATOR STUCK IN FULL THROTTLE POSITION AND ALMOST CAUSED AN ACCIDENT. I WAS ABLE TO PUT THE VEHICLE IN NEUTRAL, THE ENGINE OVER-REVVED, AND THE PEDAL FINALLY RETURNED TO THE NORMAL POSITION. WHEN I CONTACTED THE DEALER I WAS TOLD THAT IT MUST HAVE STUCK ON THE FLOORMAT, BUT THIS WAS NOT POSSIBLE. THE FLOORMAT WAS NO WHERE NEAR THE PEDAL. I COMPLAINED ABOUT THIS HAPPENING AND THE FACT THE PEDAL FELT LIKE IT HAD PULLED ITSELF DOWN MORE THAN WHAT I WAS PUSHING ON IT. I ALSO COMPLAINED OF THE PEDAL BEING HARD TO PUSH AT TAKE-OFF AND ALWAYS JOLTING FORWARD AT TAKE-OFF DUE TO THE PRESSURE NEEDED TO PUSH THE ACCELERATOR. THE DEALER AGAIN STATED IT HAD TO BE THE FLOORMAT AND ONLY DOCUMENTED THE PROBLEM OF THE PEDAL BEING HARD TO PUSH. WHEN THEY RETURNED THE VEHICLE THEY SAID THE PEDAL WAS FINE AND THAT IT WAS NORMAL TO HAVE TO PUSH HARD ON IT DUE TO THE FACT IT DID NOT OPERATE WITH A CABLE ANYMORE. I CONTACTED TOYOTA SEVERAL TIMES VIA EMAIL SINCE THE LATEST RECALL AND FINALLY RECEIVED A CALL TODAY FROM THEM. THE WOMAN WHO CALLED SAID TO TAKE IT TO THE DEALER TO BE REPAIRED. WHEN I ASKED HER IF THE INCIDENT WITH THE STUCK ACCELERATOR WOULD BE INVESTIGATED BY TOYOTA, SHE STATED THAT THERE ONLY ACTION WOULD BE THE RECALL FIX AND TO CONTACT THE DEALER. I FEEL TOYOTA OR AN INDEPENDENT AGENCY SHOULD CHECK THE VEHICLE BEFORE TOYOTA IS ALLOWED TO TOUCH IT, BECAUSE I DON'T FEEL THAT THERE SHIM WILL FIX THIS PROBLEM. I BELIEVE IT IS A PROBLEM OTHER THAN THE PEDAL JUST BEING STUCK. MY VEHICLE ONLY HAD APPROX. 8,000 MILES AT THE TIME. \*TR

**NHTSA ODI Number:** 10325528  
**Date of Incident:** 20090728  
**Vehicle:** 2010 LEXUS RX  
**Location of Incident:** PASADENA, CA

**NHTSA Summary:**  
I PURCHASED MY 2010 LEXUS RX 450H IN JULY OF 2009. EVER SINCE I BOUGHT IT, I HAVE NOTICED THAT FROM TIME TO TIME, WHEN I PRESS THE BRAKE PEDAL, THE CAR SEEMS TO SURGE FORWARD() MOMENTARILY BEFORE IT SLOWS DOWN. THIS HAPPENS MOST FREQUENTLY WHEN DRIVING OVER BUMPY ROADS. AND IT WILL HAPPEN EVEN IF I AM ONLY COASTING AND NOT TOUCHING THE GAS PEDAL. WHEN PRESSING THE BRAKE INITIALLY. IT HAPPENS TO ME AT LEAST ONCE OR TWICE A WEEK. IT IS SOMEWHAT DISTURBING. I HAVE MENTIONED THIS TO MY LEXUS DEALER, BUT THEY HAVE DISMISSED MY CONCERNS BOTH TIMES I BROUGHT IT UP. I NOTICED THIS EVEN BEFORE I HAD HEARD OF THE TOYOTA RECALL ON HYBRID PRIUS BRAKES, BUT FROM WHAT I READ, THE ISSUE SOUNDS SIMILAR TO THE PRIUS HYBRID 2010 PROBLEMS. BUT THERE IS SO FAR NO RECALL ON LEXUS 2010 HYBRID BRAKES. HAS ANYONE ELSE NOTICED THIS ISSUE?

**Location of Incident:** LAKE HAVASU CITY, AZ

**NHTSA Summary:**  
2009 TOYOTA CAMRY ACCELERATION PROBLEM HAPPENED AFTER RECALL FIXES. WAS PULLING INTO PARKING SPACE SLOWLY WHEN ACC. PEDAL DROPPED AND ENGINE ZOOMED. I WAS ABLE TO STOMP HARD ON BRAKES AND NOT HIT THE BUILDING SINCE HYBRID GAS PART OF ENGINE DISENGAGES WHEN THE BRAKE PEDAL IS USED.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10312900  
**Date of Incident:** 20090729  
**Vehicle:** 2009 TOYOTA RAV4  
**Location of Incident:** PRESTON, WA

**NHTSA Summary:**  
SINCE I BOUGHT MY 2009 TOYOTA RAV4 (6CYL) IN JULY 2009, I HAVE EXPERIENCED CONSISTENT JACKRABBIT STARTS. THE DAY AFTER I BOUGHT IT, I DISCUSSED THIS WITH THE SALESMAN WHO HANDLED MY TRANSACTION. HE SEEMD UNCONCERNED AND TOLD ME TO DISCUSS IT WITH THE SERVICE DEPARTMENT AT THE 5000 MILES CHECK. VIRTUALLY EVERY TIME I ATTEMPT TO SMOOTHLY ACCELERATE FROM A STOP, I AM THROWN BACK INTO MY SEAT AND THE VEHICLE ACCELERATES RAPIDLY. ON A COUPLE OF OCCASSIONS I NEARLY HIT THE CAR IN FRONT OF ME. ON FEB 1, 2010, I BROUGHT THIS TO THE ATTENTION OF THE SERVICE DEPARTMENT OF MICHAEL'S TOYOTA IN BELLEVUE, WA, WHEN I TOOK MY VEHICLE IN TO HAVE THE ACCELERATOR PEDAL CHECKED - MINE WAS A DENSO AND DID NOT REQUIRE MODIFICATION. THEY REPORTED "NO DEFECT,"

C-1443

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AND THAT MY VEHICLE DRIVES LIKE EVERY OTHER RAV4. IF THAT IS THE CASE, THERE IS NO DOUBT A RISK THAT THIS JACKRABBIT TENDENCY WILL CAUSE ACCIDENTS. I AM CONVINCED THAT THE COMBINATION OF TOYOTA'S ELECTRONIC ACCELERATOR PEDALS AND THE HARDWARE/SOFTWARE TOYOTA USES TO CONTROL THE ENGINES ARE FAULTY. I HAVE LISTED THE DATE OF INCIDENT AS THE DAY I BOUGHT THE RAV4, BUT THE JACKRABBIT ACCELERATIONS HAPPEN EVERY DAY!

**NHTSA Summary:**  
**Additional Summary:**  
San Diego News article: Several Toyota Owners Say they Side With Prius Driver (James Sikes)

"Several local Toyota drivers told 10News they believe runaway Prius driver James Sikes is telling the truth about his ordeal.

"I absolutely believe him," said Carlsbad resident Bob Bender.

Bender believes him because he knows what it's like to be in an out-of-control vehicle. Seven months ago, he was in his Lexus SUV when he said it accelerated "My car lurched forward; as I'm braking, it's not stopping. It rear-ended another car," said Bender.

It was his fourth such collision in 9 years. Each time, Toyota found nothing wrong and Bender said, "It gets me angry."

Bender was more upset upon hearing Toyota's response to the Sikes incident. The company said the sudden acceleration could not be duplicated. "They can't duplicate anybody's situation. That doesn't mean it doesn't happen. They use that as a brush-off excuse. 'We can't do it, so it doesn't exist.' There's a glitch in their cars," said Bender."

Bender is part of class-action lawsuit.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

MY BROTHER WENT TO THE DEALERSHIP AND HAD A HEATED DISCUSSION WITH THE DEALERSHIP. MY DAD WENT TO PICK THE CAR UP, BUT THE DEALERSHIP DID NOT PROVIDE ANY PAPERWORK TO HIM ON WHAT REPAIRS WERE MADE. HE WAS NOT CHARGED FOR THE SERVICE BUT THE DEALERSHIP WAS ADAMANT ABOUT NOT DISCLOSING ANY DETAILS. IT WAS ONLY MONTHS LATER WE FOUND OUT THAT THE CRUISE CONTROL WAS NOT FUNCTIONAL. SADLY, WE DO NOT KNOW IF THEY DISCONNECTED IT OR IT JUST STOPPED WORKING. EITHER WAY, WE HAVE NOT EXPERIENCED THE SUDDEN ACCELERATION ISSUE SINCE THEN. I AM NOT SURE ABOUT THE EXACT DATES, BUT I AM HOPING THAT THE DEALERSHIP HAS RECORD OF THIS TRANSACTION. I AM SENDING THIS EMAIL FOR NOTIFICATION PURPOSES IN LIGHT OF EVERYTHING THAT IS GOING ON WITH TOYOTA CAMRY. THANKS. VINEET KATOCH (CONCERNED SON)

**Location of Incident:** NORTH TONWANDA, NY  
**NHTSA Summary:**  
TOYOTA CAMRY 2009 - WHILE DRIVING ON THE HIGHWAY THE CAR SUDDENLY ACCELERATED FROM 65MPH TO 90MPH WITHOUT EVEN TOUCHING THE GAS PEDDLE. IT WAS FULL THROTTLE. WHEN TRYING TO STOP IT BECAME VERY DIFFICULT FOR THE BRAKES TO DEPRESS. HAD TO PUSH DOWN ON BRAKES VERY HARD TO GET IT TO SLOW DOWN. THE NEXT DAY DRIVING ON A LOCAL STREET I PULLED OUT OF MY STREET AND STARTED TO ACCELERATE AND THE IT JUST ACCELERATED OUT OF CONTROL, GOING FROM 30MPH TO 50MPH. TRIED THE BRAKES AND THEY FELT LIKE THEY WERENT WORKING UNTIL YOU HAD TO STEP ON THEM ALL THE WAY. THAT WAS TWO DAYS IN A ROW THAT THIS HAPPEN. TOOK INTO THE DEALERSHIP AND THEY SAID THEY COULDN'T FIND ANYTHING WRONG WITH THE CAR OR DUPLICATE THE PROBLEM. I HAVE RESEARCHED THIS ISSUE AND HAVE FOUND THAT THERE IS A LOT OF COMPLAINTS OF THIS VERY SAME PROBLEM. SOMETHING NEEDS TO GET DONE OR THERE WILL BE A LOT OF ACCIDENTS. \*TR

**Date of Incident:** 20090803  
**Vehicle:** 2006 LEXUS GS300  
**Location of Incident:** SKOKIE, IL

**NHTSA Summary:**  
A FEW MONTHS AFTER I BOUGHT MY 2006 LEXUS GS300 IN JAN., 2006, I EXPERIENCED THE SUDDEN ACCELERATION OF MY CAR. I WAS PASSING A CAR AND WHEN I TOOK MY FOOT OFF OF THE GAS PEDAL, IT CONTINUED TO ACCELERATE. I TRIED THE BRAKE BUT IT SEEMED FROZEN. IT DIDN'T MOVE AT ALL. I QUICKLY THREW THE CAR INTO NEUTRAL, AND AS I WAS ABOUT TO HIT THE CAR IN FRONT OF ME, I SHIFTED INTO PARK... IT WAS THE ONLY WAY TO GET THE CAR TO STOP. THEN I TURNED THE CAR OFF. THE FIRST TIME I ATTEMPTED TO START THE CAR BACK UP, IT RACED. ON THE SECOND ATTEMPT IT SEEMED TO START UP NORMALLY, AND I DROVE IT TO WORK. I TOOK THE CAR IN TO THE DEALER THE NEXT DAY. THEY SAID EVERYTHING CHECKED OUT FINE. THE OTHER EVENING 8/3/09, A LITTLE MORE THAN 3 YEARS AFTER THE FIRST INCIDENT, MY WIFE WAS DRIVING ON THE HIGHWAY, WITH ME IN THE PASSENGER SEAT. AS SHE WAS ACCELERATING, ALL OF A SUDDEN WHEN SHE TOOK HER FOOT OFF OF THE ACCELERATOR, THE PEDAL CONTINUED TO MOVE TOWARD THE FLOOR. IT GOT UP TO 80 MILES AN HOUR, WHEN SHE DID AS I DID, PUT IT IN NEUTRAL, PULL OVER ON THE SHOULDER, AND THROW IT INTO PARK. SHE WAS FRANTIC, CALLING THE CAR A "DEATHTRAP". I CALLED THE DEALER FOR A TOW AND WHEN I DESCRIBED WHAT HAPPENED, HE SAID IT WAS PROBABLY THE MATS. NO WAY. EVEN AFTER WE MOVED THE MAT COMPLETELY AWAY AND RESTARTED THE CAR, THE RPM'S RACED UP. EVEN THE TOW TRUCK DRIVER SAID THE CAR RACED AND "JUMPED" WHEN HE PULLED IT ONTO THE FLATBED. THE DEALER CALLED THE NEXT DAY AND SAID THE CAR IS FINE. I TOLD HIM I WANT THEM TO KEEP THE CAR UNTIL THEY FIGURE OUT THE PROBLEM AND FIX IT. I HAD A LOANER FOR A COUPLE DAYS AND THEN THE DEMANDED IT BACK. I SAID I DON'T WANT MY CAR BACK UNTIL IT'S FIXED OR THEY GIVE ME A NEW ONE. I CAN'T SUPPLY THE VIN RIGHT NOW BECAUSE THE CAR IS STILL AT THE DEALER, BUT I CAN GET IT. \*TR

**NHTSA Summary:**  
ON 3, AUGUST 2009, I DROPPED OFF MY TOYOTA COROLLA, YEAR 2006, VIN: INXBR32E26Z681171 IN POWER TOYOTA, IRVINE, CA DUE TO THE VEHICLE ABRUPTLY LUNGES FORWARD WHEN ACCELERATOR PETAL IS BARELY TOUCHED. WHEN I PICKED UP THE CAR, THE VEHICLE STILL LUNGES FORWARD WHEN BARELY TOUCHING GAS PETAL. THIS, IMMEDIATELY BROUGHT THE CAR BACK TO SERVICE, ASKED TO HAVE THE ISSUE LUNGING FORWARD LOOKED AT AGAIN. POWER TOYOTA SERVICE TEAM ASSIGNED A MECHANIC TO RIDE ALONG WITH ME FOR A TEST DRIVE. DURING THE TEST DRIVE, THE MECHANIC AGREED THE LUNGING FORWARD FROM A DEAD STOP IS NOT NORMAL AND WE DROVE BACK TO POWER TOYOTA FACILITY. ONCE ARRIVED AT TOYOTA, THE MECHANIC WENT TO TALK TO HIS SUPERVISOR AND A DIFFERENT MECHANIC CAME OUT AND LOOKED AT THE CAR. THE SECOND MECHANIC STATED "THIS IS NORMAL FOR TOYOTA", DISMISSING THE FIRST MECHANIC'S OBSERVATIONS. I ASKED FOR THE FIRST MECHANIC, THE SECOND MECHANIC STATED "THE MECHANIC (FIRST) IS NOT AVAILABLE. IF I WISH, I COULD HAVE THE ELECTRONIC ACCELERATOR PARTS REPLACED, BUT I WILL NEED TO PAY FOR THE REPAIR/SERVICE AND THE EXPENSE WILL NOT BE COVERED BY TOYOTA. RECENTLY I CONTACTED POWER TOYOTA TO MAKE AN APPOINTMENT TO HAVE MY VEHICLE'S ACCELERATOR SYSTEM INSPECTED, POWER TOYOTA SAID SINCE THE VEHICLE IS NOT INCLUDED IN THE RECALL, I WILL NEED TO CONTACT TOYOTA'S CONSUMER DEPARTMENT, POWER TOYOTA CANNOT DO ANYTHING. THUS, CONTACTED TOYOTA CONSUMER DEPARTMENT AND VERBALLY MADE A COMPLAINT ON SAID ISSUE. VEHICLE ABRUPTLY LUNGES FORWARD WHEN THE ACCELERATOR PETAL IS BARELY TOUCHED. WITH RECENT INFORMATION RELEASED BY TOYOTA ON COROLLA ACCELERATOR SYSTEMS (OTHER TOYOTA MODELS ARE INCLUDED) AND RECALLS. I AM FORMALLY ASKING TOYOTA MOTOR SALES SERVICE DEPARTMENT TO CRITICALLY INSPECT MY VEHICLE'S ACCELERATOR'S ELECTRONIC AND MECHANICAL SYSTEM AND REPLACE ALL PARTS IN QUESTION, TO ENSURE OCCUPANTS SAFETY. HOW AND WHERE CAN I HAVE MY VEHICLE'S ACCELERATOR SYSTEM INSPECTED, AT THIS TIME, TOYOTA HAS NOT CONTACT ME ON THIS ISSUE.

**Toyota ID Number:**  
**NHTSA ODI Number:**  
**Date of Incident:** 20090805  
**Vehicle:** 2007 TOYOTA CAMRY LE  
**Location of Incident:**  
**Additional Summary:**

My wife recently had a near death experience on 8-5-09 in our 2007 Camry LE. On 2 separate occasions 10 minutes apart as she was accelerating, the gas pedal, on its own, continued to advance till it was wide open. She was unable to pull the pedal up with her toe. She stood on the brake with the throttle wide open and shifted into neutral with the engines RPM's racing. She was able to get to the side of the freeway and shut the car off. After some 5 minutes and regaining her composure, she began to re-enter the freeway after a 18 wheeler had passed her. She was afraid to depress the gas pedal too aggressively so she very slowly depressed the gas. On its own, the pedal continued to the floor and she was again racing uncontrollably down the freeway toward the rear end of the 18 wheeler that had passed her. She frantically put the car into neutral and attempted to pull onto the shoulder only to see that there was no shoulder because of a deep ravine. She pulled to the right as far as possible but still had a portion of her car in the right lane when another 18 wheeler rounded the turn behind her and narrowly avoided rear ending her as he had little time to react. She was finally able to drive home and did not experience the problem for 30 minutes until climbing a small hill 2 blocks from home. She was barely creeping up the hill because she was afraid to depress the gas very hard. She could feel a vibration or small surge like it was going to do it again. She called me at work shortly afterwards in near hysteria at 11:30 P.M. and told me the story. Refusing to drive the car again, we had to buy another vehicle. We brought it in to our local Toyota dealer and talked to the service manager and techs. They found it hard to believe and had never heard of that happening. I could not duplicate the problem when I drove it in. Initially, we were going to go through the process of going the route of the "Lemon Law". However, if they cannot duplicate the problem, then we are stuck with the car and without it for approx. 2 months. Even if we were to win and they found the problem, they would only give us its trade in value which is less than what we owe. The sales manager believed us and the dealership basically bought the car back from us and put us into a Highlander SUV. However, our worry is that being it is another Toyota product, the same thing might happen down the line if the same computer modules and cruise control parts are used.

\*\*\*It was definitely a mechanical problem as the cruise control was off and the floor mats were secure with the pins and of the type approved by the recall of the old mats that might pose a problem with interfering with the gas pedal.\*\*\*

**Location of Incident:** TORRANCE, CA  
**Additional Summary:**

**NHTSA Summary:**  
WIFE'S 2007 LEXUS IS 250 EXPERIENCED SUDDEN ACCELERATION ON THE NORTHBOUND 405 FREEWAY IN LONG BEACH CALIFORNIA. AFTER SHE ACCELERATED ONTO THE FREEWAY SHE ENTERED THE FAST LANE AND EASED UP ON THE GAS PEDAL BUT THE CAR CONTINUED TO ACCELERATE OUT OF CONTROL WITH HER FOOT COMPLETELY OFF THE GAS PEDAL. SHE BEGAN PRESSING ON THE BRAKE PEDAL IN AN EFFORT TO STOP THE VEHICLE. ALL THE WHILE THE CAR WAS TRYING TO ACCELERATE. LUCKILY SHE WAS ABLE TO MAINTAIN CONTROL AND MOVED OVER TO THE RIGHT LANE, THEN ONTO THE SHOULDER OF THE HIGHWAY. SHE THREW THE AUTO TRANSMISSION LEVER INTO NEUTRAL. SHE WAS THEN ABLE TO BRING THE CAR TO A STOP, EVEN WHILE THE ENGINE WAS RACING AT HIGH RPM. SHE TURNED OFF THE IGNITION AND THE ENGINE STOPPED. WE HAD THE CAR FLAT-BEDDED TO SOUTH BAY LEXUS IN TORRANCE, CALIFORNIA WHERE THEY GAVE HER A LOANER FOR THE WEEKEND AND PROMISED TO HAVE ONE OF THEIR MECHANICS DRIVE THE CAR OVER THE WEEKEND TO SEE IF THEY COULD REPEAT THE PROBLEM. ON MONDAY THEY CALLED ME AND TOLD ME THAT THEY COULD NOT FIND ANYTHING WRONG WITH IT, TELLING ME THAT MORE THAN LIKELY THE FLOOR MAT HAD GOTTEN PUSHED UP INTO THE GAS PEDAL MECHANISM. THIS IS IMPOSSIBLE IF YOU LOOK AT THE ANGLE OF THE FLOOR ABOVE THE MATS WHERE THE GAS PEDAL IS. MY WIFE INSISTS THE MAT WAS NOWHERE NEAR THE GAS PEDAL. THE DEALER PUT A GRAND TOTAL OF ONLY 24 MILES ON THE VEHICLE IN THE THREE DAYS THAT THEY HAD IT. OVER THE WEEKEND MY WIFE AND I DID SOME ONLINE RESEARCH AND SURPRISINGLY FOUND A NUMBER OF OTHER PEOPLE WHO HAVE EXPERIENCED THE SAME PROBLEM. WE TRADED THE VEHICLE IN ON MONDAY. THE SAME DAY WE GOT IT BACK FROM LEXUS. MY WIFE REFUSED TO DRIVE IT AGAIN. NOW, WE JUST FOUND OUT THAT ON AUGUST 28TH, THREE WEEKS AFTER OUR EXPERIENCE, CALIFORNIA HIGHWAY PATROL OFFICER MARK SAYLOR AND THREE OF HIS FAMILY MEMBERS WERE KILLED WHEN THE LEXUS ES 350 THEY WERE DRIVING SUDDENLY ACCELERATED. LEXUS IS AGAIN BLAMING IT ON THE FLOOR MAT. \*TR

**Additional Summary:**

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2005 TOYOTA SCION XA. WHILE DRIVING APPROXIMATELY 30 MPH THE VEHICLE ACCELERATED AGGRESSIVELY. THE CONTACT DEPRESSED THE BRAKE PEDAL, BUT THE VEHICLE FAILED TO SLOW DOWN. THE GEAR WAS SHIFTED INTO NEUTRAL AND THE VEHICLE SLOWED DOWN. THE FAILURE OCCURRED WITHOUT WARNING. THE FAILURE RECURRED ON A SEPARATE OCCASION AND THE VEHICLE CRASHED INTO A BUILDING AND STRUCK A PEDESTRIAN. THE PEDESTRIAN WAS TRANSPORTED TO THE HOSPITAL AND THE POLICE WAS CALLED TO THE SCENE. A POLICE REPORT WAS FILED. THE VEHICLE WAS TAKEN TO AN AUTHORIZED DEALER FOR INSPECTION AND THEY STATED THAT THE REPAIRS WOULD COST \$2,500. THE VEHICLE IS IN THE PROCESS OF BEING REPAIRED. THE FAILURE AND CURRENT MILEAGES WERE 68,000.

**NHTSA ODI Number:** 10291263  
**Date of Incident:** 20090809  
**Vehicle:** 2008 TOYOTA TACOMA  
**Location of Incident:** OAK PARK, IL

**NHTSA Summary:**

I WAS DRIVING WESTBOUND ON I-90 (KENNEDY EXPRESSWAY) AT APPROXIMATELY 9:40 AM ON SATURDAY, AUGUST 8, 2009. IN MY 2008 TOYOTA TACOMA I WAS TRAVELING AT APPROXIMATELY 40 MPH WHEN I APPLIED THE BRAKES AS A CAR IN FRONT OF ME SLOWED TO EXIT THE EXPRESSWAY. WHEN THE VEHICLE IN FRONT OF ME EXITED, I STEPPED ON THE GAS PEDAL AND MY TRUCK IMMEDIATELY BEGAN TO ACCELERATE AT A HIGH RATE OF SPEED. I SLAMMED ON THE BRAKES BUT THE TRUCK CONTINUED TO ACCELERATE, EVENTUALLY REACHING 80 MPH. I STEERED THE TRUCK INTO THE FAR RIGHT LANE AND WAS NOW PRESSING AS HARD AS I COULD WITH BOTH FEET ON THE BRAKE PEDAL. I WAS ABLE TO GET THE TRUCK DOWN TO APPROXIMATELY 25 MPH, AT WHICH POINT I DROVE ONTO THE SHOULDER AND PUT THE TRUCK IN NEUTRAL AND THEN PARK, WHERE THE TRUCK FINALLY CAME TO A STOP. THE ENTIRE INCIDENT LASTED LESS THAN 30 SECONDS. WITHIN 15 MINUTES AN IDIOT TRUCK PULLED UP BEHIND ME AND TOWED ME A SHORT DISTANCE UP THE EXPRESSWAY TO A SAFETY AREA, WHERE I WAITED FOR THE AAA TOW TRUCK TO ARRIVE. I HAD THE VEHICLE TOWED TO THE TOYOTA DEALER WHERE I HAD PURCHASED IT LESS THAN 2 YEARS BEFORE. THE DEALER KEPT MY TRUCK UNTIL AUGUST 13, AND I WAS TOLD THAT THE REASON THE TRUCK ACCELERATED WAS BECAUSE THE GAS PEDAL GOT STUCK UNDER THE HEAVY DUTY FLOOR MATS WHICH I HAD PURCHASED FROM THE DEALER AT THE TIME I BOUGHT MY TRUCK. I TOLD THE SERVICE MANAGER THERE WAS ABSOLUTELY NO WAY THE PEDAL HAD GOTTEN STUCK UNDERNEATH THE FLOOR MAT, BECAUSE THE FLOOR MAT WAS NOT POSITIONED SO FAR FORWARD THAT THE PEDAL COULD HAVE GOTTEN STUCK ON IT. THE SERVICE MANAGER TOLD ME THE ONLY WAY THEY GOT THE TRUCK TO REPLICATE WHAT HAD HAPPENED TO ME WAS WHEN THE GAS PEDAL GOT STUCK ON THE FLOOR MAT, BUT I LET HIM KNOW THAT I STRONGLY DISAGREED WITH WHAT HE WAS TELLING ME. I KNOW THE GAS PEDAL DID NOT GET STUCK UNDER THE FLOOR MAT IN THIS INCIDENT. I TOLD THE SERVICE MANAGER TO REMOVE MY FLOOR MATS, BECAUSE IF THIS EVER HAPPENED AGAIN I DID NOT WANT TOYOTA TO BE ABLE TO USE THE FLOOR MATS AS AN EXCUSE. \*TR

**Date of Incident:** 20090810  
**Vehicle:** 2010 TOYOTA PRIUS  
**Location of Incident:** SHORELINE, WA

**NHTSA Summary:**

I HAVE EXPERIENCED TWO PROBLEMS WITH MY 2010 PRIUS V THAT I PURCHASED LAST SUMMER. FIRST, ON APPROXIMATELY 6-8 OCCASIONS, MY CAR HAS NOT STOPPED IMMEDIATELY WHEN I APPLIED THE BRAKES. THIS OCCURRED 3-4 TIMES WHEN I APPROACHED A STOP SIGN ON A ROAD BETWEEN MY HOME AND CHURCH. THE SURFACE OF THE ROAD APPROACHING THE STOP SIGN HAD BEEN SCRAPED AND ROUGHENED TO GET READY FOR RE-PAVING. AS I APPROACHED AND APPLIED THE BRAKES, MY CAR SURGED FORWARD FOR ABOUT A SECOND, BUT I WAS ABLE TO STOP. THIS HAPPENED 3-4 TIMES IN OTHER LOCATIONS, AS WELL. IT IS AN INCREDIBLY STRANGE AND HELPLESS SENSATION. THIS PROBLEM WAS PROBABLY NOTED BETWEEN LATE AUGUST 2009 AND LAST OCCURRED ABOUT THREE WEEKS AGO. EVEN THOUGH I WAS FORCED TO PUT AN EXACT DATE IN THE FIELD BELOW, I HAVE NO IDEA NOW WHEN THE EXACT DATES WERE IN WHICH THIS BRAKING ISSUE OCCURRED. WHEN I BROUGHT MY CAR TO THE DEALER FOR ITS FIRST OIL CHANGE, I DESCRIBED WHAT HAD HAPPENED BUT WAS TOLD THIS HAD NOTHING TO DO WITH THE OTHER PROBLEMS THAT HAD BEEN IDENTIFIED IN THE MEDIA AS TO OTHER CARS. THE PERSON AT THE SERVICE DESK JUST KIND OF IGNORED MY COMMENTS AND WAS NOT INTERESTED IN HEARING ABOUT THE BRAKING ISSUE FURTHER. THE SECOND PROBLEM I HAVE EXPERIENCED IS THAT WHEN USING THE CRUISE CONTROL ACCELERATE FUNCTION THE CAR JUST CONTINUED ACCELERATING EVEN THOUGH I WAS NO LONGER TURNING THE CRUISE FUNCTION LEVER. THIS STOPPED WHEN I APPLIED MY BRAKES. IT DID CAUSE ME TO STOP USING THE CRUISE CONTROL DURING THAT TRIP THOUGH. THE CRUISE CONTROL ISSUE PROBABLY OCCURRED LAST AUGUST IN I-5.

**Vehicle:** 2010 TOYOTA PRIUS  
**Location of Incident:** HERRIN, IL

**NHTSA Summary:**  
FEBRUARY 15, 2010 AT 3:29 PM I SPOKE TO SUSZANNE AT TOYOTA 1-800-331-4331 ABOUT PROBLEMS I'VE EXPERIENCED WITH MY 2010 PRIUS. I TOLD HER ABOUT THE CRUISE CONTROL DANGER. WHERE THE CAR HAD BEEN GOING ALONG NICELY ON CRUISE, BUT SUDDENLY RAPIDLY ACCELERATED WHEN, ON AUGUST 11, 2009, I WAS ON THE TRIP BETWEEN NEW JERSEY AND ILLINOIS COMING THROUGH THE TENNESSEE/KENTUCKY AREA. I HAD BEEN TRAVELING AT ABOUT 65MPH ON CRUISE, AND IT RAPIDLY ACCELERATED TO OVER 80MPH AND I PANICKED WHILE TRYING TO GET IT TO SLOW DOWN. I TRIED SLOWING IT DOWN USING THE CRUISE BUTTON, THEN DEPRESSED THE CRUISE OFF BUTTON. DIDN'T WORK. IT DID NOT RESPOND IMMEDIATELY TO THE BRAKE UNTIL I BRAKED REALLY HARD. THEREFORE, MY DRIVING IT WAS SEVERELY LIMITED TO DRIVING AT VERY LOW SPEEDS IN TOWN. OTHER UNINTENDED ACCELERATION HAS OCCURRED EVEN WHEN NOT USING THE CRUISE. THE CAR BOLTED FORWARD NUMEROUS TIMES ON A BUMPY SECTION OF ROAD ON MY ROUTE HOME FROM WORK; IT HAPPENED OFTEN ENOUGH THERE THAT I COMPENSATED BY TAKING A DIFFERENT ROUTE. EFFORTS TO STOP THE FORWARD LUNGE INCLUDED BRAKING WITH NO RESPONSE, USING THE KNOB TO SHIFT TO A DIFFERENT SETTING, AND SCRAMBLING TO FIND THE DAMN BUTTON TO PRESS PARK. SOMETHING FINALLY STOPPED IT, BUT I DON'T KNOW WHAT. THE NEXT SCARE OCCURRED AFTER IT SNOWED. I DROVE SLOWLY ON THE PLOWED ROAD, BUT WHEN THE CAR ENCOUNTERED SNOWY LUMPS IT RAPIDLY ACCELERATED LUNGING FORWARD AGAIN. MY ATTEMPTS TO STOP CAUSED ME TO SKID DANGEROUSLY INTO ONCOMING TRAFFIC LANE. I PARKED THE CAR IN THE GARAGE AND HAVE NOT DRIVEN IT AGAIN IN WELL OVER A MONTH DUE TO THE DANGER. IN FEBRUARY, MY CO-WORKER, TELLI ALLEN, URGED ME NOT TO DRIVE THE CAR BECAUSE SHE HAD HEARD ABOUT A RECALL AND WAS AFRAID FOR ME, BUT I HAD ALREADY PARKED IT BY THEN & KNOWING SOMETHING WAS WRONG WITH IT. IT HAS NOT BEEN DRIVEN SINCE PRIOR TO MY LEARNING THAT OTHERS HAVE HAD SIMILAR EXPERIENCES & SOME HAVE DIED OR BEEN INJURED AS A RESULT.

**Location of Incident:** BOYNTON BEACH, FL

**NHTSA Summary:**  
I PURCHASED A NEW RAV4 2009 TOYOTA AND EXPERIENCED UNINTENDED RUNAWAY ACCELERATION ON THREE SEPARATE OCCASIONS. IT WAS FIRST BROUGHT TO A TOYOTA DEALER IN SANDY SPRINGS, ATLANTA AND WAS TOLD THAT THE ROTORS ON THE BRAKES WERE WARPED. THEY WERE REPLACED BUT SOON AFTER THAT REPAIR, IT ACCELERATED OUT OF CONTROL AGAIN AND WAS BROUGHT TO DELRAY TOYOTA WHERE I PURCHASED THE CAR. THEY KEPT IT FOR 5 DAYS AND CALLED TO TELL ME THERE WAS "NOTHING WRONG" AND UNLESS THEY EXPERIENCED THE PROBLEM DURING A TEST DRIVE THERE WAS NOTHING THEY COULD DO. I HAD SOMEONE DRIVE THE CAR BACK TO MY HOME AND IT IS PRESENTLY SITTING IN MY GARAGE. SOON AFTER THE THIRD INCIDENT I WAS CALLED BY THE DEALER AND WAS TOLD TO BRING IT IN. THE CAR WAS TOWED TO DELRAY TOYOTA AND THEY TOLD ME THAT THE RECALL DID NOT PERTAIN TO MY CAR BECAUSE THE VIN # DIDN'T QUALIFY FOR REPLACEMENT OF THE GAS PEDDLE WHICH WAS RECALLED ON OTHER RAV 4S. IT WAS AGAIN RETURNED WITH NO REPAIR OF THIS SERIOUS SAFETY ISSUE AND IS PRESENTLY UNUSABLE BECAUSE I FEAR THAT THIS UNINTENDED ACCELERATION PROBLEM COULD CAUSE A SERIOUS ACCIDENT EFFECTING ME AND OTHERS.

**Location of Incident:** ESTES PARK, CO

**NHTSA Summary:**  
2002 TOYOTA HIGHLANDER ACCELERATOR STICKING IN THE FULL DOWN POSITION WHEN PASSING ANOTHER VEHICLE. FIRST HAPPENED SUMMER OF 2008. SECOND TIME THIS HAPPENED AUGUST 13, 2009. PUT ON FULL BRAKE AND TURNED IGNITION KEY OFF. AFTER VEHICLE STOPPED, ABOUT 5-10 SECONDS, PEDAL RELEASED. SERVICE APPOINTMENT WITH DEALERSHIP AUGUST 18, 2009 TO CORRECT PROBLEM. DEALERSHIP COULD NOT FIND ANYTHING WRONG WITH VEHICLE. SAID IT WAS THE FLOOR MAT THAT MADE THE ACCELERATOR STICK IN THE OPEN POSITION. DON'T THINK TOYOTA INFORMED OF THIS COMPLAINT. SINCE TOYOTA RECALL HAS TAKEN PLACE, I WANTED TO GET MY VEHICLE BACK IN THE DEALERSHIP TO CORRECT MY PROBLEM. APPOINTMENT MADE 2009/08/10 AT 10:30 WITH DEALERSHIP. DEALERSHIP CHECKED THROTTLE BODY AND THROTTLE CABLE. SAID ALL OKAY. DEALERSHIP CONTINUES TO TELL ME RUBBER MAT COULD CATCH PEDAL AND CAUSE PROBLEM. I DISAGREE WITH THIS DIAGNOSIS. I ASKED DEALERSHIP TO PLEASE INFORM TOYOTA ABOUT THIS PROBLEM IN MY MODEL SINCE THE RECALL IS ONLY CORRECTING 2010 MODELS. THE ONLY WAY I WILL TRY AND PASS ANOTHER VEHICLE NOW, ESPECIALLY ON MOUNTAIN ROADS, IS PLACE THE CAR IN SECOND GEAR AND ACCELERATE. I DON'T TRUST PLACING THE PEDAL DOWN TO FLOORBOARD. I OFFER THIS AS ADDITIONAL INFORMATION REGARDING THIS DANGEROUS PROBLEM. I HOPE TOYOTA WILL CORRECT THIS SITUATION IN "ALL" MODELS OF THEIR CARS.

**NHTSA Summary:**

LEXUS IS300 2002 VEHICLE ROLLOVER ON FREEWAY. DEFECT THAT CAUSED THE CAR TO ROLL WAS FROM THE LEFT FRONT WHEEL/RIM BROKE IN HALF WHILE DRIVING. I WAS MERGING AND HEARD SOMETHING BREAK UNDER THE CAR. MY STEERING WHEEL TURNED A HARD RIGHT FORCEFUL AND WITHOUT MY CONTROL. I TRIED TO STRAIGHTEN THE STEERING WHEEL OUT FROM THIS INVOLUNTARY HARSH DIRECTION OF VEHICLE, IT WAS LOCKED UP. I TURNED COMPLETELY AROUND FACING TRAFFIC. ALL ATTEMPTS TO TURN THE STEERING COLUMN WOULD NOT ALLOW ME TO DO SO (COMPLETELY LOCKED POSITION). THE VEHICLE SPUN AND I HEARD AND FELT THE BACK END HIT SOMETHING. THE CAR CATAPULTED OVER A 8 FT. FENCE THAT SEPARATES THE ACCESS ROAD. THE CAR LANDED ON ITS ROOF. MY AIRBAGS NEVER DEPLOYED! IMPACT CRUSHED THE ROOF INTO THE GROUND I WAS SUSPENDED UPSIDE DOWN BY MY SEAT BELT. THE CAR ENGINE WAS STILL RUNNING. I ATTEMPTED TO UNLATCH MY SEAT BELT, IT TOOK A FEW ATTEMPTS. I COULD NOT FIND A DOOR HANDLE, OR WINDOW TO GET OUT. I TRIED FORCING THE DRIVERS DOOR OPEN. IT WOULD NOT MOVE, I WAS TRAPPED INSIDE THE UPSIDE DOWN VEHICLE. IN A PANIC, I FEARED THE CAR WOULD SPILL GASOLINE AND CATCH FIRE. I TURNED THE IGNITION OFF. I THEN REALIZED NO ONE STOPPED TO HELP. I FORCED MY BODY TO HIT THE DOOR OVER AND OVER, TO BREAK IT OPEN. I GOT THE SIDE MIRROR TO BREAK ALLOWING THE DOOR TO OPEN A FEW INCHES. JUST ENOUGH TO CRAWL OUT. I WENT BACK IN TO FIND MY PHONE AND CALL 911. AT THAT TIME A PERSON PULLED OVER. I FOUND MY PHONE AND FOR SOME REASON I DECIDED TO TAKE A PICTURE OF THE VEHICLE. I CAPTURED THE BROKEN WHEEL. IN THE PICTURE. POLICE ASKED ME WHAT HAPPENED, I SAID OVER AND OVER "IT LOCKED UP"...MY PHONE

**C-1465**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BATTERY DIED RIGHT AFTER I TOOK THE PICTURE. I DIDN'T HAVE MEDICAL COVERAGE FOR EMERGENCY, SO I DIDN'T GO TO THE HOSPITAL. THE COP SAID, "PEOPLE DON'T WALK AWAY FROM THIS KIND OF ACCIDENT" HE ADVISED I GO WITH THE AMBULANCE, HOWEVER I COULDN'T AFFORD THE COST. I DIDN'T REALIZE I WAS INJURED, UNTIL LATER. NO ONE HAS EVER SEEN A WHEEL DO THAT. \*TR

**Additional Summary:**

2002 LEXUS IS 300 CRASHED DUE TO A WHEEL RIM FAILURE. REPLACED WITH A 2006 LEXUS IS250 - THE 2006 LEXUS IS EXPERIENCED INSTANCES OF ENGINE REVVING.

THE 2006 LEXUS IS 250 - HAS ON 3 DIFFERENT OCCASIONS REV-UP VERY HIGH. THOUGHT IT WAS STRANGE THAT THE HARDER SHE PRESSED ON THE BRAKE - THE HIGHER THE RPM'S WENT UP.

**NHTSA ODI Number:** 10311238  
**Date of Incident:** 20090813  
**Vehicle:** 2008 TOYOTA AVALON  
**Location of Incident:** GLENWOOD, IL  
**NHTSA Summary:**

I HAVE A 2008 TOYOTA AVALON THAT I HAD ONLY 4 MONTHS PRIOR TO THE ACCIDENT. THE CAR APPEARED TO BE IN EXCELLENT CONDITION UNTIL MY HUSBAND TOOK IT TO THE DELTA SONIC CARWASH TO HAVE IT CLEAN. AS HE WAS COMING OUT OF THE CAR WASH, HE SHIFT FROM NEUTRAL TO DRIVE AND THE ACCELERATOR FAILED, STICKING IN FULL THROTTLE, CAUSING HIM TO LOSE CONTROL OF THE VEHICLE. TO AVOID COLLISION WITH OTHER VEHICLES COMING OUT OF THE GAS STATION, WHICH IS PART OF THE BUSINESS, AND HITTING PEDESTRIANS AND THE GAS PUMPS, HE STEERED THE CAR HITTING A POLE, GOING OVER EMBANKMENT, THE SIDEWALK AND INTO ONGOING TRAFFIC IN THE OPPOSITE DIRECTION. THE CAR CAME TO A STOP TWO BUSINESS DOWN FROM WHERE THE ACCIDENT ORIGINATED. DAMAGES WAS DONE TO ALL 4 TIRES WITH BENT RIMS, THE FRONT RIGHT AND LEFT BUMPER AND GRILLE, THE HOOD, THE LAMP GROUND WITH THE HEAD LIGHT KNOCKED OUT. THE DRIVER'S SIDE MIRROR WAS HANGING DOWN. THE EXHAUST SYSTEM (MUFFLER, TAILPIPES) WERE DAMAGED. THE REAR FENDER AND BUMPER WAS DAMAGED. THE BATTERY, OIL PAN, REAR ENGINE CRADLE CUSHION PIPES WERE REPLACED. AT THE TIME, WE THOUGHT IT WAS SOMETHING THAT HE DID, BUT WE NOW SINCE HAVE FOUND THAT TOYOTA HAS HAD A PROBLEM WITH THE ACCELERATOR PEDAL STICKING IN FULL THROTTLE AND HAVE ASKED FOR A RECALL. THE TOTAL DAMAGE WAS TO A SUM OF \$12,226.39. THE INSURANCE AND REPAIR COMPANY HAVE FIXED THE CAR AT OUR EXPENSE AND THE OLD OR REPLACEMENT PARTS ARE NO LONGER AVAILABLE TO MY KNOWLEDGE. I HAVE ONLY PHOTOS OF THE CAR IN THE DAMAGED STATE. I DID GO TO THE TOYOTA DEALERSHIP THAT I PURCHASED THE CAR FROM AND THEY PLAN TO START REPAIRS FEB. 15, 2010. MY CONCERNS IS HOW DO I GET TOYOTA TO HONOR MY REQUEST FOR A CAR REPLACEMENT BECAUSE MY CAR HAS BEEN DEVALUED BECAUSE OF THE ACCIDENT AND IS NOW PART OF THE CAR FAX REPORT. I RUN THE RISK OF HAVING OTHER PROBLEMS. IF NOT REPLACE THE CAR, PROVIDE ME WITH FREE MAINTENANCE FOR THE LIFE OF THE CAR AND REPAY ME FOR OUT OF POCKET EXPENSES DUE TO THE FAILED ACCELERATOR. \*TR

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** BERKELEY, CA

**NHTSA Summary:**

I HAD JUST LEFT MY DOCTOR'S OFFICE AND GONE TO A PARKING STRUCTURE WHERE I HAD PARKED MY CAR FOR THE VISIT. I PAID THE PARKING CHARGE, GOT BACK MY VALIDATED TICKET, AND INSERTED THE TICKET IN THE GATE-ARM MACHINE. THE GATE LIFTED, AND I PUT MY FOOT LIGHTLY ON THE ACCELERATOR TO EXIT FROM THE PARKING STRUCTURE INTO THE STREET. THE CAR THEN PICKED UP SPEED, WELL PAST WHAT IT SHOULD HAVE PICKED UP BASED ON THE LIGHT PRESSURE I HAD PUT ON THE ACCELERATOR, AND THE BRAKES HAD NO EFFECT. THE CAR WENT FASTER AND FASTER, CROSSED A STREET, AND CRASHED INTO A CONCRETE WALL. ON IMPACT, THE AIRBAGS WERE DEPLOYED. I SUFFERED SERIOUS BACK PAIN, AND MY WIFE WAS IN THE HOSPITAL FOR THREE NIGHTS WITH TWO BROKEN RIBS. THE CAR WAS TOTALED.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BEWEEN AUGUST AND OCTOBER 2009 I EXPERIENCED THREE INCIDENTS OF SUDDEN ACCELERATION BY THE VEHICLE IN LOW SPEED CITY DRIVING, 25-30 MPH. THESE EVENTS WERE ALWAYS PRECEDED BY BUMP OR IRREGULAR SURFACE ON DRY ASPHALT OR CONCRETE SURFACES. IN EACH EVENT I HAD TO APPLY THE BRAKES TO COUNTER THE SUDDEN AND UNEXPECTED ACCELERATION. I HAVE NOT EXPERIENCED ANY FURTHER INCIDENTS WITH THE ADVENT OF COLDER WEATHER AND WINTER DRIVING CONDITIONS. CURRENT MILEAGE IS 7,707. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10318488  
**Date of Incident:** 20090814  
**Vehicle:** 2008 TOYOTA HIGHLANDER  
**Location of Incident:** STRONGSVILLE, OH  
**NHTSA Summary:**

WHILE I WAS DRIVING OUR 2008 TOYOTA HIGHLANDER (WITH 21506 MILES) TO THE TOYOTA DEALER FOR A TIRE INSPECTION, THE VEHICLE SURGED TO APPROX 80 MPH WITHOUT ACCELERATOR PEDAL ENGAGEMENT. WHEN I APPLIED BOTH FEET TO THE BRAKE PEDAL, IT SLOWED THE VEHICLE TO APPROX 60 MPH, BUT THE ENGINE CONTINUED TO RACE OUT OF CONTROL. I PUT THE VEHICLE IN NEUTRAL, BUT THE ENGINE CONTINUED TO RACE. I PUT THE VEHICLE BACK INTO DRIVE AND TURNED OFF THE IGNITION. I EVENTUALLY GLIDED TO A SLOW, DIFFICULT STOP. NO OTHER VEHICLES WERE IN THE IMMEDIATE AREA. AFTER A 5 MINUTE REST IN PARK, I STARTED THE CAR AND THE ENGINE RACED. I IMMEDIATELY TURNED OFF THE IGNITION. AFTER ANOTHER 5 MINUTE DELAY, I STARTED THE VEHICLE AGAIN AND IT APPEARED NORMAL. I DROVE THE VEHICLE TO THE DEALER AND EXPLAINED WHAT HAD OCCURRED. THE DEALER COULD NOT RECREATE THE EVENT AND DID NOT SEE ANY READOUTS INDICATING WHAT HAD OCCURRED. THEY EXPLAINED IT AS A ECT TRANSMISSION THAT IS COMMON WHEN THE AIR CONDITIONING IS ON. GIVEN RECENT EVENTS, MY FEAR IS THAT THE EXPLANATION GIVEN TO ME IS NOT ACCURATE. I CALLED THE DEALER SEVERAL TIMES OVER THE PAST 2 MONTHS TO DETERMINE WHAT MY OPTIONS ARE FOR RECALL AND REPAIR. THEY CONTINUE TO TELL ME TO WAIT FOR A FLOOR MAT RECALL NOTICE FROM TOYOTA, AND PRIOR TO RECEIVING THAT NOTICE, THEY CANNOT ASSIST. I CALLED THE NATIONAL TOYOTA SERVICE CENTER 1-800-331-4331 TO FILE AN INCIDENT REPORT. I EXPLAINED THE SITUATION ABOVE, THEY GAVE ME A CASE NUMBER 1002129421. THEY INDICATED THAT OUR VEHICLE WAS MADE IN JAPAN AND SHOULD NOT BE PART OF THE PEDAL RECALL. THEY ALSO INDICATED THAT WE SHOULD BE PART OF THE FLOOR MAT RECALL WHICH WILL INCLUDE A COMPUTER CHIP ADJUSTMENT THAT WILL INSTALL A BRAKE OVERRIDE TO ENSURE THAT THE BRAKE PEDAL WILL OVERRIDE THE ACCELERATOR. GIVE THE RECENT EVENTS OVER THE PAST 2 DAYS, IT APPEARS THAT MAY NOT BE WORKING PROPERLY ON OTHER VEHICLES. SINCE AUGUST 2009, THIS SITUATION HAS NOT OCCURRED AGAIN. MY FEAR IS THAT IT WILL

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AFTER PULLING INTO A PARKING SPOT, PRIOR TO CHANGING THE GEAR FROM DRIVE TO PARK, THE ENGINE REVVED UP VIOLENTLY ON ITS OWN. MY FOOT WAS NO LONGER ON THE ACCELERATOR. LUCKILY, I WAS ABLE TO APPLY HARD AND FAST PRESSURE TO THE BRAKE PEDAL AS SOON AS THE ENGINE ROARED, AND PUT THE TRUCK IN PARK BEFORE LURCHING INTO THE BRICK WALL IN FRONT OF ME. I TURNED THE TRUCK OFF, AND RESTARTED IT. IT STARTED NORMALLY, AND I HAD NO MORE PROBLEMS WITH IT. THIS HAPPENED IN THE SUMMER OF 2009, AND HASN'T HAPPENED SINCE. I MARKED IT UP AS BEING SOME STRANGE ELETRO-MECHANICAL ANOMOLY, BUT AFTER RECEIVING TOYOTA'S RIDICULOUS 'FLOOR-MAT' EXPLANATION AND HEARING HOW WIDE-SPREAD THIS PROBLEM WAS, I WANTED TO GO ON RECORD THAT THE 2007 TOYOTA TACOMA SUFFERS FROM THE SAME UNEXPLAINED SAFETY HAZARD AS THE VEHICLES LISTED IN THE JANUARY 2010 TOYOTA RECALL. IT WOULD HAVE BEEN BAD ENOUGH HITTING THAT WALL, BUT SOMEONE COULD HAVE BEEN WALKING IN FRONT OF ME. THIS IS NOT A GOOD THING. \*CN

**Vehicle:** 2006 LEXUS IS250  
**Location of Incident:** FOSTER CITY, CA

**NHTSA Summary:**

HI, WITH ALL THE NEWS LATELY REGARDING THE PROBLEMS WITH "STICKING" GAS PEDALS ON CERTAIN TOYOTA MODELS, I WANTED TO EMPHASIZE THAT I DON'T BELIEVE THE PROBLEM IS LIMITED TO TOYOTAS. I HAD E-MAILED YOU PREVIOUSLY TO DESCRIBE SIMILAR PROBLEMS MY WIFE AND I HAVE HAD WITH OUR 2006 IS 250, WHERE THE CAR FELT LIKE IT WANTED TO LURCH FORWARD WITH OUR FOOT ON THE BRAKE PEDAL. ADDITIONALLY, THE TACHOMETER NEEDLE WAS FLUCTUATING WHILE THIS WAS HAPPENING. OUR CAR EVEN DIED ONCE AT A STOP LIGHT FOR NO APPARENT REASON. THERE IS A RECORD OF OUR TAKING THE CAR INTO PUTNAM LEXUS FOR INSPECTION OF THIS PROBLEM. WE NEVER DID RECEIVE A RESPONSE FROM LEXUS TO OUR FIRST E-MAIL. AND, WE DO NOT FEEL THAT A CREEPING FLOOR MAT WAS THE CAUSE OF THE PROBLEMS WE WERE EXPERIENCING. WE FEEL THAT THE PROBLEMS WE'VE DESCRIBED NEED TO BE INVESTIGATED FURTHER SINCE IT IS SAFETY RELATED. I JUST TRIED FOUR TIMES TO SEND THIS DESCRIPTION TO LEXUS THROUGH THEIR ONLINE E-MAIL SYSTEM BUT KEPT GETTING, "OPERATION FAILED, ILLEGAL PARAMETERS." \*TR

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Date of Incident:** 20090815  
**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** EVERETT, WA

**NHTSA Summary:**

I HAVE A 2006 TOYOTA TACOMA PRE-RUNNER. I RECEIVED A NOTICE REGARDING THE FLOOR MAT ENTRAPMENT RECALL, HOWEVER, THE ENGINE HAS OVER REVVED ON ONE OCCASION REQUIRING TWO FEET ON THE BRAKE AND AN IMMEDIATE SHIFT INTO NEUTRAL TO DISENGAGE THE ACCELERATOR. NOW THE ACCELERATOR IS SLOW TO RETURN TO IDLE AND IT OFTEN REVS UP WHILE I'M TRYING TO SLOW DOWN, ESPECIALLY AT LOWER SPEEDS. I CALLED THE DEALERSHIP TODAY AND WAS TOLD THAT THERE WAS NO RECALL FOR MY VEHICLE AND THAT THERE WAS NO PROBLEM WITH MY TRUCK. I EXPLAINED THAT I HAD RECEIVED AN OFFICIAL RECALL NOTICE. THE SERVICE REP. RE-STATED THAT THERE WAS NO PROBLEM WITH MY TRUCK, BUT THERE IS! AND FLOOR MAT IS NOT THE PROBLEM. IT IS SO TIGHTLY SECURED TO THE FLOOR BY THE FACTORY CONNECTORS THAT IT IS, AND HAS ALWAYS BEEN, A MAJOR PAIN TO REMOVE FOR CLEANING. I DON'T TAKE IT OUT TO CLEAN BECAUSE IT IS SO HARD TO GET DISCONNECTED. THAT IS WHY I FEEL THAT THE ACCELERATOR ISSUES WITH MY TRUCK SHOULD BE INCLUDED IN THE SECOND RECALL. I BELIEVE THAT THIS ISSUE IS MORE COMPLEX THAN IS BEING STATED. I FELT THAT WAY WHEN I RECEIVED THE FLOOR MAT RECALL NOTICE AND I FEEL STRONGER ABOUT THIS EVERY TIME THE RPM'S REV AND MY FOOT IS NOT ON THE PEDAL. THE INITIAL PROBLEM OCCURRED BEFORE THE FLOOR MAT RECALL NOTICE ARRIVED AND CONTINUES INTERMITTENTLY. NO ACCIDENT OR CRASH OCCURRED, BUT THE FIRST TIME THE PEDAL STUCK WIDE OPEN I WAS IN A VERY SMALL PARKING LOT AND WOULD HAVE HIT THE BARTLELL'S PHARMACY BUILDING IF I HAD NOT PUT IT IN NEUTRAL. I AM AWAITING NOTIFICATION ABOUT THE FIRST RECALL FIX BUT REMAIN EXTREMELY CONFIDENT THAT IT IS NOT A FLOOR MAT ISSUE.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10308311  
**Date of Incident:** 20090815  
**Vehicle:** 2007 TOYOTA 4RUNNER  
**Location of Incident:** HARRISBURG, IL

**NHTSA Summary:**

I BOUGHT A 2010 TOYOTA CAMRY IN SEPT. I CALLED MY DEALERSHIP 2 WEEKS AFTER I BOUGHT IT NOTICING THAT MY CAR REVS UP FOR NO REASON & DOESN'T SHIFT RIGHT. I CONTACTED ANOTHER TOYOTA DEALERSHIP RECENTLY ABOUT IT NOT SHIFTING RIGHT & THEY SAID THEY HAVE HAD SEVERAL COMPLAINTS ABOUT THE SAME THING. MY MOM HAS A 2007 TOYOTA 4-RUNNER & THE GAS PEDAL STUCK 3X ON HER & MY STEPDAD LAST SUMMER ON THE INTERSTATE. NOT KNOWING WHAT TO DO, HE TURNED OFF THE IGNITION & COASTED TO THE SIDE OF THE INTERSTATE. THEY CONTACTED MARION, IL TOYOTA DEALERSHIP WHERE THEY BOUGHT IT & THEY GAVE MY PARENTS A HARD TIME & WAS VERY HATEFUL. AFTER THE 3RD TIME THEY FINALLY CLEANED THE "THROTTLE BODY" & HASN'T DONE IT SINCE YET SHE HASN'T DROVE IT MUCH SINCE SHE IS SCARED FOR HER LIFE. SHE HAS BEEN AN AVID TOYOTA OWNER. SHE HAS OWNED 3 4-RUNNERS AND IS THINKING ABOUT GOING TO SOMETHING ELSE MAINLY ALSO BECAUSE HER DEALERSHIP IS BEING HATEFUL ABOUT ALL OF THIS. I'M SCARED FOR HER & OF COURSE FOR MYSELF SINCE THE TOYOTA 4-RUNNERS ARE NOT ON THE RECALL LIST.

**Vehicle:** 2007 LEXUS GX470  
**Location of Incident:** MORRILTON, AR

**NHTSA Summary:**

ON 8/15/09 I WAS IN MY 07/LEXUS/GX470/WGN V-8. I HAD PARKED IN OUR HOSPITAL PARKING LOT WHERE I VOLUNTEER. I WAS MOVING MY VEHICLE FROM THE W SIDE OF THE PARKING LOT TO THE E SIDE OF THE LOT TO ENTER ANOTHER AREA OF THE HOSPITAL. MY AUNT WAS WITH ME THE AUXILIARY PRESIDENT WALKED DOWN THE SIDEWALK TO MEET US. I DROVE TO THAT AREA SLOWLY CAME TO A PARKING SPACE WAS SLOWLY PULLING INTO THE SPACE, A FEW FEET FROM THE SIDEWALK MY CAR WENT ABSOLUTELY WILD AND CRAZY, IT SOUND AND ACTED LIKE AN ANGRY VIOLENT ANIMAL, IT JUMPED THE SIDEWALK, I MANAGED TO MISS A TREE THAT WAS IN ITS PATH, IT WENT UP A GRASSY AREA ALONG THE SIDEWALK HEADED FOR THE FRONT OF THE HOSPITAL, I THREW THE CAR OUT OF GEAR AND IT STOPPED. WE WERE NOT HURT, THE AUXILIARY PRESIDENT WITNESSED THIS AS SHE WAS WALKING DOWN THE SIDEWALK. I CANNOT DESCRIBE TO YOU HOW I FELT, THERE ARE NO WORDS TO DESCRIBE THIS HORRIFIC EXPERIENCE, MY AUNT AND AUXILIARY PRESIDENT WERE ALSO SPEECHLESS AND HORRIFIED. I SLOWLY DROVE HOME IN THE VEHICLE, IMMEDIATELY CALLED LEXUS LITTLE ROCK, AR WHICH IS WHERE I PURCHASED THE CAR. THEY TOLD ME IT HAD TO BE THE FLOORMAT, I CHECKED IT AND IT IS SECURED WITH GROMETS, THEY THEY TOLD ME IT HAD TO DRIVER ERROR WHICH I DON'T THINK IT WAS, I HAD MY FOOT ON THE BRAKE, THEY SAID I MOST PROBABLY HAD IT ON THE GAS ALSO. I CANNOT PROVE THAT I DID OR I DIDN'T, I DID NOT LOOK DOWN, I WAS TRYING TO STOP THE CAR. THE CAR DID DIG UP SOD WHEN IT WAS GOING CRAZY ALONG THE SIDEWALK WHATEVER THAT MEANS. I HAD ROADSIDE TAKE MY CAR IN THEIR LEXUS CHECKED IT OUT, FOUND NOTHING WRONG. I HAVE DRIVEN IT SINCE NO INCIDENTS. MY INVOICE DOES NOT SHOW I HAD A PROBLEM, CALLED MY DEALER LAST WEEK TO VOICE MY CONCERN ABOUT ALL THE RECALLS, ASK WHY SUDDEN ACCELERATION WAS NOT DOCUMENTED ON INVOICE, HE STAMMERED SAID WELL IT SAYS YOUR BRAKES WERE SPONGY AND GRABBY, ALSO A COMPLAINT BUT THAT WAS DEFINITELY NOT WHY MY CAR WAS HAULED IN. WOULD YOU PLEASE DOCUMENT THIS AND DO YOU HAVE ANY ADVICE.

**Date of Incident:** 20090815  
**Vehicle:** 2009 TOYOTA COROLLA  
**Location of Incident:** CHEVY CHASE, MD

**NHTSA Summary:**

WE PURCHASED A 2009 TOYOTA COROLLA LAST SPRING FROM COLEMAN'S TOYOTA IN ROCKVILLE, MD. IN AUGUST, WE HAD A FRIGHTENING EXPERIENCE. THE TEMPORARY DRIVER'S FLOOR PAD BECAME LOOSE AND CREPT OVER THE ACCELERATOR, MAKING IT NECESSARY TO STOP THE CAR AND REMOVE THE PAD. AT THAT TIME, WE HAD NOT HEARD OR SEEN ANY NEWS ABOUT A RECALL, BUT WERE TOLD BY OUR COLEMAN'S SALESMAN THAT WE WOULD HAVE TO PAY \$200 FOR FRONT SEAT FLOOR PADS THAT WOULD BE CLIPPED ON THE FLOOR. HE SAID TOYOTA DID NOT CONSIDER ATTACHABLE FLOOR PADS STANDARD EQUIPMENT IN THE PRICE OF A CAR. HE FINALLY SOLD ME ATTACHABLE PADS FOR \$40 ON SEPT. 18, 2009. WE HAVE NOT HAD A PROBLEM SINCE THEN, BUT WE WONDER WHY NHTSA WOULD ALLOW A CAR DEALER TO SELL ANY CAR WITHOUT FIRMLY PLACED FLOOR PADS ARE PART OF THE STICKER PRICE. IT IS NOW FEB. 12, 2010, AND WE HAVE NOT RECEIVED ANY RECALL NOTICE FOR THE ACCELERATOR PROBLEM. MY WIFE IS FRIGHTENED TO USE THE CAR ON ANY MAJOR HIGHWAY.

C-1472

**Toyota ID Number:**  
**NHTSA ODI Number:** 10313046  
**Date of Incident:** 20090815  
**Vehicle:** 2010 TOYOTA CAMRY  
**Location of Incident:** FRAMINGHAM, MA

**NHTSA Summary:**  
IN AUGUST 2009 I PURCHASED A 4-CYLINDER AUTOMATIC 2010 TOYOTA CAMRY LE IMMEDIATELY AFTER TAKING DELIVERY I NOTICED THAT THE CAR HESITATED WHEN I PRESSED THE ACCELERATOR. WHEN I PRESS THE ACCELERATOR IT FEELS LIKE THE ENGINE IS NOT GETTING SUFFICIENT AMOUNT OF GAS AND IT WILL STALL. IT TAKES A NOTICEABLE AMOUNT OF TIME FOR THE ENGINE TO RESPOND TO THE DEMAND FROM THE ACCELERATOR PADDLE. UPON CONTACTING THE DEALER I WAS TOLD THAT ACCELERATION WILL SMOOTH OUT AFTER A COUPLE OF WEEKS. HOWEVER, SEVEN MONTHS LATER THE HESITATION IS STILL THERE. FROM POSTINGS ON THE INTERNET IT APPEARS THAT THIS HAS BEEN AN ON GOING ISSUE WITH CAMRY WHICH TOYOTA HAS KNOWN FOR MANY YEARS BUT INSTEAD OF FIXING THE PROBLEM THE COMPANY HAS TRIED TO ADDRESS IT THROUGH TSBS INCLUDING, BUT NOT LIMITED TO, EG056-06 AND EG036-07. BASED ON MY EXPERIENCE WITH 2010 CAMRY AND EXPERIENCE OF MANY OTHER 2010 CAMRY OWNERS POSTED ON THE WEB IT IS OBVIOUS THAT THIS PROBLEM CONTINUES TO EXIST. IN ADDITION TO BEING A DESIGN FLAW IT IS ALSO A SAFETY HAZARD BECAUSE THE CAR DOES NOT REACT NORMALLY WHEN THE DRIVER PRESSES THE ACCELERATOR. THIS IS PARTICULARLY DANGEROUS WHEN MERGING INTO TRAFFIC OR GETTING ON A HIGHWAY. CAR'S HESITATION BEFORE PICKING UP SPEED CAN LEAD DRIVER TO MISJUDGE THE TIME NEEDED TO MERGE INTO TRAFFIC WHICH CAN RESULT IN SERIOUS ACCIDENT. REGRETFULLY THIS IS JUST ONE OTHER SAFETY ISSUE THAT TOYOTA HAS OPTED TO IGNORE. IT MAYBE WORTHWHILE TO NOTE THAT THIS ACCELERATION HESITATION PROBLEM IS TIED TO THE SAME ELECTRONIC MODULE THAT CONTROLS THE SPEED OF THE CAR AND ACCORDING TO MANY EXPERTS MAYBE THE ACTUAL CAUSE OF CAMRY'S SUDDEN ACCELERATION.

**NHTSA ODI Number:** 10314183  
**Date of Incident:** 20090815  
**Vehicle:** 2009 TOYOTA TACOMA  
**Location of Incident:** GOLDSBORO, NC

**NHTSA Summary:**  
AS THE VEHICLE IS COMING TO A STOP AND I AM PUTTING ON THE BRAKE, THE ENGINE REVS UP UNCONTROLLABLY. MY FOOT IS PRESSED HARD ON THE BRAKE, AND IS NOWHERE NEAR THE ACCELERATOR. THE ONLY WAY I CAN STOP IT IS TO QUICKLY PUT IT INTO NEUTRAL. I KEEP IT IN NEUTRAL AND KEEP PRESSING MY LEFT FOOT HARD ON THE BRAKE. AFTER IT REVS UP TO ABOUT 6000 RPM, IT FINALLY GOES BACK TO IDLE. THIS HAS HAPPENED ON FOUR DIFFERENT OCCASIONS IN THE LAST FIVE MONTHS. THE FIRST INCIDENT OCCURRED WITHIN A COUPLE WEEKS AFTER I PURCHASED MY BRAND NEW VEHICLE. I HAVE TAKEN THIS VEHICLE INTO THE TOYOTA SERVICE CENTER TWICE FOR THIS PROBLEM. THEY DIDN'T KNOW HOW TO FIX IT SINCE THEY SAY IT HAS TO BE DOING IT WHEN THEY LOOK AT IT. THEY HAVE DOCUMENTED IT IN THEIR FILES AND CONFIRMED THAT THE UNEXPLAINED ACCELERATION IS NOT CAUSED BY A FLOOR MAT DEFECT.

BACKING OUT OF PARKING SPACE IN SMALL PARKING LOT, CAR ACCELERATED OUT OF CONTROL. WOULD NOT STOP WHEN STEPPED ON BRAKE AND CRASHED INTO TWO OTHER CARS. REPORTED TO DMV IN CA, WHERE CAR REGISTERED, ALTHOUGH ACCIDENT OCCURED IN NEVADA. CAR SEVERLY DAMAGED AND REPAIRED BY INSURANCE CO. LEXUS DEALER CHECKED CAR AFTER REPAIR AND BLAMED FLOOR MATS BUT WE DISAGREE. IF ANYONE HAD BEEN BEHIND CAR THEY WOULD HAVE BEEN KILLED OR INJURED.

**Date of Incident:** 20090815  
**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** PEORIA, AZ

**NHTSA Summary:**  
NOW THAT THE TOYOTA PROBLEMS HAVE RECEIVED SUCH WIDEAPREAD COVERAGE, I WANTED TO REPORT WHAT I BELIEVE IS A PROBLEM ON MY WIFE'S 2006 TOYOTA TACOMA. ON SEVERAL OCCASIONS OVER THE LAST 3 1/2 YEARS, WHEN USING THE CRUISE CONTROL, WHEN THERE WAS AN UPGRADE REQUIRING THE CRUISE CONTROL TO INCREASE POWER TO MAINTAIN SPEED, THE CRUISE CONTROL WOULD SIMPLY START THE VEHICLE ACCELERATING WITHOUT STOPPING AND I HAD TO TURN OFF THE CRUISE CONTROL. I DIDN'T THINK TOO MUCH ABOUT IT UNTIL THE RECALLS AS I SIMPLY DON'T USE IT--JUST THOUGHT IT WAS POORLY DESIGNED COMPARED TO EVERY OTHER ONE I HAVE EVER HAD.

**Additional Summary:**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**C-1474**

MANIPULATING CRUISE CONTROL. 117 DOWNHILL UNINTENDED ACCELERATION, NO BRAKE RESPONSE, MOVED TO ROCKY LEFT SHOULDER, THROWING ROCKS NOISY BUT MAY MAY HAVE HELPED SLOW ME BUT BRAKES WOULD NOT DEPRESS, IN SOME ORDER? SHIFTED TO NEUTRAL, TURNED OFF KEY, EMERGENCY BRAKE, BRAKES NOW WORKING. ONLY TIME IT HAPPENED. A FEW WEEKS LATER TOYOTA SAYS REMOVE FLOOR MAT, DID THAT ALSO QUIT USING CRUISE CONTROL AS OFTEN I THINK I USE IT A LOT MORE THAN MOST PEOPLE. CONCERNED NOW THAT BOTH LOCALLY AND NATIONALLY TOYOTA WON'T TALK TO ME BECAUSE MY YEAR (2007) MATRIX IS NOT ON THE RECALL LIST.

**NHTSA ODI Number:** 10331222  
**Date of Incident:** 20090815  
**Vehicle:** 2009 TOYOTA RAV4  
**Location of Incident:** STOW, MA

**NHTSA Summary:**  
AS I WAS LEAVING A PARKING LOT I DEPRESSED THE BRAKE AS THERE WAS ONGOING TRAFFIC COMING ON THE ROAD I WAS ENTERING. THE CAR ACCELERATED AND CONTINUED TO RACE AS I PUT INCREASING PRESSURE ON THE BRAKE AND THE CAR DID MOVE FORWARD SLIGHTLY. THIS HAPPENED TWICE ON A CAR THAT HAD LESS THAN 900 MILES. I HAVE STOPPED DRIVING THE CAR, A TOYOTA 2009 RAV 4. IT WAS PICKED UP BY A TOYOTA DEALER JUST RECENTLY AND IS BEING TESTED. BASED ON THEIR COMMENT THAT IN THE PAST THEY HAVE BEEN UNABLE TO REPRODUCE THIS PROBLEM EVEN THOUGH THERE ARE MORE AND MORE REPORTS OF THIS PROBLEM. I CURRENTLY HAVE 3 OTHER CARS AND HAVE NEVER EXPERIENCED THIS PROBLEM. IN FACT IN OVER 40 YEARS OF DRIVING THIS HAVE NEVER OCCURED BEFORE. IT IS OBVIOUSLY A CAR FAILURE NOT A DRIVER PROBLEM. THIS IS A SERIOUS ACCIDENT WAITING TO HAPPEN

**NHTSA Summary:**  
TL\* THE CONTACT OWNS A 2004 TOYOTA CAMRY 4-CYLINDER VEHICLE WHICH WAS PURCHASED IN 2004. WHILE DRIVING SPEEDS OF LESS THAN 2 MPH THERE WAS AN UNEXPECTED SURGE AT 3,000 RPMS, THE VEHICLE RAPIDLY ACCELERATED AND THE CONTACT ALMOST CRASHED INTO THE GARAGE. AN INDEPENDENT MECHANIC STATED THAT THERE WAS A FAULTY COMPUTER CHIP IN THE GAS PEDAL. THE COMPUTER CHIP WAS REPLACED AT THE OWNER'S EXPENSE FOR \$750. THE MANUFACTURER ADVISED THE CONTACT THAT THEY WOULD CALL HIM BACK AFTER THEY SPOKE WITH MANAGEMENT. THE FAILURE AND CURRENT MILEAGES WERE APPROXIMATELY 26,000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10290818  
**Date of Incident:** 20090816  
**Vehicle:** 2003 TOYOTA COROLLA  
**Location of Incident:** WATERBURY, CT

**NHTSA Summary:**  
TL\* THE CONTACT OWNS A 2003 TOYOTA COROLLA. WHILE APPROACHING A STOP LIGHT BETWEEN 2 TO 10 MPH THE VEHICLE ACCELERATED PAST THE LIGHT WITHOUT INTENTION. THE VEHICLE WAS TAKEN TO THE DEALER, BUT THEY COULD NOT FIND THE PROBLEM. THE FAILURE MILEAGE WAS 105,000.

**Location of Incident:** OLEAN, NY

**NHTSA Summary:**  
I STARTED UP MY 2009 TOYOTA COROLLA, THEN WITH MY FOOT ON THE BREAK, I PUT THE CAR'S GEAR INTO REVERSE. THE CAR STARTED BACKING UP, ACCELERATING UNCONTROLLABLY. THE BRAKE WOULD NOT STOP THE CAR. I NEVER TOUCHED THE ACCELERATOR FROM THE TIME I STARTED THE CAR. THE CAR STOPPED WHEN IT RAN INTO ANOTHER PARKED VEHICLE. I TOOK THE CAR TO THE TOYOTA DEALERSHIP IN BRADFORD, PA. THE SERVICE MANAGER TOLD ME THAT THERE WAS NOTHING WRONG WITH THE CAR. HE SAID THAT I STEPPED ON THE BRAKE TOO HARD AND THAT DISABLES THE ANTI-LOCK BRAKES. THEY REFUSED TO LOOK AT THE CAR. THERE WERE NO FLOORMATS IN MY VEHICLE. THE TOYOTA DEALERSHIP WILL NOT LOOK AT MY CAR BECAUSE THEY SAY THAT IT IS NOT COVERED BY THE RECALL BECAUSE ITS VIN NUMBER BEGINS WITH A J, WHICH MEANS IT WAS MANUFACTURED IN JAPAN. I AM SCARED TO DRIVE IT BECAUSE I HAVE ALREADY HAD THE ACCELERATION PROBLEM ONCE AND CRASHED.

**Date of Incident:** 20090817  
**Vehicle:** 2003 TOYOTA MATRIX  
**Location of Incident:** OBERLIN, OH

**NHTSA Summary:**  
I HAVE HAD FOUR INSTANCES OF SUDDEN ACCELERATION IN A 2003 TOYOTA MARIX XRS OVER A PERIOD OF 8 YEARS. IN EACH INSTANCE, I WAS PULLING INTO A CARPORT AT A SLOW SPEED WITH MY FOOT ON THE BRAKE WHEN THE ENGINE SUDDENLY ACCELERATED DESPITE THE FACT THAT MY FOOT WAS ON THE BRAKE, NOT THE GAS PEDAL. IN ALL INSTANCES, I WAS ABLE TO PRESS HARD ON THE BRAKE AND COME TO A STOP. AFTER THE SECOND INCIDENT, I TOOK THE CAR INTO MY TOYOTA DEALER AND TOLD THEM WHAT HAD HAPPENED TWICE. THEY CHECKED OUT THE CAR AND SAID NOTHING WAS WRONG WITH IT. I HAVE HAD TWO OTHER INCIDENTS SINCE THEN. I LIVE IN A RETIREMENT COMMUNITY AND HAVE TOLD THE AUTHORITIES HERE THAT IF I EVER DRIVE THE CAR THROUGH THE CARPORT WALL IT WILL BE DUE TO SUDDEN ACCELERATION OF MY MATRIX. THE INCIDENTS ARE WIDE-SPREAD -- PERHAPS EVERY TWO YEARS. SO IT IS A LITTLE HARD TO GET TOYOTA TO PAY ANY ATTENTION TO THE COMPLAINT. PLEASE CHECK THE ELECTRONICS -- IT IS OBVIOUSLY NOT MECHANICAL. I HAVE GIVEN THE DATE OF THE LAST INCIDENT BELOW.

**NHTSA Summary:**  
WHEN BACKING UP, THE CAR WILL, ON OCCASION, AUTOMATICALLY ACCELERATE EXCESSIVELY. THIS CAUSES THE DRIVER TO NEED TO STEP AGGRESSIVELY ON THE BRAKE IN ORDER TO CONTROL THE CAR. THIS CYCLE OF "RACE AND BRAKE" CONTINUES UNTIL OUR NEED TO REVERSE IS COMPLETE. ONCE WE ARE IN DRIVE THERE IS NO FURTHER PROBLEM. THIS HAS OCCURRED ABOUT SIX TIMES SINCE WE PURCHASED THE CAR IN LATE JULY. IT HAS MOST OFTEN OCCURRED WHEN IT IS THE INITIAL DRIVE OF THE DAY, BUT THE MOST RECENT TIME THE CAR HAD ALREADY BEEN DRIVEN 100 MILES AND HAD BEEN IDLING FOR SEVERAL MINUTES. WE CONTACTED THE DEALERSHIP FROM WHICH WE BOUGHT THE CAR. THEY HAVE NOT HEARD OF THE ISSUE. WE ALSO TOOK IT INTO OUR LOCAL DEALERSHIP. THEY WERE, OF COURSE, NOT ABLE TO REPLICATE THE PROBLEM. NO RESOLUTION OR CORRECTION HAS OCCURRED.

**Vehicle:** 2009 TOYOTA TACOMA  
**Location of Incident:** SPRINGFIELD, MA

**NHTSA Summary:**  
TL-THE CONTACT OWNS A 2009 TOYOTA TACOMA. WHILE DRIVING APPROXIMATELY 65 MPH ON NORMAL ROAD CONDITIONS, THE CRUISE CONTROL SYSTEM UNEXPECTEDLY ENGAGED WITHOUT ASSISTANCE. THE VEHICLE BEGAN TO ACCELERATE AT AN UNEXPECTED SPEED RATE OF 95 MPH. THE ENGINE WAS SURGING IN THE RANGE OF HIGH ENGINE IDLE. THE VEHICLE REVVED EXCESSIVELY HIGH RPM'S. THE BRAKE PEDAL REQUIRED GREATER FORCE. THE GEAR SHIFTER WAS PLACED INTO THE "NEUTRAL" POSITION, FOLLOWED BY A REDUCTION IN THE SPEED RATE. THE DRIVER PULLED OVER TO THE SIDE OF THE ROAD WITH CAUTION. THE GEAR WAS SHIFTED INTO THE "PARK" POSITION; AND THE ENGINE WAS TURNED OFF. THE VEHICLE WAS RESTARTED AND RESUMED NORMAL OPERATION. THE VEHICLE WAS TAKEN TO AN AUTHORIZED DEALER FOR INSPECTION. THE TECHNICIAN STATED THE COMPUTERIZED SYSTEM POSSIBLY RESET. ALSO, THE FAILURE POSSIBLY WAS CONTRIBUTED TO THE FLOOR MAT NOT PROPERLY SECURED UNDERNEATH THE ACCELERATOR PEDAL INTERFERING WITH THE FUNCTIONING. THE DRIVER RETURNED THE VEHICLE TO THE AUTHORIZED DEALER DUE TO THE SAFETY HAZARD. THE FAILURE AND CURRENT MILEAGES WERE MILEAGE 3,100. THE VIN WAS UNAVAILABLE AT THE TIME OF FILING THE SAFETY COMPLAINT FORM. JS

**Date of Incident:** 20090820  
**Vehicle:** 2008 TOYOTA RAV4  
**Location of Incident:** BUFFALO, NY

**NHTSA Summary:**  
LAST AUGUST I EXPERIENCED A STUCK ACCELERATOR ON MY 2008 TOYOTA RAV4. IT HAPPENED ONLY ONCE AND HASN'T REPEATED. IT WAS WHILE APPROACHING AN INTERSECTION RED LIGHT FORTUNATELY WITH NO CARS IN FRONT OF ME. I WAS ABLE TO OVERCOME THE ACCELERATION BY STANDING ON THE BRAKE AND SHIFTING INTO NEUTRAL. WHEN TOYOTA CAME OUT WITH THE RECALL FOR FLOOR MATS MY CAR WAS NOT ONE OF THE MODELS WITH THOSE TYPR OF FLOOR MATS AND THE MATS IN THE CAR ARE FASTENED DOWN. TOYOTA'S CURRENT RECALL DOES NOT INCLUDE THIS MODEL AND A CHECK OF THE ACCELERATOR PEDAL CONFIRMS THAT THIS IS NOT ONE OF THE CURRENT PEDAL REPLACEMENTS. MY VEHICLE WAS PRODUCED IN JAPAN NOT THE USA.  
**C-1481**

#### Safety Research & Strategies

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SUSPECT THAT THIS WAS MORE OF AN ELECTRONIC PROBLEM THAN A PEDAL PROBLEM. I'M CONCERNED THAT IT COULD HAPPEN AGAIN. SINCE MY YEAR AND MODEL IS NOT ON THE RECALL HOW CAN I GET HELP BEFORE I OR MY WIFE EXPERIENCE IT AGAIN?

**Vehicle:** 2005 TOYOTA HIGHLANDER  
**Location of Incident:** WORCESTER, MA

**NHTSA Summary:**  
AN AFTERNOON DURING AUGUST OR EARLY SEPTEMBER 2009 I WAS DRIVING MY 2005 HIGHLANDER IN A HIGH TRAFFIC ROUTE WHEN THE ACCELERATOR PEDAL GOY STUCK DOWN, LEADING TO AN INITIAL HIGH SPEED AND STEADILY HIGH RPMs (6-7000). I WAS ABLE TO CONTROL THE SPEED BY STEPPING DOWN THE BRAKE PEDAL WITH BOTH FEET WHILE KEEPING EXCEEDINGLY HIGH RPMs ON HEAVY TRAFFIC. IN THE EMOTIONAL AND PHYSICAL STRESS OF THE MOMENT, I WAS ABLE TO DRIVE TO A BUILDING ENTRANCE. WITH THE CAR ON "PARKING" POSITION, THE RPMs KEPT HIGH AND DID NOT DECREASE DESPITE STEPPING FURTHER ON THE ACCELERATOR PEDAL TRYING TO "UNSTUCK" IT, WHICH WAS UNSUCCESSFUL. FINALLY I TURNED OFF THE IGNITION. AFTER TURNING THE CAR BACK ON, THE PROBLEM DID NOT RECURRENT. I TOOK THE CAR TO ITS REGULAR MAINTENANCE SERVICE IN HARR TOYOTA (100 GOLD STAR BLVD., WORCESTER, MA) IN SEPT. 19, 2009, EXPLAINED THE EVENT, THEY DOCUMENTED IT, AND APPLIED THE 60F CARPET CLIP RECALL. THERE HAS BEEN NO SIMILAR INCIDENT SINCE THEN. I REPORTED THE INCIDENT TO TOYOTA COMPANY WITH DOCUMENTATION # 1002135597. TOYOTA CLAIMS THEY WILL NOT APPLY THE CURRENT RECALL ACCELERATOR FIX TO MY CAR BECAUSE IT IS NOT ON THE OFFICIAL RECALL AND THE CAR WAS BUILT IN JAPAN (BASED ON VIN), WITH A DIFFERENT ACCELERATOR PEDAL DESIGN AND CONSTRUCTION.

**NHTSA Summary:**  
Excerpt from USA Today news article "They died in Toyotas, leaving many questions" - Jane Zakutansky's incident

"As she and her daughter drove through downtown Scotch Plains that Friday afternoon, she decided to pull over and have her daughter drop some letters into a blue postal box by the side of the road. But as she tried to slow down, the car wouldn't stop.

"My daughter said, 'Mom, slow down!' And I said, 'I'm trying, I'm trying,'" recalls Zakutansky, then 58.

When the engine began revving, Zakutansky did the only thing she could think of: With her foot on the brake, she tried putting the car into park. That didn't work. The car slammed into reverse and sped backward, finally stopping 50 feet down the road when it hit a utility pole.

Zakutansky had no idea that in those few seconds, she'd struck someone. Ledzian, who was trying to cross the street, had been pinned between his own car and Zakutansky's. Her car then dragged him. He died a week later."

**Date of Incident:** 20090821  
**Vehicle:** 2004 TOYOTA CAMRY  
**Location of Incident:** EAST SYRACUSE, NY

**NHTSA Summary:**  
WE OWN A 2004 CAMRY LE. THIS CAR HAD BEEN IN TWO SEPARATE ACCIDENTS - ONE IN 23 DECEMBER 2007 AND 21 AUGUST 2009 WHEREIN THE ACCELERATOR TOOK OVER THE CAR CAUSING ACCIDENTS AND EXTENSIVE HOOD DAMAGES COSTING THE INSURANCE WELL OVER \$5,000. "I HAVE NO CONTROL OVER MY CAR" WAS THE ONLY REASON I CAN GIVE FOR THESE TWO INCIDENTS. THESE INCIDENTS WERE REPORTED TO ROMANO TOYOTA ONLY TO BE TOLD THAT MAINTENANCE CANNOT EXPLAIN WHY THESE UNCONTROLLABLE INCIDENTS HAPPENED. IN THE MEANTIME OUR INSURANCE COMPANY DROPPED US AND OUR INSURANCE PREMIUMS HAVE INCREASED. ON THE RECENT WAVE OF REPORTS ON TOYOTA CAMRY FAILURES, ROMANO TOYOTA WAS AGAIN APPROACHED TO HAVE MY CAMRY LE EVALUATED FOR THE SAME FAILURES. WE WERE TOLD THIS TIME THAT MY CAR IS NOT PART OF THE RECALL YEARS. DO WE HAVE TO WAIT UNTIL THERE IS A LOSS OF LIFE BEFORE SOMETHING IS DONE WITH MY CAR? THIS HAS BEEN HAPPENING SPORADICALLY OVER THE COURSE OF THE YEARS OF OWNERSHIP. ALTHOUGH BOTH INCIDENTS WERE NOT REPORTED TO THE POLICE, THE INSURANCE COMPANY HAD THEIR REPRESENTATIVES INSPECT THE DAMAGES.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**C-1484**

WHILE DRIVING HOME WITH MY WIFE IN HER 2009 TOYOTA CAMRY LE AND APPROACHING A TRAFFIC CONTROLLED INTERSECTION THAT WAS STILL SOME DISTANCE AWAY. WE SUDDENLY TRAVELED THE DISTANCE TO THE INTERSECTION VERY QUICKLY AND BY THE TIME I WAS ABLE TO SLOW THE VEHICLE DOWN, WE WERE IN THE MIDDLE OF THE INTERSECTION. THE RESULT WAS A COLLISION WITH ANOTHER VEHICLE CROSSING THE INTERSECTION. THE OTHER VEHICLE WAS NOT SIGNIFICANTLY DAMAGED, BUT OUR VEHICLE WAS A TOTAL LOSS. THANKFULLY, THERE WERE NO INJURIES. AT THE TIME, THE MOST REASONABLE EXPLANATION APPEARED TO BE INCLEMENT WEATHER; [IT HAPPENED DURING A STRONG RAIN STORM]. WE ASSUMED THAT WHAT SEEMED LIKE A VERY RAPID TRAVERSING OF DISTANCE AND THE UNRESPONSIVENESS OF THE VEHICLE WAS DUE TO POOR VISIBILITY AND SLIPPAGE. YET I REMEMBER REMARKING TO MY WIFE THAT THE VEHICLE HAD APPEARED TO ACCELERATE ON ITS OWN, BUT I HAD NO WAY OF CONFIRMING THIS. I AM NOW CONVINCED THAT THIS WAS ACTUALLY THE CAUSE. \*TW

**NHTSA Summary:**  
ORIGINALLY I OPENED ODI 10660806 / DE04021 IN EARLY 2004 TO REPORT SUDDEN AND SHORT SURGES OF ACCELERATION WITH MY 2002 CAMRY LE. THIS PROBLEM HAS CONTINUES PERIODICALLY WITHOUT WARNING SINCE MY ORIGINAL REPORT. THE LAST OCCURRENCE WAS IN REVERSE ABOUT 5-6 MONTHS AGO. I AM VERY DISTURBED THAT TOYOTA HAS NOW RECALLED LATER MODEL YEAR CARS WITH SIMILAR PROBLEMS BUT CONTINUES TO NOT ADDRESS EARLIER MODELS WHICH FIRSTED REPORTED THE PROBLEM IN PE04021, DP05002, AND DP06003. I CALLED THIS MORNING AND WAS TOLD I WOULD NEED TO RE-ISSUE A NEW ODI TO GET THE NHSTA TO RE-OPEN THIS INVESTIGATION. I HAVE ADDITIONALLY OPENED CASES LOCALLY AND AT THE CORPORATE LEVEL WITH TOYOTA, AS I WANT THIS PROBLEM DOCUMENTED AGAINST MY VIN NUMBER. PLEASE, HELP THE OWNERS OF THE 2002 MODEL YEAR CARS THAT STARTED THESE INVESTIGATIONS ORIGINALLY BEFORE THERE ARE MORE DEATHS OR INJURIES AS THE PROBLEM STILL EXISTS \*CW

BEEN DIAGNOSED BY THE DEALERSHIP. THE CURRENT AND FAILURE MILEAGES WERE 14500.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10292642  
**Date of Incident:** 20090826  
**Vehicle:** 2003 TOYOTA COROLLA  
**Location of Incident:** DURHAM, NC

**NHTSA Summary:**  
I WAS DRIVING ALONG A RESIDENTIAL STREET (35 MPH) AND I WAS STOPPED AT A STOP LIGHT. WHEN THE LIGHT CHANGED, I BEGAN ACCELERATING UPHILL. ONCE I REACHED MY DESIRED SPEED OF 35 MPH, I REMOVED MY FOOT FROM THE ACCELERATOR BUT THE CAR CONTINUED TO INCREASE IN SPEED (I WAS STILL TRAVELING UPHILL). I IMMEDIATELY PUT THE CAR INTO NEUTRAL, PULLED OFF TO THE SIDE OF THE ROAD, AND TURNED THE IGNITION OFF. FIFTEEN MINUTES LATER, I TURNED THE CAR BACK ON AND THE ENGINE IMMEDIATELY REVVED UP, ALTHOUGH MY FOOT WAS NOT ON THE ACCELERATOR; BASED ON THE SOUND OF THE ENGINE, I WOULD ESTIMATE THAT IT SURPASSED 4000 RPM. I TURNED THE CAR OFF AND 15 MINUTES LATER I TURNED THE CAR ON ONLY TO MEET WITH THE SAME RESULTS. WHEN THE TOW TRUCK DRIVER ARRIVED, HE NOTICED THAT THE THROTTLE VALVE WAS STUCK IN THE OPEN POSITION. HE CLOSED THE THROTTLE AND THIS FIXED THE PROBLEM. A FEW DAYS LATER, I BROUGHT THE CAR TO A TOYOTA DEALER. THEY TOLD ME THAT THERE WAS A KINK IN THE THROTTLE CABLE THAT MAY HAVE CAUSED IT TO GET STUCK. HOWEVER, THEY WERE NOT ABLE TO PROVIDE A DEFINITIVE DIAGNOSIS BECAUSE THE PROBLEM WAS NOT REPEATABLE AND, THEREFORE, DID NOT REPLACE THE CABLE. I HAVE HAD THE CAR FOR 6.5 YEARS AND THIS HAS ONLY HAPPENED TWICE (THE OTHER TIME WAS IN EARLY 2008 AND OCCURRED ON A HIGHWAY). IN LIGHT OF RECENT MEDIA REPORTS ON ACCELERATION PROBLEMS IN TOYOTAS, I MUST NOTE THAT I HAVE THE ORIGINAL FLOOR MATS AND THAT THEY ARE, AND ALWAYS HAVE BEEN, PROPERLY SECURED IN PLACE. I DID NOT NOTICE WHETHER OR NOT THE ACCELERATOR WAS STUCK, BUT I WAS ONLY TRAVELING 35 MPH, SO THE ACCELERATOR WAS NOT DEPRESSED ENOUGH TO GET CAUGHT UNDER THE FLOOR MAT. THE PARTS ARE STILL AVAILABLE SINCE I DID NOT REPLACE THE CABLE. \*TR

**Additional Summary:**

**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** CANAL WINCHESTER, OH

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2004 TOYOTA SIENNA. WHILE DRIVING AT APPROXIMATELY 10 MPH, THE CONTACT EASED PRESSURE OFF THE ACCELERATOR PEDAL BUT THE VEHICLE SUDDENLY ACCELERATED. HE DEPRESSED THE BRAKE PEDAL TO PREVENT THE VEHICLE FROM CRASHING INTO ANOTHER VEHICLE IN FRONT. THE VEHICLE CONTINUED TO ACCELERATE UNTIL HE TURNED OFF THE IGNITION. WHEN HE RESTARTED THE VEHICLE, IT SEEMED TO FUNCTION NORMALLY. THE VEHICLE WAS TAKEN TO AN AUTHORIZED DEALERSHIP WHERE HE WAS INFORMED THAT THE PROBLEM WAS CAUSED BY THE FLOOR MAT. THE VIN WAS UNAVAILABLE AT THE TIME OF THE COMPLAINT. THE CURRENT AND FAILURE MILEAGES WERE UNKNOWN.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10282215  
**Date of Incident:** 20090827  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** LAKE OSWEGO, OR

**NHTSA Summary:**  
OUR 2007 LEXUS ES 350 ABRUPTLY AND WILDLY ACCELERATED WHILE MY WIFE WAS DRIVING ON THE FREEWAY. SHE STOOD ON THE BRAKES AND DEPRESSED THE PARKING BRAKE WHILE MOVING INTO THE SLOW LANE AND TOOK THE NEXT EXIT RAMP. THE CAR FINALLY SLOWED SOMEWHAT BEFORE REAR ENDING A STOPPED CAR. FORTUNATELY, NO ONE WAS HURT. THE CAR WAS TOWED TO THE LEXUS DEALER. THEIR DIAGNOSTIC COMPUTER SYSTEM DID NOT "CALL OUT" ANY PROBLEMS. THEY IMMEDIATELY BLAMED THE FLOOR MATS. HOWEVER, THE FLOOR MATS WERE TWO INCHES AWAY FROM THE GAS PEDAL. THEY THEN TRIED TO BRUSH ME OFF BY ASKING ME WHERE I WANTED THE CAR TOWED TO GET BODY WORK PERFORMED. I REFUSED AND ESCALATED TO LEXUS USA. THEY ARE NOW TRYING TO DETERMINE IF THEY CAN FIND A PROBLEM. THIS REMINDS ME OF THE AUDI ACCELERATION PROBLEM AND WARRANTS AN COMPLETE AND FULL INVESTIGATION. I KEEP THINKING THAT THE 2007 MODEL IS THE FIRST OF THE NEW ES BODY STYLES AND THERE IS SOMETHING TERRIBLY WRONG. \*TR

**Additional Summary:**

From Denverpost.com blog - Mrs. Eisner's post

"On August 27, 2009, a terrifying experience occurred with my 2-7 Lexus ES350 that suddenly accelerated while driving on the freeway. After pushing as hard as I could on both the brake and emergency brake I managed to steady the acceleration to a small degree, and was fortunately able to exit the freeway. The car finally came to a halt after rear ending a stopped car. It is a miracle no one was injured. There was an all wheel floor mat in the car positioned as far back from the accelerator as possible and could NOT have been the problem. Currently Lexus is undergoing an investigation. We filed a complaint with National Traffic and Safety Assoc. where other such claims have been submitted. The internet is full of sudden acceleration problems with the Lexus ES350, one recently in San Diego where four people were killed! Something is terribly wrong and warrants a complete and full investigation."

**Vehicle:** 2006 TOYOTA CAMRY  
**Location of Incident:** UPLAND, CA

**NHTSA Summary:**  
**Additional Summary:**  
On August 28, 2009, my mother (Noriko Uno) was killed in a sudden unintended acceleration accident when her 2006 Toyota Camry careened out of control, flipped over and crashed into a tree.

Excerpt from news article "Grieving family sues Toyota to expand recall" by John Guenther, University of Southern California

"The accident that killed Uno happened on Aug 28, 2009, the same day an off-duty CHP officer and his family were killed in a now-famous sudden acceleration crash in San Diego involving a Lexus.

On that day, Uno was traveling on Euclid Ave in the City of Upland when witnesses say her Camry suddenly accelerated and quickly reached speeds close to 100mph.

Bystanders say Uno swerved to avoid other cars and veered onto the wrong side of the road. The traffic report concluded Uno then entered the median to avoid an oncoming truck and collided with a telephone pole. The car went airborne and finally smashed into a tree.

Uno was declared dead at the scene of the crash.

The complaint filed by the plaintiff says Uno tried to stop the car with the brake pedal and the hand brake, which was found pulled up all the way."

**Date of Incident:** 20090829  
**Vehicle:** 2009 LEXUS ES350  
**Location of Incident:** CHULA VISTA, CA  
**NHTSA Summary:**  
**Additional Summary:**

"On August 28, 2009, four occupants of a 2009 Lexus ES350 tragically and unnecessarily died in Santee, California in San Diego County following a high speed loss of control and rollover event. The vehicle in question was a loaner car from Bob Baker Lexus in El Cajon, California. Driving the vehicle was Mark Saylor, 45, a 19 year veteran of the California Highway Patrol. Saylor had obtained the vehicle that day after dropping off his Lexus for service.

Witnesses report that Officer Saylor was maneuvering the Lexus in and out of traffic at high rates of speed on State Route 125, honking his horn with the hazard lights on, prior to the highway ending at an intersection. Officer Saylor attempted to negotiate a turn but could not avoid striking another vehicle and losing control because of his high rate of speed. The vehicle lost control, rolled several times, and caught fire. All four occupants are reported to have died almost immediately.

Prior to entering the intersection, an occupant of the vehicle called 911 emergency to report that the accelerator was stuck. He reported that the vehicle was traveling 120 miles per hour and that they were approaching an intersection. Occupants are heard telling each other to pray before a woman screams and the call suddenly ends.

Mark Saylor, his wife Cleofe Saylor, 45, and their 14 year old daughter Mahala all died in the crash. Cleofe's brother, Chris La Stella, 38, also died."

STATED THAT THEY DID NOT HAVE ANY ADDITIONAL COMPLAINTS SIMILAR TO HIS. ON A SEPARATE OCCASION, WHILE DRIVING AT SPEEDS OF APPROXIMATELY 25 MPH THROUGH A SCHOOL ZONE, THE VEHICLE ABNORMALLY ACCELERATED TO THE RIGHT AND CRASHED INTO A POLE. THE DRIVER ATTEMPTED TO STOP THE VEHICLE BY DEPRESSING THE BRAKES, TO NO AVAIL. THE VEHICLE WAS DESTROYED AND A POLICE REPORT WAS FILED ON SCENE. THE CONTACT WAS TRANSPORTED TO THE HOSPITAL AND SUFFERED MODERATE INJURIES AND BRUISES. THE MANUFACTURER INVESTIGATED THE VEHICLE FURTHER AND COULD NOT FIND ANY TECHNICAL ERRORS IN THE VEHICLE. THE CAUSE OF THE CRASH WAS INCONCLUSIVE. THE FAILURE MILEAGE WAS 40,000. THE VIN WAS NOT AVAILABLE.

**Location of Incident:** DUBLIN, OH  
**NHTSA Summary:**

BOUGHT MY 2010 CAMRY LAST AUG. NOTICED SUDDEN SPEEDS ONCE IN A WHILE. CALLED DEALER, THEY SAID IT WAS NORMAL. HERE RECENTLY, I HAD THE RECALL REPAIRS DONE. IT STILL FEELS AS IF THE CAR WANTS TO SPEED WITHOUT ME FOOT ON THE GAS. CALLED DEALERSHIP AND ONCE AGAIN THEY SAID IT WAS NORMAL BECAUSE OF THE DIFFERENT CLUTCH SYSTEM VS THAT OF OLDER CARS. IT DOESN'T FEEL NORMAL TO ME. I'M AFRAID TO DRIVE MY CAR BUT I HAVE NO CHOICE. I NEED IT FOR MY JOB WHICH DEMANDS ALOT OF DRIVING. NOT SURE WHAT TO DO AT THIS POINT.

**Date of Incident:** 20090831  
**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** WAYNESBORO, PA  
**NHTSA Summary:**

I PURCHASED A 2003 TOYOTA CAMRY IN THE FALL OF 2002. ONE WEEK AFTER THE PURCHASE I WAS AT A STOP SIGN, WITH MY FOOT ON THE BRAKE, AND THE CAR SUDDENLY ACCELERATED. I TAPPED THE ACCELERATOR BUT THE ENGINE CONTINUED TO ACCELERATE WITH THE TACHOMETER READING NEARLY 9,000 RPM'S. I TURNED THE ENGINE OFF WITH THE IGNITION. THE NEXT DAY I CALLED MY DEALER (FITZGERALD TOYOTA, CHAMBERSBURG, PA.) AND REPORTED THE INCIDENT AND IT WAS SUGGESTED I HAD STEPPED ON THE ACCELERATOR VS. THE BRAKE. I DIDN'T ARGUE THE POINT AND THE CAR PERFORMED FINE UP UNTIL TWO WEEKS AGO WHEN THE SAME THING HAPPENED TWICE WITHIN THREE DAYS. I SPOKE WITH FITZGERALD TOYOTA YESTERDAY (JAY NEWCOMER) TO ASCERTAIN IF ANYONE ELSE HAD REPORTED A SIMILAR PROBLEM. I WAS TOLD "FITZGERALD HADN'T HEARD ANYTHING ABOUT A PROBLEM WITH SUDDEN ACCELERATION. THIS MORNING I CHECKED ON THE INTERNET AND FOUND THIS PROBLEM WAS FAIRLY COMMON WITH TOYOTA'S OF THAT YEAR PLUS OTHER YEAR'S MODELS. IS THE NHTSA AWARE OF A PROBLEM WITH TOYOTA'S AND SUDDEN ACCELERATION? \*TR

**NHTSA Summary:**

2010 TOYOTA COROLLA. SUDDEN ACCELERATION \*GR THE CONSUMER STATED SINCE PURCHASING THE VEHICLE HE HAS HAD TWO ACCIDENTS DUE TO SUDDEN ACCELERATION. THE CONSUMER STATED HE WAS BACKING OUT OF HIS GARAGE, WHEN HALF WAY DOWN THE DRIVEWAY, THE VEHICLE SUDDENLY ACCELERATED. HE APPLIED THE BRAKE, BUT THE VEHICLE DID NOT RESPOND. THE VEHICLE CONTINUED TO BACK UP IN THE STREET AND WENT ACROSS THE ROAD AND HIT A CURB, WHERE IF FINALLY

**C-1495**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

STOPPED. THERE WAS NO DAMAGE. THE SECOND INCIDENT OCCURRED WHEN THE CONSUMER WAS BACKING OUT OF PARKING SPACE, AND THE VEHICLE SUDDENLY ACCELERATED, BUT WHEN HE APPLIED THE BRAKE, NOTHING HAPPENED. INSTEAD, IT KEPT GOING UNTIL HE HIT A TRUCK THAT WAS DOUBLE PARKED BEHIND HIM. AS THE CONSUMER PU THE GEAR INTO PARK, SO HE COULD TALK TO THE OWNER OF THE TRUCK, THE VEHICLE CONTINUED TO ACCELERATE AGAIN, ALMOST HITTING THE PARK VEHICLE IN FRONT OF THE CONSUMER. AS HE REPEATEDLY APPLIED THE BRAKE TO STOP THE VEHICLE, NOTHING HAPPENED SO HE FORCED THE GEAR TO PARK AND TURNED OFF THE ENGINE AND FINALLY THE VEHICLE STOPPED. THE CONSUMER STATED HIS RIGHT WRIST WAS A LITTLE SORE FROM FORCING THE GEAR INTO PARK AND HE COULDN'T LIFT ANYTHING FOR A DAY OR TWO. JB

**Location of Incident:** ARTESIA, CA  
**NHTSA Summary:**

I BOUGHT A TOYOTA COROLLA MARCH 2009. ON ABOUT SEPT. 1, 2009 I WAS DRIVING AROUND PALOS VERDES I SAW DONALD TRUMP'S GOLF COURSE SO I PULLED IN AND DROVE THROUGH THE DROP OFF AREA AND ASK THE GUY THAT WAS OUT THERE FOR A FLYER AND HE GAVE ME ONE AND THEM I WENT TO THE STOP SIGN TO LEAVE. I WAS PULLING OUT AND I SAW A SMALL TRUCK COMING SO I JUMPED ON THE ACCELERATOR TO GET AHEAD OF TRUCK AND WHEN I LET UP ON THE ACCELERATOR THE CAR DIDN'T SLOW DOWN. I THEN HAD TO PUSH ON MY BRAKES AS HARD AS I COULD WHILE PULLING ON THE STREWING WHEEL. REALLY HARD TO HELP ME PUSH THE BRAKE PEDAL. REAL HARD. THE CAR WOULD NOT STOP RUNNING FAST IT GOT STUCK IN PASSING GEAR MOLD AND WONT STOP FROM REALLY RACING THE ENGINE. I WAS REAL LUCKY THERE WAS A PLACE TO PULL OFF THE ROAD SO I PULLED INTO A SMALL PARKING AREA AND PUT THE CAR INTO PARK. I TURNED THE KEY OFF AND THEM I STARED THE CAR AGAIN AND IT WAS STILL RACING THE ENGINE REALLY REALLY FAST. SO I TURNED THE KEY OFF AGAIN AND I DIDN'T KNOW WHAT TO DO. I DIDN'T WANT TO DRIVE DOWN THE HILLS IN PALOS VERDES BECAUSE THAT WAS REALLY SCARY AND I THINK THAT IF I WASN'T UBE TO BEING AROUND CAR'S WITH MY X-HUSBAND A LOT. LIKE PULLING CAR'S WITH A ROPE TO START THEM AND THEN SLAMMING ON THE BRAKE WHEN IT STARTED TO KEEP FROM RUNNING INTO THE CAR THAT WAS TOWING ME. SOME OTHER PEOPLE COULD PANIC AND HAVE A REALLY BAD ACCIDENT. SO ANY WAY I HAD A FRIEND WITH ME AND I OPENED THE HOOD AND ASK HER TO GET INTO THE DRIVERS SIT TO PUMP ON THE GAS PEDDLE I TRIED TO SEE WERE THE LINKAGE WAS TO SEE IF I COULD DO SOMETHING TO STOP THE MOTOR FROM RACING. I COULD NOT SEE WHERE THE LINKAGE WAS AND I DIDN'T WANT TAKE THE COVER OF THE MOTOR BECAUSE I HAVEN'T DONE THAT ON NEWER CAR'S SO I GOT BACK INTO THE DRIVERS SEAT AND GOT MY PURSE OUT TO CALL THE AUTOMOBILE CLUB BUT BEFORE I DID THAT I THOUGHT I WOULD TRY STARTING THE CAR ONE MORE TIME AND IT WAS O.K. I TOOK THE CAR TO TOYOTA TO CHECK IF THEY COULDN'T GET TO DO THE SAME THING AND TRIED TO BLAME IT ON THE CARPET. \*TR. 2009 TOYOTA COROLLA I HAVE A FILE NUMBER 10284648 I FILED A COUPLE OF WEEKS AGO. MY CAR 'S GAS PEDAL DID NOT GET STUCK ON THE FLOOR MAT. TOYOTA IS MAKING UP A CHEAT EXCUSE FOR THE REAL PROBLEM THE GAS PEDAL IN MY CAR COMES FROM WAY UP UNDER THE DASH, HIGH ON THE FIRE WALL PEDAL ARM COMES DOWN TO ABOVE THE FLOOR MATS. I THINK YOU NEED TO DO YOUR OWN INVESTIGATING, I'LL LET YOU CHECK MY CAR EVEN. \*TR

**Date of Incident:** 20090901  
**Vehicle:** 2008 TOYOTA TACOMA  
**Location of Incident:** FLORENCE, MT

**NHTSA Summary:**  
MY ACCELERATOR STUCK TWO DIFFERENT TIMES DURING A RECENT DRIVE TO WORK.  
THOUGH I BELIEVE IT WAS DUE TO THE FLOOR MAT PROBLEM THAT HAS PROMPTED THE  
RECENT RECALL, MY ATTEMPT TO GET ANSWERS FROM THE LOCAL TOYOTA  
DEALERSHIP PROMPTED A RESPONSE THAT TOYOTA HADNT FIGURED OUT HOW TO FIX  
IT YET AND THEY WERE DRILLING HOLES IN THE BACK OF THE MAT AND USING ZIP TIES  
TO SECURE THE MAT TO THE FRONT OF THE SEAT FRAME. THAT WAS NOT HOW I  
WANTED IT FIXED. ATTEMPTS TO CONTACT TOYOTA OF AMERICA RESULTED IN LOTS OF  
RECORDED MESSAGES AND NOTHING MORE. I HAVE YET TO RECEIVE ANY OFFICIAL  
RECALL NOTICE, BUT, HAVING HAD THE TWO FRIGHTENING EXPERIENCES, I FEEL THE  
PROBLEM NEEDS TO BE ADDRESSED IMMEDIATELY BY THE MANUFACTURER. AND IT  
NEEDS TO BE MORE THAN INSTRUCTIONS TO REMOVE THE MAT. \*TR

**NHTSA ODI Number:** 10297789  
**Date of Incident:** 20090901  
**Vehicle:** 2004 TOYOTA COROLLA  
**Location of Incident:** DANVERS, MA

**NHTSA Summary:**  
REGARDING SUDDEN ACCELERATION IN THE TOYOTA COROLLA: ALTHOUGH THIS  
PROBLEM HAS RECENTLY BEEN WIDELY REPORTED ON THE NEWS IN OTHER MODELS I  
HAVE EXPERIENCED DOZENS OF EVENTS IN THE TOYOTA COROLLA FOR AN ENTIRELY  
DIFFERENT REASON. THE SPACING BETWEEN THE BRAKE PEDAL AND THE  
ACCELERATOR IS SO CLOSE THAT ANYONE WHO HAS BIG FEET SUCH AS ME ( I WEAR A  
MEN'S 12 WIDE SHOE) CAN EASILY HIT THE ACCELERATOR AT THE SAME TIME THE  
BRAKE IS HIT. THIS PROBLEM BECAME SUCH AN ISSUE FOR ME SINCE MY ELDERLY  
MOTHER OWNS 2 DIFFERENT TOYOTA COROLLA THAT I AVOID USING HER CARS  
WHENEVER POSSIBLE. HOWEVER BECAUSE SHE IS SO OLD AND CANNOT EASILY GET  
INTO CARS THAT ARE LOW TO THE GROUND BECAUSE OF THEIR SMALL WHEEL  
DIAMETERS I DO TAKE HER IN HER CAR AT TIMES. THERE IS HARDLY A SINGLE  
INSTANCE IN WHICH I DRIVE THE CAR THAT I DO NOT EXPERIENCE PROBLEMS. I ALSO  
TRIED ABOUT 5 YEARS AGO TO BUY MY OWN TOYOTA COROLLA BUT BEING AWARE OF  
THE PROBLEM I ASKED THE DEALER IF HE COULD MOVE THE BRAKE PEDAL AND HE  
TOLD ME THERE WAS NOTHING THAT COULD BE DONE. THIS CAR IS VERY DANGEROUS  
FOR ANYONE WITH FEET LARGER THAN THE NORMAL. I EXPECT THAT IN JAPAN THEY  
MUST HAVE SMALL FEET FOR CREATING SUCH A STUPID BLUNDER. THIS VEHICLE  
SHOULD BE REMOVED FROM THE ROAD. I EXPERIENCED THE PROBLEM IN MORE THAN  
ONE MODEL YEAR. MY MOTHER OWNS TWO DIFFERENT MODEL YEARS. THE CAR I TEST  
DROVE ON THE DEALERS LOT WAS ANOTHER MODEL YEAR. SO AT LEAST 3 DIFFERENT  
MODEL YEARS AFTER 2004 HAVE THE PROBLEM. IT CAN EASILY BE SEEN JUST BY  
LOOKING AT THE PEDAL SPACING. THIS BLUNDER IN DESIGN IS HARD TO BELIEVE SINCE  
IT IS SO STUPID. \*TR

**Additional Summary:**

**Date of Incident:** 20090901  
**Vehicle:** 2010 TOYOTA COROLLA  
**Location of Incident:** JONESBORO, AR

**NHTSA Summary:**  
FOR ENTIRE TIME OWNED - THERE IS A GAP OF SECONDS BETWEEN PRESSING GAS PEDAL  
AND ACTUAL ACCELERATION. WHEN I PRESS GAS PEDAL THERE IS A HESITATION  
LEADING ME TO PRESS HARDER. THEN OF COURSE THE CAR HAS A SUDDEN SPRINT IN  
ACCELERATION. THIS IS NOT SAFE. I HAVE HAD THE CAR FOR 5.5 MONTHS SO I AM  
GETTING BETTER AT WAITING INSTEAD OF PRESSING HARDER. BUT I FEEL THIS IS  
DEFINITELY A DEFECT. I INQUIRED OVER PHONE WITH SERVICE MANAGER WHERE I  
PURCHASED - EXPLANATION: I AM NOT USE TO A 4 CYLINDER, WHICH I BELIEVED  
BECAUSE I HAVE NEVER DRIVEN A 4 CYLINDER. BUT, I AM BEGINNING NOT TO BELIEVE  
THIS EXCUSE. \*TW

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I HAVE A 2008 TOYOTA COROLLA AND THE FLOOR MAT HAS GOTTEN STUCK UNDER THE  
GAS PEDAL, SIMILAR TO THE SITUATIONS LEADING UP TO THE RECALL ON THE 2009-2010  
COROLLAS. OVER THE COURSE OF A FEW DAYS OF DRIVING, THE FLOOR MAT WILL  
UNHOOK FROM THE HOOK IN THE FLOORBOARD AND SLOWLY GET JUMBLED UNDER THE  
GAS PEDAL AS I MOVE MY FEET BY GETTING IN AND OUT OF THE CAR. I WILL PUT IT  
BACK ON THE HOOK AND IT GETS JUMBLED AGAIN.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10312887  
**Date of Incident:** 20090901  
**Vehicle:** 2002 TOYOTA RAV4  
**Location of Incident:** HONOLULU, HI

**NHTSA Summary:**  
I OWN A 2002 TOYOTA RAV4. I'VE BEEN THE SOLE OWNER OF THIS VEHICLE AND  
PURCHASED IT BRAND NEW IN 2002 FROM A LOCAL HONOLULU TOYOTA DEALER. IN  
MIDLATE 2009, THE VEHICLE STARTED HAVING TRANSMISSION PROBLEMS: HARD  
SHIFTING IN LOWER GEARS 1, 2 & 3, HARD SHIFTING WHEN PLACING THE VEHICLE IN  
REVERSE, THE VEHICLE SHAKING AND VIBRATING WHEN SLOWING DOWN AND SUDDEN  
ACCELERATION FROM THE STOPPED POSITION WHEN THE GAS PEDAL IS SLOWLY  
PRESSED. I TOOK THE VEHICLE IN TO DETERMINE THE PROBLEM. AN INDEPENDENT  
MECHANIC INFORMED ME THAT TOYOTA ISSUED MEMO OUTLINING THE PROBLEMS I  
DESCRIBED ABOVE POSSIBLY DUE TO THE TRANSMISSION AND/OR THE ECU (COMPUTER  
THAT CONTROLS THE TRANSMISSION). A TOYOTA SERVICING MECHANIC INFORMED ME  
THAT MY 2002 RAV4 WAS NO LONGER UNDER DRIVETRAIN WARRANTY, SO REPAIR COST  
ARE MY RESPONSIBILITY. A QUICK WEB SEARCH OF "RAV4 TRANSMISSIONS" SHOWS  
THAT MANY OTHER RAV4 OWNERS SUFFER FROM SIMILAR PROBLEMS, RESULTING IN  
VERY HIGH REPAIR COSTS, ANYWHERE FROM \$3,000 UP TO \$8,000. THE VEHICLE STILL  
SUFFERS FROM THE ABOVE MENTIONED PROBLEMS, BUT DUE TO THE HIGH REPAIR  
ESTIMATES I AM UNABLE TO FIX THE VEHICLE.

**Additional Summary:**

**NHTSA ODI Number:** 10313328  
**Date of Incident:** 20090901  
**Vehicle:** 2005 TOYOTA PRIUS  
**Location of Incident:** ANAHEIM, CA

**NHTSA Summary:**  
I WAS STOPPED AT A STOP LIGHT IN MY CAR, A 2005 TOYOTA PRIUS. WHEN THE LIGHT  
TURNED GREEN I TOOK MY FOOT OFF THE BRAKE. THIS IS WHEN MY CAR QUICKLY  
ACCELERATED INTO THE CAR IN FRONT OF ME WHILE MY FOOT WAS NOT ON THE GAS  
OR THE BRAKE. AFTER THE INITIAL IMPACT MY CAR DROVE INTO THE CAR IN FRONT OF  
ME AGAIN. WHILE THIS WAS HAPPENING I APPLIED THE BRAKE BUT NOTHING HAPPENED.  
THE CAR STOPPED MOVING AFTER THE SECOND IMPACT AND CAME TO REST ON THE  
FRONT CAR'S BUMPER. THE DAMAGE TO THE CAR I HIT WAS \$1000, THE DAMAGE TO MY  
PRIUS WAS \$7000. TOYOTA HAD CONTACTED ME IN A FORM OF A RECALL ABOUT FLOOR  
MATS BEING THE CAUSE OF THIS PROBLEM. WHEN I CALLED TOYOTA OF ORANGE TELL  
THEM WHAT HAPPENED THEY LOOKED UP MY VIN NUMBER AND ASSURED ME MY CAR  
WAS NOT A PART OF ANY RECALL. THEY SAID I COULD BRING MY VEHICLE IN HOWEVER  
NOTHING WOULD BE DONE IF THEY COULD NOT RECREATE THE PROBLEM. SINCE THE  
INITIAL CRASH MY PRIUS HAS MIMICKED THIS SAME SITUATION A HANDFUL OF TIMES.  
NONE OF THE TIMES AFTER RESULTED IN A SECOND CRASH. I HAVE NOT TAKEN MY

**C-1499**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

PRIUS TO A DEALER TO HAVE THE PROBLEM LOOKED INTO. I DO NOT HAVE ANY OTHER  
MODE OF TRANSPORTATION AND TOYOTA DOES NOT OFFER LOANER CARS.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10314810  
**Date of Incident:** 20090901  
**Vehicle:** 1997 TOYOTA PREVIA  
**Location of Incident:** REDDING, CA

**NHTSA Summary:**  
MY TOYOTA PREVIA HAD A INCIDENT WITH A STUCK ACCELERATOR. I WAS  
EVENTUALLY ABLE TO CONTROL AND STOP VEHICLE WITH MAXIMUM FOOT BRAKE  
PRESSURE TO THE POINT OF GRINDING BRAKES AND TURNING IGNITION OFF WHEN  
AWAY FROM OTHER TRAFFIC ON HIGHWAY. I BELIEVE THIS INCIDENT WITH THE STUCK  
ACCELERATOR AND RED-LINING OF RPM'S LED TO A BLOWN HEAD GASKET THAT WAS  
NOT FISCALLY REPAIRABLE BY RECOMMENDATION OF AUTHORIZED TOYOTA  
REPAIRMAN.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10315979  
**Date of Incident:** 20090901  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** CANONSBURG, PA

**NHTSA Summary:**  
2002 TOYOTA CAMRY SE V6 - AROUND SEPTEMBER 2009 I BEGAN TO NOTICE SUDDEN  
SURGES IN ACCELERATION WHILE DRIVING BETWEEN 40-45 MPH. WITHOUT CHANGING  
THE POSITION OF THE GAS PEDAL, THE VEHICLE WOULD SURGE-HESITATE-SURGE  
SEVERAL TIMES THEN SUDDENLY STOP THE BEHAVIOR. SINCE THEN, I NOTICE IT  
OCCURS AT LEAST ONCE EVERY 3 OUT OF 4 TIMES I'M DRIVING THE CAR. TO ME, THIS IS  
NOT RELATED TO ANYTHING ON THE FLOOR OR THE GAS PEDAL ITSELF. IT APPEARS TO  
COME FROM WITHIN THE ENGINE OR OTHER COMPONENT. NO REPAIRS HAVE BEEN  
INVESTIGATED OR PERFORMED. I AM CONSIDERING A VISIT TO THE DEALER.

**Additional Summary:**

**Date of Incident:** 20090904  
**Vehicle:** 2006 TOYOTA TUNDRA  
**Location of Incident:** STATESVILLE, NC

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2006 TOYOTA TUNDRA. WHILE DRIVING 5 MPH INTO A PARKING LOT, THE ACCELERATOR PEDAL BECAME STUCK. THE VEHICLE UNCONTROLLABLY ACCELERATED OVER A CURB AND CRASHED INTO A BUILDING. THE CONTACT WAS APPLYING EXTREME PRESSURE TO THE BRAKE PEDAL; HOWEVER, THE VEHICLE WOULD NOT STOP. HE WAS FORCED TO SHIFT GEARS INTO NEUTRAL, REACH DOWN AND PULL THE PEDAL FROM THE FLOOR. THERE WERE NO INJURIES. THE VEHICLE WAS DRIVEN TO THE DEALER AND TESTED; YET, THE DEALER STATED THAT THERE WAS NOTHING WRONG WITH THE VEHICLE. THE DEALER ALSO TESTED THE MICRO CHIP IN THE ENGINE AND IT REGISTERED THERE WERE NO FAILURES. THE FAILURE MILEAGE WAS 29,828.

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** WEST COVINA, CA

**NHTSA Summary:**

MY TOYOTA CAMRY 2007 HAD A UNINTENDED ACCELERATION THAT CAUSES MY CAR CRASHED TO THE CAR INFRONT ME. TOYOYS DEALER DID SOMETHING IN THE CARPET AND ACCELERATION PEDAL YESTERDAY. I AM STILL AFRAID TO DRIVE THIS CAR FOR I STRONGLY BELIEVED THAT THE SENSOR OR THE ELECTRICAL THROTTLE ACTIVATE THE SUDDEN UNINTENDED ACCELERATION OF MY CAR. I ALSO BELIEVED THAT TOYOTA ARE NOT BEING HONEST IN FINDING A SOLUTION TO THESE PROBLEMS. I DON'T WANT TO EXPERIENCE AGAIN THE DEATH ACCELERATION THAT MAY OCCUR WHILE DRIVING THIS CAR. EVERYTHING TOYOTA DID TO MY CAR IS JUST BAND-AID SOLUTION AND NOT SOLVING THE MAIN CAUSE OF THE ACCIDENT WHICH IS THE ELECTRONIC THROTTLE AS IT HAPPENED TO ALL OTHER HIGH SPEED THAT CANNOT BE STOPPED BY THE DRIVER, AND CAUSED DEATHS TO ALL PASSENGER. I DO NOT WANT TO BE IN THEIR SEATS AND EXPERIENCED WHAT THEY WENT THROUGH LIVING OR DEAD. YOUR QUESTION BELOW OF "WERE THERE ANY DEATHS OR INJURIES?" IS TOO VAGUE. I DO NOT WANT TO EXPERIENCE DEATH WHILE DRIVING TOYOTA.

**Date of Incident:** 20090904  
**Vehicle:** 2000 TOYOTA CAMRY  
**Location of Incident:** SNELLVILLE, GA

**NHTSA Summary:**

I HAVE A 2000 TOYOTA CAMRY. I HAVE TAKEN THIS CAR IN FOR REQUIRED SERVICING AND REPORTED TO THE SERVICE TECHNICIAN THAT THE GAS PEDAL WAS STICKING. THIS IS NOTICED AFTER I HAVE STOP AND THEN STEP ON THE GAS PEDAL TO GO. THE GAS PEDAL STICKS ON THE TOP SO THERE IS A JERKING ACTION WHEN I START OFF. I HAVE PAID CLOSE ATTENTION TO HOW CLOSE I STOP BEHIND OTHER AUTOS SO THAT I DO NOT HIT THEM IN THE REAR IF IT JERKS WHEN I TAKE OFF. THIS DOES NOT HAPPEN AFTER EVERY STOP. THE SERVICE TECHNICIAN SUGGESTED I GO TO A RETAIL STORE TO PURCHASE SILICONE GREASE TO PUT ON THE ACCELERATOR. I HAVE DONE NOTHING BUT REMOVE THE FLOOR MAT TO MAKE SURE THAT IT WAS NOT A PROBLEM. I DO NOT HAVE THE VIN WITH ME AT THIS TIME BUT I CAN SUPPLY IT IF NEEDED.

**Date of Incident:** 20090907  
**Vehicle:** 2009 TOYOTA AVALON  
**Location of Incident:** INMAN, SC

**NHTSA Summary:**  
WE PICKED UP OUR NEW 2009 AVALON LIMITED ON 7/31/09. ON 9/7/09, AFTER RETURNING FROM A DRIVE, THE CAR ACCELERATED INTO THE GARAGE DOOR AS IT WAS OPENING. WE HAD STOPPED ABOUT 6 FEET FROM THE DOOR TO OPEN IT. AS WE RELEASED THE BRAKE PEDAL THE CAR SHOT FORWARD INTO THE DOOR. DAMAGE TO THE CAR AMOUNTED TO \$1500, AND ANOTHER \$1000 FOR THE GARAGE DOOR. I DID NOT FILE AN INSURANCE CLAIM. TOYOTA LATER RECALLED THE VEHICLE TO PUT A SPACER ON THE GAS PEDAL AND TO "RE-FLASH" THE COMPUTER. I BELIEVE THIS IS AN ELECTRICAL PROBLEM WITH THE GAS PEDAL CONTROL SYSTEM AND NOT A MECHANICAL PROBLEM. THE DEALERSHIP SAID THE SPACER WAS THE SOLUTION. I'VE ALSO RECEIVED NOTIFICATION OF A PROBLEM WITH THE FLOOR MATS, BUT HAVE NOT RECEIVED A RECALL NOTICE TO FIX IT. THE DEALER INDICATED THAT AN OVERRIDE ON THE BRAKE PEDAL (TO CUT OUT THE GAS PEDAL) WAS SUPPOSED TO BE PART OF THAT RECALL. THAT MIGHT HELP, BUT I'M STILL WAITING. THE PROBLEM OCCURED ONLY ONCE. ONCE WAS ENOUGH!

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THIS IS A DESCRIPTION OF AN EVENT THAT OCCURRED IN SEPTEMBER OF 2009. BELLINGHAM WASHINGTON. I WAS SOUTHBOUND ON I-5 APPROXIMATELY 25 MILES SOUTH OF SUNSET DRIVE. I WAS TRAVELING AT ABOUT 60 MPH, WHEN NOTICING A SLOW VEHICLE DIRECTLY ABOUT 300 FT AHEAD I SIGNALLED AND MOVED INTO THE PASSING LANE TO PASS THE SLOWER VEHICLE. TRAFFIC WAS FAIRLY LIGHT. JUST AS I WAS JUST PAST THE SLOW VEHICLE I NOTICED I WANTED TO TAKE THE UPCOMING OFF RAMP, SO I ACCELERATED BRIEFLY TO GAIN SPEED TO MOVE BACK INTO THE SLOWER LANE. FORTUNATLY TRAFIC WAS LIGHT BECAUSE THE VEHICLE STARTED RACING, I HAD LET OFF THE ACCELERATOR AND NOTHING HAPPENED, INSTEAD I APPLIED BOTH FEET FIRST GENTLY QUICKLY FIRMLY TO THE BREAK EVEN WITH THE BREAK FIRMLY APPLIED WITH BOTH FEET MY SPEED WAS WELL IN EXCESS OF 80MPH AND THE ENGINE WAS RACING. SEVERAL HUNDRED FEET IN FRONT OF ME WAS MY OFFRAMP AND TRAFIC. LOTS OF IT. I ASKED MY HUSBAND SITTING NEXT TO ME IF HE COULD REACH DOWN AND PRY THE ACCELERATOR FROM THE FLOOR. HE TRIED UNSUCCESSFULLY. AT THIS POINT I NEW I HAD TO GET OFF THE HIGHWAY OR REAR END SOMEONE ON THE HIGHWAY FIRST. THEN AGAIN THE SAME WOULD BE TRUE OFF THE RAMP WHICH WAS A FAIRLY SHORT RIGHT SWEEPING RAMP. I DIDNT THINK WE WOULD MAKE IT AND WAS MOST CONCERNED ABOUT HITTING SOMEONE ELSE SO I DECIDED TO TAKE THE RAMP, AT THE SAME TIME CAREFULLY HOLDING THE WHEEL I DUCKED UNDER IT ALL THE WAY TO THE FLOOR AND JERKED THE ACCELERATOR PEDAL OUT TO THE TOP, IMMEDIATELY RETURNED ABOVE TO THE TURNING RAMP BOTH FEET STILL PRESSED HARD ON THE BREAK AND JUST AS I GOT TO THE END OF THE RAMP, THE VEHICLE STOPPED RIGHT IN FRONT OF MCDONOLDS. I JUST GRIPPED THE WHEEL TIGHTLY LOOKED AT MY HUSBAND AND SAID LOUDLY FUCK (EXCUSE ME) THANK YOU GOD. I HAD NEVER TOLD ANYONE OF THIS INCIDENT BUT IT HAUNTED ME AND WHEN I HEARD OF THE ISSUES GOING ON IN JANUARY I THOUGHT OVER AND OVER I SHOULD CONTACT TOYOTA. I FINALLY DID, I THINK IT WAS ABOUT A MONTH AGO. I DID GET A RESPONSE. SAFETY ISSUES DONT AFFECT MY VEHICLE Y

**Location of Incident:** NEW BERN, NC

**NHTSA Summary:**

I BELIEVE THAT TOYOTA IS COVERING UP THE REAL CAUSE OF THE ACCELERATION OF THE ENGINE WHILE DRIVING. IT HAPPENED TO ME WHILE I WAS DRIVING AND WAS VERY FRIGHTENING. THE ENGINE BEGAN TO SPEED UP AUTOMATICALLY AND I COULD NOT STOP IT WITH MY BRAKES. I PUT THE CAR IN NEUTRAL AND THEN STOPPED. THE ENGINE CONTINUED TO RACE. I TOOK THE CAR TO THE LOCAL TOYOTA DEALER THE NEXT DAY AND IT DID THE SAME THING. IT REACHED SPEEDS OF 70-MPH WITHOUT ME TOUCHING THE PEDAL. THE TOYOTA DEALERSHIP REPLACED THE IDLE AIR CONTROL VALVE PN. 22270-0A060. I HAVE NOT HAD A PROBLEM SINCE. TOYOTA HAS TRIED TO BLAME THIS PROBLEM IN THE MEDIA ON THE FLOOR MATS AND NOW THE ACCELERATOR PEDAL. I PRAY THAT NO ONE ELSE WILL SUFFER INJURIES OR DEATH. THIS PROBLEM CAN EASILY BE FIXED BUT IT IS COSTLY (OVER \$450.00). TOYOTA SEEMS TO BE LOOKING FOR THE CHEAP, EASY FIX. \*TR

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** VALPARAISO, IN

**NHTSA Summary:**

2007 CAMRY XLE. PROBLEMS WITH HESITATION WHEN ACCELERATING. THE DEALERSHIP JUST BLEW ME OFF WHEN I EXPLAINED THE PROBLEM. ACTED AS IF THIS WAS NEVER A PROBLEM WITH CAMRYS. ALSO HAVE HAD PROBLEMS WITH STEERING COLUMN'S RADIO CONTROLS - WHEN PRESSING THE APPROPRIATE BUTTONS, NOTHING WOULD HAPPEN OR, WHEN SEEKING STATIONS THAT WERE PROGRAMMED IN, THE DOWN OR UP BUTTONS WOULD JUMP TO OTHER STATIONS NOT PROGRAMMED. SINCE THIS PROBLEM IS ERRATIC, NOTHING WAS DONE BY DEALER. PROBLEMS WITH THE OUTDOOR TEMPERATURE GAUGE - AT TIMES, IT WOULD TAKE 15-20 MINUTES BEFORE THE TEMPERATURE WOULD CHANGE TO THE CORRECT ONE. EXAMPLE: IT READ 77 DEGREES WHEN IT WAS ACTUALLY IN THE MID-90S. DEALERSHIP DID REPAIR THIS LAST SUMMER BUT NOW, IT IS READING SEVEN+ DEGREES OFF THE ACTUAL OUTDOOR TEMPERATURE. THE FINAL PROBLEM WITH THIS CAR IS THAT THE PAINT IS CHIPPING OFF OF THE FRAME AREA BELOW THE DOORS OF THE CAR. THIS HAS NEVER HAPPENED WITH ANY PREVIOUS CAR I HAVE OWNED. DEALER ATTRIBUTED IT TO THE FACT THAT THIS CAR IS THE SPORT VERSION SO IT RIDES LOWER. FIRST TOYOTA I HAVE OWNED AND IT LOOKS LIKE IT MAY BE MY LAST. \*TR

**NHTSA Summary:**

FOUR INCIDENTS OF UNINTENDED ACCELERATION. ON FOUR OCCASIONS THE 2000 LEXUS IS250 I PURCHASED ON SEPTEMBER 3, 2009 HAD UNINTENDED ACCELERATION OF UP TO 5000 RPM.. THREE TIMES THIS OCCURRED WHEN STARTING THE CAR IN PARK; THE FOURTH TIME WAS WHEN THE CAR WAS STOPPED AND IDLING. TWICE I HAD THE DEALER, THOUSAND OAKS, CA LEXUS, EXAMINE THE PROBLEM AND WAS TOLD NO DEFECT COULD BE FOUND. ON THE FOURTH OCCURRENCE I NOTICED MY FOOT WAS ON THE EDGE OF THE BRAKE PEDAL AND DEPRESSING THE ACCELERATOR SIMULTANEOUSLY. I WEAR ONLY A SIZE 9 SHOE, HAVE BEEN A LICENSED DRIVER FOR OVER 65 YEARS AND HAVE NEVER HAD ANY EXPERIENCES SUCH AS THESE. I HAVE CONCLUDED THAT EITHER THE BRAKE AND ACCELERATOR PEDALS ARE TOO CLOSE TO EACH OTHER OR THEY HAVE BEEN POSITIONED TOO FAR TO THE LEFT, THAT IS, TOO CLOSE TO THE STEERING COLUMN CAUSING ONE'S FOOT TO BE ON THE EDGE OF THE BRAKE PEDAL. SINCE UNINTENDED ACCELERATION HAS BEEN REVEALED AS A PROBLEM WITH THE LEXUS, I SHALL APPRECIATE YOUR RESPONSE TO THE PROBLEM I HAVE DESCRIBED. \*TR THANK YOU.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10304877  
**Date of Incident:** 20090910  
**Vehicle:** 2010 TOYOTA PRIUS  
**Location of Incident:** ELLINGTON, CT

**NHTSA Summary:**  
AS I WAS APPROACHING A STOP LIGHT, I TOOK MY FOOT OFF OF THE GAS PEDAL OF MY 2010 TOYOTA PRIUS TO HIT THE BRAKE WHEN ALL OF THE SUDDEN MY VEHICLE ACCELERATED AND SURGED FORWARD. IT DID NOT STOP UNTIL I SLAMMED MY FOOT ON THE BRAKE. THIS HAS NOT HAPPENED SINCE AND I HAD ASSUMED IT WAS A FREAK ACCIDENT, BUT I WANTED TO REPORT IT IN LIGHT OF THE TOYOTA RECALLS THAT HAVE OCCURRED. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10312510, 10316513  
**Date of Incident:** 20090910  
**Vehicle:** 2005 TOYOTA HIGHLANDER  
**Location of Incident:** BEAVERTON, OR

**NHTSA Summary:**  
I AM WRITING ABOUT A PROBLEM I ENCOUNTERED WITH MY 2005 TOYOTA HIGHLANDER. WE PURCHASED IT BRAND NEW IN JANUARY OF 2005. BEAVERTON TOYOTA HAS ADJUSTED THE COMPUTER ON MY CAR SEVERAL TIMES SINCE THE FIRST OIL CHANGE AS MY HIGHLANDER FEELS LIKE IT IS CHANGING GEARS BY ITSELF. THE CAR HAD NOT DONE THIS UNTIL AFTER THE FIRST OIL CHANGE. ON SUBSEQUENT SERVICE CALLS, I WOULD DISCUSS THE PROBLEM AND THEY WOULD TELL ME THAT THEY ADJUSTED THE CAR'S COMPUTER. ON SEPTEMBER 10, 2009, I WAS DRIVING THROUGH THE STORE PARKING LOT AND WAS ABOUT TO PULL INTO A PARKING PLACE BY THE FRONT OF THE STORE WHEN I HEARD A SURGING SOUND AND MY CAR QUICKLY WENT FORWARD AND SMASHED INTO A BRICK COLUMN IN FRONT OF THE STORE AND THEN IT WENT BACKWARDS AND STOPPED. THE FRONT OF THE CAR WAS SMASHED AND WAS NOT DRIVABLE. I HAD NOT SPOKEN ON MY CELL PHONE SINCE THE NIGHT BEFORE, I HAD NO ONE ELSE IN THE CAR WITH ME TO DISTRACT ME, AND I WAS NOT SPEEDING OR SWERVING TO AVOID ANOTHER PERSON OR CAR. I THANK GOD THAT I HIT THE BRICK COLUMN IN FRONT OF THE STORE INSTEAD OF A PERSON OR ANOTHER CAR. MY SHOULDER, NECK AND TEETH STILL HURT FROM HITTING THE BRICK COLUMN SO HARD. I HAD JUST GOTTEN GAS, AND I HAD MY TIRES ROTATED A FEW DAYS BEFORE THIS INCIDENT. I ASKED THE BODY SHOP WHO FIXED MY CAR AND BEAVERTON TOYOTA TO CHECK THE ACCELERATOR. AT THE TIME OF MY ACCIDENT, THEY WERE LOOKING FOR CAR MATS THAT WEREN'T PROPERLY INSTALLED. I WAS TOLD THERE WAS NOTHING WRONG. IT SEEMS STRANGE THAT WITH ALL THE RECALLS NOW, EVEN TOYOTA CANNOT FIGURE OUT WHAT THE PROBLEM IS WITH THE ACCELERATORS. I THINK IT MIGHT HAVE BEEN A GLITCH IN THE COMPUTER. I CAN STILL HEAR THAT SURGING SOUND AND AM AFRAID IT MIGHT HAPPEN AGAIN. THERE IS NO REASON FOR IT TO HAVE SURGED AND SMASHED INTO A BRICK COLUMN AS I WASN'T STOMPING ON THE ACCELERATOR OR BRAKE WHEN I WAS DRIVING THROUGH A PARKING LOT TO PARK MY CAR. I HAVEN'T BEEN IN AN ACCIDENT FOR 38 YEARS. 2005 TOYOTA HIGHLANDER. CONSUMER STATES UNINTENDED ACCELERATION CAUSED A CRASH. \*TGW THE CONSUMER STATED AS SHE WAS ABOUT TO PULL INTO A PARKING SPACE,

**NHTSA ODI Number:** 10313865  
**Date of Incident:** 20090910  
**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** NORTHRIDGE, CA

**NHTSA Summary:**  
THIS IS A POSSIBLE EXPANSION OF THE PRESENT TOYOTA "SUDDEN ACCELERATION" INVESTIGATION. IT INVOLVES ONE MOMENTARY INCIDENT OF UNCOMMANDED ACCELERATION ON A 2007 TOYOTA RAV4 VEHICLE IN SEPT. 2009. IT HAS NOT RECURRED NOR WAS IT REPORTED TO TOYOTA NOR THE NHTSA. WHILE TRAVELING ON AN OPEN HIGHWAY, WITH THE VEHICLE UNDER CRUISE CONTROL, I ATTEMPTED TO RESUME MY NORMAL CRUISING SPEED AFTER AN APPARENTLY SUCCESSFUL "BRAKE SHUTDOWN" OF THE SYSTEM. ON APPLYING THE "RESUME SPEED COMMAND", THE ENGINE WENT TO AN APPARENT FULL THROTTLE POSITION WITH THE TRANSMISSION DOWNSHIFTING INTO "PASSING GEAR". THIS CONTINUED FOR A SHORT TIME, ESTIMATED TO BE LESS THAN 2 SECONDS, FOLLOWED BY A SHARP DECELERATION AND A SECOND FULL ACCELERATION (AGAIN OF A MOMENTARY LENGTH OF TIME). AFTER THE SECOND INCIDENT, THE VEHICLE RESUMED NORMAL OPERATION WITH CONTINUED CRUISE CONTROL. AT NO TIME DID I APPLY MANUAL BRAKES OR SHIFT OUT OF "DRIVE". THE INCIDENT HAS NEVER REPEATED. THE REPORT IS STRICTLY TO INFORM YOU THAT THE APPARENT PROBLEM UNDER INVESTIGATION SHOULD NOT BE LIMITED TO 2009 MODEL YEAR TOYOTA'S BUT SHOULD GO BACK FURTHER INTO THEIR FLEET WITH "ELECTRONIC THROTTLE CONTROL".

**Location of Incident:** LAGUNA BEACH, CA

**NHTSA Summary:**  
**Additional Summary:**  
On September 11th, 2009 we drove from our home in Orange County to Kernville for a weekend camping trip. About 120 miles into our journey we were out in the Mojave Desert on highway 395 when I overtook another car at approximately 75 miles per hour. As I got back into lane, I attempted to depress the brake to slow back down but the car continued to accelerate. My wife was sitting beside me. We also had our two young children and dogs in the car. Perplexed, I looked down at the pedals and told my wife the car would not slow down, as I continued to try and depress the brake pedal. At each attempt to decelerate the engine whined alarmingly but the car continued to accelerate. I tried several times to press and release the accelerator followed by returning my foot to the brake. At no time did the accelerator pedal appear to be hindered or restricted in anyway. The car continued to accelerate. At 95 miles per hour I forced down both the brake pedal and the emergency/ hand brake at the same time forcing the car to slow down, all the while the engine continued to rev up. As we approached stopping Saskia pushed the gear stick into park and we bounced and shuddered to a halt. It was terrifying.

We took a short brake and then gingerly attempted to move forward again. The car appeared to be working and we slowly accelerated back on to the highway attempting several times to stop and brake to make sure that the car was working properly. It was immediately apparent that the brakes were not working properly though still functional. They were taking longer to stop and there was a grinding sound and shuddering every time we tried to slow down. We were much closer to our destination than to home and decided it made sense to continue and hope that we could complete our weekend trip bringing the car to the dealer on Monday 15th.

Upon arrival at the campsite, as we attempted to turn off the car, the dashboard and control panel lights went haywire and a warning flashed up that the brakes were not functioning and we needed to bring the car to the dealer. The car completely shut down and would not restart. It was getting dark and we decided to

C-1515

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

leave the problem for the next day. A couple of hours later, extremely worried that we might be stuck, I tried the car again and it turned on normally. There were no longer any messages about the brakes not working properly which was extremely strange. I turned it off and went to bed. The next day, Saturday, I drove it for about 5 minutes to a country store, there and back. The car turned on normally but I could still hear the brakes grinding.

On Sunday the 13th, we packed up around midday and attempted to turn the car on. It was completely dead the interim had we left the lights on or used the battery in anyway. After several unsuccessful attempts, we borrowed some jump cables and jump-started the car with the help of another vehicle. The brakes were still malfunctioning and we had to drive very carefully in order to allow enough room for stopping. The grinding and shuddering continued and was very loud.

The next morning, we took the car to the dealer, Tustin Toyota. I called ahead of time and explained the problems in advance. The Dealer took it in and promised some answers later in the day. That evening they called and said that they had identified the problem, that the floor mat clips had broken and that the mat had disrupted the accelerator pedal. He said that when we reported the problem they had called Toyota and they had instructed them to replace the clips on the mats. I found this difficult to believe as I had not seen the mat out of place. I asked about the brakes to which the service manager, Dan Stanley, replied that the computer controlling the antilock brakes must have malfunctioned but that the brakes themselves were fine. This set off alarm bells for me as I knew I had trouble with the brakes the entire way home. I asked them to please check the brakes carefully again and also to take care of two outstanding defects for which the car had been recalled. A couple of hours later they called back and said again that there was nothing wrong with the brakes and we could pick up the car. I reluctantly picked it up hoping the problems were resolved and we were done with the issue.

The next day Saskia drove the car to bring the kids to school and while driving, the lights on the dashboard and control panel went haywire again and she had the same problems as before with the brakes. She came home and was too distraught to consider driving the car anymore.

At the same time, we heard from both a friend of Saskia's and our attorney that there had been a story reported over the weekend where four people were killed in San Diego County in a Lexus car which would not stop. This was the last straw for us. We could no longer contemplate using this vehicle to transport our family considering the fate of those poor people and that the same thing would have happened to us if we had been in a built up area and not on an empty desert highway. That afternoon I drove the car down the hill from where we live to the dealer. Along the way I noticed the same problems with the breaks, the lack of responsiveness and the grinding noise. At the dealers we told the Service Director and the Service Manager that we no longer wanted the car, that we did not consider it a safe vehicle for our family, no matter what their computers were telling them in the service department. My wife was visibly distraught at the dealership but the attitude of the Director and Manager was completely unsympathetic and rude, but that is another story. We called the number for Toyota's corporate office while at the dealership. The service manager informed us that they would have a specialist come out on Friday, the 18th. We opened a case on the phone with Toyota and asked for the proper procedures to return the vehicle.

**Date of Incident:** 20090912  
**Vehicle:** 2007 TOYOTA PRIUS  
**Location of Incident:** HOOVER, UT  
**NHTSA Summary:**  
 ACCELERATING FROM A STOP LIGHT, AT ABOUT 30 MPH THE PRIUS ENGINE FELT AND SOUNDED LIKE IT BEGAN TO ACCELERATE AT MAXIMUM RATE. BRAKING HAD NO EFFECT ON SLOWING THE VEHICLE RESULTING IN RUNNING THROUGH A MAJOR INTERSECTION AT A RED LIGHT. THE CAR WAS STOPPED BY SHIFTING INTO NEUTRAL, COASTING TO A STOP, AND PUSHING THE POWER BUTTON. AFTER WAITING 2 MINUTES, THE CAR WAS RESTARTED AND RAN WITH A PROBLEM. THIS OCCURRED ONCE IN SEPTEMBER 2009. TOYOTA'S REMEDY IS TO REPLACE THE FLOOR MATS, HOWEVER, THE FLOOR MAT WAS SECURED TO THE CARPET AND WAS VERIFIED AT THE TIME OF THE INCIDENT THAT IT WAS FAR FROM INTERFERING WITH THE GAS PEDAL. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10314466  
**Date of Incident:** 20090912  
**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** ELK RIVER, MN  
**NHTSA Summary:**  
 I OWN A 2004 TOYOTA SIENNA. I PURCHASED IT AUG, 2009 AND 2 WEEKS LATER WHILE FLOORING THE ACCELERATOR, THE ENGINE ACCELERATED THE VEHICLE SPONTANIOUSLY AFTER PULLING MY FOOT OFF THE PEDAL. I FRANTICALLY STOMPED ON THE PEDAL AND APPROXIMATELY 3 SECONDS PASSED UNTIL THE ENGINE DECREASED R.P.M. ADMITTEDLY I HAD JUST PREVIOUSLY PLACED AN "AFTER MARKET" FLOOR MAT IN THE DRIVER COMPARTMENT AND REMOVED IT IMMEDIATELY WHEN

C-1517

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

REACHING MY DESTINATION. HOWEVER, THIS FLOOR MAT AND THE ORIGINAL ONE WERE NOWHERE NEAR THE GAS PEDAL. I CAN ONLY EXPLAIN THE REASON WHY I NEVER REPORTED THIS UNTIL NOW AS: I REALLY DON'T EVER HAVE TO "FLOOR" THE ACCELERATOR ANYWAY. IN LIGHT OF THE ONGOING EXPOSURE IN THE MEDIA OF THESE TYPES OF PROBLEMS WITH TOYOTAS. I AM COMPELLED TO VOICE MY EXPERIENCE IN HOPES THAT THIS MAY AVOID HARM AND EVEN SAVE LIVES. MY TOYOTA CURRENTLY IS NOT INCLUDED IN A RECALL RELATED TO THIS ISSUE, EVEN THOUGH OTHER REPORTS ARE ALREADY PUBLISHED IN THE MEDIA SIMILAR TO MY EXPERIENCE WITH THE SIENNA. PERSONALLY, I BELIEVE THAT THE FLOOR MAT RECALL WAS A HOAX, AND THE CLAIM THAT THE GAS PEDAL SENSOR, MADE BY A U.S. FIRM, BEING AT FAULT IS JUST A DELIBERATE DISTRACTION TO THE COSTLY TRUTH. I BELIEVE TOYOTA HAS ELECTRONIC, AND PROBABLY EVEN COMPUTER RELATED PROBLEMS WITH ITS VEHICLES, AND IF ALL OF THIS DUE PROCESS GOES AS IT SHOULD, MY PREDICTION IS THIS: ALL TOYOTAS WITH "DRIVE BY WIRE" SYSTEMS WILL BE RECALLED, AND IT WILL INVOLVE MORE THAN JUST PEDAL SENSORS AND FLOOR MATS. SERIOUSLY, PEOPLE ARE IN JAIL BECAUSE TOYOTAS HAVE ACCELERATED OUT OF CONTROL, BUT WHAT CONCERNS ME THE MOST IS THAT I HAVE A WIFE AND FOUR CHILDREN THAT I LOVE MORE THAN CAN BE DESCRIBED, THAT DEPEND ON THIS TOYOTA TO FUNCTION SAFELY FOR US ON A DAILY BASES. PLEASE USE THIS COMPLAINT TO MAKE AN IMPROVEMENT IN SAFETY.

**Additional Summary:**

**Toyota ID Number:**

**Date of Incident:** 20090912  
**Vehicle:** 2005 TOYOTA COROLLA  
**Location of Incident:** ORANGE CITY, IA  
**NHTSA Summary:**

COMPLAINT ABOUT AN ACCIDENT ON SEPTEMBER 12, 2009 I WAS DRIVING ON OLD HWY 75 BETWEEN SALIX AND SLOAN IN IOWA AT ABOUT 6-7 PM ON SEPTEMBER 12, 2009. MY CAR WAS A COROLLA 2005 CE (VIN INXBR32E23Z78258) WHICH HAS 4-CYLINDER AND ABOUT 67,000 MILES ON IT. AS I WAS DRIVING ON OLD HWY 75, I EXPERIENCED A SUDDEN ACCELERATION, THE CAR LURCHED AND PULLED ME TO THE DITCH ON THE RIGHT HAND SIDE. I IMMEDIATELY LOOSEN THE ACCELERATION PAD BUT IT DIDN'T SLOW DOWN BUT ACCELERATED TOWARDS THE RIGHT HAND SIDE. THEN I WAS SCARED THAT IT WILL ROLL OVER IN THE DITCH AND SO I PULLED IT BACK TO THE LEFT, BUT THERE WAS A VAN COMING IN THE OPPOSITE DIRECTION (NEXT LANE) AND THUS WE HAD A HEAD-ON COLLISION. THE TWO OLD LADIES INCURRED LEG INJURIES AND THEY COULDN'T COME OUT OF THE VAN. THE TWO BOYS (ABOUT 4 YEARS OLD) SEEMED FINE AND CAME OUT OF THE VAN. LATER ON THE TWO OLD LADIES NEEDED TO HAVE SURGERIES AND THEY FILED A LAWSUIT AGAINST ME. AT THAT TIME, I FELT THAT SOMETHING WAS WRONG WITH MY COROLLA BUT I COULDN'T HAVE A CHANCE TO FIND IT OUT BECAUSE I NEEDED THE INSURANCE COMPANY TO GET ME ANOTHER CAR FOR COMMUTING PURPOSES. HOWEVER, I FEEL THAT THIS ACCIDENT WAS DUE TO THE COROLLA THAT I WAS DRIVING AT THE MOMENT AND THUS IT WAS NOT COMPLETELY MY FAULT. COROLLA 2005 IS NOT IN THE RECALL LIST, BUT I STILL WANT TO FILE THIS REPORT AND I WILL SEEK LEGAL ADVICE IN TERMS OF LIABILITY. PLEASE CONSIDER MY COMPLAINT CAREFULLY BECAUSE I ALMOST DIED IN THE ACCIDENT AND GIVE ME A REPLY AS SOON AS POSSIBLE.

**Location of Incident:** TUCSON, AZ  
**NHTSA Summary:**

IN SEPTEMBER 2009, I WAS STARTING MY 1999 TOYOTA 4RUNNER IN MY DRIVEWAY. I DRESSED THE CLUTCH AS USUAL AND TURNED THE KEY. THE ENGINE STARTED, I HEARD A "POP", AND IT BEGAN RUNNING AT FULL THROTTLE AND WAS RACING FOR SEVERAL MINUTES UNTIL I FINALLY TURNED IT OFF. THE RPM GAUGE WAS AT ITS MAXIMUM. I DID NOT HAVE A FLOOR MAT ON THE DRIVERS SIDE, I DID NOT HAVE MY FOOT ON THE GAS, AND WAS NOT DOING ANYTHING TO RACE THE ENGINE. I COULD NOT MAKE THE ENGINE STOP RACING. I TRIED TO PUT MY FOOT ON THE GAS PEDAL AND THEN RELEASED IT. IT WAS STILL RACING, AND THE GAS PEDAL WAS NOT DEPRESSED OR CAUGHT ON ANYTHING. FORTUNATELY, THE CAR WAS STILL IN NEUTRAL WITH THE PARKING BRAKE ON. IT WAS VERY SCARY, AS I COULD NOT MAKE THE ENGINE STOP RACING. I HAD TO TURN THE ENGINE OFF TO STOP IT. I TOOK IT TO THE TOYOTA DEALER, THEY COULD FIND NOTHING WRONG AFTER INSPECTING WITH A "SCAN TOOL" AND THE WIRING LOOKED GOOD. THEY SAID THAT IT WAS BECAUSE A PACK RAT HAD BEEN IN THE ENGINE AT THE TIME. (THAT'S A PRETTY LAME EXCUSE.) THEY SAID THEY COULD "CLEAN THE THROTTLE" AND "FLUSH THE FUEL LINE" WHICH I HAD THEM DO (COST \$300.) BECAUSE I WAS SCARED TO DRIVE THE CAR UNTIL THEY DID SOMETHING. \*TR

**NHTSA ODI Number:** 10307384  
**Date of Incident:** 20090915  
**Vehicle:** 1999 LEXUS RX300  
**Location of Incident:** ANN ARBOR, MI  
**NHTSA Summary:**

ACCELERATOR ENTRAPMENT IN AFTERMARKET FLOOR PAD OF A LEXUS RX 300 LAST SEPTEMBER. (I DON'T KNOW WHAT KIND OF FLOOR PAD, I BOUGHT IT IN 1999 AND INSTALLED IT THEN, IT IS ONE OF THE THICK ONES THAT IS GOOD A HOLDING SNOW AND WATER.) I FIGURED OUT THAT THE FLOOR PAD WAS THE PROBLEM WHILE THE ENGINE WAS REVVING TO 90 MPH AND THE BRAKES WOULD NOT STOP THE CAR. LEXUS COULD FIND NOTHING WRONG BUT SAID NOTHING TO ME ABOUT THIS BEING A PROBLEM IN TOYOTA PRODUCTS. NO CRASH AND NO INJURY SINCE I FIGURED IT OUT; THE FLOOR MAT FELT THICK TO MY FOOT SO I YANKED IT OUT FROM UNDER THE PEDALS. JUST REALLY SCARY... SPECIFICALLY, I CAME OUT OF A SIDE STREET ON TO A MAIN ROAD AND NEEDED TO GET AHEAD OF TRAFFIC SO I STOMPED IN THE ACCELERATOR PRETTY HARD- NOT MY TYPICAL DRIVING STYLE- AND THEN THE ACCELERATOR STUCK, THE CAR REVVING AND GOING TO 90- 100 MPH. I STOOD ON THE BRAKES BUT IT WOULD NOT STOP. I TRIED TO THROW IT INTO PARK ( BUT THANKFULLY THE CAR WOULDN'T LET ME- I WAS THINKING ABOUT TRYING TO USE THE PARKING BRAKE TO STOP IT, BUT IT DOESN'T HAVE A HAND BRAKE SO THAT'S WHY I WAS SO STUPID AND TRIED TO THROW IT IN PARK. THE NOISE FROM THAT WAS SO HORRIFYING I DID NOT PUT IT IN NEUTRAL, THEN I FELT THE LUMPY FLOOR MAT AND YANKED IT OUT FROM UNDER THE PEDALS. IT WAS LATE AT NIGHT AND THERE WERE NO CARS ON THE ROAD SO I HAD A MILE OF CLEAR ROAD TO WORK THIS OUT. CAR HAD ABOUT 275,000 MILES ON IT. BUILT IN JULY 1998, JTG10U7X0032830 IS SERIAL. I CAN'T GIVE YOU THE EXACT DATE BECAUSE I CAN'T FIND THE SERVICE RECEIPT- SORRY!

**Location of Incident:** JACKSON, TN

**NHTSA Summary:**  
I OWN A 2007 TOYOTA CAMRY I HAD A ACCIDENT IN THE VEHICLE ON SEPTEMBER 17, 2009 IN JACKSON, TN. I TOLD THE OFFICERS AND THE INSURANCE COMPANY THAT I TRIED TO STOP BUT WAS UNABLE TO I ALSO TOLD THEM THAT SOMETHING WAS WRONG IT WOULD NOT STOP UNTIL I WENT INTO A DITCH. TWO DAYS LATER TOYOTA DID A RECALL ON THE FLOOR MATS. I FOUND OUT ABOUT THE FLOOR MATS THIS YEAR IN FEBRUARY 2010. I CONTACTED TOYOTA AND FOUND OUT THAT THEY HAD THE WRONG NAME AS BEING THE OWNER AND SAID THEY WOULD GET ME THE RECALL INFORMATION MAILED TO MY HOME. THE COMPANY DID SEND ME THE INFORMATION I CALLED THE LOCAL TOYOTA DEALERSHIP HER AND THEY TOLD ME I COULD BRING MY VEHICLE IN. IT STATES ON THE PAPERS THAT TOYOTA WILL REPLACE THE PEDAL WITH A NEW ONE IF I WANTED TO WAIT FOR IT IN AND THAT THEY WOULD REPLACE THE OLDER ALL WEATHER FLOOR MATS AND CLEAN THE CARPET. THIS DID NOT HAPPEN FOR ME I NOW HAVE THE SAME DIRTY FLOOR THAT I HAD BEFORE I TOOK IT TO THEM AND NOW I'M RIDING IN A RENTAL CAR BECAUSE SINCE THEY PUT THE REINFORCEMENT BAR ON MY CAR THE CHECK ENGINE LIGHT HAS COME ON AND I'M AFRAID EVEN MORE TO DRIVE

C-1527

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THE CAR I TOOK IT TO THE DEALERSHIP AND THEY TOLD CORPORATE THAT I WOULD HAVE TO PAY THEM TO CHECK OUT THE CAR AND MY MANUAL SAYS THAT IF THIS LIGHT COMES ON THAT IT IS THE ELECTRONIC THROTTLE. THE DEALERSHIP TOLD ME IT COULD BE UP TO 200 DIFFERENT THINGS AND THAT UNLESS I PAY FOR THIS THEY WOULD NOT DO ANYTHING TO ASSIST ME I CAN WRITE A LETTER TO THE CLAIMS DEPARTMENT BUT THERE IS NO GURANTEE THAT THEY WILL REIMBURSE ME FOR MY RENTAL OR FOR FIXING THE VEHICLE. ALSO THAT MY FLOOR MATS ARE NOW AFTERMARKET MATS AND THE WILL NOT DO ANYTHING TO THEM EITHER NOR MY FLOOR PLEASE DO SOMETHING THEY ARE NOT FIXING THESE VEHICLES AND ARE NOT STANDING BY THERE WORD I CAN NOT AFFORD TO PAY ANYMORE MONEY TO GET THIS VEHICLE FIX AND DETAILED AND I HAVE NO OTHER MEANS OF TRANSPORTATION. THE PEOPLE AT CORPORATE SAY THEY ARE STICKING BY THE DEALERSHIP AND I NEED TO PAY TO GET THIS FIXED!

**NHTSA ODI Number:** 10319308  
**Date of Incident:** 20090918  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** RICHMOND, KY

**NHTSA Summary:**  
SINCE MY PURCHASE IN DECEMBER 2003 OF A USED TOYOTA CAMRY XLE, SIX CYLINDER (VIN 4T1BF30K92U0179630, THERE HAVE BEEN THREE (3) INSTANCES OF UNINTENDED ACCELERATION. TWICE I WAS BEHIND THE WHEEL, ONCE MY WIFE WAS. IN EACH CASE, CIRCUMSTANCES WERE SIMILAR: THE CAR WAS IDLING IN NEUTRAL OR PARK; THE DRIVER PUT HIS/HER FOOT ON THE BRAKE AND SHIFTED INTO DRIVE; VIRTUALLY SIMULTANEOUSLY THE ENGINE ACCELERATED RAPIDLY. IN EACH CASE THE DRIVER'S FOOT ON THE BRAKE PREVENTED THE CAR FROM MOVING FORWARD WITH ANY SPEED, BUT IT WAS NECESSARY TO PRESS HARD ON THE BRAKE -- AND EVEN WITH THAT IN AT LEAST ONE INSTANCE THE CAR STRAINED AND BUCKED. THE SITUATIONS WERE RESOLVED WHEN THE DRIVER SHIFTED. IN TWO INSTANCES THE SHIFT WAS INTO PARK AND THE VEHICLE THEN STALLED IN EACH CASE. I DO NOT RECALL CLEARLY WHETHER THE SHIFT IN THE THIRD INSTANCE WAS INTO PARK OR NEUTRAL OR WHETHER THE VEHICLE STALLED. WE WERE AT THE TIME EXITING A GAS STATION AND MERGING INTO TRAFFIC. IN NO INSTANCE WAS THERE A PROBLEM WITH THE MAT AND IN NO CASE WAS THE DRIVER'S FOOT ON THE ACCELERATOR. RATHER THE RIGHT FOOT WAS IN EACH CASE ON THE BRAKE. THE APPROXIMATE DATES OF THE INSTANCES WERE FALL 2006, JUNE 2009, AND SEPTEMBER 2009. THE FIRST INSTANCE WAS REPORTED TO OAKLAWN TOYOTA, OAKLAWN, ILLINOIS; THE SECOND TO TOYOTA SOUTH, RICHMOND, KENTUCKY. EACH WAS THE THEN SERVICING DEALER WITH TOYOTA SOUTH ALSO THE DEALER FROM WHOM THE CAR WAS PURCHASED. NEITHER DEALER COULD FIND ANYTHING WRONG WITH THE CAR. THE THIRD INSTANCE WAS NOT REPORTED.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** EUGENE, OR

**NHTSA Summary:**  
DRIVING MY 2007 TOYOTA TACOMA (V6, 4-WD, AUTOMATIC, ACCESS CAB), I EXPERIENCED SUDDEN UNINTENDED ACCELERATION AS I WAS TURNING FROM W. SEVENTH AVENUE IN EUGENE, OREGON ONTO NORTHBOUND INTERSTATE-105. I WAS TRAVELING AT A SAFE RATE OF SPEED (APPROX. 20 MPH) AS I MADE THE TURN FROM THE SURFACE STREET TO THE LEFT-HAND, CURVING, ON-RAMP WHICH IS THE BEGINNING OF AN ELEVATED FREEWAY STRUCTURE. IT WAS MID-MORNING AND, ALTHOUGH THERE HAD BEEN SOME LIGHT RAIN OVERNIGHT, THE PAVEMENT WAS DRY. ABOUT HALFWAY THROUGH THE CURVE THE TACOMA INEXPLICABLY ACCELERATED. THE REAR OF THE TRUCK SWUNG OUT TO THE LEFT AT WHICH POINT IT WAS MOVING SIDEWAYS UP THE ON-RAMP. THE FRONT OF THE TRUCK JUMPED THE CURB AND THE TRUCK PROCEEDED 20-30 FEET SIDEWAYS ALONG THE CURB AND EVENTUALLY SLID UP A CONCRETE WALL WHERE THE CURB TRANSITIONS TO THE BRIDGE RAIL OF THE ELEVATED STRUCTURE. JUST SHORT OF THE START OF THE ACTUAL BRIDGE RAILING THE FRONT RIGHT WHEEL AND FENDER STRUCK A TREE. AT THIS POINT, THE VEHICLE BOUNCED BACK, CONTINUED TO ROTATE TO THE LEFT AND CAME TO A REST, STRADDLING THE TRANSITION WALL, HAVING TURNED 150-170 DEGREES. AT THIS POINT I REALIZED THE MOTOR WAS STILL RACING AND I SWITCHED THE ENGINE OFF. MY FOOT WAS ON THE BRAKE PEDAL. THE AIR BAGS DID NOT DEPLOY. NO ONE WAS INJURED, NO OTHER VEHICLES WERE INVOLVED. POLICE WERE CALLED TO PROVIDE TRAFFIC CONTROL WHILE THE VEHICLE WAS REMOVED FROM THE SCENE BUT NO REPORT WAS FILED. I HAVE LIVED WITHIN TWO-AND-A-HALF MILES OF THIS INTERSECTION FOR MORE THAN 36 YEARS. I HAVE BEEN THROUGH THIS INTERSECTION THOUSANDS OF TIMES AS A PRIVATE CITIZEN AND IN MY ROLE AS A TRANSPORTATION PLANNER. I HAVE BEEN AND AM BAFLED BY THIS INCIDENT. THE COLLISION DAMAGE WAS REPAIRED. OTHER THAN THAT ALL PARTS ARE ORIGINAL. ORIGINAL EQUIPMENT TOYOTA FLOOR MATS HAD BEEN REMOVED PREVIOUSLY. \*TR

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SPACE IN THE LOT OF A BUSINESS WHEN THE ACCIDENT HAPPENED. I DID NOT HAVE MY FOOT ON THE GAS AS I WAS ALLOWING THE CAR TO "CREEP" INTO POSITION BUT HAD IT HOVERING AND/OR TOUCHING THE BRAKE PEDAL. ALL OF A SUDDEN THE ENGINE REVVED AND STARTING SPEEDING FORWARD, AGAIN WITHOUT MY FOOT ON THE GAS PEDAL. IT HAPPENED SUDDENLY AND QUICKLY AND I IMMEDIATELY HIT A SIGN AT THE FRONT OF THE PARKING SPACE. THIS SET OFF THE AIR BAGS, JAMMING ME BACK IN THE SEAT AND PULLING THE SEAT BACK. I COULD NOT LONGER REACH THE PEDALS BUT I WAS STUNNED BY THE SEAT BELT EXPLOSION. THE CAR WENT OVER THE SIGN (FLATTENED IT), OVER A LOW CEMENT BARRICADE, AND INTO THE SIDE OF THE BUSINESS. I WAS NOT SERIOUSLY INJURED DUE TO THE AIR BAGS BUT THE FRONT OF THE CAR WAS BADLY DAMAGED. I'VE NEVER RECEIVED AN TYPE OF RECALL NOTICE AND NOTHING HAS BEEN DONE TO REPAIR THE DEFECT. I'M DRIVING A VERY SCARY TIME BOMB.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

A car crashed through the front of the fire station just before 8:30 a.m. today. No serious injuries were reported although the building was left with "significant structural damage," according to police.

The crash occurred as a Toyota Camry and a Honda Accord were both traveling north and collided at Old Bridge Street and Marsh Road, police said.

The Camry crashed through the center bay of the fire station at 8 Old Bridge St.

The driver of the Camry was Leon Moreau, 78, of Somerville, Mass. Frederick Pepe, 39, of Pelham was driving the other car, a Honda Accord, police said.

Moreau and Pepe were both taken to area hospitals with "non-life-threatening injuries," police said.

The building inspector was notified along with a rigging company to construct a temporary support system for the building.

The crash remains under investigation. Drugs and alcohol do not appear to be factors, police said.

I WAS DRIVING WITH WIFE IN MY 2005 TOYOTA SEQUOIA WEST BOUND ON THE LONG ISLAND EXPRESSWAY AND WAS ABOUT TO EXIT ON EXIT 25. IT WAS A CLEAR DAY AT ABOUT NOON. THE CAR NEVER HAD A REPAIR AND HAS ABOUT 50,000 MILES. THE BRAKE PADS AND TIRES HAS BEEN CHANGES AT ABOUT 40,000 MILES. AS I WAS ABOUT TO EXIT, THE CAR SPED UP FROM 65 MPH TO ABOUT 70 MPH EVEN AS I WAS PRESSING ON THE BRAKES. THE MATS WERE NOT IN THE WAY THE BRAKE AND THE GAS PEDAL WAS NOT HAVING AN AFFECT. THE CRUISE CONTROL WAS NOT ENGAGED. AFTER ABOUT TEN SECOND, THE BRAKES FINALLY KICKED IN. THIS HAS NEVER HAVE BEFORE OR EVER SINCE. NOTHING WAS DONE TO CORRECT THE FAILURE.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SEPT. 27, 2009, I WAS DRIVING MY 2006 TOYOTA AVALON INTO MY GARAGE AT A SLOW SPEED. WHEN I HIT THE BRAKE, THE CAR ACCELERATED CAUSING ME TO DRIVE INTO THE WORKBENCH, BREAKING IT AND SOME WALLBOARD BEHIND IT AS WELL AS DAMAGING THE CAR BEFORE THE CAR FINALLY CAME TO A STOP.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316756  
**Date of Incident:** 20090927  
**Vehicle:** 2010 TOYOTA CAMRY  
**Location of Incident:** LAWRENCEBURG, IN

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2010 TOYOTA CAMRY HYBRID. THE MANUFACTURER WAS CONTACTED SHORTLY AFTER PURCHASING THE VEHICLE WHEN IT ACCELERATED AND LUNGED FORWARD. THE CONTACT STATED THAT THE DEALER TOLD HER THAT IT WAS PERFECTLY NORMAL FOR HYBRID VEHICLES. THE CONTACT STATED THAT SHE HAD PREVIOUSLY HAD THE RECALL REPAIR DONE FOR THE ACCELERATOR PEDAL; HOWEVER, SHE CONTINUED TO EXPERIENCE THE FAILURE. THE CONTACT HAS DRIVEN HYBRID VEHICLES BEFORE AND THEY DID NOT ACCELERATE. THE FAILURE MILEAGE WAS 15 AND THE CURRENT MILEAGE WAS 4,000.

**NHTSA Summary:**  
MY WIFE AND I EXPERIENCED AN UNCONTROLLABLE RUNAWAY OF OUR NEW (3 WEEKS OLD AND LESS THAN 200 MILES) LEXUS ES-350 CAR ON 09/27/2009. THE CAR WAS TOTALED. AT TIME, BOTH POLICE AND AMBULANCE WERE CALLED. AND WE WERE SENT TO THE NEARBY SHADY GROVE HOSPITAL FOR CHECKUP AND TREATMENTS. INITIALLY, I THOUGHT IT COULD BE BECAUSE I MISTAKENLY PRESSED THE GAS PEDAL, INSTEAD OF THE BRAKE, WHEN I TRIED TO SLOW DOWN THE CAR PREPARING TO MAKE A LEFT-HAND TURN ONTO RT. 28. NOW, AFTER I READ ALL THE RECENT TOYOTA/LEXUS ACCIDENT NEWS REPORTS, WHICH SPECIFICALLY INVOLVED THE LEXUS ES SERIES, I BEGIN TO BELIEF IT WASN'T THE CASE. AND IN FACT, IT WAS AN UNCONTROLLABLE RUNAWAY CAR, AT THE TIME, BECAUSE OTHERWISE I WOULD HAVE NATURALLY SLOWED DOWN THE CAR AT THE INTERSECTION AND PREPARED TO MAKE THE TURN. THEREFORE, I SHOULDNT BE THE ONE WHO CONTRIBUTED TO THE ACCIDENT. ALSO CONSIDERING THE FOLLOWING: (1) IM AN EXPERIENCED DRIVER, AND HAVE DRIVEN ALL KIND OF BRAND AND SIZES OF CARS, AND UNDER VARIOUS WEATHER AND ROAD CONDITIONS SINCE 1962; (2) THE ACCIDENT HAPPENED ON THE GREAT SCENICA HWY IN GAITHERSBURG. I'VE BEEN LIVING IN THIS SPECIFIC AREA SINCE 1974; AND GOING THROUGH ALL THE COMMUNITY CHANGES AND EXPANSIONS, INCLUDING NEW ROAD STRUCTURES, AND TRAFFIC PATTERNS; (3) I'VE A SUPERIOR DRIVING RECORD; AND A 20/20 VISION.

**NHTSA Summary:**  
I PURCHASED A NEW TOYOTA TACOMA SR5 PICKUP 8/27/09. IMMEDIATELY I NOTICED A PROBLEM WHEN I SLOWED DOWN AT SPEED BUMPS AND TO TURN CORNERS AND THEN STARTED TO ACCELERATE. THE VEHICLE WOULD HESITATE THEN SURGE FORWARD. I CAN STOP THE HESITATION SOMEWHAT BY VERY LIGHTLY PRESSING THE ACCELERATOR AFTER I SLOW DOWN AND THEN SLOWLY ACCELERATING. IF I FORGET TO VERY LIGHTLY ACCELERATE, THE VEHICLE WILL SURGE FORWARD FOLLOWING THE HESITATION. ONE TIME THIS SURGE AS I TURNED A CORNER ALMOST TOOK ME INTO ONCOMING TRAFFIC. I ATTEMPTED TO RESOLVE THE ISSUE WITH SERVICE REPRESENTATIVES LOCALLY WHO TOLD ME THE TRANSMISSION WAS OPERATING NORMALLY. I FILED A COMPLAINT WITH TOYOTA, WAS GIVEN A CASE NUMBER AND WAS TOLD BY THEIR COMPALINT CENTER THAT IT WAS TOYOTA'S POSITION THAT THE TRANSMISSION IS OPERATING NORMALLY. I FEEL THAT THIS TENDENCY, WHICH HAS BEEN DOCUMENTED BY NUMEROUS OTHER OWNERS AT ONLINE SITES SUCH AS EDMUNDS.COM, IS A SAFETY HAZARD THAT SHOULD BE REMEDIED IN A RECALL. THIS SITUATION OCCURS EVERY TIME THE VEHICLE IS DRIVEN AND REQUIRES VERY CAREFUL CONCENTRATION TO AVOID A SUDDEN AND POTENTIALLY UNSAFE SURGE IN SPEED. NOTHING HAS BEEN DONE TO CORRECT THIS ISSUE AND NO RESPONSE OTHER THAN TO DENY MY COMPLAINT HAS BEEN TAKEN.

**Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

"Floyd County couple wants to alert Toyota owners to be cautious, even if your vehicle year isn't included in the recent recall.

Delma Taylor had been driving her used 2004 Toyota Camry for three years before an accident last October. "My car just sorta took off and I hit the brakes and it didn't stop it. The tree stopped me," says Delma Taylor, who lives in Floyd County.

She says her car was accelerating, but her foot wasn't on the pedal. Luckily, she did not hit any other vehicles or people. Taylor went across the double line, down an embankment and hit a tree.

"Broke my heel, cracked my breast bone. Cracked a rib," says Taylor. After three months of healing and therapy, she's getting closer to being fully recovered."

**Date of Incident:** 20091001  
**Vehicle:** 2008 LEXUS ES350  
**Location of Incident:** PICKERINGTON, OH

**NHTSA Summary:**

ON OCTOBER 1, 2009 MY 2008 LEXUS ES 350 EXPERIENCED UNCONTROLLED ACCELERATION. UPON ENTERING THE HIGHWAY THE VEHICLE INCREASED IN SPEED TO APPROX. 90 MPH WITHOUT DEPRESSING THE ACCELERATOR. THE VEHICLE DID NOT STOP OR SLOW DOWN, EVEN AFTER STEPPING FORCEFULLY ON THE BRAKES. I PUSHED THE START/STOP BUTTON ON THE DASHBOARD NUMEROUS TIMES AND THE CAR WOULD NOT STOP OR CUT OFF. SOMEHOW, THROUGH THE GRACE OF GOD I BEGAN SHIFTING THE GEARS, ONCE THE GEAR WAS PLACED IN NEUTRAL THE SPEED FINALLY BROKE AND THE CAR SLOWED DOWN. THE VEHICLE WAS STEERED TO THE SIDE OF THE ROAD WHERE THE CAR HAD DIFFICULTY COMING TO A COMPLETE STOP. ONCE THE CAR ACTUALLY STOPPED I CALLED THE LEXUS DEALERSHIP AND A FLATBED WAS SENT AND THE CAR WAS TOWED TO THE DEALERSHIP FOR SERVICE. THE LEXUS SERVICE DEPARTMENT DETERMINED THE DAMAGE CONSISTED OF BURNT FRONT PADS AND ROTORS AND BURNT REAR PADS AND ROTORS THAT ALL OCCURRED WHILE TRYING TO STOP THE RUNAWAY VEHICLE. \*TR

**NHTSA Summary:**  
I OWN A 2009 HIGHLANDER HYBRID AND AM CONCERNED THAT I AM EXPERIENCING THE SAME TYPE OF PROBLEMS WITH BRAKING THAT ARE NOW BEING REPORTED FOR THE PRIUS. SOMETIMES, WHEN BRAKING IT FEELS LIKE THE BRAKES ARE NOT ENGAGING AND THERE IS A SENSATION THAT THE CAR IS SPEEDING UP. CONTINUED PRESSURE ON THE BRAKE PEDAL FINALLY SLOWS THE CAR DOWN. I WAS RECENTLY INVOLVED IN A MINOR ACCIDENT WHEN I WAS UNABLE TO BRAKE QUICKLY ENOUGH WHEN APPROACHING A TRAFFIC LIGHT AND HIT THE CAR IN FRONT. THE SENSATION THAT THE BRAKES WERE NOT ENGAGING WAS EXPERIENCED AT THAT TIME AS WELL AS ON OTHER OCCASIONS. I REPORTED THIS ISSUE TO MY TOYOTA DEALER JUST A FEW WEEKS AGO, AND THE MECHANIC WHO TEST DROVE THE VEHICLE, WITH ME IN THE PASSENGER SEAT, STATED HE EXPERIENCED A SIMILAR DELAY IN BRAKING. THE BRAKES WERE THEN TESTED USING COMPUTERIZED DIAGNOSTICS AND I WAS TOLD EVERYTHING CHECKED OUT OK BUT WAS OFFERED NO EXPLANATION OF WHY I WAS HAVING THIS ISSUE WITH THE BRAKES. I AM SHARING THIS ISSUE WITH YOU AS I BELIEVE MY HIGHLANDER HYBRID 2009 MAY NOT BE CONSISTENTLY TRUSTWORTHY WHEN THE BRAKES ARE NEEDED. PLEASE ADVISE.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10315521  
**Date of Incident:** 20091003  
**Vehicle:** 2007 TOYOTA PRIUS  
**Location of Incident:** JEFFERSONVILLE, IN

**NHTSA Summary:**  
I OWN A 2007 PRIUS, AND HAVE ENJOYED THE CAR. HOWEVER, SOMETIME IN OCTOBER 2009, I WAS DRIVING TO A WEDDING SHOWER AND THE CAR SUDDENLY ACCELERATED WHEN I WAS ENTERING A MULTI-LANE EXPRESSWAY. IT WOULD NOT DECELERATE WHEN I EASED OFF THE ACCELERATOR, AND I HAD TO VEER ACROSS LANES TO AVOID HITTING A TRUCK IN FRONT OF ME. SIMPLE BRAKING DID NOT STOP THE ACCELERATION, ONLY VERY HARD AND CONTINUED AND PANICKED BRAKING. ON

C-1551

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THE WAY BACK, ON AN AREA OF INTERSTATE THAT WAS FREE OF VEHICLES, I WAS ABLE TO RECREATE THE ACCELERATION BY 'STOMPING' ON THE ACCELERATOR. AGAIN, IT WOULD NOT STOP ACCELERATING WHEN I TOOK MY FOOT OFF THE ACCELERATOR. AND ONLY AFTER STOMPING THE BRAKE A LOT DID IT RETURN TO REGULAR RESPONSIVENESS. I HAVE NOT "TRIED" THAT AGAIN, AND MY HUSBAND DID TRY, BUT COULD NOT DUPLICATE MY EXPERIENCE. WE CONTACTED OUR LOCAL TOYOTA DEALER (GREENTREE IN CLARKSVILLE, IN) AND THEY WERE NOT RESPONSIVE. LATER IN THE FALL, AFTER THE RECALL ABOUT FLOOR MATS, WE WERE TOLD TO TAKE THE FLOOR MAT AWAY ON DRIVERS SIDE, AND A "FIX" WOULD BE DEVELOPED. I AM NOW FEARFUL OF THE CAR. I AM REPORTING NOW BECAUSE I DO NOT BELIEVE THAT THE PRIUS PROBLEM IS A SIMPLE FLOOR MAT ISSUE (NEVER DID, BUT AM A WOMAN AND CERTAINLY NOT "KNOWLEDGEABLE" SO AS TO REFUTE TOYOTA'S ENGINEERS.)

**NHTSA Summary:**

APPROXIMATELY ONE MONTH AGO,EARLY OCT., I WAS MERGING ONTO AN EXPRESSWAY WITH MY 2007 CAMRY. AS I WAS BRISKLY ACCELERATING, I NOTICED THE GAS PEDAL WAS STUCK AND THE TACHOMETER WAS REGISTERING 6000 TO 7000 RPM'S. THERE WAS ONLY LIGHT TRAFFIC, NO ONE AHEAD OF ME FOR SEVERAL HUNDRED YARDS. I PUT THE CAR INTO NEUTRAL AND WAS ABLE TO FLIP THE PEDAL UP WITH MY TOE. I CAREFULLY DROVE HOME AND BROUGHT THE CAR INTO THE TOYOTA DEALERSHIP SERVICE DEPARTMENT THE NEXT MORNING. I HAD INSPECTED THE FLOOR MAT AND SAW THAT IT WAS NOWHERE NEAR THE GAS PEDAL. THE SERVICE MANAGER TOOK OUT THE FLOOR MAT AND SAID THAT WAS THE PROBLEM. ALTHOUGH I ASKED TO HAVE THE LINKAGE CHECKED, I DOUBT THAT WAS DONE. THE PROBLEM SO FAR HAS NOT RECURRED. IN ORDINARY EXPRESSWAY TRAFFIC THIS COULD HAVE BEEN DISASTROUS. \*TR

**NHTSA Summary:**

I AM WRITING THIS LETTER ON BEHALF OF MY MOTHER. SHE DRIVES A 2002 TOYOTA CAMRY. LAST WEEK SHE INFORMED ME THAT HER CAR DID IT AGAIN AND THAT SHE IS AFRAID TO DRIVE THE CAR. WELL, I DIDN'T FULLY UNDERSTAND WHEN SHE SAID HER CAR WOULD SOMETIMES ACCELERATE IN BURSTS UNTIL I SAW NIGHTLINE LAST NIGHT REGARDING THE TOYOTA RUN-AWAY CAR ISSUE. HERE ARE THE INCIDENTS THAT HAVE HAPPENED TO MY MOM: 1)ON THE MORNING OF SEPTEMBER 3, 2009, SHE WAS BACKING OUT OF HER SPACE AT A SUPERMARKET PARKING LOT AND THE CAR BACK OUT REALLY FAST. SHE WAS SO AFRAID THAT SHE WAS GOING TO HIT SOMEONE. LUCKILY, NO ONE WAS BEHIND HER SO NO ONE GOT HURT. SHE TRIED APPLYING THE BRAKES TO NO AVAIL AND THEN TRIED MOVING THE GEARS AND EVENTUALLY THE CAR STOPPED. 2)ON SEPTEMBER 20, 2009, SHE WAS BACKING OUT FROM HER HOME AND THE CAR TOOK OFF AND WENT BACK REALLY FAST AND THEN SPUN AROUND AND THEN HIT A TREE ACROSS THE STREET IN THE NEIGHBOR'S SWELL. SHE HIT THE BRAKE PEDAL BUT THE CAR DID NOT STOP. SHE THEN TURNED THE IGNITION OFF AND THE CAR EVENTUALLY STOPPED. 3)ON OCTOBER 6, 2009, SHE WAS BACKING OUT FROM GETTING HER HAIR DONE AND THE CAR ACCELERATED, TURNED AROUND AND WENT TOWARDS THE HOUSE ACROSS THE STREET AND THEN WENT STRAIGHT INTO THE BACKYARD OF THE HOUSE--HITTING THE SIDE OF THE HOUSE ALONG THE WAY. THE CAR WAS OUT OF

C-1554

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

CONTROL. THE BRAKES DIDN'T WORK. THE CAR BROKE DOWN THE CLOTHES LINE. THANK GOD THAT NEITHER SHE, THE PASSENGER, NOR THE OWNER OF THE HOUSE GOT HURT. THE OWNER OF THE HOUSE WAS UNDER A CAR - FIXING IT IN THE BACKYARD. HAD HE NOT BEEN UNDER THE CAR, SHE FELT SURE THAT THE CAR WOULD HAVE HIT HIM. 4)ON OCTOBER 27, 2009 SHE WAS DRIVING ABOUT 40 MILES PER HOUR WHEN THE CAR JUST TOOK OFF GOING REALLY FAST. SHE TOOK HER FEET OFF OF THE GAS PEDAL AND TRIED TO USE THE BRAKES. THAT'S WHEN SHE TOLD ME THAT SHE WAS SO SCARED AND DIDN'T WANT TO DRIVE THE VEHICLE ANYMORE. \*TR

**NHTSA ODI Number:** 10324350  
**Date of Incident:** 20091007  
**Vehicle:** 2001 TOYOTA AVALON  
**Location of Incident:** BRADENTON, FL

**NHTSA Summary:**  
INFORMATION REDACTED PURSUANT TO THE FREEDOM OF INFORMATION ACT (FOIA), 5 U.S.C. 552(B)(6) ON OCT. 7, 2009, AT ABOUT 3:00 PM EDT ON A SUNNY DAY IN BRADENTON, FL, I WAS DRIVING ALONE WHILE SOBER, ALERT, AND HEALTHY AT ABOUT 35 MPH ON A PAVED SIDE ROAD [XXX] APPROACHING A RED STOPLIGHT AT U.S. 41 SO WITH 2 OR 3 CARS STOPPED AHEAD OF ME FOR THE LIGHT. ABOUT 100 YARDS BEFORE THE STOPLIGHT, I APPLIED MY FOOTBRAKE,[XXX] (OK WHEN INSPECTED & DRIVEN A WEEK EARLIER AS PART OF OIL CHANGE & GENERAL CHECKUP), THE FOOT PEDAL WENT TO THE FLOOR, WITH NO BRAKING EFFECT. I SWERVED TO THE LEFT OF THE CARS AHEAD OF ME AND MADE A SHARP LEFT TURN WHEN I REACHED U.S. 41, TO AVOID HITTING/BEING HIT BY ONCOMING TRAFFIC. MY CAR ROLLED OVER AND CRASHED. I HIT MY HEAD ON THE CAR'S ROOF[XXX]. I NEVER LOST CONSCIOUSNESS, BUT THE PAIN WAS TERRIBLE. I BLEED, UPSIDE DOWN, FOR ABOUT 10-15 MINUTES, FEARING ANOTHER CRASH FROM ONCOMING CARS, HANGING FROM MY SEATBELT. A BYSTANDER STANCHED THE BLOOD EVENTUALLY. THE PARAMEDICS SHOWED UP IN AN AMBULANCE & TOOK ME TO THE EMERGENCY ROOM AT MANATEE MEMORIAL HOSPITAL IN BRADENTON. THE DR. CLEANED VERY PAINFUL GLASS SHARDS FROM MY MULTIPLE SCALP WOUNDS, THEN PUT IN FIVE STAPLES & RELEASED ME. TWO SHERIFF'S DEPUTIES INTERVIEWED ME & SAID MY CAR'S TIRE-MARKS SHOWED SIGNS OF ACCELERATION. I DENIED ACCELERATING; IT MADE NO SENSE TO ME UNTIL RECENT STORIES IN THE NEWSPAPER ABOUT TOYOTA BRAKE PROBLEMS AND SUDDEN UNEXPLAINED ACCELERATION IN OTHER CASES. A FRIEND PICKED ME UP THE NEXT DAY I WENT TO THE GARAGE OF ELMER'S TOWING, WHICH HAD TOWED MY TOTALLY WRECKED CAR. I ASKED FOR THE FOOT BRAKES TO BE CHECKED. THEY WERE NORMAL. I FOUND THIS VERY PUZZLING; IT ONLY MADE SENSE RECENTLY AS I READ AND HEARD ON TV ABOUT SIMILAR PROBLEMS BY OTHER WITH TOYOTAS. SHELLY DEVANE OF ELMER'S IS A WITNESS TO THE REPORT OF OK BRAKES. I STRONGLY BELIEVE THAT AN INTERMITTENT ELECTRONIC PROBLEM WITH THE BRAKES CAUSED THE WRECK. I DID NOT FILE THIS COMPLAINT EARLIER BECAUSE THE EVIDENCE IS CIRCUMSTANTIAL & THE CAR NOW GONE. \*TR

**Additional Summary:**

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2009 TOYOTA HIGHLANDER WITH MCNEIL WEATHER TECH FLOOR MATS WITH PART NUMBER 44115-1-2-3. WHILE DRIVING 65 MPH HE ATTEMPTED TO ACCELERATE TO PASS A VEHICLE AND NOTICED THAT THE FLOOR MAT BECAME STUCK BEHIND THE ACCELERATOR PEDAL CAUSING THE VEHICLE TO CONTINUALLY ACCELERATE. THE CONTACT WAS ABLE TO RELEASE THE FLOOR MAT WHICH ALLOWED THE PEDAL TO RELEASE. THE FLOOR MAT HAS NOT BEEN CONFIRMED AS THE CAUSE OF THE FAILURE BY A DEALER. THERE WERE NO PRIOR WARNINGS. THE FAILURE MILEAGE AND VIN WERE UNAVAILABLE.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10303710  
**Date of Incident:** 20091012  
**Vehicle:** 2008 TOYOTA TACOMA  
**Location of Incident:** BOCA RATON, FL  
**NHTSA Summary:**  
I PREVIOUSLY FILED ODI COMPLAINT 10282779 TO REPORT TO TWO INSTANCES WHERE MY TACOMA ACCELERATED ON ITS OWN AT A TIME WHEN I HAD ABOUT 17,000 MI. ON THE VEHICLE. THEREAFTER I TRIED TO TROUBLESHOOT THE PROBLEM. THE ONLY THING THAT CHANGED PRIOR TO THE ONSET OF THE SPONTANEOUS ACCELERATION WAS THAT I ACQUIRED A BLACKBERRY CURVE TO REPLACE MY PREVIOUS CELL PHONE. MY OLD CELL PHONE WAS SMALLER, SO WHILE DRIVING I USUALLY KEPT IT IN THE SLOT NEXT TO MY GEAR SHIFTER. MY BLACKBERRY WAS MUCH BIGGER AND DIDNT FIT IN THE SLOT. THEREFORE I PUT IT IN THE CUP HOLDER UNDERNEATH MY DASHBOARD. IT WAS THEN THAT I STARTED EXPERIENCING THE ACCELERATION PROBLEM. SUBSEQUENTLY, I STARTED CARRYING MY BLACKBERRY EITHER IN MY BACKPACK ON THE PASSENGER SEAT OR IN THE SLOT WHERE I USED TO KEEP MY SMALLER CELL PHONE AND I NO LONGER CHARGE THE BLACKBERRY USING THE CHARGER THAT PLUGS INTO MY LIGHTER SOCKET IN MY DASHBOARD. WITH ONE EXCEPTION (WHICH I SHALL DESCRIBE) THIS HAS SOLVED THE PROBLEM OVER THE 9,000 MI. SINCE IT BEGAN. ON 10/21/2009, I WAS DRIVING MY TACOMA AT A TIME WHEN I NEEDED TO CHARGE MY BLACKBERRY. I PLUGGED MY BLACKBERRY INTO THE CAR CHARGER AND PLACED THE BLACKBERRY IN MY BACKPACK ON THE PASSENGER SEAT. WITHIN 10 MILES MY TACOMA STARTED ACCELERATING UNCONTROLLABLY. I SHIFTED THE TRUCK INTO A LOWER GEAR AND UNPLUGGED MY PHONE FROM THE CHARGER, BUT THE VEHICLE KEPT ACCELERATING. I SHIFTED TO NEUTRAL AND TURNED OFF THE ENGINE WHEN IT STARTED TO REDLINE, AND STEERED THE VEHICLE OFF THE SIDE OF THE ROAD. AFTER I STOPPED, I SHIFTED INTO PARK AND TURNED THE IGNITION AND THE ENGINE AGAIN STARTED TO REDLINE. I LET IT REST A COUPLE OF MINUTES, AND IT STARTED NORMALLY AND I DROVE OFF. I NO LONGER CHARGE MY BLACKBERRY WITH THE LIGHTER CHARGER AND HAVE NOT HAD ANY SUBSEQUENT PROBLEMS. IT IS MY BELIEF THAT MY BLACKBERRY'S ELECTROMAGNETIC FREQUENCIES INTERFERE WITH MY TACOMA'S ELECTRICAL SYSTEM WHEN THE PHONE IS EITHER TOO NEAR THE DASH OR PLUGGED INTO THE CAR CHARGER. \*TR

**Date of Incident:** 20091013  
**Vehicle:** 2007 TOYOTA HIGHLANDER HV  
**Location of Incident:** LUNENBURG, MA

**NHTSA Summary:**  
ON OCTOBER 13, 2009, MY 2007 TOYOTA HIGHLANDER HYBRID WAS PARKED AT A SMALL BUSINESS PARKING LOT, ABOUT 40 FT. AWAY FROM ANOTHER PARKED CAR. THE WEATHER WAS CLEAR AND DRY. DURING THE PROCESS OF PUTTING THE CAR IN REVERSE, WITH MY FOOT ON THE BRAKE (NECESSARY FOR IGNITION) MY CAR ACCELERATED ON ITS OWN AT A VERY HIGH SPEED, AND SMASHED INTO THE PARKED CAR BEHIND ME. I HAD ABSOLUTELY NO CONTROL OF THIS CAR. IT DAMAGED THE BACK OF THE OTHER CAR SO COMPLETELY THAT IS WAS UNDRIVABLE AND HAD TO BE TOWED. MY CAR HAD SUBSTANTIAL DAMAGE TO THE REAR BUMPER TRUNK/HATCH BACK AND EXHAUST SYSTEM. THE ESTIMATED DAMAGE IS \$3500-\$4500. THIS IS NOT A FLOOR MAT RELATED PROBLEM. THE HIGHLANDER HAS HOOKS THAT SECURE THE DRIVERS SIDE FLOOR MATS SO THEY DO NOT COME IN CONTACT WITH THE GAS PEDAL. I AM VERY CONCERNED ABOUT THE SAFETY OF THIS CAR. MY CAR HAD JUST HAD ITS 30K SERVICE A WEEK PRIOR TO MY ACCIDENT AND IS VERY WELL MAINTAINED. I AM A VERY SAFE AND CAREFUL DRIVER WITH AN OUTSTANDING DRIVER RECORD AND I KNOW THIS WAS NOT MY FAULT. THIS CAR SPED OUT OF CONTROL BY ITSELF. NO ONE COULD POSSIBLY REVERSE THEIR CAR IN A SMALL PARKING LOT THAT QUICKLY. I HAVE CONTACTED TOYOTA AND THEY HAD A CORPORATE INVESTIGATOR INSPECT MY CAR FOR POTENTIAL CAUSES. THEY INDICATED THAT NO UNUSUAL ERRORS WERE REPORTED ON THE VEHICLES COMPUTER. I FEEL TOYOTA OWES ME AND POSSIBLY HUNDREDS OF OTHER TOYOTA OWNERS THAT HAVE EXPERIENCED THE SUDDEN ACCELERATION PROBLEM AN EXPLANATION AND CORRECTIVE ACTION. THIS IS A VERY DANGEROUS AND REAL PROBLEM. \*TR

**Date of Incident:** 20091014  
**Vehicle:** 2000 LEXUS GS300  
**Location of Incident:** VIENNA, VA

**NHTSA Summary:**  
TWICE IN THE SAME DAY OUR 2000 LEXUS GS300 EXPERIENCED ACCELERATION PROBLEMS SIMILAR TO THOSE NOW INVOLVED IN THE INTERNATIONAL INVESTIGATION OF TOYOTA PRODUCTS. THE ACCELERATION BEGAN AS THE VEHICLE WAS STOPPED. I HAD TO PUSH THE BRAKE WITH GREAT FORCE TO KEEP THE VEHICLE FROM MOVING FORWARD. WHEN I PLACED THE CAR IN NEUTRAL, THE REVVING OF THE ENGINE STOPPED. THE FLOOR MAT ON THE DRIVER'S SIDE HAD NOT BEEN MOVED AND WAS NOT INTERFERING WITH THE GAS PEDAL. WE CALLED A MECHANIC WE USE FOR THE CAR AFTER THE INCIDENT TO FIND OUT WHETHER ANYTHING SIMILAR HAD BEEN REPORTED OR IF LEXUS HAD ISSUED A RECALL. WHEN WE LEARNED THAT OUR MODEL VEHICLE WAS NOT INDICATED AS HAVING A PROBLEM, WE DID NOT DO ANYTHING FURTHER ABOUT THE PROBLEM. WE'VE NOT HAD THE PROBLEM SINCE THEN. HOWEVER, I THOUGHT IT BEST TO REPORT THE PROBLEM AFTER HEARING ABOUT VERY SIMILAR ISSUES IN OTHER MODELS OF TOYOTAS AND LEXUSES. I'M WONDERING IF THE PROBLEM EXTENDS FURTHER THAN THE MODELS AND MODEL YEARS NOW BEING RECALLED? \*TR

**NHTSA Summary:**

I HAD COME TO A COMPLETE STOP AT A RED LIGHT WITH MY FOOT ON THE BRAKE, MY 2007 TOYOTA TACOMA STARTED TO ACCELERATE. I FREAKED OUT, THINKING THAT I MAY HAVE ACCIDENTALLY PUSHED DOWN ON THE ACCELERATOR PEDAL. I MOVED MY FOOT OVER TO THE LEFT A LITTLE, WITH NO CHANGE. I THEN LOOKED DOWN TO MAKE SURE THAT MY FOOT WAS NOT ON THE ACCELERATOR PEDAL. LUCKILY, THE LIGHT CHANGED NOT LONG AFTER THIS INCIDENT. IT HAS NEVER OCCURRED AGAIN.

**Additional Summary:**

**Toyota ID Number:**

**NHTSA ODI Number:** 10324112  
**Date of Incident:** 20091015  
**Vehicle:** 2006 LEXUS GS300  
**Location of Incident:** TOLUCA LAKE, CA

**NHTSA Summary:**

I DRIVE A 2006 LEXUS GS300. LAST FALL, AS I BACKED OUT OF MY PARKING SPACE - IN A BUILDING - MY CAR "TOOK OFF" AND HIT A CEMENT WALL. (AT FIRST, I THOUGHT I HIT THE GAS PEDAL IN ERROR HOWEVER, AFTER WHAT HAPPENED NEXT, I KNEW THAT WAS NOT THE CASE. FORTUNATELY, THERE WERE NO PEDESTRIANS IN THE PARKING LOT.) I PUT THE CAR IN DRIVE AND IT "TOOK OFF" AGAIN. LUCKILY, I HIT A CEMENT PARKING BUMPER THAT STOPPED ME. ALL THIS TOOK PLACE IN MAYBE 15 SECONDS OR SO. NOT REALIZING THERE WAS ANYTHING TERRIBLY WRONG WITH MY CAR, I STEERED AROUND THE BUMPER. THE CAR CONTINUED TO ACCELERATE AND I WAS HEADED FOR ANOTHER CEMENT WALL. I WAS APPLYING MY BRAKES WITH ALL MY EFFORT AND FINALLY I CAME TO A STOP A FEW FEET FROM THE WALL. SHAKING, I DROVE MY CAR DIRECTLY TO THE LEXUS DEALER AND TOLD HIM WHAT HAPPENED. (AT THAT TIME I USED THE TERM "TAKE OFF" AS I HADN'T HEARD ABOUT ALL THE ACCELERATION PROBLEMS) HE RAN MY CAR THROUGH A COMPUTER CHECK AND ASSURED ME THAT HE COULD FIND NOTHING WRONG. SEVERAL WEEKS LATER A FRIEND ASKED ME WHAT KIND OF CAR I DROVE AND TOLD ME ABOUT ALL THE PROBLEMS TOYOTA WAS HAVING. I DROVE MY CAR BACK TO THE DEALER AND ASKED HIM TO RECHECK THE CAR. HE DID, AND AGAIN ASSURED ME THAT THERE WERE NO PROBLEMS. WE BOUGHT THIS CAR USED LESS THAN 1 YEAR AGO WITH JUST 12,000 MILES ON IT. IT OCCURRED TO ME THAT IT WAS POSSIBLY TRADED IN BECAUSE IT HAD ACCELERATED WHEN THE LAST OWNER HAD IT. THE DEALER CHECKED AND SAID THERE HAD BEEN NO PREVIOUS ACCELERATION PROBLEMS. ONE LAST BIT OF INFO...I'M NOT REALLY SURE THE EXACT MONTH I EXPERIENCED THE PROBLEMS. AND FINALLY, EVEN THOUGH I HAVE NOT HAD ANY ACCELERATION PROBLEMS SINCE LAST FALL, I AM STILL NERVOUS EVERY TIME I DRIVE MY CAR. PLEASE ADVISE. THANK YOU \*TR

**Vehicle:** 2009 TOYOTA TACOMA  
**Location of Incident:** HUNTINGDON VALLEY, PA

**NHTSA Summary:**

I WAS ON MY WAY TO WORK IN MY NEW (3 MONTHS OLD) 2009 TOYOTA TACOMA. I WAS ABOUT ONE BLOCK FROM HOME WHEN I WAS APPROACHING A RED LIGHT. AS I WAS BRAKING FOR THE RED LIGHT AND THE ENGINE SUDDENLY SPED UP ON ITS OWN. I HAD TO PRESS DOWN VERY HARD ON THE BRAKES TO STOP THE CAR, BUT WHEELS WERE STILL SPINNING CAUSE THE BRAKES TO SMOKE. (I COULD SEE THE SMOKE IN MY REAR VIEW MIRROR. I HAD TO PUT THE CAR IN PARK TO COMPLETELY STOP THE FORWARD MOVEMENT OF THE CAR. THE ENGINE CONTINUED TO RUN AT VERY HIGH RPM. I THEN SHUT THE VEHICLE OFF. I STARTED THE CAR AGAIN IN PARK. THE ENGINE AGAIN RACED UP MUCH HIGHER THAN NORMAL. I SHUT THE CAR OFF AGAIN AND RESTARTED AND EVERY THING WAS NORMAL. I HAD THE CAR TOWED TO THE TOYOTA DEALER AS I FELT IT WAS UNSAFE TO DRIVE. PRIOR IT BEING TOWED I CHECKED THE GAS PEDAL AND THEIR WERE NO OBSTRUCTIONS AROUND IT. THE DEALER COULD NOT FIND ANY FAULT CODES OR STICKING LINKAGE ETC. THEY ALSO TOOK IT FOR A TEST DRIVE. THE SERVICE MANAGER SUGGESTED I ACCIDENTALLY PUT MY FOOT ON THE GAS INSTEAD OF THE BRAKE, WHICH I TRULY BELIEVE IS NOT THE CASE HERE. I SAW OTHER REPORTS ON THE INTERNET SIMILAR TO THIS FOR THE TACOMA SO I FELT COMPELLED TO NOTIFY YOU. KINDLY REQUEST THAT YOU LOOK INTO THIS MATTER AS SOMEONE COULD EVENTUALLY GET SERIOUSLY HURT OR KILLED. NOTE: I WAS NOT USING CRUISE CONTROL AT THE TIME OF THE INCIDENT. \*TR

**NHTSA Summary:**

DEAR NHTSA, I BOUGHT THE TOYOTA AVALON LIMITED EDITION 2007. MY WIFE IS THE MAIN DRIVER FOR THIS VEHICLE. SHE RECENTLY EXPERIENCED THE GAS ACCELERATION ON THIS VEHICLE FOR THE PAST 6 WEEKS. I JUST CALLED TOYOTA MANUFACTURE AND COMPLAINED TO THEM ABOUT MY CONCERN AND THEY GAVE ME THE DOCUMENTATION # 0911113153. THEY ADVISED ME TO BRING THE CAR TO THE DEALERSHIP FOR CHECK UP. I TOLD THEM THAT WHEN THE CAR ACCELERATES BY ITSELF ON AND OFF SOMETIMES, IT'S VERY DIFFICULT FOR THE TECHNICIAN TO IDENTIFIES THE ISSUE. I ASKED TOYOTA CUSTOMER CARE TO MAIL ME A LETTER IN REGARDING THE ISSUE IF THEY IDENTIFY THE CAUSE. MY NAME IS QUANG VUU PLEASE SEND ME ANY INFORMATION REGARDING THE GAS ACCELERATOR FOR TOYOTA CARS AND TRUCKS. I THANK YOU FOR YOUR SUPPORT AND ASSISTANCE. \*TR SINCERELY, QUANG VUU

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

HI, I HAVE A 2005 TOYOTA CAMRY. I READ A RECENT ARTICLE REGARDING THE LEXUS AND TOYOTA HAVING UNEXPECTED ACCELERATION. THIS HAS HAPPENED TO ME 3 TIMES IN THE LAST 30 DAYS. THE FIRST COUPLE OF TIMES I WAS COMING TO A STOP AT A STOP SIGN AND AT A RED LIGHT. I WAS APPLYING MY BRAKES AND THE CAR SUDDENLY ACCELERATED FOR A COUPLE OF SECONDS. I HAD TO PUT A LOT MORE PRESSURE ON THE BRAKES TO STOP. THE THIRD INCIDENT HAPPENED IN A PARKING LOT. I PULLED IN THE LOT BEHIND ANOTHER CAR AND WAS APPLYING THE BRAKES. I WAS STOPPED WITH THE BRAKES APPLIED AND SUDDENLY THE CAR ACCELERATED. LUCKILY I STILL HAD MY FOOT ON THE BRAKES OTHERWISE I WOULD HAVE HIT THE CAR IN FRONT OF ME. I DID, HOWEVER BURN RUBBER AS THE TIRES SPUN WHILE I HAD TO PRESS DOWN HARD ON THE BRAKES. I TOOK IT IN TO MY MECHANIC. THEY CALLED A TOYOTA DEALERSHIP IN MODESTO, CA TO SEE IF THERE WAS A RECALL FOR THIS PROBLEM OR IF THEY HAD HEARD OF A SIMILAR TYPE PROBLEM. THEY SAID THERE WAS NO RECALL FOR THIS PROBLEM AND WERE NOT AWARE OF OTHER INCIDENTS. TO ME THIS WAS A VERY SCARY SITUATION. WHEN YOU APPLY THE BRAKES YOU WOULD EXPECT TO STOP, NOT HAVE THE CAR ACCELERATE. THIS COULD VERY EASILY RESULT IN A CRASH. \*TR

**NHTSA Summary:**

I BOUGHT USED 2005 TOYOTA CAMRY FOR MY 16 YEAR OLD DAUGHTER. WHILE WE WERE TRAINING HER, THE CAR ACCELERATED QUICKLY FOR ABOUT 2 SECONDS AS IF SOMEONE FLOORED IT. I YELLED AT MY DAUGHTER BECAUSE I THOUGHT SHE WAS GOOFING AROUND BUT SHE PROTESTED SHE DID NOT MOVE THE ACCELERATOR. I SUBSEQUENTLY FOUND OUT THIS HAPPENED TO MY WIFE WHILE SHE WAS TRAINING HER. THIS HAPPENED TWICE OVER A 6 MONTH PERIOD. OTHER THAN THAT THE CAR RUNS NORMALLY. I DID NOT THINK MUCH OF IT UNTIL I STARTED HEARING ABOUT THE CRASHES DUE TO UNCONTROLLED ACCELERATION. I HAVE THREE OTHER 2001 CAMRY'S AND NEVER HAD A PROBLEM LIKE THIS. THERE WAS NOTHING OBSTRUCTING THE GAS PEDAL. I HAVE DECIDED TO TAKE IT TO THE DEALER THIS WEEK. I GUARANTEE YOU THERE IS SOMETHING INTERMITTENT ELECTRONIC CAUSING THIS. \*TR

**Location of Incident:** RENO, NV  
**NHTSA Summary:**  
I PULLED INTO A PARKING SPACE AT A SHOPPING CENTER NEAR MY HOME, THEN BACKED UP A FEW FEET IN ORDER TO STRAIGHTEN MY CAR. WHEN I PUT THE TRANSMISSION INTO DRIVE, THE CAR SUDDENLY SURGED FORWARD ENTIRELY ON ITS OWN, STRIKING THE CONCRETE BARRIER A FEW FEET IN FRONT OF MY CAR. I DID NOT ACCELERATE, THERE WERE NO FLOOR MATS ON THE DRIVER'S SIDE, AND THE FORCE THREW ME AGAINST THE STEERING WHEEL. A WITNESS RAN OVER TO SEE I WAS INJURED, BUT I WAS JUST BADLY FRIGHTENED. THE FRONT FENDER WAS DENTED, BUT ACTUALLY POPPED BACK OUT AS I WAS STANDING BESIDE MY CAR WITH THE WITNESS. I HAD PREVIOUSLY COMPLAINED ABOUT THE ENGINE ALTERNATELY SLOWING AND SURGING AS I DROVE, USUALLY ONLY AT SPEEDS UP TO 40MPH, TO MY LOCAL SERVICE DEPARTMENT. WHEN I CALLED MY SERVICE DEPARTMENT, THEY GAVE ME A TOLL FREE NUMBER WHERE I SPOKE TO A TOYOTA CASE MANAGER WHO ASSIGNED ME A CASE NUMBER AND TREATED ME VERY COLDLY AND WITH SUSPICION, ASKING PERSONAL QUESTIONS ABOUT MY HEALTH, INSURANCE COMPANY AND DRIVING RECORD. I SAID I WAS JUST CONCERNED THAT MY CAR HAD BEHAVED LIKE ONE I HAD JUST HEARD ABOUT ON THE LOCAL NEWS, AND I WANTED TO KNOW WHAT TO DO AND PREVENT OTHERS FROM EXPERIENCING WHAT HAD HAPPENED TO ME OR WORSE. THE CASE MGR.

**Vehicle:** 2006 TOYOTA AVALON  
**Location of Incident:** RANCHO SANTA MARGARITA, CA  
**NHTSA Summary:**  
I HAVE A 2006 TOYOTA AVALON AND HAVE HAD THE ACCELERATOR GET STUCK FOUR TIMES OVER THE PAST TWO YEARS. EACH TIME WAS WHEN I WAS PUSHING THE ACCELERATOR DOWN HARD TO GAIN SPEED. THREE TIMES I WAS FORCED TO PUT BOTH FEET ON THE BRAKES AS HARD AS I COULD TO SLOW THE ACCELERATION AND LUCKILY I WAS IN OPEN STRETCHES WHERE I DIDN'T HAVE INTERSECTIONS OR ONCOMING TRAFFIC TO CONTEND WITH. THE FOURTH TIME WAS JUST RECENTLY, AFTER I HAD HEARD ABOUT THE RECALL AND AFTER I HAD VERIFIED THE FLOOR MATS WERE SECURED PROPERLY. I ACTUALLY REACHED DOWN WITH MY RIGHT HAND AND UNSTUCK THE ACCELERATOR. THE FLOOR MAT WAS NOT IN CONTACT WITH THE ACCELERATOR AT ALL. THIS IS A VERY UNSAFE CONDITION. WHEN THIS HAS HAPPENED, IT HAS BEEN TERRIFYING AND I AM LUCKY IT DID NOT HAPPEN ON A BUSY STREET. I LITERALLY HAD TO PUT THE FULL FORCE OF BOTH FEET ON THE BRAKES TO SLOW DOWN THE UNCONTROLLED ACCELERATION. WHEN I DRIVE NOW, I AM VERY CAREFUL NOT TO FULLY ENGAGE THE ACCELERATOR. FOR FEAR OF IT GETTING STUCK AND I ALSO MAKE SURE I'M ABLE TO REACH DOWN TO GRAB THE ACCELERATOR IF IT GETS STUCK AGAIN. I HAVE TOLD MY WIFE ABOUT THIS TO MAKE HER AWARE OF THE PROBLEM AND A WAY TO "FIX" IT WHILE DRIVING, BUT THIS IS NOT AN ACCEPTABLE CONDITION AND TOYOTA IS WRONG IN SAYING IT'S STRICTLY A FLOOR MAT ISSUE. \*TR

**NHTSA Summary:**  
ON OCTOBER 17TH, 2009, WHILE PULLING INTO THE PARKING LOT OF MCDONALD'S, MY VAN SUDDEN ACCELERATED AS I ENTERED THE PARKING SPACE. THE MOTOR WAS ROARING. I WOULD HAVE BEEN TURNING INTO MY SPACE. MY FOOT WOULD HAVE BEEN OVER THE BRAKE AND I MAY HAVE STARTED TO PRESS THE BRAKE. WHEN THE VEHICLE SURGED FORWARD, THINKING MY FOOT WAS ON THE GAS, I IMMEDIATELY MOVED IT FURTHER TO THE LEFT AND PRESSED THE BRAKE TO THE FLOOR. I REMEMBER THINKING THIS THING ISN'T SLOWING DOWN ONE BIT NOR WAS IT STOPPING, IT FELT POSSESSED. IT SLAMMED INTO A HEAVY DUTY VAN, ROCKING IT HARD AND DOING CONSIDERABLE DAMAGE TO OUR VAN. I DID TELL THE OFFICER AT THE SCENE THAT I MUST HAVE HAD MY FOOT ON THE GAS, IT WAS THE ONLY THING THAT MADE LOGICAL SENSE TO ME AT THE TIME. IN REPLAYING THE EVENTS IN MY MIND, I WAS SURE MY FOOT WAS OVER THE BRAKE, AND THAT I DIDN'T PRESS ANYTHING HARD UNTIL AFTER THE VEHICLE ACCELERATED, AFTER I MOVED MY FOOT FURTHER TO THE LEFT. I HAVE SINCE AMENDED MY REPORT WITH THE OFFICER AT THE SCENE AND MY INSURANCE COMPANY. THE FRONT-END DAMAGE ON THE VAN HAS BEEN REPAIRED. ON NOVEMBER 17TH A TECHNICAL SPECIALIST FROM TOYOTA WENT OVER THE VAN. THEY RELEASED THE VAN

**Location of Incident:** PRESCOTT, AZ  
**NHTSA Summary:**  
I AM FILING THIS COMPLAINT WITH REFERENCE TO ODI #S 10183308 AND 10288886. THESE ODIS WERE PUT IN BY ME. THESE ARE LEAD UPS TO THIS COMPLAINT. AFTER THE COLLISION WITH THE POLARIS I DROVE MY VEHICLE HOME. THE NEXT DAY I DROVE THE TOYOTA TO TINS TOYOTA IN PRESCOTT AZ. WHERE THE VEHICLE WAS PURCHASED. THEY LOOKED AT THE VEHICLE AND SAID THAT THEY WOULD CALL FOR A FACTORY REP TO LOOK AT MY VEHICLE. THIS WAS TO BE ON NOV. 9, 2009. I DID DRIVE MY VEHICLE TO YARNELL AZ FOR DEER SEASON. I DROVE THE VEHICLE BACK TO PRESCOTT TO MEET WITH THE FACTORY REP. HE DID WHATEVER THEY DO AND SAID HE HAD ALL THE INFORMATION HE NEEDED. HE ALSO TOLD ME TO GO AHEAD AND GET AN ESTIMATE FOR THE REPAIRS BUT NOT TO HAVE IT REPAIRED UNTIL I HEARD FROM TOYOTA. THE PRELIMINARY ESTIMATE IS JUST SHY OF \$2000.00. THIS ESTIMATE WAS GIVEN TO JEFF LOCKE TO BE SENT TO TOYOTA. MY QUESTION TO ALL OF THIS IS, WHY DID TOYOTA ALLOW ME TO DRIVE THIS VEHICLE AFTER THE MEETING, WHEN THEY KNOW THAT I AM DRIVING A TIME BOMB. ALSO WHY HASN'T NATIONAL HIGHWAY SAFETY INVOLVED ITSELF INTO AN INVESTIGATION OF ITS OWN? I NOW KNOW THE VERBIAGE FOR THE INCIDENT. IT IS CALLED "SUDDEN UNINTENDED ACCELERATION" WHICH IS TIED TOGETHER WITH THE CRUISE CONTROL, THROTTLE BODY AND OTHER ELECTRICAL, VACUUM CONTROLLED, MECHANICAL UNITS. LOOK IT UP FOR YOURSELVES. IT WILL OPEN YOUR EYES TO WHAT IS GOING ON WITH THIS CONDITION. MY VEHICLE SITS IN MY GARAGE SO ANYTIME NATIONAL HIGHWAY SAFETY WANTS TO DO AN INVESTIGATION IS FINE WITH ME. TOYOTA HAS NOT DONE A PROPER EVALUATION OF THE ISSUE. MY INSURANCE COMPANY IS BEHIND ME 100% AND IS NOW GOING TO CONTACT TOYOTA TO TRY TO FIND THE CAUSE FOR "SUDDEN ACCELERATION" AND CRUISE CONTROL UNITS TO BEHAVE THE WAY THAT THEY ARE. RACING TO OVER 5000 RPM'S AND HUNTING GEARS THE WAY THEY DO IS JUST NOT THE WAY THEY ARE SUPPOSED TO OPERATE. TOYOTA

**Location of Incident:** MEDFORD, MA

**NHTSA Summary:**  
**Additional Summary:**  
FROM NEWS ARTICLE "TOYOTA SUED IN FATAL CRASH" FROM BOSTON GLOBE BY ERIN AILWORTH, DATED FEBRUARY 27, 2010

A State Police account at the time of the Medford family's accident indicated that Gerald Murphy was driving on Interstate 93 in Medford near Roosevelt Circle when the vehicle crashed in the early hours of Oct. 18. The car veered right and slammed into a guardrail, police said, then swept across four traffic lanes and hit a concrete median barrier. That impact apparently sent the sedan back across the roadway, where it stopped in the breakdown lane.

According to court records, the Murphys were driving home with their children after visiting a Halloween display in southern New Hampshire and were "only minutes" from their house when the crash occurred about 12:15 a.m. Gerald Murphy, the record said, was trying to exit the interstate and had removed his foot from the car's accelerator.

"The Camry, rather than slowing down, suddenly surged, accelerated, and picked up speed," the court filing said. "Gerald Murphy stepped on the brake pedal in an attempt to control the vehicle. Despite his application of the brakes, the vehicle continued to surge." Marianne Murphy was taken to the hospital and later died. Gerald Murphy was seriously injured, though it is unclear what type of injuries he incurred. Neither was wearing a seat belt. An unidentified teen had minor injuries, while the Murphys' adult daughter, Rhonda, was unharmed. Both sat in the back seat and wore seat belts.

**NHTSA Summary:**  
I OWN A 2006 LEXUS IS250 AND THERE IS A PROBLEM THAT I CANNOT SEE TO HANDLE NOR THE DEALER CAN HANDLE. THE PROBLEM WITH THE CAR IS THAT WHEN I'M GOING OVER 60 TO 65 MPH THE CHECK ENGINE LIGHT BLINKS AND THE VSC LIGHT COMES ON. THE CAR DOES NOT ACCELERATE AND JUST THE RPM WOULD GO UP. I TOOK THE CAR IN TO THE DEALER WITH EXTENDED WARRANTY IN HAND ON 4 NOW 5 DIFFERENT OCCASIONS AND EVERYTIME I'M HEARING DIFFERENT STORIES. HERE IS THE LIST. \* MAY 22, 2009: 60,000 MILE SERVICE DONE. \* SEPT 6, 2009: TOOK THE CAR IN FOR "CHECK VSC & CHECK ENGINE". NEXT DAY THEY TOLD ME NOTHING WAS WRONG WITH THE CAR. \* OCT 10, 2009: TOWED CAR TO DEALERSHIP. "CHECK VSC & CHECK ENGINE" LIGHT CAME ON AGAIN. PULLED OVER ON THE HIGHWAY 3 TIMES TO RESET BUT THE LIGHTS DID NOT GO AWAY. PULLED OVER TWICE EARLIER THAT DAY, TWICE THE DAY BEFORE ALSO. \* OCT 14, 2009: (LEXUS TOLD YOU THAT THE ISSUES WERE RESOLVED BY SWAPPING THE ENGINE COILS THE DAY OR TWO BEFORE. NO CHARGES.) I REQUESTED AN EMISSIONS TEST BEFORE I CAME TO PICK IT UP. LEXUS CALLED BACK AND TOLD ME THAT THE ENGINE LIGHT CAME BACK ON AGAIN DURING THE EMISSIONS TEST. STILL LOOKING FOR THE PROBLEM. \* OCT 18, 2009: LEXUS CALLED, TOLD ME THAT THE PROBLEM WITH THE ENGINE IS BECAUSE OF THE CARBON BUILDUP. THEY WERE GOING TO COVER THE VALVE SPRINGS BUT I WOULD HAVE TO PAY FOR THE CLEANUP WHICH IS \$960. NOT COVERED BY EXT. WARRANTY. 2 OTHER DEALERS TOLD ME THAT THE CARBON BUILDUP CLEANUP WAS AN INJUNCTION SERVICE AND IT IS SUPPOSED TO ONLY

C-1578

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

COST 190 DOLLARS. THE FUNNY THING IS THAT THE DEALER WROTE THE PROBLEM IS CAUSED BY "CARBON BUILDUP CLEANUP?" WITH A QUESTION MARK. TOOK THE CAR AND HAD THE INJUNCTION SERVICE DONE. I TOOK THE CAR TO ANOTHER LEXUS DEALER AND THEY TOLD ME THAT WHILE THE OTHER DEALER WAS DOING THE COIL SWAP THEY CRACKED THE COVER FOR IT AND NOW GAS WAS LEAKING. HAD TO GET IT FIXED AND ALSO DID THE CARBON BUILDUP CLEANUP (INJUNCTION SERVICE). FEB 2010 SAME PROBLEM OCCURED.

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2009 TOYOTA CAMRY. WHILE DRIVING 25 MPH OVER RAILROAD TRACKS THE VEHICLE ACCELERATED RESULTING IN A CRASH. THE CONTACT DID NOT REPORT ANY INJURIES. THE CONTACT APPLIED THE BRAKES UNTIL THE BRAKE PEDAL TOUCHED THE FLOORBOARD; HOWEVER, THE VEHICLE DID NOT STOP. WHEN THE STEERING WHEEL LOCKED, THE WINDSHIELD WIPERS BEGAN TO FUNCTION. THE VEHICLE WAS TAKEN TO AN AUTHORIZED TOYOTA DEALER TO BE REPAIRED FOR THE

C-1579

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BODY DAMAGE BUT IT WAS NOT EXAMINED FOR THE CAUSE OF FAILURE. THE CONTACT STATED THAT A FEW MONTHS LATER THE ACCELERATOR PEDAL RECALL WAS REPAIRED; HOWEVER, AFTER THE REPAIR WAS PERFORMED THE VEHICLE SURGED FORWARD INTERMITTENTLY UNTIL THE BRAKES WERE APPLIED. THE VEHICLE WAS TAKEN TO AN AUTHORIZED DEALER WHERE THE BRAKE SYSTEM WAS REPAIRED. THE FAILURE HAD NOT RECURRED BUT THERE WAS A ROCKING NOISE IN THE ENGINE. THE VEHICLE WAS TAKEN TO ANOTHER AUTHORIZED DEALER WHO STATED THAT THE MOTOR MOUNT WAS CRACKED; YET, THE VEHICLE HAD NOT BEEN REPAIRED. THE VIN WAS NOT AVAILABLE. THE FAILURE MILEAGE WAS UNKNOWN. THE CURRENT MILEAGE WAS 18,000. 5/10/2010 \*CW

**NHTSA Summary:**

**Additional Summary:**  
On October 19, 2009, Eva Gomez was parking in her designated parking spot at her condominium located at 136 Benjamin Court, Philadelphia, PA 19114, at approximately 3:00 pm. While her foot was still on the brake, the car unintentionally accelerated, hitting a gas pipe in the condominium and setting fire to the building as well as her car.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10304345  
**Date of Incident:** 20091019  
**Vehicle:** 2007 TOYOTA PRIUS  
**Location of Incident:** MONTEREY PARK, CA

**NHTSA Summary:**

**Additional Summary:**  
ON OCTOBER 19, 2009 I WAS DRIVING SOUTH BOUND ON THE I-5 WHEN THE GAS PEDAL ON MY 2007 TOYOTA PRIUS GOT STUCK AND IT WASNT THE FLOOR MAT. I KNOW THIS BECAUSE I DIDNT HAVE A FLOOR MAT IN THE FIRST PLACE. THE MAJOR PROBLEM IS ON THE PRIUS THE PUSH START BUTTON FAILED SO YOU COULDN'T TURN OFF THE VEHICLE AND WHEN YOU TRIED TO PUT IT IN NUTREUL IT WOULD FAIL (NOT SURE WHY). I AM ASSUMING DO THE SPEED YOU ARE GOING THE COMPUTER DOES NOT ALLOW YOU TO PUT IT NUTREUL OR TURN IT OFF.

**NHTSA Summary:**

**Additional Summary:**  
I HAVE A 2004 TOYOTA PRIUS. ON OCTOBER 19, 2009, THE CAR ACCELERATED BY ITSELF TO 65 MPH. I WAS ABLE TO PRESS ON THE BRAKE, SLOW DOWN THE CAR AND PULL TO THE SIDE OF THE ROAD. I HAD THE CAR TOLLED TO THE LOCAL DEALERSHIP AND THEY SAID THEY COULD NOT "DUPLICATE THE PROBLEM." THEY TOLD ME TO TAKE THE FLOOR MAT OUT. IN THE MEANTIME, THEY CHARGED ME \$1400 TO REPLACE A WATER PUMP AND PERFORM OTHER MAINTENANCE SERVICES. THE RECENT ACCELERATION RECALL BY TOYOTA DOES NOT INCLUDE MY CAR ALTHOUGH I HAD THE ACCELERATION PROBLEM WITH THIS CAR. WHEN I CALLED THE COMPANY TO INQUIRE THE REASON FOR THIS, THEY TOLD ME THAT THIS MODEL WAS MADE IN JAPAN WITH A DIFFERENT PART MANUFACTURE, THUS IT IS NOT UNDER THE ACCELERATION RECALL, JUST THE FLOOR MAT RECALL.

**Additional Summary:**

**Toyota ID Number:**

ON 10/21/09 I WAS STOPPED AT AN INTERSECTION IN MY 2008 RAV4 WHILE WAITING FOR TWO CARS TO GO BY. MY FOOT WAS FULLY PLANTED ON THE BRAKE. SUDDENLY THE

**C-1584**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ENGINE REVVED UNCONTROLLABLY AND THE CAR LURCHED FORWARD. I PRESSED AS HARD AS I COULD ON THE BRAKE. THIS HAPPENED TWICE. I BARELY MANAGED TO KEEP THE CAR OUT OF THE INTERSECTION. THERE WERE NO WARNING LIGHTS. I WAS ABLE TO DRIVE HOME WITHOUT ANOTHER INCIDENT. THE FLOOR MATS WERE FIRMLY CLIPPED INTO PLACE CAUSING NO INTERFERENCE WITH THE ACCELERATOR. I HAD THE REPAIR SHOP AT MY DEALER CHECK IT OVER. THEY COULD NOT FIND ANY PROBLEM WITH IT AND NO REPAIRS WERE MADE. I WROTE A LETTER TO MY DEALER DOCUMENTING MY SAFETY CONCERNS. THE DEALER THEN BROUGHT A TOYOTA FIELD SPECIALIST IN TO LOOK AT IT. HE TOO WAS UNABLE TO FIND ANY PROBLEM. SINCE THEN TOYOTA HAS ANNOUNCED TWO RECALLS ASSOCIATED WITH FLOOR MAT INTERFERENCE AND FAULTY GAS PEDALS. I'VE FOUND OUT THAT MY RV4 WAS BUILT IN JAPAN AND, THEREFORE, NOT SUBJECT TO THE FAULTY GAS PEDALS. THIS LEADS ME TO BELIEVE THAT THE PROBLEM IS DUE TO AN ELECTRONIC GLITCH MOST LIKELY ASSOCIATED WITH THE COMPUTERIZED ELECTRONIC THROTTLE SYSTEM. I BELIEVE TOYOTA NEEDS TO ROLL-OUT A "BRAKE OVERRIDE SYSTEM" TO TRULY RESOLVE THIS PROBLEM. FORTUNATELY, I HAVE NOT HAD ANOTHER "SUDDEN ACCELERATION" EVENT SINCE 10/21/09. \*TR

**Additional Summary:**

**NHTSA ODI Number:** 10305772  
**Date of Incident:** 20091021  
**Vehicle:** 2010 TOYOTA PRIUS  
**Location of Incident:** PALO ALTO, CA

**NHTSA Summary:**  
I PURCHASED A BRAND NEW 2010 TOYOTA PRIUS V ON SEPTEMBER 24, 2009. IT PERFORMED BEAUTIFULLY, AND WAS A REAL PLEASURE TO DRIVE. HOWEVER, A MONTH OR SO LATER, WITH THE CAR IN REVERSE, I STARTED BACKING OUT OF A PARKING PLACE AND IMMEDIATELY NOTICED AN UNUSUALLY INTENSE "REVING" OF THE ENGINE. STARTLED, I IMMEDIATELY PRESSED ON THE FOOT BRAKE, RELEASING IT IN LITTLE STEPS UNTIL THE CAR WAS "INCHED" OUT OF THE PARKING PLACE. I THEN SHIFTED THE LEVER INTO "DRIVE" AND PROCEEDED ON MY WAY QUITE NORMALLY WITHOUT ANY FURTHER PROBLEM WHATSOEVER. IN THE ENSUING MONTHS, THIS STRANGE PHENOMENON HAS ONLY REPEATED ITSELF TWO MORE TIMES OUT OF HUNDREDS OF BACKOUTS FROM PARKING SLOTS. THERE HAS BEEN NO OTHER CIRCUMSTANCE IN WHICH THIS SEVERE " REVING" HAS RE-OCCURRED. IN THE AFOREMENTIONED THREE CASES, I HAD NO RECOLLECTION WHATSOEVER OF PRESSING THE FOOT THROTTLE, AND THEREFORE HAVE PRESUMED THAT THE PROBLEM IS IN THE ELECTRONICS OR SOFTWARE, RATHER THAN IN THE FLOOR THROTTLE MECHANICS. IN EVERY OTHER RESPECT SO FAR, MY 2010 TOYOTA PRIUS V HAS PERFORMED PERFECTLY.

**Additional Summary:**

**Toyota ID Number:**

**Location of Incident:** FLAGSTAFF, AZ

**NHTSA Summary:**  
HI I HAVE A 2009 PRIUS THAT HAS HAD 5 SEPARATE EPISODES OF ACCELERATOR STICKING. SINCE I BOUGHT THE CAR 11-09, THE LAST INCIDENT WAS OCT 09, NO FLOOR MATS IN THE CAR. IT HAS ONLY OCCURRED WHEN, AT 55+ MPH, I ACCELERATE RAPIDLY TO PASS ANOTHER CAR. THE ACCELERATOR FELT LIKE IT HAD REMAINED DEPRESSED WITH CONTINUED SPEED ACCELERATION. THIS DID NOT RESPOND TO PUSHING DOWN OR PULLING UP ON THE ACCELERATOR, OR TO DEPRESSION OF THE BRAKE PEDAL. THE EPISODES LASTED LESS THAN 10 SECONDS AND RESOLVED SPONTANEOUSLY. I WAS UNABLE TO IDENTIFY WHY THE ACCELERATION SUDDENLY STOPPED, BUT WHEN IT FINALLY DID STOP, THE SPEEDOMETER INDICATED OVER 70+ MPH. I PUSHED CONTINUOUSLY ON THE BRAKE PEDAL TO SLOW THE CAR DURING THE EPISODES, WITH ONLY MINIMAL SLOWING OF THE VEHICLE. I HAVE NOT TAKEN THE CAR TO THE DEALER YET, AS EVERYTHING IN THE MEDIA INDICATES THAT THEY DENY ANY PROBLEMS WITH THE CARE AND HAVE HAD NO EXPLANATION FOR THE EVENTS EXCEPT THE CAR MATS.

\*TR

C-1587

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**  
OUR 2009 TOYOTA CAMRY HYBRID HAS EXPERIENCED THREE SEPARATE INCIDENCES OF SUDDEN UNINTENDED ACCELERATION DURING THE PAST NINE MONTHS. THE CAR WAS PURCHASED IN APRIL OF 2008. THE FIRST EVENT OCCURRED IN FEBRUARY 2009. THE SECOND AND THIRD EVENTS OCCURRED IN JULY 2009 AND OCTOBER 2009, RESPECTIVELY. IN ALL THREE EVENTS THE ACCELERATOR "GRABBED" AND BEGAN TO SPEED UNCONTROLLABLY. DURING THE FIRST EVENT, THE CAR CONTINUED TO ACCELERATE EVEN AFTER I REMOVED MY FOOT FROM THE ACCELERATOR. DURING THE SUBSEQUENT TWO EVENTS, THE CAR ACCELERATED WITHOUT MY FOOT EVEN BEING ON THE GAS PEDAL. IN ALL INSTANCES, IT FELT AS IF THE RESUME BUTTON OF THE CRUISE CONTROL (WHICH WAS OFF AT ALL TIMES) WAS DEPRESSED. SPEEDS REACHED IN EXCESS OF 60MPH IN EACH EVENT. DURING THE FIRST TWO EVENTS, A COMBINATION OF EXTREME-PRESSURE BRAKING AND SHIFTING THE CAR INTO NEUTRAL WORKED TO STOP THE CAR, THANKFULLY, WITHOUT INCIDENT. DURING THE THIRD EVENT, AFTER ROUGHLY FIVE TO TEN SECONDS OF ACCELERATION, A "POP" WAS HEARD AT WHICH TIME THE CAR'S ACCELERATION CEASED AND RETURNED TO NORMAL. THE CAR WAS TAKEN TO THE DEALER AFTER EACH INCIDENT. ALL THREE TIMES DIAGNOSTICS WERE PERFORMED AND ALL THREE TIMES THE SAME ANSWER....."FOUND NO CURRENT OR PENDING FAULT CODES." THE FIRST TIME IT WAS BLAMED ON AN AFTER-MARKET FLOOR MAT. WHILE ONE WAS INSTALLED, IT WAS THE TYPE WITH "GRABBER" SPIKES ON THE UNDERSIDE TO PREVENT MOVEMENT, SIMILAR TO A CHAIR MAT. I KNEW THAT THIS WAS NOT THE CAUSE BUT, AS A PRECAUTION, I REMOVED THE AFTER-MARKET FLOOR MAT. FOR THE SECOND EVENT, AGAIN, THE DEALER FOUND NO FAULTS AND, AGAIN, SUGGESTED FLOOR MATS. THE ONLY FLOOR MAT IN THE VEHICLE WAS THE FACTORY-INSTALLED CARPETED FLOOR MAT WHICH WAS SECURED BY THE FACTORY-INSTALLED RETAINING HOOKS. FLOOR MATS WERE NOT THE ISSUE. AS AN EXTRA PRECAUTION, HOWEVER, I REMOVED THE CARPETED MAT. THE THIRD EVENT OCCURRED ON OCTOBER 22, 2009. CAR WAS TAKEN TO DEALER. FACTORY TECHNICIAN WAS BROUGHT IN. NO PROBLEM FOUND. \*TR

2006 TOYOTA TACOMA INVOLVED TO ACCIDENT ON 10/22/09 WHERE DURING THE ACCIDENT THE ACCELERATOR STUCK WIDE OPEN ON THE ICE. MY FOOT WAS ON THE BRAKE WHEN TRUCK STOPPED & THE REAR TIRES WERE STILL SPINNING. I HAD TO TURN OFF THE IGNITION TO GET THE WHEELS TO STOP SPINNING. THE CAR I HIT HONDA ACCORD WAS TOTALED. IT GOT KNOCKED INTO THE DRAINAGE DITCH. LUCKILY NO ONE WAS INJURED. AT THE TIME I DIDN'T TELL POLICE ABOUT THE ACCELERATOR PROBLEM. NOT ON THE POLICE REPORT. I DID ADVISE THE PARTY I HIT & THE TOW TRUCK DRIVERS. ALSO ADVISED THE BODY SHOP. NOW MY INSURANCE WENT UP \$50 A MONTH. I HAVE A TICKET AND HAVE TO PAY A FINE. I IMMEDIATELY REMOVED THE FLOOR MAT WHEN I GOT MY TRUCK BACK FROM THE BODY SHOP. I BELIEVE TOYOTA IS PARTIALLY TO BLAME FOR MY ACCIDENT. I STARTED TO SLIDE ON THE ICE & AT SOME POINT THE ACCELERATOR STUCK WIDE OPEN. THIS I'M SURE MADE THE ACCIDENT MUCH WORSE. IMAGINE BEING ON ICE WITH YOUR ACCELERATOR STUCK WIDE OPEN. I WAS LUCKY NO ONE WAS KILLED. \*TR

**NHTSA Summary:**

C-1589

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

WHILE DRIVING MY VEHICLE ON OR ABOUT OCTOBER 23, 2009, I APPROACHED AN INTERSECTION AND CAME TO A STOP. I TOOK MY FOOT OFF OF THE BRAKE TO PRESS ON THE ACCELERATOR, HOWEVER THE VEHICLE DID NOT ACCELERATE AS ANTICIPATED. I REALIZED I WOULD NOT BE ABLE TO MAKE IT SAFELY INTO THE INTERSECTION AT THIS POINT, AND BEGAN TO BRAKE, AT WHICH TIME THE VEHICLE SUDDENLY HAD A BURST OF ACCELERATION AND THE CAR SHOT OUT INTO THE INTERSECTION, ALMOST INTO THE DITCH ON THE OTHER SIDE, AND ME AND MY SON WERE ALMOST HIT IN THE SIDE BY AN ONCOMING CAR. THIS INCIDENT COMPLETELY FREAKED ME OUT, AND I SUBSEQUENTLY TRADED IN THE VEHICLE. I WOULD ABSOLUTELY NOT PUT MY SAFETY, ESPECIALLY MY CHILD'S, AT ISSUE ANY LONGER, AS THIS IS THE SECOND ISSUE I HAVE HAD WITH THAT PARTICULAR CAMRY, THE FIRST ISSUE RESULTING IN A COLLISION. \*TR

**Toyota ID Number:**  
**NHTSA ODI Number:** 10304212  
**Date of Incident:** 20091023  
**Vehicle:** 2002 TOYOTA 4RUNNER  
**Location of Incident:** HUNTINGTON BEACH, CA

**NHTSA Summary:**

I OWN A TOYOTA 4 RUNNER. WHILE DRIVING ACROSS COUNTRY LAST FALL I NOTICED THAT THE TRUCK WOULD ACCELERATE RAPIDLY WHEN I HAD CRUISE CONTROL ON. THE CRUISE CONTROL WOULD KICK IN AS IT SHOULD HAVE BUT IT WOULD ACCELERATE VERY RAPIDLY AND FELT OUT OF CONTROL. ONCE IT BEGAN THE ACCELERATION, IT WOULD NEVER STOP AND LEVEL OUT TO THE APPROPRIATE SPEED AS IT SHOULD HAVE. IT WOULD CONTINUE TO ACCELERATE BRAKING WORKED IN SLOWING THE VEHICLE DOWN, BUT IT FRIGHTENED ME WHILE I WAS DRIVING. I DO NOT USE THE CRUISE CONTROL NOW AS A RESULT OF THIS. I WAS DRIVING R/T FROM CA TO DENVER, CO AND IT HAPPENED SEVERAL TIMES DURING THIS TRIP.

**Date of Incident:** 20091026  
**Vehicle:** 2010 TOYOTA CAMRY  
**Location of Incident:** HOUSTON, TX

**NHTSA Summary:**  
WE BOUGHT A 2010 TOYOTA CAMRY LESS THAN SIX MONTHS AGO. FROM THE BEGINING WE HAD PROBLEMS WITH THE BRAKES WHICH MAKES A KNOCKING SOUND. TOOK IT BACK TO FRED HAAS TOYOTA ON TWO TO THREE OCASION. THEY CLAIM NOTHING WAS WRONG EACH TIME. I ALSO EXPERIENCED THE ACCELERATION PROBLEM WHICH I TOLD THEM ABOUT, STILL NOTHING WAS DONE. WE HAVE 5 YEARS TO PAY FOR A CAR THAT IS A DANGER TO MYSELF & MY FAMILY.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10340948  
**Date of Incident:** 20091026  
**Vehicle:** 2007 TOYOTA HIGHLANDER HV  
**Location of Incident:** ST LOUIS PARK, MN

**NHTSA Summary:**  
I HAVE A 2007 TOYOTA HIGHLANDER HYBRID. ON 1/26/2009 I WAS STOPPED AT A LIGHT, BEHIND ANOTHER VEHICLE, WAITING FOR THE LIGHT TO CHANGE. I HADN'T BEEN DOING ANYTHING BUT SITTING THERE, WAITING FOR THE CAR IN FRONT OF ME TO START MOVING, WHEN MY VEHICLE WENT FORWARD (LURCHED) AND I REAR-ENDED THE CAR IN FRONT OF ME! I HAVE NEVER DONE THAT IN MY LIFE. MY CAR HIT THE VEHICLE - A MINIVAN, IN FRONT OF ME VERY HARD, (FELT LIKE 10-15 MPH) CAUSING A LOT OF DAMAGE TO THE REAR CARGO DOOR. HOWEVER, BECAUSE THE EVENT WAS SO ODD, AND HAPPENED SO FAST, (AND THIS HAPPENED BEFORE TOYOTA EVER RECALLED ANYTHING EXCEPT THE PRIUS), I ASSUMED I MUST'VE DONE SOMETHING TO CAUSE IT. SO WHEN THE POLICE GOT THERE, I TOLD THEM MAYBE I WASN'T PAYING ATTENTION, AND MAYBE I ACCELERATED BEFORE THE LIGHT CHANGED (BUT EVEN AT THE TIME, IT DIDN'T MAKE SENSE TO ME, BECAUSE I WASN'T FIRST IN LINE AT THE LIGHT, I WAS

C-1596

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

WAITING, PATIENTLY, BEHIND ANOTHER VEHICLE). IN FACT, I DON'T EVEN REMEMBER LOOKING AT THE LIGHT, I WAS JUST WAITING FOR THE VEHICLE IN FRONT OF ME TO MOVE, AS I USUALLY DO - DID. I WENT IN TO MY TOYOTA DEALER A FEW MONTH AGO (MARCH 2010) AND TOLD THEM WHAT HAPPENED, AND THE SERVICE ADVISOR TOLD ME THAT BECAUSE MY VEHICLE IS A HYBRID, SOMETIMES, WHEN YOU'RE STOPPED AT A LIGHT, IT SWITCHES FROM THE ELECTRIC MOTOR TO GAS, AND IF YOU DON'T HAVE YOUR FOOT ON THE BRAKE PETAL HARD ENOUGH, IT CAN LURCH FORWARD. PLEASE CAN YOU LOOK INTO THIS FURTHER, IT WAS QUITE SCARY. I BET ALL STATE AND OTHER INSURANCE COMPANIES HAVE MANY CLAIMS WHERE A TOYOTA HIGHLANDER REAR-ENDS OTHER VEHICLES, AND PEOPLE ASSUME ITS THEIR FAULT, NOT ASSUMING THE VEHICLE MIGHT HAVE A PROBLEM.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10289953

**Location of Incident:** HOUSTON, TX  
**NHTSA Summary:**  
TL- THE CONTACT OWNS A 2008 TOYOTA HIGHLANDER PURCHASED OCTOBER 2007. SHE STATED WHILE ATTEMPTING A LEFT TURN WITH HER FOOT ON THE BRAKE, THERE WAS A SUDDEN INCREASE IN ENGINE RPM'S WITHOUT WARNING. SHE ASSUMED THE FLOOR MAT WAS BLOCKING THE ACCELERATOR PEDAL, HOWEVER UPON FURTHER INVESTIGATION FOUND THIS WAS NOT THE CASE. THE VEHICLE THEN PROCEEDED TO ABNORMALLY ACCELERATE AT SPEEDS OF LESS THAN 15 MPH. THE CONTACT USED BOTH FEET TO DEPRESS THE BRAKE PEDAL AND ABRUPTLY SHIFTED THE VEHICLE INTO THE PARK POSITION. THE VEHICLE CONTINUED TO IDLE UNTIL SHE SHUT OFF THE ENGINE. THE DEALER WAS CONTACTED AND SHE WAS ADVISED THERE WERE NO RECALLS ON HER VEHICLE. THE DEALER NOR MANUFACTURER PROVIDED ANY ASSISTANCE. THE FAILURE MILEAGE WAS 38,400 AND THE CURRENT WAS 39,538. \*KMJ

**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** ,  
**NHTSA Summary:**  
PROBLEM: THROTTLE HUNG IN A WIDE-OPEN POSITION WHILE DRIVING. NO CARPET PROBLEM WAS INVOLVED. THIS HAS HAPPENED TWICE TO ME IN A TWO WEEK SPAN!!! I WOULD LIKE TO REPORT A SERIOUS PROBLEM WITH MY 2006 TACOMA. ON 10/29/09 WHILE TOWING A TRAILER I EXPERIENCED THE FIRST OCCURRENCE. I HAD TWO PASSENGERS WITH ME THAT CAN ATTEST TO THE TRUTH OF MY SITUATION. I DEPRESSED THE THROTTLE AND THE MOTOR SUDDENLY WENT TO A WIDE-OPEN POSITION. FORTUNATELY, I WAS NOT IN HEAVY TRAFFIC. I ATTEMPTED TO SLOW THE TRUCK WITH BRAKES ALONE BUT THEY COULD NOT STOP THE ACCELERATION OF THE TRUCK. MY ONLY THOUGHT WAS TO TURN OFF THE IGNITION. I DID SO AND BROUGHT THE TRUCK AND TRAILER TO A SAFE STOP ALTHOUGH IT WAS VERY DIFFICULT WITHOUT THE POWER BRAKES BEING ACTIVE ALONG WITH THE FACT THAT I WAS ALSO TOWING A TRAILER. I CHECKED THE THROTTLE AND GAS PEDAL CONNECTIONS AND FOUND NO OBVIOUS PROBLEMS. I THEN ATTEMPTED TO RESTART THE TRUCK TO SEE IF POSSIBLY THE COMPUTER CLEARED ITSELF. WHEN I TURNED ON THE IGNITION, THE MOTOR STARTED AND INSTANTLY WENT INTO A FULL-OPEN THROTTLE MODE. I SHUT IT OFF BEFORE IT REACHED A VERY HIGH LEVEL. WE THEN CHECKED ALL THE SAME THINGS WE ALREADY CHECKED AND I DECIDED TO TRY STARTING THE TRUCK AGAIN. THIS TIME, IT STARTED AND RAN LIKE NOTHING EVER WAS WRONG. WE DROVE THE TRUCK HOME WITH NO OTHER PROBLEMS. I BROUGHT THE TRUCK TO MY LOCAL TOYOTA DEALER WHERE I HAD PURCHASED IT. THEY INSPECTED BOTH THE THROTTLE BODY, ENGINE CODES, AND TEST DROVE IT AND TOLD ME THAT THEY COULD FIND NOTHING WRONG. I WAS SENT ON MY WAY WITH NO CHARGE TO ME. THEY GAVE ME NO PAPERWORK AS I NORMALLY GET BUT I DID CONFIRM THAT THIS COMPLAINT WAS PUT INTO THEIR COMPUTER SYSTEM. THIS SAME PROBLEM HAPPENED TO ME ONCE MORE ON 11/02/09 WHICH ALSO HAPPENED TO BE MY BIRTHDAY. I FEEL EXTREMELY FORTUNATE TO NOT HAVE BEEN INVOLVED IN ANY ACCIDENT TO DATE BUT I MUST TELL YOU THAT I DO NOT FEEL SAFE DRIVING THIS VEHICLE AT THE PRESENT TIME. REF. TOYOTA NATIONAL HEADQUARTERS FILE #0911125974. \*TR

**Additional Summary:**

I would like to report a serious problem with my 2006 Tacoma. On 10/29/09 while towing a trailer I experienced the first occurrence. I had two passengers with me that can attest to the truth of my situation. I depressed the throttle and the motor suddenly went to a wide-open position. Fortunately, I was not in heavy traffic. I attempted to slow the truck with brakes alone but they could not stop the acceleration of the truck. My only thought was to turn off the ignition. I did so and brought the truck and trailer to a safe stop although it was very difficult without the power brakes being active along with the fact that I was also towing a trailer.

I checked the throttle and gas pedal connections and found no obvious problems. I then attempted to restart the truck to see if possibly the computer cleared itself. When I turned on the ignition, the motor started and

C-1600

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

instantly went into a full-open throttle mode. I shut it off before it reached a very high level. We then checked all the same things we already checked and I decided to try starting the truck again. This time, it started and ran like nothing ever was wrong. We drove the truck home with no other problems. I brought the truck to my local Toyota dealer where I had purchased it. They inspected both the throttle body, engine codes, and test drove it and told me that they could find nothing wrong. I was sent on my way with no charge to me. They gave me no paperwork as I normally get but I did confirm that this complaint was put into their computer system.

This same problem happened to me once more on 11/02/09 which also happened to be my birthday. I feel extremely fortunate to not have been involved in any accident to date but I must tell you that I do not feel safe driving this vehicle at the present time.

I have the correct factory mats for this truck and they were and are properly installed. The mats ARE NOT the problem!!

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Date of Incident:** 20091030  
**Vehicle:** 2010 TOYOTA CAMRY  
**Location of Incident:** FREMONT, CA

**NHTSA Summary:**  
 SINCE THE TIME I BOUGHT MY NEW 2010 TOYOTA CAMRY, I SAW ISSUES WITH THE WAY THE CAR TRANSMISSION WORKED AT SPEEDS FROM 0-50MPH. STARTING FROM THE FIRST WEEK OF MY USING THE CAR, I WENT TO THE DEALERSHIP A TOTAL OF 4 TIMES, ONLY TO BE SENT BACK AFTER A "TEST DRIVE" SAYING NOTHING IS WRONG. IN MY OWN LANGUAGE, I HAD BEEN EXPLAINING THE ISSUE WHICH NOW LOOKS EXACTLY SIMILAR TO THE "STICKING GAS PEDAL." RECALL RECENTLY INFORMED BY TOYOTA. MY CAR WAS STILL ACCELERATING WHILE BRAKING, OR WOULD START BRAKING WHEN MY FOOT IS OFF THE ACCELERATOR. I ALSO USED TO FEEL A JERK WHEN THE CAR MOVED BETWEEN SPEEDS OF 0-50MPH. I COMMUTE 70 MILES DAILY TO WORK AND I HAVE NOTICED THIS DAILY TO THE POINT THAT I HAVE STARTED IGNORING OUT OF DEEP FRUSTRATION. THE DEALER TEST DRIVES AND CAUSES EMBARRASSMENT SAYING THEY CANNOT RECREATE MY ISSUE. I LOGGED AN INCIDENT WITH TOYOTA (091214-000053). IT LED TO MY FOURTH VISIT TO THE DEALER WITH THE SAME ANSWER. TOYOTA'S RESPONSE FROM A CASE MANAGER WAS THAT IF THEY CANNOT RECREATE THEY WILL NOT DO ANYTHING. I ALMOST FEEL THIS IS A HOPELESS CASE AS I DON'T THINK NEITHER TOYOTA NOR THE DEALERSHIP WERE TRULY SERIOUS ABOUT ASSISTING ME. THEY COULD HAVE AT LEAST INFORMED ME THAT THERE ARE SOME POTENTIAL ISSUES WITH THEIR VEHICLES THAT THEY ARE WORKING ON. I REOPENED A NEW CASE (100130-000604), SO FAR I HAVE RECEIVED NO RECALL NOTICE FROM TOYOTA. I DON'T THINK THEY ARE HANDLING THIS THE RIGHT WAY. I HAVEN'T HAD ANY MAJOR INCIDENTS, BUT I DON'T THINK I CAN WAIT FOR THAT TO HAPPEN TO GET THE ATTENTION OF TOYOTA OR ITS DEALER. THIS IS NOT A SMART WAY OF SOLVING AN ISSUE. I FEEL DISAPPOINTED, ANGRY AND HELPLESS. \*TR

**Date of Incident:** 20091031  
**Vehicle:** 2008 LEXUS IS250  
**Location of Incident:** FREEHOLD, NJ

**NHTSA Summary:**  
 I WAS DRIVING MY WIFE'S LEXUS 2008 IS 250 OUT OF A PARKING LOT WHEN APPLYING MY FOOT ON THE BRAKE THE CAR ACCELERATED. I NOW SLAMMED MY FOOT ON THE BRAKES AND THE CAR CONTINUED TO ACCELERATE. THE ONLY THING THAT STOPPED MY CAR WAS THE CAR IN FRONT OF IT WITH VERY LITTLE DAMAGE. IF THE CAR WAS NOT IN FRONT OF ME I WAS ACCELERATING FASTER INTO ON COMING TRAFFIC. MY FLOOR MAT IS NOT ON THE FLOOR AS AFTER THE SAN DIEGO INCIDENT THAT WAS TOYOTA'S REASONING. WE WERE TOLD ROUGHLY A MONTH AND HALF AGO TO TAKE THE MAT OUT, WHICH I DID RIGHT AWAY. THEY CAN DENY IT ALL THEY WANT THIS CAR WAS ACCELERATING AND GETTING FASTER WHEN APPLYING THE BRAKE. THE POLICEMAN AT THE SCENE INSTRUCTED US TO NOT DRIVE THIS VEHICLE AND TO GET A LOANER WHICH WE DID. THE CAR WAS PICKED UP AND SENT TO LEXUS IN FREEHOLD. FIRST WE WERE TOLD NOTHING IS WRONG AND THEY TEST DROVE IT AND SUCH THEY WERE KEEPING IT FOR 3 DAYS NOW THEY ARE TELLING US THEY ARE KEEPING IT FOR 3 WEEKS. THERE ARE REPORTS ALL OVER THE WEB ON THIS WITH OVER 2000 COMPLAINTS. IT IS OBVIOUS THERE IS A MAJOR DEFECT IN THEIR COMPUTER SYSTEM. THEY REALLY NEED TO STOP COVERING THIS UP AS 16 PEOPLE HAVE DIED. FYI, THIS HAS HAPPENED TO PEOPLE IN LEXUS LOANERS AND LOANERS DO NOT HAVE FLOOR MATS. AGAIN, LUCKILY THE CAR WAS ONLY 15 FEET IN FRONT OF ME WHAT IF IT WAS 100 FT! \*TR

**NHTSA Summary:**

I WAS DRIVING 2004 TOYOTA SIENNA XLE AWD, 109,000. WITH BRIDGESTONE RFT SNOW TIRES. AT 15-20 MPH ON DRY PAVEMENT, I TRIED TO STOP QUICKLY FOR A DOG STROLLING IN FRONT OF US. THE VAN SLIGHTLY SLOWED, THE DOG WADDLED OUT OF THE WAY AND WE CAME TO A ROLLING, GRADUAL STOP WITH THE BRAKE PEDAL DEPRESSED FULLY TO THE FLOOR. I HADN'T TIME TO PUMP BRAKES AND I DON'T KNOW IF IT WOULD HAVE MATTERED. THE TOYOTA DEALER COULDN'T DUPLICATE PROBLEM AND SAID PADS, ETC; WERE GOOD. HAS HAPPENED TO ME THIS ONE TIME ONLY, BUT GOOGLE SEARCH SUGGESTS OTHERS MAY HAVE HAD THIS EXPERIENCE. THANKS

**NHTSA Summary:**

PLEASE LOOKING INTO THE LEXUS RX330 MODELS. I PREVIOUSLY OWNED A 2005 LEXUS RX330. I DIDN'T EXPERIENCE THE BRAKE PROBLEMS OR EXCELERATION. WHAT I EXPERIENCED THAT ONCE I PRESS ON THE BRAKE AT A RED LIGHT OR STOP. THE VEHICLE TEND TO STILL BE MOVING SLIGHTLY FORWARD. THEN I WOULD HAVE TO PRESS THE BRAKES HARDER IN ORDER FOR THE VEHICLE TO COME TO A COMPLETE STOP. THIS WAS AT 5MPH OR LESS. I BELIEVE IT'S THE COMPUTER CONTROLLED UNIT FOR THE

C-1608

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

GAS. YOU CAN ACTUAL FEEL IN THE BREAK AND ENGINE THAT THE VEHICLE DOES NOT WANT TO COME TO A COMPLETE STOP. I ALSO WENT THRU THE RECALL TO REPLACE THE COVER ON THE DRIVER SIDE THAT THE DEALER STATED IT WAS CAUSING THE FLOOR MAT STUCK TO THE GAS PEDAL. IN MY OPINION IT'S THE CPU THAT MAY BE CAUSING THE PROBLEM. YOU CAN HEAR AND FEEL THE ENGINE STILL HAVING A SLIGHT ROAR AFTER THE BRAKE IS PRESSED ON, AS IF GAS IS STILL BEING APPLIED OR REDUCED IN THE ENGINE.

**NHTSA Summary:**  
ON TUESDAY, NOVEMBER 3, 2009, I WAS COMING OUT OF A STOP LIGHT AND THE THROTTLE WENT TO FULL OPEN AND STUCK. (2009 TACOMA - JUST A YEAR OLD) I AM A CONSERVATIVE DRIVER AND DO NOT GUN THE ENGINE. I WAS PULLING INTO THE INTERSECTION GRADUALLY AND HADN'T EVEN LET THE CLUTCH OUT ALL THE WAY YET TO SHIFT OUT OF FIRST WHEN THE THROTTLE WHEN TO FULL. (THANK GOODNESS I HAVE A STANDARD!) I BABBED THE CLUTCH TO GIVE ME JUST ENOUGH GAS TO MOVE THROUGH THE INTERSECTION AND STOP ON THE OTHER SIDE. I TURNED OFF THE TRUCK AND WHEN I TURNED IT BACK ON, IT WAS FINE. THE ENGINE SMELLED AWFUL! I CHECKED THE FLOOR MAT WHEN I STOPPED BECAUSE I KNOW IT CAN CAUSE PROBLEMS AND I HAD A NON-CONFORMING MAT, SO I KEEP AN EYE ON IT, BUT THE MAT WASN'T THE PROBLEM. ALSO, I NEVER HAD THE ACCELERATOR DOWN VERY FAR AT ALL WHEN THE THROTTLE OPENED UP, SO I DON'T SEE HOW THE MAT COULD CAUSE THE THROTTLE TO OPEN FULL, STICK YES, BUT OPEN FULL BY ITSELF? I DROVE IT THE REST OF THE WAY TO WORK (LESS THAN 2 MILES) AND THE SMELL BLEW AWAY AND ALL SEEMED OK. I HAD IT IN THE SHOP TODAY AND THEY COULD FIND NOTHING WRONG AND TOLD ME TO REMOVE THE MATS. FINE, I CAN DO THAT, BUT MEANWHILE IT MAKES ME NERVOUS THAT IT COULD HAPPEN AGAIN. THE SERVICE DEPARTMENT REPRESENTATIVE AGREED WITH ME THAT HE DIDN'T SEE HOW THE MATS COULD HAVE CAUSED THE PROBLEM. I DID NOT KNOW ABOUT THIS BEING A GENERAL PROBLEM AND IN THE NEWS RIGHT NOW (I DON'T WATCH TV AND I MISS THE NPR STORY OR IT ISN'T FRONT PAGE, I MAY NOT HEAR THINGS). WHEN I FOUND OUT OTHERS WERE HAVING THE PROBLEM, I THOUGHT I SHOULD WRITE ABOUT MINE. \*TR

**Vehicle:** 2008 TOYOTA TUNDRA  
**Location of Incident:** EL PASO, TX

**NHTSA Summary:**  
AS I ARRIVED AT MY HOME AND DROVE UP INTO MY DRIVEWAY I EXPERIENCED AN UNEXPLAINED ACCELERATION ON MY 2008 TOYOTA TUNDRA THAT MADE ME REACT TO SLAM ON THE BRAKES AND CAUSE THE TRUCK TO SLIDE ON AN UNPAVED (DIRT) SURFACE IN MY YARD AND SLIDE INTO THE TRUNK OF A PINE TREE AND DAMAGING THE FRONT BUMPER TO MY TRUCK. I HEARD ON THE NEWS THAT THERE WAS A RECALL FOR THE FLOOR MATS ON THIS VEHICLE TO BE REMOVED IF IT DID NOT HAVE CLIPS TO HOLD THE MAT IN PLACE. MY TRUCK DOES HAVE THE CLIPS TO HOLD THE MAT IN PLACE AND PREVENTS THE ACCELERATION PEDAL FROM GETTING LODGED WITH THE MAT. I DO BELIEVE THE ACCELERATION PROBLEM WAS CAUSED BY AN UNKNOWN DEFECT AND NOT THE FLOOR MAT. CURRENTLY, THE FLOOR MAT REMAINS IN PLACE ON ITS CLIPS WITHOUT INTERFERENCE TO THE ACCELERATION PEDAL. TODAY, I RECEIVED A RECALL LETTER FROM TOYOTA TO REMOVE THE FLOOR MAT, THEREFORE, I WILL, AGAIN I DON'T BELIEVE THE FLOOR MAT WAS THE PROBLEM. I JUST WANT THIS COMPLAINT DOCUMENTED BECAUSE IT CAUSED AROUND \$500 WORTH OF DAMAGED TO MY TRUCK. \*TR

NBC ACTION NEW REPORT -"Exclusive: "Operator Error" Caused Fatal Crash"

GRANDVIEW, Mo. – Crash reports indicate "operator error" caused a deadly crash at a Grandview car wash last November.

Documents, photos, and surveillance video from the car wash, owned by U.S. Congressman Emanuel Cleaver, II, explains how investigators came to their conclusion.

On Nov. 5, 2009, John Page, 65 at the time, was driving his wife's 2002 Toyota Land Cruiser through the car wash.

The video shows Page's SUV exit a washing bay then quickly swerve to the right. He hit a car and two people sitting on a bench. Witnesses scrambled to help. However, Rosland Watson, 40, died.

The reports, obtained exclusively by NBC Action News, say Page was not impaired. He told investigators "his accelerator stuck."

To test Page's claim, Grandview police towed his SUV to a garage in December. Toyota representatives asked and were allowed to assist in the investigation.

In front of Watson's family, their attorney, Page, his attorney, and police, a Toyota engineer tested the Land Cruiser's brakes and accelerator several times.

He found no malfunctions or problems with the accelerator sticking, the reports said.

As a result, police closed the case. They did not file any criminal charges.

However, in light of Toyota's recent struggles with sticking accelerator pedals in other vehicles, Watson's grieving family still has questions and concerns over what caused the crash.

"The family is investigating all potential causes of the accident and their investigation continues," said Eric Dirks, one of the attorneys representing the Watson family. "We will be engaging several experts to determine the cause. We're also closely following what's happening with Toyota and recalls with other models."

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

IT'S A 2007 COROLLA. I DONT USUALLY DRIVE MUCH BEFORE AND I DO DRIVE A LOT SINCE I TRANSFER TO COLLEGE AND HAVE TO GO ON FWY. ABOUT 3 MONTHS AGO, ONCE I TRIED TO STOP ON THE RAOD CUZ RIGHT LIGHT, I LEFT THE GAS PETAL AND WAIT TO DECELERATE AND THEN STEP ON THE BREAK,BUT IT DIDN'T, I ALMOST HIT THE CAR BEFORE ME AND IT'S REALLY HARD TO STOP I HAD TO STEP IT REALLY HARD. FROM THAN TIME, I BEGAN TO REALIZE THAT THERE MIGHT BE A PROBLEM FOR IT. I CANT TELL EXACTLY HOW OFTEN IT HAPPEN, BUT SOMEHOW I KNOW WHEN IT GOES UP TO 60MPH, AND IT WILL DECELERATE. WHEN IT DROPS TO AROUND 45, IT STOPS TO DROP. AND WHEN I GO ON THE FWY, WHEN IT HTS CERTAIN SPEED LIKE 75, SOME TIMES IT WONT SLOW DOWN EVEN I LEAVE MY FOOT FROM THE GAS PEDAL. AFTER I KNEW THE TYT PETAL PROBLEM AND THE STEERING PROBLEM, I WONDER IF MY CAR WAS INVOLVED. HOWEVER, THIS MODEL IS NOT ON THE LIST, I STILL WORRIED ABOUT IT. CUZ TYT MIGHT HIDE THE PROBLEM, OR THEY DID FIND IT NOW AND THEY WILL FIND IT LATER. THIS WEEK I GOT A SPEEDING TICKET IN CA I-5 FWY AND I DOUBT THAT PART OF THE REASON IS THAT THE "RARE" ACCELERATE PROBLEM. I DONT KNOW HOW TO FIX IT CUZ THERE'S NO EVIDENCE TO SHOW THE PROBLEM RIGHT NOW. I HOPE THAT THE US WILL INVETIGATE ALL MODEL FROM 2000 TO 2010 TO ENSURE PEOPLE SAFE.

**NHTSA Summary:**

I PURCHASED A NEW 2010 TOYOTA CAMRY IN OCT-2009 AND I REALIZED AFTER 2-3 WEEKS THAT THERE IS SOMETHING WRONG IN THERE. THE RPM GOES HIGH (AND TRIES TO STAY THERE) WHEN DOWN-SHIFTING EVEN WITHOUT THE LEG IS OFF THE GAS PADDLE. WHILE I UNDERSTAND THAT DOWNSHIFTING MAY INCREASE RPM BUT THEN I FEEL LIKE IT WANTS TO STAY THERE BY MEANS OF SOME UN-INTENDED ACCELERATION. WHEN I REALIZED THAT THERE IS SOMETHING WRONG, I JUST IGNORED THE ISSUE BECAUSE I DID NOT WANT TO TAKE THE CAR TO THE DEALER AND LET THEM MESS IT UP FURTHER. I THOUGHT THIS IS HAPPENING BECAUSE IT IS A NEW CAR. AFTER FEW MILES DRIVEN, THE ISSUE WILL GO AWAY. BUT WHEN I LEARNED ABOUT THE UN-INTENDED ACCELERATION IN JANUARY 2010, I REALIZED THAT THE ISSUE IS MORE SERIOUS AND I SHOULD NOT IGNORE ANY MORE. I WENT TO DEALER BUT AS I EXPECTED, THEY DID NOT TAKE IT SERIOUSLY AND TOLD ME THAT THE CAR RUNS AS PER DESIGN. I WENT FOR THE RECALL TOO BUT IT DID NOT MAKE ANY DIFFERENCE. BEING AN ENGINEER, I MYSELF HAVE ESTABLISHED FEW SIMPLE TEST CASES WHERE ONE CAN PROVE THAT THERE IS DEFINATELY SOMETHING WRONG IN THE CAR. AND IF THE CAR RUNS AS PER DESIGN, THEN THERE IS SOMETHING WRONG IN THE DESIGN ITSELF. I KNEW IN ADVANCE THAT TAKING THE CAR TO THE DEALERSHIP WAS NOT GOING TO WORK. I PURCHASED A NEW VEHICLE SO THAT I CAN KEEP ON DRIVING IT NICELY FOR YEARS TO COME BUT I NEVE EXPECT IT TO BE GOING TO GARAGE FOR SUCH A SERIOUS ISSUE IN LESS THAN 3 MONTHS! I HAVE NOT RECEIVED ANY SATISFACTORY ANSWER/SOLUTION TO MY PROBLEM SO FAR.

**Additional Summary:**  
George Fitts and his family were on their way to watch a University of Texas Longhorns football game on November 6, 2009, in his 2007 Lexus ES350. They were traveling southbound on US 70, just outside of Hearne, Texas, when the Lexus crashed into a pickup truck that was stopped and preparing to turn.

The 72-year-old George Fitts suffered fatal injuries and passengers in the Lexus, William and Billy C. Fitts, suffered serious injuries.

According to the lawsuit, the trooper who investigated the accident said Fitts apparently failed to see the other vehicle bu the family claims that the Lexus suddenly accelerated out of control and could not be stopped. The family says the vehicle's cruise control was engaged at the time of the crash, the suit states.

**Date of Incident:** 20091108  
**Vehicle:** 1998 LEXUS ES300  
**Location of Incident:** HUNTINGTON BEACH, CA

**NHTSA Summary:**  
THE ACCIDENT WAS DUE TO UNINTENDED-ACCELERATION AS THE CAR LURCHED FORWARD FIGHTING THE BRAKE. IT SEEMED AS THOUGH THE ACCELERATOR HAD A LIFE OF ITS OWN OVERRIDING THE BRAKING ACTIONS I TRIED TO IMPLEMENT. I WAS PROCEEDING SLOWLY UP THE LONG NARROW DRIVEWAY. I MADE A RIGHT TURN INTO A PARKING PLACE THAT WAS PERPENDICULAR TO THE WALK-WAY & I SLOWLY TAPPED THE GAS ON MY LEXUS ES 300 AND THEN THE BRAKES. AS I MOVED MY FOOT OVER TO THE HIGHER LEVEL BRAKE PEDAL & THE CAR LURCHED FORWARD ACCELERATING ON ITS OWN-THE IGNITION/ACCELERATOR SYSTEM TOOK OVER THE CAR. I PRESSED THE BRAKE AS FIRMLY AS I COULD BUT IT DID NOT OVERRIDE THE ACCELERATION & THE BRAKES HAD ROUTINE MAINTENANCE SIX WEEKS PRIOR TO THE ACCIDENT AND I WAS TOLD THEY WERE IN GOOD WORKING ORDER.&THE CAR JUMPED THE SIDEWALK AND CRASHED INTO A BLOCK WALL. IT WAS A MECHANICAL FAILURE IN THE ACCELERATOR WHICH CAUSED THE ACCIDENT & & THE BRAKE PEDAL WAS HIGH AND THERE WAS NO MISTAKING ONE PEDAL FOR ANOTHER. \*TR

**NHTSA ODI Number:** 10306110  
**Date of Incident:** 20091108  
**Vehicle:** 2010 LEXUS HS  
**Location of Incident:** BIRMINGHAM, AL

**NHTSA Summary:**  
I PURCHASED A LEXUS HS250 IN OCTOBER 2009. SINCE THEN, I HAVE EXPERIENCED AT LEAST 6 OCCASIONS FROM THE END OF OCTOBER 2009 TO EARLY FEBRUARY 2010 IN WHICH I BRAKED WITH THE INTENTION OF COMING TO A STOP. THE VEHICLE BEGAN TO SLOW DOWN IN THE BRAKING PROCESS, THEN THE BRAKES STALLED FOR A FEW SECONDS BEFORE RESUMING THE BRAKING ACTION. IT IS UNEXPECTED AND DANGEROUS BECAUSE YOU DON'T KNOW IF YOUR BRAKES ARE COMPLETELY STALLING OR NOT. FOR A COUPLE OF SECONDS, EVERYTHING JUST GIVES WAY BEFORE THE BRAKES SEEM TO BEGIN WORKING AGAIN. IN THAT SITUATION, YOU DON'T KNOW WHETHER TO PRESS DOWN A SECOND TIME ON THE BRAKE OR TO PUMP THE BRAKE PEDAL OR NOT TO DO ANYTHING. WHEN THIS EVENT HAPPENS, YOU FEEL AS IF YOU HAVE ABSOLUTELY NO CONTROL OVER THE OPERATION OF THE VEHICLE. SIMILAR TO DRIVING ON A SHEET OF ICE, EXCEPT NONE OF THOSE SAFETY RULES SEEM TO APPLY HERE. THIS HAS HAPPENED ABOUT EVERY FEW WEEKS. I HAVE NOTICED THAT IT SOMETIMES HAPPENS WHEN I AM DRIVING OVER AN UNEVEN SURFACE, BUMP, OR A POTHOLE IN THE STREET WHILE BRAKING. WHILE I HAVE NOT BEEN INVOLVED IN A CRASH, IT HAS WORRIED ME THAT THIS COULD LEAD TO ONE. \*JB

**Date of Incident:** 20091109  
**Vehicle:** 2009 TOYOTA COROLLA  
**Location of Incident:** BLOOMINGTON, IN

**NHTSA Summary:**

SORRY, THIS MIGHT SOUND TRITE GIVEN ALL OF THE SERIOUSNESS WITH THE TOYOTA GAS PEDAL PROBLEMS. BUT I FEEL IT NEEDS TO BE DOCUMENTED. WE PURCHASED A 2009 TOYOTA COROLLA. WHAT I NOTICED ABOUT THE GAS PEDAL IS THAT IT DOESN'T PRESS VERY SMOOTHLY, YOU HAVE TO BABY IT, OR YOU GET A JACK RABBIT START. BUT THAT IS NOT WHY I AM WRITING. WE GET MICE IN THE CAR ON A REGULAR BASIS. THERE ARE APPARENTLY GAPS THAT ALLOW FOR MICE TO GET IN. THEY CHEW ON THINGS, EAT FOOD AND PEE. IT DOESN'T SEEM LIKE THERE SHOULD BE GAPS BIG ENOUGH TO ALLOW THIS TYPE OF ACCESS. I LOOKED BELOW AND THERE IS A LOT OF GAP SPACE BETWEEN THE BOOT AROUND THE STEERING SHAFT. AGAIN I KNOW THIS SOUNDS TRIVIAL. BUT IF A MOUSE CAN GET IN, SO CAN OTHER CREATURES. A SNAKE? IMAGINE DRIVING DOWN THE ROAD AND HAVING SOME CRITTER APPEAR AND SCARE THE DAYLIGHTS OUT OF YOU. ANYWAY, THAT IS ALL. I JUST FELT IT SHOULD BE REPORTED.

**Additional Summary:**

**NHTSA Summary:**

IN NOVEMBER OF 2009 I PURCHASED A NEW TOYOTA COROLLA SPORT AND WITHIN 2 DAYS NOTICED THE TACHOMETER RACING EVEN WHEN THE CAR WAS IN NEUTRAL. I ALSO NOTICED THAT WHEN I WOULD TAKE MY FOOT OFF THE GAS AND PRESS IN THE CLUTCH THE TACHOMETER WOULD ACCELERATE AS MUCH AS 2000 RPM AND STAY THERE. I HAVE TAKEN MY CAR BACK TO THE TOYOTA DEALERSHIP WHERE IT WAS PURCHASED THREE TIMES IN 2009 AND ONCE IN 2010 REGARDING UNEXPLAINED ACCELERATION. EVEN WHEN I AM NOT IN THE CAR AND THE CAR IS IDLING ALL OF A SUDDEN THE ENGINE SUDDENLY ACCELERATES FROM 6 ON THE TACHOMETER TO 6.4 ON THE TACHOMETER. THE DEALERSHIP SAYS THEY CAN'T REPLICATE THE ISSUES AND HAVE ADVISED ME NOT TO DRIVE THE CAR. WHEN I TOOK THE VEHICLE IN THE LAST TIME I HAD 5 RECORDING ON MY CELL PHONE WHERE YOU CAN CLEARLY SEE THE TACHOMETER OVER 6,000RPM WITH NO ONE IN THE VEHICLE. THEY HAVE TOLD ME THEY CAN'T HELP ME AT THIS TIME. I AM CONCERNED ABOUT HOW LONG THIS ACTION WILL TAKE AS I NEED MY CAR.

**NHTSA Summary:**

I WAS DRIVING A 2008 LEXUS ES 350 DOWN WISCONSIN AVENUE IN BETHESDA, MD AND WAS STATIONARY AT A RED TRAFFIC LIGHT AT THE INTERSECTION OF WISCONSIN AVENUE AND BRADLEY BLVD. WHEN THE LIGHT CHANGED TO GREEN, UPON LIGHTLY PRESSING THE ACCELERATOR TO GET MY CAR MOVING AGAIN, IT STARTED TO RAPIDLY ACCELERATE (OUT OF MY CONTROL) AND, DESPITE MY PRESSING THE BRAKES WITH FULL FORCE, THE CAR WAS MOVING VERY FAST AND STOPPED ONLY AFTER A FEW HUNDRED FEET, WHEN IT CRASHED INTO THE VEHICLE IN FRONT OF ME. THAT VEHICLE CRASHED INTO ANOTHER VEHICLE IN FRONT OF IT. A CAR HIT ME FROM BEHIND AS WELL. MY AIRBAGS WENT OFF AND MY CAR WAS DAMAGED SO MUCH THAT IT HAD TO BE TOWED AWAY. I AM CONVINCED THAT THIS ACCIDENT WAS CAUSED BY A ACCELERATOR DEFECT IN THE CAR. THIS IS CONSISTENT WITH THE ONGOING TOYOTA INVESTIGATION INTO ACCELERATOR DEFECTS IN MY CAR MODEL. I AM LUCKY THAT I SURVIVED. HAD I NOT BEEN IN HEAVY TRAFFIC, THAT FORCED MY CAR TO STOP, I CAN ONLY IMAGINE HOW MUCH MORE SPEED I WOULD HAVE GAINED RESULTING IN LIKELY MUCH GREATER DAMAGE TO LIFE AND PROPERTY.

**NHTSA ODI Number:** 10313342  
**Date of Incident:** 20091110  
**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** MOBILE, AL

**NHTSA Summary:**

ON 11/10/09, WHILE BACKING OUT OF A PARKING LOT, MY VEHICLE SUDDENLY ACCELERATED COLLIDING WITH A PARKED UTILITY TRUCK. MY INSURANCE COMPANY PAID APPROXIMATELY \$9800 FOR REPAIRS TO MY VEHICLE. ON 1/4/2010 MY VEHICLE SUDDENLY ACCELERATED, COMING OUT OF A PARKING LOT, EVEN DEPRESSING THE BRAKE PADAL AS HARD AS I COULD WOULD NOT STOP THE VEHICLE. I WENT OUT INTO THE MAIN TRAFFIC STREAM. LUCKILY THERE WAS NO ACCIDENT, JUST IRATE DRIVERS. EACH INCIDENT LASTED ONLY SECONDS THEN WENT TO NORMAL OPERATION. I HAVE A 2003 TOYOTA CAMRY, XLE, V-6 WHICH I PURCHASED NEW AND THE MILEAGE WAS APPROXIMATELY 44000 MILES. I HAVE EXPERIENCED NO OTHER PROBLEMS BUT AM WONDERING IF I WILL AND WHEN. HAVE YOU HAD ANY OTHER REPORTS SUCH AS MINE?

**Date of Incident:** 20091110  
**Vehicle:** 2007 TOYOTA COROLLA  
**Location of Incident:** MARYLAND HEIGHTS, MO

**NHTSA Summary:**  
WE HAVE A 2007 TOYOTA CAROLLA. WE HAD BEEN ON THE HIGHWAY USING OUR CRUISE CONTROL. WHEN WE CAME TO THE EXIT, MY HUSBAND STEPPED ON THE BRAKE AND DISENGAGED THE CRUISE CONTROL AND WE STOPPED AT THE LIGHT. WE WERE SITTING THERE WITH THE ENGINE IDLING, MY HUSBAND'S FOOT WAS ON THE BREAK, WHEN ALL OF A SUDDEN THE MOTOR ROARED AND THE CAR BEGAN TO SURGE FORWARD. HE STEPPED HARD ON THE BRAKE AND IT STOPPED. SCARED US TO SAY THE LEAST. IT HAS NOT OCCURRED AGAIN, BUT SOMETIMES WHEN WE ARE ON THE HIGHWAY, WITH THE CRUISE CONTROL ON AND IT ACCELERATES, IT WILL NOT BACK OFF AND THE CAR WILL CONTINUE TO ACCELERATE UNTIL WE STEP ON THE BRAKE. IF YOU STEP ON THE BRAKE AND DISENGAGE THE CRUISE CONTROL THE ACCELERATION WILL STOP. IN LIGHT OF THE RECENT INCIDENTS WE FELT WE SHOULD REPORT THESE INCIDENTS. WE READ THE REPORT ON THE RUNAWAY PRIUS AND THAT YOU COULD NOT DUPLICATE THE INCIDENT. I AM CONVINCED, BASED ON OUR EXPERIENCE THAT YOU WILL NOT BE ABLE TO DUPLICATE THE INCIDENT. WE FEEL STRONGLY, BASED ON THE PERFORMANCE OF OUR OWN VEHICLE THAT IT IS A COMPUTER/ELECTRICAL PROBLEM OF SOME SORT AND THAT IT COULD BE CONNECTED TO THE CRUISE CONTROL. AS I SAID IT HAS NOT HAPPENED AGAIN, BUT I WONDER IF IT WILL AT SOME POINT. WE WERE VERY FORTUNATE THAT NO ONE WAS IN FRONT OF US OR WE WOULD HAVE HIT THEM.

**NHTSA Summary:**  
TL- THE CONTACT OWNS A 2006 TOYOTA CAMRY. SHE STATED WHEN DEPRESSING THE BRAKE PEDAL, THE BRAKES WOULD HESITATE TO ENGAGE AND WOULD FEEL SPONGY CAUSING HER TO USE EXTREME FORCE WHEN BRAKING. THIS WOULD OCCUR FREQUENTLY AND THE VEHICLE WAS TAKEN TO THE DEALER WHERE THEY CONFIRMED THE BRAKES WERE NOT ENGAGING AS DESIGNED. THE MASTER CYLINDER WAS REPLACED UNDER FACTORY WARRANTY BUT DID NOT CORRECT THE FAILURE. THE MANUFACTURER SENT A REPRESENTATIVE TO INVESTIGATE THE VEHICLE AND ADVISED THERE WERE NO FAILURES IN THE VEHICLE BRAKING SYSTEM. ON A SEPERATE OCCASSION, WHILE DRIVING AT SPEEDS OF APPROXIMATELY 70 MPH, THE VEHICLE BEGAN TO ABNORMALLY ACCELERATE. SHE DEPRESSED THE BRAKES AND THE VEHICLE IMMEDIATELY DECREASED IN SPEED. THE DEALER WAS CONTACTED AND ADVISED HER YEAR, MAKE AND MODEL WERE NOT UNDER RECALL. THE FAILURE PERSISTED AND NO REPAIRS WERE MADE TO THE VEHICLE IN REGARDS TO THE ACCELERATION ISSUE. THE FAILURE MILEAGE WAS UNKNOWN AND THE CURRENT WAS 95,000. \*KMJ

**Vehicle:** 2008 TOYOTA RAV4  
**Location of Incident:** POTTSTOWN, PA

**NHTSA Summary:**  
WHEN COMING TO A STOP AT THE END OF A HIGHWAY EXIT RAMP, I WAS BRAKING AT APPROXIMATELY 5 - 10 MPH. AS I APPROACHED THE CAR IN FRONT OF ME I NOTICED THE CAR WAS NOT RESPONDING AS IT NORMALLY DOES TO A SLIGHT DEPRESSION OF THE BRAKE PEDAL. MY CAR SEEMED TO KEEP MOVING AND NOT SLOW DOWN IN ITS NORMAL BRAKING CHARACTERISTIC. I DEPRESSED THE BRAKE PEDAL MUCH FIRMER AND THE CAR SLOWED BUT THE ENGINE BEGAN TO INCREASE IN RPM'S (AS NOTED BY THE ENGINE SOUND AND VISUALLY BY TACHOMETER INDICATION). MY FOOT WAS OFF THE ACCELERATOR AT THIS TIME. I PUSHED THE BREAK PEDAL DOWN A HARD AS I COULD AND THE CAR STILL MOVED FORWARD. FINALLY, I PUT THE TRANSMISSION (AUTOMATIC) IN NEUTRAL AND THE ENGINE RACED AWAY. I FINALLY PLACED THE TRANSMISSION IN REVERSE AND THE ENGINE SLOWED DOWN TO NORMAL AND THEN THE CAR STALLED. AFTER RESTARTING THE ENGINE EVERYTHING WORKED AS IT SHOULD. I DROVE IT THE TWO MILES TO WORK WITH NO FURTHER PROBLEM AND AFTER BEING PARKED FOR 10 HOURS DROVE IT 7 MILES TO MY HOME WITH NO FURTHER PROBLEM. \*TR

**NHTSA Summary:**  
**Additional Summary:**  
Linda Geyer had just left the Rite Aid parking lot on Route 8 when she lost control of her vehicle and plunged over a steep hill and teetered along an embankment. She told witnesses that her accelerator was stuck and that she could not control her car. "She said when she got into the car and put the transmission into drive, the accelerator pedal stuck. She said she panicked and didn't know what to do so she stood on the brakes and it still wouldn't stop. She started blowing her horn, continued through the parking lot and eventually crashed, said Hampton Township Patrolman Peter Halli.

In the same article (Another 'accelerator pedal' crash) the Hampton police say "they didn't know if the mat was an "original equipment" Toyota mat."

**NHTSA Summary:**  
FOLLOWING ARE THE SERIES OF EVENTS ON NOVEMBER 11, 2009: 1.I WAS LOOKING FOR A PARKING SPACE IN THE PARKING GARAGE OF UNIVERSITY OF MARYLAND. 2.I FOUND ONE OPEN SPACE ON MY LEFT. 3.I APPLIED THE BRAKES AND SLOWED DOWN MY CAR TO ALMOST ZERO SPEED. 4.I TURNED THE STEERING WHEEL TO LEFT TOWARDS THE PARKING SPACE. 5.I SLOWLY RELEASED THE BRAKES TO LET THE CAR SLOWLY ROLL INTO THE PARKING SPACE. 6.SUDDENLY MY CAR EXPERIENCED SUDDEN ACCELERATION. 7.I DID NOT UNDERSTAND WHAT HAPPENED. I TRIED MY BEST TO APPLY THE BRAKES. 8.BEFORE, I COULD REALIZE WHAT HAPPENED, THE CAR BANGED INTO THE PARKING GARAGE WALL. AROUND 3 METERS AHEAD OF ME AND STOPPED AFTER THE IMPACT. 9.THE IMPACT WAS SO BAD THAT THE AIRBAGS POPPED OUT. 10.SMOKE STARTED COMING OUT OF THE HOOD. 11.I SUFFERED SEVERE 6WHIPLASH6 INJURY IN MY NECK. 12.NOT ONLY THIS, THE PLACE WHERE IT ALL HAPPENED WAS ALMOST 4 STORIES HIGH IN PARKING GARAGE. HAD THE WALL IN-FRONT OF ME GIVEN AWAY, I WOULD HAVE FALLEN ALMOST 4 STORIES DOWN WITH THE CAR. 13.I WAS FORTUNATE ENOUGH TO SURVIVE THE CRASH WITHOUT ANY SEVERE INJURY. 14.FOR A FEW SECONDS, I WAS TOTALLY BLANK, THEN I TRIED OPENING THE DRIVER SIDE DOOR, BUT IT WAS STUCK. 15.I PUSHED IT HARD, AND DOOR OPENED SLIGHTLY. 16.I TURNED OFF THE ENGINE, TOOK THE KEYS OUT. 17.I RUSHED OUT OF THE CAR AND CALLED MY INSURANCE COMPANY. 18.THE INSURANCE COMPANY (GEICO) SENT SOMEONE TO TOW AWAY THE CAR. 19.THE CAR WAS TOWED AWAY TO COLLISION CENTER. 20.AFTER SPENDING MORE THAN A MONTH AND AROUND USD 18,000.00, I GOT MY CAR BACK ON DECEMBER 16TH 2009 FROM THE COLLISION CENTER.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** SELMA, AL

I WAS DRIVING MY TRUCK TO A WORK LOCATION AND STOPPED AT A T-INTERSECTION TO YIELD TO THE NORMAL TRAFFIC FLOW. WHILE STOPPED, THE ENGINE BEGAN TO REV UP FOR NO APPARENT REASON. I WAS NOT TOUCHING THE ACCELERATOR PEDAL, BUT HAD MY FOOT FIRMLY ON THE BRAKE. AT FIRST, I HEARD THE ENGINE NOISE BUT DID NOT REALIZE THAT IT WAS MY VEHICLE MAKING THE NOISE. THEN WHEN I LOOKED DOWN AT MY INSTRUMENTS, I SAW THAT MY ENGINE RPM'S WERE ABOVE 1800 AND STAYING STEADY. THERE WAS AN AUDIBLE CLUNK NOISE AND THE TRUCK SUDDENLY LURCHED FORWARD (TRANSMISSION ENGAGING I WOULD GUESS) AND I PRESSED THE BRAKE WITH INCREASED FORCE TO KEEP FROM ROLLING FORWARD. THEN THE ENGINE RPM'S RETURNED TO A NORMAL IDLE JUST AS SUDDENLY. THIS OCCURRED WITH A WARM ENGINE AFTER SEVERAL MILES OF NORMAL DRIVING. WHILE THE SAME EXACT THING HAS NOT OCCURRED SINCE THIS INCIDENT, I HAVE HAD AT LEAST ONE OTHER EPISODE WHERE THE TRUCK'S ENGINE RPM'S INCREASED FOR NO REASON WHILE I WAS STOPPED AT A RED LIGHT. THE LATTER OCCURRENCE WAS NOT AS SEVERE AS THE FIRST INCIDENT AND HAPPENED WITHIN THE LAST MONTH OR SO. I WANTED TO REPORT THIS BECAUSE MY TRUCK IS A TOYOTA BRAND AND I HAVE READ ABOUT THE RECENT RECALLS RELATED TO ACCELERATOR ISSUES ON SOME OF THE SMALLER TOYOTA PASSENGER CARS, BUT NEVER SAW ANY MENTION OF THIS INVOLVING THEIR TRUCK PRODUCTS. AS AN ENGINEER MYSELF, I STRONGLY SUSPECT THAT THIS PHENOMENON IS DUE TO AN ELECTRICAL AND/OR COMPUTER MALFUNCTION AND NOT SOME SORT OF MECHANICAL OR PHYSICAL INTERFERENCE ISSUE. I SAY THIS BECAUSE OF MY OWN EXPERIENCE WHEN I KNOW FOR A FACT THAT THERE WAS NOTHING INTERFERING WITH THE ACCELERATOR PEDAL AND IT WAS NOT STUCK MECHANICALLY. \*TR

**NHTSA ODI Number:** 10292245  
**Date of Incident:** 20091114  
**Vehicle:** 2009 TOYOTA COROLLA  
**Location of Incident:** WILSONVILLE, OR

**NHTSA Summary:**  
2009 TOYOTA COROLLA, "S" AUTOMATIC TRANSMISSION. THE PROBLEM WAS INITIALLY IDENTIFIED BY ME WHEN MY CAR WOULD NOT CATCH WHILE ON A SLOPE IN DRIVE. THE TRANSMISSION WOULD ROLL BACK. THE DEALERSHIP SAID THIS WAS NORMAL DUE TO A LOSS OF PRESSURE, HOWEVER IT WOULD DO IT EVEN IF I BARLEY STOPPED ON A GRADUAL INCLINE FOR A FEW SECONDS. THIS HAS CAUSED ME TO ROLL BACK UNLESS I HAD ONE FOOT ON THE BRAKE AND ONE FOOT ON THE GAS WHILE TO KEEP ME STEADY TO START. THIS HAPPENED AT FROM THE TIME I PURCHASED THE CAR. RECENTLY, I MY ENGINE HAS BEEN RUNNING REALLY ROUGH AND WINDING AT A HIGH PITCH WHILE DRIVING. IT NOW INTERMITTENTLY GOES BETWEEN GEARS AND DOWNSHIFTS AUTOMATICALLY INTO GEARS THAT ARE NOT APPROPRIATE FOR THE SPEEDS TRAVELING. THIS CAUSES A DRASTIC DOWN SPEED, AND EXAMPLE IS I WILL BE ON THE FREEWAY TRAVELING SPEEDS BETWEEN 50-65 AND IT WILL DOWNSHIFT AND REDUCE MY SPEED TO 40 MPH OR LESS, THEN I WILL TRY TO ACCELERATE AND IT WILL REDLINE OUT, AS IF I AM IN NEUTRAL AND I WILL HAVE NO CONTROL TO REGAIN SPEED UNTIL IT AUTOMATICALLY PUSHES ITSELF BACK INTO GEAR, AND THEN INCREASES MY SPEED AT A RAPID PACE, WITHOUT ME PUTTING MY FOOT ON THE GAS. AT THIS POINT, I AM REQUIRED TO PLACE MY FOOT ON THE BRAKE TO CONTROL MY SPEEDS. THE DEALERSHIP HAS TAKEN MY CAR BACK TWICE AND CLAIMED TO HAVE FIXED IT TWICE BASED ON THE READS, BUT I HAVE HAD THE SAME PROBLEM. THE READS ON THE COMPUTER WILL SAY THAT IT IS AN ELECTRICAL MALFUNCTION... HOWEVER THEY CAN NOT IDENTIFY WHERE THE MALFUNCTION IS COMING FROM. PARTS HAVE NOT BEEN REPLACED AND NO REPAIRS HAVE BEEN MADE TO FIX THIS AT THIS TIME. TOYOTA IS NOT ASSISTING WITH THE RECALL AND I AM LEFT WITH LOTS OF SHOP HOURS. THINKING ABOUT REGISTERING FOR THE LEMON LAW ABOUT MY CAR, I DRIVE APX. 1000 MILES WEEK AND MY CAR IS NOT SAVING, CONSISTENT, AND IS A SAFETY ISSUE SINCE HAVE NO CONTROL WHILE MY CAR MALFUNCTIONS. I CAN ONLY REACT TO WHAT IS HAPPENING. IT ALSO MAKES A LOUD CLUNKING SOUND, AND A HIGH WINDING SOUND WHEN REDLINING. \*TR

**NHTSA Summary:**  
TWO MONTHS AGO I HAD A SUDDEN ACCELERATION EVENT IN MY LEXUS LS430. 2005. I WAS IN A MUSEUM PARKING GARAGE, MY WIFE GOT OUT, I NEEDED TO REPOSITION TO NOT BE 'ON THE LINE'. I BACKED UP, PRESSED THE GAS VERY LIGHTLY AND THE CAR ACCELERATED OUT OF CONTROL. I SLAMMED ON THE BRAKES AND WAS ABLE TO HALT IT ONE-TWO INCHES FROM THE WALL. INITIALLY, I BLAMED MYSELF BUT THEN THOUGHT IT MIGHT HAVE BEEN MY FLOOR MAT AND REMOVED IT. MY WIFE REMAINS

C-1640

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TERRIFIED TO THIS DAY. IN ANALYZING THE PROBLEM, THERE WAS A SUDDEN MASSIVE ACCELERATION WHICH I DID NOT CAUSE AND THERE IS NO WAY THE FLOOR MAT COULD HAVE CAUSED SUCH A PROBLEM SINCE I BARELY PRESSED THE ACCELERATOR PEDAL TO GO A FEW FEET. I THINK THE PROBLEM IS ELECTRONIC AND AM WORRIED THAT A NEW SPRING ON THE PEDAL IS INSUFFICIENT. I DIDN'T THINK COMPLAINING WOULD DO ME ANY GOOD BUT NOW THAT I UNDERSTAND THE PROBLEM IT IS VITAL FOR YOU TO KNOW THAT MY MODEL OF CAR LEXUS 430 LS IS AFFECTED AS WELL. \*TR

**Vehicle:** 2006 TOYOTA AVALON  
**Location of Incident:** CHATSWORTH, CA

**NHTSA Summary:**

WHILE TOYOTA HAS ISSUED A LETTER REGARDING NHTSA CAMPAIGN #09V388000, I BELIEVE THAT THE PROBLEM WITH CONTINUOUS ACCELERATION IS CAUSED NOT BY THE CARPET (WHICH IS A LUDICROUS STORY) BUT BY THE FAULTY CONTROL MECHANISM (PERHAPS, COMPUTER CHIPS) USED IN THE CRUISE CONTROL. MY 2006 AVALON HAS A LASER-GUIDED CRUISE CONTROL WHICH AUTOMATICALLY SLOWS DOWN MY VEHICLE WHEN IT APPROACHES TOO CLOSE TO THE VEHICLE AHEAD OF IT. AFTER A SAFE DISTANCE IS ATTAINED, IT THEN ACCELERATES TO KEEP UP WITH THE VEHICLE AHEAD. I HAVE NOTICED THAT SOMETIMES IN SO DOING, THE VEHICLE SURGES AS IF I WERE FLOORING THE GAS PEDAL. IT IS SCARY WHEN IT LUNGES FORWARD WITH SUCH A FORCE. I AM NO LONGER USING THE CRUISE CONTROL FOR THIS REASON. I BELIEVE THAT THE PROBLEM IS IN CERTAIN CRUISE CONTROL DEFECT. CARPET HAS NOTHING TO DO WITH IT. THAT SOUNDS LIKE A SMOKE SCREEN. PLEASE INVESTIGATE VIGOROUSLY. \*TR

**NHTSA ODI Number:** 10306567  
**Date of Incident:** 20091115  
**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** AMERICAN CANYON, CA

**NHTSA Summary:**

I OWN A 2006 TOYOTA TACOMA. ON 2 OCCASIONS IN THE LAST FEW MONTHS I THOUGHT MY ACCELERATOR PEDAL WENT DOWN SLIGHTLY INCREASING MY SPEED WITHOUT MEDDING ANYTHING TO MAKE IT HAPPEN. ON BOTH OCCASIONS THE ROADWAY WAS WET AND I TRIED TO EXPLAIN THE WEIRD FEEL BY TELLING MYSELF IT MUST BE HYDROPLANING.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10307057  
**Date of Incident:** 20091115  
**Vehicle:** 2002 TOYOTA PRIUS  
**Location of Incident:** SAN DIEGO, CA

**NHTSA Summary:**

I DRIVE A USED 2002 TOYOTA PRIUS, WHICH NOW HAS ABOUT 86,000 MILES ON IT. IN NOVEMBER 2009 I WAS PARKING WHEN THE CAR SPONTANEOUSLY ACCELERATED. MY SPEED WAS LESS THAN 2MPH, MY FOOT WAS CONTINUOUSLY ON THE BRAKE WHILE EASING INTO THE PARKING SPACE, PRIOR TO THE UNCONTROLLABLE ACCELERATION. SUDDENLY WITHOUT WARNING I HEARD THE ENGINE RACE AND THE CAR BOLTED FORWARD, UNRESPONSIVE TO MY BRAKING. I ONLY STOPPED WHEN MY CAR COLLIDED HEAD ON WITH A PARKED CAR, WHICH WAS MOVED ABOUT TWO FEET BY OUR COLLISION. IT HAPPENED TOO FAST TO EVEN THINK OF CHANGING GEAR INTO NEUTRAL, BECAUSE I WAS ONLY 5 FEET FROM THE OTHER CAR WHEN THE SPONTANEOUS ACCELERATION OCCURRED. AFTER THE ACCIDENT I LOOKED FOR CAUSE AND I

C-1642

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

DETERMINED THAT NO OBJECT IN THE CAB HAD ACCIDENTALLY PUSHED THE ACCELERATOR PEDAL, INCLUDING THE FLOOR MAT. I BELIEVE THAT BECAUSE OF THE SMALL NUMBER OF DRIVERS EXPERIENCING UNCONTROLLABLE ACCELERATION OUT OF THE MILLIONS OF TOYOTAS SOLD, THAT THE PHENOMENON IS CAUSED BY TWO OR MORE INDEPENDENT ERRORS IN THE VEHICLE ELECTRONICS, OCCURRING UNFORTUNATELY AT THE SAME TIME. THE CONFLUENCE OF TWO UNLIKELY EVENTS HAS EVEN SMALLER PROBABILITY, THEREFORE FEW OCCURRENCES. FOR EXAMPLE IF THE CRUISE CONTROL FAILED TO DISENGAGE AND ALSO THERE WAS A SIGNIFICANT DELAY IN THE SIGNAL FROM BRAKE PEDAL TO BRAKE DRUMS, THE COMBINATION COULD BE TRAGIC. THE TOYOTA PRIUS 2002 MODEL WHICH I DRIVE HAS NOT BEEN RECALLED; HOWEVER SINCE THE ACCIDENT I HAVE BEEN EVER ON THE ALERT, PREPARED TO GEAR INTO NEUTRAL. EVEN THIS VIGILANCE WILL NOT PROVIDE SAFETY IF THE DISTANCE BETWEEN MY CAR AND AN OBSTACLE OR CREVASSE IS SHORT WHEN THE FLAW SURFACES AGAIN, GIVEN THE FINITE SPEED OF HUMAN NERVOUS TRANSMISSION, THE CAR'S SUDDEN, UNCONTROLLABLE ACCELERATION NEEDS TO BE INVESTIGATED. THANK YOU.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10308337  
**Date of Incident:** 20091115  
**Vehicle:** 2006 TOYOTA 4RUNNER  
**Location of Incident:** SALINA, KS

**NHTSA Summary:**

RANDOM UNINTENDED ACCELERATION ON MY 2006 TOYOTA 4RUNNER AFTER COMING TO A STOP. THIS HAS HAPPENED SINCE IT WAS NEW AND SINCE IT DIDN'T OCCUR ALL THE TIME I THOUGHT IT WAS JUST A BREAKING IN PROBLEM AND WOULD GO AWAY. THIS IS NOT A FLOOR MAT OR STICKY GAS PEDAL PROBLEM - THE CAR BRAKES OKAY AND MY FOOT IS OFF THE GAS PEDAL AND ON THE BRAKE PEDAL WHEN IT HAPPENS. THE ENGINE GOES TO A NORMAL STOP IDLE AND THEN SURGES TO A HIGHER RPM ON ITS OWN. NORMAL ENGINE RPM AT STOP IS ABOUT 550, BUT DURING A SURGE IT JUMPS TO 1300 RPM AND DOESN'T GO BACK TO THE 550 RPM UNTIL AFTER I LEAVE THE STOP CONDITION OR TURN THE CAR OFF AND I RESTART IT. I'VE LEARNED TO BE CAUTIOUS AND ALWAYS PREPARED TO PRESS HARDER ON THE BRAKE PEDAL IF IT HAPPENS. I'VE JUST RECENTLY REPORTED THIS TO TOYOTA ON THEIR WEBSITE AFTER LEARNING OF ALL THE OTHER UNINTENDED ENGINE ACCELERATIONS. THIS SEEMS TO BE AN ENGINE COMPUTER CONTROL PROBLEM, NOT FLOOR MATS OR STICKY ACCELERATORS, AND SEEMS TO BE WHAT OTHER PEOPLE ARE EXPERIENCING. I'M CONCERNED BECAUSE THE 4RUNNERS HAVE NOT BEEN MENTIONED IN THE RECALLS, AND NEITHER HAS THIS PROBLEM BEEN RECALLED AS IT IS RELATED TO THE ENGINE COMPUTER. THE LAST TIME THIS HAPPENED, NOV. 2009, I WAS PULLING INTO MY GARAGE WITH THE ENGINE AT IDLE (550 RPM) AND IT SUDDENLY SURGED AND I HAD TO STOMP ON THE BRAKE HARDER TO KEEP FROM RUNNING INTO MY LAWN MOWER/BACK GARAGE WALL. MY FOOT WAS OVER THE BRAKE PEDAL AND I WAS COASTING INTO THE GARAGE AT THE TIME.

**Location of Incident:** CARY, NC

**NHTSA Summary:**

I DRIVE A 2007 TOYOTA FJ CRUISER. I'VE OWNED THE VEHICLE SINCE AUGUST 2006. TWO TIMES SINCE I'VE OWNED THE VEHICLE, IT HAS ACCELERATED UNEXPECTEDLY. EACH TIME, IT HAS TAKEN ME OFF GUARD. ONE TIME I WAS IN A 35 MPH ZONE AND IT GOT UP TO 50 OR 60 MPH. IN BOTH INCIDENTS, I SWITCHED THE CAR INTO NEUTRAL AND THE ENGINE CONTINUED TO REV. I WAITED FOR THE ENGINE TO RETURN TO NORMAL BEFORE PUTTING IT BACK INTO DRIVE. BOTH TIMES, I THINK I WAS GOING A SLOW ENOUGH SPEED THAT THE BRAKE HELPED SLOW THE VEHICLE DOWN ALSO. I HAVE INSPECTED MY FLOOR MAT AND IT WAS NEVER NEAR THE GAS PEDAL. DURING ANY OF THE INCIDENTS, I ASSUMED THAT THESE WERE JUST RARE OCCURRENCES. NOW, AFTER HEARING OTHER TOYOTA OWNERS DESCRIBE SIMILAR ISSUES, I'M WONDERING IF THIS IS RELATED TO A MECHANICAL DEFECT.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Date of Incident:** 20091116  
**Vehicle:** 2009 TOYOTA MATRIX  
**Location of Incident:** BOCA RATON, FL  
**NHTSA Summary:**  
NHTSA COMPLAINT:  
TOYOTA ACCIDENT I DRIVE A LEASED 2009 TOYOTA MATRIX.AT 8.24 AM ON NOVEMBER 16, 2009, PULLING INTO A PARKING SPACE AT THE DOCTORS OFFICE BUILDING AT 1905 CLINT MOORE RD BOCA RATON. THE CAR WAS ALMOST STOPPED AND MY FOOT WAS ON THE BRAKE, WHEN THE CAR REVVED UP TO THE MAXIMUM, JUMPED THE CURB AND HIT A PALM TREE. I IMMEDIATELY SWITCHED OFF THE ENGINE. I WAS DAZED, AND AFTER A COUPLE OF MINUTES I GOT OUT THE CAR TO SEE THE DAMAGE. HAVING HEARD OF CAR MAT PROBLEMS, I INSPECTED THE MATS, BUT NOTHING WAS OUT OF PLACE. AFTER A FEW MINUTES, I WENT TO MY DOCTORS APPOINTMENT, BUT HAD TO LEAVE BEFORE I SAW THE DOCTOR, AS I DIDN'T FEEL WELL. DESPITE A LOT OF FRONT END DAMAGE, THE CAR WAS DRIVABLE, SO I DECIDED TO DRIVE THE CAR TO MY HOME, BUT I WAS FRIGHTENED ALL THE WAY AS I THOUGHT THE CAR MIGHT DO THE SAME THING AGAIN IN TRAFFIC. WHEN I GOT HOME I CALLED ALLSTATE AND REPORTED THE ACCIDENT. I TOLD THEM THERE IS A PROBLEM WITH THE CAR, AS IT ACCELERATED BY ITSELF, AND THE DRIVER SIDE AIRBAG DID NOT INFLATE. PER INSTRUCTIONS FROM ALLSTATE, THE CAR HAS BEEN TOWED TO ED MORSE CADILLAC FOR REPAIR OF THE DAMAGE INCURRED. MY QUESTION IS, CAN I LEGALLY BREAK MY LEASE AND RETURN THE CAR TO TOYOTA, AS IT IS UNSAFE.  
**Additional Summary:**  
TOYOTA ACCELERATED ON ITS OWN AND RAN CAR INTO TREE, THE AIR BAG DID NOT DEPLOY-PAIN IN NECK AND LOWER BACK - He drives a 2009 Toyota Matrix. He drove into the parking spot at his doctors office about 2 or 3 mph and the car accelerated, with his foot on the brake, and it jumped over the barrier into a tree. They have not given him a quote on the damages to the car, but it crushed the front fender and it will be 2 weeks before he gets the car back. He went to the orthopedic doctor this morning, he has a lot of pain in his neck and lower back and they will be monitoring it. They gave him some pain medicine. He called Allstate and they told him to give it to a body shop, but he wanted someone at Toyota to test it because the air bag did not deploy and the car accelerated by itself. He needs to get out of the lease he has because he is afraid to drive the car anymore.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10307548  
**Date of Incident:** 20091116  
**Vehicle:** 2007 TOYOTA TACOMA  
**Location of Incident:** FAIR OAKS, CA  
**NHTSA Summary:**  
ON NOVEMBER 16, 2009, I PULLED MY 2007 TOYOTA TACOMA PICKUP INTO A PARKING SPACE AT A LOCAL WALMART STORE PARKING LOT AND AS I APPLIED THE BRAKES TO STOP, THE ENGINE ACCELERATED CAUSING A "FORWARD BUCKING" MOTION FORCING ME INTO THE CAR PARKED IN THE SPACE IN FRONT OF ME. DUE TO THE DAMAGE TO THE CAR, I REPORTED THE INCIDENT TO MY INSURANCE AND ALSO REPORTED THE MATTER TO TOYOTA CUSTOMER SERVICE BECAUSE SIMILAR INCIDENTS HAVE OCCURRED ON PRIOR OCCASIONS (AND SINCE) BUT NO DAMAGE WAS DONE. I AM AWARE OF THE FLOOR MAT RECALL BY TOYOTA FOR THE PICKUP, BUT IN MY STRONG OPINION, THIS "ACCELERATION" ISSUE IS NOT CAUSED BY THE FLOOR MAT. RATHER, I BELIEVE THE ISSUE IS DUE TO A FAULTY DESIGN OF THE BRAKE PEDAL/SYSTEM AND/OR THE ACCELERATOR. THE CURRENT DESIGN ALLOWS MY FOOT TO CATCH THE ACCELERATOR WHEN I APPLY THE BRAKE PEDAL. THE ACCELERATOR AND THE BRAKE PEDAL ARE LESS THAN 3 INCHES APART AND THE BRAKE PEDAL IS ONLY ABOUT 1/4 INCH HIGHER THAN THE

C-1647

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ACCELERATOR WHEN NEITHER PART IS BEING DEPRESSED. HOWEVER, WHEN PRESSING THE BRAKE PEDAL, IT BECOMES LEVEL WITH THE ACCELERATOR AND IF MY FOOT IS NEAR THE SIDE OF THE PEDAL, MY FOOT CAN ALSO CONTACT THE ACCELERATOR, CAUSING THE ENGINE TO ACCELERATE WHILE THE BRAKE IS BEING APPLIED. THIS SITUATION HAS OCCURRED ON AT LEAST FOUR OCCASIONS, BUT ONLY THE ONE INVOLVED ANOTHER VEHICLE. WHEN I REPORTED THIS MATTER TO TOYOTA, I WAS ASKED NOT TO HAVE THE PICKUP REPAIRED/CHECKED UNTIL IT COULD BE INSPECTED BY A TOYOTA TECHNICIAN. AFTER EIGHT WEEKS AND SEVERAL PHONE CALLS, NOTHING HAS HAPPENED. WHILE I NOW KNOW HOW TO CORRECT THIS PROBLEM WHEN IT OCCURS, ANOTHER DRIVER MIGHT NOT AND A SERIOUS ACCIDENT COULD RESULT. MOREOVER, MY FOOT SIZE IS LESS THAN AN 8 SO A DRIVER WITH A LARGER FOOT SIZE COULD EASILY HAVE SIMILAR OR GREATER PROBLEMS. I HAVE DRIVEN NUMEROUS VEHICLES DURING MY 50 PLUS YEARS OF DRIVING EXPERIENCE AND NEVER ENCOUNTERED A SIMILAR SITUATION!

**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** BROAD RUN, VA

**NHTSA Summary:**  
ON 2 OCCASIONS THE GAS PEDAL HAS STUCK ON MY 2003 TOYOTA CAMRY. ON THE FIRST OCCASION, IT OCCURRED WHILE I WAS ON THE HIGHWAY TRAVELING FORWARD WITH THE TRANSMISSION IN DRIVE. THE 2ND OCCASION WAS ON SATURDAY, NOVEMBER 21, WHEN I PUT THE CAR IN REVERSE. ON BOTH OCCASIONS I WAS ABLE TO GET THE CAR UNDER CONTROL BY FORCEFULLY STEPPING ON THE BRAKE PEDAL, BUT THE SECOND TIME THIS OCCURRED WAS A VERY NEAR ACCIDENT - CAME WITHIN INCHES OF HITTING A PARKED VEHICLE. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10307005  
**Date of Incident:** 20091121  
**Vehicle:** 2001 TOYOTA TUNDRA  
**Location of Incident:** CLOVIS, CA

**NHTSA Summary:**  
UNINTENDED ACCELERATION WHILE BACKING UP OUT OF A PARKING SPACE ON MY MOTHER'S 2001 TOYOTA TUNDRA LIMITED. THE TRUCK HIT TWO PARKED VEHICLES IN THE PARKING LOT. AS A PASSENGER I REACHED OVER TO TRY TO PUT THE TRUCK IN NEUTRAL BUT THAT WASN'T WORKING SO I TURNED OFF THE IGNITION AND WE STOPPED. THE SECOND VEHICLE WE HIT, A FORD EXPEDITION WAS FORCEFULLY MOVED OVER TO THE NEXT PARKING SPOT DUE TO THE CRASH. 911 WAS CALLED, FIRE DEPT AND AMBULANCE ARRIVED BUT POLICE DID NOT SHOW UP DUE TO THEIR LACK OF STAFF AND NO INJURY/DEATH.

**Additional Summary:**

**Date of Incident:** 20091121  
**Vehicle:** 2004 TOYOTA CAMRY  
**Location of Incident:** STILLWATER, OK

**NHTSA Summary:**  
TO WHOM IT MAY CONCERN: WITHOUT HEARING THE NEWS RELATED TO TOYOTA VEHICLE RECALL, I HAVE FELT REALLY STUPID HOW I COULD HAVE HAD THE ACCIDENT. RECALLING THE PROCESS OF THE ACCIDENT, I MIGHT HAVE TO SAY IT WAS WEIRD BEFORE THE CRASH. I CLEARLY NOTICED THE RED LIGHT AND A STOPPED CAR JUST IN FRONT OF ME ON N PERKINS RD. CLOSE TO MCELROY RD IN STILLWATER, OKLAHOMA, AND THE DISTANCE WAS MORE THAN 20 METERS APART AT THAT MOMENT. I PRESSED ON THE BRAKE PEDAL AS USUAL, BUT MY CAR DID NOT SLOW DOWN UNTIL HIT THE CAR BEFORE MINE, AND THE AIRBAG DID NOT POP OUT. MY FACE WAS KNOCKED ONTO THE STEERING WHEEL AND ONE OF MY GLASSES SMASHED, FORTUNATELY NOT MAKING ME BLEED, AND TWO TEETH IN MOUTH WERE BLEEDING ALONG WITH SOME SCRATCHES ON MY FACE. THE CAR WAS TOTALED AT THE SPEED OF LESS 40 MI/H. PEOPLE LOVE TOYOTA VEHICLES FOR THE REASON OF SAVING GAS AT THE SACRIFICE OF SAFETY. SHORTLY, THE POLICE AND AMBULANCE ARRIVED. I DECLINED ANY MEDICAL ARRANGEMENT AFTER BEING TESTED THAT MY MIND WAS UNDER CONTROL AND COULD MAKE DECISION CLEARLY BECAUSE I WAS NOT SURE WHETHER MY INSURANCE COVERS THE COST OR NOT. AND NOW, AS THE PROBLEM WITH TOYOTA VEHICLES WAS DISCLOSED, I FEEL MY ACCIDENT MIGHT ALSO BE DUE TO THE SAME GAS PEDAL DEFECT. (IN

**NHTSA Summary:**  
I WAS ON A JOB ASSIGNMENT IN NAPA VALLEY, CALIFORNIA. I HAD A RENTAL TOYOTA CAMRY FROM NATIONAL CAR RENTAL. I DON'T HAVE VIN BUT LICENSE WAS CA 6GAN376. I WAS DRIVING NORTH OF PT REYES ON HWY 1 AND DECIDED TO STOP AT A SCENIC AREA. I TOOK A LEFT OFF THE HWY INTO THE PARKING AREA. I WAS BRAKING AND APPROACHING A PARKING AREA SURROUNDED BY LARGE TIMBERS AS PARKING GUARDS. I WAS NEARLY STOPPED AT THE TIMBER, BRAKING AND PREPARING TO PUT THE TRANSMISSION INTO PARK. MY CAR SUDDENLY LURCHED FORWARD OVER THE TIMBER, ENGINE ROARING. BECAUSE I HAD BEEN PREPARING TO PUT THE TRANSMISSION INTO PARK AND DID THIS, THE CAR ENGINE ACCELERATED SEVERLY AND DIED. MY FIRST THOUGHT WAS THAT I HAD BEEN STRUCK FROM BEHIND AND THRUST FORWARD BUT THERE WERE NO OTHER CARS OR WITNESSES. I WAS ABLE TO RESTART THE CAR, ROCK A BIT AND MOVE BACKWARDS OFF THE TIMBER. I WAS BEWILDERED BY THE STRANGE BEHAVIOR OF THE CAR AND DIDN'T CONNECT THIS EVENT TO THE RECENT TOYOTA PROBLEMS UNTIL THE RECALLS AND TV REPORTS. I NOW AM SURE THIS WAS AN EVENT OF RAPID ACCELERATION. I WAS FORTUNATE IN

C-1660

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THAT I HAD MY FOOT ON THE BRAKE AND HAD BEEN ALMOST STOPPED WHEN THE LURCH FORWARD OCCURED. AFTER EXPERIENCING THIS, I DONT BELIEVE THE PROBLEM HAD ANYTHING TO DO WITH THE ACCELERATOR SINCE MY FOOT WAS ON THE BRAKE, NOT THE ACCELERATOR. I REALLY WONDER IF ELECTRONIC "CROSS-TALK" HAS BEEN RULED OUT AS THIS PROBLEM SEEMED TO BE VERY RELATED TO ELECTRONICS.

**Date of Incident:** 20091122  
**Vehicle:** 2004 LEXUS RX330  
**Location of Incident:** SAN ANTONIO, TX

**NHTSA Summary:**

VEHICLE HAS EXPERIENCED UNINTENDED ACCELERATION THREE TIMES DURING THE TWO YEARS THAT I HAVE OWNED IT. THIS HAPPENED ON OCCASIONS WHEN I HAD SLOWED DOWN AND THEN SLIGHTLY DEPRESSED THE GAS PEDALL TO RESUME SPEED. WITH THE GAS PEDAL SLIGHTLY DEPRESSED, I FELT THE PEDAL GO FURTHER DOWN BY ITSELF, LEAVING MY FOOT AND THE CAR GOING FASTER. I SAID, "WHOA! WHAT WAS THAT?", AND THEN ASSUMED THAT THE CAR HAD SOME SORT OF O'ERDRIVE THAT CAUSED IT TO DO THAT. ON TWO OF THE OCCASIONS THIS OCCURRED WHEN I HAD SLOWED TO EXIT A FREEWAY, AND THEN SLIGHTLY DEPRESSED THE GAS PEDAL TO RESUME SPEED AND GET ONTO AN ACCESS ROAD. I HAVE CALLED THE LEXUS DEALER AND AM TAKING IT IN TO BE CHECKED.

**Additional Summary:**

**Toyota ID Number:**

**NHTSA ODI Number:** 10303083  
**Date of Incident:** 20091123  
**Vehicle:** 2005 TOYOTA HIGHLANDER  
**Location of Incident:** EASTHAMPTON, MA

**NHTSA Summary:**

MY 2005 TOYOTA HIGHLANDER V6 4WD, WHICH I PURCHASED NEW, HAS BEEN EXPERIENCING A HESITATION/SHIFTING PROBLEM FOR NEARLY AS LONG AS I HAVE OWNED THE VEHICLE. WHILE THE PROBLEM DOES NOT ALWAYS OCCUR, IT IS QUITE PRONOUNCED WHEN IT DOES AND HAS RESULTED IN VERY DANGEROUS SITUATIONS. THE PROBLEM HAS BEEN BROUGHT TO THE DIRECT ATTENTION OF TOYOTA MOTOR SALES IN CALIFORNIA, AND THEIR RESPONSE HAS BEEN DISTURBINGLY POOR. THE TOYOTA DEALER THAT HAS BEEN SERVICING MY VEHICLE HAS BEEN VERY HELPFUL, BUT APPARENTLY CANNOT TAKE ACTION TO CORRECT THE PROBLEM WITHOUT CORPORATE AUTHORIZATION. HERE IS A SUMMARY OF THE PROBLEM: THE VEHICLE CANNOT ALWAYS DECIDE WHEN TO ACCELERATE FROM A STOP - THERE HAVE BEEN

C-1661

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

MANY INSTANCES OF INITIAL HESITATION/LACK OF ADEQUATE POWER UPON APPLYING THE GAS PEDAL. FOR EXAMPLE, I HAVE EXPERIENCED A DELAY OF A SECOND OR TWO WHEN APPLYING THE GAS PEDAL TO PROCEED. THIS HAS RESULTED IN SOME VERY CLOSE CALLS WITH ONCOMING TRAFFIC. ALSO, THERE ARE OCCURRENCES WHERE THE VEHICLE CANNOT SEEM TO DECIDE BETWEEN GEARS (IT WILL SOMETIMES JUMP UP/DOWN BETWEEN THE LOWER GEARS, SUCH AS 1ST TO 2ND GEAR AND/OR 2ND TO 3RD GEAR). FURTHERMORE, I HAVE NOTICED A GENERAL LACK OF ADEQUATE ACCELERATION/GAS PEDAL RESPONSE, ESPECIALLY DURING CITY DRIVING (IE. LOWER SPEEDS). MY LOCAL TOYOTA DEALER HAS RECORDS OF THE PROBLEM SINCE APPROXIMATELY 16,000 MILES (THE VEHICLE NOW HAS ABOUT 44,000 MILES). I BELIEVE THE ISSUE IS THE ECM, WHICH WAS REPROGRAMMED BUT THE PROBLEM RETURNED. BASED ON MY RESEARCH, I BELIEVE THE ECM MAY BE DEFECTIVE AND THAT REPLACING THE UNIT MAY SOLVE THE PROBLEM. TOYOTA WILL NOT REPLACE THE ECM. ABOUT A MONTH AGO, THE TOYOTA DEALER WAS ABLE TO VERIFY THE HESITATION PROBLEM DURING A SERVICE VISIT. HOWEVER, THEY COULD NOT DUPLICATE IT LATER WITH THE SCAN TOOL ATTACHED - THEY HAD THE VEHICLE FOR TWO DAYS TRYING TO GET A SNAP SHOT BECAUSE THE TOYOTA FIELD SERVICE TECHNICIAN TOLD THEM "NO REPAIRS ARE TO BE MADE UNTIL THE PROBLEM OCCURS MORE OFTEN." TW\*

**Location of Incident:** VALLEY COTTAGE, NY

**NHTSA Summary:**

ON NOV 23, MY WIFE HAD AN ACCIDENT IN HER 2009 CAMRY. SHE WAS PULLING INTO A PARKING SPACE WHEN THE CAR ACCELERATED. THE CAR CONTINUED TO ACCELERATE WITH THE BRAKE ON. THE CAR HAS BEEN COSMETICALLY FIXED (\$9500). WE HAVE NO FAITH IN THIS RECALL FOR GAS PEDAL. THERE IS MUCH MORE HERE, A SENSOR OR COMPUTER FAILURE. TOYOTA HAS STILL NOT FIXED OUR CAR BECAUSE THEY DO NOT HAVE RECALL PARTS YET. THEY ALSO SAID THEY WERE GOING TO INSTALL BREAK OVER-RIDE SOFTWARE WHEN THAT BECOMES READY. PLEASE CONTINUE YOUR INVESTIGATION. I FEEL WE HAVE NOT HEARD THE LAST ABOUT THIS ISSUE.

**Additional Summary:**

On November 23, 2009 my 2009 Camry (7000 miles) suddenly accelerated into the side of a Rite-Aid store causing over \$9000 in damage. Lucky no one was hurt, but something caused that car to accelerate and surely not the floor mates. Now the car is fixed but I will not drive it, it is at the dealership waiting for recall supplies to arrive. Even then, I do not trust the car. So, what do I do with this car? If I trade in I take a huge financial loss. I feel I have to in order to feel safe. Thank you for your investigation. I feel some one is on my side.

**Date of Incident:** 20091123  
**Vehicle:** 2008 TOYOTA CAMRY  
**Location of Incident:** LAREDO, TX

**NHTSA Summary:**

I WAS DRIVING MY TOYOTA CAMRY 2008 MODEL ON A DRY, FLAT ROAD IN CLEAR, DRY WEATHER, GOING ABOUT 55 MPH. THE ROAD WAS 2 LANES WITH NO SHOULDERS ON EITHER SIDE. I SWERVED INTO THE LEFT LANE TO PASS A TRUCK BUT SAW A CURVE APPROACHING AND WENT TO SWERVE BACK IN BEHIND THE TRUCK, BRAKING TO SLOW DOWN. AS I DID THE BRAKING, THE CAR RAPIDLY INCREASES SPEED SO I BRAKED HARDER BUT THE CAR KEPT GOING AT SPEED. THERE WAS NO ROOM TO GO RIGHT (NO SHOULDER) IN ORDER TO AVOID CRASHING INTO THE TRUCK IN FRONT OF ME, SO I SWERVED LEFT, INTO THE ON-COMING LANE. THERE WERE NO CARS IN THAT LANE. MY CAR CONTINUED TO ACCELERATE AND IT VEERED ACROSS THE LANE, INTO A DITCH ALONGSIDE THE ROAD AND TURNED OVER, LANDING ON THE ROOF. THE OTHER 2 OCCUPANTS OF THE CAR AND MYSELF HAD OUR SEAT BELTS ON AND WERE NOW SUSPENDED FROM THEM AND UNHURT EXCEPT FOR MINOR SCRATCHES AND BRUISES. THE CAR WAS BADLY DAMAGED AND REQUIRE ABOUT \$10,000 WORTH OF REPAIRS OVER A 7 WEEK PERIOD. THERE NO OTHER VEHICLES INVOLVED NOR WAS THERE ANY PROPERTY, PUBLIC OR PRIVATE, DAMAGED.

**Date of Incident:** 20091124  
**Vehicle:** 2005 TOYOTA TACOMA  
**Location of Incident:** ESTACADA, OR

**NHTSA Summary:**

2005 TOYOTA TACOMA--IT'S NOT THE FLOOR MAT! UNINTENTIONAL ACCELERATION PROBLEM. BACKING TO TURN AROUND, LOOKING OVER MY RIGHT SHOULDER AND TURNING THE STEERING WHEEL TO THE LEFT. WHEN MOVING MY RIGHT FOOT FROM THROTTLE TO BRAKE, THE TRUCK SUDDENLY ACCELERATED AND THE HARDER I BRAKED, THE FASTER IT WENT. STOPPED THE MOVEMENT BY SHUTTING OFF THE ENGINE. WHAT HAPPENED: IN THE POSITION I WAS IN, TWISTED TO LOOK OVER MY RIGHT SHOULDER. WHEN MOVING MY FOOT TO THE BRAKE, I INADVERTENTLY FAILED TO MOVE MY FOOT COMPLETELY ONTO TO THE BRAKE AND OFF THE THROTTLE. MY FOOT ENGAGED BOTH PEDALS AND THE BRAKES DID NOT ENGAGE UNTIL THE BRAKE PEDAL WAS PRESSED DOWN FAR ENOUGH TO ALSO PRESS ON THE THROTTLE. THIS HAS HAPPENED TO ME 3 TIMES, FORTUNATELY IN MY DRIVEWAY AND THERE WERE NO COLLISIONS. THE PROBLEM IS THAT THE BRAKE PEDAL GOES DOWN TOO LOW BEFORE ACTUALLY ACTIVATING THE BRAKES. THE SOLUTION IS TO DESIGN SO THAT THE BRAKES ENGAGE WHEN THE PEDAL IS A LITTLE HIGHER THAN THE THROTTLE. IS IT

C-1663

**Vehicle:** 2010 TOYOTA CAMRY  
**Location of Incident:** SPRINGFIELD, PA

**NHTSA Summary:**

11/24/09 I WAS DRIVING MY 2010 CAMRY IN A PARKING LOT. MY CHILDREN WERE IN THE BACK SEAT. I WAS TRAVELING 10 MPH. MY RIGHT FOOT WAS NOT ON THE GAS, NOR THE BRAKE, THE TORQUE OF THE ENGINE WAS SUFFICIENT FOR MOVING US ALONG WHILE LOOKING FOR A PARKING SPACE. MY RIGHT FOOT WAS ABOVE THE BRAKE AS I WAS SLOWLY LOOKING FOR A PARKING SPOT. SUDDENLY, I HEARD A VERY LOUD VVRRROOOOMMMM AND THE CAR SPONTANEOUSLY ACCELERATED AND LUNGED FORWARD APPROXIMATELY 20 FEET. THANKFULLY I WAS ABLE TO BRAKE QUICKLY AND STOPPED THE CAR. I THEN TOOK IT TO THE DEALERSHIP. CONICELLI RAN A DIAGNOSTIC ON MY CAR. LATER THAT DAY WHEN I PICKED UP THE CAR, THEY SAID THEY FOUND NOTHING. WHEN I ASKED THEM WHERE THE "SPONTANEOUS ACCELERATION" (A PROBLEM TOYOTA EARLIER IN THE DAY TOLD ME THEY WERE HAVING) WOULD HAVE APPEARED ON THE DIAGNOSTIC, THEY WERE AT A LOSS. LET ME BE VERY CLEAR THAT THERE WAS NOT A FLOOR MAT IN THE DRIVER'S SIDE. I DO NOT BELIEVE THE "SPONTANEOUS ACCELERATION" WAS CAUSED BY THE "MAT ISSUE." I KNOW MY EXPERIENCE WAS REAL AND NOT CAUSED BY DRIVER ERROR. I FEEL THE PROBLEM IS ELSEWHERE AND EXACERBATED FOR SOME DRIVERS BECAUSE THEY HAD THE FLOOR MATS IN PLACE. PLEASE PRESS TOYOTA TO GET TO THE BOTTOM OF THIS ISSUE. I NO LONGER FEEL SAFE IN MY 2010 TOYOTA CAMRY THAT I BOUGHT FOR SAFETY REASONS IN THE FIRST PLACE. \*TR THANK YOU.

**Additional Summary:**

**NHTSA Summary:**

SUDDEN ACCELERATION AT HIGHWAY SPEEDS IN 2006 TOYOTA COROLLA ID # 1NXBR32E86Z756049 - ON 11-24-09 TRAVELLING SOUTH ON HIGHWAY 5 IN CALIFORNIA NEAR BUTTONWILLOW AT APPROXIMATELY 70-75 MILES PER HOUR IN THE FAST LANE, PROBABLY WHILE ON CRUISE CONTROL, CAR BEGAN TO ACCELERATE, HIT THE BRAKE

C-1664

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

WHICH HAD NO EFFECT, AND IF IT HAD BEEN ON CRUISE CONTROL, IT DID NOT OVERRIDE THE ACCELERATION. I BEGAN TO GET CLOSER TO THE CAR IN FRONT OF ME. I DO NOT BELIEVE I INITIALLY TRIED TO PUT THE CAR INTO NEUTRAL. I TURNED OFF THE CAR ENGINE, THE ACCELERATION STOPPED, I HIT THE BRAKE SOMEWHAT TO GET IT DOWN TO A REGULAR SPEED, PUT THE CAR INTO NEUTRAL, STARTED IT WHILE COASTING, PUT IT BACK INTO GEAR (MANUAL TRANSMISSION), AND THE CRISIS WAS OVER. THEN, ABOUT AN HOUR LATER, WHILE ON THE GRAPEVINE PORTION OF HWY 5 AFTER THE SUMMIT, IT DID THE SAME THING WITH LESSER TRAFFIC. I PUT IT INTO NEUTRAL THIS TIME, HIT THE BRAKE, SLOWED A LITTLE, PUT IT BACK INTO GEAR AND SINCE THEN IT HAS NOT OCCURRED. SEE NEXT PARAGRAPH. OVER THE PAST 3 YEARS, THEIR HAVE BEEN A NUMBER OF ADDITIONAL OCCASIONS WITH A DIFFERENT ISSUE WHERE: 1) MY FOOT HAS SLIPPED OFF THE BRAKE ONTO THE ACCELERATOR CAUSING THE ENGINE TO REV WHEN IN NEUTRAL IN THE DRIVEWAY OR A STOPLIGHT (I THINK BECAUSE THE PEDALS ARE SMALL AND VERY CLOSE TO ONE ANOTHER), AND; 2) OCCASIONS WHEN THE ACCELERATOR HAS GOT STUCK UNDER THE FLOORMAT WHEN THE FLOORMAT HAD SLID FORWARD CAUSING THE CAR TO ACCELERATE. REGARDING THE HIGHWAY ACCELERATION PROBLEM, THIS WAS NOT THE CASE.

**NHTSA ODI Number:** 10318585  
**Date of Incident:** 20091124  
**Vehicle:** 2005 TOYOTA PRIUS  
**Location of Incident:** SAN FRANCISCO, CA

**NHTSA Summary:**

ON 11/24/09 I WAS PARKED IN A SAN FRANCISCO SHOPPING MALL PARKING LOT AND STARTED MY VEHICLE, PUT IT REVERSE, RELEASED THE BRAKE AND IT, IMMEDIATELY, ACCELERATED OUT OF THE ANGLED PARKING SPACE, ACROSS THE ONE-WAY SINGLE LANE AND CRASHED INTO THE REAR OF A CAR SIMILARLY PARKED ON THE OPPOSITE SIDE OF THE TRAFFIC LANE. I FRANTICALLY BRAKED BUT THE CAR DID NOT STOP AND, IN FACT, SEEMED TO SPEED UP. I AM ABSOLUTELY CONVINCED THAT THE CAUSE OF THE ACCIDENT WAS A FAULT IN THE ACCELERATOR MECHANISM. I, AT FIRST, THOUGHT IT WAS MY FAULT AND SAID SO TO MY INSURANCE COMPANY WITHIN AN HOUR OF THE ACCIDENT. BUT ON REFLECTION, I DECIDED IT WAS THE CAR ITSELF AND THE FOLLOWING DAY I CALLED MY INSURANCE COMPANY AND TOLD THEM THAT IT WAS A FAULT WITH THE CAR THAT WAS THE CAUSE. I HAVE TRIED TO CONTACT TOYOTA CORP. NUMEROUS TIMES BY EMAIL AND HAVE NOT BEEN SUCCESSFUL. FINALLY I CONTACTED THE LOCAL TOYOTA DEALER WHO WAS GOOD ENOUGH TO RELAY MY EMAIL TO TOYOTA CORP. THE LOCAL DEALER SENT ME AN EMAIL THE FOLLOWING DAY TELLING ME THAT I HAD TO GET AN OFFICIAL CASE OPENED WITH TOYOTA'S CUSTOMER EXPERIENCE CENTER AND TO CONTACT THEM AT 1(800)331-4331 TO GET A CASE NUMBER. I HAVE BEEN PHONING THEM FOR WEEKS AND I AM NOT ABLE TO GET ANYTHING BUT A RECORDED MESSAGE. TRYING THE LOCAL DEALER AGAIN, HE CALLED DIRECT AND ASKED THEM TO CALL ME BUT THEY TOLD HIM THAT THEY WERE NOT ABLE TO DO SO BECAUSE OF THEIR LONG WAITING LIST. SO I AM NOW TRYING THE NHSTA.

**NHTSA ODI Number:** 10293888  
**Date of Incident:** 20091127  
**Vehicle:** 2006 TOYOTA TUNDRA  
**Location of Incident:** PRESCOTT, AZ

**NHTSA Summary:**

THIS COMPLAINT IS TO INCLUDE ODI #'S 10183308,10288886, AND 10293097. THE ODI #'S ARE ALL FOR THE SAME VEHICLE BUT ARE FOR DIFFERENT DATES IN WHICH THIS VEHICLE HAD SOMETHING TO REPORT THAT WAS DIFFERENT BUT WERE ASSOCIATED. THIS COMPLAINT IS FOR AN INCIDENT THAT OCCURRED ON NOV. 27TH 2009. I WAS PARKED ALMOST ALL THE WAY OUT OF MY GARAGE. THE VEHICLE WAS RUNNING AND TRANSMISSION WAS IN PARK WITH EMERGENCY BRAKE APPLIED. FORTUNATELY I WAS SITTING BEHIND THE WHEEL AND IMMEDIATELY SHUT THE IGNITION OFF. I DO NOT KNOW THE RPM'S. MY WIFE WAS GETTING INTO THE TRUCK ON THE PASSENGERS FRONT. WHEN ALL OF A SUDDEN THE ENGINE RACED AS IT WOULD HAVE AS DESCRIBED AS "UNINTENTIONAL SUDDEN ACCELERATION". THIS WAS THE SECOND TIME THAT THE TRUCK DID THIS EXCEPT THAT THE TRANSMISSION WAS IN PARK. BEING OUT IN THE DESERT AND THIS HAPPENING AND BEING IN THE GARAGE IN PARK SENDS OUT TO ME A MESSAGE THAT THIS TRUCK HAS A GLITCH IN IT THAT NOW HAS HAPPENED TWICE. IF I WAS NOT IN THE TRUCK, GOD ONLY KNOWS WHAT WOULD HAVE HAPPENED. I HAVE REPORTED THE SUDDEN ACCELERATION TO TOYOTA ALREADY. TOYOTA HAS LOOKED AT THE TRUCK AT MY DEALERS AND HAS SENT THE INFORMATION TO THEIR LEGAL DEPT. TO DECIDE WHAT THEY WILL DO. I HAVE NOT REPORTED THE LATEST INCIDENT. THE TOYOTA PEOPLE ARE SUPPOSED TO CALL ME MONDAY THE 30TH. I SHALL TELL THEM ABOUT THIS INCIDENT AT THAT TIME. I HAVE ALREADY TOLD THEM THAT THEY SHOULD HAVE IMPOUNDED THE VEHICLE BUT INSTEAD THEY LET ME DRIVE THE VEHICLE HOME. WHAT NEEDS TO HAPPEN IS TOYOTA NEEDS TO BUY THE TRUCK BACK AND MAKE ME WHOLE ON THE COMPLETE PURCHASE PRICE OF THE TRUCK. ONCE THAT IS DONE THEY CAN USE MY VEHICLE AS A TEST TRUCK. THE FLOOR MATS ARE THE CORRECT TOYOTA ISSUED WITH ONE KEEPER. MY GAS PEDAL DOESN'T HANG UP, SO POSSIBLY THEY WILL ACTUALLY HAVE TO FIND THE PROBLEM. I REALLY HOPE THEY FIND WHAT THE ISSUE IS. BUT ONCE THEY SAY THAT "IT IS FIXED". I'LL WAIT ANOTHER YEAR BEFORE I AMUSE MYSELF TO PURCHASE ANOTHER TRUCK. I ALWAYS TRUSTED TOYOTA BUT NO MORE. \*TR

**NHTSA Summary:**

ON NOVEMBER 27, 2009, MY BOYFRIEND AND I WERE DRIVING MY 2007 TOYOTA TACOMA HOME AFTER ATTENDING A FOOTBALL GAME AT AUBURN UNIVERSITY. MY BOYFRIEND WAS DRIVING AND AS HE WAS ACCELERATING TO PASS A SEMI, MY TACOMA'S ACCELERATOR SUCKED TO THE FLOOR, PUSHING MY VEHICLE TO DANGEROUS SPEEDS NEARLY CAUSING US TO REAR-END THE VEHICLE IN FRONT OF US. HE WAS UNABLE TO GET THE VEHICLE TO STOP USING THE BRAKE AND WAS UNABLE TO PRY THE ACCELERATOR UP WITH THE TOE OF HIS SHOE. HE RESORTED TO PUTTING THE VEHICLE IN NEUTRAL AND TURNING IT OFF. WE WERE TERRIFIED, IN HEAVY TRAFFIC AND IN A

C-1671

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

VEHICLE WE NO LONGER FELT SAFE DRIVING. APPROXIMATELY AN HOUR AFTER THE FIRST INCIDENT, THE TRUCK SUDDENLY ACCELERATED AGAIN. AS WE WERE SPEEDING UP AFTER BEING STOPPED AT A RED LIGHT, THE VEHICLE SURGED PULLING THE ACCELERATOR AWAY FROM MY BOYFRIEND'S FOOT TO THE FLOOR. HE RESORTED, AGAIN, TO PUTTING THE VEHICLE IN NEUTRAL IN ORDER TO STOP IT. WE TOOK THE TACOMA TO TOYOTA OF DOTHAN THE NEXT MORNING TO DETERMINE WHAT THE PROBLEM WAS. THE DEALERSHIP KEPT THE VEHICLE NEARLY A WEEK TO DETERMINE THE PROBLEM. THEY REPORTED THAT THE FLOOR MAT MUST HAVE BEEN CAUGHT UNDER THE GAS PEDAL. I KNOW FOR A FACT THE MAT WAS NOT UNDER THE ACCELERATOR. I HAD READ REPORTS PRIOR TO THE INCIDENT WHERE MISPLACED FLOOR MATS WERE CAUSING THE ACCELERATOR TO HANG AND I HAD PULLED THE MAT IN MY VEHICLE BACK INTO A SECURE LOCATION. I TALKED TO MY BOYFRIEND; HE REPORTED THAT THE MAT WAS IN ITS PROPER PLACE WHEN THE INCIDENT OCCURRED. \*TR

**Date of Incident:** 20091128  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** ALBUQUERQUE, NM  
**NHTSA Summary:**  
AFTER PICKING UP HER MAIL AT HER CONDO MAILBOX AREA, MY MOTHER (93 YEARS OLD BUT IN GOOD HEALTH) STARTED UP HER CAR, HEARD A LOUD ROARING NOISE, THOUGHT IT WAS AN AIRPLANE FLYING LOW OVERHEAD (IT WAS HER CAR ENGINE), AND PUT THE CAR IN REVERSE TO EXIT HER PARKING SPACE. WITH THE THROTTLE JAMMED FOR SOME REASON, THE CAR TOOK OFF VERY FAST IN REVERSE IN AN UNCONTROLLED MANNER, CIRCLED AROUND SEVERAL TIMES OVER CURBS, GRASSY AREAS, SIDE SWIPED A SIGN POLE, AND CAME TO A STOP FINALLY AFTER BACKING (CRASHING) INTO ANOTHER CONDO UNIT ACROSS THE STREET FROM WHERE SHE LIVES. OBVIOUSLY SHE WAS VERY SCARED AFTER THIS VERY FAST UNCONTROLLED BACKWARD RIDE, BUT HAPPY TO FIND THAT SHE HAD NOT BEEN INJURED, OR THAT SHE HAD NOT HIT ANOTHER CAR OR PERSON. THE CAR (2002 CAMRY) WAS TOWED TO THE LOCAL TOYOTA DEALER WHERE IT WAS REPAIRED OVER A PERIOD OF SEVERAL WEEKS (BODY AND MECHANICAL SUSPENSION PARTS) AND CHECKED OVER. NO OBVIOUS REASON WAS FOUND FOR THE THROTTLE JAM WAS FOUND. SHE DID HAVE AN EXTRA FLOOR MAT ON TOP OF OEM MAT TO BETTER PROTECT FROM WEAR AND WET WEATHER. SHE SAID SHE DID LOOK LATER TO SEE IF THE FLOOR MAT HAD GOTTEN OUT OF PLACE TO HAVE CAUSED THE INCIDENT,

**C-1674**  
**Safety Research & Strategies**  
*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BUT IT DID NOT APPEAR TO HAVE MOVED OUT OF PLACE ENOUGH TO HAVE CAUSED THE INCIDENT. FORTUNATELY, THE THROTTLE JAM HAS NOT OCCURRED AGAIN. \*TR

**Location of Incident:** LONG BEACH, CA  
**NHTSA Summary:**  
ON 11/29/09 IN THE AFTERNOON AS I WAS PULLING INTO A PARKING SLOT IN A TRADER JOE'S PARKING LOT, MY 2007 TOYOTA PRIUS SUDDENLY ACCELERATED FORWARD OVER A CURB, ACROSS A CROSSWALK AND CAME TO REST AGAINST A TREE. SPACE COVERED BY THE CAR FROM ACCELERATION TO THE TREE WAS ABOUT 20-25 FEET. WITNESSES ATTEST THAT I WAS USING MY BRAKE AS THEY SAW THE LIGHTS. I DID NOT HAVE TIME TO ATTEMPT TO SHIFT THE CAR TO "NEUTRAL." THE FLOORMATS WERE NOT

**C-1676**  
**Safety Research & Strategies**  
*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

INTERFERING WITH THE ACCELERATOR PEDAL (I HAVE PICTURES) AND THE FLOOR MATS WERE HOOKED DOWN. FORTUNATELY NO ONE WAS HURT INCLUDING ME. THERE WAS SLIGHT DAMAGE TO THE FRONT DRIVERS SIDE BUMPER OF AN EMPTY CAR PARKED FACING ME. THERE WAS SUBSTANTIAL DAMAGE TO THE FRONT OF MY PRIUS. AS I STATED, THERE WERE TWO WITNESSES WHO GAVE ME THEIR CONTACT INFORMATION AND SAID THEY WOULD BE WILLING TO TESTIFY FOR ME IF NECESSARY. THERE WAS A TRADER JOE WORKER WHO CALLED A TOW TRUCK. THE DRIVER OF THE OTHER VEHICLE WITH THE MINIMAL DAMAGE WAS QUITE UPSET AND CALLED THE POLICE WHO CAME AND WROTE A REPORT. MY CAR HAS NEVER SUDDENLY ACCELERATED BEFORE - THIS WAS THE FIRST TIME. THE CAR WAS TOWED TO HOONMAN TOYOTA IN LONG BEACH. IN RESPONSE TO MY COMPLAINTS TO TOYOTA, A REGIONAL TEAM WAS SENT TO EVALUATE THE ACCELERATOR MECHANISM. THE CAR IS CURRENTLY BEING REPAIRED HOWEVER TOYOTA HAS NOT BEEN IN TOUCH WITH ME TO TELL ME THEIR FINDINGS. TOYOTA'S BEHAVIOR TO MY COMPLAINTS OF SAFETY ISSUES HAS BEEN TO TELL ME THAT THE ONLY PROBLEM THEY HAVE IS FLOORMATS AND THAT MY PROBLEM HAS NEVER BEEN REPORTED BEFORE. THEIR IMPLICATION IS THAT I WAS AT ERROR. MY INSURANCE COMPANY STATE FARM INITIALLY HELD ME RESPONSIBLE FOR NOT CONTROLLING THE VEHICLE. WHEN I REFUSED THIS DECISION, SF DID MORE RESEARCH AND CHANGED THEIR RULING TO FIND FAULT WITH TOYOTA AND WILL TRY TO GET REIMBURSED FOR REPAIR COSTS AND MY DEDUCTIBLE. I EXPECT MY CAR TO BE READY NEXT WEEK AND AM DEEPLY CONCERNED THAT THE PROBLEM WILL NOT BE FIXED. \*TR

 FROM NEWS ARTICLE  
 KVAL 13 - EUGENE, OREGON - TOYOTA SUED IN CALIF. OVER ACCELERATION DEATHS

Jacquelyn Donoghue of Holder, Neb., said in the lawsuit that her 2006 Toyota Prius suddenly sped up and went out of control in December, slamming into another vehicle, killing her husband John and seriously injuring her. Her attorney, Robert Nelson, said Toyota vehicles weren't equipped with a brake-to-Idle safety feature which allows drivers to override the electronic throttle and control the vehicle in case of a sudden unintended acceleration.

Other manufacturers include this safety feature, and Toyota's failure to include it on their models played a "direct role" in the death of John Donoghue, he said.

Jacquelyn Donoghue, a 67-year-old nurse, had to move out of her home after the accident so she could live closer to family members who could help take care of her.

**Additional Summary:**  
 FROM WFAA.COM NEWS ARTICLE POSTED FEBRUARY 1, 2010

Don Campbell's 2005 Toyota Avalon crashed through the front windows of McAlister's Deli on Colleyville Boulevard back in December. His wife was parking the car when, Campbell said, the vehicle just took off.

"The motor was running at full blast," Campbell said. "She had pressed the brake so hard, that the brake - it was smoking."

The car jumped the curb and crushed some patio tables and chairs before crashing through the window of the business.

Deli workers said they heard the engine revving even after the crash until the car stalled out.

**NHTSA Summary:**

**Additional Summary:**  
 FROM CBC NEWS "TOYOTA HIT BY ANOTHER CLASS-ACTION SUIT"

"Calgary resident Kari Grant is considering joining the class action lawsuit.

Grant said she was driving down Crowchild Trail two months ago when her 2007 Lexus IS 350 began accelerating on its own. That model was part of an earlier floor mat pedal entrapment recall, but she doesn't believe her floor mat was what caused her car to speed up.

C-1682

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

Her Lexus raced down the road at 160-km an hour until Grant managed to shut it down by shifting it into neutral.

"Your heart is absolutely racing for sure," she said. "I was lucky because it was late at night, and there weren't as many people on the road. Had there been traffic, I probably would have been in a bit more trouble, as would the people around me."

**NHTSA Summary:**

**Additional Summary:**  
 INFORMATION FROM NEWS ARTICLE - WALL STREET JOURNAL - "Acceleration Mishaps Worry Vehicle Owners"

"Frank Kimball, a recruiter in Chicago, said he is still driving his three Lexus vehicles, despite what happened about three weeks ago. After dinner at a downtown restaurant with his wife and daughter, he got into in their 2005 GS350 sedan and started the car with his foot on the brake. Then the engine suddenly revved to a very high speed, Mr. Kimball said, estimating it reached 6,000 revolutions per minute. That's near the limit for the car and strong enough to over come the brake, he said.

The vehicle then began lurching forward and screeching down the street. He says his wife and daughter were both screaming, and he managed to turn the ignition off and slip the car into park. "It was extremely scary," Mr. Kimball said.

He asked the service department at the Lexus dealership who told him that it could have been caused by the way the floor mats were aligned. "That's not credible," says Mr. Kimball. Still, he said he feels he knows what to do if a problem occurs, so is still driving all three Lexus vehicles."

**Toyota ID Number:**

**NHTSA ODI Number:** 10301860  
**Date of Incident:** 20091201  
**Vehicle:** 2007 TOYOTA TACOMA  
**Location of Incident:** LEBANON, MO

**NHTSA Summary:**

ON 1 DEC 2009 I WAS DRIVING BEHIND A LEBANON RIII DISTRICT SCHOOL BUS AT APPROXIMATELY 3PM ON WASHINGTON AVE IN LEBANON MO. I WAS DRIVING MY 2007 TOYOTA TACOMA AT APPROXIMATELY 20-25 MPH WHEN THE SCHOOL BUS BEGAN TO SLOW TO MAKE A LEFT TURN. I WAS APPROXIMATELY 30 FEET BEHIND THE BUS AND LIFTED MY FOOT OFF THE ACCELERATOR TO COAST MY TRUCK AND THEN BEGAN TO BRAKE WHEN THE BUS STOPPED TO MAKE ITS TURN. WHEN I APPLIED THE BRAKES THE TRUCK DID NOT SLOW. INSTEAD IT KEPT AT ABOUT THE SAME SPEED DESPITE PRESSURE ON THE BRAKE PEDAL. AT FIRST I THOUGHT I HAD BRAKE FAILURE AND PUSHED HARDER ON THE PEDAL AND WAS PRACTICALLY STANDING ON THE PEDAL WHEN I IMPACTED THE REAR OF THE BUS. THE CRASH RESULTED IN MINOR DAMAGE TO THE BUS, BUT MAJOR DAMAGE TO THE TACOMA (\$8K). THERE WERE NO INJURED CHILDREN ON THE BUS, HOWEVER, SOME PARENTS TOOK THEIR CHILD TO A DOCTOR FOR A CHECK-UP. EYE WITNESSES OF THE ACCIDENT VERIFIED THAT I TRIED TO STOP THE TACOMA AND COULD NOT. ADDITIONALLY, THERE WAS APPROXIMATELY 20 FEET OF FRESH TIRE

C-1683

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SKID MARK BEHIND THE TRUCK WHICH INDICATED THE BRAKES WORKED AS INTENDED. THE CRASH OCCURRED AFTER BOTH VEHICLES HAD CROSSED A SERIES OF RAILROAD TRACKS AT A TRAIN CROSSING. I CALLED TOYOTA LATER ON IN THE DAY TO REPORT THE ACCIDENT AND FOLLOWED UP BY MAILING A NARRATIVE DESCRIPTION OF THE ACCIDENT, POLICE REPORT AND INSURANCE ADJUSTER'S ESTIMATE OF DAMAGES TO THE TRUCK ON 15 DEC 09. TOYOTA ALSO SEND A REPRESENTATIVE TO INVESTIGATE THE TRUCK WHO INTURN FILED A REPORT WITH TOYOTA HQ. I RECEIVED RESPONSE FROM TOYOTA ON 20 JAN 10 AND THEIR REPORT SAID THAT THEY COULD NOT FIND ANY MANUFACTURER DEFECT WITH THE TACOMA WHICH COULD HAVE CAUSED THE ACCIDENT. I BELIEVE THEY ARE IN ERROR AND BELIEVE THERE MAY BE A SOFTWARE PROBLEM WITH THE ECU OR ACCELERATOR CONTROL MODULE WHICH MAY HAVE BEEN AFFECTED BY RADIO SIGNALS OR ELECTRON SIGNALS BY THE TRAIN CROSSING. \*TR

**Vehicle:** 2003 TOYOTA RAV4  
**Location of Incident:** PLEASANTON, CA

**NHTSA Summary:**

AROUND 12/1/2009, I NOTICED THAT THE AUOMATIC TRANSMISSION SEEMED TO HAVE PROBLEMS SHIFTING, FOR EXAMPLE WHEN YOU WOULD THINK THAT THE CAR WOULD

C-1684

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SHIFT FROM 1ST TO 2ND GEAR, IT WOULD NOT, OR WHEN YOU WERE AT A STOP LIGHT AND TRIED TO ACCELERATE, CAR WOULD NOT MOVE. IT WAS AS IF THE CAR WAS IN NEUTRAL SO STEPPING ON THE ACCELERATOR DID NOTHING BUT CAUSE A LOUD "REVVING" SOUND. IN MOST CASES WITHIN A FEW SECONDS, IT DID GET INTO GEAR AND THE CAR DID ACCELERATE HOWEVER WHEN THIS HAPPENED, THE CAR WOULD JERK SHARPLY. WITHIN A FEW DAYS THE PROBLEM WAS OCCURRING ALOT (AT EVERY STOP, EVERY TIME THE CAR NEEDED TO SHIFT BETWEEN 1ST AND 2ND GEAR OR 2ND AND 3RD) SO I STOPPED DRIVING IT SINCE I DID NOT FEEL IT WAS SAFE, FOR EXAMPLE, WHEN THE CAR WAS MOVING IN TRAFFIC BUT THEN WOULD NOT SHIFT FROM 1ST TO 2ND GEAR, I COULD NOT ACCELERATE AND GO THE POSTED SPEED LIMIT. I RESEARCHED THE PROBLEM ONLINE AND SPOKE TO MY MECHANIC AND WE AGREED THE CAR SEEMED TO BE EXHIBITING PROBLEMS DESCRIBED IN A TOYOTA SERVICE BULLETIN TC002-06 (A PROBLEM WITH THE ENGINE CONTROL MODULE). AS MY CAR HAD JUST OVER 10000 MILES, TOYOTA REFUSED TO CONSIDER THIS AS COVERED BY WARRANTY SO I HAD TO PAY TO GET IT DONE (ENDED UP GOING TO A PRIVATE SHOP). CAR IS BETTER NOW, THOUGH IT MAY ALSO NEED GET THE TRANSMISSION REBUILT AS THERE ARE STILL SOME ISSUES WHEN THE CAR SHIFTS FROM 1ST TO 2ND GEAR OR 2ND TO 3RD GEAR.

**NHTSA Summary:**

DEC 1 2008 PRIUS - UNEXPECTED ACCELERATION IN STOP AND GO TRAFFIC AND WITH FOOT ON THE BRAKE, THE CAR SUDDENLY ACCELERATED AND HIT THE CAR IN FRONT OF ME... APPROXIMATELY A CAR LENGTH OR SO AWAY. THE MOTOR RACED HIGH AND I WAS UNABLE TO GET THE ENGINE TO SHUT DOWN UNTIL I HELD ON THE POWER BUTTON FOR AN EXTENDED PERIOD OF TIME. THE CAR IN FRONT OF ME WAS PUSHED INTO THE CAR AHEAD OF THEM IT TOOK TOYOTA OVER A MONTH TO INSPECT THE CAR (THEIR LEGAL FOLKS SET IT UP) AND WE WERE TOLD WE COULD BE PRESENT WHEN IT HAPPENED, BUT THEY DIDN'T LET US KNOW. OVER 5 WEEKS AFTER THE ACCIDENT WE RECEIVED A FORM LETTER FROM TOYOTA STATING THEY FOUND NOTHING WRONG. WITH TOYOTA'S DELAY, WE ENDED UP WAITING OVER 8 WEEKS TO GET THE CAR BACK, AT A COST OF \$15,000 ... FOR A COLLISION WHERE THE TRAFFIC WAS MOVING 1-4 MILES PER HOUR. THE CAR IS KNOW UNSAFE AND WE CANNOT DRIVE IT. OFFERS FROM 2 TOYOTA DEALERSHIPS ARE UP TO \$3K UNDER KELLY BLUE BOOK TRADE IN VALUE FOR A REPLACE CAR (NON PRIUS). DRIVER OF PRIUS HAS A RECORD OF DRIVING OVER 30 YEARS WITH NO ACCIDENTS.

**Vehicle:** 2002 TOYOTA SIENNA  
**Location of Incident:** METAIRIE, LA

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2002 TOYOTA SIENNA. WHILE DRIVING 40 MPH THE CONTACT RELEASED THE ACCELERATOR PEDAL AND THE VEHICLE CONTINUED TO ACCELERATE. THE CONTACT TRIED APPLYING THE BRAKES BUT THE VEHICLE WOULD NOT SLOW DOWN COMPLETELY. THE CONTACT SHIFTED THE VEHICLE INTO NEUTRAL AND IT STILL DID NOT SLOW DOWN. THE CONTACT THEN SHIFTED THE VEHICLE INTO PARK WHILE THE VEHICLE WAS IN MOTION. THE CONTACT WAS ABLE TO PULL THE VEHICLE OVER AND SHUT IT OFF. THE CONTACT RESTARTED THE VEHICLE AND THE RPM'S BEGAN TO INCREASE RAPIDLY. THE CONTACT PUMPED THE ACCELERATOR PEDAL AND THE RPM'S DECREASED. THE VEHICLE WAS DIAGNOSED BY THREE LOCAL MECHANICS AND NEITHER ONE OF THEM COULD DUPLICATE THE FAILURE. THE DEALER WAS ALSO UNABLE TO DUPLICATE THE FAILURE AND THAT "GUNK" COULD HAVE COMPOSED IN THE ENGINE, CLOGGED IT WHICH WOULD HAVE CAUSED THE VEHICLE TO ACCELERATE. THE CONTACT STATED THAT THE FAILURE IS DIRECTLY RELATED TO THE CURRENT RECALL FOR THE PEDAL. THE FAILURE MILEAGE WAS 83,271.

**Date of Incident:** 20091203  
**Vehicle:** 2008 TOYOTA RAV4  
**Location of Incident:** READING, PA

**NHTSA Summary:**  
I HAVE A 2008 TOYOTA RAV4. I HAD AN INCIDENT IN THE FALL OF 2009 WHERE, AS I WAS BRAKING AND SLOWING DOWN, MY ENGINE REVVED UP WITHOUT MY TOUCHING THE GAS PEDAL, AND I STEPPED ON THE BRAKE AND PUT MY CAR IN NEUTRAL. DIDN'T UNDERSTAND WHAT HAD JUST HAPPENED BUT THOUGHT IT WAS MAYBE MY FAULT SOMEHOW. IN EARLY DEC. I PULLED INTO A PARKING SPACE, FRONT END FORWARD, AND THERE WAS ANOTHER PARKED CAR OPPOSITE MY CAR, FACING MINE. AS I WAS SLOWING DOWN AND BRAKING, THE ENGINE REVVED AND I HAD TO SLAM MY FOOT ON THE BRAKE TO AVOID HITTING THE CAR IN FRONT OF ME. I CALLED MY DEALERSHIP IMMEDIATELY FROM MY CELL PHONE, RIGHT THERE IN MY CAR, AND TOLD THEM WHAT HAPPENED. THEY ASKED ME IF I WAS WEARING "HEELS", DID I STEP ON THE ACCELERATOR BY MISTAKE, DID THE FLOOR MAT GET CAUGHT?... AND I SAID NO TO ALL OF THAT. I WENT IN THE NEXT DAY TO SERVICE, AND THEY SPENT SEVERAL HOURS LOOKING AT MY CAR, CHECKING THINGS OUT. WHEN THEY WERE FINISHED, THEY SAID THEY "COULDN'T MAKE MY CAR DO WHAT I TOLD THEM IT DID". COULD NOT FIND A PROBLEM. ASKED AGAIN ABOUT SHOES, WRONG PEDAL, ETC. SINCE THEN, I HAD ONE MORE EXPERIENCE WITH ACCELERATION AT THE TOP OF A HILL, WHERE TOOK MY FOOT OFF THE GAS AND THE MOTOR CONTINUED TO ACCELERATE. RIGHT ABOUT THAT TIME THE NEWS OF THE TOYOTA PROBLEMS WAS BEGINNING. I CALLED MY DEALERSHIP AND ASKED WHY I HAD NOT RECEIVED A LETTER ABOUT A RECALL. I WAS TOLD THAT MY TOYOTA HAD BEEN BUILT IN JAPAN AND THEREFORE IT DOES NOT HAVE THE ACCELERATOR PROBLEM AND IS NOT ON THE RECALL LIST. WHAT DO I DO NOW??

**Additional Summary:**

**NHTSA Summary:**  
TL-THE CONTACT OWNS A 2005 SCION TC. WHILE DRIVING APPROXIMATELY 35 MILES PER HOUR THE ACCELERATOR PEDAL STUCK. THE CONTACT PUT THE VEHICLE IN NEUTRAL AND VEHICLE DID NOT STOP. THE CONTACT STATED THERE WAS AN ACCIDENT IN WHICH 3 INDIVIDUALS WERE INJURED. A POLICE REPORT WAS FILED IN WHICH THE CONTACT PAID \$220 FOR FAILURE TO CONTROL SPEED. THE FAILURE AND CURRENT MILES WERE NOT AVAILABLE. THE VIN WAS NOT AVAILABLE. AA

**Additional Summary:**

December 4, 2009, I was driving my Toyota Scion 2005 when the car started accelerating at a fast rate of speed. I tried braking but they would not engage. My car rear ended car in front of me which in turn rear ended the car in front of it. Then my car hit a concrete embankment. I suffered head injuries and car was totaled. Car was towed to Toyota and they said nothing was wrong with accelerator, couldn't recreate the problem. I have filed complaints with Texas Attorney Generals office, NHTSA, Toyota and called my insurance State Farm to give them information. No results with anyone. I read where you are keeping records of the various cars that have problems. The SCION does have the acceleration problem but no one will listen. Thank you.

**Vehicle:** 2004 TOYOTA COROLLA  
**Location of Incident:** GREER, SC

**NHTSA Summary:**  
FRIGHTENING INCIDENT THAT WAS REPORTED ON MY 2004 TOYOTA COROLLA LE/SD 4 DR. PARKING MY VEHICLE IN A DRIVEWAY (ON A SLIGHT INCLINE), DRY CONDITIONS, AND ONLY 1 FOOT FROM A PARKED CARGO VAN. ABOUT TO PLACE FOOT ON BRAKE TO STOP COMPLETELY TO TURN CAR OFF AND FULL ACCELERATION TOOK PLACE. GAS PEDAL WENT FULL THROTTLE AND HIT THE CARGO VAN. TIRES WERE SPINNING, LEFT TIRE TRACKS. MY CAR PINNED BETWEEN A CARGO VAN AND PULLING TO THE LEFT -- SIX INCHES FROM HITTING A SUBARU OWNED BY SISTER. ACCELERATION WENT FOR ABOUT TWO MINUTES AS I WAS APPLYING THE BRAKES, NO RESULTS. I LOOKED DOWN TO SEE IF MY CAR MAT WAS IN THE WAY AND THE ANSWER IS NO. THREE PEOPLE CAME OUTSIDE THE HOME TO SEE WHAT THE LOUD IMPACT WAS AND WHY THE CAR WAS ACCELERATING IN THAT MANNER-- THINKING THE ENGINE HAD BLOWN. I WAS ABLE TO PUT THE CAR IN NEUTRAL, THEN PARK AND SHUT IT OFF WHILE APPLYING THE BRAKE. CONTACTED TOYOTA CORPORATE OFFICE WHO THEN REFERRED ME OUT TO CUSTOMER EXPERIENCE CENTER ON MONDAY 12/7 TO INFORM THEM OF MY ORDEAL. THEY ARRANGED FOR MY CAR TO BE SERVICED BY A TECHNICIAN ON 12/15/2009 AT THE TOYOTA DEALER IN GREER, SC. I WAS TOLD TO PICK THE CAR UP AFTER 1 1/2 HOURS. I HAD CAR TOWED TO AND FROM CAR DEALER. IN JANUARY 2010, I PICKED UP A CERTIFIED LETTER FROM THE POST OFFICE THAT WAS DATED DECEMBER 23, 2009. IT STATED THAT "BASED ON OUR FINDINGS PROVIDED ABOVE, WE RESPECTFULLY DECLINE ANY FURTHER ASSISTANCE IN THIS MATTER." THE INSPECTION WAS - PROVIDING A ROAD TEST AND THE BRAKES, HELD VEHICLE SPEED AT 10 MPH, NO LEAKAGE WITH BRAKES, AND ACCELERATION DID NOT STICK. THEY SENT ME ON MY WAY AND CLOSED THE CASE AND THANKED ME FOR MY BUSINESS AND BEING A LOYAL TOYOTA CUSTOMER! I ONLY HAD MY CAR FOR TWO YEARS. IT IS THE FIRST TIME IT HAPPENED. I ULTIMATELY HAD TO GET ANOTHER VEHICLE TO GET AROUND IN. IT WAS MY ONLY

**Location of Incident:** ELK GROVE, CA

**NHTSA Summary:**  
CRUISE CONTROL: SINCE MY 2006 TOYOTA TACOMA WAS BRAND NEW, WHEN GOING UP AN INCLINE SUCH AS A FREEWAY OVERCROSSING, OR MODERATE INCLINE, THE CRUISE CONTROL WILL CAUSE THE AUTOMATIC TRANSMISSION TO DOWNSHIFT ONE GEAR AND MANY TIMES TWO GEARS IN AN EFFORT TO MAINTAIN THE FREEWAY SET SPEED (I.E. 65 OR 70 MPH). THIS CRUISE CONTROL THROTTLE INCREASE AND TRANSMISSION DOWNSHIFTING RESULTS IN AGGRESSIVE ACCELERATION WHICH CONTINUES PAST THE SET SPEED BY A FEW MILES PER HOUR BEFORE THE CRUISE CONTROL'S INCREASED THROTTLE INPUT BACKS OFF (SINCE IT SHOT PAST THE CRUISE CONTROL'S SET SPEED) BEFORE THE CRUISE CONTROL INITIATES REDUCED THROTTLE INPUT TO TRY TO REDUCE THE VEHICLE SPEED BACK DOWN TO THE SET SPEED. IN ADDITION TO THE LACK OF SMOOTH CRUISE CONTROL SET SPEED OPERATION, THIS CONDITION IS ESPECIALLY SCARY WHEN THE INCLINE IS ALSO ON A CURVE. AS THE VEHICLE AGGRESSIVELY ACCELERATES IT CAN FEEL AS THE VEHICLE IS TRAVELING FASTER THAN IT SHOULD FOR THE CURVE CAUSING THE DRIVER TO TAP THE BRAKE TO DISENGAGE THE CRUISE CONTROL TO STOP THE EXCESSIVE ACCELERATION. TO DATE, ALL INQUIRIES TO NORTHERN CALIFORNIA TOYOTA DEALER SERVICE REPRESENTATIVES HAVE RESULTED IN THE SAME RESPONSE: 6 THE 2006 TACOMA DOES NOT HAVE A SPEED CONTROL PROBLEM AND THERE ARE NO ADJUSTMENTS AS IT IS CONTROLLED BY THE MAIN COMPUTER.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10305790  
**Date of Incident:** 20091205  
**Vehicle:** 2003 TOYOTA HIGHLANDER  
**Location of Incident:** SUMMERFIELD, FL

**NHTSA Summary:**  
IN THE MORNING OF 12-05-09, AS I PULLING INTO MY GARAGE THE CAR VERY SUDDENLY LURCHED FORWARD WITH AN UNEXPECTED INCREASE IN SPEED. BEFORE I COULD BRAKE, THE CAR SLAMMED INTO A STEEL SHELVING UNIT ON THE BACK WALL WHICH RESULTED IN EXTENSIVE DAMAGE TO THE WALL (BOTH INTERIOR & EXTERIOR) AND WHAT APPEARED TO BE MINIMAL DAMAGE TO THE AUTO. I TOOK THE VEHICLE TO MY TOYOTA SERVICE ON THAT SAME DAY BECAUSE I WERE FELT THAT THIS COULD CONSTITUTE AN UNSAFE DRIVING CONDITION. TOTAL COSTS FROM THIS INCIDENT WERE AS FOLLOWS: COVERED BY INSURANCE- \$3607.81 (PLUS 703.31 PD. DIRECTLY TO THE DEALER?) AND \$916.27 ( 500.00 INSURANCE DEDUCTIBLE AND AN ADDITIONAL MECHANICAL CHARGE FOR A FUEL/AIR SENSOR THAT FAILED ON 12-26-09). I HAVE NOT PREVIOUSLY EXPERIENCED "SUDDEN ACCELERATION" WITH THIS VEHICLE. I HAVE NOTIFIED BOTH MY LOCAL DEALER, SOUTHEAST TOYOTA DISTRIBUTORS AND TOYOTA CUSTOMER RELATIONS REGARDING THE PROBLEM STATING THAT THERE MAY BE OTHER VEHICLES BEYOND THE SCOPE OF THEIR CURRENT RECALL THAT SHOULD ALSO BE CONSIDERED AS POTENTIALLY DANGEROUS.

**Date of Incident:** 20091205  
**Vehicle:** 2008 TOYOTA HIGHLANDER  
**Location of Incident:** SAN MARCOS, CA

**NHTSA Summary:**  
I AM LEASING TWO TOYOTA VEHICLES ... A 2008 TOYOTA HIGHLANDER AND A 2009 TOYOTA CAMRY. DURING DECEMBER 2009 I EXPERIENCED PROBLEMS WITH THE 2008 TOYOTA HIGHLANDER TRANSMISSION AND SUDDEN ACCELERATION WHILE BRAKING. DETAILS INCLUDE A TRANSMISSION NOISE RATTLE WHILE DRIVING ON A CALIFORNIA FREEWAY AT ABOUT 60 MPH. THIS TRANSMISSION NOISE CONTINUED FOR 3-4 MINUTES, SOUNDING LOUDER AS IF A PART WAS LOOSE INSIDE OF THE TRANSMISSION. I SHIFTED THE TRANSMISSION ON THE 2008 HIGHLANDER BETWEEN GEARS AND THE NOISE EVENTUALLY STOPPED. THE SECOND COMPLAINT ON THE 2008 TOYOTA HIGHLANDER OCCURRED ON DECEMBER 5, 2009, WHILE I WAS PARKING THE VEHICLE. AS I APPROACHED THE PARKING PLACE, WITH MY FOOT COVERING THE BRAKE PEDAL, I EXPERIENCED UNEXPECTED ACCELERATION WHILE BRAKING. THE 2008 TOYOTA HIGHLANDER SUDDENLY LURCHED WITHOUT WARNING AND WOULD HAVE CONTINUED TO ACCELERATE THROUGH A PLATE GLASS WINDOW AT THE BANK IF I DIDN'T APPLY FULL FORCE OF THE BRAKE! I WAS ABLE TO APPLY THE BRAKE FIRMLY ENOUGH TO OVERCOME THE SUDDEN ACCELERATION IN ORDER TO STOP THE VEHICLE IN TIME. CARLSBAD, CALIFORNIA TOYOTA OF CARLSBAD WAS NOTIFIED ON DECEMBER 9, 2009 IN WRITING REGARDING THESE TWO ISSUES. I HAD PERSONALLY DELIVERED A TWO PAGE DOCUMENT DETAILING BOTH OF THESE COMPLAINTS TO THE TOYOTA OF CARLSBAD SERVICE DEPARTMENT. I HAVE NOT RECEIVED ANY RESPONSE FROM MY COMPLAINT BY TOYOTA OF CARLSBAD OR THE TOYOTA MOTOR CORPORATION.

**Date of Incident:** 20091205  
**Vehicle:** 2010 TOYOTA PRIUS  
**Location of Incident:** REDWOOD CITY, CA

**NHTSA Summary:**  
I HAVE A 2010 TOYOTA PRIUS, PURCHASED ON 7/24/09. ON SEVERAL OCCASIONS, THE FIRST BEING 12/05/09, THE PRIUS HAS REVERSED IN A "JERKY" FASHION. I KEEP MY FOOT ON THE BRAKE, EASE UP ON THE PEDAL WITH THE CAR IN REVERSE, AND THE CAR LURCHES BACKWARDS AT A SURPRISING SPEED, AND A SPEED WHICH IS UNWARRANTED BY THE AMOUNT OF PRESSURE ON THE BRAKE. THIS HAS HAPPENED 4-6 TIMES IN THE LAST TWO MONTHS. I HAVE NEVER HAD THIS EXPERIENCE WITH ANY OTHER CAR, AND MY FIANCE HAS EXPERIENCED THE PROBLEM WHEN HE DRIVES MY PRIUS. IT SEEMS TO OCCUR ON INCLINES AND UNEVEN SURFACES. IT HAS NOT YET CAUSED AN ACCIDENT OR INJURY, BUT I FIND THIS ISSUE CONCERNING

**NHTSA Summary:**

I HAVE A TOYOTA TACOMA 2005. ON DECEMBER 6, 2009 AT APPROXIMATELY 3PM I WAS HEADING SOUTH ON I-190 IN NIAGARA FALLS NY. CRUISE WAS ON, BUT HAD TO TAP BRAKES BECAUSE OF SLOWER MOVING VEHICLE. THIS DID DISENGAGE THE CRUISE & MY TRUCK BEGAN TO SLOW DOWN. WHEN THE CAR MOVED OVER I DEPRESSED THE ACCELERATOR AND AT THAT TIME THE TRUCK WENT INTO OVERDRIVE/PASSING GEAR. THE MOTOR WAS ROARING AND I HAD NO BREAKS. THEY WERE LIKE A ROCK. IT ACCELERATED TO OVER 94MPH. IT THEN DISENGAGED ON ITS OWN & THE SPEED DECREASED. I THEN TURNED OFF THE CRUISE CONTROL NOT SURE HOW LONG THIS WENT ON BUT IT SEEMED LIKE AN HOUR. AND YES I PANICKED. THIS IS NOT A MAT PROBLEM / THIS TRUCK IS A DEATH TRAP. I WAS TOLD IT COULD NOT BE REPAIRED UNTIL APRIL OF 2010 (5MONTHS). \*TR

**Vehicle:** 2008 TOYOTA HIGHLANDER  
**Location of Incident:** BELLEVUE, WA

**NHTSA Summary:**

ON DECEMBER 7, 2009, I HAD JUST ARRIVED AT MY PARKING APRON IN FRONT OF MY GARAGE AND WAS PUTTING THE CAR IN "PARK" AND HAD DEPRESSED THE BRAKE PEDAL TO DO SO. THE ACCELERATOR IMMEDIATELY JAMMED ON "FULL" AND THE CAR WENT THROUGH A WOODEN TWO-CAR GARAGE DOOR TAKING ALL OF THE EQUIPMENT WITH IT AND PROCEEDED EIGHTEEN (18) FEET INTO THE GARAGE AND WAS STOPPED ONLY BY THE STAIRS TO THE CONDO AND THE HOUSE FOUNDATION. THERE WAS \$9,000 DAMAGE TO THE VEHICLE AND \$4,000 DAMAGE TO THE GARAGE AND STAIRS. TOYOTA HAS EXAMINED THE VEHICLE AND CLAIM IT IS NOT ONE OF THE RECALLED AUTOS AND THIS EVENT MUST HAVE BEEN MY FAULT. THIS IS VERY DISTRESSING AS I AM A SENIOR VOLUNTEER DRIVING SENIORS TO THEIR MEDICAL APPOINTMENTS AND AN "AT FAULT" ACCIDENT WOULD PREVENT MY CONTINUING THIS PROJECT. I FIRMLY BELIEVE THAT SOME DEFECT, PROBABLY ELECTRONIC CONTROLS, CAUSED THE VEHICLE TO DO WHAT IT DID AND I AM VERY AFRAID TO CONTINUE DRIVING IT. EVEN IF, TOYOTA'S CLAIM IS CORRECT THAT MY FOOT WEDGED BETWEEN THE BRAKE AND GAS PEDAL CAUSING ACCELERATION, WOULD THIS NOT ALSO BE A DESIGN DEFECT? PLEASE PROVIDE ANY INFORMATION OR ASSISTANCE AVAILABLE

**Additional Summary:**

**NHTSA Summary:**

I LEASED 2010 TOYOTA CAMRY ON 7/27/09 FROM HUDSON TOYOTA, JERSEY CITY, NJ. IN DECEMBER 2009 MY VEHICLE ACCELERATED BY ITSELF AND BY APPLYING THE BRAKES THE VEHICLE WENT BACK TO NORMAL. IN JANUARY 2010, TOYOTA REPORTED A RECALL ANNOUNCING THAT MY VEHICLE IS FALLING UNDER THEIR RECALL CAMPAIGN. I HAVE NOT RECEIVED ANY NOTICE LETTER FROM TOYOTA REGARDING THE RECALL FIX. ON 2/16/10, WHEN I TOOK MY VEHICLE TO MY LOCAL DEALER FOR 5000 MILES SERVICE, I WAS TOLD THEN THAT MY VEHICLE IS UNDER THE RECALL CAMPAIGN AND IT WILL TAKE LONGER TO PERFORM THE FIXES. NOW WITH ALL THE NEWS HAS BEEN COMING OUT REGARDING THE LACK OF TOYOTA'S SAFETY AND CREDIBILITY, AND WHOLE OTHER FACTS: TOYOTA MANUFACTURER LEASED TO ME 2010 CAMRY WITH FULL KNOWLEDGE ABOUT THE VEHICLE DEFECT (SUDDEN ACCELERATION) SINCE 2007 ON 3/18/10, I SEEK RESOLUTION FOR MY CASE BY TRYING TO EXIT MY FRAUD LEASE AGREEMENT. I HAD MY ARBITRATION HEARING THROUGH NATIONAL CENTER OF DISPUTE SETTLEMENT AT HUDSON TOYOTA, JERSEY CITY. LEM TRYING TO HAVE TOYOTA BUYBACK THE VEHICLE (2010 CAMRY) AND REFUND ME THE PAYMENTS I DID SINCE 7/27/09. THE GENTLEMAN-

C-1700

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

REPRESENTED TOYOTA CLAIMED HE IS THE REGION DISTRICT MANAGER, HAVE NO BUSINESS CARD AND REFUSED TO ANSWER SAFETY QUESTIONS ABOUT THEIR PRODUCT. HE WAS SPENDING MOST OF THE HEARING TIME ON HIS BLACKBERRY, THE ARBITRATOR FROM NATIONAL CENTER FOR DISPUTE SETTLEMENT NEVER COMMENTED ON TOYOTA'S REPRESENTATIVE BEHAVIORS. I'M STILL WAITING FOR A DECISION, WHICH MOST LIKELY TO BE IN TOYOTA'S FAVOR AS THE NCDS LACKED THE TRANSPARENCY IN CONDUCTING THAT HEARING. ARE THERE ANY FURTHER ACTIONS I SHOULD TAKE TO EXIT MY LEASE AND GET A COMPLETE REFUND, AS I DON'T FEEL SAFE DRIVING THEIR VEHICLE?

UNDERSTAND THAT MY CAR IS NOT IN THE RECENT PEDAL RECALL, BUT I THINK IT SHOULD BE. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10304062  
**Date of Incident:** 20091209  
**Vehicle:** 2009 TOYOTA COROLLA  
**Location of Incident:** LANSING, MI

**NHTSA Summary:**  
I BROUGHT MY COROLLA 2009 IN NOV 2008 . IN FEB 2009 I TOOK IT TO LANSING MI DEALER SAYING BRAKES WENT DOWN TO THE FLOOR. I HAD HARD TIME TO STOP MY CAR. THEY SEND ME BACK SAYING NOTHING IS WRONG. THERE WAS A BRAKE RECALL FEW MONTHS LATER. I AM AGAIN FACING THE SAME PROBLEM. I AVOIDED BANGING MY CAR TWICE. I TOOK MY CAR TO TOYOTA DEALER. THE SERVICE PERSONNEL INSTEAD OF LOOKING FOR PROBLEM SAID HE CAN'T HELP ME PUT ON THE BRAKES AS IT WINTER. I TOLD THEM I WANT TO TALK TO HIS SERVICE MANAGER. THE SERVICE MANAGER ASSURED ME THAT HE WILL CHECK THE PROBLEM. THE REAR BRAKES WERE NOT ALIGNED PROPERLY . FRANKLY I CAN'T TRUST THAT CAR. I FEEL THAT CARS 2 BASIC FUNCTIONALITIES WENT WRONG. 1. BRAKE 2. GAS PEDAL. IF TOYOTA CAN'T GET 2 BASIC THINGS RIGHT THEY SHOULD STOP MAKING CARS. \*TR

**Date of Incident:** 20091209  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** SAN RAMON, CA

**NHTSA Summary:**  
THE VEHICLE WAS INVOLVED IN AN ACCIDENT CAUSED BY SUDDEN ACCELERATION. THE DRIVER WAS STOPPED FOR A RED LIGHT. WHEN THE LIGHT TURNED GREEN, THE DRIVER RELEASE THE BRAKE AND THEN THE VEHICLE ACCELERATED ON ITS OWN AND COLLIDED WITH THE VEHICLE AHEAD. THE ACCIDENT WAS REPORTED TO THE LEXUS AS A PRODUCT LIABILITY CASE, CAUSED BY A SUDDEN OR UNINTENDED ACCELERATION. THE VEHICLE WAS INSPECTED AT THE MAGNUSSEN LEXUS DEALERSHIPS, FREMONT, CALIFORNIA BY LEXUS TECHNICIANS ON JANUARY 26, 2010. ON FEBRUARY 10, 2010 THE LEXUS CLAIMS ADMINISTRATOR SENT US A LETTER STATING THAT THE VEHICLE REVEALED NO EVIDENCE OF ANY VEHICLE DEFECTS. I REJECT THIS ASSERTION BY LEXUS AND HEREBY REQUESTING THAT NHTSA INVESTIGATE THIS MATTER. \*TR

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316692  
**Date of Incident:** 20091209  
**Vehicle:** 2008 TOYOTA MATRIX  
**Location of Incident:** OLNEY, MD

**NHTSA Summary:**  
I HAVE HAD MY TOYOTA MATRIX FOR ALMOST A YEAR WHEN IT STARTED HAVING PROBLEMS. THE ISSUE FOR ME WAS COMING TO A STOP LIGHT AND THE CAR WOULDN'T STOP EVEN THOUGH I WAS BRAKING HARD. IT KEPT ROLLING FORWARD. YOU COULD HEAR THE ACCELERATION. PUTTING IT IN NEUTRAL WAS NOT AN OPTION WHEN YOU ARE SITTING IN TRAFFIC AT A LIGHT. I COULD EITHER REAR END THE CAR AHEAD OF ME OR GET REAR ENDED BY THE CAR BEHIND ME. I HAD TO STOP THE CAR BY PUTTING IT IN PARK. THE CAR "BUCKED." IT STOPPED THE CAR AND FOR THAT I WAS GRATEFUL BECAUSE IT JUST KEPT MOVING. I WAS ON A CELL PHONE CALL WHEN IT HAPPENED ANOTHER TIME GOING INTO A GARAGE. THE CAR WOULDN'T STOP AGAIN. MY FRIEND COULD HEAR THE ACCELERATION OF THE CAR THROUGH THE CELL PHONE. I COULDN'T STOP THE CAR WITH MY BRAKE. AGAIN I HAD TO PUT IT INTO PARK AND IT BUCKED AGAIN. I REPORTED IT TO THE TOYOTA DEALERSHIP ON 12/9/09. I CALLED THE SERVICE MANAGER AFTER THAT DATE AND HE TOLD ME TO BRING THE CAR BACK AND I DID ON 2/19/10. THE PEDAL WAS REPLACED ON 3/4/10 AND ON WEEK OF 3/8/10 I EXPERIENCED THE SAME ISSUE OF THE CAR NOT STOPPING AND THE ACCELERATOR STICKING 3 TIMES IN ONE WEEK. THATS AFTER THE PEDAL WAS REPLACED. THE DEALERSHIP CHECKED MY CAR OUT ON EACH OCCASION. I HAVE DOCUMENTATION FOR ALL THESE VISITS AND OPENED IT LOOKS LIKE 2 ACCOUNTS WITH TOYOTA OF AMERICA #100600133 AND #093430265. THEY HAVE REPEATEDLY TOLD ME THAT THEY COULD FIND NOTHING WRONG EVEN AFTER DRIVING THE CAR FOR 4 MILES. THE PROBLEM IS INTERMITTENT AND DRIVING 4 MILES IS LUDICROUS IN ORDER TO SEE IF THEY CAN EXPERIENCE THE PROBLEM. THEY HAVE TOLD ME THEY HAVE DONE EXTENSIVE DIAGNOSTIC WORKUPS ON THE CAR. THEY WILL NOT CHECK THE COMPUTER OR ELECTRONICS AS THEY SAY IT IS NOT THE PROBLEM. HELP. I AM IN TRAFFIC EVERYDAY. I DON'T KNOW WHEN THE FAILURE WILL POP UP ON ME. I NOW HAVE TO GET RID OF THIS CAR AND I CAN'T SELL IT TO SOMEONE PRIVATELY AS I WOULD BE RESPONSIBLE FOR ANYTHING HAPPENING TO THAT PERSON. PLEASE HELP. THANK YOU.

**NHTSA Summary:**

ON THE DAY OF DECEMBER 10, 2009 I WAS ARRIVING HOME FROM WORK AS I ALWAYS DO. I WAS PREPARING TO PARK MY 2005 TOYOTA TACOMA TRUCK IN FRONT OF THE GARAGE AS I ALWAYS DO. AS I BEGAN TO BACK UP THE ENGINE ROARED CAUSING THE TRUCK TO PLUNGE BACKWARD INTO THE GARAGE DOOR AND HOUSE. I WAS UNABLE TO STOP THE VEHICLE EVEN WHILE HAVING MY FOOT ON THE BRAKE. HOWEVER THIS WAS NOT THE FIRST TIME THIS HAD HAPPENED. THE FIRST TIME WAS AT A TRAFFIC LIGHT. AS I STOPPED AT THE LIGHT, WITH A CAR IN FRONT OF ME, WITH MY FOOT ON THE BRAKE THE ENGINE ROARED AND THE TIRES SCREECHED CAUSING THE TRUCK TO ACCELERATE. FORTUNATELY I WAS ABLE TO PUT THE TRUCK IN NEUTRAL ALLOWING ME TO AVOID SLAMMING INTO THE CAR. THE SECOND TIME I WAS TAKING MY WIFE TO HER ONCOLOGIST APPOINTMENT FOR A CHEMOTHERAPY TREATMENT. AS I APPROACHED THE TURNPIKE BOOTH TO GET MY TICKET THE ENGINE AGAIN ROARED AND PLUNGED FORWARD AND I WAS UNABLE TO GET MY TICKET. THANK GOD THERE WAS NO CAR IN FRONT OF US. I WAS FINALLY ABLE TO BRING THE TRUCK TO A STOP BY PLACING IT IN NEUTRAL. AGAIN VISIBLY SHAKEN, I TURNED THE TRUCK AROUND EXPLAINED TO THE TICKET TAKER WHAT HAD HAPPENED AND I RETURNED HOME. I IMMEDIATELY CALLED THE DEALER WHERE I HAD PURCHASED THE VEHICLE AND ASKED IF THEY HAD HEARD OF ANY SIMILAR INCIDENT. THEY INFORMED ME THEY HAD NOT HEARD OF THIS BEFORE. AT THIS POINT IN TIME NO ONE IS WILLING TO HELP RESOLVE THIS PROBLEM. I AM UNABLE AND UNWILLING TO USE THIS TRUCK BECAUSE I AM AFRAID SOMETHING FATAL MY HAPPEN. \*TR

ON 10 DEC 09, AT APPROX. 4:15 PM, I WAS DRIVING MY 2010 TOYOTA CAMRY, WITH MY WIFE IN THE FRONT PASSENGER SIDE. I WAS PROCEEDING SOUTH ON ROUTE 81 1/4 MILE BEFORE THE TAFT ROAD EXIT. I WAS IN THE PASSING LANE PROCEEDING AT APPROX 60-65 MPH. UPON DEPRESSING THE ACCELERATOR INTO PASSING GEAR, THE PEDAL STUCK IN A DOWNWARD POSITION. I ATTEMPTED TO BRAKE THE VEHICLE WITH NO RESPONSE, I QUICKLY PLACED THE VEHICLE IN NEUTRAL AT WHICH TIME THERE WAS A LARGE ENGINE ROAR, AT WHICH TIME I IMMEDIATELY PUT MY RIGHT FOOT SHOE TOE UNDER THE ACCELERATION AND PULLED THE PEDAL BACK INTO ITS NORMAL POSITION. I WAS CROSSING TWO LANES WHEN THIS INCIDENT OCCURRED. I THEN PLACED THE VEHICLE BACK IN DRIVE & VERY CAREFULLY DROVE HOME. I REPORTED THE INCIDENT TO MY DEALER FOX IMPORTS IN AUBURN NY.. \*TR

**Additional Summary:**

FROM NEWS ARTICLE - SYRACUSE.COM: North Syracuse man recalls wild ride after throttle stuck on his 2009 Toyota Camry

C-1709

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

Preston G. Prue believes he had an angel on his shoulder Dec. 10 when his 2009 silver Camry raced out of control on Interstate 81.

Seven weeks ago, Prue, 60, was driving home with his wife, Daryll, 59, from the Great Northern Mall to North Syracuse. On I-81, about a mile from the Taft Road exit, Prue put on his blinker and began easing the Camry from the far left lane to be ready to exit to the right.

That's when the gas pedal stuck, he said.

Prue estimates his car got up to 80 mph before he was able to control it. "I forgot all about the traffic," he said.

Prue called Fox Toyota, the dealership where he bought the car, right away to report the problem. A Toyota representative looked the car over, but didn't find a problem, according to documents supplied by Prue.

Prue said he also reported the problem to Toyota, but a representative there told him the acceleration problem probably came from faulty floor mats bunching up underneath the gas pedal.

"I said this is not the case. This is different," said Prue, a retired Syracuse police officer who in the course of his career has investigated his share of accidents.

Prue said Toyota has refused to take the car back and return his money. He said he's stuck with a \$31,000 car that he's afraid to drive, and he can't, in good conscience, sell it to anyone else.

"I'm telling you, they've got a throttle problem with the cars," he said."

**NHTSA Summary:**  
**Additional Summary:**  
"PRODUCTS LIABILITY - TOYOTA ACCELERATION - He has a Toyota Corolla. The first time he experienced a problem was in October. He came to a stop sign and instead of slowing down, it accelerated. He had 2 other episodes. He called the Toyota Dealership and on 12/11/2009 they inspected it. One day later, he is driving in normal traffic, and the car accelerated again. He almost went into oncoming traffic. The car is parked in his driveway and he is scared to drive it again."

DIAGNOSTIC DONE BY CONICELLI TOYOTA IN CONSHOHOCKEN, PA DID NOT REVEAL ANY DEFECTS OR PROBLEMS; MR. MOORE HAS RECEIPT FOR THIS TEST.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TL\*THE CONTACT OWNS A 1999 TOYOTA CAMRY. WHILE DRIVING TOWARD A RED LIGHT APPROXIMATELY 10 MPH, SHE PUT HER FOOT ON THE BRAKE PEDAL AND THE VEHICLE LUNGED FORWARD AND ACCELERATED. THE DRIVER PRESSED HER FOOT ON THE BRAKE PEDAL WITH MUCH FORCE IN ORDER TO STOP THE VEHICLE. THE PASSENGER THOUGHT THE DRIVER HAD ENGAGED THE ACCELERATED PEDAL SINCE THE VEHICLE BEGAN TO ACCELERATE; HOWEVER, SHE WAS ENGAGING THE BRAKE PEDAL. THE DEALER INSPECTED THE VEHICLE AND STATED THAT THERE WAS NOTHING THEY COULD DO SINCE THE VEHICLE WAS FUNCTIONING PROPERLY. THE FAILURE MILEAGE WAS 106,000. THE CURRENT MILEAGE WAS 109,890.

**NHTSA Summary:**  
**Additional Summary:**  
December 13, 2009. Coming into small town in Arkansas - with CC on, tapped brakes, to slow, it did. Turned into parking lot at 15 mph and coasted in foot on brake - trying to complete stop - ABS kicked on - heard clicking and moaning sound (familiar with that) going 3 to 5 mph when it happened. Pole in front of him at 3 feet. With foot on brake car lunged into the pole. Rear end was hopping tires spinning... slammed car into Park - engine was racing even after the vehicle in Park. Carpeted floor mats in place and hooked. Two witnesses came out of the store and saw. Had 41k on it never had a problem.

Drove it to Father's and called Toyota. Took to North Point Toyota (in North Little Rock). They said nothing wrong with the vehicle. Drove for about 100 miles.

**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** DURHAM, NC

**NHTSA Summary:**  
**Additional Summary:**  
"As I was parallel parking at my church, the engine suddenly revved loudly and the car accelerated without warning. Slamming into the back of a Jeep Grand Cherokee, combined with me jamming on the brakes-pedal and parking-helped stop my Camry. The car accelerated on its own. The engine continued roaring loudly even after the car was stopped and the gear was in park. There are several witnesses glad to share their testimony. The defect resulted in more than \$3,000 damage to my car plus repairs on the Jeep. I thank God that my Camry crashed into the Jeep rather than a family or the church building. I will absolutely never drive this car again."

**NHTSA ODI Number:** 10304201  
**Date of Incident:** 20091215  
**Vehicle:** 2007 TOYOTA TACOMA  
**Location of Incident:** FORT COLLINS, CO

**NHTSA Summary:**  
MOVING VERY SLOWLY DOWNHILL ON A SNOW-COVERED DRIVEWAY. DEPRESSED BRAKE PEDAL, BUT ABS FAILED TO ENGAGE. BRAKES LOCKED UP INSTANTLY, CAUSING AN APPROXIMATELY 200FT SLIDE, HITTING UTILITY POLE AND GUARD RAIL. ABOUT ONE WEEK LATER, BRAKES LOCKED AGAIN (ABS FAILED TO ENGAGE), BUT I WAS READY FOR IT AND IMMEDIATELY LET OFF AND REAPPLIED PRESSURE. THIS TIME ABS DID ENGAGE. I HAVE SINCE TESTED THE BRAKES ON SLICK SURFACES IN SAFE ZONES. ONLY THREE TIMES DID ABS FAIL, AND THE TWO TIMES THAT I LET OFF AND RE-APPLIED THE BRAKES, THE ABS ENGAGED AT THAT POINT IN TIME. EACH TIME THE ABS FAILED, IT WAS WHILE MOVING DOWNHILL. THE ISSUE FOR ME IS THAT I DO NOT KNOW HOW TO REACT WHEN BRAKING IN CRITICAL SITUATIONS: DO I PUMP THE BRAKES AS FOR W/O ABS, OR STEADILY HOLD BREAKS AS ONE WOULD WITH FUNCTIONING ABS. I TOOK THE VEHICLE (2007 TOYOTA TACOMA) TO DEALER, BUT THEY SAID BRAKES LOOKED OK.

C-1722

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I AM WRITING TODAY TO ALERT YOU TO A POTENTIAL ACCELERATOR PROBLEM WITH THE 2005 TOYOTA 4RUNNER SUV. IN MID-DECEMBER, MY HUSBAND AND I WERE DRIVING ON THE HIGHWAY WHEN THE CAR INEXPLICABLY ACCELERATED, GOING FROM APPROXIMATELY 40 MPH TO ABOUT 60 MPH WITHIN A MATTER OF SECONDS. MY HUSBAND, WHO HAS HAD PROFESSIONAL DRIVING INSTRUCTION, PUT THE CAR INTO NEUTRAL AND WAS ABLE TO SLOW THE CAR DOWN, AT WHICH POINT THE ACCELERATOR (WHICH WAS MOVING TOWARDS THE FLOOR WITHOUT A FOOT ON IT) POPPED BACK UP AND THE BRAKES BEGAN WORKING AGAIN. HOWEVER, WITHIN THIS SAME JOURNEY, THIS SAME ACCELERATOR PROGRAM OCCURED TWO ADDITIONAL TIMES. WE IMMEDIATELY TOOK THE SUV TO TOYOTA OF ALEXANDRIA IN VIRGINIA AND EXPLAINED WHAT HAPPENED. THEY NOTIFIED US THAT OUR CAR WAS NOT SUBJECT TO A RECALL FOR ACCELERATOR PROBLEMS BUT, BASED ON OUR CONCERNS, AGREED TO EXAMINE THE SUV. TO THEIR CREDIT, THEY DID CALL IN A CORPORATE INSPECTOR TO EXAMINE THE DISASSEMBLED DRIVE TRAIN WHO IN TURN DETERMINED THAT AN ACCUMULATION OF OIL IN THE DIFFERENTIALS CAUSED THE CAR'S COMPUTER TO MISREAD ACCELERATION AND DECELERATION INFORMATION. DESPITE THIS DIAGNOSIS -- AND SUBSEQUENT REPLACEMENT OF THE DRIVE TRAIN AND REAR DIFFERENTIALS -- TOYOTA MECHANICS WERE NEVER ABLE TO REPLICATE THE ACCELERATION PROBLEM THAT WE EXPERIENCED. AFTER TALKING TO SEVERAL TOYOTA REPRESENTATIVES, AS WELL AS A NUMBER OF INDEPENDENT MECHANICS, WE WERE ADVISED TO PURSUE ARBITRATION WITH TOYOTA AND ARE CURRENTLY ENTRENCHED IN THAT PROCESS. IN THE INTERIM, WE ARE USING THE CAR ONLY FOR LOCAL JOURNEYS OUR OF CONCERN THAT THIS ACCELERATOR PROBLEM COULD REOCCUR. I AM WRITING TODAY TO INFORM YOU OF THE PROBLEM SO THAT YOU HAVE A RECORD THAT TOYOTA'S ACCELERATOR PROBLEMS MAY EXTEND BEYOND THE CARS/SUVS INCLUDED IN THE RECENT RECALL.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10307058  
**Date of Incident:** 20091215  
**Vehicle:** 2005 TOYOTA PRIUS  
**Location of Incident:** CANASTOTA, NY

**NHTSA Summary:**  
ABOUT 2 YEARS AGO, ON ROUTE 840 IN UTICA, I FLOORED THE GAS PEDAL ON MY 2005 TOYOTA PRIUS TO PASS A CAR. THE PRIUS DOES NOT HAVE A LOT OF POWER, SO FLOORING IT WAS SOMETIMES NECESSARY TO PASS UPHILL. WHEN I TOOK MY FOOT OFF THE GAS PEDAL, THE CAR WAS STILL ACCELERATING. I TOUCHED THE BRAKES. NOTHING. FINALLY, I PUSHED DOWN HARD ON THE BRAKES AND GOT THE CAR TO THE SIDE OF THE ROAD AND TURNED IT OFF. I HAVE RUBBER MATS. I THOUGHT ONE OF THEM HAD GONE UNDER THE PEDAL. "CASE SOLVED" SO I THOUGHT. LAST DECEMBER, AGAIN PASSING A TRUCK UPHILL ON ROUTE 840, I FLOORED THE PRIUS GAS PEDAL. THE SAME THING HAPPENED! THIS TIME I KNEW IT WAS NOT THE MAT BECAUSE I HAD DRILLED HOLES IN IT AND ATTACHED IT TO THE MAT POSTS. IT WAS INCHES AWAY FROM THE GAS PEDAL. WHEN THIS HAPPENED, I PUSHED THE BRAKES DOWN HARD AND STRUGGLED TO THE SIDE OF THE ROAD RIGHT BEFORE THE LANES MERGED AND THE TRUCK WOULD HAVE CUT ME OFF (INTO A SWAMP). THE BRAKES, WITH A BURNING SMELL, FOUGHT THE RACING CAR. I FINALLY GOT IT TURNED OFF. WHEN I TURNED IT BACK ON, THE GAS WAS STILL RACING! I TURNED IT OFF AGAIN. AFTER WAITING, IT STARTED NORMALLY. IT HAS DONE IT EVERY TIME THE PEDAL WAS FLOORED(SELDOM). I WENT TO THE INTERNET AND FOUND THIS HAD BEEN A PROBLEM AND TOYOTA WAS PLANNING A PRIUS RECALL, WITH PARTS TO REPAIR AVAILABLE IN APRIL. I WAS VERY SCARED TO DRIVE THE CAR, BUT CAN'T AFFORD TO SELL IT (WRONG) OR BUY ANOTHER. SO I DECIDED TO WAIT FOR THE RECALL. I HAVE BEEN DRIVING ON PINS AND NEEDLES SINCE. AND NOW THERE IS

C-1723

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

NO RECALL FOR THE PRIUS GAS PEDAL! I'M GLAD FOR THE BRAKE RECALL BECAUSE MY PRIUS HAS DONE THAT ONCE, BUT FREAKED OUT ABOUT NO STICKING GAS PEDAL RECALL FOR THE PRIUS. I WENT TO THE DEALER TODAY FOR 115,000K SERVICE AND TOLD THEM ABOUT THIS. "TECHNICIAN CAN NOT REPLICATE PROBLEM". JUST LIKE SO MANY STORIES FROM OTHER TOYOTA OWNERS ON THE WEB. THIS WILL BE MANY A PRIUS DRIVER'S EPITAPH WITHOUT GOVERNMENT ACTION. PLEASE MAKE TOYOTA FIX THESE STICKING PRIUS ACCELERATORS

**Additional Summary:**

**NHTSA ODI Number:** 10312870  
**Date of Incident:** 20091215  
**Vehicle:** 2006 TOYOTA PRIUS  
**Location of Incident:** DENVER, CO

**NHTSA Summary:**  
MY 2006 PRIUS HAS ON AT LEAST 3 OCCASIONS HAS ACCELERATED INEXPLICABLY ON AT LEAST THREE SEPARATE OCCASIONS. THE FIRST TWO INCIDENTS OCCURED DURING MY FIRST YEAR OF OWNERSHIP AND WERE REPORTED TO THE DEALER. I WAS TOLD THERE WAS NO PROBLEM. THE MOST RECENT EVENT WAS IN DECEMBER 2009. I WAS DRIVING DOWN THE HIGHWAY WHEN THE CAR BEGAN ACCELERATING RAPIDLY. EVEN AFTER I REMOVED MY FOOT FROM THE GAS PEDAL, I WAS ABLE TO SLOW THE CAR DOWN AND PULL OVER SAFELY. PLEASE NOTE THAT AT THIS TIME, I HAD ALREADY REMOVED THE FLOOR MAT AS SUGGESTED BY TOYOTA. AGAIN, I WAS TOLD BY THE DEALER THAT NOTHING WAS WRONG WITH MY CAR, A RESPONSE THAT DID NOTHING TO REASSURE ME. I WAS TOLD IN A FOLLOW UP CALL TO THE DEALER THAT TOYOTA WOULD BE DOING NOTHING TO ASSIST WITH THIS PROBLEM.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TAKEN PLACE AT SPEEDS ABOVE 55 MPH AND AS SLOW AS 15 MPH. A CO-WORKER OF MY WIFE'S SISTER HAS A TOYOTA AND HAS DESCRIBED EXACTLY THE SAME THING HAPPENING WHILE SHE IS DRIVING HER CAR.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10320233  
**Date of Incident:** 20091215  
**Vehicle:** 2006 TOYOTA SIENNA  
**Location of Incident:** FOX POINT, WI

**NHTSA Summary:**

WHEN STARTING TO ACCELERATE FROM A STOP AT A LIGHT, MY TOYOTA SIENNA SUDDENLY BOLTED FORWARD AS IF A BOULDER HAD BEEN DROPPED ON THE ACCELERATOR. I BRAKED AS HARD AS I COULD, BUT WAS ONLY ABLE TO KEEP THE SPEED DOWN TO ABOUT 40-45 MPH. EVENTUALLY, IT EITHER IT LET UP ON ITS OWN, OR I SHIFTED INTO NEUTRAL AND SLOWED, I AM NOT SURE WHICH - IT HAPPENED SO FAST. I IMMEDIATELY GOT OUT OF MY CAR AND LOOKED TO SEE IF ANYTHING WAS ON THE ACCELERATOR, BUT THERE WAS NOTHING. I DO HAVE FLOOR MATS, BUT THEY ARE CUT TO AVOID THE PEDALS AND IN FACT WERE NOT CAUGHT ON THE PEDALS. THIS IS THE ONE AND ONLY TIME IT HAS HAPPENED. I REPORTED IT TO TOYOTA BUT THEY INFORMED ME THAT SIENNAS DO NOT HAVE THE PART THAT IS CAUSING THE SUDDEN ACCELERATION PROBLEM.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10325990  
**Date of Incident:** 20091215  
**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** VANCLEAVE, MS

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2006 TOYOTA TACOMA. WHILE THE CONTACT WAS DRIVING APPROXIMATELY 2 MPH IN REVERSE THE VEHICLE SURGED RESULTING IN A CRASH. THE POLICE APPEARED ON THE SCENE AND THERE WERE NO INJURIES REPORTED. PRIOR TO THE FAILURE THE VEHICLE HAD BEEN TAKEN TO AN AUTHORIZED DEALER FOR ROUTINE MAINTENANCE. THE DEALER STATED THAT THE FLOOR MATS WERE EXCHANGED AND THE VEHICLE WAS SAFE TO DRIVE. THE VEHICLE HAD NOT BEEN REPAIRED WHEN THE COMPLAINT WAS FILED. THE VIN WAS NOT AVAILABLE. THE FAILURE AND CURRENT MILEAGES WERE 70,000.

**Additional Summary:**

**Toyota ID Number:**

**Date of Incident:** 20091216  
**Vehicle:** 2008 TOYOTA HIGHLANDER HYBRID  
**Location of Incident:** WASHINGTON, DC

**NHTSA Summary:**

WHILE PULLING OUT OF A PARKING LOT ONTO A BUSY STREET I PRESSED THE ACCELERATOR HARD AT WHICH TIME IT BECAME STUCK. I TRIED BRAKING HARD BUT THE CAR CONTINUED TO ACCELERATE AT WHICH TIME I REMEMBERED HEARING ABOUT A RECALL INVOLVING FLOOR MATS. I YANKED THE FLOOR MAT BACK WHILE CONTINUING TO BRAKE AND SHORTLY THEREAFTER THE CAR STOPPED ACCELERATING. I WOULD ESTIMATE IT WAS STUCK FOR ABOUT 5 SECONDS, MAYBE A QUARTER MILE

C-1725

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

DISTANCE. AFTER RETURNING HOME AND MOVING THE FLOOR MAT AROUND I DO NOT SEE HOW IT COULD HAVE BEEN UP UNDER THE GAS PEDAL AND IF IT WAS HOW IT COULD HAVE INTERFERED WITH THE OPERATION OF THE GAS PEDAL. THE FLOOR MAT IS A VINYL/PLASTIC, RIGID, RELATIVELY THIN AND BOUGHT AFTERMARKET (NOT THE CARPET FLOOR MAT THAT CAME WITH THE CAR). I REMOVED THE FLOOR MAT ALTOGETHER. READING ABOUT THE LATEST RECALL PROMPTED ME TO FILE THIS REPORT EVEN THOUGH NO ACCIDENT WAS CAUSED NOR DAMAGE DONE TO THE VEHICLE.\*CV

**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** VAN NUYS, CA

**NHTSA Summary:**

I RECEIVED A LESS THAN REASSURING ASSESSMENT TODAY OF HOW MY '07 LEXUS ES 350 WAS FIXED AT KEYES LEXUS, VAN NUYS, CA, FOLLOWING A RECALL NOTICE. ALTHOUGH THE ACCELERATOR PEDAL HAD BEEN TRIMMED, AND SOUND MATERIAL WAS REMOVED FROM THE DRIVER-SIDE FLOOR MAT AREA, THE PRINCIPAL SUDDEN ACCELERATION PROBLEM REMAINED UNSOLVED, ACCORDING TO BILL HORVATH, LEXUS SERVICE REP. BACKGROUND: WHILE TRAVELING WEST ON THE 60 FREEWAY IN MID-DECEMBER MY CAR TOOK OFF LIKE A BAT OUT OF HELL AS I NEARED CHINO AIRPORT, LOCATED

C-1726

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

APPROXIMATELY 50 MILES FROM HEMET, WHERE I VISIT MY 95-YEAR OLD MOTHER EACH WEEK, THE CAR'S CRUISE CONTROL HAD BEEN ACTIVATED AND IN USE FOR ABOUT FIVE MINUTES. MY SPEED WAS SET AT 68 MPH WHEN SUDDENLY THE CAR SIMPLY TOOK OFF, ULTIMATELY REACHING NEARLY 100 MPH. AT THE TIME OF ACCELERATION MY RIGHT FOOT WAS NO WHERE NEAR THE GAS PEDAL OR BRAKE. I REMOVED THE ORIGINAL LEXUS CAR MATS LONG AGO. NEVERTHELESS, IT PROVED TO BE AN UNBELIEVABLE EXPERIENCE AND TERRIFYING RIDE. I SHUT OFF THE CRUISE CONTROL DEVICE, HIT THE BRAKE AS HARD AS A COULD, THREW THE AUTO-GEAR SHIFT INTO NEUTRAL AND PULLED OFF TO THE SIDE OF THE FREEWAY. I WASN'T HURT, BUT TERRIFIED BY THE EXPERIENCE. I WILL NOT LET MY WIFE OR DAUGHTER DRIVE THIS DEFECTIVE CAR--EVER! THE LEXUS TECHNICIANS WERE UNABLE TO DUPLICATE THE CRUISE-CONTROL INSTANT ACCELERATION PROBLEM, ACCORDING TO HORVATH. WHEN I PICKED UP THE CAR I TOLD HORVATH THAT I'M ACCEPTING IT UNDER PROTEST AND THAT THE DEALER'S SOLUTION AND FINDINGS TO MY VERY DANGEROUS INCIDENT WERE "INADEQUATE." FOR THE RECORD, THIS REPRESENTS A SINGLE ISOLATED EVENT. I NEVER HAD ANY OTHER ISSUES WITH THIS VEHICLE. HOWEVER, I NOW FULLY UNDERSTAND HOW EASY IT MIGHT BE TO GET KILLED IN ONE OF THESE SO-CALLED LUXURY CARS. WHAT PISSES ME OFF THE MOST IS THAT TOYOTA HAS KNOW ABOUT THIS SERIOUS SAFETY DEFECT FOR THE LAST NINE YEARS.

**Additional Summary:**

**Toyota ID Number:** 1004110012  
**NHTSA ODI Number:** 10296245  
**Date of Incident:** 20091216  
**Vehicle:** 2009 TOYOTA TACOMA  
**Location of Incident:** SAN FRANCISCO, CA

**NHTSA Summary:**

FIVE MONTHS OLD 2009 TOYOTA TACOMA PRERUNNER, V6 5-SPEED AUTOMATIC TRANSMISSION. HAD MADE SHORT TRIP FROM HOME AND WAS RETURNING. PROCEEDING DOWN SLIGHT GRADE ABOUT THREE BLOCKS FROM HOME MANUALLY DOWNSHIFTED FROM DRIVE TO 4TH, SEEING RED SIGNAL SEVERAL BLOCKS AHEAD DOWNSHIFTED AGAIN TO 3RD, THEN 2ND, SLOWING ENOUGH SO AS TO HAVE GREEN LIGHT AT INTERSECTION. MADE BRAKING RIGHT TURN AT INTERSECTION, AWARE FROM EXPERIENCE THAT I WOULD NOW HAVE RED LIGHT AT NEXT INTERSECTION AND WOULD HAVE TO STOP. AGAIN SLIGHT DOWNGRADE AFTER MAKING TURN. TRUCK REQUIRED MORE THAN NORMAL BRAKING TO SLOW PROPERLY AFTER TURN, FINALLY USED BOTH FEET TO APPLY MAXIMUM BRAKE PRESSURE. TRUCK STOPPED, BUT AFTER STOPPING ENGINE SURGED REPEATEDLY, CAUSING REAR WHEELS TO INTERMITTENTLY SPIN UNCONTROLLABLY ON DAMP PAVEMENT. ONLY FRONT WHEEL BRAKES WERE HOLDING TRUCK FROM CRASHING INTO ANOTHER VEHICLE. MANAGED TO SHIFT INTO PARK AND SHUT OFF ENGINE. WHEN RESTARTED, OPERATION WAS NORMAL. FLOOR MATS NOT INVOLVED! ENGINE WAS REPEATEDLY SURGING AND RETURNING TO NORMAL RPM. BOTH FEET WERE ON BRAKE PEDAL AND NOT ON ACCELERATOR. ODOMETER: 3850. CONDITIONS: NIGHT, HEADLIGHTS ON, HEATER BLOWER ON, A/C OFF, RADIO OFF. DUE TO SHORTNESS OF TRIP ENGINE WAS MOST LIKELY NOT FULLY WARMED UP TO NORMAL OPERATING TEMPERATURE. AFTER ARRIVING HOME TOOK TRUCK OUT FOR ANOTHER SHORT TRIP OVER SAME ROUTE. UNABLE TO REPLICATE SITUATION, AS RETIRED ELECTRONICS TECHNICIAN UNDERSTAND HOW DIFFICULT THIS TYPE OF INTERMITTENT ISSUE IS FOR TOYOTA TO REPLICATE OR CONFIRM, BUT IT IS HAPPENING, AND IT IS A MAJOR SAFETY ISSUE, NHTSA. AND IT IS A LOT MORE THAN "FLOOR MATS". FLOOR MATS MIGHT OCCASIONALLY CATCH AN ACCELERATOR PEDAL, BUT THEY DON'T MAKE AN ENGINE REPEATEDLY SURGE. BEEN DRIVING 50 YEARS... KNOW IT WHEN I SEE IT. \*TR

**Location of Incident:** TX

**NHTSA Summary:**  
The Houston-based Lanier Law Firm said that Anha Pham, 22, sustained back injuries, and significant lacerations in a crash allegedly caused by accelerator malfunction in her mother, Natalie Pham's, 2008 Toyota Camry SE. The law firm said the accident happened on Dec. 18, 2009 in the parking lot of Barton Creek Square Mall.

"When she was backing up the car, she released the gas pedal and pushed the brake, but the gas pedal would not return to normal," said Thai Pham, Anha's father who was translating his wife's Vietnamese during a press conference outside the Harris County courthouse Wednesday.

Anha crashed into another car. She suffered bruising on her face, chest and shoulder in addition to cuts on her leg.

**NHTSA Summary:**  
DRIVING MY 2009 TOYOTA COROLLA WESTBOUND AND WAS APPROACHING AN INTERSECTION WHERE THE LIGHT WAS RED. I SLOWED DOWN ON MY APPROACH TO THE TRAFFIC LIGHT AND APPLIED THE BRAKES TO STOP CAR FOR THE RED LIGHT. THE CAR SLOWED BUT WOULD NOT STOP. THE LIGHT WAS STILL RED AND IN THE INTERSECTION WAS A MAN MAKING A LEFT HAND TURN TO TRAVEL EASTBOUND IN HIS SUV. HE SAW ME COMING SPED UP HIS VEHICLE (ALSO GIVING ME THE FINGER) I SWERVED TO MY RIGHT TO AVOID AN ACCIDENT. I HAD DRIVEN THROUGH THE RED LIGHT BECAUSE THE CAR WOULD NOT STOP. I TOOK MY FOOT OFF THE BRAKE AND IMMEDIATELY THE CAR ACCELERATED WITHOUT ME TOUCHING THE GAS PEDAL. I APPLIED PRESSURE TO THE BRAKE AGAIN AND BROUGHT THE CAR BACK TO THE SPEED LIMIT. THIS INCIDENT OCCURRED SHORTLY AFTER TOYOTA MADE THE ANNOUNCEMENT ABOUT PROBLEMS WITH THEIR FLOOR MATS. I STOPPED THE CAR AND CHECKED MY FLOOR MAT AND IT WAS NOT IN THE WAY AT ALL OF THE ACCELERATOR PEDAL. \*TR

**Date of Incident:** 20091219  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** HUNTINGTON, WV

**NHTSA Summary:**  
OCTOBER - DECEMBER 2009 ON TWO (2) SEPERATE OCCASIONS, MY 2007 TOYOTA CAMRY ACCELERATED WITHOUT APPARENT CAUSE. THE SECOND INCIDENT HAPPENED AFTER I HAD BEEN SHOPPING AT THE HUNTINGTON MALL FOR CHRISTMAS. I WAS COMING UP TO A REDLIGHT BEHIND SEVERAL AUTOMOBILES WHEN THE CAR ACCELERATED. I VEERED TO THE RIGHT SIDE OF THE ROAD TO AVOID HITTING THE AUTOMOBILE IN FRONT OF ME AND BRAKED AS HARD AS I COULD. I ALSO PUT THE AUTOMOBILE IN PARK AS SOON AS I COULD. BEFORE THIS, I HAD AN INCIDENT OF SLIGHT ACCELERATION, BUT I DON'T RECALL EXACTLY WHEN OR WHERE JUST THAT I MENTIONED TO MY HUSBAND THAT I FELT THE CAR DIDN'T WANT TO STOP WHEN I APPLIED THE BRAKE. ON JANUARY 6, 2010, I TOOK THE CAMRY TO THE DEALERSHIP IN WHICH I PURCHASED IT FOR A ROUTINE OIL CHANGE AND REQUESTED THE SERVICE DEPARTMENT TO LOOK AT THE ACCELERATOR PEDAL. ON JANUARY 22, 2010, THE CAMRY HAD TO BE TOWED INTO THE DEALERSHIP DUE TO A BUSTED OIL TUBE (WHICH WAS LATER IDENTIFIED AS A RECALL) AND AGAIN, I ASKED THE REPAIR DEPARTMENT TO CHECK THE PEDAL. MY HUSBAND ACCOMPANIED ME TO PICK THE CAR UP LATER THAT AFTERNOON AND WHEN I ASKED IF THE PEDAL HAD BEEN CHECKED, THE SERVICE ADVISOR TOLD MY HUSBAND THAT THE PEDAL HAD BEEN CHECKED AND HE HAD DRIVEN THE CAR AND COULDN'T FIND ANY PROBLEMS. THE SERVICE ADVISOR RELATED TO US THAT "SOMETHING ABOUT A RECALL WAS ON THE NEWS ABOUT 4:00 A.M. THAT VERY MORNING". AFTER THE PUBLIC RECALL AND TWO LETTERS ADDRESSING THIS ISSUE WITH THE DEALERSHIP, I WAS FINALLY CONTACTED BY THE DEALERSHIP TO BRING MY AUTOMOBILE IN FOR RECALL REPAIRS. SINCE THAT TIME, I'VE TAKEN THE CAMRY IN FOR A STEERING WHEEL CONCERN, WHICH WARRANTED NO APPARENT CAUSE, AND RECENTLY EXPERIENCED ANOTHER INCIDENT WITH ACCELERATION. THE ACCELERATION WAS MORE OF A REVVING OF THE ENGINE RATHER THAN AN OUT OF CONTROL ACCELERATION. I WOULD LIKE OTHERS TO KNOW ABOUT THESE INCIDENCE AND HOPEFULLY AVOID INJURIES. THANK YOU, VANESSA BOZEMAN HUNTINGTON, WV 25704

**Location of Incident:** CORVALLIS, OR  
**NHTSA Summary:**  
I AM REPORTING 2 INSTANCES OF UNINTENDED THROTTLE ACCELERATION IN MY 2006 SOLARA. CIRCUMSTANCES IN BOTH CASES WERE SIMILAR. THE TWO CASES: (1) APPROXIMATELY NOVEMBER 1, 2009 -- I WAS DRIVING SLOWLY IN A PARKING LOT. I BRAKED TO MAKE A TURN WHEN THE ENGINE SUDDENLY ACCELERATED VIOLENTLY. STEPPING HARD ON THE BRAKE AND PULLING THE SHIFTER INTO N STOPPED THE ACCELERATION. THE CAR THEN OPERATED NORMALLY. (2) APPROXIMATELY DECEMBER 20, 2009 -- I WAS PULLING SLOWLY INTO A PARKING PLACE IN FRONT OF A POST OFFICE WHEN THE ENGINE SUDDENLY ACCELERATED VIOLENTLY. STEPPING HARD ON THE BRAKE AND PULLING THE SHIFTER INTO N STOPPED THE ACCELERATION. THE CAR THEN OPERATED NORMALLY. OBVIOUSLY I AM CONCERNED ABOUT THIS PROBLEM ESPECIALLY WITH THE PUBLICITY AND RECALLS BUT UNDERSTAND THAT MY MODEL IS NOT ON RECALL.

**Vehicle:** 2006 SCION XA  
**Location of Incident:** GALLATIN, TN

**NHTSA Summary:**

WAS DRIVING 2006 TOYOTA SCION XA TO WORK IN MORNING GOING AROUND CURB I HAVE DRIVEN FOR 8 YEARS. AFTER BRAKING TO TAKE CURB NO LONGER HAD CONTROL OF VEHICLE. DROVE LONG WAY ON CURVY ROAD AND COULD NOT GAIN CONTROL OF CAR. ENDED UP GOING OFF ROAD AT APPROX 40MPH HIT A TREE STUMP AND THEN FLIPPED VEHICLE. NO AIRBAGS DEPLOYED OR SEAT BELTS LOCKED UP. CALLED TOYOTA AND WAS TOLD THAT AIRBAGS ONLY GO OFF IF VEHICLE REACHES A CERTAIN RATE OF DECELERATION AT POINT OF IMPACT. THIS HAPPENED 2 WEEKS PRIOR TO NEWS OF ACCELERATION PROBLEMS. I HAD NO CLUE WHY I LOST CONTROL OF CAR AT CURB. EVERYONE AROUND ME SAID IT WAS PROBABLY BLACK ICE FROM FOG BUT MY SON WHO WAS RIGHT BEHIND ME DID NOT HIT ICE OR LOSE CONTROL. AFTER RESEARCHING THE WEB, I FIND HUNDREDS OF TOYOTA OWNERS WHOSE AIRBAGS DID NOT GO OFF AND THEY WERE ALL FED THE SAME LINE I WAS. DID OUR SENSORS NOT DETECT DECELERATION BECAUSE OF BAD ACCELERATION SENSORS? DID I LOSE CONTROL BECAUSE MY CAR DID NOT DECELERATE WHEN I PUT FOOT ON BRAKE AT CURB. I HAVE BEEN DRIVING FOR 35 YEARS AND HAVE NEVER LOST CONTROL OF MY CAR. I WAS LUCKY AND MY INJURIES WERE NOT LIFE THREATENING OR CRIPPLING; BUT I WOULD LIKE TO KNOW WHAT HAPPENED AND WHY I WAS NOT PROTECTED BY MY AIRBAGS WHEN MY CAR HIT A TREE DEAD ON. I DO HAVE PHOTOS FROM THIS ACCIDENT AND THIS VEHICLE IS STILL AVAILABLE AT INSURANCE TOW LOT FOR VIEWING AND TESTING. PLEASE CALL FOR DETAILS. DESIREE JENKINS 615-338-4629

**Date of Incident:** 20091222  
**Vehicle:** 2009 TOYOTA COROLLA  
**Location of Incident:** PACIFIC PALISADES, CA  
**NHTSA Summary:**  
PURCHASED A 2009 TOYOTA COROLLA ON JAN. 31, 2009. IMMEDIATELY NOTICED "UNWANTED ACCELERATION", THE CAR WANTED TO GO WHEN STOPPED UNLESS THE BRAKE WAS APPLIED HARD AND DID NOT SLOW DOWN IMMEDIATELY WHEN FOOT WAS TAKEN OFF THE GAS PEDAL. GAS PEDAL DID NOT ALWAYS COME ALL THE WAY UP WHEN FOOT TAKEN OFF. BUT WOULD POP UP IF BRAKES APPLIED HARD. CRUISE CONTROL DID NOT WORK PROPERLY. MENTIONED CONCERN SEVERAL TIMES TO TOYOTA SERVICE DEPT. THEY TOLD ME THAT WHAT I WAS DESCRIBING WAS NORMAL FOR THOSE CARS. THE CAR WAS IN AN ACCIDENT ON 12/22/09. HIT ANOTHER CAR FROM BEHIND. I THINK THAT THE "NOT SLOWING DOWN IMMEDIATELY WHEN FOOT TAKEN OFF GAS PEDAL" WAS A CONTRIBUTING FACTOR TO THE ACCIDENT. THERE WERE NO INJURIES BUT THE CAR WAS BADLY DAMAGED. TOYOTA SENT RECALL NOTICE BUT SAID VIN#S BEGINNING IN J NOT AFFECTED. OUR CAR BEGINS WITH J. RECENTLY SEND LETTERS TO TOYOTA AND WAITING FOR REPLY.

**Vehicle:** 2004 LEXUS IS300  
**Location of Incident:** CASTLE ROCK, CO

**NHTSA Summary:**  
ON THE MORNING OF DECEMBER 22, 2009, AT APPROXIMATELY 6:30 AM, ON THE NORTHBOUND ON RAMP TO I-25 AT CASTLE PINES NORTH, CASTLE ROCK, CO MY 2004 LEXUS IS 300 ACCELERATED OUT OF CONTROL. STOMPING THE BRAKES HARD DID NOT STOP THE ACCELERATION. THE ONLY THING GOING THROUGH MY MIND AT THE TIME BESIDES STOPPING THE CAR, WAS THE FAMILY OF FOUR IN CALIFORNIA THAT DIED IN A RENTED LEXUS THAT ACCELERATED OUT OF CONTROL. I WAS ABOUT AT THE END OF THE ON RAMP AND I KNEW I COULD NOT MERGE ONTO I-25. WHEN STANDING ON THE BRAKES STOPPED THE ACCELERATION, AND I WAS THEN ABLE TO GET THE CAR STOPPED. AFTER CALMING DOWN, I DROVE MY CAR INTO WORK (ABOUT 20 MILES) AND CALLED KUNI LEXUS OF LITTLETON, CO. KUNI LEXUS INFORMED ME AT THAT TIME I NEEDED TO REPORT THIS INCIDENT TO TOYOTA HEADQUARTERS BEFORE KUNI LEXUS COULD DO ANYTHING, SO I CALLED TOYOTA AND REPORTED THE INCIDENT, THEN CALLED KUNI LEXUS BACK, TOLD THEM WHAT HAPPENED AND ARRANGED TO HAVE MY CAR TOWED TO THE DEALERSHIP. KUNI LEXUS HAD MY CAR FOR A WEEK, AND DID NOT FIND ANYTHING WRONG WITH THE CAR. THEY DID NOTE THAT MY FLOOR MATS WERE NOT HOOKED INTO PLACE. THE FLOOR MATS WERE THE FIRST THING I CHECKED, AS I HAD HEARD THE FLOOR MAT THEORY. THE MATS WERE IN PLACE WHEN I CHECKED THEM, BEFORE I HAD MY CAR TOWED TO THE DEALERSHIP.

**Location of Incident:** HERMITAGE, TN

**NHTSA Summary:**  
I AM AN ENGINEER SO NOT COMPLAINING IN REACTION TO THE NEWS BUT I HAVE A 2007 CAMRY LE (4 CYLINDER) WHICH I BOUGHT BRAND NEW AND IN THE PAST 3 YEARS, IT HAS 'ACCELERATED' CONSIDERABLY SEVERAL TIMES WHENEVER I SWITCH OFF MY CRUISE CONTROL. I CAN COUNT ATLEAST 6 INSTANCES WHEN THIS HAS HAPPENED AND BRAKING FIXED THE ACCELERATION SO LUCKILY NO ACCIDENTS BUT ONLY CAUSED MY INCREASED HEART RATE. MY PERSONAL EXPERIENCE REALLY MAKES ME FEEL THAT THERE IS MORE GOING ON WITH TOYOTA THAN JUST THE BRAKE PEDAL. THATS WHY I HAVE NOT EVEN TAKEN IT IN YET TO GET THE 'FIX'. THIS SHOULD BE INVESTIGATED THOROUGHLY AND I AM SURE THERE ARE DEEPER ISSUES THAN WE CURRENTLY KNOW OF.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10306402  
**Date of Incident:** 20091223  
**Vehicle:** 2006 LEXUS ES300  
**Location of Incident:** MIAMI, FL

**NHTSA Summary:**  
ON 12/23/09 AT APPROXIMATELY 1:46PM, MY MOTHER LOST CONTROL OF HER 2006 LEXUS ES300 IN THE PARKING LOT OF A STORE IN MIAMI, FL. THE CAR WENT UP ON A RAISED GRASS BEHIND AND WAS STOPPED ONLY BECAUSE IT CAUGHT BETWEEN THE ARMS OF A LARGE METAL GATE. THE GATE REMOVED THE ENTIRE HOOD OF THE CAR AND SHATTERED THE WINDSHIELD. MIRACULOUSLY, MY MOTHER WAS NOT HURT AND NO OTHER CARS OR PERSONS WERE INVOLVED IN THE INCIDENT. MY MOTHER WAS TICKETED FOR "CARELESS" DRIVING, LOSS OF CONTROL. FROM THE MOMENT I ARRIVED ON THE SCENE, SHE DESCRIBED A FEELING OF NOT BEING IN CONTROL OF HER CAR - SHE SAID THAT IT WAS AS IF THE CAR WAS GOING WITHOUT HER! WE HAVE REPEATEDLY CHECKED WITH LEXUS, AND HAVE BEEN TOLD THAT THE ACCELERATOR PEDAL FOR HER MAKE, MODEL, YEAR IS NOT ONE OF THE ONES EFFECTED BY THE RECALL. HOWEVER, NOW THAT THE ELECTRONIC ISSUES ARE EMERGING IN THE PRESS - - WE CANNOT HELP BUT BELIEVE THAT HER ACCIDENT IS RELATED TO THE TOYOTA/LEXUS ACCELERATOR SYSTEM! ON MONDAY, 2/8/10, I HAVE MADE AN APPOINTMENT FOR HER TO BRING HER REPAIRED CAR (PICKING UP TODAY) TO LEXUS OF KENDALL. ON US 1 IN MIAMI TO BE INSPECTED BY A SERVICE MANAGER THERE. NONETHELESS, WE WANT TO REPORT THIS INCIDENT OFFICIALLY -- EVEN IF IT IS THE FIRST 2006 LEXUS ES300 INCIDENT TO BE REPORTED! WE DO NOT WANT THIS TO HAPPEN TO ANYONE ELSE!

**NHTSA ODI Number:** 10310512  
**Date of Incident:** 20091224  
**Vehicle:** 2006 TOYOTA RAV4  
**Location of Incident:** DULUTH, MN

**NHTSA Summary:**

VEHICLE: 2006 TOYOTA RAV 4. PROBLEM: STUCK ACCELERATOR. DATE OF INCIDENT: DECEMBER 24, 2009. MY WIFE WAS LEAVING WORK ON THE 24TH OF DECEMBER. OUR CAR WAS PARKED FACING UPHILL. AS SHE WAS LEAVING HER PARKING SPACE, SHE DEPRESSED THE ACCELERATOR SLIGHTLY AND THE CAR "TOOK OFF" ON ITS OWN. SHE ENDED UP HITTING A CAR ON THE OTHER SIDE OF THE ROAD, THEN GOING OVER TO THE OTHER SIDE, OVER A SIDEWALK, SNOW BANK AND THEN HITTING A BUILDING. I HAVE REPORTED THIS INCIDENT TO TOYOTA WHO WENT TO MY LOCAL DEALER TO CHECK IT OUT. THEY CLAIM THAT THEY COULD NOT FIND ANYTHING AND SENT A LETTER TO MY HOUSE STATING THAT FACT. THE WEATHER CONDITIONS THAT DAY WERE SLOPPY SNOW, AS MENTIONED, THE CAR WAS FACING UPHILL. SO THE SLIPPERY CONDITIONS ACTUALLY ACTED IN HER FAVOR. I WROTE UP A FULL REPORT WITH PHOTOS THAT I SENT TO BOTH TOYOTA AND STATE FARM. I WOULD BE HAPPY TO E-MAIL THIS REPORT TO YOU AS WELL. OUR RAV 4 HAD A LITTLE OVER 51,000 MILES ON IT WHEN THE ACCIDENT OCCURRED. IT IS A 4 CYLINDER, AUTOMATIC. \*TR

**Additional Summary:**

**NHTSA ODI Number:** 10316400  
**Date of Incident:** 20091224  
**Vehicle:** 2010 TOYOTA CAMRY  
**Location of Incident:** HERMITAGE, TN

**NHTSA Summary:**

THE DAY AFTER PURCHASING MY 2010 CAMRY, THE CAR SEEMED TO RIDE FUNNY. I FELT UNEASY BUT INITIALLY THOUGHT IT MAY BE THAT IT WAS MY FIRST COMPLETELY NEW CAR. THIS WENT ON FOR THE NEXT FEW WEEKS, I.E. THE CAR SEEMING TO JERK OR HEAVE, REGARDLESS OF THE SPEED. I WAS WORRIED THAT THERE WAS SOMETHING WRONG WITH THE ENGINE AND THEN THE LIGHTS ON THE AIRCONDITION/HEATING BOARD STOPPED WORKING SO I THOUGHT IT WAS AN ELECTRICAL PROBLEM INSTEAD. I

C-1750

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TOOK IT IN. THE MECHANIC EXPLAINED EVERYTHING AWAY. EXPLAINED THE ELECTRICAL PROBLEM, AND STATED THAT THE HEAVING FEELING I WAS SENSING WAS THAT THE CAR WAS COMPUTERIZED AND THAT IT TOOK TIME FOR THE ACCELERATOR TO CATCH UP WITH THE SIGNAL. THE COMPUTER WAS GIVING IT, OR SOMETHING LIKE THAT. HE RAN AN ENGINE CHECK AND EVERYTHING WAS FINE. ON MY SERVICE SHEET HE SIMPLY STATED THAT I HAD COMPLAINED ABOUT THE ACCELERATOR HESITATING (WHICH I DID NOT), BUT DID NOT DOCUMENT THAT I BROUGHT THE CAR IN COMPLAINING THAT IT HAD ELECTRICAL PROBLEMS. A WEEK LATER THERE WAS THE RECALL. WHEN I LATER CALLED ABOUT THE RECALL AND CONTINUED TO COMPLAIN ABOUT THE ACCELERATOR PROBLEM, THE SERVICEMAN (A DIFFERENT ONE) TOLD ME THAT I WOULD FEEL NO CHANGE IN THE WAY THE WAY THE CAR DROVE SO HE WOULD HAVE SOMEONE RIDE WITH ME TO TRY TO FIGURE OUT WHAT I WAS TALKING ABOUT. THE DAY BEFORE TAKING THE CAR IN FOR THE FIX, THE CAR SLIGHTLY ACCELERATED WHEN I WAS TRYING TO COME TO A STOP. AFTER THE FIX, A TOYOTA REPRESENTATIVE RODE WITH ME (I LET HIM DRIVE), BUT THE CAR DID APPEAR TO RIDE BETTER AFTER THE FIX. THE CAR DOES STILL FEEL BETTER THAN WHEN I FIRST BOUGHT IT BUT SEEMS TO BE GRADUALLY GETTING WORSE SINCE THE FIX. E.G. THE CAR OCCASIONALLY SLIGHTLY ACCELERATES WHEN I AM COMING TO A STOP.

**NHTSA Summary:**

ON CHRISTMAS DAY, DECEMBER 25, 2009, I WAS DRIVING OUR 2004 TOYOTA CAMRY ON THE 880-N FREEWAY IN OAKLAND, EXITED THE FREEWAY, AND WHEN I APPLIED THE BRAKES TO STOP AT THE FIRST INTERSECTION AFTER EXITING, THE CAR SUDDENLY ACCELERATED FORWARD. I WAS UNNERVED AS MY FOOT HIT THE BRAKES AND THE CAR REACTED BY JUMPING FORWARD. FORTUNATELY, MY WIFE AND INFANT CHILD WERE STRAPPED SAFELY WITH SEAT BELTS IN THE CAR AND NO ACCIDENT OCCURRED. THIS WAS NOT SUPPOSED TO HAPPEN. THE INCIDENT WAS ALSO NOT THE RESULT OF DRIVER ERROR - MY RIGHT FOOT HIT THE BRAKES. THE WEATHER AND ROAD CONDITIONS WERE GOOD. THE WEATHER WAS DRY AND PARTLY CLOUDY. THE ROADS WERE DRY. AFTER THE INCIDENT, I CONTACTED THE SAN BRUNO, CA BASED MELODY TOYOTA SERVICE DEPARTMENT AND A LOCAL INDEPENDENT MECHANIC. BOTH TOLD ME THAT THEY WOULD HAVE TO REPLICATE THE PROBLEM UNDER SIMILAR DRIVING CONDITIONS BEFORE THEY COULD DO ANYTHING. WHILE THE INCIDENT HAS NOT REPEATED ITSELF, I AM CONCERNED THAT THE PROBLEM COULD POP UP AT ANY TIME. I BELIEVE TOYOTA SHOULD, AT THEIR OWN EXPENSE, INSPECT AND REPAIR MY VEHICLE SO THE BRAKES FUNCTION AS INTENDED. I AM CONCERNED ABOUT THE SAFETY OF MY 2004 CAMRY VEHICLE AND BELIEVE OTHER 2004 TOYOTA CAMRY OWNERS HAVE HAD SIMILAR EXPERIENCE. AS OF TODAY, I BELIEVE TOYOTA HAS ONLY PARTIALLY ADDRESSED THE SUDDEN UNINTENDED ACCELERATION ISSUE AND I AM CALLING ON THE NHTSA TO INVESTIGATE THIS MATTER MORE THOROUGHLY. I WOULD LIKE TOYOTA TO INVESTIGATE THIS MATTER AND BELIEVE THAT GOVERNMENT LEGISLATORS AND REGULATORS OUGHT TO PROUD TOYOTA TO DO MORE. TOYOTA HAS STATED THAT IT DOES NOT BELIEVE ITS CURRENT RECALL SHOULD REACH BACK TO THE 2004 MODEL YEAR. I DISAGREE. I WOULD LIKE TOYOTA TO FIX THE DEFECT TO ENSURE THAT MY BRAKE SYSTEM FUNCTIONS PROPERLY. BEYOND SAFETY CONCERNS, I AM ALSO DISAPPOINTED THAT TOYOTA'S CAMRY TROUBLES HAVE CAUSED A SIGNIFICANT DECLINE IN THE VALUE OF MY CAR.

**NHTSA Summary:**  
CONSUMER STATES THAT 2005 TOYOTA CAMRY NEEDS TO BE ADDED THE TOYOTA RECALL. \*NJ THE CONSUMER STATED HE EXPERIENCED SUDDEN ACCELERATION ON 3 SEPARATE OCCASIONS. THE FIRST INCIDENT HAPPENED IN 2008. AS HE APPROACHED AN INTERSECTION WITHIN AN ENCLOSED PARKING LOT BUILDING, HE APPLIED THE BRAKES, BUT SUDDENLY THE VEHICLE SHOT FORWARD AT AN INCREDIBLE SPEED AND CRASHED INTO 3 PARKED CARS. THERE WERE NO INJURIES, BUT THE DAMAGE WAS SEVERE. THE OTHER TWO INCIDENTS HAPPENED ON CHRISTMAS DAY 2009. THE FIRST WAS AT A STREET INTERSECTION NEAR THE CONSUMER'S HOME WHERE HE NARROWLY MISSED A CAR. THE SECOND WAS WHEN THE VEHICLE DRASTICALLY ACCELERATED INTO HIS GARAGE HITTING A DESK AND PUTTING A HOLE IN THE WALL. THE DAMAGE WAS MINIMIZED BY THE USE OF THE PARKING GEAR. THE CONSUMER WAS ADVISED TO REMOVE THE MATS, BUT HE FELT AS THOUGH THE PROBLEM WAS WAY BEYOND THE MATS. \*JB

Floor mats ruled out as cause in fatal Southlake wreck, police say  
Posted Wednesday, Jan. 06, 2010  
BY BILL MILLER

wmiller@star-telegram.com  
Defective floor mats did not contribute to the Dec. 26 wreck in Southlake that killed four people who were conducting religious work in the area, a police spokesman said. They drowned when a 2008 Toyota Avalon crashed through a metal fence and then landed in a pond near Lonesome Dove Road and Burney Lane, police have said. Officers have not yet determined why the car suddenly sped out of control. Toyota last year recalled the Avalon and other models because of concerns about the gas pedal getting stuck on the floor mat, causing sudden acceleration. But Lt. Ben Brown, a Southlake police spokesman, said Wednesday that investigators have ruled out the floor mats because they were

C-1754

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

not inside the car.

The victims were Monty Hardy, 56, of Southlake, the driver; Hadassah Vance, 35, of Euless; Wendy Akion, 38, of Irving; and Sharon Ransom, 56, of Grapevine.

**Date of Incident:** 20091226  
**Vehicle:** 2004 LEXUS RX330  
**Location of Incident:** WALNUT CREEK, CA

**NHTSA Summary:**  
**Additional Summary:**  
From ABC 7 On Your Side News

Renata Jabuka of Walnut Creek remembers the day after Christmas for all the wrong reasons. "My physical reaction, from the top of my head to my feet, I was just shaking so hard," she said. "I could barely even touch the wheel." That is what she says happened after she made a right turn and began pulling forward into a parking space. That is when she says the throttle of her 2004 Lexus RX-330 clicked down on its own and thrust itself into the parked car ahead of her.

"Because the impact was so severe, it would bounce back and then hit, jerk forward again," she explained. "It was as though you were hitting something and the impact was so hard the car would kick back and hit again, and then kick back and hit again."

The impact knocked a 1997 Honda Civic onto the sidewalk. That car's owner saw only the aftermath of the accident.

Jabuka invited us along when Toyota engineers came to inspect her vehicle. The engineers installed a tech stream device which can tell whether the accelerator was depressed and whether the brake lights were on at the time of the accident. That can point investigators towards operator error or dysfunction in the car itself.

Our visit was short. Without explanation, the engineer ended his inspection. By phone Toyota told 7 On Your Side it does not conduct investigations in front of news crews and accused us of interfering.

The engineer has since completed his investigation, but has not released his findings.

Jabuka is certain her floor mats did not cause her accident, even though her RX-330 is not part of the current recall. "They were clamped down," she said. "There's little clamps on the floor of the car, sir, and there's little holes where the mat goes and mine were up and attached."

**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** NORWALK, CT

**NHTSA Summary:**  
MY FIANCE DRIVES A 2007 TOYOTA RAV4. THIS VEHICLE IS CURRENTLY NOT WITHIN THE SCOPE OF THE TOYOTA ACCELERATION PEDAL RECALL. IN DECEMBER, I WAS DRIVING HER CAR (SHE WAS IN THE PASSENGER SEAT), FROM MASSACHUSETTS BACK TO OUR HOME IN CONNECTICUT. AS I MERGED ONTO RT 128 IN MA, I HAD TO ACCELERATE QUICKLY TO GET ONTO THE HIGHWAY. AFTER SAFELY MERGING ONTO THE HIGHWAY, I LET OFF THE GAS PEDAL AS I ALWAYS DO, HOWEVER NOTICED THE PEDAL DID NOT RELEASE AND WAS STUCK DOWN TO THE FLOOR. MY FIRST REACTION WAS TO PUMP THE BRAKE, HOWEVER, THAT ONLY SLOWED US DOWN TEMPORARILY. I THEN TRIED KICKING AT THE GAS PEDAL TO SEE IF I COULD GET IT TO RELEASE, HOWEVER, THAT ALSO DID NOT WORK. I THEN TRIED PULLING THE GAS PEDAL UP WITH MY HAND AND IT WOULD NOT BUDGE. FINALLY, AFTER CONTINUING TO PUMP THE BRAKE TO SLOW DOWN, THE GAS PEDAL RELEASED ON ITS OWN. I WOULD ESTIMATE THAT IT WAS STUCK FOR 20 SECONDS. UNFORTUNATELY, I DID NOT REPORT THE INCIDENT RIGHT AWAY, HOWEVER, I CALLED TOYOTA THE DAY I FOUND OUT OF THEIR RECALL. THIS PAST WEEKEND, I BROUGHT THE VEHICLE IN FOR A COURTESY INSPECTION, HOWEVER, TOYOTA SERVICE TEAM SAID THERE WERE NO ISSUES. I HAVE CALLED THE TOYOTA HOTLINE MULTIPLE TIMES AND WAS ONLY ABLE TO GET THROUGH TO SOMEONE ONCE. I REPORTED THE INCIDENT AND THE TOYOTA REP ON THE PHONE SAID THEY WOULD REPORT THE INCIDENT UP THE CHAIN. HAVE NOT HEARD BACK FROM THEM. I CONTACTED THE BETTER BUSINESS BUREAU, HOWEVER, HAVE NOT MADE ANY PROGRESS THERE. MY FIANCE DRIVES THE CAR DAILY, BUT WE CAN'T TRUST THAT THIS WILL NEVER HAPPEN AGAIN. OUR ONLY OPTION IS TO TRADE-IN THE VEHICLE, AND WE MAY DO SO SOON, HOWEVER, THIS CAR SHOULD NOT BE RESOLD IN THE MARKET. I AM VERY DOUBTFUL THAT TOYOTA HAS SOLUTIONED THE 'REAL' ISSUE.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10300210  
**Date of Incident:** 20091228  
**Vehicle:** 2007 TOYOTA AVALON  
**Location of Incident:** PITTS TOWN, NJ

**NHTSA Summary:**  
I OWN A 2007 AVALON. IN THE PAST 6 MONTHS I HAVE EXPERIENCED 5 EVENTS WHERE THE CAR ACCELERATED ON ITS OWN PRIOR TO THE FINAL EVENTS LEADING UP TO THIS REPORT. SEVERAL TIMES I EXPERIENCED THE CAR ACCELERATING WITHOUT MY FOOT ON THE GAS PEDAL AS I DROVE THROUGH TOWN THE CAR WOULD GO BACK TO ITS CORRECT RPM'S AFTER DRIVING A FEW MILES OR AFTER THE CAR WAS STOPPED AND PUT INTO PARK. AFTER EXPERIENCING THE SUDDEN ACCELERATION THE THIRD TIME I TOOK MY VEHICLE TO BE CHECKED AT MY LOCAL AUTO SHOP. THEY COULD NOT FIND ANYTHING WRONG WITH THE VEHICLE. AFTER 2 MORE INCIDENTS I BROUGHT MY CAR TO A TOYOTA DEALERSHIP (11/11/09) TO BE CHECKED. AFTER KEEPING MY CAR FOR 2 DAYS THEY FOUND NO UNINTENDED ACCELERATION PROBLEMS AND CONFIRMED THAT THE FACTORY MATS ARE INSTALLED PROPERLY. THEN ON 12/28/09 I WAS DRIVING TO WORK ON A MAJOR HIGHWAY. THE CAR BEGAN TO ACCELERATE WITHOUT MY FOOT ON THE GAS PEDAL. AS I PUSHED ON THE BRAKE, THE CAR CONTINUED TO ACCELERATE. AT THAT TIME I WAS NOT ABLE TO STOP MY VEHICLE BY PRESSING HARD ON THE BRAKE. THE ONLY WAY I WAS ABLE TO SLOW THE CAR DOWN WAS TO PUT THE CAR INTO NEUTRAL. I TOOK THE NEXT EXIT WHICH WAS THE EXIT FOR THE TOYOTA DEALERSHIP. I CALLED THE DEALERSHIP AND TOLD THE SERVICE MANAGER TO MEET ME OUTSIDE BECAUSE I WAS EXPERIENCING ACCELERATION PROBLEMS. I DROVE APPROXIMATELY 5 MILES BY ALTERNATING FROM NEUTRAL TO DRIVE AND PRESSING VERY FIRMLY ON THE BRAKES. AS I PULLED INTO THE FRONT OF THE DEALERSHIP I PUT THE CAR INTO NEUTRAL AND EXITED THE CAR. WITH THE BRAKES SMOKING FROM THE EXCESSIVE BRAKING AND THE CAR'S RPM'S RACING THE MNGER ENTERED MY CAR. HE CONFIRMED THAT THE MATS WERE PROPERLY IN PLACE AND CONFIRMED THE RPM'S WERE VERY HIGH. THEY CONTACTED A TOYOTA TECH TO LOOK AT MY CAR, AFTER 1 1/2 WEEKS WITH MY CAR THEY WERE TOLD BY TOYOTA TO REPLACE THE THROTTLE BODY AND ACCELERATOR ASSEMBLY INCLUDING BOTH SENSORS. I NO LONGER FEEL SAFE DRIVING

C-1759

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ON MY SERVICE RECEIPT AS "NORMAL NOISE". ALSO REGARDING THE ACCIDENT A TOYOTA INSPECTOR FROM CORPORATE INSPECTED MY CAR BEFORE MY RECALL WAS FIXED AND DESPITE THE TWO RECALLS SAID THAT MY VEHICLE HAS NO PROBLEMS AND THE ACCIDENT HAD NOTHING TO DO WITH IT. I NOW DRIVE A 2010 TOYOTA COROLLA THAT SQUEALS AND SQUEAKS EVERY DAY AND MY INSURANCE COMPANY IS FIGHTING PROPERTY DAMAGE AND BODILY INJURY CLAIMS FROM THE DRIVER I STRUCK ON THE PASSENGER SIDE AND EVERYTHING APPEARS TO BE MY FAULT AND NOT TOYOTA. IM IN SUCH DISTRESS WITH TOYOTA I DONT KNOW WHAT MORE TO DO. I GAVE THEM CHANCE AFTER CHANCE TO HELP ME BUT ITS JUST GETTING WORSE. THIS IS MY FIRST NEW CAR AND ALSO MY FIRST ACCIDENT I EVER HAD. IM SCARED THAT I HAVE TO PAY 20,000 FOR THE NEXT FIVE YEARS FOR A DEFECTED CAR. PLEASE HELP

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THIS CAR AND I AM NOT CONVINCED THAT TOYOTA HAS FOUND THE ROOT CAUSE OF THIS PROBLEM.

Per email 12/29/09 - Had a couple of incidents four to five months ago - the car started accelerating on its own around 25 to 30 mph. Was able to slow the car with brakes then put into Neutral. Revving stopped after a few minutes. Dealer didn't find anything.

Yesterday (12/28/09) on highway - wouldn't stop this time. More pressure on brakes - kept accelerating (pumped brakes). Put in N - engine kept revving. Called the dealer to tell him he is on his way to see them and the car was revving uncontrollably. Drove the car to them by shifting from N to Drive with the engine at full throttle (dealer was only 2 mile away.). Asked that the dealer be ready to come out and see the car. He pulled into the dealer with car revving, brakes smoking. Dealer noted that the car was still revving - no floor mat interference. Dealer tried to physically move the pedal, no change, still revving. Shut car down. Kevin got the dealer to sign a work order detailing what he saw. Dealer called the Toyota Corp Rep (Totawva, ND) - They called Kevin back in an hour and said that the Toyota said they would pay for the part (\$1700 part), labor and rental car. As of 11:00 am 12 / 29 Kevin didn't know what the "part" is that they are going to replace.

SK talked to owner on 1/6/10, vehicle is at dealer still. Toyota is paying for the repairs and should have the car back to him on 1/7/10. Owner will get back to SRS with details and documents.

Hi Kevin,

Thank you for speaking with me today about your Avalon and the incident you experienced. I'm glad you're OK. Can you confirm you have received this email please?

My contact details are below should you need to reach me, anytime.

Please consider filing a report at our website, which is www.safercar.gov. The link is in the right most column, it says "FILE A COMPLAINT." You will need your VIN number if you have it, otherwise I can add it later. You should include as much detail and content as possible.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

You mentioned you had some other repair orders and a signed document from the dealership. I'd like to get copies of those please, if you can email or fax them to me. I will probably have some follow-up questions to ask so I will contact you at that time. I may want you to speak with some of my other technical colleagues also, who I've copied on this email, if that's OK. Also we may want to look at the vehicle, which you indicated you were willing to let us do, so I'll let you know about that too.

Thanks again for speaking with me,

Scott

**NHTSA Summary:**

TWICE LAST YEAR THE CAR JUST TOOK OFF ACCELERATING ON ITS OWN AND WHEN I TRIED TO USE THE BRAKE TO STOP THE CAR IT JUST KEPT GOING. THE FIRST TIME I COULD NOT CONTROL THE CAR BY USING THE BRAKES AND IT FINALLY STOPPED AFTER IT WENT DOWN THE STREET A WAYS AND OVER A CURB. THE CAR HAD BEEN PARKED AND I HAD JUST STARTED UP THE CAR PUTTING MY FOOT ON THE GAS PEDAL WHEN THE CAR WENT OUT OF CONTROL. THE SECOND TIME I HAD ENTERED A PARKING GARAGE, STOPPED TO TAKE A TICKET FROM A MACHINE AND WHEN I APPLIED THE GAS IT TOOK OFF. I APPLIED THE BRAKE AND TRIED TO STEER THE CAR OUT OF DANGER. IT FINALLY HIT A CEMENT BLOCK, BOUNCING BACK GOING FORWARD AGAIN BEFORE IT STOPPED. BOTH TIMES I TOOK IT TO THE TOYOTA DEALER AND THEY CHECKED IT OUT AND COULD NOT FIND ANYTHING WRONG. THE SECOND TIME IN DECEMBER 2009 THEY TOLD ME OF THE PROBLEM REGARDING THE GAS PEDAL AND THE CARPET, WHICH THEY SAID WAS OK ON MY CAR AND TOLD ME IF IT HAPPENED AGAIN TO PUT THE CAR IN NEUTRAL AND THE WHEELS WOULD STOP TURNING. THEY ALSO SAID THEY WERE WORKING ON A RECALL BUT THAT MY CAR WOULD NOT BE A PART OF IT AS THE PROBLEM DID NOT EXIST UNTIL 2005 ON CAMRYS.

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** BLOOMINGTON, CA

**NHTSA Summary:**

2007 TOYOTA CAMRY, FROM TIME WE PURCHASED CAR IT WOULD ACCELERATE TO HIGH RATE OF SPEED WHEN TRYING TO SPEED UP, IE; GETTING ON FREEWAY, PASSING AND MOST ESPECIALLY WHEN CRUISE CONTROL WAS IN USE, (SAME AS STEVE WOSNIECK, APPLE COMPUTER IS REPORTING). I ADDRESSED THIS WITH DEALER ALMOST EVERY TIME I HAD CAR SERVICED, THEY SAID IT WAS DUE TO COMPUTER. SAID COMPUTER TAKES 30 SEC. OR SO TO CATCH UP AND THAT CAUSED THE "LURCH" OR INCREASED SPEED. ON RECENT TRIP, CAR WENT AS FAST AS 85MPH (FROM 60) WHEN I FINALLY APPLIED BRAKE AND TURNED OFF CRUISE CONTROL. THERE WAS NO FLOOR MAT IN CAR, NO PROBLEM WITH PEDAL. ALSO HAD PROBLEM WITH CRUISE CONTROL. WOULD NOT HOLD SPEED ON DOWN-HILL DRIVE. DEALER SAID IT WAS NOT DESIGNED TO WORK ON DOWN HILL. THIS HAPPENED ON EVEN MINOR DOWN GRADES, WOULD JUST TAKE OFF! ON 1/27/10 I WENT TO DEALER AND PURCHASED WHAT THEY SAID WAS A "SAFE" NO ISSUE 2010 CAMRY. THEY SAID THIS ONE HAD THE SAFE "PEDAL". NOW I AM HEARING ISSUES THAT IT IS WITH THE COMPUTER! I FEEL SKUNKED! I HAD MY CAR ALMOST PAID OFF AND NOW AM BACK IN DEBT FOR ANOTHER 5 YEARS! NOT HAPPY. THIS PROBLEM WAS ON-GOING FROM THE TIME WE BOUGHT THE 2007, LAST INCIDENT WAS DATE BELOW ON WAY HOME FROM VEGAS. I DO FEEL LUCKY AND THANKFUL THAT SO FAR I AM ALIVE TO REPORT THIS!

**Date of Incident:** 20091229  
**Vehicle:** 2005 TOYOTA PRIUS  
**Location of Incident:** GREENFIELD, WI

**NHTSA Summary:**

WE HAVE A 2005 TOYOTA PRIUS THAT WAS INVOLVED IN AN ACCIDENT AS A RESULT OF THE CAR TAKING OFF ON ITS OWN AND THE BRAKES NOT WORKING. THE PRIUS ONLY STOPPED WHEN IT HIT ANOTHER CAR AND THEN WE WERE UNABLE TO GET THE CAR TURNED OFF. THIS WAS NOT DUE TO THE FLOOR MAT RECALL. THE CAR WAS IN PARK AND TOOK OFF. WOULD NOT STOP EVEN WITH BOTH FEET ON THE BRAKES. IT STOPPED ONLY UPON IMPACT. LITERALLY WAS SECONDS AWAY FROM PINNING A PERSON IN BETWEEN THE TWO VEHICLES. THIS COULD HAVE LED TO A DEATH OR SERIOUS INJURY. SINCE THEN THE CAR WAS REPAIRED BUT TOYOTA ENGINEERS TEST DROVE IT FOR ABOUT 10 MILES AND OF COURSE IT DIDNT HAPPEN TO THEM SO THEY INDICATED THERE WAS NO PROBLEM. WE HAD 51,000 MILES ON THE CAR BEFORE THIS HAPPENED. CURRENTLY THE CAR SITS IN THE DRIVEWAY NOT BEING USED BECAUSE OF THE DEFECT. THIS MODEL IS NOT PART OF THE RECALL YET BUT OBVIOUSLY IS DEFECTIVE. WE HAVE TWO ADDITIONAL 2007 PRIUS MODELS IN THE FAMILY THAT ARE OF CONCERN. THIS IS OF MAJOR CONCERN AS NOTHING IS BEING DONE TO CORRECT OR ADDRESS THESE MODELS, ONLY THE NEWER PRIUS MODELS. WE SEE TOYOTA AS IGNORING THE CONCERNS ON THIS MODEL. IT IS A HUGE SAFETY HAZARD AS WHEN YOU LOOK AROUND ON THE ROADS, MANY OF THESE VEHICLES ARE STILL IN USE.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

2009 TOYOTA COROLLA WITH IDLE CONTROL ISSUES INCLUDING SLOW TO RETURN TO IDLE ON OCCASION. VEHICLE HAS HAD BRAKE VACUUM RECALL COMPLETED AND JUST TODAY THE GAS PEDAL REPAIR. PROBLEM STILL EXISTS. I FEEL IT IS UP IN THE FUEL CONTROL SYSTEMS AND HAVE TOLD THE DEALER THIS EACH TIME STARTING BACK ON 12/30/09. TOYOTA CORPORATE HAS GIVEN ME A CASE NUMBER BUT THE PERSON HANDLING THE CASE HAS NEVER CALLED AND IS NEVER AVAILABLE. COLD ENGINE ALWAYS HAS HIGH IDLE UP UNTIL FULL OPERATING TEMPERATURE. IT FLUCTUATES FREQUENTLY. ONCE FULL OPERATING TEMPERATURE IS REACHED IT THEN GOES TO A NORMAL IDLE BUT THEN FREQUENTLY STUMBLES AND DROPS BY 200 RPM. ON A FEW TIMES DURING EACH DRIVE OF 45 MINUTES OR MORE IT IS NOTICEABLE THAT THE RPM'S ARE SLOW TO RETURN TO IDLE AND VEHICLE KEEPS SPEED WITHOUT TOUCHING THE GAS. \*TR

**Vehicle:** 2005 TOYOTA HIGHLANDER

**Location of Incident:** DRUMS, PA

**NHTSA Summary:**

I OWN A 2005 TOYOTA HIGHLANDER. I WENT TO A FRIEND'S HOUSE AND PARKED VEHICLE IN FRONT OF THE HOUSE IN THE DRIVEWAY BY PLACING THE GEAR SHIFT IN THE PARK POSITION. I LEFT THE VEHICLE IDLEING WHILE I WENT INTO MY FRIEND'S HOUSE TO GET A GROCERY LIST. I WENT IN AND OUT OF THE HOUSE ON 2 DIFFERENT OCCASIONS OVER A PERIOD OF ABOUT 10-15 MINUTES TO RETRIEVE ITEMS FOR MY FRIEND THAT WERE OUTSIDE. ON BOTH OCCASSIONS MY VEHICLE WAS IN THE DRIVEWAY IDLEING. WHILE I WAS BACK INSIDE RETRIEVING THE GROCERY LIST MY FRIEND AND I OBSERVED MY VEHICLE MOVING THROUGH HER BACK YARD AND PROCEEDED INTO THE WOODS BEHIND HER HOUSE WHERE IT CAME TO A STOP AFTER HITTING A TREE. THIS VEHICLE SOMEHOW TOOK ITSELF OUT OF THE PARK POSITION AND INTO DRIVE!!!! I REPORTED THIS TO MY TOYOTA DEALER AND THE INSURANCE COMPANY. THE TOYOTA DEALER AND THE REGIONAL TOYOTA MANAGER SAID THERE WAS NO WAY THIS COULD HAVE HAPPENED AND THAT IT WAS NOT THE SAME ISSUE BEING INVESTIGATED (GAS PEDAL ISSUE). I WENT AHEAD AND HAD THE CAR REPAIRED AND THE INSURANCE COMPANY PAID FOR IT (EXCEPT FOR MY \$500.00 DEDUCTIBLE) WITH NO INVESTIGATION OR QUESTIONS. I PICKED THE CAR UP TODAY AND NOW I AM HEARING ON THE NEWS THAT MANY OF THE SO CALLED GAS PEDAL INCIDENTS HAVE NOT BEEN EXPLAINED AND THAT IT IS POSSIBLE THAT MANY OF THE PREVIOUSLY REPORTED INCIDENTS CAN ONLY BE EXPLAINED BY A FAULTY COMPUTER. RIGHT AFTER THE ACCIDENT I ASKED THE TOYOTA DEALER/REGIONAL MANAGER SPECIFICALLY IF MY INCIDENT COULD HAVE BEEN CAUSED BY A COMPUTER MALFUNCTION. THE ANSWER WAS NO!

**Location of Incident:** GOOSE CREEK, SC

**NHTSA Summary:**

SINCE THE PURCHASE OF OUR 2007 TOYOTA HIGHLANDER HYBRID WE HAVE HAD BRAKE DECELERATION ISSUES. THE BRAKES SEEM TO OCCASIONALLY SKIP, THEN LURCH FORWARD AS SOON AS THE BRAKING SYSTEM INITIATES. WHILE I HAVE NOT GOTTEN INTO ANY ACCIDENT, I HAVE BECOME ACCUSTOMED TO BRAKING EARLY IN PREPARATION FOR STOPPING. IT HAPPENS AT LOW SPEEDS (BETWEEN 5-45MPH) ALTHOUGH THAT IS WHEN I'M MOST LIKELY TO COME TO A FULL STOP. NOT SURE WHAT WOULD HAPPEN AT FULL HIGHWAY SPEED. CALLED THE DEALERSHIP AND WAS TOLD THAT THIS HAS NOT BEEN REPORTED TO THEM, THOUGH THEY WOULD TAKE A LOOK. AFTER READING POSTS OF IDENTICAL BRAKING ISSUES, AND WITH THE ACCELERATION ISSUES IN CONSIDERATION I FEEL IT BEST TO FILE A COMPLAINT FOR THE SAFETY OF MY FAMILY. \*TR

**Vehicle:** 2006 TOYOTA MATRIX  
**Location of Incident:** TUSCON, AZ

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2006 TOYOTA MATRIX HATCH BACK. HE STATED THAT WHILE APPROACHING A STOP LIGHT AT SPEEDS OF LESS THAN 20 MPH, HE DEPRESSED THE ACCELERATOR PEDAL BUT THE VEHICLE WOULD NOT STOP OR SLOW DOWN. THE CONTACT SHIFTED THE VEHICLE INTO A LOWER GEAR AND THEN TO NEUTRAL. HE THEN SHUT OFF THE IGNITION AND COASTED TO A STOP. THE DEALER WAS CONTACTED AND PERFORMED A SAFETY TEST ON THE VEHICLE. THE FAILURE COULD NOT BE DUPLICATED. NO REPAIRS WERE MADE TO THE VEHICLE TO DATE. THE FAILURE AND CURRENT MILEAGES WERE UNDER 20,000.

**Vehicle:** 2004 TOYOTA CAMRY  
**Location of Incident:** LAKE OSWEGO, OR

**NHTSA Summary:**

MY 2004 TOYOTA CAMRY XLE (6 CYLINDER) HAS A STICKING GAS PEDAL PROBLEM. WHEN ACCELERATING FROM A STATIONARY POSITION, THE GAS PEDAL IS DIFFICULT TO DEPRESS FROM THE "UP" POSITION. IT TAKES A FAIR AMOUNT OF PRESSURE WHEN PRESSING DOWN ON THE GAS PEDAL TO GET IT TO RELEASE FROM THE STUCK POSITION AND ALLOW THE PEDAL TO FURTHER DEPRESS FOR PROPER ACCELERATION. WHEN THE GAS PEDAL FINALLY DOES RELEASE AFTER APPLYING PRESSURE, THE MOTOR HAS REVVED UP CAUSING THE CAR TO, IN ESSENCE, POP A WHEELIE, SPIN ITS WHEELS, AND ACCELERATES IN A POTENTIALLY DANGEROUS MANNER. THIS TOYOTA MODEL HAS NOT YET BEEN INCLUDED IN THE CURRENT RECALL, BUT I AM CONCERNED THAT IT SHOULD BE RECALLED SINCE IT IS EXHIBITING SIMILAR SYMPTOMS AS THOSE INCLUDED IN THE RECALL. I AM BECOMING INCREASINGLY CONCERNED THAT THIS CAR POSES A RISK PROFILE AND SHOULD NOT BE DRIVEN WITHOUT BEING FIXED. \*TR

**Date of Incident:** 20100101  
**Vehicle:** 2005 TOYOTA AVALON  
**Location of Incident:** NEWINGTON, CT

**NHTSA Summary:**

I HAVE OWNED AND DRIVEN A 2005 TOYOTA AVALON SINCE MAY 20, 2005. NOW IT HAS ABOUT 35,000 MILES ON IT. FROM TIME TO TIME, ESTIMATED AT SEVEN OR SO INSTANCES, I NOTED A DRAMATIC INCREASE IN ENGINE RPM WHEN APPLYING THE BRAKES. THIS HAPPENED ONLY DURING BRAKE APPLICATION, NOT AT OTHER TIMES. IN EACH INSTANCE OF UNEXPECTED ACCELERATION, I WAS ABLE TO STOP THE CAR WITH A FIRM, STEADY APPLICATION OF PRESSURE ON THE BRAKE PEDAL. AFTER THE FIRST RECALL FOR THE FLOOR MAT, I REMOVED THE MAT ON THE DRIVER'S SIDE. I WAS SKEPTICAL THAT THE MAT WAS A PROBLEM BECAUSE IT IS A HEAVY, OEM, FITTED MAT WHICH WAS ANCHORED WITH TWO FACTORY INSTALLED HOOKS ON THE FLOOR. THEY ENGAGE THE MAT THROUGH EYELETS NEAR THE MAT'S TRAILING EDGE. WITH THE MAT REMOVED, I EXPERIENCED ANOTHER SUDDEN ACCELERATION INCIDENT IN THE GARAGE OF HARTFORD HOSPITAL. IT WAS CLOSE TO A DISASTER BUT THE APPLICATION OF STEADY, STEADY PRESSURE ON THE BRAKE PEDAL STOPPED THE CAR. I CONSIDERED THE POSSIBILITY THAT THE BRAKE AND ACCELERATOR PEDALS ARE CONFIGURED OR POSITIONED SO THAT BOTH ARE ACTIVATED AT THE SAME TIME. ON CLOSE EXAMINATION I CONCLUDED THAT WAS UNLIKELY. I NOW CONCLUDE THESE FAILURES HAVE BEEN CAUSED BY A DEFECT IN THE ELECTRONIC SYSTEM IN THE CAR. I HAVE REPORTED THIS TO CTDOT. A REPRESENTATIVE(?) PHONED TO REFER MY CORRESPONDENCE TO FEDERAL DOT. \*TR

**Vehicle:** 2006 TOYOTA HIGHLANDER  
**Location of Incident:** GRANT, MN

**NHTSA Summary:**

WE HAVE A 2006 TOYOTA HIGHLANDER HYBRID. I SHOULD START OFF BY STATING THAT WE LOVE THIS VEHICLE. WE HAVE, HOWEVER, NOTICED A "GLITCH" THAT MIGHT BE RELATED TO THE SAME PROBLEM THAT THE PRIUS HAS AND THOUGHT WE SHOULD REPORT IT. OCCASIONALLY, WHEN WE STEP ON THE BRAKE, AND AFTER THE CAR IS SLOWING DOWN, THE ENGINE WILL SURGE FORWARD AS IF IT WANTS TO ACCELERATE AGAIN. PUMPING THE BRAKES WORKS AND THE CAR STOPS. I DON'T THINK THIS IS A PEDAL PROBLEM BUT A COMPUTER PROBLEM. SINCE WE NEVER TAILGATE AND WE ALWAYS ALLOW FOR DISTANCE TO STOP, THIS HAS NEVER POSED A PROBLEM FOR US BUT IT IS AN ISSUE WORTH NOTING.

**NHTSA ODI Number:** 10306660  
**Date of Incident:** 20100101  
**Vehicle:** 2010 TOYOTA PRIUS  
**Location of Incident:** GRENADA, MS

**NHTSA Summary:**

AROUND THE FIRST OF JANUARY, 2010, WE HAD TURNED INTO THE DRIVE OF OUR HOME IN GRENADA, MS. AS THE DRIVE CURVES IN FRONT OF THE HOUSE IT IS BORDERED BY A BRICK RETAINING WALL. WE WERE GOING SLOWLY AND INTENDED TO APPLY THE BRAKE. INSTEAD OF SLOWING THE 2010 PRIUS SPEED UP AND STRUCK THE WALL. THE RESULTING DAMAGE WAS BETWEEN \$4500 AND \$5000. I ASSUMED WE HAD MISTAKENLY USED THE ACCELERATOR INSTEAD OF THE BRAKE. I STILL BELIEVE THAT IS EXACTLY WHAT OCCURED. HOWEVER, WITH THE ISSUES AROUND THE PRIUS, I WANTED TO REPORT THIS INCIDENT. THERE WAS NO INJURY AND THE CAR HAS BEEN REPAIRED WITH INSURANCE PROCEEDS. I'M HAPPY TO PROVIDE MORE INFORMATION IF YOU LIKE.

**NHTSA Summary:**

I OWN A 2009 TOYOTA HIGHLANDER HYBRID. IT HAS HAD THREE INSTANCES OF UNINTENDED LOW SPEED ACCELERATION SINCE I PURCHASED IT IN JUNE 2009. THE FIRST TIME IT HAPPENED, IT WAS SO UNEXPECTED AND UNCONVENTIONAL THAT I THOUGHT IT MUST HAVE BEEN A MISTAKE IN MY PERCEPTION. THE SECOND TIME IT HAPPENED I WAS MORE AWARE BECAUSE IT HAD HAPPENED ONCE BEFORE. AND THE THIRD TIME EVEN MORE SO. NOW I AM ALERT FOR THE EVENT AND WILL TRY TO RECORD IT AS ACCURATELY AS POSSIBLE IF IT HAPPENS AGAIN. AS BEST I CAN DESCRIBE IT, I WAS SLOWING DOWN, ALMOST TO A STOP. IT IS AT THE POINT WHERE

C-1774

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

YOU HAVE SLOWED THE CAR BY BRAKING, THEN TAKE YOUR FOOT OFF THE BRAKE OR LIGHTEN THE BRAKING PRIOR TO THE FINAL BRAKING WHICH BRINGS YOU TO A FULL STOP WITHOUT A SMALL JOLT. I PROBABLY WAS TRAVELLING BETWEEN 5 AND 10 MILES PER HOUR. I HAD MY FOOT OFF THE GAS AND BELIEVE PROBABLY OFF THE BRAKE AS WELL. ALL OF A SUDDEN THE CAR ACCELERATED. I DEPRESSED THE BRAKE AND THE CAR STOPPED NORMALLY. I HAVE NOT WORKED ON CARS IN YEARS, BUT DID EXTENSIVELY WHEN I WAS A TEENAGER. SO I THINK OF MY SENSES AS REASONABLY ATTENTIVE TO THE SOUNDS AND MOTIONS OF VEHICLES WHICH INDICATE THAT SOMETHING IS AMISS. HOPE THIS HELPS.

**NHTSA Summary:**

ENGINE STALLED WHILE DRIVING 15 MPH AND WAS TOWED TO TOYOTA AND THEY COULD FIND NOTHING WRONG WITH CAR. \*TR

**Additional Summary:**

1995 Camry complaint (TOYSUA2585) - UNASSISTED AND UNSAFE ACCELERATION ON FOUR OCCASIONS WITH MY 1995 TOYOTA CAMRY AND A COMPLETE ENGINE STALL-OUT WHILE DOING 15 MPH WITH MY 2009 TOYOTA CAMRY. (ODI 10313767)

please be advised that my wife and I experienced the "acceleration problem" with our 1995 Camry on four occasions, the car was towed twice and toyota was never able to find the problem. we then traded up to a 2009 Camry LE with only 7000 miles. After three months, while driving at 15 MPH, the engine stalled out and again, the car was towed to Toyota and they found no cause for the problem. Had this incident occurred on a high speed roadway, my wife and I could very easily have become carnage. We then realized that no Toyotas were safe and bought a different brand after losing \$8000 on the 2009 Camry after only 5 months and 4000 miles. I feel compelled to let the public know that Toyota has been lying for a long time and that the acceleration problem is indeed ELECTRICAL and not mechanical and the problem stems from at least 1995.

**Date of Incident:** 20100101  
**Vehicle:** 2008 TOYOTA 4RUNNER  
**Location of Incident:** MCCALLA, AL

**NHTSA Summary:**

I WAS IN THE SMOKEY MOUNTAINS IN DEC 2009-JAN 2010 WHERE THE TEMPERATURES WERE VERY LOW AND THE VEHICLE WAS OUTDOORS. TEMPS WERE MID 20S IN THE DAY TIME AND MID TEENS AT NIGHT. NO ICING WAS AN ISSUE. I WAS DRIVING MY 2008 TOYOTA 4-RUNNER INTO A PARKING SPACE SLOWLY AROUND 2 PM GETTING READY TO APPLY THE BRAKES. BEFORE I COULD DO SO THE VEHICLE TOOK OFF. I IMMEDIATELY SLAMMED ON THE THE BRAKES AND THE VEHICLE DID STOP, HOWEVER IT HAD TRAVELED APPROX 10 FT BEFORE I COULD DO SO AND IT SLAMMED INTO A TREE. I OWNED A NEW 2003 4-RUNNER AND NEVER HAD THIS HAPPEN. I BOUGHT THIS VEHICLE IN JAN 2008 NEW. THIS IS THE ONLY TIME THIS HAS HAPPENED. THIS CRASH RESULTED IN \$1768.35 IN DAMAGE. I TOOK THE VEHICLE TO A TOYOTA DEALER AND THEY REMOVED MY ALL WEATHER MATS. (I INSPECTED THESE IMMEDIATELY AFTER THE ACCIDENT AND THEY WERE IN PLACE AS THEY SHOULD BE LOCKED DOWN) TOYOTA SET UP AN APPOINTMENT AND LOOKED AT THE VEHICLE AT THE DEALERSHIP AND SENT A LETTER THAT STATED "NO SYSTEM FAILURE WAS FOUND IN EITHER THE BRAKING SYSTEM OR THE ACCELERATOR SYSTEM" THEY FURTHER STATED THAT "THE FACT YOUR VEHICLE IS NOT INCLUDED IN THE CURRENT SAFETY SERVICE CAMPAIGN INVOLVING FLOOR MATS/UNINTENDED ACCELERATION WOULD INDICATE THAT THIS INCIDENT WAS NOT THE RESULT OF THIS ISSUE." ??? IF NOT WHAT IS THE ISSUE. CRUISE CONTROL COMPUTER? THE DEALERSHIP STATED THAT THE ONLY VEHICLES AFFECTED WERE MADE IN THE USA AND MY VEHICLE WAS MADE IN JAPAN, THEREFORE IT WAS NOT HAVING A PROBLEM. WHAT HAPPENS NEXT TIME AND I GO OFF A CLIFF. WE NEED SOME ANSWERS. I DONT KNOW WHAT TO DO. I SPENT ALOT OF MONEY ON THIS VEHICLE AND I AM NOT SURE IT IS SAFE AND IF I SELL IT I STAND TO LOSE ENOUGH MONEY TO KEEP ME FROM BUYING A VEHICLE OF EQUAL VALUE. WE NEED TO PUT OUR FOOT DOWN AND MAKE THEM SOLVE THIS. THANK YOU NHTSA

**Location of Incident:** CRANSTON, RI

**NHTSA Summary:**  
ON JANUARY 2, 2010 AT APPROXIMATELY 1:30 I WAS TRAVELING NORTH ON ROUTE 146. THE WEATHER CONDITIONS WERE POOR AND I WAS TRAVELING AT APPROXIMATELY 50MPH. MY CAR CONTINUED TO ACCELERATE AND WHEN I PROCEEDED TO HIT THE BRAKE PEDAL IT SKIPPED AND MY CAR DID NOT SLOW DOWN AT ALL. I BELIEVE THAT PARTIALLY THE ICY WEATHER CONDITIONS WERE TO BLAME BUT IN MY OPINION A 2007 VEHICLES BREAKS SHOULD NOT SKIP ON A REGULAR BASIS AND THE GAS PEDAL SHOULD ALWAYS WORK PROPERLY. I HAVE CALLED THE DEALERSHIP SEVERAL TIME NAMELY BALISE AND THEY HAVE NOT RETURNED ANY OF MY PHONE CALLS REGARDING THE RECENT RECALL. I UNDERSTAND THAT THE CALL VOLUME ON THIS ISSUE IS PROBABLY GIANTIC YET WHEN A CUSTOMER, ESPECIALLY ONE HAVING ISSUES WITH THEIR VEHICLE SHOULD BE PRIORITIZED. DUE TO THIS MY VEHICLE SUSTAINED OVER \$9,000 IN DAMAGES AND I HAVE OVER \$5,000 IN MEDICAL BILLS. IN THIS INCIDENT I HIT A GUARD RAIL TO AVOID HITTING OTHER CARS AND MY OPINION IT COULD HAVE BEEN MUCH WORSE. I TRULY BELIEVE TOYOTA ARE GREAT VEHICLES AND HAVE ALWAYS HAD A GREAT REPUTATION THAT IS WHY I HAVE ONLY OWNED THIS MAKE OF VEHICLE. \*TR

THE BRAKE PEDAL; HOWEVER, THE VEHICLE FAILED TO STOP AND CRASHED INTO ANOTHER VEHICLE. THE FRONT END OF THE VEHICLE WAS DAMAGED AND REPAIRED. THE MECHANIC TEST DROVE THE VEHICLE, EXPERIENCED THE FAILURE AND ADVISED THE CONTACT THAT THEY WOULD NOT RELEASE THE VEHICLE SINCE IT WAS TOO DANGEROUS TO DRIVE. THE DEALER WAS NOTIFIED AND ADVISED THE CONTACT THAT AN INSPECTOR WITHIN THEIR LEGAL DEPARTMENT WOULD DIAGNOSE THE FAILURE SINCE IT WAS INVOLVED IN A CRASH. THE FAILURE AND CURRENT MILEAGES WERE 40,400.

**Additional Summary:**  
ON JANUARY 2, 2010 I EXPERIENCED THE SUDDEN ACCELERATION OF MY TOYOTA 4RUNNER (2004), WHICH CAUSED ME TO CRASH INTO A PARKED CAR. THIS HAPPENED IN A PARKING LOT AS I WAS ENTERING THE PARKING SPACE THAT I HAD CHOSEN TO PARK IN. THIS HAPPENED SO SUDDENLY AND WITH SUCH FORCE THAT I COULDN'T IMAGINE WHAT WAS HAPPENING! I APPLIED BOTH FEET TO THE BRAKE (MY RIGHT FOOT WAS ALREADY ON THE BRAKE AS I WAS PULLING INTO THE PARKING SPACE). EVEN WITH BOTH FEET ON THE BRAKE AND PRESSING SO HARD MY BODY WAS STRAIGHTENED OUT AND MY ARMS WERE STRAIGHTENED OUT SO THAT I WAS PRESSING ON THE BACK OF MY SEAT, MY VEHICLE DIDN'T EVEN SHOW SIGNS OF SLOWING, MUCH LESS OF STOPPING!

AT THE BODY SHOP WHERE I HAD MY REPAIRS TAKEN CARE OF, THE SERVICE ADVISOR, WHILE TEST DRIVING MY SUV, HAD A SIMILAR EXPERIENCE. HE COULD NOT GET THE CAR TO STOP UNTIL HE HAD PRESSED FIRMLY ON THE BRAKE TWICE .... THE CAR KEPT GOING AT 35 MPH. DUE TO HIS EXPERIENCE HE DID NOT RELEASE MY CAR BACK TO ME AS HE FELT IT WAS UNSAFE TO DRIVE. HE SUGGESTED I CONTACT TOYOTA REGARDING THIS INCIDENT.

**NHTSA ODI Number:** 10310799  
**Date of Incident:** 20100102  
**Vehicle:** 2008 TOYOTA PRIUS  
**Location of Incident:** MIAMI, FL

**NHTSA Summary:**  
TOYOTA PRIUS PROBLEM - CRUISE CONTROL MALFUNCTION: ON 2 JAN 2010 (ABOUT 0600 HRS) I WAS DRIVING A RENTED PRIUS (ALAMO) FROM PALM BEACH, FL TO MIAMI, FL. I WAS USING CRUISE CONTROL AND GOING THE LISTED SPEED LIMIT FOR I-95 (65MPH). THE CAR SEEMED TO BE PERFORMING CORRECTLY FOR THE FIRST 35 PLUS MILES BUT THEN I GOT INTO HEAVY TRAFFIC AND HAD TO BRAKE. THE CRUISE CONTROL RELEASED NORMALLY AND I SLOWED TO ABOUT 60 MPH. WHEN THE TRAFFIC CLEARED I PUSHED THE CRUISE CONTROL "RESUME" BUTTON AND THE PRIUS STARTED TO ACCELERATE AS NORMAL. HOWEVER, THE ACCELERATION DID NOT STOP AT THE ORIGINAL SPEED I HAD SET AND HAD BEEN DRIVING AT (65 MPH) BUT CONTINUED TO CLIMB TO 70 MPH AND HIGHER TO NEAR 75 MPH WHEN I HAD TO HIT THE BRAKES AND SHUT THE CRUISE CONTROL OFF TO SLOW THE CAR. AFTER THAT I DID NOT USE THE CRUISE CONTROL FOR THE REMAINDER OF MY TRIP. I JUST THOUGHT THERE MAY HAVE BEEN A GLITCH OR OPERATOR ERROR AND I DID NOT THINK OF IT AS THE PROBLEM I RECENTLY SAW ON THE NEWS. I LIVE IN THE REPUBLIC OF PANAMA AND DID NOT SEE ANYTHING ABOUT THE PRIUS PROBLEMS UNTIL RECENTLY. AS I SAID THE CAR WAS A RENTAL AND I JUST MENTIONED TO THE CHECK IN PERSON THAT I HAD A SLIGHT PROBLEM WITH THE CRUISE CONTROL BUT I DO NOT KNOW IF IT WAS REPORTED. \*TR

**NHTSA Summary:**  
I WAS DRIVING THRU MY NEIGHBORHOOD RETURNING HOME AFTER A HEAVY SNOWFALL. I HAD MY FAMILY IN THE CAR AND TO HAVE A LITTLE FUN I WOULD GIVE MY SEQUOIA A LITTLE EXTRA GAS AS I WOULD GO AROUND A CORNER TO GET THE

**C-1784**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TIRES TO SPIN A LITTLE. WITH TRACTION CONTROL AND ANTI-LOCK BRAKES IT WAS NOTHING SIGNIFICANT BUT THE KIDS THOUGHT IT WAS FUN. AS I NEARED MY HOUSE I ACCELERATED ONE LAST TIME BEFORE I WAS GOING TO TURN INTO MY DRIVEWAY. UNFORTUNATELY THIS TIME THERE WAS UNINTENTIONAL ACCELERATION. I DON'T HAVE THE STOCK FLOOR MATS, BUT EVEN SO I TRIED USING MY FOOT TO LIFT THE GAS PEDAL. THAT DID NOT WORK. SINCE I WAS ON A DEADEND RESIDENTIAL STREET, I OBVIOUSLY DID NOT WANT THIS CONDITION TO GET OUT OF CONTROL. WHEN YOU ARE NOT IN THAT SITUATION IT IS EASY TO SAY THAT YOU NEED TO PUT IT IN NEUTRAL, BUT WHEN THE SITUATION IS OCCURRING YOU REALLY ONLY HAVE TIME TO REACT. I PUT THE SEQUOIA INTO PARK. FORTUNATELY SINCE IT WAS A HEAVY SNOW, AND SINCE I WAS PROBABLY ONLY GOING 10-15 MPH THE CAR CAME TO A STOP QUICKLY BUT NO ONE WAS THRUST FORWARD. I HAD WARNING LIGHTS ON ALL OVER MY DASH. I TURNED THE CAR OFF AND RESTARTED AND THE LIGHTS WENT OFF AND THE CAR SEEMED TO FUNCTION NORMALLY AFTERWARDS THANKFULLY. I HAVE NOT TAKEN IT IN FOR THE RECALL BECAUSE THE CURRENT RECALL FOR THE 2005 SEQUOIA SAYS THAT IT IS A FLOOR MAT ISSUE. IT IS NOT. I AM SO GLAD THAT YOU ARE PURSUING FURTHER INVESTIGATION INTO THE REAL CAUSE OF THIS VERY POTENTIALLY DANGEROUS CONDITION.

**Vehicle:** 2001 TOYOTA CAMRY  
**Location of Incident:** ROUND LAKE, IL

**NHTSA Summary:**  
I HAVE 2001 TOYOTA CAMRY 4 CYL LE MODEL. MANY TIMES WHEN I BEGIN MY TRIP FROM MY HOME MY CAR ACCELERATES EVEN I HAVE MY FOOT OFF THE GAS PEDAL. IT ONLY HAPPENS WITHIN FIRST FEW MILES AND THEN THE PROBLEM GOES AWAY. I HAVE A STOP SIGN CLOSE TO MY HOME AND BEFORE NEARING THE STOP SIGN I LIFT MY FOOT FROM GAS PEDAL AND CAR WILL ACCELERATE AND THEN I HAVE TO STEP ON MY BRAKES TO STOP IT BY THE STOP SIGN. IT IS VERY TRICKY IN WINTER WHEN THERE IS ICE ON ROAD. SINCE I AM AWARE OF THIS ISSUE I DO NOT STEP ON GAS AT ALL TILL I HIT THE FIRST STOP SIGN. ONCE THE CAR IS RUNNING FOR A WHILE THE PROBLEM SEEMS TO GO AWAY. I WANTED TO BRING THIS TO THE ATTENTION AS I FIRMLY BELIEVE THAT THERE IS SOMETHING MORE THAN STICKY PEDAL. SINCE THE PROBLEM GOES AWAY AFTER FEW MINUTES OF DRIVING. THAT CLEARLY INDICATES THAT THE PROBLEM IS NOT WITH STICKY PEDAL. SINCE MY CAR IS NOT RECALLED I HOPE SOMEONE LOOKS INTO THIS YEAR MODEL TOO.

**NHTSA Summary:**

TRAVELING ON INTERSTATE I BEGAN THE PROCEDURES TO CORRECTLY PASS A VEHICLE IN FRONT OF ME. WHEN I STARTED TO PASS MY TOYOTA AVALON ACCELERATED BEFORE I COULD CHANGE LANES. I HAD A DIFFICULT TIME REGAINING CONTROL TO PREVENT HITTING THE VEHICLE IN FRONT OF ME AND TO KEEP FROM HITTING A CONCRETE WALL DIVIDING THE NORTH/SOUTH LANES. I WAS BEARING HARD ON THE BRAKE AND I WAS ABLE TO REGAIN CONTROL. I THOUGHT OTHERS ON THE INTERSTATE WOULD BE CALLING POLICE ABOUT MY IRRATIONAL DRIVING. THIS

C-1789

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

HAPPENED ABOUT TWO WEEKS BEFORE THE PROBLEM WAS ANNOUNCED. I TRADED THE CAR ON FEBRUARY 4, 2010 BECAUSE I DID NOT FEEL CONFIDENT DRIVING THE CAR.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10298556  
**Date of Incident:** 20100105  
**Vehicle:** 2010 TOYOTA AVALON  
**Location of Incident:** PALM BEACH SHORES, FL

**NHTSA Summary:**

1. ON THREE OCCASIONS THE ACCELERATOR PEDAL WAS JAMMED OPEN BY FACTORY CLOTH FLOOR MAT. REMOVED THE MAT. 2. ON MULTIPLE RECENT OCCASIONS WHEN THE CAR IS STARTED AND PLACED IN REVERSE TO BACK OUT OF A PARKING SPACE THE CAR WILL NOT MOVE EVEN IF THE ACCELERATOR IS PRESSED. CAR SEEMS AS IF THE WHEELS ARE CHOCKED. THEN WHEN CAR DOES MOVE IT ACCELERATE QUICKLY IN REVERSE. HAVE DISCOVERED WHEN THIS HAPPENS THE TRACTION CONTROL APPEARS WHEN THE CAR IS SHIFTED INTO REVERSE AND STAYS LIT FOR A PERIOD OF TIME, THEN THE LIGHT GOES OUT AND THE CAR SIMULTANEOUSLY FEELS AS IF THE BRAKES HAVE BEEN RELEASED EVEN THOUGH THE BRAKE PEDAL WAS NOT DEPRESSED. IT IS EASY TO UNDERSTAND HOW A DRIVER COULD PRESS THE ACCELERATOR TO GET THE VEHICLE TO MOVE AND THEN HAVE THE CAR SHOOT BACKWARDS CAUSING DAMAGE OR INJURY. 3. ON THREE SEPARATE OCCASIONS WHILE WEARING BOOTS I REMOVED MY FOOT FROM THE ACCELERATOR AND DEPRESSED THE BRAKE PEDAL ONLY TO HAVE THE VEHICLE INSTEAD OF DECELERATING, ACCELERATE VERY QUICKLY. THE REACTION EACH TIME WAS TO PRESS THE BRAKE PEDAL EVEN HARDER RESULTING ONLY IN THE VEHICLE ACCELERATING EVEN HARDER. ON ONE OF THOSE OCCASIONS IT OCCURRED BACKING OUT OF A DRIVEWAY AND ALTHOUGH I WAS ABLE TO STOP THE VEHICLE QUICKLY IT NONETHELESS ACCELERATED SEVERAL FEET INTO THE MIDDLE OF A STREET. IT IS CLEAR THAT THESE THREE INCIDENTS OCCURRED BECAUSE OF THE PROXIMITY OF THE BRAKE AND ACCELERATOR PEDALS AND INADVERTENTLY BUT SIMULTANEOUSLY DEPRESSING BOTH. I BELIEVE THE SITUATION IS AGGRAVATED BY THE FACT WHEN DEPRESSING THE BRAKE PEDAL YOU CANNOT FEEL THE ACCELERATOR PEDAL UNDER YOUR FOOT AND HAVE NO IDEA YOU ARE PRESSING THE ACCELERATOR UNTIL YOU GO THROUGH THE MENTAL PROCESS OF TRYING TO DETERMINE WHY THE HARDER YOU DEPRESS THE BRAKE THE FASTER THE CAR GOES. IT IS EASY TO UNDERSTAND WHY ONE MIGHT PANIC AND "STAND" ON THE BRAKE PEDAL ONLY TO HAVE THE CAR ACCELERATE TO A VERY DANGEROUS SPEED. MY 190 MPH MOTORCYCLE DOESN'T SCARE ME, THE VENZA DOES. \*TR

**NHTSA Summary:**

WHILE USING THE CRUISE CONTROL IT HAS A TENDENCY TO ACCELERATE RAPIDLY AND SOMETIMES PAST THE SET SPEED WHEN USING "RESUME." HITTING THE BRAKES OR TURNING OFF CRUISE CONTROL HAS ALWAYS STOPPED IT. THIS HAS HAPPENED MANY TIMES OVER THE LAST THREE YEARS. USUALLY THE CAR IS GOING OVER 60 MPH WHEN THIS HAPPENS. RECENTLY THE CAR HAS ACCELERATED ONCE WHEN NOT USING THE CRUISE CONTROL. WHEN HITTING THE BRAKES THE ACCELERATION STOPPED. THIS HAS HAPPENED ONLY ONCE. I HAVE NEVER TAKEN IT IN BECAUSE IT WILL BE HARD TO TRACE AND THE WARRANTY IS OUT. WITHOUT CHANGING OUT ALL OF THE COMPONENTS ONE COULD NEVER BE SURE THE PROBLEM WAS CORRECTED. I NOTED THAT YOU HAVE NOW GONE DOWN TO 2009 RAVS. I BELIEVE THAT THERE COULD BE A PROBLEM WITH EARLIER YEARS TOO. \*TR

**NHTSA Summary:**

SUDDEN ACCELERATION IN MY 2005 TOYOTA AVALON. THE MAT DID NOT INTERFERE WITH THE ACCELERATOR. WITHOUT LOOKING AT THE VEHICLE TOYOTA HAS MAINTAINED THAT THE MAT IS THE CAUSE OF THE ACCIDENT LEADING ME TO BELIEVE THAT ABOUT WHAT TOYOTA KNOWS ABOUT THIS PROBLEM AND IS NOT BEING CANDID WITH THE NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION WHEN INFORMING THEM OF THE ISSUE. \*TR

**Additional Summary:**

INFORMATION FROM NEWS ARTICLE - WALL STREET JOURNAL - "Acceleration Mishaps Worry Vehicle Owners"

Susan and Rafael Marrero have garaged their 2005 Toyota Avalon after an accident that they say occurred on its own in a McDonald's parking lot when the vehicle accelerated until it hit a curb and flatted two tires. The car was taken to a dealership after the tires were repaired. After about two weeks, a Toyota inspector advised the couple to install clips to ensure the floor mat doesn't get stuck against the gas pedal.

**NHTSA Summary:**

I WAS IN A MULTI-STOREY CAR PARK AND I SPOTTED A FREE SPACE 20 YARDS AHEAD. I TOOK MY FOOT OFF THE ACCELERATOR, AND THE VEHICLE BEGAN TO LOSE SPEED NORMALLY. I APPLIED THE BRAKE GENTLY TO TURN RIGHT INTO AN EMPTY SPOT. I WAS BRAKING TO A HALT AT AN APPROPRIATE DISTANCE FROM A RETAINING WALL WHEN SUDDENLY, WITH NO WARNING, THE TOYOTA LURCHED FORWARD AT AN INCREDIBLE RATE OF ACCELERATION, STRUCK THE WALL THEN BOUNCED BACK SEVERAL FEET AND THE ENGINE CUT OUT. I SUFFERED SEVERE NECK TRAUMA, DUE FIRST TO THE SUDDEN ACCELERATION AND THEN THE IMPACT. THE AIRBAG DID NOT DEPLOY DESPITE THE FACT THAT THE DAMAGE TO THE FRONT OF THE CAR WAS ACCORDING TO AN EXPERT CONSISTENT WITH AN IMPACT SPEED OF 30 TO 35 MPH. EARLIER IN THE SAME TRIP, I WAS STOPPED AT TRAFFIC LIGHTS WITH THE CAR IN DRIVE AND MY FOOT ON THE BRAKE. SUDDENLY THE CAR VIBRATED AND LURCHED AGAINST THE BRAKE, TRYING TO MOVE AHEAD. I HAD TO BRAKE HARD TO PREVENT IT FROM DOING SO. THE LIGHTS CHANGED AND I PROCEEDED TOWARDS THE PARKING GARAGE WHERE THE ACCIDENT DESCRIBED ABOVE SUBSEQUENTLY OCCURRED. THE DAMAGE TO THE FRONT OF THE CAR HAS NOT YET BEEN FIXED AND THE CAR HAS NOT BEEN USED SINCE THE ACCIDENT. I REPORTED THIS ACCIDENT TO TOYOTA CUSTOMER SERVICE WHO ARRANGED FOR SOMEONE FROM THEIR LOCAL SERVICE COMPANY TO EXAMINE THE VEHICLE AT THE BODY SHOP WHERE IT WAS LOCATED. THE MAIN CONCLUSION OF THEIR EXAMINATION WAS THAT THEY FOUND NO PROBLEM WITH THE BRAKES. IN FACT, MY COMPLAINT WAS NOT ABOUT THE BRAKES, WHICH HAD ALWAYS WORKED PERFECTLY NORMALLY. THEIR REPORT ALSO SAID "WE ARE HAPPY THAT YOU DID NOT SUSTAIN INJURIES IN THIS INCIDENT". I AM SORRY TO INFORM THEM THAT I AM STILL SUFFERING FROM SEVERE BACK AND NECK PAIN FROM THE INJURIES THAT I SUSTAINED.

**NHTSA Summary:**

AFTER I READ THE ARTICLE ABOUT APPLE INC. CO-FOUNDER STEVE "WOZ" WOZNIAK'S EXPERIENCE ABOUT HIS 2010 PRIUS, I WAS RELIEVED SOMEWHAT FROM MY OWN DOUBT AND CONFUSION. I BOUGHT A USED 2005 SIENNA XLE LIMITED (WITH RADAR SENSOR) LAST NOVEMBER WITH 95000 MILEAGE. IT ACCELERATED UNINTENTIONALLY SEVERAL TIMES WHEN I WAS USING CRUISE CONTROL WITH ONLY SINGLE PUSH OF THE ACCELERATION HANDLE. I ONCE LET THE CAR WENT UP TO 90 MPH BEFORE I BRAKED IT OFF FROM THE CRUISE CONTROL MODE. THE ACCELERATION WAS VERY POWERFUL WHEN IT MALFUNCTIONED. ALL HAPPENED IN SEVERAL SECONDS. YOU COULD HEAR THE ENGINE REVERING LOUDLY TOWARDS FULL SPEED. I HAD NO PROBLEM TO BRAKE IT OFF EVERY TIME THOUGH. I ALSO BELIEVE IT IS AN ELECTRONIC OR SOFTWARE PROBLEM SINCE NONE OF MY FEET WAS ON ANY PEDAL WHEN THIS HAPPENED AND THERE WAS NO FLOOR MAT ISSUE AT ALL.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10302975  
**Date of Incident:** 20100106  
**Vehicle:** 2008 TOYOTA PRIUS  
**Location of Incident:** BEAUMONT, TX

**NHTSA Summary:**  
WE WERE STOPPED AT A NEIGHBORHOOD INTERSECTION. AS WE BEGAN TO LET OFF OF THE BRAKE TO MAKE A LEFT HAND TURN, THE CAR ACCELERATED UNCONTROLLABLY. DEPRESSING THE BRAKE HAD NO EFFECT ON THE ACCELERATION. BEFORE WE TURNED THE WHEEL TO THE LEFT TO BEGIN THE TURN, THE CAR HAD SPED ACROSS THE 35 FOOT STREET, JUMPED A 6 1/2 INCH CURB, WENT THROUGH A FENCE, ACROSS ANOTHER STREET, AND WAS STOPPED WHEN IT HIT A SECOND FENCE. THE TOTAL DISTANCE TRAVELED FROM BEING STOPPED AT THE CORNER UNTIL THE VEHICLE WAS STOPPED BY THE SECOND FENCE WAS 81 FEET. THE STREETS WERE DRY AND THERE WERE NO SKID MARKS ON THE ROAD. HOWEVER, DUE TO PREVIOUS RAINS, THE GRASS AREAS WERE MOIST. THERE ARE NO TIRE MARKS IN THE GRASS FROM THE CURB UNTIL APPROXIMATELY 6 FEET BEFORE THE STOPPING POINT. THE FRONT LIFT OF THE PRIUS IS AROUND 7 1/2 INCHES. THE VEHICLE HAD TO HAVE SIGNIFICANT MOMENTUM TO GO OVER A 6 1/2 INCH CURB IN JUST 35 FEET. WE FILED A CLAIM WITH OUR INSURANCE ON JAN. 7 AND REQUESTED THAT THE VEHICLE BE INSPECTED FOR ACCELERATOR ISSUES. THE CAR WAS TOWED TO TOYOTA WHOM, UPON THEIR OWN INVESTIGATION, STATED THAT THERE WAS NO EVIDENCE OF ACCELERATION MALFUNCTION. THE CAR IS BEING REPAIRED AT A BODY SHOP WITH INITIAL DAMAGE ESTIMATED AT OVER \$6000. WE HAVE PHOTOGRAPHS OF THE DAMAGE TO THE CAR AS WELL AS THE SCENE OF THE ACCIDENT AND MEASUREMENTS OF DISTANCES TRAVELED. IN 2009, WE RECEIVED A RECALL LETTER FROM TOYOTA CONCERNING FLOOR MAT ISSUES WITH OUR PRIUS. WE INSPECTED OUR FACTORY-INSTALLED FLOOR MATS, AS INSTRUCTED BY THE RECALL LETTER, AND WERE AWAITING THEIR 2ND NOTIFICATION WHEN THE "CAMPAIGN REMEDY" BECAME AVAILABLE. THE FLOOR MAT ON THE DRIVER'S SIDE HAS A LOCKING MECHANISM AND COULD HAVE, IN NO WAY, OBSTRUCTED THE ACCELERATOR PEDAL. THE CAR SHOULD BE REPAIRED AND READY NEXT WEEK. HOWEVER, WE DO NOT BELIEVE IT IS A SAFE VEHICLE TO DRIVE. WHAT RECOMMENDATIONS DO YOU HAVE? \*TW

**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** NEW YORK, NY

**NHTSA Summary:**  
I OWN A 2003 TOYOTA CAMRY VIN#4T1BF32K64U577035 ON JANUARY 6, 2010 I WAS DRIVING UP FIRST AVE IN MANHATTAN GOING TO RANDALLS ISLAND. AT 1ST AVE AND ABOUT 10 ST I WAS DRIVING ABOUT 20 MILES PER HOUR, PRESSED THE BRAKE APPROACHING A RED LIGHT. INSTEAD AND INSTEAD THE ENGINE REVVED (VROOM) AND CAR ACCELERATED FORWARD. I FLOORED THE BRAKE AND PULLED UP THE EMERGENCY BRAKE AND STILL I TAPPED THE COMMERCIAL VEHICLE. IN FRONT BEFORE BEING ABLE TO STOP BY PUTTING CAR INTO PARK. 2 HOURS LATER I WAS RETURNING HOME AND DRIVING DOWN 9TH STREET BETWEEN BROADWAY AND UNIVERSITY AND AGAIN APPROACHING A RED LIGHT BRAKED TO SLOW DOWN THE CAR I WAS ALREADY GOING 20MPH. AGAIN, INSTEAD THE VEHICLE REVVED AND ACCELERATED FORWARD AND THIS TIME NO MATTER HOW HARD I PUSHED THE BRAKE THE CAR WOULDN'T STOP. I SLAMMED THE TRANSMISSION INTO PARK, PULLED UP THE EMERGENCY BRAKE AND THAT STOPPED THE CAR. I CALLED AAA AND HAD THE CAR TOWED TO TOYOTA OF MANHATTAN WHERE THEY SAID MY BRAKE PINS WERE FROZEN AND THERE WAS A THROTTLE PROBLEM AND CHARGED \$1300 FOR REPAIR. (MY PERSONAL MECHANIC IN NJ LATER TOLD ME BRAKE PINS AND UNCONTROLLED ACCELERATION WERE NOT RELATED. ON MONDAY FEBRUARY 22, 2010 WHILE DRIVING TO MY SUMMER APARTMENT IN VENTNOR NJ THE SSAME THING HAPPENED. WE WERE AGAIN ABLE TO STOP THE CAR BY PULLING INTO PARK MODE AND EMERGENCY BRAKE. WE RESTARTED THE CAR AND

C-1796

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

DROVE 10 MILES PER HOUR TO OUR PARKING LOT WHERE THE CAR STILL SITS. CALLS TO TOYOTA OF MANHATTAN SIMPLY STATED THAT THIS MODEL WAS NOT UNDER RECALL AND THE CAR WAS TOO FAR FOR THEM TO SEND A TOW. ATTEMPTS TO BRING THE CAR TO A LOCAL TOYOTA (SHORE TOYOTA) CALLS WERE NOT ANSWERED AND I WAS TOLD I COULD NOT BRING THE CAR IN WITHOUT AN APPOINTMENT. AND I SHOULD BRING THE CAR BACK TO WHERE THE REPAIR WAS DONE. SO THERE IT SITS IN A PARKING LOT. I HAD TO RENT A CAR TO GET HOME WITH MY PET. THE REPAIR WAS CLEARLY BOGUS AND THIS PROBLEM IS ACCELERATION UPON HITTING THE BRAKE PEDAL. P VEH

**NHTSA ODI Number:** 10303909  
**Date of Incident:** 20100107  
**Vehicle:** 2005 TOYOTA AVALON  
**Location of Incident:** TARZANA, CA

**NHTSA Summary:**  
MY WIFE DROVE OUR 2005 TOYOTA AVALON INTO THE PARKING LOT AT THE TARZANA, CA POST OFFICE. SHE PULLED INTO A PARKING SPOT FACING THE POST OFFICE, TOOK HER FOOT OFF THE ACCELERATOR PEDAL AND STARTED APPLYING THE BRAKES. THE CAR SURGED FORWARD, CROSSING A WALKWAY AND RAN INTO A CONCRETE BLOCK PLANTER IN FRONT OF THE POST OFFICE. THE CAR SUFFERED SUBSTANTIAL BODY AND RADIATOR DAMAGE AND IS NOW BEING REPAIRED AT A COST OF OVER \$8000. THE AIR BAGS DID NOT DEPLOY AND MY WIFE WAS NOT INJURED. THE CAR WAS PURCHASED NEW AND HAS APPROXIMATELY 30,000 MILES ON IT. IT HAS BEEN SERVICED ON A REGULAR BASIS AND WAS IN EXCELLENT CONDITION PRIOR TO THE ACCIDENT. THE CAR IS KEPT GARAGED AND IS UNLIKELY TO HAVE HAD CONDENSATION IN THE ACCELERATOR PEDAL SYSTEM. THE WEATHER AT THE TIME OF THE ACCIDENT WAS CLEAR AND SUNNY WITH THE TEMPERATURE IN THE 70'S. THE CAR IS STILL UNDERGOING REPAIR AND WE ANTICIPATE RECEIVING IT SOMETIME THIS WEEK (2/2/10). WE HAVE CONTACTED TOYOTA AND THEY SENT AN INSPECTOR TO LOOK AT THE CAR ON 1/27/10. WE HAVE HAD NO REPORT BACK FROM TOYOTA AS TO THE CAUSE OF THE PROBLEM. THE FLOOR MAT WAS CHECKED THE DAY OF THE ACCIDENT AND IT WAS FIRMLY IN PLACE WITH THE FLOORBOARD CLIPS HOLDING THE MAT TO THE FLOOR. I CHECKED THE FLOOR MAT AFTER THE ACCIDENT AND IT HAD NOT MOVED OR INTERFERED WITH THE ACCELERATOR PEDAL. MY WIFE COULD NOT HAVE BEEN MOVING FORWARD AT MORE THAN 5 MILES/HOUR AS SHE WAS JUST MOVING INTO THE PARKING SPOT AT THE TIME OF THE ACCIDENT. OBVIOUSLY, THE CAR MUST HAVE ACCELERATED TO AT LEAST 15-20 MILES/HOUR IN THE SPACE OF APPROXIMATELY 5 FEET BEFORE RUNNING INTO THE PLANTER. IT IS BEYOND BELIEF THAT THE PROBLEM WAS CAUSED BY A STICKING ACCELERATOR PEDAL. \*TR

**Date of Incident:** 20100108  
**Vehicle:** 2009 TOYOTA TACOMA  
**Location of Incident:** DOUGLAS, MA

**NHTSA Summary:**

WHILE ATTEMPTING TO COME TO A STOP ON A HIGHWAY EXIT RAMP, WHEN I APPLIED FIRM PRESSURE TO THE BRAKE ABOUT HALF WAY DOWN THE RAMP, THE ENGINE ACCELERATED UNEXPECTEDLY AND THE REAR WHEELS ON MY TRUCK BEGAN TO SPIN AND SLIP. ALTHOUGH THE TRUCK WAS SLOWING DOWN IT COULD NOT COME TO A COMPLETE STOP AND STRUCK A STOPPED VEHICLE AT THE END OF THE RAMP AT SLOW SPEED. WITH EXTREME PRESSURE ON THE BRAKE THE TRUCK REMAINED STOPPED BUT THE REAR WHEELS CONTINUED TO SPIN AT A HIGH RATE. I SHIFTED TO NEUTRAL AND TURNED OFF THE IGNITION KEY. THE TRUCK IS AN AUTOMATIC AND WAS IN 2 WHEEL DRIVE AND THE AUTO SPEED CONTROL WAS NOT ON. I CHECKED THE FLOOR MATS BECAUSE I HAD PREVIOUSLY RECEIVED A SAFETY RECALL INTERIM NOTICE AND HAD PREVIOUSLY MADE SURE THE MATS WERE CORRECTLY INSTALLED. THE ALL WEATHER FLOOR MAT WAS CORRECTLY INSTALLED AND SECURED TO THE 2 FLOOR HOOKS, AND WAS NOT ON THE ACCELERATOR PEDAL. WHEN THE IGNITION WAS TURNED BACK ON THE TRUCK OPERATED NORMALLY AND HAS CONTINUED TO DO SO, NOW ABOUT 2 WEEKS. \*TR

**Date of Incident:** 20100108  
**Vehicle:** 2003 TOYOTA CAMRY SOLARA  
**Location of Incident:** EASTON, PA

**NHTSA Summary:**

ON JANUARY 8, 2010, MY ACCELERATOR PEDAL STUCK WHILE PULLING INTO A PARKING SPACE AND MY 2003 TOYOTA SOLARA SLAMMED INTO A PARKED SUV SENDING IT HALFWAY OUT OF ITS PARKING SPACE. ONLY A SMALL RUBBER MAT WAS ON THE FLOOR, NOT TOUCHING THE PEDAL. THE ORIGINAL CARPET MAT HAD PREVIOUSLY BEEN REMOVED FOR CLEANING. INSURANCE COVERS AUTO BODY DAMAGE BUT DOES NOT ADDRESS THIS NEW RECALL PROBLEM BECAUSE MY CAR IS NOT IN THE LISTED AFFECTED YEARS (2007-2010). WHAT RECOURSE DO I HAVE? DO I REPAIR THE CAR AND FORGET THAT THIS COULD HAPPEN AGAIN? I AM AFRAID TO DRIVE IT EVEN TO THE REPAIR SHOP. I COULD FIX IT OR NOT FIX IT AND TRY TO SELL IT, BUT WHO WOULD WANT THE CAR, IN LIGHT OF THE RECENT PUBLICITY ABOUT THE RECALLS AND TOYOTA'S RESPONSE TO IT. I SUPPOSE I WILL WAIT AND SEE HOW THIS ALL PLAYS OUT, BUT WANTED TO PUT ON RECORD (SOMEWHERE) AND PERHAPS OTHERS ARE IN THE SAME SITUATION AS I COINCIDENTALLY FOUND MYSELF IN. MY CAR HAS BEEN

**C-1801****Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

GARAGED AND WELL MAINTAINED WITH ONLY 30,000 MILES ON IT AND I HAVE NEVER HAD A PROBLEM WITH THE ACCELERATOR IN THE PAST. \*TR

**Date of Incident:** 20100108  
**Vehicle:** 2003 LEXUS GX470  
**Location of Incident:** DENVER, CO

**NHTSA Summary:**

I OWN A 2003 LEXUS GX470. ON FRIDAY JANUARY 8TH AS I WAITED FOR TRAFFIC TO CLEAR BEFORE TURNING RIGHT TO ENTER A BLVD, THE ENGINE SUDDENLY BEGAN TO RACE WHILE MY RIGHT FOOT FORCED DOWN THE BRAKE PEDAL TO PREVENT THE CAR FROM "LAUNCHING" INTO THE CROSS TRAFFIC. THE VEHICLE BEGAN TO SHUDDER

**C-1802****Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AND SHAKE AND MY DAD YELLED "YOU'RE SPINNING YOUR TIRES!" I YELLED "MY FOOT IS ON THE BRAKE, WHAT SHOULD I DO?" WE TURNED OFF THE IGNITION AND THE ENGINE STOPPED RUNNING. LATER, WHILE MY DAD OBSERVED FROM THE OPEN DRIVER'S-SIDE DOOR, I ROUGHLY TROMPED ON THE GAS PEDAL 2 OR 3 TIMES BECAUSE WE WERE VAGUELY AWARE OF A TOYOTA "ACCELERATOR STICKING" PROBLEM. I THEN STARTED THE CAR AND DROVE IT SEVERAL MILES - WHILE TOTALLY TERRIFIED. IMMEDIATELY I ARRANGED TO HAVE THE CAR TRANSPORTED TO MY DEALER'S FACILITIES. AND, AFTER THREE DAYS OF "TESTING," NO PROBLEM WAS FOUND AND I DROVE HOME, SHAKING. SO, JUDGING FROM RECENT MEDIA REPORTS, WHAT WAS NEW OR DIFFERENT ABOUT MY EXPERIENCE? 1) NO MATS WERE EVER USED IN THE DRIVER'S COMPARTMENT DURING THE FIVE YEARS I HAVE OWNED THE CAR. 2) THE ENGINE WAS "AT IDLE" AND THE BRAKE PEDAL WAS DEPRESSED BEFORE THE ENGINE BEGAN TO SUDDENLY RACE. 3) I AM NOT A "TWO-FOOT" DRIVER...NEVER, EVER. 4) MY DAD CHECKED (YES, HE IS A MECHANICAL ENGINEER) TO SEE IF THE GAS PEDAL WAS IN ITS CORRECT IDLE POSITION AFTER SHUT-OFF. THE PETAL POSITION WAS NORMAL, NORMAL BEFORE, DURING AND AFTER BEING "TROMPED" ON. 5) MY CAR WAS NOT MOVING, JUST WAITING, AT IDLE, WITH NO OPERATOR INTERVENTION PRIOR OR DURING ENGINE REV-UP. IN A NUT-SHELL, MY NEAR-DEATH EXPERIENCE COULD NOT HAVE BEEN PROVOKED BY A MECHANICAL PROBLEM WITH THE ACCELERATOR PETAL. THIS FAILURE HAS NOT HAPPENED AGAIN... NO REPAIR WAS MADE... MY DEALER CLAIMED THAT NOTHING LIKE THIS HAS HAPPENED ON A LEXUS THAT THEY KNEW ABOUT...BUT CONGRESSIONAL TESTIMONY TODAY SHOWS THAT OTHER LEXUS OWNERS HAVE EXPERIENCED SUDDEN ENGINE ACCELERATION WITH NO PEDAL INVOLVEMENT.

**Date of Incident:** 20100109  
**Vehicle:** 2009 TOYOTA RAV4  
**Location of Incident:** LAKEWOOD, CO

**NHTSA Summary:**

NEW TOYOTA ELECTRONICS PROBLEMS MY RAV4 SOMETIMES DOES HAVE INTERMITTENT ACCELERATOR STICKING/GO PROBLEMS, EVEN THOUGH THE ACCELERATOR PEDAL HAS FULLY RETURNED TO IDLE CONDITIONS. DURING THE WINTER I OFTEN WHERE SORELS. I THOUGHT THAT BECAUSE OF MY BOOTS I WAS HITTING BOTH THE BRAKE AND ACCELERATOR. ONE TIME I EVEN HAD TO PUSH THE TRANSMISSION INTO NEUTRAL TO MAKE A STOP. CURSING THE TOYOTA DESIGNER WHO PUT THE BRAKE PEDAL SO CLOSE TO THE ACCELERATOR (ANOTHER PEDAL DESIGN FLAW?). FROM THEN ON I WAS VERY CAREFUL TO KEEP MY FOOT ON JUST ONE PEDAL. HOWEVER, I STILL NOTICED PROBLEMS SOMETIMES, AND NOW THIS "PSEUDO RECALL" HAS SOLVED A DILEMMA I HAD. THE PROBLEM IS NOT WITH UNINTENDED ACCELERATION, IT IS WITH IMPAIRED DECELERATION. THE ENGINE IS FIGHTING AGAINST THE BRAKING SYSTEM BECAUSE THE ENGINE DOES NOT RETURN TO IDLE SOON ENOUGH. WITH THE OLD MANUAL ACCELERATOR LINKAGE SYSTEMS, YOU COULD FEEL WHEN YOU LET OFF THE GAS. NOW INSTEAD THE COMPUTER IS DECIDING HOW TO SLOW

**C-1804****Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THE ENGINE. THIS IS WHERE THE PROBLEM LIES. WHAT "BONE HEADED" TOYOTA ENGINEER ALLOWED BOTH THE ACCELERATOR AND BRAKE TO WORK AT THE SAME TIME ON A "DRIVE BY WIRE" SYSTEM? THERE IS NO MECHANICAL LINKAGE TO UNDO, SO HITTING THE BRAKE SHOULD DEFEAT THE ACCELERATOR (I.E. QUICKLY RETURN THE ENGINE TO IDLE MODE). THAT IS ALL THAT WAS NEEDED TO PREVENT THIS PROBLEM. THIS IS AT LEAST ONE PROBLEM WITH THE TOYOTA ELECTRONIC THROTTLE SYSTEM. IT IS A TOYOTA 6MYTH6 TO INSIST THERE IS(ARE) NO ELECTRONIC PROBLEM(S). WHAT OTHER MORE COMPLEX PROBLEMS ARE THERE IN THE ELECTRONICS, IF THIS BASIC PROBLEM WAS NOT ACCOUNTED FOR?

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2008 TOYOTA YARIS. WHILE DRIVING APPROXIMATELY 5 MPH INTO A PARKING SPACE APPLYING PRESSURE TO THE BRAKE PEDAL THE VEHICLE BEGAN TO LUNGE FORWARD FORCEFULLY. THE DRIVER PLACED THE GEAR SHIFT INTO THE "REVERSE" POSITION AND SUDDENLY, THERE WAS AN UNINTENDED INCREASE IN ACCELERATION. THE VEHICLE FAILED TO SLOW DOWN AND TRAVELED OVER A CURB INTO SOME BUSHES. THE GEAR SHIFT WAS PLACED INTO THE "NEUTRAL" POSITION BEFORE THE VEHICLE CAME TO A COMPLETE STOP. THE AMBULANCE AND POLICE WERE CALLED TO THE SCENE. THERE WERE INJURIES. THE VEHICLE WAS TOWED TO AN AUTHORIZED DEALER. THE BODY DAMAGE REPAIR COST WAS \$4,523.94. THE CAUSE OF FAILURE HAS NOT BEEN DETERMINED AT THIS TIME. THE FAILURE MILEAGE WAS UNKNOWN.

**Date of Incident:** 20100111  
**Vehicle:** 2009 TOYOTA RAV4  
**Location of Incident:** GLEN ELLYN, IL

**NHTSA Summary:**  
GAS PEDAL STUCK ON MY 2009 RAV4 AND I HIT THE REAR OF THE CAR IN FRONT OF ME AT A 4 WAY STOP. I WAS ABLE TO ENGAGE THE BRAKES BUT THE DISTANCE/TIME WAS TOO SHORT FOR THE BRAKES TO OVER COME THE ACCELERATION. IN FRONT OF THE CAR THAT I HIT WAS A PEDESTRIAN CROSSING--IF IT WERE NOT FOR THE CAR IN FRONT OF ME I WOULD HAVE STRUCK PEDESTRIANS. BEFORE THE ACCIDENT I DID NOT DETECT ANY EVIDENCE OF A PROBLEM. THE PEDAL FAILURE WAS A ONE TIME INCIDENT. AFTER THE ACCIDENT (BEFORE THE RECALL) IT NEVER OCCURRED TO ME THAT THERE WAS A MECHANICAL PROBLEM--I ASSUMED SOMEHOW THAT I HAD MY FOOT ON BOTH ACCELERATOR AND BRAKE. HOWEVER AFTER SPENDING MUCH TIME IN MY DRIVEWAY I COULD NOT REPLICATE HAVING MY FOOT PUSH BOTH THE GAS PEDAL AND BRAKE PEDAL. MY WIFE AND I AGREED THAT SHE WOULD DRIVE THE RAV4--AND I WOULD NOT. SOON AFTER MY ACCIDENT THE 2009 RAV 4 RECALL FOR STICKING GAS PEDAL WAS ANNOUNCED. I AM ABSOLUTELY SURE THAT THE STICKING GAS PEDAL CAUSED THE ACCIDENT. SINCE THE DATE OF THE RECALL (JANUARY 21) WE PARKED THE CAR IN OUR DRIVEWAY. WE WILL NOT DRIVE OUR RAV4. I CONTACTED MY DEALER (LOMBARD TOYOTA, LOMBARD IL)--THEY REPLIED THAT AS A DEALER THEY COULD ONLY RECOMMEND THAT I CALL TOYOTA'S CUSTOMER EXPERIENCE NUMBER. AFTER A COUPLE DAYS I WAS ABLE TO GET THROUGH TO THE "TOYOTA EXPERIENCE" LINE--OVER THE NEXT SEVERAL DAYS I WAS PASSED UP THE LINE UNTIL I WAS ABLE TO SPEAK TO A CASE MANAGER. ON JANUARY 27THE A TOYOTA FIELD TECHNICIAN CAME TO MY HOUSE AND INSPECTED MY CAR. SINCE THEN I HAVE HEARD NOTHING FROM TOYOTA. TOYOTA CLAIM #1001136997

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**  
I ROUTINELY HAVE DIFFICULTY WITH MY BREAKS ON MY 2003 TOYOTA HIGHLANDER. I BROUGHT THE CAR TO THE DEALER SEVERAL TIMES AND THEY WERE NEVER ABLE TO REPRODUCE THE PROBLEM. JUST RECENTLY I DISCOVERED THAT THE PROBLEM IS CAUSED BY MY "BIG FEET" -I AM A SIZE 14. IF MY FOOT IS STRAIGHT UP AND DOWN THE TOP OF MY SHOE OR BOOT RESTS AGAINST THE METAL BRACKET AND I LOSE ALL THE LEVERAGE ON THE BREAK. IN ESSENCE - I HAVE TO STAND ON THE BREAK TO MAKE THE CAR STOP. I NOW TRY TO REMEMBER TO KEEP MY FOOT TILTED TO THE SIDE SO THAT I ONLY PUSH ON THE RUBBER PAD OF THE BREAK PEDAL. I DON'T BELIEVE THAT I SHOULD ALTER HOW I APPLY THE BREAKS TO GET THEM TO WORK. THE BREAK PEDAL DESIGN NEEDS TO BE CHANGED. AT LEAST TWICE I HAVE HAD NEAR ACCIDENTS WHEN I FOOT TO STOP SUDDENLY AND MY REFLEX WAS TO BREAK NORAMLLY - NOT TILT MY FOOT TO THE SIDE. I ENTERED THE LAST DATE THIS OCCURED.

**NHTSA ODI Number:** 10306449  
**Date of Incident:** 20100111  
**Vehicle:** 2010 TOYOTA PRIUS  
**Location of Incident:** LITTLE ROCK, AR

**NHTSA Summary:**  
THE CRUISE CONTROL ON MY 2010 TOYOTA PRIUS DOES NOT ALWAYS CANCEL WHILE BRAKING. THIS HAS RESULTED IN UNINTENDED ACCELERATION AFTER BRAKING WHILE THE CRUISE CONTROL HAS BEEN SET. A DRIVER EXPECTS THAT THE CRUISE CONTROL WILL AUTOMATICALLY CANCEL WHILE APPLYING THE BRAKES BUT THIS DOES NOT HAPPEN UNDER LIGHT BRAKING. THIS IS EVEN MORE PRONOUNCED WHILE DRIVING UP A STEEP HILL. ON JANUARY 11TH, 2010, I WAS IN A SITUATION WHERE I ACTUALLY APPLIED THE BRAKES TO REDUCE MY SPEED WHILE TRAVELING UP A STEEP HILL AND FELT THE CAR "FIGHTING" AGAINST ME TO MAINTAIN A STEADY SPEED. AFTER I HAD SLOWED MY PRIUS TO MATCH THE SPEED OF THE CAR IN FRONT OF ME, THE CRUISE CONTROL UNEXPECTEDLY CAUSED THE CAR TO ACCELERATE AGAIN, PLACING ME AT A LESS THAN SAFE DISTANCE TO THE CAR IN FRONT OF ME AS WE CRESTED THE HILL.

**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** DELRAY BEACH, FL

**NHTSA Summary:**  
ON JANUARY 12, 2010, I HAD MY 2003 CAMRY DETAILED (WASHED INSIDE AND OUT-INCLUDING THE CARPET)AT A CAR WASH. I PROCEEDED TO A NEARBY MALL,WHERE I STOPPED BRIEFLY AT A STORE. UPON EXITING THE PARKING LOT, I MADE A FULL STOP AT THE STOP SIGN. I THEN PROCEEDED TO GO BY STEPPING ON THE ACCELERATOR. AT THIS POINT THE CAR SUDDENLY ACCELERATED TO A HIGH SPEED, AND I WAS NOT ABLE TO STOP IT, EVEN THOUGH I WAS PRESSING ON THE BRAKE. THE CAR WENT ACROSS 3 LANES & UP, OVER, AND DOWN A MEDIAN,CONTINUED TO GO ACROSS ANOTHER 3 LANES AND FINALLY CAME TO REST AFTER HITTING A TREE ON ANOTHER MEDIAN. TO THE BEST OF MY KNOWLEDGE, THE ACCELERATOR BECAME STUCK IN THE DOWN POSITION, AND PUSHING DOWN ON THE BRAKE TO THE LEFT OF IT DID NOT HELP, NOR DID THE STEERING WHEEL TURN AS I WAS TRYING TO AVOID HITTING THE TREE. ALSO, PLEASE BE AWARE THAT MY FRONT AIR BAG DID NOT DEPLOY. AT THE TIME, I HAD NO VISIBLE SIGNS OF INJURY, BUT INJURIES BECAME APPARENT SOON AFTER, AND CAN BE VERIFIED BY A DOCTOR. A POLICE REPORT IS AVAILABLE, IF NEEDED. THE VEHICLE WAS TOWED TO A COLLISION SHOP, WAITING TO BE REPAIRED. A CLAIM WAS FILED WITH TOYOTA MANUFACTURING. THE FAILURE MILEAGE WAS ABOUT 52,000. \*JB  
TL\*THE CONTACT OWNS A 2003 TOYOTA CAMRY. WHILE DRIVING 5 MPH THE VEHICLE ACCELERATED ACROSS THE PARKING LOT AND AS SHE DEPRESSED THE BRAKE PEDAL THE VEHICLE WOULD NOT STOP AND CRASHED INTO A TREE. THERE WERE NO INJURIES. A POLICE REPORT IS AVAILABLE IF NEEDED. THE VEHICLE WAS TOWED TO A DEALER TO BE REPAIRED. A CLAIM WAS FILED WITH THE TOYOTA MANUFACTURER. THE FAILURE MILEAGE WAS 52,700.  
**Additional Summary:**  
On January 12, 2010, I had my 2003 Camry detailed (washed inside and out(including carpet) at a Car Wash. I proceeded to a nearby Mall, where I stopped briefly at a store. Upon exiting the Parking Lot, I made a full stop at the Stop Sign. I then proceeded to go by stepping on the accelerator. At this point, the car suddenly accelerated to a high speed and I was not able to stop it, even though I was pressing on the brake. The car went across 3 lanes, & up, over, and down a median, continued to go across another 3 lanes and finally came to rest after hitting a tree on another median. To the best of my knowledge, the accelerator became stuck in the down position, and pushing down on the brake to the left did not help, nor did the steering wheel turn, as I was trying to avoid hitting the tree. The only thing that stopped the car was hitting the tree, which fell down, and broke into pieces. The car landed on top of the fallen tree. Also, please be aware that my front air bag did not deploy. At the time, I had no visible signs of injury, but injuries became apparant soon after, and can be verified by a doctor. A police report is available. The case number is 10-01872. My insurance company was notified. I called Toyota's main office and I filed a report. I have a case manager and my case number is 1001124426. My car was towed to a collision repair shop where it has been sitting in storage. The mechanic has not touched the car because I am waiting for a call from someone at Toyota's regional office in Deerfield Beach, Florida. I spoke to her last week and she was supposed to call me this past Tuesday,

**NHTSA Summary:**  
APPROXIMATELY 1ST WEEK OF JANUARY, 2010, AUTO DEMONSTRATED SEVERAL PERIODS OF IDLING ROUGH WHILE STOPPED AT TRAFFIC LIGHTS OR STOP SIGNS.

C-1816

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BEGINNING OF 2ND WEEK OF JANUARY, 2010, I WAS DRIVING MY AUTO ON A COLD, DRY DAY AND STOPPED AT STOP SIGN AND STOPPED AT TRAFFIC LIGHT AND AUTO DEMONSTRATED 2 EPISODES OF UNINTENDED EXCESSIVE ACCELERATION LASTING APPROXIMATELY 1-3 SECONDS, THEN IMMEDIATELY DEMONSTRATED APPROXIMATELY 30 SECONDS OF UNINTENDED UNDERACCELERATION, AND THEN RESUMED NORMAL ACCELERATION FOR 5-6 MILES. THE FIRST EPISODE OF PREVIOUS DESCRIBED ACCELERATION ISSUES, OCCURRED AFTER I HAD LEFT MY GARAGE AND DROVE FOR 1 MILE. THE SECOND EPISODE OF PREVIOUS DESCRIBED ACCELERATION ISSUES OCCURRED AFTER I HAD DRIVEN THE AUTO FOR APPROXIMATELY 5-6 MILES. ON 01/13/2010, I TOOK AUTO TO DEALER, FOR ROUTINE SERVICE AND ASKED THEM TO CHECK ACCELERATION ISSUES THAT HAD RECENTLY OCCURRED. SERVICE TECH NO CODES PENDING, CURRENT OR IN HISTORY. SALES MANAGER SAID THESE ISSUES COULD HAVE BEEN CAUSED BY MY AUTO BEING PARKED IN WARM GARAGE AND THEN DRIVING IN COLD WEATHER. NOTE THAT MY AUTO 2007 LEXUS IS 350 WAS ON RECALL LIST AND THERE WAS NO DRIVER FLOOR MAT IN MY AUTO AT TIME OF DESCRIBED ACCELERATION ISSUES. LEXUS HAD ADVISED ME BY LETTER TO REMOVE DRIVER SIDE FLOOR MAT. ON 2/23/2010, I EXPERIENCED IDENTICAL ACCELERATION ISSUE AS DESCRIBED PREVIOUSLY. THE WEATHER WAS WARMER THAN DAY OF PREVIOUS EPISODE AND ROADS WERE DRY. I LEFT MY GARAGE AND DROVE 5-6 MILES AND STOPPED AT STOP SIGN. IN THE DIRECTION I WAS GOING THE ROAD WAS SLOPPING SLIGHTLY DOWNHILL AT STOP SIGN SO I APPLIED SLIGHT PRESSURE TO ACCELERATOR WHEN PROCEEDING THROUGH STOP SIGN INTERSECTION. MY AUTO DEMONSTRATED THE SAME SEQUENCE AS PREVIOUSLY DESCRIBED ACCELERATION ISSUES. I DID NOT HAVE DRIVER SIDE FLOOR MAT. I TOOK AUTO TO DEALER SERVICE. TECH FOUND NO PROBLEMS. DEALER OPENED TAS CASE 100540139 & ADVISED FTS. I CALLED LEXUS CUSTOMER SERVICE AND WAS TOLD SOMEONE WOULD CALL ME.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10314182  
**Date of Incident:** 20100112  
**Vehicle:** 2010 TOYOTA CAMRY  
**Location of Incident:** ROCHESTER HILLS, MI

**NHTSA Summary:**  
 I AM REQUESTING THAT DOT NHTSA INVESTIGATE THE DRIVER'S CONTRIBUTION TO UNINTENDED ACCELERATION (UA) AND TOYOTA'S ACCELERATOR/BRAKE PEDAL DESIGNS THAT MAKE IT POSSIBLE. I WAS DRIVING A RENTED TOYOTA CAMRY IN A PARKING LOT. I APPLIED THE BRAKE AND INSTEAD OF SLOWING DOWN THE VEHICLE BEGAN TO GAIN SPEED. I PRESSED HARDER ON THE BRAKE AND IT ACCELERATED. THE HARDER I TRIED TO STOP THE CAR THE FASTER IT WENT. I TOOK MY FOOT OFF THE BRAKE FOR A MOMENT AND THE VEHICLE STOPPED ACCELERATING. I BELIEVE THAT MY FOOT WAS ON BOTH THE BRAKE AND THE ACCELERATOR PEDALS. I MEASURED THE DISTANCE BETWEEN THE BRAKE AND THE ACCELERATOR AND FOUND THAT IT WAS ONLY 1.5 INCHES. MY VEHICLE A GM ACADIA IS 2.5 INCHES. THIS MADE ME THINK THAT THE TOPS OF THE TWO PEDALS ARE TOO CLOSE TOGETHER. I MANAGED TO FIND 6 DIFFERENT TOYOTA MODELS INCLUDING THE PRIUS AND THEY AVERAGED 1.5 INCHES BETWEEN THE TOPS OF THE BRAKE AND THE ACCELERATOR PEDALS. I MEASURED COMPETITIVE VEHICLES AND FOUND THEY AVERAGED 2.2 INCHES. SOMETHING IS WRONG WITH THE TOYOTA DESIGNS & THEY ARE TOO CLOSE TOGETHER. I HAVE CONTINUED TO INVESTIGATE UNINTENDED ACCELERATION AND HAVE COLLECTED A SIGNIFICANT AMOUNT OF DATA THAT SUPPORTS THE FACT THAT THE DRIVER IS A MAJOR CAUSE OF UA AND THAT SOME VEHICLE DESIGNS MAKE IT POSSIBLE. I HAVE CONDUCTED DRIVING TESTS AND SIMULATED THE CONDITIONS THAT CAUSE UA. THEY CLEARLY IDENTIFY THAT TOYOTA PEDAL DESIGNS CONTRIBUTE TO THE DRIVER BEING

**C-1817**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

A CAUSE OF UA. GOOD VEHICLE PEDAL DESIGNS MAKE IT VERY DIFFICULT TO SIMULTANEOUSLY AND UNINTENTIONALLY DEPRESS BOTH PEDALS. FROM THE ODI INCIDENT REPORTS GM VEHICLES SEEM TO BE PARTICULARLY INSENSITIVE WHILE THE FORD 150 TRUCK SEEMS TO HAVE A LARGE NUMBER OF COMPLAINTS. THERE MUST BE SOMETHING IN THE PEDAL DESIGNS OR OPERATION THAT MAKES THIS POSSIBLE. I HAVE READ TWO OLDER DOT REPORTS CONCERNING UA AND THEY INDICATE THAT THE DRIVER IS A CAUSE OF UA. WHY IS THAT NOT STUDIED AND ACKNOWLEDGED NOW? PLEASE FORMALLY INVESTIGATE.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10314742  
**Date of Incident:** 20100112  
**Vehicle:** 2010 TOYOTA HIGHLANDER  
**Location of Incident:** GRAFTON, WI

**NHTSA Summary:**  
 I HAVE A 2010 TOYOTA HIGHLANDER BASE MODEL. WHEN CRUISER CONTROL IS ACTIVATED AND WHEN THE VEHICLE IS MOVING SLIGHTLY UPHILL, THE VEHICLE USUALLY ACCELERATES TO A SPEED THAT IS MUCH HIGHER (OVER 5 MI/HR HIGHER) THAN THE SET SPEED. THIS SITUATION HAPPENED SEVERAL TIMES AND WAS WORRYING, ESPECIALLY WHEN MY WIFE WAS DRIVING. I PURCHASED THE VEHICLE ON DECEMBER 28TH, 2009. I GUESS THAT THE LOCAL DEALER (HEISER TOYOTA, MILWAUKEE) MUST BE AWARE OF THE PROBLEM AT THE TIME OF MY PURCHASE BUT PRETENDED TO NOT KNOW THE PROBLEM, BECAUSE THE SPECIFIC SALESPERSON (ART STAMOS) TOLD ME AND MY WIFE DURING VEHICLE DELIVERY THAT, IN CASE OF UNCONTROLLED ACCELERATION, WE SHOULD PUT GEAR TO NEUTRAL AND FIRMLY PRESS BRAKE PEDAL. I SUGGEST THAT YOUR OFFICE REQUEST TOYOTA TO NOT ONLY RECALL BUT BUY-BACK ALL TOYOTA VEHICLES THAT WERE SOLD DURING THE TOYOTA'S MOST RECENT PROMOTION PERIOD (TOYOTATHIONE) IN WHICH TOYOTA WAS AWARE OF THE PROBLEM BUT DECIDED TO DO NOTHING.

**Additional Summary:**

**Toyota ID Number:**

THROUGH THE LIGHT WITHOUT ANY PROBLEMS WITH THE ACCELERATION, BRAKE OR STEERING. I SAID TO MY FRIEND, "THAT WAS WIERD." I THOUGHT IT WAS A FLUX BUT THEN WHEN I STARTED READING ABOUT ALL OF THE PROBLEMS WITH TOYOTA I BECAME CONCERNED. I CALLED OUR LOCAL DEALER AND HE SAID THAT 2007 MATRIX WERE NOT PART OF THE RECALL. HE OFFERED TO DRIVE THE CAR AROUND TO SEE IF THERE WERE ANY PROBLEMS. I HAVE NOT HAD ANY FURTHER PROBLEMS AND DID NOT TAKE IT IN FOR HIM TO DRIVE AROUND. (I HAD THEM DO A REGULAR MAINTENANCE CHECK WHEN I FIRST BOUGHT THE CAR AND THEY THEY DID FAR MORE "MAINTENANCE" THAN WAS RECOMMENDED IN THE MANUAL AND I THINK TOOK ADVANTAGE OF MY IGNORANCE ABOUT CAR MAINTENANCE. IT MADE ME SUSPICIOUS SO I DON'T REALLY TRUST THE DEALER.)

**NHTSA Summary:**  
 AFTER HAVING AN OXYGEN SENSOR REPLACED IN THE EXHAUST SYSTEM OF MY 2002 TOYOTA RAV4 ON 02/02/10, I NOTICED THAT MY CAR BEGAN ACCELERATING SLUGGISHLY. APPROXIMATELY 50 MILES AFTER THE SERVICE WAS PERFORMED, I NOTICED MY CAR JERKED WHEN SHIFTING THROUGH GEARS 1-3 AND THE TACHOMETER WOULD REV TO

**C-1820**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

3000 RPMs. THE CAR THEN RAN FINE FOR APP. 4 DAYS WITH NO GEAR SLIPPAGE. A WEEK LATER THE GEARS STARTED SLIPPING AGAIN WITHOUT WARNING AND THE CAR SEEMED TO HAVE NO POWER WHEN THE GAS PEDAL WAS FULLY ENGAGED DURING A RIGHT HAND TURN TO MERGE WITH ONCOMING TRAFFIC. THE CAR THEN BUCKED VIOLENTLY. THIS RESULTED WITH MY PASSENGER AND I BECOMING ANXIOUS/SCARED BECAUSE WE DIDN'T KNOW IF THE TRAFFIC COMING TOWARD US WOULD HAVE HIT US IF WE SUDDENLY LOST POWER. I IMMEDIATELY DROVE MY CAR HOME WHERE IT HAS REMAINED PARKED AND SET AN APPOINTMENT WITH A TOYOTA DEALER EXPLAINING THE PROBLEMS. ACCORDING TO SIMILAR STORIES FROM FELLOW RAV4 OWNERS, THERE IS A PROBLEM WITH THE ELECTRONIC CONTROL MODULE CAUSING IRREVERSIBLE DAMAGE TO THE TRANSMISSION. I AM TAKING THE CAR TO THE DEALER TO HAVE IT OFFICIALLY DIAGNOSED ALTHOUGH IT ONLY CODES TO HAVE THE O2 SENSOR REPLACED, WHICH I DID. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10310738  
**Date of Incident:** 20100113  
**Vehicle:** 2003 LEXUS ES300  
**Location of Incident:** LOUISVILLE, KY

**NHTSA Summary:**  
 ON JANUARY 13, 2010 WHILE MY WIFE WAS DRIVING OUR LEXUS ES 300, THE CAR ACCELERATED AS SHE WAS ENTERING A PARKING SPACE, CAUSING THE CAR TO COLLIDE WITH A POLE IN THE PARKING LOT. THE DEALER WHERE WE PURCHASED THE VEHICLE (LEXUS OF LOUISVILLE) WOULD NOT REPAIR THE VEHICLE BECAUSE IT CLAIMED THE CAR WAS NOT ONE OF THE MODELS RECALLED. WE REPAIRED DAMAGE TO THE BODY AT A COST OF \$2500, BUT ARE NOW CONCERNED THAT THE VEHICLE IS NOT SAFE TO DRIVE. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10312189  
**Date of Incident:** 20100113  
**Vehicle:** 2010 TOYOTA RAV4  
**Location of Incident:** MARTLBORO, NJ

**NHTSA Summary:**  
 ON 2 OCCASIONS, MY 2009 TOYOTA RAV 4 WITH A SERIAL # BEGINNING WITH A "J" EXPERIENCED SUDDEN ACCELERATION. ALTHOUGH THERE WAS NO DAMAGE ON EITHER INCIDENT, THE DEALERSHIP STATED THAT THERE WAS LITTLE THEY COULD DO AS THE RECALL FOR SUDDEN ACCELERATION DID NOT APPLY TO TOYOTA RAV 4S WITH A "J" SERIAL CODE. I EXPLAINED UPON BRINGING THE VEHICLE IN ON 2/17/10 TO DCH TOYOTA, RT 9 SO., FREEHOLD, NJ., THAT BOTH OF MY SUDDEN ACCELERATION CASES OCCURRED BEFORE THE RECALL NOTICE AND THAT I, IN FACT CALLED DCH ON 1/13/10 & ON 1/24/10 AND REPORTED THE PROBLEM. ON BOTH OCCASIONS I WAS TOLD BY THE SERVICE DEPARTMENT TO BRING THE CAR IN FOR SERVICE BUT IT WAS NOT SUBJECT TO RECALL BECAUSE OF THE "J" SERIAL. I DID BRING THE CAR IN ON 2/17 AND WAS TOLD, AFTER INSPECTION, THAT SINCE NO SUDDEN ACCEL. WAS EXPERIENCED DURING THE SERVICE, NOTHING COULD BE DONE AND NO REMEDIAL ACTION COULD BE TAKEN. MY CONTENTION, AND THE REASON FOR MY COMPLAINT IS THAT SUDDEN ACCELERATION IN THE RAV 4 IS, WITHOUT A DOUBT, OCCURRING IN THIS CAR WITH A "J" SERIAL # AND SHOULD BE COVERED BY THE RECALL AND REMEDIATION SHOULD EXTEND TO THIS VEHICLE. I DO BELIEVE THAT OTHER "J" SERIAL CARS HAVE BEEN INVOLVED IN

**Toyota ID Number:**  
**NHTSA ODI Number:** 10302181  
**Date of Incident:** 20100114  
**Vehicle:** 2009 TOYOTA TACOMA  
**Location of Incident:** MARIETTA, GA

**NHTSA Summary:**  
 I AM REPORTING AN INCIDENT I HAD WITH MY 2009 TOYOTA TACOMA PICKUP TRUCK. I WAS STOPPED AT A RED LIGHT, WITH BOTH FEET ON THE BRAKE, WHEN THE ENGINE STARTED REVVING UP. I ENGAGED THE EMERGENCY BRAKE AS WELL, AND SHIFTED INTO NEUTRAL. THE ENGINE CONTINUED TO RACE, UNTIL I REPEATEDLY PUMPED THE ACCELERATOR AND IT SLOWED BACK DOWN. A TRIP TO THE DEALER (COBB COUNTY TOYOTA, KENNESAW GA) REVEALED NOTHING. THE FLOOR MAT WAS STILL FASTENED BY ITS HOOKS, AND WAS NOWHERE NEAR THE ACCELERATOR PEDAL. THIS OCCURRED ON JANUARY 14, 2009 WHEN THE VEHICLE HAD APPROXIMATELY 2,100 MILES ON IT. **NHTSA ODI Number:** 10303946  
**Date of Incident:** 20100114  
**Vehicle:** 2007 LEXUS RX350  
**Location of Incident:** MILL VALLEY, CA

**NHTSA Summary:**  
 SINCE PURCHASING MY 2007 RX350 LEXUS, I HAVE HAD MULTIPLE INSTANCES WHERE, UPON ATTEMPTING TO ACCELERATE WITH FOOT ON GAS PEDAL, THERE IS A HESITATION, FOLLOWED BY A LURCH/AND OR UNCONTROLLED ACCELERATION. THESE EPISODES HAVE ONLY LASTED A FEW SECONDS, AND HAVE SEEM TO REMEDY BY REMOVING FOOT FROM GAS PEDAL. OR APPLYING PRESSURE TO GAS PEDAL. ALTHOUGH, I HAVE NOT HAD A SITUATION WHERE THE CAR IS "OUT OF CONTROL" AND HAVE NOT HAD ANY ACCIDENT, THESE EPISODES ARE SCARY. I REPORTED THIS BEHAVIOR TO MY LEXUS DEALER WITHIN A FEW WEEKS OF OWNERSHIP. THEY TESTED IT AND DEEMED THE CAR SAFE TO DRIVE. IT IS NOT MY EXPERIENCE THAT THESE INSTANCES ARE CAUSED BY THE PEDAL GETTING CAUGHT ON THE CARPET, OR BY A "STICKY" PEDAL AS DESCRIBED BY THE DEALERSHIP ON MODELS CURRENTLY RECALLED. I HAVE NOTIFIED MY DEALER, AGAIN, OF THE SITUATION IN HOPES THAT THIS WILL GAIN WIDER ATTENTION, AND TOYOTA WILL MAKE THE REPAIRS NEEDED TO REMEDY THE PROBLEM. I AM PERSONALLY AWARE OF AT LEAST ON FATALITY OF SOMEONE DRIVING THE EXACT SAME MODEL AS MY CAR. I DO NOT WANT TO WIND UP LIKE HIM. PLEASE INVESTIGATE THIS SITUATION FURTHER. \*TR

**Additional Summary:**

**Date of Incident:** 20100115  
**Vehicle:** 2007 TOYOTA FJ CRUISER  
**Location of Incident:** INDIANAPOLIS, IN  
**NHTSA Summary:**

I DRIVE A 2007 TOYOTA FJ CRUISER AND HAVE EXPERIENCED PROBLEMS WITH BRAKING ON AT LEAST THREE OCCASIONS. I HAVE HEARD FROM MANY OTHER FJ CRUISER DRIVERS WHO HAVE ALSO EXPERIENCED THIS PROBLEM. WHEN DRIVING AT RELATIVELY LOW SPEEDS (BELOW 40 MPH) AND ATTEMPTING TO BRAKE, SUCH AS AT A STOPLIGHT, THE BRAKES WILL LOCK UP CAUSING THE VEHICLE TO CONTINUE TO ROLL FORWARD EVEN WHILE THE BRAKE IS BEING PRESSED. IT SEEMS AS THOUGH THE ABS KICKS IN AS YOU CAN FEEL THE "SCRAPING" FEELING THROUGH THE PEDAL. FROM ALL OTHER ACCOUNTS AND BASED ON MINE, IT SEEMS THE COMMON FACTOR IS ROLLING OVER UNEVEN TERRAIN WHILE BRAKING, SUCH AS A POTHOLE, MANHOLE COVER, OR JUST BUMPY ASPHALT. SO FAR I WAS FORTUNATE NOT TO HAVE ANOTHER CAR DIRECTLY IN FRONT OF ME. HOWEVER, I CAM DANGEROUSLY CLOSE TO ROLLING THROUGH A RED LIGHT WHICH COULD HAVE CAUSED A COLLISION WITH THE TRAFFIC WHICH HAD THE GREEN LIGHT. THERE ARE AT LEAST DOZENS OF THESE SAME REPORTS WHICH I'VE READ ON JUST ONE FJ CRUISER OWNER FORUM. ALL ARE CONSISTENT WITH BRAKING OVER UNEVEN TERRAIN WHICH RESULTS IN THE VEHICLE CONTINUING TO ROLL FORWARD.

**Location of Incident:** ANNANDALE, VA  
**NHTSA Summary:**

2003 TOYOTA CAMRY LE 4-CYLINDER. 66,000 MILES. OCCASIONAL MINOR "LUNGING FORWARD" FROM STATIONARY POSITION. ON ONE OCCASION, WHILE SITTING AT A BANK DRIVE-UP WINDOW, THERE WAS A RAPID INCREASE IN GAS FEED WHEN I DEPRESSED THE ACCELERATOR PEDAL. SLIGHTLY BUT WHEN I DEPRESSED THE BRAKE IT RETURNED TO NORMAL IDLING. I AM CONCERNED THAT THE PROBLEM IS RELATED TO THE GENERAL TOYOTA ACCELERATOR PROBLEM AND COULD GET WORSE. NO ACCIDENTS TO DATE. DATE INDICATED IS ONLY APPROXIMATE. I WOULD HAVE MADE A SPECIFIC NOTATION OF THE DATE IF I HAD KNOWN ABOUT THE GENERAL PROBLEM WITH TOYOTAS AT THE TIME OF THE INCIDENTS. I REPORTED MY CONCERN VERBALLY A FEW DAYS AGO TO THE NATIONAL TOYOTA TELEPHONE CONTACT (AND WAS TOLD THAT MY CALL WAS BEING RECORDED) BUT HAVE NOT RECEIVED A REPLY. ANOTHER CONCERN IS THE GENERAL "CHECK ENGINE LIGHT" PROBLEM THAT TOYOTAS HAVE. TOYOTA SAYS THE PROBLEM IS CAUSED BY CLICKING THE GAS CAP MORE THAN ONCE WHEN REATTACHING IT AFTER FILLING UP WITH GAS. THIS SEEMS TO BE A RATHER FLAKEY EXCUSE, AND I HAD TO PAY THE DEALER TO TURN OFF THE CHECK ENGINE LIGHT MORE THAN ONE YEAR AGO BUT RECENTLY RECEIVED AN OFFER FROM THE DEALER TO FIX THESE PROBLEMS FOR FREE. ARE THE ACCELERATOR PROBLEM AND THE CHECK ENGINE LIGHT PROBLEM RELATED TO THE TOYOTA COMPUTER SYSTEM? \*TR

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**  
CRUISE CONTROL THROWS YOU BACK IN YOUR SEAT AS SOON AS IT KICKS IN GOING UP A SMALL INCLINE. WE'VE NEVER HAD A CRUISE CONTROL THAT THROWS YOU VIOLENTLY BACK IN YOUR SEAT. IT ONLY HAPPENS WHEN THE CRUISE CONTROL IS ON - WE FEEL IT IS AN ELECTRONIC PROBLEM. THE TOYOTA DEALER SAYS THEY HAVEN'T HAD ANY COMPLAINTS; WE DON'T USE OUR CRUISE CONTROL ANYMORE JUST IN CASE ONE DAY THE BRAKES WON'T MAKE THE CRUISE KICK OUT. THIS IS THE FIRST NEW CAR WE PURCHASED IN THIRTY YEARS AND NOW IT'S BEEN RECALLED AND THE SAFETY OF THIS CAR IS NOW IN QUESTION. VERY DISAPPOINTING!

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ON A FEW OCCASIONS (4-8 TIMES), THE GAS PEDAL HAS GOTTEN STUCK. IN SUCH A WAY, THAT THE VEHICLE ACTUALLY ACCELERATED. IT HAS HAPPENED FROM A COMPLETE STOP GOING UP TO 20-25 MPH, AND WHILE ON THE FWY, DRIVING APPROX. 65 MPH. THE FIRST TIME, WHILE DRIVING FROM COMPLETE STOP TO ABOUT 20-25 MPH, MY WIFE NOTICED THE VEHICLE ACCELERATING, SHE TURNED INTO A SMALLER STREET, THEN FORCED THE SHIFTER INTO PARK, AND PULLED UP THE E-BRAKE. ALL OTHER TIMES, WE SIMPLY TAP, OR PUMP, THE ACCELERATOR PEDAL FOR IT TO GET 'UNSTUCK'.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10318344  
**Date of Incident:** 20100115  
**Vehicle:** 2006 TOYOTA COROLLA  
**Location of Incident:** SACRAMENTO, CA  
**NHTSA Summary:**  
MY 2006 TOYOTA COROLLA HAS HAD SEVERAL EPISODES OF UNINTENDED ACCELERATION WHILE GOING DOWN STEEP MOUNTAINS SUCH AS THE GRAPEVINE PASS NEAR LA AND HIGHWAY 101 BETWEEN LA AND SANTA BARBARA. WHILE GOING DOWNHILL, MY 21 YEAR OLD DAUGHTER TRIED TO STEP ON THE BREAKS TO SLOW DOWN THE CAR, BUT IT SUDDENLY ACCELERATED TO 90 MILES AN HOUR AND SHE HAD SOME VERY VERY SCARY MOMENTS... WE HAVE TAKEN THE CAR TO 2 DIFFERENT TOYOTA DEALERSHIPS ON SEVERAL OCCASIONS AND CALLED TOYOTA'S CUSTOMER SERVICE NUMBER AND SERVICE SUPERVISORS BUT OUR COMPLAINTS WERE IGNORED ON GROUNDS THAT THE 2006 COROLLA WAS "NOT ON THE RECALL LIST" OR THAT THEY COULD NOT "REPLICATE THE PROBLEM". SINCE THE PROBLEM ONLY HAPPENS ON STEEP, DOWNHILL ROADS WHEN MY DAUGHTER STEPS ON THE BREAKS TO SLOW DOWN THE CAR, IT NATURALLY CANNOT BE REPLICATED ON THE FLAT SURFACES OF SACRAMENTO OR ONTARIO, CA. AFTER GIVING TOYOTA SUCH SPECIFIC INFORMATION, ONE WOULD HOPE THAT THEY WOULD TRY TO EXPLORE IT, FIX IT OR REPLACE THE CAR GIVEN THE HIGH DEGREE OF DANGER AND THE HIGH INCIDENCE OF DEADLY CRASHES IN RECENT YEARS. WE ARE VERY FRUSTRATED WITH THEIR FAILURE TO FIX THE PROBLEM OR REFUND US THE BLUE BOOK VALUE. SO THAT WE COULD PURCHASE A SAFER CAR FOR OUR CHILD. THE PROBLEM REOCCUR EVERY TIME MY DAUGHTER DRIVES THIS ROUT TO COME HOME FROM COLLEGE ON VACATIONS. SHE HAS ADAPTED BY DRIVING ONLY 55 MILES PER HOUR ON THE GRAPEVINE PASS ON THE SLOWEST LANE. HOWEVER, NOW THAT WE ARE COGNIZANT OF THE PROBLEM AND HEAR ABOUT SO MANY OTHER PEOPLE WITH SIMILAR COMPLAINTS, WE ARE SIMPLY TERRIFIED AND WANT TO BUY HER A NEW AND A SAFER CAR. WE FEEL TOTALLY FRUSTRATED BY TOYOTA'S FAILURE TO ADDRESS THE PROBLEM AND BY THEIR TENDENCY TO BRUSH IT OFF DESPITE THE MANY FATALITIES. PLEASE CONTINUE TO PUT GOVERNMENTAL PRESSURES ON TOYOTA AND INSIST THAT THEY FIX THE PROBLEM RATHER THAN HIDE FROM IT AND ABDICATE THEIR RESPONSIBILITY TO THEIR CLIENTS AND OTHER INNOCENT DRIVERS. PLEASE HELP US AND PLEASE CALL OR EMAIL US.

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**

I OWN A 2008 TOYOTA HYBRID HIGHLANDER. I HAVE EXPERIENCED A "LAG" BEFORE THE BRAKES KICK IN AND IT SEEMS LIKE THE CAR IS ACCELERATING AS I AM BRAKING. IT FEELS AS IF WHEN IT HAPPENS I AM HITTING THE BRAKE AND GAS PEDAL AT THE SAME TIME. IT IS SOMEWHAT FRIGHTENING. IT HAS HAPPENED AT LEAST 5 TIMES SINCE I HAVE OWNED THE CAR. I BELIEVE IT IS THE SAME ISSUE AS THE PREIUS. IT FEELS LIKE A BRIEF SURGE. PLEASE INVESTIGATE AS TOYOTA IS NOT RECALLING THE HYBRID HIGHLANDER. I BELIEVE IT IS THE SAME TECHNOLOGY AND ISSUE THE PREIUS IS EXPERIENCING

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10315786  
**Date of Incident:** 20100117  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** LA CRESCENTA, CA

**NHTSA Summary:**  
MY 2005 TOYOTA CAMRY HAS HAD NO PROBLEMS AND HAS BEEN MAINTAINED AS RECOMMENDED FOR 5 YEARS UP TO THE DATE OF THE ACCIDENT WHICH OCCURRED ON JANUARY 17, 2010. I WAS PULLING INTO A PARKING SPOT AT APPROXIMATELY 1 MILE PER HOUR, LIGHTLY TOUCHED THE BRAKE AND INSTEAD OF STOPPING THE CAR LUNGED FORWARD (SELF-ACCELERATED) UP OVER A CONCRETE BLOCK, ONTO A SIDEWALK AND CAME TO A STOP WHEN IT HIT A HEAVY METAL RAILING. AN 8' SECTION OF THE RAIL WAS BROKEN OFF AND FELL 4' AWAY FROM THE CAR. I REPORTED THE ACCIDENT TO THE POLICE AND TO MY INSURANCE COMPANY. A TOW TRUCK DRIVER GOT THE CAR MOVED, CHECKED THE BRAKES - WHICH HE SAID WERE WORKING PROPERLY - AND SUGGESTED THAT THE ACCIDENT MAY HAVE BEEN CAUSED BY A STUCK THROTTLE. NEITHER THE FLOOR MATS OR THE GAS PEDAL CAUSED THE PROBLEM. THE DAMAGE TO THE CAR CAME TO \$2200.00 BUT NOTHING WAS DONE TO FIX THE PROBLEM BECAUSE TOYOTA HAS NOT RECALLED THIS YEAR VEHICLE AND THE FORENSIC MECHANIC WHO INSPECTED IT FELT THAT IT WAS A COMPUTER PROBLEM AND THE SOLUTIONS OFFERED BY TOYOTA WOULD NOT ADDRESS THE RANDOM ACCELERATION PROBLEM.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10319949  
**Date of Incident:** 20100117  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** CHESTER, VA

**NHTSA Summary:**  
TL- THE CONTACT OWNS A 2007 TOYOTA CAMRY. THE DRIVER STATED THAT WHEN ACCELERATING ON THE INTERSTATE AT APPROX 35 MPH, THE VEHICLE SEEMED AS IF THE CRUISE CONTROL ACTIVATED (IT DID NOT BUT SEEMED AS THOUGH) AND ACCELERATED UP TO 95 MPH. THE DRIVER PULLED THE ACCELERATOR PEDAL UP WITH HER FOOT. THE CONTACT TOOK THE VEHICLE TO THE DEALERSHIP AND THE DEALER REPROGRAMMED THE COMPUTER TO OVERRIDE THE ACCELERATOR IF THE BRAKE PEDAL WAS DEPRESSED. THE CONTACT HAD NOT CALLED THE MANUFACTURER TO DATE. THE CONTACT FELT THAT THE ACCELERATION ISSUE WAS ELECTRONIC. THE CURRENT MILEAGE WAS APPROXIMATELY 45,140. THE FAILURE MILEAGE WAS APPROXIMATELY 44,000-BK

**NHTSA Summary:**  
ON NUMEROUS OCCASIONS THIS VEHICLE STUDDERS WHEN MERGING ON TO TRAFFIC. ON THIS SPECIFIC INSTANCE I WAS MERGING FROM FROM TURN IN LANE. THE THROTTLE WAS SLOW TO RESPOND AFTER DEPRESSING THE ACCELERATOR PEDAL 3/4 OF THE WAY. THEN IT JUMPED/LURCHED FORWARD. I WAS NEARLY HIT BUT THE TRAFFIC COMING UP FROM BEHIND. THIS HAS OCCURED ON MULTIPLE OCCAIONS IN THE PAST, BEGINNING WITH 20000 MILES ON THE CAR. HAD BROUGHT IT TO THE DEALER'S ATTENTION IN THE PAST AND WAS TOLD THAT THIS IS A "DESIGN FEATURE" OF THE ELECTRONIC THROTTLE. THEY SEEMED TO BE AWARE OF THE PROBLEM BUT COULD NOT OFFER ANY SOLUTION. THE ECM WAS REPROGRAMMED ONCE UNDER WARRANTY BUT THAT ALSO DID NOT SOLVE THE PROBLEM.

**NHTSA Summary:**  
**Additional Summary:**  
On January 18, 2010 while traveling in extremely heavy rain on a San Diego freeway, my car accelerated twice for no reason. I was traveling at about 50 mph. My vehicle accelerated, on its own, to about 63 mph (or at least that was what was showing at the time I looked at it when I noticed the car speeding up). It scared me and I immediately lifted my foot from the pedal. My vehicle slowed back down 50 mph and I maintained at that speed for awhile. About 10 minutes later I needed to speed up again and the same thing repeated itself. I then found that my vehicle didn't do it again if I kept it under 50-55 mph. I reached my destination about 30 minutes later. Since I was following my boyfriend, Mike Bass, to our location, I mentioned it to him because I was concerned I was going to be making a 100 mile drive shortly thereafter. The vehicle sat in the rain for about 2 hours before I proceeded on a 100 mile journey. By this time the rain had stopped and the freeway heading to the Inland Empire was relatively dry with no more rain. I felt safe driving home. Since that day my vehicle has only done it one other time. Again, it was in heavy rain. At the time of the acceleration and knowing about Toyota's thoughts about floor mats, that was the first thing I checked when the acceleration took place. Be assured that my floor mat was not the problem.

**Date of Incident:** 20100120  
**Vehicle:** 2007 LEXUS RX400H  
**Location of Incident:** JACKSON, WY

**NHTSA Summary:**  
I RECENTLY PURCHASED A USED 2007 LEXUS RX 440H WITH 22,000 MILES ON THE ODOMETER. IMMEDIATELY (AND SEVERAL WEEKS PRIOR TO LEARNING OF POTENTIAL TOYOTA AND LEXUS ACCELERATION AND BRAKING ISSUES) I NOTED THAT WHEN BRAKING FROM A LOW SPEED, SAY 20 MPH AT A STOP SIGN, THE BRAKES WOULD INITIALLY TAKE HOLD IN A NORMAL MANNER AND THEN, FOR A VERY BRIEF TIME, IT FELT AS IF THE CAR WAS SLIDING, THEN THE BRAKES WOULD CONTINUE TO TAKE HOLD AND BRING THE CAR TO A NORMAL STOP. TYPICALLY THIS HAS OCCURRED ON A SNOWY OR IGY SURFACE, BUT I HAVE NOT DETECTED THE ABS KICKING IN AT ANY TIME. THE ABS HAS OPERATED NORMALLY UNDER OTHER CIRCUMSTANCES. AT FIRST I ATTRIBUTED THIS TO THE HYBRID TECHNOLOGY AND REGENERATIVE BRAKING SYSTEM ON THE CAR. HOWEVER, IT NOW SOUNDS EXACTLY LIKE THE EXPERIENCE THOSE DRIVING PRIUS AND LEXUS 250H AUTOMOBILES HAVE DESCRIBED THAT HAS BEEN REPORTED IN THE MEDIA. THIS BRAKING ANOMALY OCCURS EXACTLY THE SAME WAY EVERY TIME IT OCCURS AND IT OCCURS FREQUENTLY. SO FAR I HAVE OWNED THE VEHICLE FOR LESS THAN ONE MONTH.

C-1848

**Date of Incident:** 20100121  
**Vehicle:** 1999 TOYOTA SIENNA  
**Location of Incident:** ANNAPOLIS, MD

**NHTSA Summary:**  
I AM REPORTING ANOTHER TOYOTA STICKY ACCELERATOR PEDAL... OUR 1999 SIENNA MINIVAN HAS HAD 3 INCIDENTS OF STUCK ACCELERATOR, THE MOST RECENT WAS JAN. 21, 2010. I BELIEVE IT HAS BECOME "STUCK" BETWEEN 40 AND 45MPH. OTHER INCIDENTS WERE IN SUMMER (CANNOT REMEMBER DATE) AND OCTOBER 2009. THE 1ST INCIDENT WAS BRIEF AND CORRECTED QUICKLY BY PUSHING DOWN ON THE PEDAL TO "FREE IT", THE 2ND INCIDENT REQUIRED BRAKING AND PUTTING THE CAR IN NEUTRAL AND SHOVING THE PEDAL WITH MY FOOT TO THE LEFT AND RIGHT TO FREE IT UP. I WAS ABLE TO DRIVE THE CAR TO THE SHOULDER, TURNED THE CAR OFF AND THEN THE PEDAL SEEMED TO WORK OK, ALTHOUGH A BIT SLUGGISH RESPONSE. OUR MECHANIC FIXED THE THROTTLE BODY AND THE CAR HAS NOT HAD ANOTHER INCIDENT UNTIL LAST WEEK. THE MOST RECENT INCIDENT WAS MORE HARROWING IN THAT THERE WAS NOT MUCH ROOM TO MANEUVER THE CAR SINCE WE WERE HEADED FOR LOTS OF CARS STOPPED AT A TRAFFIC LIGHT. I TRIED TO SLOW THE CAR BY BRAKING HARD WITH THE LEFT FOOT AND SHOVING THE ACCELERATOR PEDAL DOWN AND SIDE TO SIDE WHILE IN NEUTRAL BUT THIS DID NOT WORK QUICKLY LIKE THE OCTOBER INCIDENT. I WAS ABLE TO PULL OVER TO A SHOULDER BEFORE CRASHING BUT IT TOOK MUCH LONGER FOR THE CAR TO STOP THIS TIME, AND I ACTUALLY THREW THE CAR IN PARK TO STOP THE CAR! I TURNED OFF THE CAR AND AFTER A FEW MINUTES, WAS COMPOSED ENOUGH TO DRIVE IT. OUR DEALER WILL CHECK THE CAR JAN 29. THE FLOOR MAT DOES NOT APPEAR TO BE INVOLVED JAMMING INTO THE PEDAL, SO IT IS PROBABLY A MECHANICAL "CATCH" THAT IS GETTING HUNG UP WHEN THE PEDAL IS DOWN A CERTAIN DISTANCE. WE THOUGHT THE SAFETY GURUS WOULD WANT TO KNOW. LUCKILY NO CRASHES HAVE OCCURRED YET! \*TW

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10303301  
**Date of Incident:** 20100121  
**Vehicle:** 2006 TOYOTA COROLLA  
**Location of Incident:** DAVIS, CA

**NHTSA Summary:**  
I WAS TRAVELING WESTBOUND ON I-80 AT APPROXIMATELY 55-60 MILES PER HOUR DURING LIGHT RAIN. I TOOK MY FOOT OFF THE GAS PEDAL BUT THE CAR CONTINUED TO ACCELERATE. I PUSHED THE BRAKE PEDAL A FEW TIMES, BUT THE BRAKING SYSTEM WAS NON-RESPONSIVE. I REALIZED I WOULD SOON BE APPROACHING THE CAR AHEAD OF ME, SO I LOOKED IN MY MIRRORS AND OVER BOTH SHOULDERS TO DETERMINE THE LOCATIONS OF OTHER VEHICLES. I WANTED TO CHANGE LANES SO THAT I HAD MORE TIME TO ATTEMPT OTHER CORRECTIVE ACTIONS. WHEN I BEGAN THE LANE CHANGE AND WHILE MY VEHICLE WAS CONTINUING TO ACCELERATE, THE VEHICLE SPUN OUT AND I HIT THE CENTER DIVIDE HEAD-ON. THE ACCIDENT STALLED THE MOTOR. A HIGHWAY PATROL OFFICER ARRIVED ON SCENE, BUT AFTER ARRIVING HAD TO LEAVE TO GO TO A MAJOR-INJURY CRASH. \*TR

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**  
STARTED MY 2008 TOYOTA 4RUNNER. NEVER TOUCHED THE ACCELERATOR PEDAL. ENGINE RACED UNCONTROLLABLY TO AROUND 7-8000 RPM AND SHUDDERED TERRIBLY. IMMEDIATELY TURNED THE ENGINE OFF AND THEN TRIED IT AGAIN. DID SAME THING. TOOK VEHICLE TO THE DEALERSHIP WHERE THEY SAID THEY COULDN'T DUPLICATE THE SYMPTOMS AND SAID THERE WEREN'T ANY CODES STORED IN THE COMPUTER. WAS TOLD THEY WOULD CALL TOYOTA TECHNICAL TO REPORT ISSUE. NEVER HAVE BEEN CONTACTED. THIS INCIDENT ONLY REINFORCES THE BELIEF THAT TOYOTA HAS ISSUES OTHER THAN THE "RECALL FIX". I BELIEVE THAT IT IS AN ELECTRICAL/COMPUTER PROBLEM. IT SHOULD BE NOTED THAT MY VEHICLE IS NOT EVEN ON THE RECALL LIST.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10318111  
**Date of Incident:** 20100121  
**Vehicle:** 2006 TOYOTA PRIUS  
**Location of Incident:** NORCO, CA

**NHTSA Summary:**  
TL- CONTACT OWNS A 2006 TOYOTA PRIUS. THE DRIVER STATES WHILE TAKING A ROAD TRIP TRAVELING AT ABOUT 70MPH THEY SET CRUISE CONTROL AND ABOUT 10 MINS LATER THE VEHICLE THEN TOOK OFF ON ITS OWN. THE DRIVER STATES THE VEHICLE THEN SLOWED DOWN BELOW THE SET LEVEL. THE CONTACT SAYS THEY TRIED THE CRUISE CONTROL AGAIN BUT THE SAME THING HAPPEN. THE FAILURE MILEAGE WAS 47,000 AND THE CURRENT IS 4,8000. AR

**NHTSA ODI Number:** 10317998  
**Date of Incident:** 20100121  
**Vehicle:** 2004 TOYOTA CAMRY  
**Location of Incident:** FORREST HILLS, NY

**NHTSA Summary:**  
TL-THE CONTACT OWNS A 2004 TOYOTA CAMRY. THE CONTACT STATED WHILE DRIVING 40 MPH THE VEHICLE SUDDENLY ACCELERATED WITHOUT WARNING CAUSE THE VEHICLE TO ACCELERATED UP TO 50 MPH AND CRASHED INTO A SIDE-WALL ON THE HIGHWAY. THE FRONT PASSENGER SIDE OF THE VEHICLE SUFFERED MAJOR DAMAGE. NO ONE WAS INJURED DURING THE CRASH. THE CONTACT TOWED THE VEHICLE TO A LOCAL MECHANIC AND CALLED THE MANUFACTURER. THE MANUFACTURER INFORMED THE CONTACT TO TAKE THE VEHICLE TO THE DEALER. THE CONTACT COULD NOT TAKE THE VEHICLE TO A DEALER SO THE CONTACT TOWED THE VEHICLE TO A BODY SHOP AND REPAIRED THE VEHICLE. THE REPAIRS HAVE NOT BEEN COMPLETE DUE TO THE AVAILABILITY OF PARTS. THE CONTACT STATED THE CRASH WAS DUE TO RAPID ACCELERATION. JO

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I WAS ACCELERATING AWAY FROM A TRAFFIC LIGHT, MAKING A LEFT TURN FROM 1300 EAST ONTO FT. UNION BLVD. AND THE VEHICLE CONTINUED TO ACCELERATE RAPIDLY EVEN AFTER I REMOVED MY FOOT FROM THE ACCELERATOR. I PROMPTLY PLACED THE TRANSMISSION IN NEUTRAL, BRAKED RAPIDLY, AND NARROWLY AVOIDED REAR-ENDING THE CAR IN FRONT OF ME. I COULD NOT TELL IF THE GAS PEDAL WAS STUCK ON THE FLOOR MATS, BUT REARRANGED THEM QUICKLY AND THE ENGINE RPMs QUICKLY DROPPED TO AN IDLE SPEED. THIS WAS THE ONLY TIME THIS HAS OCCURRED. SEVERAL DAYS LATER, I TOOK THE CAR TO THE LOCAL TOYOTA DEALER, LARRY MILLER OF MURRAY, UT. I SPOKE WITH THE MANAGER ABOUT THE PROBLEM. HE EXAMINED MY CAR, INFORMED ME THAT IT WAS NOT PART OF THE RECALL, ASSERTED THAT THERE HAD BEEN NO REPORTS OF ISSUES WITH THE 2004 SIENNA, AND THAT THE PEDAL ON MY CAR WAS NOT OF THE TYPE IMPLICATED IN THE RECALLS. HE HAD ME TAKE THE CAR TO THEIR SERVICE DEPARTMENT FOR FURTHER INSPECTION AND TESTING. THEY DID NOT FIND ANY FAILURE CODES PRESENT AND NO CHECK LIGHTS WERE ON. THEY TEST DROVE THE CAR 10 MILES, BUT WERE UNABLE TO REPLICATE THE PROBLEM. NO PARTS WERE REPAIRED NOR REPLACED. NO FURTHER ACTION WAS TAKEN BY THEM.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10321530  
**Date of Incident:** 20100121  
**Vehicle:** 2009 TOYOTA COROLLA  
**Location of Incident:** HOGANSFIELD, GA

**NHTSA Summary:**  
TL- THE CONTACT OWNS A 2009 TOYOTA COROLLA. WHILE DRIVING THE VEHICLE THE ACCELERATOR PEDAL STUCK AND THE DRIVER COULD NOT STOP. THE VEHICLE WAS THEN PLACED IN NEUTRAL WHICH ALLOWED IT TO STOP. THE SPEED BEFORE THE FAILURE WAS APPROXIMATELY 65 MPH. THE FAILURE HAS OCCURRED 3 TIMES. THE VEHICLE WAS TAKEN TO AN AUTHORIZED DEALER WHERE A REINFORCEMENT BAR WAS INSTALLED AFTER THE FIRST FAILURE. NO REPAIRS WERE MADE AFTER THE TWO OTHER FAILURES. THE FAILURE MILEAGE WAS 35371. THE CURRENT MILEAGE WAS 38372.-TS

**Vehicle:** 2010 TOYOTA CAMRY  
**Location of Incident:** OLD WESTBURY, NY

**NHTSA Summary:**  
THE CAR IS A CAMRY TOYOTA, 2010,4DSD, PURCHASED ON DEC 28, 2009 BY NATIONAL HOME PLANS (TEL 516-876-9740) HAS A FAULTY ACCELERATOR SYSTEM, CAUSING SUDDEN SPEED AND A CRASH, WITH DAMAGES, WHILE ENTERING THE GARAGE. WE ARE NOT GETTING SIGNIFICANT COOPERATION FROM TOYOTA. LUCKILY, THERE WAS NO BODILY INJURY....PLEASE HELP. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10303471  
**Date of Incident:** 20100122  
**Vehicle:** 2002 TOYOTA RAV4  
**Location of Incident:** LAUREL, MD

**NHTSA Summary:**  
ONE DAY OUT OF THE BLUE MY TRUCK HAD TROUBLE ACCELERATING EACH TIME I CAME TO A STOP. IT THEN ALTERNATE BETWEEN JERKING FORWARD AND HESITATING BEFORE IT ACTUALLY GOT GOING. I HAD TO TRY NOT TO HIT ANYTHING IN FRONT OF ME AND NOT GET HIT BY THE CAR BEHIND ME THINKING IM TAKING OFF. I WAS TERRIFIED MERGING ONTO THE HIGHWAY BECAUSE IT WOULDNT ACCELERATE AND THEN DID THE HESITATING AND JERKING THING. WENT STRAIGHT TO MECHANIC, DIAGNOSTICS SHOWED POSSIBLE TRANSMISSION ISSUE. WHICH WOULD COST \$4,200 NEW AND ABOUT \$3K USED. DID ONLINE RESEARCH AND FOUND HUNDREDS OF SAME COMPLAINTS AND RECOMMENDATIONS TO REPLACE ECM BEFORE IT DID RUIN THE TRANSMISSION. I TOOK THE CHANCE AND REPLACED THE ECM AND TRUCK IS RUNNING FINE NOW. I HAD CALLED MY TOYOTA DEALERSHIP WHO TOLD ME MY WARRANTY WAS UP (5YRS/50K MILES - AND I AM AT 70K MILES). COULD NOT GET THRU TO TOYOTA HEADQUARTERS BECAUSE OF GAS PEDAL RECALL. THIS IS DANGEROUS AND RESEARCH SHOWS TOYOTA KNEW OF THIS PROBLEM SINCE 2006 AND HAS NOT DONE A RECALL. TOTAL COST: \$1,300 FOR NEW ECM AND \$300 FOR CAR RENTAL. \*TR

**Date of Incident:** 20100122  
**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** HOUSTON, TX

**NHTSA Summary:**

AFTER RUNNING ERRANDS, MY WIFE AND I WERE RETURNING HOME FRIDAY AFTERNOON JANUARY 22, 2010 IN MY 2007 TOYOTA RAV4 (V6 ENGINE - 30,815 MILES ON THE ODOMETER) WHEN WE EXPERIENCED SUDDEN ACCELERATION WHILE DRIVING IN OUR SUBDIVISION. I WAS TRAVELING AT A SPEED OF 20-22 MILES PER HOUR WHEN I APPLIED THE BRAKE WITH NO RESPONSE AND THE VEHICLE GATHERED SPEED (ESTIMATED 35 MPH) IN SPITE OF MY EFFORTS TO BRAKE HARD. AS THE RESIDENTIAL STREET WAS TO END AT A "T" WITHIN ABOUT 100 YARDS AND THERE WAS A CAR AHEAD OF ME, I HAD TO USE ANY MEANS POSSIBLE TO STOP MY RUNAWAY VEHICLE OR A COLLISION WAS SURE TO FOLLOW. ONLY AFTER SHIFTING, WHILE CONTINUING TO BRAKE, THROUGH "PARK", "REVERSE", TO "NEUTRAL" TO THE UNBELIEVABLE ROARING SOUND OF THE RACING ENGINE DID THE VEHICLE FINALLY STOP AND A COLLISION WAS AVOIDED BY A FEW CAR LENGTHS. I HAD NEVER EXPERIENCED THIS BEFORE, AND WAS ESPECIALLY SURPRISED IN THAT I HAD JUST HAD MY 30,000 MILE MAINTENANCE PERFORMED AT MY TOYOTA DEALERSHIP ON DECEMBER 18, 2009. BADLY SHAKEN, MY WIFE AND I DROVE THE THREE BLOCKS TO OUR HOUSE AND I IMMEDIATELY CALLED MY TOYOTA DEALERSHIP FOR HELP. I WAS TOLD THAT, AS MY VEHICLE WAS NOT ON THE RECALL LIST, THERE WAS NOTHING HE COULD DO FOR ME AND HE TOLD ME TO CALL THE TOYOTA CUSTOMER CARE EXPERIENCE CENTER. SO I HUNG UP THE PHONE AND THEN CALLED TOYOTA AS INSTRUCTED. WHEN FINALLY GETTING THROUGH, I RELATED MY EXPERIENCE AND WAS TOLD THAT "TOYOTA TAKES THIS VERY SERIOUSLY" AND THAT MY INFORMATION WOULD BE PASSED ALONG IMMEDIATELY. I WAS ASSIGNED A CASE NUMBER AND WAS TOLD THAT I WOULD HEAR BACK FROM A CASE WORKER ON

**C-1853****Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

MONDAY, JANUARY 25. I DID GET A CALL BACK ON MONDAY, BUT NOT FROM A CASE WORKER, BUT FROM THE SAME INDIVIDUAL I HAD TALKED TO ON FRIDAY. I WAS TOLD THAT MY ISSUE WAS NO LONGER A PRIORITY SINCE MY VEHICLE WAS NOT ON THE RECALL LIST AND I SHOULD CALL MY DEALERSHIP AND GET MY CAR INSPECTED AT MY EXPENSE. I INSTEAD LEFT MY CAR PARKED IN MY DRIVEWAY, AFRAID TO CHANCE AN ACCIDENT.

**Location of Incident:** MORONGO VALLEY, CA

**NHTSA Summary:**

NOVEMBER OF 2008 I BOUGHT A 2009 TOYOTA PRIUS. SINCE THEN I HAVE EXPERIENCED 4 INCIDENTS WHERE THE ACCELERATOR BECAME PARTIALLY DEPRESSED CAUSING AN UNPROVKED ACCELERATION, THE MOST RECENT BEING ON SUNDAY, JANUARY 24, 2010. I CONTACTED THE TOYOTA DEALERSHIP WHERE I BOUGHT MY CAR THE VERY NEXT DAY (1/25/10) AND REPORTED ALL 4 INCIDENTS. I WAS TOLD BY THE TOYOTA REPRESENTATIVE THAT THERE WAS NOTHING THAT THEY COULD DO. I WAS GIVEN AN 800 NUMBER TO CALL TO REPORT MY CONCERNS. I RECEIVED AN AUTOMATED REPLY TELLING ME TO CALL BACK AT ANOTHER TIME. I HAVE BEEN CALLING BACK BUT TO NO AVAIL. I LIVE IN THE HIGH DESERT WHERE IT SOMETIMES SNOWS AND THE HIGHWAY CAN GET ICY DURING THE WINTER. I FEAR FOR MY SAFETY AND THE SAFETY OF OTHER MOTORISTS IF I CONTINUE TO DRIVE MY PRIUS DUE TO THE UNPREDICTABILITY OF THE ACCELERATOR STICKING. I AM RETIRED AND LIVE ON A MODEST INCOME AND CANNOT AFFORD TO PAY FOR THE REPAIR OF THE ACCELERATOR PROBLEM. IN THE INCIDENTS THAT I HAVE DESCRIBED THE STICKING OF THE ACCELERATOR WAS NOT CAUSED BY THE FLOOR MAT OR ANY OTHER ACCESSORIES. \*TR

**NHTSA Summary:**  
IN JANUARY 2010 MY TOYOTA AVALON LTD WITH APX 36K MILES FORCED FORWARD AND I COULD NOT SHUT IT DOWN I HAVE A VERY BAD BACK AND NECK WITH MULTIPLE DISCS REPLACED WITH A METAL PLATE IN MY NECK AND LOW BACK BAD DISCS. I WENT AND HAD MY LOW BACK INJECTED FROM INTENSE PAIN BROUGHT ON AFTER I WAS BANGING MY FOOT ON THE BRAKE - GOT DOWN TO PULL UP THE GAS PEDAL WHICH WAS NOT STUCK - FINALLY GOT THE CAR OFF. ... AFTER RECOVERING FROM THE RESIDUAL EFFECTS AND REST I TOOK MY CAR TO TOYOTA REPAIR IN ST GEORGE. I WAS RIDICULED BY SOME ARROGANT EMPLOYEES (YOUNG) WHO SAID THAT THE RUG GOT THE PEDAL STUCK. I ASSURED THIS YOUNG WHIPPER SNAPPER THAT THE RUG WAS NOT THERE WHEN THE CAR WANTED TO HAVE A MIND OF ITS OWN BUT HE DID NOT LISTEN. I WENT INSIDE AND SPOKE TO THE SUPERVISOR WHO WAS VERY ACCOMMODATING AND APOLOGIZED FOR THE ATTITUDE AND HARRASSMENT OF HIS EMPLOYEES. MY CAR WAS SERVICED THE NEXT DAY AND THEY ADDED A METAL PLATE SOMEWHERE IN THE GAS PEDAL. I TOLD THE SUPERVISOR A FEW DAYS LATER THAT THE GAS PEDAL NOW GENTLY SLAPS MY FOOT WHEN I LET MY FOOT OFF THE GAS. I WAS TOLD I WOULD GET USED TO IT. I CALLED TOYOTA AGAIN TO TELL THEM THAT WHILE DRIVING MY CAR IS ACTING LIKE IT IS CHANGING GEARS AS IF I WERE DRIVING IT LIKE A SPORTS CAR STYLE (WHICH I DO NOT DO). HE IMMEDIATELY SCHEDULED MY CAR FOR ADDITIONAL REPAIRS A) DIFFERENT GAS PEDAL AND B) RE PROGRAM MY ELECTRONICS COMPUTER FOR SOMETHING I DO NOT UNDERSTAND. I AM 62 YEAR OLD AND WORRY ABOUT DRIVING MY CAR EVERY TIME I TAKE IT OUT OF THE GARAGE NOW. I WANT TOYOTA TO GIVE ME BACK MY MONEY. I PAID CASH FOR MY CAR IN 2007 IT WAS MY FIRST BRAND NEW CAR IN 40 YEARS. I KEEP IT IN MINT CONDITION. I SERVICE IT AT TOYOTA EVERY 3,000 OR SO MILES. I TOLD TOYOTA REPAIR NUMBER OF TIMES CAR ACTING STRANGELY. THEY SAY NO PBM. I PLANNED ON DRIVING THIS CAR FOR THE REST OF MY DRIVING YEARS ON THIS EARTH. NOW, ALL I DO IS WORRYING ABOUT DYING IN A CAR CRASH AND AM AFRAID TO DRIVE IT. PLEASE HELP ME. THANK YOU.

I WAS DRIVING A LEXUS RX 400H IN A PARKING LOT. WHEN I TURNED LEFT INTO THE PARKING SPOT AND ENGAGED THE BRAKES WHILE PULLING INTO THE PARKING SPOT. AT THAT TIME, I FELT THE CAR CONTINUE TO ACCELERATE AND ENDED UP HITTING AND GOING OVER THE PARKING CEMENT CURB AND THE CAR STOPPED BETWEEN THE CURB AND THE SIDEWALK AFTER I SLAMMED ON THE BRAKES AS HARD AS I COULD. I CONTACTED THE DEALERSHIP, THEY LOOKED AT THE VEHICLE AND SAID THEY COULD NOT REPEAT THE INCIDENT AND FOUND NOTHING WRONG WITH THE CAR. \*TR

**NHTSA Summary:**  
LASER CRUISE CONTROL MALFUNCTIONED WITHOUT APPARENT REASON, MOST IMPORTANT PROBLEMS IT HAS ARE UNCONTROLLABLE ACCELERATION AND SUDDEN DECELERATION, WHICH HAS NEARLY CAUSED MY RAMMING INTO A CAR IN FRONT OF ME AND A CAR BEHIND ME CRASHING INTO ME. THESE, ALONG WITH OTHER PROBLEMS IN THE SYSTEM, OCCUR EVERY TIME IT IS ENGAGED. WHEN FIRST PRESENTED TO THE DEALER IN PHONE CONVERSATION WAS TOLD IT WAS A PSYCHOLOGICAL REACTION TO NEWS REPORTS AND GIVEN AN 800 NUMBER TO A RECORDED MESSAGE TELLING ME IF I HAVE A PROBLEM STOP MY CAR AND REPORT IT TO MY DEALER. I THEN WENT TO THE DEALER AND WAS THEN TREATED WITH DISBELIEF. THEIR INITIAL SOLUTION WAS DENIAL THAT THERE IS A PROBLEM. AFTER DEMANDING A MECHANIC TEST DRIVE THE CAR, THE TECHNICIAN CONCEDED THE PROBLEM IS EXACTLY AS I DESCRIBED. I WAS THEN TOLD THAT THEIR IN SHOP DIAGNOSTIC TEST SHOWED THERE WAS NO PROBLEM WITH THE LASER CRUISE. AND WHEN I QUESTIONED THIS WAS INCREDIBLY ASKED IF I DIDN'T BELIEVE TECHNOLOGY WHEN THEIR OWN MECHANIC VERIFIED THAT IN REALITY THE SYSTEM WAS NOT WORKING DURING THE ROAD TEST. THEN THEY DECIDED TO TAKE ANOTHER TACTIC. THERE IS A 1/2 INCH DING IN THE FRONT BUMPER OF MY CAR THAT IS THE RESULT OF MY CAR ROLLING 5 FEET WHILE IN NEUTRAL AND TAPPING A POLE. THEY DECIDED TO BLAME THE MALFUNCTION ON THIS MINUTE DING EVEN THOUGH I INFORMED THEM THAT THE MALFUNCTION DID NOT CORRELATE WITH THE TIME OF THE BLEMISH TO THE CAR. NOW THEY WANT TO CHARGE ME AN EXORBITANT AMOUNT, OVER \$3000, TO FIX THIS DING. HOPING IT WILL DETER ME FROM PURSUING THE ISSUE OF THE INNATE FLAWS IN TOYOTA'S LASER MECHANISM. I KNOW THIS WILL NOT RESOLVE THE PROBLEM BUT AM INSTRUCTING THEM TO REPAIR THE BUMPER AS A MEANS OF GUARANTEEING THIS IS THE SOLUTION TO MY LASER CRUISE PROBLEM. I WILL PAY TO FIX MY DLCC, NOT CORRECT A BLEMISH IN MY BUMPER. I AM LETTING U KNOW cuz OTHERS R PROBABLY BEING MET WITH THE SAME RESISTANCE AND SOMEONE IS GOING TO GET SERIOUSLY HURT OR KILLED. MY CAR IS 2008 AVALON LIMITED. DEALER: TOYO OF WATERTOWN

**Location of Incident:** PORT ST LUCIE, FL  
**NHTSA Summary:**

2007 TOYOTA HIGHLANDER 6-CYL LIMITED RUNNING UNDER CRUISE CONTROL WILL SLOWLY BEGIN TO ACCELERATE WHEN "RESUME" IS PRESSED IN ORDER TO GET BACK UP TO THE CRUISING SPEED. HOWEVER AS THE SPEED NEARS (WITHIN 4-5 MPH) THE CRUISING SPEED, THE TRANSMISSION DOWNSHIFTS RESULTING IN A HAZARDOUS QUICK ACCELERATION THAT REQUIRES BRAKING OR QUICKLY TURNING OFF THE CRUISE CONTROL. THIS OCCURS REGULARLY DURING HIGH SPEED HIGHWAY DRIVING. THE PROBLEM CAN ONLY BE AVOIDED BY MANUALLY RETURNING THE VEHICLE TO CRUISING SPEED BEFORE PRESSING RESUME. THE DEALER STATES THEY HAVE NO KNOWLEDGE OF THIS PROBLEM.

**NHTSA Summary:**

ON JAN 26,2010, I WAS STOPPED BEHIND CARS AT A TRAFFIC LIGHT. MY 2010 TOYOTA HIGHLANDER STARTED CREEPING FORWARD I THOUGHT I'D TAKEN MY FOOT OFF THE BRAKE, AND THEN THE ENGINE STARTED REVVING TO AN OUTRAGEOUS LEVEL. THE HARDER I BRAKED THE MORE THE ENGINE REVVED AND THE CAR TRIED TO JUMP FORWARD. IT WAS SO LOUD THE DRIVER AHEAD OF ME TURNED AROUND TO SEE WHAT WAS GOING ON BEHIND HIM. I THOUGHT I WAS GOING TO REAR-END HIM UNTIL I REMEMBERED TO PUT THE CAR IN NEUTRAL. EVENTUALLY THE ENGINE RETURNED TO ITS NORMAL RPM'S, BUT I WAS REALLY SHAKEN. I DROVE ABOUT 1 MILE TO MY DESTINATION AND CALLED TOYOTA AND HAD THE CAR TOWED TO THEIR SERVICE AREA. THEY CHECKED THE CAR AND AFTER 24 HRS. TOLD ME THEY COULDN'T FIND ANYTHING AND MY CAR WAS MADE IN JAPAN SO IT WASN'T UNDER THE RECALL. I DON'T FEEL SAFE IN THIS VEHICLE AND I DON'T FEEL TOYOTA REALLY KNOWS OR IS REVEALING ALL THE PROBLEMS THEY ARE HAVING. MY PROBLEM OCCURRED WHEN I WAS AT A STANDSTILL AT A TRAFFIC LIGHT, SO I DON'T BELIEVE THE STUCK ACCELERATOR STORY. WHAT CAN I DO TO GET SOME SATISFACTION? AT THIS POINT THE PROBLEM HAS ONLY OCCURRED ONCE, BUT I'VE LOST ALL CONFIDENCE IN MY NEW VEHICLE...LESS THAN 4000 MILES ON IT! \*TR

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

LAST MONTH, 1/26/2010. MY 2008 TOYOTA CAMRY ACCELERATED FORWARD. I AM NOT SURE WHETHER IT WAS CAUSED BY THE ACCELERATOR PEDAL OR THE BRAKE MALFUNCTION: I HAD THE BRAKE ON, ACCELERATOR OFF. SECOND INCIDENT, ON FEB. 16,2010, WHILE I WAS DRIVING AT APPROXIMATELY 10 MPH COMING TO A STOP LIGHT, I PRESSED MY BRAKE PEDAL. THE BRAKE STARTED SHAKING AND MAKING A WEIRD NOISE AS IF GEARS WERE MOVING/GRINDING. IT WAS UNLIKE THE ANTILOCK BRAKE SRS SYMPTOM. I IMMEDIATELY PLACED MY CAR ON PARK AND STOPPED THE CAR. THANK GOD THAT I HAD ENOUGH TIME/SPACE BETWEEN MY CAR AND THE CAR IN FRONT OF ME: I HAD STARTED STOPPING WELL AHEAD, AS I USUALLY DO. WHEN I STOPPED THE CAR, THE CAR BEHIND ME STARTED HONKING: IT WAS RUSH HOUR. WHEN THE CAR IN FRONT STARTED MOVING, I STARTED MY CAR AGAIN AND DROVE INTO THE NEAREST PARKING LOT. I STARTED MY CAR AND DROVE IN CIRCLES IN THE PARKING LOT. IT RETURN TO NORMAL. I AM AFRAID TO DRIVE MY CAR NOW. I AM A 59 YEAR OLD TEACHER / GRANDMOTHER AND WOULD LIKE TO LIVE A LITTLE WHILE LONGER. I HAVE NOT RECEIVED MY RECALL LETTER AS PROMISED. WILL YOU PLEASE FIX: (1) ACCELERATOR PEDAL, (2) BRAKE PEDAL, (3) CARPET PROBLEM. PLEASE KNOW THAT AS AN AMERICAN, I AM LIKEWISE CONCERNED FOR TOYOTA'S FINANCIAL LOSSES AND HOPE THAT YOU ARE ABLE TO FAIR WELL. " APPROXIMATELY 3 DAYS LATER (I HAVE THE PAPERWORK), TOYOTA CALLED AND I WENT IN THAT DAY TO HAVE IT FIXED. THEY STATED THAT MY TOYOTA CAMRY DID NOT HAVE THE PROBLEM BECAUSE IT WAS MADE IN JAPAN. THEY WORKED ON IT ANYWAY AND STATED THAT THEY HAD CHANGED THE COMPUTER TO BYPASS THE ACCELERATOR PEDAL. I STILL AM FEARFUL. PLEASE HELP ME MAKE SURE IT IS FIXED COMPLETELY. THANK YOU

**NHTSA Summary:**  
Brackett said just nine days ago she was driving about 10 to 15 mph in Hingham, slowing down because a school bus was stopped ahead of her, with another school bus on the other side of the road.

"I was the seventh or eighth car to stop, and when I put my foot on the brake, my car accelerated, as if the pedal went to the floor rather quickly. My brake did not work. Fortunately for me, I was able to pull in the wrong lane, pass the cars that were sitting waiting for the school bus — and I thought 'heaven help me, I'm going to hit a school bus now.' "

C-1867

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

But the first car that was stopped behind the school bus had left a couple of car lengths, Brackett explained, and that enabled her "to pull over in front of those cars and off to the side of the road on someone's lawn before my car stopped."

Recalling the experience Brackett said, "I put both feet on the pedal — on the brake — and held them as hard as I could — trying to hold on to the steering wheel and drive around all the cars, and not hit the mothers on the side of the road with little children. It all happened in probably 10 or 12 seconds, and it was over."

She said other drivers began blowing their horns at her. "I was terrified — absolutely terrified," Brackett explained, "not necessarily because of myself, but because there were young mothers with young children on both sides of the road, where the two school buses had stopped." Asked if the brake suddenly worked or if the accelerator eased up, she replied, "It was like someone had turned a switch — just like when it happened — it just stopped. It stopped accelerating, and the brake worked."

As for how she managed to get the car to stop and not hit anyone or anything, Brackett said, "I don't think I put it in neutral, as the Web site instructed me to do. I really don't know whether I did that or not, because it all happened so quickly. I did shift it down into first gear to get the car to stop."

Brackett is referring to a Web site she had previously read instructing car owners what to do if their vehicle suddenly accelerates — because she explained this wasn't the first time her Corolla experienced sudden acceleration. "I've had incidents seven or eight times with acceleration and my brake not working," she said, although Brackett explained the incident on Jan. 27 was more severe.

Brackett said that without exception these incidents have all occurred while she has been traveling at slow speeds when she hits the brake to slow down or come to a stop. "I'm a driver that stays four or five car lengths behind a car in front of me anyway; fortunately, on the other incidents that happened before this last one, it wasn't as bad — it didn't last as long — I think that's the best way to explain it. It accelerated — the brake didn't work — but it only lasted 4 or 5 seconds — and I was able to stop the car. This last incident lasted longer, and it accelerated more extreme.

After previous sudden acceleration experiences, Brackett said she took the Corolla to her local mechanic and asked him to check her brakes, "because to me — the brake doesn't work — there's something wrong with my brakes," she said.

But that mechanic told her he found nothing wrong with the brakes.

Brackett said she took the car back to this same mechanic as recently as three weeks ago asking him to again check the brakes. She said she explained to him, "It won't stop."

But, again, Brackett said this mechanic told her he checked the car and found nothing wrong with the brakes. Brackett said her mechanic suggested she take it to a Toyota dealer to investigate her concern further, so she made an appointment to take her Corolla to Toyota of Braitree.

"I had called to make an appointment to take it over to Braitree to have them check it when the recall came out and... in the interim I had that incident with the school bus thing," Brackett said.

Brackett said she has left her Corolla at Toyota of Braitree since the day of the incident in Hingham, and has given them permission to test drive it to see if they can duplicate her experience.

"They told me that they put it on the computer and that the techs looked at it and that there is nothing wrong with my car, and they have no fix for it. And they said it wasn't on the recall," Brackett said. "I

C-1868

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

said it didn't matter to me whether it was on recall or not — let's just set that aside and fix my car," Brackett said.

**NHTSA Summary:**  
I AM A MECHANIC FOR 5 YEARS. MY WIFE ALWAYS DRIVE THE TRUCK. NEVER ME. ON JAN 27 THE PROBLEM STARTED WHEN I START ENTERING THE FREEWAY OR SPEED UP. I HAVE TO STEP ON GAS TO THE METAL. I NOTICED THERE IS A ELECTRONIC OR SENSOR DELAY ON THE GAS PEDAL. CAUSING ME TO REALLY BOTTOM THE GAS PEDAL. BY THAT TIME I REACH IDEAL SPEED. I LET GO OF THE GAS PEDAL THEN THERE IS ANOTHER PROBLEM THE TRUCK DOES NOT STOP IMMEDIATELY OR DECELERATE BECAUSE THE SENSOR HAS A DELAY. I HAVE TO STEP ON THE BRAKES VERY HARD. I EXPLAINED THIS TO THE DEALER FEW DAYS AGO. BUT TOLD ME MY TRUCK IS NOT PART OF THIS RECALL. RIGHT NOW I TRIED TO PUT SOME LUBE ON THE JOINT OF THE PEDAL BUT IT IS ELECTRONIC-PROBLEM COMPARE TO CABLE AND SPRING. ONCE YOU RELEASE THE PEDAL IT WILL DECELERATE ON ITS OWN. PLS HELP ME AND HAVE THIS RECALLED. THE COMPUTER OR THE SPEED ON THE TROTTLE SENSOR SHOULD BE REAL TIME. FROM THE THE MOMENT YOU STEP IN THE GAS THE SENSOR SHOULD IMMEDIATELY SEND TO COMPUTER TO GO ACCELERATE. WHEN RELEASE IT SHOULD IMMEDIATELY SEND TO COMPUTER SPLIT SECOND DECELERATE. THAT DELAY IS CAUSING ISSUES OF SAFETY. NOW I HAVE TO TELL MY WIFE TO GIVE ENOUGH SPACE BECAUSE THE TRUCK SEEMED TO BE VERY HEAVY FIGHTING THE DECELERATION DELAY PROCESS AND WEIGHT PLUS BRAKES. IN CALIFORNIA DRIVERS WILL CUT YOU OFF.

**Date of Incident:** 20100127  
**Vehicle:** 2010 TOYOTA COROLLA  
**Location of Incident:** SAN FRANCISCO, CA  
**NHTSA Summary:**  
I HAD AN ACCIDENT ON JANUARY 27TH 2010 . I HAVE A TOYOTA COROLLA 2010 WITH FAULTY ACCELERATOR PEDAL(RECALLED) MY CAR BOUGHT ON DECEMBER 13 2010 FROM TOYOTA DEALERSHIP. I WAS PULLING MY CAR FROM MY GARAGE AS USUAL VERY SLOW HOLDING MY FOOT ON THE BRAKES BUT THIS TIME SUDDENLY MY CAR ACCELERATES SO FAST THAT THE NEXT THING I KNEW I WAS IN GARAGE DOOR OF THE HOUSE ACROSS THE STREET. I WAS UNABLE STOP THE CAR IMMEDIATELY EVEN AFTER I PRESSED THE BRAKES VERY HARD. BY THE TIME IT STOPPED THE CAR BROKE THE GARAGE DOOR OF THE HOUSE ACROSS THE STREET. LUCKILY NOBODY WAS INJURED. ALONG THE WAY THE CAR BRUSHED OFF THE BUMPER OF ANOTHER PARKED UNATTENDED CAR AND SHEARED OFF THE LICENSE PLATE. LICENSE PLATE WAS DAMAGED, THE BUMPER WAS SCRATCHED. MY CAR WAS DAMAGED AND MY FARMERS INSURANCE PAID FOR REPAIR OF MY CAR AND CAR PARKED ON THE STREET. THE OWNER OF THE HOUSE NEEDED TO USE HER CAR PARKED IN HER GARAGE URGENT AND TOLD ME TO REPAIR GARAGE DOOR IMMEDIATELY. SAME DAY THE NEW GARAGE DOOR WAS INSTALLED BY GARAGE MASTER INC. GARAGE DOOR WAS BROKEN BEYOND REPAIR. I PAID IMMEDIATELY BY CHECK TO THE GARAGE CO. I ALSO PAID FOR DOOR PAINTING. I REPORTED THIS ACCIDENT TO THE DMV. I WAS ABLE TO REACH TOYOTA CUSTOMER EXPERIENCE LINE ONLY IN TWO DAYS ON JANUARY 29. FINALLY I WAS INFORMED THAT MY CAR HAS A FAULTY ACCELERATOR PEDAL. CASE MANAGER TOLD ME INSPECTION WILL BE SCHEDULED SOON. MY CASE NUMBER #1001151635 . SINCE THE ACCIDENT I AM NOT DRIVING THIS CAR FOR SAFETY REASON. IT HAS BEEN PARKED IN THE GARAGE SINCE FEBRUARY 8. I AM REQUESTING COMPENSATION FOR ALL MY EXPENSES. BUT TOYOTA TOLD ME TO WAIT FOR AN INSPECTION AS THEY ARE VERY BUSY. TODAY IS MARCH 5 AND NOTHING HAS BEEN DONE BY TOYOTA ONLY WORDS AND PROMISES. THEY ARE NOT RETURNING CALLS. I ASKED FOR THE E-MAIL OF THE CASE MANAGER - E-MAIL ONLY FOR LOCAL USAGE REFUSE TO PROVIDE EMAIL PLEASE HELP AS SOON AS POSSIBLE. THANK YOU. UPDATED 03/17/10

**Location of Incident:** LAKE FOREST, CA  
**NHTSA Summary:**  
MY RAV4 WAS PART OF THE RECALL. ONE, I BOUGHT MY CAR ON 1/22/10. I HEARD TOYOTA FILED THEIR CLAIM ON 1/21/10. THE RECALL WAS ANNOUNCED ON 1/26/10. I FEEL THE DEALERS MOST HAVE KNOWN WHAT WAS HAPPENING AND SOLD ME MY CAR ANYWAY. ON THE TOYOTA WEBSITE IT STATED IF YOU BOUGHT YOUR CAR WITHIN 5 DAYS OF THE RECALL THE DEALER WOULD TAKE IT BACK. WHEN I CALLED THE DEALER THEY SAID THEY NEVER HEARD ANYTHING LIKE THAT AND REDIRECTED MY CALL TO THEIR SERVICE DEPARTMENT, WHO TOLD ME THERE WASN'T A FIX YET AND I WAS TO WAIT TO BE NOTIFIED. I WANTED INFORMATION ON THE GENERAL MANAGER OR DISTRICT MANAGER AND WAS TOLD I COULD FIND IT ON THE WEBSITE. FROM THERE I DIDN'T KNOW WHO TO TALK TO. I HAVE BEEN SICK TO MY STOMACH EVER SINCE. TWO, I NEVER RECEIVED ANY INFORMATION ABOUT THE RECALL. I HAD TO CALL THE TOYOTA HOTLINE AND THEY ALSO SAID TO WAIT FOR NOTIFICATION. THREE, NEVER RECEIVING A POSTCARD, I FINALLY CALLED A DEALER AND ARRANGED FOR MY CAR TO BE FIXED. I WAS EXPERIENCING RANDOM ACCELERATION WHEN THE CAR WAS HOT AND COLD.

#### Safety Research & Strategies

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

**C-1872**

FOUR, AFTER THE FIX THE CAR CONTINUES TO DO THIS. IT WILL ACCELERATE RAPIDLY, DECELERATE AND THEN RUN SMOOTHLY AGAIN. IT DOES THIS RANDOMLY. IT IS QUITE NERVE RACKING WHEN THIS HAPPENS. I DON'T KNOW WHAT TO DO. I HAVE A YOUNG SON WHICH I TRANSPORT ON A DAILY BASES. I AM SCARED TO DEATH TO DRIVE A CAR I WAITED 12 YEARS TO BUY.

**Additional Summary:**

**NHTSA ODI Number:** 10325256  
**Date of Incident:** 20100127  
**Vehicle:** 2002 LEXUS ES300  
**Location of Incident:** COLUMBIA, SC

**NHTSA Summary:**

I OWNED A 2002 LEXUS ES 300 WHICH IN JANUARY 2010 BEFORE THE CRAZE OF THE ACCELERATION BECAME POPULAR, IT TOOK OFF, WITHOUT PROVOCATION, SHIFT LOCKED, ACCERATION LOCKED, AND BRAKES DIDN'T WORK. I FILED A BBB ORG COMPLAINT, I FAXED, EMAILED, FACEBOOKED, AND TWITTERED TOYOTA LEXUS CONCERNING MY CONCERNS, AND THE FACT THAT AS A DISABLED VET, WHO SPENT HIS ENTIRE EARNINGS ON A CAR FOR HIS FAMILY, AND THAT VEHICLE CRASHED WITHOUT PROVOCATION, AND ASKED FOR THEIR HELP. THEY NEVER ANSWERED THE BBB COMPLAINTS WITH THE USA LOCATION OR NORTH AMERICAN, FROM FACEBOOK, THEY SAID TO CONTACT THE CUSTOMER SATISFACTION DEPARTMENT, WHICH I DID. WHEN CONTACTING THE CUSTOMER SATISFACTION DEPARTMENT, THEIR JOBS ARE TO ATTEMPT TO TALK FAST, IN THE ATTEMPT TO SAY IT WAS DRIVERS ERROR. I TOLD THEM THAT I WASN'T INTERESTING IN SUING, WASN'T INTERESTED IN PLACING BLAME, JUST INTERESTED IN THEIR HELP IN ASSISTING ME IN REPAIRING MY GARAGE, AND THEIR ASSISTANCE IN ME GETTING A NEW USED VEHICLE. THAT'S ALL. I INFORMED THEM THAT WHILE HURT BY THE ACCIDENT, I WASN'T NOR DIDN'T SEEK A ATTORNEY, OR LEGAL REPRESENTATION, AND THAT I WOULD THINK THAT THEY WOULD WANT TO ASSIST THIS VETERAN AS A ACT OF KINDNESS. I ONLY ASKED THAT THEY ASSIST IN MY HOME REPAIRS, AND GETTING ANOTHER SAME LIKE VEHICLE, IN ALTERNATE, HELPING ME WITH MY HOME REPAIRS DEDUCTIBLE AND ASSISTING ME IN GETTING ANOTHER VEHICLE, AND AS A LAST ALTERNATIVE, I ASKED THEM IF THEY WOULD ISSUE A NON-QUALIFYING CERTIFICATE SO OTHER THAN INCOME, I COULD PURCHASE A VEHICLE FROM THEM, TO ACCOMMODATE MY FAMILIES NEEDS, THEY JUST IGNORED ME, NOW I WANT JUSTICE, BECAUSE MY REQUEST WERE NOT OUTRAGEOUS. IF THEY WOULD HELP ME GET ANOTHER VEHICLE FOR MY FAMILIES NEEDS, I WOULD BE TOTALLY SATISFIED, I DON'T BELIEVE IN ALWAYS GOING THROUGH THE COURTS WHAT PEOPLE CAN DO.

**NHTSA Summary:**

ODI 10303913  
I WAS BEHIND A CAR MAKING A LEFT TURN WITH THE LEFT BLINKER CLEARLY ON, I HAD SLOWED TO ABOUT 10 OR 15 MPH AND WAS ABOUT 1 OR 2 CAR LENGTHS BEHIND THE CAR. I APPLIED THE BRAKES AND THE TRUCK WENT TO A FULL THROTTLE CONDITION... I GLANCED DOWN TO SEE IF MY FOOT WAS ON THE GAS??? IT WAS FULLY ON THE BRAKE I THEN STOOD ON THE BRAKE PEDAL BUT WITH THE FULL THROTTLE IT CONTINUED FORWARD UNTIL I HIT THE CAR AND PUSHED IT LIKE A BULLDOZER. MY TRUCK CONTINUED ABOUT 20 BEFORE FINALLY STOPPING. ABOUT 2 WEEKS BEFORE THIS INCIDENT I HAD A SIMILAR INCIDENT WHILE ON A DOWN RAMP WITH A CAR AT LEAST 20 CAR LENGTHS IN FRONT OF ME. I APPLIED THE BRAKE AND IT TOOK OFF??? I QUESTIONED MYSELF AS TO WHAT HAD HAPPENED? IT ACTS LIKE THE RESUME BUTTON IS PRESSED FOR CRUISE CONTROL BUT I DID NOT HAVE CRUISE ON EITHER TIME. IN READING TOYOTAS DESCRIPTION OF THE PROBLEM THEY SAY... STICKING AND OR HARD TO PRESS ON THE PEDAL I HAVE NOT HAD ANY OF THOSE PROBLEMS IN TALKING WITH TOYOTA I WAS ASKED WHAT I THOUGHT THE PROBLEM MIGHT BE AND I SAID I THINK THE CRUISE CONTROL MODULE MIGHT BE INVOLVED. IT HAS AN INPUT FROM THE GAS PEDAL, AN INPUT FROM THE BRAKE PEDAL AND AN OUTPUT TO THE THROTTLE POSITIONER. IT IS MY FEELING THAT THERE ARE MORE PROBLEMS THAN JUST A GAS PEDAL ISSUE. \*TR

**Additional Summary:**

On Jan. 28 I was behind a clearly left turning car, going about 15mph behind the car I applied my brakes when I did the truck went to FULL THROTTLE... I glanced down to see if my foot was on the gas? my right foot was planted on the brake which then stood on. The truck hit the car in front of me and continued for about 15 or 20 at least before stopping. About 2 weeks before I had a similar issue when on an exit ramp I applied my brakes and the truck took off? I hit the brakes hard and it did slow, I had no traffic directly in front of me or I could have hit a car if there was. I thought did I do something wrong, did I have my foot on the gas? what happened did NOT relate to what Toyota has been saying about the pedal sticking? Both times the feeling was like having cruise control ON at 65mph and applying the brakes to knock it off slowing to 30 mph and then pressing the RESUME button. The throttle will open and you will

C-1874

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

go back to 65 mph. I have a case number with Toyota but they still have not contacted me at this time. I did talk with someone at Toyota on Sat. and they asked me what I thought was the problem. I told them I thought the cruise control could be involved with it. Welcome to my Nightmare.

**NHTSA Summary:**

MY 2010 LEXUS RX 350 HAS HAD TWO INCIDENTS OF SUDDEN ACCELERATION IN THE 6 WEEKS I HAVE OWNED THE VEHICLE. ON BOTH OCCASIONS, THE VEHICLE SUDDENLY REVED UP PAST 4 TO 5000 RPM FOR A FRACTION OF A SECOND AND THEN RETURNED TO NORMAL RPM (2000). REPORTED THE FIRST INCIDENT TO LEXUS. NO ACTION HAS BEEN TAKEN BY LEXUS.

**NHTSA Summary:**  
INCIDENT THAT TOOK PLACE ON JANUARY 28, 2010. I OWN A 2008 TOYOTA FOUR RUNNER SR5 WITH 13 K MILES, I AM THE ORIGINAL OWNER AND NO ONE HAS DRIVEN THE VEHICLE BUT ME. VEHICLE PURCHASED AT LEGACY TOYOTA. STOPPED AT A TRAFFIC LIGHT; WHEN THE LIGHT CHANGED, I PLACED PRESSURE TO THE ACCELERATOR TO DRIVE OFF. NOTHING HAPPENED! EXCEPT A SLIGHT FORWARD MOVE! AGAIN I APPLIED PRESSURE TO THE ACCELERATOR! NOTHING HAPPENED! BY THIS TIME I HAD ROLLED INTO THE MIDDLE OF THE INTERSECTION. NOW FOR THE THIRD TIME! AGAIN APPLIED PRESSURE TO THE ACCELERATOR AND AFTER A MOMENT THE ENGINE REVVED UP AND BEGAN TO MOVE THE VEHICLE RAPIDLY FORWARD. I RELEASED THE PRESSURE ON THE ACCELERATOR AND BRIEFLY TOUCHED THE BRAKE, WHEN ALL SEEMED TO RETURN TO NORMAL. FEBRUARY 1, 2010 REPORT THE INCIDENT AS IT OCCURRED TO LEGACY TOYOTA. DEALER REACTED WITH NO CONCERNS.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

on July 29, (DATE IS ACTUALLY JAN, 29, 2010) I was leaving a parking lot waiting behind a car about 4 feet in front of me. Suddenly my 2007 prius accelerated into the back of the car in front of me. fortunatley no one was seriously hurt, but the rear bumper of the car in front and the front bumper of the prius were damaged. The woman in the car which I hit had whiplash. I reported the accident to my insurer Geico, who said I would be at fault and would lose my good driver discount. The agent had not heard about the toyota recall, but said she would look into it. I made an appointment with toyota to inspect the accelerator linkage. I think toyota is responsible for this accident and should pay for the damage.

ACCELERATOR AND NO FLOOR MAT WAS THE PROBLEM. I FEEL THIS IS A WARNING OF WHAT COULD HAPPEN AND THERE ARE DOCUMENTED C/O SINCE 2006 FOR SIENNAS THAT HAVE THIS SAME PROBLEM. \*TR  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10304586  
**Date of Incident:** 20100129  
**Vehicle:** 2008 TOYOTA CAMRY  
**Location of Incident:** DECATUR, GA

**NHTSA Summary:**  
I PURCHASED MY 2008 TOYOTA CAMRY IN NOVEMBER 2008. INSTANTLY I NOTICED TWO THINGS, ONE, HOW THE CAR WAS SLOW WHEN TRYING TO MERGE TO ANOTHER LANE. IN FACT, I ALMOST CAUSED A MAJOR ACCIDENT, VERY SCARY TO SAY THE LEAST. SECONDLY, I SMELLED FUMES AND I ASKED MY UNCLE DID HE SMELL IT AND HE SAID YES. IN ADDITION MY UNCLE STATED, "THIS IS A NEW CAR YOU SHOULD NOT SMELL THESE FUMES. YOU NEED TO TAKE THIS CAR BACK TO THE DEALERSHIP!" I DID, ONLY TO BE TOLD THEY DID NOT SMELL ANYTHING AND EVERYTHING LOOKED FINE. IN REGARDS TO THE MERGING ISSUE, I WAS TOLD THAT IT THE NEWER MODELS ARE NOW RAN ELECTRONICALLY AND THIS IS ONE OF THE DRAWBACKS OF THESE MODELS, AND THAT WAS IT. I HAVE NEVER FELT COMFORTABLE DRIVING MY CAR BECAUSE IT ALWAYS FELT LIKE I HAD A FLAT TIRE. I HAVE HAD THREE ALIGNMENTS, REPLACED MY TIRES AND THE CAR STILL DOES NOT DRIVE WELL. NOW THE RECALL REGARDING THE BRAKES/FLOOR MATS HAS NOT BEEN AN ISSUE FOR ME BUT THE SLOW RETURN OF THE ACCELERATOR MOST DEFINITELY, AND I NOTICED THIS BEFORE I HEARD ABOUT THE 2ND RECALL. I TOOK MY CAR TO THE TOYOTA DEALERSHIP ON PTREE INDUSTRIAL IN ATLANTA, GA ON FRIDAY, JANUARY 29TH, TO GET MY CARBON AIR FILTER REPLACED AND THAT IS WHEN I TOLD THEM ABOUT MY ACCELERATOR AND I WAS TOLD THAT IT WAS NOT PART OF THE RECALL ISSUE. SO THE SALESPERSON TOOK SOME INFORMATION DOWN AND SAID THE PARTS HAVE NOT COME IN YET, THEREFORE, THERE IS NOTHING WE CAN DO. IF THIS WAS NOT PART OF THE RECALL WHY TELL ME THAT THE PARTS HAVE NOT COME IN IF I WAS NOT AFFECTED BY IT BASED ON MY CONCERNS? SO NEEDLESS TO SAY, I TOO, LIKE MOST CUSTOMERS HAVE MY CONCERNS. I HAVE ALWAYS TRUSTED TOYOTAS AND NOW THIS. I PRAY NOTHING OCCURS WITH ME AND MY FAMILY WHILE TOYOTA DECIDES WHAT, WHEN, AND HOW TO SOLVE THIS MAJOR ISSUE.

**Date of Incident:** 20100129  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** JACKSON, NJ

**NHTSA Summary:**  
ON FRIDAY JAN 29, 2010 I ARRIVED AT MY WORKPLACE IN PISCATAWAY, NJ. AS I PULLED INTO THE PARKING LOT AND WAS SLOWING INTO A PARKING SPOT, MY 2007 CAMRY WHICH I WAS DRIVING ACCELERATED AND TOOK OFF ON ITS OWN. BEFORE I KNEW WHAT WAS HAPPENING, THE CAR HAD HIT A CURB, JUMPED OVER THE CURB AND ONTO A MAJOR ROAD. I DON'T KNOW HOW I AVOIDED A HEAD ON COLLISION WITH A CAR ON THE ROAD. MY IMMEDIATE SENSE WAS TO STEER ONTO A NEARBY TREE TO AVOID GOING ONTO A BUSIER STREET NEARBY. THE FRONT TIRE HAD BURST ON IMPACT WITH THE CURB AND THAT PROBABLY HELPED SLOW THE CAR DOWN. AS I MATCHED ON THE BRAKE, THE CAR MANAGED TO STOP AND MIRACULOUSLY, I DID NOT HIT ANYBODY OR ANYTHING. IF THE CAMRY JUST HAD A STICKING GAS PEDAL, WHAT IS THE LIKELIHOOD THAT THE CAR COULD HAVE GAINED ENOUGH ACCELERATION AND SPEED TO MAKE THE IMPACT IT MADE WITH THE CURB. I WAS VERY CLOSE TO THE CURB -- ABOUT 2 TO 3 FEET FROM THE CURB. MY CAR WAS ALMOST AT A FULL STOP. I BELIEVE THAT WHEN MY CAR SPED OFF, IT MUST HAVE HIT THE CURB AT ABOUT A SPEED OF 50 MILES PER HOUR OR MORE. I AM WORRIED THAT EVEN AFTER TOYOTA INSERTS THE SMALL CORRECTIVE METAL IN THE PEDAL, THE PROBLEM MAY STILL BE THERE. WOULD'NT IT BE UNFORGIVABLY TRAGIC IF ANYONE SHOULD GET HURT OR DIE FROM A RUN-AWAY TOYOTA AFTER THE CORRECTIVE METAL HAS BEEN INSERTED?

Information from news articles. Articles saved in folder TOYSUA4337.

Todd Allen claims his Camry mysteriously accelerated in a parking lot, leaving him and three others upside down in a ditch under water. Allen told police, despite having both feet on the brake, the car accelerated, went over the curb, and fell into the creek below. Four people were trapped inside. Allen suffered a spinal cord injury.

Phil Grossman is one of the attorneys now representing Allen.

PROBLEM THEN AND EVEN STATED I RECEIVED THE NOTICE IN THE MAIL. I WAS BASICALLY TURNED AWAY I WAS TOLD THAT I HAD TO WAIT TO RECEIVE MY SECOND NOTICE IN THE MAIL AND THAT BY THEN THEY SHOULD HAVE THE PARTS TO FIX THE PROBLEM. PRIOR TO HAVING MY CAR SERVICED MY CAR ACCELERATED BEFORE HOWEVER I THOUGHT THAT IT WAS DUE TO THE TRACTION ON MY TIRES AND WORN PADS. LITTLE DID I KNOW THAT I WOULD SOON FIND THAT THAT WAS MY NO MEANS THE CASE. A LITTLE OVER TWO WEEKS AFTER HAVING MY MAINTENANCE DONE ON MY VEHICLE I WAS HEADED TO WORK ON THE HIGHWAY IT HAD JUST STOPPED RAINING WHEN MY CAR PICKED UP IN SPEED TO WELL OVER 75 MPH. FROM THERE EVERYTHING HAPPENED SO FAST. THE CAR WAS ACCELERATING I PANICKED GIVEN A CAR RIGHT IN FRONT OF ME I STEERED OVER TO THE RIGHT LANE TO AVOID THE COLLISION AND IN DOING SO I HIT WATER ON THE ROAD WHICH CAUSED ME TO BEGIN TO HYDROPLANED. MY FIRST REACTION WAS TO BRAKE HOWEVER THAT DIDNT WORK IT ONLY CAUSED ME TO HYDROPLANE MORE SPINNING ABOUT 5 TIMES OVER A DITCH AND LANDING IN BETWEEN TWO TREES. EVERYTHING ABOUT THIS ACCIDENT WAS A NIGHTMARE. I ACCRUED SEVERAL EXPENSES ONE TOTALLING MY CAR WHICH I HAVENT EVEN HAD A YEAR AS WELL AS BACK AND NECK PAIN. I NOT ONLY NOTIFIED TOYOTA AND MADE SEVERAL ATTEMPTS TO HAVE THE PROBLEM RESOLVED I ALSO CONTACTED THE NATIONAL HEADQUARTERS OF TOYOTA INC AND STILL NOTHING HAS BEEN DONE.

**Location of Incident:** MATHEWS, VA  
**NHTSA Summary:**  
I HAVE OWNED MY 2006 TOYOTA COROLLA S WITH A 5-SPEED MANUAL TRANSMISSION SINCE JULY 2006. IN THAT TIME I HAVE HAD APPROXIMATELY 5 INCIDENCES WHEN THE ENGINE RACED UNEXPECTEDLY. THIS HAS ALWAYS OCCURRED WHEN I HAD THE CLUTCH DEPRESSED AND WAS BRAKING. I HAVE THOUGHT THAT MY RIGHT FOOT, WHICH I INTENDED TO BE ON THE CENTER OF THE BRAKE PEDAL, WAS ACTUALLY ON THE SIDE OF THE BRAKE PEDAL SUCH THAT IT SIMULTANEOUSLY CONTACTED THE ACCELERATOR PEDAL. THIS EXPLANATION IS PROBLEMATIC IN THAT EVEN WITH THE BRAKE PEDAL FULLY DEPRESSED, IT IS STILL HIGHER THAN THE ACCELERATOR PEDAL. THE ONLY WAY I COULD BE DEPRESSING BOTH THE BRAKE PEDAL AND THE ACCELERATOR PEDAL AT THE SAME TIME IS FOR MY FOOT TO BE TWISTED AND OFF CENTER AT THE SAME TIME. MAYBE THIS IS POSSIBLE. I DON'T KNOW. WHAT USUALLY HAPPENS IS THAT THE ENGINE RACES(MAYBE 4000 TO 5000 RPM) BUT SINCE THE CLUTCH IS ALREADY DEPRESSED AND MY FOOT IS ON THE BRAKE, THE CAR DOES NOT SPEED UP. USUALLY THE ENGINE ONLY RACES FOR A SECOND OR TWO AND I DON'T KNOW HOW IT GETS SETTLED DOWN--MAYBE I REPOSITION MY FOOT A LITTLE--I DON'T KNOW WHAT HAPPENS BECAUSE IT IS ALWAYS UNEXPECTED AND HAPPENS SO QUICKLY I AM LEFT CONFUSED AND SCARED. THE LAST TIME THIS HAPPENED WAS A FEW DAYS AGO SO WITH ALL THE PUBLICITY ABOUT TOYOTA ACCELERATOR PEDALS, I THOUGHT I WOULD REPORT THIS PROBLEM EVEN THOUGH MY CAR IS NOT COVERED IN THE RECALL.

ON FEB. 30,2010 I AND 2 PASSENGERS WERE RIDING AROUND IN MY 2008 TOYOTA TACOMA PICK-UP TRUCK IN 4 WHEEL DRIVE. THERE WAS SNOW ON THE GROUND AND WE WERE OUT CHECKING OUT THE NEIGHBORHOOD. WE DROVE ABOUT 2 MILES, VISITED TWO RESTURANTS LOOKING FOR MY BOAT MECHANIC. WHEN ARRIVING AT SECOND RESTURANT, I WAS PULLING INTO A PARKING SPACE TRAVELING APPROX. 5MPH WHEN I DISCOVERED THE TRUCK WASN'T STOPPING OR SLOWING, I STOOD ON THE BRAKE AND IT KEPT PULLING! WE WENT STRAIGHT INTO THE WALL OF THE RESTURANT. I CUT TRUCK OFF, GATHERED MYSELF, CUT TRUCK ON AND BACKED OUT OF THE WALL. MY FRONT SEAT PASSENGER SAID WOW, I SAW YOU PRESSING THE BRAKE PEDAL HARD, BUT THE TRUCK JUST KEPT GOING, WHAT'S UP WITH THAT? I TOLD HIM I DID EVERYTHING I COULD, IT JUST KEPT PULLING LIKE IT HAD A MIND OF ITS OWN! SO I SHUT OFF ENGINE AGAIN, THE MANAGER OF THE RESTURANT CAME OUT AND ASKED IF WE WERE ALL OK. I TOLD HIM WE WERE NOT INJURED AND I WAS SORRY FOR THE WALL. I WENT INSIDE AND CALLED THE POLICE AND MY INSURANCE COMPANY. I EXPLAINED IN BOTH REPORTS THAT THE ACCELERATOR KEPT GOING EVEN WITH THE BRAKE FULLY APPLIED. INSURANCE COMPANY TOLD ME TO TAKE IT TO THE BODY SHOP FOR REPAIRS, I AM WAITING TO GET IT BACK, BUT NO ONE HAS ADVISED ME ABOUT THE ACCELERATION PROBLEM. I DON'T WANT THIS TO OCCUR AGAIN, SOMEONE COULD BE KILLED OR INJURED. I FEEL WRONGED BY THIS INCIDENT. I TAKE EXCEPTIONAL CARE OF MY VEHICLES, AND THIS WAS MY RETIREMENT TRUCK. NOW IT HAS LOST MY TRUST, AS WELL AS LOST RESALE VALUE BECAUSE IT IS NOW A WRECKED VEHICLE. ALL THIS THROUGH NO FAULT OF MY OWN! TOYOTA SHOULD REPLACE MY TRUCK WITH A NEW ONE WITHOUT DEFAULTS SUCH AS THIS, I PAID CASH FOR MY TRUCK, 28K AS WELL AS BUYING MY WIFE A TOYOTA SALARA CONVERTABLE. I HAVE PLACED ALOT OF MONEY AND CONFIDANCE IN THIS COMPANY.

AND SMOOTHLY. I TOLD THE DEALER -- AND THEY TOLD ME NOTHING WAS WRONG (INFERRING IT WAS MY PROBLEM -- THAT I'M A LOUSY DRIVER.) I REPORTED THE BRAKE PROBLEM AGAIN AFTER THIS ACCIDENT, AND WAS TOLD AGAIN THERE WAS NO PROBLEM. NEWS REPORTS NOW SUGGEST - THERE IS A PROBLEM. (BTW - MY CAR HAS ALSO DONE SOME BRIEF SPURTS OF ACCELERATION, WHICH IS ODD IN ANY HYBRID. THEY USUALLY HAVE NO REAL PICK-UP.) I HAD NEVER BEFORE DRIVEN A PRIUS, SO I FIGURED THAT WAS HOW THE CAR RAN. PLEASE LET ME KNOW HOW TO DEAL WITH THIS? THE DEALER SAYS THEY'LL CHECK THE BRAKES - BUT THEY DON'T KNOW WHAT THEY'RE LOOKING FOR. ALSO - MY CAR INSURANCE RATES WILL GO UP BECAUSE OF THIS ACCIDENT, AND IT COST ME THE \$500 DEDUCTIBLE. I'M DISGUSTED, TO SAY THE LEAST. I THOUGHT I'D BOUGHT THE HOLY GRAIL OF DESIGN EXCELLENCE & FUEL ECONOMY -- NEW AND IMPROVED 3D-GENERATION. I BOUGHT AN EXPENSIVE HEADACHE.

**NHTSA ODI Number:** 10306002  
**Date of Incident:** 20100130  
**Vehicle:** 2010 SCION TC  
**Location of Incident:** SAN DIEGO, CA  
**NHTSA Summary:**  
HAPPENED LAST WEEKEND, WAS MAKING A RIGHT TURN IN MY NEW 2010 SCION TC. CAR IS JUST BARELY 2 MONTHS OLD AND LESS THAN 800 MILES ON THE ODOMETER. MIDDLE PART OF A NICE, MILD DAY, DRY ROAD, BUT SOME BROKEN PAVEMENT/ROUGHNESS AT THE CORNER THERE. SOMEONE COMING FROM MY 3 O'CLOCK POSITION WAS PLANNING TO MAKE A U-TURN IN THE INTERSECTION SO I ATTEMPTED TO STOP FOR THEM BEFORE COMPLETING MY RIGHT TURN. APPLIED BRAKES AND PEDAL RESISTANCE AND DECELERATION RATE INITIALLY SEEMED NORMAL, BUT THEN WHEN IT GOT A LITTLE BUMPY THE BRAKE PEDAL EFFORT WENT TO ZERO AND SO DID MY BRAKING, SO MY CAR PROCEEDED WITH THE MOTION, AT COASTING SPEED -- NOT ACCELERATING (MY FOOT WAS OFF THE GAS, ON THE BRAKE PEDAL), BUT ALSO NOT SLOWING AT ALL! \*JB

**Vehicle:** 2010 LEXUS RX  
**Location of Incident:** ALDIE, VA  
**NHTSA Summary:**  
I LIVE IN ALDIE, VA AND HAVE A NEW LEXUS 2010 RX 450H HYBRID. I HAD AN ACCIDENT ON 01/30/2010 AROUND 11AM. WHAT HAPPENED WAS... I WAS DRIVING AROUND 5 TO 10 MILES PER HOUR AND TURNED THE VEHICLE TO 90 DEGREES SLOWLY TO GO TO THE SCHOOL. BUT THE VEHICLE WENT 45 DEGREES AND HIT A WOODEN STOP SIGN. I WAS REALLY DRIVING SLOW. I APPLIED THE BRAKE, BUT THE CAR SUDDENLY PICKED SOME SPEED AND HIT THE STOP SIGN. ITS UNUSUAL. THERE MAY BE SOME DEFECT IN THE BRAKES/GAS PEDALS OR WITH THE ABS SYSTEM OR THE ELECTRONICS AROUND IT. I CALLED LEXUS CUSTOMER SERVICE AND FILED A COMPLAINT ABOUT THE VEHICLE. THEY ARE SENDING IT TO THE LEGAL DEPARTMENT. THE ESTIMATED DAMAGE TO MY CAR WAS AROUND \$5,550 AND THE CAR IS CURRENTLY AT THE AUTOBODY SHOP FOR REPAIR.

**Location of Incident:** ORLANDO, FL  
**NHTSA Summary:**  
2002 RAV4 FAULTY ECM DAMAGED MY TRANSMISSION. I BOUGHT THIS CAR FOR MY DAUGHTER FOR COLLEGE AND IT RAN FINE FOR 3 YEARS UNTIL NOW. THE CAR STARTED JERKING (PULLING) WHEN ACCELERATING THE CAR. I DID MY RESEARCH ON THE INTERNET AND FOUND OUT ABOUT THE PROBLEM WITH THE ECM. I FOUND HUNDREDS OF COMPLAINTS FROM OTHER RAV4 WITH THE SAME PROBLEM. I DECIDED TO CALL TOYOTA AND OPENED A CASE NUMBER. A WEEK LATER I CALLED THEM BACK AND THEY TOLD ME THAT THE WARRANTY NO LONGER COVER THIS. I ALSO FOUND OUT THAT TOYOTA NEVER NOTIFIED CUSTOMERS ABOUT THIS PROBLEM REPORTED ON BULLEIN TC002-06 DATED 3/3/06. I RECEIVED A RECALL FOR "CHECK ENGINE LIGHT" BUT NEVER RECEIVED A RECALL TO REPLACE THE ECM. I TOOK THE CAR TO THE DEALER AND THEY SAID I HAVE TO REPLACE BOTH THE ECM AND THE TRANSMISSION AND IT WILL COST ME ABOUT \$3000, WHICH I THINK THIS COULD HAVE BEEN PREVENTED IF TOYOTA WOULD HAVE REPLACED THE ECM EARLIER.

**NHTSA Summary:**  
I WAS A PASSENGER IN MY FRIEND'S 2008 TACOMA TRUCK ON 1/31/10. WE WERE TRAVELLING FROM CULPEPPER, VA, TO CHARLOTTESVILLE WHEN WE PULLED INTO A GAS STATION AND MCDONALDS. AS WE PULLED IN THE GAS STATION WE MADE A RIGHT HAND TURN AND THEN A LEFT HAND TURN PULLING INTO THE PARKING SPOT AT NORMAL PARKING SPEED (~5MPH). AS THE DRIVER PUT ON THE BRAKE TO STOP IT FELT LIKE THE ABS ADJUSTED TO THE SLICK SURFACE AND SLID A LITTLE. THIS IS WHEN THE FRONT WHEELS LOCKED UP AND THE ENGINE REVVED AND THE BACK TIRES STARTED TO SPIN VERY FAST. AT THIS POINT THE TRUCK CLIMBED THE CONCRETE PARKING BARRIER, CROSSED THE SIDE WALK, REVVED FASTER WHILE THE DRIVER HAD HIS FOOT ON THE BRAKE AND PUT THE TRUCK IN PARK. IT PROCEEDED TO CLIMB OVER A 2FT WALL, CROSSED THE BUSHES AND CRASHED INTO THE MCDONALDS STORE FRONT.  
**C-1889**

**NHTSA ODI Number:** 20100200  
**Date of Incident:** 20100200  
**Vehicle:** 2010 TOYOTA RAV4  
**Location of Incident:** PHOENIX, AZ

**NHTSA Summary:**  
**Additional Summary:**  
PER NEWS ARTICLE IN AZCENTRAL.COM -

"Most Toyota customers affected by the recall are anxiously awaiting their notices so they can take their cars into a dealer for the repair. They are understandably nervous that their cars could malfunction while they wait. Well, we found a viewer with a sudden acceleration problem, but she says it occurred AFTER the repair was complete!"

"I am terrified to drive this car. This car I believe is not fixed."

Irene Simonetti bought her 2010 RAV4 last December. In January, she got a notice from Toyota that her car was part of the sticking gas pedal recall.

"We had that car taken in for the recall in February. They put an accelerator plate in it and that was supposed to take care of any future problems with the gas pedal."

That accelerator plate costs about 25-cents. Irene says the car ran perfectly before the plate was installed, but days afterward she says her RAV4 suddenly accelerated near I-17 and the Carefree Highway.

"Knowing at that hour how much traffic there is I was frightened if there were any cars in front of me then I was going to smash into them. Fortunately there was not."

Bell Road Toyota brought in a tech from Toyota corporate to inspect the car. What was the tech's conclusion?

"Nothing was wrong with the car. All tests were done, and it possibly could have been the floor mat."

The Toyota corporate rep claimed, according to Irene, that her thin, very flexible, driver's-side rubber mat could have rolled up and stuck against the gas pedal.

"The floor mat was not rolled up. I believe there was still a problem with that car. I don't believe whatever they did fixed it."

Irene describes her RAV4 as a 2000 pound weapon. She's still driving it, but is afraid every time she does.

"I want Toyota to give us a loaner, to take this car back, and not to have me behind the wheel of this car, because my instincts are telling me that this is going to happen again."

Irene wants Toyota to consider that the sticking gas pedal fix may not work and look into other possible causes for the problem.

#### Safety Research & Strategies

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

But she doesn't have to worry anymore. We assisted Irene as she worked with the dealer where she bought the RAV4, Camelback Toyota, on getting a new car. In the end, Camelback Subaru and Camelback Toyota agreed on a straight trade-out.

Irene turned in her RAV4 and is now the proud owner of a brand new Subaru forester with no additional money out of her pocket.

We want to thank both Camelback Toyota and Camelback Subaru for stepping up and providing great service to their customer and our viewer."

**NHTSA Summary:**  
I OWN A 2007 TOYOTA MATRIX THAT WAS EXPERIENCING UNEXPLAINED SURGING AND ACCELERATION WHILE AT A STOP AND AT IDLE. THE ENGINE WOULD REV UNEXPECTEDLY CAUSING THE CAR TO LURCH FORWARD. THIS HAPPENED WHILE SITTING AT A STOP WITH MY FOOT ON THE BRAKE. I TOOK THE MATRIX TO THE DEALER BUT THEY COULD NOT FIND WHAT THE PROBLEM WAS UNTIL THE CHECK ENGINE LIGHT CAME ON. THE CAR FINALLY GO TO A POINT WHERE IT WOULD REV UP BY ITSELF TO AS MUCH AS 4000 RPM. IT FINALLY GOT TO A POINT WHERE IT WAS UNDRIVABLE. I TOOK THE CAR TO THE DEALER AND AFTER 2 DAYS IT WAS DETERMINED THAT THE ELECTRONIC THROTTLE BODY WAS MALFUNCTIONING. THE DEALER IS CURRENTLY REPLACING THE ELECTRONIC THROTTLE BODY AT A COST OF \$1,350. I BELIEVE THAT THIS IS A PROBLEM THAT EFFECTS MORE TOYOTA MODELS AND YEARS THEN WHAT HAS CURRENTLY BEEN RECALLED.

**Vehicle:** 2010 TOYOTA 4RUNNER  
**Location of Incident:** PASADENA, CA

**NHTSA Summary:**  
TOYOTA RAV4 2010 - ON STOP AND GO TRAFFIC I WAS GOING ABOUT 5 MPH AND I LOOKED DOWN FOR A SECOND AND REAR ENDED ANOTHER CAR. BEFORE I HIT THE CAR I SLAMMED ON MY BRAKES AND BASED ON MY MANY YEARS OF DRIVING EXPERIENCE (12+) I BELIEVE THE CAR SHOULD HAVE STOPPED BUT IT DID NOT. THE INCIDENT WAS VERY MINOR. MY CAR HAS A FEW SCRATCHES THAT MAY GO AWAY WITH JUST SOAP AND WATER. THE OTHER CAR DID NOT HAVE ANY DAMAGE. I DID HAVE NECK PAIN ALL WEEK AND I STILL HAVE IT ON AND OFF. AFTER THE INCIDENT I TRIED, ON SAFE CONDITIONS, TO GO UP TO 20 MPH AND BRAKE SUDDENLY AND NOTICED THAT THE CAR LOSES BRAKING POWER AS YOU DO THIS. THE BRAKES FULL POWER IS FELT MID PRESS (AS THEY ARE HALF WAY DOWN) BUT AS THEY ARE PRESSED ALL THE WAY IN THEY LOOSE POWER. I HAD NOTICED A LOUD SOUND WHEN I USED MY HAND BRAKE AFTER PUTTING THE CAR IN PARK. THE CAR ALSO MOVES ABOUT AN INCH OR TWO AFTER I PUT THE CAR IN PARK AND DEPRESS THE BRAKE PEDAL. I CALLED THE DEALER ABOUT THE HAND BRAKE ISSUE AND THEY SAID IT WAS NORMAL AS THE GEAR WAS GOING INTO PLACE. I DIDN'T THINK TO MUCH OF IT BUT AFTER MY CAR CRASH INCIDENT I THINK THAT THERE MAY BE A PROBLEM WITH THE BRAKES.

**Date of Incident:** 20100201  
**Vehicle:** 1998 LEXUS LS400  
**Location of Incident:** SEVERNA PARK, MD

**NHTSA Summary:**  
ACCELERATION STUCK, RPMs LOCK IN AT ABOUT 2000. FAILURE OCCURS ABOUT ONCE OR TWICE DAY, BUT USUALLY ONLY IF THE AIR CONDITION IS TURNED OFF. THIS HAS BEEN GOING ON FOR YEARS NOW WITH MY VEHICLE. I TURN OFF VEHICLE AND RESTART IT TO CORRECT THE PROBLEM AND REGAIN CONTROL OF THE ACCELERATOR, IT ALWAYS RETURNS AFTER RESTART. I BELIEVE THIS MAY BE CAUSED BY FAULT IN LEXUS ELECTRONIC THROTTLE SYSTEM AND SINCE YOU ALL ARE FINALLY INVESTIGATING THIS I THOUGHT I SHOULD REPORT IT IN CASE YOU WOULD LIKE TO EXAMINE MY VEHICLE SINCE IT OCCURS SO OFTEN. I WAS TOLD BY LEXUS I SHOULD PURCHASE A NEW THROTTLE BODY. I HAVEN'T DONE SO BECAUSE I DO NOT SEE HOW THAT WILL CORRECT MY ACCELERATOR FROM STICKING IN ONE POSITION DURING DRIVING AND I BELIEVE THIS IS MORE OF A SERIOUS SAFETY ISSUE NOW WITH THE RECALLS FINALLY BEING DONE.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10305523  
**Date of Incident:** 20100201  
**Vehicle:** 2004 TOYOTA SOLARA  
**Location of Incident:** EVANSTON, IL

**NHTSA Summary:**  
I HAVE THE SAME BRAKING PROBLEM WITH MY 2004 TOYOTA SOLARA THAT HAS BEEN RECENTLY DESCRIBED IN THE 2010 PRIUS. I FIRST REPORTED THE PROBLEM TO KERRY TOYOTA IN COVINGTON, KENTUCKY ON OCTOBER 11, 2005. I HAVE A COPY OF THE SERVICE REPORT INCLUDING TOYOTA'S CLAIM THAT THE BRAKES WERE WORKING PROPERLY. I HAVE DISCUSSED THE PROBLEM WITH EVERY TOYOTA DEALER WHO HAS WORKED ON THE CAR SINCE I HAVE OWNED IT. NONE HAVE ACKNOWLEDGED THE PROBLEM AND AS A FEMALE, I DON'T REALLY FEEL LIKE I HAVE BEEN TAKEN SERIOUSLY. I AM AN EXCELLENT DRIVER WITH NO ACCIDENTS IN 30 YEARS OF DRIVING. MOST RECENTLY, ON THIS PAST MONDAY, FEBRUARY 1, AS I DROVE TO WORK, THE CAR IN FRONT OF ME BRAKED SUDDENLY. WHEN I APPLIED MY BRAKES, I HIT A POT HOLE AT EXACTLY THE SAME TIME. THE BRAKE PEDAL SOFTENED AND THE CAR DID NOT SLOW DOWN AT ALL. I PUMPED THE BRAKES AND THIS TIME THE BRAKES ENGAGED AND THE CAR SLOWED. THIS ISSUE HAS BEEN COMPLETELY CONSISTENT. SUDDEN BRAKING, A BUMPY ROAD OR LOOSE TRACTION, ABS SEEMS TO ENGAGE, ABSOLUTELY NO BRAKES. THE ISSUE IS BAD ENOUGH THAT I REFUSED TO SELL THE NOW 6 YEAR OLD CAR TO MY BROTHER FOR HIS DAUGHTER TO DRIVE. I DO NOT THINK THAT AN INEXPERIENCED DRIVER COULD POSSIBLY RESPOND QUICKLY ENOUGH TO STOP THE CAR.

**NHTSA Summary:**  
MY CAMRY 2008 EXPERIENCED A SUDDEN ACCELERATION THIS MONDAY MORNING (2/1/2010). MY WIFE WAS DRIVING TO HER OFFICE. SHE SAW A RED LIGHT THEN STOPPED

C-1896

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ON THE BREAK PEDAL AND THE CAR STARTED TO SLOW DOWN. IT WAS ALMOST 0 MPH THEN MY WIFE HEARD THE ENGINE SUDDENLY SOUNDED LOUDLY AND THE CAR STARTED TO ACCELERATE. FORTUNATELY, THE SPEED WAS ALREADY LOW AND MY WIFE STEPPED HARD ON THE BRAKE AND THE CAR STOPPED. AFTER THAT, WE PARKED THE CAR HOME AND RENTED A NISSAN. I'VE CALLED TOYOTA DEALER AND THEY SAID THERE WILL BE A FIX NEXT WEEK. I LOOKED AT THE TOYOTA WEBSITE ABOUT THE FIX, AND, HONESTLY, I AM NOT SURE THAT FIX WILL WORK. THE FIX, AT MOST, CAN REDUCE THE CHANCE THAT THE GAS PEDAL IS STUCK, BUT FOR MY CASE, THE ENGINE ALREADY SLOWED DOWN THEN ACCELERATED SUDDENLY. I ALSO CALLED TOYOTA CUSTOM SERVICES, AFTER A LONG TIME HOLDING AND A FEW TRANSFERRING, THEY GAVE ME A CASE NUMBER AND TOLD ME THEY WILL CALL ME BACK IN TWO DAYS, THREE DAYS PASSED AND THEY DIDN'T CALL. I CALLED THEM AGAIN THIS MORNING (2/4/2010) AND AFTER A LONG TIME HOLDING (45 MINUTES), THE GENTLEMAN TOLD ME THE CASE MANAGER SHOULD CALLED ME YESTERDAY AND HE WILL CALL ME TODAY. IT'S 7:48PM NOW AND THEY STILL HAVEN'T CALLED. \*JB

**NHTSA Summary:**

ON 2/01/10 AT APPROXIMATELY 8:00 AM I WAS DRIVING MY TOYOTA ON THE WASHINGTON DC BELTWAY 495 NORTH FROM VIRGINIA. I WAS NEARING 270 NORTH AND DECIDED I HAD BETTER CHANGE LANES TO STAY ON MY INTENDED ROUTE ON 495. LOOKING IN THE REARVIEW MIRROR I SAW A TRACTOR-TRAILER WAS IN THE RIGHT HAND LANE NEXT TO ME AND I NEEDED SOME RAPID ACCELERATION TO GET AHEAD OF THE TRUCK SO I STAMPED ON THE ACCELERATOR. I STAMPED MUCH HARDER THAN I NORMALLY WOULD DO. IMMEDIATELY MY ACCELERATOR STUCK TO THE FLOOR AND THE CAR ACCELERATED FROM APPROXIMATELY 65 TO OVER 85 MILES AN HOUR. I HAD

C-1898

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SEEN A TV REPORT ON THE NBC STATION IN DC THAT ADVISED IF YOUR TOYOTA ACCELERATOR STICKS, APPLY BOTH FEET TO THE BRAKE PEDAL AND HOLD IT. I FORGOT THE HOLD IT PART AND I STARTED TO PUMP THE BRAKE, WHICH HAD NO EFFECT. I ALSO REMEMBERED THAT THE NEXT THING TO TRY WAS PUT THE CAR IN NEUTRAL. THIS I DID AND THE ACCELERATION STOPPED IMMEDIATELY. I WAS ABLE TO COAST THE CAR OFF INTO AN AREA, A TRIANGLE BETWEEN THE RIGHT LANE OF THE BELTWAY AND AN ONCOMING LANE. I THEN TURNED OFF THE CAR AND PHYSICALLY REACHED DOWN AND PULLED THE ACCELERATOR BACK UP. IT "POPPED" UP LIKE A SPRING. I THEN RESTARTED THE CAR AND CONTINUED TO WORK. I REMEMBERED THAT ON LONG TRIP RECENTLY TO ATLANTA THAT ONE OTHER TIME IT FELT LIKE THE ACCELERATOR STUCK, BUT THAT TIME IT WAS MOMENTARY A FEW SECONDS. ON 2/21/10 THE ACCELERATOR STAYED DOWN I AM GUESSING A GOOD 20-30 SECONDS BEFORE I REMEMBERED TO PUT THE CAR IN NEUTRAL. WHEN I GOT TO WORK I CALLED TOYOTA USA TO REPORT THE PROBLEM AND THEY TOLD ME MY CAR WAS NOT COVERED BY THE RECALL AND THAT I SHOULD CALL A DEALER. I CALLED MY DEALER AND HE TOLD ME THERE WERE NO PARTS AVAILABLE OR EVEN MADE FOR THE CAMRY HYBRID AND THAT HE WOULD JUST HAVE TO REPLACE THE ACCELERATOR ASSEMBLY WITH THE SAME PART. HE SAID THEY HAVEN'T MADE ANY NEW PARTS FOR THE HYBRID. DID NOT SOUND LIKE THEY CARED

**Date of Incident:** 20100201  
**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** LOS ANGELES, CA

**NHTSA Summary:**

I HAVE AN AUTOMATIC, 6-CYLINDER 2007 TOYOTA RAV4 LIMITED AWD, THAT SUFFERS FROM THROTTLE/TRANSMISSION LAG OF 1-2 SECONDS. I EXPERIENCE IT MOST COMMONLY WHEN MERGING INTO TRAFFIC OR CHANGING LANES, WHEN I DEPRESS THE ACCELERATOR TO SPEED UP, THERE IS AN UNCOMFORTABLY LONG DELAY BEFORE THE TRANSMISSION CHANGES GEARS. THE RESULT IS I AM LEFT HANGING OUT IN A LANE, WITH NO POWER OR SPEED. WHEN THE TRANSMISSION OR THROTTLE FINALLY KICKS IN, THE CAR LURCHES VIOLENTLY, ALMOST CAUSING ME TO LOSE CONTROL. I AND MANY OWNERS HAVE COMPLAINED BUT HAVE BEEN TOLD THAT THIS IS NORMAL OPERATION. BY THE WAY, I ALSO OWN A 2008 HONDA ACCORD AUTOMATIC AND HAVE NEVER EXPERIENCED ANYTHING LIKE THIS IN THE HONDA. I WOULD LIKE THIS TO BE LOOKED AT AND FIXED.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10308468

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

INTERSECTION. THE LIGHT AHEAD WAS RED, SO I TOOK MY FOOT ENTIRELY OFF OF THE ACCELERATOR AND LET THE CAR COAST. IT GRADUALLY SLOWED DOWN AS IT ALWAYS DOES, NOTHING UNUSUAL. AS I CAME UP ON THE RED LIGHT I APPLIED THE BRAKES AND ROLLED TO A SOFT STOP. I WAITED AT A RED LIGHT WITH MY FOOT RESTING ENTIRELY ON THE BRAKE PEDAL. ALL OF A SUDDEN--THE FIRST THING I NOTICED WAS THE SOUND--THE ENGINE ROARED AND THE CAR TRIED TO RACE FORWARD DESPITE MY FOOT ON THE BRAKE. I PRESSED HARDER ON THE BRAKE TO NO AVAIL. THE CAR WAS FIGHTING AGAINST ME WANTING TO RACE FORWARD. THERE WAS A STOPPED CAR AHEAD OF ME AND I WAS TRYING NOT TO CRASH INTO IT. IN DESPERATION I STOOD UP ON THE BRAKES AS HARD AS I COULD AND THE CAR SKID. I HAD TO STEER INTO ONCOMING TRAFFIC TO AVOID REAR ENDING THE CAR IN FRONT OF ME. I PULLED THE EMERGENCY BRAKE AND THE CAR CAME TO A STOP DIAGONAL ACROSS TWO LANES OF TRAFFIC. I BROUGHT THE CAR INTO TOYOTA FOR A SECOND TIME. DEALER RAN EXTENSIVE TESTS ON ELECTRONIC AND ENGINE SYSTEMS AND SAID THERE WAS NOTHING WRONG. THEY STATED THAT THE COMPUTER "HISTORY" SHOWED NO RECORD OF THE INCIDENT. THEY OFFERED NO EXPLANATION NOR ANY REMEDY. I AM FRUSTRATED BEYOND BELIEF THAT TOYOTA IS HIDING BEHIND "WE CAN'T FIND ANYTHING WRONG" AND IS NOT TRYING HARDER TO FIND THE CAUSE. THERE ARE NO FLOOR MATS IN MY CAR, AND THERE ARE NO PROBLEMS WITH THE GAS PEDAL. I WOULD LIKE TO MAKE VERY CLEAR THAT MY FOOT WAS ENTIRELY OFF OF THE GAS PEDAL FOR AT LEAST 15 SECONDS PRIOR TO THE FAILURE. I AM CONVINCED THAT THIS INCIDENT WAS CAUSED BY A COMPUTER MIS-FIRE OR ELECTRONIC MALFUNCTION THAT CAUSED THE ENGINE TO OPEN FULL-THROTTLE WHILE THE CAR WAS STOPPED AND BRAKES ENGAGED. TOYOTA DOES NOT KNOW WHAT IS WRONG, AND THEY DON'T KNOW HOW TO FIX IT --THIS IS A HUGE PROBLEM! PEOPLES LIVES ARE AT STAKE! \*TR

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

MY WIFE WAS SITTING AT A SIGNALIZED INTERSECTION IN OUR 2009 TOYOTA RAV 4 ON TUESDAY FEBRUARY 2, 2010 WITH HER FOOT ON THE BRAKE. WHEN THE VEHICLE SUDDENLY LURCHED FORWARD. SHE WAS ABLE TO KEEP THE VEHICLE FROM TRAVELING FURTHER BY APPLYING MORE PEDAL PRESSURE ON THE BRAKE AND THEN SHIFTING INTO NEUTRAL. WHILE IN NEUTRAL, THE ENGINE REVVED LOUDLY FOR ABOUT 10 SECONDS BEFORE RETURNING TO NORMAL IDLE. SHE BROUGHT THE VEHICLE HOME BUT WAS VISIBLY SHAKEN UP FROM THIS EXPERIENCE. I IMMEDIATELY CALLED THE TOYOTA DEALERSHIP AND WAS TOLD TO TAKE THE VEHICLE IN FOR THEM TO CHECK. THEY COULD NOT REPLICATE THIS CONDITION AND THUS SAID THERE'S NOTHING THAT CAN BE DONE AT THIS TIME. THIS IS ONE OF THE VEHICLES THAT DOES NOT HAVE THE SO-CALLED FAULTY STICKING ACCELERATOR PEDAL, AND FLOOR MATS DID NOT CAUSE THIS ISSUE, SO THIS LEADS ME TO SUSPECT THAT AN ELECTRONICS PROBLEM IS THE CAUSE AND THAT TOYOTA IS REFUSING TO COME UP WITH A VIABLE FIX FOR THE SITUATION. I CALLED THE TOYOTA MAIN OFFICE THIS MORNING, BUT WAS NOT GIVEN ANY SATISFACTION REGARDING THIS ISSUE. MEANWHILE, WE ARE STUCK WITH A VEHICLE THAT WE ARE BOTH AFRAID TO CONTINUE DRIVING.

**NHTSA Summary:**  
TL--THE CONTACT OWNS A 2006 TOYOTA COROLLA. THE CONTACT STATED THAT THE VEHICLE ACCELERATES WITHOUT THE ACCELERATOR PEDAL BEING APPLIED MAINLY AT LOWER SPEEDS. THE CONTACT HAS CRASH THE VEHICLE 4 TIME DUES TO THE VEHICLE SURGING WHILE TRYING TO STOP. DURING ALL 4 CRASHES NO ONE WAS INJURED. THE CONTACT HAS TAKEN THE VEHICLE TO THE DEALER TWICE BUT THE CONTACT INFORMED THE DEALER THAT THE BRAKES WAS THE ISSUE UNAWARE OF THE FLOOR MAT OR THE STICKY PEDAL RECALL. THE CONTACT FEELS THIS IS VERY UNSAFE AND MAY CAUSE SERIOUS INJURIES TO SOMEONE. THE FAILURE MILEAGE WAS 9,664. JO

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**

I WAS DRIVING MY 2010 TOYOTA PRIUS USING CRUISE CONTROL ON A HIGHWAY. I DISENGAGED CRUISE CONTROL TO SLOW DOWN AS A VEHICLE ENTERED THE HIGHWAY IN FRONT OF ME. ONCE THE SECOND VEHICLE HAD ACCELERATED AHEAD, I RE-ENGAGED CRUISE CONTROL AT MY DESIRED SPEED. THE CRUISE CONTROL ENGAGED, BUT CONTINUED ACCELERATION, AS IF I WAS ACTIVATING THE CRUISE CONTROL MECHANISM'S ACCELERATE "PADDLE", WHICH I WAS NOT ACTUALLY DOING. I IMMEDIATELY DIS-ENGAGED CRUISE CONTROL, SLOWED TO MY DESIRED SPEED, AND RE-ENGAGED CRUISE CONTROL. AT THIS POINT, THE CRUISE CONTROL RESUMED PROPER OPERATION AND I WAS ABLE TO DRIVE AT MY SELECTED SPEED.

**Additional Summary:****Toyota ID Number:****NHTSA ODI Number:** 10305221**Date of Incident:** 20100202**Vehicle:** 2010 TOYOTA RAV4**Location of Incident:** MINNEAPOLIS, MN**NHTSA Summary:**

CAR SEEMS TO LAG WHEN I STEP ON GAS PEDAL FROM A STOP POSITION (WHEN I'M STOPPED AT A RED LIGHT). IT HAS HAPPENED 3 TIMES NOW AND ONLY WHEN I'M TRYING TO TURN LEFT. VEHICLE DOESN'T JUMP, BUT THERE IS A LAG AND THE CAR DOESN'T GO, EVEN WHEN I'M PRESSING DOWN ON THE GAS PEDAL. DOES ANYONE ELSE HAVE THIS PROBLEM? THIS IS MY FIRST BRAND NEW VEHICLE AND I'M PRETTY DISSAPPOINTED.

**Additional Summary:****Toyota ID Number:****NHTSA ODI Number:** 10306263**Date of Incident:** 20100202**Vehicle:** 2007 TOYOTA TACOMA**Location of Incident:** RICHFIELD SPRINGS, NY**NHTSA Summary:**

I WAS DRIVING MY 2007 TOYOTA TACOMA, WHICH IS A 4 CYLINDER STANDARD SHIFT MODEL, AND APPROACHING A STOP SIGN WITH THE CLUTCH DEPRESSED AND MY OTHER FOOT ON THE BRAKE WHEN THE ENGINE WENT TO MAXIMUM RPM. I SHUT THE IGNITION OFF IMMEDIATELY AND LOOKED AT THE ACCELERATOR WHICH WAS ALL THE WAY UP. I THEN RESTARTED THE VEHICLE AND IT RAN NORMALLY. A SUBSEQUENT VISIT TO THE PLACE WHERE THIS HAPPENED REVEALED A UTILITY POLE WITH 3 TRANSFORMERS ON IT. THE STATIC FROM THESE TRANSFORMER WAS SO INTENSE THAT IT DROWNED OUT THE RADIO. THIS INCIDENT WOULD APPEAR TO CONTRIBUTE TO THE THEORY THAT ELECTROMAGNETIC INTERFERENCE IS A POSSIBLE FACTOR IN THE TOYOTA ACCELERATOR PROBLEM. NO PREVIOUS OR SUBSEQUENT PROBLEMS HAVE BEEN EXPERIENCED.

**Additional Summary:****Toyota ID Number:****NHTSA ODI Number:** 10306788**Date of Incident:** 20100202**Vehicle:** 2009 TOYOTA CAMRY**Location of Incident:** BROOKLYN, NY**NHTSA Summary:**

MY 2009 CAMRY ACCELERATES SUDDENLY ON CITY STREETS. THERE HAVE BEEN SEVERAL SUDDEN ACCELERATIONS ON TURNS. MY CAR SUDDENLY ACCELERATED

**C-1905****Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

DURING A RIGHT TURN AND I NEARLY JUMPED THE CURB (TWICE) TAKE OFF IS NOT SMOOTH SINCE IT TEMPORARILY STALLS AND THEN SUDDENLY JERKS OUT AT A HIGHER SPEED. THE BRAKE PETAL, STEERING WHEEL AND CAR FLOOR ALL VIBRATE AND THE ENGINE MAKES CLUNKING NOISES. MY CAR HAS LESS THAN 5,000 MILES ON IT. THE PETALS SHIFT AND MAKE CLUNKING NOISES LIKE WOODEN CLOGS. THIS PAST MONTH, THE PASSENGER CABIN SMELLS WITH GAS FUMES AS THE CAR OPERATES. AFTER THE RECALL, I DISCOVERED THAT I WAS LIED TO BY THE DEALER AND MY CAR WAS NOT MADE IN JAPAN AS I WAS TOLD AT THE TIME OF SALE.

CAR ACCELERATED, COULD NOT STOP IN 5 DIFFERENT INCIDENTS. THE LATEST ONE WAS ON BACKING OUT OF GARAGE. PRESSED HARD ON BRAKE AND CAR STOPPED JUST SHORT OF HITTING ANOTHER CAR. \*CN

**Additional Summary:****Toyota ID Number:****NHTSA ODI Number:** 10307020**Date of Incident:** 20100202**Vehicle:** 2005 TOYOTA CAMRY**Location of Incident:** SOUTH PORTLAND, ME**NHTSA Summary:**

2005 TOYOTA CAMRY WITH 3.0L V6 ENGINE. I RECENTLY BRAKED MY TOYOTA CAMRY ON THE STREET NEXT TO MY HOUSE, PARALLEL TO THE CURBING. THEN, I PUT THE VEHICLE IN REVERSE, MADE A 180 DEGREE TURN AND BACKED BETWEEN THE TWO LARGE BUSHES ON EITHER SIDE OF MY DRIVEWAY. I MUST BACK VERY SLOWLY INTO THE OPENING. AFTER I HAD THE VEHICLE BETWEEN THE 2 BUSHES AT THE TOP OF THE DRIVEWAY, I BRAKED THE VEHICLE, STILL IN REVERSE, SO THAT I COULD STRAIGHTEN OUT AND PROCEED SLOWLY TO PARK NEXT TO MY HUSBAND'S TRUCK AT THE END OF THE DRIVEWAY. SUDDENLY, THE VEHICLE JOLTED AND I FOUND MYSELF PRACTICALLY

**C-1906****Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

FLYING BACKWARDS. THE VEHICLE WENT BACK ABOUT 25 FEET, THEN TOOK OUT OUR FENCE, AND HALF OF OUR 6 FOOT TRELIS. HOWEVER, IT DID NOT STOP THERE. IT PRACTICALLY FLEW INTO OUR NEXT DOOR NEIGHBOR'S YARD, DID A 180 BEHIND THE NEIGHBOR'S HOUSE, FINALLY STOPPING AT THE BOTTOM OF A HILL IN SOME SNOW TWO DOORS DOWN FROM MY HOUSE. DURING THIS TIME, I HAD NO CONTROL OVER THE VEHICLE. BECAUSE OF THE RECENT TOYOTA RECALLS, I THOUGHT I HAD PROGRAMMED MYSELF AS TO WHAT TO DO, IF MY VEHICLE WENT OUT OF CONTROL. HOWEVER, GOING IN REVERSE AT A HIGH SPEED IS SOMETHING DIFFERENT. IT COMPLETELY DISORIENTED ME, SO THAT I DID NOT DROP THE VEHICLE INTO NEUTRAL OR TURN OFF THE KEY. I HAVE BEEN BACKING INTO MY DRIVEWAY THE SAME WAY FOR 45 YEARS, AND NEVER EXPERIENCED ANY PROBLEM BECAUSE I DO SO AT SUCH A SLOW PACE. MY VEHICLE MUST HAVE GONE ABOUT 150 FEET BEFORE STOPPING, AND I FELT LIKE IT WAS POSSESSED. FORTUNATELY, NO ONE WAS INJURED, BUT THERE IS \$5,000 WORTH OF DAMAGE TO MY VEHICLE. AFTER READING ABOUT SIMILAR EXPERIENCES ON YOUR SITE, I TRULY FEEL THE 2005 CAMRY SHOULD BE INCLUDED IN THE RECALL. I DO NOT FEEL THAT I COULD TRUST IT AGAIN.

**Additional Summary:****Toyota ID Number:****NHTSA ODI Number:** 10308632**Date of Incident:** 20100202**Vehicle:** 2005 TOYOTA TUNDRA**Location of Incident:** LOS ANGELES, CA**NHTSA Summary:**

ON FEBRUARY 2, 2010 AT ABOUT 6:20AM WHILE DRIVING MY TOYOTA TUNDRA 2005, V8 ENGINE, ON HIGHWAY 101 WEST BOUND WHEN MY VEHICLE SUDDENLY ACCELERATED ON ME. I WAS ON LANE ONE BETWEEN BARHAM AVE. & VINELAND AVE WHEN IT ALL HAPPEN. MAKING ME CHANGE LANES AT AN UNSAFE SPEED TRYING IT TO CONTROL IT. I HAD MY FOOT OFF THE ACCELERATOR BUT IT KEEP GOING AT ABOUT 75-80 MPH. THERE WAS NO CRUISE CONTROL ON AND I WAS SHOCKED ABOUT THE SUDDEN ACCELERATION. THE VEHICLE FINALLY CAME TO NORMAL DRIVING CONDITIONS AT ABOUT 1/4 OF A MILE FROM VINELAND AVE.

**Additional Summary:****Toyota ID Number:****NHTSA ODI Number:** 10310152**Date of Incident:** 20100202**Vehicle:** 2004 TOYOTA COROLLA**Location of Incident:** GRANADA HILLS, CA**NHTSA Summary:**

TL-THE CONTACT OWNS A 2004 TOYOTA COROLLA. THE CONTACT STATED HER VEHICLE ACCELERATOR AT LEAST THREE TIMES. LASTLY AS SHE PULLED INTO THE DRIVEWAY THE VEHICLE ACCELERATED ALMOST INTO THE GARAGE AS SHE DEPRESS HER BRAKES THE VEHICLE STOP. THE VEHICLE HAS NOT BEEN TAKEN TO THE DEALER BECAUSE THE DEALER TOLD HER IT WOULD COST \$90 FOR A DIAGNOSTIC TEST. THERE WAS NO MAINTENANCE PERFORMED PRIOR TO THE BRAKE FAILURE. THE FAILURE MILEAGE WAS 40,000. MW

**Additional Summary:****Toyota ID Number:****NHTSA ODI Number:** 10314170**Date of Incident:** 20100202**C-1907****Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C***Vehicle:** 2009 TOYOTA COROLLA**Location of Incident:** BEACHWOOD, OH**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2009 TOYOTA COROLLA. WHILE THE CONTACT WAS DRIVING 30 MPH THE VEHICLE SUDDENLY ACCELERATED CAUSING HIM TO CRASH INTO AN OBJECT WHICH DESTROYED THE VEHICLE. THE CONTACT INJURED HIS SHOULDER DURING THE CRASH AND A POLICE REPORT WAS FILED. THE VEHICLE HAS NOT BEEN DIAGNOSED BY THE DEALERSHIP AND THERE WERE NO PRIOR WARNINGS. THE CURRENT AND FAILURE MILEAGES WERE 15000.

**Additional Summary:****Toyota ID Number:****NHTSA ODI Number:** 10319696**Date of Incident:** 20100202**Vehicle:** 2010 TOYOTA CAMRY**Location of Incident:** BRISTOW, VA**NHTSA Summary:**

ON FEBRUARY 2, 2010 I WAS ENTERING MY GARAGE AND SLOWLY DROVE IN. I THEN PLACED MY FOOT ON THE BRAKE TO STOP. I THEN OPENED THE DRIVERS SIDE DOOR SLIGHTLY AS I WAS ABOUT TO PLACE THE VEHICLE IN PARK A SHORT REVING OF THE ENGINE BEGAN, RIGHT BEFORE I PLACED THE SHIFTER INTO PARK THE VEHICLE JUMPED INTO REVERSE AND BEGAN TO ACCELERATE BACKWARDS, CAUSING DAMAGE TO THE DRIVERS SIDE DOOR WHICH FLEW OPEN DUE TO THE REVERSE ACCELERATION, THE WALL IN MY GARAGE, THE GARAGE RAILING, THE SIDE PANEL OF THE GARAGE WERE ALL DAMAGED AS A RESULT. I THEN SLAMMED ON THE BRAKES AND THE PARKING BRAKES, PLACED THE SHIFTER IN NEUTRAL AND THEN TURNED OFF THE ENGINE. I THEN CALLED THE TOYOTA CORPORATION AND EXPLAINED THE EVENT TO THEM. THEIR PROCESS WAS SLOW AND NOT CONSIDERATE TO MY NEEDS AS A CONSUMER. AFTER SEVERAL DAYS AND NUMEROUS PHONE CALLS TOYOTA FINALLY RESPONDED AND I WAS TOLD THAT I WAS GOING TO HAVE TO WAIT ANOTHER 4 DAYS FOR SOMEONE ELSE FROM THEIR REGIONAL DEPARTMENT TO GET IN TOUCH WITH ME. I FINALLY DECIDED TO LET MY INSURANCE COMPANY HANDLE THE VEHICLES DAMAGE BECAUSE I ONLY HAVE ONE CAR. AFTER A WEEK IN THE SHOP I THEN TOOK THE VEHICLE A TOYOTA DEALER FOR THEM TO REPAIR THE RECALL ISSUES. TOYOTA EXPLAINED TO ME THAT THEY FIXED THE RECALL PROBLEMS AND RETURNED THE VEHICLE BACK TO ME.

**Additional Summary:****Toyota ID Number:****NHTSA ODI Number:** 10320880**Date of Incident:** 20100202**Vehicle:** 2005 TOYOTA CAMRY**Location of Incident:** NEWNAN, GA**NHTSA Summary:**

LETTER ON BEHALF OF RE HER EXPERIENCE WITH UNINTENDED ACCELERATION IN HER 2005 TOYOTA CAMRY. REPLY ATTN: ATLANTA OFFICE. \*KB THE CONSUMER STATED SHE BACKED OUT OF A PARKING SPACE ONTO A ONE WAY STREET WITH TWO LANES. NO CARS WERE COMING IN THE FIRST LANE. AS SHE BEGAN BACKING UP, THE VEHICLE SUDDENLY ACCELERATED BACKWARDS. SHE CROSSED THE FIRST LANE AND HIT A TRUCK IN THE SECOND LANE. IT STOPPED AFTER HITTING THE TRUCK. \*JB

**Toyota ID Number:**  
**NHTSA ODI Number:** 10325597  
**Date of Incident:** 20100202  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** NORTH POTOMAC, MD  
**NHTSA Summary:**  
RE: LEXUS ES350, 2007, 16,800 MILES; VIN: JTHBJ46G572030044 ON FEBRUARY 2ND, 2010, I WAS DRIVING ABOVE REFERENCED CAR, WITH ONLY ABOUT 16,800 MILES DRIVEN ON IT, BARELY AT 20 MPH ON A SIDE STREET AND OUR LEXUS ACCELERATED ON ITS OWN, BRAKES FAILED AND THE CAR SKIDDED AND HIT THE PAVEMENT OF A SIDEWALK. I TOOK THE CAR TO THE LEXUS OF ROCKVILLE (301 762 9099) AND THEY SAID ALTHOUGH MOST REPAIRS ARE COVERED UNDER THE WARRANTY, A FEW ARE NOT. THEY INITIALLY QUOTED ME MY SHARE OF THE COST TO ABOUT \$250 WITH WHICH I AGREED. SUBSEQUENTLY THEY CALLED ME AND TOLD ME THAT MY BILL WILL BE ABOUT \$2300 IN ADDITION TO THE COSTS COVERED BY THE WARRANTY. PLEASE VERIFY THAT THESE COSTS ARE LEGITIMATE AND PLEASE RE-DETERMINE WHY WILL THEY NOT RELEASE MY CAR FOR A SECOND OPINION? BEING IN DOUBT, I ASKED FOR THE CAR BACK FOR TAKING IT TO ANOTHER DEALER, BUT THEY WILL NOT GIVE BACK TO ME MY OWN CAR (THEY SAID DUE TO SAFETY REASONS) AND COERCED ME INTO PAYING A BILL OF \$2199.36 (INVOICE #882736), WHICH CONTAINED ALMOST \$1800 IN LABOR COST AND THE BALANCE IN PARTS. PLEASE LOOK INTO THIS INCIDENT AND THE ATTACHED INVOICE VERY THOROUGHLY. IT WAS A MANUFACTURING DEFECT THAT THE CAR ACCELERATED ON ITS OWN, BRAKES FAILED AND THE CAR SKIDDED AND HIT THE PAVEMENT. IT WAS NONE OF MY FAULT AND THE CAR IS STILL UNDER 7 YEAR WARRANTY. LEXUS SHOULD FULLY AND COMPLETELY REIMBURSE ME FOR REPAIRS AND INJURIES (TO MY RIGHT WRIST) AS A CIVIC AND HUMANITARIAN DUTY. I ALSO URGE YOU TO PLEASE CONSIDER A RECALL, SO THAT OTHERS WILL NOT BE INJURED MORE SERIOUSLY.

**NHTSA Summary:**  
PURCHASED NEW 2003 TOYOTA COROLLA LE IN 2003 AND NEW 2006 TOYOTA COROLLA LE IN 2006. FROM 2003 THRU 2006 SIX INCIDENTS OCCURRED WITH VEHICLE STOPPED AND MY FOOT ON THE BRAKE PEDAL NOT ON ACCELERATOR PEDAL WHERE ENGINE RACED AS IF CRUISE CONTROL KICKED INTO "RESUME" AND VEHICLE BEGAN TO ACCELERATE.  
**C-1909**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BY REFLEX, I SHIFTED INTO PARK OR SHUT TURNED OFF THE IGNITION KEY TO CONTROL THE VEHICLE. I REPORTED THE INCIDENTS TO LASSEN TOYOTA, ALBANY OREGON NO RESPONSE FROM THEM. THE 2006 TOYOTA HAD THE SAME INCIDENT OCCUR ONCE IN THE LAST FOUR YEARS. IT HAS THE SAME ENGINE AND EQUIPMENT AS THE 2003 MODEL I OWNED AND I REPORTED THE INCIDENT AGAIN TO LASSEN TOYOTA WITH NO RESPONSE. I AM ON MY GUARD NOW THAT I KNOW THIS OCCURS AND I DON'T PANIC AND KNOW HOW TO DEAL WITH IT, BUT ANYONE WHO DOESN'T KEEP A CLEAR HEAD AND KNOW WHAT TO DO INSTINCTIVELY COULD BE IN TROUBLE. I AM SURE THIS IS A COMPUTER PROBLEM THAT HAS SOME LINK TO THE ACCELERATION PROGRAM IN THE CRUISE CONTROL AREA EVEN WITH THE CRUISE CONTROL OFF AND THE CAR IN DRIVE WITH THE FOOT ON THE BRAKE PEDAL AND THE FOOT NO WHERE NEAR THE ACCELERATOR PEDAL. THIS PROBLEM EXISTED IN TWO DIFFERENT YEARS OF THE SAME MODEL TOYOTA. JUST THOUGHT YOU SHOULD BE AWARE THAT THIS DOES OCCUR RANDOMLY IN THESE CARS AND THAT COMPLAINTS ARE IGNORED. \*TR

**C-1912**

THE FIRST THING I NOTICED WAS THAT THE ACCELERATOR PEDAL WOULD NOT ACCELERATE WHEN I STEPPED ON IT GOING ONTO THE ON-RAMP, ABOUT A MONTH AGO. ON TUESDAY, I WENT TO THE DEALER AND THEY SAID THEY DIDN'T HAVE THE PARTS YET, THAT THEY WOULD CALL ME, AND THAT THEY DIDN'T EVEN KNOW WHAT TO DO WITH THE PARTS WHEN THEY GOT HERE. THEY SAID THEY HAD ONE OF THOSE COURSES TWO WEEKS AGO, BUT WHAT THEY LEARNED THERE DOES NOT REALLY APPLY TO THE PROBLEMS THAT ARE COMING ON NOW. SO EVEN WHEN THEY GOT THE PARTS, THEY WOULD HAVE TO FIGURE OUT WHAT TO DO WITH THEM. I TRIED TO ASK FOR A REPLACEMENT OR SOMETHING OF THE SORT, AND THEY SAID THAT THEY DIDN'T EVEN HAVE ANY CARS TO PROVIDE ME BECAUSE ALL THE MODELS ON THE LOT WERE INCLUDED IN THE RECALL. THE NEXT DAY (YESTERDAY), I TRIED TO STOP AT A STOP SIGN AND IT DIMINISHED THE SPEED BUT IT DID NOT STOP COMPLETELY. IT DIDN'T STOP UNTIL THE MIDDLE OF THE INTERSECTION AND I GOT A TICKET.

**Location of Incident:** SAINT PAUL, MN

**NHTSA Summary:**

1. AS I WAS PULLING INTO A PARKING PLACE IN A PARKING LOT, MY 2009 TOYOTA RAV4 ACCELERATED RAPIDLY AND DROVE UP ON THE SIDEWALK. I IMMEDIATELY SLAMMED MY FOOT ON THE BRAKE AND MANAGED TO STOP THE CAR JUST BEFORE IT WOULD HAVE RUN INTO THE WALL AHEAD OF ME. BEFORE TURNING INTO THE PARKING PLACE, I HAD SLOWED WAY DOWN TO MAKE THE 90 DEGREE TURN AND I APPLIED ONLY GENTLE PRESSURE ON THE ACCELERATOR TO PULL INTO THE PARKING SPOT. 2. I HAVE HAD THIS CAR SINCE SEPTEMBER 2009 AND HAVE NEVER HAD AN EXPERIENCE LIKE THIS BEFORE. 3. I HAVE AN APPOINTMENT WITH MY TOYOTA DEALER NEXT TUESDAY, FEB 9, TO INSERT A PIECE OF METAL TO STOP THE ACCELERATOR FROM STICKING. BUT I'M AFRAID THIS MAY NOT SOLVE THE PROBLEM, SINCE THIS DID NOT SEEM TO BE THE RESULT OF THE ACCELERATOR STICKING; THE ACCELERATOR WAS ONLY SLIGHTLY DEPRESSED WHEN THE CAR SPEEDED UP BY ITSELF.

**NHTSA Summary:**

I DRIVE A 2000 TOYOTA CAMRY, AND HAVE HAD A FEW INCIDENTS PREVIOUSLY, DURING THE WINTER MONTHS OF 2008-09. THIS CONCERN NEVER HAPPENS DURING WARMER MONTHS. IT HAPPENED 3 TIMES IN THE SAME DAY ON FEB. 3, 2010: WHEN APPROACHING A T-INTERSECTION OF SMALLER HIGHWAYS, WHEN I CAME TO A STOPLIGHT CONTROLLED 4-WAY INTERSECTION IN THE TOWN OF NEWTON, IA, AND AS I WAS SLOWING DOWN TO TURN OFF THE MAIN ST. INTO A PARKING LOT. WHEN I PUSHED DOWN ON THE BRAKE PEDAL, IT WAS ALMOST LIKE THERE WERE NO BRAKES. I HAD TO PUSH IT CLEAR TO THE FLOOR AND THEN VERY SLOWLY AND GRADUALLY, MY CAR EVENTUALLY STOPPED, BUT OUT IN THE INTERSECTION OR BEYOND MY TURNOFF. I HAVENT REAR-ENDED ANYONE OR HIT ANY PEDESTRIANS, BUT THAT IS A DEFINITE POSSIBILITY. I STARTED RESEARCHING ONLINE TO SEE IF OTHERS HAVE HAD THIS PROBLEM AND DISCOVERED THAT SOME TOYOTA MODELS IN THE YEARS 2007-2010 HAVE BEEN RECALLED DUE TO A VERY SIMILAR PROBLEM, WITH THE SAME SYMPTOMS. WHEN I CALLED TOYOTA OF DES MOINES, I WAS TOLD THAT IT COULDN'T BE THE SAME PROBLEM, SINCE THE BRAKE SYSTEM USED IN 2000 IS DIFFERENT FROM THAT IN THE RECALL YEARS. I HAVE AN APPT. IN 2 WEEKS IN D.M. AND HAVE TO BE VERY CAUTIOUS BETWEEN NOW AND THEN, ESPECIALLY IF DRIVING WHEN SNOW IS FALLING AND/OR THE TEMP. IS QUITE COLD. IT MAKES NO DIFFERENCE IF THE PAVEMENT IS WET OR DRY, WHEN THIS HAPPENS, AND IT'S LIKE A LAYER OF ICE IS WITHIN MY BRAKES, KEEPING THEM FROM TAKING HOLD WHEN I APPLY THEM.

**Vehicle:** 2006 TOYOTA COROLLA  
**Location of Incident:** GRANGER, IN

**NHTSA Summary:**

MY TOYOTA COROLLA HAS ACCELERATED UNEXPECTEDLY SEVERAL TIMES, GENERALLY WHEN THE TEMPERATURE IS AROUND 32 DEGREES FAHRENHEIT. THE FIRST TIME I NOTICED IT, I REAR-ENDED A PICKUP TRUCK AFTER A RED LIGHT HAD TURNED GREEN. THE SECOND TIME, I WAS BACKING OUT OF A PARKING SPACE AND THE CAR SHOT BACKWARDS 30' INTO A POST (DENTING MY BUMPER AND BREAKING THE REAR DRIVERS' SIDE LIGHTS). THE THIRD TIME, NOTHING WAS BROKEN - I WAS THE ONLY PERSON ON THE ROAD - BUT IT SCARED THE BEJESUS OUT OF ME. I CALLED TOYOTA TO COMPLAIN AND THEY SAID THAT THERE IS NO RECALL ON MY CAR. MY BELIEF IS THAT THERE ARE ACCELERATOR / ELECTRONICS PROBLEMS WITH THE TOYOTA COROLLA THAT THEY ARE NOT ADMITTING.

PER NEWS ARTICLES -

BECKY LANE SAYS A STUCK ACCELERATOR CAUSED HER 2008 TOYOTA CAMRY TO SLAME INTO THE MANES FUNERAL HOME IN NEWPORT, TN.

"Lane told The Newport Plain Talk that her accelerator got "hung" as she was headed east on East Main Street at Court Avenue, at about 2:30 p.m., on her way to the Food City East store.

Lane said she had stopped for the stop sign on East Main Street at Court Avenue when she stepped on the gas pedal and it got stuck to the floor."

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

"Manes Funeral Director Phillip Gregg was standing just 30 feet from the front door when he saw the car racing toward him.

"It's just unbelievable," he told 6 News in Knoxville. "I didn't move and she didn't either. She was scared to death."

After the crash, Gregg went the driver's side. "She said the gas feed hung up. That's all she said," he recalled. Manes President Chris Austin was in the back of the building with a family making funeral arrangements when he heard the impact.

"Furniture was overturned, part of the wall was missing so I walked up to the front of the lobby and found a car parked inside the building," Austin said. "It was still trying to come into the building. It was trying to accelerate forward, it appeared to me."

**NHTSA Summary:**  
MY 2007 TOYOTA CAMRY CAR ECCELERATED GOING 10 MILES A HOUR IN A PARKING LOT WITH OUT WARNING. I COULD HEAR THE ENGINE RACE. I PUT THE BREAK ON AS HARD AS I COULD PRESS DOWN AND THE CAR WOULD NOT STOP. PEOPLE WERE WALKING ON MY RIGHT, I SAW THE CEMENT PILLAR AND TURN THE WHEEL TO HIT THAT INSTEAD OF THE PEOPLE. I BOUGHT THE CAR NEW AND IN 3 YEARS RECEIVED LETTERS THAT THERE WAS A PROBLEM WITH THE PEDAL. ALL 3 TIMES I TOOK THE LETTER INTO THE DEALERSHIP WHERE THEY TOLD ME IT WAS NOT MY PEDAL. NOW AFTER THE ACCIDENT THE SERVICE MANAGER TRIED TO BLAME ME. I REQUESTED TO MEET WITH A TOYOTA REP. THE REP ALSO TRIED TO BLAME ME. WHEN I PUSHED THE ISSUE IT CAME OUT THAT MY CAMRY WAS ONE WITH THE PEDAL THAT COULD GET STUCK ON A FLOUR MAT. THE TOYOTA REP, ROB BROWN SAID WHEN THE CAR IS FIXED THEN WE WILL SEND IT OVER TO THE OTHER DEPARTMENT TO MODIFY YOUR PEDAL. I TOLD THE REP ROB BROWN AND THE COLLISION MANAGER I WANT DOCUMENTATION ON THE MODIFICATION WORK DONE ON THE PEDAL. THERE WAS SO MUCH DAMAGE DONE TO MY CAR THAT THOSE REPAIRS ARE STILL NOT DONE 3 WEEKS LATER. I VERY WELL COULD HAVE KILLED PEOPLE THAT DAY. THE DEALERSHIP IS HOSELTON AUTOMALL 66 MARSH RD. E ROCHESTER NY 14445. PH #1-866-882-2473

**NHTSA Summary:**  
WHILE DRIVING MY CAR TO WORK IT WOULD ACCELERATE. MY CAR HAD TWO RECALLS. THE DEALERSHIP HAD MY CAR DURING MOST OF THE MONTH OF FEBRUARY. THEY CALLED ME AND INDICATED THE CAR WAS REPAIRED. DROVE CAR TO WORK AND CAR ACCELERATED AGAIN. TOOK CAR BACK TO DEALERSHIP AND THEY PUT IN A NEW DRIVE SHAFT. AT THAT POINT I WAS TOO SCARED TO GET BACK IN CAR. I HAD NO CONFIDENCE THAT THE PROBLEM WAS FIXED AND I DON'T REALLY THINK THEY KNEW WHAT WAS WRONG WITH THE CAR AS IT WAS STILL UNSAFE TO DRIVE. I COULD NOT GET BACK IN THAT CAR NOR COULD I AFFORD TO GO TO ANOTHER DEALERSHIP TO PURCHASE A NEW ONE. I QUALIFIED FOR THEIR 0% FINANCING ON A 2010 NEW PRODUCTION WITH NO RECALL AND FREE TWO YEAR MAINTENANCE AGREEMENT. I FELT TRAPPED WITH NO CHOICE BUT TO BUY THE CAR AS I HAD PUT \$11,000 ON THE 2007 WHICH WAS A LOSS. I HAVE BEEN DRIVING OVER 30 YEARS AND NEVER HAD AN ACCIDENT OR TICKET UNTIL I BOUGHT THIS CAR.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10305468  
**Date of Incident:** 20100204  
**Vehicle:** 2009 TOYOTA CAMRY  
**Location of Incident:** BARRINGTON, RI

**NHTSA Summary:**  
I HAVE EXPERIENCED THE SAME "2010 TOYOTA PRIUS BRAKING ISSUE" ON MY 2009 TOYOTA CAMRY. THE TOYOTA PRIUS BRAKING ISSUE IS DESCRIBED AS THE FOLLOWING: "MOMENTARY LOSS OF BRAKING CAPABILITY WHILE TRAVELING OVER UNEVEN ROAD SURFACES, POTHOLES OR BUMPS." THIS IS EXACTLY WHAT HAPPENED TO ME IN MY 2009 TOYOTA CAMRY JUST A FEW HOURS AGO. AFTER ROLLING OVER A SERIES OF BUMPS AT ABOUT 45 MPH I TRIED TO APPLY THE BREAK IN MY 2009 CAMRY AND THE PEDAL WAS VERY SLOW TO RESPOND AND THE PHYSICAL BREAK PEDAL ITSELF EXHIBITED GREAT RESISTANCE IN MY EFFORT TO PRESS IT DOWN INTO USE. THIS PROBLEM OCCURS ONLY AFTER HAVING TRAVELED OVER BUMPS OR POTHOLES, ETC. THE REASON I AM FILING THIS COMPLAINT IS THAT I FEEL THAT THE "PRIUS BRAKING ISSUE" IS NOT LIMITED TO ONLY THE PRIUS MODEL THAT HAS BEEN REPORTED ON IN THE NEW OVER THE PAST 24 HOURS.

**Vehicle:** 2007 LEXUS RX400H  
**Location of Incident:** AUSTIN, TX

**NHTSA Summary:**  
I AM THE ORIGINAL OWNER OF A 2007 LEXUS RX 400H WHICH HAS NOT BEEN INVOLVED IN ANY ACCIDENTS, AND CURRENTLY HAS APPROXIMATELY 30,000 MILES ON IT. SINCE I PURCHASED THE VEHICLE I HAVE NOTICED AN IRREGULARITY IN MY BRAKING SYSTEM UNDER CERTAIN CONDITIONS, WHICH IS EXACTLY WHAT I HEARD DESCRIBED THIS EVENING ON THE NEWS ABOUT PRIUS HYBRID VEHICLES. IT CAN SIMPLY BE DESCRIBED AS WHEN BRAKING, IF A POTHOLE OR BUMP IN THE ROAD IS HIT, OR SOME OTHER SMALL IRREGULARITY IN THE ROAD SURFACE, THE CAR SEEMINGLY JERKS FORWARD/ACCELERATES FOR A SPLIT SECOND. THE FEELING IS OF A MOMENTARY LOSS OF CONTROL OF THE VEHICLE, AND HAS HAPPENED WHILE SLOWLY APPROACHING A STOP SIGN OR BRAKING/DECELERATING IN TRAFFIC, BUT NOT TYPICALLY WHEN SLOWING AT HIGHER RATES OF SPEED. C-1919

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

MOVING TRAFFIC WHERE I LOST MOMENTARY CONTROL OVER THE CAR AS THE BRAKES "HICCUPPED" OVER A ROUGH SPOT ON THE ROAD AND LURCHED AT THE CAR IN FRONT OF ME. I WAS JUST ABOUT TO MAKE AN APPOINTMENT WITH MY LOCAL LEXUS DEALER, LEXUS OF AUSTIN (TEXAS) REGARDING MY CONCERN WHEN I SAW THIS EVENING'S NEWS. IT COMPELLED ME TO NOTIFY YOU. IT LOOKS AS THOUGH THIS PROBLEM MAY BE MORE WIDESPREAD WITH ALL TOYOTA PRODUCTS. \*JB

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10305756  
**Date of Incident:** 20100204  
**Vehicle:** 2005 TOYOTA RAV4  
**Location of Incident:** PENDLETON, OR

**NHTSA Summary:**  
I HAVE A 2005 RAV4, THE TRANSMISSION HAS BEEN SLIPPING, IT IS AN AUTOMATIC AND SOMETIMES IT WON'T CHANGE GEARS WHEN IT SHOULD, SO IT WON'T ACCELERATE AND WHEN IT FINALLY DOES SWITCH TO THE NEXT GEAR THE WHO CAR JERKS AND TAKES OFF VERY QUICKLEY. THIS BEGAN HAPPENING FOR NO REASON I HAVE NOT HAD ANY SORT OF ACCIDENT WITH THE VEHICLE AND TAKE VERY GOOD CARE OF IT. I HAVE BEEN TOLD BY CAMPBELL MOTORS IN HERMISTON OR, THAT THE ONLY OPTION IS TO COMPLETELY REPLACE THE TRANSMISSION FOR A COST OF \$3900. I HAVE READ THAT IS IS A COMMON PROBLEM ON THE RAV4 AND FEEL THAT TOYOTA SHOULD ISSUE A RECALL ON THE TRANSMISSION IT IS VERY DANGEROUS IN TRAFFIC TO HAVE A CAR THAT JERKS AROUND AND ACCELERATES/WON'T ACCELERATE IN AN UNPREDICTABLE MANNER.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10305537  
**Date of Incident:** 20100204  
**Vehicle:** 2009 TOYOTA CAMRY  
**Location of Incident:** CORDOVA, TN

**NHTSA Summary:**  
WHEN STARTING FROM A COMPLETE STOP AND BEGINNING ACCELERATION, AND SOMETIMES WHEN TRYING TO QUICKLY ACCELERATE WHILE MOVING FORWARD, THE CAR WILL HESITATE AND NOT ACCELERATE FOR ABOUT 1/2 TO ONE SECOND WHILE THE CAR IS SLOWLY MOVING INTO TRAFFIC. THIS IS A SIGNIFICANT SAFETY ISSUE PARTICULARLY WHEN TURNING AND CROSSING TRAFFIC AND WHEN MERGING WITH TRAFFIC ON A FREEWAY. THIS IS A FREQUENT OCCURANCE, BUT DOES NOT SEEM TO FOLLOW ANY PARTICULAR PATTERN OTHER THAN IT OCCURS HERE AND THERE WHEN ACCELERATING. I TOOK THE CAR BACK TO THE DEALER WITHIN A COUPLE OF WEEKS OF BUYING IT AND THEY SAID THAT IT WAS FUNCTIONING FINE. I LOOKED ON THE INTERNET AND FOUND THAT THEY ARE MANY OTHERS THAT HAVE COMPLAINED ABOUT ACCELERATION HESITATION ISSUES WITH THE TOYOTA CAMRY WHO ALSO TOOK THEIR CARS BACK TO THE DEALER AND RECEIVED THE SAME RESPONSE THAT I DID THAT "IT WAS FUNCTIONING NORMALLY". THOUGH I FEEL THAT THIS IS A SIGNIFICANT SAFETY RISK WITH THE CAR, I FEEL THAT MY ONLY RECOURSE, SINCE TOYOTA SAYS IT IS RUNNING FINE, IS TO ESSENTIALLY AVOID ALL SITUATIONS WHERE SUDDEN QUICK ACCELERATION IS REQUIRED. WITH THE NUMBER OF REPORTS ON THE INTERNET MATCHING MY EXACT PROBLEM I FEEL THAT THIS IS AN ISSUE THAT NEEDS TO BE LOOKED INTO WITH AT LEAST 2009 TOYOTA CAMRY

**Toyota ID Number:**  
**NHTSA ODI Number:** 10306268  
**Date of Incident:** 20100204  
**Vehicle:** 2010 LEXUS HS  
**Location of Incident:** HOUSTON, TX

**NHTSA Summary:**

WHEN AT A MID-SPEEDS (TYPICALLY 35 TO 50 MPH) AND ONE TRIES TO BRAKE ON A ROUGH, UNEVEN OR LOOSE GRAVEL SURFACE, THE CAR ACCELERATES AGAINST THE DRIVERS BRAKING. THIS IS PARTICULARLY PROBLEMATIC WHEN MAKING A TURN FROM A BUMPY OR UNEVEN ROAD. THE ACCELERATION FORCE OVERPOWERS THE DRIVERS BRAKING AND MAKES THE TURN DIFFICULT CAUSING THE DRIVER POTENTIALLY TO OVERSHOOT THE TURN. THIS ACCELERATION AGAINST BRAKING HAS ALSO OCCURRED ON STRAIGHT ROAD DRIVING WHEN ONE BRAKES FROM MID-SPEEDS ON UNEVEN, BUMPY OR LOOSE GRAVEL ROADS. THIS EVENT HAS OCCURRED REPEATEDLY IN SIMILAR CIRCUMSTANCES.

**Additional Summary:**

**NHTSA ODI Number:** 10306258; 10306385  
**Date of Incident:** 20100204  
**Vehicle:** 2007 TOYOTA HIGHLANDER  
**Location of Incident:** CHARLESTON, SC

**NHTSA Summary:**

ACCELERATION & DE-ACCELERATION PROBLEM: WHEN THE VEHICLE IS IN FORWARD MOTION, ON A HIGHWAY, AND I PRESS ON THE ACCELERATOR TO RAPIDLY SPEED UP, THERE IS AN APPROXIMATELY ONE SECOND TIME DELAY IN THE VEHICLE'S RESPONSE TO MY REQUEST TO ACCELERATE. FREQUENTLY, THIS DELAY HAS ALMOST CAUSED AN ACCIDENT. ON THE OCCASIONS THAT I WANT TO SPEED UP TO PASS A VEHICLE, OR TO CHANGE LANES OR TO AVOID A POTENTIALLY SERIOUS SITUATION, THIS DELAY IS VERY STARTLING. BECAUSE OF THE VEHICLE'S RESPONSE DELAY, I THEN SOMETIMES SUDDENLY TAKE MY FOOT OF THE ACCELERATOR TO CANCEL MY ACCELERATE REQUEST. HOWEVER, THE VEHICLE, AFTER ITS INITIAL ACCELERATION DELAY, WILL THEN ACCELERATE FOR JUST A MOMENT EVEN THOUGH I HAVE NOW JUST TAKEN MY FOOT OFF THE ACCELERATOR. IN MY ALMOST 50 YEARS OF DRIVING MANY VEHICLES, ACCELERATORS ALWAYS RESPONDED INSTANTLY. THAT'S BECAUSE THERE WAS A LINKAGE CABLE THAT MECHANICALLY CONNECTED THE GAS PEDAL TO THE CARBURETOR. NOW, IN THIS TOYOTA, IT IS COMPUTER CONTROLLED. WHEN I COMPLAINED ABOUT THIS DELAY TO MY LOCAL TOYOTA DEALER, THEY TESTED THE VEHICLE AND ADVISED ME THAT EVERYTHING IS OPERATING NORMALLY, & HOWEVER, THEY EXPLAINED TO ME THAT THE ACCELERATION IS NOW COMPUTER CONTROLLED AND THE COMPUTER IS OPERATING AS INTENDED. I INSISTED THAT THIS WAS A DESIGN FLAW AND THAT THE COMPUTER SHOULD NOT QUESTION MY DECISION TO ACCELERATE WHEN I WANT TO ACCELERATE. I WAS ADVISED THAT THERE IS NO FIX FOR THIS AND THAT THIS IS HOW IT IS. I PURCHASED THIS VEHICLE NEW FROM A TOYOTA DEALER. THIS PROBLEM HAS ALWAYS EXISTED.; THIS IS IN FOLLOW-UP TO MY COMPLAINT #10306258 FILED EARLIER THIS MORNING (FEB 5, 2010). I FOUND MY PREVIOUS SERVICE ORDER OF JULY 23, 2008, FROM MY TOYOTA DEALERSHIP, ON WHICH I COMPLAINED ABOUT THE DELAYED ACCELERATION WHEN I PRESSED ON THE GAS PEDAL. THEIR RESPONSE, AS DOCUMENTED ON MY REPAIR ORDER WAS SCANNED FOR ERROR CODES. NONE PRESENT. CHARACTERISTIC OF THIS TRANSMISSION, & ON MY PREVIOUS REPORT TO YOU REGARDING THIS, I CLASSIFIED THIS AS A FUEL SYSTEM, GASOLINE & AND AS ELECTRICAL SYSTEM, & IT LOOKS LIKE TOYOTA CLASSIFIED THIS AS A TRANSMISSION PROBLEM. REGARDLESS, THE FACTS ARE AS I STATED THEM AND I

C-1921

**Date of Incident:** 20100204  
**Vehicle:** 2009 TOYOTA COROLLA  
**Location of Incident:** ST. ANTHONY, MN

**NHTSA Summary:**

ABOUT 5:30PM ON THURSDAY EVENING (2/4/10), I WAS DRIVING HOME N ON SILVER LAKE BLVD & 36 ST. IT WAS LIGHTLY SNOWING, THE STREETS WERE WET AND SLIPPERY, AND I WAS DRIVING UNDER 15MPH GOING DOWNHILL. AS I PRESSED THE BREAKS, THE CAR WENT FASTER, AND DID NOT STOP UNTIL I BADLY HIT THE CAR IN FRONT OF ME AND WENT OVER THE CURB. MY CAR IS A 2009 TOYOTA COROLLA. ABOUT 2-3 MONTHS AGO, TOYOTA SENT ME A RECALL NOTICE FOR THE BREAKS. MUCH BEFORE THE NATIONWIDE TOYOTA RECALL HIT THE MEDIA, AND NOW, EVEN AFTER I DID RECALL A FEW MONTHS AGO, THIS IS THE SECOND TIME THAT SUCH A BREAK-RELATED INCIDENT HAS HAPPENED TO ME EVER SINCE THE RECALL. I FEEL THAT THIS INCIDENT IS RELATED TO ANOTHER BREAK DEFECT OF THE NEWLY-REPLACED/ALTERED BREAKS, AND WOULD KINDLY ASK FOR IT TO BE FURTHER INVESTIGATED.

**NHTSA Summary:**

AS I WAS COMING DOWNHILL ON STEEP MT. HELIX AND STEPPED ON THE BRAKES, THE CAR ACCELERATED INSTEAD OF REDUCING THE SPEED. AT THAT MOMENT I COULD CLEARLY HEAR THE ROTATION ACTUALLY INCREASING. I HAD TO PRESS IT HARDER AND CONTROL THE WHEEL TO GET IT TO REDUCE THE SPEED. THIS HAS HAPPENED 3 OTHER TIMES WHILE DRIVING DOWNHILL. IN THE 2 MONTHS I HAVE OWNED THIS 2010 COROLLA, THE NEXT MORNING I TOOK MY CAR TO THE DEALERSHIP AND WAITED FOR ABOUT 1 HOUR FOR THE CAR TO BE INSPECTED AND THE PEDAL ACCELERATOR RECALL ISSUE FIXED, BUT THE SERVICE STAFF TOLD ME THAT THE BRAKES WERE FINE AND THEY HAD RUN OUT OF THE RECALL PARTS. THEY COULD NOT GIVE ME A TIME TABLE WHEN THE PARTS WERE GOING TO ARRIVE. I ALSO CONTACTED 2 OTHER DEALERSHIPS LATER THAT DAY, AND THE ONLY ANSWER I GOT WAS THAT " WE WERE ALL IN THE SAME BOAT", NOBODY KNEW WHEN SAID PARTS WERE EXPECTED TO ARRIVE.

**Location of Incident:** SAN ANTONIO, TX

**NHTSA Summary:**

On February 4, 2010, Mr. Martinez was driving a 2009 Toyota Camry with Mr. Hernandez and Mr. Diaz as passengers. As they approached a stop light, Mr. Martinez applied the brakes but the car continued to accelerate. In order to avoid other vehicles and innocent bystanders, Mr. Martinez veered right and crashed into a telephone pole at Perrin Beittel Rd. and Perrin Central Blvd.

As a result of the accident, Mr. Martinez sustained a concussion, back and shoulder injuries. Both Mr. Hernandez and Mr. Diaz suffered neck and back injuries. The initial police report indicated that a throttle control malfunction was the lone contributing factor to the accident.

**NHTSA Summary:**

TL\* THE CONTACT OWNS A 2008 TOYOTA 4RUNNER. THE CONTACT STATED AS SHE WAS DRIVING 40MPH THE ACCELERATOR PEDAL WENT ALL THE WAY TO THE FLOOR AND BECAME STUCK AND THE SPEED INCREASED TO 90MPH. THE CONTACT STATED SHE JAMMED HER FEET ON THE BRAKES, PUT THE VEHICLE IN NEUTRAL AND THE VEHICLE

C-1923

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SLOWED DOWN. SHE THEN PULLED TO THE SIDE OF THE ROAD. SHE TURNED THE VEHICLE ON AND OFF AS THE ENGINE RESET ITSELF. SHE THEN DROVE SLOWLY HOME AND PARKED THE VEHICLE. SHE DROVE THE VEHICLE TWICE AFTER THE FIRST FAILURE AND THE ACCELERATOR PEDAL BECAME STUCK TO THE FLOOR. HER HUSBAND HAD TO PULL THE PEDAL UP MANUALLY. THE VEHICLE WAS TAKEN TO THE DEALER AND THEY COULD NOT DUPLICATE THE FAILURE. THE CONTACT STATED THAT A REPRESENTATIVE WILL BE COMING FROM THE MANUFACTURER TO INSPECT THE VEHICLE. THERE WAS NO PRIOR MAINTENANCE DONE TO THE VEHICLE PRIOR TO THE FAILURE. THE FAILURE MILEAGE WAS 8,236.

**Vehicle:** 2006 TOYOTA AVALON  
**Location of Incident:** EL PASO, TX

**NHTSA Summary:**

THE VEHICLE DOES NOT WANT TO STOP. WHILE DRIVING 1 BLOCK FROM AN OFFICE TO AN INTERSECTION AT A SPEED OF LESS THAN 30 MILES PER HOUR I HAD TO PLACE BOTH FEET ON BRAKE PEDAL AND MASH THE PEDAL TO THE FLOOR TO STOP THE VEHICLE AT A STOP LIGHT. MILEAGE ON THE VEHICLE IS 23,000 AND I HAVE TOLD TOYOTA THIS WAS OCCURRING SINCE I OWNED THE VEHICLE. I HAVE CONSISTENTLY HAD TOYOTA CHECK FOR PROBLEMS AND NONE ARE FOUND. THIS HAPPENS ABOUT ONCE EVERY THREE MONTHS. THE CAR IS AN AUTOMATIC AND THIS IS THE BEST WAY TO DESCRIBE WHAT IT FEELS LIKE. IF YOU WERE DRIVING A MANUAL TRANSMISSION VEHICLE AND WERE ON A HILL TRYING TO MAINTAIN YOUR POSITION YOU WOULD BE ENGAGING THE CLUTCH AND THE GAS PEDALS, ONE WOULD BE FIGHTING THE OTHER. THAT IS WHAT THIS FEELS LIKE, THE BRAKE FIGHTS THE GAS PEDAL.

**Location of Incident:** NORTH POTOMAC, MD

**NHTSA Summary:**

MY 2003 TOYOTA MATRIX XR SOMETIMES ACCELERATES UNCONTROLLABLY. USUALLY WHEN I AM CRUISING AT HIGHWAY SPEEDS, WHEN I LET OFF OF THE GAS PEDAL, THE CAR'S THROTTLE STILL FEELS LIKE ITS IN THE OPEN POSITION, CAUSING THE CAR TO SPEED UP INSTEAD OF SLOWING DOWN. IT ALMOST FEELS LIKE IF THE CRUISE CONTROL IS TURNED ON AND THE CAR IS TRYING TO MAINTAIN SPEED, MY CRUISE CONTROL WAS

C-1928

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TURNED OFF DURING EACH OF THESE INCIDENTS, AND THERE WAS NO INDICATION THAT THEY WERE TURNED ON AT THE TIME OF THE INCIDENTS. THIS PROBLEM OCCURS ONCE EVERY FEW MONTHS AND I USUALLY DON'T PAY ATTENTION TO THEM. THE CAR WILL ACCELERATE FOR A FEW SECONDS THEN EVENTUALLY THE THROTTLE WILL CLOSE AND THE CAR WILL SLOW DOWN AND THEN I WILL APPLY THE BRAKES GENTLY. I HAVE INFORMED MY TOYOTA DEALER OF THIS BUT THEY USUALLY JUST BRUSH THE COMPLAINT OFF AND SAY THEY COULDN'T FIND ANY PROBLEMS. I PERSONALLY THINK IT'S AN ELECTRONICS ISSUE WHERE THE CRUISE CONTROL SYSTEM OVERRIDES THE MANUAL SYSTEM WITHOUT THE INPUT OF THE DRIVER.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316580  
**Date of Incident:** 20100205  
**Vehicle:** 2009 TOYOTA RAV4  
**Location of Incident:** WADSWORTH, OH

**NHTSA Summary:**

I OWN A 2009 TOYOTA RAV4. MY CAR WAS NOT STOPPING PRIOR TO RECALL-SPOKE WITH TOYOTA AND THEY CONTACTED DEALER TO COME TO MY HOME AND PICK UP MY CAR, AS IT WAS NOT STOPPING FOR MY AND I WOULD NOT DRIVE THE CAR. RECALL (ACCELERATOR PEDAL REINFORCEMENT BAR) PERFORMED 2/5/2009. I CALLED DEALERSHIP TO SCHEDULE ANOTHER APPOINTMENT AS THE GAS PEDAL IS VERY TOUCHY AND MY CAR IS ACCELERATING WHEN MY FOOT IS ON THE BRAKE AND I CAN NOT STOP CAR. THE DEALERSHIP LOOKED AT CAR AND TOLD ME THAT THERE WAS NO PROBLEM-THE STANDARD LINE "OUR SERVICE TECHNICIAN WAS UNABLE TO DUPLICATE CUSTOMER CONCERN". I AGAIN HAVE A CAR THAT HAS A SAFETY CONCERN THAT WILL NOT STOP AT TIMES AND TOYOTA IS UNWILLING TO RESOLVE THIS ISSUE FOR ME.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10317783  
**Date of Incident:** 20100205  
**Vehicle:** 2007 TOYOTA CAMRY HV  
**Location of Incident:** LAKE BLUFF, IL

**NHTSA Summary:**

CRUISE CONTROL SET @ 70 MPH SPEED LIMIT ON I-85 WHEN A TRACTOR-TRAILER TRUCK RAPIDLY CLOSED THE INTERVAL BEHIND AS I STARTED UP AN INCLINE. WITHOUT WARNING MY SPEED QUICKLY DROPPED AND THE TRUCK MOVED DANGEROUSLY CLOSE. STEPPED ON THE ACCELERATOR TO INCREASE SPEED AND WITHIN A SECOND OR TWO THE CRUISE CONTROL FURTHER INCREASED MY SPEED. DO NOT KNOW WHAT THE SPEED INCREASE WAS BECAUSE I WAS PAYING ATTENTION TO THE INTERVAL BETWEEN THE TRUCK AND MY CAR AND NOT WHAT REGISTERED ON MY SPEEDOMETER. AFTER GOING OVER THE HILL'S CREST THERE WAS STATE PATROL CAR IN THE MEDIUM WHO CLOCKED MY SPEED AT 80MPH. HAD NOT PREVIOUSLY EXPERIENCED SPEED DROPS AND SURGES WITH THE CRUISE CONTROL AND WAS MUCH MORE ATTENTIVE TO THE ACTIONS OF THE CRUISE CONTROL FOR THE REMAINING PART OF THE TRIP. THERE WERE MULTIPLE INSTANCES WHERE THE SPEED WOULD DROP FROM SIX TO SEVEN MILES PER HOUR AS THE CAR STARTED UP AN INCLINE AND THEN WOULD RAPIDLY ACCELERATE, OVERSHOOTING THE SETTING BY THREE TO FOUR MILES PER HOUR (ONCE OVER FIVE) BEFORE ULTIMATELY DROPPING BACK TO THE SET SPEED. THIS IS BOTH A SAFETY CONCERN AS WELL AS UNCOMFORTABLE WHEN THERE IS A SERIES OF ROLLING HILLS. THE TOYOTA DEALER COULD FIND NO PROBLEM WITH THE CRUISE CONTROL, FINDING NO DTC FAULT CODES AND NO ABNORMAL FINDINGS AFTER FORCE TESTING THE CRUISE

C-1929

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SYSTEM. I SUSPECT THE ISSUE MAY RELATE TO THE ELECTRONIC CONTROLS FOR THE HYBRID SYSTEM. AS THE CAR WENT DOWN HILL, THE GASOLINE ENGINE APPEARED TO BE IN "IDLE/COASTING" STATE AND THE GPS/ENERGY DISPLAY SHOWED NO ENERGY FLOW TO EITHER THE DRIVE WHEELS OR THE BATTERY FROM THE ENGINE. THE ELECTRIC MOTOR, HOWEVER, WAS IN CHARGING MODE.

**Vehicle:** 2004 TOYOTA COROLLA  
**Location of Incident:** PLYMOUTH, MA

**NHTSA Summary:**

I WAS DRIVING MY 2004 TOYOTA COROLLA THE OTHER DAY ON A SIDE ROAD. I WAS APPROACHING A CORNER IN THE ROAD AND TOOK MY FOOT OFF MY GAS PEDAL. THE CAR CONTINUED TO ACCELERATE. I PUSHED ON THE BREAK WHICH SLOWED THE CAR SLIGHTLY, BUT WOULDNT STOP IT. I PUT THE CAR INTO NEUTRAL AND PULLED OFF TO THE SIDE OF THE ROAD. THE ENGINE WAS REVVING VERY LOUDLY SO I TURNED OFF THE CAR. I PROCEEDED TO TURN THE CAR BACK ON AND IT WAS STILL REVVING. I PULLED ON THE GAS PEDAL AND CHECK MY FLOOR MAT, AS I KNEW OF ALL THE CURRENT RECALLS IN EFFECT. THE FLOOR MAT WAS NOT IN THE WAY AND THE PEDAL APPEARED FINE. NOTHING CHANGED. I CALLED A TOW TRUCK AND IN ABOUT 2 HRS LATER WHEN THE TOW TRUCK GUY STARTED MY CAR, IT APPEARED FINE. IT WAS BROUGHT TO A TOYOTA DEALERSHIP, WHOM PLAYED IF OFF AS IF MY FLOOR MAT WAS THE CAUSE AND SENT ME ON MY WAY. I THEN BROUGHT IT TO MY FATHER WHO USED TO BE A MECHANIC AND HE CHECKED ALL THE MECHANICS OF THE CAR. HE LUBED UP SOME PARTS AND CLEANED THE ACCELERATOR PLATE, HOWEVER HE STATED EVERYTHING LOOKED GOOD TO HIM. AS OF TODAY THIS HAS NOT HAPPEN AGAIN.

**Location of Incident:** EAST ELIJAY, GA

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2009 LEXUS IS 250. HE STATED THAT WHILE DRIVING 35 MPH UP A HILL WHEN TURNING AND SLOWING DOWN BY PUTTING HIS FOOT ON THE BRAKE PEDAL THE VEHICLE ACCELERATED ON ITS OWN. THE VEHICLE ACCELERATED AND CRASHED OVER A MOUNTAIN. THE CONTACT SUSTAINED MAJOR INJURIES, BROKE HIS RIGHT SHOULDER, CHEST PAINS, AND HIS FACE WAS ALSO INJURED WHEN THE AIR BAG DEPLOYED HITTING HIM IN THE FACE. THE POLICE AND THE INSURANCE COMPANY WERE CONTACTED AND A REPORT WAS FILED BY BOTH OF THEM. THE VEHICLE WAS TOWED TO A LOCAL TOWING FACILITY WHERE THEY STATED THAT THE VEHICLE WAS DESTROYED. THE DEALER WAS CONTACTED AND WROTE A REPORT AS WELL. HE ALSO STATED THAT HE RECEIVED A RECALL NOTICE FOR THE FLOOR MATS AND WAS WAITING FOR AN APPOINTMENT. THE FAILURE AND CURRENT MILEAGE WERE 11000.

**Additional Summary:**

**NHTSA ODI Number:** 10312795  
**Date of Incident:** 20100206  
**Vehicle:** 2007 TOYOTA COROLLA  
**Location of Incident:** SONORA, CA

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2007 TOYOTA COROLLA. THE CONTACT STATED AS SHE WAS DRIVING AT 20MPH WITH HER FOOT ON THE BRAKES THE VEHICLE ACCELERATED TO THE MAXIMUM RPM, HOWEVER SHE DID NOT HAVE AN ACCIDENT. THE CONTACT PUT THE VEHICLE INTO NEUTRAL WHEN THE VEHICLE STOPPED AND SHE TURNED THE ENGINE OFF AS IT WAS STILL RACING AT THE MAXIMUM RPM. THE VEHICLE WAS TOWED TO THE DEALER AND WAS TOLD THEY CANNOT DUPLICATE THE PROBLEM BECAUSE SHE PRESSED ON BOTH THE BRAKE AND ACCELERATOR PEDAL AT THE SAME TIME. THE CONTACT STATED SHE SENT A LETTER TO THE TOYOTA MANUFACTURER AND HAD NOT RECEIVED AN ANSWER BACK AT THE TIME OF THE COMPLAINT. THE FAILURE MILEAGE WAS 47,000. UPDATED 03/17/10. \*LJ

**Date of Incident:** 20100207  
**Vehicle:** 2010 TOYOTA CAMRY  
**Location of Incident:** BOSTON, MA

**NHTSA Summary:**  
I OWN A 2010 TOYOTA CAMRY. I WAS TOLD BY ONE DEALERSHIP THAT MY CAR IS NOT AFFECTED. I WAS TOLD BY ANOTHER DEALERSHIP THAT MY CAR IS INCLUDED IN THE ACCELERATOR RECALL. FIRST, WHEN I PUT THE KEYS IN MY CAR AND START IT, IT WILL START TO ACCELERATE TO 2000 RPMs FOR 30 SECS TO A MINUTE BEFORE GOING BELOW 1000RPMs. ALSO, WHEN I DRIVE AROUND TOWN, THE CAR WILL REMAIN ACCELERATED EVEN AFTER I TAKE MY FOOT OFF OF THE GAS PEDAL OR EVEN AFTER I TAKE MY FOOT OFF THE BRAKE. I DO NOT KNOW WHAT TO DO, AND IF MY CAR IS NOT PART OF A RECALL, THIS COULD BE MORE OF A SYSTEMATIC PROBLEM (EITHER WITH THE ELECTRIC CHIP OR THE ACCELERATOR PEDAL I HAVE) THAN WHAT EVERYONE THINKS NOW. I HAVE BROUGHT MY CAR TO THE DEALER 2-3 TIMES (PRIOR TO THE RECALL) AND THEY SAID IT WAS "NORMAL" FOR ALL CAMRYS. BUT THIS IS OBVIOUSLY NOT NORMAL.

**NHTSA Summary:**  
I WAS TRAVELLING ALONE ON ERRANDS AND HAD STOPPED AT A T-INTERSECTION, POSITIONED AT THE TOP OF THE "T" AND PREPARING TO TURN RIGHT. I'D LET A FEW CARS GO PAST, TRAVELLING ON THE MAIN STREET WITH TRAFFIC CLOSEST TO ME GOING FROM LEFT TO RIGHT. WHEN THOSE CARS HAD PASSED AND IT WAS SAFE TO TURN RIGHT ONTO THE MAIN STREET, I STARTED TO SLOWLY DEPRESS THE GAS PEDAL TO ACCELERATE. SUDDENLY THE CAR BOLTED FORWARD AND OUT OF CONTROL, ACCELERATING DIRECTLY ACROSS THE STREET AND INTO THE PATH OF ONCOMING

C-1937

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TRAFFIC TRAVELLING RIGHT TO LEFT. A CAR GOING ABOUT 40 MPH SLAMMED INTO THE RIGHT FRONT PASSENGER SIDE OF MY CAR. THE AIRBAGS DEPLOYED AND BOTH OUR CARS CAME TO A COMPLETE STOP. I WAS DAZED FROM THE COLLISION AND EXITED MY CAR FROM THE DRIVER'S SIDE AS SOON AS POSSIBLE. I COULD SEE THAT THE WHOLE FRONT OF MY CAR, INCLUDING THE ENGINE WAS COMPLETELY DEMOLISHED. I WAS IN SHOCK AND A LADY FROM A NEARBY HOUSE WHO HAD HEARD THE CRASH CAME OUT WITH A CHAIR FOR ME TO SIT ME DOWN ON WHILE THE POLICE AND PARAMEDICS WERE ON THE WAY. I NEVER WENT TO THE PASSENGER SIDE OF THE CAR AND DON'T KNOW THE CONDITION OF THE OTHER DRIVER OR THEIR CAR. I WAS TAKEN TO THE EMERGENCY ROOM AND SUFFERED CHEST, NECK AND BACK PAIN. I AM QUITE SURE IT WAS THE GAS PEDAL STICKING THAT CAUSED THE CAR TO ACCELERATE SO UNEXPECTEDLY AND QUICKLY, PROPELLING ME THROUGH THE CROSS-TRAFFIC AND ONTO THE OTHER SIDE OF THE STREET. IT WAS AN ABSOLUTELY HORRIBLE ACCIDENT AND I AM STILL IN SHOCK OVER IT. NOT TO MENTION NOT KNOWING THE CONDITION, EXTENT OF INJURIES OR EVEN THE IDENTITY OF THE OTHER DRIVER AS YET.

**NHTSA Summary:**  
I HAVE A 2007 JAPANESE-MADE CAMRY. I BOUGHT AT A PREMIUM (WELL ABOVE INVOICE AND ABOVE MSRP BECAUSE SERVCO HAWAII DOES NOT GIVE DISCOUNTS) THINKING I WAS PAYING FOR A RELIABLE AND WELL-MADE VEHICLE. I HAVE HAD OTHER TOYOTAS BUT NONE WITH AS MANY PROBLEMS AS THIS VEHICLE. AND, WITH ALL THE NEWS OF ACCELERATOR PROBLEMS, I WOULD LIKE MY PROBLEMS CHECKED AND NOT BE CHARGED FOR IT. I DO NOT LIKE THE IDEA OF HAVING TO PAY \$103 (1HR LABOR) X 3 DIFFERENT ACCELERATOR ISSUES + ANOTHER \$103 TO SEE WHY THERE IS THE SMELL OF GASOLINE COMING FROM THE A/C VENT. 1. WHEN STEPPING ON THE ACCELERATOR, I WILL GET NO RESPONSE... I CONTINUE TO DEPRESS THE GAS, STILL NO RESPONSE. THEN FINALLY, THE CAR WILL THRUST FORWARD VIOLENTLY. THIS HAS BEEN MENTIONED TO TOYOTA HAWAII DEALER SEVERAL TIMES SAYING IT WAS NORMAL FOR DRIVE BY WIRE VEHICLE AND THAT IT WILL TAKE SOME GETTING USED TO. 2. WHEN ACCELERATING SLOWLY, THE CAR WILL REV HIGH WITHOUT THE AUTOMATIC TRANSMISSION UPSHIFTING. I HAVE TO DEPRESS THE GAS MORE AND THE CAR WILL REV EVEN HIGHER BEFORE UPSHIFTING. 3. ON 2 DIFFERENT TIMES, THE CAR HAS REVVED AND JUMPED FORWARD WHILE NOT IN GEAR. THE FIRST TIME WAS AT AN INTERSECTION. I SHIFTED INTO NEUTRAL WITH THE P-BRAKE ON AND IT FELT AS IF SOMEONE HIT MY CAR FROM THE REAR. THE CAR JUMPED INTO THE BUSY CROSSWALK ABOUT 2 FEET UNTIL I HIT THE BRAKE PEDAL AND SHIFTED IT BACK INTO DRIVE. ANOTHER TIME WAS AT THE DRIVE-TRU WINDOW IN PARK. THE CAR DIDNT MOVE BUT JERKED VIOLENTLY. BOTH WERE ON FLAT SURFACES. 4. WHEN UNDER HEAVY ACCELERATION, THE CAR SOMETIMES GIVE OFF THE SMELL OF GASOLINE. IT IS NOT EXHAUST FUMES BUT SMELLS OF RAW GASOLINE. A/C IN RECIRCULATE MODE. I ALSO HAVE BEEN HAVING

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Vehicle:** 2008 TOYOTA CAMRY  
**Location of Incident:** YONKERS, NY

**NHTSA Summary:**

I PURCHASED A 2008 TOYOTA CAMRY FOR MY EMPLOYER. I USE THE CAR FOR WORK, AND FREQUENTLY USE THE CRUISE CONTROL. WHEN I FIRST BOUGHT THE CAR, I HAD PROBLEMS WITH THE CRUISE CONTROL, PRIMARILY CLIMBING OR DESCENDING HILLS (I COMMUTE ALONG THE TACONIC PARKWAY IN NY). IF YOU SET THE CAR AT 60MPH, FOR EXAMPLE, THE CAR WOULD SLOW DOWN TO ABOUT 50MPH WHEN IT WAS CLIMBING, THEN SUDDENLY DOWN SHIFT AND ACCELERATE VERY QUICKLY, LITERALLY PINNING YOU BACK IN YOUR SEAT. THIS WOULD THEN CAUSE THE CAR TO SPEED UP TO ABOUT 75MPH BEFORE COASTING, BUT IT WOULD NOT SLOW DOWN THE CAR IN ANY WAY UNTIL I EITHER BRAKED OR THE CAR STARTED ASCENDING ANOTHER HILL. WHEN I HAD A CHANCE, I TOOK THE CAR IN TO THE LOCAL TOYOTA DEALER AND MENTIONED THIS TO HIM. HE ADMITTED THAT TOYOTA HAD A "SERVICE BULLITEN" OUT TO UPDATE THE SOFTWARE AS THERE WERE SOME FLAWS IN THE PROGRAMMING. WHEN I QUESTIONED WHY IT WASN'T A FLEET WIDE RECALL, HE SAID "WE ONLY HAVE TO DO IT WHEN PEOPLE COMPLAIN ABOUT IT". CONSIDERING THE WILD EXTREMES OF THE SPEEDS THAT I WAS EXPERIENCING I FOUND THIS COMMENT TO BE EXTREMELY ODD. HOWEVER, AFTER THEY DID THEIR FIX, THE CAR DID IMPROVE AS IT DOESN'T ACCELERATE WILDLY LIKE IT USED TO. BUT EVEN TODAY AS I WAS DRIVING THE CAR BACK FROM BALTIMORE, IT STILL HAS A WIDE OPEN RANGE FOR ITS CRUISE CONTROL THAT I THINK IS NOT NORMAL. I HAD THE CRUISE SET FOR 65MPH TODAY, AND THE CAR TOPPED OUT AT 80 + OR - 15MPH IS WAY TOO FAR BEYOND AN ACCEPTABLE RANGE. MY CRUISE CONTROLS THE SPEED WITHIN A +-5MPH RANGE ON THE SAME ROUTE. THE RECENT EVENTS IN THE NEWS MAKES ME WONDER IF THERE ISN'T A LATENT DEFECT IN EITHER THE SENSORS OR THE PROGRAMMING.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I HAVE A 2007 LEXUS RX400H THAT I PURCHASED NEW IN DECEMBER 2006. EVER SINCE FIRST TAKING OWNERSHIP, I HAVE NOTICED AT SPEEDS LESS THAN ABOUT 25 MPH THAT THE REGENERATIVE BRAKING SOMETIMES RELEASES THE BRAKES WITHOUT WARNING AND THE HYDRAULIC BRAKES DO NOT IMMEDIATELY ENGAGE TO TAKE UP THE DESIRED BRAKING FUNCTION. THE RESULTING FEELING IS ONE OF LOST BRAKE CONTROL AND A SLIGHT SURGE FORWARD BY THE VEHICLE. I FIRST REPORTED THIS TO THE DEALER AT THE 10,000 MILE SERVICE CHECK (09-18-2007) AND WAS TOLD THAT THE BRAKING SYSTEM WAS PERFORMING NORMALLY. "CANNOT VERIFY CUSTOMER CONCERN." I HAVE SEVERAL TIMES SINCE ASKED THE LEXUS DEALER ABOUT THIS PROBLEM THAT I CONTINUE TO EXPERIENCE, AND EACH TIME HAVE BEEN TOLD THAT MY BRAKE SYSTEM IS OPERATING NORMALLY. THE DEALER HAS SAID THAT IT MUST BE THAT I'M NOT USED TO THE REGENERATIVE BRAKING SYSTEM ACTION, DESPITE THE FACT THAT I'VE NOW DRIVEN THE CAR OVER 55,000 MILES. I'VE ALSO BEEN TOLD BY THE DEALER THAT THEY'VE HAD NO OTHER COMPLAINTS OF THIS TYPE WITH MY MODEL VEHICLE. I'VE KNOWN ALL ALONG THAT I WASN'T IMAGING THIS PROBLEM AND AFTER ALL THE PUBLICITY REGARDING THE PRIUS BRAKE AND ACCELERATOR PROBLEMS I REALIZE THAT TOYOTA / LEXUS HAS BEEN IGNORING THIS ISSUE.

**Date of Incident:** 20100208  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** FOREST HILLS, NY

**NHTSA Summary:**

PER ARTICLE IN NY DAILY NEWS:

"Gerald Silver and his wife Roslyn were on the way home to their Forest Hills apartment when they said the accelerator jammed as Silver made a turn onto Yellowstone Blvd. from Queens Blvd.

"I attempted to brake it and it just kept getting faster and faster," The 86-year-old Purple Heart recipient told the Daily News. "I was practically right on top of two cars. I hit both of them and then ended up on the steps of the synagogue."

While Silver and his wife were grateful to be wearing their seatbelts, Roslyn was treated at a local hospital for a bruised forehead.

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** SAN ANTONIO, TX

**NHTSA Summary:**  
I OWN A 2007 TOYOTA CAMRY. ON MANY SEPARATE OCCASIONS, I HAVE EXPERIENCED NOT A SUDDEN ACCELERATION BUT A SUBTLE INCREASE IN SPEED, WHILE ON LEVEL ROAD. THE IMPRESSION I HAD WAS THAT THE CRUISE CONTROL WAS OPERATING WHEN IT WAS NOT EVEN TURNED ON. I WAS ABLE TO MAINTAIN CONTROL OF THE CAR. I HAVE TAKEN THE CAR TO THE DEALER AND EXPLAINED WHAT IT WAS DOING BUT WAS TOLD I MUST HAVE HAD THE CRUISE CONTROL ACTIVATED. THEY DID TRY TO RECREATE THE PROBLEM BUT COULD NOT. THE VEHICLE HAS SINCE HAD THE "ACCELERATOR PEDAL FIXED" AS A RESULT OF TOYOTA'S MOST RECENT RECALL. HOWEVER, THE CAR CONTINUES TO RANDOMLY "ACCELERATE". I DO NOT BELIEVE THE PEDAL WAS EVER

**Date of Incident:** 20100208  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** SEATTLE, WA

**NHTSA Summary:**

WHILE ENTERING A PARKING STALL OUR PERFECTLY MAINTAINED 2002 TOYOTA CAMRY SEEMED TO GO FULL-THROTTLE AND TOSSED US OVER A CURB, A SIDEWALK, UNDER A STEEL HANDRAIL, AND DOWN A 15 FT ROCKERY, JUST MISSING TREES AND A BUILDING. TOTALING OUR CAR. WE WALKED AWAY SORE AND SHAKEN, BUT UNINJURED. THE INVESTIGATING OFFICER'S REPORT STATES "REAR TIRES LEAVING VISIBLE DRAG MARKS ON THE SIDEWALK" INDICATING THE BRAKES WERE ENGAGED. THIS SIDEWALK IS ATTACHED TO THE CURB SO THE BRAKES WERE ENGAGED DURING THE ENTIRE INCIDENT. THE CAR WAS TOTALED, AND \$3800.00 DAMAGE WAS DONE TO THE APARTMENT COMPLEX PROPERTY.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10319977/10323350  
**Date of Incident:** 20100208  
**Vehicle:** 2004 TOYOTA AVALON  
**Location of Incident:** LAS VEGAS, NV

**NHTSA Summary:**  
1. I WAS AT NELLIS AIR FORCE BASE PERFORMING A CEREMONY AFTER THE CEREMONY I ENTERED THE VEHICLE WITH WIFE TO GO TO THE BASE SHOPPING AREA. THE VEHICLE WAS PARKED IN A PARKING SPACE WITH A CONCRETE TIRE STOP AND WALL IN FRONT. ENTERED THE VEHICLE TO BACK OUT. IT CAME OUT QUICKER THAN NORMAL OFF AXIS AND THE REAR BUMPER IMPACTED THE CONCRETE PROTECTOR TO A POLE WITH VERY LITTLE DAMAGE. I PUT THE VEHICLE IN NEUTRAL AND FELT NO OUT OF THE ORDINARY INDICATIONS. 2. I PUT IT INTO DRIVE WITH MY FOOT ON THE BRAKE TO PULL FORWARD THEN BACK OUT. THE CAR ACCELERATED AT FULL POWER SUFFICIENT ENOUGH TO KICK OUT THE CONCRETE TIRE STOP BEHIND THE VEHICLE, AND TOTAL THE FRONT END OF THE 2003 TOYOTA AVALON XLS TO THE TUNE OF 17684 DOLLARS. I PURCHASED THE VEHICLE IN DECEMBER OF 2008 AND HAD NO PRIOR PROBLEMS, AND NOT BEING A RECALLED AVALON NO WARNING. I WENT THROUGH THE NHTSA DATABASE FOR AVALON FROM 2000-2010 AND FOUND I HAD THE EXACT SAME PROBLEM OTHERS REPORTED. 3. TOYOTA DEALERSHIP WAS CONTACTED AT THE TIME OF THE ACCIDENT. WHEN I CALLED CORPORATE LATER IN THE MONTH THEY DID NOT EVEN HAVE THE VEHICLE IN MY NAME. I ASKED FOR AN INSPECTOR AND THEY SENT ONE HIS NAME EMAIL ETC IS ON FILE. WHEN I CALLED TOYOTA CORPORATE AGAIN THEY SAID I WOULD GET A LETTER FROM THEIR CLAIMS DEPARTMENT ABOUT THE FINDINGS IN 2-4 WEEKS. THEY DID NOT OFFER TO PICK UP THE RENTAL OR TO PROVIDE ANY ASSISTANCE. NOTE: I PUT IN SPEED CONTROL AND AIR BAGS FOR I HAD TO PUT IN SOMETHING TO MAKE THE MENU WORK. IT ACCELERATED OUT OF CONTROL WITH MY FOOT ON THE BRAKE THE EXACT CAUSE IS TO BE DETERMINED, I COULD NOT CONTROL THE SPEED SO THAT FIT CLOSEST. THE AIR BAGS DID NOT DEPLOY FOR IT HIT ON AN ANGLE, A FLAW IN THE DESIGN. IF YOU ACCELERATE AT FULL POWER INTO A BRICK WALL THEY SHOULD DEPLOY. PARKING SPACE SPEED UNKNOWN PUT IN 30 MPH TO MAKE THE FORM WORK. FORM NEEDS UPDATING THIS SHOULD BE OPTIONAL.

ODI 10323350 20100401

TL- THE CONTACT OWNS A 2003 TOYOTA AVALON. THE CONTACT STATED THAT HE WAS PARKED IN THE PARKING LOT. THE CONTACT STATED THAT HE REVERSED OUT OF THE PARKING LOT, AND THE VEHICLE ACCELERATED INTO A POLE. THE CONTACT THEN PUT THE GEAR SHIFT INTO NEUTRAL, THEN SHIFTED THE VEHICLE INTO DRIVE, WHEN THE CONTACT PLACED HIS FOOT ON THE BRAKE PEDAL, THE VEHICLE ACCELERATED INTO A BRICK WALL. THE CONTACT STATED THAT HIM AND HIS PASSENGER WAS IN THE VEHICLE AT THE TIME OF THE INCIDENT. THE VEHICLE WAS TAKEN TO THE DEALER FOR DIAGNOSTIC AND TESTING. THE DEALER COULD NOT DUPLICATE THE PROBLEM. THE CONTACT STATED THAT HE CONTACTED THE MANUFACTURER REQUESTING AN INSPECTOR TO COME OUT TO TAKE A LOOK AT THE VEHICLE. THE CONTACT STATED THAT THE VEHICLE WAS TOTALLED. THE CONTACT STATED THAT THE VEHICLE AIR BAGS DID NOT DEPLOY. THE APPROXIMATE FAILURE MILEAGE WAS 53809. THE CURRENT MILEAGE WAS 53809. RG

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** INVERNESS, CA

**NHTSA Summary:**  
I WAS DRIVING MY 2006 TOYOTA MATRIX I PURCHASED ONE MONTH AGO. I WAS DRIVING ON A VERY WET ROAD LESS THAN 20-25 MPH. APPROXIMATELY 9:00A.M. COMING HOME FROM LOCAL GYM. I SLOWED TO STOP FOR CONSTRUCTION WORK ON SLICK TWO LANE ROAD. BRAKES DID NOT GRAB AS I TRIED TO SLOW DOWN. I PUSHED BRAKES DOWN HARDER, AND AS THEY STARTED TO WORK, THE ACCELERATOR BEGAN TO ACCELERATE ON ITS OWN, CAR BEGAN TO FEEL LIKE IT WAS REVVING UP. I PUT CAR IMMEDIATELY IN PARK, AND TIRES BURNED RUBBER (ENOUGH TO SMELL) AND CAR STOPPED COMPLETELY. IT ALL HAPPENED INCREDIBLY FAST, AND SCARED ME TO DEATH. I HAVE NOT HAD THIS PROBLEM PREVIOUSLY (I HAVE OWNED VEHICLE FOR 1 MONTH) AND CAR IS NOT ON RECALL LIST (CLEARLY SHOULD BE). I HAVE CALLED TOYOTA CUSTOMER SERVICE CENTER, AND WILL CALL DEALER WHERE I PURCHASED CAR NEXT.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ARLINGTON, VA, US. SINCE THEN I DO NOT HAVE ANY ISSUES UP UNTIL TODAY. WHEN I CAM OUT TODAY TO DRIVE ON 66 HIGHWAY AND ALSO TO GET ON TO WEST OX ROAD, I HAD RECALL COMPALINTS WHAT WAS LISTED OCCURED TO ME. 1) ABOVE 60 MILES SPEED WHEN I WAS TRAVELLING AND TIME TO APPLY THE BREAKS, I COULDN'T STOP THE CAR IMMEDIATELY, IT TOOK 2-3 MIN. TO GET TO STOP AFTER TRAVELLING SOME DISTANCE THOUGH I DIDNT SEE HOW FAR I HAD TO TRAVEL TOO. 2) OTHER INCIDENT HAPPEN ON SAME TRAVEL TIME ON WEST OX ROAD, I WAS APPROACHING A TRAFIC LIGHT NEAR FOX MILL AT SPEED AROUND 12 - 15 MILES / HOUR - I COULDN'T STOP THE CAR, IT WAS ACCELERATING ONLY INSPITE ME APPLYING THE BREAKS.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10308306  
**Date of Incident:** 20100209  
**Vehicle:** 2007 TOYOTA FJ CRUISER  
**Location of Incident:** WEBSTER, NY

**NHTSA Summary:**  
I WAS DRIVING MY MODEL YEAR 2007 TOYOTA FJ CRUISER TO WORK ON THE MORING OF 2/9/2010 AT 0730. WHILE BRAKING FOR A RED LIGHT THE PASSENGER SIDE FRONT TIRE WENT OVER A WET STORM SEWER DRAIN GRATE. THE SLICK SURFACE OF THE DRAIN GRATE CAUSED THE TIRE TO SKID. THE ABS SYSTEM ACTIVATED AND THE BRAKES RELEASED, ALLOWING THE VEHICLE TO PROCEED UNIMPEDED TOWARD THE INTERSECTION. I PRESSED THE BRAKE PEDAL HARDER. THE VEHICLE STOPPED JUST INTO THE INTERSECTION. THERE WAS NO COLLISION. I DO NOT KNOW IF PRESSING THE BRAKE PEDAL HARDER HAD ANY EFFECT OR IF THE SYSTEM MANAGED TO APPLY THE BRAKES ITSELF AFTER THE TIRES WERE ON PAVEMENT AGAIN. THIS IS THE FIRST TIME I HAVE EXPERIENCED THIS SITUATION. THE CONSEQUENCE WAS THAT THE VEHICLE PROCEEDED ABOUT 10 FEET INTO THE INTERSECTION, E.G. BEYOND THE "STOP" LINE. IF THE BRAKES HAD NOT RELEASED THE VEHICLE WOULD HAVE STOPPED BEHIND THE WHITE "STOP" LINE. ACCORDING TO THE TOYOTA DEALER THERE IS NOTHING WRONG WITH THE VEHICLE.

**Additional Summary:**

**NHTSA Summary:**  
MY NAME IS CORY DICKENS. I AM NOT A TOYOTA OWNER, HOWEVER I BELIEVE I AM THE VICTIM OF A TOYOTA ACCIDENT. YESTERDAY, MY CAR WAS PARKED OUTSIDE OF MY OFFICE AT 2758 RUSSELL BLVD, SAINT LOUIS, MO. AROUND 10:45 AM I HEAR A CRASH AND SEE MY VEHICLE (2008 CHEVY EQUINOX) PICK UP OFF THE GROUND. VEHICLE OWNER PHUONG VO, DRIVING A 2010 TOYOTA CAMRY HAD SLAMMED INTO THE BACK OF MY CAR, AND DAMAGED IT FROM FRONT TO BACK, INCLUDING REMOVING MY BACK AXEL COMPLETELY. WHEN I CAME OUTSIDE, THERE WAS AN ADDITIONAL TRUCK FOLLOWING THIS CAMRY. APPARENTLY THE CAMRY HAD HIT THIS PERSONS CAR, HE GOT IN IT TO FOLLOW THE DRIVER, AND THEN WITNESSED THE DRIVER HIT AN ADDITIONAL 5 CARS BEFORE CRASHING INTO MINE AND COMING TO A STOP! NOW I AM VERY UPSET BECAUSE, NOT ONLY DOES THIS TOYOTA DRIVER NOT HAVE ENOUGH INSURANCE TO COVER MY DAMAGES, BUT HIS INSURANCE COMPANY IS REFUSING TO PAY FOR MY DAMAGES AND PROVIDE ME WITH A RENTAL VEHICLE. I DID NOTHING WRONG. JUST WENT TO WORK YESTERDAY, AND NOW I AM OUT OF A \$500 DEDUCTIBLE.

**C-1948**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AND MY VEHICLE IS EXPECTED TO TAKE WEEKS BEFORE BEING REPAIRED. FURTHERMORE, THE ST LOUIS POLICE DEPARTMENT HAD REPORTED THAT WHEN AN OFFICER TRIED TO MOVE THE VEHICLE IT SEEMED AS IF THE GAS PEDAL WAS STUCK TO THE FLOOR.

**NHTSA Summary:**

MY WIFE HAD A MAJOR ACCIDENT LAST WEEK IN SEAVILLE,NJ. SHE WAS DRIVING A 2006 TOYOTA COROLLA S. THE WEATHER WAS COLD OUTSIDE BUT IT WAS NOT SNOWING. SHE HAD AMPLE OF DISTANCE AND TIME TO STOP THE VEHICLE AT THE TRAFFIC LIGHT. SHE HIT ON THE BRAKES WHEN THE LIGHT TURNED YELLOW. THE CAR STILL KEPT ON GOING AND DID NOT SLOW DOWN. SHE SLAMMED THE BRAKES REAL HARD AND THE CAR STILL KEPT ON GOING. FINALLY THE CAR STOPPED WHEN IT HIT 2 TRUCKS ON CROSS TRAFFIC. THE DRIVER SIDE AIR BAG DEPLOYED. MY WIFE WAS RUSHED TO THE ER DIRECTLY FROM THE ACCIDENT SCENE. POLICE WAS ON SITE. SHE WAS HURT PRETTY BAD IN HER NECK, LOWER BACK, SHOULDER FOOT ETC. I WOULD NEVER BUY A TOYOTA AGAIN. BOTH HER AND MY CONFIDENCE IS LOST IN TOYOTA. GOVERNMENT SHOULD BE STRICTER WITH EXAMINING CARS. HER CAR WAS NOT IDENTIFIED AS PART OF RECALL. I WOULD ASK THE GOVERNMENT TO INFORM OTHER 2006 TOYOTA OWNERS TO BE VERY CAREFUL. UPDATED 03/08/10

**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** MIAMI, FL

**NHTSA Summary:**

I OWN A 2005 TOYOTA CAMRY AND SINCE I BOUGHT IT FROM THE DEALER IT HAD BEEN HAVING PROBLEMS WITH THE AUTOMATIC TRANSMISSION SYSTEM AND THE ACCELERATOR. FOR EXAMPLE WHEN I STOP AT A TRAFFIC LIGHT AND I BEGIN TO ACCELERATE THE CAR TAKES TO LONG TO SHIFT TO THE NEXT GEAR AND WHILE THIS TIME ELAPSES FOR ABOUT 2 TO 4 SECONDS THE CAR KEEPS ACCELERATING WITH NO GEAR AT ALL. THIS ALMOST MAKE ME CRASH THE OTHER DAY TRYING TO AVOID A COLISION WITH AN AGRESSIVE DRIVER THAT GOT IN MY WAY AND I COULD NOT ADVANCE WITH THE CAR AT THAT CRUCIAL MOMENT AND GET OUT OF THE WAY OF THE SITUATION SINCE THE GEAR WAS NOT READY FOR ME TO ACCELERATE AND ADVANCE. ANOTHER PROBLEM THAT I HAVE BEEN NOTICING IS THAT WHILE AT LOW TO MEDIUM SPEEDS THE ABS BRAKING SYSTEM FAILS TO BRAKE THE CAR AFTER IT GETS OVER A BUMP IN THE ROAD. SEVERAL TIMES IT HAD HAPPENED TO ME THAT AFTER I GET A BUMP I HAVE TO APPLY THE BRAKES 2 TO 3 TIMES IN A RAPID SUCCESSION TO COME TO A COMPLETE STOP. ALSO SOMETIMES WHILE DRIVING AT LOW SPEEDS WITH LOW RPMS THE CAR STALLS WITHOUT WARNING AND THE WHEEL GETS VERY HARD TO MANUEVER. I EVEN HAVE TO STOP THE CAR IN THE MIDDLE OF THE ROAD TO START THE

ENGINE AGAIN AND CONTINUE WITH MY TRIP. ALL THIS COMPLAINT WAS GIVEN TO TOYOTA IN PRIORS CALLS I MADE TO THEM BUT THE DEALERS THEY SEND ME TO SEE SAID THAT WAS NORMAL OPERATION OF THE CAR. THAT THERE WAS NOTHING WRONG.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10310225  
**Date of Incident:** 20100210  
**Vehicle:** 2001 TOYOTA PRIUS  
**Location of Incident:** LEXINGTON, MA

**NHTSA Summary:**  
DRIVING MY 2001 PRIUS DOWN RT 95 IN CT. SUDDENLY LOST POWER. I WAS ABLE TO DRIVE - ELECTRIC DRIVE ONLY, NO GAS POWER. I MADE TO TO THE EXIT IN WESTPORT AND FOUND A TOYOTA DEALERSHIP OPEN. THE DIAGNOSIS, VIA CODES, WAS FAILED ACCELERATOR PEDAL. RESETTNG THE COMPUTER AND RESTARTING THE CAR A FEW TIMES ALLOWED IT TO WORK ENOUGH FOR ME TO GET HOME. I HAVE STILL NOT REPAIRED THE ACCELERATOR. LATELY THIS PROBLEM HAPPENS NEARLY EVERY TIME I START THE CAR...THE ENGINE STALLS IMMEDIATELY OR LOSES POWER DOWN THE ROAD. RESTARTING 2 OR 3 TIMES "FIXES" THE PROBLEM MOST OF THE TIME. MY RESEARCH HAS SHOWN THAT THIS PROBLEM IS COMMON, AND CALLED "BIG HAND SYNDROME" AMONG 1ST GENERATION PRIUS OWNERS, AND ACCELERATOR PEDAL REPAIR IS THE COMMON FIX. I BELIEVE THE 2001-2003 PRIUS SHOULD BE INCLUDED IN THE TOYOTAL ACCELERATOR PEDAL RECALL.

**Additional Summary:**  
1st two years ago - driving on 95 - car lost power - the engine wouldn't run but the electric motor did - was able to coast and travel about 1 - 1.5 miles at 10 mph - Toyota dealer in Westport nearby off the exit - DTC - accelerator pedal needed to be replaced - started the car at the dealership - after the error codes were cleared and the car drove fine - filed it as "interesting" - according to chat rooms the prius has a big hand syndrome - guy repairs accelerator pedals on prius' because parts go bad - will send us a link - web link - pictures of him taking out sensors

About 5 month ago - problem started happening again - pull over and restart the car - it goes away -

**NHTSA Summary:**  
PARKING CAR IN SHOPPING MALL LOT. SPOT IS PERPENDICULAR TO TRAFFIC LANE. DIVIDER BETWEEN MY SPOT AND OPPOSITE SPOT. DIVIDER CONSISTS OF ELEVATED PLANTING WITH MATURE BUSHES, AND STEEL POST WITH HANDICAP PARKING SIGN. I HAD MY FOOT DEPRESSING THE BRAKE PEDDLE. CAR HAD ALMOST STOPPED WHEN SUDDENLY IT ACCELERATED AND "BUCKED FORWARD" ONTO THE PARKING DIVIDER. I CONTINUED TO PRESS DOWN HARD ON THE BRAKE. FORWARD MOMENTUM STOPPED AFTER I HIT AND KNOCKED DOWN THE SIGN POST AND HIT FRONT OF A TOYOTA TACOMA THAT WAS PARKED FACING ME ON OTHERSIDE OF DIVIDER. THE DIVIDER WITH JUNIPER BUSHES ELEVATED MY CAR AND WHEN I STOPPED THE REAR WHEELS WERE SUSPENDED OFF THE PAVEMENT. I HAD MY FOOT ON BRAKE DURING THIS TIME, PUT THE GEAR INTO PARK AND TURNED OFF THE IGNITION. THE AIR BAGS DID NOT DEPLOY.

C-1954

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

WAS TRAPPED IN THE CAR BY DENSE JUNIPER BUSHES ON BOTH SIDES DOORS, AND REQUIRED ASSISTANCE TO GET OUT OF THE CAR. I WAS NOT INJURED - JUST SCARED. I CALLED MY DAUGHTER AND SON-IN-LAW TO THE SCENE. SINCE HE DRIVES A TOYOTA TUNDRA, HE LOOKED AT THE FLOOR MAT ON DRIVERS SIDE. IT WAS IN PLACE, HAD NOT MOVED FORWARD. BECAUSE OF THE WINTER WEATHER WITH SNOW, WE HAD AN AFTER MARKET FLOOR MAT. MY HUSBAND HAD CUT OFF THE RIGHT FRONT CORNER TO INSURE THAT IF IT DID COME LOOSE, IT COULD NOT INTERFERE WITH THE GAS PEDAL. THE MAT WAS RESTRAINED BY REAR EDGE THAT PROTRUDED DOWN AND RESTRAINED BY THE TWO RAISED CLIPS ON THE FLOOR. BECAUSE OF THE ELEVATED REAR WHEELS, WE NEEDED A TOW TRUCK TO PULL MY CAR OFF THE DIVIDER. WE HAD THE CAR TOWED TO MY DEALER STEVINSON TOYOTA. THEIR INSPECTION SHOWED NO DAMAGE TO THE UNDERSIDE OF THE CAR. FRONT RIGHT CORNER DAMAGE ESTIMATE OF \$2,200. THE MECHANIC DID A COMPUTER DIAGNOSIS REPORTED "NOTHING ABNORMAL". SAID HE COULD NOT EXPLAIN WHY THE CAR SUDDENLY ACCELERATED. HE ROAD TESTED THE CAR AND TOLD ME IT WAS SAFE TO DRIVE. I COULD NOT GET IMMEDIATE REPAIRS, SO DROVE IT 120 MILES TO TO MY HOME. IT HANDLED NORMAL.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10318311  
**Date of Incident:** 20100210  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** ROY, WA

**NHTSA Summary:**  
ON FEB 10, 2010 MY 07 TOYOTA CAMRY ACCEL PEDEL STUCK ON ME, 5 DAYS AFTER THE RECALL WAS DONE ON IT. IT REVVED FROM 2000-4000 RPMs, I HAD TO BRAKE HARD FOR IT TO STOP AND REGAIN CONTROL. TOOK IT INTO TOYOTA, THEY LOOKED AT IT, RETURNED THE CAR AND TOLD ME "NOTHING WAS WRONG." ON MARCH 4, 2010 IT HAPPENED AGAIN, THIS TIME IT ACCELERED FROM 20 MPH TO 40 MPH IN A SPLIT SECOND, AND I ALMOST HIT THE CAR IN FRONT OF ME. AGAIN I HAD BRAKE HARD TO GAIN CONTROL OF MY VEHICLE. TOYOTA AGAIN LOOKED OVER MY CAR, AND AGAIN CAME UP WITH NOTHING WRONG WITH MY CAR. SO THAT IS TWO TIMES AFTER THE RECALL WAS COMPLETED THAT MY HAS EXCELLERATED. IT ALSO DID EXCELLERATE BEFORE THE RECALL.

**NHTSA Summary:**  
IN 2007 WE LEASED A NEW CAMRY ALONG WITH ANOTHER NEW TOYOTA PRODUCT ON THE SAME DAY. MY WIFE HAS HAD THE ACCELERATOR STICK ON HER AND SHE HAD TO USE THE EMERGENCY BRAKE TO STOP THE CAR AND RAN OFF THE ROAD. SHE NARROWLY AVOIDED HAVING A TERRIBLE ACCIDENT IN THE CAR WHILE MY FOUR YEAR OLD DAUGHTER WAS IN THE CAR WITH HER. THE DEALERSHIP PICKED UP THE CAR AND ATTEMPTED TO FIX IT. THE FIRST TIME MY WIFE DROVE THE CAR THE ACCELERATOR STUCK AGAIN. THEY HAVE SINCE CAME AND PICKED IT UP AGAIN AND HAVE HAD IT FOR ALMOST TWO WEEKS WITH NO PROGRESS OR SOLUTIONS OFFERED. THE CAR IS UNSAFE AND THEY HAVE NO SOLUTIONS TO FIX IT. THEY TELL US THEY'RE WAITING ON TOYOTA ENGINEERS TO COME BUT HAVE NO DATE OR TIME THAT WILL HAPPEN. MY WIFE IS TERRIFIED OF THE CAR AND RIGHTFULLY SO. THERE ARE ONLY 15 MONTHS LEFT ON THE LEASE AND WE JUST WANT THEM TO PURCHASE THE CAR BACK. IT IS LEASED THROUGH TOYOTA FINANCIAL. THIS HAS BEEN GOING ON FOR TOO LONG FOR THEM TO HAVE NO SOLUTIONS FOR A REPAIR.

**Date of Incident:** 20100211  
**Vehicle:** 2006 LEXUS RX400H  
**Location of Incident:** WAYLAND, MA

**NHTSA Summary:**  
I OWN A 2006 LEXUS RX400H WHICH I BELIEVE HAS EXACTLY THE SAME FLAW AS RECENTLY REPORTED IN THE PRIUS. SEVERAL YEARS AGO I HAD A MINOR ACCIDENT CAUSED BY MY CAR LURCHING FORWARD DURING BREAKING WHICH CAUSED ME TO HIT THE CAR IN FRONT OF ME. WHEN I BROUGHT MY CAR INTO THE LEXUS OF WATERTOWN DEALERSHIP WHERE I PURCHASED THE VEHICLE I REPORTED THAT I THOUGHT THE ISSUE MIGHT BE RELATED TO THE TRANSITION BETWEEN THE REGENERATIVE BRAKING SYSTEM AND THE REGULAR BRAKE. IT SEEMED LIKE THE REGENERATIVE BRAKING SYSTEM WAS TURNED OFF SLIGHTLY BEFORE THE REGULAR BRAKING SYSTEM KICKED IN CAUSING A GAP IN THE BRAKING THAT WAS PERCEIVED BY ME TO BE A "LURCHING FORWARD". OF COURSE, WHAT IT WAS WAS A DECREASE IN DECELERATION THAT APPEARED BE BE ACCELERATION. IN ANY EVENT, THE DEALER SAID HE CHECKED THE BRAKES AND COULD NOT FIND ANYTHING WRONG. I WOULD SAY FROM THAT TIME UNTIL NOW I HAD ABOUT ONE OR TWO INSTANCES OF THIS LURCHING PER MONTH. I AM VERY USED TO HYBRIDS AND CURRENTLY OWN A PRIUS AS WELL, SO I KNOW THE IDIOSYNCRATIC NATURE OF THE BRAKING SYSTEM. HOWEVER, AFTER THE RECENT CASCADE OF REPORTS ON PROBLEMS WITH THE PRIUS I CALLED MY DEALER AGAIN AND TOLD THEM, YOU SHOULD KNOW THAT THE LEXUS HAS THE SAME PROBLEM, I HAVE HAD EXACTLY THE SAME PROBLEM WITH MY LEXUS HAVE THERE BEEN ANY OTHER REPORTS OF PROBLEMS. I BELIEVE I WAS TOLD NO. HOWEVER, THE WORDING OF THE ANSWER WAS GUARDED. TODAY, I HAD ANOTHER LURCHING EVENT. APPROACHING A STOP SIGN, ON A SMOOTH, DRY ROAD I LURCHED FORWARD AT APPROXIMATELY 15 MPH. IF A PEDESTRIAN WERE CROSSING THE STREET AT THE TIME I WOULD HAVE HIT THEM, CAUSING SERIOUS INJURY, HOPEFULLY NOT DEATH. THIS IS A DANGEROUS SITUATION. I CONTACTED MY LEXUS DEALER TO RELAY THIS ISSUE TODAY AND SAY WE MUST DO THE RIGHT THING. THEY DID NOT RESPOND, SO I AM MOVING FORWARD WITH THIS FORMAL COMPLAINT BEFORE MORE SERIOUS HARM IS DONE.

**Date of Incident:** 20100211  
**Vehicle:** 2008 LEXUS ES350  
**Location of Incident:** WEST PALM BEACH, FL

**NHTSA Summary:**  
ACCELERATION PROBLEM 2008 LEXUS E350. WHILE ENTERING THE FLORIDA TURNPIKE, I ACCELERATED QUICKLY TO MERGE AHEAD OF TRAFFIC. I PUSHED THE ACCELERATOR PEDAL TO THE FLOOR. THE PEDAL STUCK. IT FELT LIKE THE VEHICLE SPEED CONTROL TOOK OVER. I ACCELERATED QUICKLY FROM 45MPH TO 85 MPH. MY FIRST REACTION WAS TO HIT THE BRAKE PEDAL. AS I LOOKED DOWN AT THE ACCELERATOR BEFORE I HIT THE BRAKE, IT WAS DEPRESSED. WHEN I HIT THE BRAKE SEVERAL TIMES IT RELEASED. WHILE SHAKEN, I CONTINUED ON TO MY DESTINATION IN MIAMI. I WAS CAREFUL NOT TO ACCELERATE QUICKLY. WHEN I RETURNED TO WEST PALM BEACH I TOOK THE VEHICLE TO THE LEXUS DEALER AND INFORMED THEM OF THE PROBLEM. THE LEXUS DEALER INDICATED MY VEHICLE WAS PART OF THE RECALL FOR FLOOR MATS. THE FLOOR MATS WERE NOT SECURED TO THE HOOKS. THE FLOORMAT HOOK HOLES WERE BEHIND THE HOOKS AND MATS WERE BACK AGAINST THE FRONT SEAT SUPPORTS. THE MATS WERE NO WHERE NEAR THE BRAKE PEDAL OR THE ACCELERATOR AT THE TIME OF THE INCIDENT OR WHEN I ARRIVED AT THE LEXUS DEALERSHIP. THE SERVICE MANAGER INSISTED THE PROBLEM OCCURRED DUE TO THE FLOOR MATS. I DISAGREED KNOWING THE POSITION OF THE MATS WHEN THE INCIDENT OCCURRED AND THE REACTION OF THE VEHICLE. THE DEALERSHIP REPLACED THE RECALLED FLOORMATS. MY COMPLAINT IS THEY DENIED THERE IS A PROBLEM WITH THE VEHICLE SPEED CONTROL AND INSISTED IT WAS A PROBLEM WITH THE FLOOR MATS. I HAVE A DIFFICULT TIME UNDERSTANDING WHY THEY ARE NOT ALSO CHECKING THE VEHICLE SPEED CONTROL SOFTWARE. WHILE THIS IS THE ONLY OCCURRENCE OF THIS TYPE OF INCIDENT SINCE I HAVE OWNED THE VEHICLE, I NOW HAVE A VERY UNCOMFORTABLE FEELING ABOUT ACCELERATING QUICKLY. SINCE I HAVE OWNED THE CAR, THERE HAVE BEEN VERY FEW TIMES I ACCELERATED QUICKLY. I DON'T FEEL MY CONCERN OR COMPLAINT HAS BEEN PROPERLY ADDRESSED. THERE WAS NEVER ANY INDICATION FROM THE LEXUS DEALER THAT THEY LOOKED ANY FURTHER THAN THE FLOORMATS TO SOLVE THE PROBLEM. THE DEALERSHIP IS LEXUS OF WEST PALM BEACH. PLEASE ADVISE. \*TR

**NHTSA Summary:**

C-1961

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SUDDEN UNEXPLAINED ACCELERATION AND BRAKE FAILURE ON MY 2004 TOYOTA SIENNA. I WAS ALMOST AT A STOP AT A TRAFFIC LIGHT WHEN THE LIGHT TURNED GREEN. I PRESSED THE ACCELERATOR. MY VAN SHOT OFF! IT ACCELERATED VERY RAPIDLY. I PRESSED THE BRAKE. THEY DID NOT ENGAGE. I PRESSED THE BRAKE AGAIN. THEY WENT TO FLOOR. WITH ONCOMING TRAFFIC ON MY LEFT AND A CAR IN THE RIGHT LANE, I HAD NOWHERE TO GO. I HIT THE TRUCK IN FRONT OF ME WHO WAS STOPPING AT THE NEXT TRAFFIC LIGHT. HAD I BEEN ON A CURVY ROAD OR THE INTERSTATE, I COULD HAVE BEEN SERIOUSLY INJURED. I DID NOT LOOK AT THE SPEEDOMETER TO SEE HOW FAST THE VAN GOT. I WAS TOO BUSY TRYING TO FIND A WAY NOT TO HIT SOMEONE. THIS WAS VERY SCARY.

**NHTSA ODI Number:** 10310092  
**Date of Incident:** 20100212  
**Vehicle:** 2010 TOYOTA COROLLA  
**Location of Incident:** BAKERSFIELD, OR

**NHTSA Summary:**

TL- THE CONTACT OWNS A 2010 TOYOTA COROLLA. SHE STATED OFTEN WHILE DRIVING AT VARIOUS SPEEDS OF 3 MPH AND UP, THERE WOULD BE A SUDDEN INCREASE IN RPM'S WITHOUT WARNING. WHILE DEPRESSING THE ACCELERATOR PEDAL, THE PEDAL WOULD OFTEN RETURN TO THE IDLE POSITION VERY SLOWLY. THERE WOULD ALSO BE INSTANCES WHEN THE VEHICLE WOULD FEEL AS IF IT WAS LOSING POWER WHILE TRAVELING DOWNHILL, AT ANY SPEED, ALSO CAUSING A SUDDEN INCREASE IN RPM'S. THE DEALER INSTALLED A CUT METAL BAR TO THE ACCELERATOR PEDAL UNDER NHTSA CAMPAIGN ID NUMBER: 10V023000; COMPONENT: VEHICLE SPEED CONTROL-ACCELERATOR PEDAL IN AN ATTEMPT TO CORRECT THE FAILURE. THE FAILURE PERSISTED. THERE WERE NO FURTHER REPAIRS PERFORMED ON THE VEHICLE. THE FAILURE AND CURRENT MILEAGES WERE 2,376. \*KMJ

**Location of Incident:** HINGHAM, MA

**NHTSA Summary:**

FOUR MONTHS AGO I PURCHASED A 2004 TOYOTA 4RUNNER LIMITED WITH APPROX. 82,000 MILES. A MONTH OR SO LATER, I APPROACHED A STOP SIGN AND AS I BRAKED, THE VEHICLE SUDDENLY ACCELERATED. I STEPPED AS HARD AS I COULD ON THE BRAKE AND FORTUNATELY, THE VEHICLE STOPPED. AT THE TIME, I WAS SCARED BUT THOUGHT THAT MAYBE BY MISTAKE, MY FOOT WAS SPANNING BOTH PEDALS (I DIDN'T THINK SO BUT COULDN'T BE 100% POSITIVE). YESTERDAY, I APPROACHED ANOTHER

C-1962

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

INTERSECTION WITH MY FOOT CLEARLY ON THE BRAKE PEDAL AS I WAS COMING TO A CONTROLLED STOP WHEN, SUDDENLY, THE VEHICLE ACCELERATED AGGRESSIVELY AGAIN, I WAS ABLE TO SLOW THE VEHICLE DOWN BY ALMOST STANDING ON THE BRAKE PEDAL, THOUGH NOT ENOUGH TO STOP ME FROM GOING THROUGH THE INTERSECTION WITHOUT STOPPING. THIS TIME THERE WAS NO DOUBT - THE VEHICLE ACCELERATED ON ITS OWN. THE PEDAL DID NOT STICK AS MY FOOT WAS ON THE BRAKE AS I WAS COASTING TO A STOP. THIS VEHICLE DEFINITELY HAS A DEFECT AND IT WAS VERY SCARY. MY WIFE WILL NOT DRIVE THIS CAR AND I ONLY WILL NOW IF I ABSOLUTELY HAVE TO.

**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** COCOA, FL

**NHTSA Summary:**

I OWN A 2005 CAMRY. I WAS DRIVING ON I 95 AT 60 MPH WHEN THE CAR LUNGED TWICE, THEN STOPPED ACCELERATING AND WENT FROM 60 TO 0 IN TEN SECONDS MAKING IT DIFFICULT TO COAST TO A STOP ON THE SIDE OF THE VERY BUSY HIGHWAY. AFTER TOWING CAR TO THE DEALER NEAREST ME, IT WAS DIAGNOSED AS THE THROTTLE BODY FAILURE. I WA TOLD IT WOULD COST 1,000 TO REPLACE IT. MY CAR ONLY HAS 39,000 MILES ON IT. THE WARRANTY DID NOT COVER THIS PART. THEN THE DEALER REPAIRMAN SAID HE WOULD CLEAN IT OUT FOR 145.00 WHICH HE DID. HE SAID THIS HAS TO BE DONE EVERY 30,000 MILES BECAUSE OF A DESIGN PROBLEM. I DID SOME RESEARCH AND HAVE FOUND TOYOTA CAMRY 02-06 HAVE THIS FLAWED PART AND THERE ARE MANY COMPLAINTS OVER THE INTERNET DOCUMENTED. I FELT VERY UNSAFE WHEN THE INCIDENT HAPPENED AND NOW AM ANXIOUS THAT IT WILL HAPPEN AGAIN. MY QUESTION IS: WHY DID THE DEALER WANT TO SEE IF IT WAS COVERED UNDER OUR WARRANTY WE PAID FOR EXTRA BY ANOTHER INSURANCE COMPANY (IE., NOT TOYOTAL MFR. WARRANTY) AND WHEN THEY FOUND OUT IT WAS NOT COVERED, THEY JUST CLEANED IT AND SAID IT WAS FINE NOW? AS A CONSUMER, I AM NOT WANTING TO GO THROUGH THE EXPERIENCE OF MY CAR JUST ABRUPTLY STOPPING LIKE THAT AND BEING LEFT ON THE SIDE OF THE ROAD AGAIN.

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** WOONSOCKET, RI

TL\* THE CONTACT OWNS A 2007 TOYOTA CAMRY. THE CONTACT STATED AS HE WAS DRIVING 15MPH THE VEHICLE STARTED TO ACCELERATE AT A UNCONTROLLABLE SPEED. HE PUT HIS FEET ON THE BRAKES AND THE GEAR IN NEUTRAL. THE VEHICLE SLOWED DOWN BUT AS HE WAITED FOR ABOUT FIVE MINUTES BEFORE MOVING, THE VEHICLE MOTOR KEPT REVVING. HE DROVE THE VEHICLE HOME AND CALLED THE DEALER. THE VEHICLE WAS TOWED TO THE DEALER AND A REPRESENTATIVE TOOK IT OUT FOR A TEST DRIVE AND INFORM HIM THE TRANSMISSION WAS BURNT OUT AND THAT THEY ARE GOING TO REPLACE THE TRANSMISSION. THE CONTACT STATED HE IS NOT SAFE DRIVING THE VEHICLE AND DOES NOT WANT THE VEHICLE BACK. THE FAILURE MILEAGE WAS 12,500.

**Vehicle:** 2010 TOYOTA SIENNA  
**Location of Incident:** MISSION HILLS, CA

**NHTSA Summary:**  
I RECENTLY DROVE A RENTED 2010 TOYOTA SIENNA VAN, TEXAS LICENSE NUMBER NWT003 FROM ALAMO RENTALS IN SAN ANTONIO TEXAS. I FOUND THE CRUISE CONTROL SYSTEM A BIT QUIRKY AND A BIT STARTLING AT FIRST. ONCE THE CRUISE CONTROL WAS SET TO 70 MILE PER HOUR, THE SYSTEM OPERATED FINE AND MAINTAINED THE SET SPEED. HOWEVER, ONCE EVERY 3 OR 4 TIMES THE CRUISE CONTROL WAS DISCONNECTED USING THE BRAKE PEDAL, THEN USING THE RESUME FUNCTION OF THE CRUISE CONTROL, THE VEHICLE WOULD ACCELERATE RAPIDLY PAST 75 MILES PER HOUR. ONCE I DISCONNECTED THE CRUISE CONTROL AND RESET THE DESIRED SPEED, THE CRUISE CONTROL OPERATED NORMALLY. THIS SEEMED TO BE A PERSISTANT BUT INTERMITTENT ISSUE. ONCE I WAS AWARE OF THE POTENTIAL FOR RAPID ACCELERATION AND SPEED OVERSHOOT, I WAS ABLE TO ANTICIPATE AND CONTROL THE THE VEHICLE FROM RUNNING AWAY. IN LIGHT OF ALL THE ISSUES CONCERNING TOYOTA PRODUCTS, I THOUGH I WOULD BRING THIS TO YOUR ATTENTION. DRIVING CONDITIONS AT THE TIME OF THESE INCIDENTS WERE DRY CONCRETE ROAD, 7 PASSENGERS IN THE VEHICLE, HIGHWAY SPEED OF 70 MILES PER HOUR, OUTIDE TEMPERATURES WERE BETWEEN 34 DEGREES F TO 70 DEGREES F. HIGHWAY WAS STRIGHT AND LEVEL.

**NHTSA Summary:**  
I WAS DRIVING A 2010 LEXUS RX450H ON A HIGHWAY AT @60 MPH WHEN IT ACCELERATED ON ITS OWN TO @80 MPH WITHIN A FEW SECONDS. IT RESPONDED TO THE BRAKE AND I EXITED THE HIGHWAY. I HAD THE VEHICLE PREVIOUSLY CHECKED BY THE DEALER, RALLYE LEXUS IN GLEN COVE NY, AND THEY SAID THEY WERE NO PROBLEMS. THE DEALER AND FACTORY REP. CHECKED THE VEHICLE AFTER THE INCIDENT AND THEY AGAIN SAID THERE WERE NO PROBLEMS WITH THE CAR. HOWEVER, THE EVENT

C-1965

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

DID OCCUR AND NOW I WILL NOT DRIVE THE VEHICLE. FORTUNATELY THERE WAS NO ACCIDENT AS A RESULT OF THE MALFUNCTION.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10314851  
**Date of Incident:** 20100212  
**Vehicle:** 2010 TOYOTA COROLLA  
**Location of Incident:** ENOSBURG FALLS, VT

**NHTSA Summary:**  
THIS IS THE SECOND TIME I AM CONTACTING YOU REGARDING A COMPLAINT WITH MY 2010 COROLLA. I FIRST CALLED THE NHTSA 800 NUMBER WITH THIS WRITTEN COMPLAINT AND WAS TOLD I WOULD RECEIVE A HARD COPY IN TWO WEEKS (I HAVE YET TO RECEIVE IT). SO ONCE AGAIN I AM PUTTING THIS COMPLAINT IN WRITING, SO I HAVE PROOF THAT IT WAS FILED AND SENT. I HOPE THAT SOMETHING GETS DONE WITH IT ONCE AND FOR ALL. THE COMPLAINT IS REGARDING TOYOTA'S NEW PEDAL RECALL PART. IT DOES NOT CORRECT THE ACCELERATION PROBLEM. MY CAR ACCELERATED OVER 80 MPH ON FEB.12.2010. TOYOTA PUT IN THE RECALL PEDAL THAT MORNING AFTER I BROUGHT THE CAR THERE. ON THE WAY HOME FROM WORK ON FEB 12, THE CAR EXHIBITED MORE ACCELERATION ISSUES. THAT WAS WHEN I CALLED TO REPORT IT WITH THE NHTSA. THE CAR THEN ACCELERATED AGAIN ON FEB15 WITH THE NEW "PEDAL RECALL IN". I WAS DRIVING UP A LONG ONRAMP ONTO THE INTERSTATE AT APPROX. 35-40 MPH, AND THE CAR TOOK OFF TO OVER 80 MPH. I WAS INJURED. I CALLED AGAIN TO YOUR AGENCY TO REPORT THIS ON FEB15TH. I GOT THE CAR BACK FROM TOYOTA ON FEB 19TH. THEY SAID "THE CAR WAS FINE. IT IS NORMAL FOR COROLLAS TO ACCELERATE TO 80 MPH" THAT IS TOTAL BULL! THE CAR'S PEDAL STARTED STICKING ON SUNDAY, FEBRUARY 21. THIS CALLED MORE RPM & ACCELERATION PROBLEMS WITH THE CAR. ALSO THE BRAKES ARE GOING DOWN TO THE FLOOR. THE CAR HAS GONE THRU A 5 WAY INTERSECTIONS STOP LIGHT AND A STOP SIGN. I HAVE HAD TO USE THE EMERGENCY BRAKE TO STOP THE CAR.

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TL- THE CONTACT PREVIOUSLY OWNED A 2009 TOYOTA COROLLA. THE CONTACT STATED THAT SHE REAR ENDED ANOTHER VEHICLE WHEN PULLING UP TO A STOP LIGHT. HER FOOT WAS ON THE BRAKE PEDAL BUT THE VEHICLE LUNGED FORWARD SUDDENLY. THERE WERE NO INJURIES BUT A POLICE REPORT WAS TAKEN. SHE TOOK THE VEHICLE TO THE DEALERSHIP FOR INSPECTION AND THE DEALER TOLD HER THAT THEY FOUND NOTHING WRONG. SHE WAS LATER TICKETED DRIVING DOWN THE HIGHWAY AT 64 MPH WHICH SHE ATTRIBUTED TO THE UNINTENDED ACCELERATION AS SHE DEPRESSED THE BRAKE PEDAL BUT THE VEHICLE DID NOT SLOW. AFTER A WEEK, SHE WAS PULLING UP TO A STOP LIGHT AND WHEN SHE TRIED TO BRAKE, THE VEHICLE KEPT MOVING FORWARD AND SHE REAR ENDED ANOTHER VEHICLE. THERE WERE NO INJURIES AND NO POLICE REPORT WAS TAKEN. SHE TOOK THE VEHICLE BACK TO THE DEALERSHIP AND SHE REFUSED TO DRIVE THE VEHICLE. SHE WAS GIVEN ANOTHER VEHICLE AND TRADED THE ORIGINAL. THE CURRENT MILEAGE WAS APPROXIMATELY 34,000. THE FAILURE MILEAGE WAS APPROXIMATELY 30,000-BK

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10319589  
**Date of Incident:** 20100212  
**Vehicle:** 2007 TOYOTA COROLLA  
**Location of Incident:** FREDERICK, MD

**NHTSA Summary:**  
APPROXIMATELY JAN 26, 2010 2007 TOYOTA COROLLA ENGINE ACCELERATED UP TO APPROXIMATELY 7000 RPMs WHILE MY WIFE'S FOOT WAS ON BRAKE ONLY, CAR WAITING FOR ABOUT TWO MINUTES AT TRAFFIC LIGHT. CAR WAS TURNED OFF. CAR TOWED TO TOYOTA DEALER, DEALER FOUND NOTHING WRONG, NOTHING DONE. FEB 12, 2010 AGAIN THE CAR WAS IDLING, WAITING FOR TRAFFIC TO CLEAR, TO MAKE RIGHT TURN. THIS TIME ENGINE STARTED WILDLY ACCELERATING AS SOON AS MY WIFE GAVE CAR A LITTLE GAS, THE CAR LURCHED FORWARD RAPIDLY, SHE HIT ANOTHER CAR, CAUSED DAMAGE TO BOTH CARS, NO INJURIES. CAR ENGINE RACED VERY FAST AGAIN JUST AFTER ACCIDENT. CAR TOWED TO REPAIR SHOP FOR BODY WORK ONLY. FEB 24 JUST AFTER CAR PICKED UP AT BODY SHOP, CAR WAS WAITING IN TRAFFIC TO MAKE LEFT TURN, FOOT ON BRAKE, ENGINE ACCELERATED UP TO 7000 RPM AGAIN, CAR TURNED OFF, TOWED BACK TO TOYOTA DEALER. IT STILL SITS THERE TODAY, MARCH 15, DEALER WILL NOT LOOK AT CAR, NATIONAL TOYOTA TECH TEAM SAYS THEY WILL CALL TO SET UP APPOINTMENT TO LOOK AT CAR, MAYBE CALL THIS COMING WEEK, MAY NOT EVEN START LOOKING AT CAR FOR SEVERAL MORE WEEKS. WE HAVE NOT HAD USE OF CAR FOR ONE MONTH, TOYOTA IS CONVINCED NOTHING IS WRONG, CAR IS NOT RECALLED, TOYOTA SEEMS DETERMINED TO PROVE CAR PROBLEM DID NOT CAUSE ACCIDENT, SHOW NO CONCERN FOR WHAT IS CAUSING PROBLEM. WE HAVE EXTENDED WARRENTY, BUT CAR IS NOT GETTING FIXED, WE CAN NOT GET RENTAL CAR WHILE CAR IS IN SHOP BECAUSE TOYOTA IS NOT BEING FIXED. CAR SEEMS TO BE EXCELLENT CANDIDATE FOR STUDIES, SINCE IT HAS HAD 3 SUDDEN ACCELERATIONS IN A SHORT TIME, TWO OF THEM INVOLVING FOOT ON BRAKE, NOT ACCELERATOR, POINTS TO SOFTWARE PROBLEM. TOYOTA ACTS LIKE THEY DO NOT WANT SOFTWARE PROBLEM TO BE FOUND.

**Location of Incident:** OLATHE, KS

**NHTSA Summary:**  
ON FEB. 13TH 2010 I EXPERIENCED A NEAR ACCIDENT DUE TO AN UNINTENDED SUDDEN ACCELERATION ON A 2008 TOYOTA RAV4. I INITIALLY RELEASED BRAKE AND HIT IT AGAIN AND VEHICLE STOPPED JUST SHORT OF A TOLL BOOTH BARRICADE. I LATER INVESTIGATED AND UPON RELATED SEARCH ON INTERNET CAME ACROSS THE SUDDEN UNINTENDED ACCELERATION PROBLEM. IN MY CASE I WAS PAYING A TOLL WHEN CAR ACCELERATED. I BELIEVE I HIT THE ACCELERATOR PEDAL AND BRAKE AT SAME TIME. I AM VERY CONCERNED THAT THE NHTSA HAS NOT MANDATED A BRAKE OVERRIDE FOR ALL SMALL VEHICLES WHERE PEDAL ERROR CAN EASILY OCCUR. I BELIEVE THE MAJORITY OF SUA INCIDENTS I HAVE LOOKED AT THAT SERIOUS (SUDDEN), THAT PEDAL ERROR IS BEING UNDER REPORTED AS MOST DRIVERS DENY IT. I AM NOT. BUT IS IS SERIOUS HUMAN FACTORS ISSUE IN ALL SMALL CARS DRIVEN BY LARGE AMERICANS.

**Location of Incident:** BATTLE CREEK, MI

**NHTSA Summary:**  
I HAVE A 2002 LEXUS ES300. MY CAR AT SLOWER SPEEDS HAS BEEN JERKING/SURGING AT LOWER SPEEDS AND LURCHES FORWARD WITHOUT NOTICE. IT IS A NIGHTMARE TO DRIVE THIS CAR IN TRAFFIC. I KEEP BEING TOLD ITS NORMAL, IT SEEMS HUNDREDS OF OTHERS HAVE COMPLAINED, BUT I'M NOT GETTING ANYWHERE. THE LEXUS DEALERSHIP DID A SOFTWARE UPGRADE RECENTLY, IT ONLY MADE THE MATTER WORSE. I HATE DRIVING THIS CAR, EVERYONE IN MY FAMILY AVOIDS DRIVING IT, AS WE JUST DONT FEEL COMFORTABLE IN THE WAY IT ACCELERATES AND SHIFTS GEARS. ITS A 2002 MODEL, WITH 49K MILES. I AVG 25K MILES A YEAR DRIVING, DO THE MATH, THIS CAR SUCKS, AND I AVOID USING IT OUT OF FEAR/ANNOYANCE.

**NHTSA Summary:**  
I AM THE OWNER OF A 2006 TOYOTA TACOMA THAT WAS INVOLVED IN A ROLL OVER ACCIDENT ON 2/14/2010. MY SON MICHAEL WAS DRIVING THE VEHICLE WITH 2 PASSENGERS ON A CHURCH OUTING. THEY WERE STOPPED AT A TRAFFIC LIGHT WAITING TO TURN. WHEN THE LIGHT CHANGED HE SAID HE TRIED TO ACCELERATE BUT THE PEDAL DID NOT RESPOND. THE SECOND TIME HE TRIED THE VEHICLE TOOK OFF. AS HE TRIED TO ROUND THE CORNER, THE VEHICLE KEPT ACCELERATING, HE TRIED TO BRAKE BUT THEY DID NOT RESPOND. HE LOST CONTROL OF THE VEHICLE AND HIT THE CURB ON THE ADJACENT SIDE OF THE ROAD AND BECAME AIRBORN. THEY WENT DOWN AN EMBANKMENT AND ROLLED. THERE WAS ANOTHER VEHICLE OF YOUNG ADULTS TRAVELING WITH THEM, AND IN THE LANE NEXT TO THEM ON THEIR LEFT. THEY SAW THE WHOLE THING AND SAID THEY COULD HEAR THE ENGINE RACING. WHEN THE GOT TO THE VEHICLE, THEY WERE ABLE TO GET EVERYONE OUT AND MY SON JUST KEPT SAYING "WHAT THE HELL HAPPENED". THEY WERE ALL TREATED AND RELEASED WITH MINOR INJURIES. THIS VEHICLE WAS IN THE TOYOTA RECALL FOR FLOOR MATS. I DID NOT HAVE TOYOTA MATS IN THE TRUCK, I HAD VERY HEAVY RUBBER MATS. I BELIEVE THIS VEHICLE EXPERIENCED THE ACCELERATOR PEDAL ISSUE THAT HAS CAUSED HUNDREDS OF OTHER CRASHES. WE ARE JUST FORTUNATE NO ONE WAS SERIOUSLY HURT.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** BRICK, NJ

**NHTSA Summary:**

I OWN A 2007 TOYOTA TACOMA DOUBLE CAB 4X4 PICK-UP TRUCK. I HAVE BEEN EXPERIENCING THE FOLLOWING SITUATION : WHEN STOPPED IN TRAFFIC MY FOOT ON THE BRAKE WITH EITHER THE HEATER , FAN , OR AC ON ( ONE OF THESE COMPONENTS ON ) THE ENGINE WILL PERIODICALLY SURGE AND YOU CAN FEEL THE TRUCK WANT TO MOVE FORWARD - IT SOMETIMES FEELS LIKE SOMEONE TAPPED ME FROM BEHIND, MY FOOT ON THE BRAKE PEDAL STOPS THE TRUCK FROM MOVING FORWARD. THIS ONLY OCCURS WHEN ONE OF THE ABOVE MENTIONED COMPONENTS IS BEING USED. IT SEEMS TO BE ASSOCIATED WITH ENGAGING THE ABOVE MENTIONED ITEMS. I HAD LAKEWOOD TOYOTA OF NJ CHECK IT OUT HOWEVER THEY WERE UNABLE TO REPRODUCE THE COMPLAINT AT SO THEY SAY. IM VERY CONCERNED ABOUT THIS SITUATION BECAUSE OF THE RECENT SAFETY RECALLS. MAYBE THERE IS A PROBLEM MECHANICALLY OR WITH THE SOFTWARE. THIS PROBLEM OCCURRED IMMEDIATELY WHEN THE VEHICLE WAS NEW AND CONTINUES TODAY AT 40,000 MILES. PLEASE LOOK INTO THIS AND ADVISE ME ON WHAT TO DO. \*TR

**Additional Summary:**

**Toyota ID Number:**

**NHTSA ODI Number:** 10310778  
**Date of Incident:** 20100215  
**Vehicle:** 2010 TOYOTA TACOMA  
**Location of Incident:** MOUNT JULIET, TN

**NHTSA Summary:**

THE VEHICLE SURGES UNEXPECTEDLY. ONE OR MORE TIMES A DAY, DEPENDING ON TRAVEL NEEDS, I EXPERIENCE SURGES BOTH AT COMPLETE STOPS AND WHEN ACCELERATING. DEPRESSING THE ACCELERATOR PEDAL FROM A STOP OR ROLL INCLUDES A "DELAY" IN RESPONSE FROM THE VEHICLE, THEN THE UNEXPECTED SURGE IS NOTICED. GENERALLY, A SMALL AMOUNT OF PRESSURE ON THE PEDAL DOES NOT YIELD A DESIRED ACCELERATION EFFECT, INSTEAD A "WAIT AND GO" EFFECT IS EXPERIENCED. SEVERAL TIMES, THIS DELAY HAS CAUSED NEAR MISSES IN TERMS OF ACCIDENTS. EXPECTING THE VEHICLE TO RESPOND TO ACCELERATOR PRESSURE BUT NOT GETTING ACCELERATION IS CONSIDERED HAZARDOUS. SURGING FORWARD VIOLENTLY WHEN AT A COMPLETE STOP IS ANOTHER CONCERN. WITH THE BRAKES COMPLETELY DEPRESSED, THE VEHICLE WILL SURGE FORWARD AT MOST TRAFFIC LIGHTS OR DURING STOP AND GO TRAFFIC. THIS VEHICLE WAS BROUGHT TO THE DEALER A WEEK AFTER PURCHASE WITH MY CONCERNING OF SHIFTING AND SOMETIME ERRATIC BEHAVIOR. THE DEALERSHIP DID LITTLE MORE THAN TAKE A SHORT TEST DRIVE WITH ME (NO DIAGNOSTICS, NO FORMAL OR MECHANICAL EVALUATION), AND TELL ME NOTHING WAS WRONG WITH THE TRUCK. THE TRUCK HAD LESS THAN 1000 MILES ON IT, NOW WITH 2600 MILES, THE PROBLEMS PERSIST. \*TR

**Additional Summary:**

**NHTSA Summary:**

ON FEBRUARY 15, 2010, I DROVE MY 2010 TOYOTA COROLLA FOR A SHORT ERRAND NEAR MY HOME. I STOPPED AT A RED LIGHT. WHEN THE LIGHT TURNED GREEN, I PROCEEDED TO MAKE A RIGHT TURN. TO KEEP THE CAR UNDER CONTROL, I GENTLY PRESSED ON THE ACCELERATOR A LITTLE THEN PRESSED GENTLY ON THE BRAKE. WHEN I REMOVED

C-1977

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

MY FOOT FROM THE BRAKE TO RETURN TO NORMAL SPEED, THE CAR IMMEDIATELY ACCELERATED WITHOUT MY TOUCHING THE ACCELERATOR. I PUSHED HARD ON THE BRAKE AND STOPPED THE CAR. THEN THE CAR RETURNED TO NORMAL OPERATION. ALL THIS OCCURRED WITHIN 10 MINUTES OF LEAVING MY HOME. AT NO TIME DID I GO MORE THAN 25MPH. THE PAVEMENT WAS DRY. THE CAR HAS LESS THAN 250 MILES ON THE ODOMETER. NO, I HAVE NOT RECEIVED ANY LETTER FROM TOYOTA ABOUT THE RECALL AFTER THE INCIDENT. I CALLED THEIR CUSTOMER SERVICE IN CA. THEIR RESPONSE, OOPS I SHOULD HAVE GOTTEN A LETTER BUT ADMITTED NONE WAS SENT. THEY WILL CONTACT MY DEALER. 2 OBSERVATIONS ABOUT THE EXPERIENCE, IF MY HARD BRAKING DID NOT WORK THE CAR WOULD HAVE KEPT ACCELERATING. THE SURGE WAS POWERFUL. ALSO, THE ENGINE DID NOT REV, THE CAR JUST SEEMED TO GET A SIGNAL TO ACCELERATE TO A CERTAIN SPEED. YES, THE EXPERIENCE WAS SCARY AND DANGEROUS. BEFORE, I WAS WILLING TO GIVE TOYOTA THE BENEFIT OF THE DOUBT, BUT IT'S HARD TO SEE HOW MY GAS PEDAL WOULD GET STUCK AFTER 240 DRIVEN MILES. PLEASE, DO YOUR JOB. TOYOTA SHOULD PERMANENTLY TAKE BACK ANY CARE EXPERIENCING THIS ACCELERATION. THESE CARS SHOULD BE PERMANENTLY OFF THE ROAD. \*TR

**Toyota ID Number:**

**NHTSA ODI Number:** 10311569  
**Date of Incident:** 20100215  
**Vehicle:** 2010 TOYOTA COROLLA  
**Location of Incident:** MCKEES ROCKS, PA

**NHTSA Summary:**

MULTIPLE INCIDENTS... THE THREE MOST RECENT OCCURRED ON 2/8, 2/10, AND 2/15 OF 2010. THIS PROBLEM HAS BEEN HAPPENING SINCE WE PURCHASED THE CAR. I FIGURED IT WAS JUST BECAUSE IT WAS A NEW VEHICLE AND NEEDED DRIVEN (BROKEN IN) SO THE BRAKES WOULD FIND THEIR BEST WORKING LEVELS. THE PROBLEM OCCURS WHEN DRIVING, AT ANY SPEED, AND IN ALL ROAD CONDITIONS. THE INCIDENT ON 2/8 MY WIFE WAS DRIVING AND ONLY GOING ABOUT 5-8 MPH. AS SHE MADE A TURN THE CAR PROCEEDED TO SHUTTER AND THE LOW TRACTION LIGHT AGAIN CAME ON, NO BRAKING WAS AVAILABLE DURING THIS INCIDENT, BUT LUCKILY SHE WAS ABLE TO COME TO A STOP BEFORE HITTING ANOTHER VEHICLE. ON 2/10 I WAS GOING TO TAKE THIS CAR TO FINALLY HAVE THEM FIX THE PROBLEM AND IN (VERY SAFE) GOOD DRIVING CONDITIONS I EXPERIENCED WHAT MY WIFE HAD EXPLAINED THAT THE CAR HAS BEEN DOING FOR THE BETTER OF 6 MONTHS. AS YOU PROCEED TO COME TO A STOP THE CAR ACCELERATES UPON DEPRESSING THE BRAKE PEDAL. WHEN THIS HAPPENS (I HAVE TESTED THIS) IF YOU KEEP THE PEDAL AT THE SAME POINT THE CAR WILL CONTINUE TO SPEED UP SLOWLY, BUT IF YOU TAKE YOUR FOOT OFF THE BRAKE THE CAR SEEMS TO MAINTAIN THE SPEED. NOW THIS IS WHERE MY WIFE WILL NOT DRIVE THE CAR ANY LONGER, WHEN YOU PRESS THE BRAKE FURTHER DOWN TO STOP IT LOCKS THE TIRES FOR ABOUT A SECOND BEFORE THE ABS EVEN KICKS IN. BEING THAT THIS IS A COLD AREA AND WE LIKELY HAVE SNOW DURING THE WINTER MONTHS I AM AMAZED THAT IF ANY OTHER COROLLA ARE HAVING THIS PROBLEM THEY ALL HAVE NOT SLID OFF THE ROAD. WHEN I EXPERIENCED THIS PROBLEM ON 2/10 I WAS GOING TO TAKE IT TO TOYOTA FOR SERVICE. NEVER MADE IT, DID NOT TRUST THE VEHICLE TO SAFELY GET ME TO MY DESTINATION WITHOUT INJURY TO MYSELF, OTHERS, OR PROPERTY. THE LAST INCIDENT ON 2/15 WAS THE SAME PROBLEM, AND AT THIS POINT MY WIFE WILL NO LONGER DRIVE THE CAR. THIS IS THE VEHICLE WE PURCHASED TO KEEP OUR NEWBORN SAFE... LOOKS TO HAVE BEEN A POOR CHOICE. I FINALLY RISKED MY LIFE AND TOOK IT TO TOYOTA TONIGHT, WE WILL SEE WHAT COMES OF THIS. THANKS \*TR

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** CENTERVILLE, MA

**NHTSA Summary:**

I HAVE A 2008 RAV4. IT HAS BEEN ACCELERATING ON A SMALL SCALE FOR THE LAST THREE MONTHS. I TOOK IT IN TO MY DEALER AND WAS TOLD THAT MY PARTS WERE MADE IN JAPAN AND NOT NORTH AMERICA. AND THEY FOUND NOTHING ABOUT A WEEK LATER MY HUSBAND, DAUGHTER-IN-LAW AND GRANDAUGHTER WERE HEADED TO A HOCKEY GAME. I WAS DRIVING, WE WERE COMING UP ON A RED LIGHT WHEN I STARTED TO APPLY THE BRAKES, AT THE SAME TIME THE VEHICLE STARTED TO ACCELERATE. THIS WAS MUCH MORE THAN HAD HAPPENED BEFORE. I STOOD ON THE BRAKE AND FLEW THROUGH THE REDLIGHT, I SCREAMED FOR MY HUSBAND TO PUT IT IN NEUTRAL, HE HAD TROUBLE DOING SO. I THOUGHT WE WERE ALL DEAD. THE PERSON THAT HAD THE GREEN LIGHT MUST HAVE SEEN WE WERE HAVING A PROBLEM, AS HE STOPPED TO LET US RACE THROUGH. IT SLOWED AFTER A BIT, AND WENT BACK TO NORMAL. WHEN WE WERE ACCELERATING I NOTICED THE RPM'S TO BE OVER 3. I COULDN'T WATCH IT THAT CLOSELY FOR FEAR I WOULD COMPLETELY LOSE CONTROL OF THE VEHICLE. WE RETURNED THE VEHICLE TO THE DEALER AND WAS TOLD THAT WE WOULD HAVE TO CALL CALIFORNIA AND PUT IN A COMPLAINT. WE DID THAT AND WERE GIVEN A CASE NUMBER. AFTER FOUR DAYS OF NO RETURN CALL WE CALLED THE DEALER AND ASKED FOR AN UPDATE AS TO WHAT WOULD GO ON NOW. THEY SAID THAT SOMEONE WOULD HAVE TO COME AND INSPECT THE VEHICLE, I ASKED IF WE COULD HAVE A LOANER AND I WAS TOLD NOT UNTIL TOYOTA DECIDES THERE IS A PROBLEM. MY CAR HAS BEEN IN THE DEALERS HANDS FOR A WEEK TODAY AND WE HAVE NO CAR. ALTHOUGH TOYOTA REPS HAVE BEEN PLEASANT, WE DON'T FEEL THAT THEY REALLY KNOW WHAT IS GOING ON. WE HAVE BEEN TOLD THAT IT WILL BE INSPECTED TOMORROW. WE WILL WAIT FOR THE CALL, BUT WILL NOT RECEIVE THE CAR UNTIL IT IS FIXED AND THERE IS A GUARANTEE THAT IT WON'T DO IT AGAIN. I WILL NOT KILL MYSELF OR ANYONE ELSE BECAUSE OF THIS ISSUE.

**NHTSA ODI Number:** 10315788  
**Date of Incident:** 20100215  
**Vehicle:** 2008 TOYOTA RAV4  
**Location of Incident:** NEW HAMPTON, NH

**NHTSA Summary:**  
I AM THE OWNER OF A 2008 RAV4. I WAS TRAVELING WITH CRUISE CONTROL AT 50 MPH AS I APPROACHED A DOWN GRADE TOWARD A TRAFFIC LIGHT I MANUALLY TOOK THE CAR OUT OF CRUISE CONTROL EXPECTING TO SLOW SOME. I REALIZED THAT I NEEDED TO SLOW MORE AND APPLIED THE BRAKE PEDAL. HOWEVER, I COULD FEEL THE CAR FIGHTING THE BRAKES. I PUT THE CAR INTO NEUTRAL AND WAS ABLE TO STOP FOR THE LIGHTS. WHEN I DID THIS THE ENGINE WAS RACING WHILE STOPPED. WHEN THE LIGHT CHANGED I PUT THE RACING ENGINE INTO DRIVE. I JERKED FORWARD AND HAS BEEN OK SINCE. I REPORTED THIS TO THE DEALER. I WAS TOLD THAT ANOTHER OWNER OF THE SAME YEAR AND MODEL REPORTED A SIMILAR EVENT THAT DAY. THIS IS DIFFERENT THAN THE RUNAWAY CARS REPORTED IN THE NEWS, AS THE CAR DID NOT ACCELERATE TO MAX SPEED. TOYOTA SEEMS NOT TO BE RESPONDING TO CARS MADE BEFORE 2009. I THINK THIS IS A COMPUTER PROBLEM WHERE THE CRUISE CONTROL DID NOT TURN OFF AND THE STEPPING ON THE BRAKES DID NOT TAKE IT OUT OF CRUISE CONTROL EITHER. ON FEB 19 I REPORTED THIS TO THE TOYOTA DEALER AND WAS TOLD THAT ANOTHER PERSON HAD REPORTED THIS SAME TYPE OF THING THAT SAME DAY. THEY LOOK FOR ERROR CODES BUT FOUND NONE.

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** FRISCO, TX

**NHTSA Summary:**  
MY 2007 TOYOTA CAMRY IS DANGEROUS AND DEFECTIVE. I HAVE BEING SAYING SINCE MY FIRST MAINTENANCE CHECK AT THE DEALER THAT THE CAR DOESN'T SEEM TO BE WORKING THE WAY IT SHOULD. NOW IT HAS BEEN RECALLED FOR A "STICKY PEDAL". THE PROBLEMS I HAVE ARE NOT A STICKY PEDAL PROBLEM. THE CAR LURCHES AT TIMES WHEN ACCELERATING. IT LURCHES FORWARD FROM STOPS. I HAVE ALREADY HIT A CURB BECAUSE OF IT JUST A COUPLE OF WEEKS AGO. I HAVE VIDEO FOOTAGE OF THE ROAD AND THE DAMAGE TO THE CAR FROM HITTING THE CURB. I CAN EMAIL YOU THE

C-1982

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

VIDEO FOOTAGE. THE CAR ALSO SEEMS TO DRIFT MOMENTARILY AS IF THERE IS A STEERING SYNCHRONIZATION LAPSE DEFECT. WHEN I MENTIONED THESE BOTH TO THE DEALER A YEAR AGO, THE DEALER'S SERVICE TECH SAID IT WAS JUST THE SAFETY FEATURE OF THE CAR WORKING PROPERLY. THERE ARE SPLIT SECONDS WHEN THE STEERING WHEEL DOES NOT CONTROL THE CAR WHILE IT IS DRIVING. THIS ALL SEEMS TO HAPPEN RANDOMLY. I WONDER IF TOYOTA PROGRAMMED THE CAR TO DO THIS ON PURPOSE TO INCREASE THE NUMBER OF TIMES I WOULD NEED TO HAVE THE CAR SERVICED. THE DEALERSHIP HAS SO FAR REFUSED TO TAKE THE CAR BACK AND CANCEL MY LEASE. SO I AM STILL DRIVING THIS UNPREDICTABLE CAR EVERY DAY. THERE IS SOMETHING WRONG WITH THIS CAR.

**NHTSA Summary:**

PROBLEM: 2010 TOYOTA 4 DR CAMRY: -VIN# 4T1BF3EK4AU536166 I AM 81 YEARS OLD. AFTER CHECKING WITH THE NEW JERSEY DEALER WHERE I BOUGHT THE THIS CAR 51/2 MONTHS AGO, I WAS TOLD MY VIN # WAS OK FOR NO PROBLEM WITH THE GAS PEDAL STICKING, BUT I SHOULD GO IN FOR THE MAT/GAS PEDAL PROBLEM. I DID & WAS TOLD IT WAS DONE. ON 2/16, I WAS PULLING INTO A SPOT AT CVS. I TOOK MY FOOT OFF OF THE GAS PEDAL AND STARTED TO PUT THE FOOT ON THE BRAKE WHEN THE CAR SUDDENLY FLEW UP FORWARD OVER THE CEMENT CURB AND INTO THE DIRT AND BUSHES WHICH, THANK GOD STOPPED THE CAR. I WILL NEVER GET BACK INTO MY 2010 TOYOTA CAMRY AGAIN. THEY HAULED THE CAR TO THEIR DEALERSHIP AND GOT ME A HONDA RENTAL. I MADE AN APPOINTMENT WITH RANDY OLLILA, GENERAL MGR. HE TOLD ME SO FAR THEY HAD NOT BEEN ABLE TO FIND ANYTHING IN THE CAR. I TOLD HIM I WOULD NEVER DRIVE THAT CAR AGAIN AND MY SONS HAD TOLD ME NO MATTER WHAT THESE PEOPLE SAID I WAS NOT TO DRIVE IT. I EXPLAINED ALONG WITH NEVER BEING ABLE TO DRIVE THAT CAR AGAIN I WOULD NOT NOW PURCHASE ANOTHER TOYOTA. HE TOLD ME THEY COULD GIVE ME \$17,000. REFUND LEAVING ME TO EAT \$10,916. ON A CAR I HAVE HAD FOR 5 1/2 MONTHS AND HAD ONLY 2,091 MILES ON IT. I WAS TOLD TO TALK TO SOMEONE AT THEIR CORPORATE OFFICE IN CA AND THEY OFFERED ME NOTHING BUT A SLICK 6YOUR WORD AGAINST MINE 6 NOTHING HELP. I COULD SEE THE WRITING ON THE WALL. I WENT OUT THE NEXT DAY, BOUGHT A FORD FUSION AND DROVE AWAY IN MY NEW CAR. I AM CONTACTING YOU NOT ONLY BECAUSE TOYOTA DID NOT TRY TO ASSIST ME WITH MY PROBLEM, BUT ALSO I HAVE BEEN HAVING NIGHTMARES ABOUT THE THOUSANDS OF PEOPLE WHO WOULD TOLD THEIR VIN # HAD NO GAS PEDdle PROBLEM AS I HAD BEEN TOLD AND MAY FIND OUT THAT IS NOT TRUE - AS I DID.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I DRIVE A 2009 SCION XB. AT LEAST SIX TIMES SINCE I BOUGHT IT IN LATE 2008, I HAVE HAD TROUBLE WITH SUDDEN UNINTENDED ACCELERATION. AT ALL TIMES THE CAR WAS MOVING LESS THAN 30 MILES AN HOUR. IT OCCURED ONCE WHILE SLOWING DOWN FOR A LIGHT ABOUT TO GO GREEN. I STILL MADE A SOFT HIT ON THE CAR IN FRONT. A SECOND TIME IT HAPPENED WHILE EASING UP TO THE IMMIGRATION BOOTH ON THE QUEENSTON-LEWISTON BRIDGE TO CANADA. I AGAIN MADE OF SOFT HIT ON THE CAR IN FRONT. TWICE AFTER THAT WHILE I WAS GOING UNDER TWENTY MPH IT SUDDENLY ACCELERATED BUT I WAS ABLE TO STOMP THE BRAKE HARD ENOUGH TO STOP IT. I DID NOT SLIP OFF THE BRAKES, ALTHOUGH I WAS INITIALLY WILLING TO ACCEPT THAT RESPONSIBILITY. LAST MONTH I TOOK MY CAR TO WHERE I BOUGHT IT, HOSELTON AUTO MALL IN EAST ROCHESTER, NY. I WAS TOLD THAT THE MECHANICS HAD DRIVEN IT TWICE AND FOUND NOTHING WRONG. I WAS GIVEN THE IMPRESSION THAT I WAS AN HYSTERICAL FEMALE THOUGH NO ONE CAME OUT AND SAID IT. AND THIS MODEL HAS NOT BEEN REPORTED TO BE IN NEED OF RECALL BY TOYOTA. I HAVE TO DRIVE IT. I CAN'T AFFORD TO TAKE THE LOSS OF SELLING IT AND THE DEALERSHIP MADE ME FEEL THAT IT WAS SOMETHING WITHIN THEIR VENUE, SO IT MUST BE MY FAULT. I'VE BEEN VERY LUCK BUT I HAVE ALSO BECOME MORE THAN A LITTLE SCARED. I WANT TO BE ON RECORD WITH YOUR DEPARTMENT IF, GOD FORBID, ANYTHING ELSE OF THIS NATURE OCCURS.

**Location of Incident:** BEDFORD, MA

**NHTSA Summary:**  
UNINTENDED ACCELERATION IN COLD WEATHER: THIS HAS BEEN A PROBLEM SINCE I FIRRSST BOUGHT THE CAR NEW IN 2007 ( 2007 TOYOTA CAMRY LE 4 CYL ENGINE, AUTOMATIC TRANSMISSION). THIS OCCURS DURING COLD WEATHER ( LESS THAN 30 F) AND DURING THE FIRST 20 MINUTES OF DRIVING. PROBLEM DESCRIPTION: WHEN I AM DRIVING WITH LIGHT PRESSURE ON THE ACCELERATOR AND REMOVE MY FOOT TO SLOW DOWN, THE CAR ABRUPTLY SLOWS DOWN AFTER 1 TO 2 SECONDS (TACHOMETER DROPS FROM 1800 RPM TO 1000 RPM) AND MAKES A CLUNKING SOUND. AFTER 1 TO 4 SECONDS, WITHOUT TOUCHING THE ACCELERATOR PEDAL, THE CAR WILL THEN SPEED UP ( ANOTHER CLUNKING SOUND FROM THE DRIVE TRAIN). THE TACHOMETER JUMPS FROM 1000 TO 2000 RPM APPROXIMATELY. THIS OCCURS IN ALL GEARS AND IS SEVERE IN 3RD GEAR WHEN I TAKE MY FOOT OFF THE ACCELERATOR AND BEGIN TO BRAKE. THE RESULT OF THIS MALFUNCTION IS IMMEDIATE SKIDDING ON ICE OR SNOW COVER SURFACES. IF I AM IN A TURN, THE CAR WILL START SKIDDING IN AN UNCONTROLLED MANNER. I LIVE IN NEW ENGLAND SO THE ROADS ARE OFTEN SLICK IN WINTER. I HAD REPROTED THIS TO SERVICE SHORTLY AFTER BUYING THE CAR AND WAS TOLD IT'S NORMAL, THEY CAN'T REPRODUCE THE PROBLEM, THEY HAVE NO DAIGNOSTIC FAULTS, THEY CAN'T FIND MY SERVICE RECORDS, ETC. I AM REPORTING THIS BECAUSE THIS COULD CAUSE SLIDING ACCIDENTS IN WINTER WEATHER AND MAY HAVE CAUSED ACCIDENTS IN THE PAST, PARTICULARLY WITH PEOPLE WHO ARE NOT PREPARED FOR THIS EVENT.

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2007 TOYOTA CAMRY. THE CONTACT WAS DRIVING APPROXIMATELY BETWEEN 30-35 MPH ON NORMAL CONDITIONS. THE "CRUISE CONTROL WARNING LIGHT ILLUMINATED ON THE INSTRUMENT PANEL. THERE WERE SEVERAL ATTEMPTS OF BRAKING AND THE WARNING INDICATOR REMAINED ILLUMINATED UNTIL THE ENGINE WAS TURNED OFF. THE FAILURE OCCURRED INTERMITTENT. IN ADDITION, THERE WAS AN INCREASE OF ACCELERATION UNEXPECTEDLY. THE VEHICLE WAS TAKEN TO AN AUTHORIZED DEALER. THERE WAS A RECALL UNDER NHTSA CAMPAIGN ID NUMBER 10V017000 (VEHICLE SPEED CONTROL/ACCELERATOR PEDAL). THE VEHICLE WAS REPAIRED FOR THE RECALL DEFECT. THE TECHNICIAN WAS UNABLE TO LOCATE THE ELECTRICAL MALFUNCTION WITH THE WARNING INDICATOR. THE VIN WAS UNAVAILABLE. THE FAILURE MILEAGE WAS 69,000.

**Date of Incident:** 20100217  
**Vehicle:** 2006 TOYOTA HIGHLANDER  
**Location of Incident:** GAINESVILLE, FL

**NHTSA Summary:**  
I HAD A 2006 TOYOTA HIGHLANDER HYBRID. IN FEBRUARY OF 2007, I TOOK IT TO THE LOCAL DEALERSHIP BECAUSE I HAD EXPERIENCED THE CAR SURGING/ACCELERATING UPON BRAKING AND WAS UNPREDICTABLE AS TO WHEN IT MAY OCCUR. THE TECH DIDN'T EXPERIENCE THIS ISSUE/ALSO RAN DIAGNOSTICS WHICH CAME BACK AS "NO CODES FOUND". SINCE I CONTINUED TO EXPERIENCE THIS ISSUE, AND AFTER LEARNING OF SIMILAR ISSUES OCCURRING IN OTHER TOYOTA MODELS AND NOW THE RECALLS, I TOOK IT BACK, AND AGAIN THEY WERE UNABLE TO DIAGNOSE THE ISSUE AND GOT THE SAME "NO CODES FOUND" WHEN DIAGNOSTICS WERE APPLIED. AFTER THESE EXPERIENCES, AND READING ABOUT OTHER 2006 HIGHLANDER HYBRID ISSUES, I DECIDED I NO LONGER FELT SAFE DRIVING MY VEHICLE AND SINCE THE DEALERSHIP WAS UNABLE TO REPAIR THIS ISSUE, EVEN WHILE UNDER WARRANTY, I DECIDED TO TRADE MY VEHICLE.

**Location of Incident:** LEBANON, NH

**NHTSA Summary:**  
I AM WRITING BECAUSE I JUST EXPERIENCED SUDDEN ACCELERATION IN REVERSE IN MY NEW 2010 TOYOTA RAV4, 6 CYLINDER. THIS IS A VEHICLE I WAS TOLD BY THE DEALER WAS NOT AFFECTED BY THE RECALL. HERE ARE THE DETAILS: 1 PURCHASED THE VEHICLE ABOUT A MONTH AGO FROM IRVIN TOYOTA IN NEW HAMPSHIRE WITH VIN# JTM0K40Y6A013130. I HAD CONTACTED THE DEALER BEFORE THE CAR WAS DELIVERED TO SEE WHAT THE RECALL MEANT FOR ME. THEY SAID THAT THE VEHICLE WAS MADE IN JAPAN AND WAS NOT AFFECTED BY THE RECALL. ON FEBRUARY 17TH I PUT THE RAV4 INTO REVERSE TO BACK DOWN MY DRIVEWAY. I WAS CUTTING THE WHEEL TO THE LEFT TO MAKE A REVERSE K-TURN WHEN IT BEGAN ACCELERATING VIGOROUSLY IN REVERSE. I DID NOT HAVE MY FOOT ON THE GAS BECAUSE IT WAS IDLING IN REVERSE DOWN A 7% GRADE. THE ENGINE RACED WAY UP AND IT TOOK ALL MY LEG POWER TO BRING IT TO A STOP. I DID STOP THE CAR JUST BEFORE HITTING A TREE ON THE SIDE OF MY DRIVEWAY. I HAD MY WIFE AND MY INFANT SON IN THE CAR

C-1992

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AND THEY WERE BOTH TERRIFIED. WHEN I CALLED THE DEALER THE SERVICE MANAGER SAID HE WOULD BE HAPPY TO LOOK AT IT, BUT THAT IT WAS PROBABLY HIGH IDLE. I HAVE DEGREE IN PHYSICS AND ELECTRICAL ENGINEERING AND I OWN A COMPANY THAT BUILDS ACCELERATION SENSORS FOR VEHICLES. THIS CAR HAS A SERIOUS, POTENTIALLY DEADLY PROBLEM WITH ONE OF ITS SENSORS OR WITH ELECTRICAL INTERFERENCE CAUSING THE COMPUTER TO MISINTERPRET THE SENSOR DATA. THERE IS NO WAY A DEALER IS GOING TO FIND THIS, LET ALONE FIX IT. WHAT CAN I DO AT THIS POINT?

**Additional Summary:**

**Date of Incident:** 20100217  
**Vehicle:** 2005 TOYOTA AVALON  
**Location of Incident:** OVERLAND PARK, KS

**NHTSA Summary:**

ON FEB. 11, 2010 I TOOK MY TOYOTA AVALON IN FOR THE ACCELERATOR RECALL. ON FEB. 17, 2010 I WAS PULLING INTO A PARKING SPACE ON THE GROUNDS OF THE ELEMENTARY SCHOOL I WORKED AT THAT DAY WHEN MY CAR ACCELERATED. IT JUMPED THE CURB SIDESWIPING MY CAR WITH A CAR THAT WAS PARKED ON MY RIGHT. AFTER IT HIT THE GROUND FROM JUMPING THE CURB IT ACCELERATED AGAIN HEADING STRAIGHT TOWARD THE SCHOOL BUILDING. I PUT TWO FEET ON THE BRAKE AND PRESSED AS HARD AS I COULD. THE CAR DID STOP. THE CAR WAS TOWED BY AAA TO A TOYOTA DEALER IN FORT SMITH, AR (WHERE THE ACCIDENT OCCURRED). I BOUGHT THE CAR AT MOLLE TOYOTA IN KC, MO WHERE I LIVE (OVERLAND PARK, KS). THE INSURANCE ADJUSTOR CAME THAT DAY TO CHECK THE DAMAGE. HE SAID AN INVESTIGATOR WOULD BE OUT TO CHECK IT THE "CAUSE OF IMPACT". AS OF NOW, THAT HAS NOT HAPPENED. MY INSURANCE COMPANY KEEPS TELLING ME TO TAKE THE CAR BACK TO KC FOR REPAIRS AND I TOLD THEM I WILL NOT DRIVE AN UNSAFE CAR. I WILL NOT TOUCH THE CAR UNTIL SOMEONE INVESTIGATES THE REASON FOR THE ACCELERATION. I HAVE CALLED MY DEALER, WHO HAS BEEN WONDERFUL, TOYOTA CORPORATE WHO HAS BEEN HORRIBLE (THE FIRST THING "BARBARA" SAID TO ME WAS "WELL, WHAT DO YOU WANT ME TO DO ABOUT IT?") SHE RELUCTANTLY SAID SHE WOULD CHECK IT OUT. SHE CALLED THE TOYOTA DEALER IN FORT SMITH AND TOLD HIM THAT TOYOTA INSPECTORS WOULD BE OUT WITHIN 10 DAYS BUT DIDN'T KNOW WHEN. I CALLED THE HIGHWAY TRANSPORTATION SAFETY DEPT. WHO SAID THEY DIDN'T DEAL WITH THAT AND TO CALL MY KS ATTORNEY GENERAL. I CALLED THE ATTORNEY GENERAL WHO TOLD ME TO EMAIL THIS ADDRESS. SO... STATUS: MY CAR IS STILL IN FORT SMITH, AR

**Date of Incident:** 20100217  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** ANAHEIM, CA

**NHTSA Summary:**

TOYOTA CAMRY RECALL WAS "CORRECTED" LAST MONTH, AS TO THE ACCELERATOR PEDAL ISSUE. THE ACCELERATION NOW SEEMS MORE ERRATIC THAN BEFORE. I DO NOT BELIEVE IT WAS A PEDAL PROBLEM, RATHER AN ELECTRONIC ONE. I HAVE NOT TAKEN THE CAR ON THE OPEN ROAD BUT AM SCHEDULED TO DO SO SOON. I AM 72, IF I SHOULD HAVE A PROBLEM, I'M SURE THAT TOYOTA CORP. WOULD ATTRIBUTE IT TO MY AGE OR SOME OTHER EXCUSE. THE PEDAL IS NOT CONSISTENTLY RESPONSIVE ON ACCELERATION, SEEMS TO HAVE A DELAY AT TIMES, THEN SUDDENLY KICKS IN. IT IS INCONSISTENT ENOUGH THAT THE DEALER CAN TEST IT AND FIND NOTHING WRONG. I WOULD LIKE AN OUTSIDE EVALUATION BEFORE SOMETHING SERIOUS HAPPENS TO ME OR TO OTHER OWNERS IN THE SAME SITUATION.

**Vehicle:** 2003 TOYOTA COROLLA  
**Location of Incident:** LONDON, 00

**NHTSA Summary:**

2003 TOYOTA COROLLA LE AUTOMATIC TRANSMISSION 4 DOOR. FIRST TIME INCIDENT. WESTBOUND HIGHWAY 401 NEAR WOODSTOCK ONTARIO WITH CRUISE CONTROL @ 100 KMH IN RIGHT LANE AND SLIGHTLY ACCELERATED TO MIDDLE LANE TO AVOID MERGING INCOMING TRAFFIC FROM ROADSIDE GAS STATION. ACCELERATOR PEDAL WENT TO FLOOR WITHOUT DRIVER ASSISTANCE. STRONG BRAKING DID NOT STOP CAR. STOPPING ON ACCELERATOR DID NOT STOP CAR. TURNING OFF CRUISE CONTROL DID NOT STOP CAR. FASTEST SPEED WAS 150KMH @ 7500 RPM. SHIFTED INTO NEUTRAL AND WHEN SPEED AT 120KMH @ 4000 RPM, THE BRAKES STARTED WORKING. SLOWED AND PULLED OFF ONTO SHOULDER AND PARKED THE CAR. TWO MINUTES LATER, STILL IN PARK, IDLED AT 1900 RPM. ABLE TO DRIVE TO WORK. OVER THE PHONE, DAN FROM COMPETITION TOYOTA TOLD ME THAT PROBABLY THE THROTTLE BOX OR THROTTLE CABLE HAD BECOME GUMMED UP AND SHOULD HAVE BEEN CLEANED AS PART OF THE TOYOTA 60,000KM MAINTENANCE. I HAVE NOT USED TOYOTA DEALER TO SERVICE THE CAR DUE TO AFFORDABILITY. I DO HAVE A REGULAR MECHANIC WHO SERVICES THE VEHICLE. TOOK IT INTO COMPETITION TOYOTA AND PROBLEM WAS A DIRTY THROTTLE PLATE WHICH WAS CLEANED AT A COST OF \$70. DEALER ALSO DID A RECALL REPAIR ON A WINDOW AND SAID THERE WERE TOO MANY MATS ON THE DRIVERS SIDE WHICH SHOULD BE REMOVED. I TOLD DAN THAT DRIVER MATS WERE NOT THE CAUSE AND IN THE PRESENCE OF WANDA AND LORI, TWO TOYOTA EMPLOYEES, I SHOWED HIM PHOTOS THAT I TOOK OF THE DASHBOARD JUST AFTER I PULLED OFF THE HIGHWAY. I ASKED IF THE CAR WAS SAFE TO DRIVE, HE SAID YES, AND I HAVE BEEN DRIVING THE CAR SINCE. REPORTED THIS INCIDENT TO TRANSPORT CANADA - MATT WATSON IS THE CONTACT.

**Date of Incident:** 20100218  
**Vehicle:** 2008 TOYOTA HIGHLANDER HYBRID  
**Location of Incident:** FAIRFAX, VA  
**NHTSA Summary:**  
ACCELERATOR PEDAL STICKING - TOYOTA HIGHLANDER HYBRID 2008 (NOT RECALLED) ON 2/18/10, MY ACCELERATOR GOT STUCK WHILE DRIVING. I HAVE BEEN DRIVING FOR 30 YEARS, AND I KNOW HOW TO DRIVE, SO PLEASE SPARE ME TOYOTA! ALSO, MY CAR IS NOT EVEN ON THE RECALL LIST YET!!!! I ACCELERATED QUICKLY FROM A STOPPED POSITION. ONCE THE ACCELERATOR WAS RELEASED, THE VEHICLE CONTINUED TO RACE. I HIT THE BREAK, PUT CAR IN NEUTRAL, AND THE VEHICLE STOPPED MOVING. ABOUT 3 SECONDS LATER, AND WITHOUT TOUCHING THE ACCELERATOR, (THE ACCELERATOR WAS NOT STUCK TO THE MAT, AND IN ITS RELEASED POSITION) I PUT THE CAR BACK INTO DRIVE. THE CAR ONCE AGAIN BEGAN TO RACE FORWARD. I PUT THE CAR IN NEUTRAL AGAIN (IT STOPPED ONCE AGAIN), WAITED 20 SECONDS, AND BACK IN DRIVE, IT WAS THEN OK. THE PEDAL DID NOT GET STUCK TO THE FLOOR MAT AS TOYOTA CLAIMS COULD HAPPEN. THE FLOOR MAT IN MY CAR WAS NO WHERE NEAR THE PATH OF THE PEDAL. I WAS ABLE TO DRIVE THE CAR HOME, ALBEIT VERY CAREFULLY! THE SCARY PART, IS THAT TOYOTA DID NOT RECALL THIS VEHICLE FOR THIS PROBLEM! I BOUGHT THE CAR TO THE DEALER THE SAME DAY, AND THEY WERE A BIT NONCHALANT ABOUT THIS, AND ALSO TOLD ME THEY DID NOT FIND A PROBLEM, AND THERE WAS NOTHING THEY COULD DO ABOUT IT, WHICH REALLY CONCERNS ME! ALSO, MY CALL TO TOYOTA CORPORATION WAS TAKEN VERY LOOSELY, AND THEY DID NOT SEEM TO HAVE MUCH CONCERN, EXCEPT TO TELL ME TO REMOVE MY FLOOR MATS.

**NHTSA Summary:**  
I OWN A 2007 TOYOTA CAMRY AND WAS INVOLVED IN AN AUTO ACCIDENT TODAY. A PICKUP TRUCK BROADSIDED ME. AS SOON AS THE TRUCK HIT ME I HIT THE BRAKES. THE CAMRY DID NOT STOP AND INSTEAD QUICKLY ACCELERATED AND FISH TAILED OUT OF CONTROL. I FINALLY GAINED CONTROL OF THE STEERING BUT ENDED UP THREE LANES ACROSS FROM WHERE I WAS HIT AND INTO A GAS STATION HAVING TO DRIVE BETWEEN THE GAS PUMPS HOPING TO AVOID AN EXPLOSION. I HIT A PARKED CAR AT THE PUMP AND KEPT GOING ABOUT 5 TO 10 MORE FEET AND THE CAR FINALLY JUST STOPPED LIKE NOTHING HAPPEN. I COULD HAVE DIED TODAY! IT FELT LIKE I WAS DRIVING ON ICE OR LIKE SOMEONE FLOORED THE GAS PEDAL. I HAD NO CONTROL OF THE CAR. I DO KNOW FOR CERTAINTY I HAD MY FOOT ON THE BRAKE THE ENTIRE TIME ALL THIS WAS HAPPENING.

**Date of Incident:** 20100219  
**Vehicle:** 2008 TOYOTA RAV4  
**Location of Incident:** FAIRPORT, NY

**NHTSA Summary:**  
IDLE SPEED KICKED UP UNEXPECTEDLY AT A STOP LIGHT. THE ENGINE WAS CLOSE TO FULL OPERATING TEMPERATURE, ABOUT 1.5 MILES FROM HOME. THE AIR CONDITIONING WAS NOT ON. THE DEFROSTER WAS ALSO NOT ON, SO THERE WAS NO REASON FOR THE IDLE TO KICK UP. VEHICLE WAS STOPPED AT A LIGHT BEHIND ANOTHER VEHICLE AT AN INTERSECTION. IT LURCHED FORWARD, BUT WAS EASY TO HOLD BACK WITH THE BRAKE. I THEN PUT MY LEFT FOOT ON THE BRAKE AND RELEASED MY RIGHT FOOT TO BE SURE THAT BOTH BRAKE AND ACCELERATOR WERE NOT BEING PRESSED SIMULTANEOUSLY. THE HIGH IDLE CONTINUED, ABOUT 1100 RPM IN DRIVE. I THEN PUT THE VEHICLE IN NEUTRAL AND THE TACHOMETER READ 1300-1400 INITIALLY, THEN SLOWLY DROPPED TO ABOUT 1000. ONCE BACK IN DRIVE IT DROPPED TO ABOUT 800 RPM, WHICH IS NORMAL OPERATION. IT HAS NEVER DONE THIS BEFORE OR SINCE. THAT PARTICULAR INTERSECTION HAS POWER LINES AND/OR TRANSFORMERS THAT HAVE INTERFERRED WITH MY AM RADIO IN OTHER VEHICLES, BUT NOT THIS ONE.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10317892  
**Date of Incident:** 20100219  
**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** CAMP HILL, PA

**NHTSA Summary:**  
IN MARCH OF 2008 I HAD TWO OCCURRENCES OF UNINTENDED ACCELERATION WITH MY 2007 SIX CYLINDER TOYOTA RAV4. THE FIRST WAS VERY FRIGHTENING AS I WAS STOPPED AT A RED LIGHT. THE CAR SUDDENLY ACCELERATED AND PULLED ME THROUGH THE INTERSECTION WHILE MY FOOT WAS ON THE BRAKE. IF THERE HAD BEEN A CAR IN FRONT OF ME OR ONE COMING THROUGH THE INTERSECTION I WOULD HAVE CRASHED. SHORTLY AFTER THAT INCIDENT A MILDER LESS POWERFUL ACCELERATION EVENT HAPPENED. I BROUGHT THE CAR TO THE DEALER ON MARCH 26 08 AND AND THEY COULD NOT DUPLICATE THE PROBLEM OR GIVE A REASON FOR IT. THE TOLD ME TO BRING IT BACK IF THE PROBLEM REOCCURED. IT DID NOT HAPPEN AGAIN UNTIL 2/19/2010. AS IN THE FIRST TWO INCIDENTS, THE EVENT HAPPENED WHILE STOPPED AT A RED LIGHT WITH MY FOOT OFF THE GAS PEDAL. IN THIS CASE I QUICKLY SHUT OFF THE MOTOR, OR I WOULD HAVE HIT THE CAR IN FRONT OF ME. AS IN THE OTHER CASES AFTER I RESTARTED THE CAR THE PROBLEM WAS OVER. OUR OTHER CAR IS A CAMRY AND I HAVE NEVER HAVE NEVER HAD THIS PROBLEM WITH THAT CAR OR ANY OTHER CAR. I BROUGHT THE CAR BACK TO THE DEALER AND AGAIN NO REASON FOR THE EVENT WAS FOUND AND THERE WAS NO REMEDY OFFERED EXCEPT POSSIBLY A GAS PEDAL OVER RIDE IF ONE BECOMES AVAILABLE. AFTER THE LONG GAP IN TIME BETWEEN THE FIRST TWO EVENTS I THOUGHT MAYBE THEY WERE A FLUKE. NOW I WORRY THAT I MAY BE IN AN ACCIDENT OR HIT A PEDESTRIAN. I AM NO MECHANIC BUT I REALLY THINK THAT IT IS SOME SORT OF ELECTRONIC PROBLEM. THE CAR WAS STOPPED AND MY FOOT WAS OFF THE GAS PEDAL EACH TIME THE SUDDEN ACCELERATION HAPPENED

**Additional Summary:**

**Location of Incident:** SANTA ROSA, CA

**NHTSA Summary:**

I HAVE A TOYOTA MATRIX 2003. ON FEBRUARY 19, 2010 I WAS DRIVING NORTH ON HIGHWAY 101 IN CALIFORNIA. I WAS DRIVING AT ABOUT 35 MPH MY DISTANCE FROM THE CAR IN FRONT OF ME WAS ABOUT 1/2 A BLOCK. SUDDENLY THE TRAFFIC SLOWED

C-2005

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

DOWN AND I IMMEDIATELY STARTED SLOWING DOWN, BUT THE CAR WOULD NOT STOP AND IT FELT LIKE IT WAS ACCELERATING INSTEAD. I CRASH INTO THE CAR IN FRONT OF ME WITH SEVERAL DAMAGES TO MY CAR, TOTAL LOSS OF THE CAR IN FRONT OF ME AND WITH BODY INJURIES TO MYSELF. THIS IS NOT THE FIRST TIME IT HAPPENED ON A TOYOTA MATRIX IN 2006 I HAD ANOTHER ACCIDENT THAT PUT ME OUT OF WORK AND WITH PERMANENT DISABILITY PROBLEMS. BOTH INCIDENTS DUE TO SIMILAR CIRCUMSTANCES. I WILL LIKE TO DO FARTHER INVESTIGATION ON THIS ISSUE. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10313715/10314179  
**Date of Incident:** 20100220  
**Vehicle:** 2007 LEXUS IS250  
**Location of Incident:** ATLANTA, ROSWELL, GA

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2007 LEXUS IS 250. THE CONTACT STATED THAT WHILE DRIVING APPROXIMATELY 5 MPH, THE ACCELERATOR PEDAL DEPRESSED ON ITS OWN, STUCK TO THE FLOOR BOARD, AND THE VEHICLE CRASHED INTO HER HOUSE THROUGH THE GARAGE WALL. THE ENGINE WAS REVVING EXCESSIVELY WHEN THE INCIDENT OCCURRED. THE VEHICLE LUNGED FORWARD AND THE BOTTOM OF THE VEHICLE WENT INTO THE HOUSE FIRST. THERE WERE NO INJURIES REPORTED AND NO POLICE REPORT WAS TAKEN. THE VEHICLE HAD NOT BEEN INSPECTED TO FIND OUT WHY THE FAILURE OCCURRED. SHE CALLED THE DEALER AND THE MANUFACTURER BUT RECEIVED NO ASSISTANCE. THE VEHICLE HAD NOT BEEN REPAIRED AT THE TIME OF THE COMPLAINT. THE CURRENT AND FAILURE MILEAGES WERE 18,778.

**Additional Summary:**

I was coming into the garage applying light pressure to gas pedal creeping in. Before I could get to middle of the garage, the pedal went down to the floor and I could hear the engine revving, very high. I tried to apply the brake, but it didn't feel like it stopped the car. It leapt off the ground. There were tire marks on the floor of the garage where the car just jumped and it crashed into the wall of my house and completely ruined my bathroom. Everything was ruined. Tiles were crushed. The car bounced back 2-1/2 feet, with the engine revving and I turned the car off. Two days later, when I went to retrieve the mileage for the insurance, I accidentally pushed the ignition button and it was still revving. It had nothing to do with the floor mats. My carpet mats were secured.

Vehicle was purchased in California. Incident occurred in Atlanta, GA.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10312414  
**Date of Incident:** 20100220  
**Vehicle:** 2008 TOYOTA RAV4  
**Location of Incident:** ORION, IL

**NHTSA Summary:**

I WAS DRIVING UPHILL ON A SNOWY DRIVEWAY. THE VEHICLE BEGAN TO SPEED UP. I APPLIED THE BRAKES (WHICH CAUSED THE ABS TO PULSE VERY RAPIDLY), BUT THE CAR DID NOT SLOW DOWN. I SHIFTED INTO NEUTRAL AND THE ENGINE IMMEDIATELY REVVED TO A FAIRLY HIGH RPM. I TURNED OFF THE KEY AND RESTARTED THE VEHICLE WHICH NOW RAN NORMALLY. THIS RAV4 DOES NOT HAVE ANY OPTIONAL FLOOR MATS AND HAS ONLY 6000 MILES ON IT. THIS IS A 2008 RAV4 AND, AS SUCH, IS NOT INCLUDED IN THE CURRENT RECALL.

**Additional Summary:**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Toyota ID Number:**  
**NHTSA ODI Number:** 10312394  
**Date of Incident:** 20100220  
**Vehicle:** 2009 TOYOTA RAV4  
**Location of Incident:** APPLETON, WI

**NHTSA Summary:**

I WAS TOLD MY 2009 RAV4 WAS NOT SUBJECT TO THE TOYOTA RECALL. YET I HAVE EXPERIENCED INVOLUNTARY ACCELERATION ON TWO OCCASIONS. BOTH TIMES I WAS SLOWING DOWN TO MAKE A LEFT HAND TURN, HAVING ALMOST SLOWED TO A STOP WHEN THE RPM'S ACCELERATED TO 5,000 - 6,000. THE FIRST TIME I WAS SLOWING DOWN FROM 30 MPH TO ABOUT 10 MPH WHEN THE CAR SPED FORWARD AS I WAS TURNING. I ALMOST HIT A SIGN ON A MEDIAN BUT WAS ABLE TO STOP THE CAR BY SLAMMING ON THE BRAKES. THIS WAS IN NOVEMBER 2009 OVER THREE MONTHS AFTER THE RAV4 WAS PURCHASED BUT BEFORE I KNEW ABOUT THE RECALL. I BROUGHT THE VEHICLE INTO THE KOLASSO TOYOTA DEALERSHIP FOR THE FIX A FEW WEEKS AGO. I WAS NOT TOLD MY CAR WAS NOT PART OF THE RECALL BUT WAS TOLD I WAS "ALL SET" FOR THE TIME BEING BUT THAT THERE MAY BE ADDITIONAL FIXES REQUIRED IN THE FUTURE THAT WERE STILL BEING EVALUATED. TODAY, THIS INVOLUNTARY ACCELERATION OCCURRED AGAIN. I HAD BEEN TRAVELING ON A TWO LANE HIGHWAY. SPEED LIMIT WAS 50 MPH. I HAD SLOWED DOWN, ALMOST TO A STOP IN PREPARATION TO TURN LEFT. THE CAR WAS GOING LESS THAN 10 MPH, MY FOOT WAS ON THE BRAKE PEDAL WHEN THE RPM'S SUDDENLY SHOT UP TO 5,000 - 6,000. I PRESSED DOWN ON THE BRAKE HARDER AND PUT THE CAR IN NEUTRAL TO STOP IT FROM PROPELLING FORWARD. IT TOOK MANY SOME TIME FOR THE ENGINE TO STOP REVING. THIS NEARLY CAUSED AN ACCIDENT INTO ONCOMING TRAFFIC. WHEN I CALLED TOYOTA ABOUT THIS, AS I WAS AFRAID TO CONTINUE DRIVING THE CAR, I LEARNED THAT MY CAR WAS NOT PART OF THE RECALL BECAUSE I HAD A DENSO GAS PEDAL. TOYOTA TRIED TO MINIMIZE THE INCIDENT AND INDICATED I COULD CONTINUE DRIVING IT TO A DEALERSHIP ABOUT 25 MILES AWAY. I REFUSED TO DO SO AND HAD THE VEHICLE TOWED AT MY DEALERS EXPENSE BACK TO MY CITY OF RESIDENCE.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10313470  
**Date of Incident:** 20100220  
**Vehicle:** 2009 TOYOTA CAMRY  
**Location of Incident:** NASHVILLE, TN

**NHTSA Summary:**

MY CAR EXPERIENCED SUDDEN & STRONG ENGINE SURGING - THE PEDAL DID NOT SEEM TO BE INVOLVED. YET, REQUIRED DRIVING AT SLOW SPEEDS AND THE BRAKE HAD TO BE APPLIED VERY STRONGLY TO CONTROL THE SPEED. IT IS A 2009 CAMRY, BUT NOT ON THE TOYOTA RECALL LIST (THIS WAS CONFIRMED W/THE TOYOTA DEALERSHIP). THE TOYOTA DEALERSHIP COULD NOT REPLICATE THE PROBLEM, FOUND NO INDICATION OF IT IN THE COMPUTER/ELECTRONIC LOGS IN THE CAR. THEY HAD THEIR SERVICE MANAGER & QUALITY CONTROL MANAGERS CHECK IT. NO ONE CAN IDENTIFY THE PROBLEM. YET, IT WAS REAL AND QUITE FRIGHTENING. I AM CONCERNED AND BELIEVE THAT THERE ARE PROBLEMS OTHER THAN THE GAS PEDAL ISSUE CURRENTLY BEING INVESTIGATED.

**Additional Summary:**

**Date of Incident:** 20100220

C-2007

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Vehicle:** 2005 LEXUS ES330  
**Location of Incident:** BURR RIDGE, IL

**NHTSA Summary:**

I HAVE THE INFAMOUS ES330 HESITATION PROBLEM WHICH IS PART OF THE SUB-STANDARD OPERATING PARAMETERS OF THE CAR. WHEN PURCHASED FROM THE DEALER NEW IN 2005, I WAS ADVISED AFTER TAKING THE CAR BACK SEVERAL TIMES, THAT UPDATING ECC MODULE PROBABLY WOULD NOT FIX THE PROBLEM AND IT DIDN'ET. THE DEALERSHIP WAS VERY AWARE AND BLAMED THE LAG ON TOYOTA'S "DRIVE BY WIRE" DESIGN USED ON THIS CAR. FURTHER, THEY SAID LEXUS NEW ABOUT AND PROBABLY WOULD'NET CORRECT THE PROBLEM UNTIL THE NEXT MODEL YEAR. THE HESITATION IS ESPECIALLY APPARENT WHEN PULLING AWAY FROM A FULL STOP OR WHEN POWER IS REQUIRED TO MERGE INTO TRAFFIC. TO COMPENSATE, THE DRIVER HAS TO KEEP PUSHING DOWN ON THE GAS UNTIL THE CAR DECIDES TO ACCELERATE -- THEN THE DRIVER HAS TO QUICKLY EASE UP ON THE GAS TO KEEP THE CAR FROM OVER ACCELERATING.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316361  
**Date of Incident:** 20100220  
**Vehicle:** 2007 TOYOTA TACOMA  
**Location of Incident:** VIRGINIA BEACH, VA

**NHTSA Summary:**

2007 TOYOTA TACOMA - SUDDENLY ACCELERATED WHEN APPROACHING A TRAFFIC LIGHT. WOULD NOT STOP WHEN BRAKES WERE APPLIED. AFTER PUTTING TRUCK INTO NEUTRAL, BRAKES BEGAN TO SLOW THE TRUCK ENOUGH TO WHERE THE DRIVER WAS ABLE TO PUT THE TRUCK INTO PARK AND TURN THE TRUCK OFF. TRUCK STOPPED BEFORE INTERSECTION; THANKFULLY NO ACCIDENT OR INJURIES OCCURED. IMMEDIATELY CALLED TOYOTA DEALERSHIP WHERE TRUCK WAS PURCHASED NEW IN 2007. SINCE IT WAS A SATURDAY AFTERNOON (FEB 20, 2010, ABOUT 5PM), WE WERE ADVISED TO BRING TRUCK TO THE SERVICE DEPT ON MONDAY MORNING. TRUCK WAS INSPECTED BY SERVICE MECHANICS ON MON, FEB 22, 2010. NO PROBLEMS WERE FOUND. THE MECHANIC "ROAD TESTED THE TRUCK, COULD NOT DUPLICATE ANY THROTTLE PROBLEMS. ALL SCAN TOOL DATA IS NORMAL. ALL THROTTLE VALUES ARE NORMAL. FOUND NOTHING STICKING OR BINDING. NO FAULT CODES CURRENT OR PENDING. NO TSB FOUND. CARPET MATS ARE SECURE ON THEIR CLIPS. FOUND NO PROBLEMS WITH THE PEDAL." WE ARE STILL DRIVING THE VEHICLE BECAUSE WE HAVE NO OTHER ALTERNATIVE. TOYOTA WILL NOT INVESTIGATE FURTHER INTO THE PROBLEM SINCE THERE IS NO ACTIVE RECALL NOTICE ON THE TACOMAS FOR SUDDEN ACCELERATION. THIS IS THE FIRST TIME THE PROBLEM OCCURED. IT HAS NOT OCCURED AGAIN SINCE FEB 20. NOTHING WAS DONE TO CORRECT THE PROBLEM.

**Additional Summary:**

**Date of Incident:** 20100220  
**Vehicle:** 2010 TOYOTA COROLLA  
**Location of Incident:** NEWARK, NJ

**NHTSA Summary:**  
TL\* THE CONTACT OWNS A 2010 TOYOTA COROLLA. WHILE STOPPED AT A STOP SIGN THE VEHICLE RPM WENT UP TO 3,000 SHE HAD TO PARK THE VEHICLE FOR A WHILE FOR IT TO SLOW DOWN. SHE HAD EXPERIENCED THESE FAILURE SEVERAL TIMES. THE CONTACT STATED THAT A FEW WEEKS AFTER SHE PURCHASED THE VEHICLE SHE NOTICED THE BRAKES WERE SLOW TO RESPOND WHEN SHE DROVE 35 MPH OVER SPEED BUMPS OR ANY HOLES. SHE TOOK THE VEHICLE TO THE DEALER TWICE. THE DEALER STATED THE VEHICLE HAD BEEN TEST DRIVEN AND THEY COULD NOT DUPLICATE THE FAILURES. THE FAILURE MILEAGE WAS 10,000 AND THE CURRENT MILEAGE WAS 12,000.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

APPROACHING A TRAFFIC LIGHT, APPROXIMATELY 10-15 MPH, WITH THE BRAKE APPLIED, THE ENGINE OF MY 2008 RAV4 (VIN JTM BK31V786041720) ACCELERATED FOR 3-4 SECONDS. BECAUSE MY FOOT WAS ALREADY ON THE BRAKE PEDAL, I WAS ABLE TO KEEP THE VEHICLE UNDER CONTROL DURING THE UNINTENDED ACCELERATION. THIS HAS OCCURRED ONLY ONCE, 3 WEEKS AGO. AFTER TAKING THE RAV4 TO THE LOCAL TOYOTA DEALER, THE DEALER FOUND NO COMPUTER CODES STORED, TEST DROVE THE VEHICLE, BUT WAS UNABLE TO DUPLICATE THE ACCELERATION CONDITION. THE VEHICLE WAS NOT COVERED BY ANY OF THE EXISTING ACCELERATION RECALLS.

**Date of Incident:** 20100220  
**Vehicle:** 2009 TOYOTA CAMRY  
**Location of Incident:** SMYRNA, GA

**NHTSA Summary:**  
ON DECEMBER 31, 2008, I PURCHASED A NEW 2009 TOYOTA CAMRY SE FROM MARIETTA TOYOTA. THE CAR HAS A PERSISTENT HESITATION PROBLEM WHICH MAKES THE CAR UNSAFE IN MANY SITUATIONS. I HAD AN INCIDENT AROUND FEBRUARY 20, 2010 WHERE THE HESITATION PROBLEM ALMOST CAUSED AN ACCIDENT. I WAS PULLING INTO TRAFFIC ON SOUTH COBB DRIVE FROM A GROCERY STORE PARKING LOT. TRAFFIC FLOW DEMANDED THAT I MERGE INTO TRAFFIC BRISKLY WITHOUT DELAY - SOMETHING I EXPECT TO BE ABLE TO DO WITH A \$30,000 V6 TOYOTA CAMRY. I GAVE THE CAR GAS AND IT HESITATED HORRIBLY. THE ENGINE DIED DOWN THEN FINALLY WENT WITH SUCH FORCE THAT THE CAR VIBRATED VIOLENTLY AS THE FRONT WHEELS SPUN OUT. THE CAR WOULD NOT GO. AS TRAFFIC APPROACHED I WAS SCARED AND REALLY APPRECIATIVE OF THE DRIVERS WHO SLOWED DOWN. I HAVE BROUGHT THE CAR TO THE DEALERSHIP AND REPORTED THE PROBLEM THREE TIMES. THE FIRST TIME I WAS TOLD THAT THIS IS THE WAY THE CAR WORKS AND THAT I WOULD GET USED TO IT. AFTER DRIVING THE CAR FOR OVER A YEAR AND JUST OVER 20,000 MILES, I AM ABSOLUTELY NOT USED TO IT. THE SECOND TIME I BROUGHT THE CAR TO THE SERVICE DEPARTMENT AT MARIETTA TOYOTA THEY DID SOMETHING TO THE COMPUTER SOFTWARE. THIS DID NOTHING TO IMPROVE THE CAR'S PERFORMANCE. ON MY THIRD VISIT I SPOKE WITH A REPRESENTATIVE IN THE SERVICE DEPARTMENT. HE WAS VERY POLITE AND HONEST. REPRESENTATIVE TOLD ME THAT IN HIS OPINION (HE STATED MANY TIMES MAKING SURE THAT I UNDERSTOOD THAT THIS WAS HIS OPINION) TOYOTA MADE A MISTAKE IN HOW THEY DESIGNED THE TRANSMISSION AND COMPUTER SOFTWARE. REPRESENTATIVE EXPLAINED TO ME THAT TOYOTA TRIED TO MAKE THE TRANSMISSION STAY IN THE HIGHEST GEAR POSSIBLE AT ALL TIMES TO SAVE GAS AND THAT WHEN THE ACCELERATOR WAS PRESSED THE COMPUTER TOOK A FEW MOMENTS TO DETERMINE WHICH GEAR IT SHOULD DOWNSHIFT TO. HE SAID THAT HE HAD MANY PEOPLE (40 TO 50 PER WEEK) COMPLAIN ABOUT THE SAME THING I WAS COMPLAINING ABOUT. HE SAID HE THOUGHT IT WAS A DEFINITE PROBLEM WITH THE CAR AND THAT THERE WAS NOTHING THAT COULD BE DONE. \*TR

**NHTSA Summary:**  
LETTER TO TOYOTA 02/24/10 IVE HAD INTERMITTENT ISSUES WITH MY 2006 TOYOTA COROLLA ACCELERATING UNEXPECTEDLY. MY DEALER SAID THERE'S NO PROBLEM, BUT AFTER EXPERIENCING A LIFE-THREATENING SPINOUT ON THE HIGHWAY LAST WEEKEND (THE 4TH SUCH INCIDENCE), I'M FRIGHTENED TO DRIVE THIS CAR. IT KEEPS GETTING BANGED UP FROM THESE PROBLEMS AND MY INSURANCE RATES ARE GOING SKY-HIGH. BUT MORE SERIOUSLY, I DRIVE 36,000+ MILES PER YEAR, WHICH MEANS THAT MY EXPOSURE TO RISK IS GREATER THAN MOST DRIVERS. WHAT THE HELL AM I SUPPOSED TO DO? WILL YOU COMPENSATE MY DAUGHTER IF I DIE AS A RESULT OF YOUR PARTS FAILING WHEN THEY ARE USED AS INTENDED? I'VE CONTACTED THE NATIONAL HIGHWAY SAFETY BOARD AND THE INDIANA STATE POLICE HAVE RECORDED SUNDAY NIGHT'S INCIDENT. IRONICALLY, I WAS COMING BACK FROM CHICAGO WHERE I HAD HELPED MY EX-WIFE TO PURCHASE A 2008 TOYOTA COROLLA. I'M ALSO WORRIED ABOUT RISKS TO HER LIFE, AND MY DAUGHTER'S, BUT SHE TRUSTS YOUR REPUTATION MORE THAN MY ADVICE. THANKFULLY FOR ME, I HAD JUST HAD MY BRAKES REPLACED AND TIRES ROTATED BY MY LOCAL TOYOTA DEALER LAST WEEK. HAD THAT NOT HAPPENED, I WOULD BE DEAD TODAY FROM THE SPINOUT OFF THE HIGHWAY ON SUNDAY, BECAUSE WITHOUT GOOD BRAKES, I WOULD HAVE VEERED INTO ONCOMING TRAFFIC AND NOT BEEN ABLE TO PULL THE CAR AWAY TO THE OTHER SIDE. I DO NOT RECALL HITTING ANYTHING. BUT STRANGELY, NOW THERE ARE 2 DENTS ON THE DRIVER'S SIDE REAR OF THE CAR AND THE TRUNK FAILS TO LATCH PROPERLY. IT'S AS IF THE METAL BODY OF THE CAR WAS PULLED SO FAST THAT IT BENT. THERE ARE NO POSTS OR TREES IN THE

C-2012

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AREA THAT I COULD HAVE HIT, AND I CAME BACK THE NEXT DAY IN DAYLIGHT TO PHOTOGRAPH THE SCENE. I HAVE NO IDEA HOW THE DENTS GOT ON THE CAR, STRAIN?

**NHTSA Summary:**  
I WAS PARKED IN THE PARKING LOT OF MY CHILDREN'S SCHOOL. THE CAR NEXT TO ME NEEDED TO BACK OUT SO I WAS MOVING MY CAR FORWARD A LITTLE TO GET OUT OF THEIR WAY. WHEN I PUT THE CAR IN DRIVE IT STARTED ACCELERATING BUT MY FOOT WAS ON THE BRAKE. I TURNED THE WHEEL TO MISS THE BLOCK WALL IN FRONT OF ME. THE CAR HAD JUMPED THE CURB AND WAS UP IN THE LANDSCAPE AREA. IT WAS CONTINUING TO ACCELERATE AND I WAS PUMPING THE BRAKE AND TRYING TO NOT HIT ANYTHING. I WAS TRYING TO PUT IT IN NEUTRAL SO THAT IT WOULD STOP BUT BY THEN THE CAR WAS DOWN IN THE OTHER SIDE OF THE PARKING LOT AND HEADED TOWARD A THREE FOOT CLIFF. MY YOUNGEST SON WAS IN THE CAR AND NOT BUCKLED INTO HIS SEAT SO I WAS PARKING TRYING TO GET IT TO STOP. I PUT IT INTO PARK AND IT MAKE A WEIRD RATTLE NOISE AND THEN STOPPED VERY SUDDENLY. I LOOKED DOWN AT MY FEET IMMEDIATELY TO MAKE SURE THAT I WAS NOT ACCIDENTALLY PRESSING THE GAS BUT MY FOOT WAS STILL ON THE BRAKE. I WAS LATE TO PICK MY CHILDREN UP FROM SCHOOL. THANKFULLY, BECAUSE 10 MINUTES EARLIER THE PARKING LOT WOULD HAVE BEEN FULL OF CHILDREN. I TOWED MY CAR INTO TOYOTA AND THEY ARE LOOKING AT IT BUT SAID THAT MY VEHICLE IS NOT PART OF THE RECALL.

**Date of Incident:** 20100222  
**Vehicle:** 2006 TOYOTA RAV4  
**Location of Incident:** PRINEVILLE, OR

**NHTSA Summary:**  
MY WIFE AND I HAVE BOTH EXPERIENCED UNINTENDED ACCELERATION WHILE OUR 2006 TOYOTA RAV4 WAS OPERATING WITH CRUISE CONTROL ENGAGED OR WHILE RE-ENGAGING CRUISE CONTROL AFTER SLOWING FOR TRAFFIC. IN EACH CASE, THE VEHICLE ACCELERATED WELL BEYOND THE CRUISE CONTROL SET POINT (TYPICALLY 55 MPH). THIS ACCELERATION OCCURRED ON FLAT ROADS, NO ICE OR WATER ON THE ROAD. THE ENGINE WAS FULLY WARMED UP, AND THE VEHICLE HAD BEEN SERVICED ON A REGULAR BASIS AT PRESCRIBED INTERVALS BY OUR LOCAL TOYOTA DEALER. THIS UNINTENDED ACCELERATION HAS OCCURRED 5 OR 6 TIMES OVER THE LIFE OF THE VEHICLE. THE MOST RECENT OCCURRENCE WAS FEBRUARY 22, 2010 WHEN I RE-ENGAGED THE CRUISE CONTROL FROM A SPEED OF 50 MPH TO THE PREVIOUS SET POINT OF 55 MPH. THE VEHICLE ACCELERATED TO 65 MPH AND WAS STILL GAINING SPEED WHEN I DISENGAGED THE CRUISE CONTROL. FORTUNATELY, THE VEHICLE RESPONDED TO TURNING OFF THE CRUISE CONTROL. THE BRAKES FUNCTIONED NORMALLY, AND I WAS ABLE TO AVOID HITTING THE VEHICLE AHEAD OF ME ON THE HIGHWAY. THIS VEHICLE IS NOT INVOLVED IN ANY OF THE CURRENT TOYOTA RECALLS, AND OUR LOCAL TOYOTA DEALER DOES NOT TAKE OUR REPORTS OF UNINTENDED ACCELERATION SERIOUSLY. THEREFORE, NO ACTION HAS BEEN TAKEN TO CORRECT THE FAILURE(S) AND NO PARTS HAVE BEEN REPLACED.

**Date of Incident:** 20100222  
**Vehicle:** 2010 TOYOTA 4RUNNER  
**Location of Incident:** LANCASTER, CA

**NHTSA Summary:**  
FEBRUARY 22, 2010, MY 2010 TOYOTA 4RUNNER ACCELERATED FIERCELY, MY HEAD WAS SLAMMED INTO THE HEADREST. I WAS AT AN INTERSECTION AT THE CROSSWALK, IF A PERSON HAD BEEN IN THE CROSSWALK I WOULD HAVE KILLED THEM. THE CAR WENT BACK TO NORMAL AS SUDDENLY AS IT ACCELERATED. TERRIFYING! MY HEAD STILL ACHES. TOOK CAR TO DEALER AND REPORTED INCIDENT. THE MANAGER TOOK A FLASH LIGHT AND LOOKED AT THE GAS PEDAL AND FLOOR MAT AND SAID "IT SEEMS TO BE OKAY YOU HAVE THE ??? NEW PEDAL, BUT OUR MECHANIC CAN CHECK IT OUT IF YOU LIKE." LEFT CAR AT DEALERSHIP AND RECEIVED A CALL LATER THAT DAY THAT MY CAR WAS READY AND THE MASTER MECHANIC WAS NOT ABLE TO DUPLICATE MY ISSUE AND I CAN PICK UP MY CAR. SENT EMAILS TO TOYOTA CORPORATE, RECEIVED A CALL FROM PETER, SENIOR REP AND HE SAID I COULD GET A SECOND OPINION AT ANOTHER DEALER. I EXPLAINED I COULD HAVE KILLED SOMEONE WHEN MY CAR ACCELERATED THROUGH THE CROSSWALK. HE ENDED THE CONVERSATION BY SAYING SOMEONE FROM MY LOCAL DEALERSHIP WOULD PICK UP THE CAR AND CHECK IT OUT AGAIN. FEBRUARY 25TH A MANAGER FROM TOYOTA CAME TO MY HOME AND PICKED UP MY CAR TO RUN MORE TESTS. MARCH 1, 2010, MY CAR REMAINS AT THE DEALERSHIP. THE 2010 TOYOTA 4RUNNER SHOULD BE ON THE RECALL LIST.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10322197  
**Date of Incident:** 20100222  
**Vehicle:** 2007 TOYOTA TACOMA  
**Location of Incident:** SPRING HILL, FL

**NHTSA Summary:**  
WHILE DRIVING MY 2007 TOYOTA TACOMA X-RUNNER PICKUP IT ACCELERATED WITHOUT DRIVER INPUT. I SHIFTED INTO NEUTRAL GEAR AND VEHICLE'S ENGINE REVVED TO AN EXCESSIVE NUMBER OF REVOLUTIONS PER MINUTE, FOR APPROXIMATELY 5 TO 6 SECONDS. I CONFIRMED NOTHING WAS HOLDING THE ACCELERATOR PEDAL DOWN. THE ENGINE'S REVOLUTIONS PER MINUTE WAS EXCESSIVE TO THE EXTENT, I FEARED THE ENGINE WOULD FAIL. THE UNCONTROLLED ENGINE REVOLUTION ENDED ON IT'S OWN. MY LOCAL TOYOTA DEALER STATED THERE IS AN ELECTRONIC CHIP INSTALLED TO LIMIT EXCESSIVE ENGINE REVOLUTION, PRIOR TO CAUSING ANY DAMAGE. FURTHER, THAT NONE OF THE PRESENT "GOVERNMENT RECALLS," APPLY TO THE ABOVE VEHICLE. THIS OCCURRENCE OCCURRED ONCE AND HAS NOT BEEN REPEATED.

**Vehicle:** 2008 TOYOTA TACOMA  
**Location of Incident:** BRISTOL, CT

**NHTSA Summary:**  
I WOULD LIKE TO ADD MY NAME TO THE LIST OF PEOPLE WHO HAVE TOYOTA'S WITH ACCELERATION ISSUES. I OWN A 2008 TOYOTA TACOMA. I MADE A COMPLAINT WITH TOYOTA SHORTLY AFTER PURCHASING THE VEHICLE THAT I HAVE FELT, ON MANY OCCASIONS, WHILE STOPPED, A SUDDEN SURGE FORWARD. AT TIMES, IT FEELS AS THOUGH I WAS BUMPED FROM BEHIND. TOYOTA TOLD ME THAT IT WAS A RESULT OF THE AIR CONDITIONER COMPRESSOR KICKING ON. THE PROBLEM IS THAT ABOUT 90% OF THE TIME, MY A/C WAS NOT ON. I WAS LUCKY ENOUGH THAT THE ONLY TIMES I HAVE FELT THIS WAS WHILE STOPPED WITH MY FOOT ON THE BRAKE. THERE HAS NEVER BEEN AN ACCIDENT DUE TO THIS WITH MY VEHICLE. MY COMPLAINT IS LISTED ON THEIR SERVICE RECORD OD MY VEHICLE. I WILL SIMPLY PUT THAT DATE OF INCIDENT AS TODAY'S DATE, AS THIS PARTICULAR SURGE HAS HAPPENED SO MANY TIMES. I HAVE FLOOR MATS THAT DO NOT SLIDE FORWARD, MY PEDAL IS NOT ON THE RECALL LIST, AND I DO NOT DRIVE WITH BOTH FEET. I FEEL THAT THE ISSUE HAS SOMETHING TO DO WITH THEIR FUEL DELIVERY SYSTEM.

**Location of Incident:** TULSA, BROKEN ARROW, OK

**NHTSA Summary:**

UNINTENDED ACCELERATION OF MY 2006 TOYOTA AVALON WITH ONLY 25,000 MILES ON IT. FEB 24, 2010. I WAS DRIVING 35 MPH, HAVING SLOWED FOR TRAFFIC, THEN CHANGED LANES, BARELY TOUCHED THE ACCELERATOR AND THE VEHICLE TOOK OFF LIKE A DRAGSTER. I WAS ABLE TO PLACE IN NEUTRAL AND BRAKE THE VEHICLE TO A STOP WHILE THE MOTOR WAS AT HIGH END REV. I CHECKED TO SEE IF THE FLOOR MATS WERE OBSTRUCTING THE GAS PEDAL. THEY WERE NOT. I TURNED OFF THE VEHICLE AND STARTED IT TWICE MORE. BOTH TIMES THE ENGINE WAS IN EXTREME HIGH REV MODE. AS I SAT ON THE HIGHWAY, THE ACCELERATOR "SPRANG" BACK ON ITS OWN. I THEN STARTED THE ENGINE AGAIN AND IT WAS OPERATING NORMALLY. I CALLED TOYOTA IMMEDIATELY AND WAS DIRECTED TO A CUSTOMER SERVICE REP IN CALIFORNIA. I EVENTUALLY MADE IT TO A TOYOTA DEALER IN TULSA, OK, WHERE THE ON BOARD COMPUTER WAS "FLASHED" AND PEDAL RECALL WAS PERFORMED. SERVICE TECH

WROTE UP A FLOORMAT ISSUE AND STATED THE "SERVICE ENGINE" LIGHT WAS REPORTED BY ME TO BE ON, WHICH IT WAS NOT. THIS SHOULD BE VERIFIED BY THE INCIDENT REPORT #1002144206 OF 2-24-2010 AS TAKEN OVER THE TELEPHONE BY TOYOTA CSR DON LOMBARDO; PHONE # 800-225-2769. I WOULD BET MY LIFE THIS WAS NOT A MECHANICAL RELATED CAUSE, BUT A PROGRAMMING ISSUE WHICH CAUSED THE THROTTLE BODY TO GO WIDE OPEN. I DO NOT KNOW IF THE COMPUTER "BLACK BOX" INFORMATION WAS DOWNLOADED BY THE DEALER OR IF IT IS TOO LATE. WHEN THE DEALERSHIP GENERAL MANAGER WAS TOLD BY THE SERVICE TECHNICIAN THERE WAS "ZERO" WEAR ON THE GAS PEDAL JOINT, HE WAS SPEECHLESS, BUT EVENTUALLY SAID TOYOTA NEEDS THE VEHICLE TO GO THROUGH IT FROM BUMPER-TO-BUMPER SINCE IT HAS SUCH LOW MILEAGE.

**NHTSA ODI Number:** 20100224  
**Date of Incident:** 2002 TOYOTA CAMRY  
**Location of Incident:** CROFTON, MD

**NHTSA Summary:**

TODAY, I WAS EXITING A PARKING GARAGE. AFTER THE ARM WENT UP, I MOVED MY FOOT FROM THE BRAKE AND MOVED IT TO THE ACCELERATOR PEDAL, GENTLY, REALIZING THAT THERE WERE PEOPLE AND OTHER CARS IN THE SAME EXIT AREA. THE CAR "PEELED OUT" LEAVING RUBBER MARKS ACCELERATING AT A HIGH SPEED EVEN THOUGH I HAD TAKEN MY FOOT OFF THE ACCELERATOR. I HIT THE BRAKES HARD AND THE CAR SKIDDED TO A STOP ABOUT THREE CAR LENGTHS FROM THE GARAGE EXIT AT WHICH PLACE THERE IS A LARGE TRAFFIC AND PEDESTRIAN CIRCLE BEFORE YOU ENTER THE STREET AGAIN. THERE WAS A POLICEMAN AT THE EXIT WHO JUMPED OUT OF THE WAY WHEN HE SAW MY CAR ACCELERATE. I IMMEDIATELY TURNED THE CAR OFF. THE POLICEMAN CAME TO THE CAR TO SEE IF I WAS OKAY. I WAS SHAKEN BUT NOT INJURED. THE POLICEMAN ASKED PERMISSION TO ENTER MY CAR. I EXITED AND HE TURNED ON THE IGNITION AND PUT THE CAR IN DRIVE, MOVED FORWARD, AND THEN IN REVERSE AND MOVED BACKWARD. IT SEEMED TO BE OKAY. AS THE CAR EXITED THE GARAGE WHEN THE ACCELERATION HAPPENED, THE CAR SIDESWIPE ONE OF THE YELLOW 4 FOOT POLES CAUSING MINOR DAMAGE TO THE REAR RIGHT DOOR AND BACK FENDER PANEL. FORTUNATELY NO PERSON OR CAR WAS HIT. I DROVE THE CAR TO THE TOYOTA DEALERSHIP WHERE I BOUGHT THE CAR AND THEY ARE KEEPING IT OVERNIGHT TO CHECK IT OUT.

**Location of Incident:** NAPERVILLE, IL

**NHTSA Summary:**  
I PURCHASED A 2009 CAMRY HYBRID THIS PAST SUMMER AND WITHIN A MONTH, NOTICED PROBLEMS WITH OCCASIONAL BRAKING AND ACCELERATION ISSUES. I ORIGINALLY THOUGHT THAT PERHAPS THIS WAS THE HYBRID TECHNOLOGY, BUT AT TIMES I HAVE EXPERIENCED SOME NEAR MISSES AND HAVE BEEN VERY CONCERNED WITH THE RECENT REPORTS OF LOST LIFE. I FILED A COMPLAINT ON THE TOYOTA.COM WEBSITE ON FEBRUARY 9TH, 2010 AND HAVE RECEIVED NO RESPONSE SINCE THEN. I AM DISAPPOINTED THAT THE CAMRY HYBRID WAS NOT INCLUDED WITH THE LATEST PRIUS RECALL AND FEEL THAT TOYOTA NEEDS TO INVESTIGATE WHAT I BELIEVE TO BE A SOFTWARE/ELECTRONICS ISSUE. I HAVE BEEN IN SOFTWARE DEVELOPMENT AND SALES FOR THE PAST 15 YEARS AND HAVE NEVER BEEN IN A CAR ACCIDENT SINCE RECEIVING MY LICENSE. BUT SINCE PURCHASING THIS CAR, MY FIRST TOYOTA, I DO NOT FEEL AS SAFE AS I HAVE IN MY GM'S AND FORD'S OVER THE YEARS. WHAT I AM EXPERIENCING IS A FORWARD LURCH WHEN BRAKING FROM 50 MPH TO A QUICK STOP/TRAFFIC LIGHT AND THE GAS ENGINE IS ENGAGED. WHEN BRAKE IS APPLIED, THE CAR SLOWS, THEN THERE IS A QUICK REVVING OF THE ENGINE, THEN AN UPSHIFT PRIOR TO A DOWNSHIFT WHEN THE ELECTRONICS/BATTERY TAKES OVER. THIS HAS CAUSED SOME NEAR MISSES FROM A REAR END COLLISION, AS THE CAR APPEARS TO STOP, BUT THEN LURCHES FORWARD. I HAVE ALSO EXPERIENCED THIS FORWARD LURCH, WHEN ACCELERATING AT HIGHER SPEEDS (30-50 MPH) FROM A STOP LIGHT, AS IF THERE IS A DELAY BETWEEN THE ELECTRONICS TO THE GAS ENGINE. THIS HAS CAUSED THE CAR TO ACCELERATE RAPIDLY ON OCCASION, CAUSING ME TO BRAKE TO SLOW IT DOWN. PLEASE HAVE THIS SOFTWARE DEFECT LOOKED INTO, AS I BELIEVE THIS RECENT RECALL SHOULD INCLUDE THE CAMRY HYBRIDS AS WELL AND AS SOON AS POSSIBLE.

**NHTSA Summary:**  
ODI NUMBERS, 10183308, 10288886, 10293097, 10293888. THESE ARE ODI'S THAT ARE IN REGARDS TO MY VEHICLE. I HAVE SAID ALL ALONG THAT THE PROBLEM IS ELECTRICAL. I STILL MAINTAIN THAT. I HAVE HAD THE VEHICLE SEEN BY THE FACTORY REP AND RECEIVED A LETTER FROM TMS SAYING THAT EVERYTHING IS WORKING AS DESIGNED. THEY EVEN LOOKED AT MY THROTTLE LINKAGE. I DON'T HAVE LINKAGE. SO WHAT ELSE HAVE THEY LOOKED AT. IF IT WORKED AS DESIGNED, WHY DOES IT WORK DIFFERENTLY THAN IT DID WHEN NEW? I HAVE SUGGESTED MANY TIMES OVER THAT TMS TAKE MY TRUCK BACK AND USE IT AS A TEST VEHICLE. I HAVE NOT HAD IT REPAIRED FOR THAT REASON. MY TRUCK HAS DONE ALL SORTS OF WEIRD THINGS. THAT IS WHY I FEEL THAT IT WOULD MAKE A FANTASTIC VEHICLE TO USE TO FIND THE PROBLEM WITH THE ELECTRICAL SYSTEM. NOW I HEAR THAT DURING THE HEARINGS THAT THE CONGRESSMAN FROM TEXAS TOLD THE CEO OF TMS TO GO GET THAT VEHICLE AND USE IT AS A TEST VEHICLE REGARDLESS IF THEY HAD TO PAY ONE HUNDRED THOUSAND DOLLARS. THEY CERTAINLY WOULDN'T HAVE TO PAY ME THAT MUCH, JUST MAKE ME WHOLE. MY TRUCK IS A MOTHER LOAD OF INFORMATION. TMS IS REALLY DROPPING THE BALL ON THIS ONE. I WANT MY DEALER TO WORK WITH ME TO GET TMS TO DO AS THEY SAY THEY WILL DO. MY DEALER SAYS THAT THEIR HANDS ARE TIED. WELL TMS CALL JAPAN AND SEE IF MR. T WILL AGREE WITH ME. THE TRUCK HAS NOT BEEN REPAIRED AND I FEEL THAT ONCE THEY START TAKING IT APART THAT THE PROBLEM WILL BE EXPOSED. THIS IS THE THIRD TOYOTA TRUCK THAT I HAVE HAD AND WOULD BE PLEASED TO HAVE ANOTHER AS LONG AS IT WAS FREE OF DEFECTS. THE PEDAL THEY ARE GOING TO USE IS GOING TO GIVE THEM MORE PROBLEMS THAN THE ONE THAT IS IN THE TRUCK NOW. IF IT IS STICKING, CREATE A SCHEDULED MAINTENANCE TO LUBE IT

**Vehicle:** 2009 TOYOTA COROLLA  
**Location of Incident:** TROY, OH

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2009 TOYOTA COROLLA. THE CONTACT WAS DRIVING APPROXIMATELY 3 MPH INTO THE DRIVEWAY WHEN THE ACCELERATOR PEDAL BECAME STUCK. THE MANUFACTURER INFORMED THE CONTACT TO LET A DEALER INSPECT THE VEHICLE. THE DEALER WAS CALLED AND HAD THE VEHICLE TOWED TO THE DEALERSHIP. THE DEALER INSPECTED THE VEHICLE AND WAS UNABLE TO DIAGNOSE THE FAILURE. THE CONTACT WAS CONCERNED SINCE HE HAS NOT HAD ANY PROBLEMS WITH THE VEHICLE UNTIL THE DEALER REPAIRED IT UNDER THE RECALL FOR THE ACCELERATOR PEDAL 9 DAYS BEFORE THE FAILURE OCCURRED. THE FAILURE MILEAGE WAS 12400 AND THE CURRENT MILEAGE 12491.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** GANSEVOORT, NY

**NHTSA Summary:**

TL\* THE CONTACT OWNS A 2003 TOYOTA COROLLA. WHILE DRIVING AT SPEEDS OF 45 MPH, THE CRUISE CONTROL LIGHT ILLUMINATED. SHE WAS UNABLE TO DEACTIVATE THE CRUISE CONTROL SINCE THE RPMS BEGAN INCREASING EXCESSIVELY. THE VEHICLE ABNORMALLY ACCELERATED AND WOULD NOT STOP DESPITE HER ATTEMPTS TO APPLY THE BRAKES. THE CONTACT WAS ABLE TO SHIFT INTO NEUTRAL GEAR AND CONTINUE TO APPLY THE BRAKES. THERE WAS SMOKE PRESENT IN THE VEHICLE AS IT BEGAN TO DECREASE IN SPEED TO 15 MPH. SINCE THE CONTACT WAS UNABLE TO STOP THE VEHICLE, SHE THEN JUMPED FROM THE DRIVERS SIDE AS THE VEHICLE PROCEEDED AND PLOWED INTO A SNOW BANK BEFORE STOPPING. THE VEHICLE SUSTAINED SUBSTANTIAL BODY DAMAGE. THE DEALER STATED THAT THE TRANSMISSION WAS DESTROYED DUE TO HER SHIFTING INTO NEUTRAL GEAR FROM THE PARK POSITION. THE TRANSMISSION WAS REPLACED AND A REPRESENTATIVE FROM TOYOTA WAS SCHEDULED TO FURTHER INVESTIGATE THE FAILURE. THE INVESTIGATOR COULD FIND NO FAILURES WITHIN THE VEHICLE SPEED CONTROL. THERE WERE NO REPAIRS MADE TO THE BODY OF THE VEHICLE. THE FAILURE MILEAGE WAS APPROXIMATELY 110,000 AND THE CURRENT MILEAGE WAS APPROXIMATELY 118,000.

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

2008 TOYOTA AVALON WAS RECALLED TO REPLACE A GAS PEDAL. THE CAR WAS TAKEN IN TO THE TOYOTA DEALER FOR THE SAID REPAIR. IT TOOK 4 HOURS. A FEW DAYS LATER THE CAR WAS IN REVERSE AND WAS SLOWLY BACKING OUT OF A RESIDENTIAL CARPORT WHEN IT ACCELERATED ON ITS OWN AND THE CAR DID ABOUT 3 LOOPS AROUND THE GARAGE AREA OF THE HOME CAUSING DAMAGE TO THE CAR, BENCHES, TREE, BUSHES, LAMP POST, ETC. THIS HAPPENED AFTER THE RECALLED DEFECT WAS REPAIRED. OWNER OF VEHICLE PUT IN CLAIM TO HER OWN INSURANCE COMPANY, PUT IN A CALL TO THE 800 TOYOTA NUMBER AND HAD CAR TOWED TO WHERE SHE PURCHASED THE CAR. EVERYONE SEEMS CONCERNED, BUT ONLY WANTS TO REPAIR THE DAMAGE TO THE CAR RATHER THAN GET TO THE ROOT OF THE PROBLEM. WE THOUGHT TOYOTA HAD THE FIX, BUT APPARENTLY NOT SINCE ACCELERATING AND GOING OUT OF CONTROL ON AN ACCELERATED PACE.

**NHTSA ODI Number:** 10316352  
**Date of Incident:** 20100225  
**Vehicle:** 2008 TOYOTA PRIUS  
**Location of Incident:** KEENESBURG, CO

**NHTSA Summary:**  
SECOND ACCIDENT CAUSED BY BRAKE FAILURE WITH ACCELERATION. 2008 PRIUS IN STOP AND GO TRAFFIC DRIVING IN BATTERY (BRAKE)MODE ABOUT 10-15 MPH. CAR IN FRONT SLOWED DOWN, I HIT THE BRAKE AND THE CAR ACCELERATED SLIGHTLY. I LOOK TO BE SURE MY FOOT WAS ON THE BRAKE PEDAL AND IT WAS AND THEN REAR ENDED THE CAR IN FRONT. CAR IN FRONT MOVE FORWARD BUT PRIUS WOULDNET STOP AND STARTED TO ACCELERATE AGAIN SO I PUSHED ON THE PARKING BRAKE WITH MY LEFT FOOT AND SLOWED IT DOWN FOR THE SECOND IMPACT. CAR IN FRONT THEN DROVE SLOWLY TO A PARKING LOT AND THE PRIUS KEPT MOVING SO I DROVE IT INTO THE PARKING LOT AND WHEN IT SLOWED GOING UP THE RAMP I PUSHED THE PARKING BUTTON STOPPING THE CAR. I THEN RESTARTED IT AND RELEASED THE PARKING BRAKE TO MOVE FURTHER INTO THE PARKING LOT. 4 PEOPLE INJURED, 3 SERIOUSLY. A SIMILAR INCIDENT ACCURED 29 SEPTEMBER 2008 WHEN DRIVING ON CRUISE CONTROL AT 26 MPH THE PRIUS SUDDENLY TURNED LEFT HITTING A PARKED CAR. THE VIDEO SHOWS I WAS TRYING TO COUNTER STEER HARD RIGHT. SKID MARKS SHOWED THE LEFT FRONT WHEEL STOPPED AND THE CAR PIVOTED ON IT WITH ACCELERATION MARKS FROM THE RIGHT FRONT TIRE.

**NHTSA Summary:**  
ON 2/25/10, I EXPERIENCED THE TOYOTA SUDDEN ACCELERATION PROBLEM WITH MY 2009 TOYOTA COROLLA LE. I WAS ON THE WAY HOME FROM WORK IN THE LATE AFTERNOON AND DEPRESSED THE ACCELERATOR TO GAIN SPEED AND CHANGE LANES. I WAS TRAVELING 171 NORTH IN CINCINNATI, OHIO. THE CAR DOWNSHIFTED AND IMMEDIATELY RAN FULL THROTTLE. THE BRAKE SYSTEM IS ALSO AFFECTED BY THIS PROBLEM AS I WAS UNABLE TO TOTALLY STOP THE CAR. THE ENGINE RAN UP OVER 7500 RPM, SO I PLACED THE CAR IN NEUTRAL AS I WAS INSTRUCTED THROUGH THE MEDIA. I WAS LOSING SPED AND I STILL NEEDED TO GET OVER 3 LANES OF TRAFFIC TO A SAFE SPOT ON THE BERM. I PLACED THE CAR BACK IN GEAR AND WAS RAPIDLY GOING OVER 80 MPH. I WAS ABLE TO GET OVER AND WHEN I TRIED TO SLOW THE CAR WHILE IN GEAR, I COULDN'T GET IT BELOW 45 MPH WITH BOTH FEET PUSHING HARD ON THE BRAKE PEDAL. I AGAIN PUT THE CAR IN NEUTRAL AND WAS ABLE TO GET OFF THE ROAD. THE ENGINE WAS AGAIN RUNNING AT FULL THROTTLE WHILE I WAS IN PARK. I TURNED ON THE 4 WAY FLASHERS AND TURNED OFF THE ENGINE. I WAITED AND TRIED TO START THE CAR AGAIN SO MY WIFE COULD HEAR IT ON THE PHONE AND AGAIN IT RAN FULL THROTTLE. ABOUT 15 MINUTES LATER THE TOW TRUCK DRIVER STARTED THE CAR AND IT RAN NORMALLY. THE KINGS TOYOTA DEALER INFORMED ME THAT MY CAR WAS NOT ON THE GAS PEDAL RECALL LIST. AFTER HAVING A TOYOTA FIELD ENGR. LOOK AT MY CAR IT WAS DETERMINED THAT NO PROBLEM COULD BE FOUND, THAT THE COMPUTER HEALTH REPORT SHOWED NO PROBLEM IN THE HISTORY FILE AND THE WAS RELEASED BACK TO ME ON 3/2/10 WITH A NO PROBLEM FOUND DIAGNOSIS. THEY ASSURED ME THAT MY CAR WAS SAFE TO DRIVE AND PUT MY FAMILY IN. BUNK!!!! I NO LONGER WANT THIS CAR, I WOULD LIKE TO BE RELEASED FROM THE REMAINING 13 MONTHS OF MY LEASE AND I WILL LOOK FOR ANOTHER CAR AND NOT A TOYOTA. I WAS FORTUNATE THAT I NEVER WAS INJURED OR THAT I INJURED SOME ELSE. I HAVE BEEN EXPERIENCING HARSH PAIN IN MY NECK, SHOULDERS AND ARMS SINCE THE INCIDENT DUE TO FIGHTING TO CONTROL THE VEHICLE. I AM GOING TO SEE MY DOCTOR.

**Location of Incident:** BROCKTON, MA

**NHTSA Summary:**  
I OWN A 2007 TOYOTA CAMRY THAT WAS PART OF THE GAS PEDAL RECALL WHERE SUDDEN ACCELERATION WAS PERIODICALLY HAPPENING WITH MY CAR. I HAD THE RECALL WORK DONE ABOUT 3 WEEKS AGO BUT ABOUT A WEEK AGO MY CAR WAS SPEEDING UP WHEN I DIDN'T EVEN HAVE THE GAS PEDAL DEPRESSED, I WAS AT A STOP LIGHT WITH MY FOOT ON THE BRAKE WHEN ALL OF A SUDDEN THE CAR WAS TRYING TO ACCELERATE ON ME! THERE HAVE BEEN 2 MORE OCCURANCES OF THIS SINCE THEN AND I DON'T BELIEVE THEIR REPAIRS WORKED OR ITS THE COMPUTER OR ELECTRICAL OR SOMETHING, I CALLED THE DEALER AND THEY ARE HAVING ME BRING IT BACK IN BUT THEY AREN'T SURE WHAT ELSE CAN BE DONE SINCE THEY ALREADY FIXED THE RECALLED PEDAL. YOU NEED TO HAVE TOYOTA DO MORE, IT CLEARLY WAS WHAT THEY INSISTED IT WAS.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10317039  
**Date of Incident:** 20100225  
**Vehicle:** 2009 TOYOTA TACOMA  
**Location of Incident:** MARSHALLTOWN, IA

**NHTSA Summary:**  
I EXPERIENCED A CASE OF UNCONTROLLABLE ACCELERATION IN MY 2009 TOYOTA TACOMA. IT OCCURED ON FEB 25, 2010. I STARTED MY VEHICLE IN MY GARAGE NORMALLY. MY FOOT IS ON THE BRAKE. I LET IT IDLE FOR A SHORT WHILE UNTIL THE IDLE RATE WENT UNDER 1500 RPM'S. I SHIFTED IT INTO REVERSE AND THE IDLE SPEED WENT UNDER 1000 RPM'S. FOOT IS STILL ON THE BRAKE. I LET IT BACK OUT OF THE GARAGE ONTO THE DRIVEWAY AND THEN ONTO THE STREET TURNING THE WHEEL PARTIALLY TO ALIGN MYSELF INTO THE STREET TO BEGIN TO DRIVE AWAY. FOOT IS STILL ON THE BRAKE WHEN I SHIFTED INTO DRIVE. AS SOON AS I SHIFTED INTO DRIVE IT ACCELERATED UNCONTROLLABLY. MY FOOT IS STILL ON THE BRAKE, BUT I REALIZE THAT THE BRAKE WILL NOT STOP IT. I HAD TO MAKE A QUICK TURN TO AVOID RUNNING ONTO THE CURB/MAILBOX AND THEN I QUICKLY SHIFTED IT INTO NEUTRAL TO BRING IT TO A STOP. IT CAME TO A STOP AND I LOOK DOWN AT THE TRANSMISSION AND I ACTUALLY SHIFTED IT THROUGH NEUTRAL INTO REVERSE. BUT, IT AT LEAST WAS STOPPED. I CONTACTED MY LOCAL TOYOTA DEALER IN AMES, IA AND THEY SAID TO BRING IT IN AND THEY WOULD TAKE A LOOK AT IT. I TOOK IT IN ON MAR 4, 2010. THEY SAID THEY RAN ALL SORTS OF DIAGNOSTICS ON IT AND IT CHECKED OUT FINE. THEY SAID THEY CONTACTED TOYOTA AND OPENED UP A CASE NUMBER AND WOULD LET ME KNOW WHEN THEY KNEW SOMETHING MORE. MY VEHICLE WAS ON THE FLOOR MAT RECALL, BUT THE SAME DEALER LOOKED AT IT LAST YEAR AND SAID THE FLOOR MAT WAS FINE. IT WAS NOT ON THE FOOT PEDAL RECALL. I BELIEVE THIS IS AN ELECTRONIC PROBLEM THAT TOYOTA IS TRYING TO HIDE WITH THESE OTHER RECALLS. I HAVE NO CONFIDENCE THAT THIS PROBLEM WILL NOT OCCUR AGAIN AND BELIEVE TOYOTA NEEDS TO ADDRESS THIS ASAP.

**Vehicle:** 2010 TOYOTA COROLLA  
**Location of Incident:** GREENFIELD, MA  
**NHTSA Summary:**

PURCHASED MY 2010 TOYOTA COROLLA S IN JULY AND IT HAS BEEN RECALLED 3 TIMES. HAD ACCELERATOR PEDAL FIXED WEEKS AGO. YESTERDAY WHILE BRUSHING SNOW OFF CAR IT BEGAN TO REV AND ACCELERATOR PEDAL HAD DEPRESSED ITSELF AND STUCK. I HAD TO MANUALLY PULL UP THE PEDAL. I USE THIS CAR FOR WORK AND DRIVE APPROX 2500 MILES PER MONTH. I TRANSPORT CLIENTS AND CHILDREN. I BOUGHT A TOYOTA FOR SAFETY AND RESALE VALUE! I DO NOT FEEL SAFE IN THIS CAR. I HAVE TRIED TO TRADE IT IN AND DEALERS WILL NOT TAKE IT. IT IS UNSELLABLE AND UNSAFE. I WANT TOYOTA TO TAKE THIS CAR AND GIVE ME MY MONEY BACK. IT IS A BAD PRODUCT!

**Additional Summary:**

**Date of Incident:** 20100226  
**Vehicle:** 2009 TOYOTA MATRIX  
**Location of Incident:** ASHTABULA, OH  
**NHTSA Summary:**

I HAVE A 2009 TOYOTA MATRIX. I PURCHASED IT IN NOVEMBER OF 2008. IN OCTOBER OF 2009 THE CAR HAD ROUGHLY 7000 MILES ON IT. I EXPERIENCED MY FIRST INCIDENT OF UNINTENDED ACCELERATION. I DROVE UP A HILL TO A STOP SIGN AND AS I BRAKED THE CAR LURCHED FORWARD. I PUT BOTH FEET ON THE BRAKE AND PUT THE CAR IN NEUTRAL. I THOUGHT THAT I MIGHT HAVE SOME HOW HAD MY FOOT ON THE GAS, SO I DID NOT THINK IT WAS A SERIOUS CONCERN. HOWEVER, I HAD TWO MORE SIMILAR INCIDENTS IN THE FOLLOWING MONTHS. BOTH PULLING UP TO STOP SIGNS. BOTH TIMES I HEARD THE ENGINE START TO ACCELERATE AND WAS ABLE TO CONTROL IT. WHEN I HEARD ABOUT THE TOYOTA RECALL I IMMEDIATELY CALLED AND HAD MY CAR SERVICED. THE TOYOTA DEALER DID RECALL WORK ON MY BRAKES AND GAS PEDAL ON FEBRUARY 10TH, 2010. ON FEBRUARY 26TH, I WAS DRIVING ABOUT 5 MPH IN A PARKING AREA WITH MY SON. I PUT MY FOOT ON THE BRAKE AND I FELT THE CAR PUSH FORWARD. I PUT MY OTHER FOOT ON THE BRAKE AS WELL. MY SON SAID "ITS DOING IT AGAIN MOM!" I PUT IT IN NEUTRAL AND WE BOTH HEARD THE ENGINE WIND OUT LIKE I HAD PUSHD THE GAS PEDAL TO THE FLOOR. THIS OBVIOUSLY MEANS THE RECALL "FIX" ISN'T WORKING! I CONTACTED MY DEALER AND AM GETTING A LOANER CAR. I AM VERY CONCERNED WHAT THIS MEANS IN TERMS OF FUTURE SAFETY AND MY MONETARY INVESTMENT IN THIS CAR.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316700  
**Date of Incident:** 20100226  
**Vehicle:** 2010 TOYOTA COROLLA  
**Location of Incident:** NEWARK, DE  
**NHTSA Summary:**

ON MONDAY (MARCH 1ST) TOYOTA SERVICE CALLED ME AND TOLD ME THAT ACCORDING TO TOYOTA ENGINEERS REPORT, THERE IS NOTHING WRONG WITH THE GAS PEDAL AND THEY SAID THERE IS NOTHING TO WORRY ABOUT THE CAR. TOYOTA'S OFFICIAL EXPLANATION IS GOOPERATING AS DESIGNED, THE ECM WILL COMMAND HIGH IDLE AT TIMES FOR PROPER EMISSIONS SYSTEM OPERATION. THIS EXPLANATION DOES NOT MAKE SENSE SINCE THERE IS A SERIOUS SAFETY ISSUE HERE. I AM DRIVING THE CAR IN THE 5TH GEAR AND AROUND 3000 RPM. WHEN I NEED A SUDDEN STOP, I LET GO THE GAS PEDAL AND HIT THE BREAK. THE ECM COMMANDS HIGH IDLE EVEN I HIT THE BREAKS. THE PISTONS ARE STILL WORKING (THE ENGINE IS STILL RUNNING IN GEAR) WITH 3000 RPM SO I AM NOT ABLE TO SLOW DOWN OR STOP. THIS IS A SERIOUS SAFETY PROBLEM.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316770  
**Date of Incident:** 20100226  
**Vehicle:** 2008 TOYOTA TUNDRA  
**Location of Incident:** GAMBRIILS, MD  
**NHTSA Summary:**

THIS COMPLIANT COMPLIMENTS THE CURRENT TOYOTA RECALL THAT IS RELATED TO THE STICKING ACCELERATOR PEDAL. THE PEDAL IN MY 2008 TOYOTA TUNDRA DOES NOT GET STUCK AT ACCELERATION POINT BUT IS STICKY DURING THE ACCELERATION PROCESS. THIS IS A PHYSICAL ISSUE THAT IS RELATED TO THE PEDAL MOVEMENT AS DEPRESSED FROM A STOPPED POSITION. THIS HAS OCCURRED AT LEAST 70% OF THE TIME SINCE I OWNED THE VEHICLE (PURCHASED NEW). SINCE MY VEHICLE IS ON THE RECALL LIST I FEEL THAT THIS IS A SITUATION THAT SHOULD ALSO BE INVESTIGATED. MY SPOUSE HAS NOTICE THE DIFFERENCE IN ACCELERATION VARYING FROM A VERY SMOOTH TAKE OFF TO A HARSH JERK AND THAT LAUNCHES THE VEHICLE FORWARD.

**Vehicle:** 2007 TOYOTA TACOMA  
**Location of Incident:** SAFETY HARBOR, FL  
**NHTSA Summary:**  
I HAVE A TOYOTA ON RECALL FOR FLOOR MATS. I DID NOT HAVE THE TOYOTA FLOOR MATS, NOT PROVIDED WHEN PURCHASED. ON 2/12/10 40K MAINTENANCE WAS DONE ON MY VEHICLE I EXPRESSED CONCERN ABOUT THE ACCELERATE / BRAKE ISSUE THAT TOYOTA WAS HAVING SAID MY VEHICLE WAS NOT ON THE RECALL LIST. I ASKED THE ADVISER IF THE MECHANIC WOULD PLEASE CHECK THE ACCELERATOR & BRAKES WHILE PREFORMING THE MAINTENANCE CHECK, HE STATED HE THAT IT WOULD BE DONE WITH THE INSPECTION. UPON RECEIVING MY TOYOTA FROM THE SERVICE ADVISER, I AGAIN ASKED IF IT HAD BEEN DONE. HE STATED THAT MY TOYOTA WAS IN PERFECT CONDITION. PRIOR TO THE ACCIDENT I DID NOT NOTICE ANY PROBLEM WITH EITHER THE ACCELERATOR OR BRAKING SYSTEM. ON THE MORNING OF 2/26/10 APPROXIMATELY 10:15 - 10:30 I WAS TAKING MY CHILD TO SCHOOL. I PARKED MY TOYOTA IN A CAR SPACE AND TOOK HER TO CLASS. I RETURNED TO MY VEHICLE TO DRIVE HOME. I WAS WEARING MY SEAT BELT. I STEPPED ON THE BRAKE, STARTED THE TRUCK, SHIFTED TO REVERSE AND GENTLE TAPPED THE ACCELERATOR. THE TRUCK ACCELERATED OUT OF CONTROL AT LEAST 53 FT BACKWARDS INTO A TREE. I TRIED TO STOP THE VEHICLE WITH THE BRAKES BUT THE DIDN'T WORK. I REMEMBER GLANCING FORWARD FOR A SPLIT SECOND TO MAKE SURE MY FOOT WAS COMPLETELY ON THE BRAKE PEDAL AND APPLYING ADDITIONAL PRESSURE TURNING BACK AROUND AND THEN THE BACK OF MY TRUCK HIT THE TREE. PER POLICE THERE WAS A 53 FT SKID MARK FROM ONE OF MY TIRES. TIRES WERE STILL SPINNING PER WITNESSES AFTER CAR HIT THE TREE. I TURNED OFF THE TRUCK. AT THAT POINT THE FIRE & AMBULANCE ARRIVED AND SHORTLY AFTER THAT THE POLICE. POLICE REPORT # SO10-055898. I DO NOT KNOW THE EXACT SPEED I WAS TRAVELING. I DO NOT KNOW THE EXACT MILEAGE ON THE TRUCK.

**NHTSA ODI Number:** 10320594  
**Date of Incident:** 20100226  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** REDDING, CA  
**NHTSA Summary:**  
I OWN A 2007 TOYOTA CAMRY LE. I REPORTED THIS PROBLEM TO THE DEALER IN REDDING, CA ABOUT THE CRUISE CONTROL SYSTEM WITHIN A MONTH OF OWNERSHIP; HOWEVER, THEY SAID IT IS NORMAL OPERATION. I DOUBT IT VERY MUCH, HOW THE CRUISE CONTROL RESUMES BACK TO THE SET SPEED ALMOST INSTANTLY BY RAISING THE RPM OVER 5000, WHICH WILL MAKE YOU FEEL THE CAR IS GOING OUT OF CONTROL. I HAVE BEEN DRIVING CARS FOR OVER 30 YEARS AND OWN MANY MAKES AND MODELS BUT NONE OF THEM BEHAVED IN THIS WAY. THIS WAS MY FIRST TOYOTA CAR, I STRONGLY BELIEVE THE CAR MAKER SHOULD LOOK IN TO THE CRUISE CONTROL SYSTEMS THAT MIGHT GIVE TEM CLUES ABOUT ACCIDENTAL ACCELERATION PROBLEMS THAT I AM HEARING REGULARLY.

**Additional Summary:**

Son, age 27, borrowed vehicle to drive around the corner to buy a pack of cigarettes in a residential area coming to stop sign, vehicle speeding up, kept braking, wouldn't brake or slow down, witnesses say brake lights, turned right to miss a house and hit a tree and retaining wall in neighbors yard.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10314929  
**Date of Incident:** 20100227  
**Vehicle:** 2008 TOYOTA TACOMA  
**Location of Incident:** DACULA, GA  
**NHTSA Summary:**  
WHILE MOVING AT A SPEED OF ABOUT 25 MPH OR LESS ON A CROWDED SURFACE STREET, A TRAFFIC LIGHT TURNED RED, AND WHEN I TOOK MY FOOT OFF THE ACCELERATOR TO BRAKE, THE ENGINE OF MY TOYOTA TACOMA SUDDENLY REVVED UP TO A VERY HIGH RPM. I JAMMED THE BRAKE DOWN TO THE FLOOR AND BECAUSE OF THE DISTANCE BETWEEN MY TRUCK AND THE CAR AHEAD, I WAS ABLE TO STOP MY TRUCK BEFORE HITTING THE CAR, BUT MY REAR DRIVE TIRES WERE SQUEALING AND THE TRUCK WAS SHUDDERING. I SHIFTED INTO NEUTRAL AND TURNED OFF THE IGNITION, SUCCESSFULLY ENDING THE INCIDENT. AFTER A FEW MOMENTS, I RESTARTED THE TRUCK AND, WITHOUT FURTHER INCIDENT, WAS ABLE TO DRIVE THE TRUCK TO A DEALER LOCATED A SHORT DISTANCE AWAY. MY TACOMA IS NOT ON ANY RECALL LIST. HAVE OTHER INCIDENTS BEEN REPORTED FOR THIS TRUCK?  
**Additional Summary:**

**Location of Incident:** GURNEE IL, IL

**NHTSA Summary:**  
2005 LEXUS RX330 WAS DRIVEN AT 40MPH UNDER NORMAL HIGHWAY CONDITIONS WHEN THE VEHICLE SUDDENLY ACCELERATED ON ITS OWN. THE VEHICLE WAS IMMEDIATELY PUT IN NEUTRAL WHERE THE ENGINE KEPT REVVING. THE DRIVER COASTED TO THE SIDE OF THE ROAD AND TURNED THE ENGINE OFF. THE VEHICLE WAS RESTARTED AND BROUGHT TO A DEALERSHIP THE FOLLOWING BUSINESS DAY FOR DIAGNOSIS. THE DEALERSHIP SAID THEY DID NOT FIND ANY ERROR CODES.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316803  
**Date of Incident:** 20100227  
**Vehicle:** 2009 TOYOTA RAV4  
**Location of Incident:** MATTITUCK, NY

**NHTSA Summary:**  
OUR RAV4 WAS APPARENTLY NOT INCLUDED IN THE LAST RECALLS BUT I NOW BELIEVE THIS IS INCORRECT. ON 2/27 I REAR-ENDED A TRUCK GOING ABOUT 30-35 MPH. I ORIGINALLY THOUGHT I HAD MISSED THE BRAKE PEDAL AND BY THE TIME I REALIZED THE CAR WAS NOT STOPPING I HAD TO SLAM MY BRAKES AND TRIED TO TURN TO MISS THE CAR IN FRONT OF ME. AFTER CHECKING FURTHER I'M NOT SURE HOW I WOULD HAVE EVEN BEEN ABLE TO ENTIRELY MISS THE PEDAL. I WAS VERY SHAKEN UP AND THOUGHT I HAD IMAGINED THAT THE CAR WAS ACCELERATING AFTER I HAD ORIGINALLY BRAKED UNTIL I OVERHEARD MY 8 YR OLD DAUGHTER TALKING TO SOMEONE ELSE AND SAYING SHE 'FEL' I LIKE WE WERE GOING FASTER INSTEAD OF STOPPING". IF NOT FOR THE URGING OF FRIENDS AND FAMILY AND AFTER RESEARCHING, I'M NOT SURE I WOULD HAVE EVEN THOUGHT IT WAS A TOYOTA PROBLEM. LUCKILY I WAS THE ONLY PERSON TO BE INJURED WITH A SPRAINED FOOT, BUT IF THIS CAN HELP TO SAVE SOMEONE ELSE FROM A POTENTIALLY FATAL CRASH I WOULD FEEL THAT I HAVE DONE MY PART. PLEASE PUSH TOYOTA TO FIND OUT THE REAL PROBLEM AND GET IT FIXED. I'M NOT SURE HOW I AM EVEN GOING TO BE ABLE TO DRIVE THAT TRUCK AGAIN WITHOUT FEELING CONFIDENT THAT MY FAMILY AND I ARE SAFE.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Date of Incident:** 20100227  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** CUPERTINO, CA

**NHTSA Summary:**  
WHILE I WAS PULLING MY 2002 TOYOTA CAMRY INTO MY DRIVEWAY WITH FOOT ON BRAKE PEDAL (AND BRAKE LIGHTS ON- MY NEIGHBOR WITNESSED), THE CAR SURGED FORWARD DESPITE ME TRYING TO JAM BRAKE EVEN HARDER. THIS RESULTED IN ME CRASHING INTO MY HOUSE AND PARTLY DAMAGING THE WALL AND GARAGE. THE IMPACT WAS HIGH ENOUGH TO SHIFT THE STUCCO OFF THE FOUNDATION. SURPRISINGLY, THE AIRBAG DID NOT GO OFF. THE IMPACT DENTED THE FRONT FENDERS OF MY CAR QUITE BADLY THOUGH. IN 8 YEARS OF DRIVING THIS CAR, I HAVE NEVER EXPERIENCED SUCH SURGE IN ACCELERATION IN SUCH SHORT DISTANCE (MY DRIVEWAY IS ABOUT 20FT MAX). I TURNED OFF THE IGNITION AT THE SAME TIME THE IMPACT OCCURED, WHICH STOPPED THE CAR. I HAVE FILED A COMPLAINT W/ TOYOTA.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316563  
**Date of Incident:** 20100227  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** SENOLA, GA

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2007 TOYOTA CAMRY. THE CONTACT STATED THAT AFTER THE RECALL WAS REPAIRED FOR THE POWER TRAIN; CLUTCH ASSEMBLY; PEDAL LINKAGE, THE VEHICLE CONTINUED TO HAVE RAPID/RODDED ACCELERATION. THE CONTACT HAS NOT TAKEN THE VEHICLE BACK TO THE DEALER DUE TO THE HIGH VOLUME OF REPAIRS. THE CONTACT FEELS THAT THE REPAIR WILL NOT REMEDY THE ISSUE WITH THE STICKY PEDAL AND THE VEHICLE WAS UNSAFE TO DRIVE. THE FAILURE MILEAGE WAS 60,000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10317256  
**Date of Incident:** 20100227  
**Vehicle:** 2005 TOYOTA COROLLA  
**Location of Incident:** SUFFERN, NY

**NHTSA Summary:**  
I WAS IN THE ACT OF PARKING MY VEHICLE IN A PARKING LOT AND PLACED MY RIGHT FOOT ON THE BRAKE AND PROCEEDED TO SHIFT THE GEAR INTO THE PARK POSITION. BUT BEFORE I COULD COMPLETE THIS ACTION, MY VEHICLE SPONTANEOUSLY ACCELERATED AND HURTLED FORWARD. I WAS LUCKY THAT MY VEHICLE WAS STOPPED BY CRASHING INTO A METAL SIGN POST. HAD THE POST NOT BEEN THERE, MY VEHICLE WOULD HAVE GONE INTO A VERY BUSY MAIN ROAD.

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

C-2046

TL\* THE CONTACT OWNS A 2009 TOYOTA CAMRY. THE CONTACT WAS DRIVING APPROXIMATELY 55 MPH. THERE WAS A SUDDEN ACCELERATION WITHOUT WARNING, FOLLOWED BY 10 SECOND WAITING PERIOD BEFORE FUNCTIONING NORMALLY. THE VEHICLE HAD PRIOR RECALL REPAIRS PERFORMED UNDER NHTSA CAMPAIGN ID NUMBERS 09V388000 (VEHICLE SPEED CONTROL; ACCELERATOR PEDAL) AND 10V017000 (VEHICLE SPEED CONTROL; ACCELERATOR PEDAL). THE RECALL REMEDY FAILED TO CORRECT THE SAFETY DEFECT. THE CURRENT AND FAILURE MILEAGES WERE 36,000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10317928  
**Date of Incident:** 20100227  
**Vehicle:** 2010 TOYOTA PRIUS  
**Location of Incident:** KENTFIELD, CA

**NHTSA Summary:**  
THERE ARE SEVERAL PROBLEMS I'VE EXPERIENCED WITH THE 2010 TOYOTA PRIUS PURCHASED NEW 10 DECEMBER 2009. 1. WHEN USING CRUISE CONTROL -> THERE'S REGULARLY WHAT FEELS LIKE AN ENGINE SURGE WHEN THE FOOT BRAKE IS APPLIED TO TURN OFF CRUISE CONTROL. THIS HAPPENS REGULARLY, INCLUDING ON SMOOTH, LEVEL, DRY ROADWAYS AND FREEWAYS AND AT SPEED SETTINGS FROM 45 TO 60 MPH. BECAUSE OF CONCERN ABOUT THIS I NOW MANUALLY TURN OFF CRUISE CONTROL. THREE DAYS AGO THE CAR WAS TEST DRIVEN BY A TOYOTA DEALERSHIP SERVICE DEPARTMENT EMPLOYEE, WHO REPORTED USING CRUISE CONTROL 6 TIMES AND TURNING CRUISE CONTROL OFF BY APPLYING THE FOOT BRAKE; THE REPORT WAS CRUISE CONTROL SHUT OFF IMMEDIATELY WHEN ENOUGH PRESSURE APPLIED [EMPHASIS ADDED] TO PEDAL. 2. ON SATURDAY, FEBRUARY 27, 2010 AFTER THE CAR HAD BEEN SET AT 60 IN CRUISE CONTROL FOR SOME TIME THERE WAS A STRONG ODOR (LIKE A CAR BEING DRIVEN WITH THE "HAND" BRAKE ON, BUT MY CARES WASN'T ENGAGED) WHILE ON A DRY FREEWAY DOWNGRADE (GRADUAL, NOT STEEP). I TURNED OFF THE CRUISE CONTROL, CONTINUED AT THE SAME SPEED AND THE ODOR STOPPED. THIS WAS THE FIRST SUCH OCCURRENCE. I'VE USED CRUISE CONTROL REGULARLY BECAUSE OF USUALLY DRIVING ON FREEWAYS 6 DAYS A WEEK. THE TOYOTA SERVICE DEPARTMENT'S TEST DRIVE THREE DAYS AGO REPORTED NOT EVIDENT 3. SHIFTING FROM PARK TO DRIVE SEVERAL TIMES THIS SHIFTING WAS SUCCESSFUL ONLY AFTER MULTIPLE TRIES. ON ONE RECENT OCCASION AFTER SEVERAL TRIES AND ALSO TURNING THE CAR OFF, ON AGAIN, AND THEN UNSUCCESSFULLY RETRYING, I RESORTED TO USING THE SAFETY CONNECT SOS BUTTON. THERE WERE NO DOORS AJAR AND NO INDICATION OF THE CAUSE. WHILE TALKING WITH THE PERSON WHO RESPONDED I PERIODICALLY CONTINUED TO TRY SHIFTING FROM PARK TO DRIVE; AFTER SEVERAL ATTEMPTS THE CAR RESPONDED.

**Location of Incident:** ALEXANDRIA, VA

**NHTSA Summary:**  
S10 APPROPRIATE HANDLING RE INCIDENT OF SUDDEN UNINTENDED ACCELERATION FM OWNER OF A 2010 TOYOTA VENZA. \*KB AS THE CONSUMER WAS PULLING INTO HIS DRIVEWAY, HE PUSHED THE GARAGE DOOR OPENER BUTTON AND SUDDENLY THE VEHICLE ACCELERATED AT A GREAT SPEED, NEARLY CRASHING INTO THE OPENING OF THE GARAGE DOOR. THE VEHICLE WAS REVVING AT 5,000 RPM'S AND HE IMMEDIATELY PUT BOTH FEET ON THE BRAKES, JAMMED IT INTO NEUTRAL, THEN REVERSE, THEN PARK. IN PARK, THE ENGINE WAS STILL REVVING AT A VERY HIGH SPEED AND SO THE CONSUMER SHUT THE ENGINE OFF. HE IMMEDIATELY LOOKED DOWN TO SEE IF THE ACCELERATOR WAS STUCK UNDER THE MAT, AND IT WAS NOT. THE GAS PEDAL WAS NOW WHERE NEAR ANY FLOOR MAT AND THE VEHICLE WAS BARELY MOVING AT THE TIME. HIS FOOT WAS ON THE BRAKE, NOT THE ACCELERATOR AND THE VEHICLE WAS COASTING INTO THE GARAGE. \*JB. AT 2 PM TODAY, I HAD JUST RETURNED FROM RUNNING ERRANDS AND WAS PULLING INTO MY DRIVEWAY AND PUSHED THE GARAGE DOOR OPENER. AT THAT POINT, MY FOOT WAS ON THE BRAKE AND NOT ON THE GAS PEDAL; I WAS COASTING AT A VERY LOW SPEED WITH THE NATURAL FORWARD MOVEMENT OF THE CAR CARRYING ME INTO THE GARAGE (MY DRIVEWAY IS ONLY ABOUT TWO-CAR-LENGTHS LONG). AS I NEARED THE GARAGE DOOR, NOW HALF-WAY OPEN, MY CAR SUDDENLY REVVED TO A HIGH SPEED AND WAS HEADED STRAIGHT TOWARD SMASHING INTO THE GARAGE DOOR. AS I SAID, MY FOOT WAS ON THE BRAKE AND SO I THEN PUT THE OTHER FOOT ON THE BRAKE AS WELL. THEN, I SLAMMED THE CAR INTO NEUTRAL AND HEARD THE ENGINE JUST REV AT A VERY HIGH SPEED. I THEN SLAMMED THE CAR INTO REVERSE THEN PARK, AGAIN HEARING THE ENGINE REV AT A HIGH SPEED. I THEN PUSHED THE BUTTON TO SHUT THE CAR OFF. I IMMEDIATELY LOOKED DOWN AND SAW THAT THE GAS PEDAL WAS NOT STUCK ON ANY FLOOR MAT. AND, AS I SAID, MY FOOT WAS ON THE BRAKE AND NOT ON THE GAS PEDAL. I THEN SAT THERE FOR A FEW MINUTES WITH MY HEART RACING, THINKING THAT IF THIS HAD HAPPENED TWO MINUTES AGO WHILE ON THE ROAD, I COULD HAVE BEEN KILLED. OR, IF I HADN'T BEEN QUICK TO ACT PROPERLY, MY CAR WOULD HAVE ENDED UP IN MY FAMILY ROOM. WHAT IF I DIDN'T HAVE MY FOOT ALREADY ON THE BRAKE? SURELY I WOULDN'T HAVE BEEN ABLE TO STOP THE VEHICLE AS QUICKLY. I FELT JUST LIKE THE WOMAN AT THE CONGRESSIONAL HEARINGS, IN TEARS, DESCRIBING HER EXPERIENCE WITH HER LEXUS. THE CAR SUDDENLY REVVED TO A HIGH SPEED, AND I WOULDN'T SLOW DOWN IN NEUTRAL OR REVERSE OR PARK. SHIFTING OFF THE ENGINE WAS THE ONLY OPTION TO MAKE THE HIGH-SPEED THROTTLING TO STOP. THESE FACTS ARE CLEAR: 1) THE GAS PEDAL WAS NOT STUCK ON ANY FLOOR MAT 2) THE GAS PEDAL WAS NOT DEPRESSED IMMEDIATELY PRIOR TO THE SUDDEN ACCELERATION 3) THE BRAKE PEDAL WAS DEPRESSED IMMEDIATELY PRIOR TO THE SUDDEN ACCELERATION 4) THE SUDDEN ACCELERATION WAS AT VERY HIGH RPM'S 5) THE HIGH RPM'S WOULDN'T STOP UNTIL THE ENGINE WAS SHUT OFF. 6) MY FOOT WAS ON THE BRAKE AND NOT ON THE GAS PEDAL. 7) I WAS COASTING AT A VERY LOW SPEED WITH THE NATURAL FORWARD MOVEMENT OF THE CAR CARRYING ME INTO THE GARAGE (MY DRIVEWAY IS ONLY ABOUT TWO-CAR-LENGTHS LONG). 8) AS I NEARED THE GARAGE DOOR, NOW HALF-WAY OPEN, MY CAR SUDDENLY REVVED TO A HIGH SPEED AND WAS

C-2048

HEADED STRAIGHT TOWARD SMASHING INTO THE GARAGE DOOR. AS I SAID, MY FOOT WAS ON THE BRAKE AND SO I THEN PUT THE OTHER FOOT ON THE BRAKE AS WELL. THEN, I SLAMMED THE CAR INTO NEUTRAL AND HEARD THE ENGINE JUST REV AT A VERY HIGH SPEED. THE SUA SEEMED TO HAPPEN AS I PUSHED THE BUTTON ON THE DOOR OPENER.

**Location of Incident:** BALLSTON LAKE, NY  
**NHTSA Summary:**  
SUBJECT: UNINTENTIONAL ACCELERATION EVENT WITH 2008 TOYOTA TUNDRA, VIN # 5TBV54148S505082, FOLLOWING RECALL TO INSERT ACCELERATOR PEDAL SHIM THE PURPOSE OF THIS LETTER IS TO DOCUMENT AND INFORM YOU OF AN UNINTENTIONAL ACCELERATION EVENT THAT I EXPERIENCED WITH MY 2008 TOYOTA TUNDRA ON THE AFTERNOON OF FEBRUARY 27, 2010. THE EVENT WAS EXPERIENCED WITHIN 10 MINUTES/3.5 MILES AFTER LEAVING THE DEALERSHIP FOLLOWING DEALER-SERVICE WORK THAT INCLUDED, AMONG OTHER ITEMS, IMPLEMENTATION OF THE TOYOTA RECALL TO INSERT THE ACCELERATOR PEDAL SHIM (SSC). THIS IS THE ONLY SUCH EVENT EXPERIENCED TO DATE WITH THIS TRUCK. THE EVENT WITH THE VEHICLE PARKED AND THE ENGINE IDLING NORMALLY (APPROXIMATELY 800 RPM), I PLACED MY FOOT ON THE BRAKE IN PREPARATION OF SHIFTING THE TRANSMISSION FROM PARK TO DRIVE. MY FOOT WAS WELL CENTERED ON THE BRAKE PEDAL AND NOT IN CONTACT AT ALL WITH THE THROTTLE PEDAL. THERE WAS NO CHANGE IN ENGINE SPEED AT THIS POINT. I THEN SHIFTED THE TRANSMISSION FROM PARK TO DRIVE. AS SOON AS THE DRIVE POSITION WAS ENGAGED, WITH MY FOOT UNCHANGED FROM ITS FIRM POSITION ON THE BRAKE PEDAL, THE ENGINE SPEED IMMEDIATELY WENT TO FULL THROTTLE. AS I HEARD THE ENGINE SPEED UP, I APPLIED FULL PRESSURE TO THE BRAKE TO HOLD THE VEHICLE IN ITS STATIONARY POSITION. THE REAR WHEELS BROKE LOOSE FROM THE PAVEMENT AND BEGAN SPINNING; HOWEVER, THE VEHICLE REMAINED STATIONARY, HELD BY THE BRAKING OF THE FRONT WHEELS. FORTUNATELY, THE PAVEMENT WAS WET, WHICH FACILITATED THE REAR WHEELS LOSING TRACTION WITH THE PAVEMENT. I IMMEDIATELY TURNED THE IGNITION OFF WHILE THE DRIVE POSITION WAS STILL ENGAGED. ONCE THE ENGINE WAS SHUT DOWN, I PLACED THE TRANSMISSION IN THE PARK POSITION. AS I NEVER HAD A CHANCE TO PLACE MY FOOT ON THE THROTTLE PEDAL BEFORE THE EVENT OCCURRED, IT WAS NOT MECHANICAL IN NATURE AND CAN ONLY BE ATTRIBUTED TO AN ELECTRICAL/CONTROL ISSUE.

**Additional Summary:**  
PER ARTICLE IN THE JOURNAL NEWS -

"A 71-year-old man said his 2009 Toyota Camry unexpectedly accelerated and crashed through the door of his garage and then smashed through the brick wall in the rear of the structure.

The accident on Sunday left Evaristo Rios of Caroline Avenue with a broken rib and his daughter, Marilyn Quinones, 43, a passenger, with a bruised chest and a neck brace after being taken to St. Joseph's Medical Center.

"It was like a torpedo, it went so fast," Quinones said. "I fainted inside the car. When I woke up, my father was screaming."

On Monday, the smashed garage door was still unstable and the Camry was inside, embedded into the wall that was cracking on the outside.

Rios said he took his car to Toyota on Vredenburg Avenue in Yonkers in December after getting a recall letter. He said they drove the car four miles, pulled the mats back in the driver's area and told him the car was all right.

Inside the busy service department Tuesday, the manager said all press inquiries were being handled by the corporate offices. A company spokesman said the company is conducting an investigation in response to sudden acceleration in the cars.

A Yonkers police report was taken of the incident that happened at 9:09 p.m. Sunday.

Quinones said she and her father were out running errands Sunday. Rios said that when they returned, he turned into his parking lot and the car started "flying." He said he tried stepping on the brake but could not stop and went right through the automatic door.

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

Rios, a retired roofer, said the same thing happened on the Saw Mill River Parkway in Yonkers last year. The car raced off, and he could not stop it. By the time he did, he got a speeding ticket for going 72 mph, he said. The speeding ticket cost him \$110.

**NHTSA ODI Number:** 10314950  
**Date of Incident:** 20100228  
**Vehicle:** 2006 TOYOTA AVALON  
**Location of Incident:** IOWA CITY, IA  
**NHTSA Summary:**  
DEAR NHTSA, I OWN A 2006 TOYOTA AVALON XLS, PURCHASED USED IN SUMMER 2009. A FEW DAYS AFTER OWNERSHIP, I FELT THE CAR WANTED TO 'SPEED UP ON ITS OWN', MOMENTARILY. I TOOK IT TO OUR LOCAL TOYOTA DEALER (TOYOTA OF IOWA CITY) WHO FELT THE PROBLEM MIGHT BE DUE TO 'GEAR SHIFT SET POINTS' IN THE AUTOMATIC TRANSMISSION'S COMPUTER PROGRAMMING. THEY REPROGRAMMED THE REVOLUTIONS AT WHICH TRANSMISSION WOULD SHIFT GEARS WHILE DRIVING. HOWEVER, THE SURGE PROBLEM PERSISTS AS TIME GOES BY AND I READ MORE ABOUT TOYOTA'S ACCELERATOR PROBLEMS. I THINK THIS MIGHT BE PART OF THE SAME ISSUE AND SO I WOULD LIKE TO GIVE YOU SOME DETAILED INFORMATION ON MY OBSERVATIONS. I HAVE BEEN STUDYING IT AND MADE SOME CAREFUL OBSERVATIONS ABOUT WHICH CONDITIONS THE SURGE OCCURS DURING, AND WOULD LIKE TO DETAIL THIS FOR YOU. PERHAPS UNDER THESE CONDITIONS YOU MIGHT EVEN BE ABLE TO REPRODUCE MY SURGE SITUATION IN OTHER TOYOTAS. THE PROBLEM OCCURS WHEN THE ENGINE IS WARM. IN ORDER TO ENSURE THAT THE TRANSMISSION SHIFTING IS NOT THE ISSUE, PUT THE TRANSMISSION MANUALLY INTO '3'. DRIVE ON LEVEL ROAD AT ABOUT 30MPH, THE ENGINE RPM'S WILL TYPICALLY BE ABOUT 2000. THEN, RELEASE FOOT FROM GAS PEDAL. THE ENGINE RPM'S WILL DROP TO ABOUT 1000, THEN SPONTANEOUSLY SURGE UPWARD TO ABOUT 1500 RPM. AT THAT POINT, SOMETHING SEEMS TO LIMIT THE RPM'S FROM INCREASING FURTHER. THIS CANNOT BE THE CORRECT OPERATION; WHEN ONE IS NOT STEPPING ON THE GAS PEDAL, THE ENGINE SHOULD SLOWLY REVERT BACK TO IDLE SPEED (OR BE GOVERNED BY ENGINE BRAKING EFFECTS) IF GOING DOWNHILL...CORRECT? I THINK THAT IN A SITUATION WHERE THIS SPONTANEOUS LIMITATION OF RPM SURGING MIGHT NOT OCCUR, I COULD EXPERIENCE A "WIDE-OPEN-THROTTLE" SITUATION THAT EVERYONE IS TALKING ABOUT. PLEASE CONTACT ME FOR MORE DETAILS. I THINK MY CAR MIGHT HOLD SOME SECRETS TO THE MYSTERIES OF THE TOYOTA THROTTLE ISSUE. THIS COULD POTENTIALLY SAVE LIVES. \*RM

**Vehicle:** 1992 TOYOTA 4RUNNER  
**Location of Incident:** SAN DIEGO, CA  
**NHTSA Summary:**  
ON FEBRUARY 28, 2010, MY 1992 TOYOTA 4RUNNER HAD A REPEATED ACCELERATOR ISSUE. MY TRUCK ACCELERATED SEVERAL TIMES WHILE MY FOOT WAS OFF THE ACCELERATOR. I WAS STOPPED AT A TRAFFIC LIGHT WHEN THE TRUCK SURGED FORWARD. I PRESSED ON THE BRAKE WITH BOTH FEET AND THE ACCELERATOR CONTINUED TO RACE. I WATCHED THE TACHOMETER GO FROM 1.1K RPM TO 4K RPM WITHOUT TOUCHING THE ACCELERATOR. THIS HAPPENED OVER AND OVER AGAIN OVER A 1/2 MILE STRETCH OF CITY BLOCKS (EL CAJON BLVD IN SAN DIEGO, CA). I HAD TO PULL OVER SEVERAL TIMES BECAUSE I COULD NOT CONTROL THE SPEED. IT WAS A VERY DANGEROUS SITUATION. I REMOVED THE PLACEMAT AND THE ISSUE CONTINUED. IN FACT, WHEN I APPLIED PRESSURE ON THE ACCELERATOR, THE TACHOMETER WENT FROM 4K RPM TO 8K RPM IN THE RED ZONE EVEN THOUGH I WAS BARELY TOUCHING THE ACCELERATOR. THIS IS THE FIRST TIME THIS HAS OCCURRED BUT IT WAS EXTREMELY DANGEROUS AS I HAD TO PLACE THE TRUCK IN NEUTRAL WHEN ACTUALLY RIDING ON THE STREET JUST TO CONTROL MY SPEED. MY TRUCK HAS 143K MILES AND I HAVE NEVER HAD THIS ISSUE BEFORE. I AM WORRIED ABOUT MY NEXT TRIP.

**Location of Incident:** WHITESVILLE, KY

**NHTSA Summary:**  
AFTER HAVING MY 2006 TOYOTA AVALON RECALL SUPPOSEDLY REPAIRED A WEEK LATER I WAS PULLING UP TO MY MAILBOX AND APPLIED MY BRAKES, HOWEVER I REALIZED THE CAR WAS STILL ACCELERATING. IN ORDER TO STOP I PUT MY CAR IN NUTRIAL AND TURNED THE ENGINE OFF. WHEN I CALLED THE DEALERSHIP TO TELL THEM THEY TOLD ME I HADN'T HAD THE COMPLETE RECALL DONE AND I NEEDED TO BRING IT BACK IN. THEY SAID I NEEDED TO HAVE THE FLOOR MAT AS WELL AS THE BRAKE OVERRIDE RECALL DONE. I TRIED TO TELL THEM THE FIRST TIME I TOOK IT IN I WAS SUPPOSE TO HAVE THE FLOOR MAT PORTION OF THE RECALL DONE BUT THEY TOLD ME MY VIN NUMBER WAS NOT ON THE LIST AS NEEDING IT DONE. IT WAS NOT THE FLOOR MAT THAT CAUSED THE PROBLEM THOUGH BECAUSE MY FLOOR MAT WAS STILL ATTACHED TO THE HOOK AND IN PLACE. MY COMPLAINT IS MAINLY BECAUSE THEY DIDN'T DO THE COMPLETE RECALL WHEN I HAD IT IN THE FIRST TIME. I HAD MY 9 YEAR OLD GRANDDAUGHTER WITH ME, IF WE HAD BEEN AT A BUSY INTERSECTION I COULD HAVE BEEN HIT BECAUSE MY CAR WENT AT LEAST A HALF OF CAR LENGTH BEYOND MY MAIL BOX BY THE TIME I GOT IT STOPPED.

**Location of Incident:** MURRYSVILLE, PA

**NHTSA Summary:**  
THIS IS ADDITIONAL INFORMATION. I FILED A PRIOR INCIDENT REPORT AND HAD ANOTHER OCCURENCE ON FEB 28 2010. AGAIN MY VEHICLE HAD A SUDDEN ACCELERATION AND LEAPED FORWARD. AGAIN I WAS ABLE TO PLACE IT IN NEUTRAL. THIS IS A DANGEROUS PROBLEM. I HAVE TAKEN IT BACK TO MY LOCAL DEALERSHIP ONLY TO BE TOLD, IT WAS THE FLOOR MAT. WHEN IT HAPPENED AGAIN (AFTER I TOOK OUT THE MAT I WAS TOLD IT MAY HAVE BEEN I HIT THE CRUISE CONTROL (EVEN THOUGH I EXPLAINED I HIT THE BRAKE AND THE VEHICLE MAINTAINED ITS ACCELERATION.) THIS DEALERSHIP EVEN HAS TOLD OTHER CUSTOMERS THAT HAVE CALLED IN THEY HAVE NOT HAD ONE COMPLAINT ABOUT THIS PROBLEM. I WAS STANDING BY THE SERVICE DESK WHEN THIS TOOK PLACE. TOYOTA WILL NOT ADMIT THERE IS A PROBLEM AND IN FACT HAS SPENT MORE EFFORT TO MAKE ME FEEL ITS MY FAULT OR I AM MISTAKEN. WHAT IS THE GOVERNMENT GOING TO DO TO ADDRESS THIS PROBLEM ? IT APPEARS TOYOTA IS IN DENIAL BECAUSE THE FIX WILL COST TOO MUCH. HOW MANY MORE PEOPLE WILL DIE OR GET INJURED? I AM REQUESTING AND HOPE OTHERS ARE REQUESTING THAT THE HIGHWAY SAFETY ADMINISTRATION TAKE A STRONGER ACTION. THIS HAS GONE ON TO LONG WITHOUT SOMETHING BEING DONE. PLEASE HELP. DAVID DREW

**NHTSA Summary:**  
THIS IS EXTREMELY URGENT! I OWN A 2009 TOYOTA PRIUS WITH NO FLOOR MATS IN IT AT ALL AND THE GAS PEDAL STUCK ONCE A FEW DAYS BEFORE THE DRIVER IN CALIFORNIA(2008 PRIUS)WAS STUCK SPEEDING ON HIGHWAY AND STOPPED BY POLICE.AFTER SEEING THAT STORY,I WAS COMPELLED TO SHARE MY STORY. TOYOTA REFUSED TO HELP ME SAYING MY YEAR WASNT IN RECALL LIST. IT HAPPEN THE SAME WAY IT HAPPEN TO HIM IN CALIF. I WAS ACCELERATING ON HIGHWAY TO PASS DRIVER AND IT STUCK FOR 20 SECONDS THEN UNSTUCK. I SLAMMED ON BREAKS WHICH DIDNT HELP MUCH.I STARTED GOING UPWARDS TO TO 70 MPH WITH BRAKED TO THE FLOOR. THERE WERE NO FLOOR MATS IN CAR AT THE TIME. IM AFRAID I WILL BE THE NEXT PRIUS THAT MAY CAUSE ACCIDENT OR EVEN KILL SOMEONE. PLEASE HELP! TOYOTA REFUSES TO SEE MY CAR! I DONT KNOW WHAT TO DO...MAYBE I SHOULD GO TO THE NEWS.IM SCARED!

MAJOR PROBLEM AND THAT A MINOR ADJUSTMENT WAS MADE TO THE SHIFTING POINTS IN THE TRANSMISSION. THE VEHICLE FUNCTIONED FINE FOR A WHILE, BUT THEN THE SAME PROBLEMS QUICKLY RESURFACED. A TOYOTA REPRESENTATIVE STATED THE PROBLEM WAS NOT A DEFECT; RATHER IT WAS THE WAY THE VEHICLE WAS INTENDED TO HANDLE DUE TO ITS DRIVE-BY-WIRE SYSTEM. THE REPRESENTATIVE WENT ON TO SAY THE DRIVE-BY-WIRE SYSTEM DID NOT HAVE A TRADITIONAL ROD THAT CONNECTED THE PEDAL TO THE ENGINE; RATHER, THE PEDAL WENT TO AN ELECTRONIC SYSTEM THAT SENSED THE INTENDED ACCELERATION AND CAUSES THE ENGINE TO ACCELERATE AS DIRECTED BY THE DRIVER. THE CONSUMER WAS TOLD THE HESITATION HE COMPLAINED OF WAS NORMAL AS THE SYSTEM WAS DETERMINING HOW MUCH TO ACCELERATE. THE CONSUMER DID NOT BELIEVE THE SUDDEN ACCELERATION WAS DUE TO A STICKING PEDAL; RATHER A PROBLEM WITHIN THE ELECTRONIC TRANSMISSION CONTROL MODULE, THROTTLE OR ONBOARD COMPUTER. \*JB

DEALER AND THERE WERE NO PRIOR WARNINGS. THE CURRENT AND FAILURE MILEAGES WERE 40000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10315854  
**Date of Incident:** 20100301  
**Vehicle:** 2004 LEXUS GS300  
**Location of Incident:** POWELL, TN

**NHTSA Summary:**  
2004 LEXUS GS 300 HAS REPEATED PROBLEMS WITH ACCELERATOR WHEN PULLING OUT FROM A STOP OR ATTEMPTING TO INCREASE SPEED. AFTER PUSHING ON PEDAL THE CAR BEGINS TO MOVE THEN STOPS ACCELERATING. THEN SURGES AS PEDAL CONTINUES TO BE PRESSED DOWN. I HAVE REPORTED THE PROBLEM SEVERAL TIMES TO DEALERSHIP ONLY TO BE TOLD THAT TOYOTA IS AWARE OF THE PROBLEM BUT THERE IS NO RESOLUTION AFTER 5 YEARS. SEVERAL TIMES I HAVE ATTEMPTED TO PULL OUT FROM A STOP SIGN AS ONE NORMALLY WOULD THEN FORCED TO PUSH THE ACCELERATOR TO THE FLOOR IN AN ATTEMPT TO GET THE VEHICLE MOVING TO AVOID AN ACCIDENT. THIS IS A REPEATING EVENT AND I AM FORCED TO PULL THE EFI FUSE EVERY 5000 MILES WHICH SEEMS TO REDUCE THE EFFECT TEMPORARILY. LEXUS IS/HAS BEEN AWARE OF THIS PROBLEM SINCE THERE WAS 6K MILES ON THE VEHICLE WHICH NOW HAS 60K MILES AND IS OUT OF WARRANTY. I AM OVERLY CAUTIOUS AND FEARFUL WHEN DRIVING THE VEHICLE. IF I NEED TO ACCELERATE TO MERGE INTO TRAFFIC OR JUST NORMAL DRIVING, THE VEHICLE WILL NOT RESPOND BY ACCELERATING. AND I'M ALSO CONCERNED IF THIS IS AN EARLY SYMPTOM THAT TOYOTA IS HAVING WITH RUNAWAY VEHICLE ACCELERATION. THE LEXUS DEALERSHIP ATTRIBUTED THE PROBLEM TO THE ECM AND DRIVE BY WIRE MECHANISM TOYOTA HAS EMPLOYED IN THIS VEHICLE.

**Additional Summary:**

**NHTSA ODI Number:** 10316346  
**Date of Incident:** 20100301  
**Vehicle:** 2009 TOYOTA CAMRY  
**Location of Incident:** WALDORF, MD

**NHTSA Summary:**  
ON MARCH 1 AT 5:15PM I WAS ON I-295 HEADED HOME AND MY 2009 TOYOTA CAMRY LE ACCELERATED AFTER I HAD ALL THREE RECALLS DONE AT THE TOYOTA OF WALDORF. AS I WAS COMING UP TO A S500 MERCEDEZ I ATTEMPTED TO SLOW MY CAR DOWN ONCE I PRESSED THE BRAKE, I FELT THE CAR SWITCHED TO A HIGHER GEAR, I CONTINUES TO PRESS THE BRAKE AS HARD AS I COULD, FINALLY I PULLED OFF THE ROAD TO THE LEFT INTO THE GRASS WHERE I THEN THREW IT IN NEUTRAL TIL IT SLOWED DOWN. I THEN CUT IT OFF AND CALLED TOYOTA TO COMPLAIN. THE SERVICE MANAGER ASKED WOULD I LIKE IT TOWED AND I REPLIED "WHAT DO YOU THINK?" I EXPLAINED TO HER THAT I HAD ALL THE RECALLED DONE ON MY CAR AND I DON'T UNDERSTAND HOW THIS HAPPENED. AFTER THEY TOWED MY CAR THE NEXT MORNING I CALLED TO COMPLAIN TO THE GM THEY THEN TRANSFER ME OVER TO ANOTHER

C-2062

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SERVICE MANAGER AFTER I WAITED FOR THE GM FOR SEVERAL MINUTES. THIS SERVICE MANAGER TOLD ME THEY ARE TRYING TO FIGURE OUT WHATS WRONG AND OFFERED ME A RENTAL CAR. I WENT TO PICK UP THE RENTAL AND I REALIZED AFTER I GOT HOME THAT THERE WERE SEVERAL DIFFERENT MODELS NOT JUST MINE THAT WERE INVOLVED IN THIS RECALL SO I DECIDED TO LOOK UP THIS 2010 TACOMA THAT THEY GAVE ME AND SURE ENOUGH IT WAS ON THE LIST. I DECIDED TO PARK THIS CAR AND RIDE TO THE METRO WHICH DROPS ME OFF HALF OF A MILE FROM MY JOB. I WOULD RATHER TAKE THIS HASSLE THAN TO DRIVE ANY OF THESE RECALL VEHICLES FROM TOYOTA. I HAVE A FAMILY THAT I HAVE TO PROTECT AND IF THIS IS HOW THE "TOYOTA FAMILY" CARE FOR ITS CUSTOMERS THEN I CHOOSE TO NOT DEAL WITH THIS "FAMILY" IN THE FUTURE. I AM REQUESTING FROM TOYOTA THAT THEY PUT ME IN A CAR OF EQUAL VALUE EVEN IF ITS USED AND ONE THAT IS NOT ON THE RECALL LIST. TO ALL THAT HAVE A RECALL MODEL FROM TOYOTA I RECOMMEND THAT YOU BE VERY CAUTIOUS OF THE REPAIRS DONE AND DRIVE EVEN SAFER THAN BEFORE. I HAVE BEEN ON THE PHONE TWICE TODAY WITH THE CORPORATE OFFICE ATTEMPTING TO SPEAK WITH SOMEONE AND BOTH TIMES I WAS PLACED ON HOLD FOR 30 MINUTES AND STILL COULDN'T REACH ANYONE.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316605  
**Date of Incident:** 20100301  
**Vehicle:** 2005 TOYOTA AVALON  
**Location of Incident:** TRENTON, NC

**NHTSA Summary:**  
TL\* THE CONTACT OWNS A 2005 TOYOTA AVALON. HE TOOK THE VEHICLE TO THE DEALER MARCH 1, 2010 FOR THE ACCELERATOR REPLACEMENT. WITHIN TEN MINUTES OF PICKING THE VEHICLE UP FROM THE DEALER, WHILE DRIVING AT 25MPH AND ATTEMPTED TO TURN INTO A DRIVE WAY THE VEHICLE STARTED TO ACCELERATE. HE PUT HIS FOOT ON THE BRAKE BUT THE BRAKE PEDAL WAS HARD TO DEPRESS AND DID NOT RESPOND. HE PUT THE VEHICLE INTO NEUTRAL AND SHUT THE ENGINE OFF. HE WAS ABLE TO RESTART THE VEHICLE AND HE DROVE IT BACK TO THE DEALER. THE DEALER STATED IT MIGHT BE THE COMPUTER BECAUSE IT WAS RE-SEALED. HE HAD NOT DRIVEN THE VEHICLE SINCE MARCH 1ST. THE CONTACT STATED HE IS AFRAID HE WILL EXPERIENCE THE FAILURE AGAIN. THE DEALER TOLD HIM IF HE EXPERIENCED THE FAILURE AGAIN HE SHOULD PUT HIS RIGHT FOOT ON THE GAS PEDAL AND PUT HIS LEFT FOOT ON THE BRAKE. THIS WILL CAUSE THE GAS SUPPLY TO BE CUT OFF AND WILL CAUSE THE ENGINE TO SHUT OFF. THE FAILURE MILEAGE WAS 64,883 AND THE CURRENT MILEAGE WAS 64,900.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316602  
**Date of Incident:** 20100301

**NHTSA Summary:**  
2009 TOYOTA COROLLA-VIN# 1NXBU40E49Z055939. ON 02/13/10 I BROUGHT MY CAR IN FOR THE RECALL WITH THE GAS PEDDL. THEY INSTALLED THE ACCELERATOR REINFORCEMENT BAR INSTALLATION. I DID NOT HAVE A GAS PEDDL PROMBLE BUT BROUGHT THE CAR IN BECAUSE OF THE RECALL. SINCE THEN I NOW HAVE A PROBLEM WHEN I COME TO A FULL STOP AND PUSH DOWN ON GAS PEDDL TO GO MY PEDDL GETS STUCK I NEED TO PRESS HARD TO GET IT MOVING WHICH I NEVER HAD THIS

C-2063

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BEFORE. I CALLED TOYOTA TODAY ABOUT THIS PROBLEM AND I HAVE A APP. MARCH 11/10 TO CHECK IT OUT.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316918  
**Date of Incident:** 20100301  
**Vehicle:** 2010 TOYOTA SIENNA  
**Location of Incident:** TROY, MI

**NHTSA Summary:**  
TOYOTA CIENNA MY2009 ACCELERATED UNEXPECTEDLY AFTER THE CRUISE CONTROL WAS SET. THIS HAPPENED 2 DIFFERENT TIMES WHILE MY WIFE WAS DRIVING IT. I WAS NOT IN THE CAR. MY WIFE HAD TO IMMEDIATELY PRESS THE BRAKE PEDAL TO RELEASE THE AUTO CRUISE. AFTER THE BREAK WAS PRESSED THE AUTOCRUISE RELEASED THE ACCELERATION. OUR CAR IS NOT IN THE RECALL LIST I THINK. WE NEVER TOOK OUR CAR FOR THE RECALL REPAIR AT ANY TIME SINCE WE HAVE HAD IT.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316441  
**Date of Incident:** 20100301  
**Vehicle:** 2010 TOYOTA COROLLA  
**Location of Incident:** DE PERE, WI

**NHTSA Summary:**  
1. REGULAR DRIVING UNDER NORMAL CONDITION, SOMETIMES FOR SEVERAL MINUTES, SOMETIMES FOR A FEW SECONDS. 2. SPEED CONTROL DOES NOT SEEM TO BE CONSISTENT. RPM METER WOULD GO ABOVE NORMAL 2000 REVS PER MINUTE EVEN WHEN THE CAR IS IN NEUTRAL. 3. WAS REPAIRED BY DEALER AS PART OF THE GAS PEDAL RECALL. THE PROBLEM CONTINUES. 4. I DO NOT THINK IT HAS TO DO WITH THE GAS PEDAL, IT APPEARS TO BE A PROBLEM WITH THE THROTTLER CONTROL AS THE RPM METER CLEARLY SHOWS THE REVS ARE WAY HIGHER THAN NORMAL. IN FACT, AFTER THE GAS PEDAL RECALL REPAIR, OUR 4 MONTHS CAR NOW BURNS MORE GAS THAN BEFORE.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10317145  
**Date of Incident:** 20100301  
**Vehicle:** 2008 TOYOTA TUNDRA  
**Location of Incident:** BLACK HAWK, CO

**NHTSA Summary:**  
I HAVE 2008 TUNDRA THAT WAS RECALLED FOR 'ACCELERATION PROBLEMS' AND OSTENSIBLY FIXED, ALTHOUGH I HAD NEVER EXPERIENCED "ANY" PROBLEMS. NOW THAT IS HAS "BEEN FIXED" I DO HAVE A PROBLEM. FROM A STAND-STILL POSITION, I WILL DEPRESS THE ACCELERATOR AND NOTHING HAPPENS. ALL OF A SUDDEN THE ACCELERATOR WILL ENGAGE CAUSING MY TRUCK TO, ALL OF A SUDDEN, JUMP (ACCELERATE). IT DOESNT HAPPEN ALL THE TIME, BUT IM AFRAID THAT IT COULD HAPPEN AT A STOP LIGHT WHERE I WISH TO BEGIN FORWARD - NO RESULTS AND THEN A POSSIBLE SURGE WHERE I COULD POSSIBLE HIT A VEHICLE IN FRONT OF ME.

**NHTSA Summary:**  
TL-THE CONTACT OWNS A 2010 TOYOTA PRIUS 2. THE CONTACT HAS EXPERIENCE SEVERAL TIMES WHEN SHE IS SLOWING DOWN WHILE DEPRESSING THE BRAKE THE VEHICLE SURGES FORWARD. THE CONTACT WAS DRIVING AT 35MPH AND STARTED TO SLOW DOWN WHILE TURNING THE VEHICLE SURGED FORWARD AND MADE A LOUD NOISE. THE CONTACT ASSUMED THAT THE VEHICLE BEHIND HER RAMMED HER. WHEN SHE PULLED OVER TO LOOK THE OTHER VEHICLE DID NOT HIT HER. THE CONTACT STATED THAT THE VEHICLE SOUNDED AS IF IT WAS RAM FROM THE BACK FROM THE LOUD NOISE AND THE FORWARD SURGE. THE CONTACT DOES NOT FEEL SAFE IN THE VEHICLE AND WILL NOT DRIVE IT THE CONTACT SPOUSE DID TAKE THE VEHICLE TO BE INSPECTED. THEY INFORMED THEM THAT THEY COULD LEAVE IT AND SEE IF ITS A RECALL BUT DID NOT TELL THEM WHEN THEY WOULD GET IT BACK. SO THE CONTACT TOOK THE VEHICLE BACK AND NO REPAIRS HAVE BEEN MADE ON THE VEHICLE. THE APPROXIMATE FAILURE MILEAGE WAS 6000 AND THE CURRENT MILEAGE WAS 10000. DF

**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** NATICK, MA

**NHTSA Summary:**  
I WAS REAR-ENDED ON THE HIGHWAY WHILE DRIVING MY 2002 TOYOTA CAMRY. WHEN I TRIED TO SLOW DOWN AND MOVE INTO THE BREAKDOWN LANE, THE CAR ACCELERATED. I ENDED UP GOING DOWN AN EMBANKMENT HITTING SEVERAL TREES. THE CAR WAS EVENTUALLY SPUN AROUND AND CRASHED REAR END INTO A TREE. THE CAR WAS TOTALED. MY PASSENGER AND I EXPERIENCED CONCUSSION SYNDROME ALONG WITH MUSCLE SPASMS IN THE NECK, BACK, AND ANKLE. WE WERE TAKEN BY AMBULANCE TO THE NEW BRITAIN GENREAL HOSPITAL WHERE WE WERE TREATED AND RELEASED. WE ARE BOTH RECEIVING FOLLOW-UP MEDICAL CARE.

**Additional Summary:**

**NHTSA ODI Number:** 10320207  
**Date of Incident:** 20100301  
**Vehicle:** 2003 TOYOTA RAV4  
**Location of Incident:** MIDDLE ISLAND, NY

**NHTSA Summary:**  
I WAS DRIVING MY 2003 RAV4 ABOUT 2 WEEKS AGO WHEN IT REFUSED TO ACCELERATE FROM A STOP AT A RED LIGHT, I WAS IN THE MIDDLE OF THE INTERSECTION(COASTING BASICALLY) WITH A LINE OF UNHAPPY TRAFFIC BEHIND ME BEFORE IT SLAMMED VIOLENTLY INTO HIGH GEAR AND ALMOST CAUSED ME TO CRASH INTO THE OVERPASS WALLS. IT HAS SINCE THEN BEEN INTERMITTENT, BEING FINE FOR A DAY OR SO THEN DOING THE SAME THING, IN VARYING DEGREES OF SEVERITY. THE CHECK ENGINE LIGHT WENT ON, AND I MADE AN APPOINTMENT TO BRING IT IN TO TOYOTA FOR DIAGNOSTICS. THEY QUOTED ME \$6800 TO REPLACE THE ECM COMPUTER AND THE TRANSMISSION. THIS VEHICLE HAS BEEN REGULARLY MAINTAINED AND ONLY HAS 119,000 MILES. I HAVE SINCE FOUND OUT THAT THIS IS A VERY DANGEROUS AND COMMON PROBLEM WITH THIS YEAR OF TOYOTA THAT THEY HAVE KNOWN ABOUT FOR A WHILE NOW. I CAN'T DRIVE THE CAR AT ALL UNTIL THE COMPUTER IS REPLACED. AND THEN IT WILL NEED A TRANSMISSION SHORTLY AFTERWARD ACCORDING TO BOTH TOYOTA AND THE OTHER RAV4 OWNERS IN THIS SITUATION. IF THE COMPUTER HAD BEEN REPLACED PRIOR TO THE PROBLEM DEMONSTRATING ITSELF IN THE SHIFTING DIFFICULTIES, THERE

C-2067

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

WOULD HAVE BEEN NO DAMAGE TO THE TRANSMISSION AT ALL. I THINK THAT TOYOTA IS TO BLAME FOR NOT ADVISING RAV4 DRIVERS OF THIS DANGEROUS DEFECT AND THE RELATIVELY CHEAP REPAIR THAT COULD HAVE SAVED ME MUCH TIME AND MONEY. I NEED A CAR TO WORK, SO I EITHER PAY TOYOTA \$6800 OR BUY A NEW CAR. AND IN THIS ECONOMY I DON'T KNOW IF I'LL BE ABLE TO GET THE FINANCING TO DO EITHER.

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Vehicle:** 2003 TOYOTA RAV4  
**Location of Incident:** LEVITTOWN, NY

**NHTSA Summary:**  
MY PROBLEM IS WITH MY 2003 TOYOTA RAV 4. RECENTLY I WAS DRIVING AND THE VEHICLE STARTED TO HAVE SOME PROBLEMS. FIRST, THE VEHICLE WOULD NOT ACCELERATE AS I WOULD BE ENTERING TRAFFIC, FOR EXAMPLE, ON HIGHWAYS. A NUMBER OF TIMES IT WOULD START ACCELERATING AND THEN SLOW DOWN OR LOSE ACCELERATION, THIS CAUSED MANY ANXIOUS MOMENTS AS OFTEN A CAR/TRUCK WOULD BE COMING UP BEHIND ME. I WOULD TRY TO ACCELERATE AND STEP ON THE GAS AND THE CAR WOULD NOT REALLY MOVE UNTIL ALL OF A SUDDEN THE GEARS WOULD SHIFT AND THE CAR WOULD JUMP FORWARD AND SUDDENLY START MOVING. THIS WAS SCARY ON A NUMBER OF OCCASIONS, ESPECIALLY WHEN I HAD MY SON IN THE CAR. ALSO, THE CAR WOULD AUTOMATICALLY SHIFT GEARS, OR DROP GEARS WHILE DRIVING. I WOULD BE IN TRAFFIC AND WE WOULD BE MOVING ALONG WHEN SUDDENLY THE CAR WOULD JUMP INTO GEAR AND LITERALLY JUMP FORWARD SOMETIMES PROPELLING THE CAR FORWARD A LITTLE. ALSO WHILE DRIVING, BOTH LOCAL ROADS AND ON HIGHWAYS THE CAR WOULD DROP GEARS AND SUDDENLY SLOW DOWN AND THEN SHIFT BACK INTO GEAR. THE CAR HAS 95000 MILES ON IT. WE WERE TOLD BY A MECHANIC (WHO IS NOT FIXING THE CAR) THAT TOYOTA HAD ADVISED THAT THERE IS A PROBLEM WITH A COMPUTER-THE ECM- IN THE RAV 4, THAT WILL CAUSE THE CAR TO JUMP AND SHIFT GEARS AND POSSIBLY RUIN THE TRANSMISSION. WE HAVE RECENTLY BEEN INFORMED BY TOYOTA THAT THE ECM NEEDS TO BE REPLACED AND THAT THE TRANSMISSION IS DAMAGED AND ALSO NEEDS TO BE REPLACED.  
**Additional Summary:**

**Location of Incident:** LOWELL, MA  
**NHTSA Summary:**  
TL\* THE CONTACT OWNS A 2002 TOYOTA RAV4. WHILE SITTING IDLE, HE DEPRESSED THE ACCELERATOR PEDAL WHEN THERE WAS AN ATYPICAL SUDDEN INCREASE IN ENGINE RPM'S OF UP TO 4,000. THE VEHICLE THEN ATTEMPTED TO STALL WITHOUT WARNING, HOWEVER SUDDENLY THE VEHICLE SHIFTED GEARS AND ABNORMALLY ACCELERATED. THE CONTACT CONTINUED TO DEPRESS THE BRAKE PEDAL IN AN ATTEMPT TO DECREASE VEHICLE SPEED. HE WAS ABLE TO STOP THE VEHICLE AND THE VEHICLE WAS TAKEN TO THE DEALER WHERE THEY VERIFIED THE ELECTRONIC CONTROL MODULE (ECM) WAS THE CAUSE OF THE UNINTENDED ACCELERATION. THE CONTACT ADVISED THIS WAS NOT THE FIRST TIME HE ENCOUNTERED UNINTENDED ACCELERATION IN THIS VEHICLE. THERE WERE NO REPAIRS MADE TO THE VEHICLE. THE FAILURE MILEAGE WAS \$6,900 AND THE CURRENT WAS \$7,000.

**Vehicle:** 2010 TOYOTA PRIUS  
**Location of Incident:** MECHANICSVILLE, VA

**NHTSA Summary:**

I MAY BE ABLE TO HELP WITH YOUR TOYOTA GAS PEDAL PROBLEM. I RENTED A PRIUS OUT IN UTAH A COUPLE OF WEEKS AGO. WHILE TRAVELING THROUGH THE MOUNTAINS, THE CAR SEEMINGLY ACCELERATED UNCONTROLLABLY. I AM A MECHANICAL ENGINEER BY TRADE AND A HABITUAL GEARHEAD. I ALSO DID NOT BUY THE ACCELERATOR STICKING PROBLEM, SO I BEGAN INVESTIGATING THE INCIDENT ON MY OWN. THE SECOND TIME IT HAPPENED, I WAS TRAVELING UP THE SIDE OF A MOUNTAIN IN A NEIGHBORHOOD. THE CAR SUDDENLY LURCHED FORWARD. THE PROBLEM IS ACTUALLY QUITE SIMPLE. THE CRUISE CONTROL IS ATTACHED TO THE STEERING WHEEL AND MOVES WITH THE WHEEL. IF THE CRUISE IS ACTIVATED, SOMETIMES IN A TURN IT IS POSSIBLE TO BUMP THE CRUISE LEVER AND "RESUME" OR "ACCELERATE". DON'T BELIEVE ME - SIT IN ONE AND LOOK FOR YOURSELF. NEED MORE PROOF, HAVE A 62" PERSON DRIVE THE CAR AND POSITION THE WHEEL BETWEEN HIS/HER LEGS. I BET YOU AGREE! SINCERELY, SCOTT STAYLOR PRESIDENT SONIC TOOLS, LP ASHLAND, VA

**Location of Incident:** MORTON, PA

**NHTSA Summary:**

WHILE IN REVERSE AND BACKING MY 2004 TOYOTA COROLLA INTO MY GARAGE THE CAR SUDDENLY ACCELERATED AND I HIT THE REAR OF THE GARAGE. I AM POSITIVE I DID NOT HAVE MY FOOT ON THE GAS PEDAL. THE ENGINE WAS STILL RACING WHEN I PUT IT IN DRIVE AND DROVE OUT OF THE GARAGE. I HAD TO RUN INTO A SNOWPILE ON THE FRONT LAWN TO STOP THE VEHICLE. AFTER THE ENGINE WAS TURNED OFF I LOOKED AT THE FLOOR MAT AND SAW NOTHING WRONG WITH IT. THIS SAME PROBLEM WHILE REVERSING INTO THE GARAGE HAPPENED IN SEPT 2005. AT THE TIME I JUST THOUGHT THE MISTAKE WAS MINE, NOW AFTER THE SECOND INCIDENT I AM CONVINCED THERE IS A MECHANICAL PROBLEM WITH THE CAR.

**NHTSA Summary:**

FOLLOW-UP LTR TO NHTSA RE 4/8/10 CORRESPONDENCE ON BEHALF OF RE INCIDENT OF SUDDEN UNINTENDED ACCELERATION AFTER RECALL FIX BY DEALER ON HER 2010 TOYOTA HIGHLANDER. \*KB THE CONSUMER BECAME CONCERNED ABOUT THE RECENT ACCELERATOR PEDAL ISSUE AND CONTACTED THE DEALER TO SEE IF SHE COULD GET OUT OF THE LEASE. THE DEALER INFORMED HER THERE WAS A FIX TO THE PROBLEM, SO THE CONSUMER MADE AN APPOINTMENT ON FEBRUARY 15, 2010. ON MARCH 2, 2010 THE ACCELERATOR PEDAL BECAME STUCK MULTIPLE TIMES. TWICE, THE ACCELERATOR PEDAL STUCK WHEN TAKING OFF. IT WAS EXTREMELY HARD TO PUSH, TO THE POINT WHERE IT ACTUALLY WENT DOWN, AND THE VEHICLE JERKED. THEN ON THE WAY HOME, THE CONSUMER PUSHED THE BRAKE PEDAL DOWN TO SLOW DOWN AND NOTICED THE VEHICLE SEEMED TO BE GOING MUCH FASTER. SHE PUSHED HARDER AND HARDER ON THE BRAKE AND WHEN SHE LOOKED DOWN THE RPM'S WERE GOING STRAIGHT UP AND SHE WAS NOT SLOWING DOWN. SHE CONTINUED TO HOLD THE BRAKE PEDAL DOWN AND AFTER A FEW MINUTES THE BRAKES STARTED WORKING. THE CONSUMER CONTACTED THE DEALER THE NEXT DAY, BUT WAS INFORMED THERE WAS NOTHING THEY COULD DO SINCE THE FIX HAD ALREADY BEEN COMPLETED. \*JB

**NHTSA Summary:**

I OWN A 2008 TOYOTA CAMRY THAT WAS ONE OF THE VEHICLES RECALLED. MY DEALER DID PROVIDE ME WITH A RENTAL CAR FOR THREE DAYS AND REPAIRED THE GAS PEDAL ON 2/05/10. TODAY - WHILE OUT ON THE HIGHWAY AND STARTING UP A SMALL HILL, WHEN I TOUCHED THE GAS PEDAL - IT STARTED REVING UP REALLY LOUD, I IMMEDIATELY DID WHAT I HAVE BEEN TOLD TO DO - PUT THE BRAKE ON HARD AND

C-2078

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

FINALLY THE REVING STOPPED. THE CAR THEN STARTED TO DRIVE OK AGAIN. I AM CONCERNED THAT - HAD I NOT PUT THE BRAKE ON HARD - THE CAR WOULD HAVE GONE OUT OF CONTROL. THIS IS NOT A NORMAL REACTION! I DID CALL MY DEALER AND PLAN TO TAKE THE CAR BACK IN TOMORROW TO HAVE IT CHECKED AGAIN. I TRAVEL A GREAT DEAL AND AM WORRIED ABOUT MY SAFETY. I AM REPORTING THIS IN CASE THE UNFORSEEN SHOULD HAPPEN. ALSO - TO DATE - THERE HAS BEEN NO RESOLUTION TO THE CAR MAT ISSUE. UPDATED 03/09/10 \*BF

**Vehicle:** 2010 TOYOTA COROLLA  
**Location of Incident:** HIGH POINT, NC

**NHTSA Summary:**

I DRIVE TOYOTA COROLA LS 2010. I WAS DRIVING TO WORK TODAY APPROXIMATELY WITH 45MPH. I WAS GETTING READY TO TAKE AN EXIT FROM THE HIGHWAY. I SAW COUPLE CARS WERE STOPPED IN THE MIDDLE OF THE EXIT APPROXIMATELY 100 METER AWAY FROM ME. I DECIDED TO REDUCE THE SPEED AND GETBACK TO THE HIGHWAY/TO GET AROUND THEM SO I CAN TAKE MY EXIT. I HIT MY BREAK SLIGHTLY TO SLOW DOWN MY CAR DID NOT EVEN CHANGE SPEED, I TRIES COUPLE TIMES NOTHING HAPPENED. THEN I DECIDED TO STEP ON THE BREAK ALL THE WAY MY CAR DID NOT CHANGE THE SPEED AT ALL IT WAS GOING AT THE SAME SPEED. MY CAR WAS TRAVELING STRAIGHT ROAD FOR 7-8 SECONDS, THEN I HAD TO MAKE A QUICK DECISION SO I WILL NOT HIT THE CARS THAT WAS ONFRONT OF ME(THEY WERE STOPPED IN THE MIDDLE OF THE ROAD FOR SOME REASON) BECAUSE I WAS GETTING TOO CLOSE. I DECIDED TO GET BACK TO HIGHWAY SO I WILL NOT HIT ANYONE. BUT AFTER I TRIED TO GET BACK TO THE HIGHWAY I TOTALLY LOST MY CONROL OF THE CAR. THE CAR MOVED WITH NO CONTROL FOR SEVERAL SECONDS THEN I AND UP IN THE MIDDLE OF THE HIGHWAY. I WAS LUCKY EVERYONE WAS BEHIND ME AND THEY STAYED AWAY FROM MY CAR. I JUST TOOK MY CAR TO BE FIXED FROM THE STICKING ACCELERATION PROBLEM. I BELIEVE MY BREAKS DID NOT WORKED AT THAT POINT AND MY CAR WAS MOVING WITH THE SAME SPEED. AFTERWARD I WAS ABLE TO MOVE MY CAR AND MY BREAKS WERE WORKING. I AM WORRIED TO DRIVE THAT CAR. I DO NOT FEEL SAFE. I COULD OF HURT THE LADY AND HER KIDS THAT WERE BEHIND ME.

**Vehicle:** 2010 TOYOTA COROLLA  
**Location of Incident:** WALLA WALLA, WA

**NHTSA Summary:**

I HAVE A 2010 TOYOTA COROLLA THAT IS PART OF THE ACCELERATOR PEDAL REINFORCEMENT BAR RECALL/INSTALLATION. I HAVE NOTICED ANOTHER PROBLEM THAT APPEARS TO ALSO INVOLVE THE ACCELERATOR. THIS VEHICLE HAS A 5 SPEED MANUAL TRANSMISSION. THE PROBLEM OCCURS IN BOTH 3RD AND 4TH GEAR. THIS PROBLEM IS NOT CONSISTENT MEANING IT IS NOT ALWAYS NOTICED EVERY TIME I DRIVE, I WOULD MAINTAIN THAT IT OCCURS AT LEAST 50% OF THE TIME HOWEVER. PROBLEM: I ATTEMPT TO MAINTAIN A CONSTANT SPEED FOR INSTANCE IN 3RD GEAR AT 30 MPH, THE VEHICLE FEELS AS IF IT WANTS TO SPEED UP, I THEN REMOVE SOME PRESSURE FROM THE ACCELERATOR, THE VEHICLE THEN SLOW BY JERKING, I THEN ATTEMPT TO ACCELERATE AND THE VEHICLE JERKS AGAIN. BOTTOM LINE IS I CAN NOT MAINTAIN A CONSTANT SPEED. THE ROAD CONDITIONS DO NOT MATTER. FLAT, HILL, BUMPY, SMOOTH, WET DRY. 30 MPH, 31 MPH, 32, MPH ETC. I CANNOT MAINTAIN A CONSTANT SPEED IN 3RD AND 4TH GEAR. I AM NOT SURE OF AN APPROXIMATE DATE, IT HAS HAPPENED NUMEROUS TIMES SINCE I PURCHASED THE VEHICLE IN AUGUST OF 2009. I WILL JUST ENTER A RANDOM DATE BELOW.

**Additional Summary:**

**NHTSA ODI Number:** 10316597  
**Date of Incident:** 20100303  
**Vehicle:** 2010 TOYOTA CAMRY  
**Location of Incident:** ANN ARBOR, MI

**NHTSA Summary:**

TOYOTA CAMRY (RENTED FROM HERTZ ANN ARBOR SHERATON) DELAYED RESPONSE WHEN REMOVING FOOT FROM ACCELERATOR PEDAL. VEHICLE MAINTAINS SPEED FOR A VERY NOTICEABLE 1 OR 2 SECONDS. 100% REPEATABLE WHILE DRIVING AT HIGHWAY SPEED. THE VEHICLE ACTUALLY REMAINS UNDER POWER EVEN THOUGH THE DRIVER HAS REMOVED THE INPUT COMMAND. I OBSERVED THE SAME DELAY EACH TIME I REMOVED MY FOOT FROM THE ACCELERATOR PEDAL. EVEN BEING AWARE OF THIS SITUATION I WAS CAUGHT OFF GUARD WHEN A TRUCK CHANGED LANES IN FRONT OF ME. I REMOVED MY FOOT EXPECTING TO SLOW DOWN ONLY TO REALIZE THAT THE VEHICLE CONTINUED AT SPEED CLOSING THE GAP BETWEEN ME AND THE TRUCK WHILE THE TRUCK DECELERATED. WHEN I REMOVED MY FOOT FROM PEDAL AND SHIFT INTO NEUTRAL TO REMOVE THE LOAD, I WITNESSED THE RPM WILL INCREASE 400-1000 RPM DEPENDING ON TERRAIN AND AMOUNT THE THROTTLE WAS DEPRESSED TO MAINTAIN VEHICLE SPEED. THIS RPM SPIKE IS BRIEF IN DURATION (1 SECOND OR LESS). I REPEATED THIS AN ESTIMATED 30 TIMES UNDER VARIOUS GRADE CONDITIONS. (OHIO TURNPIKE, I-475, US 23 NORTHBOUND MICHIGAN). THE WORST CASE BEING DRIVING UP A SLIGHT GRADE MAINTAINING 2100 RPM. I FULLY REMOVED MY FOOT FROM THE ACCELERATOR PEDAL, SHIFTED INTO NEUTRAL, AND OBSERVED A BLIP TO 3100 RPM.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TL\*THE CONTACT OWNS A 2010 TOYOTA COROLLA. WHILE DRIVING 50 MPH THE CONTACT APPLIED THE BRAKES AND THE VEHICLE CONTINUED TO ACCELERATE. THE CONTACT ENGAGED THE EMERGENCY BRAKE TO STOP THE VEHICLE. THE MANUFACTURER INFORMED THE CONTACT THAT THE BRAKING SYSTEM PERFORMED ACCORDINGLY. THE CONTACT CALLED THE DEALER TO SCHEDULE AN APPOINTMENT FOR THE RECALL REPAIR. THE FAILURE IS A DANGEROUS SAFETY RISK AND COULD CAUSE A CRASH TO OCCUR. THE FAILURE MILEAGE WAS 2,200.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316673  
**Date of Incident:** 20100303  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** GUELPH, ON

**NHTSA Summary:**  
MY 2007 CAMRY HESITATES WHEN TRYING TO ACCELERATE FROM A STANDSTILL, AND RPM KEEPS DROPPING FROM 2000 RPM TO 1000 RPM FOR A SECOND AND BACK TO 2000 RPM AS I'M TRYING TO MAINTAIN SPEED. IT COULD MAKE MY CAR TO SLIDE ON ICY ROAD BECAUSE OF THIS ENGINE BRAKING, AND IT HAPPENS EVERY TIME I JUST TOUCH GAS PEDAL AND LET GO RPM DROPS AND GOES BACK TO CRUISING RPM ALL IN 1 SECOND. THIS HAPPENS AS SOON AS I REMOVE MY FOOT OF THE GAS PEDAL, CAUSING LIKE BRAKING FEELING. I TOLD TOYOTA DEALERSHIP IN GUELPH, ONTARIO ABOUT THIS PROBLEM BUT THEIR MASTER SERVICE ADVISOR CRAIG ALLEN SAYS THAT IS NORMAL. I BELIEVE THAT THERE IS ELECTRONIC THROTTLE ISSUE.

CARE/ROADSIDE ASSISTANCE OR THE TOYOTA OF BOWIE DEALERSHIP WOULD TOW IT TO THE DEALERSHIP I PLACED A CLAIM WITH MY INSURANCE COMPANY USA. WHEN I GOT TO THE DEALERSHIP THEY WERE EXTREMELY UNHELPFUL SAYING I HAD TO MAKE A COMPLAINT WITH TOYOTA AS THEY WERE NOT TOYOTA BUT AN INDEPENDENT DEALERSHIP. THEY DID NOT WANT TO LOOK AT IT SINCE IT LOOKED FINE ON ONE SIDE BUT THEY DIDN'T EVEN WANT TO HEAR ABOUT THE UNDER CARRIAGE. THE CAR IS THERE WAITING FOR MY INSURANCE ADJUSTER TO LOOK AT IT. THEY ALSO ADVISED THAT I NEEDED TO COMPLAIN TO NHTSA.GOV SINCE THERE'S NOTHING WRONG -- WITHOUT EVEN LOOKING AT IT THEY SAID THIS. I JUST HAD THE CAR IN THE 90K AND THEN FOR ELECTRONICS PROBLEM SINCE OVER 7 TIMES IF YOU DROVE THE CAR THEN SHUT IT OFF THEN TRY TO RESTART IT 5 MINUTES LATER ALL THE LIGHTS WOULD COME ON BUT YOU COULDN'T START THE ENGINE OR DO ANYTHING UNTIL THE ELECTRONICS UNFROZE. THEY SAID IT WAS THE BATTERY AND THE REMOTE BUT I DISAGREE SINCE THEY SAID TO MAKE SURE EVERYTHING IS OFF BEFORE YOU TURN IT OFF. I ASK WHY AND THEY JUST SAID THAT'S HOW TOYOTA SAYS TO DO IT. TODAY ONE OF THE FIRST THINGS THEY ASKED WAS IF THE DEFROSTER WAS ON OR OTHER ELECTRONICS. AS YOU CAN IMAGINE I AM EXTREMELY UPSET!!! TO ASK ME TO DRIVE IT TO SEE IT DOES IT AGAIN WAS AN EXTREMELY INAPPROPRIATE RESPONSE TO MY SITUATION.

**NHTSA Summary:**  
I HAVE A RECALLED 2010 TOYOTA COROLLA THAT HAD THE SUDDEN ACCELERATION PROBLEM. I HAD A MINOR ACCIDENT ON MARCH 3RD 2010 THAT INVOLVED MY OTHER VEHICLE. AS I WAS PUTTING MY COROLLA INTO REVERSE & IT JUMPED HARD BACKWARDS LIKE IT WAS PROPELLED I HAD BARELY TAPPED THE GAS, THE DRIVERS SIDE REAR BUMPER HIT MY OTHER CAR THERE WAS NO DAMAGE TO THAT ONE BUT MY COROLLA SUBSTANTIATED A MINOR, BUT BIG ENOUGH DENT TO THE LOWER BACK BUMPER, I CALLED THE POLICE MADE A REPORT AND NOW I AM WAITING ON SOMEONE FROM TOYOTA TO GET BACK TO MY HUSBAND AND I TO GET THIS COROLLA INSPECTED, IT CAN'T BE REPAIRED IN THE BACK UNTIL THAT IS DONE! MY HUSBAND HAS ON MANY OCCASIONS HIMSELF FELT THE CAR SURGE WHEN STEPPING ON THE PEDAL ITS HAPPENED TO HIM BACKING UP, GOING FORWARD AND DRIVING DOWN MAIN ROADS! MY CAR IS BRAND NEW THE VALUE OF IT AND WHAT WE PAY MAKES ME SICK TO EVEN KNOW THESE THINGS ARE HAPPENING! I LOVE MY TOYOTA AND HAD A BRAND NEW 2009 YARIS FOR YEAR BEFORE WE TRADED IT IN ON THIS! ANYHOW MY DEALER 6FIXED6 THE PEDAL BUT THE PROBLEM HAS HAPPENED SINCE THE FIX. I CONTACTED THE DEALER AND WAS TOLD THERE WAS NOTHING MORE THEY CAN DO. I HAVE CONTACTED TOYOTA AND THEY ARE SENDING SOMEONE TO INSPECT THE CAR. IF YOU CAN SEND SOMEONE TO INSPECT THE CAR, PLEASE CALL ME AT 270-304-7836 OR 270-352-3465. THANK YOU.

**NHTSA Summary:**  
2007 TOYOTA CAMRY - PRIOR TO RECALL FIX THE CAR ACCELERATED AT FULL SPEED 5 TIMES. CAR WAS "FIXED" UNDER RECALL 2 WEEKS AGO. TODAY, MARCH 4, THE CAR ONCE AGAIN ACCELERATED TO FULL SPEED. ACCLERATOR PEDAL SEEMED TO COLLAPSE TO THE FLOOR AND REMAINED IN THE POSITION UNTIL I USED MY TOW TO PULL IT UP. JOHN MOSCICKI 4 INDEPENDENCE AVE LAKE OSWEGO OR 97035 503 484 3574  
**Additional Summary:**  
From Associated Press news article "More than 100 complaints lodged over fixed Toyotas":

"John Moscicki, of Lake Oswego, Ore., told the AP his 2007 Camry accelerated on its own five times before he got the vehicle fixed under the floor mat recall last month.

On March 4, his repaired Camry took off from a standing stop on the freeway and accelerated to 50 mph before Moscicki managed to stop it by shifting into neutral, hitting the brake with his left foot and pulling back the gas pedal with his right.

"It just went to the floor like some other system had control of it," said Moscicki, who raced high-performance sports cars and previously owned a Porsche restoration business.

His Toyota dealer had the Camry for a week, and Toyota sent in a field engineer to examine the car without finding anything wrong. Moscicki said he had planned to give the vehicle to his college-age daughter but now intends to get rid of it. "I wouldn't let her anywhere near this car," he said."

**Date of Incident:** 20100304  
**Vehicle:** 2008 TOYOTA SIENNA  
**Location of Incident:** SALISBURY, MD

**NHTSA Summary:**

WE RECENTLY PURCHASED A USED 2008 TOYOTA SIENNA. JUST BEFORE 10 A.M. TODAY, I PULLED INTO THE DRIVEWAY, JUST LIKE I HAVE EVERY DAY FOR 13 1/2 YEARS, TURNED TOWARD THE GARAGE, FOLLOWING THE CURVE OF THE DRIVEWAY. I TOUCHED THE BUTTON TO OPEN THE LEFT GARAGE DOOR, JUST LIKE I ALWAYS DO. I WAS DRIVING VERY SLOWLY, BECAUSE I WAS ABOUT READY TO STOP THE CAR AND PARK IN MY DRIVEWAY. ALL OF A SUDDEN, THE CAR LURCHED FORWARD AND I THINK IT SPED UP. I DON'T KNOW WHY THE CAR WAS MOVING FORWARD! IT HAPPENED SO FAST AND I RECALL THINKING, GOSH, I DON'T WANT THE CAR TO GO IN THE GARAGE!! I WAS PRESSING THE BRAKE AS HARD AS I COULD, AND I TURNED THE WHEEL TO THE RIGHT, TRYING TO AVOID THE CAR ACCELERATING INTO THE GARAGE! THE CAR HIT THE CORNER OF THE HOUSE THAT DIVIDES THE TWO GARAGE DOORS. IT DID STOP AND I PUT IT IN REVERSE RIGHT AWAY TO BACK UP. THE FRONT CORNER OF THAT HOUSE SECTION NOW NEEDS TO BE REPAIRED, AND A FLOWER POT (LIGHTWEIGHT STYROFOAM) BROKE WHEN I TURNED THE WHEEL THAT DIRECTION. THIS WAS A VERY FRIGHTENING EXPERIENCE AND IT HAPPENED SO FAST! I AM AFRAID TO DRIVE MY CAR! I HAVE MADE AN APPOINTMENT TO HAVE IT LOOKED AT BY THE TOYOTA DEALER WHERE WE BOUGHT IT.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10319348  
**Date of Incident:** 20100304  
**Vehicle:** 2008 TOYOTA TUNDRA  
**Location of Incident:** BOLIVAR, MO

**NHTSA Summary:**

I WAS AT THE WALMART IN BOLIVAR, MO 6:30 PM ON MARCH 4TH. GOT IN MY TUNDRA PUT IT IN REVERSE, BACKED UP AND PUT IT IN DRIVE. AS I PUSHED ON THE ACCELERATOR TO GO FORWARD SLOWLY THE TRUCK ACCELERATED ON ITS OWN. I APPLIED THE BRAKE AND TURNED LEFT TO AVOID HITTING A CAR AND HIT A YELLOW CONCRETE POST WHILE THE TRUCK CONTINUED TO GO FORWARD ABOUT 20 FEET. I THEN PUT IT IN NEUTRAL AND FINALLY GOT IT TO STOP. I THEN TRIED TO OPEN MY DOOR AND IT WOULD NOT OPEN. I WENT AHEAD AND DROVE HOME ABOUT 3 MILES AND PARKED THE TRUCK. I CALLED MY INSURANCE COMPANY THAT NIGHT TO REPORT THE ACCIDENT AND LEFT A MESSAGE. I CALLED THEM AGAIN THE MORNING OF MARCH 5TH, 2010 AND GAVE THEM THE DETAILS. A CLAIMS ADJUSTER HAS ASSESSED THE DAMAGE ON THE BODY OF THE TRUCK BUT THOSE REPAIRS HAVE NOT YET BEEN COMPLETED. ON MARCH 11TH, 2010 I RECEIVED A RECALL NOTICE IN THE MAIL FROM TOYOTA ON THE TRUCK FOR A ACCELERATOR PEDAL REINFORCEMENT BAR INSTALLATION. I CALLED THE DEALERSHIP THAT SAME DAY TO SCHEDULE THE RECALL AND THEY SAID THEY COULD NOT GET ME IN UNTIL APRIL. WHEN I TOLD THEM ABOUT THE ACCIDENT THEY CHANGE MY SCHEDULED TIME TO THAT SAME DAY, MARCH 11TH AT 6:00 PM. I DROVE THE TRUCK TO THE DEALERSHIP AND THEY INSTALLED AN ACCELERATOR PEDAL REINFORCEMENT BAR. I HAVE OWNED THIS TRUCK FOR APPROXIMATELY 2 YEARS AND THIS IS THE FIRST TIME THE ACCELERATOR STUCK. I HAVE A FLAWLESS DRIVING RECORD AND CONSIDER MYSELF TO BE A VERY CAREFUL DRIVER. I AM CONFIDENT THIS WAS NOT A DRIVER ERROR. I WAS IN A BUSY WALMART PARKING LOT DIRECTLY IN FRONT OF THE ENTRANCE OF THE STORE SO I WAS NATURALLY BEING CAUTIOUS.

**Vehicle:** 2006 TOYOTA HIGHLANDER  
**Location of Incident:** HUNTINGTON BEACH, CA  
**NHTSA Summary:**  
EVER SINCE WE PURCHASED OUR 2006 TOYOTA HIGHLANDER WE HAVE RANDOMLY EXPERIENCED ACCELERATION PROBLEMS. AFTER SLOWING DOWN, WE SLOWLY ACCELERATED AND WOULD EXPERIENCE A SUDDEN THRUST BUT COULD SLOW IT DOWN BY LESSENING THE PRESSURE ON THE GAS PEDAL OR BY BRAKING. THIS WOULD HAPPEN AT RANDOM 2 OR 3 TIMES PER YEAR. WE BOTH THOUGHT IT WAS OUR FAULT UNTIL WE READ ABOUT THE TOYOTA ACCELERATION PROBLEMS. NOW, WE DON'T BELIEVE IT IS OUR FAULT AND IS A BUILT-IN PROBLEM. WE RECENTLY HAVE TALKED TO THE TOYOTA SERVICE DEPARTMENT AND THEY REFERRED US TO THE TOYOTA HEADQUARTERS FOR FILING A COMPLAINT WITH THEM. WE WERE TOLD THIS CAR IS NOT ON THE RECALL LIST. SINCE OUR PROBLEM DOES NOT SEEM AS BAD AS OTHER YEAR'S CAR, IT MAY BE THAT THIS IS THE YEAR THE PROBLEM DEVELOPED IN TOYOTA AND GOT PROGRESSIVELY WORST AS ADJUSTMENTS WERE MADE TO THE CAR'S PROGRAMMING OR ENGINE. THE LAST INCIDENT INVOLVING THIS ACCELERATION WAS IN LATE FEBRUARY OR EARLY MARCH, 2010. WE HOPE THIS INFORMATION MAY BE OF SOME HELP TO YOU AND US IN SOLVING OUR PROBLEM. \*TR

**NHTSA Summary:**  
I HAD TWO RECALLS DONE ON MY AUTO ON MARCH 4, 2010. THESE RECALLS DEALT WITH THE ACCELERATION PEDAL AND AN OIL LINE. SINCE THE RECALL OF THE ACCELERATION PEDAL WAS DONE MY CAR ON OCCASION HAS STALLED WHEN THE PEDAL IS DEPRESSED. IT WILL HESITATE WHILE I DEPRESS THE PEDAL UP TO AN INCH OR SO. FINALLY IT WILL START TO CREEP AND THEN FINALLY START MOVING. THIS HAS HAPPENED TWICE WHEN I WAS ENTERING AN INTERSTATE HIGHWAY AND AGAIN AS I PULLED AWAY FROM THE CURB OF MY HOUSE. ADDITIONALLY, THE TRANSMISSION SHIFTING IS VERY ERRATIC AT TIMES. ONCE AGAIN ALL OF THIS STARTED AFTER I HAD THE RECALL DONE. BEFORE THIS MY AUTO RAN PERFECTLY WITH NO ISSUES OTHER THAN AN OCCASIONAL HARD DOWN SHIFT WHEN COMING TO A STOP. I HAVE BEEN TO THE LEXUS DEALERSHIP IN FREDERICK, CO TWICE. THEY ARE UNABLE TO ADDRESS THESE PROBLEMS IN A SATISFACTORY MANNER. THE ACCELERATION DELAY IS A SAFETY ISSUE AND NEEDS TO BE ADDRESSED BY TOYOTA.

2007 TOYOTA CAMRY. GAS PEDAL ISSUES \*GR THE CONSUMER STATED AS HE WAS EXITING HIS DRIVEWAY, HE SAW HIS NEIGHBOR COMING DOWN THE HILL, BUT HIS VEHICLE KEPT GOING FORWARD AND HE JUST BARELY MISSED HITTING HIS NEIGHBOR. LATER THAT DAY, WHEN THE CONSUMER APPROACHED AT AN INTERSECTION, ANOTHER VEHICLE WAS IN FRONT HIM, BUT SUDDENLY THAT MOTORIST SLAMMED ON HER BRAKES, AS ANOTHER VEHICLE WAS APPROACHING AT FULL SPEED. THE CONSUMER WAS A CAR LENGTH BEHIND THE VEHICLE SO, HE REMOVED HIS FOOT FROM THE GAS PEDAL AND STEPPED ON THE BRAKE, BUT THE VEHICLE KEPT GOING EVEN THOUGH THE CONSUMER WAS PRESSING THE BRAKE AS HARD AS HE COULD. THE CONSUMER HIT THE OTHER VEHICLE AT ABOUT 5 MPH. THE CONSUMER STATED HE EXPERIENCED ANOTHER INCIDENT O SUDDEN ACCELERATION PRIOR TO THE ACCIDENT WHICH HE THOUGHT AT FIRST THAT HIS FOOT LEFT THE BRAKE PEDAL. \*JB

**NHTSA Summary:**  
TL- CONTACT OWNS A 2010 TOYOTA CAMRY. THE CONTACT STATES ON MARCH 5TH HE WAS TRAVELING AT 18MPH. THE DRIVER STATES PRIOR TO THE DOWN SHIFT HE SMELT AN ACCURATE ODOR THE SAME ODOR AS IF A WIRE WAS BURNING. THE DRIVER STATES HE THEN TOOK THE VEHICLE FROM 3RD GEAR TO 2ND GEAR. THE DRIVER STATES THE VEHICLE THEN JERKED FORWARD AND THEN TOOK OFF. THE DRIVER STATES THE RPMS WERE READING 6,000. THE DRIVER STATES HE TRAVELED FOR ABOUT 5 SECONDS AND THEN WAS ABLE TO BRING THE VEHICLE OVER TO THE SIDE OF THE ROAD IN NEUTRAL. THE RPMS CONTINUED TO READ 6,000. THE DRIVER STATES HE THEN SHUT THE VEHICLE DOWN AT THAT TIME. THE DRIVER STATES HE DID HAVE ANOTHER PASSENGER WITH HIM. THE ACCELERATED WAS FREE THERE WAS NOTHING UNDER IT AND IT WAS NOT STUCK AND THE MAT WAS SECURE. THE DRIVER STATES HE WAITED AND THEN TURNED THE VEHICLE BACK ON AND THE VEHICLE THEN DID THE SAME THING THE RPMS WERE AT 6,000. THE DRIVER STATES HE THEN TURNED THE VEHICLE BACK OFF AT THIS TIME AND WAITING 4 MINUTES AND THEN PLACED HIS FOOT BACK ON THE BRAKE AND TURNED THE VEHICLE BACK ON AND THE VEHICLE WAS FINE. THE DRIVER STATES HE THEN CALLED THE DEALERSHIP AND THEY THEN PICKED THE VEHICLE UP AND RAN DIAGNOSTIC TEST. THE DRIVER STATES THEY THEN DID THE RE-CALL FOR THE FLOOR MAT. THE DRIVER STATES THEY THEN TOLD HIM HE WAS STEPPING ON THE BRAKE AND THE ACCELERATOR AT THE SAME TIME. THE FAILURE MILEAGE WAS 521 AND THE DEALERSHIP PROBABLY PUT ON ANOTHER 30-40 MILES. AR

MR. BIERYLA CONTACTED SRS AND FAXED COPY OF LETTER HE WROTE TO HIS TOYOTA DEALER REGARDING HIS SUA EXPERIENCE WITH HIS 2010 TOYOTA CAMRY. (DOCUMENT TOYSUA4230)

C-2095

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

MR. BIERYLA HAD MET WITH THE TOYOTA DEALER REPRESENTATIVES AND MR. RAUL GUZMAN OF THE CENTRAL ATLANTIC REGION.

"As we discussed, based on your examination of the vehicle and the computer analysis performed by Mr. Guzman, you are confident that no problems exists with the above vehicle and that is safe to drive.

It is my understanding that from your evaluation of the vehicle that it is safe to drive and that we will not have another experience, unintended vehicle acceleration, as we had on the evening of March 5th, 2010."

MR. BIERYLA REQUESTS THAT THE RECIPIENTS OF THIS LETTER, MR. STEPHEN BROWN AND MR. JEFFERY CRAWFORD, SIGN AS AN ACKNOWLEDGEMENT OF THE FACTS AND RETURN THE CORRESPONDENCE TO HIM VIA FAX OR EMAIL.

**Vehicle:** EDGEWATER, FL  
**NHTSA Summary:**  
**Additional Summary:**  
PER NEWS ARTICLES - SHIRLEY BRZOZOWSKI, 80, WAS TRYING TO PARK HER 2008 TOYOTA AVALON IN THE PARKING LOT AT SACRED HEART CATHOLIC CHURCH IN NEW SMYRNA BEACH WHEN THE VEHICLE SUDDENLY ACCELERATED CAUSING DAMAGE TO TWO PARKED CARS. HER HUSBAND SAID " SHE COULDN'T STOP IT. IT TOOK OFF AND THAT SEEMS TO BE WHAT THE TOYOTAS HAVE BEEN DOING."

JOHN BRZOZOWSKI SAID THAT THEY THEY TAKEN THEIR CAR IN FOR THE RECALL REPAIRS.

UNTIL THE VEHICLE IS CHECKED AND SERVICED, NO ONE CAN BE SURE THE CAUSE OF THE CRASH. THE CAR WAS TOWED TO DAYTONA TOYOTA, AND THOUGH THE LOCAL EMPLOYEES REFERRED QUESTIONS TO CORPORATE, THEY TOLD WESH 2 OFF CAMERA THAT MORE THAN LIKELY A RECALL TEAM WILL BE SENT TO EXAMINE THE VEHICLE.

SHIRLEY BRZOZOWSKI WAS CITED FOR CARELESS DRIVING.

**Date of Incident:** 20100305  
**Vehicle:** 2005 TOYOTA TACOMA  
**Location of Incident:** SANTA ANA, CA

**NHTSA Summary:**  
I WAS SKEPTICAL ABOUT THIS BRAKE OVERRIDE UNTIL THE SUDDEN ACCELERATION ACTUALLY HAPPENED TO ME ON 3/5/2010. I WAS ON THE FREEWAY TRAVELING 50 MPH IN MODERATE TRAFFIC WHEN A CONSTRUCTION TRUCK DECIDED TO TURN INTO MY LANE. I GAVE IT A QUICK PUNCH TO AVOID A COLLISION WHEN I FELT MY RPM'S KEPT CLIMBING AS I WAS NO LONGER ON THE PEDAL. I PANICKED AND TRIED TO APPLY THE BRAKES TO NO RESPONSE, SO I TAPPED THE SHIFTER INTO NEUTRAL. AT THIS POINT MY CAR IS STILL ACCELERATING IN REDLINE. FINALLY, THE CAR SNAPS OUT OF IT AND I HAVE CONTROL AGAIN. I SLOW DOWN, SHIFT BACK INTO D AND CONTINUE MY COMMUTE TO SCHOOL. IN THE PAST, I HAVE NOTICED A FEW TIMES THERE HAVE BEEN A SLIGHT LUNGE IN ACCELERATION JUST AFTER THE TRANSMISSION SWITCHES GEARS. I LOVE MY TACOMA. I HAVE BEEN IN DENIAL AND HAVE BEEN HOPEING WISHING THAT THERE ISNT A PROBLEM. BUT FOR THE SAFETY OF MYSELF AND MY PASSENGERS, I AM GOING TO MAKE SURE THIS PROBLEM IS NOTED BEFORE ANYONE ONE GETS HURT. I WOULD HATE FOR ANYTHING SERIOUS TO HAPPEN AND LEAVE PEOPLE WONDERING. I FEEL THE NEED TO REPORT THIS COMPLAINT. COULD THIS BE SOMETHING AS SIMPLE AS A STUCK THROTTLE BODY? I HOPE THE RESOLUTION TO THIS WILL BE SIMPLE AND REWARDING, I WOULD HATE TO GIVE UP THIS TRUCK. TOYOTA TACOMA 2005 ACCESS CAB 4.0 V6 ~90,000 MILES AT TIME OF INCIDENT OWNED CURRENT VEHICLE FROM AUGUST 2009 UP TO PRESENT DATE MARCH 6, 2010

**NHTSA Summary:**  
I HAVE A 2007 TOYOTA CAMRY 4-CYLINDER NON HYBRID VEHICLE. I BROUGHT MY VEHICLE IN FOR THE REQUIRED RECALLS AND WHILE I WAS IN LINE WITH OTHER CARS TO DROP IT OFF, I NEEDED TO MOVE UP ABOUT 30 FEET. I HAD MY FOOT ON THE BREAK AND GEAR IN PARK. I STARTED THE CAR AND PUT THE SHIFT LEVER INTO DRIVE WITH MY FOOT STILL ON THE BREAK. THE ENGINE STARTED TO REV UP, BUT WITH MY FOOT ON THE BREAK, IT DID NOT MOVE. I QUICKLY PUT THE SHIFT LEVER INTO NEUTRAL AND SHUT THE ENGINE OFF. A TOYOTA EMPLOYEE CAME OVER AND TRIED TO REPRODUCE THE SITUATION, BUT COULD NOT. I HAVE A PROBLEM WITH THE RECALL FIX. IF THE CAR ACCELERATES FOR NO APPARENT REASON AND I PUT MY FOOT ON THE BREAK, THE ACCELERATION IS SUPPOSED TO STOP, BUT IN THE TIME BETWEEN SUDDEN ACCELERATION AND MY FOOT HITTING THE BREAK PEDAL, I COULD HAVE AN ACCIDENT. MY WIFE AND I AM VERY WARY ABOUT DRIVING THIS CAR.

**NHTSA Summary:**  
TL\* THE CONTACT OWNS A 2009 TOYOTA CAMRY. SHE TOOK THE VEHICLE TO THE DEALER FOR THE ACCELERATOR REPLACEMENT ON FEBRUARY 23, 2010. ON SATURDAY MARCH 6, 2010 WHILE SHE WAS STOPPED AT A STOP SIGN WHEN SHE ATTEMPTED TO ACCELERATE TO MOVE INTO TRAFFIC THE VEHICLE DID NOT ACCELERATE. SHE CONTINUED TO APPLY PRESSURE TO THE ACCELERATOR AND AFTER A WHILE THE VEHICLE ACCELERATED. SHE WILL TAKE THE VEHICLE BACK TO THE DEALER. SHE ALSO STATED THAT IN DECEMBER OF 2009 SHE HAD AN ACCIDENT DUE TO SUDDEN ACCELERATION WHILE DRIVING ON DRY PAVEMENT. THE FAILURE AND THE CURRENT MILEAGE WAS 15,500.

**Vehicle:** 2009 TOYOTA SIENNA  
**Location of Incident:** MIDDLETON, WI

**NHTSA Summary:**  
I WISH TO REPORT TWO SEPARATE GAS PEDAL INCIDENTS INVOLVING MY 2009 TOYOTA SIENNA XLE VAN THAT OCCURRED ON THE SAME DAY. ON THIS DAY, I MADE A TRIP FROM MY RESIDENCE TO A LOCAL GOLF COURSE AND ABOUT 3 HOURS LATER I RETURNED TO MY RESIDENCE. ON MY WAY TO THE GOLF COURSE, I WAS TRAVELING IN A HOUSING AREA AT ABOUT 20 MPH WHEN I TOOK MY FOOT OFF OF THE GAS PEDAL TO SLOW DOWN BUT THE CAR CONTINUED AT THE SAME OR SLIGHTLY FASTER SPEED OF ABOUT 25 MPH. THE CAR SHOULD HAVE EASILY SLOWED DOWN BECAUSE AT THIS TIME I WAS GOING UP A SLIGHT INCLINE IN THE ROAD. I HAD TO FIRMLY APPLY MY BRAKES TO SLOW DOWN THE CAR AND I IMMEDIATELY PARKED THE CAR WITHIN ABOUT 200-300 YARDS OF THE INCIDENT. ABOUT 3 HOURS LATER, I DROVE THE CAR BACK TO MY RESIDENCE. I STOPPED AT A STOP SIGN AND THEN STARTED TO DRIVE TO OUR RESIDENCE (WE HAVE A RENTED UNIT IN A GATED RESIDENTIAL AREA) AT THE POSTED SPEED OF 15 MPH. AS I REACHED 15 MPH, I TOOK MY FOOT OFF THE ACCELERATOR BUT THE CAR CONTINUED TO SPEED UP TO ABOUT 25 MPH. I HAD TO IMMEDIATELY APPLY THE BRAKES AND I ALSO DOWNSHIFTED THE TRANSMISSION TO 1ST GEAR. I PARKED THE CAR BUT DID NOTICE, BEFORE I TURNED THE KEY OFF, THAT THE ENGINE RPM'S IN THE STOPPED POSITION WERE ABOUT 1000 TO 1100. IT WAS NOT AT THE IDLE SPEED OF ABOUT 700 RPM'S WHERE IT SHOULD HAVE BEEN WHEN STOPPED. SOMETHING PREVENTED THE ACCELERATOR FROM RETURNING TO NORMAL. THESE TWO EVENTS BOTH OCCURRED ON SATURDAY MARCH 6, 2010. I TOOK THE CAR TO THE TOYOTA OF THE DESERT DEALERSHIP IN CATHEDRAL CITY, CALIFORNIA, ON MONDAY MARCH 8, 2010. THEY CHECKED THE CAR OVER AND TOLD ME THAT THEY COULD NOT FIND ANYTHING WRONG. WE ALSO TOOK A TEST DRIVE WHICH WAS EQUALLY UNEVENTFUL. MY WIFE AND I ARE EXTREMELY CONCERNED ABOUT OUR SAFETY WHEN DRIVING THIS CAR. WHY IS THERE NO RECALL OF OUR TOYOTA SIENNA? WE DARN SURE HAVE A PROBLEM!

**NHTSA Summary:**  
SUDDEN ACCELERATION IN 2009 TOYOTA RAV 4 AFTER RECALL REPAIR. HAPPENED FOR THE 1ST TIME SINCE OWNERSHIP OF CAR 4 DAYS AFTER REPAIR. HAD CAR FOR APPROXIMATELY 1 YEAR. NEVER HAD ANY PROBLEMS. 4 DAYS AFTER REPAIR, WE WERE WEST BOUND ON FM 1709 IN SOUTHLAKE, TX APPROACHING LIGHT JUST TO THE EAST OF HIGH SCHOOL. WE WERE APPROACHING AT APPROX 30 MPH WITH SPEED DECREASING DUE TO RED LIGHT AND OTHER CARS ALREADY STOPPED AT LIGHT. CAR RPM'S INCREASED TO THE 3,000 RANGE. HAD TO APPLY STEADY TO HARD PRESSURE TO BRAKES. CAR WAS FIGHTING TO ACCELERATE, BUT WAS ABLE TO CONTINUE SPEED DESCENT. GOT CAR TO AROUND 15 MPH. CAR LEARCHED INTO 1ST GEAR. RPM'S DECREASED TO AROUND 1,000 RANGE AND WE ALL WERE THROWN FORWARD IN OUR SEATS WHEN THE CAR LEARCHED.

**Vehicle:** 2008 TOYOTA CAMRY  
**Location of Incident:** NARVON, PA

**NHTSA Summary:**  
I'M A SCHOOL COUNSELOR. I WAS GOING HOME FROM WORK AT ABOUT 3:50 PM YESTERDAY, 4-6-2010, GOING SOUTH ON RT. 222, ABOUT 4 MILES NORTH OF THE DENVER EXIT. I WENT TO PASS ANOTHER CAR AND PUSHED HARD ON MY 2008 TOYOTA CAMRY'S ACCELERATOR. IT LOCKED AND KEPT ACCELERATING AS I PULLED INTO THE PASSING LANE. I TOOK MY FOOT OFF THE PEDAL ALL THE WAY, MAYBE A HALF A FOOT, BUT ALL I HEARD WAS THE ENGINE RACING AS I SAW MYSELF GETTING CLOSER TO THE CAR IN THE LANE IN FRONT OF ME. I PANICKED AND BEGAN TO STOMP DOWN ON THE PEDAL SEVERAL TIMES, I FIGURE I WAS ABOVE EIGHTY MPH BY THEN. AS I WAS TRYING TO DECIDE HOW TO STEER AROUND EVERYONE I HAMMERED DOWN ON THE PEDAL AGAIN AND IT STOPPED. THE CAR ACCELERATED OK AND I CAREFULLY USED THE GAS UNTIL I GOT THE CAR HOME. I THEN CALLED THE NEW HOLLAND TOYOTA DEALERSHIP WHO DID THE RECALL FIX ON 3-27-2010, TOLD DOUG WHAT JUST HAPPENED. I NEVER HAD THE CAR DO THIS BEFORE! I ALWAYS THOUGHT IT HAD A GOOD SMOOTH RIDE. DOUG GAVE ME THE 800 NUMBER TO CALL TOYOTA TO FILE FOR A CASE MANAGER. I'M VERY UPSET AND AFRAID TO USE THIS CAR FOR ME OR MY FAMILY. I FEEL LIKE IT'S UNBELIEVABLE THAT IT HAPPENED TO ME BUT IT DID. WHAT IS BEING DONE ABOUT THIS TERRIBLE SITUATION? PLEASE HELP ME WITH WHAT I SHOULD DO NEXT. \*TR

C-2108

VEHICLE. HOWEVER, HE DID RECEIVE A RECALL NOTICE IN THE MAIL AND COMPLIED BY TAKING THE VEHICLE TO THE DEALER TO HAVE THE REPAIRS DONE ON FEBRUARY 17, 2010. HOWEVER, ON MARCH 6, 2010, THE CONSUMER MADE A RIGHT TURN ON A STREET THAT WAS CURVY AND WAS RELATIVELY STEEP DESCENDING TOWARD AN INTERSECTION. HE GENTLY APPLIED THE BRAKES 2-3 TIMES DURING THE DESCENT TO MAINTAIN A SPEED OF 15-20 MPH. AT NO TIME DID HE DEPRESS THE ACCELERATOR DURING THE DESCENT AND THE ENGINE WAS IDLING AS THE VEHICLE COASTED TO THE BOTTOM OF THE HILL. WHEN HE APPROACHED A FOUR-WAY STOP SIGN AT THE BOTTOM OF THE HILL, HE DEPRESSED THE BRAKE PEDAL NORMALLY TO COME TO A FULL STOP. INSTANTLY, THE ENGINE RACED AND ROARED. THE CONSUMER IMMEDIATELY SHIFTED THE AUTOMATIC TRANSMISSION INTO NEUTRAL AND TURNED THE ENGINE OFF. HE RESTARTED THE ENGINE WITH HIS FOOT ON THE BRAKE PEDAL AND THE GEAR SELECTOR IN NEUTRAL AND IT STARTED WITH THE SAME ROAR. HE TURNED IT OFF AGAIN AND WAITED A COUPLE OF MINUTES. HE DECIDED TO TRY ONE MORE TIME AND THE VEHICLE OPERATED IN NORMAL MODE. THE CONSUMER ALSO STATED SINCE THE VEHICLE WAS GARAGED, THE DOORS WERE BARELY KEPT LOCKED. OVER THE LAST 6-9 MONTHS ABOUT ONCE A MONTH WHEN THE CONSUMER ENTERED THE GARAGE, HE DISCOVERED THE DOORS WERE LOCKED. THE CONSUMER BELIEVED THE ELECTRONIC DOOR LOCKING SYSTEM WAS BEING RANDOMLY ACTIVATED. \*JB

**Location of Incident:** HAMILTON, OH

**NHTSA Summary:**  
 RETURNING FROM CHURCH (MY CHURCH IS SITUATED ON A HILL) MY 2009 TOYOTA CAMRY SUDDENLY ACCELERATED WHILE RETURNING TO THE HIGHWAY. I IMMEDIATELY STEPPED AS HARD AS I COULD ON THE BRAKE PRESSING IT TO THE FLOOR, I ALSO SHIFTED THE TRANSMISSION HANDLE TO PARK, IT HAD NO EFFECT. I REACHED THE BOTTOM OF THE HILL AND SHOT ACROSS FOUR TRAFFIC LANES AND CUT MY WHEEL TO THE LEFT AND SLAMMED INTO THE GUARD RAIL. THE CAR THEN SEEMED TO STOP AND I WAS ABLE TO SHIFT OUT OF PARK TO NEUTRAL. THE BRAKES SEEMED TO COME BACK. HOWEVER I PARKED THE CAR AND CALLED THE SHERIFFS OFFICE WHO TOOK THE ACCIDENT REPORT. I HAD THE CAR TOWED TO THE TOYOTA DEALER. I PREVIOUSLY HAD BOTH RECALLS PERFORMED ON THE CAR.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10317521  
**Date of Incident:** 20100307  
**Vehicle:** 2006 TOYOTA SEQUOIA  
**Location of Incident:** BEAUMONT, CA

**NHTSA Summary:**  
 I OWN A 2006 TOYOTA SEQUOIA WITH 49,000. THIS IS MY SECOND SEQUOIA (PRIOR WAS A 2002 YEAR MODEL) SO I AM VERY FAMILIAR WITH THE CHARACTERISTICS AND NUANCES OF THE VEHICLE. AFTER PURCHASING THIS SEQUOIA, I IMMEDIATELY NOTICED THAT WHILE STOPPED IN TRAFFIC, AT TRAFFIC SIGNALS, AND BEHIND OTHER VEHICLES, THE CAR WOULD SUDDENLY ACCELERATE AND LUNGE FORWARD MOVING THE CAR SEVERAL FEET FORWARD. THE FIRST COUPLE OF TIMES THIS OCCURRED, I THOUGHT I HAD BEEN REAR-ENDED. I CAME TO REALIZE THAT IT HAD SOMETHING TO DO WITH A MOMENTARY SURGE IN THE ACCELERATOR. EVEN WITH YOUR FOOT ON THE BRAKE, IT STILL CAUSES THE VEHICLE TO LUNGE FORWARD. MY WIFE AND I HAVE NEARLY STRUCK VEHICLES IN FRONT OF US. I TOOK THE VEHICLE BACK TO THE DEALERSHIP ON SEVERAL OCCASIONS DURING WARRANTY AND REPORTED THE INCIDENTS. OF COURSE WE RECEIVED THEIR STANDARD REPLY "WE COULD NOT GET YOUR VEHICLE TO DUPLICATE THE PROBLEM." WHEN QUESTIONED FURTHER, WE WERE TOLD THAT IT WAS PROBABLY WHEN THE A/C PUMP WAS COMING ON, AND IT ONLY FELT LIKE WE WERE MOVING BUT ACTUALLY WERENT, AND THAT THIS WAS NORMAL. WOULD MAKE SENSE, BUT THE VEHICLE DOES THIS WITH BOTH THE A/C ON AND THE A/C OFF THOUGH I MUST ADMIT IT SEEMS TO DO IT MORE FREQUENTLY DURING THE SUMMER MONTHS. PLUS, THIS NEVER HAPPENED WITH MY PREVIOUS SEQUOIA. ALSO, IT IS NOT OUR IMAGINATION THAT THE VEHICLE IS MOVING FORWARD. WE HAVE NEARLY STRUCK THE REAR END OF OTHER CARS AND MUST NOW STOP 8 - 10 FEET BEHIND OTHER VEHICLES. I LOOKED ON LINE AND FOUND NUMEROUS OTHER SEQUOIA OWNERS REPORTING THE SAME PROBLEM, AND GETTING THE SAME RESPONSE FROM TOYOTA. BEING SOMEWHAT MECHANICALLY INCLINED, I TOO BELIEVE THIS IS AN ELECTRONIC/COMPUTER CONTROL PROBLEM. EVEN THOUGH I AM NOT AWARE OF THIS PARTICULAR PROBLEM CAUSING DEATHS, PLEASE DON'T FORGET US AS IT IS STILL AN ACCELERATION PROBLEM, AND FOR WHAT WE PAID FOR THIS VEHICLE, WE ARE OWED BETTER THAN THEIR LAME EXCUSE. THANKS FOR LISTENING.

**Location of Incident:** WILMINGTON, NC

**NHTSA Summary:**  
 TOYOTA 2007 AVALON XLS, 24K MI VIN 4T1BK36B97U176587 ACCELERATOR REPAIRED UNDER RECALL ON 2/16/2010 INCIDENT OF UNINTENDED FULL THROTTLE ACCELERATION CONDITIONS: TEMP 61 DEGREES F, CLEAR WEATHER, RELATIVE HUMIDITY APPROX 50%, A/C NOT ON, RADIO NOT ON, CRUISE CONTROL ON BUT NOT ENGAGED, DAYTIME RUNNING LIGHTS ON. SITUATION: AT 55 MPH, THROTTLE WAS DEPRESSED TO APPROX 1/2 TO ACCELERATE TO PASS ON A TWO-LANE HIGHWAY. CAR ACCELERATED NORMALLY TO ABOUT 65 MPH AT WHICH POINT THE ACCELERATOR WENT TO THE FLOOR. UNCOMMANDED. ONCE CLEAR OF THE PASSED VEHICLE, I SHIFTED INTO NEUTRAL AND TURNED OFF THE ENGINE AND COASTED TO A SOMEWHAT SAFE LOCATION TO STOP. THE ACCELERATOR WAS STILL LOCKED DOWN. WITH THE IGNITION OFF, I WAS ABLE TO REPOSITION THE ACCELERATOR TO THE NORMAL POSITION AFTER SHIFTING THE CAR FROM 'PARK' TO 'NEUTRAL' SEVERAL TIMES. THEN I CONTINUED THE TRIP. WIFE IN THE RIGHT SEAT WAS PETRIFIED. LATER, AT A BETTER LOCATION ON A DIVIDED HIGHWAY WITH A 70 MPH SPEED LIMIT, I SET UP THE SAME CONDITIONS AS PREVIOUSLY DESCRIBED. AFTER ACCELERATING FROM 60 MPH TO ABOUT 68 MPH WITH A HALF-THROTTLE COMMAND, THE UNINTENDED ACCELERATION TO FULL THROTTLE HAPPEND AGAIN. THIS TIME I TURNED OFF THE CRUISE CONTROL. AND THEN ATTEMPTED, UNSECESSFULLY, TO PULL THE ACCELERATOR OFF THE FLOOR WITH THE EDGE OF MY SHOE WHICH DID NOT TERMINATE THE ACCELERATION. AT ABOUT 80 MPH I WENT THROUGH THE SHUT-DOWN PROCEDURE AGAIN WITHOUT FURTHER INCIDENT. MY WIFE IS THE PRINCIPLE DRIVER OF THE CAR, BUT I WILL ALWAYS DO ALL THE DRIVING ON LONG TRIPS AND HAVE PUT THE CAR IN A SIMILAR PASSING SITUATIONS SEVERAL TIMES WITHOUT PREVIOUS ACCELERATION PROBLEMS. I AM AN COMBAT TESTED EX-FIGHTER PILOT AND TEST PILOT WITH SEVERAL THOUSAND HOURS IN HIGH PERFORMANCE FIGHTERS AND THOROUGHLY UNDERSTAND PHYSICS. THESE INCIDENTS PRESENTED NO DANGER TO ME OR MY WHITE-KNUCKLED WIFE BUT IN LESS THAN IDEAL CIRCUMSTANCES WITH LESS EXPERIENCED DRIVERS IN CONTROL, THE OUTCOME COULD HAVE BEEN DIFFERENT.

**Date of Incident:** 20100308  
**Vehicle:** 2008 TOYOTA PRIUS  
**Location of Incident:** JACUMBA, CA

**NHTSA Summary:**  
Per new article in The Wall Street Journal -

"On Monday, James Sikes, 61 years old, called 911 for help after his 2008 Prius raced to more than 90 miles per hour near San Diego and he couldn't slow down.

"I pushed the gas pedal to pass a car and it did something kind of funny...it jumped and it just stuck there," Mr. Sikes said at a news conference, according to the Associated Press. "I was trying the brakes...it wasn't stopping, it wasn't doing anything and it just kept speeding up," Mr. Sikes said, adding he could smell the brakes burning.

A California Highway Patrol officer caught up to the Prius and advised the driver to apply both the brakes and emergency brake. Eventually, Mr. Sikes was able to shut the engine off and stop the vehicle. The patrolman pulled his car in front of the Prius as a precaution. Mr. Sikes was unhurt.

Toyota is sending engineers look to look at Mr. Sikes's car, the company said Tuesday. The Transportation Department is also sending an investigator to inspect the vehicle and gather information on the incident."

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**  
THIS IS MY SECOND EVENT AND COMPLAINT CONCERNING A SUDDEN ACCELERATION INCIDENT WITH MY 2002 TOYOTA CAMRY. PLEASE REFERENCE MY FIRST COMPLAINT ODI #10312684. TODAY (3/8/2010) WHILE PULLING UP TO MY MAILBOX MY CAMRY LURCHED FORWARD AT A HIGH RATE OF SPEED. MY FOOT WAS NOT ON THE ACCELERATOR PEDAL WHEN THIS HAPPENED. IT WAS ON THE BRAKE PEDAL BECAUSE I WAS STOPPING AT MY MAILBOX WHEN THIS OCCURRED. I IMMEDIATELY APPLIED ALL OF MY BODY WEIGHT ON THE BRAKE PEDAL AND WAS ABLE TO STOP THE CAR AFTER ABOUT 10 - 12 FEET. UPON STOPPING I IMMEDIATELY PLACED THE GEARSHIFT IN PARK AND TURNED THE KEY OFF.

**Additional Summary:**

**NHTSA ODI Number:** 10317846  
**Date of Incident:** 20100308  
**Vehicle:** 2009 TOYOTA RAV4  
**Location of Incident:** CARMEL, IN

**NHTSA Summary:**  
ALTHOUGH MY CAR WAS FIXED IN THE TOYOTA RECALL, I BELIEVE THE PROBLEM STILL EXISTS. IT IS BETTER, BUT NOT BEST. WHEN I PRESS ON THE ACCELERATOR SOMETIMES THE CAR JERKS FORWARD MUCH FASTER THAN YOU WOULD EXPECT. IT USED TO DO THIS MORE OFTEN AND TO A GREATER DEGREE, BUT STILL DOES DO IT ON OCCASION. I NOTICED THIS WHEN I FIRST BOUGHT THE CAR, BUT PUT IT OFF TO PRESSING DOWN ON THE ACCELERATOR TOO HARD. THEN I BEGAN TO THINK THAT IF THAT WAS THE CASE IT WOULD HAPPEN ALL THE TIME. I PURPOSELY TRY TO GO FORWARD GENTLY, BUT AM NOT ABLE TO SOMETIMES.

**NHTSA ODI Number:** 10317693  
**Date of Incident:** 20100308  
**Vehicle:** 2007 TOYOTA TUNDRA  
**Location of Incident:** GILBERT, SC

**NHTSA Summary:**  
I HAVE A 2007 TOYOTA TUNDRA SR5 DOUBLE CAB AND HAVE HAD ALL OF MY REGULAR MAINTENANCE COMPLETED ON TIME AND AT A LOCAL TOYOTA DEALERSHIP. I HAVE MADE THE COMPLAINT OF MY GAS PEDAL STICKING AND MY FLOOR MATS WERE NOT AN ISSUE. THEY CLAIM THEY "FIXED" THE RECALL PROBLEM WITH ADDING A PART TO THE GAS PEDAL. SINCE I HAVE HAD MY TRUCK BACK, IT HAS NOT WORKED PROPERLY. THE GAS PEDAL STILL ACCELERATES ON ITS OWN OR DECELERATES ON ITS OWN. THE GAS PEDAL "FLOATS" WITH YOUR FOOT SO THE ENGINE IS CONSTANTLY MAKING THE RPM'S RISE AND FALL CONSTANTLY UPON RIDING OVER BUMPS OR HILLS. I DON'T WANT A "PART" TO BE INSTALLED, I WANT THE ENTIRE PEDAL TO BE REPLACED! I LIKE MY TRUCK, HOWEVER, THE ENGINE DOES NOT RUN CORRECTLY AND IS CONSTANTLY MAKING A TICKING SOUND LIKE A DIESEL ENGINE WOULD SOUND. I HAVE MADE SEVERAL COMPLAINTS TO THE DEALERSHIP AND THEY ARE CONSTANTLY TELLING ME IT IS OK AND NOTHING IS WRONG. TRANSMISSIONS ARE NOT MADE TO JUST DOWN SHIFT 3 GEARS RIGHT OFF THE BAT ON THE INTERSTATE ON FLAT GROUND. NOTHING HAS BEEN DONE TO TRY TO CORRECT THIS PROBLEM AS THEY PROCLAIM THERE IS NO PROBLEM. THEY ARE CRAZY! PULLING A HORSE TRAILER MADE IT DIFFICULT FOR THE TRANSMISSION TO SHIFT PROPERLY AND IT WAS IN TOW MODE. IT TOOK 1 MILE OR LONGER FOR IT TO SHIFT FROM 1/2 GEAR TO 4 GEAR AND THE RPM'S WERE OVER 2,500.

C-2115

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THIS IS NOT NORMAL. I FELT IT WOULD NEVER SHIFT DOWNWARD FROM 1/2 GEAR. I AM AFRAID TO PULL MY HORSES WITH THE TRANSMISSION ACTING THIS WAY.

**NHTSA Summary:**  
I DRIVE A 2007 TOYOTA CAMRY THIS IS ONE OF THE SAFETY RECALL CARS. I HAD BEEN HAVING ISSUES WITH ACCELERATION BEFORE THE RECALL, THEN GOT THE RECALL FIXED ON FEBRUARY 21ST. I HAD A FEW SMALL ISSUES THESE PAST FEW WEEKS WITH IT SUDDENLY ACCELERATED BUT THIS MORNING THE WAY TO WORK I WAS DRIVING ON THE 101 IN PHOENIX HEADING TO WORK WHEN MY CAMRY SUDDENLY STARTED ACCELERATING THIS TIME IT WAS NOT A SMALL ISSUE BUT IT ACCELERATED TO ALMOST 80 MPH I WAS DRIVING AROUND 65 MPH WHEN IT SUDDENLY STARTED. I GOT THE CAR SLOWED DOWN AND PULLED OVER TO THE SIDE OF THE ROAD TO CATCH MY BREATH BECAUSE I WAS VERY SCARED. I THEN MADE IT. THE REST OF MY WAY TO WORK WHICH WAS ABOUT 8 MILES. I DRIVE 50 MILES EACH WAY TO WORK EVERYDAY, I DROP MY HUSBAND OFF AT WORK, I DROP MY 17 MONTH OLD DAUGHTER OFF AT DAYCARE AND THIS TO ME IS UNACCEPTABLE. I AS OF TODAY DO NOT TRUST THIS CAR TO DRIVE ANY WHERE. SOMETHING NEEDS TO BE DONE ABOUT THIS IMMEDIATELY, CAN YOU PLEASE HELP IN MAKING THAT HAPPEN.

Pulling into her doctor's office - 10 mph - parking spot, line up, reach up to shift the vehicle into drive - foot on the brake - very clear about that - jumps forward and crashed through the wall at the doctor's office - doesn't continue to accelerate - no witnesses - only after the crash - pretty minimal - no airbag deployment - vehicle is driveable - haven't touched it - evidence.  
**Additional Summary:**

On Tuesday, March 9, 2010 at approximately 1:24 PM the Yarmouth Police and Fire Departments responded to a report of a motor vehicle which had crashed in to the Cape Cod Plastic and Hand Surgery office located at 150 Ansel Hallett Road in West Yarmouth.

Yarmouth Police Patrol Officer Richard Fichter Jr. and Patrol Investigators David Dickey and Gordon Gibbons arrived at the scene and found a red 2010 Toyota RAV4 crashed into the south side wall of the office complex. The on-scene investigation determined that the vehicle had struck the wall adjacent to the patient waiting area and penetrated into the office approximately 10 feet before coming to a stop.

Yarmouth Police Patrol Investigators Gibbons—a specially trained member of the Cape Cod Crash Reconstruction Team—made additional observations which include that the sun position in the southern sky did not appear to be a contributing factor and that the parking lot area pavement was found to be free of any scratches or gouges which could have been related to the crash.

The operator of the vehicle—Ann J. Wilkins, age 70, of 1454 Halls Path One in Harwich, Massachusetts suffered minor injuries and was treated at the scene by Yarmouth Fire Department personnel and subsequently transported to Cape Cod Hospital in Hyannis.

The vehicle has been impounded at Yarmouth Police Headquarters and the investigation is continuing. The Yarmouth Police Department is fully aware of the nationwide recall of certain models of Toyota vehicles and has notified the National Highway Traffic Safety Administration. Specialists from NHSTA are expected to examine the vehicle at Yarmouth Police Headquarters sometime within the next few days.

**Vehicle:** 2008 TOYOTA CAMRY  
**Location of Incident:** CORBIN, KY  
**NHTSA Summary:**  
**Additional Summary:**  
FROM NEWS ARTICLE IN SENTIMENTAL ECHO, LONDON, KY -

"A trip down London's Main Street Tuesday became terrifying for a Corbin family, when the Toyota Camry accelerated uncontrollably for more than four blocks before stopping near London elementary School.

The lights on the 911 Dispatch phone lines lit up around 11:30 a.m. as people called to report a 2008 Toyota Camry speeding through Main Street.

London Police Lt. Stewart Walker said 68-year-old Ada Perry and three passengers were traveling on Main Street when the car's accelerator stuck. Perry struck one unoccupied vehicle near the intersection of Sixth and Main streets, then struck two other vehicles. Walker said one of those vehicles was stopped at the sixth Street intersection to let another turn onto Main Street. The red toyota struck both vehicles before proceeding to Tenth Street."

Perry said she finally got it to go into neutral and turned it off so she could stop.

**NHTSA Summary:**

TL\* THE CONTACT OWNS A 2008 TOYOTA RAV 4. WHILE DRIVING 5 MPH SLOWLY INTO A PARKING SPACE HER VEHICLE ABNORMALLY ACCELERATED AND PROCEEDED ONTO A NEARBY CURB, THE VEHICLE CONTINUED TO ACCELERATE UNTIL IT CRASHED INTO A BRICK BUILDING. THE ENGINE CONTINUED IDLING AS THE PASSENGER PLACED THE VEHICLE INTO THE PARK POSITION AND EXIT THE VEHICLE. THE DRIVER ALSO GOT OUT OF THE VEHICLE ON THE PASSENGER SIDE. THE WHEELS ON THE VEHICLE CONTINUED TO MOVE AS IF IT WANTED TO CONTINUE ACCELERATING. THE DRIVER AND PASSENGER BOTH SUFFERED MINOR INJURIES FROM THE CRASH. THE VEHICLE WAS DESTROYED. THE FAILURE MILEAGE WAS 38,000.

**Additional Summary:**  
FROM NBC PHILADELPHIA NEWS REPORT:

"Elizabeth Bagnell and her brother Steve were pulling into a parking spot at a King of Prussia medical office complex Tuesday afternoon when she says her Toyota RAV4 accelerated on its own and into a brick wall.

"I start to give it some gas pulling into the parking spot and I can hear the engine rev," Elizabeth said. The Hatfield, Pa. woman says the next thing she knew, the car was careening towards the wall.

Elizabeth said she slammed down on the brake pedal, but the car just wouldn't stop and even after hitting the wall, the wheels just kept spinning.

"She had turned off the car, but I'm shoving my door open and the wheels are still spinning," Steve said. He says it took him putting the car into park to get the wheels to stop.

The SUV's airbags did deploy during the accident, but the two weren't seriously injured. Upper Merion Township Police are calling Bagnell's accident minor and haven't confirmed an accelerator pedal issue, but the siblings say Elizabeth wasn't at fault."

**Additional Summary:**  
Per News articles -

A 76-year-old Newington, CT woman trying to park her 2007 Toyota Camry at St. George's Church in New Britain traveled over the lawn, striking the church steps, traveling down another set of steps, crossing a street and finally stopped by a hill. Margaret Curtis, and her 15-year-old grandson were not seriously injured in the crash. Curtis said the gas pedal on her 2007 Toyota stuck while she was trying to park at the church to deliver items to the parish's tag sale. She received a recall notice from Toyota the day before, she said after the crash.

Attorney General Blumenthal wrote to Toyota regarding this crash and two others that happened in the state of Connecticut involving Camrys.

**NHTSA Summary:**

ON MARCH 9, 2010 I TOOK MY 09 TOYOTA CAMRY IN FOR THE FLOORMAT RECALL, AND TO HAVE THE CRUISE CONTROL LOOKED AT FOR AN ACCELERATION ISSUE. WHEN THE CRUISE CONTROL SLOWS DOWN IT WILL KICK INTO ABOUT 5,000 RPM'S FOR ABOUT 10 SECONDS AND PUT ME AT LEAST 10 MPH OVER THE SPEED I SET IT TO. (WHICH IS USUALLY WHEN I TURN IT OFF!!!!) WHEN I PICKED MY CAR UP AT THE END OF THE DAY I NOTICED THAT MY GAS PEDAL HAS BEEN SHAVED OFF AT THE BOTTOM MAKING IT VERY SHORT AND DIFFICULT TO DRIVE WITH PLUS MY FLOOR MATS HAD NOT BEEN MOTIFIED AS I WAS TOLD THEY SHOULD HAVE BEEN. I WAS ALSO TOLD THAT THE PROBLEM WITH MY CRUISE CONTROL, COULD NOT BE DUPLICATED BUT TO BRING MY CAR BACK IF I HAVE PROBLEMS IN THE FUTURE. I WAS THEN TOLD THAT IT IS 'NORMAL' FOR TOYOTA CARS TO RAPIDLY ACCELERATE WITH THE CRUISE CONTROL ON (AT 5,000 RPM'S??? REALLY???) AND THAT A 5-8 MPH DIFFERENCE IN THE SPEED YOU SET THE CRUISE CONTROL AT IS ALSO 'NORMAL'. I JUST LOOKED UP THE KBB ON MY CAR AND THINK I MIGHT BE ABLE TO GET OUT OF IT WITHOUT A LOSS. I AM SERIOUSLY CONSIDERING IT.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10318099  
**Date of Incident:** 20100309  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** LANSDALE, PA  
**NHTSA Summary:**

MY LEXUS ES 350, 2007 MODEL, ACCELERATED TWICE WHEN I REMOVED MY FOOT FROM THE GAS PEDAL. IT WOULD CUT OFF (DECELERATE) ONLY IF I PRESS THE BRAKE PEDAL. THE RECALL WAS COMPLETED ON 2/25/2010. REMOVING FOOT OFF THE GAS PEDAL DOES NOT SLOW THE VEHICLE INFACT IT ACCELERATED TWICE. IT WORKS IN SOME CASES. THE SPEED WAS 30/40.

**Location of Incident:** ANCHORAGE, AK  
**NHTSA Summary:**

THE ACCIDENT HAPPENED 3/9/2010. THE ACCIDENT INVOLVES OUR 2006 TOYOTA SIENNA... THERE WERE TWO ADULTS AND THREE SMALL CHILDREN IN THE VAN. MY HUSBAND, WHO WAS DRIVING, SLOWED DOWN TO MAKE A RIGHT HAND TURN INTO A GAS STATION. WHILE HE WAS TURNING... THE VAN ACCELERATED AT A HIGH SPEED... MY HUSBAND TRIED TO APPLY BRAKES TO NO AVAIL. WE SMASHED INTO A PARKED CAR (WITH OWNER STANDING NEXT TO IT PUMPING GAS) AT THE GAS STATION PUMP AND THEN THE VAN CONTINUED TO GO A BIT BEFORE SLOWING DOWN AT A SNOW BERM. LUCKILY NO ONE WAS BADLY INJURED.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Vehicle:** 2005 TOYOTA PRIUS  
**Location of Incident:** IRVINE, CA

**NHTSA Summary:**  
I DROVE A 2005 PRIUS AND WAS BEHIND A SEMI-TRAILER. WHEN I ACCELERATED TO GO, THE CAR LUNGED FORWARD CRUSHING INTO THE SEMI'S TRAILER. I DIDN'T HAVE ENOUGH TIME TO REACT BECAUSE OF THE CLOSE DISTANCE, HOWEVER THE BRAKES WERE NOT STRONG ENOUGH TO OVERCOME THE ACCELERATION POWER. THE PRIUS RAN INTO THE SEMI FOR A GOOD 25 SECONDS WHILE I TRIED TO BRAKE AND I THEN PUT THE CAR IN NEUTRAL AND TURNED OFF THE CAR. THERE WERE 3 OTHER PASSENGERS INSIDE THE CAR DURING THE INCIDENT.

**Additional Summary:**

**Toyota ID Number:**

**NHTSA ODI Number:** 10318517  
**Date of Incident:** 20100309  
**Vehicle:** 2005 TOYOTA TUNDRA  
**Location of Incident:** PHILO, CA

**NHTSA Summary:**  
I HAVE A TOYOTA TUNDRA 2005 THAT HAS HAD THE THROTTLE DRIVERS UPDATED. I HAVE HAD AT LEAST 6 INCIDENCES OF UNCONTROLLED ACCELERATION. THESE INCIDENCES OCCUR AT SLOW SPEED IN MUDDY SITUATIONS. DEPRESSING THE BRAKES TO THE FLOOR DOES NOT STOP THE VEHICLE AND I HAVE HAD SEVERAL NEAR MISSES. THIS OCCURS IN 2 WHEEL DRIVE AND I BELIEVE IT HAS TO DO WITH THE VSC AND SOFTWARE. THE ONLY WAY TO STOP THE THROTTLE OR UNWANTED MOMENTUM IS TO THROW THE VEHICLE INTO NEUTRAL. EVEN THIS DOES NOT IMMEDIATELY HELP. I RECOMMEND THE IGNITION KEY AS THE QUICKEST WAY TO STOP THIS.

C-2125

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ADDITIONALLY, OUR COMPANY HAS A NEWER TUNDRA THAT IS GETTING FIXED UNDER THE RECALL. THIS TRUCK HAS EXPERIENCED SIMILAR SITUATIONS WITH OTHER EMPLOYEES DRIVING. SLOW SPEEDS IN 2 WHEEL DRIVE, IN MUDDY SITUATIONS THE TRUCK PUSHES YOU UNCONTROLLABLY. I WILL INVESTIGATE MORE ONCE THE TRUCK IS RETURNED WITH THE RECALL REPAIRS. THIS ALL IS RELATED TO THE VSC SYSTEM AND THE SOFTWARE. PLEASE HAVE AN INVESTIGATOR CALL ME. I BELIEVE THAT I CAN EASILY REPRODUCE THIS SITUATION IN THE VEHICLE. THESE VEHICLES ARE UNSAFE AND TOYOTA NEEDS TO ADDRESS THESE ISSUES. I DON'T BELIEVE THE CURRENT RECALL IS ADDRESSING THE ISSUE!

**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** ROUND MOUNTAIN, NV

**NHTSA Summary:**

I OWN A 2007 TOYOTA RAV4 SPORT. SINCE IT WAS NEW WE HAVE HAD THIS PROBLEM. TOYOTA SAYS IT'S NORMAL AND IS THE NATURE OF THE BEAST. UPON ACCELERATING FROM A STOP OR ACCELERATING TO PASS ANOTHER AUTO, THE THROTTLE DOES NOT RESPOND UNTIL IT SUDDENLY WILL ACCELERATE HARD, LEAVING A STOP IT CAN BE VERY FRIGHTENING AS WE JUST DONT KNOW HOW HARD IT WILL ACCELERATE WHEN IT DOES. PASSING IS EQUALLY FRIGHTENING, IF NOT MORE SO. WHEN WE PULL OUT TO PASS AND STEP ON THE ACCELERATOR THE CAR DOES NOT RESPOND ACCORDING TO PRESSURE ON THE GAS PEDAL. WE'VE COME VERY CLOSE TO HEAD-ONS A COUPLE OF TIMES. I KINDA GAVE UP ON THE ISSUE AFTER BEING TURNED AWAY BY THE TOYOTA DEALERSHIP WHERE WE BOUGHT THE CAR UNTIL HEARING ABOUT OTHER TOYOTAS HAVING ACCELERATOR PROBLEMS. OUR 2007 IS A THROTTLE BY WIRE SETUP ALSO. I HAVE SPOKEN TO OTHER RAV4 OWNERS WHO HAVE EXPERIENCED THIS PROBLEM. THIS CAN BE PRETTY SCARY, ESPECIALLY FOR MY WIFE. THE INCIDENTS HAVE BEEN ONGOING SINCE THE RIG WAS NEW SO I DONT HAVE A DEFINITIVE DATE. I'LL PUT IN TODAYS DATE FOR RECORD. I WOULD REALLY APPRECIATE A RESPONSE TO THIS PROBLEM. I KNOW YOU'RE PROBABLY PRETTY TIED UP WITH TOYOTA PROBLEMS. THANK YOU, PETE OSTERGARD

**NHTSA Summary:**

MY CAR IS A 2007 CAMRY XLE V6, AND WAS NOT LISTED AS PART OF THE TOYOTA RECALL (IT HAS LOCKING MATS). PULLED INTO DRIVEWAY AT MY HOME. WITH FOOT ON BRAKES AS I TOUCHED AUTO GARAGE DOOR OPENER ON VISOR. CAR GEAR WAS IN D. AS I REMOVED FOOT FROM BRAKE TO GAS PEDAL TO PULL INTO GARAGE, AND LIGHTLY PLACED FOOT ON ACCELERATOR. INSTANTANEOUSLY ENGINE REVVED, PEDAL WENT TO FLOOR, TACH ZOOMED AND AUTO JETTED INTO GARAGE. I IMMEDIATELY HIT BRAKES WITH BOTH FEET, ATTEMPTING TO DISENGAGE TRANSMISSION FROM D AND PUT INTO N. GEAR SHIFT ERRATICALLY PLUNGED INTO R AND CAR BEGAN TO GO BACKWARDS WITH ENGINE THROTTLE WIDE OPEN. AGAIN, WITH TIRES SQUEALING, SMOKING & LAYING RUBBER, I TRIED TO JAM GEARSHIFT TO N OR P, AND CAR JETTISONED FORWARD HITTING GARAGE WALL AT FULL FORCE. WITH MILLISECOND RECOVERY, I HELD ONTO GEARSHIFT & ALL THE TIME MY FEET WERE ON BRAKES & AGAIN TRIED TO FORCE IT INTO P, AND IT AGAIN WENT TO R, (MUST PASS N AND R TO GET GEAR INTO P) THEN AGAIN FORWARD IN ANOTHER DIRECT HIT AGAINST GARAGE WALL, BREAKING THE WALL OPEN AND SPLITTING SHEETROCK AS AUTO NEARLY POPPED THROUGH TO LAUNDRY ROOM AND GAS FURNACE. I HELD THE PUSH-BUTTON IN WHILE SIMULTANEOUSLY FORCING GEAR SHIFT AGAIN TO REACH P. ENGINE WENT FROM FULL-BORE OPEN TO A STOP. THIS EVENT WAS SO FRIGHTENING. HAD IT OCCURRED MINUTES EARLIER I WAS IN COMMUTE TRAFFIC AND IN RESIDENTIAL AREA RETURNING HOME FROM METRO. PEDESTRIANS AND SCHOOLKIDS WERE IN THE AREA. I EXITED CAR TO RUN INTO HOUSE, CALL FOR HELP. DAMAGE TO GARAGE WALL (AND LAUNDRY AREA) IS SUBSTANTIAL, BUT WAS MINIMIZED TO THE AUTO DUE TO A SET OF FOUR TIRES AGAINST THE GARAGE WALL WHICH PROVIDED SOME CUSHION. BLUE TOOTH PHONE (HANDS-FREE CAR) WOULD NOT

**NHTSA Summary:**  
11 DAYS AGO THE MARINA TOYOTA DEALERSHIP PERFORMED BOTH TOYOTA RECALL REPAIRS ON MY 2008 CAMRY. ON MARCH 10, AROUND 05:19 AM, I WAS STARTING TO PARK MY CAR AT THE GYM. I APPLIED THE BRAKES TO SLOW INTO THE PARKING STALL. THE MOMENT THAT I APPLIED THE BRAKES, THE ENGINE STARTED TO RACE; THE CAR LURCHED FORWARD; THE BRAKES WERE USELESS IN STOPPING THE VEHICLE; AND I COULD NOT STEER THE VEHICLE. MY VEHICLE SLAMMED INTO A PARKED JEEP CHEROKEE; THE JEEP INTURN COLLIDED WITH A PARKED SUBARU OUTBACK. MY VEHICLE WAS TOWED TO THE DEALERSHIP AND WE ARE WAITING FOR TOYOTA'S TECHNICIANS TO EXAMINE THE CAR. I AM VERY THANKFUL TO GOD THAT NO ONE WAS INJURED OR KILLED IN THIS INCIDENT. HOWEVER, I FIRMLY BELIEVE THAT MY CAMRY IS UNSAFE AND I WILL NEVER DRIVE IT AGAIN. I HAVE WRITTEN THE VEHICLE OFF AS A TOTAL LOSS. SINCE I AM A JEHOVA WITNESS, I CANNOT SELL THE VEHICLE BECAUSE THEN I WOULD

C-2133

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BE BLOOD-GUILTY IF ANYONE WAS INJURED OR KILLED BY THE VEHICLE. I AM A ELECTRICAL ENGINEER WITH A MASTERS DEGREE IN ELECTRONICS AND CONTROL SYSTEMS. I HAVE 32 YEARS EXPERIENCE IN SYSTEMATICALLY SOLVING ELECTRICAL PROBLEMS (PARTICULARLY INTERMITTENT ELECTRICAL ISSUES). IN MY CASE, GIVEN THE SIMULTANEOUS FAILURE OF MULTIPLE SYSTEMS (ENGINE RPM CONTROL, BRAKING AND STEERING), THE CAUSE IS DEFINITELY ELECTRICAL, NOT MECHANICAL. MY EXPERIENCE WITH COMPUTER CONTROLS STRONGLY SUGGESTS THAT THE KEY HARDWARE INVOLVED IS THE ON-BOARD CPU. THEREFORE, IN MY PROFESSIONAL ENGINEERING OPINION, TOYOTA HAS NOT DETERMINED THE ROOT CAUSE OF THE SUDDEN ACCELERATION PROBLEM.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10319421  
**Date of Incident:** 20100310  
**Vehicle:** 2007 TOYOTA PRIUS  
**Location of Incident:** ROCKFORD, IL

**NHTSA Summary:**

I HAVE BEEN DRIVING A 2007 TOYOTA PRIUS SINCE JULY 2007. THE HID HEADLIGHTS SWITCH OFF AUTOMATICALLY WHILE DRIVING. SOMETIMES THE LEFT HID SWITCHES OFF BUT THE RIGHT HEADLIGHTS STAYS ON. THE HEADLIGHTS TURN OFF BUT THE DISPLAY FROM THE INSIDE SAYS THAT HEADLIGHTS ARE TURNED ON. THE HEADLIGHTS COME ON IF I TURN THE HEADLIGHTS OFF AND TURN THEM BACK ON THEN BOTH OF THEM ARE WORKING TILL THEY SWITCH OFF AGAIN DURING DRIVING. ALMOST GOT IN A T-BONE ACCIDENT WHEN THE OTHER DRIVER DID NOT SEE ME. IF I AM DRIVING USING CRUISE-CONTROL, THE CAR SEEM TO SPEED UP A BIT JUST FOR A SEC A OR TWO WHEN YOU INITIALLY APPLY BRAKES.

**NHTSA Summary:**

ATTN: DEFECTS INVESTIGATIONS OFFICE. 2007 TOYOTA CAMRY WITH 38721 MILES THAT IS OWNED BY AND USED AS AN UNDERCOVER POLICE VEHICLE ACCELERATED WITHOUT EXPLANATION ON MARCH 10, 2010. THE OPERATOR, WHO IS A SWORN OFFICER, ADVISES THAT HIS FOOT WAS NOT ON THE ACCELERATOR AND THE VEHICLE INCREASED IN SPEED AND ENGINE REVOLUTIONS WITHOUT EXPLANATION. THE EVENT OCCURRED OVER THE COURSE OF APPROXIMATELY 1/10TH OF A MILE REACHING SPEEDS JUST OVER 60 MPH. THE ACCELERATION EVENT CORRECTED ITSELF. THERE WAS NO INJURY OR CRASH ASSOCIATED WITH THE EVENT. THE VEHICLE IN QUESTION HAD COMPLETED A TOYOTA RECALL SERVICE PROGRAM # SSC90L TO ADDRESS ACCELERATION ISSUES WITH THIS MODEL VEHICLE ON MARCH 2, 2010. THE VEHICLE WAS RETURNED TO THE HENRICO POLICE ON MARCH 3, 2010. THE EXTREMELY SHORT PERIOD OF TIME BETWEEN THE RECALL SERVICE AND THIS SUDDEN UNANTICIPATED ACCELERATION EVENT GIVES

C-2135

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

REASON TO BELIEVE THAT THE RECALL SERVICE WAS NOT EFFECTIVE IN CORRECTING THE ACCELERATION ISSUES ASSOCIATED WITH TOYOTA BRAND VEHICLES. THE VEHICLE WAS PARKED SHORTLY AFTER THE EVENT AND IS CURRENTLY SECURED BY THE HENRICO POLICE. THE VEHICLE HAS NOT BEEN DRIVEN OR EXAMINED BY ANY PARTIES SINCE THE OCCURRENCE OF THIS ACCELERATION EVENT. IN LIGHT OF THE FACT THAT THIS VEHICLE HAD RECENTLY COMPLETED THE REQUIRED ACCELERATION RECALL SERVICE AND HAS BEEN SECURED SINCE THE DATE OF THE OCCURRENCE, THIS AGENCY BELIEVES THAT THIS VEHICLE IS AN IDEAL CANDIDATE FOR EXAMINATION BY THE OFFICE OF DEFECTS INVESTIGATIONS TO DETERMINE THE ORIGIN OF THIS UNANTICIPATED ACCELERATION EVENT. THE VEHICLE IN QUESTION IS OUTFITTED WITH TOYOTA BRAND FLOOR MATS WHICH ARE TETHERED TO ANCHORS IN THE FLOORBOARD OF THE VEHICLE.

**NHTSA ODI Number:** 10327820  
**Date of Incident:** 20100310  
**Vehicle:** 2010 TOYOTA COROLLA  
**Location of Incident:** NEWARK, DE

**NHTSA Summary:**

WHILE DRIVING MY COROLLA, EVEN I DO NOT HIT THE GAS PEDAL, THE RPM STAYS AROUND 2000 AND SOMETIMES IT STARTED TO STUCK AROUND 3000 RPM FOR 15 TO 30 SECONDS THAN GOES TO NORMAL. I HAD DIFFICULTY TO SLOW DOWN IN BUSY TRAFFIC, BECAUSE EVEN I HIT THE BREAKS IT DOES NOT CUT THE GAS SO THE ENGINE STILL TRIES TO RUN AND THE CAR STILL TENDS TO GO, SO I AM NOT ABLE TO SLOW DOWN OR IT TAKES TIME TO SLOW DOWN. I AM DRIVING MY TOYOTA IN THE 5TH GEAR AND AROUND 3000 RPM. WHEN I NEED A SUDDEN STOP, I LET GO THE GAS PEDAL AND HIT THE BREAK. THE ETC'S COMMANDS HIGH IDLE EVEN I HIT THE BREAKS; THE PISTONS ARE STILL WORKING (THE ENGINE IS STILL RUNNING IN GEAR) WITH 3000 RPM SO I AM NOT ABLE TO SLOW DOWN OR STOP. THIS IS A SERIOUS SAFETY PROBLEM. HOW COME ECM WOULD COMMAND FOR HIGH IDLE FROM TIME TO TIME? HOW CAN I STOP THE CAR OR SLOW DOWN IN NEED WHILE ECM IS COMMANDING HIGH IDLE? IT IS IMPOSSIBLE TO HAVE A PROPER CONTROL ON THE CAR WHEN ECM COMMANDS HIGH IDLE. WHO CAN GIVE ME GUARANTEE THAT IT WOULD NOT GET STUCK IN HIGHER IDLES? (BECAUSE IT USED TO STUCK AROUND 2000 RPM AND RIGHT NOW IT ALSO STARTED STICKING AROUND 3000 RPM) WHEN I GET CLOSE TO A CURB OR TO AN EXIT I STOP HITTING THE GAS PEDAL ASSUMING THE CAR WILL GET SLOW BUT SINCE IT STUCKS AT HIGH RPM'S, THE CAR DOES NOT GET SLOWER WHEN IT IS IN THE GEAR.

**Location of Incident:** CARROLL, IA  
**NHTSA Summary:**  
**Additional Summary:**  
PER NEWS REPORT -

"Laura Wernimont spent her 75th birthday at Nebraska Medical Center Sunday, recovering from a punctured lung, as well as a broken jaw, cheekbone and vertebrae.

She said early last month she received a recall notice on her 2007 Toyota Avalon's accelerator pedal. Wernimont scheduled a repair but had to cancel it when her husband, Clarence, died. She rescheduled for this coming Monday, an appointment that she said came too late.

"It's terribly painful," she said from her hospital bed. Though her jaw was wired shut, she wanted to talk to warn other drivers about what she sees as a real danger. Her brother-in-law Bob Schroeder, helped tell her story.

Wernimont said she was driving to church about 8:15 a.m. Thursday, going around 20 miles an hour. She said she was approaching an intersection from a good distance and had not yet hit the brake pedal.

"I sped up so fast, I bet I was going a hundred miles an hour the way it sped. It just kept going faster and faster and I couldn't do anything about it."

Schroeder said, "She cut the corner, went through a big snow bank to try to stop, try to slow it down and there was a school bus in the way. And the school bus ran over her hood." He said three children were on board, but they and the driver are all okay. After colliding with the bus, Wernimont's car finally came to a rest in a second snow drift, she said. Pictures of the damage show her front end caved in, the top cut off so that rescuers could get Wernimont out. She said she asked a rescuer she knew, "Did I kill somebody?" And he assured me, I didn't."

Carroll police had no comment over the weekend, except to say the cause of the crash has not been determined. It is under investigation. But Wernimont believes it's tied to her Avalon's recall."

FROM NEWS ARTICLES -

"An Ohio woman said her Lexus sped through a parking lot, unimpeded when she hit the brakes, and crashed into a light pole in Fort Wayne, Ind., after its accelerator dropped to the floor.

Myrna Cook, 67, of Paulding, was treated for a broken leg and other injuries after Thursday's crash. She said she almost struck cars and pedestrians in the lot of the upscale Jefferson Pointe outdoor shopping mall.

"I just pulled out and then I heard this huge, loud revving sound, and my car instantly — I mean instantaneously — zoomed forward," Paulding told The Associated Press.

C-2137

#### Safety Research & Strategies

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

Cook, who said she has followed news coverage of Toyota's troubles, said she put the car in neutral, tried to turn off the ignition and slammed on the brake. She said none of those measures nor a brake override system a dealer installed about two weeks ago seemed to have any effect. The impact of the Lexus' air bag deploying fractured a bone in Cook's leg. She said she was relieved that she was able to avoid hitting any people.

"That was my biggest concern because I couldn't see, I was going so fast," Cook said."

**Date of Incident:** 20100311  
**Vehicle:** 1999 TOYOTA CAMRY  
**Location of Incident:** SAN DIEGO, CA  
**NHTSA Summary:**

DESPITE BEING REGULARLY MAINTAINED, VERY WELL TAKEN CARE OF, NOT ABUSED, AND LESS THAN AVERAGE USE (AVERAGE 6700 MI/YR), THIS TOYOTA CAMRY (PURCHASED NEW FROM A TOYOTA DEALERSHIP IN TORRANCE, CALIFORNIA) HAS NEVER WORKED PROPERLY FOR LONG. THE FACTORY-INSTALLED CD/CASSETTE/RADIO SYSTEM HAS BEEN REPLACED THREE TIMES, AND NOW THE CD PLAYER PART YET AGAIN DOES NOT WORK AT ALL. AT ONLY ABOUT 10000 MILES, THE AIR FLOW RATIO SENSOR AND MANIFOLD HAD TO BE REPLACED. THEN THERE IS THE FACT THAT ABOUT 95% OF THE TIME, THE CAR WILL NOT START WITHOUT THE ACCELERATOR BEING DEPRESSED AND HELD FOR 1 MIN, AND EVEN THEN THE ENGINE ALWAYS SOUNDS WEAK AND ONLY REACHES ABOUT 500 RPM UNTIL PRESSING ON THE ACCELERATOR AGAIN. THIS HAS BEEN GOING ON SINCE THE ODOMETER READ 16603 MILES. THAT WAS WHEN THE IDLE AIR CONTROL VALVE WAS FIRST REPLACED. THE SITUATION SEEMED TO IMPROVE, UNTIL 34800 MILES, WHEN THE SAME PROBLEMS WITH IT NOT STARTING AND BEING VERY WEAK RESUMED. AT 35394 MILES THE IDLE AIR CONTROL VALVE WAS REPLACED FOR A 2ND TIME. AT 47000 MILES THE SAME PROBLEMS RESUMED. AT 49180 MILES, THE CAR WOULD (AS USUAL) NOT START UNLESS THE ACCELERATOR WAS PRESSED FOR 1 MIN. THEN IT RAN AT ONLY 500 RPM. AS IT WAS THEN BEING DRIVEN OUT OF AN ALLEY, THE ENGINE SUDDENLY SPONTANEOUSLY BOOSTED TO 1200 RPM, NEARLY CAUSING A COLLISION. THIS TYPE OF IMPETUOUS ACCELERATION STARTED FREQUENTLY OCCURRING. TOYOTA REFUSED TO HELP WITH THIS PROBLEM, ONLY SAYING TO USE PREMIUM GASOLINE, WHICH PROVED TO NOT SOLVE THE PROBLEM. NOW THE ENTIRE ELECTRICAL SYSTEM OF THE CAR HAS COLLAPSED THREE TIMES AT 72173 MI, 75009 MI, AND TODAY (2010-03-11) AT 75024 MI. THE DISHONESTY OF TOYOTA PERSONNEL IS SEEN IN ITS REFUSING TO ADDRESS THE PROBLEM AND EARLIER IN FRAUDULENTLY CANCELING THE MAINTENANCE PROGRAM THAT WAS PART OF THE PURCHASE OF THE VEHICLE AFTER THE CAR WAS PAID FOR AND ITS REFUSAL TO RESPOND TO WRITTEN COMMUNICATION.

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

**Toyota ID Number:**  
**NHTSA ODI Number:** 10319245  
**Date of Incident:** 20100311  
**Vehicle:** 2005 TOYOTA 4RUNNER  
**Location of Incident:** SOUTH RIDING, VA  
**NHTSA Summary:**

I WAS DRIVING EAST ON I-66 JUST A FEW MILES FROM I-495 IN FAIRLY HEAVY TRAFFIC AROUND 8:55AM ON MARCH 11, 2010. I WAS TRAVELING APPROXIMATELY 15 MPH IN THE RIGHT LANE WHEN MY 2005 TOYOTA 4RUNNER LIMITED SUDDENLY SURGED FORWARD AS IF SOMEONE HAD STOMPED ON THE GAS PEDAL. I IMMEDIATELY APPLIED BOTH FEET TO THE BRAKE AND THE ANTILOCK BRAKES BEGAN TO SHUDDER. THE SHUDDERING LASTED 2 TO 3 SECONDS AND THEN THE VEHICLE FINALLY REDUCED THROTTLE. THERE WAS NO ACCIDENT OR TRAFFIC INCIDENT, BUT THE EXPERIENCE WAS QUITE UNNERVING. MY VEHICLE IS NOT PART OF ANY RECALL. I CALLED THE DEALER AND SCHEDULED AN APPOINTMENT FOR THE NEXT DAY. I CONTINUED ON TO WORK DRIVING WITH MY HAND ON THE SHIFTER AND I EVEN PRACTICED SHIFTING INTO NEUTRAL. WHEN THE PROBLEM HAD OCCURRED, I DID NOT REMEMBER TO SHIFT INTO NEUTRAL. EVERYTHING HAD HAPPENED SO FAST AND THE ACCELERATION WAS SO VIOLENT, MY ONLY INSTINCT WAS TO APPLY THE BRAKE DECISIVELY. I DROVE HOME VERY CAREFULLY THAT EVENING AND THEN TO THE DEALERSHIP THE NEXT MORNING. MY ORIGINAL APPOINTMENT WAS FOR 1PM, BUT I THOUGHT IT WISER TO DRIVE THERE FIRST THING IN THE MORNING. MY MAIN CONCERN IS THAT THE DEALERSHIP IS INSISTING THAT SUDDEN ACCELERATION IS NOT POSSIBLE ON MY VEHICLE. THE SERVICE MANAGER TOLD ME MY VEHICLE COULD NOT HAVE DONE WHAT I DESCRIBED. THIS IS VERY ALARMING TO ME BECAUSE IT HAPPENED, WHICH MEANS HE EITHER DOESN'T KNOW THE VEHICLE THAT WELL OR HE'S LYING. HE WAS NOT RUDE AND SEEMED VERY PROFESSIONAL, BUT HE WAS INSISANT THAT MY VEHICLE COULD NOT SUDDENLY ACCELERATE ON ITS OWN. HE PUT THE VEHICLE THROUGH DIAGNOSTIC TESTING AND FOUND NO PROBLEMS. HE ALSO ACTUALLY DROVE THE VEHICLE AND TESTED THE CRUISE CONTROL AND FOUND NO PROBLEM. THE VEHICLE HAS NEVER DONE THIS BEFORE AND IT HAS 79K MILES ON IT. I HAVE NEVER HAD ANOTHER VEHICLE DO THIS. MY CONCERN IS THAT IF IT HAPPENED TO ME, IT COULD HAPPEN TO MY WIFE OR SOMEONE ELSE IN THIS VEHICLE OR PERHAPS ANOTHER. I FEEL I HAVE AN OBLIGATION TO REPORT IT.

**Additional Summary:**

Per news article in azentral.com - "Viewer loses control of his Toyota

"We have another story related to the massive Toyota recall. I've heard from many Valley Toyota owners who say due to a sticking gas pedal or floor mat entrapment malfunction, they really thought their lives were in danger. But this next viewer came closer than most. He says he almost killed a boy when his Prius suddenly accelerated.

"I would never get back in that car and drive it again."

But Chuck Schmeiser used to love his 2008 Prius. He drove it more than 2 years without a problem. Then one day last month, Chuck was with his wife, pulling the Prius into a grassy parking lot.

"When the accident occurred, it was instantaneous. We had no advance warning, whatsoever."

Chuck says there was a boy directing him into a parking space up against a small mound of dirt. "The car just accelerated, went over the berm, and at that time we did hit that young man."

Luckily the boy fell to the left and was unharmed. Chuck says jamming on the brake did nothing, but he finally managed to stop the car. The Prius was towed to Big Two Toyota in Chandler. They brought in someone from Toyota Corporate to look at the car. Chuck says the corporate tech felt the sudden acceleration was not due to an entrapped floor mat.

"He stated there was a mat recall, but that he had checked my car and there was no problem as far as the mats we had in there."

Chuck says the corporate rep's only other conclusion: It must have been operator error.

"He asked us to sign his report and my wife and I refused because we did not feel it was accurate."

So what made his Prius go over that berm?

Chuck doesn't know, but an innocent bystander barely averted a tragedy. The boy's fine. Actually, Chuck says he went right back to work that day. As for the incident, if it wasn't the mats, was it a sticking gas pedal? Toyota says no. And the Prius is not part of the sticking gas pedal recall. Was it a computer problem? Toyota told me absolutely not. They've consistently denied that possibility with any recalled vehicles."

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

IGNORED THE FEELING, SINCE MY CAR WAS RUNNING HIGH RPM SINCE NEW. I REMEMBER THAT I ASKED ABOUT THE HIGH RPM TO THE SALESMAN. HE MENTIONED SOME NEW DESIGN FEATURE THAT I COULD NOT UNDERSTAND. AFTER THIS INCIDENT WITHIN 30 MINUTES I WENT TO TOYOTA OF PLANO AND REPORTED MY INCIDENT, AND THEN I WENT TO MY CAR/HOME INSURANCE COMPANY (STATE FARM INSURANCE CO.) TO REPORT THE INCIDENT. MY CAR WAS TOWED TO TOYOTA OF PLANO. I HOPE SOME ONE CHECKS THE ENGINE ELECTRONICS, NOT JUST MECHANICAL PROBLEM OF MY CAR. THIS IS VERY ODD AND DANGEROUS. I ASKED MYSELF ABOUT THE STATE OF MY OWN MIND AND ATTITUDE AT THE MOMENT BUT I WAS VERY NORMAL. I AM AN ELECTRICAL ENGINEER AND HAVE DRIVEN THE CARS FOR LAST 50 YEARS AND HAVE LIVED AND PARKED AT THE SAME PARKING SPACE FOR LAST 17 YEARS. I HAVE HEARD ABOUT THE TOYOTA PROBLEMS BUT NOT ABOUT MY TRUCK MODEL. UPDATED 03/30/10

**NHTSA ODI Number:** 10319588  
**Date of Incident:** 20100312  
**Vehicle:** 2007 TOYOTA TACOMA  
**Location of Incident:** VIRGINIA BEACH, VA

**NHTSA Summary:**  
 UNEXPECTED ACCELERATION INCIDENT AT APPROX 12:30 PM, FRIDAY, 12 MARY 2010 IN VIRGINIA BEACH VA. ROAD DRY, TRACTION GOOD, SPEED LIMIT 35 BUT I HAD BEGUN SLOWING (COASTING) IN ANTICIPATION OF RED LIGHT AS I APPROACHED AN INTERSECTION. WHEN LIGHT CHANGED TO RED BEGAN TO BRAKE AND EXPERIENCED RAPID PULSING OF THE BRAKE SYSTEM (SOMEWHAT SIMILAR TO OPERATION OF ANTI-LOCK BRAKES ON ICY ROADS) AT ABOUT 2ND OR 3RD PULSE, ENGINE RPM INCREASED RAPIDLY FROM APPROX 1200 RPM TO 4000 RPM PLUS. CUT THE IGNITION AND BROUGHT VEHICLE TO A SAFE STOP. INTERVAL TO CAR AHEAD HAD OPENED AS I SLOWED PRIOR TO BRAKING SO WAS ABLE TO STOP WITHOUT COLLISION, BUT WOULD HAVE RE-ENDED CAR AHEAD IF I HAD BEEN A NORMAL INTERVAL WHEN THIS INCIDENT OCCURRED.

**Location of Incident:** STILLWATER, MN

**NHTSA Summary:**

VEHICLE PERIODICALLY (APPROX. WEEKLY) SURGES BETWEEN 2ND AND 3RD GEAR (AUTOMATIC TRANSMISSION). HAS BEEN DOING THIS SINCE PURCHASE IN OCT. 2003, AS A BRAND NEW VEHICLE, UP THROUGH THE PRESENT DATE. FOR YEARS I COMPLAINED VERBALLY, AND WROTE LETTERS AND E-MAILS TO LEXUS. THEY FIRST DENIED THERE WAS A PROBLEM, THEN CHANGED TACTICS AND BLAMED IT ON ME. THEN SAID THEY DIDNT KNOW WHAT THE PROBLEM WAS OR IF THERE WAS A PROBLEM. THEN LEXUS FINALLY ADMITTED THERE WAS A PROBLEM--"OFF THE RECORD," BUT DIDNT KNOW HOW TO FIX IT. EVERY TIME I BROUGHT THE CAR IN FOR ROUTINE SERVICE, THEY WOULD INSTALL COMPUTER UPDATES TO SEE IF THAT WOULD FIX THE PROBLEM--WHICH IT DID NOT. YEARS AGO, I RESEARCHED THROUGH GOVERNMENT RECORDS AND FOUND NUMEROUS COMPLAINTS OF THE SAME KIND WITH 2004 LEXUS RX 330S. IN LIGHT OF RECENT RECALLS OF TOYOTA VEHICLES, I AM CONCERNED THAT THIS MAY SOMEDAY TURN INTO THE SAME UNINTENDED ACCELERATION PROBLEM THAT IS HAPPENING WITH OTHER TOYOTAS. I DO NOT FEEL SAFE IN MY CAR!

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

HAD ACCIDENT WITH 07 CAMRY HYBRID. RECALLS DONE 5 DAYS PREVIOUSLY. APPLIED BRAKE TO STOP AT LIGHT. CAR ACCELERATED AND STRUCK CAR IN FRONT OF ME. NO INJURIES TO ANYONE INCLUDING MY 97 YR. OLD FATHER. TOW DRIVER SAID RPM'S WERE "WAY UP" WHEN HE DROVE CAR TO PUT IT ON FLATBED. RECALLED INCIDENT OF SIX MONTHS PREVIOUSLY, AFTER ACCIDENT, WHEN I ATTEMPTED TO BRAKE AT CORNER BEFORE MAKING LEFT TURN. CAR ACCELERATED AND I SHOT ACROSS STREET FRANTICALLY APPLYING BRAKE AND STOPPED JUST SHORT OF A LINE OF PARKED CARS. THOUGHT LITTLE MORE ABOUT THE INCIDENT AS I BELIEVED, AT THE TIME, THAT I HAD MIXED UP THE ACCELERATOR AND BRAKE PEDALS. DRIVING A RENTAL AT PRESENT, CAR IS ON HOLD BEFORE REPAIR SO IT CAN BE INSPECTED BY TOYOTA. THE SUBRAGATION DEPT. OF MY INS. COMPANY HAS ATTEMPTED TO CONTACT TOYOTA TO DISCUSS A NUMBER OF CLAIMS BY THEIR CUSTOMERS AND TOYOTA HAS NOT RESPONDED SO FAR.

**Location of Incident:** LOS ANGELES, CA

**NHTSA Summary:**  
 ON MARCH 12, 2010 I WAS TRAVELING TO ARCHES NATIONAL PARK WITH FOUR OTHER PASSENGERS. ON THE WAY, WE DECIDED TO STOP BY BRYCE CANYON UTAH. I WAS DRIVING A 2007 TOYOTA SIENNA THROUGH 26 S. MAIN STREET BRYCE CANYON CITY. BECAUSE OF BAD WEATHER CONDITION, I HAD PUT THE CAR IN GEAR 3 AND WAS DRIVING 5 MILES PER HOUR. SUDDENLY I HEARD THE ENGINE ACCELERATE AND FELT THE CAR PUSH FORWARD. I LET OFF THE ACCELERATOR AND CAUTIOUSLY PRESSED THE BRAKES AS HARD AS I COULD, BUT BRAKES DID NOT RESPOND AND THE CAR CONTINUED FORWARD ABOUT 150 FEET. SOMEHOW I MANAGED TO TURN RIGHT ON CENTER STREET AND BUMPED ONTO THE CURB TO BE ABLE TO STOP THE CAR. AFTER THE CAR CAME TO FULL STOP, THE ENGINE SOUNDED NORMAL. BECAUSE OF THIS INCIDENT, WE CHANGED OUR SCHEDULE AND RETURNED HOME.

**Date of Incident:** 20100313  
**Vehicle:** 2010 TOYOTA CAMRY  
**Location of Incident:** WHITE PLAINS, NY

**NHTSA Summary:**

TOYOTA CAMRY XLE 2010 WITH 11500 MILES IS ACCELERATING ON ITS OWN AND IT IS TAKING NOTICEABLE LONGER TO SLOW DOWN. CHECK ENGINE LIGHT IS ON AND (ESC) LIGHT IS ON. HOWEVER THIS IS NOT THE FIRST TIME THIS HAS HAPPENED. THE CAR WAS TAKEN TO THE DEALER. THE FIRST TIME THEY SAID THERE WAS DEBRIS IN THE ENGINE HOWEVER IT TOOK THEM OVER 30 DAYS TO FIX IT AND THEY DID NOT SEEM CONFIDENT THEY FIXED THE PROBLEM. IT IS NOT A CONSISTENT PROBLEM AS IT HAPPENS UNEXPECTEDLY. THIS IS NOT CAUSED BY A DRIVER MISTAKE AS IT CAN BE CLEARLY SEEN WHEN FOOT IS OFF THE BRAKE AND CAR IS IN DRIVE THAT THE RPM IS HIGHER. SOMETIMES THE OPPOSITE HAPPENS AND THE CAR ACTS AS IF IT IS GOING TO STALL AND SHAKES VERY HARD. THE APPROX INCIDENT DATE IS THE LAST TIME IT WAS NOTICED AND THE CAR IS NO LONGER BEING DRIVEN. \* I WONDER IF THERE IS A POSSIBILITY THAT MY CELL PHONE THAT CAUSES INTERFERENCE WITH MY TV AND RADIO CAUSES AN INTERFERENCE WITH THE ETC SYSTEM?

C-2148

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

OCCASIONS WHERE THE ACCELERATOR PETAL HAS BEEN STUCK. ONCE WHEN THE CAR WAS IN PARK ABOUT TWO MONTHS AGO AND I THOUGHT IT WAS THE FLOOR MAT SO I SWITCHED OUT FLOOR MATS SINCE MY CAR WAS NOT PART OF THE RECALL. THEN ON SAT, 3/13/10 I WAS MERGING ON TO THE HIGHWAY AND I PRESSED DOWN HARD ON THE GAS PEDAL TO SPEED UP BECAUSE A CAR WAS BESIDE ME. ALL OF THE SUDDEN THE PEDAL WAS STUCK AND I CONTINUED TO SPEED UP WHEN I LET PRESSURE OFF THE GAS PEDAL. I PUT MY FOOT ON THE BRAKE AND THE CAR WASN'T STOPPING. THINKING I WASN'T PRESSING HARD ENOUGH I PUT BOTH FEET ON THE PETAL STILL NOT EVEN SLOWING DOWN. FINALLY, I SHIFTED THE CAR INTO NEUTRAL AND COULD STILL HEAR THE ENGINE REVING BUT THE CAR SLOWED DOWN QUICKLY. THINKING THAT I WAS IMAGING IT WHEN THE CAR SLOWED ENOUGH I SHIFTED IT BACK TO DRIVE AND IT TOOK OFF AGAIN WITHOUT PRESSING THE GAS PEDAL. I QUICKLY SHIFTED IT BACK INTO NEUTRAL AND WAS WONDERING WHAT I WAS GOING TO DO AND I HEARD A LOUD POP OR SNAP WITH THE GAS PEDAL AND THEN THE CAR WAS FINE. IT STOPPED ACCELERATING ON ITS OWN WITHOUT ME TURNING OFF THE CAR. I CHECKED THE FLOOR MAT AND IT WASN'T STUCK. I CALLED THE TOYOTA DEALERSHIP AND THEY ARE LOOKING AT THE PROBLEM BUT SAID THEY HAVE BEEN INSTRUCTED NOT TO FIX ANYTHING IF THEY CAN'T REPLICATE THE PROBLEM BECAUSE IT'S NOT PART OF THE RECALL AS THE CAR I HAVE WAS MADE IN JAPAN. I ALSO CALLED THE TOYOTA GENERAL LINE AND REPORTED THE PROBLEM. MY CONCERN IS THAT MY CAR WON'T BE FIXED AS THE WARRANTY RUNS OUT AT 30,000 MILES AND I HAVE 29,000 MILES ON MY CAR AND THE RECALL DOESN'T COVER MY MODEL. I AM NEARLY CERTAIN THAT TOYOTA HASN'T RECALLED ALL OF THE CAR AFFECTED BECAUSE IT'S NOT THE SPECIFIC GAS PEDAL THAT'S THE PROBLEM AS MY CAR DOESN'T HAVE THE IDENTIFIED GAS PEDAL. THE PROBLEM ISN'T RELATED TO THE GAS PEDAL. I DON'T THINK THEY KNOW WHAT THE PROBLEM IS.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10320271  
**Date of Incident:** 20100313  
**Vehicle:** 2007 TOYOTA TUNDRA  
**Location of Incident:** MIAMI BEACH, FL  
**NHTSA Summary:**

ON SATURDAY, MARCH 13, 2010 AROUND 4:30 TO 5:00PM, MY WIFE JENNY DEVEREAUX EXITED NW 5TH COURT FROM 195 TO NW 71 STREET IN MIAMI, FLORIDA. AS SHE WAS APPROACHING THE STOP SIGN ON 71ST STREET, SHE COMMENCED TO PRESS THE BRAKES. TO HER DEMISE, AFTER PUSHING THE BRAKE PEDAL TO STOP, THE VEHICLE, A 2007 TOYOTA TUNDRA CREW CAB DID NOT STOP, INSTEAD, AUTOMATICALLY INCREASED SPEED TO OVER 20 MPH. SHE WAS FORCED TO MAKE A LEFT TURN ON 71ST STREET TO AVOID AN ACCIDENT OR FROM CRASHING UNTIL A 1990 TO 1994 GREEN FORD EXPLORER GOING AT SPEEDS WELL OVER 50 MPH ON NW 5TH COURT COMING FROM THE EAST TO WEST, RAMMED/CRASHED INTO THE FRONT PASSENGER SIDE OF THE TOYOTA TUNDRA AS MY WIFE WAS MAKING THE LEFT TRYING TO EVADE TRAFFIC AND MAKE THE TUNDRA STOP. HIS FORD EXPLORER COMPLETELY TOTALED THE TUNDRA. I THEN ARRIVED AT THE SCENE TO FIND MY WIFE WITH SERIOUS INJURIES AND TOOK HER TO THE ER. I WAS SO GLAD TO SEE SHE WAS ALIVE AND WAS ABLE TO CAREFULLY TRANSPORT HER TO THE HOSPITAL. IF SOMEONE WOULD HAVE CRASHED INTO THE DRIVER SIDE OR A FRONT END COLLISION OCCURRED, MY WIFE WOULD DEFINITELY HAVE NOT SURVIVED. I FEEL, GOD WAS ON HER SIDE THAT DAY AND GAVE HER A SECOND CHANCE AT LIFE. THE MAN IN THE GREEN FORD EXPLORER COULD HAVE SLOWED DOWN AND STOPPED, BUT DID NOT. MAYBE, IF HE DIDN'T CRASH INTO THE TUNDRA THE WAY HE DID, MY WIFE WOULD NOT HAVE SURVIVED.

**Vehicle:** 2005 TOYOTA PRIUS  
**Location of Incident:** MIAMI, FL

**NHTSA Summary:**

TL- THE CONTACT OWNS A 2005 TOYOTA PRIUS. WHILE ATTEMPTING TO PULL INTO HIS DRIVEWAY TO PARK THE VEHICLE AND DEPRESSING THE BRAKE PEDAL. SIMULTANEOUSLY THE VEHICLE ABNORMALLY ACCELERATED. THE BRAKES WOULD NOT ENGAGE AND THE VEHICLE CRASHED INTO THE GARAGE CEMENT WALL. THE CONTACT IMMEDIATELY ENGAGED THE EMERGENCY BRAKE IN AN ATTEMPT TO STOP THE VEHICLE FROM PROCEEDING ANY FURTHER. THE PASSENGER IN THE VEHICLE SUSTAINED MINOR INJURIES TO HER HEAD AND FACE AREA. THE POLICE ARRIVED AND A REPORT WAS FILED ACCORDINGLY. THE MANUFACTURER WAS CONTACTED AND HE WAS AWAITING A REPLY, TO DATE. TWO MONTHS PRIOR TO THE INCIDENT, HE NOTICED HIS VEHICLE WAS UNDER RECALL (NHTSA CAMPAIGN ID NUMBER: 09V388000: VEHICLE SPEED CONTROL, ACCELERATOR PEDAL) AND TOOK THE VEHICLE IN FOR REPAIRS. THE DEALER ADVISED HIM THERE WAS NOTHING WRONG WITH THE VEHICLE UPON A VISUAL INSPECTION. A DIAGNOSTIC WAS NOT PERFORMED ON THE VEHICLE AND THE VEHICLE WAS RELEASED TO THE OWNER. THE FAILURE AND CURRENT MILEAGES WERE APPROXIMATELY 40,000. \*KJM

**NHTSA Summary:**

I HAVE A TOYOTA AVALON (2005) THAT HAS BEEN IN TOYOTA FOR ALL THE RECALLS (FLOORMAT, ACCELERATOR). ON MARCH 14, 2010 I WAS LEAVING A PARKING LOT WHEN THE CAR ACCELERATED AND I COULD NOT STOP IT EVEN BY PUTTING 2 FEET ON

C-2153

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THE BRAKE. I STEERED THE CAR OVER TOWARDS THE CURB, JUMPED IT AND PUSHED THE IGNITION BUTTON WHILE BOTH FEET WERE ON THE BRAKE. THE CAR THEN STOPPED. I WAITED ABOUT 10 MINUTES THEN DROVE SLOWLY AND APPREHENSIVELY HOME. I CALLED THE DEALER FIRST THING MONDAY MORNING AND WAS UNABLE TO GET THE CAR INTO THE SHOP UNTIL TUESDAY MORNING. THE CAR REMAINS AT THE DEALER'S AS THEY ARE STILL TRYING TO RECREATE WHAT HAPPENED. I WAS TOLD THEY WERE TALKING TO KANSAS CITY AND CALIFORNIA. MY FEAR IS THAT NOTHING WILL BE FOUND, THEY CANNOT ASSURE ME THIS WON'T HAPPEN AGAIN. I AM VERY APPREHENSIVE AS I AWAIT THE OUTCOME. DO YOU HAVE ANY ADVICE?

**NHTSA ODI Number:** 10320755  
**Date of Incident:** 20100314  
**Vehicle:** 2010 TOYOTA CAMRY  
**Location of Incident:** WEST JEFFERSON, NC

**NHTSA Summary:**

MY CARS TRANSMISSION SHIFTING IS VERY ROUGH AND "CLUNKY" WHEN COMING TO A STOP SIGN OR TRAFFIC LIGHT. MANY TIMES THE CAR WILL SEEM TO DOWNSHIFT RESULTING IN A STRONG PULLING (ALMOST A BRAKING SENSATION) PREVENTING A NORMAL COASTING TO A STOP SINCE YOU NEED TO KEEP PRESSING THE ACCELERATOR TO COUNTERACT THE DOWNSHIFTING DURING A SLOW DOWN. THIS HAS ALMOST CAUSED AN ACCIDENT SEVERAL TIMES. ALSO, CONVERSELY, THE TRANSMISSION SEEMS TO PUSH THE CAR FORWARD IN THE FINAL BREAKING MOMENTS DUE TO THE TRANSMISSION SHIFTING PATTERNS. I HAVE ALMOST BUMPED THE CAR IN FRONT OF ME A FEW TIMES BECAUSE OF THIS. I HAVE TAKEN THE CAR TO THE DEALERSHIP AND THE TRANSMISSION HAS BEEN RECALIBRATED SEVERAL TIMES RESULTING IN A TEMPORARY FIX BUT THE PROBLEM RETURNS, SOMETIMES IN LESS THAN 24 HOURS OF THE RECALIBRATION. I BELIEVE THIS IS A SAFETY CONCERN DUE TO MY EXPERIENCES OF NEAR ACCIDENTS WITH MY CAR.

**NHTSA ODI Number:** 10322492  
**Date of Incident:** 20100314  
**Vehicle:** 2007 LEXUS IS250  
**Location of Incident:** VICTORVILLE, CA

**NHTSA Summary:**

I PURCHASED A 2007 LEXUS IS250 ABOUT A MONTH AGO FROM CARMAX. I WAS DRIVING AT APPROX 30MPH WHEN A CAT ENTERED THE ROADWAY. I TRIED TO SLAM ON THE BRAKES BUT THE CAR ACCELERATED INSTEAD AND QUICKLY GAINED SPEED. I DONT KNOW HOW FAST I WAS GOING WHEN I WAS ABLE TO STEP ON THE BRAKE ENOUGH FOR IT TO STOP. CARMAX TELLS ME ITS NOT THEIR PROBLEM, EVEN THOUGH THEY SOLD ME A CAR THAT WAS ALREADY RECALLED. AND LEXUS SAYS THAT THEY DONT HAVE THE PART FOR IT BUT WILL PUT ME ON A WAITING LIST. SO, I EITHER GAMBLE WITH MY LIFE AND DRIVE THE CAR ANYWAY, OR IM STUCK WITHOUT A VEHICLE AT ALL. IM FURIOUS!

**Date of Incident:** 20100315  
**Vehicle:** 2009 TOYOTA RAV4  
**Location of Incident:** RALEIGH, NC

**NHTSA Summary:**  
MY WIFE TOLD ME THAT HER TOYOTA RAV 4 SEEMED TO SURGE FORWARD WHEN SHE WAS TRYING TO STOP. A FEW DAYS LATER I WAS DRIVING HER CAR AND WAS APPROACHING A STOP LIGHT THAT HAD JUST TURNED RED. I STARTED TO SLOW DOWN AND APPLY THE BRAKE AND THE TOYOTA SUDDENLY ACCELERATED AND LURCHED FORWARD. FORTUNATELY, THERE WAS NO CAR IN FRONT OF ME OR I WOULD HAVE REAR-ENDED IT. I IMMEDIATELY PUT IT IN NEUTRAL AND PUT BOTH FEET ON THE BRAKE AND THE ENGINE ACCELERATED TO APPROXIMATELY 5000 RPM. I TURNED THE IGNITION OFF AND PULLED OVER. AFTER THE ENGINE SHUT OFF COMPLETELY, I RESTARTED THE CAR AND MANAGED TO GET HOME SAFELY. I CALLED THE DEALER LEITH TOYOTA, AND THEY SAID TO BRING THE CAR IN RIGHT AWAY. THEY KEPT THE CAR SEVERAL DAYS AND RAN SOME TESTS, DROVE THE CAR BUT BECAUSE THEY WERE UNABLE TO REPLICATE THE SAME MECHANICAL OR ELECTRONIC PROBLEM, THEY COULD NOT OR WOULD NOT DO ANYTHING TO FIX THE PROBLEM. SO I FEEL THAT I AM LEFT WITH A VEHICLE THAT IS NOT SAFE TO DRIVE. AFTER LEARNING THAT SO MANY PEOPLE HAVE HAD THE SAME PROBLEM, IT IS NOW OBVIOUS THAT TOYOTA AND LEITH TOYOTA SOLD US THIS VEHICLE KNOWING THE PROBLEM EXISTED. THE GOVERNMENT NEEDS TO HOLD TOYOTA AND THE DEALERSHIPS RESPONSIBLE AND LIABLE FOR ANY ACCIDENTS THAT OCCUR FROM THIS PROBLEM AND REIMBURSE CONSUMERS THAT PURCHASED AND OWN VEHICLES THAT ARE UNSAFE DUE TO THIS MECHANICAL/ELECTRONIC PROBLEM.

**NHTSA Summary:**

ON MY 2009 COROLLA, I HAVE CONTINUED TO HAVE AN ISSUE WITH SLIGHT ACCELERATION AND SUDDEN RPM INCREASE WHILE THE ACCELERATOR IS NOT BEING APPLIED, AND USUALLY WHEN THE BRAKE IS BEING ENGAGED. THIS MAINLY HAPPENS WHILE GOING DOWNHILL AND IT CAUSES A FORWARD MOTION JERK IN THE CAR THAT IS FELT BY ALL PASSENGERS. I HAVE HAD THE RECALL REGARDING THE METAL ACCELERATOR PATCH, FIXED. I HAVE ALSO TAKEN MY CAR INTO THE DEALERSHIP SINCE THE RECALL FIX TO ADDRESS THIS PROBLEM AND I WAS INFORMED THAT ALL TOYOTA CARS DO 'THIS' AND THAT IT IS NORMAL. THEY DID HOOK MY CAR UP FOR A HEALTH

C-2162

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

DIAGNOSTIC WHICH SHOWED NOTHING ABNORMAL. I HAVE DRIVEN A LARGE NUMBER OF CARS WHICH INCLUDE OTHER TOYOTAS, AND I HAVE NEVER EXPERIENCED THIS PHENOMENA. I HAVE ALSO HAD MULTIPLE THIRD PARTIES IN MY CAR AND THEY HAVE SHOWN SURPRISE AND CONCERN WHEN THE CAR EXHIBITED THIS BEHAVIOR. I DO NEED TO SAY THAT I HAVE NEVER FELT LIKE I HAVE LOST CONTROL OF MY CAR WHILE THIS OCCURS. HOWEVER, BASED ON RECENT ACCOUNTS FROM OTHER PEOPLE THAT OWN TOYOTAS, AND COROLLAS SPECIFICALLY, I AM NOT INCLINED TO TAKE A 'WAIT AND SEE' APPROACH TO THIS MATTER. THIS PROBLEM HAPPENS ON AN ALMOST DAILY BASIS, SOMETIMES MULTIPLE INSTANCES IN ONE DAY WITH 8-10 SEPARATE INSTANCES BEING THE MOST COUNTED IN A 24 HOUR PERIOD OF TIME. THE MECHANIC THAT RAN THE HEALTH DIAGNOSTICS (3/18/10) TOLD ME THAT GIVEN THE NUMBER OF COMPUTERS THAT 'RUN MY CAR' THERE COULD BE A NUMBER OF THINGS GOING ON THAT WOULD CAUSE THIS TO HAPPEN BUT THAT ANY ABNORMALITIES WOULD COME UP ON THEIR COMPUTER SYSTEM, ONCE THE TESTS WERE RUN. NOTHING APPARENTLY SHOWED UP. APPROXIMATE INCIDENT DATE BELOW SHOWS THE DATE THAT THIS LAST OCCURRED IN MY VEHICLE, BUT SINCE THERE IS NOT AN OPTION FOR DATE RANGE, IT IS NOT GOING TO ACCURATELY REFLECT THE AMOUNT OF TIME THIS HAS BEEN GOING ON (WHICH HAS BEEN ALMOST THE WHOLE TIME I HAVE OWNED THE CAR, 2 YEARS IN JULY 2010).

**Date of Incident:** 20100317  
**Vehicle:** 2006 TOYOTA HIGHLANDER HV  
**Location of Incident:** NORTHBOROUGH, MA

**NHTSA Summary:**

WE'VE OWNED THE CAR FOR ABOUT A YEAR AND THIS PROBLEM HAS HAPPENED TO MY WIFE AND I BOTH WHILE DRIVING. WHILE BRAKING THE BRAKE PEDAL RISES AGAINST YOUR FOOT AND THE VEHICLE SURGES FORWARD THEN AS YOU APPLY MORE FORCE THE PEDAL GOES DOWN AND THE VEHICLE STOPS SUDDENLY. IT HAPPENS INTERMITTENTLY AND THE BRAKE WEAR AND FLUID LEVELS HAVE ALWAYS BEEN FINE, IT SEEMS TO BE A PROBLEM WITH THE POWER ASSIST TO THE BRAKE MAYBE AS THE HYBRID MODEL ENGINE STARTS BECAUSE IT SEEMS TO HAPPEN WHEN BRAKING AFTER COASTING SO THE ENGINE WOULD BE OFF BUT AS THE BRAKES ARE APPLIED ABOUT HALFWAY THROUGH THE NORMAL STOP YOU FEEL THE BRAKE PEDAL GET HARD AND THEN NORMAL AGAIN. DURING THE BRAKE PEDAL HARDNESS THE SPEED OF THE VEHICLE INCREASES WHICH REACTS IN A HARDER BRAKE PEDAL PRESSURE BUT BY THEN THE ASSIST IS BACK AND THE STOP IS SUDDEN. THIS COULD CAUSE BOTH AN ACCIDENT FROM HITTING SOMEONE DURING THE LOSS OF BRAKE AND FROM BEHIND BECAUSE OF THE SUDDEN STOP.

**Vehicle:** 2010 TOYOTA COROLLA  
**Location of Incident:** ENOSBURG FALLS, VT

**NHTSA Summary:**  
APPROXIMATELY ONE WEEK AGO, MY 2010 COROLLA SURGED FORWARD APPROXIMATELY 6-8 FEET AFTER I PLACED IN PARK IN MY WORK PARKING LOT. THE TACHOMETER WENT TO ABOVE 2000 RPM'S, AND THE CAR'S SPEED WENT OVER 20 MPH BEFORE I WAS ABLE TO JAM ON THE EMERGENCY BRAKE. MY FOOT WAS NOT ON THE BRAKE OR THE GAS PEDAL. I ALMOST HIT A TREE. MY HEAD WAS THRUST BACKWARDS. THREE HOURS LATER THE PARAMEDICS HAD TO COME TO MY OFFICE AND RUSH ME TO THE HOSPITAL AS I HAD A TIA AS A RESULT. THIS IS THE THIRD ACCELERATION INCIDENT WITH MY VEHICLE SINCE FEBRUARY 12TH. THE DEALERSHIP HAS EVEN HAD A SPECIALIST LOOK AT MY CAR, AND THEY SAID NOTHING IS WRONG WITH IT. I BROUGHT THE CAR BACK TO THE DEALERSHIP TODAY BECAUSE OF THE ABOVE INCIDENT. THE GENERAL SERVICE MANAGER SAID TO ME QUOTE UNQUOTE "WE CAN FIND NOTHING WRONG WITH YOUR VEHICLE, AND CAN NOT VERIFY YOUR COMPLAINT. YOU HAVE BROUGHT THE CAR TO US FOUR TIMES FOR THIS SAME ACCELERATION PROBLEM AND THERE IS NOTHING WRONG WITH YOUR CAR. WE HAVE NOT CHARGED YOU ANY OF THESE TIMES. IF YOU BRING IT TO US AGAIN FOR THE SAME PROBLEM, WE ARE GOING TO HAVE TO BILL YOU FOR OUR TIME. THEY ALSO CHARGED ME FOR THE RENTAL CAR TODAY. HE ALSO STATED THAT THE MEDIA IS BLOWING THIS WAY OUT OF PROPORTION, AND THAT THERE IS NOTHING WRONG WITH ANY OF THE TOYOTA VEHICLES. HE SAID THE PROBLEM IS ONE OF TWO THINGS. I ASKED HIM WHAT THOSE TWO THINGS WERE. HE STATED THAT THEY ARE THE DRIVERS ARE BAD DRIVERS AND THE OTHER IS IT IS FRAUD. SO I SAID ARE YOU IMPLYING I AM A LIAR OR A BAD DRIVER AND HE REFUSED TO ANSWER. I THEN SAID I AM NEITHER OF THE TWO AND THAT I RESENTED THE IMPLICATION TO BOTH. I TOLD HIM MY CAR IS A DEATH MOBILE AND UNSAFE TO DRIVE, AND ALSO THAT I HAD BEEN HURT 3 OR 4 TIMES ALREADY.

**Date of Incident:** 2009 TOYOTA CAMRY  
**Vehicle:** CHICAGO, IL  
**Location of Incident:** CHICAGO, IL

**NHTSA Summary:**

**Additional Summary:**  
Per News Report "Woman blames crash on Toyota brake problem":

"A Chicago woman who crashed her Toyota Camry through her garage Thursday says sudden acceleration was to blame.

After crashing through the garage, Charlene Amerson's 2009 Toyota Camry came to a stop in the backyard after hitting and dislodging her air conditioning unit. Amerson says she was just backing the car into the garage Thursday morning when it took off on her.

"I felt it accelerating so I tried to stop it by hitting the brakes but it never stopped," said Amerson. Amerson, who filed a police report, says just two weeks ago she brought her car in for service because of the recall of Toyota models with sudden acceleration problems. She got a receipt for the work. She says her car never acted like this before, though there have been other reported complaints about sudden acceleration in Toyotas even while driving in reverse.

"It was going so fast, till it didn't hardly give me time to think what I should do to stop it," said Amerson.

Because her airbag never deployed investigators will be able to get information from the car's so-called black box.

A Toyota spokesperson tells ABC7 they will notify Toyota's quality insurance team in Chicago. They will also contact the dealer and assist with the police accident investigation. The spokesperson also tells ABC7 Ms. Amerson should call her dealer.

She says she did that and they gave her the Toyota national number. But after waiting on hold for more than an hour she says she finally hung up."

**Vehicle:** 2007 TOYOTA TUNDRA

**Location of Incident:** NORTH ATTLEBORO, MA

**NHTSA Summary:**

I OWN A 2007 TOYATA TUNDRA AND HAD THE GAS PEDAL FIXED LAST WEEK UNDER THE RECALL. SINCE THE REPAIR MY GAS PEDAL IS SUPER SENSITIVE TO PRESSURE. THE FRICTION TO PUSH THE PEDAL DOWN IS CONSIDERABLY LESS AND CAUSES THE TRUCK TO LUNGE AS I ACCELERATE UNEVENLY. IT IS MOST NOTICEABLE ON A BUMPY ROAD WHEN THE PRESSURE FROM MY FOOT IS IMPOSSIBLE TO MAINTAIN AT AN EVEN PRESSURE. I CONTACTED THE DEALER AND WAS TOLD THAT THOUSANDS HAVE BEEN REPAIRED AND NO ONE HAS EVER COMPLAINED ABOUT THIS. I HAVE SPENT THE LAST SEVERAL HOURS SEARCHING THE INTERNET FOR SIMILAR STORIES AND FOUND A COUPLE. IN MY OPINION THIS IS MORE SERIOUS THAN BEFORE THE SO CALLED FIX. I WANT THIS FIXED AND DO NOT SEEM TO BE GETTING ANYWHERE UNTIL MORE PEOPLE COME FORWARD.

**Vehicle:** 2008 TOYOTA TUNDRA

**Location of Incident:** TAMPA, FL

**NHTSA Summary:**

SUDDEN ACCELERATION ON MY 2008 TOYOTA TUNDRA. TRUCK WOULD NOT STOP, KEPT GETTING FASTER AND FASTER. TURNED KEY OFF TO STOP. TOOK TO DEALER AND THEY SAID THEY SAID THEY PUT A SHIM ON THE GAS PEDDLE AND THEN THEY TEST DROVE THE TRUCK AND FOUND NO PROBLEM. I CALLED TOYOTA CORPORATE AND THEY SAID THEY WOULD ONLY NOTE MY ACCOUNT AND WILL NOT INVESTIGATE PROBLEM. MY COMPLAINT IS THAT NO ONE WILL LOOK INTO THE VEHICLE COMPUTER TO SEE WHAT CAUSED THE VEHICLE TO ACCELERATE SO FAST AND WHY IT GOT WORSE WHEN I APPLIED THE BRAKES. TOYOTA IS TOTALLY NOT TAKEN THIS SERIOUS AT ALL.

**NHTSA ODI Number:** 10322233  
**Date of Incident:** 20100322  
**Vehicle:** 2008 TOYOTA SEQUOIA  
**Location of Incident:** INDIO, CA

**NHTSA Summary:**

WE OWN A 2008 SEQUOIA. ON 3/13/10 THE LOCAL 1-10 TOYOTA DEALER IN INDIO, CA DID THE INITIAL "RECALL FIX" CONCERN SEQUOIA. MY HUSBAND WORKS IN ANZA, CA. ON HIS WAY HOME FROM WORK HE WAS DRIVING DOWNHILL ON ROUTE 74 (A VERY TREACHEROUS MOUNTAIN ROAD) AND THE RPM'S ON THE TOYOTA INCREASED AND WHEN HE SAW THEM GET OVER 3000 RPM'S HE TRIED TO BREAK. THE BREAKS DID NOT WORK AND THE RPM'S KEPT RISING. HE HIT THE BREAKS AGAIN AND THEY STILL DIDNT WORK. HE LAID ON THEM THE 3RD TIME AND THEY FINALLY KICKED IN. WHEN HE GOT HOME HE TOLD ME WHAT HAPPENED. I IMMEDIATELY CALLED THE TOYOTA DEALER AND THEY ADVISED ME TO BRING THE CAR IN FIRST THING THE FOLLOWING DAY. WE RAN INTO SEVERAL BAD EXPERIENCES WITH HOW THE DEALER HAS HANDLED US DURING THE WEEK. THEY STILL HAVE THE VEHICLE AND TODAY IS 3/25/10. WE ASKED THEM FOR A FULL PEDAL REPLACEMENT AS WE RESEARCHED IT ON LINE AND SAW THAT WE WERE NOT ALONE IN EXPERIENCING A PROBLEM EVEN AFTER THEY HAVE COMPLETED THEIR INITIAL "RECALL FIX". WE ARE VERY CONCERNED ABOUT SEVERAL ISSUES. OUR PRIMARY CONCERN IS THAT MY HUSBAND CAN NO LONGER TRUST DRIVING THIS CAR BACK AND FORTH TO WORK. WE FEEL WE WILL NOT BE ABLE TO TRUST DRIVING IT EVEN AFTER WE GET IT BACK SINCE THIS IS THE 2ND FIX THEY HAVE DONE ON IT. WE ALSO ARE CONCERNED ABOUT THE RESELL VALUE OF OUR VEHICLE AS WE HAVE SEEN ARTICLES STATING THAT KELLY BLUE BOOK IS CONFIRMING THAT THE RESELL VALUES ARE BEING EFFECTED. COULD A LAWYER POSSIBLY NEGOTIATE WITH TOYOTA ON OUR BEHALF TO REDUCE OUR LOAN SINCE WE ARE FINANCED THROUGH TOYOTA DIRECTLY AND OUR VEHICLE VALUE HAS BEEN REDUCED.

**NHTSA Summary:**

**Additional Summary:**  
"Lee County Sheriff's deputies say Glenda Whitfield was pulling up to ACT III when her 2007 Toyota Camry reportedly accelerated on its own Tuesday morning and drove through the salon.

Salon Owner Gail Moree says Whitfield was holding down the brake and the car accelerated anyway. Toyota recalled certain 2007 Camrys due to possible sticking accelerators.

Toyota of Albany Owner Alan Murphy says Whitfield brought her car into their office and they did the recall work - fixing the potential problem. Murphy says Toyota engineers will come to Albany in the next few days to examine the car's computer.

"It will be able to go in there and read exactly what happened to the vehicle, whether she put her foot on the gas or the break, who's responsible or what the fault is," Murphy said.

Murphy says this is the first report of a possible sticking accelerator at the Albany dealership. He says they've worked on 800 recalled Toyotas."

**NHTSA Summary:**

RETURNING HOME AT 10 P.M I DROVE UP TO MY GARAGE DOOR AND ATTEMPTED TO TURN OFF THE MOTOR. INSTEAD THE CAR LURCHED FORWARD, HITTING THE DOOR WITH SOME FORCE. I SLAMMED ON THE BRAKES AND PUT THE CAR IN REVERSE. BUT INSTEAD OF STOPPING IT BACKED RAPIDLY OUT OF THE DRIVEWAY, ACROSS THE ROADWAY, AND INTO MY NEIGHBOR'S CADILLAC. WHEN I PUT IT BACK IN DRIVE IT STILL MOVED RAPIDLY, THIS TIME BACK ACROSS THE ROAD AND INTO MY GARAGE, CAUSING TERRIBLE DAMAGE. THIS HAPPENED 4 DAYS AGO. NEVER BEFORE. I'M NOW WAITING FOR A SETTLEMENT SO I CAN BUY A LESS RISKY CAR.

**Location of Incident:** DES PLAINES, IL

**NHTSA Summary:**

THERE APPEARS TO BE SOMETHING DANGEROUSLY WRONG WITH THE TRANSMISSION. I HAVE EXPERIENCED THIS RANDOMLY, MAYBE A DOZEN TIMES, OVER THE LAST WEEK SINCE I HAVE OWNED THE CAR. IT TAKES UP TO TWO SECONDS FOR THE CAR TO RESPOND AFTER PRESSING THE GAS PEDAL. THIS HAS HAPPENED WHEN SLOWING DOWN AND THEN HAVING TO GIVE THE CAR GAS, AGAIN. OTHER TIMES IT HAS HAPPENED FROM A STOP OR AN IDLING ROLL. THERE IS A SIGNIFICANT HESITATION. THIS DOES NOT HAPPEN EVERY TIME, WHICH MAKES IT THAT MUCH MORE DANGEROUS - BEING UNPREDICTABLE.

**NHTSA Summary:**

DROVE UP TO USE THE ATM AT BANK. PLACED CAR IN PARK AND USED ATM. WHEN I FINISHED, I PUT MY FOOT ON THE BRAKE AND SHIFTED INTO DRIVE. CAR ENGINE ACCELERATED AND CAR LURCHED FORWARD. A LARGE CLOUD OF SMOKE CAME OUT OF THE EXHAUST PIPE. I WAS ABLE TO PUT THE CAR IN NEUTRAL AND TURN OFF THE ENGINE. PUTTING THE CAR IN NEUTRAL DID NOT STOP THE ENGINE FROM RACING. I PUSHED THE CAR AWAY FROM THE ATM AND CALLED THE TOYOTA DEALER, WHO CAME AND DROVE THE CAR TO THEIR GARAGE. THE DEALER FOUND NO RECORD OF THE EVENT ON THE CAR'S COMPUTER AND HAS TWICE TRIED TO RETURN THE VEHICLE TO ME. ONLY AFTER I THREATENED TO GO ON A LOCAL RADIO TALK SHOW, DID THE AGREE TO CONTINUE TO INVESTIGATE. I WAS ABLE TO OBTAIN VIDEO OF THE INCIDENT FROM THE BANK'S SECURITY CAMERAS AND HAVE SHARED THEM WITH THE TOYOTA DEALER AND WOULD BE HAPPY TO SHARE THEM WITH THE NHTSA.

**Date of Incident:** 20100323  
**Vehicle:** 2010 TOYOTA TUNDRA  
**Location of Incident:** READING, MA

**NHTSA Summary:**

IN MARCH 2010, I PURCHASED A NEW TOYOTA TUNDRA 2010 CREWMAX 5.7L TRUCK FULLY LOADED WITH NAVIGATION SYSTEM, REMOTE START, AND GUIDEPPOINT (LOJACK LIKE) SYSTEM FROM EXPRESSWAY TOYOTA IN DORCHESTER, MA. THE TRUCK WAS SUPPOSEDLY MANUFACTURED IN FEBRUARY 2010 AND HAD THE REVISED GAS PEDAL. ON MARCH 23, THE INCIDENT BELOW OCCURRED. WAS DRIVING TO WORK FROM READING, MA TO CHARLESTOWN, MA (ABOUT 13 MILES) ON TUESDAY, MARCH 23. IT WAS A RAINY DAY AND TRAFFIC WAS HEAVY. I HAD THE DEFROSTER AND WIPERS ON AND WAS STUCK IN TRAFFIC ON A BUSY MAIN STREET ABOUT 10 MILES INTO THE TRIP. THE CAR IN FRONT OF ME STARTED TO MOVE FORWARD SLOWLY SO I TOOK MY FOOT OFF THE BRAKE TO ALSO MOVE FORWARD SLOWLY. THAT OTHER CAR WAS ABOUT 10 FEET IN FRONT OF ME. I BARELY TOUCHED THE GAS PEDAL WHEN THE TRUCK TOOK OFF AT FULL ACCELERATION. I GOT ON THE BRAKE AS HEAVY AS I COULD AND THE TRUCK FISH TAILED SIDE TO SIDE. I QUICKLY PUT IT INTO NEUTRAL AND THEN PARK WHILE THE TRUCK WAS STILL REVVING AT FULL ACCELERATION. WHILE IT WAS IN PARK AND ENGINE STILL GOING FULL SPEED I TAPPED THE GAS PEDAL WITH MY FOOT AND IT RELEASED. I WAS VERY LUCKY I DIDN'T CRASH INTO ANYTHING. I DID SMELL A BURNING ODOOR ONCE I GOT THE TRUCK UNDER CONTROL. I'M NOT SURE IF THAT WAS THE TIRES, BRAKE PADS OR SOMETHING ELSE.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AFTER TOYOTA RECALLED AND WORKED ON MY GAS PEDAL, IT GOT STUCK ONCE, WHICH LITERALLY CAUSED ME TO BUMP SLIGHTLY INTO A CAR IN FRONT OF ME) THEN ESCALATED ON ITS OWN SPORADICALLY. ONE DEALER AGENT TOLD ME WOULD SUBMIT PAPERWORK AND IT WOULD TAKE AN HOUR TO CHECK, AND THE GAS PEDAL WOULD BE REPLACED. WHEN I TRIED TO BRING THE CAR TO BE CHECKED AND WORKED ON, HE SAID NOT COME TILL HE CALLED WHEN HE WAS READY. FOR 1-2 WEEKS HE NEVER CALLED. WHEN I WENT TO ASK, THEY SAID THE CAR WAS NOT TO BE WORKED ON FOR A WHILE. I CALLED CUSTOMER SERVICE TO CHANGE TO ANOTHER DEALERSHIP. THIS DEALERSHIP ASKED ME TO WAIT FOR 2 WEEKS, AND SAID WOULD NEED TO KEEP MY CAR FOR TWO WEEKS TO CHECK. I CALLED TWICE BUT NO ONE CALLED BACK. I FINALLY WENT TO A DEALERSHIP WHERE I HAPPENED TO BE NEAR WHERE I WORKED ONE DAY. THEY CHECKED TO MAKE SURE MY CAR WAS OKAY AT LEAST THEN. I ASKED THEM HELP ME PUT MY CARPET IN PLACE AS AFTER DETAILING THE FIRST DEALERSHIP DID NOT PUT THEM BACK IN ORDER AS THEY WERE WET. THIS DEALERSHIP PUT HOOK ON MY CARPET TO MAKE SURE THEY WERE IN PLACE AS I DID NOT HAVE THE HOOK AS THEY WERE SUPPOSED TO BE, AND ADVISED ME TO CALL CUSTOMER SERVICE, NOT KNOWING I HAD ALREADY CALLED AND THEY WERE REFERRING ME TO DEALERSHIP THAT TOOK FOREVER. I WAS BY ANOTHER DEALERSHIP WHERE I WORKED THE NEXT DAY. THEY CHECKED, AND ORDERED THE GAS PEDAL IMMEDIATELY. IN JUST 2-3 DAYS THEY TOLD ME THEY HAD THE PART AND HAD ME OVER AND GOT MY CAR FIXED. THE CARPET IN THE DRIVER SEAT IS FIXED, BUT NOT THE OTHERS YET. THE GAS PEDAL OF MY CAR WAS A RISK TO THE SAFETY OF ME AND MY CAR AND OTHER PEOPLE AND CARS AROUND ME. THE DELAY OF THE FIRST TWO DEALERSHIPS AND CUSTOMER SERVICE SEEM TO NOT CARE FOR THE URGENT NEED FOR THE PEDAL TO BE REPLACED IMMEDIATELY TO ENSURE ABSOLUTE SAFETY. THE LATTER TWO DEALERSHIP WERE HELPFUL TO SPOT THE PROBLEM OF MY CARPET AND TOOK PREVENTIVE MEASURE IMMEDIATELY, AND THEN GOT THE GAS PEDAL REPLACED IMMEDIATELY. SHOULD TAKE CARE OF PROBLEM BETTER.

**Vehicle:** 2005 TOYOTA TUNDRA  
**Location of Incident:** WHITTIER, CA

**NHTSA Summary:**

I DRIVE A 2005 TOYOTA TUNDRA THAT HAS ACCELERATED ABOUT A DOZEN TIMES SINCE I BOUGHT IT. SEEMS THAT WHEN I HIT A MAJOR BUMP THAT'S RISING ACROSS THE LANE I'M IN AND GO ACROSS IT, MY TRUCK WILL ACCELERATE MOMENTARILY WITHOUT ME PRESSING ON THE GAS PEDAL. I CANNOT ALWAYS DUPLICATE THIS ACTION AND WHEN I GO TO THE DEALER IT COMES BACK AS PROBLEM NOT FOUND. AS I MENTIONED IT'S ONLY OCCURED MAYBE A DOZEN TIMES SINCE 2005 BUT IT IS A CONCERN AFTER ALL THE RECALLS THAT TOYOTA HAS HAD. I RECENTLY COMPLETED 95,000 MILES ON MY VEHICLE AND HAVE BEEN HAPPY WITH ITS PERFORMANCE WITH THIS EXCEPTION.

ON 4 SEPARATE OCCASIONS, 2 TIMES EACH FOR 2 DIFFERENT DRIVERS, OCCURRING ABOUT EVERY 1200 MILES, OUR LEXUS HS250H ACCELERATED DURING A STOPPED OR BRAKING SITUATION. WE BROUGHT IT TO THE DEALER AND CONTACTED LEXUS CUSTOMER SERVICE. THE RESPONSE: [THERE IS NOTHING WRONG AND THE VEHICLE IS OPERATING NORMALLY. YOU ARE EITHER USING THE ACCELERATOR AND BRAKE AT SAME TIME OR JUST EXPERIENCING THE GAS ENGINE STARTING UP WHICH IS GIVING YOU THE SENSATION OF MOVING WHEN YOU ACTUALLY AREN'T MOVING. THIS SENSATION IS NORMAL FOR BOTH PRIUSES AND HS 250 MODELS.] I CAN USUALLY TELL WHEN THE GAS ENGINE FIRES UP AND THE SENSATION IS DEFINITELY DIFFERENT THAN THE SCARY PROBLEM WE ARE HAVING. WHEN ASKED WHAT TO DO IF THIS CAUSES AN ACCIDENT THE RESPONSE WAS: [CONTACT YOUR INSURANCE COMPANY]. CLEARLY LEXUS HAS NO INTENTION OF ADMITTING THAT THERE'S ANYTHING WRONG. NO SALESPERSON INFORMED US THAT THE NORMAL OPERATION OF THE CAR INCLUDES SUDDEN ACCERATION OR THE "SENSATION" OF IT. TWO INCIDENTS CAUSED MY WIFE TO SLAM ON THE BRAKE IN BUMPER TO BUMPER TRAFFIC TO AVOID HITTING THE CAR IN FRONT AND ONE INCIDENT CAUSED ME TO HIT AN OBJECT IN MY GARAGE.

WORK TOYOTA WOULD REPLACE THE ENTIRE ACCELERATOR ASSEMBLY AT THE VEHICLE OWNER'S REQUEST. I HAVE HAD PROBLEMS WITH THE UNINTENDED ACCELERATION, HAD THE FIRST REPAIR ATTEMPT COMPLETED AND I STILL HAVE THE PROBLEM. I CALLED MY LOCAL TOYOTA DEALER WHERE I PURCHASED THE VEHICLE AND WAS TOLD THAT TOYOTA WILL NOW REFUSE TO PERFORM THIS SECOND ATTEMPT UNTIL NEXT MONTH WHEN ANOTHER DIFFERENT TYPE OF "FIX" WILL BE SCHEDULED (SHAVING THE ACCELERATOR PEDAL). MY VEHICLE DOES NOT HAVE FLOOR MATS AND I FIND THIS EXCUSE UNACCEPTABLE.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10323041  
**Date of Incident:** 20100325  
**Vehicle:** 2010 TOYOTA RAV4  
**Location of Incident:** MALIBU, CA

**NHTSA Summary:**  
UNINTENDED ACCELERATION OF TOYOTA RAV4 WITH "FIXED" ACCELERATOR PEDAL. WITHIN 30 MILES OF DRIVING: ON COMING TO TRAFFIC STOP, ENGINE REVVED UP TO AN AUDIBLE HIGH SPEED. TO PREVENT A COLLISION I APPLIED INTENSIVE PRESSURE TO BRAKE PEDAL WHILE SETTING HAND BRAKE. CAR STILL SEEMED TO BE IN FORWARD ROLL MODE, SO I PUSHED GEAR SHIFT FROM DRIVE THRU NEUTRAL, REVERSE AND INTO PARK. ENGINE SPEED RETURNED TO NORMAL IDLE WITHOUT FURTHER INCIDENT. I THEN DROVE 40 SOME MILES TO RETURN HOME. ON 3/27 I TOOK CAR TO THE DEALER TO REPORT THAT THE ACCELERATOR PEDAL MODIFICATION WAS A FAILURE. I TOOK DELIVERY OF THIS NEW CAR ON 7/31/09. WITHIN ABOUT 300 DRIVING MILES OF ACCUMULATED MILEAGE, THE 1ST UNINTENDED ACCELERATION OCCURRED REQUIRED ADDED PRESSURE TO BRAKE PEDAL & USE OF HAND(EMERGENCY) BRAKE TO STOP CAR & END ABNORMAL ENGINE SPEED. GEAR SHIFT REMAINED IN DRIVE. I HAD 3 TO 4 SUCH INCIDENTS WITHIN APPROX. 2400 MILES COMPRISING 40-50 TRIPS, NONE LONGER THAN 100 MILES. MOST OF MY DRIVING IS HIGHWAY TYPE, WHICH DOES REQUIRE INTERMITTENT BUT INFREQUENT TRAFFIC STOPS. ABOUT 200 MILES OCCURRED IN CITY-TYPE CONDITIONS (FREQUENT TRAFFIC STOPS) WHICH WERE SPREAD OVER ABOUT 12 OF THE AFORESAID TRIPS. ALL THE UA SITUATIONS OCCURRED UNDER THE CITY-TYPE CONDITIONS. I MADE SEVERAL TRIPS TO THE DEALER TO REPORT THE INCIDENTS AND TO OBTAIN HELP. AFTER THE 1ST ONE THE SERVICE DEPARTMENT CHECKED THE CAR & FOUND NOTHING WITH THE CAR'S SAFE OPERABILITY. I TOOK THE CAR BACK FOR SERVICE AFTER THE INCIDENT WHICH WAS POST SAFETY RECALL PEDAL MODIFICATION. THE RESPONSE WAS THAT THIS WAS THE FIRST THAT THEY HAD HEARD OF A "FIX" FAILURE. TOYOTA APPEARS TO CLING TO THE STICKY FLOOR MAT OR SIMULTANEOUS PRESSURE TO ACCELERATOR AND BRAKE PEDALS.

ON MARCH 26, 2010 MY HUSBAND AND I WERE STOPPED AT A TRAFFIC SIGNAL, (WITH MY FOOT ON THE BRAKE AS YOU WOULD EXPECT), WHEN THE CAR SUDDENLY ACCELERATED AT FULL THROTTLE. IN THE BRIEF BUT TERRIFYING MOMENTS THAT THE CAR WAS OUT OF CONTROL I UNFORTUNATELY COLLIDED WITH ANOTHER VEHICLE AS I THREW THE GEAR SELECTOR INTO NEUTRAL.

**Additional Summary:**  
FROM DETROIT FREE PRESS:

C-2190

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

"The Allen Park couple stopped at a traffic light on Van Born near Pelham Road in Taylor on March 26. Lois Markyvech was driving when she said her 2003 Lexus ES300 lurched forward even though she held her foot firmly on the brake. She said she turned into the right-turn lane attempting to pull into a service station, remembering that, as Toyota has instructed customers, she should shift into neutral.

"It all happened in a matter of a few seconds," Lois Markyvech said. Her Lexus sideswiped a GMC Sierra pickup driven by John Green of Dearborn. No one was hurt. But the car sustained significant body damage.

THE MARKYVECH'S CALLED THEIR DEALER, LEXUS OF ANN ARBOR WHO REFERRED THEM TO A CUSTOMER SERVICE NUMBER. AFTER NUMEROUS CALLS, A LEXUS REP TOLD THEM NOT TO HAVE THEIR CAR REPAIRED AND SOMEONE WOULD CALL THEM VERY SOON TO LOOK AT THE CAR. AFTER NOT HEARING FOR TWO WEEKS, THE FREE PRESS CONTACTED TOYOTA INQUIRING - SEVERAL DAYS LATER TOYOTA CUSTOMER SERVICE REP. SANDRA FOREMAN CONTACTED THE COUPLE. THE NEXT DAY THE CAR WAS TOWED TO MEADE LEXUS IN SOUTHFIELD (APRIL 15TH) WHERE ERIC LEWIS OF ENGINEERING ANALYSIS ASSOCIATES IN WARREN TOLD THE MARKYVECHS THAT HE WOULD CONDUCT AN INVESTIGATION. FIVE DAYS LATER, AND THEY HAVE NOT HEARD ANYTHING ABOUT WHAT THE TECHNICIANS FOUND.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10322432  
**Date of Incident:** 20100326  
**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** RENO, NV

**NHTSA Summary:**  
ON THE 26TH OF MARCH 2010 ABOUT 3:00 PM, I WAS DRIVING MY 2006 TOYOTA TACOMA AND GOT ONTO INTERSTATE 80 GOING WEST AND BEGAN TO MERGE INTO TRAFFIC. AS I ACCELERATED TO GET IN FRONT OF A WHITE SEMI-TRACTOR TRAILER, I REALIZED I WAS ACCELERATING FASTER THAN I WAS PUSHING DOWN ON THE GAS PEDAL. MY TRUCK ACCELERATED AS IF IT WANTED TO GO FASTER THAN I DID, AND SO I LET MY FOOT OFF THE GAS PEDAL. BUT, MY TOYOTA TACOMA STILL INCREASED IN SPEED, AND THE GAS PEDAL SEEMED SOFT AS IF THE TRUCK WAS IN CRUISE CONTROL. REALIZING THAT MY SPEED WAS 80 AND RISING RAPIDLY, I PUSHED DOWN ON THE BRAKE PEDAL. THE CAR BARELY SLOWED DOWN AND SPED RIGHT BACK UP CONTINUING TO ACCELERATE AS SOON AS I REMOVED MY FOOT FROM THE BRAKE. SO, I PRESSED DOWN THE BRAKE PEDAL WITH ALL MY FORCE, BUT THE TRUCK DID NOT SLOW DOWN SUFFICIENTLY TO SAFELY PULL OVER. SO, THEN, I PUT ONE FOOT ON THE BRAKE AND USED THE OTHER TO PUSH DOWN THE EMERGENCY BRAKE. THE TRUCK DECELERATED ENOUGH TO ALLOW ME TO PULL OVER INTO THE FAR RIGHT LANE. THE CAR CONTINUED TO ROLL DESPITE APPLICATION OF BOTH BRAKES, AND SO I THREW THE VEHICLE INTO PARK. THIS SHUT OFF THE ENGINE. I HAD MY TRUCK TOWED TO THE DEALERSHIP AND NOTHING HAS BEEN RESOLVED AS OF TODAY.

**Additional Summary:**  
INFO FROM NEWS ARTICLES IN THESPEC.COM:

"A Hamilton man who claims to be the victim of sudden unintended acceleration that sent his 2009 Toyota Venza crashing into a tree and house last weekend says he is grateful no one was injured.

Since the ordeal Saturday morning, Hindle said he has spoken with the area dealership where he leased the SUV. All he wants is to get out of the lease. He says he will never drive a Toyota again.

Hindle was returning from a Locke Street bakery around 9:15 a.m. when he turned onto Dundrum Street South off Aberdeen Avenue. The street is on a bit of an incline, so, Hindle said, he accelerated as he turned onto the street. But when he tried to slow for his approaching turn, the accelerator pedal stuck, he claimed.

Hindle slammed on his brakes. The tires screeched and smoked, but the vehicle continued to gain speed, he said. "I was panicking," he said, adding that in hindsight he should have shifted into neutral. He kept thinking: "I'm going to hit somebody or something."

C-2193

#### Safety Research & Strategies

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

Hindle said he looked for the safest place to crash his car and decided on a lawn with three trees. The tree he slammed into was dead and crashed over "like paper," he said. The vehicle came to rest lodged in the front of a Dundrum Street home. Dazed, he shifted into park and turned off the engine.

It caused serious damage to the home's exterior wall and windows. But nobody was hurt, other than some minor back pain for Hindle."

#### Safety Research & Strategies

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

ON MARCH 28, I WAS DRIVING OUR 2010 TOYOTA HIGHLANDER THAT WE PURCHASED AT THE END OF DECEMBER 2009 IN A RESIDENTIAL AREA WHEN THE GAS PEDAL STUCK AND I WAS UNABLE TO APPLY THE BRAKES TO STOP IT. LUCKILY I WAS ABLE TO PUT IT IN NEUTRAL GEAR AND COAST TO THE SIDE OF THE ROAD WITHOUT PROPERTY DAMAGE OR INJURY TO ANYONE. I THEN CALLED THE 911 AND THE POLICE CAME OUT. THIS CAR WAS INVOLVED IN THE RECALL AND THE FIX WAS COMPLETED A FEW WEEKS AGO. NO ONE WAS AVAILABLE AT ANY TOYOTA DEALERSHIP TO COME OUT AND PICK UP THE CAR, SO I HAD IT TOWED USING AAA TO A LOCAL DEALERSHIP. I HAD MY FOUR CHILDREN IN THE CAR WITH ME AND CAN TESTIFY AS TO WHAT HAPPENED. THIS IS RIDICULOUS. THEIR FIX HAS NOTHING TO DO WITH WHAT IS REALLY WRONG WITH THESE CARS. I LOVED TOYOTA UNTIL THIS HAPPENED. SOMETHING NEEDS TO BE DONE BEFORE PEOPLE GET HURT FROM THESE CARS. BY THE WAY, YOUR FORM REQUIRES A SPEED AND A MILEAGE, BUT I DO NOT HAVE THE CAR TO GET THE MILEAGE, NOR DO I REMEMBER THE SPEED BECAUSE IT STARTED ONCE I APPLIED THE GAS AND IT HAPPENED SO FAST, SO I APPROXIMATED BOTH IN THE COMPLAINT.

**Vehicle:** 2009 TOYOTA CAMRY  
**Location of Incident:** KOHLER, WI  
**NHTSA Summary:**  
**Additional Summary:**  
From news articles:

"Myrna Marseille had her foot on the brake of her 2009 Toyota Camry when it surged forward with an "awful roar" and traveled up a small embankment into the side of the Sheboygan Falls YMCA, the Kohler woman said this morning.

In an interview with The Sheboygan Press, Marseille also revealed that the car that landed her in the hospital with a broken sternum had already received the repairs recommended by Toyota as part of a recall.

"I thought I was dead," said Marseille, 76. "It was this awful roar, like you would hear in the Indy 500 or something. ... It was just like if you had floored it, but my foot was on the brake. It was the scariest thing I think that has ever happened to me."

Sheboygan Falls police said Marseille was pulling into a parking stall at the YMCA when her car suddenly accelerated and slammed into the wall about 11 a.m. Monday.

"I had my foot on the brake and was about to put it into park and all of the sudden it accelerated and shot forward," Marseille said. "There was a witness and that person said they saw my brake lights, so they know I had my foot on the brake, and they heard this awful roar, also."

Police Chief Steve Riffel said witness accounts appear to confirm Marseille's belief that the car accelerated on its own.

Marseille said the crash is particularly concerning since she already took her car in for the repairs Toyota recommended.

Mark Frank, service manager at Lakeland Automotive in Sheboygan, confirmed Marseille's car was serviced on Feb. 11 as part of the recall. It received adjustments to the accelerator pedal, on-board computer and carpet. A shim was placed in the accelerator pedal designed to make sure it returns to the full stop position, and the shop also removed a portion of the carpet padding and cut out the bottom of the accelerator pedal to provide more clearance below the pedal, Frank said. The shop also tweaked the computer, which Marseille believes is responsible for the crash.

"We re-flash memory into the computer, so if in fact the vehicle is accelerating on its own ... or if your foot is on the accelerator and you apply brake pressure, it automatically cuts down the throttle to an idle

C-2196

#### Safety Research & Strategies

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

position so if you would be pushing on both pedals at the same time it virtually cannot accelerate," Frank said."

**NHTSA Summary:**

I WAS DRIVING MY NEWLY PURCHASED 2009 TOYOTA PRIUS (VIN# JTDKB20U793522931) ON RT 66 IN ARLINGTON VIRGINIA ON MARCH 31, 2010. I WAS DRIVING APPROXIMATELY 50-60 MILES PER HOUR AND ACCELERATING. I TOOK MY FOOT OFF THE ACCELERATOR TO SLOW THE CAR AND THE CAR KEPT ACCELERATING. I THEN DEPRESSED THE BREAK, BUT THE CAR DID NOT SLOW, AND IN FACT I HEARD WHAT SOUNDED LIKE THE ENGINE GUNNING AND IT CONTINUED TO ACCELERATE. I PRESSED THE BREAK DOWN AS FAR AS IT WOULD GO AND WHILE THE CAR SLOWED ITS ACCELERATION, IT DID NOT SLOW OR STOP THE CAR. AS SOON AS I LIFTED MY FOOT FROM THE BREAK, THE CAR BEGAN TO ACCELERATE AGAIN AND I COULD HEAR THE ENGINE RACING. I PRESSED THE BREAK AGAIN, AND THE SAME THING HAPPENED & THE CAR SLOWED ITS ACCELERATION, BUT DID NOT SLOW ITS OVERALL SPEED. AS SOON AS I LIFTED MY FOOT FROM THE BREAK, THE CAR ACCELERATED. I DID THIS THREE TIMES, BECOMING INCREASINGLY AFRAID. I THEN JAMMED MY FOOT HARD ON THE BREAK AND PULLED OFF ONTO THE SIDE OF THE HIGHWAY. I TURNED THE CAR OFF, AND IT FINALLY STOPPED. I SAT THERE FOR A FEW MOMENTS, THEN TURNED THE CAR BACK ON AND GOT BACK ONTO THE HIGHWAY. AS SOON AS I GOT UP TO HIGHWAY SPEEDS, THE SAME THING HAPPENED AGAIN & THE CAR ACCELERATED ON ITS OWN AND THE BREAK WOULD NOT STOP THE CAR. I PULLED OVER A SECOND TIME AND TURNED THE CAR OFF AS THE ONLY WAY I COULD FIND TO STOP IT. I TURNED THE CAR ON AGAIN, AND THIS TIME WAS ABLE TO REACH MY DESTINATION WITH NO MORE INCIDENTS. I REPORTED THE PROBLEM TO THE CARMAX DEALER FROM WHOM IT WAS PURCHASED AND HAVE BEEN ON HOLD TO REPORT THIS DIRECTLY TO TOYOTA FOR OVER 30 MINUTES, BUT HAVE BEEN UNABLE TO GET THROUGH.

**Location of Incident:** ROCHESTER, MN

**NHTSA Summary:**

PROBLEM: ACCELERATOR STUCK IN 2010 TOYOTA RAV4 ON 3/31/10, WHILE AT LOW SPEED AND SLOWING FOR A STOP LIGHT, MY ACCELERATOR STUCK, IMPAIRING MY ABILITY TO STOP. I PRESSED FIRMLY ON THE BRAKE, THEN ENGINE CONTINUED TO RACE. WHILE CONTINUING TO PRESS THE BRAKE, I PUT THE CAR IN NEUTRAL, THEN INTO PARK. THE CAR STOPPED. I AM SURPRISED I DID NOT REAR END THE VEHICLE IN FRONT OF ME.

C-2201

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I DROVE CAREFULLY TO THE ROCHESTER TOYOTA DEALERSHIP, JUST MINUTES AWAY. I SPOKE WITH THE SERVICE MANAGER. THIS VEHICLE IS ONE INVOLVED IN THE CURRENT TOYOTA RECALL. I HAD THE ACCELERATOR REPAIR MADE ON MARCH 5, 2010. I HAD NOT EXPERIENCED ANY ACCELERATOR PROBLEM BEFORE TODAY. I EXPLAINED TO THE MANAGER MY CONCERN THAT THE TRUE PROBLEM WITH UNCONTROLLED ACCELERATION HAS NOT BEEN IDENTIFIED, THUS MY PROBLEM OCCURRED DESPITE THE PRIOR REPLACEMENT OF MY PEDAL. I PHONE THE TOYOTA 800 NUMBER AN MADE A REPORT. NEITHER THE TOYOTA SERVICE MANAGER NOR THE PERSON AT THE 800 NUMBER COULD ASSURE ME THAT THESE INCIDENTS ARE BEING DOCUMENTED OR EVALUATED INDIVIDUALLY OR AS A GROUP. I FIND THIS VERY UNSETTLING, AND I'M CONCERNED FOR MY SAFETY AND THE SAFETY OF OTHERS IN AND AROUND TOYOTA VEHICLES.

**NHTSA Summary:**

ON WEDNESDAY, MARCH 31 AT APPROXIMATELY 5:30 P.M., I DRIVING MY IN-LAWS E 2007 LEXUS ES 350 NORTH ON MAIN ROAD, WHEN THE VEHICLE SUDDENLY BEGAN TO ACCELERATE. THE GAS PEDAL MOVED AWAY FROM MY FOOT AND THE VEHICLE

C-2202

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

STARTED ACCELERATING AT FULL POWER. I IMMEDIATELY APPLIED THE BRAKES, BUT THE VEHICLE CONTINUED TO GAIN SPEED. I ATTEMPTED TO CUT THE CAR OFF BY HITTING THE START BUTTON (IT HAS NO KEY). AGAIN, NOTHING HAPPENED. I WAS TRAVELING APPROXIMATELY 55 TO 60 MPH BEFORE THE ACCELERATION AND APPROXIMATELY 80-85 AFTER THE ENGINE BEGAN TO RACE. THE BRAKES DID LITTLE TO REDUCE THE OVERALL SPEED; HOWEVER, PUSHING THE BRAKE PEDAL SEEMED TO REDUCE THE RATE OF ACCELERATION. I TRIED PUTTING THE VEHICLE INTO NEUTRAL BUT THAT DID NOT STOP THE ACCELERATION. I HAD BOTH FEET ON THE BREAK AND WAS PUSHING AS HARD AS I COULD, BUT IT STILL COULD NOT REDUCE THE SPEED. AT SOME POINT, I TURNED ON THE HAZARD LIGHTS. I KEPT TRYING TO GET THE CAR INTO NEUTRAL AND TO HIT THE ON/OFF BUTTON BUT THE VEHICLE WAS NONRESPONSIVE. I WAS QUICKLY APPROACHING THE VEHICLE IN FRONT OF ME AND HAD DECIDED TO HIT IT RATHER THAN RUN OFF THE ROAD. JUST AS SUDDENLY AS IT STARTED, THE CAR JUST CUT OFF AND I COASTED TO THE NEXT SIDE STREET WHICH WAS OLD POND ROAD. IT SEEMED LIKE I WAS WITHOUT BRAKES FOR APPROXIMATELY 2-3 MILES.

**NHTSA Summary:**

**Additional Summary:**  
KOAT.com news article:

"Jill Hertel said she is worried that her 2009 Toyota Land Cruiser she has the same accelerator problem that has been in the headlines for months.

She told Action 7 News she's getting little help from Toyota.

Hertel said she has become terrified of the revving engine sound.

Hertel said at random moments her Land Cruiser accelerates on its own. Hertel said she had the car in park the first time it happened.

"So I would turn the car off and then on and then it happened again and revved out of control," Hertel said.

Two weeks ago, Hertel said the engine revved out of control while driving in rush hour traffic.

"The car again accelerated out of control in the clear blue and I was worried about that because if someone had been in front of me I would've hit them," Hertel said.

Hertel said she had to shove the car into neutral and coast to the side of the road.

She claims the accelerations have happened three times in three months.

Hertel took the car to American Toyota where she bought it. She has records of her three visits to the dealership. One record indicates the problem was because of bad fuel, the other two times, the dealership found no problems with the car.

Hertel said she doesn't want a new car. She just wants the problem fixed or to speak to the person who can get that done.

**Location of Incident:** CEDAR LAKE, IN

**NHTSA Summary:**

VEHICLE TRAVELING 35MPH ON A LEVEL STREET. WARM, DRY, WINDY, CLOUDY AFTERNOON. SUDDEN ACCELERATION! BRIEF (1-2 SECONDS) ENDED BEFORE I COULD DEPRESS THE BRAKE. NO DAMAGE, COLLISION OR INJURY OCCURRED. JUST STARTLED. CHECKED FOR FLOOR MAT OR OTHER VISIBLE OBSTRUCTION/IMPEDENCE, NONE APPARENT. THIS WAS THE FIRST TIME I WAS SURE OF THE OCCURANCE. THERE HAVE BEEN A VARIETY OF WHAT APPEAR TO BE ELECTRICAL/ELECTRONIC "GLITCHES" - AC GREEN LIGHT ON BUTTON COMES ON BY ITSELF, SUMMER OR WINTER AND SOMETIMES I CAN NOT GET IT TO TURN OFF. SEATBELT LIGHT SOMETIMES COMES ON WHEN THEY ARE PROPERLY IN USE. (AND NOTHING HEAVY RESTING ON THE SEATS) ALSO AIRBAG LIGHT SOMETIMES. SERVICE LIGHT REMAINS ON SOMETIMES AFTER OIL CHANGE SERVICE. BRAKE HIGHLY SENSITIVE GAS PEDAL VERY TOUCHY, ESPECIALLY FROM STOP/JE AT LIGHT. HARD TO NOT SPIN WHEELS ON STARTING. (ESPECIALLY WHEN PAVEMENT WET, EVEN ON LEVEL ST.). FORTUNATELY, HAVING LIVED IN SNOW TERRITORY, I KNOW THE IMPORTANCE OF SLOW STARTS AND STOPS WHEN POSSIBLE. I HAVE NOT CHECKED ANY SITES TO SEE IF SIENNA 2008 HAS ANY PROBLEMS LISTED YET.

C-2208

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**

I WAS ATTEMPTING A LEFT TURN AND HAD BEGUN TO ACCELERATE BUT THEN DECIDED TO NOT TURN, I TOOK MY FOOT OFF THE GAS PEDAL AND IT CONTINUED TO ACCELERATE, I'M NOT SURE IF I WAS ABLE TO APPLY THE BRAKE AND GET ANY RESULTS OR NOT BECAUSE I WAS HIT BY ONCOMING TRAFFIC SUDDENLY. I WAS VERY CONFUSED BY THE INCIDENT, BECAUSE IT WAS NOT MY INTENT TO DRIVE FORWARD AND YET IT DID SO. I WAS ASSUMING THAT SINCE I HAD THE CAR SERVICED FOR THE RECALL ISSUES LAST MONTH, THE CAR WAS SAFE. WE HAVE ALSO HAD ISSUES WITH THE GAS PEDAL BEING NON RESPONSIVE WHEN IN CRUISE CONTROL MODE. IT HAD HAPPENED ONCE WHEN I HAD USED IT AND ONCE WHEN MY HUSBAND HAD USED IT, BUT WE HAD NO INCIDENTS FROM IT AND DISCONTINUED USING CRUISE CONTROL. THE CAR WAS TOWED TO THE CHEROKEE COUNTY (GA) TOYOTA COLLISION CENTER WHERE I TOLD THEM OF THE NON INTENDED ACCELERATION. THEY ASSURED ME THEY WOULD LOOK INTO IT, BUT ONLY AFTER REPAIRING THE BODY. AFTER THEY HAD DONE SO, THEY CALLED ME AND TOLD ME TO GENERATE A CASE AND GAVE ME THE NUMBER TO TOYOTA. I DID SO ON FRIDAY, APRIL 16TH. I HAVE NOT YET HEARD FROM THE CASE MANAGER, BUT AM CONCERNED AND FRIGHTENED OF THE VEHICLE AT THIS POINT. I HAVE A HEAD INJURY; A CONCUSSION AND A WRIST INJURY AS A RESULT OF THE ACCIDENT. THE RECALL SERVICE WORK WAS DONE AT CHEROKEE COUNTY TOYOTA IN GEORGIA WHERE I PURCHASED THE CAR. MY INSURANCE COMPANY WAS ALSO INFORMED OF THE ISSUE AND HAVE ASSURED ME THAT THEY WILL LOOK INTO THE ISSUE AND SEEK REPAYMENT FROM TOYOTA IF THEY ARE LIABLE FOR THE ACCIDENT. THE SERVICE MANAGER AND COLLISION CENTER GUY WHO IS HANDLING MY VEHICLE HAVE TOLD ME THAT IT IS MORE LIKELY THAT I WOULD BE "HIT BY LIGHTENING AND MAULLED BY A BEAR ON THE SAME DAY" THAN IT IS THAT MY ACCIDENT WAS CAUSED BY A PROBLEMATIC OR UNINTENTIONAL ACCELERATION THAT IS A RESULT OF AN ISSUE WITH THE CAR. THEY ALSO TOLD ME THAT A COMPUTERIZED "TEST" WAS DONE AND THAT MY CAR IS OK, BUT THEN TOLD ME TO INITIATE A CASE WITH TOYOTA.

**Location of Incident:** GUELPH, ONTARIO, CANADA  
**NHTSA Summary:**  
**Additional Summary:**  
NEWS ARTICLE IN THE GUELPH MERCURY (CANADA):

"Miron Suvagau is convinced he's a victim of a sticky Toyota gas pedal.

On April 3, the Guelph man said, he reversed out of a parking spot outside his Neeve Street apartment building, straightened his 2009 Corolla and touched the gas to go forward. He said his Corolla then burst forward, jumped a curb in the front of the building, struck a stone wall surrounding a flower bed and kept accelerating along the curb. The wall has been repaired but several areas show where it was chipped in the incident.

Eventually, he said, the vehicle bounced back onto the driveway and stopped when it struck another curb.

Suvagau said he and his wife were in the car at the time and he feels fortunate no one was injured in the incident.

"The vehicle became crazy," Suvagau said. "There was unusual accelerating. I just managed to avoid hitting somebody."

C-2209

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

In February, Suvagau received a letter from Toyota. He said it indicated his vehicle was one of the affected models on the Japanese automaker's recall list.

On Jan. 21, Toyota announced it would recall 2.3 million vehicles to address sticking pedals in six vehicle models. Toyota has recalled more than eight million vehicles worldwide because of acceleration problems in multiple models.

Suvagau took his vehicle in to Cambridge Toyota, on March 17, and a 90-minute inspection followed. He said he was then told his car was safe to be on the road and Suvagau drove it home.

"I thought it was normal after they did the work," said Suvagau.

Guelph Police were called to the incident and an investigation is on-going. However, Sergeant Peter Mitro, with the police's traffic department, said he doesn't expect charges will be laid.

The incident took place on a private driveway, which means charges won't be laid under the Highway Traffic Act and Mitro said there isn't sufficient evidence to lay criminal charges, given testimony from several witnesses.

According to city police, Suvagau's accident is the only local one reported that involves a recalled Toyota and a motorist claim that a faulty accelerator may have caused it.

A service representative at Cambridge Toyota confirmed it has been in discussion with Suvagau about this matter but referred the Mercury to Toyota Canada for further comment. A Toyota Canada official said Monday the company would not discuss the case.

Suvagau said his insurance company contacted him Monday and indicated Toyota wasn't responsible for the accident. The insurance company told Suvagau his policy would cover costs to repair the front-end damage to the vehicle.

However, Suvagau said he doesn't want to drive the same vehicle. He said he wants Toyota to replace it or terminate his lease.

He said he called Toyota roadside assistance after the incident. The car was towed from the scene and it's not in his possession.

The insurance company has informed him it wants to have the vehicle inspected at another service shop.

Suvagau said he's not sure what he'll do next over the car."

**Vehicle:** 2003 LEXUS SC430  
**Location of Incident:** LA CRESCENTA, CA  
**NHTSA Summary:**

I AM FORMALLY FILING A COMPLAINT AGAINST A VEHICLE 2003 LEXUS SC430. I HAVE REASON TO BELIEVE THAT THIS VEHICLE HAS CAUSED AN ACCIDENT DATED APRIL 3, 2010 AT ABOUT 2AM. AFTER THE COLLISION, I NOTICED THAT THE LEFT TIRE WAS OUT AT THE LEFT BOTTOM AREA OF THE CAR. I WAS TURNING ON A PARKING LOT (180 DEGREES) TRAVELLING ABOUT 25-30 MPH, THE WHEEL LOCKED AND THE BRAKES WERE NOT FUNCTIONING. IT ACCELERATED INTO PARKED VEHICLES IN FRONT AND THE AIRBAGS DEPLOYED. AFTER THE ACCIDENT, I TOOK PICTURES OF THE VEHICLE AT AN IMPOUND AND I NOTICED THAT THE LEFT WHEEL STEERING ARM AND LOWER SUSPENSION WAS CUT OFF FROM ITS STEM. THE KNUCKLE STEERING WAS PULLED OFF FROM THE TIE ROD. THE LEFT WHEEL WAS STILL ATTACHED TO THE WHEEL SHROUD AND BRAKES AND THE LOG NUTS WERE INTACT BUT IT WAS OUT UNDER THE VEHICLE. IMPACT WAS AT THE RIGHT FRONT AND RIGHT FENDER BUT THE LEFT WHEEL WAS CUT OFF AT THE STEM OF THE SUSPENSION ARM AND STEERING ARM. I LOOKED AT THE SCENE OF THE ACCIDENT. I NOTICED EXCAVATED MARKINGS BEFORE THE IMPACT PROVING THAT METAL WAS SCRAPING ON THE ASPHALT ROAD BEFORE THE IMPACT. THERE WERE SIGNS OF BRAKE FLUID LEAKAGE ABOUT 15-20 FEET BEFORE IMPACT. I HAVE PICTURES AND VIDEOS TO PROVE SUCH CLAIM (SUCH AS NO SIGNS OF DENT INSIDE

C-2211

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THE INNER HOUSING OF THE LEFT WHEEL, BRACKETS WERE INTACT, SUSPENSION WERE INTACT, BRAKE SHROUD WERE INTACT, LOWER SUSPENSION AND STEERING ARM WAS CUT OFF AT THE STEM). I CALLED YOUR OFFICE ON APRIL 9 NO VERBALLY REPORT THIS COMPLAINT, BUT YOUR OFFICE REFERRED ME TO LEXUS. LEXUS HAS BEEN INFORMED AT 1-800-255-3987 (OPTION 4 COMPLAINT # PETER REONISTO) AND THEY HAVE AGREED TO BRING THE CAR FROM THE IMPOUND INTO THEIR VAN NUYS DEALER OFFICE. THEY HAVE PROMISED TO DO SO ON APRIL 14, 2010 BUT HAVE NOT YET ACTED ON THIS COMPLAINED. I REFERRED THIS INCIDENT WITH SAFETY RESEARCH AND STRATEGIES TOGETHER WITH PICTURES AND THEY HAVE ADVISED THAT NHTSA SHOULD BE PRIMARY IN THE INVESTIGATION. I FEEL THAT THERE IS VALID INVESTIGATION DONE (VINJTHFN48Y930043784)

**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** FLOWER MOUND, TX  
**NHTSA Summary:**

I WAS DRIVING IN THE MIDDLE LANE ON A THREE LANE ROAD. I ARRIVED AT A TRAFFIC LIGHT AND CAME TO A COMPLETE STOP. I WAS STANDING IN A TRAFFIC LIGHT WITH MY FOOT ON THE BRAKE. STANDING IN THE SAME TRAFFIC LIGHT, THERE WERE MANY CARS IN FRONT OF MY VEHICLE AND SEVERAL CARS BEHIND MY VEHICLE. SUDDENLY, I FELT MY VEHICLE WAS ATTEMPTING TO MOVE AND SMILLED BURNING RUBBER FROM THE RIGHT FRONT TIRE. AT THE SAME TIME MY FOOT WAS STILL APPLIED FIRMLY TO THE BRAKES AND MY VEHICLE JUMPED WITH A GREAT FORCE COLLIDING WITH THE VEHICLE IN FRONT ME, WHICH CAUSED ANOTHER IMPACT AND A THIRD IMPACT. THE POINT OF IMPACT ON MY VEHICLE WAS THE RIGHT SIDE OF THE FRONT OF THE VEHICLE. THE LEFT FRONT TIRE WAS ONLY TWO WEEKS OLD AND THE OTHER THREE TIRES WERE APPROXIMATELY 12,000 MILES. THE TWO FRONT AIR BAGS DEPLOYED AND THE VEHICLE WAS TOTALED. MY DAUGHTER WAS IN THE FRONT PASSENGER SEAT AND SUFFERED A TINY FRACTURE IN THE RIP CAGE AS A RESULT OF THE AIRBAG IMPACT. THIS WAS THE FIRST TIME WE HAD EXPERIENCED A CASE OF SUDDEN ACCELERATION.

**Location of Incident:** FREDERICKSBURG, TX  
**NHTSA Summary:**

4 April 10 - 8:30 A M  
Driving south on interstate 10 between Waring and Boerne. The truck suddenly redlined and went sideways in the middle of the separated four lane interstate. It was a total surprise! I was doing 65 mph and the next second the 5.7 liter engine was at full bore. I did not apply the brakes and with white knuckles managed to correct the direction of the truck. The acceleration suddenly stopped and I regained control of the truck. Note, the cruise control was off. Fortunately the traffic was sparse on Easter morning and no other vehicles were in danger at this time.

I returned home and called the Boerne toyota dealership on Monday.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

UNINTENDED ACCELERATION IN A 2009 TOYOTA TACOMA. WHILE SHIFTING FROM THE 3RD TO 4TH GEAR, THE ENGINE STAYED AT HIGH SPEED EVEN THOUGH MY FOOT WAS OFF ACCELERATOR PEDAL. I WAS ABLE TO GET THE TRUCK OFF THE ROAD WITH THE ENGINE OFF. AFTER GETTING OUT OF TRAFFIC, I RESTARTED THE ENGINE AND IT WAS STILL RACING. I TURNED IT OFF AND RESTARTED IT ABOUT 1-2 MINUTES LATER AND IT WAS NORMAL.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10324279  
**Date of Incident:** 20100404  
**Vehicle:** 2009 TOYOTA RAV4  
**Location of Incident:** WESTERVILLE, OH  
**NHTSA Summary:**  
APRIL 4, 2010 TOPIC: COMMUNICATION OF ENGINE ACCELERATION FROM: OMITTED VEHICLE: -TOYOTA RAV4 -PURCHASED 9/26/09 - -YEAR/MODEL: 2009/4443A -ENGINE: 3.5 LITER DOHC V6 ENGINE WITH DUAL VVT-I -PURCHASED FROM: GERMAIN TOYOTA OF COLUMBUS PROBLEM: TODAY, APRIL 4, 2010, MY WIFE WAS BACKING THE RAV4 INTO OUR CAR GARAGE. UPON GETTING THE CAR COMPLETELY ON THE FLOOR OF THE GARAGE (A LEVEL SURFACE), SHE WAS IDLING IN REVERSE SO THAT THE SUV WOULD FINISH BACKING UP TO INSURE THE GARAGE DOOR WOULD GO DOWN WITHOUT HITTING THE FRONT OF THE VEHICLE. SUDDENLY, THE ENGINE REVVED UP A FEW HUNDRED RPMs. WITH HER FOOT ALREADY ON THE BRAKE PEDAL SHE IMMEDIATELY PUSHED DOWN VERY HARD ON THE BRAKE PEDAL AND PUSHED THE CONSOLE GEAR SHIFT INTO NEUTRAL. THIS MY WIFE WAS ABLE TO PREVENT THE SUV FROM IMMEDIATELY SPEEDING UP IN REVERSE WHICH PREVENTED THE VEHICLE FROM RAMMING INTO THE GARAGE WALL WHICH WAS APPROXIMATELY 4 TO 5 FOOT FROM THE BACK OF THE VEHICLE. THE ABOVE ACTION BY MY WIFE MAY HAVE TAKEN 2-3 SECONDS HOWEVER, AFTER GETTING THE RAV4 INTO NEUTRAL, THE ENGINE IMMEDIATELY REVVED UP TO A FEW THOUSAND RPMs. WITHIN A VERY FEW SECONDS MY WIFE TURNED THE MOTOR OFF. FORTUNATELY, THE VEHICLE WAS IN NEUTRAL WHEN THIS ENGINE REVING OCCURRED. I WAS IN THE HOUSE IN A ROOM DIRECTLY ABOVE THE GARAGE AND HEARD BOTH TIMES OF THE ENGINE REVING. MY WIFE ALSO HAD A SIMILAR REVING UP OF THE ENGINE THAT OCCURRED APPROXIMATELY 5 DAYS PREVIOUS TO MARCH 4, 2010 WHILE SITTING AT A RED LIGHT. SHE HELD THE BRAKE PEDAL DOWN. SHE ONLY NEEDED TO HOLD THE BRAKE PEDAL DOWN FOR 1-2 SECONDS BEFORE SHE COULD TAKE HER FOOT OFF THE BRAKE TO ALLOW THE CAR TO GO THROUGH THE LIGHT THAT JUST CHANGED TO GREEN. UPON LETTING UP ON THE BRAKE PEDAL TO GO FORWARD THE RPMs IMMEDIATELY REDUCED. ALSO, THE REVING OF THE ENGINE THIS TIME WAS COMPARABLE TO THE INITIAL ENGINE REVING STATED ABOVE FOR A FEW HUNDRED RPMs. \*TR

**Date of Incident:** 20100405  
**Vehicle:** 1999 TOYOTA CAMRY  
**Location of Incident:** MISHAWAKA, IN  
**NHTSA Summary:**

I HAVE A "1999" TOYOTA CAMRY THAT ON THE WAY TO WORK YESTERDAY HAD THE ENGINE BEGIN RACING AND THE BRAKES WERE BARELY ABLE TO STOP IT. I HAD TO PUT THE VEHICLE IN PARK WHILE THE ENGINE CONTINUED TO RACE. I GOT OUT AND CHECKED FLOOR MATS AND WORKED THE GAS PEDAL BY HAND AND THE ENGINE

C-2214

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

CONTINUED TO RACE. I SHUT OFF THE ENGINE AND TRIED RESTARTING IT AND THE ENGINE IMMEDIATELY BEGAN RACING AGAIN. I MANAGED TO MOVE IT OFF THE ROAD AND INTO A GAS STATION AND HAD SOMEONE FROM INSIDE COME OUT JUST TO WITNESS IT AS I COULDN'T BELIEVE IT WAS HAPPENING. I OPENED THE HOOD AND MANUALLY WORKED WHAT I CALL THE THROTTLE CONTROL AND WAS ABLE TO ROTATE IN BUT THE ENGINE CONTINUED TO RACE. ONLY TURNING THE ENGINE OFF WOULD STOP THE RACING. I REPEATED THESE STEPS AT LEAST 3 TIMES AND UPON THE LAST ENGINE START UP THE ENGINE IDLED NORMALLY. I HAD DRIVEN FOR A SHORT TIME BEFORE AND I FEEL CERTAIN THAT THE SPEED CONTROL WAS CONTROLLING THE SPEED UNTIL I TOOK IT OFF. AT FIRST THOUGHT MY BRAKES WERE BAD AS THEY WEREN'T STOPPING THE CAR WELL. THEN I NOTICED IT WAS ACTUALLY ACCELERATING ON IT'S ON. I UNDERSTAND THIS WAS NOT SUPPOSED TO HAPPEN ON THIS YEAR OF VEHICLE AND THAT IS WHAT THE LOCAL SERVICE PEOPLE TOLD ME WHEN I CALLED THEM. HOWEVER, I AM VERY WARRY THAT THERE IS AN ELECTRONIC ASPECT TO THE PROBLEM AND EVEN IF IT IS SOME OTHER PROBLEM KNOWN OR NOT KNOWN TO TOYOTA IT IS A VERY DANGEROUS PROBLEM TO HAVE AND NEVER TO HAVE KNOWN ABOUT MYSELF.

**Vehicle:** 2010 TOYOTA PRIUS  
**Location of Incident:** LANSDALE, PA  
**NHTSA Summary:**

2010 PRIUS WITH ABOUT 14,500 MILES DRIVING ON SMOOTH, WET, PAVED ROAD 20 MILES AN HOUR ON A CURVE. NEITHER FOOT WAS NOT ON A PEDAL - CAR WAS COASTING FOR SEVERAL SECONDS AS EXPECTED, SLOWLY DECELERATING. IN THE MIDDLE OF THE CURVE, WITH BOTH FEET STILL NOT ON EITHER GAS OR BRAKE, I FELT AND HEARD A NOTABLE SURGE OF HARD ACCELERATION DESPITE BOTH FEET BEING OFF THE GAS AND BRAKE. MY WIFE IN THE PASSENGER SEAT ALSO NOTICED THE SURGE. I IMMEDIATELY BRAKED HARD. THE CAR SLOWED SAFELY, AND THE UNREQUESTED ACCELERATION SEEMED TO STOP AS SOON AS I ENGAGED THE BRAKE PEDAL. NOTHING WAS TOUCHING THE ACCELERATOR BEFORE THE SURGE, DURING THE SURGE, OR WHEN THE SURGE ENDED AS I BRAKED - NOT A FLOOR MAT, NOT A STRAY OBJECT, NOT MY FOOT. THIS IS THE FIRST TIME WE HAVE EXPERIENCED THIS EXACT PATTERN OF SYMPTOMS. IN THE PAST, BEFORE THE BRAKE SOFTWARE RECALL, WAS DOWNLOADED TO OUR CAR, WE HAD MANY EPISODES OF TEMPORARY LOSS OF BRAKING POWER ON BUMPY ROADS. AT LEAST ONE OF THOSE PRIOR EPISODES HAD UNEXPLAINED ACCELERATION ACCOMPANY THE TEMPORARY BRAKING FAILURE ON A BUMPY ROAD. TODAY'S INCIDENT WAS VERY DIFFERENT - I WAS NOT BRAKING, AND THE ROAD WAS NOT BUMPY. NOTE THAT THE 2010 PRIUS IS NOT ON THE RECALL LISTS FOR THE ACCELERATOR MODIFICATIONS, AND THAT A STICKY ACCELERATOR WOULD NOT EXPLAIN THIS BEHAVIOR.

**NHTSA Summary:**

I HAVE EXPERIENCED TWO EPISODES WHERE MY 2007 PRIUS ACCELERATED UNCONTROLLABLY. ONE WAS WHILE BACKING OUT OF A DRIVEWAY BY MY CLASSROOM ONTO THE STREET. I PUT MY FOOT ON THE ACCELERATOR AND THE CAR LITERALLY TOOK OFF BACKWARDS LIKE A ROCKET. I REMOVED MY RIGHT FOOT FROM THE GAS PEDAL AND APPLIED THE BRAKES--NOTHING HAPPENED!! I ENDED UP WITH BOTH FEET ON THE BRAKE ACROSS THE STREET IN PARKING SPACES BY THE LIBRARY. THIS HAPPENED DEC. 22 AT 2:15, WE WERE DISMISSED EARLY FOR CHRISTMAS BREAK, IF IT HAD BEEN ANY OTHER DAY THIS STREET IS USED BY TEACHERS TO TRANSFER ELEMENTARY STUDENTS TO THE LIBRARY FOR THE AFTER SCHOOL PROGRAM. MY HUSBAND CALLED THE TOYOTA DEALERSHIP AND REPORTED THIS, HE WAS TOLD OUR CAR WAS NOT ON THE RECALL LIST. THE LATEST INCIDENT WAS LAST WEEK, APRIL 7 AT 7:35 IN THE MORNING. I PULL INTO THE SCHOOL PARKING LOT DRIVING VERY SLOWLY TO MY PARKING SPACE, I START TO TURN INTO THE SPACE, I REMOVED MY RIGHT FOOT FROM THE GAS, AND FOR THE SECOND TIME IT TAKES OFF LIKE A ROCKET AND DOES NOT REACT TO BRAKE APPLICATION. IN FRONT OF MY PARKING SPACE IS A DROP OFF AND THEN A CONCRETE BLOCK WALL. I TURNED THE WHEEL SHARPLY TO THE RIGHT TO AVOID THESE, DID A PARTIAL DONUT TURN, ENDED UP ONCE AGAIN WITH BOTH FEET PRESSING THE BRAKE AS FAR AS POSSIBLE. AFTER I HAD CAUGHT MY BREATH, I LOOKED AROUND, NO ONE WAS COMING INTO THE PARKING LOT SO I SLOWLY RELEASED THE BRAKE, CAREFULLY PUT MY FOOT ON THE GAS, THE CAR RESPONDED NORMALLY, AND I PULLED INTO THE PARKING SPACE. THE PRIUS IS NOW AT THE DEALERSHIP WHERE THEY SAY THE CAR ISN'T DISPLAYING ANY PROBLEMS--OF COURSE IT ISN'T, NOT UNTIL NEXT TIME. WE STATED THAT WE WOULD NOT PICK UP THE PRIUS UNTIL IT WAS FIXED, SO NOW WE ARE WAITING FOR TOYOTA'S NEW SMART TEAM TO COME. HONESTLY, I KNOW THAT IF MY FOOT ISN'T ON THE ACCELERATOR, THE CAR SHOULD NOT TAKE OFF LIKE A ROCKET!! THIS IS A DANGER NOT ONLY TO MYSELF, BUT TO ANYONE ELSE ON THE ROAD WITH ME. I'VE BEEN FORTUNATE TWICE, BUT WHAT ABOUT NEXT TIME?? \*TR

**Toyota ID Number:**  
**NHTSA ODI Number:** 20100408  
**Date of Incident:** 2006 TOYOTA CAMRY  
**Location of Incident:** DES MOINES, IA

**NHTSA Summary:**

FROM NEWS ARTICLE IN DESMOINES REGISTER:

"A 2006 Toyota Camry driven by Carol Jane Larperner, 70, of Des Moines crossed the sidewalk, went through the front window and lodged into the building, said Urbandale Police Sgt. Dave Disney.

Larperner's vehicle also struck a parked car. No injuries were reported. A salon customer had been sitting in the waiting area where the crash occurred minutes before the accident, Pigneri said.

"Luckily, she had just been called back to her appointment," Pigneri said. Larperner told police she was attempting to park in the handicap space and had applied the brake, but her car accelerated instead. She told officers her Toyota was not involved with the recent recalls involving sticking accelerators."

**Location of Incident:** PLAINSBORO, NJ

**NHTSA Summary:**

1. MY PARTNER LEFT WORK AT @ 4 PM AND STARTED TO DRIVE HOME. IT WAS A CLEAR DAY WITH NO PRECIPITATION. HE WAS ABOUT A MILE AWAY FROM WORK PROCEEDING WEST ON NJ STATE ROUTE 561 WHEN HE CAME TO A STOP 1-2 FEET BEHIND A TRUCK AT A STOPLIGHT. HE HAD HIS FOOT ON THE BRAKE. 2. HE WAS CAUGHT OFF GUARD AS THE CAR ACCELERATED FORWARD INTO THE TRUCK AHEAD OF HIM WITHOUT HIS DOING ANYTHING TO THE ACCELERATOR. DAMAGE WAS CAUSED TO THE TRUCK'S BUMPER AND TO THE PRIUS' BUMPER AND HOOD. WE HAD NEVER HAD THIS OCCUR IN THE CAR AND HAD NO OTHER PROBLEMS PRIOR TO THIS INCIDENT. 3. IN THE SPLIT-SECOND HE HAD TO REACT, HE JAMMED HIS FOOT ON THE BRAKE AND TRIED TO DEPLOY THE P BUTTON ON THE DASH, BUT THE P BUTTON DID NOT ENGAGE NOR LIGHT UP AS GREEN. A POLICE REPORT WAS MADE AND THE CAR WAS DRIVEN HOME. THE LOCAL TOYOTA DEALER, WHERE THE CAR WAS PURCHASED AND SERVICED, WAS CONTACTED AND THEY ASKED US TO CONTACT TOYOTA "EXPERIENCE," AND WE GAVE A FULL REPORT AND RECEIVED A CASE #: 1004081978. WE THEN BROUGHT THE CAR TO THE DEALER'S BODY SHOP THE NEXT DAY AND AWAITED OUR INSURANCE CLAIMS ADJUSTER AND THE "EXPERIENCE" TEAM TO COME AND GET THE DATA OFF THE COMPUTER TO SEE WHAT MIGHT HAVE CAUSED THE ACCIDENT. WE WILL HAVE THE PHYSICAL DAMAGE TO THE CAR REPAIRED (DAMAGE TO BUMPER AND HOOD) AS SOON AS THE "EXPERIENCE" TEAM IS ABLE TO GET THE DATA.

**NHTSA Summary:**

**Additional Summary:**

Last Friday he was driving the vehicle when the engine cut off and he came to a halt. Was able to get the vehicle started again and it stopped again. He noted that the MIL light came on. The next day, Saturday, it happened to him again.

On Sunday it stopped multiple times. Each time he was able to get it going. Then when he was driving he said the vehicle went from 25-55 in split second. He was able to get the vehicle stopped by putting it in neutral. He stated that if he had not done this the vehicle would have kept accelerating.

He said that when he would start the vehicle the rpm's would shoot up upon ignition, rev and then shut down. He knows that there was not floor mat issue or that he did not accidentally step on the wrong pedal. He was able to do this while sitting on the car seat with his feet on the ground outside the vehicle.

He had it towed into a Toyota Dealership and the tow drive can confirm that the engine revs upon ignition.

He talked to Roxanne Jones at the dealership and she acknowledged that she has seen this problem and that she fixed one a week or so prior. While at the dealership, the assistant manger turned the key and the RPM's went to 3500.

After a \$99 diagnostic service, they told him that he needed a new Throttle Body and it would cost \$1237. He was furious. He could not believe that with everything that is going on with Toyota and these issues that they would not "take care" of him. He has not received the diagnostics report. The service record does say that the engine throttle is stuck and needs to be replaced (See attached).

**Vehicle:** 2009 TOYOTA RAV4  
**Location of Incident:** WALPOLE, NH

**NHTSA Summary:**

2009 TOYOTA RAV4-DRIVEN BY OWNER WITH WIFE AS PASSENGER. COMING DOWN OFF RAMP FROM TWO LANE ROAD TO STOP SIGN IN ORDER TO TURN ONTO A TOWN STREET. ALTHOUGH BRAKING HARD, CAR FAILED TO STOP AND ENGINE DECIDEDLY ACCELERATED. DRIVER ABLE TO TURN CORNER AND, SINCE NO CAR COMING IN HIS LANE, WAS ABLE TO PULL TO SIDE OF ROAD. DRIVER DECIDED TO PROCEED 2-3 BLOCKS TO A GAS STATION. DROVE SLOWLY TO STATION, PULLED IN, CAR REFUSED TO STOP. IN FACT IT WAS JERKILY ACCELERATING, AND BUMPED INTO A CAR WHOSE DRIVER WAS PUTTING GAS INTO IT. NO DAMAGE TO EITHER CAR OR PERSONS. (PRESSED YES FOR CRASH, BUT WAS ONLY GOING ABOUT 5 MPH OR LESS AND DRIVER'S CAR PUSHED OTHER CAR INTO A STREET.) DRIVER WAS ABLE TO PUT CAR IN NEUTRAL AND CAR STOPPED. DRIVER HAD CAR TOWED TO TOYOTA DEALER WHOSE SERVICE MANAGER, AFTER TELLING DRIVER HIS RAV-4 WAS MADE IN JAPAN AND NOT ELIGIBLE AS A RECALL CAR, FINALLY AGREED TO HAVE CAR TESTED. NOTHING FOUND AND TOYOTA HAS REFUSED TO REPLACE ANY PARTS SAYING THERE IS NOTHING WRONG WITH CAR--TO THEM THE INCIDENTS DID NOT TRULY OCCUR. AFTER TESTING, TWICE, DRIVER PICKED UP CAR AND WAS DRIVING HOME, HAD TO STOP FOR A SCHOOL BUS AND WHILE STOPPED FELT ENGINE SURGING FORWARD AGAIN BUT WAS ABLE TO KEEP CAR BRAKED AND PUT CAR IN TO NEUTRAL. ONLY DRIVES CAR ON BACK ROADS NOW. THESE THREE INCIDENTS ARE THE ONLY ONES THAT HAVE BEEN EXPERIENCED THUS FAR.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10334188  
**Date of Incident:** 20100409  
**Vehicle:** 2010 TOYOTA CAMRY  
**Location of Incident:** ARLINGTON, TX

**NHTSA Summary:**

I BOUGHT A NEW 2010 CAMRY. I COMPLAINED TO THE DEALER THE VERY NEXT DAY THAT THE ACCELERATOR PEDAL WAS TOO SENSITIVE AND THE CAR WAS NOT DRIVABLE. I WAS ASSURED THAT ALL ACCELERATOR PEDAL RECALL MODIFICATIONS WERE DONE ON THE CAR BEFORE THE SALE. I WAS STILL NOT SATISFIED. THE MANAGER OF THE SHOP AND I DID A TEST DRIVE AND AFTER A DETAILED DISCUSSION OF THE ACCELERATOR PEDAL AND DESIGN DEFECTS WE JOINTLY AGREED TO TRY AND REPLACE THE PEDAL MECHANISM WITH ONE MADE - NOT BY THE US VENDOR - BUT BY NIPPONDENSO -- TOYOTA'S ALTERNATE VENDOR IN JAPAN. TO MY GREAT SURPRISE THE ACCELERATOR PEDAL WAS OF A DIFFERENT DESIGN AND FEEL. WITH THE NIPPONDENSO PEDAL THE FOOT'S POSITION ON THE PEDAL IS AT A MUCH MORE COMFORTABLE ANGLE. BUT MOST IMPORTANT OF ALL THE RESPONSE CHARACTERISTICS IS A 100% BETTER THAN THE

C-2229

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AMERICAN MADE PEDAL. WITH THE US MADE PEDAL THE CAR HAD A "STEP" RESPONSE WHILST WITH THE NIPPONDENSO PEDAL IT HAS MORE OF A "RAMP" RESPONSE. I WAS TOLD BY THE DEALER'S SHOP MANAGER THAT THE NIPPONDENSO MADE PEDAL MECHANISM DOES NOT NEED THE SPACER OR THE FLOOR MAT MODIFICATION EITHER. I AM SURPRISED THAT TWO VENDORS MAKING THE SAME PART FOR THE SAME MANUFACTURER TO THE SAME SPECIFICATIONS AND DRAWINGS HAVE PRODUCTS THAT ARE SO VASTLY DIFFERENT. THE ONLY THING COMMON BETWEEN THE PEDAL MECHANISMS FROM THE TWO VENDORS IS ITS MOUNTING ON THE FLOOR BOARD. WHERE IS TOYOTA'S QUALITY CONTROL? IN MY OPINION THERE IS A STRONG CORRELATION BETWEEN UNINTENDED ACCELERATION COMPLAINTS AND THE US MADE ACCELERATOR PEDAL DESIGN AND ITS SHARP "STEP" RESPONSE. LET ALL THOSE WHO HAVE A COMPLAINT ABOUT THE UNINTENDED ACCELERATION INSIST ON REPLACING THE PEDAL MECHANISM MADE BY NIPPONDENSO. NHTSA SHOULD LOOK INTO THE VARIATIONS IN THE DESIGN FROM THE TWO VENDORS AND QUESTION AS TO WHY TOYOTA HAS PERMITTED THE VENDORS TO DESIGN THE MECHANISMS RATHER THAN JUST BUILD IT TO TOYOTA'S SPECIFICATIONS

**Additional Summary:**

**Toyota ID Number:** 1004221137  
**NHTSA ODI Number:** 10331409  
**Date of Incident:** 20100410  
**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** CANTON, GA

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2004 TOYOTA SIENNA. WHILE DRIVING AT 3 MPH TAKING HER FOOT OFF THE ACCELERATOR PEDAL WHEN THE VEHICLE SURGED FORWARD IN TO A CEMENT POLE AND BY THE TIME SHE PRESSED ON THE BRAKE IT HAD ALREADY CRASHED. THERE WERE FRONT END DAMAGES AND SHE SUSTAINED MINOR INJURIES TO HER KNEES. THE VEHICLE WAS TOWED TO THE DEALERSHIP WHERE THEY REPAIRED THE EXTERIOR OF THE VEHICLE. THE DEALER ALSO STATED THAT THERE WAS NOTHING WRONG WITH THE VEHICLE DUE TO THE ACCELERATION. THE FAILURE AND CURRENT MILEAGE WAS 106000.CV

**Additional Summary:**

On April 10, 2010 her Sienna accelerated while going into parking spot, smashed into pole. Looked down at foot - foot was on the brake. Brakes had been replaced less than 6 months prior - Toyota inspected vehicle. Had some delayed acceleration occurrences in 2005-06, and Toyota had apparently changed software then. Toyota Dealership said they have lots of these reports - cannot duplicate.

HI, WHILE DRIVING TO WORK THIS MORNING, MY LEFT HEADLIGHT FLASHED AND THEN STOPPED WORKING. MY 2008 TOYOTA PRIUS IS ABOUT 1.75 YEARS OLD WITH APPROXIMATELY 28,000 MILES. I HAVE HEARD FROM OTHER PRIUS OWNERS THAT THEY HAVE HAD PROBLEMS WITH THEIR HEADLIGHTS. I HAVE ALSO HEARD THE REPLACEMENT COST FOR THE HEADLIGHT IS \$300.00. I FIND THAT HARD TO BELIEVE, NONETHELESS HEADLIGHTS IN EVERYOTHER CAR I HAVE OWNED SEEM TO HAVE A LIFE OF 10 OR MORE YEARS. THIS IS A SAFETY ISSUE BECAUSE I DRIVE TO WORK EARLY IN THE MORNING WHEN IT IS DARK AND I SOMETIMES DON'T RETURN HOME UNTIL AFTER DARK. THE BULK OF MY DRIVING HAS BEEN IN THE DAYLIGHT, HOWEVER I NEED MY

C-2230

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

CAR TO GET TO WORK. ALSO ON 3 OCCASIONS MY CRUISE CONTROL ACCELERATED BEYOND WHERE I SET IT. FOR EXAMPLE I RESET THE CONTROL AFTER HAVING HIT THE BRAKES. I GOT BACK TO MY SPEED AND SET THE CRUISE CONTROL AT 70MPH. I NOTICED A SHORT WHILE LATER THE CAR WAS GOING 95. I HIT THE BRAKES TO SLOW DOWN AND THE CAR IMMEDIATELY CAME OUT OF CRUISE CONTROL AND SLOWED DOWN AS IT SHOULD. I NOW TAKE THE CAR ALL THE WAY OUT OF CRUISE CONTROL SHUTTING IT OFF AFTER I HIT THE BRAKES. I NEXT TURN THE CONTROL BACK ON AND RESET THE CRUISE. USING THE CRUISE THIS WAY I HAVE NOT HAD THE PROBLEM OF THE CAR SPEEDING UP. IF FIGURE I WILL CONTINUE TO USE THE CRUISE THIS WAY AND OBSERVE WHETHER THERE IS ANY PROBLEM. HOWEVER, I DON'T BELIEVE TOYOTA INTENDED FOR THE CRUISE CONTROL TO BE USED THIS WAY. THANK YOU \*TR

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Date of Incident:** 20100412  
**Vehicle:** 2002 TOYOTA TACOMA  
**Location of Incident:** DANBURY, CT  
**NHTSA Summary:**

**Additional Summary:**  
FROM NEWS ARTICLE IN BROOKFIELD PATCH: "Updated: Runaway Tacoma Crashes On Federal Road" DATED APRIL 12, 2010

Freddie Perez, 45, of Danbury, and his son, Jonathan, 12, were leaving the Maggie McFly's parking lot on Federal Road at about 5:50 p.m. when the Toyota Tacoma they were driving began accelerating uncontrollably, causing them to launch over the grass and into the roadway. According to people at the scene, Perez swerved to avoid other vehicles and the truck subsequently flipped onto the driver's side.

As of 8 p.m. Monday night, Jonathan had been released from Danbury Hospital. Freddie was still admitted, but was "fine," according to a nurse on staff.

Four bystanders, Kevin Desch and Anthony Marucci, both of Danbury (who were in the parking lot, narrowly avoiding getting hit), and Mo Sakil, of Danbury, and Ken Bardelli, of Bethel (who were in the Costco parking lot), rushed to the scene. Two of them got on top of the car (passenger side) and were able to get Jonathan out, however his father Freddie was still trapped in his seat.

As the truck drove through the parking lot into the roadway, all four reported seeing smoke pouring from the front tires as the emergency brake strained against the accelerating vehicle. Jonathan, who was getting out of Taekwondo class, told them that the car began accelerating out of control (at about 35 to 40 mph) and would not slow down after his father pulled the emergency brake."

**Toyota ID Number:**  
**NHTSA ODI Number:** 10325130  
**Date of Incident:** 20100412  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** SUMMERFIELD, NC  
**NHTSA Summary:**

**Additional Summary:**  
ON 4/3/10, UNINTENDED ACCELERATOR "FIX" PER TOYOTA LETTER WAS PERFORMED ON OUR 2007 TOYOTA CAMRY XLE (VANN YORK TOYOTA IN HIGH POINT, NC). ON 4/12/10, WHILE MY WIFE WAS DRIVING AT 35MPH ON A CITY STREET, MAINTAINING CONSTANT ACCELERATION; THEN, SHE REMOVED THE FOOT OF THE ACCELERATOR AS SHE HEADED TOWARD AN INTERSECTION, WHEN SUDDENLY, THE ENGINE SPEED DRASTICALLY INCREASED (I.E. REVVED UP LIKE WHEN THE DRIVER STEPS ON THE ACCELERATOR TO ACHIEVE A FAST VELOCITY RATE OF CHANGE); HOWEVER, THE CAR VELOCITY DECREASED AND SHE APPLIED THE BRAKES TO GET TO THE INTERSECTION AND MAKE A RIGHT TURN. IT IS IMPORTANT TO POINT OUT THAT THE SUDDEN ENGINE SPEED INCREASE LASTED FOR APPROXIMATELY 5 SECONDS; AFTERWARDS, THE ENGINE SPEED WENT BACK TO THE NORMAL (PREVIOUS) LEVEL. AFTER MAKING A RIGHT TURN AT THE INTERSECTION, THERE WAS NO RE-OCCURRENCE OF THIS ISSUE, AND MY WIFE AND 5 YEAR OLD DAUGHTER MADE IT HOME SAFE. THE SUDDEN ENGINE SPEED INCREASES HAVE OCCURRED MULTIPLE TIMES IN OUR 2007 TOYOTA CAMRY SINCE WE BOUGHT IT LATE 2006. WE HAVE REPORTED THIS ISSUE, AS WELL AS WHAT FEELS LIKE INFREQUENT TIRE SLIPPAGES TO SEVERAL DEALERSHIPS (IN PHOENIX AND GREENSBORO), BUT THEY HAVE NEVER FOUND ANY ISSUES WHILE INSPECTING THE CAR. WE ARE EXTREMELY CONCERNED THAT EVEN AFTER TOYOTA HAS RECOMMENDED THE ACCELERATOR "FIX" (THEY CHANGED THE SHAPE OF THE ACCELERATOR PEDAL AND MADE AN UPDATE TO THE ENGINE THROTTLE COMPUTER) AND THE FIX HAS BEEN APPLIED TO OUR CAR, IT CONTINUES TO BEHAVE IN THE MANNER DESCRIBED ABOVE. WE FEEL THE CAR IS UNSAFE.

**NHTSA Summary:**  
TL\* THE CONTACT OWNS A 2009 TOYOTA CAMRY. WHILE PULLING INTO A DRIVEWAY AT SPEEDS OF 5 MPH, THE VEHICLE ABNORMALLY ACCELERATED AND CRASHED INTO THE GARAGE DOOR. THE ENGINE CONTINUED IDLING EXTREMELY HIGH AND THE TIRES CONTINUED TO SPIN WHILE THE VEHICLE WAS AT A COMPLETE STOP ATTEMPTING TO CONTINUE ACCELERATION. THE MANUFACTURER WAS CONTACTED AND ADVISED HAVING THE VEHICLE INSPECTED TO ASSESS THE FAILURE. THE VEHICLE HAD NOT BEEN DRIVEN SINCE THE FAILURE. THE FAILURE AND CURRENT MILEAGES WERE 7,322.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10325898  
**Date of Incident:** 20100412  
**Vehicle:** 1996 TOYOTA CAMRY  
**Location of Incident:** SUGAR LAND, TX

**NHTSA Summary:**  
MY 1996 TOYOTA CAMRY EXPERIENCED UNINTENDED ACCELERATION AND BECAME DIFFICULT TO CONTROL ON APRIL 12, 2010. WHILE DRIVING HOME FROM WORK (A DISTANCE OF 26 MILES) I ENTERED THE FREEWAY AND GAVE MY CAR GAS TO MOVE INTO THE SECOND FROM THE LEFT HAND LANE. AFTER GETTING INTO THE PROPER LANE, THE CAR BEHAVED IN THE SAME WAY AS A CAR AFTER PRESSING THE RESUME BUTTON, AFTER DISABLING CRUISE CONTROL. THIS HAPPENED AT 4:30P DURING THE START OF RUSH HOUR TRAFFIC. THE ONLY WAY I COULD KEEP FROM HITTING ANOTHER VEHICLE WAS TO FLOOR THE BRAKE. AT ONE POINT THE CAR RACED TO SPEEDS OF 65-75 MPH.

C-2238

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

COULD TELL THAT AT THE 75 MPH RANGE THAT I WAS VERY LIKELY TO HIT THE CAR IN FRONT OF ME. TO PREVENT THIS I BRIEFLY PLACED THE CAR IN NEUTRAL, THEN SWITCHED IT INTO REVERSE TWICE IN QUICK SUCCESSION. THE CAMRY MADE A HORRIBLE NOISE, BUT DID SLOW DOWN AFTER THAT. THE BRAKES SEEMED TO BE UNABLE TO ENGAGE PROPERLY FROM THAT POINT, POSSIBLY DUE TO EXCESSIVE USE. I WAS ABLE TO SUCCESSFULLY DRIVE TO THE DEALERSHIP AFTER THAT. THE DEALER EXAMINED THE CAR, TEST DROVE IT AND STATED THAT THEY COULD FIND NO PROBLEM WITH THE CAR. STATEMENT FROM SPOUSE: AS A RECENTLY RETIRED ENGINEER FROM A LARGE RESEARCH LABORATORY, I'D LIKE TO ADD MY COMMENTS: I SPENT 33 YEARS DESIGNING LABORATORY EXPERIMENTS TO RUN SAFELY AND RELIABLY. OVER THOSE YEARS, I FORMED THE OPINION THAT LAB EQUIPMENT SHOULD BE DESIGNED SO THAT MALFUNCTIONS CAUSE ONLY MINOR PROBLEMS, NOT MAJOR ONES. SINCE TOYOTA'S PROBLEMS WITH UNINTENDED ACCELERATION SEEM TO AFFECT VEHICLES OF VARIOUS AGES AND DESIGNS, I SUSPECT THE ROOT CAUSE IS NOT A SPECIFIC PIECE OF HARDWARE, BUT RATHER A FAILURE TO DESIGN THEIR EQUIPMENT SO THAT MALFUNCTIONS CAUSE ONLY MINOR PROBLEMS, NOT MAJOR ONES. PERHAPS THERE ARE COMPONENTS OF THEIR VEHICLES THAT FAIL IN A WAY THAT GIVES THE VEHICLE FULL POWER, WHEREAS A SAFER FAILURE MODE WOULD BE HAVE NO POWER.

**Location of Incident:** DENVER, CO  
**NHTSA Summary:**

MOMENTARY ACCELERATION DURING NORMAL BRAKING. PROBLEM OCCURS REGULARLY (BUT NOT EVERY TIME) DURING NORMAL BRAKING. LEXUS DEALER SERVICE WRITER REPORTS THIS AS NORMAL AND EXPECTED PERFORMANCE. IT APPEARS THAT NORMAL BRAKING STARTS WITH REGENERATIVE BRAKES AND THEN TRANSITIONS TO FRICTION BRAKES. THERE IS A MOMENT DURING THE TRANSITION THAT BRAKING POWER IS LOST AND VEHICLE UNEXPECTEDLY ACCELERATES. TO MAINTAIN EVEN DECELERATION DURING EVERY BRAKING MANUEVER THE DRIVER MUST BE PARTICULARLY AWARE OF THIS POTENTIAL PROBLEM AND BE PREPARED TO QUICKLY APPLY SIGNIFICANT ADDITIONAL PRESSURE TO THE BRAKE PEDAL DURING THE TRANSITION PHASE THEN IMMEDIATELY REMOVE THE ADDED PRESSURE TO PREVENT OVER-BRAKING..

**NHTSA Summary:**

MY WIFE WAS RECENTLY IN AN ACCIDENT WHILE DRIVING A 2009 TOYOTA COROLLA IN PRINCETON NJ. SHE MENTIONED THAT SHE STOPPED AT THE STOP SIGN AND PRESUMABLY TRIED TO MOVE FORWARD A BIT SO THAT SHE CAN SEE THE TRAFFICE ON THE MAIN ROAD. TO MAKE A RIGHT TURN AND NEXT THING SHE REALIZED WAS THAT SHE WAS ON MIDDLE OF THE MAIN ROAD HIT BY A FLATBED TRUCK. SHE IS NOT SURE HOW IT HAPPENED. THE CAR SUFFERED GOOD DAMAGE TO THE FRONT LEFT SIDE NEAR THE TIRES AND BASED ON THE AUTOBODY, IT IS GOING TO BE A HIGH DOLLAR REPAIR. DURING THE ACCIDENT: 1) THE SEATBELT TIGHTENED STRONG ENOUGH TO BRAKE HER LEFT CLAVICLE BONE IN HER SHOULDER. 2) THE AIR BAGS DID NOT DEPLOY. THIS IS MY BIGGEST CONCERN. DUE TO THIS ACCIDENT SHE RECEIVED A TRAFFIC TICKET. THIS MODEL OF THE CAR WAS PART OF THE RECENT ACCELERATOR PEDAL RECALL AND I GOT IT FIXED MARCH 2010. I CANNOT STOP WONDERING IF THAT ISSUE, EVENTHOUGH CONSIDERED AS FIXED, HAD SOMETHING TO DO WITH THE CAR ACCELERATING FASTER ON TO THE ROAD THAN EXPECTED. MY WIFE THINKS SHE HIT THE ACCELERATOR SLOWLY TO MOVE AHEAD A BIT TO BETTER SEE THE TRAFFIC ON THE MAIN ROAD. I HAVE DIRVEN HER CAR IN THE PAST AND DID NOT NOTICE ANY ISSUES RELATED TO THIS RECALL BEFORE THE FIX. I AM NOT BLAMING THIS ON THIS ISSUE. HOWEVER, I CANT STOP WONDERING IF THAT MAY HAVE PLAYED A ROLE. AND MY BIGGER ISSUE IS THAT THE AIR BAGS DID NOT DEPLOY. THE CAR IS IN A BODY SHOP IN NJ AND I CAN SHAR PHOTOS IF NEEDED.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

MY VEHICLE ACCELERATED AS IF I HAD FLOORED THE GAS PEDAL (THE PEDAL WAS MINIMALLY DEPRESSED.) I IMMEDIATELY STEPPED ON THE BREAKS, THEN TURNED OFF THE ENGINE. I PUT THE CAR IN NEUTRAL AND GLIDED TO A STOP. AFTER WAITING 2 MINUTES I RESTARTED THE VEHICLE. WITHOUT TOUCHING THE GAS PEDAL THE ENGINE REVED UP PAST 7,000 RPM. I TURNED OFF THE CAR IMMEDIATELY. I TRIED PUSHING THE PEDAL UP AFTER WAITING 3 MINUTES. ONCE AGAIN THE VEHICLE RATED IN NEUTRAL TO 7,000 RPM. I OPENED THE HOOD AND (USING A PAIR OF PLIERS) ROTATED THE THROTTLE ASSEMBLY. WHILE ROTATING THE ASSEMBLY I FELT THE ASSEMBLY HIT AND GO THROUGH SOME KIND OF BARRIER. I RESTARTED MY VEHICLE. THIS TIME IT STARTED NORMALLY. I TOOK THE CAR TO A REPAIR TECH WHO SAID HE THINKS THE SPARK PLUG WIRE CAUGHT ON THE ASSEMBLY. HE WIRE TIED THE SPARK PLUG WIRES TO A SMALL RUBBER HOSE TO SECURE IT. THERE IS ENOUGH PLAY IN WHERE THE CABLES ARE ROUTED (EVEN THOUGH THE WIRES ARE TIGHT) FOR THE SPARK PLUG WIRES TO TOUCH THE ASSEMBLY WHILE DRIVING. THE TECH SAID THAT THAT MIGHT HAVE BEEN THE PROBLEM AND TO CALL HIM IF I HAD ANY MORE PROBLEMS. HE ALSO REMINDED TO TURN OFF THE ENGINE (AGAIN) IF I HAD ANY FURTHER ACCELERATION PROBLEMS. ANY OTHER CAUSES? I ALMOST HIT THE VEHICLE IN IN FRONT OF ME. HAD I NOT TURNED OFF THE ENGINE THE BREAKS (EVEN THOUGH THEY ARE NEW) WOULD NOT HAVE STOPPED THE ACCELERATION. I REACTED QUICKLY. FROM SUDDEN ACCELERATION TO ENGINE OFF WERE LESS THAN 3 SECONDS AND THE ENGINE WAS REALLY RACING. THE DEPRESSION I PLACED UPON THE PEDAL SHOULD HAVE TAKEN 10 SECONDS TO BRING ME TO 35 FROM 32. INSTEAD, IN LESS THAN 3 SECONDS I WAS GOING 40 AND ACCELERATING. THE BREAKS ALONE COULD NOT HAVE STOPPED THE ACCELERATION OF THE CAR.

**Date of Incident:** 20100416  
**Vehicle:** 2008 TOYOTA COROLLA  
**Location of Incident:** SPOKANE VALLEY, WA  
**NHTSA Summary:**

I WAS DECELERATING WITH MY RIGHT FOOT ON THE BRAKE TO STOP AT A RED LIGHT. THERE WAS A CAR AHEAD OF ME AT THE LIGHT, AND AS I PULLED UP BEHIND IT, I PUT MY RIGHT FOOT ON THE BRAKE TO COME TO A COMPLETE STOP. WHEN I BRAKED, I FOUND THAT THE CAR WAS NOT STOPPING AND THAT THE CAR WAS ACCELERATING. I PUT BOTH FEET ON THE BRAKE, AND PULLED THE EMERGENCY BRAKE BUT THE CAR CONTINUED TO ACCELERATE UNTIL IT ENDED UP PUSHING ON THE CAR AHEAD OF ME. I DID EVERYTHING I COULD THINK OF TO STOP THE CAR, BUT WAS UNABLE TO DO SO UNTIL I TURNED THE KEY OFF. AS FAR AS I KNOW, THERE WERE NO INJURIES, AIR BAGS DIDN'T DEPLOY, NO TICKETS WERE ISSUED, AND THE BUMPERS OF BOTH CARS WERE NOT DENTED, BUT HAD VERY DEEP SCRAPES ON THEM. THE MAT WAS HOOKED AT THE TIME AND WAS NOT INVOLVED AND I DIDN'T TOUCH THE GAS. I HAD MY HUSBAND FOLLOW ME TO MY DEALERSHIP, WHERE I ASKED THEM TO INSPECT THE CAR AND LET ME KNOW IF IT WAS SAFE TO DRIVE. THEY REFUSED TO INSPECT IT AND REFERRED ME TO MY INSURANCE COMPANY. I DID THAT, BUT I ALSO TALKED TO TOYOTA'S SERVICE LINE IN CALIFORNIA AND THEY SAID THE BEST THEY COULD DO WAS ARRANGE FOR AN INSPECTION WITH RESULTS IN APPX 74 DAYS. MY INSURANCE COMPANY HAD AN INDEPENDANT INSPECTION, BUT ALL HE TOLD ME WAS THAT MY ACCELERATOR WAS NOT "CABLE". THE TOYOTA COMPANY TOLD ME I COULD GO AHEAD AND HAVE THE BODY WORK DONE AS LONG AS THE REPAIRS DID NOT HAVE ANYTHING TO DO WITH THE BRAKE OR THE IGNITION. POLICE WERE CALLED AT THE SCENE, BUT DID NOT MEET WITH US.

**Vehicle:** 2005 LEXUS LX470  
**Location of Incident:** LAGUNA BEACH, CA  
**NHTSA Summary:**

I HAD A 2005 LEXUS 470 CAR AND IT WAS INVOLVED IN TWO ACCIDENTS THAT NEITHER I NOR THE OTHER DRIVER COULD NEITHER ONE HAS EVER HAD AN ACCIDENT AND I HAVE BEEN DRIVING 35 YEARS. THE CAR IN THE FIRST ACCIDENT I DO NOT EVEN KNOW WHAT HAPPENED THERE WAS A COLLISION ON A ROAD I TAKE EVERY DAY. THE OTHER CAR WAS TOTALLED HE HAD NO SKID MARKS AND THE LEXUS TIRE WAS HIT NO ONE EVER KNEW WHAT HAPPENED. THEN LAST MONTH MY GOD SON WAS DRIVING ON THE LA FREEWAY IN STOP AND GO 5 MILES AN HOUR TRAFFIC. THE CAR ACCELERATED INTO THE FLATBED TRUCK INFRONT OF HIM AND HE WAS OK BUT THE CAR TOTALLED IT IS HARD TO HURT A LEXUS 470 AND THE ONLY EXPLANATION WAS THAT THE CAR ACCELERATED INTO THE FLATBED CRUSHING THE RADIATOR. IT WAS BIZRRE AND THE CAR RUINED. I THINK TOYOTA AND LEXUS HAVE NOT FULLY EXAMINED THE LEXUS CAR FOR THE ACCELERATION PROBLEM AND THEY SHOULD. ANYONE OF THE PEOPLE INVOLVED COULD HAVE BEEN KILLED NO ONE WAS DRIVING FAST AND THERE WAS NO EXPLANATION FOR THE ACCIDENTS EXCEPT THE LEXUS MALFUNCTION.

**Date of Incident:** 20100418  
**Vehicle:** 2001 TOYOTA HIGHLANDER  
**Location of Incident:** FANWOOD, NJ  
**NHTSA Summary:**

2001 TOYOTA HIGHLANDER PURCHASED NEW. ABOUT ONCE A YEAR IT ACCELERATES ON ITS OWN. REPORTED PROBLEM TO TOYOTA DEALER IN 2002 OR 2003 - HAVE RECEIPT. WE CAN STOP THE CAR WITH FIRM PRESSURE ON THE BRAKE. IN MOST CASES WHEN WE PUT THE TRANSMISSION INTO PARK THE ENGINE CONTINUED TO RACE AT HIGH RPM. I CAN'T REMEMBER ALL INCIDENTS, BUT BELIEVE THAT IN SOME CASES WAS ABLE TO SLOW THE ENGINE DOWN BY KEEPING MY FOOT ON THE BRAKE AND PUTTING THE CAR BACK INTO DRIVE. OTHER TIMES I TURNED OFF THE IGNITION. WHEN I RESTART THE CAR IT IS FINE. MOST RECENT OCCURRENCE WAS SUNDAY 4/18/2010 IN PARKING LOT OF A&P ON SOUTH AVENUE IN CLARK OR WESTFIELD, NJ. MY WIFE WAS IN THE CAR WITH ME. I HAD BEEN DRIVING THE CAR FOR ABOUT AN HOUR. THE LAST HALF HOUR WAS ON THE GARDEN STATE PARKWAY AT 55+ MILES PER HOUR, WAS OFF THE PARKWAY FOR LESS THAN 5 MINUTES WHEN I MADE LEFT TURN INTO A&P PARKING LOT AND ANOTHER LEFT IN THE PARKING LOT. DRIVING LESS THAN 15 MILES PER HOUR, THEN WAS ALMOST STOPPED AS I WAS ABOUT TO TURN LEFT INTO PARKING SPACE. NOTICED THE ENGINE RPM SEEMED A LITTLE HIGHER THAN NORMAL, AND I BECAME MORE CAUTIOUS AND MADE SURE MY FOOT WAS FIRMLY ON THE BRAKE PEDAL. THE ENGINE RPM BEGAN TO INCREASE RAPIDLY. I PRESSED ON THE BRAKE PEDAL AS HARD AS POSSIBLE AND WAS ABLE TO KEEP THE CAR FROM MOVING FORWARD, BUT THE ENGINE WOULD NOT STOP RACING. I PUT THE TRANSMISSION IN PARK AND THE ENGINE CONTINUED TO RACE AT FULL THROTTLE. I TURNED OFF THE IGNITION AND THE ENGINE STOPPED. RESTARTED THE CAR AFTER A MINUTE AND IT WAS FINE. DON'T BELIEVE I WAS PRESSING ON THE GAS AT THE SAME TIME AS THE BRAKE BECAUSE THE TWO PEDALS ARE FAR ENOUGH APART THAT TO DO SO MY FOOT COULD ONLY BE HALFWAY ON THE BRAKE PEDAL. IN THAT CASE WHEN I PRESS HARD MY ANKLE STARTS TO TWIST. I AM SURE MY FOOT WAS CENTERED ON THE BRAKE IN THIS INCIDENT BECAUSE I HAD TIME TO PREPARE AND IT FELT FIRMLY IN THE CENTER. I DON'T THINK THE GAS PEDAL WAS STUCK BECAUSE I HAD BEEN DRIVING VERY SLOWLY IMMEDIATELY BEFORE THE INCIDENT. \*TR

**Location of Incident:** BALTIMORE, MD  
**NHTSA Summary:**  
I MADE A NHTSA COMPLAINT ON 1/27/10 FOR ABS/UNINTENDED ACCEL INCIDENTS IN MY PRIUS2010. SUPPOSEDLY TOYOTA CORRECTED THE PROBLEM ON 2/11/10. ON 4/20/10 @ 12:50 PM, MY PRIUS ACCELERATED DANGEROUSLY AS I WAS COMING TO A COMPLETE STOP ON A SLIGHT INCLINE. THE CAR SHOT FORWARD THROUGH A RED LIGHT ON A BUSY BALTIMORE ARTERIAL. I WAS BRAKING THE CAR AND TRYING TO TURN IT TO AVOID HITTING A CONCRETE WALL OR CARS IN THE OPPOSITE LANES. I TURNED VERY SHARPLY, UNABLE TO BRAKE THE CAR; I FEARED IT MAY ROLLOVER. MY FOOT WAS ON THE BRAKE THE WHOLE TIME. I HOPPED A CURB ON THE MEDIAN AND CLIPPED A TRAFFIC SIGN. I THEN PARKED THE CAR AND PHONED THE POLICE. IT WAS AMAZING NO ONE GOT HURT OR KILLED. SINCE THIS INCIDENT OCCURED AFTER TOYOTA SAID THEY FIXED THE PROBLEM, I DO NOT TRUST THEM OR MY CAR. I WANT A REFUND FOR FOR THIS CAR, I WILL NOT DRIVE IT AGAIN:IT IS A DEATH MACHINE.

FROM WAOI.COM NEWS REPORT - "CITY OWNED TOYOTA EXPERIENCES SUDDEN ACCELERATION PROBLEM"  
"The accident happened Wednesday morning in the 100 block of Fredericksburg Road. The driver who told News 4 WAOI he is an employee of the San Antonio Police Department, and was driving a city owned Toyota Prius when suddenly it wouldn't stop while making a turn on to Fredericksburg road.  
The accident happened in front of News 4 WAOI photographer Mike Botsford who shot the accident scene just minutes after it happened.  
According to Police, as the Prius prepared to make it's turn onto Fredericksburg road, the brakes grabbed briefly, but couldn't hold the car back. As the car continued, a second vehicle struck the car spinning it around when a motorcyclist then hit the car.  
"The Prius pretty much looked like it had no brakes," explained Botsford. "It was just accelerating and the driver could not correct into an easy turn."  
The motorcyclist was treated at the scene for some bumps and bruises, but was not hospitalized. Since the problem did involve the sticking pedal on a recalled vehicle, we did contact Toyota to report the incident."

PER NEWS ARTICLE - APP.COM DATED APRIL 22, 2010

"A 78-year-old New Rochelle man told police Wednesday that his 2010 Toyota "took off," causing it to strike two curbs before landing on top of two unoccupied cars.  
The Camry driver, Rocco A. Doimo of 915 Wynnewood Road, and his 74-year-old wife, Bridie, were in the Kohl's parking lot on Boston Post Road between a Bank of America and a Verizon store after 2 p.m., when he was about to make a left turn but jumped a curb, landing in an empty space, then a second curb, landing on the two cars, Port Chester police said.

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**C-2252**

Lt. James Ladeairous said the driver told police that the accelerator stuck and, "All of a sudden, the car took off."

The man and woman were taken to White Plains Hospital Center after they both complained of chest pains, police said.

When no one is hurt, it is a civil matter if there are questions about the mechanics of a car, Ladeairous said, noting that the police investigation of the accident was over."

INFORMATION REDACTED PURSUANT TO THE FREEDOM OF INFORMATION ACT (FOIA), 5 U.S.C. 552(B)(6) MY 2010 TOYOTA CAMRY (PURCHASED MARCH 30, 2010 WITH THE ASSURANCE THIS CAR WAS NOT ONE OF THE MODELS AFFECTED BY THE GAS PEDAL PROBLEM) HAD BEEN SITTING IN MY DRIVEWAY OVERNIGHT AFTER USING IT ON A 200 MILE TRIP THE DAY BEFORE. WHEN I STARTED THE CAR THE FOLLOWING AFTERNOON, WITH THE CAR IN PARK & MY FOOT ON THE BRAKE THE ENGINE ROARED & THE RPM INDICATOR READ 3000 RPM. AFTER ABOUT 15 TO 20 SECONDS THE RPM DROPPED TO 1000 RPM. I PUT IT IN GEAR AFTER IT DROPPED TO 1000 RPM & DROVE IT FOR 1/2 MILE (UP TO THE POST OFFICE) & THE GAS PEDAL SEEMED TOUCHY. I STARTED IT SEVERAL TIMES THEREAFTER & ALL SEEMED NORMAL. THIS CAR VIN [XXX] WAS PURCHASED FROM LAKELAND TOYOTA IN LAKELAND, FLORIDA. \*TR

**NHTSA Summary:**  
**Additional Summary:**  
My husband drives a 2007 Toyota Tacoma for Atlanta Gas Light Company. On April 22, 2010 the engine raced up and ran him off the road and down a embankment full of trees and large boulders. The truck finally stopped on a boulder about four feet off the ground. The boulders were the only thing that stopped the truck, the brakes would not.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10327010  
**Date of Incident:** 20100422  
**Vehicle:** 2010 TOYOTA TACOMA  
**Location of Incident:** ENDICOTT, NY

**NHTSA Summary:**  
2010 TACOMA CREW CAB WITH 10,000 MILES, AUTOMATIC TRANSMISSION. WHEN THE VEHICLE IS WARM (DRIVEN) AND STOPPED (AT A LIGHT OR STOP SIGN), WHEN THE ACCELERATOR IS PRESSED TO BEGIN DRIVING AGAIN THE TRANSMISSION WILL NOT ALWAYS ENGAGE IMMEDIATELY. THERE ARE TIMES IT TAKES TWO TO THREE SECONDS FOR THE TRANSMISSION TO GATCHG AND THE TRUCK TO BEGIN MOVING. YOU CAN HEAR THE ENGINE REV UP BUT THE TRUCK WILL NOT MOVE. PRESSING HARDER ON THE ACCELERATOR TO GET THE TRUCK TO MOVE DOES NOTHING BUT REV THE ENGINE, AND WHEN THE TRANSMISSION DOES CATCH THE VEHICLE CAN LURCH FORWARD RAPIDLY ACCELERATING. THIS SITUATION CAN BE VERY DANGEROUS IF YOU ARE NOT READY FOR IT.

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2007 TOYOTA AVALON. THE CONTACT WAS DRIVING APPROXIMATELY 45 MPH WHEN THE VEHICLE SUDDENLY ACCELERATED. THE CONTACT ENGAGED THE BRAKE PEDAL AND THE VEHICLE CAME TO A COMPLETE STOP. HE TURNED OFF THE ENGINE AND RESTARTED THE VEHICLE. AFTER TWO SEPARATE ATTEMPTS, THE RPMS INCREASED EXCESSIVELY. HE RESTARTED THE VEHICLE AND IT BEHAVED NORMALLY AFTER FIVE TO TEN MINUTES. PRIOR TO THE FAILURE, THE CONTACT HAD THE VEHICLE REPAIRED ACCORDING TO RECALLS 09V388000, VEHICLE SPEED CONTROL, ACCELERATOR PEDAL AND 10V017000. THE REPAIR DID NOT CORRECT THE FAILURE. THE CONTACT WILL TAKE THE VEHICLE TO THE DEALER SINCE THE COMPLAINT WAS FILED. THE FAILURE MILEAGE WAS APPROXIMATELY 26,000.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I WAS APPROACHING A PARKING SPACE AT A RESTAURANT. I HAD MY FOOT ON THE BRAKE PEDAL AS I TURNED INTO THE SPACE. AS I CAME TO THE END OF THE SPACE, THE CAR LUNGED OVER THE CURB AND HIT THE BUILDING. BECAUSE THINGS HAPPENED SO QUICKLY, I CANNOT SAY WHETHER MY FOOT SLIPPED OFF THE BRAKE BUT I DO KNOW THAT I DIDN'T HAVE CONTROL OF MY CAR. THERE WAS DAMAGE TO THE CORNER OF THE BUILDING AND TO MY CAR AS WELL. I HAVE NOT HAD ANY PROBLEMS WITH THIS CAR IN THE PAST AND CAN'T SAY THAT ANY EQUIPMENT WAS DEFICIENT.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BRAKE PEDAL. THE CONTACT CONTINUED APPLYING PRESSURE TO THE BRAKES AND WAS ABLE TO SHIFT INTO NEUTRAL GEAR WHICH STOPPED THE VEHICLE FROM ACCELERATING. THE VEHICLE WAS TAKEN TO THE DEALER AND A TECHNICIAN FROM CHICAGO INSPECTED IT; HOWEVER, THE TECHNICIAN COULD NOT FIND THE CAUSE OF THE FAILURE. THE CONTACT REQUESTED A REPLACEMENT VEHICLE DUE TO SAFETY RISK WITH THE CURRENT VEHICLE. THE FAILURE MILEAGE WAS APPROXIMATELY 16,000. THE CURRENT MILEAGE WAS 16,040.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10328437  
**Date of Incident:** 20100425  
**Vehicle:** 2008 TOYOTA PRIUS  
**Location of Incident:** ANNAPOLIS, MD

**NHTSA Summary:**

WHILE DRIVING ABOUT 65 MPH ON A SMOOTH INTERSTATE, MY 2008 TOYOTA PRIUS ACCELERATED WHEN I TAPPED THE BRAKE TO TAKE IT OUT OF CRUISE CONTROL. I STEPPED ON THE BRAKE AGAIN AND IT STOPPED ACCELERATING, AND SLOWED DOWN. I HAD REMOVED THE FLOOR MAT A FEW WEEKS PRIOR. I TOOK IT TO TOYOTA TO HAVE THE RECALL WORK DONE, WHICH INCLUDED A SOFTWARE UPGRADE. THEY SAID AFTER THEY INSPECTED THE CAR THAT THEY DETERMINED FORM THE LOG THAT THE BRAKE AND ACCELERATOR HAD BEEN PRESSED AT THE SAME TIME, TWICE. I AM SURE I DID NOT STEP ON BOTH. AS I SAID, I TAPPED THE BREAK TO TAKE IT OUT OF CRUISE CONTROL, AND AT THE TIME IT ACCELERATED MY FOOT WAS IN THE AIR, NOT TOUCHING EITHER PEDAL. I SUGGESTED THE CRUISE CONTROL MAY BE ERRONEOUSLY PUTTING FLAGS IN THE LOG AS IT SLOWS AND ACCELERATED TO MAINTAIN A CONSISTENT SPEED. THE DEALER REFUSED TO REPORT THIS SUGGESTION OR SINCE IT WOULD BE DIAGNOSING, AND SAID THERE WAS NO PLACE FOR THEM TO REPORT THAT I WAS SURE I HAD NOT STEPPED ON BOTH PEDALS AT THE SAME TIME. THANK YOU, AND I HOPE YOU ARE ABLE TO RESOLVE THIS PROBLEM. \*TR

**Additional Summary:**

Floormat had been removed prior to incident

**Toyota ID Number:**  
**NHTSA ODI Number:** 10334615  
**Date of Incident:** 20100425  
**Vehicle:** 1993 LEXUS SC400  
**Location of Incident:** WESTLAKE VILLAGE, CA

**NHTSA Summary:**

I WAS INVOLVED IN A MOTOR VEHICLE ACCIDENT ON 4/25/10 WITH A 1993 LEXUS SC400 VIN: JTSUJ230C5P0032308. I WAS APPROACHING A RED LIGHT CONTROLLED INTERSECTION WITH MY FOOT ON THE BRAKE PEDAL AND THE VEHICLE CONTINUED TO ACCELERATE THROUGH THE INTERSECTION. I FEEL THAT THE COMPUTER CHIP CONTROLLING EITHER THE TRANSMISSION OR IDLING SPEED FAILED AS THE VEHICLE COULD NOT COME TO A HALT AND RESULTED IN A COLLISION. THE TRANSMISSION FAILED TO DROP DOWN TO NEUTRAL AND/OR THE IDLE COULD NOT DROP DOWN TO LESS THAN 1000 RPM. I REALIZE IT IS AN OLDER VEHICLE AND COMPUTER CHIPS COULD FAIL DUE TO AGE BUT I WONDER IF THIS COULD BE A DESIGN FLAW OF THE FAIL SAFE ACCELERATOR ASSEMBLY. COULD YOU LET ME KNOW IF ANY OTHER COMPLAINTS HAVE BEEN LODGED.

**Date of Incident:** 20100426  
**Vehicle:** 2007 TOYOTA COROLLA  
**Location of Incident:** GRAYSLAKE, IL

**NHTSA Summary:**

I HAD JUST STARTED MY 2007 TOYOTA COROLLA IN A PARKING LOT, I BACKED OUT OF A MY PARKING SPACE, AND PUT THE TRANSMISSION IN DRIVE. I WAS TRAVELING APPROXIMATELY 3-4 MPH, WHEN I APPLIED THE BRAKE TO STOP. THE CAR CONTINUED TO LURCH FORWARD, EVEN THOUGH MY FOOT WAS ON THE BRAKE. I APPLIED MORE PRESSURE TO THE BRAKE, BUT THE CAR CONTINUED TO MOVE. I HAD TO SHIFT THE TRANSMISSION INTO PARK, IN ORDER TO STOP THE CAR. I THEN LOOKED DOWN AT THE BRAKE AND ACCELERATOR PEDALS. MY FOOT WAS FIRMLY ON THE BRAKE AND THE ACCELERATOR WAS NOT DEPRESSED IN ANYWAY, HOWEVER THE ENGINE RPM'S CONTINUED TO INCREASE. I HAD TO TURN THE ENGINE OFF TO STOP THE ENGINE SPEED FROM INCREASING. I TOOK THE CAR TO TOYOTA DEALERSHIP IMMEDIATELY, BUT THEY FOUND NOTHING WRONG WITH THE CAR.

**NHTSA Summary:**  
TWO UNACCOUNTED ACCELERATION SINGLE VEHICLE ACCIDENTS WITH 2009 TOYOTA PRIUS. AFTER ACCIDENT OF APRIL 30, 2010 PER MY REQUEST, VEHICLE WAS INSPECTED BY A CONSULTANT FROM TOYOTA.[MAY 26, 2010]. TOYOTA IS SAYING CAR IS SAFE. CAR WAS RETURNED TO ME ON MAY 28, 2010. FIRST ACCIDENT OCCURED AUGUST 31, 2009. BOTH ACCIDENTS OCCURED UNDER SIMILAR CIRCUMSTANCES IE. DRIVING AT SLOW ACCELERATION WHILE MAKING A RIGHT TURN. ACCIDENT #1 TURNING A CORNER, ACCIDENT #2 PULLING INTO A PARKING SLOT IN A PARKING LOT. BOTH TIMES ENGINE REVVED AND CAR LURCHED FORWARD. IN FIRST ACCIDENT CAR CRASHED INTO A TREE, IN SECOND ACCIDENT CAR RAN OVER A LANDSCAPING BOULDER WHICH STOPPED IT FROM CRASHING INTO THE STREET. THE BOULDER WAS STUCK UNDER THE MIDDLE OF THE CAR. TWO WHEELS ON EACH SIDE OF IT AND FRONT WHEELS WERE OFF OF THE GROUND. THE FRONT WHEELS WERE STILL TURNING AFTER I GOT OUT OF THE CAR. I GOT BACK IN THE CAR AND TURNED OFF THE ENGINE. I AM REQUESTING TOYOTA REPLACE THIS VEHICLE WITH A LIKE VALUE VEHICLE. I HAVE PICTURES TAKEN AT THE TIME OF THE ACCIDENT OF APRIL 30, 2010 AND DETAILED EXPLANATIONS OF BOTH ACCIDENTS. DAMAGES FROM BOTH ACCIDENTS WAS APPROXIMATELY 20 THOUSAND DOLLARS. MY INSURANCE COMPANY FOUND ME AT FAULT FOR THE ACCIDENT OF AUGUST 31, 2009 BECAUSE ALL OF THE CAR'S WARNING LIGHTS CAME ON AND I GLANCED AT THE DASH. THE INSURANCE COMPANY HAS FOUND ME NOT AT FAULT FOR THE ACCIDENT OF APRIL 30, 2010. I RECEIVED A RECALL NOTICE FROM TOYOTA AFTER THE ACCIDENT OF APRIL 30TH. HOWEVER, I WAS TOLD THAT THIS HAD NOTHING TO DO

C-2269

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

WITH THE ACCIDENTS. MY CAR HAS HAD A NUMBER OF UNSUAL ISSUES SINCE ITS PURCHASE. THIS IS DOCUMENTED WITH TOYOTA SERVICE. THIS CAR WAS PURCHASED NEW AND HAS 11,000 MILES ON IT.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10343461  
**Date of Incident:** 20100430  
**Vehicle:** 2009 TOYOTA MATRIX  
**Location of Incident:** WILMINGTON, DE

**NHTSA Summary:**  
TL\* THE CONTACT OWNS A 2009 TOYOTA MATRIX. THE CONTACT WAS DRIVING APPROXIMATELY 45 MPH WITH A SUDDEN INCREASE IN ACCELERATION. THE BRAKE PEDAL WAS APPLIED AND THE VEHICLE CONTINUED TO ACCELERATE AND TRAVELED OFF THE ROADWAY INTO AN OPEN FIELD AND STRUCK A POLE. THE VEHICLE SUSTAINED MODERATE DAMAGES. THERE WAS NO PERSONAL INJURY. A POLICE REPORT WAS FILED OF THE INCIDENT. THE VEHICLE WAS TOWED TO AN AUTHORIZED DEALER AND REMAINED AT THE FACILITY FOR OVER A PERIOD OF TWO AND A HALF MONTHS UNDER AN INVESTIGATION. THE MANUFACTURER HAD AN INDEPENDENT ENGINEER TO PERFORM FURTHER INVESTIGATION REGARDING THE ACCELERATION FAILURE. THE AUTHORIZED DEALER WAS UNABLE TO LOCATE THE PROBLEM AND INFORMED THE CONTACT TO PICK UP THE VEHICLE. THE VEHICLE WAS REPAIRED FOR THE BODY DAMAGES. THE MANUFACTURER WAS NOTIFIED AND ADVISED THAT THEY WOULD NOT COMPENSATE FOR ANY DAMAGES UNTIL THE CAUSE OF FAILURE HAD BEEN DETERMINED. THE CONTACT EXPRESSED CONCERN THAT THE VEHICLE HAD NOT BEEN REPAIRED AND THE DEALER'S ADVISEMENT TO RELEASE THE UNSAFE VEHICLE TO HIM. THE FAILURE MILEAGE WAS APPROXIMATELY 22,000. THE VIN WAS NOT AVAILABLE.

**NHTSA ODI Number:** 10328464  
**Date of Incident:** 20100501  
**Vehicle:** 2008 TOYOTA RAV4  
**Location of Incident:** DENVER, CO

**NHTSA Summary:**  
MY FIANCEE AND I WERE DRIVING OUR 2008 RAV4/LIMITED/V6/4WD AND WE WERE AT A STOP LIGHT. I WAS DRIVING AND I HAD MY FOOT ON THE BRAKE FOR ABOUT 30 SECONDS WAITING FOR THE LIGHT TO TURN GREEN. IT WAS A BUSY INTERSECTION HERE IN DENVER AND THERE WAS A CAR IN FRONT OF US. ALL OF A SUDDEN THE ACCELERATOR TOOK OFF AND I COULD FEEL THE CAR TRYING TO MOVE FORWARD. LUCKILY, I ALREADY HAD MY FOOT ON THE BRAKE AND I PRESSED DOWN EVEN HARDER ON THE BRAKE AS I IMMEDIATELY PUT THE CAR IN NEUTRAL. WHEN I PUT IT IN NEUTRAL THE ACCELERATOR CONTINUED TO REV HIGHER THAN IT WAS BEFORE. I SLAMMED THE GEAR SHIFT INTO PARK AND SHUT THE CAR OFF. WE WERE OBVIOUSLY SHAKEN FROM THIS AND JUST SAT THERE FOR A MINUTE AS WE REALIZED WHAT HAD JUST HAPPENED. MY FIANCEE WANTED TO GET OUT OF THE CAR AND CALL A TOW TRUCK. I WANTED TO TRY AND START THE CAR AGAIN BUT LEAVE IT IN PARK AND TEST IT OUT.

I STARTED THE CAR WITHOUT TOUCHING THE BRAKE AND IT DID IT AGAIN. EVERY LIGHT ON THE DASH BOARD LIT UP LIKE A CHRISTMAS TREE. WE WERE IN PARK SO THE CAR COULD NOT MOVE BUT THE RPM'S WERE ON THE WAY TO REDLINING AND I TURNED OFF THE CAR AGAIN. THE LIGHTS AROUND THE SPEEDOMETER HAD NEVER LIT UP LIKE THAT BEFORE. SERIOUSLY EVERY DUMMY LIGHT ON THE CAR WAS LIT AND FLASHING.

C-2270

**Safety Research & Strategies**

**Location of Incident:** LSLIP TERRACE, NY

**NHTSA Summary:**  
I WAS DRIVING MY 2008 IS250 AT ABOUT 40 MPH ON A TWO LANE ROADWAY WHEN I FELT THE CAR ACCELERATE SUDDENLY. I TOOK MY FOOT OFF THE GAS PEDAL BUT IT CONTINUED TO ACCELERATE TO 85 MPH. I IMMEDIATELY HIT THE BRAKE BUT THE VEHICLE DID NOT STOP OR EVEN SLOW DOWN. I HAD PRESSED THE BRAKE PEDAL AS FAR AS IT WOULD GO BUT THE VEHICLE DID NOT RESPOND. THE THIRD TIME I PRESSED THE BRAKE PEDAL THE VEHICLE BEGAN TO SLOW DOWN BUT WOULD NOT STOP. THE SPEED SLOWLY DECREASED TO ABOUT 20 MPH BUT STILL DID NOT STOP. LUCKILY THERE WAS LITTLE TRAFFIC VOLUME BUT I WAS APPROACHING AN INTERSECTION. THE CAR WAS SLOWING DOWN BUT NOT STOPPING. FINALLY IT CAME TO A CRAWL JUST AS THE TRAFFIC LIGHT TURNED GREEN. I LET GO OF THE BRAKE AND THE CAR THRUSTED FORWARD. I PRESSED THE BRAKE PEDAL YET AGAIN AND THE VEHICLE FINALLY CAME TO A STOP. I CALLED LEXUS DEALERSHIP TO REPORT THE PROBLEM. THEY TOWED THE CAR TO THEIR SERVICE CENTER. NOONE ASKED FOR SPECIFIC DETAILS OF THE INCIDENT. IT DIDNT SEEM THAT THIS TYPE OF COMPLAINT WAS ANYTHING NEW TO THEM.

**Date of Incident:** 20100504  
**Vehicle:** 2006 TOYOTA AVALON  
**Location of Incident:** JOLIET, IL

**NHTSA Summary:**  
I WAS AT A STOPLIGHT, FOOT FIRMLY ON THE BRAKE, DOING NOTHING BUT WAITING FOR THE LIGHT TO CHANGE. SUDDENLY I REALIZED MY CAR WAS MOVING FORWARD, SO I PUSHED THE BRAKES HARDER. THE PEDAL WENT DOWN FURTHER BUT THE CAR KEPT MOVING FORWARD. ALL OF THIS TOOK ONLY A FEW SECONDS. THEN I HEARD AND FELT THE ENGINE ACCELERATING VERY LOUDLY. JUST AT THAT MOMENT THE LIGHT CHANGED, AND TRAFFIC SPED AHEAD. WITHOUT THINKING, I PUT MY FOOT ON THE ACCELERATOR AND THE ENGINE STOPPED ROARING. THE CAR ACCELERATED NORMALLY AND THE BRAKES WERE RESPONSIVE. 2. THIS WAS THE ONLY INCIDENT. 3. I WAS ACTUALLY ON MY WAY TO THE TOYOTA DEALER FOR ROUTINE MAINTENANCE WHEN THE INCIDENT OCCURRED, SO I CONTINUED ON MY WAY. WHEN I GOT TO THE DEALER, I HAD THE PERSON WHO MET ME AT MY CAR CHECK THE FLOOR MAT BEFORE I WALKED AWAY. HE SAID IT WAS FINE. TOYOTA PERFORMED ALL RECALL ACTIONS, ASKED IF I WANTED THE COMPUTER RE-PROGRAMMED TO ALLOW THE BRAKES TO OVERRIDE EVERYTHING ELSE (I SAID YES), AND FILLED OUT THE FORMS AND PERFORMED ACTIONS IN ACCORDANCE WITH AN SUA INCIDENT. THEY GAVE ME A LOANER AND THE NEXT DAY TOLD ME THAT MY CAR WOULD BE RELEASED. I ASKED FOR, AND RECEIVED A COPY OF THE FORM FOR AN SUA INCIDENT, BUT IT ONLY HAS INSTRUCTIONS FOR THE TECHNICIAN AND NO WRITTEN RESULTS, SO I DON'T KNOW WHAT WAS FOUND AND WHAT WAS DONE, OTHER THAN NORMAL RECALL WORK. I AM FILLING THIS OUT BECAUSE I NO LONGER TRUST TOYOTA, AND NOW I AM AFRAID. IT ONLY HAPPENED ONCE, SO I DON'T KNOW IF THEY FIXED THE PROBLEM, AND I WANT TO BE PART OF THE RECORD OF INCIDENTS.

**Additional Summary:**  
Claims dealer employee confirmed that floormat was "fine"

**NHTSA ODI Number:** 10328962 - 10329513  
**Date of Incident:** 20100505  
**Vehicle:** 2008 TOYOTA 4RUNNER  
**Location of Incident:** ELIZABETHTOWN, IN

**NHTSA Summary:**  
SUDDEN UNINTENDED ACCELERATION OCCURRED IN OUR 2008 TOYOTA 4RUNNER. WHILE SITTING IN A TURN LANE, FOOT ON BRAKE, TRANSMISSION IN DRIVE, THE VEHICLE ENGINE SUDDENLY INCREASED POWER DRAMATICALLY ON ITS OWN. WITH FOOT ON BRAKE THE VEHICLE ACCELERATED FORWARD ON ITS OWN. IT CONTINUED FORWARD FOR ABOUT 800 FEET BEFORE IT RETURNED TO NORMAL. NO DAMAGES OR INJURIES. VEHICLE WAS PARKED AND TOYOTA DEALER CAME AND GOT IT. SAID THEY WILL RUN TESTS. THIS WAS NOT A IMAGINED EVENT. THIS IS OUR SECOND 4RUNNER MODEL. AND WE HAVE HAD NO COMPLAINTS WITH THE VEHICLE UNTIL THIS INCIDENT. ADDITIONALLY, I NOTE THAT THIS VEHICLE IS NOT ON TOYOTA'S CURRENT RECALL LIST. THERE IS NOTHING TOYOTA CAN SAY OR DO THAT WOULD RESTORE MY SAFEY CONFIDENCE IN THIS VEHICLE AFTER THIS INCIDENT. THUS, WE WILL TRADE IT IN ON ANOTHER BRAND ONCE WE GET IT BACK. I WOULD LIKE FOR NHTSA TO CONSIDER REQUIRING TOYOTA TO PUT THIS VEHICLE MODEL ON THEIR RECALL LIST. EVEN ONE DEFECT OF THIS NATURE IS UNACCEPTABLE. (ODI 10329513)

**Additional Summary:**

This sudden unintended acceleration event occurred at about 10:30 am on May 5, 2010. The event occurred in the northbound lane at the intersection of US Hwy 31 and Taylor Road, Columbus, IN. 47331. I have made two NHTSA reports. I made an oral report and was given ODI #10328962 on May 5, 2010. Later, on May 9, 2010, I made an online report, and the ODI number assigned to that report is #10329513.

My wife, Kathy, was driving the vehicle alone when this event occurred. Several cars were ahead of her as she had come to a complete stop waiting for room to enter the right turn lane at the above intersection. Her foot was on the brake and the vehicle was in drive. Suddenly, the vehicle accelerated on its own. She says that her immediate reaction was focused upon trying to squeeze between the vehicle in front of her and the guard rail on the right. The vehicle continued forward into the intersection and she negotiated a right turn without hitting anything. Fortunately, cross traffic in the intersection had ceased. Still surging forward on its own after making the turn, she remembers beginning to pump the brake at this point. Says the vehicle continued forward on its own for a few hundred feet as she continued to pump the brake before returning to normal. Overall distance that the vehicle was out-of-control was about 800 feet.

**NHTSA Summary:**  
THIS EVENT HAPPEN 2 TIMES IN THE 3YEARS IVE OWNED THE CAR, THE 1ST INCIDENT WAS 2009 WHILE I WAS PARKING MY CAR IN A WENDY'S LOT. WHILE SLOWING DOWN TO PARK THE CAR ACCELERATED IN THE PARKING SPOT AND WHILE SLAMMING MY FOOT ON THE BRAKES IT FINALLY STOPPED BUT ON TOP PARKING CONCRETE STOPPER (NOT SURE ABOUT NAME AND ALSO ON TOP OF THE SIDE WALK. THE SECOND INCIDENT JUST HAPPEN TODAY (5/5/10) WHILE LEAVING WORK. AS I WAS BACKING THE CAR UP AND GETTING OUT THE PARKING SPOT I PUT THE CAR IN DRIVE AND IT ACCELERATED FORWARD BEFORE PUTTING MY FOOT ON THE GAS, I THEN AGAIN BANGED MY FOOT ON THE GAS AND MADE SURE I WAS PRESSING THE BRAKE AND THE CAR KEPT ON ACCELERATING INTO A PARKED CAR AND I WAS THEN ABLE TO PUT THE CAR IN PARK. THE FIRST TIME THE INCIDENT HAPPEN I WAS IN DENIAL AND SECOND GUESSING MY OWN DRIVING SO I PAID TO GET THE FRONT BUMPER REPLACED. THIS IS THE SECOND TIME THIS HAS HAPPEN AND I REPORTED THE INCIDENT TO MY INSURANCE. NOT TO MENTION WHEN I FIRST PURCHASED MY SCION I HAD SPOKE TO THEM ABOUT MY BRAKES GRINDING WITH IN THE FIRST 1000 MILES , THEY LOOKED AT IT AND TOLD ME EVERYTHING WAS CHECKED OUT. I HAVE SINCE DEALT WITH THE PROBLEM BY ALLOWING MYSELF TO BE PREPARED AHEAD OF TIME TO STOP. I HAVE ALSO HAD MY BRAKES REPLACED WHICH IN TURN DIDNT SOLD THE GRINDING. IN THE SNOW MY CAR BARELY EVEN STOPS

**Date of Incident:** 20100505  
**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** RICHMOND, VA

**NHTSA Summary:**  
MAY 5, 2010 ACCIDENT. TOYOTA RAV4 2007 ACCELERATED AT TIME OF ACCELERATION I HAD ALREADY BEGIN BRACING TO MAKE A RIGHT TURN. ENGINE BEGAN LOUD RACING AND CAR ACCELERATED. WITH VERY LITTLE ROOM TO MANEUVER I TURNED CAR HARD RIGHT TO AVOID CARS AND RAN INTO A LARGE TREE WITH CAR STILL ACCELERATING STOPPING ONLY WHEN HITTING TREE AND BOUNCED OFF. WHEN CAR CAME TO A STOP ENGINE WAS STILL RACING AND VERY LOUD. THE ACCIDENT WAS ON PRIVATE PROPERTY SO POLICE WERE NOT CALLED. WITNESS OBSERVED SLOW DOWN AND TURN SIGNALS AND THEN SEEING CAR BEGIN ACCELERATING VERY QUICKLY. 2ND WITNESS THAT HEARD THE NOISE OF THE CRASH CAME OUT OF HOUSE AND WAS ALARMED AT THE LOUD RACING STILL COMING FROM THE ENGINE AFTER CAR HAD COME TO A STOP. ENGINE RACING DID NOT STOP UNTIL I WAS ABLE TO TURN THE IGNITION OFF. ACCIDENT HAPPENED IN A MATTER OF LESS THAN A MINUTE AFTER ACCELERATION BEGAN AND I WAS NOT ABLE TO TAKE HANDS OFF OF WHEEL TO ATTEMPT PUTTING INTO NEUTRAL OR TURN ENGINE OFF. CAR ESTIMATE WAS \$14,000 WHICH DID NOT INCLUDE THE NEW ENGINE AND TRANSMISSION THAT WOULD BE REQUIRED SO IT WAS TOTALED. INJURIES SUSTAINED BY ME INCLUDE SEVERE BRUISING, SORENESS AND BURN LIKE ABRASIONS ACROSS NECK AND RIGHT ARM FROM SEAT BELT. A CONCUSSION DUE TO HEAD AND NECK BEING THROWN BACK WARD AND FORWARD ON IMPACT. REMAINING SYMPTOMS INCLUDE DIZZINESS, NAUSEA, HEADACHES, COGNATIVE ISSUES. THIS WAS 2ND EXPERIENCE OF ACCELERATION PROBLEM. FIRST INCIDENT 2 WEEKS PRIOR, LASTED LESS THAN 30 SECONDS WITH NO ACCIDENT AND CAR RESUMED PREVIOUS SPEED BEFORE ACCELERATION. CAR HAS HAD FULL MAINTENANCE WITH DEALER SINCE PURCHASE AS A NEW CAR. NO PREVIOUS ACCIDENTS. CAR HAS NEVER REQUIRED ANY REPAIR OTHER THAN A TIRE AND ALL MAINTENANCE WAS PROPERLY MAINTAINED.

**Vehicle:** 2006 TOYOTA SIENNA  
**Location of Incident:** DRYDEN, NY

**NHTSA Summary:**  
I WAS DRIVING ON A STRAIGHT, LEVEL DRY ROAD WITH CRUISE CONTROL SET AT 58MPH. SUDDENLY CAR BEGAN TO DOWNSHIFT. ASSUMING TRANSMISSION PROBLEM I DISENGAGED CRUISE CONTROL AND CAR ALMOST CAME TO A STOP. I PUSHED GAS PEDAL AND DROVE IN LOW GEAR TO NEAREST PULL-OFF. DISCOVERED LEFT FRONT BRAKE WAS SMOKING. AFTER THINGS COOLED OFF I DROVE CAR IN LOW GEAR ABOUT 6 MILES TO LOCAL SERVICE STATION. MECHANIC FOUND ALL BRAKES LOCKED AND REMOVED ALL WHEELS. HE INSPECTED ALL ROTORS, CALIPERS BRAKE LINES, ETC AND FOUND NO PROBLEMS. (I HAD NEW BRAKES INSTALAAED AT DEALERSHIP ABOUT 4 MONTHS EARLIER.) WHEN MECHANIC MANIPULATED LEFT FRONT CALIPER ALL BRAKES DISENGAGED. MECHANIC FOUND BRAKE FLUID LEVEL WAS NORMAL. I'DV DRIVEN CAR ABOUT 500 MILES SINCE PROBLEM OCCURRED WITH NO PROBLEMS. I DON'T USE CRUISE CONTROL OFTEN - AND HAVEN'T USED IT SINCE PROBLEM OCCURED. I'M WONDERING IF PROBLEM IS WITH CRUISE CONTROL RATHER THAN BRAKES?? THIS COULD HAVE BEEN A DISASTER IF IT HAPPENED ON A FREEWAY AT HIGHER SPEEDS!

**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** MISSION HILLS, CA

**NHTSA Summary:**

I WAS GETTING ON THE FREEWAY AND I WAS MERGING TO ANOTHER FREEWAY I WAS ON THE 5 MERGING TO THE 118 AND THAT IS WHERE I NOTICED THE GAS PEDAL EXCELERATED AND I COULD NOT SLOW THE VEHICLE DOWN. I THEN LOST CONTROL OF THE STEERING WHEEL. I WAS TRYING TO GET THE STEERING WHEEL TO STRAIGHTEN OUT THE CAR AND GO WITH THE CURVE AND IT WOULDNT. I THEN HIT THE WALL 3 TIMES AND FLIPPED MY CAR. I DID NOTICE THIS A MONTH PRIOR TO THE ACCIDENT. BUT I THOUGHT IT WAS A GROOVE IN THE FREEWAY. THIS TIME I COULD NOT STOP OR CONTROL THE CAR. I GET ON THE SAME FREEWAY EVERYDAY IT WAS 5:30 IN THE MORNING ON THE 7TH OF MARCH, I WAS GOING ABOUT 45 MILES WHEN I STARTED TO EXCEL THE PEDAL TO CONTINUE ON TO THE OTHER FREEWAY OVERPASS. I HAVE BEEN GOING ON THIS FREEWAY TO WORK FOR 7 YEARS NOW AND HAVE NEVER HAD AN INNCEDENT EXCEPT FOR THE MONTH BEFORE. AGAIN I THOUGHT IT WAS A GROOVE IN THE HIGHWAY. I DID HEAR ON THE NEWS WHEN I GOT HOME FROM THE HOSPITAL THAT THERE WAS PROBLEMS WITH THE 2005 TOYOTA CARS AND THE STEERING COLUM SNAPS AND LOSES CONTROL. WHICH WAS EXACTLY WHAT HAPPENED. I DID CONTACT TOYOTA AND THEY SAID IT DIDNT HAVE ANYTHING TO DO WITH THE GAS PEDAL THAT IT WAS THE 2006 THAT WAS BEING RECALLED FOR THE GAS PEDAL. THEY SAID IT WAS PROBLEY THE FLOOR MAT THAT GOT STUCK UNDER THE GAS PEDAL. I HAD NO RECALL ON THE FLOOR MATS. I FEEL IT WAS VERY WRONG FOR THEM TO KIND OF CUT ME SHORT. I DID SUFFER INJURIES, CUTS AND BRUISES NOT TO MENTION TOTALING MY CAR. INSURANCE DID PAY OFF MY CAR. BUT SUCH A HUGE ORDEAL TRYING TO GET MONEY TOGETHER TO BUY ANOTHER CAR. I AM NOT TRYING TO MAKE MYSELF A RICH WOMEN I JUST WANT TOYOTA TO KNOW THAT IT WAS A HORRIBLE THING THAT HAPPEND TO ME AND THANK GOD NO ONE ELSE WAS INVOLVED. ATTORNEYS DO NOT WANT TO HELP ME FOR SOME KIND OF COMPENSATION OF THE ORDEAL. I WENT THROUGH PHYSICALLY AND MENTALLY. I AM DOING ALOT BETTER NOW, BUT THEY DID STOP THE DOCTOR VISITS AND THERAPY DUE TO THE FACT THAT I MAY GET NOTHING OUT OF THIS AND HAVE TO PAY THE BILLS MYSELF

**Date of Incident:** 20100508  
**Vehicle:** 2011 SOUTHEAST TOYOTA SIENNA  
**Location of Incident:** EDISON, NJ

**NHTSA Summary:**

I BOUGHT A 2011 TOYOTA SIENNA LE IN MARCH 2010 AND HAVE 1200 MILES ON IT. I BELIEVE THE SIENNA AS ACCELERATION ISSUES WHEN IN CRUISE CONTROL. I TURNED ON THE CRUISE CONTROL TO KEEP THE SPEED AT 60 MPH ON THE BRIDGE. WHILE GOING UPHILL. THE SIENNA WAS ACCELERATING TO MAINTAIN SPEED WHICH WAS OK BUT WHEN GOING DOWNHILL IT JUST WONT STOP ACCELERATING AND THE SPEED WENT UP TO 75-80 MPH WHEN I HIT THE BREAKS AND TURNED OFF THE CRUISE CONTROL. I TRIED THE SAME IN ANOTHER UPHILL/DOWNHILL LOCATION ON ROUTE 1 AND THE SAME THING HAPPENED. PLEASE LOOK INTO THE ISSUE AND HAVE TOYOTA TAKE REMEDIAL ACTION. THE OTHER ISSUE I FOUND WAS THE UNTIMELY CHANGE IN GEAR. THIS HAPPENED WHEN I HIT THE BRAKES TO GO OVER A SPEED-REDUCER AND THEN HIT THE ACCELERATION PEDAL. USUALLY THERE IS A GEAR SHIFT AROUND 20-40 MPH, BUT IN THIS CASE THE GEAR JUST WASNT SHIFTING AND THE RPM WENT ON RISING. I STOPPED THE VEHICLE AND STARTED AGAIN AND THINGS SEEMED TO BE ALRIGHT. THIS HAS HAPPENED TO ME WITH THE SIENNA A NUMBER OF TIMES. THE THIRD ISSUE IS THAT WHEN I TURN QUICKLY THE STEERING SEEMS TO BECOME NON-RESPONSIVE FOR A FEW SECONDS AND SEEMS TO GET STUCK. THIS DOESN'T HAPPEN WHEN I AN SLOWLY TURNING THOUGH.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10343536  
**Date of Incident:** 20100508  
**Vehicle:** 2006 TOYOTA CAMRY  
**Location of Incident:** WELDON, NC

**NHTSA Summary:**

I WAS DRIVING MY CAR UNDER MY CARPORT. WHEN TOUCHED THE ACCELERATOR TO SLOWLY ENTER THE CARPORT, THE CAR ACCELERATED ON ITS OWN. IT JUMP AND TOOK OFF. I TRIED TO PUT THE CAR IN PARK AND IT KEPT GOING. I FEARED IT WOULD KEEP GOING ACROSS MY YARD, SO I PREPARED TO JUMP OUT BY OPENING THE DOOR AND STICKING MY LEG OUT. THE OPEN DOOR HIT A SUPPORT POLE ON MY CARPORT AND MY LEG WAS INJURED. LUCKILY MY FINAL ATTEMPT TO BREAK STOPPED THE VEHICLE.

**NHTSA Summary:**

TL- THE CONTACT OWNS A 2010 TOYOTA CAMRY. WHILE THE CONTACT WAS DRIVING APPROXIMATELY 30 MPH, SUDDENLY THE SPEED RATE INCREASED BETWEEN 80 TO 100 MPH WITHOUT WARNING. WHEN BRAKING THE VEHICLE FAILED TO SLOW DOWN AND CRASHED INTO A UTILITY POLE. THE CONTACT SUSTAINED MINOR INJURIES TO THE MUSCLE AREAS, CUTS AND ABRASIONS TO THE FACE AND LEG. THE VEHICLE WAS COMPLETELY DESTROYED AND TOWED TO AN IMPOUND LOT. A POLICE REPORT WAS FILED OF THE INCIDENT. THE CAUSE OF FAILURE HAD NOT BEEN DETERMINED AT THE TIME OF THE COMPLAINT. THE FAILURE AND CURRENT MILEAGES WERE 3,500. JS

**Additional Summary:**

INFO FROM GLOUCESTER TIMES:

The Toyota Camry that crashed at high speed on Washington Street Monday afternoon, breaking apart after striking a telephone pole and rolling over, accelerated on its own and could not be slowed, the driver of the car told her family after the accident.

C-2283

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

"She was adamant that the car sped up on its own and she did everything in her power to stop it," James McDermott, son of Rose McDermott, the 82-year-old driver, told the Times Tuesday. "I asked her what she had done and she said: 'I did nothing wrong.'"

Rose McDermott was airlifted to Beth Israel Deaconess Medical Center after the crash with what were described as "non-life-threatening injuries," and by Tuesday morning had been released and was back at her home on New Way Lane in West Gloucester. James McDermott said his mother, who had been wearing her seat belt, was still shaken up, recovering, and did not want talk about the incident publicly.

After she was flown to Boston, McDermott was charged by Gloucester police with driving to endanger, failing to keep right and speeding. Investigators said the Toyota had left around 150 feet of skid marks on Washington Street, indicating excessive speed on the narrow, thickly settled stretch of road.

But witnesses to the accident — including the driver of the car sideswiped by the Toyota — said McDermott seemed lucid, alert and concerned about others after the accident and they doubted that she would have embarked on a wild, speed-fueled rampage.

"I went to see if she was OK, and I noticed she was awake and alert and said she couldn't get out," said Catherine Crowley of Riverview Road, whose brand-new Nissan Sentra was struck and nearly run off the road by the Camry. "She was making total sense."

"She was talking and very worried about the other car and whether anyone else was hurt," said Alicia Gossom, a nurse at Cape Ann Pediatricians who was walking by as the crash occurred and was one of the first people to try to help McDermott."

**Date of Incident:** 20100510  
**Vehicle:** 2007 TOYOTA PRIUS  
**Location of Incident:** SANTA CLARA, CA

**NHTSA Summary:**

SUMMARY: MY CAR BEGAN ACCELERATING WHILE I WAS IN PARK. I OWN A 2007 TOYOTA PRIUS. TWO DAYS AGO, I DROVE TO MY DESTINATION, PULLED INTO A PARKING SPOT, AND TURNED OFF THE CAR. I WAS EARLY, SO I TURNED THE CAR BACK ON (SO I COULD LISTEN TO THE RADIO WHILE I WAITED). THE CAR WAS IN PARK AND I DID NOT HAVE MY FEET ON ANY PEDALS. THE CAR WAS ON FOR LESS THAN A MINUTE WHEN IT BEGAN TO DRIVE FORWARD. I BOTH HEARD THE SOUND OF THE MOTOR ENGAGING AND VISUALLY PROCESSED THAT THE CAR WAS MOVING. I IMMEDIATELY STEPPED ON THE BRAKE HARD AND THE CAR IMMEDIATELY CAME TO A STOP. MY 4-YEAR-OLD WAS DISTRESSED BECAUSE THE ROLLING AND HARD STOP MADE A BIG JOLT. THE CAR WAS STILL IN PARK. I RELEASED THE BRAKE PEDAL AND THE CAR STAYED STILL. I DO NOT KNOW IF THIS IS RELATED, BUT MY CAR HEADLIGHTS RANDOMLY TURN OFF WHILE I AM DRIVING. IF I TOGGLE THE SWITCH OFF AND BACK ON, THEY ALWAYS COME BACK ON. I TOOK IT TO THE LOCAL DEALER, WHERE THE REPAIR GUY TOLD ME THEY FREQUENTLY SEE THIS PROBLEM, AND ALL THEY DO IS REPLACE THE HEADLIGHTS (WHICH MADE NO SENSE TO ME, BECAUSE THE BULBS AREN'T BURNED OUT). I WOULD SAY THIS PROBLEM HAPPENS ABOUT ONCE A WEEK.

**Vehicle:** 2008 TOYOTA FJ CRUISER  
**Location of Incident:** MENDOTA HEIGHTS, MN

**NHTSA Summary:**  
I HAVE A 2008 FJ CRUISER MANUAL TRANSMISSION. THIS IS THE 2ND TIME THIS HAS HAPPENED TO ME SINCE I'VE OWNED THE TRUCK. ON MAY 10TH, I WAS DRIVING DOWN THE HIGHWAY AT ABOUT 70-80 MPH. THE TRUCK TO THE RIGHT OF ME SEEMED LIKE HE WANTED TO CHANGE LANES IN TO MY LANE. I HIT THE BREAKS TO LET HIM IN BUT THE BREAKING POWER BEING APPLIED TO THE ROTORS WAS A LOT HARDER THEN WHAT I NEEDED. IN OTHER WORDS, IT SEEMED LIKE THE COMPUTER THOUGHT MY BREAK PEDAL WAS ALL THE WAY DOWN TO THE FLOOR WHEN IN REALITY, I JUST NEEDED A QUICK BREAK. ANYWAY, THE WHEELS LOCKED UP TO AND RELEASED. IT SCARED ME HOW HARD THE TRUCK STOPPED-- ALMOST CAUSED AN ACCIDENT BEHIND ME. THE BREAKS THEN RELEASED AND I KEPT GOING, BUT COULD SMELL THE BURNT RUBBER FOR ANOTHER MILE. THIS WAS A CEMENT HIGHWAY ROAD THAT MAY HAVE HAD SOME CRACKS IN IT BUT I DON'T REMEMBER IF BEING PARTICULARLY UNEVEN. JUST SEEMED LIKE THE COMPUTER MISUNDERSTOOD HOW MUCH ACTUAL PRESSURE I APPLIED TO THE PEDAL AND OVER BRAKED. THE FIRST TIME THIS EVER HAPPEND WAS PROBABLY A YEAR AGO WHEN I WAS GOING AROUND 20MPH. AGAIN, DON'T REMEMBER THE CONDITION OF THE ROAD BEING OVERLY TERRIBLE.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10330043  
**Date of Incident:** 20100511  
**Vehicle:** 2006 TOYOTA MATRIX  
**Location of Incident:** LATHROP, CA

**NHTSA Summary:**  
AT 10:30 AM ON A SUNNY DAY, I EXITED THE I-880 NORTHBOUND 23RD AVE EXIT. COMING UP TO A LINE OF CARS STOPPED AT THE 11TH ST SIGNAL LIGHT, I BEGAN PRESSING DOWN ON THE SERVICE BRAKE TO SLOW DOWN. AS I WAS COMING UP TO THE BMW AHEAD OF ME, I PRESSED MORE ON THE SERVICE BRAKE TO STOP MY CAR. THINGS WENT WRONG WHEN I FELT AND HEARD THE ACCELERATOR REVVING UP, CAUSING ME TO INSTINCTIVELY PRESS EVEN HARDER ON THE SERVICE BRAKE. AS THE ACCELERATION INCREASED, MY TOYOTA MATRIX'S BRAKES BEGAN SLIPPING CAUSING MY CAR TO INCH CLOSER TO THE BMW. REALIZING THAT THE SERVICE BRAKE WAS NOT HOLDING, I PULLED UP ON THE EMERGENCY BRAKE AND SHIFTED THE CAR INTO NEUTRAL. ALL THE WHILE STILL PRESSING DOWN ON THE SERVICE BRAKE. SINCE THE ENGINE WAS STILL ACCELERATING FASTER, I MANAGED TO TURN THE IGNITION KEY OFF, SUCCESSFULLY SHUTTING DOWN THE ENGINE AND STOPPING THE ACCELERATION. AFTER A BRIEF 15 SECONDS, I RESTARTED THE CAR WITH THE ENGINE IN PARK, AND THE EMERGENCY AND SERVICE BRAKES ON. THE ENGINE IMMEDIATELY REVVED UP AS BEFORE AND I ONCE AGAIN TURNED OFF THE IGNITION KEY TO SHUT DOWN THE ENGINE. REALIZING I HAD A MAJOR PROBLEM, I KEPT THE ENGINE OFF AND PUT THE CAR IN NEUTRAL SO I COULD PUSH THE CAR TO A SAFER PART ON THE SIDE OF THE ROAD. UPON INSPECTION, I FOUND THAT MY FLOOR MAT WAS SECURELY LOCKED INTO PLACE, AND THAT THE ACCELERATOR PEDAL WAS IN THE UP POSITION, A FEW INCHES OFF THE FLOOR. I AM THE ORIGINAL OWNER WITH 75000 ACCIDENT AND INCIDENT FREE MILES ON THE CAR, AND THIS IS THE FIRST THING THAT HAS EVER GONE WRONG WITH THE VEHICLE. I HAD AAA TOW THE CAR TO ONE TOYOTA IN OAKLAND, AND THEY ARE DOING DIAGNOSTICS WITH THE VEHICLE. THEY GAVE ME A RENTAL CAR FREE OF CHARGE UNTIL THEY DETERMINE WHAT WENT WRONG. THE SERVICE DEALER TOLD ME THAT IT IS THE 2007 AND LATER MATRIX'S THAT HAVE THE ACCELERATION PROBLEM, AND THAT FOR MY 2006 MATRIX TO HAVE THIS PROBLEM IS UNCOMMON. HOPEFULLY TOYOTA WILL FIND AND CORRECT THE PROBLEM TO PREVENT THIS FROM HAPPENING TO OTHERS.

**NHTSA Summary:**  
I OWN A 2008 TOYOTA TACOMA TRUCK. I HAVE HAD PROBLEMS WITH THE THROTTLE SURGING WHEN THE AIR CONDITIONER IS TURNED OFF. I TOOK IT TO THE DEARLERSHIP AND THEY COULD NOT FIND ANYTHING WRONG. I STILL CONTINUED TO HAVE PROBLEMS BUT THEN, ON MAY 11, 2010, I WAS GOING TO PARK THE TRUCK BEHIND OUR MOTORHOME WHICH HAD A CAR CADDY ATTACHED TO IT. AS I TURN INTO THE SPACE, THE THROTTLE STUCK AND I RAN INTO THE CAR DOLLY. I IMMEDIATELY SHOVED INTO NEUTRAL AND TURNED IT OFF. MY CAR DOLLY TOOK THE IMPACT. I LOOKED DOWN TO MAKE SURE MY FOOT WAS ON THE BRAKE AND IT WAS. I THEN HAD THE TRUCK TOWED TO THE DEARLERSHIP ON MAY 12 AND IT HAS BEEN SITTING THERE SINCE.

**Vehicle:** 2004 TOYOTA CAMRY SOLARA  
**Location of Incident:** SALISBURY, MD

**NHTSA Summary:**  
2004 TOYOTA SOLARA SEV6 SPORT- VEHICLE HAS ON SEVERAL OCCASIONS WHEN TRAVELING AT "PARKING LOT SPEEDS" OR IN "STOP & GO TRAFFIC", OR BEFORE COMING TO A COMPLETE STOP - ACCELERATES WITHOUT WARNING AND WHEN BRAKES (ANTI-LOCK YET) ARE DEPRESSED, THERE IS ABSOLUTELY NO RESISTANCE. VEHICLE DOES NOT STOP!! ENGINE SURGES. FLOOR MATS NO ISSUE. FIRST INCIDENT 2008 OR 09, I HAD PULLED INTO A PARKING LOT. VEHICLE SURGED, JUMPED A CURB & INTO A RAVINE. ENGINE WAS STILL SURGING (WHILE DOWN IN THE RAVINE!) UNTIL IGNITION WAS TURNED OFF. 2 WEEKS AGO, DRIVING IN CITY TRAFFIC, (OVERCAST BUT DRY CONDITIONS APPROXIMATELY 1:00PM) I WAS THROWN BACK IN MY SEAT SUDDENLY. I THOUGHT I HAD BEEN REAR-ENDED INITIALLY DUE TO THE THRUST BACK, BUT NO ONE HAD IMPACTED THE REAR OF MY VEHICLE. REALIZING THE CAR WAS ACCELERATING ON ITS OWN, I SLAMMED ON THE BRAKES. AGAIN, NO RESISTANCE, THEY WENT FLAT. MY VEHICLE REAR ENDED AND DROVE UNDER THE BACK END OF AN SUV. UPON IMPACT,

MY KNEE SLAMMED INTO THE DASHBOARD, AND THE STEERING WHEEL BRUISED UP MY THIGH. SWELLING IN SHOULDER DUE TO BELT. NO INJURY TO PERSON IN OTHER VEHICLE. NO SKID MARKS ON ROADWAY. FILED CLAIM W/TOYOTA HOME OFFICE. THEY ARE INSPECTING THE CAR THIS WEEK @ DEALERSHIP. IF ANYONE HAD BEEN WALKING IN FRONT OF THIS CAR WHEN THESE INCIDENCES HAPPENED? THEY WOULD BE DEAD. THIS IS A SERIOUS & POTENTIALLY DEADLY ISSUE. I WILL NEVER GET BEHIND THE WHEEL OF THAT CAR EVER AGAIN. NOT FOR A MILLION DOLLARS! LIFE IS TOO PRECIOUS TO ME. AS A FORMER INVESTIGATOR/AGENT MYSELF, I IMPLORER YOU TO PLEASE INVESTIGATE THIS ASAP BEFORE THIS VEHICLE (OR OTHERS OF THE SAME) KILL SOMEONE. THIS CAR (2004 TOYOTA SOLARA (2- DOOR CAMRY)) IS NOT ON THE RECALL LIST. I AM NOW WITHOUT A CAR. I HAVE BEEN SPARED FROM BROKEN BONES, BUT I MAY NEED KNEE SURGERY. WAITING ON THE RESULTS OF AN MRI. PLEASE TAKE THESE VEHICLES OFF THE ROAD. SO THANKFUL MY CHILD WASN'T DRIVING OR IN THE CAR WITH ME. FILED A POLICE REPORT WITH THE LOCAL AUTHORITIES

**Vehicle:** 2009 TOYOTA RAV4  
**Location of Incident:** SANTA ROSA BEACH, FL

**NHTSA Summary:**  
AS I DROVE INTO OUR PARKING LOT AT WORK AFTER LUNCH, I WAS IDLING ENGINE WITH FOOT ON BRAKE AS I PULLED INTO A PARKING SPOT. I WAS ALREADY MAKING MY TURN INTO THE PARKING SPOT WITH FOOT ON BRAKE AND ENGINE IDLING WHEN MY CAR BEGAN TO RAPIDLY ACCELERATE. I RESPONDED BY APPLYING FOOT BRAKE AND GRABBING AND PULLING THE EMERGENCY BRAKE BUT ONLY HAD ABOUT 15 - 20 FEET BEFORE HITTING A CONCRETE WALL AT THE BAKE OF THE PARKING SPOT. I MANAGED TO NOT HIT HARD ENOUGH FOR THE AIR BAGS TO DEPLOY BUT THERE IS DAMAGE TO MY FRONT BUMPER AND HOOD. THIS IS THE ONLY TIME MY CAR HAS DONE THIS. I BOUGHT IT NEW LAST AUG. 09 AND IT HAS APPROX 12,432 MILES. TOYOTA TOOK IT TO QUALITY IMPORTS TOYOTA AND "INVESTIGATED" IT AND HAS FOUND NO DEFECT. I TALKED TO THE INSPECTOR OVER THE PHONE AND HE EXPLAINED THAT HE SPENT A FEW HOURS GOING THROUGH A SERIES OF TESTS ATTEMPTING TO FIND OR REPRODUCE A MALFUNCTION WITH NO SUCCESS. HE TOLD ME THAT WHILE MY REPORT IS QUITE COMMON HE HAS NEVER FOUND A DEFECT TO EXPLAIN SUDDEN UNEXPECTED ACCELERATION AND THAT HE THINKS MY CAR IS SAFE AND HE WOULD LET HIS DAUGHTER DRIVE MY CAR. I ATTEST TO THE FACT THAT A STICKING ACCELERATOR AND/OR A SLOWLY RETURNING ACCELERATOR CANNOT EXPLAIN THIS EXPERIENCE AND IS NO "FIX" FOR MY ACCIDENT. MY EDUCATION IS IN MECHANICAL ENGINEERING AND I HAVE BEEN AN EQUIPMENT MECHANIC ON MACHINERY FOR 15 YEARS. I DO NOT BELIEVE THAT JUST BECAUSE YOU CANNOT REPRODUCE AN ELECTRONIC PROBLEM IN A MATTER OF HOURS THAT THE CONCLUSION SHOULD BE THAT THERE IS NO DEFECT. IT DOES NOT EXCUSE THE FACT THAT THERE IS A MAJOR PROBLEM AND NOTHING SERIOUS IS BEING "INVESTIGATED."

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** SAN DIEGO, CA

**NHTSA Summary:**  
I WAS DRIVING A LEXUS RX 300 AND HAD EXITED THE FREEWAY. I PRESSED THE BRAKE LIGHTLY TO DECREASE MY SPEED BUT INSTEAD, THE CAR UNEXPECTEDLY ACCELERATED. I THEN STEPPED ON THE BRAKE FULLY BUT THE CAR CONTINUED TO ACCELERATE BY ITSELF. I TRIED TO SLOW THE CAR BY SHIFTING THE GEARS...TRIED NEUTRAL, L1, L2, AND EVEN REVERSE BUT FAILED TO SLOW DOWN. I WAS GOING AT HIGH SPEEDS, UNABLE TO STOP, AND VERY SCARED AS I WAS ON A STREET WITH MANY LIGHTS. AFTER PASSING THROUGH A RED LIGHT, I TURNED THE CAR INTO THE CURB AND DRAGGED THE WHEELS AGAINST THE CURB UNTIL THE CAR CAME TO A STOP. I WAS VERY FORTUNATE NOT TO HIT ANOTHER CAR OR PEOPLE THROUGH TWO INTERSECTIONS. THIS OCCURRENCE HAPPENED AT 3:55PM, MAY 12, 2010. THE VEHICLE WAS TOWED TO THE NEAREST LEXUS DEALERSHIP FOR INSPECTION AND AT THIS TIME, IT IS STILL UNDER EVALUATION. THIS IS THE FIRST TIME THIS CAR HAS DEMONSTRATED ANY UNINTENDED ACCELERATION OR FAILURE OF BRAKES TO STOP ACCELERATION.

THE DRIVER SUFFERED A BLOODY NOSE, BUT THE FRONT SEAT PASSENGER, AMANDA EMERY, 21, SUFFERED TWO BROKEN LEGS. A BABY, SEATED IN A CAR SEAT WAS NOT INJURED.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10330985  
**Date of Incident:** 20100514  
**Vehicle:** 2006 LEXUS ES330  
**Location of Incident:** ARMONK, NY

**NHTSA Summary:**  
I WAS BACKING OUT OF MY GARAGE IN MY 2006 LEXUS ES 330. THE CAR WAS IDLING AT ABOUT 1400 RPM, WITH MY FOOT ON THE BRAKE I PUT THE CAR IN REVERSE, RELEASED THE HAND BRAKE AND STARTED TO SLOWLY BACK UP. SUDDENLY THE CAR SHOT OUT OF MY GARAGE, DOWN MY DRIVEWAY, ACROSS THE STREET, JUMPED THE FAR SIDE CURB TURNING RIGHT AND STRUCK A LIGHT POLE WHICH WAS BROKEN OFF. THE CAR WAS TRAVELING ON ITS OWN AT A HIGH RATE OF SPEED. AT THIS TIME, IN A STATE OF CONFUSION AND EXTREME AGITATION I ATTEMPTED TO SHIFT THE CAR INTO NEUTRAL BUT INSTEAD I ACCIDENTLY SHIFTED INTO DRIVE. I WENT FORWARD CONTINUING IN A HIGH RATE OF SPEED BACK ACROSS THE STREET AND INTO MY DRIVEWAY WHEN I FINALLY MANAGED TO GET THE CAR IN NEUTRAL. I WOULD LIKE TO EMPHASIZE THAT AT NO TIME DID I EVER TOUCH THE ACCELERATOR PEDAL! THIS APPEARS TO ELIMINATE STICKING ACCELERATOR PEDALS AS A CAUSE OF THIS PROBLEM. I WOULD LIKE TO INFORM YOU THAT THIS SAME PROBLEM OCCURED TO ME LAST OCTOBER ALSO BACKING OUT OF A DRIVEWAY, ALTHOUGH AT THAT TIME I HAD NOT HEARD OF THIS TOYOTA PROBLEM AND DID NOT REALIZE EXACTLY WHAT WAS HAPPENING. MY LEXUS DEALER INFORMED ME THAT THEY WERE UNAWARE OF THIS PROBLEM HAPPENING TO THIS LEXUS MODEL PRIOR TO THIS.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10331852  
**Date of Incident:** 20100514  
**Vehicle:** 2006 LEXUS ES330  
**Location of Incident:** PLANO, TX

**NHTSA Summary:**  
I WOULD LIKE TO REPORT AN INCIDENT HAPPENED ON MAY 14, 2010. AT AROUND 2:30PM, I WAS DRIVING MY 2006 LEXUS ES 330 TO A SHOPPING CENTER. THE CENTER IS LOCATED ON THE SOUTH WEST CORNER OF 75 AND LEGACY DRIVE, IN PLANO, TEXAS. WHEN I ARRIVED TO THE CENTER, I FOUND THE NEAR-BY PARKING SPACES WERE ALL PACKED. SO I DECIDED TO PARK MY CAR AT FAR WEST CORNER OF THE PARKING LOT. I FOUND A SPOT THAT WAS NOT VERY OCCUPIED. WHEN I SLOWLY APPROACHED TO A PARKING SPACE, I PUT MY FOOT ON THE BRAKE AND PREPARED FOR THE FULL STOP. BUT INSTEAD OF EXPERIENCING A FULL STOP, I WAS PULLED FORWARD AT FULL SPEED AS IF THE VEHICLE WAS ON FULL ACCELERATION. THE CAR WENT UP THE CURB FOR A PLANT-BED/MEDIUM AND CLEARED A COUPLE OF BIG PLANTS. I TURNED THE WHEEL AS I STRUGGLED TO MAINTAIN CONTROL OF THE VEHICLE. FINALLY IT STOPPED AFTER WENT THROUGH THE PLANT-BED/MEDIUM. AFTER IT MADE A FULL STOP, FIRST THING I DID WAS CHECKING TO SEE IF MY FOOT WAS ON THE BRAKE, AND IT WAS. AFTER I CALMED MYSELF DOWN, I MENTALLY REVISITED THE INCIDENT. ONE FEELING STANDING OUT WAS THAT THE ACCELERATION OF THE VEHICLE I EXPERIENCED WAS COMPLETELY DIFFERENT FROM MY STEPPING ON THE GAS PEDAL. IN NORMAL DRIVING, THE ACCELERATING IS GRADUAL AS THERE IS A LAG BETWEEN STEPPING ON THE GAS PEDAL AND THE GAINING OF THE SPEED. IN THIS CASE, THE VEHICLE SIMPLY GARNERED SPEED

C-2292

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AND RUNNING THROUGH THE BUMP AND PLANT-BED/MEDIUM. I CALLED PARK PLACE LEXUS WHERE I DO ALL THE MAINTENANCE SERVICES. THEY ASKED ME TO BRING THE CAR IN. AN ASSISTANT SERVICE MANAGER AT THE LEXUS RECORDED THE INCIDENT AND TOLD ME THAT THE ENGINEERS WOULD LOOK INTO THAT ON FOLLOWING MONDAY. ON MONDAY, I WAS ADVISED TO CALL 1-800-255-3987. I DESCRIBED THE INCIDENT TO A TOYOTA SUPPORT REPRESENTATIVE AND EXPRESSED MY WORRY AND CONCERN OF THE SAFETY OF DRIVING MY LEXUS. HE TOLD ME THEY WILL ESTABLISH A CASE FOR THE INCIDENT AND IT WILL TAKE ABOUT FOUR TO SIX WEEKS TO FINISH THE INVESTIGATION.

**Additional Summary:**

**NHTSA Summary:**  
 PURCHASED TOYOTA RAV 4 2008 [XXX] ON 12/07. 4 INCIDENTS OF THROTTLE OPENING. FIRST 2 OCCURRED WITHIN A FEW WEEKS OF EACH OTHER WHEN CAR WAS NEW. ENGINE STARTED TO RACE AT HIGH RPM WHEN PLACING CAR IN PARK AFTER HAVING BEEN DRIVEN ON AN OUTING FOR A PERIOD OF TIME. NOT REPORTED TO TOYOTA. EARLY MAY 2010, IN CONGESTED CONSTRUCTION TRAFFIC INCHING ALONG, THROTTLE OPENED AGAIN. STAYED HARD ON BRAKE BUT CAR KEPT INCHING FORWARD AND TAPPED A CAR IN FRONT BEFORE I PUT CAR IN NEUTRAL. REPORTED INCIDENT TO NATIONAL TOYOTA AND BROUGHT CAR TO LOCAL DEALERSHIP. THEY COULD FIND NO PROBLEM. MAY 14 WITH WIFE IN CAR, FOOT ON BRAKE ATTEMPTING TO PARK, THROTTLE OPENED UP COMPLETELY-RED LINE RPM. IMMEDIATELY PLACED CAR IN NEUTRAL AS ENGINE CONTINUED TO RACE FOR 20-30 SECS. DEALER COULD FIND NO PROBLEM AS WELL AS NATIONAL COMPANY TECHNICIAN A WEEK LATER. WE OFFERED TO LET TECHNICIAN KEEP AND DRIVE OUR CAR FOR A MONTH OR TWO IN THE HOPE THAT THE PROBLEM WOULD MANIFEST ITSELF BUT TOYOTA DECLINED. CAR IS ESSENTIALLY NEW, NO SCRATCHES, DENTS ETC. 7200 MILES. WE TOLD TOYOTA THAT WE ARE A FAMILY FAR REMOVED FROM LITIGIOUS BEHAVIOR AND AGITATING TROUBLE. AS MY FAMILY IS NOW NOT COMFORTABLE WITH DRIVING THE CAR WE ARE BEING FORCED TO TRADE THIS CAR IN AT A DEALERSHIP (WE COULD NOT IN GOOD CONSCIENCE SELL IT PRIVATELY) FOR A PRICE THAT IS NOWHERE NEAR ITS VALUE. WE HAVE EXPLAINED THIS TO TOYOTA. ALL WE WANT IS FOR THIS PROBLEM TO BE RECOGNIZED AND FIXED ON OUR CAR. INFORMATION REDACTED PURSUANT TO THE FREEDOM OF INFORMATION ACT (FOIA), 5 U.S.C. 552(B)(6). \*TR

**NHTSA Summary:**  
 ON MAY 15, 2010, A SUNNY DAY, DRY STREETS AND WARM TEMPERATURE, I HAD COME TO A COMPLETE STOP ABOUT 3 1/2 FEET BEHIND ONE CAR WAITING AT A RED LIGHT AT A VERY BUSY INTERSECTION. WITH MY FOOT SOLIDLY ON THE BRAKE MY TOYOTA CAMRY ENGINE BEGAN TO REV, AND IN JUST SECONDS, THERE WAS A "SUDDEN UNINTENDED ACCELERATION" AND MY 2005 CAMRY CRASHED INTO THE CAR AHEAD OF ME WHICH HAD A WRAP AROUND RUBBER STRIP IN THE REAR BUMPER. THE CRASH BOUNCED MY CAR BACK OVER A FOOT AND A HALF. I WENT FROM A TOTAL STOP TO A "RUN AWAY" 2005 TOYOTA CAMRY. HAD I BEEN THE FIRST CAR AT THE STOP LIGHT AND MY TOYOTA HAD ACCELERATED INTO THAT BUSY INTERSECTION, THERE WOULD HAVE BEEN A FATALITY. TWO YOUNG MEN WITNESSED THIS ACCIDENT AND CAME RUNNING TO HELP. THERE IS A POLICE REPORT. AND NO CITATIONS WERE ISSUED. I PHONED THE DEALERSHIP AND THE CAR WAS TOWED TO THEM. I WAS WEARING MY SEAT BELT BUT MY NECK WAS SNAPPED. ON JUNE 7, 2010 TOYOTA PHONED TO SAY THIS VEHICLE HAD BEEN INSPECTED AND "THERE IS NOTHING WRONG WITH IT" AND THAT TOYOTA IS NEITHER LIABLE OR RESPONSIBLE. NO REPAIRS WERE MADE AND THE CAR WAS RETURNED TO ME ON JUNE 9, 2010. IRONICALLY ABOUT 3 WEEKS PRIOR TO MY "SUDDEN UNINTENDED ACCELERATION" ANOTHER RESIDENT OF OUR INDEPENDENT LIVING RETIREMENT COMMUNITY WITH AN IDENTICAL MODEL TOYOTA HAD THE SAME THING HAPPEN. HER CAR CRASHED INTO THE CEMENT WALL OF THE UNDERGROUND PARKING GARAGE AND THERE WAS EXTENSIVE DAMAGE AND SHE WAS ALSO TOLD THAT THERE WAS NOTHING WRONG WITH HER TOYOTA. I WILL NEVER BE BEHIND THE WHEEL OF THAT CAR AGAIN WHEN IT IS STARTED. IT IS DANGEROUS, AND THE TRAUMA IT HAS CAUSED WILL NOT BE GIVEN A CHANCE TO BE REPEATED. MY CAR IS SHOWROOM QUALITY WITH ONLY 18,000+ MILES. TOYOTA HAS OFFERED NOTHING TO HELP REPLACE THIS VEHICLE. I UNDERSTAND THAT BEGINNING IN 2011 TOYOTA VEHICLES WILL HAVE

C-2295

**NHTSA Summary:**  
 WHIPLASH AND CERVICAL DISC HERNIATION DUE TO NEGLIGENCE OF TOYOTA RAV 4 2002 TRANSMISSION AND ECM PROBLEMS. AROUND 4/20/10 I TOOK MY TOYOTA TO THIS DEALERSHIP DUE TO ONGOING JERKING AND FORWARD THRUST WHEN STARTING FROM A STOP POSITION, ALSO THE ENGINE LIGHT WAS ON. THEY KEPT MY TOYOTA FROM 4/19/10 TILL 4/21/10. RESET THE ENGINE STATING THAT IT IS O2 SENSOR PROBLEM AND REPLACED IT. ALSO DIAGNOSED TRANSMISSION PROBLEMS BUT I WAS TOLD BY THE DEALERSHIP PERSONAL "I DONT WANT TO STAMP YOUR CAR AS CONDEMNED, TAKE IT BACK AND WHEN PROBLEM GETS WORSE BRING IT BACK" HE DID NOT WARN ME THAT IF I DID NOT GET IT CORRECTED RIGHT AWAY, I CAN BE JEOPARDIZING MY SAFETY AND SAFETY OF PEOPLE ON THE ROAD. IT IS APPARENT FROM THE PAPERWORK THEY HANDED ME THAT THEY HAD DIAGNOSED A SERIOUS PROBLEM AND SHOULD HAVE CORRECTED IT RIGHT AWAY. AROUND MIDDLE OF MAY THE PROBLEMS WITH THE TRANSMISSION GOT WORSE, ON 2 OCCASIONS THE CAR STALLED COMPLETELY WHILE GOING AT 30 MPH AND THEN SEVERELY THRUST FORWARD AGAIN. IN ANOTHER 3-4 DAYS I STARTED EXPERIENCING SEVERE MUSCLE SPASMS AND HEADACHES. SINCE THEN I HAD BEEN TO ER, RECEIVED CT AND MRI SHOWING DISC PROLAPSE AND TEAR OF MY 2 VERTEBRAL DISCS. I HAVE BEEN RECEIVING PHYSICAL THERAPY, CERVICAL TRACTION, PAIN MEDICATION, CERVICAL COLLAR, AND AM SCHEDULED TO RECEIVE AN EPIDURAL INJECTION IN 2 WEEKS. I HAVE SEEN MY PCP TWICE, A NEUROLOGIST, 2 NEURO SURGEONS AND HAVE RECEIVED NUMEROUS MEDICATION, SOME WITH SERIOUS SIDE EFFECTS AND HAVE DETAILED INFORMATION ABOUT THESE VISITS. I AM A PHYSICIAN AND DUE TO THIS PROBLEM HAVE MISSED DAYS AT WORK JEOPARDIZING MY CLINICAL CARE. YESTERDAY ALMOST GOT IN AN ACCIDENT WHEN MY CAR SLOWED DOWN INSTEAD OF ACCELERATING AND I ALMOST HIT ANOTHER CAR, THIS INCIDENT MADE ME REALIZE I CAN HURT OTHER PEOPLE IF I CONTINUE TO DRIVE THIS CAR. I TOOK IT IN TO DEALER TODAY AND THEY ARE GOING TO RUN A DIAGNOSIS ON IT AGAIN, AND IT MIGHT COST ME 6,000 DOLLARS. PLEASE HELP.

**NHTSA ODI Number:** 10332064  
**Date of Incident:** 20100516  
**Vehicle:** 2008 TOYOTA AVALON  
**Location of Incident:** LAKE JACKSON, TX

**NHTSA Summary:**  
I HAVE A 2007 TOYOTA AVALON. THIS IS IN REFERENCE TO A PREVIOUS COMPLAINT "10308589". IT HAPPENED AGAIN. ON SUNDAY, MAY 16TH, 2010 I "FLOORED" THE ACCELERATOR AFTER TURNING INTO TRAFFIC BECAUSE THE CAR ON THE ROAD WAS GOING MUCH FASTER THAN I EXPECTED. THE ACCELERATOR GOT STUCK SO I PUT IT IN NEUTRAL, HEARD AND SAW HIGH RPM ON THE TACK AND TURNED THE MOTOR OFF WITH THE KEY. I WRESTLED THE CAR INTO THE NEXT TURN-OFF (NO POWER STEERING). I LOOKED DOWN AND MY GAS PEDAL WAS STUCK ALL THE WAY DOWN BY THE FLOORMAT. THIS IS A FLOORMAT THAT I PUT IN FROM WALMART. IT IS MADE OF HEAVY RUBBER TO PROTECT MY NICE FLOORMATS. IT IS NOT LATCHED INTO THE FLOOR LIKE MY NICE FLOORMAT UNDERNEATH. THIS WAS MY FAULT, NOT TOYOTA. THAT FLOORMAT IS NOW IN THE TRUNK OF MY CAR. THIS IS THE THIRD TIME UNCONTROLLED ACCELERATION HAS HAPPENED IN THIS CAR. IT WAS IN FOR RECALL REPAIR AFTER THE SECOND INCIDENT. DRIVER BEWARE! THIS TOOL IS REQUIRING ME TO SELECT A MODEL NUMBER ON EQUIPMENT WHICH DOES NOT MAKE SENSE SO I JUST SELECTED ONE AT RANDOM - THAT IS A FLAW IN THE REPORTING PROCESS.

**NHTSA Summary:**  
**Additional Summary:**  
CHARLES ANTON WAS DRIVING HIS GIRLFRIEND LINDA CHORY'S CAR - A 2007 TOYOTA CAMRY - WHEN HE EXPERIENCED SUDDEN UNINTENDED ACCELERATION. "I ACCELERATED NORMALLY, THEN THE CAR WENT BESERK," SAID ANTON. "I KEPT TRYING TO STOP AND STEPPING ON THE BRAKES. I HIT THEM AGAIN AND AGAIN. BUT I COULDN'T STOP HITTING THE GUY IN FRONT OF ME. MY CAR WAS LITERALLY TRYING TO CLIMB OVER HIS CAR. FINALLY, AS HARD AS I COULD, I SLAMMED THE CAR INTO PARK. IF IT WASN'T FOR THE GUY IN FRONT OF ME, I'D STILL BE GOING DOWN RIVERFRONT DRIVE."

THE CRASH DIDN'T RESULT IN ANY INJURIES. ANTON REFUSED TO DRIVE THE CAR AND IT WAS TOWED TO HEINTZ TOYOTA WHERE IT HAD BEEN TAKEN FOR RECALL REPAIRS SEVERAL MONTHS AGO. THE CAR WILL BE CHECKED BY A TEAM OF INVESTIGATORS AND EVALUATED. THE RESULTS WILL BE PROVIDED TO ANTON AND CHORY.

JUNE 14, 2010 NEWS ARTICLE STATES THAT TOYOTA INSPECTORS RECOVERED COMPUTER DATA FROM THE VEHICLE SHOWED THAT ANTON HAD REPEATEDLY HIT THE ACCELERATOR NOT THE BRAKE. ANTON SAID HE HAD REPEATEDLY HIT THE BRAKE AND INITIAL TESTS COMPLETED BY THE DEALERSHIP SHOWED A BRAKE OVERRIDE SYSTEM.

**Vehicle:** 2009 TOYOTA VENZA  
**Location of Incident:** UNION, NJ

**NHTSA Summary:**  
I WAS GENTLY ACCELERATING ONTO NJ RT. 22 EAST AT 7:40 AM ON MAY 19, 2010. VERY SUDDENLY, THE VEHICLE ACCELERATED AT FULL THROTTLE, EVEN AFTER I REMOVED MY FOOT FROM THE ACCELERATOR PEDAL. I APPLIED FULL PRESSURE ON THE BRAKE, BUT IT KEPT ACCELERATING. I THEN APPLIED THE EMERGENCY BRAKE, AND WHILE WEAVING IN AND OUT OF TRAFFIC AT VERY HIGH RATE OF SPEED, ATTEMPTED TO GET THE VEHICLE OUT OF DRIVE. I DROVE ON TO THE SHOULDER TO AVOID TRAFFIC AFTER SOME COMBINATION OF BRAKING, APPLYING THE EMERGENCY BRAKE, AND PUTTING THE VEHICLE IN NEUTRAL OR REVERSE. IT CAME TO A STOP. I AM NOT SURE WHEN I WAS ABLE TO PUT IT IN PARK, BUT I PRESSED THE IGNITION BUTTON AND THE ENGINE STOPPED. I PUT ON MY HAZARD LIGHTS, TOOK A DEEP BREATH, AND REALIZED THAT THE REAR DRIVER'S SIDE CORNER WAS PROTRUDING THE RIGHT LANE. SO AS NOT TO BE A FURTHER HAZARD TO TRAFFIC, I STARTED THE VEHICLE TO MOVE IT. A WARNING LIGHT APPEARED ON THE DASHBOARD TELLING ME TO "CHECK THE BRAKES WITH THE DEALER." OR SOMETHING TO THAT EFFECT. THE SMELL FROM THE OVER HEATED BRAKES WAS VERY STRONG--STRONG ENOUGH TO PROMPT ME TO OPEN THE WINDOWS. ODDLY ENOUGH, THE CAR RAN FINE AFTER RESTARTING. IT WAS AS IF I REBOOTED THE COMPUTER. I WAS VERY CLOSE TO THE DEALER FROM WHICH I PURCHASED THE VEHICLE, SO WITH THE HAZARD LIGHT BLINKING, I DROVE SLOWLY TO THE DEALER SERVICE CENTER. THEY SAID THEY INSPECTED THE VEHICLE AND FOUND NOTHING WRONG. THEY ALSO BROUGHT IN A TOYOTA ENGINEER WHO SAID THEY FOUND NOTHING WRONG. THE VEHICLE WAS ONLY 2 WEEKS OLD WHEN THE SUDDEN ACCELERATION OCCURED. I DO NOT FEEL SAVE DRIVING THIS VEHICLE. I DO NOT WANT IT BACK. THEY STILL HAVE POSSESSION OF IT. ON A SIDE NOTE, I WOULD FEEL BETTER IF THEY WERE NOT ABLE TO SELL IT TO ANYONE ELSE. PLEASE CONTACT ME (JASON TREULICH) AT 626.399.9090 WITH QUESTIONS. PLEASE HELP US.

**Date of Incident:** 20100519  
**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** PARMA, OH

**NHTSA Summary:**  
WE HAD A TOYOTA RAV4, BOUGHT NEW IN 2007. WE HAD ABOUT 5200 MILES ON IT, WHEN, ON MAY 19, 2010, WHILE PARKING THE CAR IN THE GARAGE, I PUT THE GEAR IN REVERSE, WITH MY FOOT ON THE BRAKE. THE ENGINE SUDDENLY SURGED, THE RPM'S WENT ABOVE 5000, AND IN SPITE OF MY PRESSING HARD ON THE BRAKE, THE CAR SHOT OVER 1/4 MILE OUT THE GARAGE. I PUT THE CAR IN PARK, AND THE ENGINE CONTINUED AT THIS HIGH SPEED. I USED THE KEY TO SHUT IT DOWN. ALL THE LIGHTS ON THE DASH SHONE WITH AN UNUSUAL BRIGHTNESS DURING THIS EVENT. I CALLED THE DEALER, METRO TOYOTA, AND THEY TOLD ME TO BRING THE CAR IN, WHICH I DID. LATE IN THE DAY, THE NEXT DAY, THEY CALLED ME, TOLD ME THERE WAS NOTHING WRONG WITH THE CAR, AND THAT THE REASON OF THE ACCELERATION WAS THE "RUG". THE RAG WAS REMOVED, AND I PICKED UP THE CAR. OBVIOUSLY, I DROVE IT HOME WITH GREAT CARE. THE NEXT DAY, IN TRAFFIC, I WAS APPROACHING A RED LIGHT, WITH A CAR STOPPED IN FRONT OF ME, DOWN A LITTLE SLOPE ON THE ROAD. I KEPT A SAFE DISTANCE OF 3-4 CAR LENGTHS BEHIND THE CAR IN FRONT OF ME, FOOT LIGHTLY ON THE BRAKE, WHEN THE CAR AGAIN SURGED, BUT I MANAGED TO CONTROL IT BARELY AVOIDING REAR ENDING THE CAR IN FRONT OF ME. VERY EARLY NEXT MORNING, I TOOK THE CAR BACK TO THE DEALER, WHERE IT WAS KEPT FOR OVER 2 WEEKS, NO ATTEMPT TO REPAIR WAS DONE, WITH THE WORD THAT THE CAR CHECKED OK.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**  
WE WERE LEAVING A GAS STATION AND PROCEEDED TO GO AROUND THE BACK OF THE GAS STATION BUT DECIDED THERE WAS INSUFFICIENT AMOUNT OF AREA TO GO THROUGH BETWEEN THE GAS STATION AND AN IGA STORE. THE WIFE PUT THE CAMRY IN REVERSE AND THE ENGINE ACCELERATED AND BACKED INTO A TELEPHONE POLE. IT THREW US FORWARD AND AGAIN BACKED INTO THE POLE. MY WIFE AUTOMATICALLY PUT THE CAR IN DRIVE AND THE CAR SHOT THROUGH BETWEEN THE STORE AND THE GAS STATION. IT BROKE BOTH SIDE MIRRORS AND SCRATCHED DOWN THE SIDES OF THE CAR. WE PROCEEDED INTO THREE LANES OF TRAFFIC, HITTING A HONDA VAN IN THE PASSENGER DOOR. THE CAR KEPT GOING ACROSS TWO MORE LANES OF TRAFFIC AND INTO THE GAS STATION ACROSS THE STREET BEFORE I FINALLY REACTED AND TOLD THE WIFE TO APPLY THE EMERGENCY BRAKE. THE CAR STOPPED ABOUT TWO FEET FROM HITTING ANOTHER VEHICLE. AND THE OTHER GAS STATION. BOTH VEHICLES WERE TOTALED IN THE ACCIDENT. THE CAR WOULD NOT STOP EVEN WITH MY WIFE RIDING THE BRAKE UNTIL WE HIT THE VAN. WITNESSES SAID THEY HEARD THE BRAKES SQUEALING AS WE WERE COMING OUT OF THE GAS STATION AREA. \*TR

**Date of Incident:** 20100522  
**Vehicle:** 2009 TOYOTA MATRIX  
**Location of Incident:** DOVER, DE

**NHTSA Summary:**  
MY HUSBAND AND I WERE ON INTERSTATE 495 OF THE WASHINGTON BELTWAY SITTING IN A 3 MILE BACKUP WHERE 5 LANES WERE MERGING INTO ONE. MY FOOT WAS FIRMLY ON THE BRAKE LEAVING PLENTY OF ROOM FROM THE CAR IN FRONT OF ME. ALL OF A SUDDEN I REALIZED THAT THE CAR WAS INCHING FORWARD AND THE BRAKE WOULD NOT STOP THE ACCELERATION. MY HUSBAND REALIZED WHAT WAS HAPPENING AND LOOKED DOWN AND KNEW THAT MY FOOT WAS FIRMLY ON THE BRAKE. ALL OF A SUDDEN, IT JUST STOPPED AS FAST AS IT STARTED. WE CAME WITHIN INCHES OF HITTING THE CAR IN FRONT OF US. AS I SAT IN THAT MESS OF A TRAFFIC JAM AND SAW THE AMOUNT OF CELL PHONES BEING USED, IT HIT ME. DID ALL THESE PHONES START THAT CAR TO MOVE? THIS MATRIX 2009 ONLY HAS 22,700 MILES ON IT BUT I WILL BE TAKING IT TO THE TOYOTA DEALERSHIP AND TOYOTA WILL BE RECEIVING A LETTER FROM ME WITH THE DETAILS. THE RECALL WORK ON THE ACCELERATOR WAS DONE 2 MONTHS AGO. I HAVE ALSO MADE A COMPLAINT TO THE DEALERSHIP THAT THE CAR SEEMS TO DO SOMETHING BETWEEN 20 AND 40 MILES PER HOUR WHEN YOU ARE DECELERATING. I CAN'T TELL EXACTLY WHAT IT IS DOING BECAUSE IT SEEMS TO JERK. THE DEALERSHIP PUT IT ON THE COMPUTER AND SAID NOTHING WAS WRONG. IT MAY BE UNRELATED TO THE OTHER PROBLEM BUT IT IS ONE MORE THING THAT I HAVE NOTICED ABOUT THIS CAR. AS A NOTE, MY HUSBAND AND I HAVE HAD TOYOTAS FOREVER AND CURRENTLY HAVE A 2004 COROLLA AND TRADED IN THE 2006 COROLLA FOR THIS MATRIX. WE HAVE NEVER HAD ANY TROUBLE WHATSOEVER WITH OUR TOYOTAS UNTIL NOW.

**NHTSA Summary:**  
THIS IS AN UPDATE TO COMPLAINT # 10314227 I HAVE HAD TWO MORE SUAS. ONE WAS IN MAY WHEN I WAS PARKED AT A FAST FOOD RESTAURANT ON A SLIGHT UPWARD SLANT. THE CAR WAS SLIGHTLY WARM. IT WAS A DRY, COOL DAY. WHEN I SHIFTED INTO REVERSE AND BEGAN TO ROLL BACKWARD, I PUT MY FOOT ON THE BRAKE TO PAUSE TO LOOK FOR TRAFFIC. THEN THE MOTOR BEGAN TO RACE AS IF SOMEONE HAD FLOODED THE ACCELERATOR AND WAS HOLDING IT THERE. AS MY FOOT REMAINED ON THE BRAKE, WHICH FORTUNATELY HELD. I LOOKED AROUND TO SEE IF ANYONE WAS WITNESSING THE EVENT SO I WOULD HAVE SOMEONE TO BACK ME UP, BUT NO ONE WAS NEAR. IT STOPPED RACING AFTER A FEW SECONDS, THEN ABRUPTLY STARTING RACING AGAIN FOR A FEW SECONDS. ALL THIS TIME I WAS IN REVERSE AND HAD MY FOOT ON THE BRAKE. THEN IT SUDDENLY STOPPED. I PUT IT INTO PARK FOR A WHILE TO SEE WHAT IT WAS GOING TO DO, BUT WHEN NOTHING HAPPENED I WENT INTO REVERSE AGAIN AND THE ENGINE DID NOT RACE. THE SECOND OCCURRENCE WAS IN THE FIRST PART OF JUNE WHEN I HAD JUST GONE ABOUT 1/8 OF A MILE AND THE CAR WAS STILL COLD. IT WAS A WARM, DRY DAY. I WAS SITTING AT A LIGHT WAITING TO GET ON THE BELTLINE WHEN I HEARD WHAT SOUNDED LIKE A MOTORCYCLE NEARBY RACING ITS ENGINE. MY RADIO WAS ON PLAYING MUSIC. I HEARD IT FOR A FEW SECONDS AND THEN IT STOPPED. I LOOKED AROUND FOR THE MOTORCYCLE. THEN IT STARTED AGAIN. BY THIS TIME I REALIZED THAT IT WAS MY ENGINE THAT WAS RACING. BY THE TIME I CUT THE RADIO OFF, IT HAD AGAIN STOPPED. SO THIS WAS THE SECOND TIME THE SUJA HAPPENED WHEN THE ENGINE WAS RELATIVELY COLD AND WITH TWO SHORT EPISODES OF THE RACING ENGINE. I DID NOT THINK TO LOOK AT THE TACHOMETER. IT WAS TOO QUICK. AGAIN, MY FOOT NEVER LEFT THE BRAKE. WHEN THE LIGHT CHANGED I DROVE ON THROUGH THE TRAFFIC WITHOUT FURTHER INCIDENT. PLEASE REFERENCE THIS COMPLAINT NUMBER TO MY OTHER COMPLAINT. THANK YOU. \*TR

**Vehicle:** 2008 TOYOTA TUNDRA  
**Location of Incident:** MABSCOTT, WV

**NHTSA Summary:**  
APPROXIMATELY TWO WEEKS AGO I WAS PULLING OUT OF THE BALL PARK HERE IN BECKLEY WEST VIRGINIA WHEN I BEGAN TO ACCELERATE MY 2008 TOYOTA TUNDRA. THE VEHICLE BEGAN ACCELERATING HIGHER AND HIGHER ON ITS OWN SENDING ME AND MY DAUGHTER ON A 70 MPH RIDE. THE ONLY WAY I COULD STOP WAS TO PUT BOTH FEET ON THE BRAKE AND PUT VEHICLE INTO NEUTRAL, EVENTUALLY THE PEDAL BECAME UNSTUCK AND I DROVE THE VEHICLE TO MY PLACE OF WORK LESS THAN A MILE AWAY AND PARKED IT. I CALLED TOYOTA AND THEY TOWED THE VEHICLE IN. THIS INCIDENT OCCURRED AFTER THE SAFETY RECALL. TOYOTA AT THIS TIME CUT THE GAS PEDAL IN TWO AND ADDED CHEAPER FLOOR MATS. THEY SAID THIS WAS THE PROBLEM.

C-2304

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TODAY I WAS TAKING MY CHILDREN TO SCHOOL AND WAS GOING UP A HILL. I DEPRESSED THE GAS PEDAL AND HAD NO ACCELERATION. I GENTLY ROLLED BACK DOWN THE HILL AND GOT THE VEHICLE ON THE LEVEL AND THEN TOOK ANOTHER ROUTE. I FEEL THIS VEHICLE IS NOT SAFE. ITS NOT THE FLOOR MATS OR THE SIZE OF THE PEDAL IT IS IN THE WIRING, COMPUTER, OR SOMETHING. BOTH INCIDENTS WERE FORTUNATE THAT NO VEHICLE WAS IN FRONT OF ME OR BEHIND ME. I CALLED TOYOTA TODAY ABOUT THIS SECOND INCIDENT AND ALL THEY COULD TELL ME WAS TO CALL THE 1 800 NUMBER. I EXPLAINED I DIDNT FEEL SAFE IN THIS VEHICLE, KNOWING THAT IM PUTTING MYSELF AND OTHERS ON THE HIGHWAY IN HARMS WAY. THIS IS MY MODE OF TRANSPORTATION SO UNFORTUNATELY I CANT JUST STOP DRIVING IT.

**Vehicle:** 2007 TOYOTA PRIUS  
**Location of Incident:** NOVATO, CA  
**NHTSA Summary:**

YESTERDAY I WAS DRIVING BACK FROM DROPPING OFF MY SON AT SCHOOL, GETTING ON THE FREEWAY. MY GAS PEDAL WAS ABOUT 1/2 WAY DEPRESSED. THE NEXT THING I KNOW THE GAS PEDAL IS LEAVING MY FOOT AS IF IN CRUISE CONTROL AND FLOORING ITSELF. THE CAR ENGINE IS RACING FULL SPEED, FORTUNATELY I HAD RUN THIS THROUGH MY HEAD BEFORE, AND I WAS COMPETENT ENOUGH TO APPLY THE BRAKES AS HARD AS I COULD, PUT THE CAR IN NEUTRAL AND SAFELY PULL OFF THE FREEWAY AND TURN OFF THE CAR. SO I WAS TOWED INTO TOYOTA, GIVEN A LOANER CAR AND TOLD THAT SOMEONE FROM THE FACTORY WOULD COME OUT TO RUN SOME TESTS. FIRST LET ME STATE, THAT AFTER THIS WAS OVER I DID LOOK DOWN TO SEE IF MY FLOOR MAT WAS A FACTOR IN THIS, BUT ALSO KNOWING THAT THE PEDAL HAD LEFT MY FOOT AND HEADED FOR THE FLOOR, THE FLOOR MAT WAS A GOOD 2 INCHES FROM THE PEDAL. SO THIS MORNING TOYOTA CALLS ME TO SAY THAT THEY HAVE DETERMINED THAT IT INDEED WAS MY FLOOR MAT, NO DOUBTS IN THEIR MINDS ABOUT THAT, SO THEY HAVE GIVEN ME A NEW FLOOR MAT AND TOLD ME MY CAR IS FINE. THERE IS NO DOUBT IN MY MIND THAT THIS IS AN ELECTRICAL PROBLEM, NOT A FLOOR MAT ISSUE.

**Date of Incident:** 20100527  
**Vehicle:** 1995 TOYOTA CAMRY  
**Location of Incident:** BURNSVILLE, MN

**NHTSA Summary:**

THE INCIDENT OCCURRED AT APPROXIMATELY 5:45 P.M. IN HEAVY TRAFFIC IN MINNEAPOLIS. IT WAS A WARM, SUNNY AFTERNOON. I WAS DRIVING ON A ROAD THAT HAD VERY HEAVY TRAFFIC AND WAS CONTROLLED BY STOP LIGHTS. THE SPEED LIMIT WAS 35 WITH MOST CARS GOING ABOUT 40-45. FOR A FEW MILES MY CAR HAD BEEN SLOWLY INCREASING IN RPM'S AND HAD BEEN ACCELERATING ON ITS OWN WITHOUT MY NEEDING TO USE THE ACCELERATOR PEDAL. I ACTUALLY NEEDED TO KEEP MY FOOT ON THE BRAKE AT ALL TIMES TO KEEP THE CAR IN CONTROL AND AROUND THE SPEED LIMIT. IT WAS CONTROLLABLE UNTIL, SUDDENLY, IT SHOT UP TO 5,000+ RPM'S AND THEN, EVEN WITH BOTH FEET ON THE BRAKE PEDAL ATTEMPTING TO STOP THE CAR, THE CAR WOULD NOT SLOW. I WAS APPROACHING A STOPLIGHT WITH STOPPED CARS AND AS MY CAR WOULD NOT SLOW, WITHIN 20-30 FEET OF THE STOPPED CAR, AND STILL AT A SPEED OF ABOUT 30 MILES PER HOUR, I PUT THE CAR INTO PARK AND IT VIOLENTLY JOLTED TO A STOP. THE CAR WAS IN THE MIDDLE OF ROAD IN TRAFFIC AND SAT THERE FOR 15-20 MINUTES. DURING THIS TIME, I ATTEMPTED TO START THE CAR ON 2-3 OCCASIONS AND EACH TIME AS SOON AS THE CAR WAS STARTED IT IMMEDIATELY WENT UP TO 5,000+ RPM'S. THE CAR WAS EVENTUALLY PUSHED INTO A PARKING LOT AND SAT FOR 2-3 HOURS. AFTER THIS TIME, IT STARTED NORMALLY AND RAN NORMALLY. IT WAS DRIVEN STRAIGHT TO A TOYOTA DEALERSHIP AND THE SCENARIO WAS DESCRIBED TO THE SERVICE DEPARTMENT. THEY DIAGNOSED IT AND EXAMINED THE CAR AND THERE WAS NOTHING FOUND WRONG WITH THE VEHICLE.

**NHTSA Summary:**

MY WIFE DRIVES A 2007 TOYOTA SOLARA AND WAS PULLING INTO A PARKING SPACE IN ANASTASIA PLAZA IN ST. AUGUSTINE, FL AND WAS ABOUT TO COME TO A STOP A PLACE THE CAR IN PARK WHEN IT ACCELERATED OVER THE TIRE STOP, OVER THE CURB AND THROUGH THE GLASS WINDOWS AND DOORS AND INTO THE SEA OATS RESTAURANT. SHE IS CONFIDENT THAT SHE NEVER TOUCHED THE ACCELERATOR AS HER FOOT WAS ALREADY ON THE BRAKE TO BRING THE CAR TO A STOP AND PLACE IN PARK. THERE WERE NO PRIOR SYMPTOMS OF THIS UNEXPECTED ACCELERATION. THE AIR BAGS DID NOT DEPLOY. THE CAR SMASHED INTO THE LUNCH COUNTER, WHICH WEIGHS APPROX. 2 TONS) AND PUSHED IT 6 FEET. THERE WERE RUBBER MARKS ON THE FLOOR ON THE LEFT SIDE AS THOUGH THE FRONT WHEEL WAS SLIPPING AS IT PUSHED THE COUNTER (PICTURE AVAILABLE). MY WIFE CONTENDS THAT HER FOOT WAS ON THE BRAKE THE WHOLE TIME. I CONTACTED TOYOTA AS WELL AS MY INSURANCE COMPANY. TOYOTA DID AN INSPECTION OF THE CAR ON 6/7/2010. I AM WAITING ON THE RESULTS AND EXPECT TO HEAR BY 6/9/2010.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10336357  
**Date of Incident:** 20100528  
**Vehicle:** 2008 TOYOTA MATRIX  
**Location of Incident:** REDMOND, WA

**NHTSA Summary:**

ON MAY 28TH, WHILE PULLING INTO MY DRIVEWAY AS I'VE DONE WITH MY 2008 MATRIX HUNDREDS OF TIMES, THE BRAKES FAILED AND MY CAR RAN INTO MY HOUSE. I COULD FEEL THE ABS FIRING, BUT THE CAR FAILED TO SLOW DOWN. I HAVE A SHORT DRIVEWAY, ABOUT A CAR AND A HALF IN LENGTH, AND IT IS DOWNHILL. THE APPROACH TO THE DRIVEWAY HAS ME TURNING AND BRAKING WHILE GOING OVER THE BUMP OF THE CURB. TO ADD TO THAT, IT WAS RAINING THE DAY THIS HAPPENED. FORTUNATELY, MY APPROACH WAS RATHER SLOW AND NO ONE WAS INJURED. MY CAR SUSTAINED SOME MINOR DAMAGE, AND MY GARAGE SUSTAINED MORE DAMAGE FROM THE FORCE OF THE IMPACT. UNDER THE ADVICE OF MY AUTO INSURANCE AGENCY, I HAD THE CAR TOWED TO THE TOYOTA DEALERSHIP FOR INSPECTION. THEY INFORMED ME THAT THEY RAN A COMPLETE DIAGNOSTIC, AND ALL OF THE SYSTEMS WERE RUNNING FINE. THEY REPORTED TO ME THAT THE BRAKE PADS WERE IN GOOD CONDITION, AND THERE WERE NO HOT SPOTS. FROM THEIR PERSPECTIVE, THE CAR SEEMED FINE. I ADVISED THEM THAT WHILE THE DIAGNOSTICS REPORTED THE CAR AS BEING FINE, THE INABILITY FOR THE CAR TO BRAKE COMING INTO MY DRIVEWAY, AND THE DAMAGE SUSTAINED, LEAVES ME NEEDING A BETTER ANSWER THAN THAT. THEY TOLD ME THAT WHEN IT NEXT RAINED THAT I COULD COME IN AND DRIVE THE CAR WITH ONE OF THEIR TECHNICIANS TO TRY AND RE-CREATE THE ISSUE. IT HAS BEEN SEVERAL WEEKS, AND WE HAVE NOT HAD THE PROPER WEATHER CONDITIONS WHEN THEY HAVE BEEN OPEN AND I HAVE BEEN ABLE TO GET OFF WORK AND GET OVER THERE WITH OUR ONE REMAINING CAR. WHEN I SPOKE TO THE DEALER REP ON MONDAY, HE RE-ITERATED HOW THEIR SOFTWARE DIAGNOSTIC SHOWED THE CAR WAS OPERATING FINE. I ASKED HIM HOW THEN THE 2010 PRIUS HAD A SOFTWARE UPDATE TO CORRECT A BRAKING ISSUE. HE SAID THAT THE PRIUS SITUATION WAS COMPLICATED, BROUGHT ON BY THE COMBINATION OF TURNING, GOING OVER A BUMP AND BRAKING AT THE SAME TIME. I TOLD HIM THAT WAS WHAT HAPPENED DURING MY ACCIDENT. THERE WAS SILENCE, AND A REPEAT STATEMENT THAT I COULD COME IN AND TEST THE VEHICLE WITH THEIR TECH.

AFTER BRAKING BACK TO THE DESIRED 70 MPH, HE CONTINUED TO DRIVE. THE CONSUMER STATED THE INCIDENT HAPPENED A SECOND TIME, AND THE VEHICLE ACCELERATED TO 80 MPH. \*JB

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10335385  
**Date of Incident:** 20100602  
**Vehicle:** 2010 TOYOTA RAV4  
**Location of Incident:** BLAINE, WA

**NHTSA Summary:**  
I HAVE A 2010 TOYOTA RAV 4, V6, AWD. SEVERAL TIMES I HAVE INADVERTENTLY ACCELERATED WHEN I ATTEMPTED TO APPLY THE BRAKES. EACH TIME I WAS ABLE TO DETERMINE THAT THE CAUSE OF THE UNINTENDED ACCELERATION WAS THAT MY FOOT WAS OVERLAPPING THE BRAKE PEDAL AND WAS ALSO DEPRESSING THE ACCELERATION PEDAL AT THE SAME TIME. THE ACCELERATION WAS OVERRIDING THE BRAKING UNTIL I RELEASED PRESSURE ON THE BRAKE PEDAL. THIS IS A VERY SERIOUS SAFETY ISSUE! LAST WEEK I ALMOST KILLED A MOTHER AND HER YOUNG CHILD DURING A PARKING SITUATION. I WAS TRAVELLING AT ABOUT 5MPH WHEN I INTENDED TO COME TO A SLOW STOP OUTSIDE A NOSE IN PARKING SPOT. THE YOUNG MOTHER WAS TIEING THE SHOESTRINGS OF HER YOUNGSTER NEAR THE OUTSIDE MIDDLE OF THE PARKING SPOT I INTENDED TO USE. MY CAR WAS TRAVELLING DIRECTLY TOWARD HER WHEN I SLOWLY DEPRESSED THE BRAKE PEDAL. THE CAR STARTED TO ACCELERATE! I IMMEDIATELY RECOGNIZED THE PROBLEM AND STOPPED THE CAR BY SHIFTING MY RIGHT FOOT TO THE LEFT WHICH ALLOWED ME TO APPLY PRESSURE TO THE BRAKE PEDAL WITHOUT SIMULTANEOUSLY DEPRESSING THE ACCELERATOR PEDAL! WE SPOPPED ABOUT 8 FEET FROM THE MOTHER AND CHILD. HAD I NOT EXPERIENCED THIS PROBLEM SEVERAL TIMES BEFORE AND THEREFORE HAD KNOWN HOW TO CORRECT IT, MY RESPONSE WOULD HAVE BEEN TO DEPRESS THE BRAKE PEDAL EVEN MORE. I COULD EASILY HAVE DRIVEN OVER THE MOTHER AND HER CHILD! I AM AWARE THAT TOYOTA HAS A RECALL ON MANY OF ITS PRODUCTS BECAUSE OF UNINTENTIONAL ACCELERATIONS, BUT I AM UNAWARE OF ANY INVESTIGATIONS THE FOCUS ON THE CAUSE OF MY NEAR-FATAL INCIDENT. I AM CERTAIN THAT SOME OF THE ACCIDENTS REPORTED ON THE RAV 4, V6 ARE ATTRIBUTABLE TO THE LACK OF ADEQUATE SEPARATION BETWEEN THE BRAKE AND ACCELERATOR PEDALS! THIS MUST BE INVESTIGATED AND FIXED IMMEDIATELY! I REPORTED THIS INCIDENT TO TOYOTA USA GILBERT DYER, TORRENCE CA ON JUNE 4, 2010 WITH THE REQUEST THAT HE FORWARD IT TO THE HIGHEST LEVEL AT TOYOTA. IT DEMANDS IMMEDIATE ATTENTION!!!!

**Vehicle:** 2008 TOYOTA TUNDRA  
**Location of Incident:** NORTH WILDWOOD, NJ

**NHTSA Summary:**  
I OWN A 2008 TOYOTA TUNDRA WHICH I PURCHASED NEW. FROM THE DAY I PURCHASED IT, THE ACCELERATOR FLUCTUATED WHENEVER I HIT A BUMP. THIS WAS MOST EVIDENT WHEN I STARTED FROM A STOP AND HIT A BUMP. I DIDN'T THINK TOO MUCH ABOUT IT UNTIL THE FLUCTUATION BECAME SO BAD I THOUGHT I WOULD AT SOME POINT, LOSE CONTROL OF THE VEHICLE. I NOTIFIED TOYOTA ABOUT THIS PROBLEM WHEN IN 2010, MY VEHICLE WAS RECALLED FOR ACCELERATOR PROBLEMS. TOYOTA REPLACED THE ACCELERATOR. I CONTINUED TO COMPLAIN ABOUT THE SENSITIVE ACCELERATOR UNTIL A DISTRICT SERVICE MANAGER NOTIFIED ME THAT MY VEHICLE'S ACCELERATOR WAS NORMAL. HE FURTHER INDICATED THAT NEW TUNDRA'S HAD THE SAME ACCELERATOR FEEL AS MINE. THE DISTRICT MANAGER STATED THAT HE HAD PARKED MY VEHICLE NEXT TO A NEW VEHICLE IN CASE I WANTED TO COMPARE THE NEW VEHICLE TO MINE. I DID NOT COMPARE THE TWO VEHICLES. HOWEVER, I FEEL THE ACCELERATOR IN MY VEHICLE IS A HAZARD AND SHOULD BE EXAMINED FOR THE SAFETY OF THOSE WHO OWN TOYOTA TUNDRA'S.

**NHTSA Summary:**  
**Additional Summary:**  
INFO FROM FORSYTHNEWS.COM ARTICLE -

"Carl Caballes was on his couch Thursday afternoon when he was moved 10 feet from where he had been sitting.

The 18-year-old said neither he nor his mother were injured when her 2007 Toyota Sienna crashed through the garage and wall that separated the rooms at their home on Berryhill Road off Haw Creek Circle.

"All she said was she was pushing on the brakes and nothing happened," he said.

A Forsyth County Sheriff's report shows Mary Caballes told authorities she was pulling into her downspout driveway when the van accelerated.

The van then struck her son's vehicle and continued through the garage doors and into the house, the report said."

**NHTSA Summary:**

CAR : 2008 TOYOTA CAMRY LE, 30K MILES STILL UNDER FACTORY WARRANTY PROBLEM : UNINTENDED SUDDEN BREAKING AFTER TOYOTA'S RECALL. DESCRIPTION: I AM OWNER OF 2008 TOYOTA CAMRY LE. MY CAR EXPERIENCED AN UNINTENDED ACCLERATION PROBLEM ONCE. LOCAL TOYOTA DEALER APPLIED RECALL TO FIX THIS ISSUE. NOW MY CAR APPLIES UNINTENDED BREAKS. THIS HAS HAPPENED 3 TIMES IN LAST 15 DAYS. EACH OF THE SYMPTOMS DESCRIBED BELOW 1) TRYING TO COAST TO STOP. CAR WAS GOING AT 50MPH. AS SOON AS I STEP FOOT OFF PEDAL, CAR SLOWED DRAMATICALLY. BREAK LIGHT DIDNT COME ON BUT CAR REDUCE SPEED FROM 50MPH TO 35MPH AND KEPT ON REDUCING. NOTE THAT I NEVER PRESSED BREAK PEDAL BUT BREAKS WERE APPLIED AUTOMATICALLY TO WHEELS. THIS HAPPENED TWICE. 2) TRYING TO MERGE INTO FREEWAY, SPEED BETWEEN 45-50MPH & TRYING TO ACCELERATE, SUDDENLY LOST SPEED FROM 50 TO 40MPH IN MATTER OF 2 SECONDS. MY FOOT WAS ON ACCLERATOR ALL THE TIME. WE WERE ALMOST REAR ENDED BY VEHICLE FOLLOWING US. I REQUEST YOU TO LOOK INTO THIS CARS STOPPING BY THEMSELF ARE EQUALLY AS BAD AS CARS ACCELERATING BY THEMSELF. WE HAVE EXPERIENCED FIRST HAND WHEN WE WERE ALMOST REARENDED BY A CAR. KINDLY LOOK INTO THIS.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10336385  
**Date of Incident:** 20100612  
**Vehicle:** 2010 TOYOTA SIENNA  
**Location of Incident:** PANORA, IA

**NHTSA Summary:**

UNCONTROLLED ACCELERATION WHERE DEPRESSING THE BRAKE PEDAL WAS "SOFT" AND DID NOT HAVE ANY EFFECT IN STOPPING THE VEHICLE. I WAS PULLING INTO MY GARAGE AND AS I NEARED THE POINT WHERE I WANTED TO STOP, I PRESSED ON THE BRAKE PEDAL. THIS HAD NO EFFECT AND THE VEHICLE CONTINUED TO ACCELERATE. THE VEHICLE PROCEEDED THROUGH THE OTHER END OF THE GARAGE. THERE IS A DROP

C-2323

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

FROM THE FLOOR OF THE GARAGE TO THE GROUND ON THE BACK SIDE OF THE GARAGE. WHEN THE HEAVY FRONT END OF THE 2010 TOYOTA SIENNA WENT THROUGH THE GARAGE WALL, IT DROPPED TO THE GROUND AND THE VEHICLE WAS BALANCED LIKE ON A TEETER-TOTTER WITH 1 REAR WHEEL IN THE AIR INSTEAD OF ON THE GARAGE FLOOR. THIS POSITION STOPPED THE VEHICLE FROM CONTINUING TO MOVE FORWARD. I WAS UNABLE TO GET OUT BECAUSE THE DOORS WERE LOCKED AND DID NOT RELEASE WHEN I TRIED TO OPEN THE DOOR. I CALLED THE LOCAL SECURITY FORCE WHO CAME TO MY ASSISTANCE. WITH THE SECURITY FORCE PULLING ON THE DOOR FROM THE OUTSIDE, I WAS ABLE TO GET OUT THROUGH THE REAR PASSENGER DOOR. THIS HAS NEVER HAPPENED BEFORE BUT THE CONSEQUENCE WAS FRIGHTENING EVEN AT THE SLOW SPEED THAT I WAS GOING. I CONTACTED MY INSURANCE COMPANY AND THOUGH NOT FINALIZED, IT APPEARS THAT THEY BELIEVE THEY WOULD BE ABLE TO REPAIR THE VEHICLE. THEIR REPAIRS WOULD BE BODY WORK, PAINTING, AND A NEW FRONT WINDSHIELD. MY CONCERN IS THAT THESE REPAIRS MAY NOT ADDRESS THE ROOT CAUSE OF THE PROBLEM - THAT THE BRAKE PEDAL DID NOT SLOW OR STOP THE VEHICLE AS INTENDED.

**Additional Summary:**

**Toyota ID Number:**

**Date of Incident:** 20100616  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** NEW ORLEANS, LA

**NHTSA Summary:**

IN 2007, I PURCHASED A NEW 2007 MODEL LEXUS ES 350 4 DOOR SEDAN. SHORTLY AFTER I PURCHASED THE VEHICLE, I NOTICED THAT WHEN THE ACCELERATOR WAS LIFTED AND THE CAR WAS DOWNSHIFTING AND BRAKING BY THE ENGINE (THE BRAKE NOT BEING DEPRESSED), AT ONE POINT THE CAR CONTINUED FORWARD FOR A TIME RATHER THAN CONTINUE TO BEING BRAKED BY THE ENGINE. THIS CONDITION HAS CONTINUED IN SPITE MY CALLING IT TO THE ATTENTION OF THE LEXUS DEALER IN NEW ORLEANS ON SEVERAL OCCASIONS, THE FIRST BEING SHORTLY AFTER I PURCHASED THE CAR, AND THE LATEST BEING ON JUNE 16TH OF THIS YEAR. IN EACH INSTANCE, I WAS TOLD BY THE DEALER THAT THE CAR HAD NO PROBLEMS. THE PROBLEM IS NOT A RAPID SURGE, BUT RATHER A SUDDEN AND UNEXPECTED MOVING FORWARD IN GEAR INSTEAD OF A CONTINUOUS DOWNSHIFTING AND RESULTING BRAKING WHEN THE CAR HAS BEEN DRIVEN AT ABOUT 30 TO 40 MPH AND THE ACCELERATOR IS LIFTED. THIS PROBLEM DOES NOT OCCUR IN EVERY INSTANCE WHEN THE ACCELERATOR IS LIFTED, BUT IN TRAFFIC WHEN THE DRIVER EXPECTS THE CAR TO SLOW ITSELF THE SUDDEN FORWARD MOVEMENT, INSTEAD OF A CONTINUOUS SLOWING, IS DANGEROUS. THE ACCELERATION PROBLEM APPEARS TO BE A FAULT OF THE CAR'S ELECTRONIC CONTROL SYSTEM. I ALSO CALLED TO THE ATTENTION OF THE DEALER THE FACT THAT WHEN THE CAR IS BRAKED, THE CAR DOES STOP BUT IF PRESSURE IS CONTINUED TO BE PLACED ON THE BRAKE PEDAL, THE PEDAL GOES ALL THE WAY TO THE FLOOR. THIS HAS NOT CAUSED AN ACCIDENT TO DATE, BUT IT DOES REQUIRE THE DRIVER TO PUMP THE BRAKE PEDAL TO MAKE CERTAIN THAT THE CAR WILL STOP. EACH TIME THIS IS DONE, THE BRAKE PEDAL CATCHES MIDWAY TO THE FLOOR. AGAIN, I WAS TOLD THAT THIS WAS NOT A PROBLEM. I REGISTER THESE TWO ISSUES AS POTENTIAL CAUSES OF ACCIDENTS AND AS COMPLAINTS ON MY PART.

**Vehicle:** 1998 LEXUS GS300  
**Location of Incident:** BETHESDA, MD

**NHTSA Summary:**

REFERRING TO A 1998 LEXUS GS300, REAR WHEEL DRIVE CAR WITH 84,000 MILES. ON SATURDAY, JUNE 19, 2010, I WAS COMING TO A STOP AT AN INTERSECTION WITH A 2 WAY STOP SIGN, WITH MY FOOT ON THE BRAKE. MY CAR AFTER SLOWING DOWN A BIT, SUDDENLY ACCELERATED, ALMOST RESULTING IN AN ACCIDENT AS I CRUISED ACROSS THE INTERSECTION INSTEAD OF STOPPING. I CALLED LEXUS AND THEY ADVISED THAT I BRING THE CAR IN. I DROVE THERE ABOUT 15 MILES, AND ON THE WAY THERE I STOPPED ABOUT 100 FEET BEHIND ANOTHER CAR WHICH WAS STOPPED AT A RED LIGHT. I WAS AT A TOTAL STOP. MY FOOT ON THE BRAKE, AND THE CAR SUDDENTLY LUNGED FORWARD. THERE WAS NO ACCIDENT BECAUSE I WAS SO FAR BEHIND THE CAR IN FRONT OF ME. I DROVE TO LEXUS. THEY EXAMINED THE CAR AND TOLD ME THEY FOUND NOTHING WRONG, INCLUDING WITH THE COMPUTER. THEY THEN TOOK ME FOR A DRIVE, PERHAPS 20 OR 30 MINUTES, STOPPING AND STARTING, AND THE PROBLEM COULD NOT BE DUPLICATED. I WAS TOO AFRAID TO DRIVE THE CAR AWAY AS THIS SUDDEN ACCELERATION HAPPENED TWICE THAT MORNING, SO I BOUGHT A NEW CAR ON THE SPOT. I WAS OF THE UNDERSTANDING THAT THE PROBLEM OF SUDDEN ACCELERATION DID NOT INVOLVE THE GS SERIES. LEXUS DID ALLOW MY GS300 AS A TRADE-IN. BOTH TIMES WHEN THE CAR ACCELERATED, I HAD NO DISTRACTIONS AND AM CERTAIN THAT THIS DESCRIPTION IS ABSOLUTELY ACCURATE. ALSO, I HAD ONLY THE ORIGINAL MATS IN THE CAR AND THEY WERE SET PROPERLY WITH THE HOOKS THROUGH THEM AS THEY SHOULD BE.

**Date of Incident:** 20100620  
**Vehicle:** 2010 TOYOTA RAV4  
**Location of Incident:** PARMA, OH

**NHTSA Summary:**

AFTER HAVING HAD TWO EVENTS OF SUDDEN ACCELERATION IN AN 2007 TOYOTA RAV4, THE DEALER, METRO TOYOTA, TALKED US UNTO TRADING IN THE 2007, FOR A BRAND NEW 2010 RAV4, AFTER ASSURING US THAT THERE WERE NO SIMILAR COMPLAINTS WITH THE 2010 MODEL. WE DROVE THIS CAR FOR ABOUT 230 MILES, WHEN ON JUNE 20, 2010, A MILE AFTER EXITING THE FREEWAY, WITH MY WIFE IN THE PASSENGER SEAT, I WAS COMING UP TO A RED LIGHT, GOING DOWN A SLIGHT SLOPE, ON THE ROAD, WHEN THE CAR ENGINE SURGED. I PUT THE GEAR IN NEUTRAL, DROVE THE CAR PARALLEL AND NEAR SOMEBODY'S DRIVEWAY, PUT THE CAR IN PARK, AND WAS PREPARING TO GO KNOCK ON THE DOOR OF THE HOMEOWNER TO ASK HIM/HER TO COME AND WITNESS THE RPM'S, WHEN THE CAR SURGING STOPPED. I CAREFULLY DROVE THE CAR HOME. I DID NOT CALL THE DEALER THAT EVENING. THE NEXT DAY, I WAS GOING TO A NEARBY GROCERY, PREPARING TO GET INTO A LEFT TURNING LANE, APPROACHING A RED LIGHT, AGAIN GOING DOWN A SLIGHT INCLINE ON THE ROAD, MY FOOT ON THE BRAKE, WHEN I FELT THE ENGINE REV UP STRONGLY. I PRESSED HARD ON THE BRAKE, PUT THE GEAR IN NEUTRAL, LIFTED UP THE HAND BRAKE, AND A GOT OUT OF THE CAR FOR A WHILE HOPING TO SPOT A POLICE CAR OR HAVE SOMEONE ELSE COME AND WITNESS THIS TERRIBLE EVENT. SEEING NO ONE WILLING TO STOP, I GOT BACK IN THE CAR, AGAIN PRESSED MY FOOT ON THE BRAKE, BUT THE RPM'S REMAINED ABOVE 5000. AFRE WAITING ONE MORE MINUTE, THE SPEED OF THE ENGINE CAME DOWN TO NORMAL. I PICKED UP THE REQUIRED ITEMS AT THE GROCERY STORE, AND RETURNED TO MY HOME NEARBY. I CALLED THE DEALER, THEY SENT A MAN WHO TOOK THE CAR TO SERVICE. THE CAR WAS THERE FOR OVER THREE WEEKS. THEIR ANSWER WAS THAT THE CAR CHECKED OK, THEY ATTEMPTED NO REPAIR. I REFUSED TO AGAIN DRIVE THIS CAR ON

C-2330

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THE ROAD. I ENDED UP BUYING A SIMILAR CAR OF ANOTHER MAKE. THIS AND THE PREVIOUS INCIDENT IN THE 2007 RAV 4 HAS COST US OVER 13000 DOLLARS.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10348535  
**Date of Incident:** 20100620  
**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** ROCKVILLE, MD

**NHTSA Summary:**  
ON JUNE 20 SHORTLY BEFORE 6:00 PM I BACKED OUT OF THE PARKING SPACE OF OUR CONDO BUILDING, AND I PROCEEDED TO DRIVE THE CAR. WITH ABOUT 10 MLS/HOUR TOWARD A STREET CCA 50 YARDS AWAY. BEFORE ENTERING THE STREET THE CAR HAS TO BE STOPPED, HOWEVER, WITHOUT PRESSING THE GAS PEDAL, THE CAR ON ITS OWN ACCELERATED. IMMEDIATELY I APPLIED THE BRAKES, BUT THE CAR DID NOT RESPOND. THE CAR SPEEDED INTO A GRASSY AREA, AND FROM THERE TO OUR OVERFLOW PARKING LOT, AND FROM THERE TO A SECOND PARKING LOT. THE TIRES BURNED THE GRASS DUE TO THE APPLIED BRAKES. PICTURE OF THE BURNED GRASS CAN BE SUPPLIED IF REQUESTED. THE UNSTOPPABLE CAR TRAVELED ABOUT 170 YARDS. DUE TO THE FORCE BY WHICH THE CAR HIT FOUR CURBES, THE FRONT TIRES WERE FLATTENED AND THE FRONT RIGHT WHEEL WAS SEVETLY DAMAGED. THE FRONT END COLLAPSED TO THE GROUND AND THE CAR FINALLY STOPPED. MY WIFE AND MYSELF WERE WEARING THE SAFETY BELTS, WHICH PREVENTED TO BE THROWN INTO THE FRONT WINDSHIELD. MY WIFE WAS SITING NEXT TO ME, THERE WERE NO OTHER PASSENGERS IN THE CAR. IN ADDITION THE FORCE CAUSED BOTH OF THE FRONT AIRBAGS TO DEPLOY. MINIMIZING THE HUMAN DAMAGE. THE AIRBAGS CAUSED A SECOND DEGREE BURN ON MY LEFT ARM AS AS DETERMINED IN THE ER. THE AIRBAG ALSO HIT THE FRONT OF MY FACE, AND SLIGHTLY BURNED THE FINGER ON HER LEFT HAND. NEEDLESS TO STAY THAT WE WERE EXTREMELY SHAKEN AND FRIGHTENED. UPON EXITING THE CAR I CALLED 911 AND REPORTED WHAT HAPPENED. AN UNKNOWN NEIGHBOR CALLED AN AMBULANCE, WHICH CAME VERY SOON WITH A LARGE FIRE TRUCK. WE WERE TAKEN TO THE ER OF A LOCAL HIOSPITAL. WE SPENT AT 4-5 HOURS IN THE ER OF THE HOSPITAL WHERE WE WERE X-RAYED. EVEN AS OF THE DATE OF THIS REPORT, SOME 2 MONTHS AFTER THE ACCIDENT BOTH MY WIFE AND I REMAIN EXTREMELY SHAKEN BY THIS TRAUMATIC EXPERIENCE. MY WIFE'S SPINAL PROBLEMS WERE ENHANCED BY THE CRASH, AND HER CONDITION IS BEING MONITORED BY SPECIALISTS. THE CAR WAS NOT ON THE RECALL LIST. I SUSPECT THE ORIGINAL MICRO CHIP TO CAUSE THE MULFUNCTION OF THE GAS FLOW.

**Location of Incident:** HARRISON, OH

**NHTSA Summary:**

WHILE AT A DRIVE THRU AND FOOT FIRMLY ON THE BRAKE MY 2009 SCION XB SURGED BY RELEASING THE PRESSURE ON THE BRAKE, I QUICKLY REMOVED MY FOOT AND REAPPLIED PRESSURE AND IT DID IT AGAIN AT A STOP LIGHT SAME OCCURANCE. VEHICLE AT BOTH THESE TIMES WAS NOT IN MOTION. I TOOK IT TO THE DEALERSHIP TO ASK IF PROBLEMS HAD BEEN REPORTED AS BOTH THESE INSTANCES HAPPENED WITHIN MINUTES OF EACH OTHER AND THEY STATED TO LEAVE THE VEHICLE AND THEY WOULD CHECK IT OUT. HOWEVER, I TOLD THEM I NEEDED A CAR THEY SAID SERVICE WAS CLOSED AND WAS UNABLE TO PROVIDE ME WITH A CAR IN ORDER FOR ME AND MY FAMILY TO GET HOME AND FOR WORK THE NEXT DAY. THE DEALERSHIP WAS OPEN IT WAS 7:15PM AT NIGHT BUT I COULD NOT GET A LOANER CAR IN ORDER FOR THEM TO PROPERLY CHECK MY BRAKES AND ACCELERATION ISSUES. I ASKED THEM TO WRITE DOWN THAT I HAD APPROACHED THEM ON THE SUBJECT AND THEY SAID THEY WOULD. THE NEXT MORNING WHILE GOING TO WORK THE VEHICLE WAS IN MOTION GOING DOWN A HILLSIDE WHEN I APPLIED BRAKE THE VEHICLE SLOWED AS IT SHOULD BUT AGAIN THERE WAS A SURGE IN POWER AND IT ACCELERATED AND I HAD TO REMOVE MY FOOT QUICKLY FROM THE BRAKE AND REAPPLY TO BRING THE VEHICLE BACK UNDER CONTROL. WE ARE AGAIN CONTACTING THE DEALERSHIP TODAY FOR ANOTHER PROPER INSPECTION.

**Additional Summary:**  
INFORMATION FROM NEWS ARTICLES: Woman Crashes Into Burnsville Hair Salon (CBS) and Toyota Crashes Into Burnsville Hair Salon, Driver Says Accelerator Stuck (Minnesota incident)

"The driver of a 2003 Toyota Corolla lost control of her vehicle and crashed into a hair salon in Burnsville Wednesday.

The Burnsville Police Department said it happened around 11:50 a.m. at Syndicut For Hair on 10th Avenue South. The driver was an 83-year-old woman who was driving in the parking lot when she somehow lost control and went crashing into the window of the salon.

The wheels were still spinning, inside the hair salon, when the owner asked the driver to turn off the vehicle.

The woman allegedly claimed the vehicle's pedal was stuck, leading to the crash. Police checked with the local Toyota dealership and said the vehicle was not part of the recent recall.

There were no injuries and no citations."

The name of the woman involved in the crash has not been released.

**NHTSA Summary:**

I HAVE A TOYOTA HYBRID 07. I TURNED ON CAR MADE HORRIBLE LOAD NOISE THE SPEEDOMETER WENT UP TO 100 MPH IN SECONDS THE TWO FRONT TIRES WERE SHACKING HORRIBLY LIKE THE CAR WANTED TO TAKE OFF THE CAR KEEP MAKING LAUD NOISE I HONESTLY THOUGH THE CAR WAS GOING TO BLOW UP. I THANK GOD THAT I WASN'T IN ROAD WHEN IT HAPPENED. AM VERY AFRAID TO GET INTO CAR THERE IS NO WAY I WILL BE ABLE TO DRIVE THAT CAR AGAIN I VALUE MY LIFE TOO MUCH AND ITS SAD THAT TOYOTA JUST THINKS ABOUT MONEY AND NOT LIVES OF PEOPLE. I SAY THIS BECAUSE THEY SAID "WELL BRING IT IN IF IT HAPPENS AGAIN" YEAH RIGHT AND WHAT IF IT DOES BUT AM DEAD , OR CREDICLY INJURED.

**Location of Incident:** OCEANSIDE, CA

**NHTSA Summary:**

I OWN A 2008 LEXUS ES-350 - IT HAD A RECALL FOR ACCELATION PROBLEMS WHICH THEY ADJUSTED THE GAS PEDAL. ABOUT 3 WEEKS AGO I PULLED UP TO THE OFFICE AT MY APT COMPLEX, HAD MY FOOT ON THE BRAKE AND CAR CONTINUED TO GO FORWARD, WENT OVER THE CURB AND KNOCKED DOWN THE LEASING SIGN. I PUT THE CAR IN REVERSE STILL WITH MY FOOT ON THE BRAKE AND CAR CONTINUED TO GO BACKWARDS, THEN PUT CAR IN NUTURAL AND FINALLY CAR STOPPED. LEXUS CUSTOMER SERVICE AND MY INSURANCE COMPANY EXAMANED THE CAR AND SAID THERE WAS NOTHING WRONG WITH THE CAR. IF THAT IS TRUE WHY DID THE CAR CONTINUE TO GO FORWARD WITH MY FOOT ON THE BRAKE.

**Vehicle:** 2009 TOYOTA YARIS  
**Location of Incident:** TOMS RIVER, NJ

**NHTSA Summary:**

I WAS DRIVING AT THE REGULAR SPEED LIMIT AND WHEN THE CAR IN FRONT OF ME WAS STOPPING TO MAKE A LEFT HAND TURN. I STEPPED ON MY BRAKE AND THE CAR WOULD NOT STOP. I WAS PRACTICALLY STANDING ON THE BRAKE PEDAL AND THE CAR WOULD NOT STOP AND I HIT THE CAR IN FRONT OF ME. THE AIRBAGS DEPLOYED. I REMEMBER THAT A POLICEMAN TOLD ME TO PUT ON THE EMERGENCY BRAKE BECAUSE THE CAR WAS STILL SLIDING. I KNOW I TRIED TO STOP AND THE CAR WOULDN'T STOP. BASED ON THEIR REPORTS OF TOYOTA'S STICKING ACCELERATOR, I THOUGHT THIS SHOULD BE REPORTED AND INVESTIGATED. I JUST CAME HOME LAST WEEK. I BROKE 4 RIBS IN THE ACCIDENT AND THE CAR IS TOTALLED. I WAS IN REHABILITATION FOR 2 1/2 WEEKS. I WOULD LIKE TO SEE THIS ACCIDENT INVESTIGATED. I HAVE A CLEAN DRIVING RECORD AND I BELIEVE THERE MAY HAVE BEEN SOME TYPE OF MECHANICAL ISSUE THAT WOULD NOT LET ME STOP THE CAR. THE INSURANCE SALVAGE GARAGE IS HOLDING THE CAR FOR 60 DAYS AT OUR REQUEST SO THE CAR COULD BE INSPECTED.

**Vehicle:** 2010 TOYOTA HIGHLANDER  
**Location of Incident:** HENDERSONVILLE, NC

**NHTSA Summary:**

I HAVE A 2010 TOYOTA HIGHLANDER 4 CYLINDER THAT HAS AN ENGINE WHICH IS ACCELERATING AND SURGING DESPITE THAT IT HAS RECEIVED THE RECALL "FIX" FOR THE RECENT GAS PEDAL RECALL. EVEN AFTER THE RECALL MODIFICATION TO THE GAS PEDAL, THE ENGINE'S TACHOMETER JUMPS (OFTEN UP TO 5000 RPM) WHILE TRAVELING AT A STEADY SPEED OR NOT ACCELERATING. THE PROBLEM OCCURS EVERY TIME IT IS DRIVEN AND IS EASILY DUPLICATED. MY LOCAL DEALER SERVICE HAD THE CAR FOR OVER 3 WEEKS AND WAS WORKING CLOSELY WITH TOYOTA CORP TECHNICIANS. THEY WERE ABLE TO REPRODUCE AND OBSERVE THE PROBLEM AND ACKNOWLEDGED IT. BUT THE VEHICLE WAS NOT PRODUCING ANY DIAGNOSTIC "ERROR CODES" AND THEY WERE UNABLE TO DIAGNOSE OR REPAIR THIS VEHICLE. IN A STRANGE TWIST THEY RETURNED THE VEHICLE TO ME AND "CHANGED THEIR TUNE". THE DEALER THEN SAID TOYOTA TECH'S STATED IT WAS A NORMAL GEAR CHANGE FUNCTION AND THAT THERE WAS NOTHING THEY COULD DO ABOUT THE SURGING. THE PROBLEM HAS GOTTEN PROGRESSIVELY WORSE AND I AM ABOUT TO TAKE IT BACK TO THE DEALER AND GO ANOTHER ROUND. PROBLEM OCCURS AT BOTH HIGH AND LOW SPEEDS, WITH AND WITHOUT USE OF CRUISE CONTROL. THE VEHICLE IS LESS THAN 1 YEAR OLD AND THE ENGINE BEHAVIOR IS QUITE SCARY. I DO NOT WANT TO HAVE MY WIFE AND CHILDREN GET INTO AN ACCIDENT. PLEASE GET INVOLVED. IN MY OPINION, THIS PROBLEM SEEMS TO BE RELATED TO THE VEHICLES ELECTRONIC ENGINE CONTROLS. A.S.I.

**Location of Incident:** LOS ALTOS, CA

**NHTSA Summary:**

FROM A STOPPED POSITION ON A SIDE STREET, I PRESSED THE ACCELERATOR TO PULL ONTO A MAIN STREET. BECAUSE TRAFFIC ON THE MAIN STREET MOVES RATHER FAST, I ACCELERATED SOMEWHAT ABOVE NORMAL, BUT IN NO WAY EXCESSIVE. AFTER GETTING INTO MY LANE, I BACKED OFF THE ACCELERATOR, BUT THE ENGINE ACTED AS IF I WAS FLOORING IT AND THE CAR CONTINUED ACCELERATING. IT WAS SCARY. I PUSHED HARD ON THE BRAKE. THE CAR STILL ACCELERATED. I STEPPED ON THE HAND BRAKE. IT CONTINUED TO ACCELERATE. FINALLY, I TOOK THE CAR OUT OF DRIVE AND INTO NEUTRAL. THE ENGINE CONTINUED TO SCREAM, BUT I WAS ABLE TO STOP AT THE SIDE OF THE ROAD. AT SOME POINT THE ENGINE DID COME DOWN TO NORMAL IDLE, BUT I WAS SO SHAKEN, I REALLY DON'T KNOW WHEN THAT HAPPENED. FORTUNATELY NO ONE WAS AHEAD OF ME, THE ROAD IS STRAIGHT AND LEVEL, ETC. ASIDE FROM SHATTERED NERVES, THERE WAS NO HARM DONE. BUT I CAN IMAGINE ALL KINDS OF HORRIBLE OUTCOMES HAD CONDITIONS BEEN DIFFERENT. THE CAR ACTED AS IF THE ACCELERATOR STUCK ALL THE WAY DOWN, HOWEVER I KNOW I DIDN'T PRESS IT DOWN THAT FAR. LATER MY HUSBAND DROVE THE CAR HOME FROM WHERE I STOPPED IT. WITH THE CAR OFF, MY HUSBAND INSPECTED THE ACCELERATOR PEDAL PRESSING IT WITH HIS HAND AND LETTING IT BACK UP. THERE IS A POINT ABOUT HALF WAY BACK UP WHERE THE MECHANISM IS NOT SMOOTH. THE PEDAL COMES ALL THE WAY BACK UP, BUT SOMETHING INSIDE CATCHES AND CAUSES LOTS OF GAS TO FLOW INTO THE ENGINE. AT LEAST ONE TIME HE WAS ABLE TO REPRODUCE THE PROBLEM WITH THE CAR IN PARK. I AM AFRAID TO EVER DRIVE IT AGAIN. THIS TIME I WAS LUCKY, BUT I SHUTTER TO THINK. IF SOMEONE HAD BEEN IN ONE OF THE CROSSWALKS. IF I HAD BEEN APPROACHING A RED LIGHT. WHEN MIGHT THIS HAPPEN AGAIN? \*TR

**NHTSA Summary:**

ON SUNDAY, JUNE 27 2010, WE WERE TRAVELING DOWN A CROWDED CANYON IN OUR 2010 TOYOTA RAV4. (WE PREVIOUSLY BROUGHT THE VEHICLE IN TO OUR LOCAL DEALERSHIP PURSUANT TO THE SAFETY RECALL.) MY HUSBAND WAS DRIVING WHILE I WAS SEATED BESIDE OUR TODDLER IN THE BACK SEAT. ALL OF A SUDDEN IT SOUNDED LIKE SOMEBODY FLOORED THE ACCELERATOR. MY HUSBAND BECAME ALARMED AS HE NOTICED THE RPM'S IMMEDIATELY RAMPED UP. WE LURCHED FORWARD. MY HUSBAND'S FOOT WAS NOT EVEN ON THE ACCELERATOR. FORTUNATELY, SINCE MY HUSBAND WAS ABOUT TO BRAKE, WE WERE ABLE TO NARROWLY AVOID A COLLISION WITH THE VEHICLE AHEAD OF US. WE CONTACTED OUR LOCAL DEALERSHIP TO INSPECT THE NEW TOYOTA. THEY COULDN'T IDENTIFY THE CAUSE OF THE INCIDENT, BUT THEY DID INDICATE THAT IT MAY HAVE BEEN A FLOOR MAT PROBLEM. WE EXPLAINED THAT THE ACCELERATOR DID NOT SEEM STUCK AND THAT WE WERE TRAVELING AT AN EXTREMELY SLOW RATE OF SPEED AND THEN UNINTENTIONALLY ACCELERATED. WE CONTINUED TO BE CONCERNED AND SO WE CONTACTED TOYOTA. THEY EXPLAINED THAT THE DEVICE INSTALLED PURSUANT TO THE SAFETY RECALL WAS INTENDED TO ASSIST THE ACCELERATOR IN RETURNING TO AN IDLE POSITION. HOWEVER, AS WE EXPLAINED, THE ACCELERATOR WAS IN AN IDLE POSITION WHEN THIS INCIDENT OCCURRED. WE CONTINUE TO BE SCARED TO DEATH TO DRIVE OUR NEW TOYOTA RAV4. THIS MATTER HAS RECENTLY BEEN REFERRED TO ARBITRATION.

**NHTSA Summary:**

I HAVE A 2008 TOYOTA COROLLA. ON FOUR SEPARATE OCCASIONS AFTER COMING TO A COMPLETE STOP THE ENGINE ACCELERATED. I IMMEDIATELY PUT THE TRANSMISSION INTO NEUTRAL AND THE ENGINE RPM INCREASED TO 6000RPM. AFTER THE FIRST OCCURRENCE I REMOVED THE FLOOR MATS AT TOYOTA'S REQUEST EVEN THOUGH THEY WERE NO WHERE NEAR THE ACCELERATOR AND THE CONDITION RE-OCCURED. BOTH THE LOCAL AND REGIONAL TOYOTA REP CHECKED THE CAR AND FOUND NOTHING WRONG. I PUT THE FLOOR MATS BACK - AGAIN NO WHERE NEAR THE ACCELERATOR AND ON 2 JULY, THE UNINTENDED ACCELERATION OCCURED AGAIN WHEN I WAS ON A TRIP. WHEN I RETURNED I BROUGHT THE CAR TO MY LOCAL DEALER THEY CHECKED THE CAR AND FOUND NOTHING. THE REGIONAL TOYOTA REP WOULD NOT COME TO INSPECT IT BECAUSE THE FLOOR MATS WERE IN PLACE - BUT AGAIN THEY ARE NO WHERE NEAR THE ACCELERATOR. I WAS TOLD TO BRING IT IN IF IT HAPPENS AGAIN AND TO REMOVE THE FLOOR MATS. MY WIFE AND MOTHER IN LAW WERE IN THE CAR DURING THE LAST INCIDENT AND THEY WERE VERY FRIGHTENED. MY WIFE WILL NO LONGER DRIVE THE CAR. I DO NOT FEEL THAT THE CAR IS SAFE BUT HAVE NO CHOICE SINCE I CANNOT AFFORD ANOTHER CAR. THE ACCELERATOR IS NOT STICKING BUT IT IS ADVANCING TO CAUSE THE HIGHER RPM'S. I'M NOT SURE WHY TOYOTA DOES NOT REALIZE THIS.

**Additional Summary:**

ColoradoConnection.com news story "Recalled Toyota goes out of control"

"A Colorado springs woman's Toyota Avalon goes out of control even though she's already had the recall work done. Toyota began recalling millions of its vehicles earlier this year after problems with sudden unexpected acceleration.

Mary Johnson had the recall work done on her Avalon back in February.

But she says her car suddenly accelerated and went out of control on Monday. Johnson says her car flew over a curb and up an embankment before stopping in a large bush. Now she says she'll never drive a Toyota again.

The '08 Toyota Avalon went out of control less than a block from Mary Johnson's house. "Going about 15-20 miles an hour and the next thing I know I was up in the bushes just like lightning speed nothing I could do and you don't think of nothing cause its just so fast," Johnson said. People who live in the area say they could hear the engine racing just before the crash.

Mary says even after the car stopped the engine continued at full throttle. "The fence and the bushes stopped me and the car was still trying to go and I finally turned it off," Johnson said.

Mary was not injured and the damage to her car appears to be minor. But she says it could have been much worse. "If it had gone the other side of the street it would have killed kids that were playing," Johnson said.

Mary showed us the paperwork from when she had the recall work done by the dealer in February. Her's was one of millions of cars recalled after problems with sudden acceleration.

"The guy told me when they fixed the recall I said will this car be safe to drive and he said yes," Johnson said. Police didn't give Mary a ticket for the crash.

And when we checked a police report hadn't been filed yet. "I am not going to drive that car again I am not because they told me last time its safe to drive," Johnson said.

And she has this warning for other people who have had the recall work done on their Toyota. "I would say it might be safe and then again it might not happen and then it might happen," Johnson said. We called Toyota's U.S. headquarters in California. They say the repairs they have made to the recalled cars have worked.

**Vehicle:** 2010 TOYOTA COROLLA  
**Location of Incident:** DELRAY BEACH, FL  
**NHTSA Summary:**

ON JULY 6, 2010, I WAS DRIVING ON I-95 SOUTH NEAR THE IVES DAIRY RD. EXIT. I DRIVE A TOYOTA COROLLA '10 LE. I WAS GOING BETWEEN 65-70 MPH AND WAS IN THE NEXT TO LAST LANE. AT APPROXIMATELY 6:45AM, THE CAR'S RPM JUMPED FROM 2000-3000 TO 5000-6000. AT THIS POINT, I TOOK MY FOOT OFF THE GAS PEDAL...THE CAR SLOWED DOWN AUTOMATICALLY ON ITS OWN. THEN, THE RPM'S JUMPED BACK DOWN TO 2000-3000. I HAD TO CROSS THREE LANES IN ORDER TO PULL OVER. WHILE I WAS TRYING TO PULL OVER, THE CAR WAS GOING VERY SLOW, BUT THE RPM'S WERE JUMPING BACK AND FORTH BETWEEN 2000-3000 TO 5000-6000. THIS OCCURRED WHILE MY FOOT WAS OFF THE GAS PEDAL AND WHILE IT WAS HOVERING OVER THE BRAKE PEDAL. I DID NOT PRESS THE BRAKES BECAUSE I DID NOT WANT TO COME TO A FULL STOP IN THE MIDDLE OF FAST MOVING TRAFFIC ON I-95. THIS EVENT OCCURRED A TOTAL OF THREE TIMES BEFORE I WAS ABLE TO PULL OVER AND TURN OFF THE CAR. THE SOUND THE CAR WAS MAKING WAS AS IF I WERE TO PUT THE CAR IN NEUTRAL AND FLOOR THE GAS PEDAL. I HAD NOT DONE ANY OF THIS DURING THE INCIDENT. I TURNED OFF THE ENGINE FOR 10 MINUTES, AND I RESTARTED THE CAR. I SLOWLY MADE MY WAY TO MY PARENTS HOUSE NEARBY.

**NHTSA Summary:**

ON JULY 8 2010, MY 2010 TOYOTA HIGHLANDER HAD SUDDEN ACCELERATION PROBLEM WHEN I STOPPED AND BRAKED FOR THE TRAFFIC LIGHT. THIS HIGHLANDER HAS ONLY ABOUT 6,600 MILES ON IT AND IT NEVER HAD THE SUDDEN ACCELERATION PROBLEM BEFORE. THE DEALER HAD INSTALLED THE RECALL FIXES.

**Additional Summary:**

Summary of July 8th UA Incident:

That's until a few days ago. On July 8, I stopped and braked my 2010 Highlander (about 6,600 miles) for a traffic light on a flat normal local New Jersey street. No a/c was on, the temperature had cooled down to the high 70s in this part of New Jersey. About two seconds after braking the vehicle, all of a sudden, I heard and felt a big jolt and noise - the engine wanted to speed off. I was shocked and panicked to say the least. I did not know what to do at first, but then I put the gear in the P position. Then I felt I was able to tame the beast and wrestled the car back (in reality I don't think the car moved when it was on P). When the traffic light turned green, I proceeded to drive without any problem. I was not sure if I should get on the Garden State Parkway which is about another mile to go. After some hesitations, I got on to the Parkway and drove very slowly and thank God, I was able to drive home safely that night. I'm a very lucky guy, my family and friends all said so.

**Additional Summary:**

Summary of July 9th Dealer Visit:

Mr. Chen drove to Crestmont Toyota in NJ. Explained the UA event. Service tech filled out the UA questionnaire and provided Mr. Chen with a Camry loaner. Mr. Chen left while the dealer service department inspected his vehicle. Later that afternoon, Mr. Chen was called and advised by Doug Walter or Water, dealer service tech, that the computer (Tech Stream) data that was downloaded from his vehicle was consistent with his summary of the UA event and that he had contacted Toyota Corporate by computer message and they responded. Toyota Corporate stated in a response according to the service tech that they would send a field tech to the dealership sometime during the week of July 12 to conduct their inspection based on the Tech Stream results. Essentially, the computer DUPLICATED Mr. Chen's description of the unintended acceleration event.

He does not have any P codes to report. He hasn't seen the Tech Stream data!

July 11th - Mr. Chen sent an email to Dr. Gilbert in response to the AP article published over the weekend.

July 12th - I corresponded with Mr. Chen by email and we eventually spoke by telephone. I advised Mr. Chen to obtain copies of the UA questionnaire from the dealer and to also obtain a copy of the Tech Stream

C-2350

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

results. I also advised Mr. Chen to advise the dealer in writing to preserve the ECM and EDR data and to forego any further key cycles anticipating an overwrite.

Mr. Chen advised late in the afternoon that the dealer had called and stated that his vehicle had been struck on the dealer lot and that it would be sent to the body shop for immediate repair. I responded that no repairs should be conducted prior to further inspection and documentation of the UA event and recommended that he advise the dealer, take photographs of the damage, etc.

**Additional Summary:**

July 13th - Mr. Chen drove to the dealer and photographed the damage. He was advised that the dealer had placed a frame next to his vehicle and a person driving a Tundra on the lot took a sharp turn and struck the metal frame and pushed it into his vehicle causing damage. During his visit he requested copies of the questionnaire and the Tech Stream results. Mr. Walters or Water, the dealer service tech, advised him that Toyota Corporate would inspect his vehicle today and he should request the documents at that time. The dealer stated that Toyota Corporate will give him all inspection documents. Basically, the dealer declined to provide copies of his service records.

Mr. Chen will be called by the dealer to attend the inspection this afternoon.

**NHTSA Summary:**

I OWN A 2004 TOYOTA HIGHLANDER. I HAVE HAD AN OCCASIONAL PROBLEM WITH THE VEHICLE HESITATING AND THEN LURCHING UPON ACCELERATION SINCE I PURCHASED THE VEHICLE. THE PROBLEM IS BECOMING MORE FREQUENT AS THE VEHICLE AGES. I HAVE MENTIONED IT ON SEVERAL OCCASIONS WHEN THE VEHICLE WAS TAKEN IN FOR SERVICE BUT THE MECHANIC WAS NOT ABLE TO DUPLICATE THE PROBLEM. I HAVE BEEN USING AN INDEPENDENT MECHANIC FOR THE LAST COUPLE OF YEARS FOR MY REGULAR SERVICE ON THE CAR (THE CAR HAS BEEN A VERY GOOD CAR OTHER THAN THE ACCELERATION ISSUE AND HAS NOT NEEDED ANYTHING OTHER THAN REGULAR SERVICE). I MENTIONED THE PROBLEM TO HIM ON DIFFERENT OCCASIONS AND AT FIRST, HE WAS NOT ABLE TO DUPLICATE THE PROBLEM EITHER. MY HUSBAND MENTIONED IT AGAIN WHEN WE TOOK IT IN FOR THE LAST SERVICE. THIS TIME WHEN THE MECHANIC DROVE THE CAR HE WAS ABLE TO FEEL THE HESITATION AND SUBSEQUENT LURCHING. HE THEN PUT IT ON AN ANALYZER WHICH SHOWED VOLTAGE SPIKES IN THE THROTTLE BODY. HE SAID TO CALL TOYOTA. WE CALLED TOYOTA AND WERE TOLD THAT THE VEHICLE NEEDED TO BE TAKEN TO A TOYOTA DEALER. WE TOOK IT TO A DEALER THIS MORNING AND WERE TOLD THAT THEY COULD NOT DUPLICATE THE PROBLEM AGAIN. I CALLED TOYOTA AND FILED A COMPLAINT (10070906470 AND 1007090670 WERE THE NUMBERS I WAS GIVEN). THEY TOLD ME THERE WAS NOTHING THEY CAN DO UNTIL A TOYOTA DEALER CAN DUPLICATE THE PROBLEM. I HAVE SINCE FOUND HUNDREDS OF COMPLAINTS ONLINE ABOUT THE SAME ISSUE BY OTHER 2004 HIGHLANDER OWNERS. I DON'T KNOW WHERE ELSE TO TURN FOR HELP.

TL\* THE CONTACT OWNS A 2005 TOYOTA AVALON. THE CONTACT STATED SHE WAS ATTEMPTING TO ENTER A PARKING SPACE AT APPROXIMATELY 2MPH. WHEN SHE DEPRESSED THE BRAKE PEDAL, THERE WAS AN UNUSUAL INCREASE IN ENGINE RPM'S AND THE VEHICLE ABNORMALLY ACCELERATED. THE CONTACT CRASHED INTO A TREE AND CONTINUED TO ACCELERATE UNTIL INDEPENDENTLY STOPPING. THE CONTACT SUSTAINED INJURIES TO HER KNEES. A POLICE REPORT WAS AVAILABLE. THE VEHICLE WAS TOWED TO AN AUTHORIZED TOYOTA DEALER WHERE THE VEHICLE WAS INSPECTED TWO WEEKS FOLLOWING THE CRASH. THE TECHNICIAN ADVISED THAT THE RESULTS WOULD NOT BE AVAILABLE FOR 30-45 DAYS. THE CONTACT WAS AWAITING THE RESULTS OF THE INSPECTION. THE FAILURE AND CURRENT MILEAGES WERE APPROXIMATELY 49,000.

**Location of Incident:** TAMPA, FL

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2003 TOYOTA AVALON. THE CONTACT TOOK THE VEHICLE TO THE DEALER TO HAVE THE BRAKES REPLACED. THREE MONTHS AFTER THE BRAKES WERE REPLACED THE VEHICLE ACCELERATED AND CRASHED INTO ANOTHER VEHICLE. THE CONTACT STATED THAT THE VEHICLE BECAME DIFFICULT TO STOP WHEN THE BRAKES WERE APPLIED. THE CONTACT AND THE DRIVER OF THE OTHER VEHICLE WERE INJURED. A LOCAL MECHANIC NOTICED THAT THE BRAKE CALIPERS DID NOT HAVE ANY SCREWS TO HOLD THEM IN PLACE WHILE DRIVING. THE DEALER CONFIRMED THAT THE SCREWS WERE NOT PROPERLY PLACED IN THE CALIPERS. THE CONTACT STATED THE MANUFACTURER WOULD NOT OFFER ANY ASSISTANCE. SINCE THE DEALER DID NOT REPAIR THE BRAKES PROPERLY. THE FAILURE MILEAGE WAS 60,000.

**NHTSA Summary:**

I WAS DRIVING ON CRUISE CONTROL ON A HIGHWAY (APPROX. 60MPH) IN MY 2003 TOYOTA COROLLA S. SUDDENLY, IT STARTED ACCELERATING ON ITS OWN AND STARTED SWERVING. I HIT THE BRAKE PEDAL AND ATTEMPTED TO COUNTER-STEER BUT LOST CONTROL OF THE CAR AND CRASHED FRONT-END INTO THE GUARD RAIL, THEN THE CAR STARTED SPINNING AND I BELIEVE IT MUST HAVE HIT THE GUARD-RAIL FURTHER DOWN. THE FRONT IS DEMOLISHED. THE DRIVER SIDE WAS BENT IN SO COULD NOT OPEN THE DOOR FULLY. THE BACK BUMPER WAS GONE AND THE PASSENGER SIDE WAS HEAVILY SCRATCHED. THE AIRBAGS NEVER DEPLOYED.

**Vehicle:** 2002 TOYOTA RAV4  
**Location of Incident:** CHICAGO, IL

**NHTSA Summary:**

I'VE HAD MY '02 TOYOTA RAV4 SINCE 2003 AND A FEW DAYS AGO MY CAR STARTED HESITATING AND JERKING OUT OF THE BLUE. AFTER STOPPING AT LIGHTS, I NOTICED THAT AT FIRST I HAD TROUBLE ACCELERATING, CAR WOULD HESITATE, THEN ALL OF A SUDDEN IT WOULD LURCH FORWARD JUMPING TO 3000-4000 RPM'S. I WAS AFRAID THAT I WOULD GET REAR-ENDED AND THEN I ALMOST SLAMMED INTO THE CAR IN FRONT OF ME. I AM AFRAID TO TAKE MY CAR ON THE HIGHWAY WITH THE SLOW ACCELERATING AND THEN SUDDEN JERKING AND SPEED. I'M TAKING MY CAR TO THE DEALERSHIP TOMORROW TO GET THE ECM AND TRANSMISSION CHECKED OUT GIVEN THE TOYOTA TECHNICAL SERVICE BULLETIN THAT ISSUED IN 2006 INVOLVING FAULTY ECM'S (TC002-06). ALTHOUGH MY CAR IS JUST EXPERIENCING THE EARLY STAGES OF THIS MALFUNCTION, THIS IS VERY UNSAFE AND DANGEROUS. TOYOTA KNOWS ABOUT IT AND SHOULD ISSUE A RECALL.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**  
I WAS ON HIGHWAY 101 DRIVING HOME RECENTLY IN MY 97 4RUNNER WITH 200,000+ MILES ON IT AFTER A FULL SERVICING AT TOYOTA OF SANTA CRUZ AND MY ACCELERATOR STUCK, IDLING AT 3-4K RPM. AFTER THE PANIC MODE OF NOT BEING ABLE TO STOP AND REALIZING THE BRAKES WILL NOT STOP A REVVING ENGINE, I PUT IT IN NEUTRAL AND SLOWED THE VEHICLE AS THE ENGINE REVVED. I PUT IT BACK IN DRIVE AND IT SEEMED TO BE OK. I GOT TO AN AREA WHERE I COULD TEST IT OUT SAFELY AND THE SAME THING HAPPENED AND I HAD TO PUT IT NEUTRAL AGAIN. I CONTINUED TO DRIVE, BUT IT FINALLY FROZE AT 3-4K RPM AND I HAD TO PULL TO THE SIDE AND GET TOWED. I HAD IT TOWED TO TOYOTA OF SANTA CRUZ AND THE NEXT DAY WAS INFORMED THAT THE BRAIDING ON THE THROTTLE CABLE CAME APART IN THE THROTTLE HOUSING AND THE MAINTANENCING WOULD NOT HAVE FOUND THE PROBLEM. THE FIX WAS RELATIVELY INEXPENSIVE, \$200 AND THE TOW WAS \$200. THAT WOULD NOT BE A PROBLEM IF IT HADN'T BEEN SUCH A SERIOUS SAFETY HAZARD, BUT THIS WAS A MAJOR SAFETY HAZARD NOT ONLY TO MYSELF, BUT TO ANYONE THAT I WAS ON THE ROAD WITH. I UNDERSTAND THAT THE VEHICLE IS AN OLDER VEHICLE, BUT I'M GUESSING THAT THIS IS NOT THE 1ST TIME THAT THIS HAS HAPPENED, AND MY WORST THOUGHT IS THAT POSSIBLY MY DAUGHTER, GIRLFRIEND (WHICH IS A NEW DRIVER) OR ANYONE ELSE FOR THAT MATTER COULD HAVE BEEN DRIVING THE VEHICLE AND WHO KNOWS WHAT MAY HAVE HAPPENED. SO, IT LOOKS LIKE TOYOTA HAS QUITE A FEW SAFETY ISSUES THAT THEY HAVE BEEN IGNORING FOR QUITE A FEW YEARS. ON TOP OF THAT, IT SEEMS THAT THEY SHOULD HAVE AT LEAST PAID FOR THE REPAIRS FOR SENDING ME OUT IN THEIR DEATH TRAP WITH NO WARNING. I'M GOING TO BE BUYING ANOTHER CAR SOON AND I WILL TO THINK TWICE ABOUT BUYING ANOTHER TOYOTA.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10347893  
**Date of Incident:** 20100713  
**Vehicle:** 2008 TOYOTA TACOMA  
**Location of Incident:** CASA GRANDE, AZ

**NHTSA Summary:**  
SINCE SEPTEMBER OF 2007, I DROVE A 2008 TOYOTA TACOMA. JULY 13, 2010 AT APPROXIMATELY 8:55 A.M., I WAS STEPPING ON MY BRAKE TO COME TO A STOP BEHIND A VEHICLE AT A STOP SIGN IN A RESIDENTIAL AREA. I STARTED BRAKING SLOWLY AS USUAL. IT APPEARED THE BRAKES WERE WORKING BUT NOT CATCHING AS FAST AS USUAL SO I PUT EXTRA PRESSURE ON THE BRAKE. GETTING TOO CLOSE THAN I SHOULD BE FOR A STOP, I PUSHED THE BRAKE TO THE FLOOR & MY TRUCK DIPPED A BIT APPEARING TO COME TO A STOP BUT THEN KEPT ROLLING & HIT THE CAR IN FRONT OF ME. THE CAR SEEMED TO MOVE FROWARD JUST BEFORE THE TAP AS IF IT WERE GOING TO MAKE THE TURN AT THE STOP SIGN SO THE IMPACT WAS LOW. THE CAR THEN STOPPED BUT SINCE MY TRUCK HADN'T, ALTHOUGH MY FOOT WAS STILL HAD THE BRAKE TO THE FLOOR, I PUMPED MY BRAKE AND STOMPED IT TO THE FLOOR AGAIN AND MY TRUCK LAUNCHED OUT SLAMMING INTO THE CAR AGAIN. THIS WAS A LOW IMPACT COLLISION IN A RESIDENTIAL AREA COMING TO A STOP SIGN IN THE MORNING ON MY WAY TO WORK. THE BRAKES HAD FAILED PRIOR TO THE ACCELERATION ISSUE THAT FOLLOWED. MY INSURANCE COMPANY & TOYOTA CLAIM TOYOTA IS THE ONLY COMPANY ABLE TO RUN ANY TESTS ON THE VEHICLE TO INSPECT MY TRUCK. TOYOTA WRITES THAT IT IS THEIR UNDERSTANDING MY ACCIDENT WAS CAUSED WHEN MY VEHICLE ACCELERATED & REAR ENDED ANOTHER VEHICLE. THAT'S ONLY A PORTION OF MY CLAIM. THEY OVERLOOKED THE INITIAL CAUSE OF THE BRAKE NOT CATCHING. I UNDERSTAND THAT IN SOME CASES PEOPLE PANIC & STEP ON THE ACCELERATOR. EVEN IF THAT HAD HAPPENED CAUSING THE SECOND HIT, THE FIRST HIT THAT MAY HAVE CAUSED ANY PANIC WAS BECAUSE THE BRAKE DID NOT WORK. THE LETTER REGARDING

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**

2004 TOYOTA PRIUS ACCELERATES DUE TO GAS PEDAL GETTING STUCK IN THE FLOOR MAT. THIS MORNING I WAS DRIVING MY TOYOTA PRIUS 2004 THAT I BOUGHT FROM THE ORIGINAL OWNER WHO MENTIONED ALL RECALL ISSUES WERE ADDRESSED BY TOYOTA DEALERSHIP. HE MENTIONED THE DEALER SHAVED OFF THE GAS PEDAL TO MAKE IT SHORTER. BUT TODAY, WHILE ON I 495 GOING EASTWARDS JUST BEFORE ENTERING THE HOV LANE, I PRESSED THE GAS PEDAL ALL THE WAY DOWN TO OVER TAKE ANOTHER SLOW VEHICLE. THE CAR ENGINE KEPT RAISING NOISE, AND CAR STARTED TO ACCELERATE ON ITS OWN. I BRAKED, THE CAR SLOWED A BIT BUT ENGINE KEPT RUNNING FAST. I REALIZED THIS IS POTENTIALLY SAME ISSUE THAT PEOPLE REPORTED ON PRESS AND WITH LOT OF STRUGGLE TRYING TO BRAKE AND SLOW DOWN, REALIZED AND PUT THE CAR INTO N, NEUTRAL POSITION. I AM LUCKY TO KNOW THIS FROM MEDIA REPORTS, OTHERWISE I WOULD HAVE BEEN ANOTHER DEAD GUY ON A PRIUS! WHILE I WAS STILL ON HIGHWAY, NEEDING TO MAINTAIN SPEED I PUT THE CAR BACK ON DRIVE MODE, D AND THE PROBLEM CONTINUED. I REALIZED, I CAN LIFT THE GAS PEDAL WITH MY LEFT FOOT, AND SUCCEEDED IN UNTANGLING THE PEDAL FROM THE FLOOR MAT. AFTER I DID THAT IT WAS FINE. I ARRIVED AT WORK, BUT WITH EXTREME SHOCK AND DISAPPOINTMENT. I AM WONDERING HOW THIS PROBLEM CAN STILL REMAIN AFTER A RECALL REPAIR IS DONE ON THIS VEHICLE. THIS IS COMPLETELY UNACCEPTABLE AND MY LIFE WAS IN TOTAL RISK AND I SURVIVED TODAY PURELY BECAUSE OF MY TECHNICAL SKILLS AND KNOWLEDGE ABOUT THIS CAR ISSUE. I AM AN ENGINEER IN PROFESSION, A MECHANICAL ENGINEER WITH A MASTERS DEGREE AND I UNDERSTOOD HOW TO REACT. IF IT WAS FOR MY OTHER FAMILY MEMBERS IN THIS SITUATION THE OUTCOME WOULD HAVE BEEN TOTALLY DIFFERENT. I AM VERY VERY DISAPPOINTED WITH TOYOTA CORPORATION AND ALSO WITH YOU, THE NHTSA FOR NOT MAKING SURE THAT ALL PRIUS OUT THERE ARE SAFETY COMPLIANT. THIS IS REALLY TERRIBLE! ...BECAUSE ITS A KNOWN ISSUE, AND OLD ISSUE THAT SHOULD HAVE BEEN CORRECTED. [XXX] INFORMATION REDACTED PURSUANT TO THE FREEDOM OF INFORMATION ACT (FOIA), 5 U.S.C. 552(B)(6). \*TR

**NHTSA ODI Number:** 10343697  
**Date of Incident:** 20100716  
**Vehicle:** 2008 TOYOTA MATRIX  
**Location of Incident:** TAMPA, FL

**NHTSA Summary:**

SUDDEN ACCELERATION IN 2008 MATRIX AUTOMATIC. FIRST KNOWN FAILURE. CAR BROUGHT NEW IN SEPTEMBER 2007; ODOMETER: 6000 MILES. WHILE DRIVING APPROXIMATELY 35 MPH ON EVEN STRAIGHT SMOOTH ROADWAY, THERE WAS A SUDDEN ACCELERATION TO GREATER THAN 70 MPH. WHEN BRAKES WERE APPLIED, THEY DEPRESSED TO FLOOR WITHOUT ANY EFFECT. CAR CONTINUED TO ACCELERATE RAPIDLY. SHIFTED TO NEUTRAL WITHOUT SUCCESS. CAR SLOWED AFTER BEING PLACED IN REVERSE, COASTED TO A STOP. PLACED GEAR IN 2 AND DROVE SLOWLY HOME - APPROXIMATELY 1/2 MILE. FLOOR MATS WERE NOT NEAR EITHER PEDAL AND WERE KEPT STATIONARY BY HOOKS DESIGNED TO KEEP MATS FROM SHIFTING. CALLED TOYOTA SERVICE DEPARTMENT. TOLD THAT FLOOR MATS WERE THE PROBLEM; TALKED TO SERVICE MANAGERS WHO STATED THAT THE SEQUENCE OF EVENTS DESCRIBED WERE IMPOSSIBLE. NO PROBLEMS WERE KNOWN TO EXIST FOR MATRIX AND GREATER THAN 99% OF SUDDEN ACCELERATION PROBLEMS WERE DUE TO DRIVER ERROR. AFTER A DISCUSSION, THE CAR WAS EVALUATED BY THE SERVICE DEPARTMENT. THE FOLLOWING WAS REPORTED: FLOOR MATS HELD IN PROPER PLACE. NO OBJECTS ON FLOOR. NORMAL BRAKE PEDAL OPERATION. NORMAL ACCELERATOR PEDAL OPERATION. HEALTH CHECK - POWERTRAIN, CHASSIS, ELECTRICAL, NETWORK SYSTEMS - OK. COMPUTER CODES - NO ABNORMALITIES FOUND. NORMAL THROTTLE BODY INSPECTION. TIRES WITH NORMAL WEAR & FUNCTION. PROBLEM WAS NOT DUPLICATED ON TEST DRIVE. WAS TOLD THAT THE CAR IS FUNCTIONING NORMALLY IN ALL AREAS AND HAS NO PROBLEMS. IMPLIED THAT MY EXPERIENCE WAS A MISPERCEPTION OR MISREPRESENTATION. ASSESSMENT: THERE WAS A SIGNIFICANT MALFUNCTION IN THE MATRIX WHICH COULD HAVE LED TO CRITICAL INJURIES OR LOSS OF LIFE. ONLY DUE TO THE TRAFFIC FLOW AT PRECISELY THAT MOMENT, NO ONE WAS INJURED. THE TOYOTA SERVICE DEPARTMENTS DENIED THAT THE PROBLEM EXISTS. RECOMMENDATION: SUDDEN UNEXPECTED ACCELERATION SHOULD BE INVESTIGATED UNTIL AN ANSWER/SOLUTION IS FOUND. THE FINDINGS SHOULD BE SHARED WITH THE PUBLIC. THE COST FOR REPAIRS SHOULD BE PAID BY TOYOTA.

**Vehicle:** 2010 TOYOTA COROLLA  
**Location of Incident:** SYRACUSE, NY

**NHTSA Summary:**

I WAS DRIVING MY 2010 TOYOTA COROLLA DOWN THE ROAD. WHEN I BEGAN TO APPROACH A RED LIGHT AT INTERSECTION, I APPLIED BRAKES TO SLOW VEHICLE DOWN. INSTEAD OF SLOWING DOWN, HOWEVER, THE CAR BEGAN TO RAPIDLY ACCELERATE. THIS REQUIRED ME TO PASS TWO VEHICLES WAITING AT RED LIGHT IN ORDER TO AVOID COLLISION. REMEMBERING WHAT TOYOTA CO SAID TO DO WHEN THEIR VEHICLES ARE SPEEDING OUT OF CONTROL, I PUT CAR IN NEUTRAL AND CONTINUED TO APPLY BRAKES, WHICH HAD NO EFFECT WHATSOEVER. I CONTINUED TO SPEED DOWN DOUBLE-LINED ROAD, PASSING VEHICLES IN MY LANE. THEN WHEN OTHER VEHICLES WERE COMING IN OTHER LANE IN MY DIRECTION, I WAS FORCED TO SLAM FULL SPEED INTO VEHICLE IN FRONT OF ME IN MY LANE. THIS CAUSED MY VEHICLE AND THAT VEHICLE TO ROLL OVER. WHEN MY FAMILY AND I HAD FIRST HEARD OF THE RECALLS WITH TOYOTA IN FEBRUARY OF 2010, WE IMMEDIATELY TOOK CAR TO TOYOTA DEALER IN FL WHERE WE VACATIONED FOR THE WINTER. WE WERE ASSURED THAT SINCE OUR VIN INDICATED IT WAS JAPANESE-MADE, WE WERE NOT PART OF THE STICKING ACCELERATOR RECALL. THEY TOLD US TO REMOVE DRIVER-SIDE FLOORMAT ANYWAY, WHICH WE IMMEDIATELY DID. AS YOU CAN SEE, WE TOOK EVERY PRECAUTION POSSIBLE, AND AS MY CAR WAS CAREENING OUT OF CONTROL, I DID EVERYTHING I WAS SUPPOSED TO DO AND IT DID NOT MATTER. AND PLEASE DO NOT INSULT VICTIMS OF THESE TRAGEDIES BY INDICATING THAT IT IS POSSIBLY DRIVER ERROR. CLEARLY THERE IS SOMETHING MAJORLY WRONG HERE AND THESE VEHICLES NEED TO BE TAKEN OFF THE ROAD.

DATE OF INCIDENT: SATURDAY, JULY 17, 2010 AT APPROXIMATELY 12:45 P.M. INCIDENT DESCRIPTION: COMING FROM A COMPLETE STOP, TURNED THE STEERING WHEEL TO PARK A 2004 TOYOTA HIGHLANDER INTO A PARKING SPOT. THE DRIVER GENTLY/MINIMALLY TOUCHED THE ACCELERATOR PEDAL TO PULL INTO THE PARKING SPOT. THE VEHICLE SUDDENLY ACCELERATED WITHOUT ANY ADDITIONAL FORCE PLACED ON THE ACCELERATOR PEDAL. THE DRIVER IMMEDIATELY APPLIED THE BRAKES IN AN ATTEMPT TO STOP THE VEHICLE. PRIOR TO THE VEHICLE COMING TO A COMPLETE STOP, THE FRONT OF THE VEHICLE STRUCK THE METAL PART OF A SIGN. THIS IS THE FIRST OCCURRENCE OF SUDDEN ACCELERATION SINCE PURCHASING THE VEHICLE USED FROM A DEALERSHIP. THE VEHICLE HAS NOT BEEN SCHEDULED FOR REPAIR AT THIS TIME.

**NHTSA Summary:**

INCIDENT = CAR 2010 TOYOTA RAV4 UNINTENDED ACCELERATION HAPPENED 3 TIMES. FIRST TIME IT HAPPENED BEFORE I BROUGHT CAR TO SERVICE STATION FOR RECALL REPAIR. SECOND TIME IT WAS AFTER RECALL. THIRD TIME HAPPENED JUST ON JULY 17, 2010 ABOUT 9 PM. I WAS STANDING AT TRAFFIC LIGHT WHEN RPM WENT UP AND CAR START MOVING FORWARD I PUT IT IN NEUTRAL AND HAD TO TURN OFF THE IGNITION BECAUSE RPM STILL WERE VERY HIGH. PLEASE ADVISE WHAT SHOULD I DO. MY WIFE AND KIDS DRIVING MY CAR SOMETIMES AND I KNOW FOR SURE THAT THEY WOULD GET

C-2364

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

IN AN ACCIDENT IF THAT PROBLEM HAPPENS WITH THEM. DAMAGE RESULTING = MORAL DISTRESS FOR ME. MY WIFE EXPERIENCED THAT ALL 3 TIMES, VERY DEPRESSED AND SCARED TO EVEN BE IN THE CAR, NEVER MIND DRIVING IT. CAR WAS SERVICED IN MILLENNIUM TOYOTA FOR ACCELERATION RECALL. I NEED AN ADVICE WHERE CAN I CHECK THIS CAR BECAUSE IT LOOKS LIKE TOYOTA IS UNABLE TO IDENTIFY THE SOURCE OF THE PROBLEM. I ALSO WOULD LIKE TO GET DATA RELATED TO INCIDENT FROM THE CAR COMPUTER BY SECOND PARTY BEFORE TOYOTA WOULD DO THE SERVICE BECAUSE WHEN I BROUGHT MY CAR FOR RECALL I WAS TOLD THAT THEY HAD TO FLASH THE COMPUTER. MY UNDERSTANDING OF FLASHING COMPUTER IS THAT MEMORY WAS FLASHED AND OLD INFORMATION IS NOT RECOVERABLE. PLEASE ADVICE.

**NHTSA ODI Number:** 10344969  
**Date of Incident:** 20100719  
**Vehicle:** 2010 TOYOTA RAV4  
**Location of Incident:** BAY VILLAGE, OH

**NHTSA Summary:**

AT APPROXIMATELY 5:00 PM ON JULY 19TH, 2010, OUR TOYOTA RAV 4 (MODEL YEAR 2010 MILEAGE 6450) EXPERIENCED AN INCIDENT OF UNINTENDED ACCELERATION. DRIVING HOME WITH 4 MEMBERS OF THE FAMILY, WE APPROACHED AN INTERSECTION AND THE DRIVER BEGAN TO APPLY THE BRAKE. THE ROADWAY WAS CROWDED, SO OUR SPEED WAS FORTUNATELY MINIMAL (APPROXIMATELY 25 MPH). WHILE APPLYING THE BRAKE, THE ENGINE SUDDENLY BEGAN TO REV AT A HIGH RATE. THE DRIVER SAID THE CAR WAS NOT RESPONDING WELL TO THE BRAKE AND WE MAY NOT STOP IN TIME AS WE APPROACHED THE INTERSECTION. INSTINCTIVELY, I LOOKED AT THE DRIVER'S FOOT TO SEE IF THERE WAS SOME PROBLEM WITH HIM HITTING THE GAS PEDAL, BUT COULD CLEARLY SEE BOTH FEET AND ONLY THE BRAKE BEING APPLIED. THE DRIVER PUMPED THE BRAKE, LIFTING HIS FOOT FROM THE BRAKE AND REAPPLYING, WE JOLTED FORWARD HE LIFTED HIS FOOT FROM THE BRAKE OF THE REVING CAR AND THEN REAPPLIED THE BRAKE. THE ENGINE SUDDENLY SLOWED AND RETURNED TO A NORMAL IDLE AND WE WERE ABLE TO STOP WITHOUT HITTING ANYONE. WE DID NOT FILE A POLICE REPORT, BUT CONTACTED THE DEALER THE FOLLOWING MORNING AND WERE INSTRUCTED TO BRING THE CAR IN FOR INSPECTION THE FOLLOWING DAY. NOT SURPRISINGLY, AS THEY APPEAR INCAPABLE OF DETECTING THE PROBLEM WITH THEIR DIAGNOSTICS, NO PROBLEM WAS FOUND AND WE WERE ASKED TO RECLAIM THE CAR A FEW DAYS LATER. WE TOLD THE DEALERSHIP THAT WE CONSIDER THIS LEASED CAR TO BE UNSAFE AND DO NOT WANT ANYTHING TO DO WITH THE CAR AND WISHED TO RETURN IT AS IT IS CLEARLY DEFECTIVE. 4 MEMBERS OF MY FAMILY WITNESSED THE EVENT AND NO ONE IS GETTING IN THE CAR AGAIN. THE TOYOTA DEALERSHIP'S CUSTOMER SERVICE REPRESENTATIVE SAID THEY ARE ONLY DEALER, THEY ARE NOT THE MANUFACTURERS AND WE HAD TO ADDRESS ANY CONCERNS REGARDING A RETURN TO THE MANUFACTURER, IN THEIR OPINION IT CHECKED OUT FINE. THE CAR HAD ALREADY BEEN SERVICED BY THE DEALER SEVERAL MONTHS PRIOR, TO ADDRESS THE RAV 4 RECALL FOR THE UNINTENDED ACCELERATION PROBLEM. CLEARLY IN OUR CASE THEIR FIX DID NOT FIX THE PROBLEM.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:** ACCELERATOR STICKS. WHEN DEPRESSING ACCELERATOR PEDAL, IT STICKS WITHOUT MOVING. THE ONLY WAY TO GET IT TO MOVE IS BY PUTTING EVER INCREASING PRESSURE ON THE PEDAL UNTIL IT SUDDENLY BREAKS FREE AND THE CAR LURCHES FORWARD.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10344511  
**Date of Incident:** 20100720  
**Vehicle:** 2004 TOYOTA CAMRY  
**Location of Incident:** OKLAHOMA CITY, OK

**NHTSA Summary:**

WHILE DRIVING THE VEHICLE IT WOULD SUDDENLY ACCELERATE AND THEN SLOW DOWN ALMOST TO A STOP WITHOUT DRIVER PRESSURE ON THE ACCELERATOR PEDAL CHANGING. THIS PROBLEM OCCURRED EACH TIME THE VEHICLE WAS DRIVEN. THE SERVICE DEPARTMENT WHERE THE VEHICLE WAS PURCHASED STRONGLY RECOMMENDED THE VEHICLE NOT BE DRIVEN BEFORE REPAIRS COULD BE MADE. THE VEHICLE WAS LEFT AT THE SERVICE DEPARTMENT WHERE THEY DIAGNOSED THE PROBLEM AS A DEFECTIVE THROTTLE PEDAL CONTROL, P/N 78010-33010. I AM WAITING ON THE SERVICE DEPARTMENT TO REPAIR THE PROBLEM.

**NHTSA Summary:**

I OWNED A TOYOTA CAMRY FOR 2 YEARS AND HAD 2 INCIDENTS WHEN THE ACCELERATOR STUCK CAUSING ME TO LOSE CONTROL OF THE CAR. AFTER THE 1ST INCIDENT I RETURNED THE VEHICLE TO THE DEALER AND WAS TOLD NOTHING WAS WRONG WITH VEHICLE. THEN THE TOYOTA RECALLS BEGAN AND I CONTACTED TOYOTA AND WAS TOLD MY VEHICLE WAS NOT PART OF THE RECALL EVEN THOUGH I WAS HAVING THE SAME PROBLEMS. I REQUESTED MY VEHICLE BE CHECKED AND WAS TOLD I WOULD HAVE TO PAY FOR ALL COSTS. AFTER THE 2ND INCIDENT I AGAIN RETURNED THE VEHICLE WHERE I WAS TOLD THERE WAS NO MECHANICAL OR ELECTRONIC PROBLEMS IT WAS AN ISSUE WITH PEDAL PLACEMENT AND FLOOR MATS. I SOLD THE CAR BACK TO THE DEALER AT A CONSIDERABLE FINANCIAL LOSS. I AM VERY CONCERNED THIS VEHICLE AND OTHERS LIKE IT ARE BACK ON THE ROAD. UPDATED IVOQ 08/24/10

PULLED INTO PARKING SPACE AND VEHICLE SUDDENLY ACCELERATED AND HOPPED ONTO CURB AND RAN INTO PILLAR AT A RESTAURANT. LUCKILY NOBODY WAS EATING ON THE SIDEWALK WHERE VAN ENDED UP. PLACED VEHICLE INTO PARK AND REMOVED FOOT FROM BRAKE AND VEHICLE CONTINUED TO LUNGE FORWARD.

C-2368

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

IMMEDIATELY HIT BRAKES AGAIN AND A BYSTANDER CAME TO DETERMINE WHAT WAS WRONG. TALKING TO BYSTANDER TO DETERMINE WHAT HAPPENED, I TOOK MY FOOT OFF BRAKE AGAIN AND VEHICLE LUNGED FORWARD (WHILE STILL IN PARK). DECIDED TO SHUT VEHICLE OFF AND HAVE IT TOWED TO A DEALERSHIP. I AM AWAITING A CALL FROM TOYOTA CUSTOMER EXPERIENCE CENTER TO SETUP AN INSPECTION, HOWEVER I WENT TO DEALERSHIP TO PICK UP SOME THINGS OUT OF THE CAR. I INSTRUCTED THE SERVICE AGENT THAT THE VAN WAS NOT TO BE DRIVEN UNTIL THE TOYOTA CUSTOMER EXPERIENCE CENTER INSPECTOR HAD A CHANCE TO LOOK AT THE VAN WITH ALL PARTIES. NEXT THING I KNOW THE SERVICE AGENT HAD PULLED THE VAN INTO THE SERVICE BAY FOR ME TO GRAB MY BELONGINGS OUT OF. I HOPE THIS DID NOT RUIN ANY DATA IN THE COMPUTER ABOUT WHAT HAPPENED IN THE PARKING LOT.

**Date of Incident:** 20100724  
**Vehicle:** 2006 TOYOTA CAMRY  
**Location of Incident:** EATONTOWN, NJ

**NHTSA Summary:**

HESITATION PROBLEM IN 2006 TOYOTA CAMRY. HAPPENS FREQUENTLY. FAILURE TO BE ABLE TO ACCELERATE IN THESE SITUATIONS CAN RESULT IN A REAR OR SIDE COLLISION FROM ONCOMING VEHICLES, ESPECIALLY DURING A MERGE. IT HAPPENS WHEN BACKING OFF ON THE GAS PEDAL, SUCH AS WHEN THE CAR IS ABOUT TO MAKE A TURN ONTO ANOTHER STREET, OR WHEN GAINING ON SLOWER TRAFFIC ON THE HIGHWAY. THE RPM GO WAY DOWN AS THE CAR SLOWS (BY BACKING OFF THE GAS PEDAL - NO BRAKES APPLIED) TO DEAL WITH THE SITUATION. ONCE THE TURN IS COMPLETED, OR THE TRAFFIC IN FRONT STARTS TO PULL AHEAD AGAIN, THE CAR DOES NOT RESPOND TO APPLYING THE ACCELERATOR. IT CAN TAKE FROM A HALF SECOND TO TWO FULL SECONDS BEFORE THE CAR "RECOGNIZES" THAT IT IS BEING TOLD TO SPEED UP - FOR IT TO GIVE MORE RPM AND TO PICK THE RIGHT GEAR TO DO IT IN. IT SEEMS TO BE TRYING TO MAKE UP ITS MIND WHICH GEAR TO USE BEFORE IT ADDS ENOUGH RPM TO ACCELERATE. IT'S LIKE THE RPM WENT DOWN SO LOW WHEN BACKING OFF THE GAS PEDAL THAT THE CAR DOESN'T KNOW WHAT TO DO WHEN IT'S TOLD TO GET BACK TO WORK. WHEN IT FINALLY RESPONDS, THE ENGINE USUALLY KICKS DOWN ONE OR TWO GEARS AND STARTS RACING TO CATCH UP - LIKE THE DRIVER HAS FLOORED IT, WITHOUT HAVING FLOORED IT. THE DEALERSHIP HAS SAID THEY COULDN'T RECREATE THE PROBLEM. TOYOTA DENIES THE PROBLEM EXISTS. YET IT HAPPENS EVERY DAY. I BELIEVE BOTH ARE COVERING UP A PROBLEM.

**NHTSA Summary:**

2010 TOYOTA CAMRY BOUGHT 2 MONTHS BEFORE RECALL NEWS / 5,000 MILES / HAD RECALL WORK DONE AT A TOYOTA DEALERSHIP ON MARCH 4, 2010 / ON JULY 25, 2010 WHILE IN LINE AT DRIVE-THROUGH, I HAD MY FOOT ON THE BRAKE WAITING MY TURN IN LINE. SUDDENLY, THE ENGINE BEGAN TO REV, EVEN THOUGH I DIDN'T HAVE MY FOOT ON THE ACCELERATOR BUT DID HAVE MY FOOT ON THE BRAKE. THE BACK TIRES BEGAN SPINNING, AND ALTHOUGH I WAS MASHING DOWN ON THE BRAKES AS HARD AS I COULD, THE VEHICLE MOVED FORWARD (PRODUCING SKID MARKS) AND HIT THE TRUCK IN FRONT OF ME. MY CAMRY PUSHED INTO THE TRUCK'S TRAILER HITCH, BENDING THE REBAR IN THE FRONT OF MY CAR, WHICH PUSHED UP THE RADIATOR, ETC. THERE WAS A WITNESS WHO WAS STANDING NEXT TO THE DRIVE-IN WINDOW BECAUSE THE RESTAURANT HAD MESSED UP HIS ORDER. HE REPORTED TO THE OFFICER THAT CAME TO THE SCENE THAT HE HEARD THE CAMRY'S ENGINE START REVVING, AND WHEN HE LOOKED TO SEE WHY, HE COULD SEE THAT I WAS TRYING TO GET THE CAR TO STOP. OBVIOUSLY, THE TOYOTA CAMRY RECALL WORK IS NOT EFFECTIVE. MY GRANDDAUGHTER (WHO WAS IN THE CAR) AND I COULD HAVE BEEN KILLED IF THIS HAD HAPPENED AT HIGHER SPEED.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**  
ON 7/29/2010 MY 2010 LEXUS RX 350 EXPERIENCED UNINTENDED EXHILARATION CAUSING A COLLISION WITH A PARKING LOT COLLISION SAFETY POST (METAL PIPE FILLED WITH CONCRETE) CAUSING EXTENSIVE FRONTAL DAMAGE OF THE VEHICLE. THE INCIDENT OCCURRED AT APPROXIMATELY 1245 ON A CLEAR DAY DRY PAVEMENT WITH NO OTHER VEHICLES IN THE PARKING LOT NEAR THE SCENE OF THE COLLISION. THE INCIDENT OCCURRED WHEN I WAS PULLING INTO THE A PARKING SPOT MAKING RIGHT HAND TURN. AS I WAS ENTERING THE PARKING SPOT AT APPROXIMATELY 1/2 WAY I TAPPED THE ACCELERATOR PEDAL TO COMPLETE THE PARKING MANUEVER AND THAT IS WHEN THE CAR LUNGED FORWARD WITH A SPEED INDICATIVE OF HARD ACCELERATION COLLIDING WITH THE POST BEFORE I COULD TAKE ANY ACTION TO SLOW OR STOP THE VEHICLE. THE ACCELERATION DETAILED ABOVE HAS HAPPENED ONCE BEFORE WHEN MY HUSBAND WAS DRIVING THE VEHICLE AND EXPERIENCED SUDDEN ACCELERATION. WE WERE BOTH PUZZLED BY THE EVENT BUT DECIDED TO DISMISS IT SINCE IT OCCURRED DURING THE NATION WIDE MEDIA BLITZ ABOUT TOYOTA VEHICLES UNINTENDED ACCELERATION, AND REALLY DID NOT WANT TO BUY IN INTO MASS HYSTERIA. HIND SIGHT BEING 20/20 MAYBE WE SHOULD HAVE.

INFO FROM DISCOVER MAGAZINE BLOGS - REPORT: MANY OF TOYOTA'S ACCELERATION PROBLEMS DUE TO DRIVER ERROR

"Jeff Faulkner Says:  
July 31st, 2010 at 9:18 am

My 2009 Tacoma accelerated on me last night and scared the crap out of me. I was not trying to brake. I was entering the highway on an entrance ramp and was accelerating purposefully. When I reached a comfortable speed I let up on the gas and the truck did not slow down, but kept accelerating. I pressed the brake and it kept going. I put in neutral and the brakes worked, but the engine kept revving. I was able to stop on the shoulder of the highway and when I put it in park the engine kept revving. I didn't have my foot on the gas or the brake. This is clearly not a driver error situation, nor is it a floor mat problem nor is it that the gas pedal is too big. This is clearly a computer malfunction. I had my two daughters in the truck with me and was about to be in the middle of a very busy 7 lane highway. Thank God it happened when it did, before I entered the highway. Thank God I was able to get it stopped. If I were looking for money, I would have had to hire an accident first, which could have killed my girls, me, or someone else. You people who think this is a conspiracy by some Toyota drivers make me sick to my stomach."

**Toyota ID Number:**  
**NHTSA ODI Number:** 10349005  
**Date of Incident:** 20100731  
**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** LORTON, VA

**NHTSA Summary:**

I GOT IN THE CAR AND ATTEMPTED TO MOVE IT FROM THE GARAGE TO MY DRIVEWAY. WHEN I STEPPED ON THE ACCELERATOR THE CAR SURGED AND SPIRALED OUT OF CONTROL. THE ACCELERATOR 'LOCKED' AND I WAS UNABLE TO STOP THE VEHICLE AS THE BRAKE WOULD NOT WORK. THE CAR CRASHED IN MY NEIGHBOR'S YARD AGAINST HIS TREE.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10350853  
**Date of Incident:** 20100731  
**Vehicle:** 2004 LEXUS ES330  
**Location of Incident:** VANCOUVER, B.C., CANADA, 00

**NHTSA Summary:**

ON A SUNNY SATURDAY AFTERNOON, JULY 31, 2010, I ATTEMPTED TO MAKE A U-TURN IN THE PARKING LOT. WHILE I TURNED LEFT, PULLING INTO A PARKING SPACE, MY VEHICLE SURGED FORWARD WITH A SUDDEN ACCELERATION AND RAN OVER THE CURB. I STEPPED ON THE BRAKE PEDAL, BUT IT DID NOT STOP. I CHANGED THE GEAR TO THE "P" POSITION AND HEARD A LOUD NOISE WHEN THE GEAR WAS MOVED THROUGH THE "N" POSITION. IT STRUCK A LAMP POST BEFORE STOPPING. THE VEHICLE WAS INSPECTED AT LEXUS OF BELLEVUE, WA, ON AUGUST 11, 2010, BUT THEY DENIED ANY VEHICLE MALFUNCTION.

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**

TL- THE CONTACT OWNS A 2004 LEXUS RX 330. THE CONTACT WAS DRIVING AT 5 MPH INTO A PARKING LOT WHEN THE VEHICLE BEGAN IDLING EXTREMELY HIGH AND ABNORMALLY LOUD. THE VEHICLE THEN ACCELERATED WHILE THE CONTACT HAD HER FOOT ON THE BRAKE AND HIT A STONE WALL. THE CONTACT SUSTAINED A INJURIES TO HER KNEE. THE PASSENGER SUSTAINED A MINOR INJURY TO HIS TONGUE. THERE WERE FRONT END DAMAGES AND THE VEHICLE WAS TOWED TO A COLLISION CENTER. THE DEALER STATED THAT THEY WILL NOT WORK ON THE VEHICLE UNTIL THERE IS AN OPEN INVESTIGATION. THERE HAVE BEEN NO DIAGNOSIS AND NO REPAIRS. THE FAILURE AND CURRENT MILEAGE WAS 111,000. CV

**Additional Summary:****Toyota ID Number:**

**NHTSA ODI Number:** 10347340  
**Date of Incident:** 20100802  
**Vehicle:** 2010 TOYOTA COROLLA  
**Location of Incident:** MADISON, WI

**NHTSA Summary:**

DRIVING 2010 TOYOTA COROLLA MANUAL TRANS ON INTERSTATE ON 8/2/10 AT 2:30 P.M. HAD CRUISE CONTROL ON GOING 70 MPH. ENGAGED CLUTCH, SHIFTED TO NEUTRAL AND BRAKED IN PREPARATION TO STOP FOR TRAFFIC JAM AHEAD. BRAKE DID NOT ENGAGE AND VEHICLE CONTINUED AT 70 MPH WITHOUT TOUCHING ACCELERATOR. CONTINUED ATTEMPTS TO BRAKE, DOWNSHIFT, TURN OFF CRUISE CONTROL WITH NO DECREASE IN SPEED. INITIALLY UNABLE TO DOWNSHIFT BUT THEN DID GET INTO LOWER GEAR BUT WITH NO RESULTING DECREASE IN SPEED. NOR DID THE ENGINE MAKE ANY NOISE INDICATING THAT I HAD DOWNSHIFTED. I WAS ABLE TO GET ONTO SHOULDER WHERE I CONTINUED TO GO 70 MPH THEN GOT OFF AT AN EXIT THAT HAD AN INCLINE. PART WAY UP THE HILL FELT SOMETHING DISENGAGE AND THE CAR SLOWED- NOT JUST DUE TO THE INCLINE I THINK. I WAS THEN ABLE TO PUT ON EMERGENCY BRAKE AND THE CAR STOPPED. AFTER SEVERAL MINUTES I TRIED THE BRAKES AGAIN AND THEY WORKED. I DID NOT RENEGAGE THE CRUISE CONTROL AFTER THIS. PLEASE NOTE THAT THIS OCCURRED AFTER I HAD TAKEN THE CAR IN FOR BOTH TOYOTA RECOMMENDED RECALLS REGARDING THE FLOOR MATS AND PUTTING A MODIFICATION IN THE GAS PEDAL. WHEN I WENT IN FOR RECALLS I ASKED ABOUT PLACEMENT OF A COMPUTER BRAKE OVERRIDE SYSTEM AND WAS FIRST TOLD THAT FIX WAS NOT YET AVAILABLE. THEN TOLD IT WAS NOT RELEVANT TO MY CAR, AND, AFTER THE ABOVE EVENT TOLD AGAIN THAT TOYOTA DID NOT YET HAVE THE TECHNOLOGY AVAILABLE TO DO THIS FIX ON COROLLAS. THE DEALERSHIP HAVE THIS FAR BEEN UNPLEASANT AND SUGGESTING THAT I MIGHT NOT BE TELLING THE TRUTH.

**Additional Summary:****Toyota ID Number:**

**NHTSA ODI Number:** 10347260  
**Date of Incident:** 20100803  
**Vehicle:** 2010 LEXUS RX  
**Location of Incident:** MONROVIA, CA

**NHTSA Summary:**

TL-THE CONTACT OWNS A 2010 LEXUS RX450 HYBRID. THE CONTACT STATED THAT WHILE DRIVING IN A PARKING LOT, THE VEHICLE SUDDENLY ACCELERATED. SHE WAS UNABLE TO BRAKE AND THE VEHICLE MOVED ONTO A ROAD FOR A BLOCK BEFORE SHE WAS ABLE TO STOP AFTER REPEATED ATTEMPTS TO BRAKE. ALSO, THE PASSENGER FRONT TIRE EXPLODED DURING THE FAILURE. THE CONTACT CALLED ROADSIDE SERVICE AND THE VEHICLE WAS TOWED TO AN AUTHORIZED DEALERSHIP WHERE IT

**Location of Incident:** TAUNTON, MA

**NHTSA Summary:**

TL- THE CONTACT OWNS A 2010 TOYOTA COROLLA. THE CONTACT STATED THAT WHILE TURNING INTO A PARKING LOT WITH HIS FOOT ON THE BRAKE ALL OF A SUDDEN THE VEHICLE ACCELERATED ON ITS OWN WITH HIS FOOT ON THE BRAKE THE WHOLE TIME. THE VEHICLE BARELY MISSED STRIKING A PEDESTRIAN AND THEN CRASHED INTO A STORE WALL. THE CONVENIENCE STORE WHERE THIS OCCURRED HAS THE INCIDENT ON TAPE. TOYOTA WAS CONTACTED AND FILED CASE # 1008061785. THIS IS THE THIRD OCCURANCE, IT HAPPENED TWO TIMES BEFORE THE RECALL REMEDY FOR NHTSA CAMPAIGN ID NUMBER: 10V023000, VEHICLE SPEED CONTROL ACCELERATOR PEDAL AND THIS THIRD OCCURANCE WAS AFTER THE RECALL REMEDY. THE VEHICLE IS CURRENTLY

C-2378

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AT THE OWNERS HOME, AND HE WILL NOT DRIVE IT. THE CURRENT AND FAILURE MILEAGES WERE APPROXIMATELY 9,000. RD

**Additional Summary:****Toyota ID Number:**

**NHTSA ODI Number:** 10350621  
**Date of Incident:** 20100804  
**Vehicle:** 2002 LEXUS RX300  
**Location of Incident:** SIERRA VISTA, AZ

**NHTSA Summary:**

I EXPERIENCED SUDDEN UNINTENDED ACCELERATION IN MY 2002 LEXUS, RX300 ON 4 AUG, 2010. I WAS IN A PARKING LOT MAKING A LEFT TURN INTO THE PARKING AREA WHEN THE VEHICLE REVVED FULL THROTTLE AND SURGED FORWARD. I APPLIED THE BRAKES FULLY AND WHEN THE VEHICLE DID NOT FULLY STOP I PUT THE VEHICLE IN NEUTRAL WHILE STILL APPLYING THE BRAKES AND STOPPED THE VEHICLE. IT WAS STILL IDLEING FULL THROTTLE. I SHUT IT OFF AND LET IT SIT A FEW MINUTES AND STARTED IT AGAIN. IT WENT TO FULL THROTTLE AND WOULD NOT THROTTLE DOWN. I THEN WENT UNDER THE HOOD AND TRIED TO JIGGLE THE ACCELERATOR LINKAGE BUT TO NO AVAIL. I CALLED THE LOCAL TOYOTA SERVICE DEPARTMENT AND THEY TOLD ME TO GET THE VEHICLE THERE. I HAD IT TOWED TO THE SERVICE CENTER. THEY WOULD NOT DO ANY WORK ON IT OR EVEN LOOK AT IT BECAUSE IT WAS A LEXUS AND THEY HAD BEEN INSTRUCTED NOT TO DO ANYTHING WITH UNINTENDED ACCELERATION PROBLEMS ON ANY TYPE OF VEHICLE THAT WAS NOT A TOYOTA EVEN THOUGH LEXUS IS MANUFACTURED BY TOYOTA. I HAD TO GET IT TO A LEXUS DEALER IN TUCSON, AZ (~80 MILES AWAY) FOR DIAGNOSIS. THE LEXUS DEALER SERVICE CENTER DIAGNOSED THE PROBLEM AS A BENT THROTTLE CABLE. SOME HOW A COVER HAD COME LOOSE AND THE CABLE WAS EXPOSED FROM ITS SHEATH AND BENT. I AM SURE THE LEXUS OF TUCSON SERVICE MANAGER, MR. PAUL MINOR COULD EXPLAIN IT EXACTLY BUT THAT IS MY INTERPRETATION OF WHAT HE EXPLAINED TO ME. I ASKED HIM HOW THIS COULD HAVE HAPPENED AND HE SAID HE DID NOT KNOW. THE REPAIR WAS ACCOMPLISHED FOR ~\$365.00 PARTS AND LABOR. I WILL HAVE THE CAR BACK ON FRIDAY 20 AUG, 2010. I WILL HAVE THE OLD/BAD PARTS ON HAND. I FEEL THIS IS A PROBLEM IN DESIGN THAT LEXUS SHOULD TAKE RESPONSIBILITY TO REIMBURSE ME AND TO ISSUE A SAFETY RELEASE AND RECALL. THERE SHOULD BE A FAIL SAFE IF THE THROTTLE CABLE SHOULD BEND. IN MY CASE THE BENT CABLE CAUSED A FULL THROTTLE CONDITION AND SUDDEN UNINTENDED ACCELERATION. I WAS FORTUNATE THAT I WAS AWARE OF WHAT TO DO IN THAT SITUATION AND THAT A PEDESTRIAN OR ANOTHER VEHICLE

**Additional Summary:****Toyota ID Number:**

**NHTSA ODI Number:** 10348038  
**Date of Incident:** 20100805  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** MELBOURNE, FL

**NHTSA Summary:**

2005 TOYOTA CAMRY LE. APPROXIMATELY 1 TO 2 SECONDS AFTER SHIFTING INTO REVERSE, ENGINE WENT INTO HIGH RPM AND ACCELERATED OUT OF GARAGE. DRIVER ALREADY HAD FOOT ON BRAKE PEDAL AND BRAKED HARD LEAVING SKID MARK (FROM RIGHT FRONT TIRE) OF APPROXIMATELY 24 - 30 INCHES IN LENGTH ON COATED GARAGE FLOOR. RIGHT SIDE MIRROR WAS RIPPED FROM CAR. REQUIRED APPROX. 10 FEET TO STOP. ENGINE DID NOT REMAIN AT HIGH RPM. (A/C MAY HAVE BEEN "ON". ENGINE WAS "COLD" - I.E., 1ST TIME STARTED THAT DAY; HOWEVER AMBIENT TEMPERATURE WAS IN MID-UPPER 70'S.) LATER THAT SAME MORNING, THE ENGINE AGAIN WENT TO HIGH RPM

C-2379

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SHORTLY AFTER SHIFTING INTO REVERSE TO BACK OUT OF PARKING SPACE. DRIVER WAS PREPARED AND ABLE TO IMMEDIATELY STOP CAR. AIR CONDITIONING WAS NOT ENGAGED THIS TIME. TOOK CAR TO ORIGINAL DEALER SAME DAY. DEALER STATES NO FAULT CODES IN COMPUTER. "SOME" CARBON BUILD UP ON THROTTLE BODY. PERFORMED SAFETY CHECK INSPECTION. SERVICED/CLEANED THROTTLE BODY, FUEL INJECTORS, REPLACED TRANSMISSION FLUID, AND CLEANED/ADJUSTED REAR BRAKES. IN THE 3 DAYS SINCE THE ORIGINAL INCIDENTS AND SERVICE, PHENOMENON HAS NOT REPEATED. CAR HAS APPROX. 62KMILES AND HAS RECEIVED ALL WARRANTY AND REGULAR, PRESCRIBED SERVICE AT ORIGINAL DEALER ON SCHEDULE. CAR HAS HAD NO MAJOR REPAIRS DURING ITS HISTORY.

**Location of Incident:** HAUPPAUGE, NY

**NHTSA Summary:**

MY WIFE WAS PULLING INTO A PARKING SPOT AND ALL OF A SUDDEN THE CAR ACCELERATED VERY QUICKLY, SHE WAS UICKM ENOUGH TO TURN THE WHEEL SHARPLY TO THE RIGHT AND HIT THE FRONT LEFT FENDER ON THE WALL OF THE

C-2380

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BUILDING, SHE ALSO HIT A PARKING SIGN ON THE RIGHT FRONT FENDER. THE DAMAGE TO THE CAR WAS OVER \$7500. NO AIR BAGS WERE ACTIVATED. THIS IS A 2009 TOYOTA CAMRY THAT WE HAD BROUGHT INTO THE DEALERSHIP FOR A RECALL IN APRIL OF 2010. MY WIFE DOES NOT BELIEVE SHE STEPPED ON THE GAS PEDAL BUT THAT THE CAR JUST SUDDENLY ACCELERATED.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10348350  
**Date of Incident:** 20100806  
**Vehicle:** 2009 TOYOTA TUNDRA  
**Location of Incident:** HOUSTON, TX

**NHTSA Summary:**

MY 2009 TOYOTA TUNDRA WAS REPAIRED BY TOYOTA THIS PAST FRIDAY AS A RESULT OF THE TROTTLE BODY STICKING OPEN. IE WOULD STALL. AFTER REPAIRS, THE TRUCK DROVE FINE FOR 2 HRS APPROX. AFTER STOPPING FOR SUPPER (1HR) I STARTED MY TRUCK AGAIN...THIS TIME THE ENGINE EXCELLERATED IN PARK UPTO 5,000 + RPMS FOR 10-15SECS AND THEN DOWN TO 500 RPMPS...THEN REPEATED THIS OVER AND OVER. I WAITED TIL THE RPMPS DROPPED TO 500 AND PLACED TRUCK IN GEAR TO TRY TO GET IT HOME. THE TRUCK ACCELERATED AND TOOK OFF ON ITS OWN...ALMOST TAKING ME THROUGH A RED LIGHT. I WAS ABLE TO PRESS HARD ENOUGH ON THE BRAKES TO STOP IN TIME...THEN IT TOOK OFF AGAIN FOR ANOTHER BLOCK WITHOUT ME DOING ANYTHING BUT RIDING THE BRAKES. I TURNED INTO A RANDALLS PARKING LOT WHEN RPMPS DROPPED TO 500 AGAIN...DODGING PEOPLE WHO WERE WALKING INTO THE GROCERY STORE. WHEN IT DROPPED AGAIN, I PULLED INTO A PARKING SPACE AND PUT TRUCK INTO PARK. THIS, ALL WHILE THE ENGINE WAS CONSISTENTLY CHANGING FROM 500RPMPS UPTO 5,000+ RPMPS WITH NO INTERRUPTION I CALLED THE DEALERSHIP, STILL SHAKING, BUT ONLY ONE PERSON WAS STILL AT THE DEALORSHIP...HE ADVISED SINCE THEY WERE CLOSED THAT ANOTHER DEALOR WAS OPEN LATER, SO I HAD TRUCK TOWED THERE. MY ORIGINAL REPAIR, THEY WOULD NOT COVER UNDER WARRANTY (13,000 MILES ON TRUCK) BECAUSE THEY SAID I HAD VIOLATED THE WARRANTY BY INSTALLING A FUEL SAVING DEVICE, WHICH HAD DAMAGED THE THROTTLE BODY. I PAID THEM TO REPLACE THE TROTTLE BODY ASSEMBLY...AND THEN (APPROX 3HRS LATER) THE TRUCK DECIDED TO DRIVE ITSELF...AND I FEARED I WAS GOING TO HIT SOMEONE, BOTH CARS AND PEDESTRIANS. I NEVER THOUGHT WHAT I HAD READ ABOUT WOULD HAPPEN TO ME

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Vehicle:** 1999 TOYOTA SOLARA  
**Location of Incident:** OCALA, FL

**NHTSA Summary:**

AT TIMES WHEN I COME TO A STOP (TRAFFIC, STOP LIGHT, STOP SIGN, ETC.) OR SLOW DOWN IN MY 1999 TOYOTA SOLARA I HAVE TROUBLE ACCELERATING FROM THE IDLE SPEED(S). WHEN I PRESS DOWN ON THE GAS PEDAL TO ACCELERATE IT STICKS. IT WON'T MOVE UNLESS I APPLY MORE PRESSURE WHICH CAUSES MY CAR TO JERK OR "PEEL OUT". THIS SITUATION DOES NOT OCCUR AT EVERY ACCELERATION BUT DOES OCCUR FREQUENTLY. WHEN THIS SITUATION HAPPENS I DO NOT FEEL SAFE. THERE HAS BEEN A FEW OCCURENCES WHERE THE ROADS WERE WET AND I EXPERIENCED THIS PROBLEM. WHEN MY CAR FINALLY ACCELERATED THE TIRES "SPUN OUT" WHICH CAUSED MY CAR TO MOVE VIOLENTLY. THIS INCIDENT IS NOT SIMILAR TO THAT OF WHICH IS IN THE TOYOTA GAS PEDAL RECALL BUT I URGE YOU TO LOOK INTO THIS MATTER TO SEE IF IT SHOULD ALSO BE INCLUDED.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10348356  
**Date of Incident:** 20100809  
**Vehicle:** 2008 TOYOTA SIENNA  
**Location of Incident:** BRANDON, MS

**NHTSA Summary:**

PULLING 2008 TOYOTAL SIENNA INTO PARKING SPOT. AS I WAS TURNING MY STEERING WHEEL TOWARDS THE LEFT INTO THE PARKING SPACE, THE VAN SUDDENLY ACCELERATED FORWARD AT A HIGH SPEED AND CRASHED INTO A CAR PARKED ADJACENT TO THE SPACE I WAS ATTEMPTING TO PARK IN. WITNESSES OBSERVED THE EVENT. AFTER APPROPRIATE REPORTS WERE TAKEN, THE VAN WAS TAKEN TO A TOYOTA DEALER WHERE I WAS TOLD THAT MY VEHICLE WAS NOT INVOLVED IN THE RECALL. I BELIEVE THAT MY CAR MAKE AND MODEL WERE JUST ENTERED INTO A DATABASE. NOT SURE A MECHANIC EVEN INSPECTED THE ACCELERATOR.

**Date of Incident:** 20100810  
**Vehicle:** 2008 TOYOTA RAV4  
**Location of Incident:** HORTON, AL

**NHTSA Summary:**

BOUGHT '08 TOYO RAV4 NEW FROM SERRA TOYO IN BHAM AL. NOW WITH 54K MILES AND NO PROBLEMS UNTIL NOW. ABOUT 10 DAYS AGO WHILE IN TRAFFIC AND UPON BRAKING FOR TRAFFIC SIGNAL. AS WE CAME TO A NEAR STOP. WITH FOOT ON THE BRAKE PEDAL, THE CAR ACCELERATED AND LUNGED FORWARD ABOUT 8-10 FT STOPPING ONLY INCHES SHORT OF THE CAR AHEAD OF US. I HAD MY FOOT FIRMLY ON THE BRAKE PEDAL THE ENTIRE TIME AND THE CAR HAD DECELERATED TO A NEAR STOP.

C-2383

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SO THIS IS NOT A STUCK ACCELERATOR. FLOOR MATS WERE NOT NEAR THE ACCELERATOR PEDAL. EVEN SO, I DECIDED THAT I MUST HAVE ERRED IN SOME WAY AND MOVED ON. ABOUT TWO DAYS LATER AS WE WERE PULLING INTO A BUSINESS, WE HAD AN IDENTICAL REPEAT. THIS TIME COMING WITHIN INCHES OF HITTING THE FRONT OF THE BUSINESS. THERE WAS NO DOUBT THIS TIME THAT THIS WAS NOT OPERATOR ERROR. IT IS THE DISTINCT FEELING OF THE ACCELERATOR BEING PUSHED DOWN AND OVERRIDING THE BRAKE. EACH TIME, THE STOP WAS NOT AS A RESULT OF MY FOOT ON THE BRAKE, IT WAS SIMPLY RELATED TO THE FACT THAT THE ACCELERATION STOPPED BEFORE WE HIT ANYTHING. I CALLED FOR A FLATBED AND PAID \$160 TO HAVE THE VEHICLE TOWED 60 MILES TO THE DEALERSHIP AS DRIVING WAS NOT AN OPTION. SERRA ASSURED ME THAT THEY WOULD TAKE THIS VERY SERIOUSLY AND WOULD HAVE INVESTIGATORS COME IN AND CHECK THE CAR OUT. THEY CALLED ME TODAY TO TELL ME THAT EVERYTHING CHECKED OUT FINE AND THERE WAS NOTHING WRONG WITH THE CAR AND WE COULD PICK IT UP. I ABSOLUTELY REFUSE TO DRIVE THIS CAR AGAIN. WE LIVE ON A MAJOR HWY AND IF THIS HAD OCCURRED AT THE END OF OUR DRIVEWAY IT COULD HAVE PRODUCED TRAGIC RESULTS. I NEED HELP! WHAT DO I DO? I CALLED TOYOTA CUSTOMER SERV. AND THEY SAID IF THE INVESTIGATORS SAY NOTHING IS WRONG, THERE IS NOTHING FOR THEM TO DO. THE '08 RAV4 IS NOT INCLUDED IN THE RECALLS AND I SUSPECT THAT TOYOTA IS SIMPLY GOING TO REFUSE TO ACKNOWLEDGE THIS SO THEY DON'T HAVE TO ADDRESS YET ANOTHER MODEL YEAR. IF YOU HAVE OTHER REPORTS OF THIS IN A '08 RAV4, PLEASE TAKE THEM SERIOUSLY. PLEASE ADVISE

**Date of Incident:** 20100810  
**Vehicle:** 1996 TOYOTA CAMRY  
**Location of Incident:** VAUGHAN, 00

**NHTSA Summary:**

I JUST RECENTLY BOUGHT A 1996 TOYOTA CAMRY. THE CAR RUNS GREAT BESIDES THE FACT THAT IT SOMETIMES STARTS TO SELF ACCELERATE. THE PEDAL GETS STUCK IN PRESS MODE AND THE CAR JUST PICKS UP INCREDIBLE SUDDEN SPEED. IN PRIOR OCCASIONS I HAVE SUDDENLY JUST PUT THE CAR IN NEUTRAL AND THEN THE ENGINE REVS UP TO 6500 RPM. I'VE ALSO NOTICED THAT THIS PROBLEM OCCURS WHEN THE OUTSIDE TEMPERATURES ARE REALLY HOT. ON CERTAIN OCCASIONS I HAVE CAME VERY CLOSE IN BECOMING INVOLVED WITH AN ACCIDENT. IN THESE SCENARIOS I HAVE EVEN PUT THE CAR IN NEUTRAL AND SHUTTING IT DOWN. I HAVE EVEN OPENED THE HOOD MANY OF TIMES AND HAVE SEEN THAT THE CARS ACCELERATOR WIRE IS FULLY CLINCHED TO THE MAX. THIS HAS BEEN A VERY BIG SAFETY CONCERN FOR ME AND HAS IN DANGERED MY LIFE MANY OF TIMES. I HAVE CONTACTED A LOCAL TOYOTA DEALER ABOUT THIS PROBLEM, THEY SAID THEY REALLY DONT KNOW ANYTHING REGARDING A 1996 CAMRY AND ACCELERATOR PROBLEMS. THIS IS INDEED A VERY BIG ISSUE AND IT IS VERY APPARENT THAT THIS PROBLEM OF ACCELERATORS DO EXIST FROM LONG TIME BEFORE AND NOT JUST IN THE RECENT CAMRY'S. I DO NOT WANT TO GET INVOLVED IN ANY SORT OF ACCIDENT AS I'VE COME VERY VERY CLOSE.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

LAST NIGHT I EXPERIENCED A SUDDEN, UNEXPECTED INCREASE IN ENGINE RPMS WHILE STOPPING AND WHILE STOPPED AT A STOP SIGN AFTER MY CAR HAD BEEN DRIVEN APPROXIMATELY 1/4 MILE ON A COLD ENGINE (ALTHOUGH THE TEMP OUTSIDE WAS IN THE 70S). THE AIR CONDITIONER MAY HAVE BEEN ON IN THE CAR. I WAS JUST COMING UP TO A STOP AT A STOP SIGN WHEN THE ENGINE SUDDENLY BEGAN TO ROAR AND THOUGH I SAW A CAR COMING ON THE CROSS STREET, I COULDN'T UNDERSTAND WHY THE CAR SEEMED TO BE HARD TO RESTRAIN FROM MOVING FORWARD. I HAVE AN AUTOMATIC 2008 RAV4 V6 WITH ABOUT 15,000 MILES, AND I HAD MY FOOT SQUARELY ON THE BRAKE. THERE IS NO FLOOR MAT AS I REMOVED THAT THE FIRST WEEK OF THE NEWS THAT MATS COULD BE A CONTRIBUTING CAUSE TO UNINTENDED ACCELERATION. I AM VERY FAMILIAR WITH THE SLIGHT INCREASE IN RPMS THAT HAPPENS WHEN THE AIR CONDITIONING CYCLES, AND THIS WAS SEVERAL ORDERS OF MAGNITUDE BEYOND THAT. I IMMEDIATELY PUT THE CAR IN NEUTRAL AND TURNED THE IGNITION OFF. AT THAT POINT, I SMELLED A VERY DISTINCTIVE CHEMICAL SMELL, PROBABLY FROM THE TIRES SINCE THE BRAKE AND THE ACCELERATOR WERE BOTH WORKING AT THE SAME TIME. I STARTED THE CAR UP AGAIN ALMOST IMMEDIATELY AND IT WAS FINE FOR THE 10 MINUTE DRIVE HOME. THE NEXT MORNING I DROVE IT TO TOYOTA AND THEY RAN A COMPUTER DIAGNOSTIC ON IT AND THEY SAID IT SHOWED NOTHING. THEY TOLD ME TO "MONITOR THE CAR AND NOTE THE TACHOMETER READING IF IT EVER HAPPENS AGAIN." TO BE HONEST, I ALWAYS THOUGHT THAT PEOPLE MADE TOO MUCH OF THIS PROBLEM, BUT THEN I NEVER EXPECTED IT TO HAPPEN TO ME. I AM RELUCTANT TO DRIVE THE CAR NOW, SO I WANT IT NOTED THAT THIS MODEL AND YEAR OF RAV4 MAY ALSO HAVE THIS PROBLEM. IT IS IMPORTANT THAT I TURNED THE ENGINE OFF SO QUICKLY THAT THE COMPUTER DIDN'T REGISTER THE PROBLEM? I'M JUST GLAD THAT I WASN'T ON THE OPEN ROAD, BUT AT A STOP SIGN WHEN THIS HAPPENED SO I WAS ABLE TO SHUT THE CAR OFF IMMEDIATELY.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10349151  
**Date of Incident:** 20100811  
**Vehicle:** 2009 LEXUS RX350  
**Location of Incident:** SCOTSDALE, AZ

**NHTSA Summary:**

TL-THE CONTACT OWNS A 2009 LEXUS RX 350. THE CONTACT WAS DRIVING AT A LOW SPEED WHILE PULLING INTO A PARKING SPOT. WHEN THE VEHICLE SUDDENLY ACCELERATED AND JUMPED THE CURB, SHE ATTEMPTED TO USE THE BRAKES WHICH DID NOT WORK AT FIRST TO STOP THE VEHICLE. SHE THEN DEPRESSED THE BRAKE PEDAL WITH EXTREME FORCE AND SHIFTED INTO PARK WHICH STOPPED THE VEHICLE BEFORE IT COULD COLLIDE WITH A PLATE GLASS WINDOW. THE VEHICLE PREVIOUSLY HAD SLIGHT ACCELERATION PROBLEMS BUT WHEN SPEAKING TO THE DEALER IN JANUARY, THE DEALER STATED THAT THERE WAS NOTHING WRONG WITH IT. THE VEHICLE WAS TOWED TO AN AUTHORIZED DEALERSHIP WHERE THE VEHICLE WAS AT THE TIME OF THE COMPLAINT. THE DEALER STATED THAT THE MANUFACTURER WOULD SEND A REPRESENTATIVE OUT TO INSPECT THE VEHICLE. THE CURRENT AND FAILURE MILEAGES WERE APPROXIMATELY 32,000-BK

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**

TL-THE CONTACT OWNS A 2008 TOYOTA PRIUS. WHILE DRIVING APPROXIMATELY 5 MPH INTO A PARKING SPACE. THE CONTACT ENGAGED THE BRAKE PEDAL AND THE ENGINE REVVED EXTREMELY HIGH WITH AN INCREASE IN THE ACCELERATION. THE VEHICLE WOULD NOT STOP AND TRAVELED OVER A CEMENT PARKING BLOCK. THE VEHICLE CONTINUED TO ACCELERATE AND CRASHED INTO A BRICK WALL. THE AIR BAGS FAILED TO DEPLOY WITH THE IMPACT INVOLVED. THERE WAS NO PERSONAL INJURY. A POLICE REPORT WAS FILED OF THE INCIDENT. THE ESTIMATED COST FOR THE BRICK WALL DAMAGES WAS \$2,500. THE VEHICLE WAS REPAIRED UNDER THE NHTSA CAMPAIGN ID NUMBER 09V38800 (VEHICLE SPEED CONTROL- ACCELERATOR PEDAL) IN JUNE OF 2010. THE CONTACT STATED THE REMEDY DID NOT CORRECT THE PROBLEM. THE VEHICLE WAS TOWED TO A COLLISION CENTER. THE FAILURE MILEAGE WAS APPROXIMATELY 30,000. JS

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10351659  
**Date of Incident:** 20100814  
**Vehicle:** 2005 TOYOTA 4RUNNER  
**Location of Incident:** BRUNSWICK, GA

**NHTSA Summary:**

ON SAT. AUG. 14, 2010 MY 2005 TOYOTA 4RUNNER ACCELERATED BACKWARDS AT A HIGH RATE OF SPEED AS I WAS ATTEMPTING TO BACK OUT OF MY SISTER'S DRIVEWAY. I HAD MY FOOT ON THE BRAKE AT THE TIME AND TRIED TO STOP THE CAR BUT COULD NOT. I PUT IT IN PARK, NOTHING HAPPENED. THEN I TURNED IT OFF AND WE STOPPED. WE ACTUALLY BACKED INTO A GROVE OF SMALL TREES AND SHRUBS WHICH CAUGHT US. THE CAR WAS SCRATCHED UP A LITTLE BUT NOT MUCH DAMAGE WAS DONE. I DID CALL THE POLICE AND MADE A REPORT. MY YOUNGER SISTER WAS WITH ME. THE BACKWARDS ACCELERATION WAS SMOOTH AND DID NOT KNOCK US AROUND MUCH AND THE STOP WAS KIND OF SMOOTH. AFTER I TURNED IT OFF I COULD NOT USE THE BRAKES ANYMORE BUT AT LEAST WE STOPPED. IT WAS VERY FRIGHENING AND I AM AFRAID TO DRIVE THE CAR ANY MORE. IT IS PARKED AT MY HOUSE. FIRST I RENTED A CAR AND NOW HAVE BORROWERED ONE FROM A RELATIVE. I CALLED CORPORATE TOYOTA AND AN ENGINEER FROM EAA IS COMING TO BRUNSWICK TOYOTA TOMORROW (08/26) TO CHECK OUT THE CAR. TOYOTA OFFERED NO HELP WITH ANOTHER CAR AND SAY IT WILL TAKE UP TO 30 DAYS TO GIVE ME THE RESULTS OF THE INSPECTION TOMORROW. MEANWHILE I CANT DRIVE THE CAR BECAUSE I AM AFRAID OF IT AND I CANT TRADE IT IN SO I AM STUCK. THE CAR WAS ALMOST PAID OFF AND HAS NEVER GIVEN ME ANY TROUBLE TO SPEAK OF UNTIL THIS HAPPENED. I NEVER SUSPECTED MY CAR SINCE I HAD NOT HEARD OF ANY 4RUNNERS HAVING A PROBLEM. I AM AN HONEST PERSON AND AM WELL RESPECTED IN MY COMMUNITY. I WANTED TO DO THE RIGHT THING BUT IT DOES NOT FEEL LIKE TOYOTA WANTS TO DO THE RIGHT THING. I FEEL THAT THE LEAST THAT TOYOTA COULD DO IS GIVE ME BACK THE \$25,000 THAT I PAID FOR THE CAR. THANK YOU FOR YOUR TIME.

**NHTSA Summary:**

I PULLED INTO A PARKING PLACE. BBI NOTICED MY CAR WAS NOT STRAIGHT AND I STARTED TO RELEASE THE EMERGENCY BRAKE TO STRAIGHTEN IT. B THOUGH I STILL HAD MY FOOT ON THE EMERGENCY BRAKE AND HAD NOT STARTED TO ACCELERATE. THE CAR LUNGED FORWARD. I SLAMMED DOWN ON THE EMERGENCY BRAKE AND THE REGULAR BRAKE. AT SOME POINT I REMEMBER THAT MY LEFT FOOT WAS ON THE REGULAR BRAKE PUSHING WITH ALL MY MIGHT. B WITHOUT HEESITATION MY CAR SMASHED INTO THE CAR PARKED AHEAD OF ME. B MY CAR KNOCKED THE OTHER CAR INTO THE STOP SIGN AHEAD OF IT, THEN EXPLODED INTO THE INTERSECTION AND CONTINUED A SHORT WAY DOWN THE BLOCK BEFORE SLOWING DOWN. I WAITED FOR TRAFFIC AND THEN TURNED AROUND. B I CAME BACK AND PARKED ON THE OTHER SIDE

**C-2392**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

OF THE STREET FACING THE OTHER WAY. B I CROSSED THE STREET TO THE SCENE OF THE ACCIDENT AND TOLD THE PARKING METER LADY THAT I HAD HIT THE OTHER CAR. B I WAS VERY SHAKEN. THE DRIVER OF THE OTHER CAR HAD JUST ARRIVED WITH HIS FARMER'S MARKET BAGS. B B HE SAID HE WOULD TAKE PICTURES SO I WENT BACK TO MY CAR TO GET MY CAMERA TO TAKE PICTURES TOO. B I NOTICED THAT IT WAS MY RIGHT FRONT BUMPER THAT HAD HIT THE OTHER CAR'S LEFT BACK BUMPER BECAUSE, TRYING TO AVOID HITTING THE OTHER CAR, B I HAD TURNED TOWARD THE STREET. B I TOOK PICTURES OF HIS CAR. B THE OFFICER ARRIVED (CALLED BY THE METER PERSON) AND I GAVE MY REPORT. B THE OFFICER ASKED ME IF I COULD DRIVE MY CAR HOME. B I SAID I WASN'T SURE. I WOULD CALL THE INSURANCE COMPANY. B IN ANY CASE I WOULD NOT TRY TO DRIVE RIGHT AWAY AS I WAS TOO SHAKEN. B THE OTHER DRIVER DROVE AWAY. B WHEN THE OFFICER LEFT, I SAT IN MY CAR PASSENGER SIDE WITH MY FEET ON THE SIDEWALK. STILL IN SHOCK. B I WAS AFRAID OF DRIVING THE CAR. I CALLED MY SON TO COME TO GET ME. I CALLED THE INSURANCE COMPANY AND FOLLOWED THEIR DIRECTIONS. B INTENT ON STOPPING THE CAR, I HAD BRAKED AS HARD AS I COULD WITH MY LEFT FOOT. WHEN WAITING TO TURN THE CAR AROUND I SAW THE EMERGENCY BRAKE WAS ON.

**Vehicle:** 1998 TOYOTA SIENNA  
**Location of Incident:** HAYMARKET, VA

**NHTSA Summary:**

ON AUGUST 25, 2010, I WAS TAKING MY GRANDCHILDREN TO RAINBOW STATION DAYCARE IN OUR TOYOTA SPORTS VAN SIENNA XLE, 1998. WARRENTON TOYOTA DEALER IN VIRGINIA PERFORMED A FULL 100,000-MILE SERVICE ON VAN ON JULY 10, 2010. I TURNED INTO THE PARKING LOT OF THE DAY CARE AT A SPEED OF 5 MPH WITH MY FOOT ON THE BREAK. WHILE I WAS ABOUT TO PARK THE CAR, THERE WAS UNINTENDED SUDDEN ACCELERATION OF THE CAR AND CAR WENT FROM PARKING LOT TO SIDEWALK AND BEGAN GOING TOWARDS THE OFFICE OF THE DAYCARE. I TURNED THE STEERING TO THE RIGHT AS FAR AS I COULD IN ORDER TO GET AWAY FROM THE ENTRANCE OF THE DAYCARE AND THE LOBBY (BOTH HAVE A GLASS WALL) AND WAS TRYING TO GET BACK TO THE PARKING LOT THE CAR WOULD NOT STOP. I TRIED TO PUSH THE BREAK AS HARD AS I COULD BUT THE CAR WOULD NOT STOP INSTEAD IT LEFT CAR TIRE TRACK MARKS ON THE SIDEWALK AND THE FRONT LAWN OF THE DAYCARE. THE CAR FINALLY HIT THE BRICK WALL AND STOPPED. FORTUNATELY THE GRANDCHILDREN WERE SAFE. MY RIGHT HAND WRIST BONE (RADIUS) WAS BROKEN. I HAD TO UNDERGO SURGERY. OUR CAR WAS TOTALED AND IS BEYOND REPAIR. TOYOTA IS TRYING TO FIND OUT HE CAUSE OF ACCIDENT.

**Vehicle:** 2007 TOYOTA AVALON  
**Location of Incident:** DALLAS, TX

**NHTSA Summary:**  
SUDDEN ACCELERATION INCIDENT. MY 2007 TOYOTA AVALON HAD ALL RECALL WORK DONE IN MARCH 2010. THE CAR HAS AROUND 20,000 MILES ON IT. ON 9/5/2010 I WAS PULLING INTO A PARKING SPACE WITH MY FOOT ON THE BRAKE PEDAL WHEN THE CAR SUDDENLY ACCELERATED INTO THE CURB. I WAS PRESSING AS HARD AS POSSIBLE ON THE BRAKE, BUT THE CAR WOULD NOT STOP UNTIL I HIT THE CURB AND PUT THE GEAR IN PARK. IN THE PAST, I HAVE HAD PROBLEMS WITH THE TRANSMISSION "HANGING" WHEN TURNING INTO AN ALLEY OR UP A GARAGE RAMP, BUT THIS IS THE FIRST INSTANCE OF SUDDEN ACCELERATION I'VE HAD.

**NHTSA ODI Number:**  
**Date of Incident:** 20100914  
**Vehicle:** 2008 TOYOTYA TACOMA  
**Location of Incident:** LAKEPORT, CA

**NHTSA Summary:**  
**Additional Summary:**  
Starting car up from cold in park the vehicle revs – dealer has advised in the past that this is NORMAL.

Floor Mats Recall Received – Took to dealer – cut down acc pedal, ecm software updated, and rotated tires –

Leaving the dealership on Tuesday, September 14, 2010 made left hand turn – grinding medal noise under the car – took foot off of gas – could not pull to right or left because of traffic – engine making a “bucking – revving” noise – car pulling strongly to the left – suddenly took off on its own lurched to the left – no steering – engine revved up really high – hanging onto wheel – husband in passenger seat – car pulling so strongly to the left – car took off – continued moving across the oncoming traffic lane – wheel came off – vehicle dropped down and it continued going – right leg is bruised – she wasn’t braking at all – thought braking would make it worse – Airbags did not deploy - Technician didn’t put the bolts on the tire - Taken by ambulance to hospital - Injury - full body whiplash - Husband seems to be OK.
