**NHTSA Summary:**

October 2006 incident. Believes that he reported to NHTSA - Had carpeted mat. My wife drove a lexus rx330 2004. She was at a movie rental store and was leaving the parking lot. When she backed up she heard a bang noise and thought she hit something. That was not the case and when she started forward the car just took off picking up speed and heading toward a house. No matter how hard she hit the brake the car just kept going faster. At the last minute she turn left towards an ally and hit the concrete corner of a building. The police had to cut her out of the car and went to the hospital by ambulance. The car should have been totaled but they fix it and she refused to drive the car (I drove it). The dealership said driver error or mat on the floor and did not know of other problems with toyotas. In fact the NHTSA said they had no details of this. The black box was removed by Toyota and said nothing found. We

C-683

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

hired someone to check the box (toyota said we needed a lawyer to look into the box) and his findings that all the data was erased. Now we come to find out alot of cars had the same experience. Please let me know who I can contact to add our case on file. We were deceived.

 Thank you for contacting Toyota Motor Sales, U.S.A., Inc.  
 We apologize for your concern regarding the transmission of your 2006 Toyota Tacoma.  
 In order to properly assess your concerns, we have contacted the Customer Relations Manager at 200610020879 to further evaluate your Tacoma.  
 Toyota dealership technicians are specialized in the diagnosis and repair of Toyota vehicles. They are provided with extensive training and have access to state-of-the-art equipment to help in the accurate diagnosis of your vehicle. Also, if necessary, we provide additional support to assist Toyota dealership technicians in resolving unusual vehicle concerns.  
 The Customer Relations Manager will contact you by the end of the business day, Thursday, October 5, 2006. In the event you do not receive any contact from the dealership by this date, please contact us <http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enduser/std\_adp.php?p\_faqid=4164> with file #Incidents.csclearifycasenumbr.

\*\*\* SUBCASE 200610020879-2 CREATED 10/05/2006 10:48:31 AM APowe  
 ATF/Email Dated 10/01/2006 04:44 AM  
 RNW#061001-000018  
 Email States:"As a follow-up to my email ([Incident: 060924-0001222]) my question / comment is when the vehicle is in cruise contor.  
 I have yet to receive comment back from Toyota regarding this matter and/or comment (it has been a week since I sent it). Since then I have discussed the issue with my deal (salesman, parts department and

C-685

**Safety Research & Strategies**  
*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

mechanic (Westernslope auto where more than accomadating/helpfull). As per the conversations with the dealer, the issue / problem has now been narrowed to an issue with the CRUISE CONTROL: the cruise control appears to be TOO SENSITIVE (Toyota has done too good of a job) and will down shift faster then I would like it to (1 or 2 miles an hour variance is acceptable).  
 The dealer has indicated that the cruise control parameters can be changed, however, only upon receipt of revised programming (flash) to the ECU.  
 In addition, the dealer has informed me that this isn't the first time they have received and/or heard of this issue / problem.  
 What can be done to eliminate the vehicle from downshifting (shifting out of overdrive)IN CRUISE CONTROL with MINOR incline changes in the highway? Can the rear end gearing be changed to increase the RPM 3 or 4 RPM in over drive and would this help?"

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TOYOTA 2005 SIENNA LIMITED XLE. WHEN USING CRUISE CONTROL (WE ONLY USE THIS ON HIGHWAY WHILE TRAVELING) SO THIS OCCURS AT THAT TIME. WHEN WE TAKE THE CRUISE OFF AND THEN RESTART IT IS ACCELERATES AND FORTUNATELY WE CAN BRAKE TO GET IT INCONTROL. FOR EXAMPLE, IF WE HAVE THE CRUISE SET AT 70 AND DISENGAGE WHEN WE REENGAGED IT WILL AUTOMATICALLY ACCELERATE FOR 90 MILES OR GREATER. WE TOOK IT TO OUR TOYOTA DEALER AND HE SAID IT COULD BE THE LINKAGE - WE HAVE BEEN TOLD BY A MECHANIC THAT THERE IS NO SUCH THING IN THE 2005 TOYOTA. THIS IS A CONTINUING PROBLEM. \*TR

**Date of Incident:** 20061012  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** SEVIERVILLE, TN  
**NHTSA Summary:**

WHILE MERGING ONTO I-40 INTERSTATE IN MY 3 MONTH OLD 2007 ES 350, I ACCELERATED TO 65 MPH, BUT THE CAR CONTINUED TO ACCELERATE ON ITS OWN. THE CRUISE LIGHT CAME ON BY ITSELF. I DISENGAGED THE CRUISE, APPLIED THE BRAKE WITH BOTH FEET, AND SHIFTED INTO LOWER GEARS, INCLUDING NEUTRAL. I APPLIED THE EMERGENCY BRAKE & SHIFTED INTO REVERSE, AS THE CAR WAS NOW APPROACHING 100 MPH. I TRAVELED ALMOST 6 MILES AT 110+ MPH WITH THE GEARSHIFT IN REVERSE BEFORE THE BRAKES TOOK HOLD. TOYOTA MOTOR CO. DENIES THIS CAN HAPPEN, BUT THIS CAR NEEDS TO BE RECALLED. I WILL NEVER DRIVE THIS CAR AGAIN AND AM THANKFUL TO BE ALIVE EVERYDAY. \*JB  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10306284  
**Date of Incident:** 20061012  
**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** YORK, NE  
**NHTSA Summary:**

THIS ISSUE IS REPEATABLE AND OCCURS UNDER TWO CIRCUMSTANCES. 1. WHEN VEHICLE SPEED CONTROL HAS BEEN PREVIOUSLY SET, AND THE "RESUME" FUNCTION IS USED WHEN ACTUAL SPEED IS GREATER THAN OR EQUAL TO 6MPH SLOWER THAN THE PREVIOUSLY SET SPEED, THE THROTTLE MOVES TO WIDE OPEN AND THE TRANSMISSION DOWNSHIFTS TWO GEARS AND THE VEHICLE ACCELERATES VERY QUICKLY UNTIL IT EXCEEDS THE SET SPEED BY 5MPH AND THEN THE THROTTLE BACKS OFF AND THE TRANSMISSION UP-SHIFTS TO 5TH GEAR. 2. WHEN THE VEHICLE IS SLOWED BY WIND OR MODERATE GRADE WHILE USING THE VEHICLE SPEED CONTROL, THE VEHICLE EXHIBITS SIMILAR BEHAVIOR INDICATED ABOVE WHEN ATTEMPTING TO MAINTAIN SET SPEED. THIS NEARLY CAUSED AN ACCIDENT WHEN MY PARENTS USED THIS VEHICLE. THEY HAD CLEARLY ALL NEARBY TRAFFIC AND RESUMED THE SPEED CONTROL. THE VEHICLE ACCELERATED SO FAST THAT WHEN IT HIT SOME LOOSE GRAVEL ON THE PAVED ROADWAY, THEY NEARLY LOST CONTROL. I HAD BROUGHT THIS REPEATABLE BEHAVIOR TO THE ATTENTION OF THE DEALER SHORTLY AFTER PURCHASING THE VEHICLE IN SEPTEMBER OF 2006. THE DEALER INDICATED THAT THE BEHAVIOR IS NORMAL. THIS ISSUE CONTINUES TO BE A PROBLEM. VEHICLE HAS 37,000 AS OF THIS COMPLAINT.

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

FROM NEWS ARTICLE "THEY DIED IN TOYOTAS,

"A pedestrian killed outside ShopRite Place: Palisades Park, N.J."

Date: Oct. 16, 2006  
Deceased: Florence Dembek, 79 (pedestrian)  
Vehicle: 2005 Toyota Camry (recalled)  
Details: Myron Leeds, 79, from neighboring Cliffside Park, was trying to pull into a parking spot outside the ShopRite supermarket when he lost control.

His Camry slammed into one car, spun around, hit another car, then crashed into a motorcycle. It kept going at up to 25 mph, slamming into a stand of shopping carts and two elderly sisters, Florence and Helen Dembek. Florence Dembek died three days later.

The police report says Leeds was yelling out the window at people to get out of the way. He told police he doesn't know what had happened.

The anonymous complainant to NHTSA says mechanics could find nothing wrong with Leeds' Camry. Leeds was ticketed for careless driving. He had the car repaired and sold it, so family members say they worry it could still be on the road somewhere."

**Toyota ID Number:**  
**NHTSA ODI Number:** 10318437  
**Date of Incident:** 20061016  
**Vehicle:** 2003 TOYOTA MATRIX  
**Location of Incident:** FRISCO, CO

**NHTSA Summary:**  
TL -THE CONTACT OWNS A 2003 TOYOTA MATRIX. THE CONTACT WAS DRIVING APPROXIMATELY 25 MPH ON NORMAL ROAD CONDITIONS; APPROACHING A TRAFFIC SIGNAL. THE CRUISE CONTROL WAS ENGAGED WHILE PRESSURE WAS APPLIED TO THE BRAKE PEDAL. THE VEHICLE FAILED TO SLOW DOWN AND CRASHED INTO THE PROCEEDING VEHICLE. THERE WAS NO PERSONAL INJURIES. THE POLICE WAS CALLED TO THE SCENE. THE VEHICLE WAS TOWED TO AN AUTHORIZED DEALER FOR BODY DAMAGE REPAIRS. THE FAILURE MILEAGE WAS UNKNOWN. JS

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**  
WIFE WAS DRIVING ON THE INTERSTATE WITH THE CRUISE ON DOING ABOUT 65 MPH, AND SHE DECIDED TO PASS A TRUCK. SHE ACCELERATED SLIGHTLY, AND THE CAR SUDDENLY "FLOORED" TO OVER 90 MPH AND THE RPM'S WENT ALL THE WAY UP. SHE TRUNED OFF THE CRUISE, BUT IT WOULDN'T SLOW DOWN. SHE TRIED TO BRAKE, BUT THE ENGINE WAS STILL REVING AT THE HIGHEST SPEED. SHE FORCED HERSELF OFF INTO THE GRASSY MEDIAN AND SAT ON THE BRAKE UNTIL SHE COULD JAM THE TRANSMISSION INTO PARK AND TURN OFF THE ENGINE. VEH TOWED TO LEXUS DEALER. TECH COULDN'T FIGURE OUT WHAT WAS CAUSING THIS, BUT AFTER TALKING TO LEXUS HEADQUARTERS, THEY FOUND THAT THE RUBBER CAR MAT AND THE BACK OF THE ACCELERATOR SOMEHOW CONNECTED AND FORCED THE CAR TO BE "FLOORED". YOU COULD NOT TELL BY LOOKING AT THE MAT THAT IT WAS CONNECTED TO THE ACCELERATOR. MY WIFE WOULD OF DIED IF THERE HAD BEEN ANOTHER VEHICLE CLOSE TO HER. NO ACCIDENT OR INJURY. I HAVE NO COMPLAINT WITH THE DEALER. THEY DID EVERYTHING THEY COULD TO HELP. \*NM

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10306310

**Vehicle:** 2006 TOYOTA TUNDRA  
**Location of Incident:** ANAHEIM, CA

**NHTSA Summary:**  
THE DAY I DROVE MY 2006 TUNDRA OFF OF THE LOT I NOTICED THAT WHEN I AM AT A COMPLETE STOP (RED LIGHT OR STOP SIGN FOR EXAMPLE) WITH MY FOOT COMPLETELY PRESSING ON THE BRAKE, THE RPM'S RISE OUT OF NO WHERE. IN OTHER WORDS, THE TRUCK LUNGES FORWARD WHEN AT A COMPLETE STOP. I HAVE REPORTED TO THREE DEALERSHIPS, THOSE THAT I TAKE MY TRUCK IN FOR SERVICE TO, AND THE DEALER I PURCHASED THE TRUCK FROM. I FIRST COMPLAINED ABOUT THIS DURING THE FIRST WEEK AFTER I PURCHASED IT. I HAVE REQUESTED THAT THE SERVICE CLERKS INCLUDE THIS IN THE NOTES, AND COMPLAINS SECTIONS WHEN I TAKE IN THE TRUCK. I REQUESTED THIS TO DOCUMENT MY TRUCK'S ACTIONS. \*TR

**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** SAULT STE MARIE, 00

**NHTSA Summary:**  
I HAVE EXPERIENCED A LURCHING PROBLEM IN MY 2006 SPORT 4 DOOR TACOMA. THE FIRST TIME IT HAPPENED, I REAR ENDED A VEHICLE CAUSING \$1500 DAMAGE TO THE TACOMA AND \$1200 TO THE OTHER VEHICLE. I ALSO HAD A WITNESS THAT SAW MY FOOT ON THE BRAKE PEDAL AFTER IMPACT. THE VEHICLE WAS TOWED TO THE DEALERSHIP AND THE ACCIDENT REPORTED TO TOYOTA CANADA AND THE MINISTRY OF TRANSPORTATION. A THIRD PARTY INVESTIGATOR/ENGINEERING WAS SENT TO CHECK THE VEHICLE AND FOUND NO ERROR CODES. I WAS TOLD THERE WAS NO PROBLEM. TWO MONTHS LATER THE TRUCK LURCHED AGAIN AT AN INTERSECTION. THIS TIME I SHOVED THE TRUCK INTO NEUTRAL. I OBSERVED THE RPM'S CLIMB TO 3000 RPM THEN DROP OFF. THE TOYOTA DEALERSHIP (NORTHSIDE TOYOTA) CHECKED THE VEHICLE OVER AND SAID THEY FOUND NO PROBLEM. NOTE: THE VEHICLE HAD ROUGHLY 10,000 KILOMETERS AT THAT TIME. I ALSO FOUND MYSELF RIDING THE BRAKES MORE THEN I HAVE EVER ON ANY VEHICLE I'VE OWNED. WE HAVE SINCE TRADED THE VEHICLE IN FOR A 2007 TACOMA THINKING THIS PROBLEM IS ONE OF A KIND ISSUE. I TOLD THE DEALERSHIP WHY I WAS TRADING IT IN. WE NO LONGER TRUSTED THE 2006. THEY HAD NO QUALMS DOING THE TRADE, OBVIOUSLY THINKING THERE WAS NO ISSUE. I TOOK A MAJOR HIT FOR DEPRECIATION ON A TRUCK THAT HAD ONE OIL CHANGE. THAT 2006 IS STILL SITTING ON THEIR LOT. TO SAY THE LEAST I AM NOT PLEASED, BUT DON'T HAVE THE MEANS TO PURSUE THIS. ALSO THE STRESS GOT TO US. \*JB

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

WHEN CAR IS ACCELERATED FROM DEAD STOP, AS CAR PASSES 20 MPH, THE CAR SURGES, HUNTS FOR GEAR, UP SHIFTS AND DOWNSHIFTS WILDLY AND SPORADICALLY. LURCHING AND OVER-REVVING TO 5,000 RPM OR HIGHER. CAR CANNOT BE SAFELY DRIVEN, WHEN PLACING CAR IN PARK THE CAR JUMPS FORWARD. I AM CONCERNED ABOUT THE SAFETY OF THE VEHICLE FOR MY FAMILY. TOYOTA SAID THIS ISSUE IS NORMAL AND THE CAR HAS TO GET USED TO THE WAY WE DRIVE IT. CAR GOING BACK INTO THE SHOP. \*JB

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10196509  
**Date of Incident:** 20061026  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** COPLEY, OH

**NHTSA Summary:**  
WHILE ACCELERATING TO MERGE ONTO AN INTERSTATE, THE LEXUS ES350 PURCHASED EARLIER IN THE MONTH CONTINUED TO ACCELERATE. I HAD TO BRAKE WITH MY LEFT FOOT WHILE PUMPING THE ACCELERATOR WITH MY RIGHT FOOT TO FREE THE STUCK ACCELERATOR. WHEN I ARRIVED HOME, THE ONLY THING I COULD THINK OF WAS THAT THE ACCELERATOR BECAME STUCK ON THE FLOOR MAT. I HAD THE ALL-WEATHER FLOOR MAT ON TOP OF THE CARPET MAT. I SLID THE ALL WEATHER CAR MAT AS FAR BACK AS POSSIBLE. THIS PROBLEM HAS NOT RECURRENT. DESPITE HAVING THE CAR BACK TO THE DEALER AT LEAST 3 TIMES SINCE THIS INCIDENT, NO ONE AT THE DEALERSHIP DID ANYTHING TO CORRECTLY INSTALL THE ALL-WEATHER MATS NOR DID ANYONE AT THE DEALERSHIP ASK ME IF I EVER EXPERIENCED SUCH A PROBLEM. \*TR

**NHTSA ODI Number:** 10317970  
**Date of Incident:** 20061026  
**Vehicle:** 2006 TOYOTA RAV4  
**Location of Incident:** ALPHARETTA, GA

**NHTSA Summary:**  
I PURCHASED A TOYOTA 2006 RAV 4 IN JANUARY OF 2006 AND HAD THE CAR SERVICED AT THE TOYOTA DEALER PER THE SCHEDULED FACTORY MAINTENANCE SUGGESTIONS. IN OCTOBER OF 2006, I WAS TRYING TO AVOID RUNNING A YELLOW LIGHT ON PEACHTREE STREET IN ATLANTA, AND ACCELERATED HARD TO AVOID THE YELLOW LIGHT. THE CAR LUNGED FORWARD AND WAS OUT OF CONTROL. EVEN THOUGH I LIFTED MY FOOT COMPLETELY OFF THE PEDAL. AFTER GETTING THROUGH THE INITIAL SHCK I PUT THE TRANSMISSION IN NEUTRAL, THE ENGINE REVVED UP TO THE RED LINE AND I TURNED THE IGNITION SWITCH OFF. AFTER WAITING FOR A MINUTED I RESTARTED THE CAR IN PARK AND THE ENGINE IDLED NORMALLY. I TOOK THE CAR TO THE TOYOTA DEALER FOR THE SCHEDULED MAINTENANCE AND AFTER INSPECTING IT HE TOLD ME THERE WAS NOTHING WRONG WITH THE CAR. AFTER THE RECALL OF THE TOYOTA RAV 4'S I CALLED THE TOYOTA DEALER I BOUGHT THE CAR FROM AND TALKED TO HIS SERVICE MANAGER. HE TOLD ME THAT THE 2006 RAV 4'S HAVE NOT BEEN RECALLED AS THEY HAVE A DIFFERENT GAS PEDAL AND WERE MADE IN JAPAN. HE COULD NOT EXPLAIN THE CAUSE OF THE ACCELERATION. THE CAR HAS NOT DONE THAT SINCE, HOWEVER I AM NOT DRIVING THE CAR ANYMORE. MY DAUGHTER IS AND THIS CONCERNS ME GREATLY. NO FIXES OR REPAIRS HAVE BEEN DONE ON THE CAR BY THE TOYOTA DEALER.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**

SUDDEN ACCELERATION FOR THE THIRD TIME IN THIS VEHICLE. DRIVING ON A MOUNTAINOUS ROAD ABOUT 30 MPH. TRUCK MOVED TO THE SIDE GOING UP AN INCLINE FOR MY HUSBAND TO PASS HIM. HE ACCELERATED AND THE GAS PEDAL "STUCK". APPLIED THE BRAKES WITH NO DISENGAGING OF THE GAS PEDAL. TURNED THE KEY OFF AND ON SO AS NOT TO LOSE THE POWER STEERING. THIS CONTINUED FOR SEVERAL MINUTES. WHEN WE WERE ON A STRAIGHTAWAY, HE TURNED THE KEY OFF AND FINALLY THE GAS PEDAL DISENGAGED. TWO TIMES PREVIOUSLY TOYOTA HAS REPLACED THE CRUISE CONTROL. THIS IS NOT A CRUISE CONTROL ISSUE. THIS IS A GAS PEDAL ISSUE. I WAS TOLD PREVIOUSLY THE MAT WAS UNDER THE GAS PEDAL. THIS IS HARDLY THE PROBLEM. THE BRAKES WERE AGAIN RED HOT WHEN MY HUSBAND TRIED TO STOP THE TRUCK. WE WILL BE IN TOUCH WITH TOYOTA AGAIN THIS A.M. THIS VEHICLE IS A DEATH TRAP AND NEEDS TO BE PUT DOWN! \*NM

**Additional Summary:**

**NHTSA ODI Number:** 20061029  
**Date of Incident:** 20061029  
**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** GERMANTOWN, MD

**NHTSA Summary:**

I AM FILING A COMPLAINT REGARDING THE TOYOTA ACCELERATOR ISSUE. I RECEIVED NOTICE THAT TOYOTA IS GOING TO DO A RECALL BASED ON THE FLOOR MATS CAUSING THE PROBLEM. I FLOOR MATS ARE NOT THE PROBLEM. I HAVE A 2006 TACOMA AND THE DAY I BROUGHT IT HOME THE ACCELERATOR STUCK AS I PULLED INTO MY GARAGE CAUSING ME TO SCRAP THE WALL AND CAUSED MINOR BODY DAMAGE. SINCE THEN I HAVE HAD SEVERAL INSTANCES WHERE THE ACCELERATOR HAS STUCK. IT SEEMS TO OCCUR WHEN I COME OVER A HILL AND AS I START DOWN THE ENGINE CONTINUES TO "REV" AND THE RPMS STAY UP EVEN IF I APPLY THE BRAKES. I HAVE COMPLAINED TO TOYOTA ABOUT THIS EVERYTIME I HAVE THE TRUCK IN FOR ROUTINE SERVICE AND I'M ALWAYS TOLD IT IS NOTHING. I KNOW TWO THINGS FOR SURE, IT IS NOT "NOTHING" AND IT IS NOT THE FLOOR MATS. AS INFORMATION THE FLOOR MATS ARE THE STANDARD MAT THAT CAME WITH THE TRUCK WHEN I BOUGHT IT NEW AND THEY ARE SECURED TO THE FLOOR. NTSB SHOULD NOT ACCEPT THAT THIS IS A FLOOR MAT PROBLEM. \*TR

**Additional Summary:**

**NHTSA ODI Number:** 20061029  
**Date of Incident:** 20061029  
**Vehicle:** 2001 TOYOTA CAMRY  
**Location of Incident:** BAINBRIDGE, GA

**NHTSA Summary:**

THE FAILURE IS THE GAS PEDAL GETS STUCK. IT STICKS WHEN I AM AT TRAFFIC LIGHTS AND IT'S MY TURN TO GO AND HAS BEEN STICKING EVERY SINCE I HAD THE CAR. I THOUGHT THAT IT WAS JUST THE CAR NOT GETTING ENOUGH GAS. NOTHING HAS BEEN DONE TO CORRECT IT BECAUSE I WAS TOLD THERE WAS NOTHING WRONG WITH IT. I AM AFRAID THAT I AM GOING TO HIT SOMEONE BECAUSE I DO HAVE TO REALLY MASH THE GAS TO GET IT TO MOVE. THE ONLY INCIDENT WAS IN 2005 MY DAUGHTER WAS DRIVING. SHE STOPPED TO GET GAS. WHEN SHE FINISHED AND GOT IN THE CAR TO LEAVE SHE PUT THE CAR IN REVERSE AND THE ACCELERATOR STUCK WHEN SHE GAVE IT GAS SHE BAKED INTO A POLE. THE ONLY DAMAGE WAS TO MY CAR SHE WAS NOT HURT SO THE POLICE WASN'T CALLED.

C-706

**Vehicle:** 2006 TOYOTA RAV4  
**Location of Incident:** GARRISON, NY  
**NHTSA Summary:**  
 WE PURCHASED A 2006 TOYOTA RAV4 4X4 LIMITED IN MARCH 2006. SINCE THE DAY WE PURCHASED THE VEHICLE, WE HAVE HAD ISSUES WITH THE ACCELERATION EITHER NOT RESPONDING OR LURCHING FORWARD. WHEN TAKING OFF FROM A STOP, IT OCCASIONALLY TAKES THE CAR SEVERAL SECONDS TO ENGAGE AND ACCELERATE. OTHER TIMES, WHEN SLOWING DOWN TO STOP AT A LIGHT OR SIGN, THE CAR CONTINUES TO REV THE RPM+/- (m)s AND LURCHES FORWARD. IN ORDER TO STOP THE CAR FROM LURCHING FORWARD, WE HAVE TO PUT THE CAR IN NEUTRAL AND SLAM ON THE BREAKS. THIS IS VERY SCARY IF YOU ARE COMING UP TO AN ACTIVE INTERSECTION. FROM READING OTHER COMPLAINTS, TOYOTA NEEDS TO ADDRESS THIS ISSUE! \*NM  
**Additional Summary:**

+INCOMING CALL+  
 Cust insurance agenc, peggy davis, c/b sts per customer, the tire pressure warning light was on, so went to indap tire co. called city tire. Sts went in, but was adv they were too busy to check tires & perform rotation. Sts back in veh & put veh in reverse, sts engine then raced at a high rpm, sts cust adv foot was pressing on the brake, but veh still moving. Sts veh backed into a phone pole w/ the engine still racing. Sts cust then put veh in drive.  
 \*\*\* NOTES 11/30/2006 08:31:15 AM SMoore  
 veh raced forward, hit a suburu & ran into a storage trailer that was owned by city tire. Peggy sts cust doesn't remember what happened next. Sts witness, a city tire employee, joe bloominthol, sts he witnessed seeing the veh backing into the pole, racing forward & hitting the car & getting lodged under the trailer. Sts cust got out of the veh & the engine was still racing. Sts mr. bloominthol, sts he then reached in, turned the car off & removed the keys & cust was  
 \*\*\* NOTES 11/30/2006 08:40:28 AM SMoore  
 standing right next to him. Peggy sts veh is at body shop having body work performed. NCR adv inspection can take up to 30 days & up to an additional 30 days for toys position, potential total time of 60 days but can possibly be done much sooner w/in a couple of weeks (as case originally sent to region, ncr, c. ringer, adv ncr yesterday that inspection date may already be set). Also adv it's requested that veh be in original condition from accident, but depending on how  
 \*\*\* NOTES 11/30/2006 08:59:08 AM SMoore  
 much work has been done, they may still be able to perform the work. Adv it could be requested that the body work cease until inspection. Peggy then adv rep can't just inspect veh, their trained specialist has to be there & she wants the rep to call this person to coordinate the date. NCR adv will take info, but can't guarantee rep will be able to coordinate the dates. Peggy became very angry & adv toyota's policy regarding inspection times is not acceptable.  
 \*\*\* NOTES 11/30/2006 09:11:49 AM SMoore  
 and she wants a call today. NCR apol, again adv, region would be calling w/in 3 bus days. Adv ncr doesn't have the schedules of the inspectors. Peggy, very rudely asked for the tms address. NCR provided att. A108. Rep hung up w/o giving ncr the name & # of her inspector.  
 +OUTGOING CALL+  
 Peggy didn't have #address to body shop. NCR found in phone book. Called and don mackie in the body shop confirmed that veh was there. Sts it's on the frame machine now. Sts rprs have  
 \*\*\* NOTES 11/30/2006 09:13:55 AM SMoore  
 begun. NCR explained wanted to confirm veh was at cust shop as cust requesting inspection. Adv toy rep will be calling to set inspection. Don adv ok for inspection to take place on their property. NCR thanked for assist.  
 \*\*\* NOTES 11/30/2006 11:32:02 AM SMoore  
 +OUTGOING REGION CALL+  
 NCR spoke w/ regional manager, m. alfieri, who after review, adv fts will be inspecting cust veh tomorrow.  
 +OUTGOING CUST CALL+  
 In earlier conversation w/ peggy, rep adv ok to call cust directly. NCR lvm for cust, adv of info. Provided 800#, ext. 73008 & ncr's business hours (5:00 am -1:30 pm PST) if cust sks to c/b.  
 \*\*\* NOTES 11/30/2006 12:41:40 PM SMoore  
 +INCOMING CUST CALL+  
 Cust c/b sks to confirm ncr's vm. NCR confirmed inspection for tomorrow. NCR also adv of peggy's request for insurance co's rep to be present during inspection, however, peggy didn't leave info. Adv ncr can't guarantee that toy rep will be able to coordinate date if tomorrow isn't a good day for them, but willing to add insurance co. info to file & adv of request. Cust sts will adv peggy & c/b with reps info if needed. NCR also adv insurance rep  
 \*\*\* NOTES 11/30/2006 12:44:06 PM SMoore  
 can call don mackie @ body shop and request he alerts them to what time toy rep is coming. Cust thanked ncr for assist.

**Vehicle:** 2006 TOYOTA AVALON  
**Location of Incident:** PARKER, CO

**NHTSA Summary:**

C-711

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I HAVE A 2006 TOYOTA AVALON WITH ~15,000 MILES ON IT. INTERMITTENTLY, THE CAR WILL HESITATE ON ACCELERATION. THIS IS EXTREMELY DANGEROUS AS I HAVE ALMOST BEEN REAR-ENDED SEVERAL TIMES AND HAVE HAD TO SLAM ON THE BRAKES, AT TIMES, TO AVOID A SIDE-SWIPE COLLISION. THE DELAY IN INPUT TO THE ACCELERATOR PEDAL TO ACTUAL ACCELERATION IS 2-4 SECONDS AT TIMES. THIS IS A PROBLEM KNOWN TO TOYOTA. THE SERVICE DEPARTMENT IS AWARE OF THE PROBLEM BUT DESCRIBES IT AS A "CHARACTERISTIC" OF THE DRIVE BY WIRE THROTTLE SYSTEM. THIS IS A VERY DANGEROUS "CHARACTERISTIC" AND I'M CERTAIN WILL RESULT IN ACCIDENTS. THERE ARE MANY EXAMPLES ON THE "FORUM" ON EDMUNDS.COM WHERE OWNERS HAVE EXPRESSED THE SAME PROBLEM/CONCERN. \*NM

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10176572  
**Date of Incident:** 20061104  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** DALLAS, TX

**NHTSA Summary:**

2007 LEXUS ES350. EXCESSIVE RPM'S DURING START UP CAUSE THE CAR TO SHARPLY ACCELERATE WHEN PUT INTO REVERSE. RPM STAYS AT 1700+ FOR UP TO A MINUTE AFTER ENGINE START. WHEN PUTTING THE TRANSMISSION INTO REVERSE AT THIS HIGH RPM, CAUSES THE CAR TO LURCH BACKWARDS AS IF THE ACCELERATOR PEDAL HAD BEEN FLOORED. HAS CAUSED CAR TO HIT A POLE AND A TREE ON 2 SEPARATE OCCASIONS. DEALERSHIP SAYS THIS IS NORMAL. LEXUS CUSTOMER SATISFACTION HAS NOT RETURNED CALLS. \*JB

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10172802  
**Date of Incident:** 20061105  
**Vehicle:** 2006 TOYOTA TUNDRA  
**Location of Incident:** CHESTER, VA

**NHTSA Summary:**

2006 TOYOTA TUNDRA-WHEN CRUISE CONTROL IS ENGAGED, ANY HILL OR EVEN MINOR INCLINE INITIATES A DOWNSHIFT OF ONE OR TWO GEARS ACCOMPANIED BY FULL THROTTLE ACCELERATION. THIS DOES NOT OCCUR, EVEN ON MAJOR HILLS SANS CRUISE CONTROL. DEALER SAYS THIS IS NORMAL. ACTION SHOULD BE TAKEN BEFORE AN ACCIDENT/DEATH OCCURS.

**Vehicle:** 2006 TOYOTA HIGHLANDER HV  
**Location of Incident:** BROOKFIELD, WI

**NHTSA Summary:**  
I PURCHASED A TOYOTA HILANDER HYBRID IN MARCH 2006. SINCE THAT YEAR, I HAVE BEEN EXPERIENCING A PROBLEM WITH BRAKING. WHEN I BRAKE (EXAMPLE AT A TRAFFIC LIGHT OR A STOP SIGN) I NOTICE THAT THE CAR BEGINS TO SLOW DOWN, BUT FOR A FRACTION OF A SECOND, THE CAR APPEARS TO COAST OR CONTINUE TO LUNGE FORWARD AND I GET A FEELING THAT THE CAR IS NOT UNDER MY CONTROL ANY MORE. IT IS A TERRIBLE FEELING TO EXPERIENCE WHEN I AM FIRMLY AND GRADUALLY DEPRESSING THE BRAKE, AND I SENSE THAT THE CAR IS MOVING AND THAT I WOULD NOT BE ABLE TO STOP!!! IT APPEARS TO HAPPEN MORE OFTEN IN COLD WEATHER, AND NO, IT IS DEFINITELY NOT ICE OR WET ROAD THAT IS THE CAUSE. THE ROAD COULD BE DRY, AND FREE OF ICE, AND I EXPERIENCE IT. PLEASE READ AN MSNBC ARTICLE ON PRIUS BRAKING PROBLEM AND I CAN RELATE TO THE DESCRIPTION IN THAT ARTICLE. I HAVE GOT MY CAR CHECKED OUT AT TWO DEALERS - ONE IN MASON, OH AND THE OTHER IN BROOKFIELD, WI. BOTH DEALERS SAY THEY CANNOT REPRODUCE THE PROBLEM. I HAVE FILED A COMPLAINT WITH TOYOTA IN LATE 2006 OR EARLY 2007, BUT TOYOTA DENIES ANY PROBLEM WITH THE HYBRID HILANDER SUV BRAKING SYSTEM. TOYOTA AND THE DEALERS TELL ME THAT THEY HAVE NEVER EVER HEARD OF SUCH A PROBLEM FROM ANY OWNER OF A TOYOTA HYBRID CAR. IF YOU VISIT HTTP://TOWNHALL-TALK.EDMUNDS.COM/DIRECT/VIEW/F0D8058 YOU WILL SEE THAT THERE ARE SEVERAL HUNDREDS OF HYBRID CUSTOMERS (TOYOTA AND LEXUS) WHO

C-713

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ARE COMPLAINING ABOUT THIS VERY PROBLEM. THIS PROBLEM OCCURS OCCASIONALLY, BUT IT IS DISTINCT AND A TERRIBLE ONE TO EXPERIENCE. PLEASE DIRECT TOYOTA TO THOROUGHLY INVESTIGATE AND RESOLVE 2006 HILANDER HYBRID BRAKING PROBLEM.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10290951  
**Date of Incident:** 20061110  
**Vehicle:** 2006 TOYOTA PRIUS  
**Location of Incident:** ALPINE, TX

**NHTSA Summary:**  
TL\* THE CONTACT OWNS A 2006 TOYOTA PRIUS PURCHASED FEBRUARY 2006. WHEN UTILIZING THE CRUISE CONTROL SWITCH, THE ENGINE WOULD BEGIN TO ACCELERATE RAPIDLY AND RACE. ONCE THE CRUISE CONTROL WAS CANCELED, THE ACCELERATION WOULD CEASE. HE STATED THE FLOOR MATS DID NOT CAUSE RAPID ACCELERATION. THE FAILURE WOULD ONLY OCCUR WHEN CRUISE CONTROL WAS UTILIZED. THE MANUFACTURER WAS NOTIFIED, AND HE WAS ADVISED TO DISCONTINUE USAGE OF THE VEHICLE SPEED CONTROL. NO REPAIRS HAD BEEN MADE TO CORRECT THE FAILURE. THE FAILURE AND CURRENT MILEAGES WERE UNDER 15,000. UPDATED 11/23/09. \*LJ

**NHTSA ODI Number:** 10304589  
**Date of Incident:** 20061115  
**Vehicle:** 2000 TOYOTA CAMRY  
**Location of Incident:** WHITE PLAINS, NY

**NHTSA Summary:**  
I WAS ON THE HIGHWAY WITHIN CITY LIMITS DRIVING AT ABOUT 45 MPH. I REALIZED THE VEHICLE I WAS APPROACHING HAD SLOWED DOWN OR HAD STOPPED DUE TO MERGING TRAFFIC. I HAD MORE THAN THE NECESSARY AMOUNT OF CLEARANCE AHEAD. I APPLIED BRAKES. HOWEVER, BRAKES DID NOT SLOW DOWN THE VEHICLE BY ANY SIGNIFICANT AMOUNT -- IT APPEARED AS IF THE ENGINE WAS CONTINUING TO ACCELERATE OR MAINTAIN ITS SPEED. I CRASHED INTO THE VEHICLE FROM BEHIND. THE VEHICLE I CRASHED INTO VEERED TO THE RIGHT. MY VEHICLE CONTINUED FORWARD

C-715

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AND THEN CRASHED INTO ANOTHER VEHICLE STOPPED IN FRONT. AS A RESULT OF THE CRASH, THE GEAR SELECTOR MOVED INTO N, WHICH IS THE REASON I THINK THE VEHICLE FINALLY STOPPED. I HAVE THE CRASH REPORT DOCUMENTING THIS. IT WAS THE FIRST TIME SUCH AN INCIDENT HAD HAPPENED AFTER I HAD PURCHASED THE CAR USED FROM AN INDIVIDUAL. THE CAR WAS DEEMED A TOTAL LOSS BY MY INSURANCE CARRIER.

Cust sent e-mail on 12/14/06 at 12:46 PM.  
When trying to send Lexus an email about a problem with my car. There is a drop down for YEAR followed by a mandatory requirement for MODEL, but there is no drop down for MODEL, so when you try to submit the email, you get an error message. Another problem is that Lexus Customer Assistance representatives and supervisors do not return phone calls. My car problem has turned into an extreme case of unacceptable levels of Lexus support, or lack there of. I have been promised call backs by Marco Brown and Kawena De Oampo. Being unable to contact you by email has not made me any happier with this experience. Perhaps someone in Torrence could call me at 972-735-8879 to discuss the problem with my ES350. VIN JTHBJ46G77

Dear  
Thank you for contacting Lexus Customer Satisfaction. We are dedicated to providing superior service. I apologize that you are not satisfied with the service you have received from Lexus Customer Satisfaction. I do see in our records that you spoke with one of our supervisor, Kawena DeOcampo, on 12/14/2006. Ms. DeOcampo has indicated that she will be still working with you on this matter. Please continue to work with Ms. DeOcampo as she will be able to further assist you with your concern. If you require further assistance, please respond to this e-mail or contact Lexus Customer Satisfaction at 1-800-255-3987, Monday through Friday, 5:00 a.m. to 6:00 p.m., or Saturday, 7:00 a.m. to 4:00 p.m., Pacific Time.  
Sincerely,  
Jonathan Huang

**Date of Incident:** 20061117  
**Vehicle:** 2006 LEXUS RX400H  
**Location of Incident:** MASSAPEQUA PARK, NY

**NHTSA Summary:**  
I HAVE BEEN COMPLAINING OF THIS SAME PROBLEM (MY BRAKES FAIL ALSO WHEN GOING OVER ROUGH ROADS) SINCE I BOUGHT MY 2006 LEXUS RX400H. THEY HAVE BEEN TELLING ME ITS NORMAL AND DENY ITS EVEN A PROBLEM. EB: 4: NHTSA TODAY ANNOUNCED IT IS OPENING A FORMAL INVESTIGATION OF THE TOYOTA PRIUS HYBRID MODEL YEAR 2010 TO LOOK INTO ALLEGATIONS OF MOMENTARY LOSS OF BRAKING CAPABILITY WHILE TRAVELING OVER AN UNEVEN ROAD SURFACE, POTHOLE OR BUMP. THE AGENCY RECEIVED 124 REPORTS FROM CONSUMERS, INCLUDING FOUR ALLEGING THAT CRASHES OCCURRED. INVESTIGATORS HAVE SPOKEN WITH CONSUMERS AND CONDUCTED PRE-INVSTIGATORY FIELD WORK. GSAFETY IS OUR TOP PRIORITY. SAID TRANSPORTATION SECRETARY RAY LAHOOD. THAT IS WHY IN RECENT WEEKS NHTSA HAS ALSO ISSUED A CONSUMER ADVISORY ON THE RECALL OF SEVERAL MODELS OF TOYOTA VEHICLES AND THE PONTIAC VIBE INVOLVING PEDAL ENTRAPMENT AND STICKY ACCELERATOR PEDALS. WE WILL CONTINUE TO MONITOR THESE ISSUES CLOSELY. NEWS RELEASE

**NHTSA ODI Number:** 10313573  
**Date of Incident:** 20061117  
**Vehicle:** 2005 TOYOTA TACOMA  
**Location of Incident:** NEW BRAUNFELS, TX

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2005 TOYOTA TACOMA. THE CONTACT WAS DRIVING APPROXIMATELY 60 MPH AND STATED THAT THE VEHICLE SUDDENLY ACCELERATED OUT OF CONTROL INTO HEAVY TRAFFIC. THE DRIVER HAD TO MANUEVER INTO THE EMERGENCY LANE, SHIFT INTO NEUTRAL AND TURN OFF THE IGNITION. HE RE-STARTED THE VEHICLE AND TOOK THE VEHICLE TO THE DEALERSHIP. THE DEALER TOLD THE CONTACT THAT THE ACCELERATOR PEDAL MUST HAVE BEEN STUCK BESIDE THE FLOOR MAT BUT THE DRIVER SAW NO ENTRAPMENT DURING THE FAILURE. THE DEALER TOLD THEM THAT THERE WAS NOTHING THEY COULD DO AFTER INSPECTING THE FAILURE AND FINDING NO CAUSE. SHE HAD NOT CALLED THE MANUFACTURER TO-DATE. THE VEHICLE HAD NOT BEEN REPAIRED AT THE TIME OF THE COMPLAINT. THE CURRENT MILEAGE WAS APPROXIMATELY 100,000. THE FAILURE MILEAGE WAS 35,072.

**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** PHOENIX, AZ

**NHTSA Summary:**  
MY WIFE WAS DRIVING OUR NEW 2006 TACOMA, MY 9 YEAR OLD AND I WERE IN THE BACK SEAT. MY WIFE BEGAN TO SCREAM BECAUSE THE TRUCK BEGAN TO ACCELERATE UNCONTROLLABLY, SHE WAS "STANDING" ON THE BRAKE PEDAL BUT IT DID NOT SLOW DOWN. THE ACCELERATION CONTINUANCE FOR A LITTLE UNDER A MILE BEFORE REGAINING CONTROL. LUCKILY THE TRAFFIC WAS MINIMAL, NO ACCIDENT OR INJURIES OCCURRED. THE TRUCK WAS TAKEN TO THE DEALERSHIP TO GET CHECKED OUT, CORRECTIVE ACTION WAS NOTHING BECAUSE THEY COULD NOT DUPLICATE. MILEAGE OF VEHICLE DURING FAULT WAS 6380. SINCE THAT TIME SMALL OCCURENCES HAVE TAKEN PLACE, SUCH AS AT A STOP LIGHT THE VEHICLE WANTS TO CREEP FORWARD ON ITS OWN. NOTHING EVER FOUND WHEN TAKEN TO THE DEALER. SEEING THE NEWS REPORT AND READING THE COMPLAINTS ONLY CONFIRM OUR SUSPICION OF THIS DEFECTIVE VEHICLE AND IT WILL BE TRADED IN. \*TR

**Additional Summary:**

**NHTSA ODI Number:** 10308193  
**Date of Incident:** 20061120  
**Vehicle:** 2007 TOYOTA SOLARA  
**Location of Incident:** SCOTTSBORO, AL

**NHTSA Summary:**  
I TWICE WITHIN 1ST YEAR. THE CAR ACCELERATED QUICKLY WHILE I WAS DRIVING ON THE ROAD. IT WAS HARD TO STOP. I THOUGHT THE FLOOR MAT WAS UNDER THE GAS PEDAL. LATER, THE CAR SUDDENLY REVVED UP AND ACCELERATED AS I WAS LEAVING A PARKING LOT. AFTER I TOOK MY FOOT OFF OF THE GAS, IT KEPT INCREASING SPEED. NOTHING WAS IN THE WAY OF THE PEDAL THAT TIME. I WAS ABLE TO GAIN CONTROL. (THE SERVICE TECH TOLD ME THE EXPERIENCE I RELAYED TO HIM WAS NOT POSSIBLE.) STILL, THE CAR ACCELERATES BY ITSELF, MOST RECENTLY THREE DAYS AGO. I HAD IT

C-724

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SET AT 60 MPH ON CRUISE CONTROL. IT WOULDNET STAY AT 60. I HAD TO DECREASE THE CRUISE SPEED 3 OR 4 TIMES. I ROUTINELY HAVE TO MANUALLY REDUCE THE CRUISE CONTROL SPEED BY BUMPING THE LEVER DOWN. I HAVE BECOME USED TO THIS MALFUNCTION. TOYOTA EMPLOYEES DENIED A DEFECT AND REFUSED TO REPAIR THE FAULTY PARTS. DURING THE FIRST 18 MONTHS, I TOOK MY CAR IN APPROXIMATELY 20 TIMES. NO REPAIRS WERE MADE. 2. RAIN ENTERS ABOVE THE DRIVER'S SIDE WINDOW. ODI ID NUMBER:10242104 HAS BEEN ESTABLISHED BECAUSE OF THE SAME COMPLAINT ON THE SAME MAKE AND MODEL. 3. THE RIGHT FRONT TIRE HAD TO BE REPLACED TWICE DURING THE FIRST 6 MONTHS I HAD THE CAR BECAUSE THE TIRES IN THAT POSITION DAMAGED QUICKLY FOR NO LEGITIMATE CAUSE. I HAD TO BUY A WHOLE SET OF TIRES BEFORE THE CAR HAD 18,000 MILES ON IT BECAUSE THEY WERE WEARING SO BADLY THAT THEY WERE UNSAFE. THIS COINCIDES WITH ODI ID NUMBER:10269039 CITING THE SAME PROBLEMS ON ANOTHER 07 SOLARA CONVERTIBLE. 4. THE SOFT TOP HAS UNRAVELED IN TWO PLACES ABOVE THE FRONT WINDSHIELD AT THE SEAM WHERE IT IS SEWN TOGETHER. TOYOTA'S RESPONSE HAS VARIED FROM: NOTHING WRONG WITH IT, I MUST HAVE DAMAGED IT, AND IT ISN'ET COVERED UNDER WARRANTY. 5. THE ELECTRONIC SEAT STUCK. IT WAS LEFT IN A FORWARD POSITION (AS IF TO ALLOW ACCESS TO THE BACK SEAT). THE TECH SAID THE CAR DIDN'T HAVE POWER SEAT FUNCTIONS. I TOLD HIM I'D PAID FOR ONE ON MY ITEMIZED BILL AND I'D BEEN USING IT. UNREPAIRED, IT RESUMED WORKING BY ITSELF WEEKS LATER.

**Additional Summary:**

**Date of Incident:** 20061123  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** FOUNTAIN HILLS, AZ

**NHTSA Summary:**  
 I HAD A LIFE THREATENING EXPERIENCE IN MY 2007 LEXUS ES350 ON THANKSGIVING DAY 2006. I WAS DRIVING WITH 3 OTHER FAMILY MEMBERS TO PAYSON, AZ FROM FOUNTAIN HILLS, AZ. PAYSON IS IN THE MOUNTAINS AT HIGHER ELEVATION. I LIKE TO USE THE CRUISE CONTROL WHEN I AM DRIVING ANY DISTANCES. WHILE IN HEAVY TRAFFIC GOING UP A MOUNTAIN GRADE, THE CAR STARTED ACCELERATING BY ITSELF. THE FIRST THING I DID WAS HIT THE BRAKE, WHEN THAT DID NOT DISENGAGE THE CRUISE OR ACCELERATION, I STOMPED ON THE BRAKES WITH BOTH FEET. THE VEHICLE WAS NOW ACCELERATING AT OVER 100 MPH IN HEAVY TRAFFIC, THEN I FINALLY PUT THE CAR IN LOW WHICH DID FINALLY DISENGAGE THE CRUISE AND ACCELERATOR. THIS WAS A VERY SCARY EVENT. THE FOLLOWING DAY I IMMEDIATELY TOOK THE CAR IN WITH THIS COMPLAINT TO SCOTTSDALE LEXUS SERVICE DEPARTMENT. I HAD NO DOUBTS THAT THEY WOULD IMMEDIATELY TAKE CARE OF THIS LIFE THREATENING PROBLEM. TO MAKE A VERY LONG AND TIME CONSUMING STORY SHORT, I WAS TOLD TO DRIVE THE CAR UNTIL IT HAPPENED AGAIN AND THAT THEY HAD NEVER HEARD OF THIS PROBLEM BEFORE. PERHAPS THE NEXT TIME I WANT BE ABLE TO MISS ALL OF THE CARS THAT WERE IN MY WAY AND COULD JUST GO OVER THE EDGE OF THE MOUNTAIN. I HAVE SPOKEN TO A LOT OF LEXUS PEOPLE WITH NO RESULTS AND FINALLY DECIDED TO DROP IT UNTIL I HAD TIME TO TRY AND DEAL WITH THE SITUATION. I DID NOT GET A NEW LEXUS SO I COULD BE CONSUMED WITH MY TIME WASTED WITH INNUMERABLE PHONE CALL AND REPETITION OF STORIES. I PUT \$6000 DOWN ON MY NEW LEXUS LEASE THAT IS FOR 3 YEARS AND NOW HAVE A VEHICLE THAT I DO NOT FEEL SAFE TO DRIVE. I CERTAINLY WOULD NEVER SET THE CRUISE CONTROL AGAIN. \*JB

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** COLUMBIA, MO

**NHTSA Summary:**  
 NHTSA - COMPLAINT  
 NOV 23, 2006: IN REPOSITIONING MY 2007 AVALON XLS IN THE DRIVEWAY OF MY SISTER'S HOUSE, I SLOWLY PULLED FORWARD TO RE-PARK AND APPLIED THE BRAKES TO STOP AND THE ACCELERATOR IMMEDIATELY WENT TO HIGH RPMs. I HAD TO BRAKE VERY HARD TO KEEP FROM HITTING MY BROTHER-IN-LAW AND HIS HOUSE. I WAS BRAKING AND TURNED OFF THE IGNITION. ON DEC 23, 2006 THE SAME PROBLEM OCCURRED TWO BLOCKS IN A ROW IN OUR CONGESTED DOWNTOWN AREA. THE 1ST TIME, I WAS STOPPING VERY SLOWLY; THE SECOND TIME I WAS BRAKING TO WAIT FOR A PARKING SPACE. THE 1ST TIME I TRIED CHANGING GEARS AND THEN TURNED OFF THE IGNITION. THE SECOND TIME I IMMEDIATELY TURNED OFF THE IGNITION. MY WIFE WAS A WITNESS. I DROVE THIS CAR FOR THE MONTH AFTER IT'S PURCHASE NEW (SEP 6, 2006), EVERY 2ND/3RD DAY FOR THE MONTH OF OCT 2006, AND OFF/ON DURING NOV 2006 WITHOUT THIS PROBLEM. I TOLD THE LOCAL DISTRICT TOYOTA PERSONNEL THAT I COULD NOT TRUST THIS PARTICULAR VEHICLE. IT HAS BEEN PARKED EITHER AT THE DEALERSHIP OR IN MY GARAGE ALMOST EVERY DAY SINCE DEC 23, 2006. THE DISTRICT TOYOTA PERSONNEL SAID THAT THEY DID NOT CONSIDER MY CAR UNSAFE BECAUSE THEY 'COULD NOT FIND ANY ERROR CODES' IN THE CAR'S SYSTEM, AND ON THE 102 MILE TEST DRIVE THEY DID, WITHOUT ME PRESENT, THEY DID NOT EXPERIENCE MY PROBLEM. THEY DID SIMULATE IT BY STEPPING ON THE BRAKE AND ACCELERATOR AT THE SAME TIME!!!! I WAS ON THE HIGHEST ALERT THE SECOND TIME IT HAPPENED ON DECEMBER 23RD! MY FOOT WAS NOT ON THE ACCELERATOR! I WAS BRAKING ALL THREE TIMES - OR ELSE MY BROTHER-IN-LAW WOULD HAVE BEEN INJURED, HIS HOUSE DAMAGED, AND CARS DOWNTOWN HIT. I RESENT THE INSINUATION THAT I WAS PUSHING BOTH PEDALS ALL THREE TIMES. NO EXPLANATION WHY I HAD NOT EXPERIENCED THIS PROBLEM IN THE NEARLY THREE MONTHS (WITH THE SAME SHOES ON) BEFORE THE PROBLEM FIRST AROSE. TOYOTA CLOSED MY PROBLEM REPORT AS 'SOLVED' EVEN THOUGH THE LOCAL SERVICE MANAGER STATED HE DID NOT CONSIDER IT 'SOLVED'. WHY? \*NM

**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** RIVERSIDE, CA

**NHTSA Summary:**  
 THIS MAY BE A REPEAT COMPLAINT BECAUSE I FILLED THIS OUT EARLIER BUT MY COMPUTER CRASHED. MY MOTHER AND SISTER HAD A MINOR ACCIDENT TODAY (11/29/2006, 12:10 P.M.) IN WHICH OUR 2005 TOYOTA CAMRY SURGED FORWARD FROM ITS PARKING SPACE WHERE MY MOTHER HAD PULLED IN INTO THE OPPOSITE PARKING SPACE AND INTO A PARKED FORD EXPLORER SUV, KNOCKING OFF THE EXPLORER'S FRONT LICENSE PLATE COMPLETELY ONTO THE GROUND. MY SISTER SAID SHE LOOKED DOWN TO SEE IF MY MOTHER'S FOOT WAS ON THE ACCELERATOR AND IT WAS NOT, IT WAS ON THE BRAKE PEDAL. SHE HEARD MY MOTHER SAY "I CAN'T STOP!" AS SHE STOOD ON THE BRAKE PEDAL. THE CAR SURGED FORWARD INTO THE PARKED EXPLORER ON ITS OWN ACCELERATION. WE HAD A TOYOTA IN THE EARLY 1980'S AND HAD THIS EXACT PROBLEM RESULTING IN ANOTHER CRASH. THIS HAS BEEN A PROBLEM FOR TOYOTA'S SINCE THEN. TOYOTA SHOULD HAVE FIXED THIS PROBLEM OVER THE LAST 20+ YEARS. BACK THEN THERE WAS NO INTERNET TO FILL OUT IMMEDIATELY AFTER THE CRASH TO COMPLAIN. \*JB

**NHTSA Summary:**  
 \*\*\* PHONE LOG 10/25/2007 03:29:43 PM JFewel  
 RNT#071023-000438

Email states: "Problems that i am still having with my Tacoma  
 Now the reason i bought my truck is because both of my sisters have either a toyota or a lexus, also my mother has a lexus, they love their vehicles, so i went and bought my truck it has over 34k miles and i have had my truck in the shop at least 4 times within the year. My moms car had a recall on the tranny and they fixed it and got it done, so i would like to know what is wrong..."

\*\* NOTES 10/25/2007 03:30:41 PM JFewel  
 ...with my tranny, it shifts hard, when i am sitting at a red light the truck lunges forward it feels like some one has stuck me from behind, but that is not it, it is the tranny doing something it shouldnt. And North Park Toyota in Boerne said that one of his techs had to go to a special class or something like that and he asked those same questions about the trucks, had they didnt have an answer for him they just said that is just going to happen, what does that mean

\*\* NOTES 10/25/2007 03:31:10 PM JFewel  
 ...that there is problem with the truck that toyota cant fix, so they just leave it alone. Second, my starter, they have replaced the first one because it wasnt engaging and the starter wood just spin and not start the truck, so it is doing that again, now they say that it could be the sensor from the key to the sensor that is not working, i just dont understand it. And third, i was driving one day with my girl and i went to pass a car and i didnt smash the gas to the

\*\* NOTES 10/25/2007 03:31:12 PM JFewel  
 ...floor just pressed on it to pass and the truck bogged down as if it wernt getting enough fuel but then a couple seconds after that it kicked in and gave us whip lash, so these are the problems that i am having with my truck. So please help me get my truck back to the way it should."

\*\*\* SUBCASE 200710251280-1 CREATED 10/25/2007 03:33:21 PM JFewel  
 Thank you for contacting Toyota Motor Sales, U.S.A., Inc.

We apologize for your concerns with the transmission, starter and acceleration of your 2007 Tacoma. In order to properly assess your concerns, we have contacted the Customer Relations Manager at North Park Toyota/Boerne to further evaluate your Tacoma.  
 Toyota dealership technicians are specialized in the diagnosis and repair of Toyota vehicles. They are provided with extensive training and have access to state-of-the-art equipment to help in the accurate diagnosis of your vehicle. Also, if necessary, we provide additional support to assist Toyota dealership technicians in resolving unusual vehicle concerns.  
 The Customer Relations Manager will contact you by the end of the business day, Tuesday, October 30, 2007. In the event you do not receive any contact from the dealership by this date, please contact us < http://toyota.custhelp.com/cgi-bin/toyota.cfp/php/enduser/std\_adp.php?p\_faaid=4164> with file #Incidents.c\$clarifycasenumbr.

**Location of Incident:** LITTLE ROCK, AR  
**NHTSA Summary:**

WE OWN A 2002 TOYOTA CAMRY LAST NIGHT MY WIFE, SON AND A FRIEND WERE SITTING AT A STOP LIGHT BEHIND ANOTHER CAR. WITH MY WIFE'S FOOT ON THE BRAKE, THE CAR REVVED UP AND LUNGED INTO THE BACK OF THE CAR IN FRONT OF HER. IMMEDIATELY AFTER HITTING HER ONCE, THE ENGINE REVVED UP EVEN HIGHER AND ACCELERATED INTO THE CAR AGAIN. HAD SHE BEEN FIRST IN LINE AT THE LIGHT, SHE WOULD HAVE BEEN THROWN INTO THE MIDDLE OF A BUSY FOUR LANE INTERSECTION AND MIGHT POSSIBLY NOT BE HERE TODAY. IF YOU HAVE ANY MORE INFO ON THIS, COULD YOU PLEASE SEND IT TO ME OR TELL ME WHERE IT COULD BE FOUND. \*JB

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ORDER TO STOP IT. WE IMMEDIATELY TOOK THE CAR TO A LEXUS REPAIR SHOP. THEY, OF COURSE, COULD FIND NOTHING WRONG. THEY MENTIONED HAVING RECEIVED SOME REPORTS OF FLOOR-MAT PROBLEMS CAUSING ACCELERATION, BUT COULDN'T TELL ME MORE. THE FLOOR-MAT ON THIS LEXUS WAS FIXED, SO THAT WASN'T THE PROBLEM. THIS INCIDENT ONLY HAPPENED ONE TIME. I THOUGHT THE PROBLEM WAS RELATED TO THE CRUISE CONTROL, BECAUSE MY BROTHER-IN-LAW HAD HAD A SIMILAR PROBLEM (GOING FORWARD THOUGH) THAT WAS DIAGNOSED AS THE CRUISE CONTROL CAUSING ACCELERATION. EVEN THOUGH LEXUS SAID MY CRUISE CONTROL CHECKED O.K., I NEVER USED IT AGAIN. WE DECIDED TO SELL THE CAR, & DID SO WITHIN 6 MONTHS.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10291063  
**Date of Incident:** 20061210  
**Vehicle:** 2007 TOYOTA PRIUS  
**Location of Incident:** WESTWOOD, MA  
**NHTSA Summary:**

I BOUGHT A 2007 PRIUS FROM COPELAND TOYOTA-SCION DEALERSHIP. FROM THE BEGINNING, I NOTICED THAT IT ACCELERATES ON ITS OWN DURING THE DRIVE. FOR EXAMPLE, WHILE GOING AT 55 MPH, SUDDENLY, IT TRAVELS AT A HIGHER SPEED WITHOUT MY INTERVENTION. I FEEL LIKE BEING HYDROPLANING, LEAPING OR SHOOTING BY A FEW YARDS, AND THEN IT WOULD BE BACK TO NORMAL. INITIALLY, I DID NOT PAY ATTENTION TO IT, BUT I BROUGHT IT TO YOUR DEALERSHIP AND SPOKE ONE OF THEIR COUNSELORS NEARLY TWO YEARS AGO. I WAS TOLD THAT ONE OF YOUR TECHNICIANS WILL HAVE TO RIDE AND DIAGNOSE THE PROBLEM AND SINCE IT HAPPENS RANDOMLY, THERE IS NO WAY ANYONE ONE CAN DETECT. FIRST, I NOTICED THIS PROBLEM IN DECEMBER 2006. SINCE THEN, IT HAS BEEN HAPPENING ONCE IN A WAY. THE AVERAGE FREQUENCY CAN BE 3-5 TIMES A MONTH, AND IT COULD BE MORE BASED ON THE HIGHWAY USAGE. I WAS UNAWARE OF THE RAMIFICATIONS UNTIL THE RECENT RECALL NOTICE. I WANTED TO SEND THIS INFORMATION IN SEPTEMBER WHEN THE RECALL ON FLOOR MATS WAS ANNOUNCED. I AM MORE AND MORE CONCERNED ABOUT THIS UNPREDICTABLE SPEEDING ON ITS OWN WHICH COULD BE VERY DANGEROUS AS IT HAPPENED WITH SEVERAL CRASHES REPORTED (TODAY, I SAW A NEWS SEGMENT ON THE NBC TV INVOLVING A PRIUS). A CREEPING FLOOR MAT CAN GET THE GAS PEDAL STUCK, BUT WOULD NOT CAUSE SUDDEN ACCELERATION. SUDDEN ACCELERATION MAY BE MORE SEVERE IN THE CASES OF CRASHES, WHILE MINE IS LESS SEVERE, AT LEAST THUS FAR. IF THERE IS A FIX FOR THIS, I RATHER HAVE IT DONE AS SOON AS POSSIBLE, BEFORE IT GETS ANY WORSE. THANKS, AND I HOPE TO HEAR FROM YOU SOON. \*TR YOURS TRULY, S. CHAVALI

**Location of Incident:** CYPRESS, TX  
**NHTSA Summary:**  
 I AM PLEASED TO SEE SOMETHING IS FINALLY BEING DONE ABOUT THE LEXUS ES 350 2007 ACCELERATION PROBLEM. I FILED A COMPLAINT IN DEC 2006, AS I WAS SPARED FROM A FATAL CRASH DUE TO THE ACCELERATION PROBLEM. THE RECALL THAT CAME OUT THE FOLLOWING SPRING WAS ONLY FOR LEXUS MATS AND I DID NOT HAVE A LEXUS MAT BUT HAD ANOTHER STORE BOUGHT MAT. THE 2007 RECALL PROGRAM DID NOT PROPERLY ADDRESS THE ISSUE. I DISCUSSED WITH THIS AGENCY AND SENT LETTERS TO TOYOTA IN JAPAN AND TO THE LEXUS HEADQUARTERS IN CA. I KEPT COPIES OF ALL CORRESPONDENCE SENT IN 2006 SO THEY KNEW ABOUT THE PROBLEM. I EVEN SENT COPIES OF COMPLAINTS POSTED ON THIS WEBSITE. AS THE LEXUS DEALERSHIP DENIED ANY REPORTABLE INCIDENCE. I AM SO DISAPPOINTED THAT PEOPLE DIED AFTER MY ATTEMPT TO GET SOMEONE TO LISTEN. I AM STILL FEARFUL OF OUR CAR, BUT CAN'T SELL IT FOR A FAIR PRICE SO WE HAVE CONTINUED TO DRIVE IT WITH MUCH CONCERN FOR NOT ONLY OUR FAMILY BUT OTHERS ON THE ROAD. THESE CARS SHOULD HAVE BEEN TAKEN OFF THE ROAD IN 2006. I STILL HAVE NIGHTMARES ABOUT THE CAR ACCELERATING AND PROBABLY WILL FOR A LIFETIME. I FEEL YOUR AGENCY SHOULD HAVE BEEN MORE AGGRESSIVE IN 2006 WHEN THIS FIRST STARTED. TOYOTA/LEXUS HAS FAILED THOSE WHO HAVE DIED OR BEEN INJURED AND ANY ADDITIONAL POTENTIAL INJURIES OR LOSSES THAT MAY OCCUR BEFORE APRIL 2010 WHEN THE NEW SOFTWARE AND PEDALS BECOME AVAILABLE WILL BE THEIR FALL AS WELL. \*TR

**Vehicle:** 2007 TOYOTA AVALON  
**Location of Incident:** MORGAN, UT  
**NHTSA Summary:**

I PURCHASED A 007 TOYOTA AVALON LIMITED IN 11/2006 BEFORE A MONTH PASSED I HAD TO TAKE IT TO THE LOCAL DEALERSHIP IN VISALIA, CA. I TOLD THE SHOP MANAGER THE FOOTPEDAL HAD GOTTEN STUCK AND THE CAR WAS WIDE OPEN, I STOMPED ON THE GAS PEDAL AND IT WOULDN'T COME UP, THEN I REACHED DOWN AND GRABBED IT AND PULLED IT UP, I TOLD THE SHOP MANAGER IF I HAD BEEN IN TRAFFIC OR TOWN THERE WOULD HAVE BEEN INJURIES OR DEATH AND THIS WAS A SERIOUS PROBLEM. THEY CHECKED IT OUT AND TOLD ME I DIDN'T KNOW HOW TO DRIVE THE CAR AND IT WAS OK. I WAS A MAD CUSTOMER, THEN I TOLD HIM THERE WAS ALSO A PROBLEM WITH THE COMPUTER, THE THING WOULDN'T IDLE DOWN COMING UP TO A STOP SIGN, AND IF YOU PUT THE CAR IN NEUTRAL AS YOU BRAKING COMING UP TO A STOP IT WOULD ALMOST PUT YOU THROUGH THE WINDOW, AND THEY NEEDED TO FIX THIS, I GOT THE SAME ANSWER THE CAR IS OK. WELL BY THEN I REALLY MAD, BUT I ALSO KNEW THEN THEY HAD NO INTENTION OF FIXING OR ACKNOWLEDGING THERE WAS A PROBLEM, THE CAR HAS 85K MILES ON IT NOW AND I'M ON THE 3RD SET OF TIRES, 2ND SET OF BRAKES, 2ND SET OF ROTORS, AND HAD THE FRONT END ALIGNED AND NEW BOLTS INSTALLED IN THE FRONT END SO THE CAMBER COULD BE ADJUSTED, WHAT A CROCK OF SHIT, I HAVE BEEN ASKED TO LEAVE DEALERSHIPS FOR RAISING HELL ABOUT THIS CAR, I'VE ALSO SAID THE PAINT ON THIS CAR IS JUNK TO AND THEY REFUSE TO DO ANYTHING ABOUT IT. I HAVE THREE YEARS OF DIESEL AND GASOLINE MECHANICS, WAS THE TOP OF MY CLASS AND SOUGHT AFTER BY MANY LARGE CORPORATIONS WHEN I GRADUATED IN 1978, AND I USED TO WORK AT A CHEVY DEALERSHIP AS A LINE MECHANIC WHEN I GRADUATED. I CAN ASSURE YOU TOYOTA KNEW THEY HAD PROBLEMS, AND REFUSED TO DO ANYTHING AS FAR BACK AS 2006, IF I HAD THE EXTRA MONEY OR THE TIME I WOULD HAVE SUED THEM A LONG TIME AGO, BUT THEY ARE SO BIG AS A COMPANY I PROBABLY DIDN'T HAVE A CHANCE UNTIL NOW. I WILL BET YOU IF YOU INTERVIEW WORKERS AT THE TOYOTA PLANTS WHERE THE CARS WERE BUILT YOU WILL FIND THEY HAVE HAD GAS PEDALS STICK AT THE FACTORY TOO. WANT TO BET ME? \*TR

does not reach normal operating idle. I then put it in reverse and start to back out of my driveway at which time the engine revs way up once again and at  
 \*\*\* NOTES 12/18/2006 01:12:58 PM JFewel  
 ...and it was not a problem when I purchased the truck from Billion Motors in Sioux Falls, SD. After the problem began, I set up an appointment with Toyota of Carlsbad, Carlsbad, CA. I left it overnight which is not very convenient for me and they did a cold start the following morning. It revved high for them as well. They said it was operating normal and basically the computer system must have made an adjustment for California. I am not at all satisfied with this  
 \*\*\* NOTES 12/18/2006 01:13:00 PM JFewel  
 ...times revs up and down sporadically. Then, I drive away(hoping I have not awakened all of my neighbors) and after driving for a couple of minutes it will return to normal idle speed. This is not normal and I am unsatisfied with the response from the local Carlsbad dealership. Thanks for any help you can give me. It can not be good for the engine to rev high when cold.  
 Jim Kelly"

\*\*\* SUBCASE 200612181319-1 CREATED 12/18/2006 01:15:32 PM JFewel  
 Thank you for contacting Toyota Motor Sales, U.S.A., Inc.  
 We apologize for your concern regarding your Toyota's idle speed.  
 While we cannot diagnose your Toyota based on your email, and as you have not mentioned any warning lights coming on, your concern may be related to the way the engine alters its idle speed when cold, to allow the emissions system to warm up faster, which becomes more pronounced as the weather turns colder. By way of background, each year the government slightly tightens emissions standards so that vehicles emit less pollution.  
 Modern vehicles have a very sophisticated emissions system that only works when hot or warm. If the vehicle is cold, more emissions are produced.  
 The only way to heat the emissions components quickly up so they work properly is to run the engine faster when it is cold. The government wants engines and emissions systems to warm up as soon as possible so the emissions control systems work efficiently as soon as possible after a cold start.  
 You will notice that the engine will run fast when cold, (engine RPM higher) until the emissions components are properly warmed. By forcing the idle speed to stay higher, the engine turns faster and warms up more quickly than if it is allowed to idle normally as it does when it is warmed up. To accommodate the higher RPMs when the engine is cold, Toyota specifies the following engine oil, which aids cold start-up and high RPM in the cold engine:  
 Oil grade:  
 API grade SL "EnergyConserving" or ILSAC multigrade engine oil Recommended viscosity:  
 SAE SW70  
 SAE SW70 is the best choice for good fuel economy and good starting in cold weather.  
 In addition, we apologize for the concerns you experienced with your recent service at Toyota Carlsbad. You can be sure that Toyota is committed to providing the best possible service at Toyota dealerships and to making the service experience a favorable one. We encourage each dealership to maintain a professional level of performance at all times, and we were sorry to learn that you felt the service you received was less than satisfactory.  
 In the interest of customer satisfaction, we have contacted the Customer Relations Manager at Toyota Carlsbad to assist you with your concerns. The Customer Relations Manager will contact you by the end of the business day Thursday, December 21, 2006.  
 In the event you do not receive contact from the dealership by this date, please contact us <  
[http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enduser/std\\_adp.php?p\\_faqid=4164](http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enduser/std_adp.php?p_faqid=4164)> with file #5Incidents.cSclarifycasenumber.  
 It is through correspondence such as yours that we are able to continue to improve Toyota dealership services, and we sincerely appreciate the time you have taken to bring this matter to our attention.

\*\*\* CASE CLOSE 12/19/2006 11:45:58 AM DLR04222  
 12/19/JODI CORNMAN, CR, SPOKE WITH CUSTOMER. CUSTOMER HAD VEHICLE DIAGNOSED BY TOYOTA CARLSBAD AND THE CONCERN WAS DEEMED NORMAL. KATIE LEWTER IN NEW CAR ACCESSORIES IS CONTACTING HIM REGARDING THE CAMPER SHELL INQUIRY.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10293632  
**Date of Incident:** 20061219  
**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** HOUSTON, TX

**NHTSA Summary:**  
 FIRST, LET ME SAY THAT I AM AND REMAIN A SATISFIED TOYOTA CUSTOMER. HOWEVER, I HAVE EXPERIENCED THE "STUCK ACCELERATOR" TYPE OF INCIDENT IN MY 2003 CAMRY ON NUMEROUS OCCASIONS. AT FIRST, I CONSIDERED IT TO BE SOME SORT OF RARE EVENT. IT DID SEEM TO ME THAT THE FLOOR MAT AND THE ACCELERATOR PEDAL WERE SOMEHOW "JAMMED" WHEN THAT HAPPENED. CURRENTLY, WITH THE NEWS ABOUT OTHERS HAVING THE SAME EXPERIENCE, WITH NEWER MODELS OF CAMRY, I WANT TO ALERT NHTSA THAT THE PROBLEM MAY EXIST IN MODEL YEARS AS FAR BACK AS 2003.  
 \*TR NORMAN F CARNAHAN, PE, PHD

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10178672  
**Date of Incident:** 20061220  
**Vehicle:** 2002 TOYOTA AVALON  
**Location of Incident:** WALNUT CREEK, CA

**NHTSA Summary:**  
 THE CARE WOULD ACCELERATE WITHOUT INPUT FROM THE DRIVER. \*NM

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10310193  
**Date of Incident:** 20061220  
**Vehicle:** 1998 TOYOTA CAMRY  
**Location of Incident:** SWEET WATER, AL

**NHTSA Summary:**  
 MY MOTHER'S 1998 TOYOTA CAMRY EXPERIENCED THE GAS PEDAL STICKING ON HER CAR ON A REGULAR BASIS, IN 2006, TO THE POINT THAT THE CAR WOULD NOT GO AFTER ATTEMPTING TO TAKE OFF AFTER A STOP OR AFTER STARTING UP THE CAR. THIS WAS EXPERIENCED OVER A 3 MONTH PERIOD WHEREIN IT WOULD TAKE ANYWHERE FROM 5-10 MINUTES BEFORE THE GAS PEDAL WOULD WORK TO TAKE OFF FROM THE STOP POINT. THIS CONTINUED UNTIL 12:06 AT WHICH TIME THE GAS PEDAL WOULD NOT ACCELERATE AT ALL WHILE SITTING AT A RED LIGHT ON A BUSY HIGHWAY IN THE MIDDLE OF TRAFFIC. SHE ATTEMPTED TO TAKE OFF FROM THE STOP POINT FOR OVER 30 MINUTES UNTIL SOMEONE PHONED THE POLICE TO REPORT THAT SHE WAS IN THE MIDDLE OF THE HIGHWAY AND COULD NOT TAKE OFF. THE POLICE SHOWED UP AND ATTEMPTED TO ACCELERATE THE CAR WITH NO SUCCESS. THE CAR WAS THEN PUSHED TO AN AUTO REPAIR SHOP WHO REPAIRED THE GAS PEDAL. SHE WAS CHARGED \$50 FOR THE REPAIR. THE TOYOTA RECALL COVERS ONLY THE CARS FROM 2007-2010, BUT THIS PROBLEM EXISTS ON CARS PRIOR TO 2007 AS THIS IS WHAT HAPPENED TO MY MOTHER'S 1998

C-746

**Safety Research & Strategies**

CAMRY. THIS NEEDS TO BE ADDRESSED BY TOYOTA ON MODELS PRE-2007 AS THERE IS UNCERTAINTY THAT THE REPAIR TO MY MOTHER'S GAS PEDAL IS A PERMANENT FIX.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10189487  
**Date of Incident:** 20061221  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** CORONA, CA

**NHTSA Summary:**  
 UNEXPLAINED ACCELERATION / TIMING COVER SEAL TO THE ENGINE BLOCK MY 2007 ES350 ACCELERATED OUT OF CONTROL REACHING THE SPEED OF 95 MILES PER HOUR. THE ONLY WAY I WAS ABLE TO SLOW THE CAR DOWN WAS TO PUT THE CAR IN NEUTRAL. AND THEN IT BEGAN TO SLOW DOWN. I TOOK INTO TO MY LOCAL DEALER AND THEY WHERE NOT ABLE TO DIAGNOSE THE PROBLEM. IN APRIL OF 2207 I NOTICES MY ES350 HAD A SMALL OIL LEAK WHEN THE DEALER INSPECTED THE VEHICLE THY FOUND THAT THE TIMING COVER TO THE ENGINE BLOCK WAS POORLY SEALED AND WOULD NEED TO BE REPAIRED. I WAS TOLD THERE WAS A SERVICE BULLETIN OUT ON THE SEALS AND MY CAR WOULD NEED TO BE IN THE SHOP ABOUT A WEEK TO REPAIR. \*TR

 Mr. Barton is concerned w/ high idle speed when the engine is cold & feels is damaging engine.

\*\*\* SUBCASE 200701290237-1 CREATED 01/29/2007 07:32:59 AM JSpencer  
 Email sts  
 "Hi,  
 I purchased a 2006 Tacoma with the 4cyl. 5 speed.  
 When it is cold out and I start it to warm it up, it starts and idles at 2200 rpm's. I called the dealer and they say that it "normal" and can't be reprogrammed with the computer! It does idle down after a while. I have never had a Toyota cold idle at that high of RPM.  
 That motor is going to start knocking due to bearing failure before it is paid for. How can this be changed?  
 Thank you,  
 Rex Barton"

\*\*\* SUBCASE 200701290237-2 CREATED 01/29/2007 07:55:40 AM JSpencer  
 start ncr response  
 ?Thank you for contacting Toyota Motor Sales, U.S.A., Inc.  
 We apologize for your concerns with the higher than expected idle speed from your 2006 Tacoma when it is cold.  
 This is the correct operation of your vehicle as the idle speed is increased to get the engine to normal operating temperatures as quickly as possible.  
 The concern you mention regarding running the vehicle at high RPM's when cold is no longer an issue because with most modern vehicles there is full oil circulation within 20 seconds of the engine being turned on. Also over time, a film of oil will start to develop on the internal moving parts of the engine that will not drain back to the pan, which will provide some protection right at start up.  
 After waiting that first 20 seconds, you can drive your vehicle normally with out concern for abnormal wear and tear.  
 Your email has been documented at our National Headquarters under file #5Incidents.cSclarifycasenumber.  
 If we can be of further assistance, please feel free to contact us <%20http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enduser/std\_adp.php?p\_faqid=4164>.  
 Toyota Customer Experience?

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10177059  
**Date of Incident:** 20061223  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** BLACKSBURG, VA

**NHTSA Summary:**  
ON DEC 23, 2006, AROUND 11:20 AM, I WAS DRIVING AT ABOUT 5 MPH IN A PARKING LOT. AS I MADE A SLIGHT TURN TO THE LEFT TO STRAIGHTEN OUT, THE CAR SUDDENLY ACCELERATED AND HIT A PARKED CAR. THE BRAKES DID NOT WORK, EVEN WHEN FLOORED. THE CAR WOULD NOT STOP UNTIL IT PUSHED ANOTHER CAR UP ONTO THE SIDEWALK AND ITS WHEELS BUMPED UP AGAINST THE CURB. THE CAR WAS EVENTUALLY STOPPED BY TURNING OFF THE ENGINE USING THE KEY IN THE IGNITION. (TAKING MY FOOT OFF THE BRAKE PEDAL SEEMED TO MAKE IT GO FASTER.) THE WEATHER WAS SUNNY, BUT THE CAR HAD BEEN PARKED OUTSIDE IN THE RAIN THE TWO PREVIOUS DAYS. I HAD NOT USED THE CRUISE CONTROL ANYTIME RECENTLY BEFORE THE INCIDENT. WE HAVE NOT HAD ANY PROBLEMS WITH THIS CAR, ALTHOUGH OCCASIONALLY, THE RADIO TURN HAS TURNED ITSELF ON WHILE WE WERE DRIVING.  
\*NM

**NHTSA ODI Number:**  
**Date of Incident:** 20061223  
**Vehicle:** 2005 LEXUS ES350  
**Location of Incident:** SAN DIEGO, CA

**NHTSA Summary:**  
**Additional Summary:**  
They were leaving Parkway Plaza parking lot. Husband was driving out of parking lot. Tried to avoid cars and pedestrians. Husband was trying to brake and trying to lift accelerator with foot. Hit about three or four cars and one head-on, which finally stopped the car. Police and fire department came. Husband turned car back on and was unable to replicate. Car towed away. Wife called dealer and said she thought accelerator got stuck.

People in last vehicle hit had some injuries - not sure of extent - not seriously injured

Approx. \$13k in body work done. After the body work was done, brought car home, and it lunged into the garage. Called Karmy Mesa Lexus. Spoke with service manager Daniel Byron. Said the car lunged. Daniel said if they brought the car on the lot he would call the police. He said he didn't want anything to do with their car. Might not work there anymore.

No rubber mats in her car. Traded it in shortly after lunging in garage.

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THE FIRST ACCIDENT ON 12/23/2006 WAS A BIG ONE. IT WAS MY FIRST AND ONLY ACCIDENT. IT HAPPENED IN ROOSEVELT CIRCLE, MEDFORD, MA. I GOT INTO THIS ACCIDENT WHEN I WAS DRIVING MY 2001 CAMRY AT LESS THAN 30 MILES PER HOUR IN A LOCAL STREET BRIDGE, TRYING TO TURN TO THE LEFT, THERE WERE NO CARS AROUND, ONLY 2 OR 3 CARS FAR AWAY BEHIND ME. WHILE I WAS TURNING, SUDDENLY THE 2001 CAMRY WAS GOING OUT OF CONTROL. I JUST COULD NOT SLOW DOWN OR STOP THE CAR, NO MATTER WHAT I DID. IT KEPT MOVING AHEAD. I TURNED THE CAR TO THE LEFT AND THEN RIGHT. IT HIT THE LEFT AND RIGHT CURB OF THE STREET BRIDGE. MY CAR WAS DAMAGED VERY BADLY. FORTUNATELY I WAS OK. I REPORTED THE ACCIDENT TO THE MASSACHUSETTS MOTOR VEHICLE DEPARTMENT AND LOCAL POLICE DEPARTMENT, BUT I HAD NO IDEA ABOUT WHAT HAD HAPPENED. THE ONLY THING I COULD DO AT THAT TIME WAS TO REPLACE 4 TIRES AND TO REPLACE THE BRAKE SYSTEMS, BESIDES FIXING THE BODY AND THE DAMAGED ENGINE. I SPENT MORE THAN \$6000 TO FIX THE CAR AND SIX POINTS WAS ADDED INTO MY CAR INSURANCE. THE SECOND ONE IN 2009 WAS SIMILAR TO THE ONE IN 2006. IT WAS VERY SCARY. THERE WERE A LOT OF CARS AROUND AND IT COULD BE A HUGE ONE. MY SON WAS DRIVEN THE SAME CAR, 2001 CAMRY TO THE CHURCH IN CHELMSFORD, MA ON A FRIDAY EVENING. I WAS SITTING BESIDES HIM. HE WAS DRIVING ON THE LOCAL STREET IN LESS THAN 30 MILES PER HOUR AND WANTED TURN TO THE RIGHT AT AN INTERSECTION. SUDDENLY HE COULD NOT SLOW DOWN OR STOP THE CAR. HE ALMOST HIT THE CAR ON THE SIDE STREET WAITING FOR THE GREEN LIGHT. AFTER THAT HE STILL COULD NOT CONTROL THE CAR, THE CAR WAS MOVING AND MOVING AHEAD, AND FINALLY THE CAR WAS INACTIVELY STOPPED BY A SET OF BUSH AND A CURB IN A SMALL PARKING LOT. AGAIN I HAD NO IDEA WHAT HAD HAPPENED AT THAT TIME. BUT WHY WAS MY 2001 CAMRY OUT OF CONTROL? I AM WONDERING WHAT WOULD HAPPEN IF THE INCIDENT HAPPENS IN A HIGH WAY? MY SON OR I MIGHT BE KILLED! THAT IS REALLY SCARY!

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10295193  
**Date of Incident:** 20061225  
**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** VALENCIA, CA

**NHTSA Summary:**  
TL\* THE CONTACT OWNS A 2003 TOYOTA CAMRY. THE ACCELERATOR PEDAL WOULD BECOME STUCK DUE TO THE ENTRAPMENT OF THE FLOOR MAT. SHE USUALLY HAS TO MANUALLY REMOVE THE FLOOR-MAT TO PREVENT A CATASTROPHIC FAILURE. THE FAILURE OCCURRED EVERY TIME SHE OPERATED THE VEHICLE. THE VEHICLE WAS TAKEN TO THE DEALER. THE TECHNICIAN STATED THAT SINCE HER VEHICLE WAS NOT INCLUDED IN RECALL NUMBER 09V388000 (VEHICLE SPEED CONTROL-ACCELERATOR PEDAL), SHE WAS INELIGIBLE FOR A FREE REMEDY. SHE CALLED THE MANUFACTURER, BUT COULD NOT REACH A REPRESENTATIVE. NO REPAIRS WERE MADE, BUT SHE WAS IN THE PROCESS OF REMOVING THE FLOOR-MAT. THE FAILURE MILEAGE WAS APPROXIMATELY 110,000. THE CURRENT MILEAGE WAS APPROXIMATELY 162,000.

**Date of Incident:** 20061226  
**Vehicle:** 2005 LEXUS ES330  
**Location of Incident:** LITTLE ROCK, AR

**NHTSA Summary:**  
MY 2005 LEXUS ES 330 HAD A SUDDEN ACCELERATION EVENT WHILE I WAS DRIVING IN MULTI-LANE TRAFFIC IN PENSACOLA, FLORIDA. I BRAKED WITH BOTH FEET, BUT THE ENGINE KEPT WINDING UP. I TURNED OFF THE KEY AND BROUGHT THE VEHICLE TO A STOP IN TRAFFIC. I PLACED THE CAR IN PARK, RE-STARTED THE ENGINE, AND IT CONTINUED TO INCREASE IN RPM'S. I TURNED OFF THE ENGINE AND THEN STARTED IT AGAIN. THAT TIME, THE ENGINE WAS AT NORMAL RPM'S. I PULLED OUT OF THE TRAFFIC INTO A PARKING LOT AND CALLED THE MOBILE LEXUS NUMBER. THEY SENT A TRUCK AND TRAILERED IT TO MOBILE WHERE THEY SAID THEY COULDN'T FIND ANY EVENT RECORDED ON THE COMPUTER AND THAT IT WAS PROBABLY A FLOOR-MAT ISSUE. I MADE NO ADJUSTMENTS TO THE FLOOR MAT OR THE ACCELERATOR PEDAL DURING MY EVENT. I THINK IT WAS SOMETHING ELECTRICAL. FORTUNATELY, I HAVE NOT HAD ANOTHER SUDDEN ACCELERATION EVENT, BUT I AM NOT REALLY COMFORTABLE WITH THE CAR. THIS EVENT IS RECORDED IN MY LEXUS SERVICE RECORD, CASE #063560031.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10177384  
**Date of Incident:** 20061228  
**Vehicle:** 1999 TOYOTA CAMRY  
**Location of Incident:** CANAL WINCHESTER, OH  
**NHTSA Summary:**  
 ACCELERATOR PEDAL STICKS WHEN TRYING TO ACCELERATE FROM A DEAD STOP OR SLOW ROLL. SOMETIMES IT TAKES A HARD STOMP TO BREAK FREE OR TO HOLD DOWN BRAKE PEDAL AND ACCELERATOR PEDAL AT SAME TIME WHEN STOPPED AT LIGHT OR STOP SIGN. PERSONALLY CHECKED COMPONENTS ASSOCIATED WITH PEDAL BUT CANNOT FIND ANYTHING OUT OF THE ORDINARY. SEEMS TO STICK WHEN ENGINE IS UP TO OPERATING TEMPERATURE. \*NM  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10196744  
**Date of Incident:** 20061228  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** COTTEKILL, NY  
**NHTSA Summary:**  
 TL\*THE CONTACT OWNS A 2007 TOYOTA CAMRY. THE CONTACT STATED THAT THE COMPUTER THAT CONTROLS THE TRANSMISSION PREVENTS THE VEHICLE FROM MOVING WHEN THE ACCELERATOR IS DEPRESSED. OCCASIONALLY, THE VEHICLE SURGES TO HIGH SPEEDS WHEN THE ACCELERATOR PEDAL IS DEPRESSED. SHE STATED THAT SHE WAS ALMOST INVOLVED IN NUMEROUS CRASHES DUE TO THE FAILURE. TOYOTA STATED THAT THEY ARE AWARE OF THE FAILURE AND ARE WORKING ON A SOLUTION. HOWEVER, THEY CANNOT ASSIST THE CONTACT UNTIL THAT TIME. SHE STATED THAT THE CRUISE CONTROL SURGES 5-10 MPH OVER THE LIMIT IN WHICH IT IS SET. THE FAILURE CAUSES HER TO LOSE CONTROL OF THE VEHICLE. THE VIN AND ENGINE SIZE WERE UNKNOWN. THE CURRENT MILEAGE IS 7,000 AND FAILURE MILEAGE WAS 1,000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10204341  
**Date of Incident:** 20061228  
**Vehicle:** 2006 LEXUS GS300  
**Location of Incident:** LEESBURG, IN  
**NHTSA Summary:**  
 UNCONTROLLED ACCELERATION OF A 2006 LEXUS GS 300 OCCURRED DURING OVERTAKING OF ANOTHER VEHICLE ON A TWO LANE US HIGHWAY. CAR WAS TOWED TO A LEXUS DEALER (LEXUS OF FT. WAYNE INDIANA) WHERE IT WAS DETERMINED THAT THE DRIVER'S FLOOR MAT WAS JAMMED AGAINST THE ACCELERATOR PEDAL. THE DEALER STATED THAT THIS WAS THE ONLY CASE OF THIS TO THEIR KNOWLEDGE. AFTER SEEING THE NHTSA REPORT OF RECALL REGARDING DIFFERENT LEXUS VEHICLES WITH THE SAME PROBLEM I SUSPECT THAT NHTSA HAS NOT BEEN INFORMED OF THE POTENTIAL FOR THE PROBLEM TO BE MORE WIDESPREAD, POTENTIALLY REQUIRING A BROADER RECALL EFFORT. THE DATE OF THE INCIDENT (12/28/06) IS APPROXIMATE. I WOULD EXPECT THAT THE EXACT DATE IS AVAILABLE FROM THE DEALER. THE INFORMATION UNDER "EQUIPMENT" IS NOT ACCURATE AS THE CHOICES MAKE NO SENSE. \*TR  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10313586  
**Date of Incident:** 20061228  
**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** BATH (ADOLPHUSTOWN), 00  
**NHTSA Summary:**  
 MY 2003 TOYOTA CAMRY LE V6 INEXPLICABLY ACCELERATED WHILE I WAS DRIVING INTO MY GARAGE ON DEC 28 2006. THE CAR STRUCK THE BACK OF THE GARAGE WALL AND CAUSED THE WALL TO FAIL AND PARTIALLY FALL INTO MY HOUSES DEN. AT THE TIME I ASSUMED I HAD HIT THE ACCELERATOR INSTEAD OF APPLYING THE BRAKE. WHEN I THINK BACK THE CAR REALLY ACCELERATED HARD AND WHEN IT FIRST HIT THE WALL IT STOPPED THEN LURCHED FORWARD AGAIN. IN LIGHT OF ALL OF THE ISSUES SURROUNDING TOYOTAS AND UNINTENTIONAL ACCELERATION I SUSPECT THE CAR ACTUALLY ACCELERATED ON ITS OWN AND I DID NOT TOUCH THE ACCELERATOR ACCIDENTALLY. THE CAR WAS REPAIRED AND IS STILL OWNED BY OUR FAMILY. I AM RELUCTANT TO DRIVE IT GIVEN ALL OF THE ISSUES SURROUNDING TOYOTA ACCELERATION PROBLEMS.  
**Additional Summary:**

**Toyota ID Number:** 200702081276

\*\*\* SUBCASE 200705301557-1 CREATED 05/30/2007 02:52:17 PM TMorita  
Email states:  
"I have a 2005 X-Runner Tacoma, VIN 5TETU22N85Z052408 that has a tendency to maintain engine speed after you let off the foot pedal. It is very noticeable when shifting up through the gears after every stop. When you let off the foot pedal, the engine speeds hangs at the current speed for a while before slowing down. You have to shift gears VERY slowly to avoid mismatching the engine speed, if you shift normal speed, the truck will lurch forward because the engine speed is still too high. I don't drive the vehicle through the winter, but now that the weather is descent, it is becoming a problem situation again. I work on drive-by-wire engines for another company, so know it can be addressed. I just can't do it for the Toyota.  
Please advise what can be done for the situation with my Tacoma. I like the truck, but am not going to stay with a vehicle that drives like this.

Thank you for contacting Toyota Motor Sales, U.S.A., Inc.<p>  
Mr. McGaw, we apologize for the concerns you are having with your 2005 Tacoma's gears.<p>  
Because we have not inspected your vehicle, in order to properly assess your concerns, we recommend you contact the Customer Relations Manager at your <a href="http://www.toyota.com/dealers/TARGET=BLANK">local Toyota dealership</a> to further evaluate your Tacoma.<p>  
Toyota dealership technicians are specialized in the diagnosis and repair of Toyota vehicles. They are provided with extensive training and have access to state-of-the-art equipment to help in the accurate diagnosis of your vehicle. Also, if necessary, we provide additional support to assist Toyota dealership technicians in resolving unusual vehicle concerns.<p>  
Your email has been documented at our National Headquarters under file #Sincidents.c\$clarifycasenumber. If we can be of further assistance, please feel free to <a href="http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enduser/std\_adp.php?p\_faqid=4164">TARGET=\_BLANK >contact us</a>.<p>

RNT#070528-000221, dated and received 06/01/2007

Email states:  
"Tom  
I went to my local dealer, Dan Deery Toyota in Waterloo, IA. I talked to Jason Hesse, the service writer. He gave me a suggestion, but unfortunately it did not prove beneficial. When I went back I talked with the Service Manager, Brian Jensen. Brian & I went for a ride, and Brian was able to drive the vehicle and note the concern I had. Brian looked to see if there were any updated calibrations for the X-Runner and noted there were none. I asked if reflashing it might do some good (I sometimes do that in my Service work with drive by wire electronic controlled engines) but that was not pursued. Brian then consulted with Kim Michelsen, the Customer Relations Manager. Kim communicated with Adam Benlon, who I believe their area Service rep. Kim has not heard back from Adam, but Kim is continuing to get in touch with him and reporting to me. That is where we stand so far.

C-758

**Safety Research & Strategies**

**Update Report: Toyota Sudden Unintended Acceleration: Appendix C**

Kim will be gone next week, as will I, so no steps will be taken until 11 June at the earliest. Perhaps Adam Benlon will be able to offer some alternatives.  
Don McCaw"

RNT#070219-000197

02/19/2007 02:09 PM

Email states: I reported this on 2-15-07. The toyota dealership reported this on 2-14-07. Nobody from toyota has contacted me on this problem. This is a very serious and dangerous problem. I thought toyota was better in customer service than anybody else. I have read on the NHTSA website that this has happened to other people several times. I have a case # 200702150813. I would have hoped toyota would have got back to me or the dealership quickly considering the safety dangers of this.If i do not hear anything about this problem i will file a complaint with the NHTSA and contact the media if this is the only way to get this solved.

nrc states: Thank you for contacting Toyota Motor Sales, U.S.A., Inc. We are sorry to hear about the concern involving your Tacoma. We received your email and have subsequently forwarded your case to the appropriate offices of Toyota. A representative of Toyota will be in contact with you within 1 business days. We value you as a customer, and appreciate this opportunity to review your concerns. Your email has been documented at our National Headquarters

\*\*\* SUBCASE 200702150813-3 CREATED 03/06/2007 12:31:13 PM JFewel

Thank you for contacting Toyota Motor Sales, U.S.A., Inc.

We apologize for your concern regarding the engine of your 2006 Tacoma.

We apologize; we understand the frustration of an intermittent condition. An intermittent condition is inherently frustrating because it happens some times and it does not happen at other times. In your situation, it has happened for you and it has not happened for the dealership.

We always contact the Toyota dealership even for intermittent concerns, because the likelihood increases that the dealership will be able to duplicate the condition as the time increases that the dealership has the opportunity to duplicate the cause.

Your Toyota dealership serves as Toyota's eyes and ears, we need to involve the dealership because they are able to inspect the vehicle hands - on and are trained to determine cause, condition and remedy. The first step to resolve any product concern is for the Toyota dealership to duplicate the condition, so that they can determine its cause and repair it. If a dealership is unable to duplicate a condition, Toyota can not take further steps. Because the odds improve that the condition will recur when the Toyota dealership is provided an additional opportunity to inspect the vehicle, the odds improve that the dealership will be able to duplicate the condition and determine its cause and its remedy.

You can be sure that Toyota is committed to providing quality service at our dealerships so as to meet our customers' various needs. Our dealer technicians are given extensive training and use state-of-the-art equipment in order to obtain speedy and accurate diagnoses. Moreover, Toyota supports the dealerships with additional technical assistance to aid them in unusual situations. Our goal is to serve our customers in the most professional, efficient way possible.

Please accept our apologies for any inconvenience or added expense you may have been caused in this matter. We note that the Customer Relations Manager at Cloninger Toyota reviewed all information pertinent to your case and rendered a decision, declining your request for a repair on behalf of Toyota, because Cloninger Toyota has been unable to duplicate the concern you reported. Because the Customer Relations Manager has been trained by Toyota, the decision rendered by this individual represents Toyota's position. Our review of the case indicates that all of Toyota's guidelines have been followed and we accordingly concur with the decision.

Toyota values you as a customer and we appreciate this opportunity to further review your request.

If we can be of further assistance, please feel free to contact us <[http://toyota.custhelp.com/cgi-bin/toyota.cgi/php/enduser/std\\_adp.php?p\\_faqid=4164](http://toyota.custhelp.com/cgi-bin/toyota.cgi/php/enduser/std_adp.php?p_faqid=4164)>.

++OUTGOING DLR CALL++ l/m for Leonard to call me with RO/FTS info

\*\*\* PHONE LOG 10/31/2007 10:24:29 AM PTImberlake Action Type: Incoming call  
++INCOMING DLR CALL++ spoke to Leonard, sts veh is manual transmission  
RO - 162526 - 10/10/06 - 10,003 - cust sts engine idles too high. dlr duplicated condition. dlr contacted TAS but no repairs done  
RO - 164669 - 11/14/06 - 10,723 - cust sts engine idles too high even when engine is warm. dlr duplicated condition, no DTC's. dlr replaced mass airflow sensor and engine idling at 700 RPM's, dlr cleaned fuel injectors.

RO - 168987 - 2/1/07 - 11,691 - cust sts engine idles to high and goes up to 3000 RPM's when engine is cold. dlr duplicated condition and found fuel trims to lean. sts TAS had dlr clean fuel induction and reset ECU memory.

RO - 171146 - 3/12/07 - 12,478 - cust sts engine still idling too high at 3000 RPM. dlr duplicated condition. dlr spoke to TAS who told dlr to have FTS inspect veh.  
RO - 177701 - 6/26/07 - 14,471 - cust sts periodically engine idling up to 2000 RPM's. sts FTS (JDonker) duplicated condition. FTS feel condition is due to cust's driving habit (cust using engine to slow veh down). FTS had dlr replace the clutch with update version of clutch regarding cust's driving habit. dlr sts new clutch made no difference.

RO - 179609 - 7/20/07 - 14,888 - cust sts periodically engine went go below 3000 RPM's. dlr duplicated condition. TAS has dlr replace accelerator pedal due to pedal values out of range.

RO - 184818 - 10/1/07 - 16,055 - cust sts veh idles too high. dlr sts no DTC's. dlr replace throttle body as it was open too far. sirs dlr kept RO open until 10/27/07 until FTS (Brian Melcher) could test drive veh. sts FTS test test drove and felt veh performing as designed and RPM's were high due to cust's driving habits.

\*\*\* PHONE LOG 03/14/2007 06:07:14 AM MCotterell  
== PA ==  
RNW #070313-000380 Caller states: " Im not sure what to do with my truck. I took it in to Concord Toyota to get the radio repaired back in June of 2006 because it went out. When I got my truck back the check engine light was on. The representative told me to go home and bring it back the next day so that they could check it; so I went home. On my way home my truck gave a sudden jerk and lost speed. I went back to the dealer and explained to them what had happened. They told me to leave it and that they would find out what was wrong. It happened that they forgot to put in a fuse. What a mistake. As long as they fixed my truck I was not worried about it. But then a few weeks later it began to jerk at stops and as I was going down hill. I took the truck back they checked it ran the scanner on it and found nothing wrong with it. So now  
\*\*\* NOTES 03/14/2007 06:07:28 AM MCotterell  
speed. I went back to the dealer and explained to them what had happened. They told me to leave it and that they would find out what was wrong. It happened that they forgot to put in a fuse. What a mistake. As long as they fixed my truck I was not worried about it. But then a few weeks later it began to jerk at stops and as I was going down hill. I took the truck back they checked it ran the scanner on it and found nothing wrong with it. So now  
\*\*\* NOTES 03/14/2007 06:07:38 AM MCotterell  
it is jerking at stops again and I took it back to the dealer and they told me the same thing again. There is nothing wrong with it and that they reset my computer but again there is still something wrong with my truck and on top of it my CD player is giving me an error signal and not letting me play my CDs. They keep telling me that one thing does not have to do with the other but to me it seems like it does because I went in for my radio and the jerking  
\*\*\* NOTES 03/14/2007 06:07:52 AM MCotterell  
began and now i went back for the jerking and my radio is getting an error signal. I do not want to get stuck with a truck that is not going to function properly. What can I do about this. I am really concerned. I really like my truck and would hate to have to take it back. It is frustrating to keep hearing the same thing and to keep having to go back and forth. It's very time consuming and stressful. Please help me."

\*\*\* SUBCASE 200705100063-1 CREATED 05/10/2007 06:45:31 AM QHolmes  
Email states: After 86,000 miles in a little over 2 years on the 05 tacoma, these items listed below are ones I've experienced and also have several forum topics. You should use guys like me to test your new tacoma/tundra instead of just the factory testers and TRD. Shame so many problems should have been caught during testing and repaired by now. Myself and my friend my not purchase a new tacoma this year due especially because of item #1 and the countless issues with the new tacomas. I'd love to test your vehicles and give you feedback, just supply the vehicles and actually do something with my inputs. How do I know any of these items will be fixed if I buy a 2008 tacoma?  
1. Upper control arm to close to tire sidewall (approx 3/8 inch) which prevents previous tacoma owners from running small, medium, or heavy duty snow/mud chains on the 265/70/16 or similar 17 inch rims. Impacts hunters, bikers, campers impacted.  
2. The cruise control in Denver or elsewhere is dangerous on some models. The cruise control needs to drop down 1 gear and allow a little more time for 4th gear to catch vehicle up to speed setting but instead many times kicks down to 3rd gear very quickly just to get vehicle from 65-68 to 70 mph cruise setting.  
3. If the tailgate load limit is weak due to the new plastic bed, then remove it or change the mount points of the tailgate.  
4. The front end on my 05 has no bumper cushion to speak of. A walking speed accident encured 4,000 in damage since the front bumper has no impact cushion and crumbled all the way into the grill & hood.  
5. People love adding suspension lifts and larger tires. Enlarge the wheel well areas 1-2 inches to allow for this and you'll sell more trucks.  
6. Truck bottoms out to easy with half load in the bed on my shortbed crewcab on minor ruts. Beef up the leaf springs, they should get stiffer when loaded, not stay the same softness.  
7. The hinges on the storage compartments in the plastic bed rust like crazy. Use better meta or plastic.  
8. Rugged trail tires ride comfy but the tread depth is only half what almost any other tire would have. My rugged trails tread depth new looked like any other tires after 30,000 miles. Not great for off road peace of mind.  
9. If you're using some type of ceramic brake pads, then stop or change brands. I think they are to slick for stopping heavy loads like my 2,800 pound bass boat (which has surge brakes). I replaced them with semi metallic and I think they stop better with towed loads.  
10. The auto transmission has harsh indecisive lurches when using in manual switch mode between gear 1-2.  
11. Can you make it easier to perform a drain and fill on the tranny fluid. I was told you can't just fill up the fluid until it drains out of the overflow without jumpering a wire or two let the engine warm up to said temp, switch gears, stand on your head and spin 7 times. Come on!!!!  
12. Radio control display on dash catches to much light and can't read the display, tilt it down some.  
13. Increase the size of the additional tranny cooler on tow package, seems pretty small for up to 6,500 pounds and the tranny gets hot. There's room for one twice as big.

C-777

**Safety Research & Strategies**

**Update Report: Toyota Sudden Unintended Acceleration: Appendix C**

14. The floor mats with the 2 hooks are cheesy and most likely are causing some of the accelerator/gas pedal sticking problems. Maybe build sleeve slots by the pedals and sleeves or hooks on the rear end of mats. At least some cleats on the bottom.  
In summary there are many good things about the new tacoma such as, mileage, looks, room, power but not many design/problem items that are disappointing many previous tacoma owners and the new ones. Feel free to contact me if I can be of service.  
=

\*\*\* CASE CLOSE 05/01/2007 01:05:21 PM QHolmes

We apologize for the concern you are experiencing with your transmission. In order to assess if your transmission concerns are normal, your Tacoma will need to be inspected. We recommend you discuss the condition further with your local Toyota dealership, as their technicians are specifically trained in the diagnosis and repair of Toyota vehicles. If your Toyota dealership has already inspected your vehicle and found it to be operating normally, we would concur with their findings. Your email has been documented at our National Headquarters

Email verbatim: i took my 2006 tacoma in for repairs because my cruise control was doing something i have never seen any vehicle do. if i have the cruise control set, and i'm coasting on the freeway at approximately 70 mph (around 2000 rpm's), and i hit a slight increase (mean a very small slope), my engine races to 5000-6000 rpm's. it's as if i pressed the accelerator to the floor. the service guys stated there was no problem. i have talked to other....

\*\*\* NOTES 12/18/2007 06:47:54 AM QHolmes

...mechanics who have told me that this is not normal and needs to be fixed before it ruins the engine or transmission. please tell me what needs to be done. thanks Jason

\*\*\* CASE CLOSE 12/18/2007 06:58:50 AM QHolmes

Mr. Will, We apologize for your dissatisfaction with the cruise control system. Within the limits of the engine's capabilities, cruising speed can be maintained up or down grades. However, changes in vehicle speed may occur on steeper grades. Therefore, if you need acceleration (for example, when passing or going up a "small slope") depress the accelerator pedal enough for the vehicle to exceed the set speed.

When you release it, the vehicle will return to the speed set prior to the acceleration. Please note: if Sterling McCall Toyota has already inspected your cruise control system and found it to be operating normally, we would concur with their findings. Your email has been documented at our National Headquarters

Additional Summary:

I have owned the 2007 Camry LE for 2+ years. About 2 days after we bought it I tried out the cruise control on an interstate. That's when the accelerator took off...within a few seconds I was doing almost 90mph...and couldn't stop. Luckily I was on a slight incline and there wasn't much traffic. I was about ready to throw the tranny into Park but it then stopped...all in all, about 30 seconds of "terror". I contacted Toyota via email (and, I think, phone call to the dealer) and was thanked for my contact. We've never used the cruise control since then...and I knew full well, it wasn't any "carpet/mat" problem. I also knew the potential cost to Toyota could be enormous if it was a serious mechanical problem and costly to repair. This could be a long lasting and devastating problem for Toyota.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** DURANGO, CO  
**NHTSA Summary:**  
ON OUR 2006 TOYOTA TACOMA 4-CYLINDER 5-SPEED MANUAL TRANSMISSION, WHICH WE BOUGHT NEW, WHEN YOU LIFT OFF THE GAS AND PRESS IN THE CLUTCH TO SHIFT, THE ENGINE RPM'S DO NOT DROP AS THEY SHOULD, THEY REMAIN HIGH AND EVEN INCREASE. THIS HAS BEEN THE CASE SINCE IT WAS ALMOST NEW. NORMALLY WHEN YOU SHIFT THE RPM SHOULD DROP BETWEEN SHIFTS - INSTEAD THE REVS STAY CONSTANT OR INCREASE BETWEEN SHIFTS. THIS IS NOT A PROBLEM WITH "UNINTENDED ACCELERATION" BUT RATHER THE THROTTLE GETTING "HUNG" WHEN IN NEUTRAL BETWEEN SHIFTS. EVEN TAPPING ON THE GAS PEDAL DOES NOT CAUSE THE REVS TO DROP, THEY STAY HIGH OR INCREASE. I ORIGINALLY THOUGHT IT WAS A TOYOTA "FEATURE" TO SMOOTH OUT SHIFTS, BUT AFTER ALL THE PRESS, I HAVE COME TO THINK IT IS A STICKY THROTTLE ISSUE, WHETHER DUE TO MECHANICAL ISSUES (STICKY CABLE, STICKY THROTTLE LINKAGE) OR ELECTRONIC ISSUES. I CONTACTED TOYOTA ONLINE SEVERAL MONTHS AGO, GOT A CONFIRMATION THAT THEY HAD RECEIVED THE COMPLAINT, BUT THAT IS THE LAST I HAVE HEARD. I PUT IN A REQUIRED MONTH/YEAR/DATE, BUT REALLY IT IS AN ONGOING PROBLEM SINCE THE CAR WAS ALMOST NEW.

**Date of Incident:** 20070101  
**Vehicle:** 2007 TOYOTA AVALON  
**Location of Incident:** PORT HUENEME, CA  
**NHTSA Summary:**  
THIS COMPLAINT IS RELATED TO THE RECENT REPORTS OF UNINTENDED ACCELERATION. EVER SINCE MY 2007 AVALON WAS NEW, I HAVE EXPERIENCED A RAPID ACCELERATION WHEN THE CRUISE CONTROL TRIES TO RETURN TO THE PRE-SELECTED SPEED AFTER BRING SLOWED BY THE LASER GAP DISTANCE CONTROLLER OR WHEN SELECTING A HIGHER PRESET SPEED SETTING. THIS CONDITION IS MOST PREVALENT AS THE DIFFERENCE BETWEEN SET SPEED AND ACTUAL SPEED INCREASES. INITIALLY, I THOUGHT THAT IT WAS MERELY A DESIGN QUIRK THAT WAS JUST SLIGHTLY IRRITATING. HOWEVER, SINCE LEARNING ABOUT OTHER MORE SERIOUS COMPLAINTS OF UNINTENDED ACCELERATION, I'M THINKING THAT I COULD HAVE A MORE SERIOUS PROBLEM IN THE FUTURE. \*TR

**NHTSA Summary:**

I WAS DRIVING DOWN HILL ALONG ABOUT 50 KM/H. I NOTICED STOP LIGHTS AND CARS SPINNING AND SLIDING EVERYWHERE. I GENTLY TOOK MY FOOT OFF THE THROTTLE TO START ENGINE BRAKING AND AS USUAL NOTHING HAPPENS IMMEDIATELY. WORSE, TRUCK STARTED TO ACCELERATE BECAUSE OF RPM HANG PROBLEM ON EVERY MANUAL TRANSMISSION EQUIPPED MODEL (MY COMPLAINT TO DEALER WAS IGNORED TWICE). THIS IS NOT EXACTLY A PLACE WHERE YOU CAN PUSH THE BRAKES EVEN WITH ABS BECAUSE IT ALSO IS AN OFF SLOPE TURN. INSTEAD OF SLOWING DOWN GRACEFULLY, THE RPM HANG ACTUALLY ACTS LIKE A CRUISE CONTROL. COMBINED WITH THE DOWNHILL AND THE RPM HANG I AM NOT DECELERATING AT ALL! SUDDENLY THE ECU FINALLY DECIDES TO CLOSE THE THROTTLE (FUEL CUT OFF). AT THIS POINT TRUCK TAIL OF MY TRUCK SLIDE TO THE RIGHT AND TO THE LEFT. ONLY MY 20 YEAR EXPERIENCE AND GOOD LUCK LET ME AVOID A FATAL ACCIDENT. THE NON-LINEAR THROTTLE RESPONSE IS NOT SAFE. THIS IS JUST DANGEROUS HOW THE ECU IS PROGRAMMED! MAYBE BECAUSE ONLY <10% OF ALL TRUCKS HAVE MANUAL TRANSMISSIONS TOYOTA DOESN'T WANT TO HEAR ABOUT IT. TOYOTA MUST ISSUE ECU PATCH FOR MANUAL TRANSMISSION MODELS V6 TACOMA, FJ CRUISER TO ELIMINATE 1 RPM HANG WHEN SHIFTING 2.HIGH RPM (1450) WHEN ROLLING DOWNHILL IN NEUTRAL OR WITH CLUTCH DEPRESSED 3.MAKE LINEAR THROTTLE RESPONSE. \*JB

**Date of Incident:** 20070105  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** DAYTON, OH  
**NHTSA Summary:**

WE BOUGHT A 2007 LEXUS ES 350 IN NOVEMBER. AT ~1,000 MILES ON THE ODOMETER I HAD ONE EPISODE OF UNWANTED ACCELERATION. I WAS MERGING ONTO THE HIGHWAY. I WAS TRYING TO KEEP A CONSTANT SPEED BUT THE CAR ACCELERATED IN THE BLINK OF AN EYE. I DO NOT REMEMBER THE SPECIFICS. I THINK I WAS GOING ABOUT 30 AND THE CAR ZOOMED TO 60. I PUT MY FOOT ON THE BRAKE AND THE CAR SLOWED DOWN. I DO NOT REMEMBER THE EXACT DATES SO I AM ESTIMATING FOR THE ENTRY BELOW. I HAVE ALSO HAD SOME PROBLEMS WITH STOPPING. I WOULD SLOW TO STOP AND PUT MY FOOT ON THE BRAKE BUT THE CAR WOULD CONTINUE TO LURCH FORWARD. THERE AGAIN I JUST KEPT PUSHING HARD ON THE BRAKES. THIS DID NOT OCCUR AT A RAPID RATE OF SPEED. SINCE I HAD THE RUBBER FLOOR MATS REINSTALLED I HAVE NOT NOTICED IT. I DROPPED THE CAR OFF AT THE DEALERSHIP IN MAY OF 2007. I EXPLAINED THAT I HAD HEARD THERE HAD BEEN SOME PROBLEMS WITH THE BLACK RUBBER MATS AND I REQUESTED THEY INSTALL THEM PROPERLY. I HAD TRIED TO INSTALL THEM MYSELF BUT WAS UNABLE TO REMOVE THE CARPET MATS THAT CAME WITH THE CAR SO THE MATS HAD BEEN SITTING ON TOP OF THE CARPET MATS. THE DEALERSHIP CHECKED OUT THE CAR AND SAID IT WAS OKAY. \*TR

CRM will fu. within 3 business days.

\*\*\* CASE CLOSE 01/11/07 14:30:35 rulemgr

TALKED TO MR WILSON ON 01/09/07, EXPLAINED THAT WE HAVE CONTACTED TECHNICAL SUPPORT AND WE DID CHECK FOR CODES ETC ON HIS VEHICLE, THERE WERE NO DEFECTS FOUND AT THIS TIME, WE DO HAVE A 6 SPEED MANUAL VEH COMING IN LIKE HIS SO THAT WE CAN COMPARE BUT HIS VEH DOES HAVE AN ELECTRIC CONTROLLED THROTTLE SYSTEM AND IS DIFFEENT THAT HE WAS US TO DRIVING BEFORE AND IF THERE IS A PROBLEM WE WILL TAKE CAROF IT CUST HAS ONLY HAD VEHICLE FOR 3 TO 4 DAYS.

\*\*\* NOTES 01/16/2007 08:33:13 AM TMtoria

Clr sts went to David Maus Toyota, test drove veh with service technician, Rick, on 1/16/2006. who acknowledged that transmission seemed abnormal. Cust has appointment with Deland Toyota for 1/19/2007. Sits working with Mike Frieze at Deland Toyota, Service Manager, who drove the Tacoma and could not confirm or deny that it was a mfg issue. (3rd visit). ;

\*\*\* PHONE LOG 03/12/2007 11:04:03 AM MZimmerman

===TMC CONTACT-0033464-01===

Mr. Wilson sts the gas pedal in his truck sticks and causes the vehicle to accelerate on it's own. Mr. Wilson sts he has contacted TMS and has been advised the condition is normal. Mr. Wilson sts he traded a 99 Tacoma for his new truck and is disappointed with the vehicle. Mr. Wilson sts he is concerned that the vehicle is unsafe. Mr. Wilson sts he has been offered Arbitration, but he doesn't want to pursue Arbitration.

\*\*\* PHONE LOG 03/12/2007 11:10:49 AM MZimmerman Action Type: Incoming call

Previous case #'s 200701250844, 200701160499, and 200701081348.

\*\*\* PHONE LOG 03/12/2007 12:19:21 PM MZimmerman Action Type: Outgoing call

Exec Offices called Mr. Wilson who advised he filed for Arbitration and there will be a hearing on 3/29. Mr. Wilson sts if he doesn't get satisfaction from Arbitration, he will pursue Lemon Law. Mr. Wilson sts he would like one of 2 things: 1) Toyota to pay off his Tacoma and compensate him for damages, or 2) Replace his Tacoma with a Tundra and give him an interest free APR on the remaining balance on the Tacoma. Mr. Wilson sts he purchased the vehicle for work and his work has been compromised because of the concerns he has had with the vehicle. Mr. Wilson sts he test drove a truck with an automatic transmission and liked the way it handled. Mr. Wilson sts he ordered a vehicle with a manual transmission thinking it would handle similar to the automatic. Mr. Wilson sts he tows approximately 6000lbs and felt a manual transmission would hold up better than an automatic. Mr. Wilson sts he ordered the vehicle with all of the options he wanted. Mr. Wilson sts when he went to the dealer to pick the vehicle up the sales rep advised him that he was having difficulty driving the vehicle. Mr. Wilson sts the sales rep attributed the difficulty he was having on being inexperienced driving a stick shift. Mr. Wilson sts when he was driving the vehicle home he noticed that the throttle appeared to be sticking. Mr. Wilson sts he brought the vehicle back to the dealer, they contacted TAS, and TAS advised the vehicle was operating as designed and needed some time to get used to his driving habits. Mr. Wilson sts he took the vehicle back to the dealer several more times and each time was advised there was no manufacturing caused issue. Mr. Wilson sts the vehicle also tends to accelerate on it's own. Mr. Wilson sts when he is stopped the vehicle will begin shaking, he'll

C-792

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

engage the clutch, the rpm's will rev to 3500 rps, and the vehicle will surge forward. Mr. Wilson sts he doesn't feel comfortable driving the vehicle, so it has been parked in his driveway since the beginning of February. Mr. Wilson sts he has made 2 payments on the vehicle, but has been unable to drive it. Mr. Wilson sts he purchased a used 93 4Runner to use for transportation. Mr. Wilson sts he had to rent a Uhaul truck today because he had to haul some items for work. Mr. Wilson sts he spoke with the GM at the dealer who advised he could not take the vehicle back and sell it to another customer because of the numerous inspection. Mr. Wilson sts he is very disappointed with how he has been treated by the dealer and Toyota. Mr. Wilson sts he has owned several Toyotas and would like Toyota's assistance. Exec Offices apologized and advised Mr. Wilson, per case # 200701250844, it appears a Lemon Law case has begun for his vehicle. Exec Offices thanked Mr. Wilson for taking the time to advise Toyota of his concerns and advised his comments have been documented. Exec Offices recommended Mr. Wilson continue working through the Arbitration and Lemon Law processes for a resolution to his concerns. Exec Offices advised Mr. Wilson of Exec's phone number in case he would like to follow-up after the Arbitration and Lemon Law hearings have been completed. Exec Offices advised Mr. Wilson that there are no guarantees that any additional assistance could be provided once decisions have been made by the Lemon Law Admin and NCDS. Mr. Wilson understood and thanked Exec Offices for the follow-up.

\*\*\* CASE CLOSE 03/12/2007 12:43:10 PM MZimmerman  
====SUMMARY OF TMC CONTACT-0033464-01====  
1) States concern with the gas pedal sticking and the vehicle accelerating on it's own.  
2) Seeks Toyota to replace or buy back his vehicle.  
3) Exec Offices called Mr. Wilson and advised him that his case is currently being handled by NCDS and will go to Lemon Law if NCDS doesn't offer a satisfactory resolution. Exec Offices thanked Mr. Wilson for contacting Toyota and advised his concerns have been documented. Exec Offices recommended Mr. Wilson continue working with NCDS and Lemon Law, but offered phone number if he needs to call back.  
4) Customer satisfied: Unknown  
5) Root cause: Product--manual transmission shift feel and acceleration feel.  
\*\*\* NOTES 03/15/2007 09:31:52 AM MZimmerman  
Exec Offices returned call from Mr. Wilson who advised he is in the process of mailing his documents for review under Arbitration and Lemon Law and would like to know if Exec Offices would like copies. Exec Offices advised Mr. Wilson that he can send his documents and they will be added to his file.  
\*\*\* NOTES 03/29/2007 02:40:21 PM MZimmerman  
Exec Offices returned call from Mr. Wilson. Mr. Wilson sts the Arbitration hearing took place yesterday and he feels the Arbitrator will rule in his favor. Mr. Wilson sts he requested reimbursement for his postage expense, but doesn't feel the Arbitrator will award him the cost of postage. Mr. Wilson sts he would like to know if he can pursue Lemon Law to get the cost of postage back. Exec Offices recommended Mr. Wilson research Lemon Law for his state because each  
\*\*\* NOTES 03/29/2007 02:40:21 PM MZimmerman  
state has different Lemon Law guidelines. Exec Offices advised Mr. Wilson that Lemon Law is typically a resource for consumers to use when they feel there is a product related issue. Mr. Wilson sts he would like to know if she should contact Exec Offices back once an Arbitration decision has been made. Exec Offices advised Mr. Wilson he can follow-up if he likes, but doesn't have to. Mr. Wilson understood and thanked Exec Offices for the time.  
\*\*\* NOTES 04/19/2007 08:31:21 AM MZimmerman  
Exec Offices returned call from Mr. Wilson who advised he received a response from NCDS and they have denied his request for a replacement vehicle. Mr. Wilson sts he is surprised with the Arbitrator's decision and is dissatisfied with Toyota's response to his concern. Mr. Wilson sts he would like to know if there is anything else Exec Offices can do to assist. Exec Offices apologized and advised concurrence with the Arbitrator's decision. Exec Offices advised  
\*\*\* NOTES 04/19/2007 08:31:22 AM MZimmerman  
Mr. Wilson that he has the option of pursuing his case through FL, but Toyota would not be able to replace his vehicle at this time.  
\*\*\* NOTES 06/21/2007 01:52:52 PM MZimmerman  
Exec Offices returned call from Mr. Wilson who advised he won his Lemon Law case and Toyota is buying his vehicle back. Mr. Wilson sts he doesn't know how much he will be refunded for his vehicle, but would

C-793

Safety Research & Strategies

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

like to know if Toyota can offer him loyalty assistance towards another vehicle. Mr. Wilson sts he feels if Toyota wants to retain him as a customer they would be willing to offer him additional compensation. Exec Offices apologized and advised Mr. Wilson that Toyota  
\*\*\* NOTES 06/21/2007 01:52:53 PM MZimmerman  
would not be able to offer compensation in addition to the compensation he is receiving from Lemon Law. Mr. Wilson understood and thanked Exec Offices for the follow-up;

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** TAMARAC, FL

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2007 TOYOTA CAMRY. AFTER PURCHASING THE VEHICLE ON OCTOBER 31, 2006, THE CONTACT NOTICED THAT THERE WAS A LACK OF ACCELERATION IN THE VEHICLE. WHILE ATTEMPTING TO ACCELERATE FROM A COMPLETE STOP, THE VEHICLE HESITATED. THE ACCELERATOR PEDAL WAS DEPRESSED TO THE FLOOR, BUT THE VEHICLE STILL HESITATED TO PICK UP SPEED AND THEN SUDDENLY SPED OFF. THE DEALER FOUND NO FAILURES; HOWEVER, THEY LATER ASKED HER TO BRING THE VEHICLE BACK FOR REPAIRS. AFTER THE REPAIRS, THE VEHICLE CONTINUED TO LACK ACCELERATION. THE CONTACT RETURNED TO THE DEALER AND REPAIRED AGAIN. THE VEHICLE WAS SERVICED A TOTAL OF SEVEN TIMES AND THE DEALER STATED THAT THEY "UPDATED" THE VEHICLE; HOWEVER, THE FAILURE PERSISTS. THE FAILURE MILEAGE WAS 3,000 AND CURRENT MILEAGE WAS 26,500.

**Location of Incident:** MOSCOW MILLS, MO

**NHTSA Summary:**  
IN JANUARY 2007 I RECEIVED DELIVERY ON A NEW 2007 TOYOTA COROLLA. IN THE WEEKS FOLLOWING DELIVERY I EXPERIENCED WHAT I WOULD DESCRIBE AS A STUCK ACCELERATOR ON SEVERAL OCCASIONS. I WOULD BE DRIVING AND WITHOUT APPARENT REASON THE VEHICLE ENGINE WOULD RACE. FOLLOWING THESE OCCASIONS I WOULD CHECK TO SEE IF THE MAT WAS ON THE ACCELERATOR, BUT COULD NOT ATTRIBUTE THE INCIDENT SPECIFICALLY TO THAT. I REPORTED THESE INCIDENTS TO MY DEALER, PAPAS TOYOTA, IN ST. PETERS, MO, AND THEY REPORTED THAT THEY COULD NOT FIND A PROBLEM WITH THE VEHICLE. AFTER THE FIRST FEW MONTHS, THE INCIDENTS SEEMED TO STOP. BECAUSE OF THE RECENT SIMILAR ISSUES WITH TOYOTA VEHICLES, I BELIEVE THAT THE 2007 MODEL TOYOTA SHOULD ALSO BE EVALUATED.\*CW

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AT THE TIME OF THE ACCIDENT IN JANUARY OF 2007 I WAS DRIVING A 2006 TOYOTA 4RUNNER. I AM AWARE THAT THIS VEHICLE ISN'T IN THE RECALL LIST, BUT IT SEEMS HIGHLY POSSIBLE THAT MY ACCIDENT COULD HAVE BEEN A RESULT OF THE ISSUES THAT ARE BEING BROUGHT TO LIGHT. I WAS ACCELERATING FROM A STOP THROUGH A TRAFFIC LIGHT WHEN A TRUCK IN FRONT OF ME SUDDENLY STOPPED. I REAR ENDED THE VEHICLE. IT SEEMED LIKE THE 4RUNNER JUST CONTINUED TO PICK UP SPEED AND WOULDN'T STOP. I HAD OVER 20K IN DAMAGE. THE 4RUNNER WAS UNDER A LEASE AT THE TIME AND WHEN THE LEASE CAME UP IN 2009 I RETURNED IT TO THE DEALER. DESPITE BEING REBUILT IT DIDN'T SEEM TRUSTWORTHY. \*TR

"Stuck accelerator !  
My 07 Tacoma is 2 weeks old and today driving in heavy traffic, i stepped down on the accelerator and the truck just took off and I nearly ran into several vehicles. I braked as hard as I could and veered on to the shoulder. I had to shut the engine off. I waited a few minutes and then started the truck again the engine raced and I hit the accelerator hard and it bounced back and...

"Thank you for contacting Toyota Motor Sales, U.S.A., Inc. We apologize for your concerns with the accelerator pedal on your 2007 Tacoma. According to our records, you contacted us by telephone this morning regarding your accelerator pedal concerns. At that time we contacted the Customer Relations Manager (CRM) at Ehrlich Toyota to follow up with you by end of business Monday, January 22nd to try and diagnose what happened. Your email has been documented at our National Headquarters under file #Sincidents.c\$clarificationnumber. If we can be of further assistance, please feel free to contact us <%20http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enduser/std\_adp.php?p\_faqid=4164>.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**  
ON THREE DIFFERENT OCCASIONS, WHILE DRIVING MY 2006 TOYOTA AVALON XLS, I PRESSED DOWN ON THE GAS PEDAL TO PASS ANOTHER VEHICLE AND THE GAS PEDAL CONTINUED TO DEPRESS ON ITS OWN AFTER I TOOK MY FOOT OFF OF IT. I STOOD ON THE GAS PEDAL AND IT TOOK ABOUT 5 SECONDS FOR THE PEDAL TO DISENGAGE AFTER ACCELERATING VERY RAPIDLY. THE THIRD TIME, I HAD TO SHUT OFF THE IGNITION. I AM AFRAID TO PRESS HARD ON THE GAS PEDAL AT THIS POINT AS IT IS A VERY FRIGHTENING SITUATION. A LESS EXPERIENCED DRIVER WOULD GET INJURED. I WILL NOT LET ANYBODY ELSE DRIVE MY CAR BECAUSE OF THIS. THE DEALER HAD NO EXPLANATION WHICH I FIND VERY DISTURBING. HELP!! \*JB

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

Caller: Lisa White, sts is the Mother of driver & adv will need to spk w/her. Caller sts son was driving veh on 1/26/07 @ approx 5:30 pm, caller sts it just began to snow so road conditions were not dry but it was not icy or heavily wet at time and driver was wearing seatbelt. Caller sts veh was 8 days old, and had no check engine or warning lights on veh. Caller sts does not know exact location of accident but happen on Rt 151 in PA. Caller sts the local Police came to scene, sts no contact police info, readily avail. Caller sts son was driving approx 35 mph when veh had sudden surge of engine rev, sts driver tried to brake when back end of truck started to swerve sideways, sts steered vehicle off road to prevent from hitting vehicle in front and veh hit embankment, sts that slowed veh down & cust sts son was able to turn veh off to stop. Caller sts no ambulance or fire department came to scene & cust sts son injuries are sore muscle pain down right arm & in between shoulder blades, has not been to a doctor. Caller sts initially the veh was towed to Mark Coopers Autobody, Chester, VA. Caller sts the indep felt something was stuck on engine and adv cust to contact insurance. Caller sts contacted Hartford Northeast Auto, Team 2 at 800-280-0555 ext 27222. Claim# PA0006956240, Caller sts an agent went to indep Mark Coopers Autobody and looked at veh and advised customer if they felt cause of failure was a material defect to take vehicle to Team Toyota Dlr. Caller sts next had veh towed to Team Toyota and received a call from Dir Sales Rep Bill Ellis who told cust to come to dlr to get rental vehicle. Caller sts went down and Dir Sales Bill advised customer Dlr has been instructed not to touch vehicle and customer is to contact Toyota to open a case, sts dlr will not touch or rpr vehicle without a factory rep inspection. Cust sts son is afraid to drive vehicle and requests a new vehicle, no adv veh must not have any rprs, adv will receive a c/b from regional office w/in 3 business days, adv inspection of veh can take up to 30 days & up to another 30 days to receive inspection results in writing. Cflr req toyota to inspect veh for why throttle or engine stuck and new vehicle.

**NHTSA ODI Number:** 10180658

**Date of Incident:** 20070118

**Vehicle:** 2007 LEXUS ES350

**Location of Incident:** YONKERS, NY

**NHTSA Summary:**

WHILE DRIVING MY 2007 LEXUS ES 350 ON A VERY BUSY PWAY THE VEHICLE ACCELERATED ON ITS OWN. THE CAR JUST TOOK OFF. I APPLIED THE BRAKES ONCE, THEN AGAIN AND AGAIN I HAD MY FOOT ON THE BRAKE PEDAL ALL THE WAY TO THE FLOOR AND THE CAR DID NOT SLOW DOWN. IT WAS A HORROR. I HAD NO CONTROL OF THE SPEED AND ULTIMATELY CAUSED A SIX CAR COLLISION. PEOPLE INCLUDING MYSELF WERE HURT AND HOSPITALIZED. THE PURPOSE OF MY PURCHASING THIS VEHICLE WAS DUE TO THE 5 STAR RATING AND SAFETY. AFTER RESEARCHING I FOUND TOO MANY OTHER COMPLAINTS OF THIS NATURE. THE VEHICLE IS MUCH TO DANGEROUS AND SHOULD H BE RECALLED. VERY DISAPPOINTED AN ITS A MIRACLE I'M ALIVE. \*NM

**Additional Summary:**

**Toyota ID Number:**

**NHTSA ODI Number:** 10310503

**Date of Incident:** 20070118

**Vehicle:** 2005 TOYOTA MATRIX

**Location of Incident:** MILFORD, MA

**NHTSA Summary:**

TL\* THE CONTACT OWNS A 2005 TOYOTA MATRIX. WHILE DRIVING 5 MPH OUT OF A PARKING SPACE, THE VEHICLE ACCELERATED INTO AN INTERSECTION AND CRASHED INTO THE REAR OF ANOTHER VEHICLE. AS SHE DEPRESSED THE BRAKE PEDAL, THE VEHICLE WOULD NOT STOP UNTIL THE CRASH OCCURRED. NO ONE WAS INJURED. THERE IS A POLICE REPORT IF NEEDED. THE VEHICLE WAS DRIVEN TO THE DEALER. A TOYOTA FIELD ENGINEER INSPECTED THE BRAKES STATING THAT THE FAILURE WAS NOT RELATED TO THE BRAKES. THE CRASH OCCURRED 20 DAYS AFTER THE VEHICLE WAS PURCHASED. THE CONTACT IS THE SECOND OWNER OF THE VEHICLE. THE FAILURE MILEAGE WAS 14,000 AND THE CURRENT MILEAGE WAS 60,000.

**Additional Summary:**

Cust is very frustrated and sks a quick resolution to the matter. I adv cust I will speak with Mike as soon as I am able and need to speak w/ others before decision to replace his veh is reached. I will call when more info avail. Cust thanked.

\*\*\* PHONE LOG 01/31/2007 09:40:04 AM VWendlestadt1 Action Type: Incoming call  
Cld Michael Lorch, SM, Westside Lexus. Dlr and FTS determined veh cond was due to aftermarket floor mats. The concern has been doc thoroughly at dlr. SM is very confident of diagnosis b/c there were no trouble codes in ECU, the ABS brake sys still worked, (if it had failed the brakes still would not work) and there was no issue with the accelerator. It is extremely unlikely that both the accelerator and the brakes would fail simultaneously. I thanked SM.

\*\*\* PHONE LOG 01/31/2007 12:02:26 PM VWendlestadt1 Action Type: Outgoing call  
Cld cust, left v/m. Adv calling to discuss concerns w/ veh outlined in letter to TMC. Ask cust to c/b at her convenience. I can be reached at 310-468-9126.

\*\*\* PHONE LOG 02/01/2007 10:30:27 AM VWendlestadt1 Action Type: Incoming call  
Cust returned call. Cust very concerned that she has found 6 instances of sudden acceleration in ES 350 veh(s) on the NHTSA web site. The most recent she just discovered yesterday. Cust is disappointed that Lexus and dlr response has been to deny there is a concern. The SM at Westside Lexus could not satisfactorily demonstrate how the floor mat could have both caused the acceleration and the brakes to fail in stopping her veh. Cust does not want to drive veh any longer and she is driving the family's 5 yr old Toy while her husband is driving the new ES 350. Cust wants Lexus to do something that will restore her confidence in the veh by replacing something or doing some kind of rpr to her veh. She fls she should not have arb as her only recourse. I adv cust I will do some additional research w/in the co to see if there is anything else Lexus can offer at this time. Cust would like to be reimbursed for towing bill she incurred when after an incident on one of the parkways in Houston she left her veh to go to a Donut shop to call her husband and returned to find her veh had been towed. I ask cust to send tow bill to my fax at 310-381-6634 and we will review her request. Cust thanked. I will call back in a few days to adv what I have learned.

\*\*\* PHONE LOG 02/20/2007 01:39:53 PM VWendlestadt1 Action Type: Incoming call  
Cld Yanay Weaver, ACSM, Southern Area. Outgoing message adv ACSM is out of office until 2/23/07. Left v/m and ask for c/b at 310-468-9126 to discuss cust veh concerns.

\*\*\* PHONE LOG 02/22/2007 05:57:56 AM VWendlestadt1 Action Type: Outgoing call  
Yanay Weaver, ACSM Southern Area returned call and adv Aliene Paboojian in TMS Legal has all the info about cust veh. ACSM recomb contacting Aliene. I thanked ACSM.

\*\*\* PHONE LOG 02/23/2007 01:55:20 PM VWendlestadt1 Action Type: Outgoing call  
Cld A. Paboojian, TMS Legal. Outgoing message Aliene out of office today. Left v/m and ask for c/b at 310-468-9126 when she returns.

ncr sent an e-mail to cr analyst (DSimons-Baker) advising that cust already traded his veh in for another model and that cust seeking for TMS to further address concern on his original veh (which he sold).  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10188471, 10182749  
**Date of Incident:** 20070125  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** FALMOUTH, ME

**NHTSA Summary:**  
WHILE DRIVING MY NEW LEXUS ES350 ON THE INTERSTATE IN JANUARY 2007, THE CAR SUDDENLY ACCELERATED OUT OF CONTROL. AS I APPLIED THE BRAKE INITIALLY WITH ONE FOOT AND THEN BOTH FEET. I ALSO PUSHED THE IGNITION BUTTON AND TRIED EVERYTHING I COULD THINK OF TO SLOW THE VEHICLE-NOTHING SEEMED TO HELP. THE ENGINE CONTINUED TO POWER THE CAR FORWARD. EVENTUALLY THE CAR RAN OFF THE ROAD INTO A SNOW BANK. LEXUS AND THE DEALER (LEXUS OF PORTLAND MAINE) CLAIMED THEY COULD FIND NO PROBLEM WITH THE CAR. WE ARE HOPEFUL FOR SOME TYPE OF RESOLUTION EITHER FROM LEXUS OR THE DEALER. WE WOULD BE INTERESTED IN HEARING FROM OTHERS WHO HAVE EXPERIENCED SIMILAR PROBLEMS WITH A LEXUS.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10181057  
**Date of Incident:** 20070126  
**Vehicle:** 2006 TOYOTA RAV4  
**Location of Incident:** FALMOUTH, MA

**NHTSA Summary:**  
I WAS DRIVING MY 2006 TOYOTA RAV4 WHEN I APPLIED THE BRAKES FROM ABOUT 25 MPH TO STOP FOR TRAFFIC AT A LIGHT. AS I APPLIED THE BRAKE THE ENGINE ACCELERATED AND I HAD TO STAND HARD ON THE BRAKE TO KEEP FROM HITTING THE CAR IN FRONT OF ME. AFTER A FEW SECONDS THE ENGINE SPEED CAME BACK TO NORMAL. AT THAT TIME I DOUBLE CHECKED MY FOOT POSITION ON THE BRAKE PEDAL AND AM CONFIDENT THAT I WAS IN NO WAY CONTACTING THE ACCELERATOR PEDAL.  
\*JB  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10191074, 10191073  
**Date of Incident:** 20070127  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** ARVADA, CO

**NHTSA Summary:**  
2007 CAMRY XLE 4-CYLINDER PURCHASED IN APRIL 2006. CAR UNPREDICTABLY HESITATED AND JERKED UPON ACCELERATION. SOMETIMES THE HESITATION LASTED A SECOND, WHILE OTHER TIMES IT LASTED AT LEAST THREE SECONDS. OCCURRED MOST OFTEN WHEN ACCELERATING FROM COASTING, WHILE CHANGING LANES, OR WHILE ACCELERATING THROUGH A TURN. CRUISE CONTROL WAS JERKY, AND CONSTANTLY REVVED THE ENGINE BEFORE ENGAGING. IN JANUARY AND FEBRUARY, I HAD TWO SAFETY RELATED INCIDENTS. WHILE PROCEEDING THROUGH A LEFT TURN ON HARD PACKED SNOW I ATTEMPTED TO ACCELERATE THROUGH THE END OF THE TURN AND THE CAR HESITATED THEN GRABBED, CAUSING THE FRONT WHEELS TO SPIN AND

C-817

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

LOOSE TRACTION. I STOPPED THE CAR IN THE FAR LEFT ONCOMING LANE OF TRAFFIC. A SIMILAR INCIDENT OCCURRED WHILE DECELERATING IN A LEFT TURN LANE AND APPROACHING A RED LIGHT AT A LARGE INTERSECTION. WHILE APPROACHING, THE LIGHT TURNED GREEN. I ACCELERATED AND BEGAN THE TURN AND THE ENGINE REVVED AND ENGAGEMENT WAS DELAYED, CAUSING THE FRONT WHEELS TO LOSE TRACTION. IN BOTH CASES I WAS MOVING SLOWLY, AND HAD A LEFT TURN ARROW SO THERE WAS NO ONCOMING TRAFFIC AND NO ACCIDENT OCCURRED. AT PRESENT, I AM CAREFUL WHEN MAKING TURNS WITH ONCOMING TRAFFIC, ACCELERATING, CHANGING LANES OR PASSING SLOWER VEHICLES. I HAVE ATTEMPTED TO ADJUST THE ACCELERATION SO AS NOT TO INCREASE THE RPM'S SO MUCH THAT THE CAR WILL JERK FORWARD WHEN THE TRANSMISSION ENGAGED. HOWEVER, IT WAS IMPOSSIBLE TO COMPENSATE FOR THIS PROBLEM. I HAVE SPOKEN WITH THE DEALERSHIP BY PHONE. IN FEBRUARY I WAS TOLD THAT THEY WERE NOT FAMILIAR WITH ANY SUCH PROBLEM. ALSO, THEY STATED THAT SOME HESITATION WAS NORMAL. I WAS ADVISED THAT I SHOULD WAIT UNTIL A BETTER SOLUTION HAS BEEN DEvised. IN MARCH I REQUESTED THAT THEY MAKE A NOTE OF THIS PROBLEM, AND WAS TOLD THAT THEY COULD NOT DOCUMENT MY COMPLAINT OVER THE PHONE. I MUST LEAVE IT WITH THEM TO LET SOMEONE ELSE TAKE IT FOR A DRIVE. \*AK

**Date of Incident:** 20070127  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** GREENSBURG, LA

**NHTSA Summary:**  
I WAS ENTERING A CAR WASH ON HWY51 IN AMITE CITY, LA. I LIGHTLY TAPPED THE ACCELERATOR. THE CAR LUNGED FORWARD AS IF I HAD STOMPED THE ACCELERATOR. I TOOK MY FOOT OFF THE GAS. IT CONTINUED TO ACCELERATE AS QUICKLY AS POSSIBLE. I USED TO BRAKES WITH NO RESULTS. I PUT MY FULL WEIGHT ON THE BRAKES WITH NO RESULTS. I WAS TERRIFIED AS I ZOOMED OUT OF THE CAR WASH AND INTO AN AREA WHERE THERE IS HEAVY PEDESTRIAN AS WELL AS VEHICULAR TRAFFIC. I COULD TELL THAT I WAS GOING AS FAST AS THE CAR WOULD GO. I QUICKLY SCANNED THE AREA AND SAW THAT NO ONE WAS DIRECTLY IN FRONT OF ME. I CROSSED THE SIDEWALK, PINE STREET AND THE PARKING LOT OF A CONVENIENCE STORE. I HIT A TELEPHONE POLL, AN IRON POLL AND A LARGE POLL ON A SIGN FOR GAS. BOTH MY LEGS WERE BROKEN. BOTH BONES WERE BROKEN JUST ABOVE THE ANKLE ON THE LEFT LEG. THE LARGE BONE WAS BROKEN JUST BELOW THE KNEE ON THE RIGHT LEG. I STILL HAVE PROBLEMS WITH BOTH. MY DAUGHTER WAS DYING WITH CANCER. I WAS IN THE HOSPITAL, LATER REHAB, THEN A NURSING HOME WHILE I RECOVERED. I WAS NOT RELEASED UNTIL LATE MARCH. WAS NOT ABLE TO SEE MY DAUGHTER WHO LIVED IN TEXAS. I WENT TO SEE HER AS SOON AS I WAS RELEASED. SHE DIED A MONTH LATER, NOT BEING WITH HER AND HER FAMILY DURING THAT TIME WAS AS BAD AS THE INJURIES. ALL LAWYERS STATED THAT IT WOULD BE TOO EXPENSIVE TO PURSUE. TOYOTA EXAMINED THE CAR AND POO POOED THE IDEA THAT THEY WERE IN ANY WAY RESPONSIBLE. I WAS VERY WORRIED ABOUT SOMEONE HAVING A WORSE ACCIDENT.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** MEXICO, NY

**NHTSA Summary:**  
HAVE SINCE HAD 4 SITUATIONS OF "SUDDEN ACCELERATION" A VERY HORRIFYING EXPERIENCE. DATE AND APPROX MILES: 1/28/07-16,000.4/11/07-19,000-9/18/07-26,000.12/20/08-42,600. 1ST INCIDENT-STOPPED AT STOP SIGN WITH FOOT FIRMLY ON BRAKE PEDAL. TRUCK FORCEFULLY LURCHES FORWARD WITH TIRES SCREECHING. CALLED DEALERSHIP TO NOTIFY THEM, WAS SUGGESTED THAT IT COULD HAVE BEEN THE FLOOR MAT. I SAID POSSIBLY BUT DIDN'T REALLY THINK SO. 2ND INCIDENT-VERY SIMILAR TO 1ST. 3RD INCIDENT-WHILE SLOWLY PULLING INTO A PARKING SPACE WITH A CURB AHEAD I SLOWLY APPLIED BRAKES TO COME TO A STOP BEFORE HITTING CURB. AS BRAKES ARE APPLIED TO STOP, THE TRUCK MAKES A LOUD REVVING SOUND AND IS VERY FORCEFULLY LURCHING FORWARD WHILE THE TIRES ARE MAKING A VERY LOUD SCREECHING SOUND. 4TH INCIDENT-WHILE STOPPED IN TRAFFIC WITH MY FOOT ALREADY FIRMLY ON THE BRAKE PEDAL, WAITING FOR THE TRAFFIC TO CHANGE THE TRUCK VERY SUDDENLY LUNGES FORWARD WHILE TIRES ARE MAKING A SCREECHING SOUND. I QUICKLY SWERVED INTO THE LEFT LANE JUST MISSING THE REAR END OF THE CAR AHEAD OF ME. THANKGOD THERE WAS NO TRAFFIC COMING IN THE LEFT LANE AS I SWERVED INTO IT OR IT WOULD HAVE BEEN A MULTI CAR ACCIDENT NOT TO MENTION POSSIBLE INJURIES OR DEATH. 2ND,3RD&4TH TIME TRUCK WAS TAKEN TO DEALERSHIP. SAME OLD STORY EACH TIME.NOTHING SHOWED UP,EVERYTHING SEEMS TO BE WORKING OK, WE COULD NOT DUPLICATE IT. 1/7/09 TALKED WITH TOYOTA FIELD SPECIALIST. WAS ASKED IF I COULD DUPLICATE IT, I SAID NO. WAS TOLD IF YOU CANT DUPLICATE IT I GUESS WE CANT FIX IT. IF WE COULD DUPLICATE IT WE WOULD FIX IT. I GUESS THERE IS A 2ND PROBLEM AS WELL IF THE ONBOARD COMPUTER DOES NOT SHOW THIS PROBLEM IS OCCURING. BELIEVE ME IT IS! THIS IS A VERY SERIOUS SITUATION WHICH NEEDS TO BE ADDRESSED SOON BEFORE AN ACCIDENT,INJURY OR DEATH OCCURS. THERE SEEMS TO BE NOTHING I CAN DO AS TOYOTA CANNOT DUPLICATE THE PROBLEM OR MAYBE DOESNT WANT TO ACKNOWLEDGE THE PROBLEM. WHAT AM I TO DO? JUST WAIT AROUND AND WAIT FOR THE 5TH TIME? \*TR 10253233 UPDATED 1/29/08 \*CN UPDATED 01/30/09.\*JB

**Date of Incident:** 20070130  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** KODAK, TN

**NHTSA Summary:**  
PURCHASED A 2007 CAMRY LE, 4 DOOR, ON 12/12/06. CRUISE CONTROL HAS FAILED MANY TIMES. WHEN GOING DOWN HILL WITH THE CRUISE ON THE CAR WILL KEEP ACCELERATING TO VERY UNSAFE SPEEDS. THIS STARTED FROM THE DATE OF PURCHASE. I WENT THROUGH ARBITRATION IN MARCH OF 2007 AND WAS TOLD BY THE ARBITRATOR "THAT THERE HAS BEEN AN UNREASONABLE AMOUNT OF REPAIR ATTEMPTS FOR THE SAME NONCONFORMIST THAT WILL IMPAIR THE USE, VALUE AND SAFETY OF THE VEHICLE SINCE DEC.2006". THE PROBLEM HAS NOT BEEN CORRECTED AND I DON'T USE THE CRUISE CONTROL. I HAVE FOUND THAT THIS PROBLEM HAS CAUSED DEATHS, THE LATEST IN CALIFORNIA, AND SEVERAL WRECKS EVEN IN THE AREA WHERE I LIVE. HOW MANY LIVES MUST BE TAKEN BEFORE TOYOTA WILL STEP UP TO BAT AND MAKE A RECALL ON THIS DEFECTIVE CRUISE CONTROL. THE FLOOR MATS THAT TOYOTA IS SAYING WILL CAUSE THIS PROBLEM MIGHT BE IN PART THE CAUSE BUT CERTAINLY NOT THE ROOT OF THE PROBLEM. I HAVE BEEN TRYING TO GET THIS SITUATION ADDRESSED SINCE THE PURCHASE OF THIS VEHICLE AND THE NEAR WRECKS THAT I HAVE ALMOST ENCOUNTERED TO NO AVAIL. THE ARBITRATOR DID AGREE WITH MY COMPLAINTS BUT AS STATED ABOVE THERE HAD NOT BEEN ENOUGH ATTEMPTS PROVIDED BY THE DEALERSHIP TO CORRECT THE PROBLEM. HOW MANY TIMES MUST ONE TAKE A VEHICLE TO THE DEALERSHIP WITH THE SAME COMPLAINT BEFORE ANY ACTION WILL BE TAKEN. I FEEL MY LIFE IS MORE IMPORTANT THAN THE RUNAROUND THAT I HAVE RECEIVED FROM TOYOTA AND THIS IS A VERY SERIOUS SAFETY MALFUNCTION OF THE VEHICLE. I HAVE ALL SORTS OF DOCUMENTATION TO BACK MY COMPLAINT AND MY 2007 CAMRY IS NOT THE ONLY VEHICLE ON THE ROAD WITH THIS SAFETY ISSUE. I WAS TOLD BY TOYOTA THAT THE DESIGN HAD BEEN CHANGED WITH THE 2007S AND CERTAINLY THE SYMPTOMS ARE CONSISTENT WITH CONTROL SYSTEM MALFUNCTION BUT THEY DID NOT KNOW HOW TO FIX THE PROBLEM. \*TR

\*\*\* PHONE LOG 01/31/2007 11:02:24 AM JBookman Action Type: Incoming call  
Spk w/Michelle Cervantes regarding cust enrms. MCervantes advsd to inquire if the cust has their insurance company involved. MCervantes advsd to get all the info regarding the cust enrms police report, insurance info etc and if further assistnc is needed fwd info to JHuang and KPratt. Thanked.

\*\*\* NOTES 02/05/2007 02:53:26 PM KRotola330  
I spoke with the customer today @ 5:30 regarding the FTS inspection scheduled tomorrow @ Lexus of Portland. He wanted to be able to question the FTS at the inspection I advised that is not the purpose of the inspection and that he would receive a letter in writing from LCS. He felt this practice was secretive. He wanted to speak to his attorney. I advised we will not inspect this vehicle until we hear from his attorney. I advised him to contact HQ.

\*\*\* PHONE LOG 02/07/2007 04:40:03 PM JBookman Action Type: Outgoing call  
Cldd cust and his phone continued to ring w/out a vm.

IF CUST CALLS: Pls adv and thank cust for giving LCS the opportunity to review his enrms. Pls adv cust once I have more info I will fu with him. Thanks.

\*\*\* PHONE LOG 02/07/2007 04:42:06 PM JBookman Action Type: Outgoing call  
Cldd and l/m on Karen Rotola vm for further assistnc. Thanked.

\*\*\* NOTES 02/08/2007 05:57:52 AM KRotola330  
This customer has obtained an attorney- all communication needs to go through his atty. Chris Branson, 207-523-8213 A formal letter was sent on 2/7/07 offering inspection. Waiting to hear back from counsel.

\*\*\* PHONE LOG 02/08/2007 09:44:00 AM JBookman Action Type: Incoming call  
KRotola cldd and l/m on my vm regarding cust enrms. KRotola advsd the cust has a paid counsel, therefore all communication with the customer should not occur. KRotola advsd she has sent a formal lr to cust yesterday. KRotola advsd not to communicate w/the cust and she will be handling the cust enrms. Thanked.

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

Toyota ID Number:  
NHTSA ODI Number: 10182004  
Date of Incident: 20070131  
Vehicle: 2007 TOYOTA FJ CRUISER  
Location of Incident: FOXBORO, MA  
NHTSA Summary:  
ENGINE ACCELERATES TO 1500 RPM WHEN I TAKE MY FOOT COMPLETELY OFF THE THROTTLE WHEN DRIVING AT SLOW SPEEDS (UNDER 1500 RPM). THIS CAUSES THE VEHICLE (MANUAL TRANSMISSION) TO SPEED UP INSTEAD OF SLOWING DOWN, EXACTLY THE OPPOSITE OF THE "ENGINE BRAKING" THAT ONE WOULD EXPECT. I FEEL THIS PRESENTS A MAJOR SAFETY HAZARD WHEN DRIVING IN TRAFFIC AND /OR ICY ROAD CONDITIONS. \*JB  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10194225  
Date of Incident: 20070131  
Vehicle: 2007 TOYOTA CAMRY  
Location of Incident: OXFORD, NC  
NHTSA Summary:  
TL\*THE CONTACT OWNS A 2007 TOYOTA CAMRY. THE VEHICLE HESITATES WHEN THE CONTACT DEPRESSES THE ACCELERATOR PEDAL. TOYOTA STATED THAT NOTHING COULD BE DONE BECAUSE IT WAS A DESIGN FLAW. THE CONTACT BELIEVES THAT THE VEHICLE IS UNSAFE AND DANGEROUS. HE STATED THAT WHEN MERGING INTO TRAFFIC AT 60-65 MPH, THE VEHICLE MAY OR MAY NOT PICK UP SPEED WHEN THE ACCELERATOR PEDAL IS DEPRESSED. THE CURRENT MILEAGE IS 3,890 AND FAILURE MILEAGE WAS 1,000.  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10330516  
Date of Incident: 20070131  
Vehicle: 2007 TOYOTA TACOMA  
Location of Incident: BATESVILLE, AR  
NHTSA Summary:  
TOYOTA 2007 TACOMA. SICE NEW ,THE TRUCK HAS BEEN VERY UNFORGIVING ...THE BRAKE PEDAL AND ACCELAER PEDAL ARE PLACED SO CLOOSE TOGETHER , THAT ITS NOT A QUESTION OF COULD, BUT ANSWER IS YES. ITS HAPPENED TO ME, SISTER BORROWED IT,AND I WARNED ABOUT THE PROBLEM,SHE STILL RAN INTO THE REAR OF ANOTHER VEHICLE. THE TRUCK IS DANGEROUS. IM USED TO IT. BUT STILL IF I HAVE BOOTS ON, I HAVE TROUBLE. THE PEDALS ARE SO CLOOSE, AND NEARLY THE SAME HEIGHT, I CANT BELIEVE THIS VERY DANGEROUS DESIGN HASNT BEEN IDENTIFIED AND REPAIRED. I DARE NOT LOAN MY TRUCK TO ANYONE. BECAUSE OF PAST EXPERIENCE. ITS JUST NOT SAFE!!! I SHOULDNT HAVE TO CHANGE THE ORIGINAL DESIGN, BUT, TO MAKE IT SAFE I MIGHT HAVE TOO. COME ON TOYOTA ,THIS IS A PROBLEM. LETS FIX IT..  
Additional Summary:

Toyota ID Number: 200702120164

NHTSA Summary:

\*\*\* PHONE LOG 02/12/2007 07:02:55 AM JHahn  
Caller states: went to dlr re matter with cruise control sts has gone there three times and has not been able to repair the concerns. Cust sts also was having concerns w/ the dome light and mud flaps, sts that Karen Clemens assisted and resolved issues. Sfs that dome light would not turn on when door opened and two mudflaps were missing rivets. Sfs that dlr adv that mudflaps are not covered under warranty sts that if ice builds up underneath the mudflaps it will cause  
\*\*\* NOTES 02/12/2007 07:02:56 AM JHahn  
them to break. Cust is not happy. Sfs that dome light and mudflaps were taken care of the third time he was there for cruise control but nothing was done on the cruise control.

\*\*\* CASE CLOSE 02/12/2007 07:10:12 AM JHahn  
OUTGOING CALL TO CUST- Ncr contacted cust, no answer. Sent IN20. NEXT REP: When cust calls please probe to see if matter is cruise control and check for correct address. IF cust is having ongoing issues w/ cruise control and is under warranty may want to send to case manager.  
\*\*\* NOTES 08/23/2007 04:06:05 PM MDosSantos

Caller sts dlr also put wrong oil in veh sts put 10W-30 instead of 5W-30, dlr adv this is the normal weight for veh, clr sts Cruise control is still having issue, dlr adv veh operating normally, clr sts veh will down shift gears and go to aprox 4500RPMs, clr sts issue only happened intermittently, clr sts spoke to brandon svc rep, and svc manager sts svc manager adv bring veh in for oil change, clr declined, ncr adv Per Tech RogerM 10W-30 should not harm veh....

\*\*\* NOTES 08/23/2007 04:08:03 PM MDosSantos  
...but for best fuel efficiency toy recommends 5W-30, ncr apol and offered dlr open, clr declined, ncr adv may take veh to another dlr for second opinion adv concerns doc'd here at HQs.

Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10191743  
Date of Incident: 20070201  
Vehicle: 2007 TOYOTA CAMRY  
Location of Incident: LINCOLNTON, NC

NHTSA Summary:  
TL\*THE CONTACT OWNS A 2007 TOYOTA CAMRY. WHILE DRIVING 45 MPH, THE VEHICLE HESITATED. THE CONTACT HAS TAKEN THE VEHICLE TO THE DEALER WHO ADVISED HER TO PRETEND THAT THERE IS AN EGG UNDERNEATH THE ACCELERATOR PEDAL. THE DEALER STATED THAT THEY WOULD NOT PERFORM THE REPAIR, BUT OFFERED TO SCHEDULE AN APPOINTMENT. THE REPRESENTATIVE STATED THAT THEY WOULD ALSO NOT REPAIR THE VEHICLE. THE ISSUE WAS REPORTED TO A NEWSPAPER AGENCY. WHILE DRIVING LAST WEEK, THE CONTACT'S WIFE AND DAUGHTER WERE ALMOST INVOLVED IN A CRASH. THE CONTACT PLAYED A RECORDING OF THE MEETING BETWEEN THE DEALER AND HIMSELF. THE RECORDING STATED THAT THEY REFUSED TO REPAIR THE VEHICLE AND TOLD THE CONTACT TO LEAVE AFTER BEING THERE FOR FIVE HOURS. THEY DEALER OFFERED ANOTHER VEHICLE, BUT STATED THAT IN ORDER TO HAVE THE VEHICLE, THEY WOULD NEED \$12,000. THE VIN AND ENGINE SIZE WERE UNKNOWN. THE CURRENT MILEAGE IS 7,000 AND FAILURE MILEAGE WAS 100.  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10285689  
Date of Incident: 20070201  
Vehicle: 2007 TOYOTA RAV4  
Location of Incident: COMMERCE TOWNSHIP, MI

C-823

Safety Research & Strategies

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

NHTSA Summary:  
TL\*THE CONTACT OWNS A 2007 TOYOTA RAV4. WHILE DRIVING OUT OF THE DRIVEWAY THE FLOOR MAT STARTED TO SLIP UNDER THE BRAKE AND ACCELERATOR PEDAL. THE CONTACT HAS REMOVED THE FLOOR MATS. THE CONTACT IS AWARE OF THE SAFETY RISK SINCE THE VEHICLE COULD ACCELERATE AND CAUSE A CRASH. THE CURRENT MILEAGE WAS 20,000 AND THE FAILURE MILEAGE WAS 1,000.  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10308140  
Date of Incident: 20070201  
Vehicle: 2006 TOYOTA HIGHLANDER HV  
Location of Incident: FLORENCE, MA

NHTSA Summary:  
2006 HIGHLANDER HYBRID 4WD. SURGE WHEN BRAKING AND GOING OVER BUMPS. SINCE 2007, ON MANY REPEATED OCCASIONS, WHEN I GO OVER BUMPY ROADS AND BRAKING, I HAVE BEEN EXPERIENCING A SLIGHT ACCELERATION SURGE WHEN BRAKING. EVERY TIME I BRING MY HIGHLANDER INTO THE TOYOTA DEALER I ASK IF THEY KNOW ABOUT THE PROBLEM, WHAT CAUSES IT, AND IF THERE IS ANY SERVICE INFORMATION OR BULLETIN ON IT. FORM NOTES--I CHECKED SERVICE BRAKES. THIS APPLIES TO THE REGULAR BRAKING SYSTEM-THIS TERM IS NOT CLEAR. AS TO WHAT MILEAGE--THIS IS A CONTINUING ONGOING PROBLEM SO THERE IS NO WAY TO INDICATE THAT ANSWER IN YOUR BOXES. SIMILARLY THIS HAS HAPPENED AT A WIDE RANGE OF SPEEDS, 15-35 MPH SO YOUR FORM DOES NOT PROVIDE A WAY TO INDICATE THAT.  
Additional Summary:

Toyota ID Number:  
NHTSA ODI Number: 10181575  
Date of Incident: 20070203  
Vehicle: 2004 LEXUS ES  
Location of Incident: COLLEGE PARK, GA

NHTSA Summary:  
TL\* THE CONTACT CALLED REGARDING THE 2004 LEXUS ES 330. THE CONTACT WAS TURNING INTO A PARKING SPACE AND THE CONTACT'S VEHICLE HESITATED AND THEN SUDDENLY ACCELERATED AND HIT THE VEHICLE PARKED DIRECTLY IN FRONT. THERE WERE NO WARNING INDICATORS. THE CONTACT'S VEHICLE SUSTAINED FRONT END DAMAGE. THE HEADLIGHTS BROKE AND THE HOOD WAS DENTED. THE AIRBAGS DID NOT DEPLOY. THE CONTACT STATED THAT THE HER VEHICLE WENT UNDERNEATH THE VEHICLE IN FRONT. THE OTHER VEHICLE SUSTAINED MINOR DAMAGE. THE VEHICLE WAS DRIVABLE, AND HAS BEEN TAKEN TO A REPAIR SHOP. THE DEALER WILL DO A DIAGNOSTIC CHECK ON THE VEHICLE. A POLICE REPORT WAS FILED. \*AK

**NHTSA ODI Number:** 10312922  
**Date of Incident:** 20070204  
**Vehicle:** 2007 TOYOTA COROLLA  
**Location of Incident:** HEPHZIBAH, GA

**NHTSA Summary:**  
I WAS IN THE DRIVE THROUGH LINE AT MCDONALD'S IN MADISON GEORGIA. AFTER PAYING FOR MY ORDER, I PRESS THE ACCELERATOR TO MOVE UP TO THE NEXT WINDOW AND "ZOOM" MY CAR ACCELERATED AND REAR ENDED A TRUCK IN FRONT OF ME. MY PASSENGER NOR I WERE INJURED. JUST SHAKEN UP A BIT. THE CAR CONTINUED TO ACCELERATE EVEN AFTER RUNNING INTO THE TRUCK. I TURNED OFF THE CAR TO STOP THE ACCELERATION. THIS INCIDENT HAS ONLY OCCURRED ONCE. HOWEVER, THE CAR FEELS LIKE IT PUSHES OFF QUICKLY MOST OF THE TIME. AS A RESULT OF THE CRASH MY ENTIRE FRONT END WAS DAMAGED AND HAD TO BE REPAIRED. THE TOYOTA REPAIRMAN TOLD ME THEY COULD NOT FIND ANYTHING THAT WOULD CAUSE THE CAR TO ACCELERATE. THEY FIX THE DAMAGE CAUSE BY THE CRASH.  
Additional Summary:

**Toyota ID Number:**  
**NHTSA ODI Number:** 10183576  
**Date of Incident:** 20070205  
**Vehicle:** 2003 TOYOTA TACOMA  
**Location of Incident:** SAN JOSE, CA

**NHTSA Summary:**  
TL\* THE CONTACT PURCHASED ON 07/29/03 A 2003 TOYOTA TACOMA FOUR DOOR DBL CAB. THE FIRST FAILURE OCCURRED ON 4/25/04 WHILE SLOWLY PULLING INTO A PARKING PLACE WITH AND LIGHTLY ACCELERATING. THE ENGINE REVVED SO FAST THE TRUCK DROVE OVER THE PARKING STRIP AND CRASHED INTO A PILLAR ON THE SIDEWALK, CAUSING \$5000.00 WORTH OF DAMAGE TO TRUCK, AND \$6000.00 DAMAGE TO THE PILLAR. DURING THE SECOND OCCURRENCE ON 10/09/06 VEHICLE STOPPED AT A RED LIGHT AND THE ENGINE ACCELERATED SO THE CONTACT PUT IT IN TO NEUTRAL AND ENGINE REVVED FASTER. THE DRIVER THEN SHIFTED THE VEHICLE BACK INTO DRIVE AND ENGINE RETURNED TO NORMAL IN A COUPLE SECONDS. DURING THIRD OCCURRENCE ON 02/05/07 WHILE STOPPING AT A RED LIGHT THE ENGINE REVVED AND WENT BACK TO NORMAL BEFORE THE CONTACTS COULD TURN OFF THE KEY. IF THERE HAD BEEN A CAR IN FRONT OF THE CONTACTS VEHICLE IT WOULD HAVE CAUSED A CRASH. THE FIRST TWO TIMES THE CONTACT TOOK THE TRUCK TO THE DEALER. EACH TIME THEY COULD NOT FIND ANYTHING, AND GENTLY SUGGESTED THAT MAYBE THE ACCELERATOR AND BRAKES WERE BOTH ENGAGED AT THE SAME TIME. FIRST TIME THE CONTACTS FOOT WAS ON THE ACCELERATOR, AND THE OTHER TIMES IT WAS ONLY ON THE BRAKES, THAT WAS THE FIRST TIME THE CONTACT CHECKED. THE SERVICE MANAGER ADVISED HER NOT TO DRIVE THIS VEHICLE. SO SHE RENTED A VEHICLE FOR A COUPLE DAYS. THEY HAD SOMEONE FROM TOYOTA COME TO CHECK IT OUT, BUT THEY COULD NOT FIND ANYTHING WRONG. \*AK

Safety Research & Strategies  
Update Report: Toyota Sudden Unintended Acceleration: Appendix C

"SAN LUIS OBISPO, CA - On February 5, 2007, Bulent and Anne Ezal were headed to lunch at the Patrin Point Restaurant in Prismo Beach, California. The restaurant is nestled on the edge of a cliff, affording dramatic views of the Pacific Ocean below. The parking lot was downhill of the restaurant, so Ezal rode the brakes of his 2005 Camry as he approached a parking space. He was at a complete stop, when the Camry suddenly accelerated, jumping a small curb, crashing through a fence and over the bluff. The vehicle fell 70 feet to the rocks below, and turned over once, coming to rest in the surf. Anne Ezal died of her injuries in the crash. Bulent Ezal later recovered."

Customer's attorney email to LCS on 02/07/2007 at 1:32 PM:  
My name is Derrick Rubin. I am the attorney for Charlotte Levine who was injured in a car accident with her brand new Lexus ES350 automobile on Tuesday, February 6th, 2007, in Roslyn, New York. Due to some defect with the automobile which, upon information and belief, has less than 1,000 miles on the odometer, caused the car to suddenly accelerate. The car would not stop moving even though the brake was fully applied. Mrs. Levine, unable to turn off the engine by pushing the ignition button and unable to stop the movement of the car by the application of the brake, had to intentionally crash the car to stop same. Please have a member of your legal department contact me at my office to discuss this matter.  
Derrick Rubin, Esq.  
1010 Northern Blvd., Suite 300  
Great Neck, NY 11021

\*\*\* NOTES 02/22/2007 06:22:34 AM KPatron

Per PIR report the veh was found to be operating as designed.

\*\*\* NOTES 02/26/2007 09:24:27 AM BLauterbach330

Derrick Rubin, Cust attny, called in tdy. Advised Mr. Rubin that the vehicle was inspected and no problems were found with vehicle. TMS Legal would be sending Mr. Rubin a formal response to his letter.

\*\*\* SUBCASE 200702061214-1 CLOSED 02/26/2007 12:38:56 PM KPatron

\*\*\* CASE CLOSE 02/26/2007 12:44:07 PM KPatron

Informed cust attorney by BLauterbach, eastern area CSM that the veh was inspected and no problems were found with the veh and TMS Legal would be sending Mr. Rubin a formal response to his letter. Cust understood and seeks no further asst(nc).

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10183821  
**Date of Incident:** 20070206  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** ROSLYN, NY

**NHTSA Summary:**

DRIVER WAS INJURED WHEN DRIVING HER NEW (SIX WEEKS OLD) LEXUS ES350 WITH APPROXIMATELY 700 MILES ON THE ODOMETER. DUE TO A DEFECT WITH THE AUTOMOBILE, THE CAR, WHILE PROCEEDING ON A ROADWAY, SUDDENLY AND UNEXPECTEDLY ACCELERATED. THE CAR WOULD NOT STOP EVEN THOUGH THE DRIVER HAD FULLY APPLYING THE BRAKES. THE DRIVER, JAMMING ON THE BRAKES, WAS ABLE TO SLOW THE CAR. THE DRIVER, UNABLE TO TURN OFF THE ENGINE BY PUSHING THE IGNITION BUTTON AND UNABLE TO STOP THE MOVEMENT OF THE CAR BY THE APPLICATION OF THE BRAKES, INTENTIONALLY CRASHED THE CAR INTO A PARKED AUTOMOBILE TO STOP. AFTER THE CAR FINALLY STOPPED, DRIVER WAS UNABLE TO TURN OFF THE ENGINE EVEN AFTER MOVING THE STICK INTO THE "PARK" POSITION. \*JB

**Date of Incident:** 20070211  
**Vehicle:** 2007 TOYOTA CAMRY HV  
**Location of Incident:** GEORGETOWN, TX

**NHTSA Summary:**

CRUISE CONTROL VARIES SPEED BY 7 MPH HOUR WHEN ENGAGED DURING NON FLAT TERRAIN CAUSING A SAFETY ISSUE WITH CARS FOLLOWING. WHEN ON FLAT TERRAIN THE CRUISE CONTROL MAINTAINS ITS TARGET SPEED WITHIN +/- 1 MPH WITH NO PROBLEMS. THE SAFETY ISSUES OCCURS WHEN THE VEHICLE ENCOUNTERS ROLLING HILLS, THE CRUISE CONTROL WILL ALLOW THE SPEED TO DECREASE BY AS MUCH AS 5 MPH WHILE DESCENDING DOWN THE HILL, THEN AS IT BEGINS TO CLIMB WILL AGGRESSIVELY ACCELERATE TO 2 MPH OVER THE TARGET SPEED. WHEN THE ROAD FLATTENS OUT AGAIN IT WILL MAINTAIN THE ORIGINAL TARGET SPEED. AT HIGHWAY SPEEDS, 70 MPH, THIS CAUSES SAFETY ISSUES ESPECIALLY WHEN TRAFFIC CONDITIONS ARE MODERATE TO HEAVY IN THAT TRAFFIC FOLLOW WILL NOT HAVE ANY INDICATION THAT THE SPEED IS SLOW BY 5 MPH. THIS IN TURN WILL CAUSE A HAZARDOUS SITUATION WHERE A COLLISION COULD OCCUR. THIS HAS BEEN REPORTED TO THE LOCAL TOYOTA DEALER AND TOYOTA SUPPORT RESPONDED THAT ALL IS WORKING WITHIN PARAMETERS AND NO ADJUSTS ARE PLANNED. CASE # 200701250758 HAS BEEN OPENED WITH TOYOTA CUSTOMER RELATIONS WITH NO PROMISE OF ACTION. \*NM

**NHTSA Summary:**

I WAS DRIVING ON INTERSTATE 55 I WENT TO PASS A SEMI TRUCK. MY SPEED AT THIS TIME WAS 65 MPH. I STEPPED ON THE ACCELERATOR AND STARTED TO CHANGE LANES. THE TRANSMISSION DOWN SHIFTED TO A PASSING GEAR AND THE THROTTLE WAS WIDE OPEN AND IT STAYED THAT WAY. I SHUT OFF THE IGNITION AND TURNED IT BACK ON. THE THROTTLE WAS STILL WIDE OPEN. I TRIED THIS A TOTAL OF THREE TIMES, NOW I AM GOING WELL OVER 80 MPH. I FINALLY LEFT THE IGNITION OFF AND COASTED OVER TO

C-832

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THE SIDE OF THE ROAD. MY WIFE ASKED WHAT HAD JUST HAPPENED AND I TOLD HER THAT THE THROTTLE WAS STUCK OPEN. I ASKED HER TO LOOK ON THE FLOOR SO SHE COULD SHE NOTHING WAS STUCK ANYWHERE NEAR THE ACCELERATOR PEDAL. I MIGHT ADD THE CRUISE CONTROL WAS NOT ON. I RESTARTED THE TRUCK AND CAUTIOUSLY WENT TO OUR DINNER ENGAGEMENT. AFTER DINNER WE USED EXTREME CAUTION ON OUR WAY BACK HOME. I TRIED SEVERAL TIMES TO REPLICATE THE PROBLEM. IT NEVER DID PRODUCE ITSELF ON OUR RETURN TRIP. I CALLED TOYOTA ON MONDAY MORNING AND AFTER TELLING THEM THE PROBLEM THEY WANTED ME TO DRIVE THE TRUCK BACK TO THE DEALER I REFUSED. I MADE THEM COME TOW IT. IT WAS CHECKED OUT BY THE FIELD ENGINEER AND WAS RETURNED TO ME. THEY SAID NOTHING WAS FOUND TO BE OUT OF ORDER. BUT WENT INTO DETAIL THAT THE FLOOR MATS WERE NOT INSTALLED CORRECTLY. THIS TRUCK HAD 149 MILES ON IT. IT WAS ONLY 4 DAYS OLD. \*JB

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10212458  
**Date of Incident:** 20070213  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** BALLSTON SPA, NY

**NHTSA Summary:**  
THE CRUISE CONTROL/TRANSMISSION ON MY 2007 CAMRY CAUSES THE CAR TO OPERATE IN AN UNSAFE MANNER. WHEN THE CRUISE CONTROL IS ENGAGED, DUE TO ITS SENSITIVITY, THE TRANSMISSION GOES THROUGH A SERIES OF ABRUPT DOWNSHIFTS CAUSING THE CAR TO ACCELERATE AND EXCEED THE CRUISE CONTROL SPEED SETTING. AT THIS POINT, THE CAR LOOSES SPEED AND THE TRANSMISSION THEN SHIFTS BACK INTO OVERDRIVE. THE DOWNSHIFTING STARTS AGAIN UNTIL THE SPEED CONTROL SETTING IS EXCEEDED. ON A LONG HILL, IT IS NOT UNCOMMON FOR THE TRANSMISSION TO SEQUENCE BETWEEN OVERDRIVE AND THIRD GEAR FOUR OR FIVE TIMES. THE EXCEEDING OF THE CRUISE CONTROL SETTING IS VERY DANGEROUS. I HAVE HAD TO ENGAGE THE BRAKES TO AVOID AN ACCIDENT WITH TRAFFIC AHEAD OF ME. I HAVE BROUGHT THE CAR BACK TO THE DEALER FOR THIS PROBLEM AND HAVE BEEN TOLD THAT HE CAN DO NOTHING UNTIL TOYOTA COMES UP WITH A FIX. I HAVE WRITTEN TWO LETTERS TO TOYOTA ASKING THEM TO FIX THIS PROBLEM. THEY HAVE NOT REPLIED TO EITHER LETTER. \*TR

**Date of Incident:** 20070217  
**Vehicle:** 2010 TOYOTA CAMRY  
**Location of Incident:** KALAMAZOO, MI

**NHTSA Summary:**  
ON 2/12/10 MY 2010 TOYOTA CAMRY RECEIVED AN ACCELERATION FIX. IN ADDITION I WAS INFORMED A FAIL-SAFE COMPUTER PROGRAM WAS PUT IN. ON 2/17/10 AS I WAS ENTERING MY PARKING SLOT, THE CAR DID AN UNINTENDED SUDDEN ACCELERATION WITHOUT MY FOOT BEING ON THE ACCELERATOR. I WAS PRESSING THE BRAKE. I JAMMED BOTH FEET INTO THE BREAK. AFTER 3 SECONDS, AS MY CAR WAS CLIMBING UP A SNOW BANK, IT STOPPED. THE ENGINE WAS IDLING WHILE MY GEAR SHIFT WAS IN DRIVE. THIS IS THE SECOND LEVEL ON THE FAIL-SAFE SYSTEM. THIS MEANS THAT: "IF BOTH ACCELERATOR POSITION SENSORS FAIL, OR IF ONE THROTTLE POSITION SENSOR FAILS, THE ECM WILL RETURN THE ENGINE TO IDLE SPEED. HAD THE INCIDENT HAPPENED ONE MINUTE EARLIER, I WOULD HAVE BEEN IN A HIGH CAR/PEDESTRIAN AREA AND WOULD NOT HAVE BEEN ABLE TO AVOID AN ACCIDENT. THE WHOLE EVENT TOOK 5-6 SECONDS BEFORE THE CAR SUDDENLY STOPPED. THE FIX DONE BY TOYOTA IS NOT THE FIX FOR THE ACCELERATION PROBLEM. UPDATED 03/08/10 \*BF

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TL-THE CONTACT OWNS A 2006 TOYOTA PRIUS. THE CONTACT STATED THAT ON ABOUT TWELVE OCCASIONS, THE VEHICLE SUDDENLY ACCELERATED WHILE THE CRUISE CONTROL WAS ACTIVATED. HE NOTICED THE ACCELERATION WOULD OCCUR ON A SMALL DECLINE AND SOMETIMES AN INCLINE. IT WOULD DOWNSHIFT AND THEN "FLOOR ITSELF" SOMETIMES UP TO 80-90 MPH. HE HAD TO DISENGAGE THE CRUISE CONTROL TO KEEP FROM LOSING ALL CONTROL. HE DID NOT TAKE THE VEHICLE TO THE DEALERSHIP FOR THE PROBLEM AND DID NOT SPEAK WITH THE MANUFACTURER. IN APRIL 2009 DURING A TIME OF INCLEMENT WEATHER, HE TRIED TO PASS ANOTHER VEHICLE ON THE HIGHWAY AT APPROX 40 MPH AND GOT CAUGHT IN A PILE OF "SLUSH" ON THE HIGHWAY, SLID SIDEWAYS AND HIT A GUARDRAIL. THE VEHICLE WAS TOTALED. THERE WERE NO INJURIES BUT A POLICE REPORT WAS TAKEN. ADDITIONALLY, WHEN HE FIRST DROVE THE VEHICLE, HE NOTICED PUFFS OF SMOKE EMIT FROM THE DASHBOARD AND TOOK THE VEHICLE TO THE DEALERSHIP. THE DEALER NEVER INSPECTED THE VEHICLE AND TOLD HIM THAT NOTHING WAS WRONG WITH IT. THE CURRENT MILEAGE WAS APPROXIMATELY 60,000. THE FAILURE MILEAGE WAS APPROXIMATELY 600-BK

**Additional Summary:**

**NHTSA ODI Number:** 10183308  
**Date of Incident:** 20070220  
**Vehicle:** 2006 TOYOTA TUNDRA  
**Location of Incident:** PRESCOTT, AZ

**NHTSA Summary:**  
I WAS DRIVING NORTH OUT OF PHOENIX ARIZONA ON I-17 JUST PAST BLACK CANYON CITY, WITH MY CRUISE CONTROL SET AT 75 MPH. THERE IS A VERY LONG HILL GOING NORTH TO SUNSET POINT. PRIOR TO APPROACHING THE HILL I CANCELED THE CRUISE SO THAT THE TRANSMISSION WOULDN'T HUNT GEARS. I DROVE UP THE HILL AT 65 TO 75 MPH (NO CRUISE). WHEN I MADE THE TOP OF THE HILL AT SUNSET POINT AND LEVELED OUT, I ACCELERATED THE VEHICLE TO 75 MPH AND HIT RESUME. THE ENGINE RACED TO 5200 RPM. I REDLINE AT 5700 RPM. THE TRANSMISSION DID NOT FOLLOW SUITE. IT WAS AS IF I WAS IN NEUTRAL, REVVING THE ENGINE. I IMMEDIATELY CANCELED THE CRUISE AND DROVE A MILE OR SO WITHOUT CRUISE, THEN DECIDED TO TRY IT AGAIN. EVERYTHING WORKED NORMAL. I HAVE BEEN IN CONTACT WITH MY DEALERS SERVICE DEPT. AND THEY ARE BAFLED. THEY HAVE NOT LOOKED AT IT AS YET DUE TO THEIR SCHEDULE. AS SOON AS THEY CAN GET ME IN THEY WILL. THEY DID SAY THAT THERE SHOULD HAVE BEEN A CHECK ENGINE LIGHT, BUT THERE WAS NOT. THEY ARE HOPING THAT THE ONBOARD COMPUTER RECORDED IT. NOT ONLY IS THIS A MAJOR SAFETY HAZARD, BUT IT COULD HAVE CAUSED MY ENGINE TO BLOW UP. I'M NOT SURE WHAT REACTION MY WIFE WOULD HAVE HAD. SHE DRIVES ALL THE VEHICLES WE HAVE AND THEY BOTH HAVE CRUISE, YET SHE IS NOT THAT FAMILIAR WIT RPM'S AND REDLINES AND THE ISSUE THAT FOLLOW. WHEN I HAVE ALLOWED THE CRUISE TO PULL ME UP AN INCLINE IT USUALLY DROPS 1 OR TWO GEARS AND THE RPM'S ARE AROUND 3000 TO 3200. THIS I CONSIDER NORMAL. I HAD A 1999 TOYOTA TACOMA WITH A SIX CYLINDER ENGINE AND CRUISE. SO I AM VERY FAMILIAR WITH THE SYSTEM. I PURCHASED THE VEHICLE FROM TIM'S TOYOTA IN PRESCOTT. I ALSO BROUGHT TO THEIR ATTENTION A NOISE THAT I HEARD IN THE RIGHT FRONT SUSPENSION AND THEY ARE GOING TO TAKE CARE OF IT UNDER A NEW RECALL THAT HAS NOT EVEN BEEN SENT TO CUSTOMERS, NOR WAS THE SERVICE DEPT AWARE OF IT. \*JB

**NHTSA ODI Number:** 10184420  
**Date of Incident:** 20070221  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** FLAGGSTAFF, AZ

**NHTSA Summary:**  
TL - THE CONTACT CALLED REGARDING A 2007 TOYOTA CAMRY. THE CONTACT STATED THE CRUISE CONTROL WAS SET TO 65 MPH. THE VEHICLE ACCELERATED TO 90 MPH. THE CONTACT STATED HE STEPPED ON THE BRAKES AND THE VEHICLE SLOWED DOWN. THE CONTACT HAS NOT USED THE CRUISE CONTROL AGAIN. THE CONTACT TOOK THE VEHICLE IN FOR DIAGNOSIS AND WAS TOLD THE 2007 CRUISE CONTROL SYSTEM IS NOT DESIGNED WELL AND THAT THERE IS NOTHING THEY CAN DO. THE FAILURE MILEAGE WAS 4000. KB THIS CONDITION ONLY OCCURS WHEN THE CONSUMER IS GOING DOWN A STEEP HILL. NO PROBLEM WAS EXPERIENCED OTHER THAN ON STEEP DOWN HILL ROADWAYS. THIS MAY BE A NORMAL CONDITION AS THE VEHICLE APPARENTLY DOES NOT APPLY THE BRAKE TO CONTROL VEHICLE SPEED, ACCORDING TO THE OWNER'S MANUAL AND THE DEALERSHIP. \*DSV

**NHTSA ODI Number:** 10323201  
**Date of Incident:** 20070221  
**Vehicle:** 2007 TOYOTA CAMRY SOLARA  
**Location of Incident:** LITTLETON, CO

**NHTSA Summary:**  
2007 TOYOTA SOLARA. CONSUMER STATES UNINTENDED ACCELERATION. \*TGW THE CONSUMER STATED HE EXPERIENCED SUDDEN ACCELERATION FOR THE FIRST FEW MONTHS AFTER THE VEHICLE WAS PURCHASED. THE CONSUMER STATED THE VEHICLE WOULD LURCH FORWARD WHILE AT A STOP LIGHT OR STOP SIGN. IT DIDN'T HAPPEN EVERY TIME, ONLY INTERMITTENTLY. WHEN IT DID HAPPEN, THE ENGINE WAS ACCELERATING AND THE CONSUMER HAD TO PRESS VERY HARD ON THE BRAKE OR PLACE THE TRANSMISSION IN NEUTRAL TO PREVENT THE VEHICLE FROM GOING ANY FURTHER. THE CONSUMER ALSO COMPLAINED OF A ROUGH IDLE. THE ROUGH IDLE WAS DUE TO CRACK IN THE SPARK PLUG. A FEW TIMES THE VEHICLE WOULD ACCELERATE WHILE ON THE HIGHWAY. ALSO, THE CHECK ENGINE LIGHT ILLUMINATED. \*JB

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

CC List: [Nobody]  
KLee does that cllr sts: Cust called and req ASalceda. I adv cust ASalceda is currently unavail and adv cust of notes. I adv cust veh is operating w/in Lexus specifications and that a/c button was not depressed which is why the a/c did not blow cold air. Cust sts this was not the main concern. Cust sts the main concern is the acceleration and surges on its own at around 20 mph & that the a/c was rprd at prior visit to dlr. Cust sts the a/c was recalibrated by the dlr tech. Cust sts dlr tried to attempt to resolve concern but that the veh now accelerates at all speeds now even when she is attempting to stop. Cust req a c/b. Cust sts her concern was not regarding the a/c. Cust sts the concern was that even at 65 degrees Fahrenheit was blowing hot air and had nothing to do with the a/c blowing cold air. Cust req a c/b from a supervisor and from ASalceda. I adv cust of 1 b/d turn around for sup c/b.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10185364  
**Date of Incident:** 20070223  
**Vehicle:** 2006 TOYOTA CAMRY SOLARA  
**Location of Incident:** CHANDLER, AZ

**NHTSA Summary:**  
I OWN A 2006 TOYOTA SOLARA 6 CYL. AND THE CAR HAS A PROBLEM WHEN WHEN YOU ACCELERATE FROM A SLOW PACE (AS WHEN YOU START TO MERGE INTO A BUSY STREET OR FREEWAY) THE CAR ACTUALLY HESITATES. THERE IS A 1/2 TO 2 SECOND DELAY OR LAG BEFORE THE CAR ACTUALLY KICKS IN AND ACCELERATES. I ACTUALLY HEAR AND SEE THE RPM'S REV UP ON ONE OF THE GAUGES, BUT THE CAR IS NOT ACCELERATING OR SHIFTING AS IT SHOULD BE. IT IS TOYOTA'S RESPONSIBILITY TO DO A REFRESHING FOR A COMPUTER UPDATE! THIS IS ALL THAT IS NEEDED TO CORRECT THE PROBLEM AND I DEMAND THAT IT BE DONE BEFORE AN ACCIDENT HAPPENS! THIS PROBLEM IS VERY DANGEROUS AND HAS THE POTENTIAL TO CREATE A DEADLY ACCIDENT. I HAVE TAKEN MY 2006 TO TWO TOYOTA DEALERSHIPS IN THE PHOENIX AREA AND HAVE NOT GOTTEN THE HELP NEEDED TO TAKE CARE OF THIS SERIOUS MATTER. I AM NOT PLEADING WITH NHTSA TO HELP ME WITH THIS MATTER AND I WANT TO BRING THIS TO THE ATTENTION OF THE PUBLIC, TOYOTA, THE DEALERSHIPS, THE

C-840

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

GOVERNMENT AND EVERYONE WHO CAN HELP WITH GETTING THIS MATTER TAKEN CARE OF. IF I AM IN AN ACCIDENT BECAUSE OF THIS PROBLEM I WILL HOLD EVERYONE INVOLVED RESPONSIBLE AS I FEEL I AM HAVE TOLD ALL THOSE WHO CAN HELP EVERYTHING I CAN AND I GET NO RESPONSE! I WANT THIS PROBLEM TO BE TAKEN VERY SERIOUS AND I EXPECT TO BE HEARD AND SOMEONE TO CONTACT ME WITHIN A REASONABLE AMOUNT OF TIME. I KNOW IN FACT TOYOTA IS AWARE OF THIS PROBLEM AND HAS ORDERED THE MECHANICS, SERVICE WRITERS AT THE DEALERSHIPS TO WITHHOLD THIS INFORMATION FROM CUSTOMERS. I ALSO KNOW THAT TOYOTA HAS CORRECTED THE PROBLEM WITH THE 2007 TOYOTA CAMRY. I ALSO OWN A 2000 TOYOTA SOLARA 6 CYLINDER AND THIS CAR HAS NO SUCH PROBLEM WITH IT HESITATING. I ALSO DROVE A 2007 TOYOTA CAMRY, LOANER CAR, THAT DID NOT HAVE THIS PROBLEM.

**NHTSA ODI Number:** 10314403  
**Date of Incident:** 20070225  
**Vehicle:** 2007 TOYOTA TACOMA  
**Location of Incident:** PHOENIX, AZ

**NHTSA Summary:**  
PULLED INTO A PARKING SPACE AND APPLIED BRAKE. ENGINE ACCERATED CAUSING VEHICLE TO JUMP A CURB AND STRIKE A TREE WITH THE ENGINE STILL RACING. IN A FEW SECONDS, THE ENGINE RETURNED TO IDLE. THIS IS THE SECOND TIME THIS OCCURED. THE FIRST TIME, I CONCLUDED THAT I HAD CAUGHT THE EDGE OF MY SHOE ON THE ACCELERATOR PEDAL. HOWEVER, THIS TIME, BEFORE RELEASING THE BRAKE, I LOOKED AT MY FOOT AND IT WAS CLEAR OF THE ACCELERATOR PEDAL. I KNOW THERE IS A MAJOR TOYOTA RECALL FOR SIMILAR PROBLEM. HOWEVER, THIS MODEL IS NOT INCLUDED IN THE UNINTENTIONAL ACCELERATION PROBLEM. AFTER THESE TWO INCIDENTS, I'M CONCERNED THAT PROBLEMS ALSO EXIST WITH THIS MODEL TOYOTA AND IT NEEDS TO BE INVESTIGATED.

NR: Summers sks clarification & rpr if necessary of slight revving when shifting between 4th & 5th gears & w/ high RPMs at cold start up.

\*\*\* SUBCASE 200703230324-1 CREATED 03/23/2007 09:11:11 AM JSpencer

EMAIL STS

"Hello--I recently purchased a new 2006 Tacoma four wheel drive,standard cab,2.7 liter engine,manual transmission. I noticed when shifting from fourth to fifth gears,there is a slight revving of the engine when the clutch is depressed. This does not seem to occur when shifting 1-2-3,or 3-4. My question is,whether this is normal,or if I should have it checked? (There are less than 1,000 miles on the Tacoma)Also, can you tell me approximately what the cold start up idle speed is on this model? Mine seems to start around 2400-2600 rpm and slowly lower to the 500-700 rpm range once the motor is warm. I just want to make sure this is proper,and i'm not ignoring something that could damage the motor..Thanks in advance for your assistance,and thanks for making the most dependable vehicles in the world!"  
END EMAIL

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

"Thank you for contacting Toyota Motor Sales, U.S.A., Inc.  
We apologize for your concerns with your 2006 Tacoma.  
In order to properly assess your concerns with the engine revving between fourth and fifth gear, we recommend you contact the Customer Relations Manager at your local Toyota dealership  
<http://www.toyota.com/dealers> to further evaluate your Tacoma.  
Toyota dealership technicians are specialized in the diagnosis and repair of Toyota vehicles. They are provided with extensive training and have access to state-of-the-art equipment to help in the accurate diagnosis of your vehicle. Also, if necessary, we provide additional support to assist Toyota dealership technicians in resolving unusual vehicle concerns.

Regarding the cold start idle speed, your vehicle is operating as designed, as the idle speed is increased to get the engine to normal operating temperatures as quickly as possible.  
There is no issue running the vehicle at high RPM's when cold because with most modern vehicles there is full oil circulation within 20 seconds of the engine being turned on. Also over time, a film of oil will start to develop on the internal moving parts of the engine that will not drain back to the pan, which will provide some protection right at start up.

After waiting that first 20 seconds, you can drive your vehicle normally with out concern for abnormal wear and tear.

Your email has been documented at our National Headquarters under file #Sincidents c\$claircasenumber.

If we can be of further assistance, please feel free to contact us <%20http://toyota.custhelp.com/cgi-bin/toyota.cfm/php/enduser/std\_adp.php?p\_faajid=4164>.  
Toyota Customer Experience"

\*\*\* PHONE LOG 03/12/2007 02:55:07 PM KHirai Action Type: Outgoing call  
Left mssg on CSM Ken Kocher's voicemail req a return call to address the customer's concern.

\*\*\* PHONE LOG 03/12/2007 04:18:35 PM KHirai Action Type: Outgoing call  
Addressed customer's concern w/CSM Ken Kocher. FTS Dan Pfeiffer inspected veh. There were no codes indicating there were issues w/veh. It appears the rubber winter floor mat was rubbing on the accelerator pedal. The cust apparently did not remove the extra plastic cover on the winter floor mat. There was an area on that portion of the winter floor mat that had been worn. Dlr had originally delivered the veh to the cust during the summer. The veh had regular floor mats at that time. Cust acknowledged to the dlr that he installed the winter floor mats. CSM Ken provided cust the FTS' preliminary diagnosis/insight. Dlr put back the regular floor mats and cust stated they would test drive veh for a few days to see if the issue is still present. Cust picked up veh Friday afternoon and returned the dlr's loaner veh at that time.

\*\*\* PHONE LOG 03/13/2007 08:47:08 AM KHirai Action Type: Outgoing call  
Cld 513-871-7082 and left a mssg on the voicemail asking the cust to return my call at LCS 800# + prompt 4. Expl in the mssg that I would attempt to contact the cust on the other tel# LCS has on file.

\*\*\* PHONE LOG 03/13/2007 08:48:55 AM KHirai Action Type: Outgoing call  
Cld 513-821-0346 and the lady answering the phone stated cust doesn't work there. Apol to the lady. \*\*\* If cust calls, please transfer. Thanks.

\*\*\* PHONE LOG 03/14/2007 03:32:01 PM KHirai Action Type: Outgoing call  
Addressed customer's concern w/CSM Ken Kocher. FTS Dan Pfeiffer inspected veh. There were no codes indicating there were issues w/veh. It appears the rubber winter floor mat was rubbing on the accelerator pedal. The cust apparently did not remove the extra plastic cover on the winter floor mat. There was an area on that portion of the winter floor mat that had been worn. Cust stated: the floor mat was approx 4-5 inches away from the pedal. Therefore, customer's wife, Mrs. Monica Wilkins, doesn't feel FTS diagnosis was correct. Cust did acknowledge the mats may have caused the issue. Cust put the regular mats back in veh. Cust doesn't drive veh. Customer's wife is the primary driver and she hasn't adv him of any issues. Adv cust I have documented his concerns at Nat HQ's. Cust satisfied and req no further asst from LCS. Case can be closed.

\*\*\* NOTES 03/15/2007 08:01:15 AM KHirai  
Note: In regards to the previous documentation, I cld 513-871-7082 and spoke to cust. I did not mention Dan Pfeiffer's name to cust as indicated in the notes. I referred to FTS as Lexus technical advisor.

\*\*\* CASE CLOSE 03/15/2007 08:02:36 AM KHirai  
Cust w/07 ES 350 seeked to address his concerns regarding FTS inspection. Addressed customer's concern w/Lexus Rivercenter CSM Ken Kocher. Addressed customer's concerns during T'u call. Adv cust I have documented his concerns at Nat HQ's. Cust satisfied and req no further asst from LCS. CASE CLOSED.

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

Caller states: with c/c on going up any incline veh downshifts more then one gear and engines speeds up. Ctr states is aware will downshift going up hill but veh downshifts too aggressive down to 2nd gear or lower straight from drive. Veh shutters when in downshifts. It can even be a small hill at about 60 mph not towing anything. Pur new 03/07, had oil change 08/21/07 at dlr #1 Vancouver Toyota advd dlr of concern was advd nothing that can do adv to call TMS.

\*\*\* NOTES 08/23/2007 09:17:02 AM JNortz130  
FTS Benjamin Melcher is visiting the dealership this afternoon and will review the concern with shop foreman/Dave Griffin.  
\*\*\* NOTES 08/27/2007 03:19:58 PM JNortz130  
Region called the dlrshp to speak to shop foreman/Dave G. and found him to be on vacation this week. Region called FTS/Ben M. and left a voice mail message for him to call me regarding this situation.  
\*\*\* NOTES 08/27/2007 03:40:29 PM JNortz130  
Region called the FTS/Ben M. and left a voice mail message asking him to call back regarding the outcome on his inspection etc  
\*\*\* NOTES 08/28/2007 09:40:28 AM JNortz130  
Region spoke to FTS/Ben M. on meeting w/shop foreman regarding cust. concern. FTS was there for 2 hours and the Shop Foreman wasn't available. FTS will be in the office on the morning of 8/29/2007 and we will get together and call the tech. at the dlrshp. Shop Foreman is on vacation this week.  
\*\*\* NOTES 08/28/2007 09:44:56 AM JNortz130  
Region called the customer and left a voice mail message on the first no. Left name, date,time and phone no. and asked to be called back. Region called the second no. and spoke to cust. wife. Waiting to hear back from the customer.  
\*\*\* NOTES 08/28/2007 10:17:15 AM JNortz130  
Cust. called back and explained his concern. While in cruise control going up a hill the vehicle downshifts too far according to the customer. Cust. has to dis-cont. the cruise. Cust. would like to meet w/an FTS and have an inspection and road test to determine if this is a problem or if its normal. Cust. hasn't been in another like vehicle. Will suggest that to FTS. Advised cust. that I would contact him after speaking to an FTS.  
\*\*\* NOTES 08/29/2007 03:42:22 PM JNortz130  
Region called the customer to set up an appt. w/FTS/Ben M. FTS can meet w/customer to road test and inspect cust. concern on 9/7/2007 at Beaverton Toyota ( 12:00pm ). Cust. asked that the FTS call him to see if he could arrange a meeting at Toyota of Vancouver on the same day because he knows where there is hills in the area where he can demonstrate his concern. FTS will call the cust. and work out a time.  
\*\*\* NOTES 09/05/2007 11:13:55 AM JNortz130  
FTS/Ben Melcher met with customer on the 31st of Aug. at 10:30am to inspect and road test his vehicle for the concerns mentioned. According to the FTS the customer's vehicle was found to be operating as designed. No manufacturing defects were noted. FTS advised customer that he would contact Toyota of Vancouver and they would contact him if there were any soft ware changes made in the future.

\*\*\* CASE CLOSE 09/05/2007 11:17:25 AM JNortz130  
Region FTS/Ben M. met w/customer on the 31st of Aug. at the Toyota of Vancouver. A road test and inspection was completed and according to the FTS the vehicle is operating as designed. This was explained to the customer and he was satisfied with the results.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10319371  
**Date of Incident:** 20070305  
**Vehicle:** 2003 TOYOTA COROLLA  
**Location of Incident:** ALISO VIEJO, CA

**NHTSA Summary:**  
PURCHASED 2003, TOYOTA, COROLLA, VIN: INXBR32E732042375 WITH DAUGHTER. VEHICLE WAS PURCHASED FROM TOYOTA OF ORANGE IN CALIFORNIA. TWO DAYS LATER A HIT AND RUN DRIVER FORCED VEHICLE TO SKID ACROSS FIVE LANES ON INTERSTATE 10 IN ONTARIO, CALIFORNIA, AND LANDED ATOP CENTER DIVIDER. THE VEHICLE WAS SENT TO REPAIR SHOP AND "REPAIRED" AFTER APPROXIMATELY 5-8 MONTHS. HOWEVER, THE CAR WAS NEVER PROPERLY REPAIRED, AND I COMPLAINED TO BOTH TOYOTA, AND TO THE INSURANCE COMPANY. ALL STATE, BUT TOYOTA ADMANTLY STATED THE VEHICLE WAS WITHOUT PROBLEMS. THE CAR WAS CONTINUALLY IN THE SHOP FOR THE BRAKES. EVENTUALLY THE CARPET CAUSED THE ACCELERATOR TO BECOME STUCK AND THE CAR WENT OUT OF CONTROL. I WAS FORCED TO REACH DOWN WHILE THE CAR MOVING AND PULL THE CARPET WITH BOTH HANDS TO RELEASE THE ACCELERATOR. STEPPING ON THE BREAKS DID NOT HELP. NEITHER TOYOTA REPAIR NOR ALLSTATE WOULD HELP RESOLVE OUR COMPLAINTS SINCE 2003. WE WERE SIMPLY TOLD THAT THE VEHICLE WAS FINE. ADDITIONALLY I BELIEVE THE FRAME IS BENT, LACK OF INTERLOCKING BREAKS CAUSING SKIDS, BREAKS ARE SOFT AND DROP TO FLOOR, AND POOR STEERING COLUMN. THIS CAR IS DANGEROUS AND IS IMPOSSIBLE TO DRIVE WITHOUT INVOLVING NEAR MISS ACCIDENT EPISODES. THE CAR SKIDS IF GOING AS LITTLE AS 5-10 MILES PER HOUR. I OFFERED TO GIVE THE CAR AWAY TO ANYONE WHO WAS WILLING TO INVESTIGATE MY COMPLAINTS, ALL TO NO AVAIL. I JUST RECENTLY LEARNED THAT ONE OF THE PROBLEMS I HEARD IN THE THE BRAND NEW CAR WAS A HOLE IN THE EXHAUST SYSTEM. TOYOTA CONTINUALLY DENIED THIS FOR 5-6 YEARS, THEN BY ACCIDENT A VERY YOUNG NEWLY EMPLOYED STAFF AT TOYOTA OF ORANGE, INFORMED US THAT OUR COMPLAINT ABOUT LOUD AIR SOUNDING NOISE WAS A HOLE IN THE EXHAUST, WHICH HAD BEEN CONTINUALLY MAKING THE NOISE, AND BURNING OF EYES (MIGRAINES). THE BRAKES WERE REPAIRED EVERY 2-4 MONTHS OR LESS UNTIL I JUST REPORTED LESS FREQUENTLY. THE CAR IS NOW NO LONGER UNDER WARRANTY. CURRENTLY IT NEEDS SAME BRAKES, ROTORS, DRUMS, CALIPERS, AND SHOCKS AS ALWAYS.

Email verbatim: When my truck is at operating temperature and I shift from 4th gear into 5th the rpm's at the rpm that I shift out of 4th until the clutch is released again. This only happens between 4th and 5th, why? Obviously once the clutch is engaged the rpm's match where they should be. Meaning no clutch slippage. I have a 2007 tacoma 4x4 regular cab with a 5 speed. P.S. A friend has an 2002 with the same issue.

\*\*\* CASE CLOSE 10/26/2007 06:38:34 AM QHHolmes

We apologize for the concern you are experiencing with your higher engine speed, or RPM. Because we are unable to directly inspect your vehicle, we are not in a position to provide a technical diagnosis of the concern you are experiencing. In order to assess if your RPM concerns are normal, your Tacoma will need to be inspected. We recommend you discuss the condition further with Newburgh Toyota, as their technicians are specifically trained in the diagnosis and repair of Toyota vehicles. Your email has been documented at our National Headquarters

Via email ncr responded:

Dear Mr. LaSusa:

We again apologize for the concerns you are experiencing with your 2007 Tacoma.

We are not aware of any known concerns you described on the 2007 Tacoma. We have checked your VIN (Vehicle Identification Number) 5TEPX42N77Z386789 and determined that your 2007 Tacoma is currently not involved in any Special Service Campaigns and there are no Technical Service Bulletins that would address the concerns you describe.

As advised previously, since we are not in a position to inspect your vehicle, we are unable to diagnose the concern and determine the appropriate repairs. Therefore, we would like to refer you to the Customer Relations Manager at your local Toyota dealership <<http://www.toyota.com/toyotaApp/dealers>> where your vehicle can receive expert service from Toyota technicians. Each Toyota dealership has, on site, a Customer Relations Manager to oversee the various operations and address any concerns a customer may have.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

If you prefer, we would need you to provide us with the name of the Toyota dealership you would like to work with and daytime phone number and alternate phone number, we would be happy to contact them for you in order to open up the lines of communication between you and the dealership and ask the Customer Relations Manager to contact you within 3 business days. Please let us know.  
Toyota values you as a customer, and we appreciate this opportunity to review your case.  
Toyota Customer Experience  
END RESPONSE

Thank you for contacting Toyota Motor Sales, U.S.A., Inc.  
We apologize for the concerns you experienced with your recent service at Bitterroot Toyota and regarding the throttle of your 2006 Tacoma.

Toyota dealership technicians are specialized in the diagnosis and repair of Toyota vehicles. They are provided with extensive training and have access to state-of-the-art equipment to help in the accurate diagnosis of your vehicle. Also, if necessary, we provide additional support to assist Toyota dealership technicians in resolving unusual vehicle concerns.

You can be sure that Toyota is committed to providing the best possible service at Toyota dealerships and to making the service experience a favorable one. We encourage each dealership to maintain a professional level of performance at all times, and we were sorry to learn that you felt the service you received was less than satisfactory.

In the interest of customer satisfaction, we have contacted the Customer Relations Manager at Bitterroot Toyota to assist you with your concerns. The Customer Relations Manager will contact you by the end of the business day Tuesday, March 13, 2007.

In the event you do not receive contact from the dealership by this date, please contact us <[http://toyota.custhelp.com/cgi-bin/toyota.cfg/php/enduser/std\\_adp.php?p\\_faqid=4164](mailto:toyota.custhelp.com/cgi-bin/toyota.cfg/php/enduser/std_adp.php?p_faqid=4164)> with file #Incidents.c&clarifycasenumber.

It is through correspondence such as yours that we are able to continue to improve Toyota dealership services, and we sincerely appreciate the time you have taken to bring this matter to our attention.

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** EDINA, MN

**NHTSA Summary:**

I HAVE A 2007 TOYOTA CAMRY HYBRID. I REPORTED THIS ISSUE TO THE DEALERSHIP TWICE, ONCE SHORTLY AFTER I GOT THE IN CAR IN 2007 AND AGAIN IN 2008 WHEN IT WENT IN FOR ROUTINE MAINTENANCE. THE ISSUE: ON OCCATION, WHEN I REMOVE MY FOOT FROM THE ACCELERATOR PEDAL AND DEPRESS THE BRAKE PEDAL THE CAR WILL "SURGE" FORWARD MOVING FROM AN ALMOST IMPERCEVABLE AMOUNT UP TO ABOUT A FOOT. THIS IS NOT A CONSISTENT PROBLEM AND DOES NOT HAPPEN OFTEN. IT SEEMS TO HAPPEN MOST OFTEN IN THE FIRST FEW MINUTES OF DRIVING AND I HAVE NOTICED IT MORE WHEN THE CAR IS ON AN INCLINE BUT IT HAS HAPPENED AT OTHER TIMES. THIS IS NOT A FLOOR MAT ISSUE - MY FLOOR MAT HAS THE LOCKING MECHANISM TO KEEP IT FROM SLIDING AND WHEN CHECKED IT HAS NEVER BEEN UNDER OR AROUND EITHER THE BRAKE OR ACCELERATOR. THE INITIAL RESPONSE FROM THE DEALORSHIP WAS THAT THE CAR COULD NOT, UNDER ANY CIRCUMSTANCES, MOVE FORWARD IF THE BRAKE WAS DEPRESSED AND THAT I PROBABLY JUST NOTICED THE ENGINE GOING FROM GAS TO HYBRID AND THOUGHT IT MOVED. THE SECOND COMPLAINT RECEIVED MUCH THE SAME REACTION. I WAS SHOCKED THAT THE HYBRIDS WERE NOT RECALLED WITH THE ACCELERATOR ISSUE BUT GIVEN PRIOR COMPLAINTS THE DEALORSHIP HAS AGREED TO CHECK THE CAR AGAIN.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

WE HAVE HAD TWO INCIDENTS WITH OUR 2006 TOYOTA TACOMA TRUCK. I. MY WIFE, WAS DRIVING ROUTE 40 WHEN AFTER RED LIGHTS THE ENGINE SUDDENLY STARTED SPEEDING UP W/O ANY WARNING OR ALARM. HAVING HER FOOT OFF THE ACCELERATOR PEDAL DIDN'T HAVE ANY IMPACT. SHE HAD TO BRAKE AS MUCH SHE COULD TO CONTROL THE CAR. SHE WAS ABLE TO PULL TO PULL OFF BUT STILL COULDN'T CONTROL THE ENGINE. THE ENGINE DIDN'T EVEN SHUT DOWN WHEN TURNING THE KEY. CHANGING THE SELECTOR LEVER TO NEUTRAL WAS IMPOSSIBLE AS THE ENGINE TOOK FULL RPM. SOMEHOW AFTER SOME "TRIAL AND HORROR" SHE WAS ABLE TO SHUT AND RESTART THE ENGINE AND EVENTUALLY THE CAR WAS BACK IN CONTROL. THE SITUATION HAD BEEN REALLY SCARY. I WASN'T THERE SO I COULD NOT FULLY APPRECIATE WHAT HAD HAPPENED WHEN SHE DESCRIBED THE SITUATION. II. MY WIFE DIDN'T DARE TO USE THE CAR BEFORE I CAME BACK FROM A BUSINESS TRIP. YESTERDAY - SATURDAY 3/10 - I WAS DRIVING THE TRUCK THE FIRST TIME AFTER THE PREVIOUS INCIDENT. THERE WAS A SLOW DOWN IN THE TRAFFIC WHEN SUDDENLY THE ENGINE DID THE SAME AS ABOVE. I WAS ON A MIDDLE LANE AND COULDN'T DO ANYTHING BUT BRAKE AS HARD AS I COULD. HAVING HAZARD LIGHTS ON AND SLOWING THE SPEED CAREFULLY I WAS ABLE STOP ON THE HIGHWAY W/O ANYBODY DRIVING ON US. I SHUT AND RESTARTED THE ENGINE COUPLE OF TIMES W/O ANY IMPACT. EACH TIME ENGINE STARTED AS IF THE ACCELERATOR PEDAL WOULD BE PUSHED DOWN. I STARTED THE CAR AND PUSHING THE BRAKE PEDAL HARD I WAS ABLE TO CONTROL THE TRUCK AND DRIVE TO NEXT RED LIGHTS. AFTER SOME BRAKING AND RESTARTING THE CAR WAS AGAIN SUDDENLY BACK IN CONTROL. THE DEFECT DESCRIBED ABOVE COULD EASILY CAUSE A CRASH WITH SERIOUS INJURY OR EVEN DEATH WHEN HAPPENING IN A HEAVY TRAFFIC OR BAD WEATHER CONDITIONS. WE DON'T DARE TO DRIVE THE TRUCK BEFORE IT IS THE DEFECT IS IDENTIFIED AND FIXED. IT WILL BE IMPORTANT TO UNDERSTAND WHAT CAUSED THE PROBLEM AND HOW IT WAS FIXED. I HAVE NOTIFIED TOYOTA DEALER AND THEY WILL PICK UP THE TRUCK TOMORROW. \*JB

**NHTSA ODI Number:** 10310146  
**Date of Incident:** 20070310  
**Vehicle:** 2006 TOYOTA AVALON  
**Location of Incident:** FRANKLIN LAKES, NJ

**NHTSA Summary:**

2006 TOYOTA AVALON - DURING FIRST YEAR OF OWNERSHIP, VEHICLE ENGINE REVVED STRONGLY WHILE APPLYING THE BRAKE WHILE GOING ABOUT 30 MPH. THE CAR SOUNDED LIKE IT WANTED TO GO 60 MPH OR MORE AND LEACHED, BUT I WAS ABLE TO STOP IT BY PRESSING HARDER ON THE BRAKE THIS HAPPENED ON 2 OR 3 OCCASIONS. AT FIRST I THOUGHT I WAS JUST NOT USE TO THE VEHICLE AND HIT THE BRAKE AND GAS PEDAL TOGETHER, BUT I HAD SERIOUS DOUBTS. I NOW REALIZE I WAS EXPERIENCING THE CURRENT PROBLEM. IT ONLY HAPPENED DURING THE FIRST YEAR OF DRIVING AND HAS NOT HAPPENED TO ME SINCE. I DOUBT THIS WAS DUE TO A STUCK PEDAL, BUT SOME ELECTRONIC ISSUE IS AT FAULT (PERHAPS THE CRUISE CONTROL SYSTEM).

C-858

PROBLEM OF UNINTENDED ACCELERATION. WE HAVE A 1995 PREVIA. ABOUT 3 YRS BACK THE VAN WOULDA ACCELERATE AT ITS OWN. LUCKILY WE DID NOT HAVE ANY ACCIDENTS. FIRST MY WIFE NOTICED IT. THEN I STARTED DRIVING THE VAN AND NOTICED IT TOO. SCARED US, REALLY SCARY. I HAD TO PRESS ON BRAKE PEDAL FORCEFULLY TO SLOW DOWN AND STOP. TOOK IT TO LANSING TOYOTA DEALER. THE HEAD ENGINEER THOUGHT IT WAS ONE KIND OF SENSOR WHICH WAS ABOUT \$350.00. ONCE IT WAS REPLACED, IF IT STILL DID THE SAME, HE WOULD REPLACE ANOTHER SENSOR THAT WOULD COST \$600.00. WE FIRST REPLACED THE FIRST SENSOR AND STILL IT WOULD ACCELERATE ON ITS OWN. SO WE ENDED UP REPLACING THE OTHER SENSOR AND THAT SOLVED THE PROBLEM. WE HAVE NOT HAD ANY UNINTENDED ACCELERATION PROBLEM SINCE THEN. WE NEVER REPORTED IT 3 YRS AGO (THOUGH WE WERE TOLD TO) AS WE THOUGHT WITH AGING OF THE VEHICLE IT COULD CAUSE THESE KIND OF PROBLEMS AND NOT BE NECESSARILY DUE TO MANUFACTURING DEFECTS. BUT READING ABOUT OTHER TOYOTA CUSTOMERS PROBLEMS WE DECIDED TO REPORT IT NOW AS IT MAY HELP OTHER CUSTOMERS/KEEP THEM SAFE. WE HAVE MOST OF THE RECORDS RELATED TO ABOVE REPAIRS AT SPARTAN LANSING TOYOTA. IF YOU NEED MORE INFORMATION PLEASE LET US KNOW. THANKYOU.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:**  
**Date of Incident:** 20070312  
**Vehicle:** 2004 Toyota SIENNA  
**Location of Incident:**

**NHTSA Summary:**

**Additional Summary:**

I went into parking lot and placed my foot on brake so that this Sienna stopped at the parking lot and I tried to shift gear to P position but suddenly this car jumped over raised pedestrian road and ran into shop and crashed. I tried to step on brake but no use to stop such monster power. Lucky enough nobody injured but left huge property damage. I called Toyota dealer to report this serious car problem but dealer is not interested to hear "sudden acceleration problem" but just ask me to bring body shop to fix the car damage first (interested in money making, not the safety of car) and going to check the car later. (I do not expect that Toyota admits the car problem and pay all the damage.) Fixing out side of car is not important to me, I want to know Toyota can see the problem and able to fix... How can I drive this monster car again... to seek another victim...

**Toyota ID Number:**  
**NHTSA ODI Number:** 10308038  
**Date of Incident:** 20070312  
**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** SAN ANTONIO, TX

**NHTSA Summary:**

I PURCHASED A USED TOYOTA CAMRY, 2003 MODEL, FROM A SAN ANTONIO, TEXAS CAR DEALER IN JANUARY, 2007. AT THE TIME THE CAR HAD ABOUT 103,000 MILES. I WAS DRIVING ON THE HIGHWAY AT ABOUT 65 MILES PER HOUR WHEN SUDDENLY THE CAR'S ENGINE REVVED UP. THERE WAS A EASILY PERCEPTIBLE JOLT AND THE VEHICLE ACCELERATED BY ITSELF. ABOUT 2-3 SECONDS LATER I STEPPED ON THE BRAKE PEDAL, VERY HARD. THE CAR ACCELERATION RATE WENT SLIGHTLY DOWN, ENGINE RPM'S STILL HIGH, AND I COULD BARELY KEEP CONTROL OF THE CAR, SO I BECAME CONCERNED (ALMOST FEARED) OF LOSING CONTROL OF THE VEHICLE. AFTER ABOUT 30-40 SECONDS, RPM'S WENT BACK TO MORE NORMAL LEVELS, ALTHOUGH THE VEHICLE ENGINE WAS STILL ACCELERATED. AT THAT MOMENT I WAS DRIVING AT ABOUT 65 MILES PER HOUR AND IF I HAD LET GO ON THE BRAKE THE CAR WOULD HAVE ACCELERATED ON ITS OWN.

C-859

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AFTERWARDS, AND FOR ABOUT 15 MINUTES (15-16 MILES) I TOOK MY FOOT OFF THE BRAKE AND GAS PEDALS AND THE CAR CRUISED ON ITS OWN AT ABOUT 65 MPH. I FINALLY GOT HOME, PARKED THE CAR AND NEXT TIME I USED IT, EXPERIENCED NO PROBLEMS. I DON'T RECALL IF I HAD SIMILAR INCIDENTS LATER ON.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10322762  
**Date of Incident:** 20070313  
**Vehicle:** 1997 TOYOTA CAMRY  
**Location of Incident:** AVON, MA

**NHTSA Summary:**

ON MARCH 13, 2007 AT APPROXIMATELY 9:30 P.M. AS I WAS EXITING A PARKING LOT AND TURNED LEFT ON PAGE STREET IN STOUGHTON, MASS. MY 1997 TOYOTA CAMRY STARTED TO ACCELERATE. THERE WAS A CAR WITH TWO OCCUPANTS STOPPED AT A RED LIGHT APPROXIMATELY 1/5 OF A MILE IN FRONT OF ME. AS I ACCELERATED FASTER AND FASTER WITH MY 9 YEAR OLD GRANDDAUGHTER IN THE BACK SEAT I TRIED TO STOP. THE CAR STARTED TO SHAKE VIOLENTLY AND MY GRANDDAUGHTER STARTED TO SCREAM "GRAMS, WHATS WRONG WHAT'S WRONG" I KNEW I DIDN'T WANT TO HIT THE CAR IN FRONT OF ME AS THEY HAD NO IDEA I WAS SPEEDING TOWARDS THEM, AND I KNEW I WOULD SERIOUSLY HURT OR KILL THEM IF I HIT THEM AT MY ACCELERATED SPEED. SO AS I APPROCHED THE INTERSECTION I VEERED TO THE LEFT AS IT WAS AN INDUSTRIAL PARK AND MOST OF THE BUILDINGS WERE CLOSED, BUT I DIDN'T MAKE THE COMPLETE TURN AND HIT THE GUARD RAIL AND SMASHED THRU IT AND MY CAR GOT CAUGHT ON TOP OF AN FIRE HYDRANT AND STOPPED. I REMEMBER HITTING AND THEN EVERY THING WENT QUIET. MY GRANDDAUGHTER WAS SCREAMING AND I ASKED HER IF SHE WAS ALRIGHT. SHE WAS COHERANT AND THE TWO PEOPLE THAT WERE IN THE CAR AT THE LIGHT KNOCKED ON MY WINDOW AND CALLED THE POLICE. I WAS REMOVED FROM MY CAMRY BY THE FIRE DEPARTMENT AND TRANSPORTED TO THE HOSPITAL WHERE I STAYED FOR TWO DAYS. MY GRANDDAUGHTER WAS ALSO TAKEN TO THE HOSPITAL BUT RELEASED. NO ONE BELIEVED ME THAT I DID NOT ACCELERATE THE CAR MYSELF. THE INSURANCE INVESTIGATOR STATED THE GAS PEDAL WAS NOT STUCK AND THAT WAS THE ONLY THING THEY LOOKED FOR IN THE CAR. I WAS OUT OF WORK FOR THREE MONTHS. I ALMOST LOST MY HOME. ALL OF MY INSURANCE FORMS STATE THE ACCELERATION I EXPERIENCED INCLUDING THE POLICE REPORT MY CAR WAS DEEMED TOTALED. WHEN I WENT BACK TO THE SCENE OF THE ACCIDENT I REALIZED HOW LUCKY WE WERE THAT MY CAR WAS CAUGHT UNDERNEATH BY THE HYDRANT AS IT WAS HEADED INTO A VERY DEEP DROFF AND SURELY WOULD HAVE FLIPPED OVER AND DROPPED APPROXIMATELY 15 FEET. NOW WITH THE RECALL I AM VINDICATED BUT VERY ANGRY!!

**Vehicle:** 2007 TOYOTA TUNDRA  
**Location of Incident:** NORTH PORT, FL

**NHTSA Summary:**  
 I JUST NOTICED OTHERS HAD COMPLAINTS ABOUT THIS ISSUE TOO ON YOUR SITE. I BROUGHT IT TO THE ATTENTION OF THE DEALER AND THEY HAD NO FIX EXCEPT TO REMOVE ONE OR THE OTHER AL THOUGH THE STANDARD CLIP DOES NOT WORK WELL WITH THEIR MUDDER MATS. I WAS ENTERING THE HIGHWAY FROM THE RAMP AND PRESSED DOWN TO ACCELERATE TO MOVE INTO TRAFFIC AND THE TRUCK ACCELERATED AS HARD AND FAST AS IT COULD. I FOUND MYSELF HAVING TO WEAVE THROUGH TRAFFIC LIKE I WAS IN A NASCAR RACE. WHEN I FINALLY FOUND A CLEAR PATH TO THE SHOULDER I SWERVED ONTO IT AND SHUT THE TRUCK OFF. IT WOULD NOT SLOW DOWN AND I COULD NOT SHIFT INTO NEUTRAL. I HAD TO BE GOING ABOUT 60 AT THE TOP OF THE ONRAMP AND WELL OVER 100, PROBABLY FASTER. WHEN I FINALLY WAS ABLE TO SHUT IT OFF. I GOT OUT OF THE TRUCK TO TAKE A BREAK AND CALM DOWN AND UPON RETURNING TO THE TRUCK I NOTICED THAT THE "MUDDER MATS" I BOUGHT FROM A TOYOTA SITE SLIPPED FORWARD ENOUGH TO WEDGE ITSELF UNDER THE GAS PEDAL. I STAY AWARE OF THE POSITION OF THE MAT MORE FREQUENTLY NOW AND KEEP IT SLID BACK BUT THERE IS NO RESTRAINT FOR IT THAT WILL GO THRU BOTH THE FLOOR LINER THAT PROTECTS MORE OF THE FLOOR AREA AND THE MUDDER MAT ON TOP OF IT. I BOUGHT BOTH AT THE TUNDRA PARTS SITE. I HOPE THAT THERE WILL BE SOME WARNING FOR OTHERS MADE BIG AND DRAMATIC ENOUGH TO BRING ATTENTION TO THIS PROBLEM TO AVOID HAVING THIS HAPPEN TO ANOTHER. I WAS VERY LUCKY TO HAVE SURVIVED THIS. \*TR

**Date of Incident:** 20070318  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** PRAIRIE CITY, OR

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2007 TOYOTA CAMRY LE. WHILE DRIVING 65 MPH, THE CONTACT ACTIVATED THE CRUISE CONTROL. SHE ACCELERATED TO 75 MPH WHILE ATTEMPTING TO PASS A VEHICLE WITH THE CRUISE CONTROL STILL ACTIVATED. THE CONTACT ATTEMPTED TO DECELERATE BY TAPPING THE BRAKE PEDAL TO RELEASE THE CRUISE CONTROL. AFTER THREE TO FOUR ATTEMPTS, THE CRUISE CONTROL FAILED TO SHUT OFF. THE VEHICLE FELT AS IF IT WOULD ACCELERATE AND THE CRUISE CONTROL REMAIN ACTIVATED. THE VEHICLE BEGAN DECELERATING ONCE HER FOOT REMAINED ON THE BRAKE PEDAL. OTHERWISE, IF SHE WERE TO RELEASE THE PEDAL, THE VEHICLE WOULD ACCELERATE AGAIN. THE CONTACT PULLED OFF THE ROAD, APPLIED THE EMERGENCY BRAKE, AND SHUT OFF THE VEHICLE. WHEN SHE RESTARTED THE VEHICLE, IT BEGAN OPERATING NORMALLY, HOWEVER SHE DID NOT ACTIVATE THE CRUISE CONTROL AGAIN. THE TOYOTA DEALER COULD NOT LOCATE THE CAUSE OF FAILURE. A COUPLE OF WEEKS LATER, A MECHANIC INSPECTED THE VEHICLE AND ALSO FOUND NO FAILURE. THE CURRENT MILEAGE IS 16,700 AND FAILURE MILEAGE WAS 16,000.

**Vehicle:** 1999 TOYOTA AVALON  
**Location of Incident:** COLUMBUS, OH

**NHTSA Summary:**

AT ABOUT 5:00 P.M. MARCH 18, 2007, AS I WENT TO PICK UP MY 96 YEAR OLD MOTHER AT THE RETIREMENT COMMUNITY, I STOPPED MY 1999 TOYOTA AVALON UNDERNEATH THE DRIVE-THROUGH CANOPY TO WAIT FOR HER. AS I WAITED THERE, I NOTICED THAT A CAR HAD PULLED UP BEHIND ME AND WAS PREPARING TO DISCHARGE AN ELDERLY PASSENGER SO I PROCEEDED AROUND THE CIRCULAR DRIVE TO GET OUT OF THEIR WAY. AS I SLOWLY CIRCLED AROUND THE DRIVE BACK TOWARD THE ENTRANCE I NOTED THE OTHER CAR HAD CLEARED OUT. AS I COASTED TOWARD THE ENTRANCE I NOTED A

C-863

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SMALL GROUP OF PEOPLE ON THE SIDEWALK WALKING TOWARD THE ENTRANCE IN FRONT OF ME. AS I CONTINUED SLOWLY BACK TOWARD THE ENTRANCE, I FELT MY VEHICLE ACCELERATE VIOLENTLY TOWARD THE GROUP OF PEDESTRIANS. ENGAGING THE BRAKE PEDAL WITH BOTH FEET, I GRADUALLY BROUGHT MY VEHICLE UNDER CONTROL AND CONTINUED TO A SAFE STOP WHERE I SHUT OFF THE IGNITION. IT WAS A TERRIFYING FEELING TO FEEL THE SURGE OF POWER THAT I WAS BARELY ABLE TO CONTROL AND TO REALIZE THAT WITH THE PEOPLE WALKING IN FRONT OF ME I COULD HAVE INJURED OR KILLED SOMEONE. THE PEOPLE WERE ONLY ABOUT 30 FEET IN FRONT OF ME. I CALLED MY HUSBAND TO COME PICK UP MY MOTHER AND ME AS I WAS AFRAID TO DRIVE THE CAR. I REPORTED THE INCIDENT TO MY TOYOTA DEALER WHO SCHEDULED AN INSPECTION. THE SERVICE DEPARTMENT, AFTER CLASSIFYING THE INCIDENT AS UNINTENDED ACCELERATION, PROCEEDED TO CLEAN THE THROTTLE BODY, CLEAN THE FUEL INJECTORS, AND DE-CARBON THE COMBUSTION CHAMBERS. THE THROTTLE BODY HAD PREVIOUSLY BEEN SERVICED AT 45,900 MILES, (AN INTERVAL OF 43,240 MILES). A SERVICE INTERVAL OF 50,000 MILES IS RECOMMENDED BY THE TOYOTA DEALER. ALTHOUGH THERE WAS POTENTIAL FOR GREAT HARM TO PEDESTRIANS, THIS WAS THE ONLY INCIDENT OF UNINTENDED ACCELERATION THAT WE EXPERIENCED WITH THIS CAR DURING THE FOUR YEARS THAT I OWNED IT. ON FEB 13, 2008, I SOLD THE VEHICLE. \*TR

TOYOTA EXPLAINED THAT THESE RPM CONDITIONS WERE DUE TO NEW TECHNOLOGY IN AUTOMOBILES \*AK

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10307137  
**Date of Incident:** 20070320  
**Vehicle:** 1986 TOYOTA MR2  
**Location of Incident:** DIAMOND BAR, CA

**NHTSA Summary:**

I OWN AN 1986 TOYOTA MR2 WITH A 4AGE ENGINE AND MANUEL TRANSMISION. I WAS DRIVING AROUND THE NEIGHBORHOOD WHEN I APPROACHED A NEIGHBORHOOD INTERSECTION. THE ENGINE STARTED TO "REV" REALLY HIGH AND I PUT THE CAR INTO NEUTRAL. I SAT AT THE INTERSECTION FOR A WHILE TRYING TO FIND OUT WHAT THE PROBLEM WAS. THIS WAS THE FIRST AND ONLY TIME IT HAS HAPPENED TO ME. SO I STARTED TO JIGGLE THE LIMP GAS PEDLE. SOON AFTER I LOOKED IN THE ENGINE BAY AND HAD SEEN THAT A RUBBER PEICE WAS JAMED UNDER THE THROTLE LINKAGE. THE PEICE OF RUBBER WAS A CAP TO PREVENT WATER FROM GOING INTO AND RUINING THE THROTLE LINKAGE. I DROVE HOME AND LATER ON WENT TO A SPECIALIST THAT TOLD ME TO REMOVE THE RUBBER PEICE FROM LETTING THAT HAPPEN TO ME. I HOPE THIS INFORMATION CAN HELP, MAYBE THE NEWER TOYOTAS HAVE THE SAME PROBLEM. ANOTHER INCIDENT WAS WHEN I BROUGHT THE SAME VEHICLE TO GET IT SMOGED. ME

C-864

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AND MY MOM FINISHED AND LEFT TO GO HOME. WITHIN THE NEXT COUPLE OF INTERSECTIONS I LOOKED BACK AND NOTICED SPARKS SHOOTING UP FROM THE ENGINE BAY. I TOLD MY MOTHER WHOM DIDN'T BELIEVE METO STOP. THE CAR DIED IN THE MIDDLE OF THE INTERSECTION, THEN MY MOTHER AND I EVACUATED THE VEHICLE. THE ENGINE BAY BURST INTO FLAMES AND LUCKY THERE WAS A FIREDEPARTMENT NEAR BY. WE FOUND OUT THAT THE HOOD PROP HAD FALLEN ONTO THE BATTERY WHICH SHORTED OUT THE ELECTRICS AND CAUSED NEAR BY PLASTIC TO CATCH ON FIRE. THE REAR HOOD WAS RUINED, PAINT, WINDOW, WIREHARNES, AND OTHER PEICES. THE FIREDEPARTMENT SAID WE WERE LUCKY THAT THE FLAME DIDNT RUPTURE THE FUEL IN THE CAR. **NHTSA ODI Number:** 10189802  
**Date of Incident:** 20070322  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** KODAK, TN

**NHTSA Summary:**  
I PURCHASED A NEW 2007 TOYOTA CAMRY IN JUNE 2006. AFTER RETURNING THE CAR TO THE DEALERSHIP SEVERAL TIMES BECAUSE OF THE SLUGGISH ACCELERATION FROM A STOP WAS CONSISTENT AND THE PASSING GEAR DOWNSHIFT FELT DELAYED AS IF THERE WAS A COMMUNICATION LAG BETWEEN THE TCM AND ACTUAL SWITCHING OF THE SHIFT SOLENOIDS AT SPEEDS LESS THAN 50 MPH. THE CRUISE CONTROL WILL NOT SET SPEED. ON STEEPER GRADES AND ON THE INTERSTATE THE DOWN SHIFTS ARE VERY FREQUENT AND AT TIMES VERY DRAMATIC. WHEN CRESTING A STEEP HILL THE TRANSMISSION DOWN SHIFTS AT THE CREST AND TAKES 2 OR 3 SECONDS TO RELEASE THE THROTTLE, PICKING UP ANYWHERE FROM 10 TO 15 MPH AND I HAVE TO BREAK SUDDENLY IN ORDER TO SLOW THE CAR DOWN. I WAS TOLD BY TOYOTA REPRESENTATIVE THAT A TECHNICAL SERVICE BULLETIN CAME OUT IN SEPTEMBER OF 2006 FOR AN ECM CALIBRATION ENHANCEMENT TO SHIFTING PERFORMANCE AND SMOOTHNESS AND THIS NEW COMPUTER SOFTWARE HAD TO BE DOWNLOADED IN THE CAR AND THIS WOULD RECALIBRATE ECM (PCM) ENGINE & TRANSMISSION. THE  
**Additional Summary:**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

CATCHER TO THIS IS THAT THE CUSTOMER HAS TO REQUEST THIS DOWNLOAD BEFORE THE DEALERSHIP WILL FOLLOW THROUGH. IF YOU DONT KNOW ABOUT THE BULLETIN HOW CAN AN AVERAGE CUSTOMER REQUEST THIS? THE DOWNLOAD WAS PERFORMED ON THIS CAR BUT DIDN'T HELP ANY. THE DEALERSHIP TOOK THE CAR BACK AND I WAS GIVEN A NEW ONE IN DEC. 2006. SAME THING WITH THIS ONE. I HAVE BEEN THROUGH NATIONAL CENTER FOR DISPUTE SETTLEMENT WITH AN APPOINTED ARBITRATOR WHO HAD THE CAR INSPECTED BY AN ASE INDEPENDENT INSPECTOR. HE AGREED WITH THE ABOVE BUT IN CONCLUSION STATED THAT TOYOTA SHOULD "DIAGNOSE AND REPAIR AS NECESSARY". I FEEL THAT THIS IS A NO WIN SITUATION FOR THE CONSUMER AND TOYOTA KNOWS ALL ABOUT THE PROBLEMS BUT JUST DOESN'T KNOW HOW TO CORRECT THEM. BECAUSE OF THE LACK OF SAFETY THE "LEMON LAW" SHOULD BE PUT INTO EFFECT AND THESE CARS RECALLED. TOYOTA IS NOT GOING TO TAKE RESPONSIBILITY UNLESS FORCED. THIS IS MY FIRST AND LAST TOYOTA VEHICLE. \*JB

RNT#070501-000122  
Email states: "Cold Start Revolutions  
I have a 2007 Tacoma. At cold start, the engine revs to 2000, drops to 1700, then after a few seconds drops to about 1400 then after about 30 seconds drops to about 1000. Is this normal? It seems awfully high and noisy and a waste of gas."

\*\*\* SUBCASE 200705030575-1 CREATED 05/03/2007 11:04:09 AM JFewel  
Thank you for contacting Toyota Motor Sales, U.S.A., Inc.  
We apologize for your concern regarding your 2007 Tacoma's idle speed.  
While we cannot diagnose your Tacoma based on your email, and as you have not mentioned any warning lights coming on, your concern may be related to the way the engine alters its idle speed when cold, to allow the emissions system to warm up faster, which becomes more pronounced as the weather turns colder. By way of background, each year the government slightly tightens emissions standards so that vehicles emit less pollution.  
Modern vehicles have a very sophisticated emissions system that only works when hot or warm. If the vehicle is cold, more emissions are produced.

C-869

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

The only way to heat the emissions components quickly up so they work properly is to run the engine faster when it is cold. The government wants engines and emissions systems to warm up as soon as possible so the emissions control systems work efficiently as soon as possible after a cold start.  
You will notice that the engine will run fast when cold, (engine RPM higher) until the emissions components are properly warmed. By forcing the idle speed to stay higher, the engine turns faster and warms up more quickly than if it is allowed to idle normally as it does when it is warmed up. To accommodate the higher RPMs when the engine is cold, Toyota specifies the following engine oil, which aids cold start-up and high RPM in the cold engine:  
Oil grade:  
API grade SL "Energy/Conserving" or ILSAC multigrade engine oil Recommended viscosity:  
SAE 5W/30  
SAE 5W/30 is the best choice for good fuel economy and good starting in cold weather.  
Toyota values you as a customer, and we appreciate this opportunity to answer your question!

10/30/2007 12:01 PM  
Email verbatim:I have a 2007 Tacoma, at start up the engine ROARS. EVERYBODY turns to look at the truck thinking "why is he racing his engine like that?" In the morning, it's so noisy it wakes the whole family up. If I had known it was going to be that noisy, I NEVER would have bought one. Isn't there anything that can be done about the very excessive noise? If not, I'm going to trade it in for a Honda Ridgeline and never buy another Toyota.

nr states:Mr. Ohearn, We apologize for the concern you are experiencing with your engine. In order to assess if the sounds coming from your engine are normal, your 2007 Tacoma will need to be inspected. We recommend you discuss the condition further with Sandra Spence, the Customer Service Manager at Both Toyota, as their technicians are specifically trained in the diagnosis and repair of Toyota vehicles. If your Toyota dealership has already inspected your vehicle and found it to be operating normally, we would concur with their findings. Your email has been documented at our National Headquarters

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** HUNTLEY, IL

**NHTSA Summary:**  
I AS PULLING INTO A PARKING SPACE, CAR ACCELERATED - JUMPED A CURB, HITTING A TREE AND BROKE MY NOSE,AND DAMAGED THE WHOLE FRONT OF MY CAR. ON JUNE 27, 2009 I WAS PULLING INTO A PARKING SPACE AGAIN, CAMRY ACCELERATED HITTING THE SUV IN FRONT OF MY CAR. TOOK IT IN TO PAULY TOYOTA IN CRYSTAL LAKE, IL AND THEY SENT ME AWAY SAYING THERE IS NOTHING WRONG WITH MY 2007 CAMRY. I ALSO HAD TWO VERY NEAR ACCIDENTS, BUT I WAS ABLE TO STOP IN TIME. I AM DEATHLY AFRAID TO DRIVE THIS CAR. I DONT KNOW WHEN IT WILL ACCELERATE AGAIN. AND THE DEALER REFUSES TO HELP ME OUT. PLEASE HELP ME! \*TR

**Vehicle:** 2006 TOYOTA CAMRY  
**Location of Incident:** WESLEY CHAPEL, FL

**NHTSA Summary:**  
MY TOYOTA CAMRY 2006, PURCHASED ON 3/29/06 WAS INVOLVED IN TWO MAJOR ACCIDENTS AND IT WAS TOTTALLED AFTER THE SECOND MAJOR ACCIDENT WHICH OCCURRED ON 3/30/07. ON THE FIRST MAJOR ACCIDENT, MY WIFE WHO WAS DRIVING THE VEHICLE, TRIED TO STOP THE VEHICLE AT THE SIGNAL, INSTEAD IT RACED FORWARD ON ITS OWN AND HIT ANOTHER VEHICLE. ON THE SECOND MAJOR INCIDENT, AFTER STOPPING THE CAR AND ALLOWING ANOTHER CAR TO PASS ON THE SAME ROAD IN THE OPPOSITE DIRECTION, SHE MADE A LEFT TURN AND THE CAR ACCELERATED UNCONTROLLABLY AND HIT A BIG TREE STANDING AT AN ELEVATED PART OF THE ROAD. BY LOOKING AT THE SCENE ANYBODY CAN COME TO THE CONCLUSION THAT SOME KIND OF MALFUNCTIONING OF THE ACCELERATION MECHANISM HAS HAPPENED. IN BOTH OF THESE MAJOR ACCIDENTS, NONE OF THE AIR-BAGS DEPLOYED. THE SAME CAR HAD ANOTHER SIMILAR INCIDENT BUT NO PROPERTY WAS DAMAGED AND THEREFORE, THAT INCIDENT WAS NOT REPORTED TO POLICE BUT A CO-WORKER DROVE THE VEHICLE OUT OF THE RETAINING POND. IN THIS INCIDENT, MY WIFE AFTER PARKING THE CAR, TRIED TO PULL IT A LITTLE FURTHER AND THEN THE CAR JUMPED ACROSS THE CONCRETE BUMP AND FELL INTO THE RETAINING POND. LUCKYLY THERE WAS NO WATER.

\*\*\* PHONE LOG 04/26/2007 09:29:37 AM LHHeyn Action Type: Outgoing call  
LM for SM George Schauman to fup on the cust concerns. The SM sts that the Diagnostic Specialist Dave test drove the veh with the cust and inspected the veh and adv that the veh was operating as designed at the time it was inspected. Compared the veh to another veh and sts that the veh operated the same. SM sts that he doc the cust concerns and reiterated the cust warr. The SM sts that the cust adv the he was concerned b/c of info he read on the internet. The SM sts that the cust returned the loaner and picked up his veh 4/25. I adv that I read contact the cust to fup.

\*\*\* PHONE LOG 04/26/2007 10:25:55 AM LHHeyn Action Type: Outgoing call  
Contacted the cust to fup on his concerns. Cust sts that the veh was inspected but his concerns are still there. The cust sts that he is not comfortable with the veh. Cust sts that when he presses the brakes he can feel the veh braking. The cust sts that he feels a difference between 300 to 500 RPM's and sometimes between 1100 to 1300 RPM's. The cust sts that he feels that the veh surges as well. He sts that he also feels the veh hunting for gears. The cust sts that the dlr inspected the veh and compared the veh with similar veh. The cust sts that he still feels the same issue and feels that the issue has not been resolved to his satisfaction. The cust sts that he test drove the veh with the DS and sts that they test drove the veh on the freeway and std that the other veh drove differently than his veh. The cust sts that the DS kept the veh and inspected the veh. The cust sts that he was told by the DS that the veh may need a new trans. The cust sts that then two days later after the inspection took place he was told that the veh was fine. The cust sts that he is concerned. Cust sts that this is his first Lexus. Cust sts that the RPM's fluctuate and jump back and forth. The cust sts that he doesn't understand why there was a difference between the two veh. The cust sts that the sales person contacted him to ask if the DS inspected the veh. The cust sts that the sales person adv that the cust concerns were doc in the cust service history. The cust sts that the mileage is the same - 11 miles and feels that the dlr didn't test drive the veh again after they test drove the veh together. The cust sts that he is disappointed in the performance of the veh. The cust sts that his family owns seven Toyota veh and none of them perform this way. The cust sts that he is concerned about his safety and is afraid that he may rear end somebody. The cust sts that he purch the veh on 4/16 and is very disappointed. Cust sts that he drives back and forth from Kentucky to the east coast b/c of work. The cust sts that his main concern is with safety and wants to know why the veh is hunting for gears. The cust would like to have another dlr inspect the veh. The cust sts that he is so concerned b/c he commutes 750 miles each way every week. Cust sts that he loves the veh and is just concerned about the safety of his particular veh. I apol for the cust concern and adv that I would be happy to asst the cust in scheduling an appt at the dlr of his choice. I adv the cust that I have doc his concerns at HQ and adv that we are happy to asst in any way that we can. I std that the diagnosis may be the same at Lexus of Nashville but adv that if that if a second inspection will provide piece of mind to the cust then he is certainly entitled to have the veh inspected at another dlr. Cust understood. Cust adv that he would like to have the veh inspected at Lexus of Nashville. Harold, at Lexus of Nashville in Brentwood at Exit 69, scheduled an appt for the cust at 3:00 PM 4/27. James Abert is the service consultant. Ronny Travis is the DS and he will test drive the veh with the cust 4/27. I adv the cust that I will be out of the office on 4/27 but adv that I would fup with him on 4/30. Cust satis.

**Date of Incident:** 20070401

**Vehicle:** 2005 LEXUS ES330

**Location of Incident:** HAWTHORNE, NJ

**NHTSA Summary:**

2005 LEXUS ES330. HESITATION & STUMBLING ON ACCELERATION. ALSO TRANSMISSION WILL NOT DOWNSHIFT. THIS IS A WELL DOCUMENTED PROBLEM WITH THE 2005 MODEL YEAR ES330. THERE WAS ONE REVISION OF TRANSMISSION SOFTWARE/FIRMWARE PROVIDED BUT IT DID NOT FIX THIS PROBLEM. AFTER SEVERAL COMPLAINTS THE LEXUS DEALER STATED "THERE'S NOTHING MORE WE CAN DO." SEVERAL INTERNET POSTINGS SUGGEST THAT THIS "DELAY" OR HESITATION IS DESIGNED IN. ALSO, IF WHILE ENTERING A HIGHWAY, FOR EXAMPLE, THE GAS PEDAL IS DEPRESSED, RELEASED AND DEPRESSED AGAIN THERE IS A MUCH LONGER 2-3 SECOND DELAY UNTIL POWER IS DELIVERED AND TO GET PROPER UPSHIFTS AND DOWNSHIFTS I HAVE TO SHIFT THE AUTOMATIC TRANSMISSION MANUALLY. THE LEXUS DEALER WAS/IS VERY FAMILIAR WITH THIS PROBLEM BUT HAS NO FIX BEYOND WHAT WAS PROVIDED FOR BACK IN 2005 BY LEXUS. THIS SHOULD BE FURTHER INVESTIGATED ALONG WITH THE CURRENT CROP OF TOYOTA/LEXUS THROTTLE PROBLEMS. THANKS!

**NHTSA Summary:**

\*\*\* PHONE LOG 07/18/2007 08:57:44 AM JSugar

Caller states: Concerned about performance of transmission. Fls like trans has mind of its own. When coming to intersection slows down veh, steps on gas a bit & trans drops to very low gear, engine revs, pauses, and then lurches forward. Took veh to dlr for 5k mile svc who advd concern happening on tacoma & camry's. Sts 90% of time veh works fine but in slow speed (notices when cornering) veh drops to low gear & rpm's jump up. Never sure what veh will do...

\*\*\* NOTES 07/18/2007 08:57:44 AM JSugar

Fls like veh trying to make the decision & control rather than let driver decide. Asked svc people if trans could be adjusted but told nothing could be done. Sts dlr personnel have been responsive & helpful.

\*\*\* CASE CLOSE 07/18/2007 08:58:17 AM JSugar

NCR apol & thanked cust for documenting concern. NCR advd no ssc's for veh @ time but cust would be advd of ssc's for veh. NCR advd case #.

**Date of Incident:** 2007 TOYOTA RAV4

**Vehicle:** 2007 TOYOTA RAV4

**Location of Incident:** RED OAK, IA

**NHTSA Summary:**

TL\*- THE CONTACT STATED THAT WHEN THE 2007 TOYOTA RAV4 WAS TEST DRIVEN ON JANUARY 3, 2007 THE ACCELERATION AND CONTROL ON THE VEHICLE WAS NOT STABLE. AT TIMES THE VEHICLE ACCELERATED ABRUPTLY EVEN IF THE ACCELERATOR WAS SLIGHTLY DEPRESSED. THREE WEEKS AFTER THE VEHICLE WAS PURCHASED HE NOTICED THAT WHEN DEPRESSING THE ACCELERATOR PEDAL THE VEHICLE WOULD ACCELERATE, BUT IT WOULD NOT REACH THE DESIRED SPEED. THEN AFTER A FEW SECONDS THE VEHICLE WOULD ACCELERATE AGAIN. THE CONTACT STATED THAT WHEN TURNING CORNERS WITH THE ACCELERATOR WAS DEPRESSED THE VEHICLE WOULD SPEED UP. IT REMAINED STEADY FOR A FEW SECONDS AT A CONSTANT SPEED THEN IT PROCEEDED TO ACCELERATE ABRUPTLY. THE CONTACT STATED THAT WHEN DRIVING ON THE HIGHWAY IF ANOTHER VEHICLE SLOWED DOWN IN FRONT OF THE CONTACTS VEHICLE, TRYING TO SPEED UP AGAIN WAS ALSO A PROBLEM. THE VEHICLE ACCELERATED AND STAYED STEADY AT ANY GIVEN SPEED, BUT THEN AFTER A FEW SECONDS IT WOULD ACCELERATE TO A HIGHER SPEED WITHOUT WARNING. THE CONTACT TOOK THE VEHICLE TO THE DEALERSHIP, AND WAS TOLD THESE VEHICLES DID NOT HAVE A CABLE GOING FROM THE GAS PEDAL TO THE MECHANISM THAT GIVE GAS TO THE VEHICLE. THIS SYSTEM WAS ELECTRIC IN THE 2007 MODELS. THE FAILURE MILEAGE WAS 1,500, AND THE CURRENT MILEAGE WAS 3,500. \*AK UPDATE 5/3/07\*TR

**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** SPARKS, NV

**NHTSA Summary:**

IN APRIL 2007 I HAD AN ACCIDENT WITH MY 2003 TOYOTA CAMRY. I WAS BACKING OUT OF A PARKING SPOT AND PUT THE CAR IN DRIVE, IT ACCELERATED GREATLY. I PUT ON THE BRAKES AND IT WOULD NOT STOP. I HIT ANOTHER CAR AND A FENCE BEFORE I COULD THROW IT INTO PARK AND STOP IT. HAD I GONE THRU THE FENCE, I WOULD HAVE GONE INTO A DEEP Ravine AND I WOULD NOT BE HERE TO TELL THE STORY. I TOLD THE INSURANCE COMPANY THAT DAY THAT THERE WAS SOMETHING WRONG WITH THE CAR, IT WOULD NOT STOP. I TOLD THEM THEY SHOULD CONTACT TOYOTA ABOUT IT. THEY TOLD ME NOT TO WORRY, THEY WOULD COVER THE DAMAGES - AROUND \$6000. I TOLD THE GARAGE THAT REPAIRED THE CAR THAT IT WOULD NOT STOP. HE SAID I HAD TO HAVE HAD MY FOOT ON THE ACCELERATOR AND NOT THE BRAKE. NO I DID NOT HAVE MY FOOT ON THE ACCELERATOR AND IT TOLD HIM SO. I TOLD CARSON CITY TOYOTA SERVICE MANAGER THAT SOMETHING WAS WRONG WITH THE CAR AND LATER WHEN RECALLS STARTED, AGAIN TOLD HIM. HE SAID I COULD NOT PROVE IT. HAD ANYONE BEEN LISTENING TO ME 3 YEARS AGO, LIVES MIGHT HAVE BEEN SAVED. I AM STILL ANGRY ABOUT IT AND AM LOOKING TO REPLACE THE CAR AS SOON AS I CAN. \*TR

**Additional Summary:**

**NHTSA ODI Number:** 10312132  
**Date of Incident:** 20070410  
**Vehicle:** 2006 TOYOTA PRIUS  
**Location of Incident:** FRONT ROYAL, VA

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2006 TOYOTA PRIUS WHICH WAS PURCHASED IN SEPTEMBER 2006. HE STATED THAT WHILE DRIVING AT SPEEDS OF LESS THAN 40 MPH APPROACHING A STOP SIGN HE REMOVED HIS FOOT FROM THE ACCELERATOR PEDAL, INSTEAD OF SLOWING DOWN THE VEHICLE MAINTAINED THE SPEED IT WAS TRAVELING. HE THEN DEPRESSED THE BRAKE PEDAL AND THE BRAKES WOULD NOT RESPOND. THERE WAS NO RESISTANCE IN THE BRAKE PEDAL AND IT THEN IT EXTENDED TO THE FLOORBOARD. THE SPEED DECREASED SLOWLY AND HE CONTINUED TO PUSH THE BRAKE PEDAL INTO THE FLOORBOARD UNTIL THE VEHICLE EVENTUALLY CAME TO A STOP. THE DEALER ADVISED HIM THAT THERE WAS NOTHING WRONG WITH THE PEDAL OR THE BRAKES AND THAT HE SHOULD REMOVE THE FLOOR MATS FROM THE VEHICLE. THE FLOOR MATS WERE NOT CLOSE ENOUGH TO THE BRAKE OR ACCELERATOR PEDAL. WHEN THE FAILURE OCCURRED, NO REPAIRS HAVE BEEN MADE TO THE VEHICLE. ON TWO ADDITIONAL OCCASIONS, THE CONTACT EXPERIENCED THE SAME FAILURE. HE ALSO RECEIVED A LETTER FROM TOYOTA IN REGARDS TO A RECALL CAMPAIGN ID NUMBER: 09V388000, VEHICLE SPEED CONTROL ACCELERATOR PEDAL, HOWEVER, HE WAS NOT AWARE IF HIS VEHICLE WAS INCLUDED IN THE RECALL OR NOT. THE VIN WAS NOT ACCEPTED. THE FAILURE MILEAGE WAS UNKNOWN AND THE CURRENT MILEAGE WAS APPROXIMATELY 70,000.

**Vehicle:** 2007 TOYOTA AVALON  
**Location of Incident:** URBANDALE, IA

**NHTSA Summary:**

WE HAD A DRIVING INSTRUCTOR CONDUCTING A CLASS USING THE 2007 AVALON. THE INSTRUCTOR WAS DRIVING AND ACCELERATED TO PASS A VEHICLE AT APPROXIMATELY 35 MPH AND THE ACCELERATORS STUCK AND THE CAR REACHED 8000+ RPMs THE INSTRUCTOR HAD TO ENGAGE THE BRAKE AND PUT THE CAR IN NEUTRAL AND THE CAR WOULD NOT TURN OFF, USING THE PUSH BUTTON START. IT FINALLY TURNED OFF AFTER NUMEROUS TRIES ON THE PUSH BUTTON. ONCE THE MOTOR TURNED OFF THE ACCELERATOR THEN CAME UP SLOWLY BY ITS SELF. WE CALLED THE DEALERSHIP, AND WERE TOLD IT MUST HAVE BEEN THE FLOOR MATS. THERE WERE THREE PEOPLE IN THIS CAR AND THEY ALL SAW THE SAME THING. THE FLOOR MATS HAD NOTHING TO DO WITH THIS PROBLEM. WE HAD THE DEALER GO OVER THE CAR AND AGAIN WERE TOLD THERE WAS NOTHING WRONG. WE HOWEVER DO NOT BELIEVE THEIR FINDINGS. \*AK

\*\*\* PHONE LOG 04/13/2007 11:31:59 AM RDong  
Caller states: On 3/16, she was leaving PA and the roads were icy. Traffic was very slow. She was driving at the time this happened. She was driving behind 3 trucks @ 45 mph and the spray behind the trucks was pretty bad. She adv she could not see very well so she passed the trucks. She accelerated & the veh took off. The CC was off, and the veh took off & she could not stop the veh. She was braking & she was still going 60 mph. She got around the trucks & cont'd...

\*\*\* PHONE LOG 04/13/2007 11:34:24 AM RDong Action Type: Incoming call  
Continued...into another lane and decided to take the exit & her foot was on the brake the entire time & she was still going 40 mph. She pulled over into a gravel lot & hit the parking brake. Her husband adv her smoke came out of the exhaust. She did not have any srvc on her cell phone. She cld 911 & was connected to a towing srvc. While waiting for the tow guy, she jiggled the gas pedal & it seemed to stick a little. The tow guy came & he mq if he could start the veh. The tow man started the veh & drove the veh onto the tow truck. She adv she has all weather floor mats. The veh was towed to St. Albans WV. The SM @ Love Lexus adv her that all weather mats were not supposed to be used together w/ the other mats on the veh. She adv when she got back from vacation she got a summary of what the dlr did & the dlr adv her there were no codes present. She adv she was not confident the issue arose b/c of the all weather floor mats. She took the veh to Germain Lexus & adv the dlr she was very concerned. Germain adv her they had an experience like this as well. She adv she is concerned b/c if it was the mat, she would not have any worry, but she cannot duplicate it. She adv she is still not over this. I apol for the experience & adv this could be very startling & scary to go through something like that. I apol & adv that Lexus is aware that if an all weather floor mat is put over an existing floor mat, it is possible something like this may occur. I adv we are actually in the process of sending customers letters about it as well. I adv if she'd like, I can fwd this to a dept specialist who can review w/ the dlr, but from the information provided, there were no abnormal codes stored after inspection by both Love & Germain Lexus. Cust adv she understood but would appreciate a fu to c/b. I adv I would fwd the req & it would be 2 B/D. Cust thanked for the attention to her cnrn.

**NHTSA Summary:**

WHILE MY 2005 TOYOTA CAMRY WAS IN DRIVE, WITH MY FOOT ON THE BRAKE, SITTING STILL, WAITING FOR MY WIFE TO GET IN THE CAR, THE CAR REVVED TO MAX RPMs WITH NO CHANGE OF MY FOOT POSITION. MY FOOT PRESSING FIRMLY ON THE BRAKE WAS NOT ENOUGH TO KEEP THE CAR FROM ACCELERATING FORWARD. I PUMPED THE BRAKE ONCE AT THIS POINT AND THE BRAKE PEDAL WENT ALL THE WAY TO THE STOP. I THEN JAMMED THE VEHICLE IN PARK, JUST BEFORE COLLISION. THE GAS PEDAL DID NOT MOVE DURING THIS INCIDENT. I REPORTED IT TO TOYOTA AND WAS TOLD THAT THEY WERE SORRY THAT MY FLOOR MAT HAD CAUSED A PROBLEM??? RE: INCIDENT: 090929-000573. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10312318  
**Date of Incident:** 20070415  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** ORLANDO, FL

**NHTSA Summary:**

MY 2007 CAMRY ON SEVERAL OCCASIONS DURING THE FIRST FEW MONTHS OF OPERATION IN APRIL AND MAY 2007 SURGED OR LUNGED WITHOUT CAUSE. THERE WERE NO INJURIES AND NO REPAIR, NO INCIDENTS OCCURRED IN THE PAST TWO YEARS. ONE INCIDENT OCCURRED WHEN STARTING UP FROM A STOP SIGN BESIDE SCHOOL CHILDREN WAITING AT A BUS STOP. ANOTHER INCIDENT OCCURRED WHEN I SLOWLY MANEUVERED TO PARK IN A TIGHT SPACE BETWEEN TWO CARS. BOTH DRIVING INSTANCES REQUIRED FINE CONTROL AND VERY LITTLE GAS. BOTH INSTANCES OCCURRED ON COLD MORNINGS, A SHORT DISTANCE AND A SHORT TIME AFTER STARTING TO DRIVE IN THE MORNING. THE CAR UNEXPECTEDLY REVVED LOUDLY AND LUNGED FORWARD, I BRAKED HARD, THEN IT SORT OF STALLED BECAME UNRESPONSIVE AND LAGGED BEFORE RETURNING TO NORMAL CONTROL. THESE INCIDENTS WERE SCARY, COULD HAVE CAUSED PERSONAL OR PROPERTY INJURY AND OCCURRED WITHOUT ANY KNOWN CAUSE. THE CAR SEEMED CONFUSED. THE OTHER PREDOMINANT DRIVER OF THE CAR HAD SIMILAR EXPERIENCES. MY CAR IS SUBJECT TO RECALLS. I HAVE REMOVED THE FLOOR MAT BUT NOT TAKEN IT FOR THE ACCELERATOR PEDAL REPAIR. I BELIEVE THE PROBLEM IS A COMPUTER GLITCH AND NOT THE FLOOR MAT OR THE GAS PEDAL. I RECEIVED A FLOOR MAT RECALL NOTICE EARLY IN OWNERSHIP, ON MY FIRST MAINTENANCE VISIT TO TOYOTA I WAS TOLD THAT MY FLOOR MAT WAS NOT THE DEFECTIVE ONE. SUBSEQUENT LETTERS HAVE SAID TO REMOVE THE MAT AND STATED THAT NO REPAIR IS READY, THEY WILL CONTACT ME. I TRIED TO CALL THE DEALER TWO WEEKS AGO TO ASK ABOUT A REPAIR AFTER NEWS REPORTS AND FURTHER RECALLS. MY CALL WAS PLACED ON HOLD FOR SO LONG, I HUNG UP AND HAVEN'T CALLED BACK. I THINK MY CAR HAS A POTENTIAL DANGEROUS PROBLEM BUT I DO NOT BELIEVE THAT TOYOTA IS CABLE OR WILL ADDRESS THAT PROBLEM AT THIS TIME. MY VIN NUMBER DOES NOT INDICATE MY CAR IS ELIMINATED FROM THE RECALL.

EASTBOUND AT AND THE INTERSECTION OF PLEASANTON ROAD HERE IN SAN ANTONIO, TEXAS. SHE WAS WAITING TO MAKE A RIGHT HAND TURN ONTO NORTHBOUND PLEASANTON ROAD. WHILE SHE WAS STOPPED A NORTHBOUND BICYCLIST TRAVELING ON THE SIDEWALK TO HER LEFT BEGAN CROSSING THE STREET. HE WAS RIDING UPON HIS BIKE AND WHEN HIS BIKE WAS RIGHT IN FRONT OF THE VEHICLE THE AUTOMOBILE LURCHED FORWARD AND KNOCKED HIM DOWN. MY WIFE HAD HER FOOT ON THE BRAKE HOWEVER; THIS INCIDENT OCCURRED VERY QUICKLY THAT SHE COULD NOT REACT FAST ENOUGH TO PREVENT THE AUTOMOBILE FROM HITTING THE BICYCLIST. THE BICYCLIST ASSURED MY WIFE THAT HE WAS NOT INJURED. HE HAD CHECKED HIS BICYCLE AND IT WAS NOT DAMAGED AND THAT THE POLICE DID NOT NEED TO BE CALLED. THE ACCIDENT SO UPSET MY WIFE THAT SHE ENDED GOING BACK HOME AND NOT GOING TO WORK THAT DAY. THE CONTACTED THE TOYOTA SERVICE TECHNICIAN ASSURED US THAT THIS ACTIVITY WAS NORMAL FOR TOYOTA'S. THIS IS WHY I AM REPORTING THIS PROBLEM. THIS PROBLEM NEEDS TO BE SURFACED AND ADDRESSED. I AM SURE THAT THERE ARE OTHER TOYOTA CAMRY OWNERS THAT ARE SUFFERING FROM THE SAME PROBLEM AS WE ARE. I HAVE TODAY CONTACTED TOYOTA CORPORATION HERE IN THE UNITED STATES AND THE COMPANY HAS NOT ADDRESSED MY CONCERN OR EVEN ACKNOWLEDGES RECEIVING MY COMPLAINT. THE BOTTOM LINE IS THAT I WANT THIS PROBLEMS FIXED. THANK YOU FOR YOUR ATTENTION. ARTHUR GALLEGOS

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** RIVERSIDE, CA

**NHTSA Summary:**

PURCHASED NEW 2007 TOYOTA CAMRY. SOON AFTER PURCHASE REALIZED THERE WERE A LOT OF ISSUES WITH THIS CAR, ONE BEING A STICKY GAS PEDAL. THAT WHEN ACCELERATING FROM A SLOW SPEED, ( FOR EXAMPLE, A YELLOW LIGHT), THE CAR BOGS DOWN THE PEDAL FEELS STICKY THEN KICKS IN REAL HARD AND THE CAR ACCELERATES FORWARD VERY FAST. THIS OCCURS ABOUT 2 TIMES A WEEK AND WE THOUGHT IT WAS JUST HOW THE VEHICLE WAS MADE. ON 01/23/2009 WE TOOK THE VEHICLE TO A TOYOTA DEALERSHIP FOR MULTIPLE ITEMS WITH ONE BEING THE STICKY PEDAL, AND ANOTHER HAPPENED TO BE A PINGING NOISE DURING ACCELERATION SUCH AS GETTING ON A FREEWAY WITH AN INCLINE. THE CORRECTION FOR THE STICKY PEDAL WAS " UNABLE TO VERIFY AND ADVISED THE CUSTOMER TO HAVE A THROTTLE

**C-891**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BODY AND FUEL INJECTION SERVICE \$99.95 + TAX" THE CORRECTION FOR THE ENGINE CLATTER NOISE WAS " PERFORMED A ECU MEMORY RESET RE PROGRAMMING. TRANSMISSION AND ENGINE IS WORKING PER FACTORY STANDARDS AT THIS TIME". THE ECU MEMORY RESET WAS THE ONLY WORK PERFORMED IN WHICH WE PAID \$85.00. AFTER LEAVING TOYOTA WE FOUND THAT THE PEDAL PUSHED DOWN VERY EASY AND SMOOTH, WITHIN A 2 WEEK PERIOD WHILE THIS LASTED WE NEVER HAD AN ACCELERATOR ISSUE. BUT AFTER 2 WEEKS THE PEDAL WENT BACK TO BEING STICKY AND HAVING ACCELERATOR ISSUES AGAIN. WE TOOK THE VEHICLE BACK TO TOYOTA AND TOLD THEM THAT THE ECU MEMORY RESET FIXED OUR PEDAL AND ASKED IF THEY COULD LOOK INTO IT. THEY DID NOT AND WE LEFT WITH A STICKY PEDAL STILL. NOW WITH THE INFORMATION IN THE MEDIA ABOUT THE STICKING ACCELERATORS, THE FLOOR MATS AND NOW THE WORN PEDAL ASSEMBLY. I BECAME CONCERNED BECAUSE THIS STARTED WHEN MY VEHICLE WAS BRAND NEW. I CALLED TOYOTA CUSTOMER SERVICE LINE AND LET THEM KNOW OF MY PROBLEM AND CONCERNS, THE REP TOLD ME TO CALL THE NEAREST DEALER AND MAKE AN APPOINTMENT FOR THEM TO LOOK INTO THIS, AND SUGGESTED THAT I DO NOT DRIVE THE CAR. THE DEALER WILL ONLY PERFORM THE RECALL WORK AND WHEN THEY GET THE TRAINING AND PARTS. \*TR

**NHTSA Summary:**  
PURCHASE 2007 TOYOTA CAMRY, APRIL 19, 2007 FROM KING TOYOTA, DEERFIELD BEACH, FLORIDA. ALMOST IMMEDIATELY THE CAR BEGAN HAVING SHIFTING PROBLEMS. IT HESITATED AND WHEN DRIVING AROUND 40 MILES AN HOUR WHEN THE GAS PEDAL WAS RELEASED, IT JERKED AND WHIPPED YOUR BODY. THEN, WHEN GIVING IT THE GAS, IT HESITATED AND THEN JERKED FORWARD. COMPLAINED AND COMPLAINED AND WAS TOLD THAT MAYBE WHEN I BROUGHT IT IN FOR ITS 3000 MILE CHECK-UP, TOYOTA WOULD HAVE A TECH BULLETIN FOR REPAIR. THE TECH BULLETIN WAS NOT AVAILABLE UNTIL AFTER I CONTACTED TOYOTA DIRECTLY AND WAS TOLD THAT I SHOULD REQUEST TECH BULLETIN U6606. I BROUGHT THE CAR TO THE DEALERSHIP AND A NEW CHIP WAS INSTALLED THAT SOLVED THE PROBLEM FOR A SHORT PERIOD OF TIME. ABOUT THE EARLY PART OF OCTOBER IT BEGAN TO CHANGE. IN ADDITION TO HESITATING AND JERKING, IT NOW KEEPS GOING AT 40 MILES AN HOUR EVEN WHEN THE FOOT IS TAKEN OFF OF THE GAS PEDAL. IT WILL KEEP GOING TWO OR THREE BLOCK FROM 40 MILES AN HOUR, SLOWLY DOWN TO 30 MILES AN HOUR. IN OTHER WORDS, WHEN YOU ATTEMPT TO SLOW DOWN BECAUSE OF TRAFFIC, YOU MUST PUT FULL POWER ON THE BRAKE PEDAL OR YOU WILL CONTINUE TO GO AT THE SAME RATE OF SPEED. VERY DANGEROUS AS WELL AS WEARING BRAKES MUCH FASTER THAN NORMAL. IT STILL HESITATES AND JERKS WHEN APPLYING THE GAS PEDAL BUT NOW, INSTEAD OF JERKING YOU WHEN RELEASING THE GAS, IT JUST KEEPS GOING. DEALER HAS NO ANSWER AND TOLD ME THAT THEY HAVE HAD COMPLAINTS LIKE MINE WITHOUT A SOLUTION. CAN'T TOYOTA BE PRESSURED INTO SOLVING THE PROBLEM. THE NEW CHIP MADE A DIRECT OPPOSITE SITUATION...JERKING THE CAR WHEN GAS RELEASED TO "FULL SPEED AHEAD". \*TR

**NHTSA Summary:**  
INTERMITTENTLY, BUT NOT OFTEN, WHEN TAKING MY FOOT OFF OF THE GAS, THE CAR WOULD INCREASE IN SPEED AND THE ENGINE WOULD SPEED UP, BUT WOULD QUIT WHEN I BRAKED. WHEN ACCELERATING TO PASS VEHICLES, I NOTICED THAT ON OCCASION THE ENGINE WOULD HESITATE AND THEN GRAB SUDDENLY AND THEN SHOOT OFF, BUT WOULD SLOW DOWN WHEN I TOOK MY FOOT OFF OF THE ACCELERATOR. ON APRIL 20 MY CAR HAD ABOUT 2,300 MILES ON IT. WHEN I GAVE THE CAR SOME GAS TO GET UP TO SPEED TO ENTER THE BUSY FREEWAY, AS SOON AS I DID THE ACCELERATOR LOCKED AND FELT LIKE IT WAS IN PASSING GEAR. IT WAS AT 85 MPH WHILE BRAKING AS I ENTERED THE FREEWAY. THE ENGINE WAS REVVING LOUDLY AFTER I GOT IT INTO

C-893

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

NEUTRAL. AFTER ABOUT +/- MILE, IT SLOWED ENOUGH SO I SHOVED IT INTO PARK BUT IT WOULD NOT SHUT OFF. AS IT FINALLY DID DISENGAGE, THE ENGINE WAS STILL REVVING AT A HIGH SPEED WHILE ENTIRE CAR SHUTTERED, SHOOK AND MADE LOUD NOISES. I KEPT MY FEET ON THE BRAKE WHILE I CALLED LEXUS 24 HOUR ROAD SERVICE. I WAS VERY LUCKY THAT NO ONE WAS INJURED. THE CAR HAS BEEN AT LEXUS FOR 11 DAYS AT THIS POINT. \*TR

**Date of Incident:** 20070501

**Vehicle:** 2006 TOYOTA CAMRY

**Location of Incident:** ESCONDIDO, CA

**NHTSA Summary:**

I HAD PULLED SLOWLY INTO A PARKING SPACE. I HAD MY FOOT ON THE BRAKE. I WAS STOPPED. I WAS PUTTING THE CAR INTO THE PARK POSITION WHEN THE CAR SUDDENLY SURGE FORWARD AT A HIGH RATE OF SPEED. MY FOOT WAS ON THE BRAKE THE ENTIRE TIME. THE CAR WENT OVER THE CEMENT BLOCK INTO THE PARKING SPACE, JUMPED OVER A CEMENT CURB ONTO A GRASSY CENTER ISLAND AND FINALLY STOPPED WHEN I HIT A TREE. I HAVE PICTURES OF SKID MARKS ON THE GRASSY AREA AND THE PAVEMENT TO SHOW THAT I HAD MY FOOT ON THE BRAKE AND I WAS TRYING TO STOP THE CAR. THE CAR WAS TOTALED, AND I SUSTAINED BRUISES FROM THE AIRBAG AND THE SEAT BELT. I CONTACTED TOYOTA. THEY SENT AN ENGINEER. TO INSPECT THE CAR. THE ENGINEER SAID THAT HE COULD NOT RECREATE THE PROBLEM AND NOTHING WAS WRONG WITH THE CAR. I KNEW THAT MY FOOT WAS ON THE BRAKE, NOT THE GAS PEDAL. EVEN IF IT WAS ON THE GAS PEDAL, I WAS PARKING AND CERTAINLY WOULD NOT HAVE STOMPED ON THE GAS PEDAL TO MAKE THE CAR SURGE OUT OF CONTROL AS IT DID. \*AK

**Toyota ID Number:**

**NHTSA ODI Number:** 10304982

**Date of Incident:** 20070501

**Vehicle:** 2007 TOYOTA TACOMA

**Location of Incident:** DAVIS, CA

**NHTSA Summary:**

ON TWO OR THREE OCCASIONS THE BRAKES WERE SOFT ON SLOW SPEED STOPS AT INTERSECTIONS. THE EXPERIENCE CAN BE DESCRIBED AS A ROLLING STOP. I HAD TO REALLY STOMP ON THE BRAKES TO GET THEM TO GRAB AND/OR COME TO A COMPLETE STOP. DEALER EXAMINED THE BRAKES AND FOUND NOTHING WRONG. BRAKES STILL DON'T FEEL NORMAL LIKE OTHER CARS; THEY SEEM OK, BUT BELOW AVERAGE. I'M STILL VERY CONCERNED OVER THE BRAKING ABILITY ON MY 2007 TOYOTA TACOMA AND WISH A INVESTIGATION TO SEE IF THERE IS A LINK TO ACCELERATOR/ELECTRONIC PROBLEM. FLOOR MAT WAS NOT AN ISSUE AT THE TIME.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THERE WERE THREE ONE-CAR CRASHES IN MY 2005 PRIUS, THE FIRST ON 1 MAY 2007, THE SECOND ON 16 NOV 2009, AND THE THIRD ON 1 DEC 2009. ALL WERE IN FORSYTH COUNTY, NC. THE FIRST WAS AN INEXPLICABLE CRASH INTO THE EXIT GATE FROM MY COMMUNITY. THE SECOND AND THIRD CRASHES WERE SUDDEN, UNCONTROLLABLE ACCELERATIONS INTO BRICK WALLS WHILE TRYING TO PARK THE CAR IN DESIGNATED, MARKED PARKING SPACES. THE FIRST CRASH CAUSED PERSONAL INJURY AND WAS REPORTED TO THE LOCAL POLICE. THE SECOND AND THIRD CRASHES WERE NOT. ALL THREE CRASHES CAUSED SIGNIFICANT VEHICLE DAMAGE. I BECAME AFRAID TO DRIVE THE CAR ANY LONGER, AND SO I TRADED IT IN TO THE LOCAL TOYOTA DEALER ON 1 DEC 2009 FOR A NEW 2010 PRIUS. I HAVE WRITTEN TO THE LIABILITY CLAIM DEPT OF TOYOTA, ASKING FOR COMPENSATION, BUT HAVE NOT RECEIVED ANY, AS OF THIS DATE (17FEB10). THE DATA BELOW REFERS TO THE FIRST CRASH. \*TR

**NHTSA Summary:**

A MONTH OR TWO AFTER I BOUGHT MY 2007 HIGHLANDER HYBRID IN MARCH OF 2007, I HAD TWO INCIDENTS WHERE MY CAR ACCELERATED FOR ME. BOTH TIMES I WAS ON THE FREEWAY, TRAVELING AT APPROXIMATELY 65 MPH. BOTH TIMES, I FELT A SURGE OF POWER FOR ABOUT 7 - 8 SECONDS. THE TWO INCIDENTS HAPPENED MAYBE A MONTH APART. I TOLD MY HUSBAND ABOUT IT AT THE TIME AND HE ASSURED ME IT WAS JUST BECAUSE I WASN'T USED TO MY NEW CAR. I KNOW FOR SURE THAT WASN'T THE REASON. ALMOST THREE YEARS LATER I HAVEN'T HAD ANY MORE SURGES BUT I DO HAVE TWO SMALL CHILDREN. I AM HYPER AWARE OF THE FACT THAT THERE IS SOMETHING WRONG WITH TOYOTA VEHICLES AND THEY HAVE YET TO FIGURE IT OUT. IF WE COULD AFFORD IT, WE'D GET RID OF THIS CAR IMMEDIATELY AND GET A NEW ONE. BUT WE CAN'T.

GST SPOKE TO CUSTOMER AND MADE ARRANGEMENTS TO HAVE FTS INSPECT VEHICLE FOR UNINTENDED ACCELERATION. FTS INSPECTED VEHICLE ON 5/16/07 AT LANDERS TOYOTA AND PERFORMED THOROUGH INSPECTION. UNABLE TO FIND ANY MANUFACTURING DEFECTS THAT WOULD HAVE CAUSED THE VEHICLE TO ACCELERATING ON ITS OWN. BRAKE FLUID LEVEL WAS FULL. BRAKE PEDAL HAD A NORMAL FEEL AND DIDNT FAIL WHEN STEADY PRESSURE APPLIED. THE BRAKES FUNCTIONED CORRECTLY AND HELD ENTIRE VEHICLE WHEN ACCELERATOR PEDAL WAS DEPRESSED. TIRES WERE IN GOOD SHAPE. VEHICLE WAS EQUIPPED WITH AFTERMARKET FLOOR MATS THAT WERE INSTALLED ON TOP OF REGULAR MATS. THE AFTERMARKET MATS WERE NOT ATTACHED WITH THE FLOOR CLIPS THAT HOLD MATS FROM SLIDING

C-900

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

FORWARD. ACCELERATOR PEDAL DID NOT BIND OR CONTACT ANYTHING WHEN DEPRESSED AND WHEN IT WAS RELEASED WOULD TURN TO ITS ORIGINAL POSITION. THE STEERING WHEEL TURNED FROM LEFT TO RIGHT WITHOUT ANY BINDINGS, OR TIGHT SPOTS.

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** TAMARAC, FL

**NHTSA Summary:**  
I OWN A 2007 TOYOTA CAMRY SE THE TRANSMISSION LAGS BEHIND THE ENGINE SOMETIMES & THEN DESPERATELY TRIES TO CATCH UP BY AGGRESSIVELY DOWNSHIFTING TO HIGH RPM'S(AROUND 4000 TO 4500). WHEN MAKING TURNS THE CAR LOSES POWER AND THEN SHIFTS ERRATICALLY TO RETURN TO SPEED. WHEN GOING UP A SLIGHT HILL THE PEDAL HAS TO BE PUSHED TO THE FLOOR TO MAKE THE CAR GET UP TO SPEED, AND THEN TAKES OFF LIKE A ROCKET. I AM NOT AN AGGRESSIVE DRIVER BUT THIS POWER TRAIN WANTS YOU TO DRIVE LIKE ONE. I HAD THE CAR BACK TO THE DEALER TWICE WITH NO CORRECTION, ALL THEY SAY IS SORRY THAT'S THE WAY IT IS DESIGNED. I FEEL THIS IS A SAFETY HAZARD DUE TO THE FACT THAT IT BOGS DOWN WHEN YOU DON'T WANT IT TO & THEN LURCHES FORWARD TO COMPLICATE MATTERS. I CAN'T UNDERSTAND TOYOTA ENGINEERS DESIGNED & MARKETED A POWER TRAIN THAT IS A POTENTIAL HAZARD TO THE PUBLIC AND THE DRIVERS WHO OWN THESE CARS. \*TR

**Additional Summary:**

**NHTSA ODI Number:** 10311149  
**Date of Incident:** 20070505  
**Vehicle:** 2005 TOYOTA PRIUS  
**Location of Incident:** AMHERST, VA

**NHTSA Summary:**  
I LOVE MY PRIUS BUT A DIFFERENT STORY HERE. I THINK. I BOUGHT A NEW 2005 TOYOTA PRIUS. WHEN IT WAS APPROXIMATELY 2 YEARS OLD WITH APPROXIMATELY 40 THOUSAND MILES ON IT (3 YEARS AGO) THE GAS PEDAL STUCK AND IT WAS NOT RELATED TO A FLOOR MAT. I WAS ACCELERATING GETTING UP TO THE 55MPH SPEED LIMIT WHILE ALSO CLIMBING A HILL GOING OUT OF TOWN INTO THE MOUNTAINS. WHEN I CRESTED THE HILL AND LET UP OFF THE GAS IT JUST KEPT GOING. IT WAS QUITE LUCKY THAT IT HAPPENED ON A STRAIGHTAWAY JUST BEFORE THE MOUNTAIN CURVES AND DROP OFFS. AS A LIFELONG PROFESSIONAL DRIVER WITH EXPERIENCE OPERATING JUST ABOUT ANYTHING MY FIRST LEARNED REACTION WAS TO DIG MY HEELS IN AND PULL

C-902

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THE FLOOR MAT BACK. IT'S HAPPENED TO ME IN OTHER VEHICLES. I GLANCED DOWN AND THERE WERE NO OBSTRUCTIONS AT THE PEDAL. MY SEVERELY DISABLED SON WAS WITH ME. AUTOMATICALLY, I STARTED KICKING THE GAS PEDAL. AFTER SEVERAL KICKS IT SLOWED. NO PROBLEM SINCE. NEVER REPORTED THE INCIDENT. JUST FIGURED A WEIRD GLITCH. HAD NOT TRIED BRAKES YET. NOR NEUTRAL. IT'S A DIFFERENT KIND OF CAR. A BIT SCARED TO TRY TO TURN IT OFF WHILE GOING DOWN THE ROAD. I HAD ALREADY SPOTTED A DECENT PLACE TO DITCH THE CAR WITH MINIMAL DAMAGE. I HAD REACHED 75 TO 80 MPH WHEN KICKING THE PEDAL STOPPED IT. IT'S A COMPUTER THING. \*TR

**Toyota ID Number:**  
**NHTSA ODI Number:** 10203253  
**Date of Incident:** 20070507  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** ANAHEIM, CA

**NHTSA Summary:**  
MY WIFE AND I PURCHASED A 2007 CAMRY LE, 4-CYLINDER, 5-SPEED FROM TOYOTA OF ORANGE IN ORANGE CALIFORNIA. EVER SINCE OUR TEST DRIVE WE'VE EXPERIENCED LACK OF ACCELERATION (HESITATION) FROM A STOP OR AFTER SLOWING DOWN TO TURN OR PROCEED, SHIFTING PROBLEMS (CONSTANT UP AND DOWN SHIFTING AT CERTAIN SPEEDS; CAR NOT SURE WHICH GEAR TO BE IN AND FEELS LIKE THE CAR IS SURGING) AND UNABLE TO USE THE CRUISE CONTROL DUE TO ACCELERATING TOO QUICKLY DUE TO DOWNSHIFTING AND THEN OVERSHOOTING THE SET SPEED. SOME OF THESE SYMPTOMS ARE SPORADIC; YOU NEVER KNOW IF THE CAR IS GOING TO MOVE OR NOT WHEN STEPPING DOWN HARD AND QUICKLY ON THE GAS PEDAL. SOMETIMES IT "RED-LINES" BEFORE ACCELERATING, OTHER TIMES THERE IS BARELY ANY RESPONSE AT ALL. REPORTED IT TO THE DEALER 3 TIMES, HAD THE SOFTWARE UPDATED WITHOUT NOTICEABLE IMPROVEMENTS. EG036-07 IS THE LATEST ECM UPDATE, WE WOULD NEVER HAVE PURCHASED THIS VEHICLE IF WE HAD ONLY RESEARCHED THE CAR BEFOREHAND ON THE INTERNET. ME AND MY WIFE COULD NEVER GET USED TO THE GAS PEDAL. BECAUSE THE CAR RESPONDED DIFFERENTLY EVERY TIME. ONE DAY MY WIFE CAME FROM WORK AND ATTEMPTED TO PARK THE CAR INTO A SPOT ON THE PARKING STRUCTURE, SHE PRESSED THE GAS PEDAL AND THE CAR ACCELERATED REALLY FAST DRIVING THROUGH THE WALL ALMOST INTO THE COMMUNITY POOL. I HAVE STOPPED MAKING PAYMENTS ON THE CAR SINCE THE CAR IS SITTING IN THE GARAGE AND VERY UPSET WITH TOYOTA SINCE I REPORTED THE PROBLEM TO THE DEALER 3 TIMES AND CALLED TOYOTA CORP ON THE PHONE AND RECEIVED NO HELP. \*JB

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2007 TOYOTA CAMRY. WHILE DRIVING 20 MPH AND ATTEMPTING TO STOP THE VEHICLE, IT ACCELERATED ON ITS OWN. THE CONTACT APPLIED THE BRAKE PEDAL AND THE VEHICLE BEGAN TO RESPOND NORMALLY. THE VEHICLE WAS TAKEN TO THE DEALER WHO STATED THAT THERE WAS NOTHING WRONG WITH THE VEHICLE. THE ACCELERATION OCCURRED ONCE AGAIN AND ONCE AGAIN THE VEHICLE WAS TAKEN TO THE DEALER WHO DIAGNOSIS INDICATED THAT THE CODE NEEDED TO BE RESET FOR THE TRANSMISSION. THE VEHICLE NO LONGER ACCELERATES ON ITS OWN. THE FAILURE MILEAGE WAS 4000 AND THE CURRENT MILEAGE WAS 10000. UPDATED 3/16/10 \*CN

**Vehicle:** 2003 TOYOTA COROLLA  
**Location of Incident:** WHEELING, WV

**NHTSA Summary:**  
OUR 2003 TOYOTA COROLLA HAS TWICE MYSTERIOUSLY ACCELERATED. FIRST IN '07 CAUSING EXTENSIVE DAMAGE TO AUTO AND PROPERTY. DEALER DIDNT TAKE SERIOUSLY AND CLAIMED DRIVER ERROR THAT HE HAD FOOT ON ACCELERATOR INSTEAD OF BRAKE. CAR WAS REPAIRED AND RETURNED. ON 1/11/10 IT ACCELERATED A SECOND TIME WHILE I WAS GOING DOWNHILL WITH FOOT ON BRAKE. STOPPED CAR BY THROWING INTO NEUTRAL. TOYOTA WAS NOTIFIED AND GIVEN CASE NUMBER 100115005. DEALER CHECKED CAR ON 1/15/10 AND COULD NOT DUPLICATE PROBLEM. HAVE DOCUMENTATION BUT ARE UNABLE TO CONTACT TOYOTA FOR FOLLOW-UP.

**Location of Incident:** LANCASTER, CA

**NHTSA Summary:**  
IN MAY 2007 I HAD A REAR END ACCIDENT WITH ANOTHER CAR WHERE MY CAR WOULD NOT STOP WHEN I PUT ON THE BRAKE. THE OTHER CAR MOVED FORWARD AND MY CAR STILL WOULD NOT STOP AND HIT IT AGAIN. IT FINALLY STOPPED WHEN I PUT IT IN PARK. IT SEEMED TO ME THE ACCELERATOR WAS OVERPOWERING THE BRAKE. IT HAPPENED ON TWO OTHER OCCASIONS. I HAVE TAKEN IT TO THE TOYOTA DEALERSHIP TWICE FOR IT TO INVESTIGATED, ONCE AFTER THE ACCIDENT AND AGAIN LAST YEAR. THEY COULD NOT DUPLICATE IT AND TOLD ME THE CAR USES DRIVE BY WIRE TECHNOLOGY AND IT WAS IMPOSSIBLE FOR WHAT I AM EXPERIENCING TO BE OCCURRING. NOW THE SERVICE MANAGER WILL NOT EVEN RETURN MY CALLS. CALLS TO TOYOTA CUSTOMER RELATIONS WERE MET WITH YOU NEED TO CALL SCION CUSTOMER RELATIONS AND WHEN THEY TRANSFER ME THE CALL DISCONNECTS. I OWN A 2006 SCION TC. I TOOK THE DRS. SIDE FLOOR MAT OUT LAST SUMMER AND NOW WITH ALL THE PRESS AND TOYOTA SAYING THERE IS NOTHING WRONG WITH MY CAR I AM AFRAID TO DRIVE IT. I OWNE MORE THAN IT IS WORTH, SO I AM FINDING DIFFICULTY IN EVEN REPLACING IT.

C-907

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

PURCHASE AND I WAS TOLD IT WAS NORMAL. HERE IS MY DESCRIPTION OF MY BRAKING PROBLEM. WHEN I AM TRAVELING ON THE HIGHWAY OR CITY DRIVING, WHENEVER I PUSH ON THE BRAKE PEDAL YOU CAN FEEL NORMAL BRAKING ALSO YOU CAN SEE THE DASH GAUGE NEEDLE POINTING TO THE BLUE AS IT RECHARGES THE BATTERIES AND THEN THE VEHICLE COMES TO A STOP. EVER SO OFTEN, WHEN I AM BRAKING I CAN FEEL THE VEHICLE LETTING UP ON THE BRAKING, HOWEVER I HAVE NOT DECREASED MY FOOT PRESSURE AND THE NEEDLE ON THE DASH GOES FROM THE BLUE TO NORMAL AND THE VEHICLE MOVES FORWARD WITH MOMENTUM AND I MUST INCREASE MY FOOT PRESSURE ON THE BRAKE PEDAL VERY QUICKLY TO RE-GAIN MY ORIGINAL BRAKING PRESSURE. THIS HAPPENS TO ME ABOUT ONCE A WEEK, AND I HAVE LOOKED A THE BATTERY STATUS AND IT SEEMS TO ME THAT THE BATTERY STILL NEEDS MORE CHARGING. IT WAS VERY SCARY AT FIRST BUT NOW I AM USE TO IT. I HAVE NO IDEA IF THIS IS NORMAL OR NOT, HOWEVER THE DESCRIPTION OF THE PRIUS PROBLEMS SOUNDS JUST LIKE MINE.

**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** TUCSON, AZ

**NHTSA Summary:**  
ABOUT 3 YEARS AGO, I EXPERIENCED A SUDDEN ACCELERATION IN MY 2005 TOYOTA CAMRY V6. IT WAS AN UNUSUALLY RAINY DAY IN SOUTHERN ARIZONA. AS I EXITED A FREEWAY OFF-RAMP TO COME TO A STOP, IT FELT LIKE THE ABS SYSTEM TOOK OVER THE BRAKING. MY FOOT WAS ON THE BRAKE PEDAL, BUT THE CAR BRAKED, THEN ACCELERATED RAPIDLY, FISHTAILING A BIT ON THE WET PAVEMENT. I PUMPED THE BRAKE PEDAL AND WAS ABLE TO STOP A FEW FEET PAST THE STOP SIGN. LUCKILY, THERE WERE NO OTHER CARS ON THE RURAL ROAD WHERE I EXITED--THE FRONT PART OF MY CAR WAS PAST THE STOP SIGN AND OUT IN THE ROAD FOR PERPENDICULAR TRAFFIC. I WAS PERPLEXED BY THE SHORT BURST OF ACCELERATION, BUT ATTRIBUTED IT TO THE ADVANCED BRAKING SYSTEM. I HAD NEVER HAD THAT TAKE CONTROL BEFORE. MAYBE THIS INFO CAN HELP IN YOUR CURRENT INVESTIGATION OF THE SUDDEN ACCELERATION IN TOYOTA CAMRYS. THIS WAS THE ONLY TIME I EXPERIENCED THE ACCELERATION. THE CAR HAS BEEN IN FOR ROUTINE MAINTENANCE. I ASKED MY MECHANIC TO CHECK THE BRAKES SINCE THE PEDAL SEEMS TO BE "SOFT"--IT GOES DOWN A BIT BEFORE ENGAGING THE BRAKES. MECHANIC FINDS NO PROBLEMS WITH BRAKES. TC

**Toyota ID Number:**  
**NHTSA ODI Number:** 10192351  
**Date of Incident:** 20070518  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** CENTRALIA, IL

**NHTSA Summary:**  
MY DAUGHTER AND FRIENDS WERE DRIVING IN MY 2007 LEXUS ES 350 ON A 2 LANE HWY. AS THEY APPROACHED A SPEED ZONE THE DRIVER NOTICED THE CRUISE CONTROL LIGHT WAS ON WITHOUT BEING ENGAGED. SHE TURNED IT OFF. IT CAME ON AGAIN. SHE TAPPED THE BRAKES TO TURN IT OFF AND THE CAR LURCHED FWD. SHE TRIED TO SLOW THE CAR BUT WHEN SHE BRAKED THE CAR ACCELERATED. SHE CONTINUED TO BRAKE BUT THE CAR KEPT SPEEDING UP. SHE SHIFTED THE CAR INTO NEUTRAL BUT THE CAR SPED UP. SHE TRIED THE EMERGENCY BRAKE, PUSHING THE START/STOP BUTTON, BUT

C-908

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THE CAR WOULD NOT TURN OFF. SHE KEPT REPEATING THESE ACTIONS BUT THE CAR CONTINUED OUT OF CONTROL. THE DRIVER WAS STANDING ON THE BRAKE WITH BOTH FEET TRYING TO STAY ON THE ROAD AS IT APPROACHED SPEEDS OF 90MPH WITH NO BRAKES. AS THEY APPROACHED A 4 WAY STOP THE FRONT PASSENGER SEAT DESPERATELY THREW THE CAR INTO PARK AT 90MPH. THE CAR LURCHED AND SKIDDED APPROX 150 FT TO THE SIDE OF THE ROAD. WHEN I ARRIVED AT THE SCENE I CALLED OUR SALESMAN TO INFORM HIM OF THE INCIDENT AND OUR CAR WOULD BE TOWED IN. HE ASKED ME HOW MANY FLOOR MATS I HAD IN THE CAR, AND I TOLD HIM ONLY THE TWO THEY SOLD ME, THE CARPETED ONE AND THE ALL-WEATHER RUBBER MAT. HE TOLD ME THEY HAD JUST ISSUED A RECALL ON THE RUBBER MAT AS IT WAS SLIDING FWD AND JAMMING ACCELERATORS. I CHECKED AND OUR MAT WAS JAMMING THE ACCELERATOR. AFTER MY CAR WAS EXAMINED BY LEXUS FIELD TECHS THEY DETERMINED THE CAR HAD ACTED AS DESIGNED AND THE EXPENSES FOR A REPLACED TRANSMISSION AND NEW BRAKE SYSTEM WOULD BE MINE- NOT COVERED BY WARRANTY. I DISPUTED THIS AND THEY OFFERED TO REPAIR THE CAR AT NO CHARGE. IF FLOOR MATS WERE CONTRIBUTORY TO THIS POTENTIALLY FATAL INCIDENT THEY WERE NOT THE ONLY DANGEROUS ELEMENT. THE CRUISE CONTROL ISSUES, INABILITY TO STOP THE CAR IN AN EMERGENCY SITUATION BY PRESSING THE STOP BUTTON, AND THE THROTTLE SEEMINGLY OVERRIDING THE OTHER SYSTEMS IN A "SUDDEN ACCELERATION" PATTERN ARE ALL VERY STRONG CONCERNS I HAVE. \*TR

**NHTSA Summary:**  
I OWN A 2006 TOYOTA RAV4 4CYL, 4WD. I CURRENTLY HAVE JUST UNDER 15K MILES AND I'VE HAD AN ISSUE WITH THE CAR HESITATING (OR THE THROTTLE LAGGING), AT TIMES, USUALLY ONE A WEEK OR SO, IF I PUSH ON THE GAS PEDAL WHEN I NEED TO SPEED UP, IT'S AS IF NOTHING HAPPENS. I HAVE TO LET THE PEDAL GO AND PUSH IT AGAIN TO SPEED UP. IT USUALLY HAPPENS IF I'M TRYING TO MERGE INTO FASTER TRAFFIC, OR AT TIMES WHEN I'M TAKING A SLOW TURN AND THEN GO TO SPEED UP AFTERWARDS. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10193769  
**Date of Incident:** 20070520  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** ROLLING MEADOWS, IL

**NHTSA Summary:**  
ON MAY 20, 2007 WHEN I WAS DRIVING IN A HIGH TRAFFIC PRIVATE PARKWAY THE VEHICLE SUDDENLY ACCELERATED AND HIT THREE OTHER CARS. THE ROAD HAD A VERY GENTLE UP SLOPE AND A SMALL CURVE. THE ENGINE WAS ROARING VERY LOUD AS I TRIED VERY HARD TO BRAKE, BUT THE BRAKE WAS NOT EFFECTIVE. I HIT THREE CARS, RIGHT, FRONT AND FRONT RIGHT, ONE OF THE BY STANDER TOLD ME THAT HER PARENTS HAD A SIMILAR EXPERIENCE WITH THE SAME MODEL CAR LESS THAN A WEEK BEFORE THAT ON A HIGHWAY. ALSO, THE FRONT CAR PASSENGER REPORTED THAT SHE HEARD AN UNUSUAL LOUD ENGINE NOISE FROM MY CAR IN THE POLICE REPORT. LATER, THE INSURANCE COMPANY'S ASSESSOR INFORMED ME THAT THERE WAS A MEMORANDUM FROM THE MANUFACTURER TO INSURANCE COMPANIES ABOUT THE ALL WEATHER FLOOR MAT FOR THIS MODEL. COULD CAUSE SUDDEN ACCELERATION ON THE THROTTLE. I REPORTED THE ACCIDENT TO THE CUSTOMER SERVICE SPECIALIST

**C-910**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

FROM THE MANUFACTURER ON MAY 21, 2007. THEY HAVE SENT A FIELD TECHNICIAN TO INSPECT THE CAR ON JUNE 7, 2007, AND HE CONCLUDED THERE WAS NO MECHANICAL PROBLEM WITH THE CAR. THE SPECIALIST TOLD ME TO SUBMIT ANY CAR RENTAL EXPENSE CLAIM THROUGH THE INSURANCE COMPANY, AND ANY FURTHER ACTION WILL HAVE TO DEAL DIRECTLY WITH THEIR LEGAL DEPARTMENT. I ALSO TALKED WITH TWO SERVICE STAFFERS FROM 2 DIFFERENT DEALERSHIPS, AND THEY INFORMED ME THAT THEY WERE AWARE OF THE FLOOR MAT PROBLEM ABOUT THE SAME MODEL OF MY CAR. SINCE THEN I HAVE FOUND 18 SIMILAR COMPLAINTS ABOUT THE SAME MODEL CAR IN THE NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION WEB SITE. I WANT THE MANUFACTURER TO REIMBURSE ALL MY CAR RENTAL EXPENSES AND TO REPLACE MY CAR BECAUSE I HAVE NO CONFIDENCE ABOUT THE CAR WARRANTY, AND I SHOULD NOT BE BEARING THE DEPRECIATION COST FOR A CRASHED CAR. THE MANUFACTURER SHOULD RECALL ALL THE CARS THAT HAVE THE FLOOR MAT PACKAGE.\*AK

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2006 TOYOTA CAMRY. THE DEALER STATED THAT THE VEHICLE'S FRONT BRAKES WERE OUT OF ROUND AND CAUSED THE VEHICLE TO PULSATE. THE DEALER RESURFACED THE FRONT ROTORS AND SANDED THE FRONT BRAKE PADS. WHILE DRIVING 40 MPH UNDER NORMAL DRIVING CONDITIONS, THE VEHICLE SUDDENLY ACCELERATED AND FAILED TO STOP. THE CONTACT WAS UNABLE TO STEER THE VEHICLE AND CRASHED INTO A CEMENT WALL. THE DRIVER SUFFERED BRUISES ON BOTH LEGS, A HAND, AND CHEST. THE VEHICLE WAS DESTROYED AND TOWED. THE CURRENT AND FAILURE MILEAGES WERE 10,000. IN MAY 2007, MY I WAS DRIVING MY 2006 TOYOTA CAMRY WHEN IT SUDDENLY ACCELERATED TO AN UNCONTROLLABLE SPEED, THE STEERING KEPT VEERING TO THE LEFT AND THE BRAKES DID NOT STOP THE CAR. THE CAR WENT DOWN ABOUT 30 FEET INTO A GULLY BEFORE SLAMMING INTO A CEMENT COLUMN. THE CAR WAS TOTALLY DESTROYED AND I SUSTAINED INJURIES. IN A SERIES OF CORRESPONDENCE TOYOTA MOTOR SALES DENIED ANY DEFECT IN THE CAR AND MADE NO ATTEMPT TO PAY DAMAGES. I HAD PREVIOUSLY TAKEN THE CAR TO THE DEALERS FOR BRAKES ADJUSTMENT AND I COMPLAINED OF A CLUMSINESS WHEN ACCELERATING; THE DEALER ADJUSTED THE BRAKES BUT SAID THAT THE NOISE AND CLUMSINESS WAS THE NORMAL ACCELERATION FOR THE THROTTLE FOR THE V6 ENGINE.

...response is "No problem found at this time". My third visit on July 28, 2007, again test drove with another mechanic, this time no documented notes, however, was given an explanation from the service advisor that this is "Normal" conditions for this vehicle. Listed are the following issues:  
Issue #1: The Tacoma is shifting precariously on it own without pressing on the accelerator nor the brakes.  
Issue #2: The engine lunges forward while at a stop.  
Issue #3: ...

**Additional Summary:**

\*\*\* NOTES 08/21/2007 07:38:19 AM LLLeis1  
...The engine has a loss of power when coasting.  
I have shared my concerns with the dealership, and even test drove with a several mechanics that observed the random shifting of either the engine rpm or transmission shifting. The results that I am receiving from the dealership, is that this is "Normal conditions" of this vehicle is not acceptable. I can assure you that what I am claiming here is NOT NORMAL, by any means. I am a 3x Toyota owner. Neither one of my ...

RNT#070828-000373  
08/28/2007 07:26 PM  
Email states: Dear Toyota Corporate Executives, I received a call from Lynnelle Holden (Customer Relations) from the Walnut Creek Dealership on 8/21/07. We discussed the issues at hand and went over each item of concern. Lynnelle was very professional throughout the investigative period. After documenting my concern, she followed up with a call within the same day to confirm the lead time required for a follow-up appointment with a technician from corporate. I stated my availability with Lynnelle and requested a 3 day notice to arrange my schedule to meet with the corporate technician. As of today 8/28/07 and I have not heard from Lynnelle. Instead, I received an email survey from: Elaine Matsuda Corporate Customer Relations Manager Customer Services Division on 8/27/07. I completed the survey today with much dismay and am waiting for someone to take charge of my mechanical issues. I am very disappointed and concerned with the way Toyota has treated this situation. If I do not hear from the Corporate Division with a resolution by August 31, 2007, I presume that Toyota is not going to rectify my concerns and leave me no choice other than to report my experience to BBB (Better Business Bureau, 7 On Your Side & to exercise my rights as a consumer. I truly hope that this is not the case. Sincerely, Jason Tong 925-813-1060 =  
nrc states: Thank you for contacting Toyota Motor Sales, U.S.A., Inc. On 8/21/2007, our office contacted Lynell Holden, the Customer Service Manager of Toyota of Walnut Creek on your behalf. TL\* THE CONTACT OWNS A 2007 LEXUS IS350. WHILE PARKING, THE VEHICLE RAPIDLY ACCELERATED OVER AN EMBANKMENT HIT A FENCE AND THEN ROLLED OVER. A POLICE REPORT WAS AVAILABLE. THE VEHICLE WAS TOWED TO THE DEALER AND REPAIRED. THE MANUFACTURER WAS NOTIFIED OF THE FAILURE. THE FAILURE MILEAGE WAS 200.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10192384  
**Date of Incident:** 20070601  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** MAPLE VALLEY, WA

**NHTSA Summary:**  
HERE IS THE DESCRIPTION I GAVE MY LOCAL LEXUS DEALER ALONG WITH THE PHOTOGRAPHS OF THE WITNESS MARKS OF THE IMPACT TO THE DOOR. LEXUS IS EVALUATING THE CAR. I HAVE ASKED FOR A FACTORY ASSISTED REPLACEMENT CAR OF A DIFFERENT MODEL. THEY HAVE NOT RESPONDED YET. DAVE, ATTACHED IS THE EXTRACT FROM THE NHTSA ON THIS PROBLEM WITH THE ES350 MODEL ALONG WITH THE MEASUREMENTS ON THE GARAGE DOOR AND PHOTOS OF THE CAR. THERE IS THE DESCRIPTION: I WAS WATCHING MY WIFE SLOWLY (3-5 MPH) APPROACH OUR GARAGE DOOR WHEN THE CAR SUDDENLY LURCHED FORWARD AND CRASHED INTO OUR GARAGE DOOR AT 10-15 MPH. MY WIFE SAID HER FOOT WAS HOVERING OVER THE BRAKE AFTER TRANSITIONING FROM THE THROTTLE AS THE CAR WAS COASTING TOWARD THE DOOR. SHE JAMMED ON THE BRAKE BUT COULDN'T GET IT STOPPED FAST ENOUGH TO KEEP FROM HITTING THE DOOR. I'M A LICENSED PROFESSIONAL MECHANICAL ENGINEER AND OWN A DRIVE A FERRARI F355 SPIDER FOR FUN SO I AM VERY FAMILIAR WITH HOW A CAR SUSPENSION AND BODY ANGLE RESPONDS TO ACCELERATION AND BRAKING. IT LOOKED TO ME LIKE THE CAR LAUNCHED BUT WAS IMMEDIATELY FORCED INTO A NOSE DOWN ATTITUDE AS MY WIFE WAS DESPERATELY TRYING TO STOP. UNLIKE LIKE THE AUDI PROBLEM OF A FEW YEARS AGO HAD SHE MISTAKENLY HIT THE THROTTLE SHE WOULD HAVE NEVER BEEN ABLE TO HIT THE DOOR IN A NOSE DOWN ATTITUDE AND THERE WOULDN'T HAVE BEEN TIME TO TAKE HER FOOT OFF THE GAS AND ONTO THE BRAKE - AS A RESULT - IT HAD TO BE AN UNCOMMANDED ACCELERATION. THE CAR LAUNCHED IN A WAY THAT WOULD BE CONSISTENT OF AT LEAST 2500 RPM MINIMUM. I MADE SOME VERY CAREFUL WITNESS MARK MEASUREMENTS ON THE BROKEN GARAGE DOOR AND THE IMPACT POINT FOR THE LICENSE PLATE SCREW IS 3/8 OF AN INCH LOWER THAN ITS NORMAL FREE STANDING HEIGHT ON THE CAR INDICATING SHE MUST HAVE HAD HER FOOT ON THE BRAKE BY THE TIME OF THE IMPACT THUS RULING OUT THE AUDI SCENARIO. MAKE NO MISTAKE THIS IS NOT THE FLOOR MAT PROBLEM AND WE RESTARTED THE CAR TO CONFIRM THE CRUISE CONTROL WAS OFF. \*TR

**Toyota ID Number:**  
**NHTSA ODI Number:** 10302225  
**Date of Incident:** 20070601  
**Vehicle:** 2007 TOYOTA TUNDRA  
**Location of Incident:** MELROSE PARK, IL

**NHTSA Summary:**  
TL\*THE CONTACT OWNS 2007 TOYOTA TUNDRA. HE PURCHASED THE VEHICLE BRAND NEW IN MAY OF 2007. IN JUNE OF 2007 WHILE HE WAS DRIVING 55 MPH ON THE HIGHWAY AND ATTEMPTING TO PASS A VEHICLE, THE VEHICLE SUDDENLY ACCELERATED. HE WAS ABLE TO STOP THE VEHICLE BY PUTTING THE GEAR IN NEUTRAL AND DRIVING ON THE SIDE WALK TO AVOID A CRASH IN ORDER TO TURN THE VEHICLE OFF. HE EXPERIENCED THE FAILURE THREE TIMES. HE TOOK THE VEHICLE TO TWO TOYOTA DEALERS WHO STATED THAT NOTHING WAS WRONG WITH THE VEHICLE. YET, THE FLOOR MAT MAY HAVE CAUSED THE VEHICLE TO ACCELERATE. HE ADVISED THE DEALERS THAT HE DID NOT HAVE THE FLOOR MAT IN HIS VEHICLE WHEN THE FAILURE OCCURRED. HE TOOK THE VEHICLE TO A GMC DEALER WHO STATED THAT IT COULD BE A COMPUTER FAILURE. HE ALSO ASKED THE DEALER IF HE COULD TRADE THE VEHICLE WHEN HE EXPERIENCED THE FIRST FAILURE. THE DEALER STATED THAT THEY COULD NOT TAKE THE VEHICLE BACK. THE FAILURE MILEAGE WAS 9,000 AND THE CURRENT MILEAGE WAS 75,000.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10302557  
**Date of Incident:** 20070601  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** MIDDLETOWN, CT

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2007 TOYOTA CAMRY. SHE PURCHASED THE VEHICLE IN JUNE OF 2007 AND WITHIN A FEW MONTHS SHE CONTACTED THE DEALER BECAUSE THE VEHICLE HESITATED WHEN MAKING TURNS AND DECREASING SPEED. WHEN THE DRIVER ENGAGED THE ACCELERATOR PEDAL THE SPEED RAPIDLY INCREASED WITHOUT WARNING. THE DEALER STATED THAT THERE WAS NO FIX FOR THE FAILURE; HOWEVER, THEY REPROGRAMMED THE COMPUTER SYSTEM. THE DEALERS ENGINEER INSPECTED THE VEHICLE AND CONCLUDED THAT IT WAS A NORMAL STANDARD FOR THE VEHICLE TO HESITATE AND THAT SOME MODELS WERE WORSE THAN OTHERS. THE FAILURE MILEAGE WAS 9,084 AND THE CURRENT MILEAGE WAS 26,898.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10303100  
**Date of Incident:** 20070601  
**Vehicle:** 2005 TOYOTA SEQUOIA  
**Location of Incident:** TUCSON, AZ

**NHTSA Summary:**  
SEQUOIA 2005 2WD. THE 2005 SHOULD BE RECALLED. (1) WHILE PULLING INTO A PARKING SPOT AT ABOUT 5 MPH, THE CAR SUDDENLY ACCELERATED, DRIVING OVER A PARKING CURB & DOWN A HILL. (2) AFTER COMING TO A COMPLETE STOP AT A STOP SIGN, I TAPPED ON THE GAS TO GO & THE CAR SUDDENLY ACCELERATED, LURCHING FORWARD. AFTER THIS HAPPENED I TOOK THE CAR TO THE DEALER, WHO INSPECTED IT & FAILED TO FIND A PROBLEM. FLOOR MATS WERE NO WHERE NEAR THE BRAKE & IS NOT POSSIBLE THAT THE GAS PEDAL STUCK, BECAUSE IT ACCELERATED SUDDENLY. IF THE GAS PEDAL MERELY GOT STUCK, THEN THE CAR WOULD HAVE CONTINUED

C-924

FORWARD AT THE SAME RATE OF SPEED, BUT IN MY CASE IT ACCELERATED SUDDENLY BOTH TIMES. TW\* \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10303438  
**Date of Incident:** 20070601  
**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** LAKEWAY, TX

**NHTSA Summary:**  
I HAVE ALWAYS NOTICED THAT MY 2007 TOYOTA RAV4 SEEMED TO HAVE A SUDDEN BURST OF ACCELERATION WHEN I START TO MOVE. I ASKED A MECHANIC ONE TIME IF THIS COULD BE ADJUSTED AND WAS TOLD THERE WAS NOTHING THAT COULD BE DONE. I AM NOW WONDERING IF THE SAME ELECTRONIC THROTTLE CONTROL THAT IS CAUSING PROBLEMS ON THE LATER RAV4S IS ON MY RAV4. I BET IT IS THE SAME PROBLEM. I THOUGHT THERE WAS A MECHANICAL THROTTLE AND NOW I HEAR IT IS AN ELECTRONIC THROTTLE. IF ELECTRONIC, THEN I WOULD THINK A CHANGE IN THE COMPUTER CODE THAT CONTROLS THE THROTTLE WOULD FIX THE A PROBLEM. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10317745  
**Date of Incident:** 20070601  
**Vehicle:** 2007 TOYOTA HIGHLANDER  
**Location of Incident:** HORSESHE BEND, ID

**NHTSA Summary:**  
ON MAY 9, 2007 WE PURCHASED A NEW 2007 TOYOTA HIGHLANDER. ABOUT A MONTH LATER IT UNEXPECTEDLY ACCELERATED AND RAN THROUGH THE END OF OUR CARPORT WHILE BEING DRIVEN IN TO PARK. LUCKILY NO ONE WAS IN FRONT OF IT. THE AUTO SUSTAINED ABOUT \$650 IN DAMAGES AND THE CARPORT RECEIVED SIMILAR MONITARY DAMAGES. ABOUT A MONTH LATER WE HAD A SIMILAR INCIDENT WHILE PARKING IN A PARKING LOT. AT FIRST WE ATTRIBUTED THE INCIDENTS TO MY WIFES FOOT SOMEWAY SLIPPING OFF THE BRAKES AND ON TO THE ACCELERATOR. NOW, AFTER THE RECENT NATIONAL PUBLICITY, WE ARE NOT SO SURE. PERHAPS THE ACCELERATOR MECHACHISIM OR SOFTWARE IN THIS VEHICLE IS DEFECTIVE IN THIS MODEL TOYOTA ALSO. IN THE MEAN TIME, I NOW WONDER IF THIS MODEL VEHICLE IS SAFE TO DRIVE. I WILL BRING THIS ISSUE UP TO OUR TOYOTA DEALER IN THE NEAR FUTURE. I HOPE THIS INFORMATION WILL BE USEFUL IN HELPING THE GOVERNMENT AND TOYOTA TO SOLVE THIS IMPORTANT ISSUE.

**Additional Summary:**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SPEEDS FROM A COMPLETE STOP AND APPLYING THE GAS PEDAL. THIS OCCURRED SEVERAL TIMES. I TOOK MY CAR TO MY DEALER BILL PAGE. TOYOTA IN FALLS CHURCH, VA. THE FIRST TIME THE ACCELERATION OCCURRED WAS AFTER 2 YEARS AND IN MARCH 2007. I WAS ON CONSTITUTION AVENUE, RIGHT LANE IN DC--WHICH EITHER TURNS RIGHT OR GOES STRAIGHT. CONSTITUTION AVENUE IS 3 OR 4 LANES EACH EAST AND WESTBOUND--I WAS HEADING EASTBOUND. WHEN THE LIGHT TURNED GREEN, THE CAR IN FRONT OF ME TURNED RIGHT, THANK GOODNESS BECAUSE AS I TOOK MY FOOT OFF THE BRAKE AND UNTO THE GAS, MY CAR SHOT FORWARD SO FAST MY BRAKES WOULDN'T STOP MY CAR. UPON SLAMMING ON THE BRAKES WHICH WERE SHUDDERING SO BADLY, I THOUGHT MY CAR WAS NEVER GOING TO STOP AND HIT THE NEXT CAR (RUSH HOUR). I STOPPED SHORT OF HITTING THAT CAR. I WAS SO SCARED. MY SERVICE MANAGER SAID COULDN'T REPRODUCE AND THAT THERE WAS NOTHING WRONG WITH MY BRAKES OR CAR. HE TOLD ME THAT THE SHUTTERING IS NORMAL WHEN I SLAM ON MY BRAKES--A SAFETY FEATURE TO STOP THE CAR. COMPUTER SAID NOTHING WRONG. HAD THE ACCELERATION PROBLEM AT LEAST 3 MORE TIMES. I WAS AT A PARKING METER, 1ST SPACE. GOT INTO MY CAR, TURNED ON THE KEY, RELEASED MY EMERGENCY BRAKE, AND TOOK MY FOOT OFF THE BRAKE AND UNTO THE GAS. I WANTED TO MAKE A RIGHT TURN. THERE WERE 2 PEOPLE ON THE SIDEWALK, AND THANKFULLY THEY DID NOT WALK IN FRONT OF MY CAR--I WOULD HAVE RUN OVER THEM. MY CAR TOOK OFF SO FAST FROM A STOPPED POSITION THAT I HAD A HARD TIME STOPPING MY CAR. IMMEDIATELY TOOK MY 2005 CAMRY TO THE DEALER. AGAIN SERVICE MANAGER TOLD ME COMPUTER SAYS THERE IS NOTHING WRONG WITH MY CAR--THINK COMPUTER/SOFTWARE GLITCH. LAST WEEK TOYOTA CORP SAID WON'T FIX B/C NOT ON RECALL AND ONLY INTERMITTENT, WHICH IS THE PROBLEM. TOLD ME I OWN THE CAR, IT'S OUT OF WARRANTY WON'T PAY TO FIX. HELP! WHEN DRIVING IT'S LIKE RUSSIAN ROULETTE! \*TR

**NHTSA ODI Number:** 10201655  
**Date of Incident:** 20070608  
**Vehicle:** 2007 TOYOTA TACOMA  
**Location of Incident:** DOVER, TN

**NHTSA Summary:**  
OVER A PERIOD OF SEVERAL MONTHS AFTER PURCHASING A NEW 2007 TOYOTA TACOMA, I EXPERIENCED FIVE INCIDENTS OF BRAKE/ACCELERATION PROBLEMS FINALLY RESULTING IN A CRASH. FIRST INCIDENT: STOPPED AT A TRAFFIC LIGHT WITH MY FOOT ON THE BRAKE, THE TRUCK LUNGED FORWARD A FEW FEET. THE DEALERSHIP TOLD ME THEY COULD NOT FIND ANY PROBLEM. A MONTH LATER, STOPPED IN A GAS STATION DRIVE WITH MY FOOT ON THE BRAKE WAITING TO EXIT, THE REAR WHEELS BEGAN SPINNING OUT OF CONTROL. I PRESSED ON THE BRAKE AS HARD AS I POSSIBLY COULD TO KEEP FROM ENTERING TRAFFIC. THREE WEEKS LATER, APPROACHING THE BOTTOM OF A HILLY SHARP TURN, I TAPPED THE BRAKES TO SLOW DOWN. AGAIN THE REAR WHEELS ACCELERATED TO A HIGH RATE OF SPEED. I COULD NOT STOP THE TRUCK TO KEEP FROM STRIKING A VAN IN FRONT OF ME SO I CROSSED OVER A DOUBLE YELLOW LINE TO AVOID A COLLISION. IT TOOK ABOUT A THOUSAND YARDS TO GAIN CONTROL. THE DEALERSHIP SAID, "WE CAN'T FIX THE PROBLEM" UNTIL WE CAN DUPLICATE IT". I CALLED TOYOTA OF AMERICA, AGAIN ONLY TO BE TOLD THAT TOYOTA COULD DO NOTHING. THE FOURTH INCIDENT OCCURRED ON AN ENTRANCE RAMP TO A HIGHWAY. I TAPPED THE BRAKES TO SLOW DOWN. THE VEHICLE ACCELERATED TO A HIGH RATE OF SPEED. I GOT IT UNDER CONTROL QUICKLY. FINALLY THE FIFTH AND FINAL INCIDENT. COMING OUT OF NASHVILLE WHERE IT WAS RAINING HARD, I GOT FURTHER NORTHBOUND ON THE I-24 WHERE IT WAS RAINING LESS AND THE PAVEMENT WAS WET. WHILE IN THE SHOULDER LANE, A VEHICLE IN THE LEFT LANE STARTED MOVING OVER

**NHTSA Summary:**

THIS IS IN REGARD TO THE TOYOTA GAS PEDAL. RECALL. I HAVE A 2006 RAV4 AND DID IN FACT EXPERIENCE AN ACCELERATION PROBLEM ONCE BACK IN 2007 OR 2008. IT WAS VERY BRIEF AND THE CAR RECOVERED QUICKLY. I WAS ONLY GOING 35 OR 40. I PLAYED WITH THE GAS PEDAL AND IT STOPPED. IT DID NOT HAPPEN AGAIN, BUT NOW AM CONCERNED BECAUSE ACCORDING TO THE VIN NUMBER AND YEAR OF MY CAR, IT ACTUALLY ISN'T INCLUDED IN THE RECALL AND MAYBE THE RECALL NEEDS TO BE EXPANDED. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10315044  
**Date of Incident:** 20070611  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** HERMON, ME

**NHTSA Summary:**

PURCHASED A 07 CAMRY FROM DOWN EAST TOYOTA IN MAINE. 6-2-07 NOTICED NEXT DAY A DANGEROUS HESITATION PROBLEM WITH CAR. CALLED DET SERVICE DEPT 2-4-07 WITH COMPLAINT I WAS TOLD TO DRIVE FOR A WEEK SO CAR COULD LEARN DRIVING HABITS, SO I DID. PULLED INTO TRAFFIC SEVERAL TIMES THAT WEEK AND FEW TIMES THE CAR WOULD HESITATE AND JUMP FORWARD, ON 6-11-07 CALLED DET SERVICE DEPT AGAIN BECAUSE THAT MORNING TRYING TO PULL OUT OF DRIVEWAY CAR HESITATED

C-928

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

JUMPED FORWARD ALMOST HITTING A UPS TRUCK, VERRY DANGEROUS!! WHILE TALKING TO SERVICE DEPT THIS TIME I WAS TOLD THAT DRIVING THE CAMRY FOR A WEEK WOULD NOT HELP THE HESITATION PROBLEM BUT NOT TO WORRY BECAUSE LIKE THE 07 V6 CAMRY THEY HAD TO PULL ALL OFF THE LOT FOR TRANSMISSION PROBLEMS WHEN AND IF TOYOTA COMES UP WITH A FIX THEY WOULD LET ME KNOW. I TRADED THE CAMRY BACK IN BECAUSE OF THE DANGEROUS HESITATION PROBLEM AND LOST 7000.00 IN TEN DAYS?? WHEN I QUESTIONED KEVIN KELLY THE GENERAL MGR I WAS TOLD BY HIM THAT HE DID HOLD A GUN TO MY HEAD TO BUY THE CAMRY OR TO TRADE IT BACK IN, AND NOTHING I COULD DO ABOUT LOSING 7000.00 BECAUSE HE CAN DO AS HE WANTS. THE SALESMAN DON SCOTT TOLD US THAT THE SATURDAY HE SOLD US OUR CAMRY HE SOLD THREE AND TWO HAVE COME BACK BECAUSE OF THIS PROBLEM. TRACY SIMPSON AT PAPER SIGNING TOLD US THAT SHE ALSO HEARD OF THIS PROBLEM. WITH BEING TOLD NO FIX FOR A DANGEROUS PROBLEM LIKE THIS, TRADING A CAR BACK IN IN 10 DAYS LOSING 7000.00 IS JUST WRONG!!! NOW TO THIS DATE THREE TSB'S OUT FOR THIS DANGEROUS PROBLEM THAT BECOMES NORMAL WHEN TSB FAIL TO FIX PROBLEM. IS THIS DANGEROUS HESITATION PROBLEM RELATED TO THE SO CALLED FLOOR MAT TURNED TO GAS PEDAL PROBLEM?? JUST NOT RIGHT FOR DET OR TOYOTA TO KEEP GETTING AWAY WITH THIS???

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10193381  
**Date of Incident:** 20070613  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** BIRMINGHAM, AL

**NHTSA Summary:**

I SLOWED DOWN THE CAR AT THE END OF AN INTERSTATE EXIT RAMP TO CHECK FOR TRAFFIC AND THINKING I HAD ENOUGH TIME TO CROSS THE INTERSECTION I GAVE IT GAS AND GOT VERY LITTLE ACCELERATION. WHEN I PUSHED THE GAS TO THE FLOOR I STILL GOT NO MORE ACCELERATION. I WROTE THE TOYOTA SERVICE DEPARTMENT TO MAKE AN APPOINTMENT TO BRING IT IN AND RECEIVED THE RESPONSE THAT THEY WERE AWARE OF THE PROBLEM, BUT AT THIS TIME THERE WAS NO SOLUTION SO DO NOT BRING THE CAR IN. IF THERE HAD BEEN MORE TRAFFIC IN THAT SITUATION IT WOULD HAVE CAUSED A WRECK. ACCELERATION IS ALSO VERY ERRATIC WHEN USING CRUISE CONTROL. GOING UP A SLIGHT HILL WILL CAUSE THE MOTOR TO RACE. ALSO, IT REQUIRES QUITE A LOT OF FORCE TO STOP THE CAR. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10303787  
**Date of Incident:** 20070614  
**Vehicle:** 2005 TOYOTA SIENNA  
**Location of Incident:** PORT RICHIEY, FL

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2005 TOYOTA SIENNA. WHILE DRIVING 65 MPH THE VEHICLE ACCELERATED AND MOVED TO ONE SIDE OF THE ROAD; HOWEVER, AFTER THE ENGINE SHUT OFF IT RESET AND BEGAN DRIVING NORMALLY. THE CONTACT STATED THAT THE DUPLICATE FAILURE OCCURRED IN 2009 AND THE ACCELERATOR PEDAL WAS STUCK. THE CONTACT HAD TO REACH DOWN AND PULL THE PEDAL FROM THE STUCK POSITION. THE VEHICLE WAS TAKEN TO THE DEALER WHO STATED THAT THERE WAS NOTHING WRONG WITH IT. THE CONTACT STATED THAT THE FAILURE OCCURRED AT LEAST THREE TO FOUR TIMES. THE TOYOTA MANUFACTURER HAS NOT BEEN NOTIFIED. THE FAILURE MILEAGE WAS 42,000.

**Date of Incident:** 20070616  
**Vehicle:** 2007 TOYOTA TUNDRA  
**Location of Incident:** ROSEMEAD, CA

**NHTSA Summary:**

2007 TOYOTA TUNDRA DC 5.7L LIMITED. I WAS DRIVING ON THE FREEWAY AND I WENT TO PASS ANOTHER VEHICLE WHEN I GOT INTO THE NEXT LANE AND ANOTHER CAR CHANGED LANES IN FRONT OF ME AND I WAS FORCED TO SLAM THE BRAKES. THE ABS SYSTEM ENGAGED AND SLOWED VEHICLE DOWN, BUT THE TRUCK FELT LIKE IT WAS BEING PUSHED FORWARD... BY THIS TIME I HAD ENOUGH ROOM IN FRONT OF ME, SO I LET OFF THE BRAKES AND THE TRUCK JUMPED LIKE I WAS HOLDING MY FOOT ON THE GAS. I ALMOST HIT THE CAR IN FRONT OF ME AGAIN. I SLAMMED ON THE Y BRAKES AGAIN AND THE ABS SYSTEM KICKED IN, AND THE TRUCK WAS STILL TRYING TO ACCELERATE, BUT I HELD THE BRAKE HARD ENOUGH THAT I DIDN'T HIT THE CAR IN FRONT OF ME. AT THIS POINT I HAD TO DO SOMETHING. I STUCK THE TRUCK IN NEUTRAL AND TRIED TO GET TO THE SIDE OF THE FREEWAY. WHEN I GOT STOPPED I HAD 3 LIGHTS ON - BRAKE, VSC, AND A PICTURE OF A CAR WITH 2 CROOKED LINES ON IT. I BELIEVED IT WAS TRACTION CONTROL. BY NOW THE TRUCK WAS NORMAL AGAIN BUT THE LIGHTS WERE ON SO I TOOK THE TRUCK STRAIGHT TO THE DEALER. \*AK

**NHTSA ODI Number:** 10193615  
**Date of Incident:** 20070617  
**Vehicle:** 2006 TOYOTA RAV4  
**Location of Incident:** DELANCO, NJ

**NHTSA Summary:**

THE ENGINE ON TOYOTA RAV 4 STARTED TO RACE AT MAXIMUM RPM'S WHILE I WAS PARKING THE CAR. FORTUNATELY IT WAS IN NEUTRAL. I PUMPED THE ACCELERATOR BUT THAT DID NO GOOD. I TURNED THE KEY OFF AND THEN RESTARTED THE CAR. THE PROBLEM REPEATED. I DID THIS SEVERAL TIMES BEFORE ENGINE STARTED TO IDLE NORMALLY. I TOOK THE CAR TO THE DEALER, BUT THEY COULD NOT FIND ANYTHING WRONG WITH IT. I WAS CONCERNE DTHE PROBLEM WOULD HAPPEN AGAIN WHILE DRIVING.\*AK

**NHTSA ODI Number:** 10305760  
**Date of Incident:** 20070618  
**Vehicle:** 2002 TOYOTA AVALON  
**Location of Incident:** COSTA MESA, CA

**NHTSA Summary:**  
MY 2002 TOYOTA AVALON GAS PEDAL ACCELERATED A FAST SPEED BY ITS OWN MOTION WHILE I WAS EXITING FROM THE 405 FREEWAY ON TO HARBOR BOULAVARD LOCATED IN COSTA MESA, CA. IN 2007 ON MY WAY TO MY HOME AT 3015 COUNTRY CLUB DRIVE, COSTA MESA, CA 92626. THERE WAS NO WAY THAT I COULD STOP THE CAR WITH THE BRAKES OR THE GAS PEDDLE. ONLY BY THE GRACE OF GOD WAS I ABLE TO SOMEHOW SWERVE OFF THE EXIT AND INTO AN ICEPLANT FIELD THAT SLOWED THE VEHICLE DOWN WHEN I PUT THE IGNITION IN NEUTRAL. THE CAR STOPPED WHEN IT PLOWED IN TO A MOUND OF PLANTING SOIL AND THE ENGINE DIED. I TOOK THE CAR TO ORANGE COAST AUTO REPAIR WHO WERE UNABLE TO DETERMINE WHAT CAUSED THIS DEFECT AFTER EXTENSIVE TESTS. TOYOTA HAS ACKNOWLEDGED THAT THE 2002 HAD THE SAME GAS PEDAL AND OTHER EQUIPMENT AS THE 2005-2010 AVALONS BUT HAS NOT TOTATE RECALLED ANY EARLIER AVALONS THAN THE 2005S. IF NOT FOR THE ICEPLANT FIELD, BOTH ME AND THE OCCUPANTS OF ONE OF THE OTHER CARS STOPPED AT THE STOP SIGN IN FRONT OF ME WOULD HAVE BEEN SERIOUSLY INJURED OR DIED. I WANT TOYOTA TO RECALL MY 2002 AVALON AND MAKE RECTIFYING EQUIPMENT CHANGES SO I CAN DRIVE THE CAR WITHOUT FEAR OF INJURING OR KILLING MYSELF AND OTHERS. IN FACT, TOYOTA FOR SOME UNKNOWN REASON (PROBABLY ECONOMICAL ) IS NOT RECALLING ALL AVALONS WITH THE SAME DEFECTIVE EQUIPMENT. I CAN BE REACHED AT 714-751-3921 OR &14- 234-6674.(CELL) MY EMAIL IS ERWINJKEUP@AOL.COM THANK YOU.

**NHTSA Summary:**  
**Additional Summary:**  
We purchased a 2007 Camry in January 2007. From then until about July we noticed an increasing problem with a sticking accelerator pedal. Basically, when we stepped on the accelerator pedal it would "kind of" stick in place, there would be a pause and then the vehicle would start moving, of course with a jump because we had to depress the accelerator more than normal. I made several trips to GT and originally it was indicated that this was a normal problem perhaps from the way we were pushing the accelerator pedal. However, I was very insistent and persistent and one day, and Toyota national. I spoke with one KATHERINE about the problem. She provided me a case number as follows: 200706210099. Sometime later I received a call from the GT service manager who thought Toyota had sent a possible fix. PLEASE SEE THE ATTACHED COMPLETED WORK ORDER FROM GT.

As you can see based upon a Toyota national internal technical service bulletin #EG-036-07, not a recall and not listed anywhere else that I was able to find, it was decided that the problem was in the ECM - presumably meaning Electronic Control Module (computer to be simple about it). Thus, as you note, the ECM was RECALIBRATED BASED UPON THAT TSB. I saw the mechanic with the computer on top of

C-938

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

our car actually taking the necessary steps to recalibrate. That seemed to take care of the problem, although the CAMRY does not accelerate as smoothly as our 2000 Avalon and several other Camry's we have had.

ATTACHMENTS ARE IN FOLDER TOYSUA4203.

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2007 TOYOTA CAMRY. THE CONTACT STATED THAT THE VEHICLE HESITATES AND EXPERIENCES ACCELERATION FAILURE SINCE IT WAS A NEW VEHICLE. THEN, ON JULY 11, 2007, WHILE ATTEMPTING TO ACCELERATE, THE VEHICLE COMPLETELY LOST ALL MOTIVE POWER AND WAS DISABLED PARTIALLY BLOCKING A LANE OF TRAFFIC ON AN INTERSTATE. THE VEHICLE FAILED TO MOVE EVEN THOUGH THE ENGINE WAS STILL RUNNING. THE POLICE ASSISTED AND THE VEHICLE WAS MOVED TO A SAFE LOCATION. THE DEALER SUGGESTED THAT THE RUBBER FLOORMAT MAY HAVE GOTTEN STUCK UNDERNEATH THE ACCELERATOR PEDAL AND CAUSED THE HESITATION CONCERN. THE DEALER COULD NOT FIND A CAUSE FOR THE LOSS OF MOTIVE POWER FAILURE. THE CURRENT MILEAGE IS 12,968. THE FAILURE MILEAGE FOR THE HESITATION ISSUE WAS 350. \*DSY

**Location of Incident:** YONKERS, NY

**NHTSA Summary:**

MY WIFE STARTED UP HER 1998 TOYOTA CAMRY. SLOWLY MADE A RIGHT TURN WHEN SUDDENLY THE AUTOMOBILE ACCELERATED AT A HIGH SPEED, JUMPED THE CURB, KNOCKED OVER A PARKING METER AND HIT THE SIDE OF AN APARTMENT HOUSE. SHE WAS NOT HURT AND THE AIR BAG DID NOT DEPLOY, DESPITE THE IMPACT. TOYOTA, WHICH HAD JUST SERVICED THE CAR TWO WEEKS BEFORE, REPAIRED THE CAR (WITH MY INSURANCE). WE INSISTED ON A FULL INVESTIGATION BY TOYOTA, WHO DETERMINED THAT THE FLOOR MAT JAMMED THE ACCELERATOR. WE DO NOT BUY THAT STORY IN LIGHT OF RECENT EVENTS AND WHAT HAPPENED TO US, AND THAT IS WHY WE ARE WRITING NOW TO SHOW THIS PROBLEM HAS EXISTED FOR A WHILE. \*TR

**NHTSA Summary:**

DRIVING MY 2007 TOYOTA FJ CRUISER V6 4X 4 ON A LONG STRETCH OF TWO LANE HIGHWAY IN CLEAR WEATHER CONDITIONS. CRUISE CONTROL WAS SET AT 70 MPH. VEHICLE STARTED SPEEDING UP ON ITS OWN TO ABOUT 85 MPH. I THOUGHT SOMETHING WAS WRONG WITH THE CRUISE CONTROL. TURNED OFF CRUISE CONTROL. NOTHING HAPPENED. CAR WAS STILL ACCELERATING. HIT THE BRAKE PEDAL AND NOTHING HAPPENED. CAR WAS STILL ACCELERATING ON ITS OWN. I WAS GETTING READY TO PUT THE CAR INTO NEUTRAL, OR PULL THE EMERGENCY BRAKE... WHEN I DECIDED TO HIT THE BRAKE PEDAL HARD WITH BOTH FEET SEVERAL TIMES. CAR FINALLY STARTED SLOWING DOWN. IT WAS LIKE THE VEHICLE HAD A MIND OF ITS OWN. THIS OCCURRED JUST BEFORE 7/20/09 AND I TOOK THE VEHICLE INTO TOYOTA FOR REPAIR WHEN WE RETURNED HOME. THEY COULDN'T FIND ANYTHING WRONG WITH IT. HAVEN'T HAD THE ISSUE SINCE. BUT AM AFRAID TO DRIVE THE CAR ON LONG STRETCHES OF HIGHWAY. THIS CAR IS NOT CURRENTLY ON THE RECALL LIST. TOYOTA HAD A CERTIFIED MASTER TECHNICIAN RUN A SYSTEM TEST ON ALL COMPUTER SYSTEMS IN VEHICLE AND FOUND NO PROBLEM WITH THE CRUISE FUNCTION OR ANY OTHER ELECTRONIC CONTROL COMPONENTS. THIS WAS ON 7/20/07, THAT THEY CONFIRMED ALL SYSTEMS WERE OPERATING AS DESIGNED. I HAD TWO WITNESSES IN THE CAR WITH ME AND THEY SAW WHAT HAPPENED. I WAS LUCKY THERE WERE NO OTHER CARS ON THAT STRETCH OF THE HIGHWAY DURING THAT 15-20 MINUTE TIME FRAME.

**NHTSA Summary:**  
DRIVING ON A PRIMARY SURFACE STREET, I STOPPED AT A RED LIGHT. I WAS THE FIRST CAR IN THE LANE. WHEN THE LIGHT TURNED GREEN I ACCELERATED TO CHANGE LANES, THE CAR PICKED UP SPEED AND THE BRAKES COULD NOT STOP IT. THE CAR GROWLED AND JERKED FOR A COUPLE OF BLOCKS UNTIL I FORCED THE GEAR OUT OF "DRIVE". IT FINALLY STOPPED BEFORE THE NEXT INTERSECTION. I DID NOT LOSE CONTROL OF THE CAR AND DID NOT HIT ANYONE. THE CAR WAS AT THE LEXUS REPAIRS DEPT. FOR 5 DAYS. I WAS TOLD THAT I COULD NOT KEEP THE TWO FLOOR MATS. THEY REMOVED THE FACTORY INSTALLED CARPETED MAT, PLACED IT IN THE TRUNK AND LEFT THE THIN, CLEAR, PROTECTIVE PLASTIC FLOOR MAT FROM LEXUS. I NEVER HAD ALL-WEATHER FLOOR MATS. I DO NOT KNOW IF THERE IS ANY DAMAGE TO THE TRANSMISSION, ENGINE OR BRAKES. PRIOR TO THE INCIDENT AND SINCE I HAVE OCCASIONALLY FOUND IT ACCELERATING BUT IT STOPS BY BRAKING. I HAVE NOT ATTEMPTED A HIGH ACCELERATING TEST. WHEN I TOOK THE CAR TO THE REPAIRS DEPT. I ASK IF THEY KNEW OF OTHER SIMILAR INSTANCES AND WAS TOLD "NO". I ONLY HAD 1,582 MILES AT THE TIME AND I THOUGHT I WAS THE ONLY ONE WITH THE PROBLEM. ON AUGUST 16, 2007 THERE WAS AN ARTICLE IN THE NEWSPAPER REFERRING TO YOUR INVESTIGATION AND NOW REQUEST THAT MY INCIDENT BE INCLUDED. \*TR THE CONSUMER PROVIDED PICTURES OF THE FLOOR MATS, ACCELERATOR PEDAL AND A REPAIR INVOICE. + OUTGOING CUST CALL +  
NCR spoke to cust probe for status of concern. Cust sts got rid of truck and ok to close.

\*\*\* CASE CLOSE 09/05/2007 10:16:11 AM ETorres1  
---CLOSE SUMMARY---  
1. SUMMARY: cust sts gas pedal stuck & caused veh transmission to get stuck & rev  
2. ACTION TAKEN: dlr inspected to find rubber mat wedged under pedal  
3. RESOLUTION/POSITION: dlr can not duplicate concern  
4. CUSTOMER SATISFIED: unknown  
5. ROOT CAUSE: product-abnormal condition- gas pedal

\*\*\* SUBCASE 200707250064-1 CLOSED 09/05/2007 10:16:25 AM ETorres1  
Cust got rid of truck. I WAS DRIVING MY NEW 2007 TOYOTA TACOMA ON THE HIGHWAY. I WENT TO ACCELERATE TO PASS ANOTHER VEHICLE WHEN MY TRUCK SUDDENLY WENT COMPLETELY OUT OF CONTROL(AS IF THE CRUISE CONTROL HAD TAKEN OVER) THE GAS PEDAL \*PUSHED ITSELF\* TO THE FLOOR. THE TRUCK WAS ACCELERATING AS FAST AS IT COULD GO, RPM PAST 7000(COMPLETELY RED LINING). I APPLIED THE BRAKE WHICH DID NOTHING, TRUCK JUST KEPT ACCELERATING TO TOP SPEEDS. I HAD BOTH FEET ON THE BRAKE WITH ALL MY STRENGTH TO KEEP FROM CRASHING INTO OTHER CARS ON THE HIGHWAY. COUNTERBALANCING IT AT ABOUT 60-70 MPH(WHILE THE BRAKES WERE SMOKING). I TRIED PUMPING THE BRAKE, BUT THE SECOND I TOOK MY FOOT OFF, IT KEPT ACCELERATING FASTER TRYING TO GO 120 MPH. SOMEHOW RIDING THE BRAKE AS HARD AS I COULD I WEAVING IN AND OUT OF TRAFFIC I GOT INTO THE BRAKE DOWN LANE. STILL NOT ABLE TO STOP THE VEHICLE I THREW IT IN PARK, WHICH STOPPED IT, BUT THE GAS PEDAL WAS STILL STUCK TO THE FLOOR. ENGINE WAS SCREAMING, RPM AT 7000, AND THE TIRES ARE SPINNING BURNING RUBBER. I THEN TURNED THE TRUCK OFF, TURNED IT BACK ON AND IT WAS STILL DOING THE SAME THING UNTIL I REALIZED THE GAS PEDAL WAS ACTUALLY STUCK SO I HIT IT AND IT RELEASED. ONCE I UNSTUCK THE PEDAL THE VEHICLE SEEMED OK SO I DROVE HOME VERY CAUTIOUSLY. WHEN I AS ALMOST HOME I ACCELERATED WITH A LITTLE TO MUCH JUICE AND IT DID THE SAME THING A SECOND TIME. THE PEDAL TOOK OVER AND FLOORED ITSELF, ACCELERATING TO TOP SPEED AND TOP RPM'S. THIS TIME I IMMEDIATELY TURNED THE VEHICLE OFF, UNSTUCK THE PEDAL AND AGAIN CAREFULLY FINISHED MY DRIVE HOME. REPORTED THE INCIDENT THE NEXT MORNING. THEY SAID NOTHING IS WRONG WITH IT, AFTER A MONTH OF FIGHTING TRADED THE TRUCK IN. \*JB \*DSY

E-mail verbatim "My cruise not maintain a consistent speed when going down and up hills. I have had it in three times for this problem. My truck is a 2006 with 10,000 miles. When I drive around town I get 20-21 miles per gallon. Recently we took about a 600 mile trip and averaged just over 17 miles per gal, using cruise. Now you tell me if the cruise is working correctly. If you have any ideas what I can do, please let me know. Maplewood Toyota Mn. has been trying to help me. They are wonderful there but no results at this time. I did drive a new one and it worked perfect."

\*\*\* CASE CLOSE 07/24/2007 01:11:37 PM KWilson  
Via e-mail ncr responded per O/M:

Dear Mr. Gage:

Thank you for contacting Toyota Motor Sales, U.S.A., Inc.

We apologize for your concern with the cruise control in your 2006 Tacoma.

In Section 1-7 (Operation of Instruments and Control) of the Owner's Manual for your Tacoma advises if the vehicle speed is too fast when going downhill in relation to the cruise control set speed, cancel the cruise control then downshift the transmission to use engine braking to slow down. Changes in the Tacoma's speed may occur on steeper grades.

Your email has been documented at our National Headquarters under file # 200707240771. If we can be of further assistance, please feel free to contact us <http://toyota.custhelp.com/cgi-bin/toyota.cgi/php/enduser/std\_adp.php?p\_faqid=4164>.

\*\*\* SUBCASE 200707240771-1 CREATED 07/30/2007 09:09:35 AM DHoffman1  
CUST EMAIL 07/28/2007 07:42 AM: Incident created due to reply to expired incident 070724-000111. I am sorry I didn't explain the problem correctly. When the cruise is set at any speed it doesn't matter. When going down a hill it does not have to be steep, here is the problem, after you get to the bottom of the hill and start to go up another hill it also does not have to be steep the vehicle continues to slow down, up to 6 miles per hour, then it is like the cruise control is sleeping and then realizes it is on and then you better hang on because on some of the inclines it will accelerate sharply because it has lost so much speed. I believe what the cruise is supposed to do is MAINTAIN SPEED. The problem when I go to the dealers there are no hills around to really demonstrate the problem. I love this truck but this is very frustrating to me because the dealers say this is normal. I have been in the auto repair industry since 1970. I have driven thousands of new cars including Toyotas and have never had any customers complain of this kind of problem. Is it time to go back to Chevrolets? This

C-950

Safety Research & Strategies

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

particular vehicle varies as much as 3-8 miles an hour depending on the hills and provides a very frustrating ride. Plus horrible gas mileage with the cruise control on. I would hate to be following me.  
Thank You,  
Ron Gage  
gagesrl@erthlink.net

\*\*\* SUBCASE 200707240771-2 CREATED 07/30/2007 09:53:53 AM DHoffman1  
EMAIL RESPONSE: <as-html>

Thank you for contacting Toyota Motor Sales, U.S.A., Inc.->

We apologize for any concerns you are having with your vehicle->

Our office is not a technical center, but there is some information we would like to offer you. The cruise control is designed for vehicle cruising on freeways with minimum requirements for transmission shifting. It is not recommended for uphill or downhill driving. Normal cruise control systems do not activate the brakes to slow a vehicle down. <p>

However, in the interest of customer service, and in order to properly assess your concerns, we recommend you contact the Customer Relations Manager at your <a href="http://www.toyota.com/dealers/TARGET=BLANK-local Toyota dealership">a> to further evaluate your 2006 Tacoma. <p>  
Toyota dealership technicians are specialized in the diagnosis and repair of Toyota vehicles. They are provided with extensive training and have access to state-of-the-art equipment to help in the accurate diagnosis of your vehicle. Also, if necessary, we provide additional support to assist Toyota dealership technicians in resolving unusual vehicle concerns. <p>

Your email has been documented at our National Headquarters under file #Sincidents.eclarifycasenumber. If we can be of further assistance, please feel free to <a href="http://toyota.custhelp.com/cgi-bin/toyota.cgi/php/enduser/std\_adp.php?p\_faqid=4164">a href="http://toyota.custhelp.com/cgi-bin/toyota.cgi/php/enduser/std\_adp.php?p\_faqid=4164">TARGET=BLANK >contact us</a>.<p>

\*\*\* PHONE LOG 07/31/2006 12:38:40 PM KDeocampo Action Type: Outgoing call  
I spoke w/cust C.Castellano. Cust explained he was in a dangerous situation w/his floor mats. Cust sts he has regular carpet floor mat on driver side along w/all weather rubber floor mat on top. Cust sts the rubber floor mat moved up to the accelerator & depressed the pedal. Cust had a hard time trying to depress the brake b/c gas pedal was being depressed by rubber floor mat. His wife had to reach down to move the floor mat away from the pedal. Cust dissat & sts he could have hit another driver b/c of issue. Cust wants to know if both carpets should be used at the same time b/c hooks do not fit both mats. Also, he wants to know why both corners of rubber floor mat is cutout, on left side it's cutout double the space then the right side. Apol for experience & informed cust I will look further into his tech question. Cust satis.

\*\*\* PHONE LOG 08/18/2006 12:38:28 PM KDeocampo Action Type: Outgoing call  
Left v/m for cust at day phone#.

\*\*\* PHONE LOG 08/21/2006 12:22:04 PM KDeocampo Action Type: Outgoing call  
Left 2nd v/m for cust at day phone#.

\*\*\*IF CUST CALLS, PLS APOL TO CUST FOR EXPERIENCE W/FLOOR MATS. Please inform cust it is not necessary for him to use both rubber & carpet floor mats at the same time, he may choose to use one or the other. Also the cutout on the left is design of floor mat. Thanks.

\*\*\* SUBCASE 200607310905-1 CLOSED 08/25/2006 01:34:27 PM KDeocampo

\*\*\* CASE CLOSE 08/25/2006 01:36:11 PM KDeocampo

LCS- Supe left several messages for cust regarding his concern w/floor mats.

\*\*\*IF CUST CALLS, PLS APOL TO CUST FOR EXPERIENCE W/FLOOR MATS. Please inform cust it is not necessary for him to use both rubber & carpet floor mats at the same time, he may choose to use one or the other. Also the cutout on the left is design of floor mat. Thanks.

\*\*\* NOTES 09/27/2006 01:54:59 PM MChow

Cust c/b to spk to KDeocampo, adv of notes. Cust had much product development feedback for cust. Cust wants to know why the center console is more narrow in the new ES 350. Cust also wants to know why the Lexus link buttons are thinner and feels they should be illuminated at night. Cust also feels the tray is too small to hold anything. Cust is concerned about other ES 350 drivers' safety, b/c he feels the floor mats are poorly designed. Cust wants a concrete ans.

\*\*\* NOTES 09/27/2006 01:55:18 PM MChow

Adv concerns would be doc at HQ and we appreciated his feedback.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TL\* THE CONTACT OWNS A 2006 TOYOTA PRIUS. THE CONTACT WAS DRIVING APPROXIMATELY 30 MPH ON NORMAL ROAD CONDITIONS. THERE WAS PRESSURE APPLIED TO THE ACCELERATOR PEDAL, FOLLOWED BY AN UNINTENDED INCREASE IN ACCELERATION. THE DRIVER APPLIED PRESSURE TO THE BRAKE PEDAL AND THE VEHICLE FAILED TO SLOW DOWN. THE GEAR SHIFT FAILED TO OPERATE IN THE "NEUTRAL" POSITION. IN ADDITION, THE ENTIRE GEAR INDICATORS ILLUMINATED AT THE SAME TIME. THE VEHICLE WAS DRIVEN INTO A BARRIER OF DIRT AS A RESULT OF THE VEHICLE COMING TO A COMPLETE STOP. THE FAILURES OCCURRED ON FOUR SEPARATE OCCASIONS. THE VEHICLE WAS TOWED TO AN AUTHORIZED DEALER. THE TECHNICIAN WAS UNABLE TO DUPLICATE THE FAILURE. THE VEHICLE HAS NOT BEEN REPAIRED FOR THE MALFUNCTIONS. THE FAILURE MILEAGE WAS 41,404.

**Date of Incident:** 20070810  
**Vehicle:** 2006 LEXUS LX470  
**Location of Incident:** LITCHFIELD, CT

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2006 LEXUS LX470. WHILE PULLING INTO A PARKING SPACE ON AN INCLINE, THE VEHICLE AUTOMATICALLY ACCELERATED AND CRASHED INTO A NAIL SALON. THE DEALER STATED THAT THE FAILURE WAS CALLED AN UN-COMMANDED ACCELERATION. THROUGH RESEARCH, THE CONTACT DISCOVERED A PATTERN FOR THIS TYPE OF FAILURE AMONG TOYOTA VEHICLES. SHE HAS NOT YET NOTIFIED THE MANUFACTURER. THE VEHICLE IS NOT DESTROYED, HOWEVER, THERE IS \$22,000 WORTH OF DAMAGE. A POLICE REPORT WAS FILED. WHEN THE VEHICLE WAS STARTED THE DAY BEFORE THE CRASH, THE THROTTLE EXPANDED AND THE ENGINE BEGAN TO REV. THE VEHICLE THEN IDLED DOWN AND BEGAN TO OPERATE NORMALLY. THE CONTACT STATED THAT THE VEHICLE DID NOT MOVE UNTIL THE ENGINE DIED DOWN. THE SPEED WAS UNKNOWN. THE FAILURE AND CURRENT MILEAGES WERE 35,000. THE CONSUMER PROVIDED PICTURES AND AN ARTICLE PERTAINING TO THE INCIDENT. A CONNECTICUT ACCIDENT REPORT WAS ALSO SUBMITTED. UPDATED 08/28/07 \*TR

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** SALEM, OR

**NHTSA Summary:**  
ON 1 THREE DIFFERENT OCCASIONS THE THROTTLE STUCK ON MY 2007 V6 CAMRY XLE. FIRST TIME WITH THE CRUISE CONTROL ON AND I COULD NOT TURN THE CC OFF. CAR ACCELERATED TO 80MPH BEFORE IT SETTLED DOWN. SECOND TIME I WAS MERGING INTO TRAFFIC AND WHEN TRAFFIC CAME TO A STOP MY CAR KEPT ACCELERATING. I AVOIDED REARENDING THE CAR AHEAD OF ME BY STANDING ON THE BRAKES WHILE THE ENGINE WAS JUST RACING. THIRD TIME. AFTER STOPPING AT A RAILROAD CROSSING ... WHEN TRAFFIC RESUMED THE CAR TOOK OFF AGAIN, THIS TIME THROUGH A SCHOOL ZONE .... THAT WAS THE FINAL STRAW FOR ME. TOYOTA SAYS THEIR IS NO PROBLEM WITH THIS CAR OR ANY OF THE OTHER 2007 I FEEL THE CAR IS UNSAFE FOR ME AND MY FAMILY ALONG WITH OTHERS ON THE ROAD. I ASKED THE SELLING DEALER TO TRADE MY 2007 FOR ANOTHER 2007 SINCE I LIKE THE CAR, BUT NOT THIS PROBLEM ... HE DID NOT SEEM INTERESTED AND SAID THAT TOYOTA WOULD NOT HELP ME WITH THE DEPRECIATION OF MY CAR. I WENT TO A DEALER CLOSER TO HOME AND TRADED MY 2007 FOR A NEW 2007. SAME MODEL SAME FEATURES. I COMPLAINT IS THAT I OWNED AN UNSAFE VEHICLE AND I DO NOT BELIEVE THAT I SHOULD HAVE TO TAKE FULL DEPRECIATION ON A CAR THAT WAS UNSAFE TO DRIVE. TOYOTA DENIES A PROBLEM WITH THE CAR, BUT I'M THE ONE AT RISK DRIVING IT ... THE SECOND DEALER DID WHAT HE COULD FOR ME. BUT I AM PAYING \$ 8,000 DIFFERENCE FOR A CAR I SHOULD HAVE HAD TO START WITH ... I DO NOT EXPECT TO DRIVE A CAR FOR ONE YEAR AND 14,000 MILES FOR FREE, BUT I ALSO WOULD NOT HAVE TRADED IF THE CAR WAS SAFE. I AM LOOKING FOR SOME FAIR FINANCIAL RELIEF FROM TOYOTA ... OR AT LEAST MAKE PEOPLE AWARE OF A SERIOUS SAFETY ISSUE WITH SOME OF THEIR MODELS. \*TR

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

+INCOMING REGION CALL+  
FTS, BMaloney, calling. Sts he is at Desert Toyota today. Sts he was not scheduled at Findlay. CM confirmed per above case notes dated 8/17/07, factory inspection was scheduled for today at Findlay Toyota. FTS sts, he will try to make it to Findlay Toyota to inspect veh, but cannot offer guarantees.  
\*\*\* NOTES 09/17/2007 09:59:41 AM JCabrera  
+INCOMING FTS CALL+  
FTS, BMaloney, calling. Sts he inspected veh on Friday, 9/14. Sts parts have been ordered. Sts no loaner veh provided as veh is driveable & in customer's possession. Sts cust will return to dlr when parts arrive. FTS ordered a fender stay for left side. CM thanked.  
\*\*\* NOTES 09/17/2007 10:03:18 AM JCabrera  
+OUTGOING CUST CALL+  
CM contacted cust at daytime#. Cust unavailable. CM left message & adv per FTS, parts have been ordered. CM adv will keep cust posted on any new updates. Adv will fu w/dlr & check status of part arrival. Adv may call back CM if needed at 800# & login id for direct contact.  
\*\*\* NOTES 09/19/2007 01:48:39 PM JCabrera  
+OUTGOING DLR CALL+  
CM contacted dlr & spoke to Heather in service. She confirmed parts arrived today. Sts shop foreman, Victor Camperi, is handling case personally and will call cust to adv of part arrival tomorrow. Sts shop foreman is at tech training today. CM thanked for update.  
\*\*\* NOTES 09/24/2007 10:40:42 AM JCabrera  
+OUTGOING DLR CALL+  
CM contacted dlr & spoke to SM, Steve. He sts, parts arrived & rprs have been done, however, cust has contacted dlr & indicated that rattle noise has continued. Cust has scheduled an appt for today to have his veh re-inspected. SM sts, cust has not checked in veh yet. CM thanked for update.  
\*\*\* NOTES 09/24/2007 10:42:01 AM JCabrera  
+OUTGOING CUST CALL+  
CM contacted cust at daytime#. CM received busy tone.  
\*\*\* NOTES 09/24/2007 10:44:29 AM JCabrera  
+OUTGOING CUST CALL+  
CM contacted cust at ALTH. Cust unavailable. CM adv, will be contacting dlr tomorrow after veh is inspected for results of diag. Adv call back 800# & login id for direct contact.  
\*\*\* NOTES 09/26/2007 12:31:21 PM JCabrera  
+OUTGOING DLR CALL+  
CM contacted dlr & spoke to SM, Steve. Sts veh was checked in yesterday for a noise concern. Dlr found a broken rear spring near brake line. Rprs are complete, but veh has not been released to cust. SM sts, veh will be taken for a final test drive & cust will be contacted. CM thanked.  
\*\*\* NOTES 09/27/2007 04:51:05 PM JCabrera  
+OUTGOING CUST CALL+  
CM contacted cust at daytime#. Cust unavailable. CM left message & adv call back 800#, login id for direct contact, & office hours.  
\*\*\* NOTES 09/28/2007 09:41:17 AM JCabrera  
+INCOMING CUST CALL+  
Cust sts he picked up veh & problem was corrected. Cust sts is satisfied w/rprs. CM invited cust to call back CEC w/any future questions or concerns. Cust thanked.  
\*\*\* CASE CLOSE 09/28/2007 09:44:55 AM JCabrera  
1. SUMMARY: Cust sts both sides of fender on the extended bed braces have broken 2x.  
2. ACTION TAKEN: FTS & SM  
3. RESOLUTION: Fender stay for left side was rplcd & broken rear spring near brake line was rplcd.  
4. CUSTOMER SATISFIED: Yes  
5. ROOT CAUSE: Product; Recurring Condition; Truck Bed- Body; Other-Please Specify

**Toyota ID Number:** 200708200244  
**NHTSA ODI Number:**  
**Date of Incident:** 20070818  
**Vehicle:** 2004 Toyota SIENNA  
**Location of Incident:** FAIRFAX, VA  
**NHTSA Summary:**  
\*\*\* PHONE LOG 08/20/2007 07:35:57 AM SBaker  
RNT#070819-000139 E-mailer sts: 'My wife, (redact) and I bought this vehicle new from Ourisman Chantilly Toyota, Chantilly, VA on Jan 24, 2004. On Saturday evening, Aug 18, 2007, we were driving home from dinner and were coming on to the ramp leading on to US 50 West in Fairfax, VA when I accelerated the car to merge safely on to US 50 in order to turn left at the next intersection (US 50 and Rugby Road). Suddenly ...  
\*\*\* NOTES 08/20/2007 07:36:37 AM SBaker  
... the car kept accelerating and would not slow even as I firmly stepped on the brake. We nearly collided with several vehicles waiting for the light to turn at the US 50/Rugby intersection. I put the car into Neutral which slowed it a bit as the engine roared very very loudly. I somehow managed to turn right on Rugby at about 30MPH, almost hitting a vehicle waiting for the light, ...  
\*\*\* NOTES 08/20/2007 07:37:04 AM SBaker  
... and turn the car into a side street where I finally managed to slow to a halt. I turned off the ignition, but when I turned it on again the engine wanted to accelerate again. I turned it off and waited there with my wife, in complete shock. Several minutes later, I turned the car on again, and this time it acted normally, and we drove the remaining mile home safely, ...  
\*\*\* NOTES 08/20/2007 07:37:53 AM SBaker  
... with emergency flashers on. We will be taking the car to Ourisman this evening for then to look at it tomorrow morning, but I have my reservations that they will do anything to repair this most serious defect that could have resulted in death or serious injury. ...  
\*\*\* NOTES 08/20/2007 07:38:52 AM SBaker  
... You see, since we bought the Toyota (Vehicle ID Number 5TDBA22C54S013273) in 2004, we have it in to Ourisman several times on the complaint that the car, after having stopped at a traffic light, would start off slowly and sluggishly and then suddenly lurch forward. Ourisman could never find the problem. We are dismayed and profoundly fearful at the unpredictability of this car ...  
\*\*\* NOTES 08/20/2007 07:39:32 AM SBaker  
... and if the problem is not fixed, could jeopardize us and other motorists. Yesterday's experience was bone jarring, and we are fortunate to have avoided a bad accident. **Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10203124  
**Date of Incident:** 20070818  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** LENOIR, NC

**NHTSA Summary:**  
OUR 2007 CAMRY HESITATES WHEN ACCELERATING FROM A STOP OR ACCELERATING FROM A LOW SPEED. THE SITUATION HAS OCCURRED SEVERAL TIME BOTH BEFORE AND AFTER THE COMPUTER WAS RESET. \*JB  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10200951  
**Date of Incident:** 20070819  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** GUNTERSVILLE, AL

**NHTSA Summary:**  
UNINTENDED ACCELERATION OCCURRED WHILE OPERATING AT SLOW SPEED RESULTING IN A COLLISION WITH PARKED VEHICLES AND DEPLOYMENT OF AIRBAG. MY WIFE IS THE PRIMARY DRIVER OF THE VEHICLE AND HAS COMPLAINED ON AT LEAST TWO PREVIOUS OCCASIONS THAT, WHILE PARKING, THE ANTI-LOCK BRAKING SYSTEM ACTIVATED AND THE CAR ACCELERATED WITH HER FOOT ON THE BRAKE PEDAL. THIS OCCURRED WHILE TRAVELING AT APPROXIMATELY 5 TO 10 MPH IN A RIGHT TURN. ON ONE OTHER OCCASION SHE STATED THAT THE BRAKES WOULD NOT STOP THE CAR AND THE ENGINE SPEEDED UP AS SHE WAS BRAKED FOR AN INTERSECTION ? AGAIN SHE STATED THAT THE ANTI-LOCK BRAKES ACTIVATED REDUCING BRAKING EFFECTIVENESS AND ALLOWING THE ENGINE TO ACCELERATE THE CAR. I TEST DROVE THE CAR EACH TIME AND FOUND THAT IT OPERATED NORMALLY. THESE EVENTS HAVE OCCURRED DURING THE 2 YEARS WE HAVE OWNED THE CAR. THE ACCELERATION DURING THE LAST EVENT WAS STRONGER AND RESULTED IN A CRASH. MY WIFE HAS A GOOD DRIVING RECORD, KNOWS IF SHE IS DEPRESSING GAS PEDAL INSTEAD OF THE BRAKE PEDAL, AND THE FLOOR MAT WAS NOT A FACTOR. THE 2005 TOYOTA CAMRY WAS NEW WHEN WE PURCHASED IT. THE CAR HAS IS LOCATED AT A LOCAL AUTO BODY SHOP FOR REPAIR. \*JB

**Toyota ID Number:**  
**NHTSA ODI Number:** 10313976  
**Date of Incident:** 20070819  
**Vehicle:** 1991 TOYOTA COROLLA  
**Location of Incident:** NASHUA, NH

**NHTSA Summary:**  
MY CAR ACCELERATED ON REVERSE WHEREIN INSTEAD OF MAKING A 90 DEGREES ANGLE THE CAR WENT SWIPING IN 180 DEGREES. BOTH TIMES WAS RAINY. BOTH TIMES THE HEADLIGHTS & THE WINDSHIELD WIPER & THE BACK WINDOW DEFOGGER IS ON. DURING THIS BACK UP WHEN I TURN MY HEAD, THE REAR BACK WINDSHIELD WAS VERY BLURRY & TWICE THIS HAPPENS TO ME. BOTH TIMES I WAS MAKING A REVERSE LEFT SIDE CORNER. WHEN I BOUGHT THIS CAR THE LEFT BACKLIGHT IS DAMAGED. I PUT THINGS TOGETHER THAT MAYBE THE SAME THING HAD HAPPEN TO THE FIRST OWNER OF MY CAR. I HAVE DRIVEN IN ALL OVER THE WORLD FOR 18 YEARS, WITHOUT ANY ACCIDENT HAPPENED TO ME IN THE HIGHWAYS BUT THE ONLY TWO ACCIDENT I HAVE WITH SO FAR IS ON THIS CAR IN MY OWN BACKYARD, ON THE SAME EXACT MOTION, SAME WEATHER CONDITION. THE CAR WAS ON REVERSE. THE TWO TIMES IT HAPPENED WAS VERY IDENTICAL TO EACH OTHER.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10314621  
**Date of Incident:** 20070821  
**Vehicle:** 1998 TOYOTA AVALON  
**Location of Incident:** CHEMUNG, NY

**NHTSA Summary:**  
MY DAUGHTER PURCHASED A 1998 TOYOTA AVALON FROM A PRIVATE INDIVIDUAL. MY DAUGHTER'S FRIEND DROVE THE CAR HOME BECAUSE SHE COULD NOT DRIVE THE STANDARD VEHICLE MY DAUGHTER USED TO GET THE AVALON. MY DAUGHTER FOLLOWED IN THE VEHICLE THAT HAD STANDARD SHIFT. SUDDENLY, THE AVALON BEGAN ACCELERATING TO A SPEED OF OVER 90 MPH WHILE ON A SECONDARY ROAD. MY DAUGHTER'S FRIEND PUT BOTH FEET ON THE BRAKE AND THE EMERGENCY BRAKE WAS USED, BUT THE CAR DID NOT SLOW DOWN. MY DAUGHTER CALLED HER FRIEND ON HER CELL PHONE TO ASK HER WHY SHE WAS DRIVING SO FAST. HER FRIEND WAS HYSTERICAL AND SAID THE CAR WOULD NOT STOP. MY DAUGHTER IMMEDIATELY CALLED 911. JUST BEFORE A SHARP CURVE WHERE SHE WAS SURE SHE WOULD BE KILLED, THE CAR STOPPED. HER FRIEND GOT OUT OF THE CAR AND COLLAPSED ON THE GROUND. THE POLICE CALLED A TOW TRUCK AND ASSURED WITNESSES THAT SHE JUST HAD A LITTLE SCARE. THE CAR WAS TOWED TO A GARAGE IN SAYRE, PENNSYLVANIA. RELUCTANT TO BELIEVE THAT THIS HAPPENED AS DESCRIBED, THE MECHANIC DECIDED TO TAKE THE CAR FOR A DRIVE HIMSELF. THE SAME THING HAPPENED TO HIM, HOWEVER HE USED SOME METHOD TO GET THE CAR TO STOP. HE TOLD US THAT THERE WAS SOMETHING WRONG WITH THE THROTTLE. WE CONTACTED ARE LOCAL TOYOTA DEALERSHIP ABOUT THE PROBLEM; WE WERE TOLD THAT THEY HAD NEVER HEARD OF THIS HAPPENING WITH A TOYOTA. IN JANUARY 2009, I WAS ON THE PHONE WITH MY DAUGHTER, WHO NOW RESIDES IN TENNESSEE. SUDDENLY SHE YELLED, "MY GOD!" AFTER A SHORT SILENCE THAT SEEMED LIKE AN ETERNITY, SHE SAID SHE WAS AT A STOP LIGHT BEHIND ANOTHER CAR. HER FOOT WAS ON THE BRAKE, BUT THE MOTOR STARTED REVING LOUDLY. THE CAR THEN LURCHED FORWARD. BEFORE HITTING THE CAR IN FRONT OF HER, SHE PUT THE CAR IN PARK WHILE AT THE SAME TIME SHUTTING THE IGNITION OFF. SHE TOLD ME THAT THIS HAS HAPPENED A COUPLE OTHER TIMES RECENTLY. WE CALLED OUR LOCAL TOYOTA DEALERSHIP AGAIN TO INQUIRE ABOUT THE PROBLEM. THEY WOULD NOT ADMIT TO ANY PROBLEMS OF THIS NATURE.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10201595  
**Date of Incident:** 20070822  
**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** PORTLAND, OR

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2006 TOYOTA TACOMA. WHILE DRIVING 30 MPH, THE VEHICLE ACCELERATED UNCONTROLLABLY TO 95 MPH. THE DEALER STATED THAT A TOYOTA ENGINEER NEEDED TO REPAIR THE VEHICLE, HOWEVER, ONE WOULD NOT BE AVAILABLE UNTIL SEPTEMBER 24, 2007. THE DEALER INFORMED THE CONTACT THAT HE COULD DRIVE THE VEHICLE IN THE INTERIM. THE VIN AND ENGINE SIZE WERE UNKNOWN. THE CURRENT AND FAILURE MILEAGES WERE 17,000.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316446  
**Date of Incident:** 20070822  
**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** SHERWOOD, OR

**NHTSA Summary:**  
WHEN DRIVING THERE IS A DELAYED THROTTLE RESPONSE WHICH HAS LED TO A SUDDEN ACCELERATION WHEN NOT EXPECTING IT. THIS HAPPENED ON DIFFERENT OCCASIONS INTERMITTENTLY ALMOST LEADING TO AN ACCIDENT. I CALLED MY TOYOTA DEALER ON AUGUST 22/07, SPET 2007 AND THEN CALLED TOYOTA ON NOVEMBER 1, 2007. I WAS ADVISED THAT THIS SUDDEN DELAYED ACCELERATION WAS NORMAL FOR TOYOTA AS IT WAS BECAUSE THE COMPUTER SYSTEM SENDS A DELAYED MESSAGE AND I HAD TO ADJUST MY DRIVING TO ACCOMMODATE IT. IT HAS NOT HAPPENED NEARLY AS OFTEN AS THE FIRST FEW MONTHS BUT DOES OCCASIONALLY. IT IS SUDDEN AND FRIGHTENING WHEN IT HAPPENS.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10205974  
**Date of Incident:** 20070823  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** WEBSTER, MA

**NHTSA Summary:**  
THERE IS A SIGNIFICANT DELAY WHEN YOU TRY TO ACCELERATE IN THE 2007 TOYOTA CAMRY! AFTER A SCARY INCIDENT INVOLVING A TRACTOR TRAILER TRUCK, POOR ACCELERATION, AND A HILL, ( FORTUNATELY THERE WAS NO ACCIDENT) I CALLED TOYOTA HEADQUARTERS TO REPORT THE INCIDENT ( BECAUSE OF THE ACCELERATION DELAY). THEY WERE OF NO HELP, BUT TOLD ME TO BRING MY CAR TO THE LOCAL DEALER TO BE EXAMINED FOR THE ACCELERATION DELAY. THE DEALERS MECHANIC REPORTED BACK TO ME AFTER A QUICK EXAMINATION AND TEST DRIVE THAT THERE IS NO ACCELERATION DELAY ISSUE. AND THAT THE CAR IS BUILT THIS WAY. WHAT THE MECHANIC DID DO POSSIBLY TO APPEASE ME) WAS RE-SET THE ACCELERATION COMPONENT IN THE CAR'S COMPUTER. THIS 'ADJUSTMENT' HAS DONE NOTHING TO FIX THE ISSUE. AND I STILL EXPERIENCE ACCELERATION DELAY TO THIS DAY. UNFORTUNATELY, TOYOTA DOES NOT SEEM INTERESTED IN FIXING THIS POTENTIALLY DEADLY FLAW. I HOPE THERE ARE NO FATALITIES RESULTING FROM THIS PROBLEM. \*TR

**Toyota ID Number:**  
**NHTSA ODI Number:** 10200717  
**Date of Incident:** 20070824  
**Vehicle:** 2005 TOYOTA CAMRY SOLARA  
**Location of Incident:** MEDFORD, NY

**NHTSA Summary:**  
I WAS SURPRISED TO SEE HOW MANY IDENTICAL COMPLAINTS THERE WERE CONCERNING THE ACCELERATION LAG WITH THE 6 CYLINDER '05 SOLARA. MY COMPLAINTS TO TOYOTA YIELDED NO RESULTS. THE CAR HESITATES WHEN SLOWING THEN ACCELERATING THEN JUMPS FORWARD. SAME PROBLEM WHEN ACCELERATING TO MERGE WITH TRAFFIC. MANY CLOSE CALLS AND SNAPPING OF THE NECK ON ACCELERATION. DRIVE BY WIRE IS POOR SUBSTITUTION FOR DRIVE BY MECHANISM. \*TR  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10200807  
**Date of Incident:** 20070825  
**Vehicle:** 2004 LEXUS LS  
**Location of Incident:** PALM BEACH GARDENS, FL

**NHTSA Summary:**  
UNINTENDED ACCELERATION, AS I WAS PARKING THE VEHICLE SUDDENLY ACCELERATED AND JUMPED THE CURB AND RAN INTO THE BUILDING. I TRIED TO BACK OFF THE BUILDING AND COULD NOT STOP THE RACING ENGINE. THE VEHICLE SHOT BACKWARDS EVEN THOUGH I WAS ON THE BRAKE. IT WENT THROUGH SOME HEDGES OVER A RISE AND CROSSED THE STREET WHERE THE REAR HIT A PALM TREE AND COLLAPSED THE TRUNK. BOTH THE FRONT AND REAR WERE SEVERELY DAMAGED. NO AIR BAGS DEPLOYED. \*TR  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10201029  
**Date of Incident:** 20070825  
**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** FALLS CHURCH, VA

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2003 TOYOTA CAMRY. WHILE PULLING INTO A PARKING SPACE BETWEEN 3-5 MPH, THE ENGINE BEGAN TO REV. THE VEHICLE SURGED FORWARD WHEN THE CONTACT APPLIED MORE PRESSURE TO THE BRAKE PEDAL. THE VEHICLE CRASHED INTO A CONCRETE WALL AND THE AIR BAGS FAILED TO DEPLOY. HER KNEES WERE BADLY BRUISED. THE HOOD AND FRONT BUMPER WERE DAMAGED, BUT THE MAJORITY OF THE DAMAGE WAS ON THE PASSENGER SIDE OF THE VEHICLE. THE SIDE PANELS WERE MOVED AND MISALIGNED, WHICH IMPACTS THE OPENING AND CLOSING OF THE DOORS. THE PURCHASE DATE WAS UNKNOWN. THE CURRENT AND FAILURE MILEAGES WERE 58,500.  
**Additional Summary:**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

Location of Incident: EVANS, GA

**NHTSA Summary:**  
HESITATION WHEN TRYING TO PRESS GAS PEDAL USUALLY FROM A STOP. THIS COULD CAUSE AN ACCIDENT WHEN I BELIEVE I HAVE ENOUGH TIME TO GET OUT ON MAIN HIGHWAY FROM SIDE STREET AND THE SUV WON'T GO. TOOK TO DEALER, WHO SAID NORMAL. CRUISE DOES NOT WORK PROPERLY ON INCLINES. IT WILL JERK BACK AND FORTH UNTIL CRUISE TURNED OFF. MECHANIC RODE WITH ME AND SAID THIS SHD NOT BE HAPPENING, BUT TOYOTA HAS NO FIX FOR IT AT PRESENT; THEY DO NOT KNOW WHEN CALLED TOYOTA CALL CENTER. THEY SAID THIS VEHICLE NOT MEANT TO USE CRUISE ON INCLINES SO WHY PUT IT ON THE VEHICLE-PUT ON ON LEVEL ROAD. TAKE OFF WHEN SEE HILL APPROACHING-WHAT A JOKE). NEVER HAD A VEHICLE IN MY LIFE WHERE THE CRUISE WAS NOT MEANT TO BE USED AT ALL POINTS OF DRIVING. TOLD BY DEALERSHIP TO WAIT. THIS VEHICLE IS NEW AND I DO NOT WANT TO WAIT.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10204091  
**Date of Incident:** 20070828  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** MOUNT SINAI, NY

**NHTSA Summary:**  
I PURCHASED A 2007 CAMRY 4 CYLINDER XLE AUG. 2006. THE IMMEDIATE ISSUE I HAD WAS ITS LACK OF ACCELERATION. I WAS TOLD BY THE DEALERSHIP (COMPETITION TOYOTA OF NEW YORK) WAS TO CHANGE THE WAY WAS DRIVING THE CAR TO FORCE BETTER ACCELERATION. FEB. 10, 2007 I HAD MY OIL CHANGED AT THE COMPETITION TOYOTA. ASKED ABOUT THE ACCELERATION ISSUE AND WAS TOLD "NOTHING YET" FROM TOYOTA. AUG. 6, 2007, I WAS TOLD NEW SOFTWARE ARRIVED TO CORRECT THE ISSUE. THE VERBIAGE ON THE WORK SHEET STATES "PLEASE REVIEW TSBE036-07 FOR APPLICATION PERFORMED CALIBRATION ON ECM SHIFT ENHANCEMENT COMPLETED". THERE WAS AN IMPROVEMENT IN ACCELERATION FROM STOP SIGNS AND TRAFFIC LIGHTS. AUG. 28, 2007 I TOOK MY FIRST TRIP WITH THE UPGRADED SOFTWARE. THE ACCELERATION GETTING ON THE HIGHWAY WAS BETTER BUT NOT GREAT. I USED THE CRUISE CONTROL FEATURE FOR THE FIRST TIME SINCE THE UPGRADE. I DROVE 200 MILES, EXITED THE HIGHWAY, GOT GAS (SHUT OFF THE CAR). I DID NOT REACTIVATE THE CRUISE CONTROL. I PULLED INTO A PARKING GARAGE, FOUND A PARKING SPACE, BEGAN TO PULL IN WHEN THE CAR UNEXPECTEDLY ACCELERATED, HIT THE WALL AND I COULDN'T STOP THE TIRES FROM SPINNING EVEN BY DEPRESSING THE BRAKE. I THREW THE CAR INTO PARK AND SHUT OFF THE ENGINE. THERE WAS SUBSTANTIAL DAMAGE TO THE FRONT OF THE CAR BUT NO APPARENT DAMAGE TO THE ENGINE. AUG. 29, 2007 I DECIDED TO DRIVE IT HOME. UPON STARTING THE CAR, THE CRUISE CONTROL SYMBOL DISPLAYED AND WENT OFF ONLY AFTER I DEPRESSED THE CRUISE CONTROL LEVER A COUPLE TIMES. THE CAR WAS REPAIRED SEPT. 17, 2007, COMPETITION TOYOTA DID A COMPLIMENTARY SAFETY VEHICLE INSPECTION ON SEPT. 21, 2007 AND FOUND THE CAR TO BE SAFE TO OPERATE. I KNOW WHAT HAPPENED AND LIKE A DISAPPEARING TOOTHACHE I DON'T WANT THIS ISSUE DISMISSED BY THE PEOPLE AT TOYOTA AS A NON-EVENT. I STILL BELIEVE THIS IS NOT A COINCIDENCE HAVING THE ACCELERATION SOFTWARE UPDATED THEN ME HAVING THE ISSUES I HAVE STATED ABOVE. I DON'T WANT TO SEE A RE-OCCURRENCE OF THIS INCIDENT TO ME OR ANYONE ELSE. \*JB

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Vehicle:** 2007 LEXUS RX400H  
**Location of Incident:** COLUMBIA CITY, IN

**NHTSA Summary:**  
I JUST WANTED TO LET YOU KNOW THAT MY WIFE AND I HAVE EXPERIENCED THE ENGINE ACCELERATING ON THE 2007 LEXUS 400H WHILE COASTING TO STOP SIGNS. THIS OCCURRENCE STARTED ABOUT 3-4 MONTHS AFTER WE GOT THE CAR AND DOES NOT OCCUR ALL OF THE TIME. THE GAS PEDAL SEEMS TO OVERRIDE THE ENGINE ACCELERATION PROBLEM, HOWEVER, THE ISSUE SEEMS TO BE SIMILAR TO WHAT OTHERS HAVE SEEN IN OTHER CARS. THIS ISSUE HAS BEEN REPORTED TO THE DEALERSHIP IN THE PAST BEFORE THE RECALLS WITHOUT ANY SATISFACTORY ACTION. THIS MODEL IS NOT ON THE RECALL LIST, BUT I WANTED TO RAISE THE CONCERN AS IT SEEMS TO BE A PROBLEM SIMILAR TO WHAT IS HAPPENING IN OTHER VEHICLES AND MAY HELP TO INDICATE THAT THE TRUE ISSUE MAY NOT BE THE FLOOR MATS OR THE GAS PEDAL DESIGN. MY WIFE IS CONCERNED SINCE THE ENGINE IS ACCELERATING WITHOUT THE GAS PEDAL DEPRESSED. SINCE THE BRAKE IS OVERRIDING THE ACCELERATION, IT WOULD INDICATE TO ME THAT THE ISSUE IS NOT A STICKING GAS PEDAL.

**Additional Summary:**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Vehicle:** 2007 TOYOTA PRIUS  
**Location of Incident:** AUGUSTA, GA

**NHTSA Summary:**  
TOYOTA CASE#200709100295: MY NEAR DEATH EXPERIENCE DRIVE MY 2007 TOYOTA PRIUS ON AUGUST 30, 2007\*\* \*\*WHILE DRIVING MY 2007 PRIUS BEHIND A 16-WHEELER AND AT AN AVERAGE SPEED OF 60MPH, SUDDENLY MY PRIUS' ENGINE & MOTORS ROARED AND THE SPEED SURGED SO STRONGLY THAT IF I DIDN'T RIDE THE BRAKES, I SAW MYSELF RAMMING INTO THE BACK OF THE 16-WHEELER IN FRONT OF ME. ALSO AT THIS TIME, A CADILLAC SUV WAS FOLLOWING ME TO CLOSE ON THIS GEORGIA SECONDARY-HIGHWAY#121 WHEREBY I VISUALIZE A TRAGIC ACCIDENT ABOUT TO OCCUR. AFTER ABOUT A HALF-MILE RIDING THE BRAKES AND FEELING THE PULLING TORQUE OF THOSE POWERFUL ELECTRIC MOTORS ON THE FRONT WHEELS, I SAW MY CHANCE TO EXIT AHEAD WHERE TWO TRASH DUMPSTERS APPEARED. AS I STOPPED THE PRIUS, I NOTICE SMOKE COMING OVER THE HOOD. SO I JUMP OUT OF THE PRIUS. I SAW FLAMES ROUNDTHE FRONT WHEEL WELL THAT SOON FLAMED OUT. I CONTACTED AAA AUTO CLUB SOUTH AND HAD THE PRIUS TOWED 45 MILES BACK TO THE ANN TAYLOR TOYOTA DEALERSHIP/SERVICE CENTER WHERE I ORIGINALLY PURCHASED THE 2007 PRIUS. FIVE DAYS LATER, I WAS NOTIFIED BY THE SERVICE CENTER THAT A PIECE OF FLEXIBLE "CARPET MAT" SUDDENLY "RIGGIED" ENOUGH IN ORDER TO BECOMED WEDGED ONTO THE ACCELARATOR AND NO ADDITIONAL SERVICES REQUIRED. (INVOICE#T0CS368561 DATED 09/05/07) NOW IN DISBELIEF AND SCARED, I HAD MY 2007 PRIUS RE-INSPECTED AT PRECISION TUNE AUTO CARE (INVOICE#165110 DATED 09/06/07). THIS INSPECTED YIELDED EVIDENCE OF A PREVIOUS FIRE AND BURNED ROTORS! I CONTACTED BY PHONE TOYOTA CORP CUSTOMER SERVICE AND USAA AUTO INSURANCE. I CONTACTED A LEGAL ATTORNEY THAT ADVISED ME THAT MY CIRCUMSTANCES REQUIRED HIRING A MECHANICAL ENGINEER TO DISPROVE TOYOTA'S ASSERTION OR DRIVE THE VEHICLE UNTIL THE RUN-A-WAY ACCELARATION OCCURS AGAIN. AS OF THIS DATE, HAVING BEEN "STONEWALLED" THE PAST TWO YEARS, I WANT TO VERIFY THAT YOUR DEPARTMENT HAS A RECORD OF MY INCIDENT.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10323596  
**Date of Incident:** 20070830  
**Vehicle:** 2004 LEXUS ES330  
**Location of Incident:** HAMPTONVILLE, NC

**NHTSA Summary:**  
MY TRANSMISSION FEELS CONFUSED IN MY 2004 LEXUS ES 330. WHEN SLOWING DOWN TO TURN IN THE CITY OR PULL OUT OF YOUR DRIVEWAY MY CAR WILL HESITATE AND PAUSE FOR ABOUT A SECOND BEFORE ACCELERATING. THIS SEEMS TO BE VERY DANGEROUS AS I AM AFRAID THAT SOMEONE WILL HIT ME IN THE BACK BEFORE I CAN GET THE CAR UP TO THE DESIRED SPEED. I FIND MYSELF ALWAYS DOUBLE CHECKING SOMETIME TRIPLE CHECKING BEFORE I PULL OUT. I HAVE LOOKED ONLINE AT MANY DIFFERENT WEBSITES AND I HAVE FOUND ABOUT 1900+ PEOPLE WHO HAVE COMPLAINED ABOUT THIS PROBLEM.

UNINTENDED ACCELERATION RESULTING IN DAMAGE TO MY CAR AS WELL AS TWO OTHERS. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10306534  
**Date of Incident:** 20070831  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** BRYN MAWR, PA

**NHTSA Summary:**

I AM THE OWNER OF A 2007 TOYOTA CAMRY THAT IS PART OF BOTH RECALLS FOR THE FLOORMAT ISSUE AND THE ACCELERATION ISSUE. WHEN I FIRST PURCHASED MY CAR IN AUGUST 2007, I IMMEDIATELY NOTICED ACCELERATION PROBLEMS AND CALLED THE DEALERSHIP ABOUT IT. THE CAR WAS BROUGHT IN AND REPAIRS WERE MADE, HOWEVER, THE PROBLEM CONTINUED TO EXIST AND I WAS TOLD THAT IT WAS NOTHING SERIOUS. IN FEBRUARY 2008, WE WERE INVOLVED IN AN AUTO ACCIDENT IN MY VEHICLE WITH OUR TEENAGE DAUGHTER AND A FRIEND. WE WERE COMING TO A STOP LIGHT AND THERE WAS A CAR IN FRONT OF US AND OUR CAR CONTINUED TO ACCELERATE AND WE HIT THE BACK OF THE CAR IN FRONT OF US. THERE WAS SEVERE FRONT END DAMAGE TO MY VEHICLE, BUT THANKFULLY, NO REALLY BODILY INJURY TO THE PASSENGERS. AFTER PLACING A CALL TO THE DEALERSHIP AFTER THE ACCIDENT AND EXPLAINING THE ACCELERATION ISSUE TO THEM THAT I BELIEVE WAS THE REASON FOR THE ACCIDENT, I WAS TOLD THAT IT COULD NOT BE THE ISSUE AND THAT MY INITIAL ACCELERATION ISSUE HAD ALREADY BEEN FIXED. I HAVE FOUR CHILDREN THAT ARE IN MY CAR EVERY DAY AND I DO NOT FEEL SAFE IN MY VEHICLE. MY FLOORMAT ISSUE HAS NOT BEEN FIXED AND NEITHER HAS THE PEDAL ISSUE. I AM EXTREMELY DISSAPPOINTED WITH THE WAY THIS SITUATION IS BEING HANDLED, ESPECIALLY SINCE I FIRST NOTICED THE ISSUE RIGHT AFTER THE PURCHASE OF MY CAR AND I WAS ASSURED THAT IT WAS FIXED. PLEASE ADVISE. THANKS

**NHTSA ODI Number:** 10214896  
**Date of Incident:** 20070901  
**Vehicle:** 2006 SCION XB  
**Location of Incident:** MILWAUKEE, WI

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2006 TOYOTA SCION XB. WHILE DRIVING APPROXIMATELY 20 TO 50 MPH, THE HEADLIGHTS DIMMED AND VISIBILITY WAS REDUCED. THE LIGHTS WOULD ILLUMINATE AGAIN MOMENTS LATER. WHILE DRIVING 30 MPH UPHILL, THE VEHICLE ACCELERATED TO 60 MPH. THE BRAKES WERE APPLIED, BUT WOULD NOT FUNCTION UNLESS THEY WERE ENGAGED AT A RAPID PACE. OCCASIONALLY THE ENGINE SHUTS OFF. THE FRONT END SHAKES WHILE DRIVING 20-50 MPH, AND THE CRUISE CONTROL SWITCH FAILED TO ENGAGE. THE VEHICLE CONTINUED TO BURN AN EXCESSIVE AMOUNT OF FUEL AFTER THE OIL WAS CHANGED AND THE CHECK ENGINE LIGHT ILLUMINATED. THE RADIO FAILED AND THE DEALER STATED THAT THEY WOULD REPLACE IT WHEN THE PARTS ARRIVE. THE MECHANIC STATED THAT THE BACK OF THE BUMPER WAS SPLIT, WHICH CAUSED IT TO FALL OFF OF THE VEHICLE. THE DEALER ALSO OFFERED HER \$14,000 FOR THE VEHICLE ONLY IF SHE PAID THEM \$5,000. THE DEALER WAS UNABLE TO DUPLICATE THE FAILURE; HOWEVER, THEY STATED THAT THE FAILURES WERE ELECTRICAL. THE FAILURE MILEAGE WAS 400 AND CURRENT MILEAGE WAS 12,000. UPDATED 02-14-08. \*KB

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10308096

**Vehicle:** 2007 TOYOTA AVALON  
**Location of Incident:** FORT LEE, NJ

**NHTSA Summary:**

REPETITIVE...EVERY TIME I DRIVE..... TOYOTA AVALON 2007...I COMPLAINED TO TOYOTA THAT WHEN I REMOVE MY FOOT FROM THE ACCELERATOR / GAS PEDAL TO COAST TO A STOP, THE CAR IN FACT ACCELERATES AT ALMOST EACH SHIFT POINT, THUS FORCING ME TO APPLY THE BRAKES REPETITIVELY. THIS MAY CAUSE PREMATURE BRAKE WEAR. TOYOTA SAYS THIS "ACCELERATION AT EVERY SHIFT POINT" IS NORMAL DESPITE THE FACT THAT IN HUNDREDS OF THOUSANDS OF MILES AND IN HUNDREDS OF CARS OWNED AND RENTED, I HAVE NEVER EXPERIENCED THIS BEHAVIOR IN ANY VEHICLE. **Toyota ID Number:**  
**NHTSA ODI Number:** 10318865  
**Date of Incident:** 20070901  
**Vehicle:** 2007 TOYOTA COROLLA  
**Location of Incident:** CYPRESS, CA

**NHTSA Summary:**

I HAVE BEEN HAVING TWO SEPARATE PROBLEMS WITH THE ACCELERATION OF MY 2007 TOYOTA COROLLA LE. THE FIRST PROBLEM IS WITH MY GAS PEDAL. I NOTICED THAT OVER THE LAST SEVERAL MONTHS MY GAS PEDAL HAS BEEN BECOMING HARDER TO PRESS DOWN. WHEN I AM PRESSING DOWN THE GAS PEDAL I ALSO EXPERIENCE THE PROBLEM OF THE VEHICLE "JUMPING" AND SUDDENLY ACCELERATING QUICKER INSTEAD OF SMOOTH ACCELERATION AS TOYOTA HAS SAID VEHICLES SHOULD HAVE. THIS PROBLEM BEGAN ABOUT 8 MONTHS AGO AND HAS ONLY BEEN GETTING WORSE. THE SECOND ISSUE IS WITH MY CRUISE CONTROL. MY MOTHER ACTUALLY NOTICED THIS PROBLEM BEFORE I DID WHEN SHE WAS DRIVING MY CAR BUT I HAVE SEEN IT HAPPEN A FEW TIMES WHEN I'VE BEEN DRIVING ON THE FREEWAY. WHEN I SET MY CRUISE CONTROL AND THERE IS ANY TYPE OF HILL MY CAR NATURALLY DECELERATES SLIGHTLY BEFORE MY CRUISE CONTROL STEPS IN AND COMPENSATES FOR THE INCLINE. WHEN I RETURN TO FLAT GROUND HOWEVER, I WOULD EXPECT MY CAR TO RETURN TO THE SPEED THAT I HAD SET MY CRUISE CONTROL TO. MOST OF THE TIME IT DOES BUT ON MORE THAN ONE OCCASION INSTEAD OF PICKING BACK UP TO THE SET SPEED MY VEHICLE HAS ACTUALLY ACCELERATED FASTER THAN THE SPEED I HAD SET. THIS PROBLEM FIRST OCCURRED WITHIN 6 MONTHS OF THE PURCHASE OF MY VEHICLE. I DIDN'T NOTICE THESE AS A PROBLEM BECAUSE I HAD ALREADY CHECKED TO MAKE SURE MY TOYOTA WASN'T UNDER ANY CURRENT RECALLS AND IT WASN'T. MY MOTHER HOWEVER POINTED OUT THAT BOTH OF THESE THINGS ARE ABNORMAL AND I NEEDED TO TAKE THEM IN TO TOYOTA AND FILE A REPORT WITH YOU. I HAVE A SCHEDULED AN APPOINTMENT WITH TOYOTA FOR 10/22/10 BUT WAS TOLD IF THEY FIND A PROBLEM WITH EITHER OF THESE THINGS IT MAY NOT BE COVERED BECAUSE MY VEHICLE ISN'T UNDER THE RECALL.

**NHTSA Summary:**

I WAS EXITING A RESTAURANT WAITING TO TURN RIGHT ON A BUSY HIGHWAY. WHILE SITTING THERE WITH THE CAR IN DRIVE AND MY FOOT ON THE BRAKE PEDAL, THE ENGINE SUDDENLY STARTED RACING. THE CAR SUGRED FORWARD A COUPLE OF FEET BUT I PRESSED HARDER ON THE BRAKE PEDAL AND STOPPED IT AGAIN. I PUT THE CAR IN NEUTRAL AND TAPPED THE GAS PEDAL A COUPLE OF TIMES BUT THE ENGINE KEPT RACING VERY FAST. I FINALLY PUT THE CAR IN PARK AND TURNED THE KEY OFF. AFTER RESTARTING THE CAR, IT SEEMED TO BE FINE EXCEPT THE IDLE SEEMED TO BE A LITTLE BIT FASTER THAN NORMAL. I TOOK THE CAR TO A TOYOTA DEALER THE NEXT DAY BUT THEY WERE UNABLE TO DUPLICATE THE PROBLEM AND SAID THEY COULD NOT FIND ANYTHING WRONG. I WAS ASKED SEVERAL TIMES WHETHER MY FOOT COULD HAVE BEEN ON THE BRAKE AND GAS PEDALS AT THE SAME TIME BUT I AM ABSOLUTELY SURE THIS WAS NOT THE CASE. PLEASE REFERENCE ODI ID NUMBERS 10109072, 10173082, 10137143, 10125071, 10163070, 10200923, 10165337, 10166526 FOR SIMILAR COMPLAINTS RELATED TO 2005 AND 2006 COROLLAS. \*TR UPDATED 01-16-08. \*KB

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** HAVERTOWN, PA

**NHTSA Summary:**

2006 CAMRY...WHILE INCHING MY CAR FORWARD IN MY DRIVEWAY TO POSITION THE CAR TO BACK IT UP, I WAS APPLYING THE BRAKE AND MOVING AT A SPEED OF NO MORE THAN 2-3 MPH. THE CAR STARTED TO ACCELERATE WHICH KEPT INCREASING. I WAS TAKEN BY SURPRISE, DIDN'T KNOW WHAT WAS HAPPENING. I LOOKED DOWN AT THE ACCELERATOR TO MAKE SURE IT WASN'T ME. MY FOOT WAS ON THE BRAKE. BEFORE I KNEW IT, I HIT HEAD ON THE VERY LARGE TREE AT THE END OF MY DRIVEWAY. I WAS APPROXIMATELY 4 FT FROM THE TREE WHEN THE ENGINE STARTED REVVING. I HAD MY SEAT BELT ON, WHICH SAVED ME FROM SMACKING MY FACE ON THE STEERING WHEEL. MY HEAD JERKED FORWARD AND I HAD A TREMENDOUS HEADACHE AFTERWARDS WITH PAIN IN MY NECK. THE AIR BAG DID NOT DEPLOY. I PUT THE CAR IN PARK AND MY HUSBAND REACHED IN THE WINDOW AND TURNED THE ENGINE OFF. WHEN I STARTED IT UP AGAIN, THERE WAS NO PROBLEM AND I CAREFULLY MOVED IT AWAY FROM THE TREE. THE FORCE WITH WHICH I HIT THE TREE PUSHED IN MY FRONT END AND ALSO DID SOME DAMAGE UNDER THE HOOD SINCE THE POWER STEERING FLUID WAS LEAKING. I AM CURRENTLY WAITING FOR THE INSURANCE ADJUSTOR TO CHECK THIS OUT. HE DID SAY THAT IF HE DOESN'T EXPERIENCE THE SAME PROBLEM, HE DOESN'T KNOW WHAT CAN BE DONE BY TOYOTA. NEEDLESS TO SAY, I AM ANXIOUS FOR THE RESULTS AND WILL NOT FEEL SAFE DRIVING MY CAR. \*JB

**NHTSA Summary:**

THE LAST TOYOTA CAMRY I BOUGHT WAS IN 2007, IT WAS THE FIRST NEW CAMRY I EVER BOUGHT, I'VE OWNED 3 OTHERS IN MY LIFE, BUT THIS WAS THE FIRST NEW ONE I EVER PURCHASED. APX 9 MONTHS LATER ME AND MY WIFE WENT TO THE FL KEYS AND WENT TO BAHIA STATE PARK, AND UPON LEAVING THE PARK, I STILL DON'T KNOW WHAT HAPPENED, BUT WHEN GOING 10-15 MPH, THE CAR TOOK OFF AND WE ENDED UP HITTING A TREE HEAD ON. WE BOTH ENDED UP AT THE FISHERMAN'S HOSPITAL IN MARATHON ON OUR 2ND DAY ON VACATION ALONG WITH A \$120 TKT FROM THE FL HWAY PATROL. TWO WEEKS LATER I RECEIVED A RECALL FOR FLOOR MATS, I CALLED TOYOTA AND AFTER TALKING WITH A GIRL THERE IT WAS DETERMINED THAT I DIDN'T HAVE THE FLOOR MATS THAT WERE BEING RECALLED. I TOLD HER THAT THEY HAVE MORE THAN A MAT PROBLEM. SHE SAID I SHOULD SEND ALL INFO AS WELL AS MEDICAL BILLS TO THEM WHICH DID. I WAS NOTIFIED 2 WEEKS LATER THEY DETERMINED THAT THE ACCIDENT HAD NOTHING TO DO WITH THEIR RECALL. AGAIN I TOLD THE PERSON I SPOKE WITH THAT IT SEEMS AS IF THEY HAVE MORE THAN A FLOOR MAT PROBLEM. SUDDEN ACCELERATION?

**Toyota ID Number:**

**NHTSA ODI Number:** 10302981  
**Date of Incident:** 20070908  
**Vehicle:** 2008 TOYOTA CAMRY  
**Location of Incident:** HOPEDALE, MA

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2008 TOYOTA CAMRY. SHE PURCHASED THE VEHICLE BRAND NEW IN 2007. WITHIN A WEEK SHE ADVISED THE DEALER THAT THE VEHICLE PERFORMED AS IF IT WANTED TO MOVE FASTER THAN NORMAL AND WHEN SHE WAS AT A STOP LIGHT IT ALSO SURGED FORWARD. THE DEALER TOLD HER THE VEHICLE WAS COLD AND NEEDED TO WARM UP PRIOR TO DRIVING IT. THE DEALER ALSO TURNED THE IDLE DOWN AND THE VEHICLE CONTINUED TO SURGE. THE FAILURE MILEAGE WAS 500 AND THE CURRENT MILEAGE WAS 16,000.

**Additional Summary:**

**Toyota ID Number:**

**NHTSA ODI Number:** 10294147  
**Date of Incident:** 20070909  
**Vehicle:** 2006 TOYOTA CAMRY  
**Location of Incident:** SOUTHTON, CT

**NHTSA Summary:**

TL\* THE CONTACT OWNS A 2006 TOYOTA CAMRY. WHILE PARKING, THE VEHICLE RAPIDLY ACCELERATED OVER A CURB AND THROUGH THE GLASS OF A STORE- FRONT. A POLICE REPORT WAS FILED. HE CALLED THE TOYOTA MANUFACTURER AND FILED A COMPLAINT. HOWEVER HE HAS NOT RECEIVED A RESPONSE. THE DAMAGES TO THE VEHICLE AND THE STORE FRONT WERE OVER \$17,000. THE CURRENT MILEAGE WAS 20,000. THE VIN WAS UNAVAILABLE.

**Additional Summary:**

**NHTSA ODI Number:** 10208819  
**Date of Incident:** 20070910  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** LAFAYETTE, LA

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2007 TOYOTA CAMRY. WHILE DRIVING AT ANY SPEED, THE ACCELERATOR INTERMITTENTLY HESITATES. THE FAILURE USUALLY OCCURS WHEN ATTEMPTING TO ACCELERATE FROM A STOP, WHEN MAKING A TURN, AND ON MAJOR STREETS. THE VEHICLE WOULD NOT ACCELERATE WHEN THE ACCELERATOR PEDAL WAS DEPRESSED. SHE HAS TAKEN THE VEHICLE TO THE DEALER A COUPLE OF TIMES AND WAS INFORMED THAT THE FAILURE COULD NOT BE DUPLICATED. THE VEHICLE WAS ALSO TAKEN TO THE DEALER A COUPLE OF TIMES BECAUSE THE GEARS WOULD SHIFT AS IF THE TRANSMISSION WERE MANUAL, BUT IT IS AN AUTOMATIC. THE CONTACT INFORMED THE DEALER THAT THERE WAS A SERVICE BULLETIN THAT DESCRIBED HER FAILURES EXACTLY. THE DEALER RECALIBRATED HER COMPUTER AND THERE WAS A SLIGHT IMPROVEMENT WITH BOTH THE VEHICLE HESITATING AND THE GEARS SHIFTING AS THOUGH THEY WERE MANUAL. BOTH FAILURES CONTINUE TO

C-984

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

OCCUR. SHE WAS INFORMED THAT NOTHING COULD BE DONE. THE VIN WAS UNKNOWN. THE CURRENT MILEAGE WAS 12,100 AND FAILURE MILEAGE WAS 10,550. THE CONSUMER STATED THE VEHICLE WOULD NOT ACCELERATE FROM A STOP. THE TRANSMISSION FELT LIKE A MANUAL TRANSMISSION. UPDATED 11/26/07. \*JB

**Date of Incident:** 20070911  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** EDDINGTON, ME

**NHTSA Summary:**

MY WIFE AND I PURCHASED A 2007 CAMRY LE, 4-CYLINDER, 5-SPEED AUTOMATIC WITH 7,700 MILES FROM DOWN EAST TOYOTA IN BREWER, MAINE. EVER SINCE OUR TEST DRIVE WE'VE EXPERIENCED LACK OF ACCELERATION (HESITATION) FROM A STOP OR AFTER SLOWING DOWN TO TURN OR PROCEED, SHIFTING PROBLEMS (CONSTANT UP AND DOWN SHIFTING AT CERTAIN SPEEDS, CAR NOT SURE WHICH GEAR TO BE IN AND FEELS LIKE THE CAR IS SURGING) AND UNABLE TO USE THE CRUISE CONTROL DUE ACCELERATING TOO QUICKLY DUE TO DOWNSHIFTING AND THEN OVERSHOOTING THE SET SPEED. SOME OF THESE SYMPTOMS ARE SPORADIC, YOU NEVER KNOW IF THE CAR IS GOING TO MOVE OR NOT WHEN STEPPING DOWN HARD AND QUICKLY ON THE GAS PEDAL. SOMETIMES IT "RED-LINES" BEFORE ACCELERATING, OTHER TIMES THERE IS BARELY ANY RESPONSE AT ALL. SO FAR HAVE ONLY DRIVEN ON BARE DRY/WET ROADS. WE ARE NOT LOOKING FORWARD TO DRIVING IT ON SNOW AND ICE. WE WERE TOLD BY DET AFTER THE TEST DRIVE AND TOYOTA CORPORATION THAT THIS IS NORMAL PERFORMANCE FOR THIS VEHICLE, EVEN THOUGH THERE ARE TSBS (TECHNICAL SERVICE BULLETINS) CONCERNING THESE PROBLEMS. EG036-07 IS THE LATEST ECM UPDATE, WHICH WAS DONE ON 08/14/07 WITHOUT ANY NOTICEABLE IMPROVEMENTS. WE WOULD NEVER HAVE PURCHASED THIS VEHICLE IF WE HAD ONLY RESEARCHED THE CAR BEFOREHAND ON THE INTERNET. THIS CAR IS UNSAFE TO DRIVE AND TOYOTA AND DET WILL BE HELD RESPONSIBLE IF AN ACCIDENT OCCURS DUE TO THE AFOREMENTIONED PROBLEMS. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10203221  
**Date of Incident:** 20070911  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** CHICAGO, IL

**NHTSA Summary:**

ON TWO PRIOR OCCASIONS THE VEHICLE ACCELERATED FROM SPEEDS BETWEEN 20-30 MPH, TO SPEEDS UP TO 50-60 MPH. ON 9/11/07, THE VEHICLE ACCELERATED AT SPEEDS UP TO 80-90 MPH. WE ARE AWARE OF THE LEXUS NOTIFICATION OF FLOOR MAT INTERFERENCE, SO WE REMOVED THE MATS AFTER THE FIRST TWO TIMES, BUT THE LAST AND MOST FRIGHTENING, OCCURRENCE HAPPENED WITHOUT THE MAT IN THE VEHICLE. THE CAR HAD TO BE FORCED INTO PARK IN ORDER TO SLOW IT DOWN TO A HALT. MY WIFE WAS DRIVING THE VEHICLE AT THE TIME AND SHE STATES SHE ALMOST HAD SEVERAL MULTIPLE CAR ACCIDENTS WHILE TRYING TO STOP THE VEHICLE. I HAD THE VEHICLE TOWED TO THE DEALER AND THEY SAID IT'S THE FLOOR MAT, BEFORE EVEN DRIVING THE CAR. WE WON'T DRIVE THE CAR AGAIN UNTIL SOMEONE OTHER THAN LEXUS DETERMINES WHAT THE PROBLEM IS. \*TR

**Toyota ID Number:**  
**NHTSA ODI Number:** 10216514  
**Date of Incident:** 20070911  
**Vehicle:** 2007 TOYOTA COROLLA  
**Location of Incident:** PASENDA, CA

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2007 TOYOTA COROLLA. WHILE ATTEMPTING TO PARK THE VEHICLE, IT SURGED FORWARD AND CAUSED A MINOR CRASH. ONE YEAR LATER, WHILE ATTEMPTING TO DRIVE UPHILL WITH THE ACCELERATOR PEDAL SLIGHTLY DEPRESSED, THE FAILURE RECURRED. THE CONTACT STRUCK A METAL POST. THERE WERE NO PRIOR WARNINGS BEFORE THE FAILURES OCCURRED. SHE IS CURRENTLY IN THE PROCESS OF HAVING THE VEHICLE INSPECTED. THE SPEED WAS UNKNOWN. THE FAILURE MILEAGE WAS 1,500 AND CURRENT MILEAGE WAS 2,700.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10302504  
**Date of Incident:** 20070911  
**Vehicle:** 2004 TOYOTA COROLLA  
**Location of Incident:** MAPLEWOOD, NJ

**NHTSA Summary:**

2004 TOYOTA COROLLA WAS TOTAL ON 9/11/07 IN AN ACCIDENT WHERE IT ACCELERATED IN REVERSE IN A PARKING LOT AND SMASHED INTO A TRACTOR TRAILER. MY FORMER WAS DRIVING IT AND SAID IT JUST TOOK OFF ON HER. (WE FIRED HER SHORTLY AFTER THIS INCIDENT AND SHE LEFT THE USA)\*CW

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10304687  
**Date of Incident:** 20070911  
**Vehicle:** 2006 TOYOTA CAMRY  
**Location of Incident:** MOBILE, AL

**NHTSA Summary:**

I AM CONCERNED THAT MY 2006 TOYOTA CAMRY IS NOT ON THE RECALL LIST. WHILE REVERSING OUT OF A PARKING PLACE THE VEHICLE ACCELERATED AND CRASHED INTO A TREE THEN SURGED FORWARD AT A HIGH RATE OF SPEED BACK INTO THE PARKING AREA WITH TREES THAT I HAD REVERSED OUT OF. MY FOOT WAS FIRMLY ON THE BRAKE BUT THE VEHICLES ENGINE REVED AND SURGED BACK THROUGH THE TREES. IMPACT WITH TREE ON LEFT DRIVERS SIDE FIRST THEN VEHICLE SLAMMED INTO TREE ON THE RIGHT SIDE. THERE IS NO TIME TO REACT TO THIS TYPE OF DEADLY SPEED ACCELERATION. WHEN MY VEHICLE DID COME TO A STOP IT WAS IN NEUTRAL. THE DAMAGE TO THE VEHICLE WAS \$4,300, MY INSURANCE DOUBLED AND I AM LUCKY TO BE ALIVE AND THAT I DIDN'T KILL SOMEONE IN THE PARKING LOT. TOYOTA HAS NO RECALL FOR 2006 CAMRY BUT I HAVE COUNTED 50 TO 60 PLUS COMPLAINTS ON THIS SITE ALONE UNDER BRAKES, IGNITION, ACCELERATION ETC. TOYOTA SAYS I WILL HAVE TO PAY FOR THE REPAIR WHICH IS TOTALLY UNFAIR. MY VEHICLE HAS DEPRECIATED QUICKLY IN VALUE BECAUSE OF THIS DEFECT, THE ACCIDENT, AND USED PARTS BEING USED IN THE ACCIDENT REPAIR. I FEEL AS IF I AM TAKING A CHANCE WITH MY LIFE AND THE LIFE OF MY CHILD EACH TIME I DRIVE THIS CAR. YOU CANNOT GET THE CAR INTO NEUTRAL FAST ENOUGH TO AVOID A CRASH. THIS IS DEADLY SAFETY ISSUE.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10224360  
**Date of Incident:** 20070912  
**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** OMAHA, NE

**NHTSA Summary:**

APPROXIMATELY SEPTEMBER 12, 2007, I WAS APPROACHING A STOPLIGHT AND APPLIED THE BRAKE OF MY 2006 TOYOTA TACOMA. THE VEHICLE BEGAN REVVING OUT OF CONTROL AND STARTED MOVING FORWARD. I STEPPED HARDER ON THE BRAKE PEDAL AS THE VEHICLE BEGAN TO INCH FORWARD - I HAD ALL MY WEIGHT ON THE BRAKE PEDAL. KNOWING THE TRUCK WAS GOING TO MOVE, I TURNED THE WHEEL TO THE RIGHT TO AVOID THE STOPPED CARS IN FRONT OF ME, HOWEVER THE TRUCK CLIPPED THE PASSENGER-SIDE REAR BUMPER OF THE CAR IN FRONT OF ME, PUSHING IT INTO THE CAR IN FRONT OF IT. THE TRUCK THEN SHOT OFF THE ROAD INTO THE GRASSY AREA NEXT TO AN INTERSTATE ON-RAMP, WHERE I WAS ABLE TO PUSH THE SHIF INTO PARK - WHICH IS WHAT MADE THE TRUCK STOP AND THEN IT DIED. NO INJURIES WERE INCURRED; HOWEVER, THE SUDDEN ACCELERATION COULD HAVE SENT ME INTO INTERSTATE TRAFFIC. THOUGH STOPPED AT A LIGHT, I RECEIVED A TICKET FOR "FOLLOWING TOO CLOSELY" AND OUR INSURANCE PAID OUT DAMAGES TO TWO OTHER VEHICLES. I HAVE DAMAGE TO MY FRONT BUMPER THAT HAS NOT YET BEEN FIXED. AT THAT TIME, I HAD THE 2006 TOYOTA TACOMA TOWED TO OLD MILL TOYOTA TO ASSESS WHAT HAD OCCURRED; THEY STATED THEY COULD FIND NOTHING WRONG WITH THE TRUCK. \*TR

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** MINNESOTA CITY, MN

**NHTSA Summary:**

I AM CONTACTING YOU TO TELL YOU WHAT HAPPENED TO ME IN MY 2006 PRIUS ON SEPTEMBER 14, 2007. I DROVE HOME AND STOPPED AT MY MAILBOX TO GET THE MAIL. THE CAR SHIFTED OFF OF GAS AND ONTO ELECTRIC. I WAS GOING APPROXIMATELY 3 TO 4 MILES PER HOUR TO MAKE A Y-TURN TO BACK INTO OUR DRIVEWAY AND WHEN I PUSHED DOWN ON THE BRAKE THE CAR THRUSTED FORWARD WHILE ON ELECTRIC WITH GREAT FORCE THROUGH THE NEIGHBOR'S SIX FOOT WOODEN FENCE WHERE THE CAR STOPPED (I DON'T KNOW IF IT STOPPED ON ITS OWN OR GOT HUNG UP IN FENCE AND ALSO STUCK FROM HILL DECLINE.) I NEVER HAD A CHANCE TO TRY PUSHING DOWN ON THE BRAKE A SECOND TIME DUE TO THE FACT IT HAPPENED THAT FAST AND FORCE FULL. THE CAR WAS RUNNING ON ELECTRIC AND BARELY MOVING. MY GAS PEDAL WAS NOT STUCK AND THE MAT HAD NOTHING TO DO WITH IT. MY HUSBAND CHECKED THE MAT AND ACTUALLY KICKED AT THE MAT TO SEE IF IT WOULD MOVE AND IT DID NOT. OUR MAT WAS NOT EVEN UNDER THE GAS PEDAL. IT WAS SUGGESTED THAT MAYBE MY HIGH HEELS MADE THE GAS PEDAL STICK. I DO NOT WEAR HIGH HEELS AND MY FOOT WAS NOT ON THE GAS PEDAL. IT THRUSTED FORWARD WHEN I PUT MY FOOT ON THE BRAKE. IT IS CLEAR TO ME THAT YOU HAVE MORE OF AN ELECTRICAL MALFUNCTION OF SOME TYPE. WE CONTACTED TOYOTA WHO SENT A REPRESENTATIVE WHO CHECKED OUR CAR OUT WHILE AT THE BODY SHOP AND THE REPAIR GUY SAID HE WAS IN THE CAR FOR OVER AN HOUR THE COMPUTER APPEARED TO BE CLEARED. TOYOTA TOLD US THERE WAS NO PROBLEM? WE HOPE THAT YOU CAN FIGURE THIS OUT AND REASSURE US THAT OUR VEHICLE IS SAFE. I AM THANKFUL THAT THIS INCIDENT HAPPENED AT HOME DUE TO THE FACT THE DAY THIS INCIDENT TOOK PLACE I WAS AT A LOCAL COLLEGE CAMPUS AND COULD OF RUN OVER A GROUP OF YOUNG ADULTS. SOMEONE COULD OF BEEN INJURED OR KILLED THAT DAY! IT SCARES ME THAT MY CAR MIGHT DO THIS AGAIN!

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** ST. LOUIS, MO

**NHTSA Summary:**

WHILE DRIVING 2007 CAMRY ON LEVEL ROADWAY WITH CRUISE CONTROL ON AT 70 MPH, TRANSMISSION WILL SUDDENLY DOWNSHIFT SEVERAL GEARS CAUSING CAR TO ACCELERATE AGGRESSIVELY AND ROCKET FORWARD. DURING ONE SUCH INSTANCE MY CAR LURCHED FORWARD AND ALMOST DROVE UNDER A TRACTOR TRAILER THAT WAS TRAVELING IN FRONT OF US. THIS IS AN INTERMITTENT PHENOMENON, WAS REPORTED TO TOYOTA ON 10/01/07. AN APPOINTMENT WAS SET UP FOR LOCAL DEALER TO CHECK OUT PROBLEM. AFTER TOYOTA HAD THE CAR FOR FULL DAY, THEY RESPONDED THAT THEY COULD NOT DUPLICATE THE PROBLEM. UPON PICKING UP THE CAR I FOUND THAT THEY HAD NOT DRIVEN THE CAR OFF THE DEALER LOT. UPON QUESTIONING THE SERVICE MANAGER, HOW THEY EXPECTED TO DUPLICATE THE PROBLEM WITHOUT ACTUALLY DRIVING THE CAR, HE BEGAN SCREAMING AND WAS EXTREMELY RUDE. FINALLY, HE AGREED TO AN ADDITIONAL APPOINTMENT WITH A 'TECH PERSON' THE FOLLOWING WEEK. THE PROBLEM DID NOT OCCUR WHILE THE TECH PERSON WAS RIDING IN THE CAR. THERE WAS NO FURTHER FOLLOW UP TESTING BY TOYOTA. I WILL NO LONGER USE THE CRUISE CONTROL WHILE DRIVING THIS CAMRY. NOTE: THIS CAR HAD ITS 'SOFTWARE' UPDATED PREVIOUSLY DUE TO SLUGGISH ACCELERATION IN TRAFFIC.

**NHTSA ODI Number:** 10306664  
**Date of Incident:** 20070915  
**Vehicle:** 2007 TOYOTA TACOMA  
**Location of Incident:** MARIETTA, GA

**NHTSA Summary:**

IN MY TACOMA TRUCK, AFTER STOPPING AT AN URBAN INTERSECTION I DEPRESSED THE GAS PETAL AND THE TRUCK ACCELERATED TO A SAFE SPEED NORMALLY. I THEN REMOVED MY FOOT FROM THE PETAL AND THE TRUCK CONTINUED TO ACCELERATE REACHING A VERY UNSAFE SPEED. I BEGAN TO BRAKE WITH ALL OF MY STRENGTH AND FINALLY GOT THE TRUCK TO STOP WITH THE ENGINE STILL RUNNING AT SOME AWESOME RPM. I TURNED OFF THE IGNITION AND AFTER WAITING 5-10 MIN. RESTARTED THE TRUCK AND IT RESPONDED NORMALLY. THIS PROBLEM HAS NOT HAPPENED AGAIN PROBABLY BECAUSE I DRIVE VERY SLOWLY, NEVER ACCELERATE RAPIDLY. THIS MALFUNCTION OCCURRED WHEN THE TRUCK WAS NEW WITH ONLY 250 MI. ON THE ODOMETER. AFTER THREE YEARS I HAVE ONLY 2500 MI. ON THE ODOMETER SO YOU CAN SEE HOW MUCH I TRUST THIS TOYOTA !

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

"One woman was killed and another injured in a one-car collision Thursday night about three miles north of town. According to the Oklahoma Highway Patrol, Jean Bookout, 76, of Yukon was driving a 2005 Toyota Camry south on U.S. 69 at a high rate of speed at about 6:20 p.m. Thursday. Bookout, the OHP report states, failed to negotiate a curve and her car careened into a ditch on Texanna Road. Bookout was transported by helicopter to St. John Medical Center in Tulsa, where she was treated for head injuries. Bookout was listed in serious condition Friday. A passenger, Barbara Schwarz, 70, also of Yukon, was transferred from Muskogee Regional Medical Center by helicopter to St. John Medical Center, where she later died. The OHP report states safety belts were in use by both occupants. The air bag did not deploy."

 Date of Incident: 20071001  
 Vehicle: 2007 TOYOTA CAMRY HV  
 Location of Incident: SAMMAMISH, WA  
 NHTSA Summary:  
 MY TOYOTA CAMRY HYBRID 2007 MODEL HAD THE UNCONTROLLABLE ACCELERATION PROBLEM ON MULTIPLE INSTANCES MAKING IT HARD TO CONTROL AND ONCE IN A POTENTIALLY LIFE THREATENING SITUATION. I CALLED THE CLOSEST DEALERSHIP AND TOOK IT FOR EXAMINATION, THEY ASKED ME TO REPRODUCE THE PROBLEM ON THE SPOT, BUT I WAS NOT ABLE TO AT THAT INSTANT. THE DEALERSHIP THEN LATER SAID IT WAS LIKELY DUE TO FLOOR MATS AND I HAD THE FLOOR MATS SECURED (EVEN THOUGHT THAT DID NOT APPEAR TO BE THE CAUSE.) BASED ON RECENT REPORTS I AM CONCERNED THAT IT IS LIKELY DUE TO A DIFFERENT MECHANICAL PROBLEM ACKNOWLEDGED BY TOYOTA. HOWEVER I HAVE NOT SEEN ANY RECALL OR REPAIR NOTIFICATIONS FOR MY CAR YET AND I AM CONCERNED ABOUT THE SAFETY OF MY CAR.  
 Additional Summary:

Toyota ID Number:  
 NHTSA ODI Number: 10310972  
 Date of Incident: 20071001  
 Vehicle: 2007 TOYOTA FJ CRUISER  
 Location of Incident: SOMERSET, CA  
 NHTSA Summary:  
 I TOOK MY 2007 TOYOTA FJ CRUISER INTO THE DEALER AROUND THE END OF 2007. IT HAD 12,000 MILES ON IT AT THE TIME. I TOLD THEM THAT MY GAS PEDAL HAD STUCK AND I HAD TO HOLD THE BRAKES DOWN AND TURN OFF THE KEY TO GET IT TO STOP. I THEN HAD TO GET OUT OF THE CAR IN THE MIDDLE OF THE ROAD AND REACH DOWN TO RELEASE IT. THEY TOLD ME THAT IT MUST HAVE STUCK ON THE FLOOR MAT AND TO JUST WATCH IT. IT THEN STUCK AGAIN ABOUT A YEAR LATER AND I WAS ABLE TO RELEASE IT THIS TIME BY KICKING AT IT. I DIDN'T THINK ANYMORE OF IT UNTIL ALL THE RECALLS STARTED COMING OUT ON TOYOTA GAS PEDALS AND I THOUGHT THAT YOU SHOULD KNOW ABOUT THIS BECAUSE IT HAPPENED ON A MODEL THAT IS NOT ON THE RECALL LIST AND THAT THE PROBLEM CAME UP OVER TWO YEARS AGO. THIS INCIDENT IS DOCUMENTED AT THOMPSON TOYOTA IN PLACERVILLE, CA. I BOUGHT THE CAR NEW AT FOLSOM TOYOTA 2/2007. NOTHING HAS BEEN DONE TO FIX THIS YET BUT THE SERVICE DIRECTOR AT THOPSON TOYOTA WAS VERY CONCERNED THIS TIME AND SAID THAT SOMEONE WAS COMING UP FROM THE BAY AREA TO LOOK AT IT SOON. \*TR

 WHEN I WAS PULLING SLOWLY INTO MY REGULAR PARKING SPACE AT WORK, MY 2005 PRIUS SUDDENLY SURGED FORWARD AND SMASHED INTO A CEMENT WALL THAT WAS

C-1000

Safety Research & Strategies

Update Report: Toyota Sudden Unintended Acceleration: Appendix C

ABOUT 4 - 6 FEET IN FRONT OF ME. THERE WERE CARS PARKED ON EACH SIDE OF ME; I DIDN'T HIT EITHER OF THEM. I WENT STRAIGHT INTO THE WALL AT THE FRONT OF THE PARKING SPACE. NO WATER OR ICE OR BAD CONDITIONS WERE PRESENT. THE SURGE WAS MUCH FASTER THAN WOULD HAVE OCCURRED HAD I MISTAKENLY HIT THE ACCELERATOR RATHER THAN THE BRAKE. OVER \$3300 WORTH OF DAMAGE WAS DONE TO THE FRONT OF MY CAR. MY ANKLE BONE WAS CHIPPED, MY WRIST WAS SORE, I HAD MINOR WHIPLASH. I WAS ALONE IN THE CAR. I FEEL STRONGLY THAT THIS WAS NOT A RESULT OF DRIVER ERROR ON MY PART, NOR DO I THINK IT IS A RESULT OF THE FLOOR MAT CATCHING THE ACCELERATOR. WHAT I EXPERIENCED MATCHES MUCH MORE CLOSELY WITH DESCRIPTIONS OF A FLUKE COMPUTER ERROR CAUSING THE CAR TO SURGE FORWARD WHEN I TOUCHED THE BRAKES. IT WAS A STRONG, FAST AND SUDDEN SURGE; MUCH MORE POWERFUL THAN WHAT I EXPERIENCE WHEN I USE THE ACCELERATOR. I REPORTED THE INCIDENT TO TOYOTA (REFERENCE #200710181201). THEY SENT SOMEONE OUT FROM THE CHICAGO REGIONAL OFFICE TO INSPECT THE CAR IN MINNEAPOLIS. THEY CLAIMED EVERYTHING WAS WORKING FINE AND REFUSED TO DO MORE. AFTER I EXPLAINED THE SITUATION AND MY FEAR ABOUT DRIVING MY CAR, THE LOCAL WALSER TOYOTA DEALER DID ANOTHER VERY THOROUGH CHECK AND RESET ALL OF THE ELECTRONIC COMPONENTS. IT HAS WORKED FINE SINCE. PRIOR TO THIS 2007 INCIDENT THERE WERE A COUPLE OF OTHER TIMES WHEN THE CAR SEEMED TO SURGE RATHER THAN BRAKE AT STOP SIGNS. NONE CAUSED CRASHES. AND ONCE, ALSO PRIOR TO 2007, THE ANTILOCK BRAKES DID NOT DEPLOY WHEN THEY SHOULD HAVE. I NARROWLY AVOIDED A CRASH THAT TIME.

**Date of Incident:** 20071005  
**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** REVERE, MA

**NHTSA Summary:**  
 TL\*THE CONTACT OWNS A 2003 TOYOTA CAMRY. THE CONTACT SWITCHED GEARS FROM NEUTRAL TO DRIVE AND THE VEHICLE ACCELERATED TO MAXIMUM SPEED. THE ACCELERATOR PEDAL WAS STUCK AND THE VEHICLE WOULD NOT STOP. SHE DROVE INTO SOME BUSHES AND TREES THAT WERE IN FRONT OF A TWO FOOT WALL. THE UNDERCARRIAGE, TRANSMISSION HOUSING, THE ROD, AND BUMPER WERE ALL DAMAGED. THE REPAIRS WOULD COST \$5,800. THE FIRE AND POLICE DEPARTMENTS ALONG WITH AN AMBULANCE ARRIVED AT THE SCENE. A POLICE REPORT WAS FILED. THE VEHICLE WAS TOWED AND THE CONTACT REFUSED TO GO TO A HOSPITAL, EVEN THOUGH HER BLOOD PRESSURE WAS 200. THE DEALER STATED THAT NOTHING COULD BE DONE. THE SPEED WAS UNKNOWN. THE CURRENT AND FAILURE MILEAGES WERE 43,960. SEE ODI 10206896 ALSO. \*DSY; TL\*THE CONTACT OWNS A 2003 TOYOTA CAMRY. THE CONTACT STATED THAT THE VEHICLE ACCELERATED AT AN UNKNOWN SPEED WITHOUT WARNING WHEN THE GEAR WAS SHIFTED INTO DRIVE. AS A RESULT, THE VEHICLE TRAVELED APPROXIMATELY 200 YARDS AND THEN CRASHED INTO A WALL. THE CONTACT STATED THAT THE ACCELERATOR PEDAL STUCK AND SHE WAS UNABLE TO DEPRESS THE BRAKE PEDAL. THE AIR BAG FAILED TO DEPLOY. NHTSA CAMPAIGN ID NUMBER 04V346000 (AIR BAGS: SIDE/WINDOW) WAS REFERENCED. A POLICE REPORT WAS FILED. THE INSURANCE INSPECTOR FELT THAT THE ELECTRICAL SYSTEM CAUSED THE FAILURE. AS OF OCTOBER 25, 2007, THE MANUFACTURER HAD NOT INSPECTED THE VEHICLE. THE CURRENT AND FAILURE MILEAGES WERE 41,000. SEE 10209036 ALSO. \*DSY. UPDATED 01/11/08. \*1J

**NHTSA ODI Number:** 10310470  
**Date of Incident:** 20071010  
**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** RALEIGH, NC

**NHTSA Summary:**  
 COMPLAINT-SECOND COMPLAINT I PURCHASED MY TOYOTA RAV 4 2007 IN OCTOBER OF 2007. A FEW MONTHS AFTER I HAD THE CAR I STARTED NOTICING THAT THE CAR, FOR NO REASON WOULD HESITATE, LEAVING ME AT TIMES IN THE MIDDLE OF CROSSING AN INTERSECTION WITH NO POWER. AFTER OTHERS BEGAN MAKING COMMENTS THAT THERE WAS SOMETHING WRONG I BROUGHT IT INTO LEITH TOYOTA. THE FIRST TIME WAS APRIL 24TH 2008. I EXPLAINED TO THE SERVICE ADVISOR I WAS HAVING INTERMITTENT PROBLEMS WITH THE CAR. I TOLD HIM I WOULD START ACCROSS AN INTERSECTION(4 LANES) AND ALL OF A SUDDEN THE CAR HESITATED, THERE WAS NO POWER. I WOULD PRESS THE GAS PEDDLE TO THE FLOOR AND APPROXIMATELY 10-15 SECONDS LATER THE CAR WOULD LUNGE FORWARD. I TOLD THEM IT CONCERNED AND SCARED ME. I WAS TOLD THAT THEY COULD NOT FIND ANY PROBLEMS. APRIL 28TH 2008 I RETURNED AGAIN TO THE DEALERSHIP ADVISING THEM THERE WAS A PROBLEM, I WAS AFRAID TO DRIVE THE CAR AND WANTED IT FIXED. I AGAIN WAS TOLD THERE WAS NOT ANY PROBLEM WITH THE CAR. THIS TIME I REFUSED TO LEAVE UNTIL THE PROBLEM WAS FIXED. THEY FINALLY BROUGHT THE CAR BACK IN AND TOLD ME THE MODELS HAVE A PROBLEM WITH THE ECM SYSTEM. I WAS TOLD THEY REFLASHED THE ECM SYSTEM WITH AN UPDATE SENT BY CORPORATE AND THINGS SHOULD BE FINE. YESTERDAY I RETURNED TO THE DEALERSHIP. I TOLD THEM THE CAR WAS OK FOR A NUMBER OF MONTHS BUT AGAIN THIS WEEK I WAS ALMOST IN AN ACCIDENT BECAUSE THE CAR HAD STARTED TO HESITATE AGAIN, AND I AM LEFT IN THE INTERSECTION WITHOUT POWER AND ON-COMING TRAFFIC. THEY TOOK THE CAR OUT AND OF COURSE THE PROBLEM IS INTERMITTENT SO THEY WERE UNABLE TO FIND ANYTHING ABNORMAL. THEY TOLD ME THEY WOULD CHECK TO SEE IF THERE WERE ANY ADDITIONAL COMPUTER UPDATES FOR THE PROBLEM. THE CAR ALSO LOOSSES POWER ON HIGHWAY AT 60MPH, SHUTS DOWN AFTER A WHILE THEY ADVISED ME THERE WERE NO ADDITIONAL UPDATES. I TOLD THEM THE PROBLEM IS PUTTING ME IN DANGER OF HAVING AN ACCIDENT. THEY TOLD ME TOYOTA DOES NOT FEEL THIS IS A PROBLEM. \*TR

**Date of Incident:** 20071010  
**Vehicle:** 2007 LEXUS RX350  
**Location of Incident:** TRABUCO CANYON, CA

**NHTSA Summary:**  
 RANDOM ACCELERATION! MY RX 350 LEXUS WAS RETURNED TO THE DEALER FOR REPAIR LESS THAN A MONTH AFTER I PURCHASED IT FOR RANDOM ACCELERATION. I EXPLAINED THAT ALTHOUGH I AM NOT ACCELERATING MY VEHICLE ACCELERATES RAPIDLY AND LUNGES FORWARD. I HAVE TO TAKE MY FOOT OF THE GAS IMMEDIATELY

**C-1004**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AND APPLY THE BRAKE. SOMETIMES IT HAPPENS 3/4 TIMES A DAY AND SOMETIMES NOT FOR A WEEK, THUS THE TERM RANDOM. I HAVE BROUGHT IT IN TO PARK PLACE LEXUS AND CALLED NUMEROUS TIMES. THEY DRIVE IT A FEW MILES AND TELL ME NOTHING IS WRONG. I EVEN PLEADED WITH THE OWNER OF PARK PLACE, CHRIS BRUNNER TO KEEP MY CAR AND DRIVE IT UNTIL HE EXPERIENCED THE RANDOM ACCELERATION, HE REFUSED AND TOLD ME TO CALL LEXUS HEADQUARTERS. I DID CALL AND WAS ON HOLD FOR 38 MINUTES. LAUREN SHIELDS OF LEXUS ALSO TOLD ME NOTHING COULD BE DONE. I THINK MR. AL SMITH, THE VP OF CUSTOMER SATISFACTION SHOULD MONITOR HOW GOOD CUSTOMERS AND REPEAT BUYERS WITH SERIOUS VEHICLE PROBLEMS ARE HANDLED. I AM NOW AT 52,000 MILES AND PAST WARRANTY. (I THINK THIS WAS THEIR PLAN- TO DANCE AROUND THE PROBLEM UNTIL MY WARRANTY RAN OUT) I WORRY IF I WILL BE ABLE TO STOP MY VEHICLE THE NEXT TIME THIS HAPPENS. THE RANDOM ACCELERATION STARTED IMMEDIATELY AFTER PURCHASE AND IT WAS PRIOR TO ANY RECALLS, ANY TV NEWS CASTS OR NEWSPAPER ARTICLES. WE HAVE 2 HIGHLANDERS, AND THIS IS MY 4TH LEXUS. WE ARE GOOD CUSTOMERS AND NOTHING HAS BEEN DONE. I THINK THE RANDOM ACCELERATION IS A PROBLEM FOR MANY MORE VEHICLES THAN THEY HAVE RECALLED!

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10319325  
**Date of Incident:** 20071010  
**Vehicle:** 2002 TOYOTA AVALON  
**Location of Incident:** SEATTLE, WA

**NHTSA Summary:**

IN 2007 MY 2002 TOYOTA AVALON HAD A SERIOUS ACCIDENT DUE TO SUDDEN ACCELERATION. I WAS PARALLEL PARKING, HEADING SLOWLY FORWARD AT NO MORE THAN 1 OR 2 MPH WHEN THE CAR SUDDENLY TOOK OFF. MY CAR STRUCK THE CAR IN FRONT OF ME, CAREENED ACROSS THE ROAD AND SIDEWALK, AND CRASHED INTO A TRUCK PARKED IN A DRIVEWAY ACROSS THE STREET. FORTUNATELY NO BODY WAS HURT BUT PEOPLE COULD HAVE BEEN KILLED ESPECIALLY IF THERE HAD BEEN PEDESTRIANS IN THE WAY. AS YOU MIGHT EXPECT, I WAS VERY SHAKEN. MY CAR WAS "TOTALLED" AND MY INSURANCE COMPANY SAID IT HAD TO HOLD ME AT FAULT BECAUSE TOYOTA REFUSED TO TAKE RESPONSIBILITY. I AM CONVINCED THIS WAS A PROBLEM OF SUDDEN ACCELERATION NOT HAVING ANYTHING TO DO WITH A STICKING GAS PEDAL AS I WAS BARELY GOING FORWARD. I BELIEVE THAT THE SUDDEN ACCELERATION PROBLEM IN TOYOTA VEHICLES SHOULD BE FURTHER INVESTIGATED AND NOT CONFINED TO THE RECALLED MODELS. I WOULD APPRECIATE A RESPONSE TO THIS EMAIL.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10315791  
**Date of Incident:** 20071011  
**Vehicle:** 1999 TOYOTA CAMRY  
**Location of Incident:** PHOENIX, AZ

**NHTSA Summary:**

PLEASE PAY ATTENTION TO THE TWO ACCIDENTS THAT I HAVE EXPERIENCED. I PURCHASED MY TOYOTA CAMRY IN 2003 AND LOVED IT. I HAVE BEEN DRIVING FOR 57 YEARS AND NEVER HAD AN ACCIDENT. ON OCTOBER 11, 2007, I DROVE UP MY DAUGHTER'S DRIVEWAY, CAME TO A STOP (MY FOOT WAS ON THE BRAKE) AND WAS PUTTING MY CAR IN PARK WHEN IT SUDDENLY ACCELERATED INTO AND CRASHED THRU THE CLOSED GARAGE DOOR! I FINALLY CAME TO A STOP AFTER CRASHING INTO THE

**C-1005**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

HOT WATER HEATER AND A WORK TABLE, PUTTING A BIG HOLE IN THE WALL BEHIND IT. A CABINET FELL ON THE DRIVER'S DOOR AND THE BROKEN GARAGE DOOR CLOSED ONTO THE REAR OF MY CAR. LUCKILY I WAS NOT INJURED BEYOND BRUISING AND STIFFNESS. MORE IMPORTANTLY, I AM RELIEVED MY GRANDSON WAS NOT IN THE CAR WITH ME, OR WORSE, HAD NOT COME INTO THE GARAGE WHEN I HONKED FOR HIM. THIS HAPPENED IN SECONDS AND WAS TERRIFYING. MY FOOT WAS ON THE BRAKE THE ENTIRE TIME! TWO YEARS LATER, ON JUNE 16, 2009, I DROVE INTO A JEWELRY STORE IN A STRIP MALL. I PULLED SLOWLY INTO A PARKING SPACE. AGAIN, MY FOOT WAS ON THE BRAKE AS I WAS STOPPING. I ATTEMPTED TO PUT THE CAR INTO PARK. IT SUDDENLY ACCELERATED INTO A LARGE CONCRETE PILLAR, JUMPING THE CURB. AGAIN, MY FOOT WAS ON THE BRAKE. THIS HAPPENED IN A SPLIT SECOND, MY SEAT BELT TIGHTENED AND LOCKED AROUND MY CHEST AND THROAT. I JAMMED MY THUMB, HIT MY LEFT KNEE ON THE STEERING COLUMN AND WAS IN IMMEDIATE CHEST PAIN FROM THE SEAT BELT. MY CAR WAS TOWED TO MY MECHANIC. I WENT TO THE EMERGENCY ROOM AND ALSO SAW MY DOCTOR. I SUFFERED MANY DEEP CONTUSIONS AND IT TOOK SIX WEEKS FOR MY CHEST AND BACK TO HEAL. I AM STILL HAVING NECK AND KNEE PROBLEMS. THIS WAS A HORRIBLY FRIGHTENING EXPERIENCE. WHAT COULD HAVE HAPPENED HAD THAT CONCRETE PILLAR NOT STOPPED THE CAR?!! WHAT IF PEOPLE HAD BEEN ON THE SIDEWALK OR JUST A COUPLE OF MORE FEET AND THE CAR WOULD HAVE CRASHED THROUGH THE GLASS FRONT OF THE JEWELRY STORE. TWO CRASHES-\$11,000 DAMAGES I STILL FEEL VERY UNSAFE ABOUT MY CAR. WHEN WILL IT HAPPEN AGAIN?

**Toyota ID Number:**  
**NHTSA ODI Number:** 10206821  
**Date of Incident:** 20071020  
**Vehicle:** 2004 TOYOTA COROLLA  
**Location of Incident:** MIAMI SHORES, FL

**NHTSA Summary:**  
DATE 10/20/2007 THIS SATURDAY MORNING AT 9:05 AM, AFTER MASS AT THE MIAMI ARCHDIOCESES, I HAD A MOST UNPLEASANT EXPERIENCE WITH MY 2004 TOYOTA COROLLA. WHEN I MOVE TO REVERSE MY CAR FROM MY PARKING PLACE, I EXPERIENCED A SUDDEN DRAMATIC INCREASE FROM THE CAR'S IDLE AND A RELEASE OF THE ACCELERATION, CAUSING THE VEHICLE TO MOVE BACKWARD VERY FAST. I IMMEDIATELY PUT THE CAR IN NEUTRAL, BUT DID NOT STOP AND THEN, IN A FEW SECONDS, TO FORWARD TO AVOID HITTING ANY PERSONS OR VEHICLES IN MY BACK IN THE CHURCH PARKING LOT. IN TOTAL ABOUT 45 FEET BACKWARD AND FORWARD. PERHAPS 30 SECONDS PLUS IN TOTOF?. I THEN DID CRASH ON THE WALL OF ST. MARTHA RECTORY. THE CAR WAS UNCONTROLABLE AND THE FRONT OF MY CAR'S HOOD, FRONT DOORS WERE BADLY DAMAGED, (ESPECIALLY THE RIGHT SIDE, WHERE MY SICK WIFE SAT ) DAMAGES WITH A PRELIMINARY ESTIMATE OF \$ 5864. I HAVE TWO CONCERNS: A) SUDDEN ACCELERATION WHEN CAR IS STARTED AND INABILITY TO STOP IT. B) NO AIR BAG SYSTEM DEPLOYMENT IN SPITE OF THE STRENGTH OF THE IMPACT AND HAVING THE ENTIRE FRONT BUMPER OF THE CAR DESTROYED. 2) I HAVE LOST MY TRUST IN MY PRESENT TOYOTA COROLLA CAR (I HAVE HAD ONE BEFORE AND A CAMRY, AND THEIR PERFORMANCE WAS SATISFACTORY). I WOULD LIKE TO HAVE A VERY CAREFUL INSPECTION OF OUR VEHICLE, ITS CAPACITY FOR SUDDEN UNCONTROLLABLE ACCELERATION, LACK OF AIR BAG PROTECTION, AND THE LIKE. \*TR

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** LATHAM, NY

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2003 TOYOTA AVALON. WHILE DRIVING 3 MPH WITH THE BRAKES APPLIED, THE VEHICLE SUDDENLY ACCELERATED. THE CONTACT APPLIED MORE PRESSURE TO THE BRAKES; HOWEVER, THE VEHICLE DID NOT STOP AND CRASHED INTO SOME BUSHES. A POLICE REPORT WAS FILED. THERE WERE NO PRIOR WARNING INDICATORS. THE VEHICLE WAS TOWED. THE DEALER WAS UNABLE TO DUPLICATE THE FAILURE AND THERE WERE NO ERROR CODES. THE PURCHASE DATE WAS UNKNOWN. THE CURRENT AND FAILURE MILEAGES WERE 45,000. NEW YORK POLICE REPORT.

UPDATED 12/12/07 \*TR. 2003 TOYOTA AVALON WITH UNINTENDED ACCELERATION. \*KB THE CONSUMER STATED HE SOLD THE VEHICLE BACK TO THE DEALER, BUT WANTED TO DETAIL THE EVENTS OF THE ACCIDENT. WHILE ATTEMPTING TO PARK THE VEHICLE, IT SUDDENLY SURGED FORWARD AND CAUSED THE VEHICLE TO ACCELERATE OVER A CURB, THROUGH THE BUSHES AND INTO ANOTHER VEHICLE. A TOYOTA REPRESENTATIVE SUGGESTED THAT PERHAPS BOTH PEDALS WERE DEPRESSED SIMULTANEOUSLY OR THAT PERHAPS THE FLOOR MAT WAS PRESSED AGAINST THE GAS PEDAL. THE CONSUMER STATED NEITHER HAPPENED. THE CONSUMER STATED THE WAS THE THIRD INCIDENT OF SUDDEN ACCELERATION THAT HAD SHE HAD EXPERIENCED IN THE VEHICLE, BUT THE FIRST TWO WERE NOT SEVERE ENOUGH TO WARRANT A POLICE REPORT. \*JB

**NHTSA Summary:**

I OWN A 2004 TOYOTA CAMRY. I HAVE HAD TWO ACCIDENTS IN IT. BOTH TIMES THE CAR FAILED TO BRAKE BUT ACCELERATED INSTEAD. NO ONE BELIEVED ME THAT THE ACCELERATOR PEDDLE STUCK INSTEAD OF BRAKING. MY INSURANCE PAID FOR REPAIR BOTH TIMES (EXCEPT FOR THE \$500 DEDUCTIBLES). HOWEVER, AS A RESULT MY INSURANCE CARRIER OF 15 YEARS DROPPED ME AND I WAS FORCED TO TAKE OUT INSURANCE THAT COST ME MORE THAN THREE TIMES AS MUCH FOR COVERAGE. I BELIEVE THE ACCELERATOR PEDDLE STUCK BUT THE 2004 MODEL IS NOT INCLUDED IN THE CALL BACK. DO I HAVE ANY GROUNDS FOR PURSUING THIS?

**Additional Summary:**

**NHTSA ODI Number:** 10212574  
**Date of Incident:** 20071026  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** CINCINNATI, OH

**NHTSA Summary:**

WHILE PULLING INTO A PARKING LOT IN A PARKING LOT WITH CARS ON BOTH SIDES AND IN FRONT OF MY VEHICLE, MY VEHICLE INCREASED ACCELERATION AND RACED FORWARD UNCONTROLLABLY. THE BRAKE WAS PUSHED TO THE FLOOR BOARD OF THE VEHICLE AND HAD NO EFFECT ON SLOWING DOWN THE CAR. THE LARGE TRUCK IN THE SLOT IN FRONT OF ME WAS THE ONLY THING THAT STOPPED THE VEHICLE. \$87.43 DAMAGE WAS DONE TO MY VEHICLE. NONE TO THE TRUCK THAT STOPPED MY VEHICLE. LEXUS REVIEWED THE ELECTRONIC DATA RECORDER AND RELEASED A STATEMENT THAT THE VEHICLE OPERATED WITHIN SPECIFICATIONS. LEXUS ALLOWED NO ONE TO TOUCH THE VEHICLE UNTIL IT WAS INSPECTED BY THERE TECHNICIAN. NOTHING WAS DONE TO CORRECT OR PREVENT A FUTURE REPEAT OF THE LIFE THREATENING ACCELERATION SURGE EXPERIENCED WITH THIS VEHICLE. WE HAVE REQUESTED FROM THE LEXUS LEGAL DEPARTMENT THAT THE DATA RECOVERED BY THE LEXUS TECHNICIAN BE PROVIDED TO US SO THAT WE CAN ASSESS FOR OURSELVES WHAT WENT WRONG WITH THE VEHICLE. \*TR

**Date of Incident:** 20071101  
**Vehicle:** 2006 TOYOTA COROLLA MATRIX  
**Location of Incident:** PACE, FL

**NHTSA Summary:**

I OWN A 2006 TOYOTA MATRIX. AT ABOUT 40K I BEGAN NOTICING WHEN I PUSHED THE GAS PEDAL FROM A STOP THAT IT SOMETIMES LAGGED, OTHER TIMES THE PEDAL SEEMED VERY TOUCHY AND TO TAKE OFF EXCESSIVELY, CAUSING PASSENGERS TO NOTICE THE SUDDEN ACCELERATION. THIS OCCURS SPONTANEOUSLY BUT AT LEAST ONCE EVERY 14 DAYS. IT IS ALWAYS FROM A STOP SUCH AS AT A LIGHT OR DRIVEWAY, AFTER THE CAR HAS BEEN DRIVING EVEN A FEW FEET BUT IT HAS NEVER OCCURRED ON THE INITIAL PRESS WHEN THE CAR IS FIRST CRANKED AND MOVED, ONLY AFTER THE WHEELS HAVE MOVED. AS A SIDE NOTE, THE COMPUTER WAS REPLACED AT ABOUT 77K AND THIS DID NOT CORRECT THE ISSUE. I HAVE THE OEM FLOOR MATS WITH THE LATCH SYSTEM THAT HOLDS THE MAT IN PLACE. I HAVE NEVER HAD THE PEDAL APPEAR TO EVEN TOUCH THE MAT. WHILE I HAVE NEVER HAD THE TERRIBLE EXPERIENCE OF HAVING THE PEDAL STICK AND CONTINUE TO ACCELERATE, I AM HOPING THAT THIS INFORMATION WILL HELP THE CAUSE OF THE ISSUES COME TO LIGHT. THERE IS DEFINITELY A PROBLEM WITH THE GAS PEDAL AND THE COMPUTER TELLING THE THROTTLE WHEN AND HOW MUCH TO OPEN. PLEASE DO NOT LET THIS FALL SOLELY ON THE FLOOR MATS. THERE IS MORE TO THE STORY! \*TR

**NHTSA Summary:**  
PURCHASED A 2008 TOYOTA TACOMA TRUCK IN OCTOBER OF 2007. ONE MONTH LATER I HAD AN ACCELERATION ISSUE WHILE PICKING UP MY SON. I WAS UNABLE TO BRAKE THE TRUCK TO A COMPLETE STOP. CAUSING ME CRUSH MY MOTHER-IN-LAW GARAGE DOOR AND THE FRONT OF MY NEW PICKUP. IN ALL I WAS WITHOUT A VEHICLE FOR ONE WEEK WHILE HAVING THE REPAIRS COMPLETED, AND MY INSURANCE PREMIUM WENT UP FORCING ME TO FIND A BETTER RATE THROUGH ANOTHER INSURANCE COMPANY. MY MOTHER IN LAW HAD TO HAVE REPAIRS TO HER GARAGE AFTER BEING COMPENSATED FROM MY INSURANCE COMPANY. I PRESSED THE BRAKE DOWN AS HARD AS I COULD AND YET THE TRUCK CONTINUE MOVING FORWARD.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Additional Summary:**

Date: March 11, 2008  
Re: Unwarranted, unwanted uncontrolled acceleration of my 2007 Toyota Tacoma

I own a Toyota Tacoma, purchased new the spring of 2007. It had 11,000+ miles on it November of 2007. In late October when slowing down for a stop light at the corner of University and Dale in St. Paul the truck jerked and continued to accelerate. I was able to stop sufficiently with the brakes until the light changed. I was fortunate that there wasn't a car in front of me nor pedestrians crossing in front of the truck. I attributed this occurrence to my misplacement of my right foot. I thought maybe my coordination was off and I had my foot placed somehow on both pedals. Upon arriving at home I looked and couldn't figure out how I could have done that.

The afternoon of 11/21/07 I took my foot off the accelerator and starting to brake to slow down while in line in the left hand turn lane at a stop sign. The truck upon my placing my foot on the brake jerked and accelerated. In fact it seemed to race. I pushed the brake pedal with all my might and was able to slow it down before I rear ended the truck in front of me. I turned off the truck and looked down at my right foot it was completely on the brake pedal.

The truck in front of me was driven by Kaia Olsen the daughter of the owner, Jeffrey M. Olson(651-402-6281). She was not hurt and there was no noticeable damage to the Blue Suburban SUV she was driving. Later, My wife heard from the vehicle owner that there was some damage and he was given the number to contact our insurance company. The damaged amounted to \$895. I got a pretty good jolt myself and was sore all over that night. I really was shook up because if this had happened in the city at a stop light I could have run over all the people in front of me in the crosswalk and/or been hit by the crossing traffic.

I called Burnsville Toyota and spoke with Randy in service. He told me there was no way the accelerator could have stuck unless the mat had caused it. He said the dealership had awhile ago received a letter from Toyota warning of this occurrence. I had looked after the accident had occurred and did not see the Mat out of place. I checked the location of the mat and also its design on the Tacoma and saw that it was not out of place and also was designed so that this would have been very difficult in my opinion for this to happen. He said they would/could look at it right away today if I brought it in. There was no way I was going to drive the truck after my experience. I told him to send someone out to tow it. He said they'd be doing that and I would have to pay for it myself. I told him I was located in Woodbury and asked for a recommendation of someone in the area. He gave me the number of South Side towing 952-445-8928. I told him that the front end would have to be checked as well since it was quite a jolt. I asked about a vehicle to use and was told that I would have to rent one.

Randy said they would look at it and that he thought I could get it later this evening after it was checked out. I asked him if there had been any reported problems of this happening. He said they hadn't received any reports for Toyota and wouldn't unless a problem had been reported and solved. I asked if he should report the problem and he said that he could but they didn't pay attention unless the cause had been found. He didn't expect to find anything wrong because nothing could cause such a happening.

I then called the towing company. It was in Shakopee. They did not tow from Woodbury. I then called my insurance agent and was given the name of a towing company that would tow it. I asked my agent to speak with Burnsville Toyota Service Dept as to what they should do etc. concerning any structural damage. Since Burnsville Toyota wasn't on the State Farm list any body type work could not be done until an adjuster could look at the vehicle. She was told that any body type work wasn't done by them and would be done by a firm in Maplewood. News to me.

Stillwater towing towed the truck to Burnsville Toyota

I received a call from Bart in service at Burnsville Toyota. My truck had arrived at Burnsville Toyota. He said that the 4 wheel light was flashing when he drove it. The differential was locked he thought that the towing company had done this after they had loaded it. He was very apologetic and sympathetic not like

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

Randy. I picked up truck same night. I was told that it was the floor mats that caused the problem. They removed the rug floor mat and left the rubber mat in the floor of the drivers side. I took truck up hunting. Sunday, while in 4 wheel drive high, I had to turn around. I slowed down and pulled into a driveway and braked to stop. I felt the truck do a big jerk as before, however the gas was not accelerating.

11/26/07 I called Burnsville Toyota to speak with the general manager I got his voice mail and left a message to call me ASAP. I left both cell and home phone numbers. I called MN Attorney General, they would be sending out a form for me to fill out.

The general manager called me back. His name was Tony Brown, he was very receptive and said he would get right on it.

State Farm Amanda 888-248-6961, ex 327-3240 claim # 232016442 Shirley.

The Service manager of Burnsville Toyota called me (Scott). He sent a car out for me to use. He drove the truck for a number of days to check it out.

I spoke with my resource person an excellent mechanic whom I trust (Mike Glasgow) and was told that the truck has a Electric Throttle Body, and a switch. The gas pedal is really an electronic switch.

11/29/07 I was told to pick up my truck. They found nothing wrong. I asked them if they had replaced the Electric throttle body. I was told "no, because Toyota would only pay for it if they had found something wrong. Tony, the general manager of Burnsville Toyota, told me also they wouldn't do it because then I would assume it was fixed and they couldn't say that was the case. Concerning the mats causing it I was told that the letter from Toyota was concerning the mats on the Camry not on the Tacoma. I then said therefore, you have no real explanation for it and yet you won't replace the Electric Throttle Body. Tony said yes that was correct because they couldn't promise that that would solve the problem that had occurred. I then stated so I am driving out of here with the truck in the status quo and you feel that is alright. He said yes that was correct. He said if I wanted to trade it in they would give me a great deal! I asked him how it would work out and I was told it would cost me \$8000. I left the dealership.

I spoke with a couple of engineers who told me of a similar problem years ago with another vehicle (Not a Toyota). That problem was caused by a faulty combination of the cruise control, brake and throttle.

I would like either the dealership, Burnsville Toyota or Toyota America to minimally replace the Electric Throttle Body and the cruised control.

It would be nice if Toyota America were to send the components to their design and research team to look into the problem. That however is up to them.

Because of this malfunction I have an accident on my record, an insurance claim for damages to the vehicle I rear ended, occurring a towing bill of \$223.65, and damages of over \$100 to the front of my vehicle.

At a later date I received a phone call for someone from the Burnsville Toyota asking for me to do a phone survey on my repair experience. I told them frankly of my disappointment and fears. In December I had shoulder surgery and so was not driving until February. I avoid taking my truck when I have to go to busy pedestrian areas when ever possible. This also delayed the process of letter writing to The Minnesota Attorney General, Consumer Report, State Farm, National safety foundation and whom ever else might be interested.

In January or February I received an invitation to do an online satisfaction survey on Toyota. I left the survey know of my problem and fears.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

In March of 2008 I received a phone call from Judith from Toyota HQ. She inquired about my concerns. I explained to her that the dealer had told me that Toyota HQ didn't care about problems unless the dealer could duplicate and solve them. I informed her that I was in the process of sending a letter to the state attorney general, my insurance company etc so that if this occurred again to someone they would have easy recourse against Toyota for upon being notified, not looking into a very dangerous situation at the corporate level. She gave me a case number 200803040314 and told me someone would be calling me.

I received a call from Christi (1-800-331-4331 ex 73181) of Toyota's Corporate from concerning my problem. I explained it to her and my concerns. She asked if I wanted a different vehicle. I told her all I wanted was for them to replace the couple of parts that in all probability could have caused the problem and send them back to be looked at in their corporate lab. I explained to her that the dealer had told me that Toyota HQ didn't care about problems unless the dealer could duplicate and solve them. She told me the regional manager would be calling me by Monday 3/10/08.

Monday, 3/10/08 I received a phone call from Christie. She asked how much damage had been done in the accident. I told her there was some damage to the other vehicle that my insurance company had taken care of, slight damage to mine of less than \$200 which was less than my deductible and was very slight cosmetic, and the towing bill which my insurance company had covered. I was not concerned with damage compensation. What I did want was the possibly faulty parts replaced and sent into Toyota. I expressed my great concern for the future injuries and deaths this problem could cause and that I felt it was my responsibility to see if I could get this checked out at a higher level than the mechanic/technician at the local dealer. I explained to her as it had been explained to me by some computer knowledgeable people that the dealerships computer can only assess what it has been programmed to access.

I was told that Toyota Corporate was refusing to do anything or look at my parts or components unless the dealer can duplicate or find the problem. Toyota has no interest in requesting the parts for further study nor in replacing them in my vehicle.

I ended the conversation expressing my concern again any future victims and that hopefully my experience, notes and letters would serve to assist them in any legal recourses they might desire to pursue.

In summary all I want is the parts be replaced, i.e. the cruise control and electronic fuel switch so I feel my vehicle is safe and research can be conducted to protect the public safety.

It is interesting in that my vehicle is just about a year old and has it warranty in effect.

After all of this I just gave up. Other things occurred in my life that took up my time and energy. I am waiting until others have the same problem and then I will be able to provide background information as to the lack of concern of both the dealership and corporate Toyota.

**NHTSA Summary:**  
2006 TOYOTA RAV4 UNEXPECTED ACCELERATION. \*GR THE CONSUMER STATED ON THREE SEPARATE OCCASIONS, HE EXPERIENCED UNWANTED ACCELERATION. THE FIRST INCIDENT OCCURRED WHILE HE WAS TRAVELING OUT OF TOWN AND HE DISCOVERED HE HAD DIFFICULTY STOPPING THE VEHICLE TWICE. FIRST AT A TRAFFIC LIGHT, AND ANOTHER TIME AT A TOLL BOOTH. ON BOTH OCCASIONS, THE ENGINE REVVED VERY LOUDLY. THE SECOND INCIDENT HAPPENED ONE YEAR LATER AND THE CONSUMER HAD TO QUICKLY PLACE THE GEAR IN NEUTRAL AND PRESS HARD ON THE BRAKES IN ORDER TO STOP THE VEHICLE. THE VEHICLE WAS EXAMINED, AND THE CONSUMER WAS INFORMED THE PROBLEM WAS WITH THE MAT AND IT WAS SUBSEQUENTLY REMOVED. THE LAST EPISODE WAS ON FEBRUARY 13, 2010. UPON ARRIVING AT AN ESTABLISHMENT DRIVING 20- 30 MPH, HE ATTEMPTED TO STOP, BUT THE VEHICLE DID NOT RESPOND TO THE BRAKES BEING APPLIED. THE CONSUMER WAS FINALLY ABLE TO STOP AFTER PUTTING THE GEAR IN NEUTRAL. \*JB

**NHTSA Summary:**  
I HAVE SEEN IN THE NEWS, REPORTS OF '07 TOYOTA TACOMAS ACCELERATING UNINTENTIONALLY. I BOUGHT A USED 1998 TACOMA ABOUT FOUR YEARS AGO AND I HAVE EXPERIENCED PERHAPS TEN OR MORE INCIDENTS OF MY ENGINE RUNNING AWAY TO THE POINT I HAVE TO PUT IT NEUTRAL AND KICK THE GAS PEDAL TO STOP IT. AT LEAST TWICE THAT HAS NOT WORKED, FORCING ME TO TURN OFF THE ENGINE. I NOTICE IT HAPPENS WHEN I'M DOWNSHIFTING FROM THIRD TO SECOND. I CALLED TOYOTA TWO YEARS AGO AND ASKED IF THEY HAD HEARD OF THIS PROBLEM FROM OTHER OWNERS. THEY SAID THEY HAD NOT. THIS IS NOT SO MUCH A COMPLAINT AS IT IS AN FYI TO YOU IN CASE YOU'RE STILL LOOKING INTO THIS. OTHER THAN THAT THE TRUCK HAS BEEN VERY DEPENDABLE. AND SINCE THE PROBLEM IS SO INTERMITTENT, (IT HASN'T HAPPENED IN A YEAR), I DON'T FEEL THE NEED TO GET RID OF IT. BUT I CAN IMAGINE IN THE RIGHT CIRCUMSTANCES THIS COULD BE A SERIOUS SAFETY PROBLEM. PLEASE LET ME KNOW IF YOU OR TOYOTA IS LOOKING INTO THIS. THANK YOU, JOHN T. POPE \*TR

**NHTSA ODI Number:** 10311457  
**Date of Incident:** 20071201  
**Vehicle:** 2008 TOYOTA RAV4  
**Location of Incident:** LAYTON, UT

**NHTSA Summary:**

MY 2008 RAV4 SUV SUDDENLY GOES TO FULL THROTTLE ON ITS OWN. I HAVE TO PUT BOTH FEET ON BRAKE PEDAL WHILE TRYING TO GET THE CAR OUT OF GEAR. THIS HAS HAPPENED INTERMITTENTLY SINCE PURCHASING THIS SUV NEW. I HAVE BEEN BACK TO THE DEALERSHIP SEVERAL TIMES AND THEY CAN'T FIND A PROBLEM. THEY SAID THAT THEY NEED TO SEE THE CAR WHILE IT IS RACING UP, BUT I DON'T KNOW WHEN IT WILL HAPPEN AND I CAN'T MAKE IT HAPPEN ON WILL. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10304191  
**Date of Incident:** 20071202  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** SEATTLE, WA

**NHTSA Summary:**

WHEN I LET UP ON THE GAS AND THEN STEP ON THE GAS PEDAL TO CONTINUE THE CAR LURCHES. THIS HAPPENS ON A RANDOM BASIS AND I HAVE REPORTED THIS TO LEXUS SEVERAL TIMES SINCE I HAVE OWNED THE CAR BUT THEY TELL ME IF IT DOES NOT DO IT WHILE THEY ARE TEST DRIVING THERE IS NOTHING THEY CAN DO. THEY SAY EVERYTHING CHECKS OUT OK AND THERE ARE NO ERROR CODES SHOWING ON THE COMPUTER. I HAVE TOLD THEM IT IS EITHER THE TRANSMISSION OR WHATEVER CONTROLS THE GAS PEDAL AND THEY DON'T SEEM TO BE CONCERNED. IN MY OPINION THERE IS DEFINITELY SOMETHING WRONG SOMEWHERE.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**

WE BOUGHT 2007 CAMRY IN JULY OF 2007. MY WIFE DROVE IT TO WORK AND GOT AN ACCIDENT ON 12/5/07. WHEN SHE EXITED HIGHWAY, SHE USED GAS THEN USED BRAKE TO REDUCE THE SPEED. THE BRAKE DID NOT WORK. THE CAR SPED OUT OF CONTROL AND HIT THE SIDE OF HILL. THE CAR WAS ROLL OVER TO ONE SIDE AND TOTALED. MY WIFE WAS BADLY INJURED AND WAS SENT TO HOSPITAL EMERGENCY ROOM. SHE GOT SOME CUTS IN HER HEAD BY THE BROKEN WINDOW AND SHE HAD TO STAY AT HOME FOR ABOUT 2 WEEKS BEFORE GOING BACK TO WORK. WE BELIEVED SOMETHING WRONG WITH THE CAR BRAKE OR GAS PEDAL. AND WHEN THE CAR HIT THE SIDE OF HILL, NONE OF CAR SAFETY AIR BAGS CAME OUT. THE CAR WAS TOTALED AND PAID BY OUR INSURANCE. BUT THIS ACCIDENT GAVE HER A LONG TIME FEAR AND BAD FEELING WHEN SHE PASSED THAT PLACE. WE HOPE WE CAN JOIN THE TOYOTA CLASS ACTION LAWSUIT. PLEASE GIVE US SOME SUGGESTIONS. THANKS! \*TR

**NHTSA ODI Number:** 10211100  
**Date of Incident:** 20071206  
**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** FISHERS, IN

**NHTSA Summary:**

SEVERAL PROBLEMS WITH LURCHING, SUDDEN ACCELERATION, AND HIGH IDLE. WHEN STOPPED WITH FOOT SQUARELY ON THE BRAKE (AND ONLY THE BRAKE), THERE WILL BE A SUDDEN LURCH THAT IS OFTEN STRONG ENOUGH TO OVERCOME THE BRAKE, NEARLY CAUSING SEVERAL ACCIDENTS WITH THE CAR IN FRONT OF ME. ALWAYS SEEM TO BE PRESSING THE BRAKE HARD TO STOP MOTION AND STAY STOPPED. WHEN I LET OFF THE BRAKE, THE TRUCK ACCELERATES ABOUT 100 RPM BEFORE EVEN TOUCHING THE ACCELERATOR PEDAL, AND BEGINS MOVING SIGNIFICANTLY. WHEN DECELERATING TO A STOP, HAVE HAD SEVERAL INSTANCES OF SUDDEN RPM AND ACCELERATION. THIS ALSO OCCURS WHEN GENTLY PULLING INTO MY GARAGE - THE ENGINE SUDDENLY LURCHES, AND HAS NEARLY CAUSED ME TO DAMAGE MY GARAGE. HAVE HAD SEVERAL INSTANCES WHERE BRAKING TO STOP, BUT THE ENGINE LURCHES GREATLY (SEVERAL HUNDRED RPM), I ALMOST CAN'T GET THE TRUCK TO STOP, AND HAS NEARLY CAUSED SEVERAL ACCIDENTS. I HAVE BEEN FORTUNATE SO FAR, BUT AFRAID IT WON'T LAST. ALL OF THIS IS WORSENERD WHEN THE AC/COMPRESSOR IS RUNNING - THE IDLE RPM INCREASES ABOUT 300 RPM (WAY MORE THAN NECESSARY), AND ALSO CONTRIBUTES TO WORSENERD THE LURCH. SOMETIMES IT SEEMS THAT THE LURCHING OCCURS WHILE DOWN-SHIFTING DURING DECELERATION. THESE PROBLEMS HAPPEN TO ME REGULARLY

**C-1037****Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

- AND ALWAYS OCCUR WHEN RUNNING THE AC/COMPRESSOR. PLEASE ADDRESS ASAP. THANKS. \*TR

**Additional Summary:****Toyota ID Number:**

**NHTSA ODI Number:** 10318713  
**Date of Incident:** 20071207  
**Vehicle:** 2005 TOYOTA PRIUS  
**Location of Incident:** BATTLE CREEK, MI

**NHTSA Summary:**

MY TOYOTA PRIUS (2005) GAS PEDAL STUCK. I WAS TAKING MY WIFE TO THE HOSPITAL WITH A HEART ATTACK WE WERE GOING DOWN A RAMP AND IT STUCK WIDE OPEN. I KEPT PUSHING THE START BUTTION AND IT QUIT. I CALLED THE TOYOTA DEALER AND HE TOLD ME TO REMOVE MY FLOOR MATS. I DO NOT THINK MY FLOOR MAT HAD ANYTHING TO DO WITH IT. IT HAS NOT STUCK SINCE.

**Additional Summary:****Toyota ID Number:**

**NHTSA ODI Number:** 10306242  
**Date of Incident:** 20071209  
**Vehicle:** 2007 SCION TC  
**Location of Incident:** CORONA, CA

**NHTSA Summary:**

MY DAUGHTER PEDAL STUCK TO THE FLOOR OF HER 2007 SCION IN 2009 OF LAST YEAR. I CAN PROVIDE THE DATE OF THE INCIDENT. SHE WAS DRIVING NORMAL SPEED IN CORONA CALIFORNIA DOWN HIDDEN VALLEY PARKWAY. SHE TRIED TO STOP THE CAR BUT THE PEDAL WAS STUCK & THE RUG MAT ALWAYS GAVE US PROBLEMS WITH THIS FAIRLY NEW VEHICLE. SHE WAS UNABLE TO STOP AT PLOWED IN TO THE CAR AT A HIGHER SPEED DUE TO THE PETAL STUCK AND GOING IN A DOWNHILL DESCEND. AS A RESULT OF THE PETAL/MAT MALFUNCTION, SHE HIT THE VEHICLE AT THE LIGHT AT A NON-EXTREME SPEED BUT WAS NOT ABLE TO STOP. THE AIR BAGS DID NOT DEPLOY AND SHE HAD HIT THE GENTLEMEN IN A TRUCK IN FRONT OF US. THE CORONA POLICE TOOK THE INCIDENT REPORT DOWN. THE OFFICER SAID IT WAS AMAZING THAT SHE NOT INJURED TOO BAD, BUT EMOTIONALLY SHE WAS A MESS. THE WHOLE FRONT IN OF THE VEHICLE CAME RIGHT INTO HERFRONT SEAT & PASSENGER SEAT. THE AIRBAGS DID NOT DEPLOY AT ALL. SHE WAS ONLY INJURED SLIGHTLY WITH A COUPLE DAYS OFF FROM

**C-1038****Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SCHOOL. MYSELF FROM WORK TO ATTEND TO HER PAIN. I WAS NOT IN THE VEHICLE. MY DAUGHTER'S CAR WAS TOTALED & THE COLLISION CENTER, THE INSURANCE COMPANY FILED THE REPORT OF THE STUCK PEDAL(ACCELERATOR). I COMPLAINED TO TOYOTA- I ALSO WAS CONCERNED ABOUT THE INCIDENT. THIS INCIDENT HAPPENED PRIOR TO THE RECALL BUT IS TOO MUCH OF A CO-INCIDENT. MY DAUGHTER IS A GOOD DRIVER. SHE COMPLAINED OF THE PEDAL BUT I DID NOT THINK THAT IT WAS GOING TO BE A SAFETY ISSUE. I HAVE SINCE THEN SETTLED WITH THE INSURANCE COMPANY FOR THE PAYMENT TO PURCHASE A NEW CAR. WE BOUGHT ANOTHER SCION TC THIS TIME 2009. NOW THIS CAR IS BETTER IN THE PEDAL AREA BUT STILL HAS A DELAY WITH THE BRAKING SYSTEM AND PULLS TO THE LEFT SLIGHTLY. I AM FILING A COMPLAINT BECAUSE THE INITIAL TOYOTA WAS TOTALLED DUE TO A STUCK PEDAL. THIS IS BEFORE ANY RECALL OR DEATHS OCCURRED BUT SEVERAL OF MY FRIENDS, COLLEAGUES ARE TELLING ME TO FILE THE COMPLAINT FOR INVESTIGATION TO SEE WHY THIS FAILURE OCCURED. I WAS ONLY ABLE TO CORRECT THE FAILURE WITH A NEW CAR. THAN

**Date of Incident:** 20071210  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** VIRGINIA BEACH, VA

**NHTSA Summary:**

THE ENGINE OFTEN HESITATES FOR SEVERAL SECONDS WHEN I STEP ON THE GAS. THIS OFTEN HAPPENS WHEN I AM RAPIDLY ACCELERATING TO ENTER A FREEWAY OR SIMPLY PULLING AWAY FROM A STOP LIGHT. THIS IS A DANGEROUS SITUATION AS I NEED THE CAR TO ACCELERATE TO ENTER FAST MOVING TRAFFIC BUT I CANNOT COUNT ON THE ENGINE TO RAPIDLY SPEED UP. AFTER SEVERAL SECONDS OF HESITATION, THE CAR THEN ACCELERATES TOO RAPIDLY. I HAVE HAD AN ISSUE WITH THIS CAR SINCE I HAVE OWNED IT AND HAVE BEEN GIVEN EVERY EXCUSE IN THE WORLD AS TO WHY THE VEHICLE PERFORMS IN THIS MATTER FROM THE COMPUTER HAS TO "LEARN" YOUR DRIVING STYLE TO THAT IS HOW TOYOTA MADE THE VEHICLE. THEY REPLACED THE TRANSMISSION AND REBOOTED THE COMPUTER AND STILL THE PROBLEM. I ALSO HAD THE VVTI OIL LINE BREAK AND DUMP OIL AND HAD BEEN DRIVING LIKE THAT FOR OVER 100 MILES-I HAD REPLACED THE REGULAR OIL WITH SYNTHETIC OIL -TOYOTA REPLACED THE LINE AND USED THE EXACT SAME KIND OF PART THAT HAD FAILED WHEN I REQUESTED THEY REPLACE IT WITH THE UPGRADED PART I WAS TOLD THAT IT WAS NOT A WARRANTY PART REPLACEMENT FOR THE FAILURE AND IF I WANTED THEM TO PUT THE OTHER PART ON THEY WOULD BUT THE CAR WOULD NOT BE COVERED UNDER WARRANTY BECAUSE OF THE NON SPECIFIED PART BEING PUT ON THE CAR. LETS HOPE IT DOES NOT FAIL AGAIN. TWO ISSUES ONE ONGOING ONE NOT FIXED WITH THE UPGRADED PART--SHAME ON TOYOTA!! \*TR

THE FOLLOWING E-MAIL WAS SENT TO YOU DECEMBER 2007. "WITH ALL OF THE PROBLEMS TOYOTA IS HAVING WITH THE 2007 CAMRY TRANSMISSIONS, WHY HAVE THEY NOT HAD A RECALL? THE SLIP, BUCK AND WHEN YOU TAKE YOUR FOOT OFF OF THE GAS PEDAL AROUND 40 MILES AN HOUR, THE CAR CONTINUES TO GO FORWARD."

**C-1039****Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SENT BY ME, SHELDON GREENBERG, E-MAIL ADDRESS, MRBIGSHEL@AOL.COM. WHY DIDNT YOU PEOPLE DO SOMETHING YEARS AGO?????????????

**Additional Summary:****Toyota ID Number:**

**NHTSA ODI Number:** 10211750  
**Date of Incident:** 20071212  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** SAN LEANDRO, CA

**NHTSA Summary:**

HE HAS BEEN EXPERIENCING PROBLEM EITHER WITH THE TRANSMISSION OR THE ACCELERATOR. WHEN HE START TO ACCELERATE SOMETIMES, USUALLY IN LOW SPEED, 20% TO 40% OF THE TIME, THERE IS A FEW SECONDS THE CAR DOES NOT RESPOND, AND SUDDENLY HE FEEL A JOLT AND THE CAR JUMPS VIOLENTLY. HE HAS TO LOOK BACK WHENEVER IT HAPPENS TO SEE IF SOMEONE HAS CRASH IN TO HIS CAR. IF THERE IS A CAR INFRONT OF HIM WHILE IN TRAFFIC, THIS COULD LEAD POTENTIAL CAR ACCIDENT OF HITTING THE CAR INFRONT OF HIM. HE ALSO HAS TO MAKE SURE HE DOES NOT PARK TOO CLOSE TO OTHER CARS OR THE WALL. I HAVE HELP HIM REPORTED THE ISSUE TO DEALER 2 TIMES MANY MONTHS AGO AND THEY SAID THEY CAN NOT FIX THE PROBLEM IF THEY CAN'T FEEL THE PROBLEM. I HAVE ALSO TOLD THE HEADQUARTER I FOUND NUMEROUS COMPLAINTS ON THE SAME HESITATION/ACCELERATION PROBLEM MY FATHER EXPERIENCING AND I NOTICED TOYOTA HAVE BEEN TELLING OTHER PEOPLE SAME RESPONSE THAT DEALER CAN NOT FIX THE PROBLEM IF DEALER CAN NOT FEEL THE PROBLEM, AND DEALER HAVE BEEN TELLING PEOPLE THIS IS NORMAL BEHAVIOR FOR THOSE WHO REVISITED MANY TIMES. THERE ARE HUNDREDS OF COMPLAINTS ABOUT THIS ISSUE IF YOU GO SEARCH ON GOOGLE (USING KEYWARD TOYOTA CAMERY TRANSMISSION PROBLEM). ONE OF THE WEBSITE IS I FOUND FROM GOOGLE RESULT FOR EXAMPLE WAS  
[HTTP://WWW.AUTOBYTEL.COM/CONTENT/RESEARCH/FORUMS/INDEX.CFM/ACTION/POSTS/FID/282](http://www.autobytel.com/content/research/forums/index.cfm/action/posts/fid/282). IT HAS 27 PAGES OF SUCH COMPLAINTS. I HAVE ALSO NOTICE SUCH COMPLAINTS DOES NOT APPLY TO JUST 2005 YEAR CAMERY BUT AGAINST 2002 AND 2007 CAMERY AS WELL. WITH SO MANY CARS THEY SOLD OVER 5 YEARS AND SO MANY COMPLAINTS ON THEIR TRANSMISSION THAT CAN LEAD ACCIDENTS AND POSSIBLY ALREADY DID, TOYOTA ARE MAKING INDIVIDUALS FEEL AS IF THEY ARE THE ONLY ONE IMAGINING THINGS. A FEW PEOPLE SAID CERTAIN STORES ALLOW THEM TO DO A COMPUTER CHIP "FIX." AND THE FIX WAS NOT HELPFUL. ON TOP OF TRANSMISSION PROBLEM. HE NOTICED PAINT PEELING, RUST PAINT UNDER 15X MAGNIFYING GLASSES, A BUBBLE ON DASH BOARD. \*TR

\*\*\* SUBCASE 200712150210-1 CREATED 12/15/2007 10:19:41 AM JSpencer  
START RESPONSE

"Thank you for contacting Toyota Motor Sales, U.S.A., Inc.  
We apologize for your concerns with the operation of the cruise control system on your 2005 Tacoma and 2007 RAV4.

Within the limits of the engine's capabilities, cruising speed can be maintained on up-hill or down-hill grades. However, changes in vehicle speed may occur on steeper grades. The engine will downshift to a lower gear to achieve the set speed or use engine braking to keep the downhill speed close to the set speed. Depending on the steepness and length of the grade, the cruise control system may not be able to compensate and your actual speed may increase beyond the set speed.

To avoid vehicle speed increases when driving in hilly terrain, cancel the cruise control and use the gas or brake to adjust your speed manually. On lengthy downhill grades you can downshift the transmission to use engine braking to slow down.

Since we are not structured to offer on-line technical evaluations, repair, or diagnostic information we recommend you contact the Customer Relations Manager at your local Toyota dealership

<http://www.toyota.com/dealers> to further evaluate your vehicle. Even though you state that you have already worked with several dealerships we would still want the Customer Relations Manager to be involved to verify that all proper steps were taken.

We again apologize for the situation you encountered with your vehicle and we are sorry for any inconvenience you may incur.

Your email has been documented at our National Headquarters under file #200712150210. If we can be of further assistance, please feel free to contact us.

Toyota Customer Experience"

**NHTSA Summary:**

WHILE DRIVING, I TOO EXPERIENCED SUDDENT UNINTENDED ACCELERATION OF THE VEHICLE. I OVERTOOK A SLOW MOVIN VEHICLE IN FRONT OF ME ON OTHERWISE AN EMPTY ONE-LANE STRAIGHT ROAD. AS I EASED BACK INTO THE LANE, THE VEHICLE BEGAN TO RACE. I PRESSED THE BRAKE PEDAL AND THE CAR REALLY WANTED TO GO FASTER AND FASTER. AS I WAS REACHING SPEEDS IN EXCESS OF 50MPH, I THEN SHIFTED TO NEUTRAL BUT TO NO AVAIL AS THE VEHICLE CONTINUED TO ACCELERATE. LUCKILY, THE BRAKE WORKED AT ALL TIMES. I KEPT IT PRESSED DOWN REAL HARD WHILE THE RPM'S WERE GOING WELL ABOVE 6K. THE VEHICLE BEHAVED AS IF BOTH THE GAS AND BRAKE PEDALS WERE PUSHED DOWN ALL THE WAY. FINALLY, THE BRAKES DID THEIR JOB AND AS I SLOWED TO A STOP AND TURNED THE ENGINE OFF WITH A KEY. AFTER COLLECTING MYSELF I TURNED ON THE IGNITION AND CONTINUED WITH MY TRIP. NEXT DAY, I TOOK THE VEHICLE TO HIGHLAND PARK LEXUS IN NORTHBROOK, IL AT WHICH POINT THE SERVICE MANAGER JUST SHRUGGED HIS SHOULDERS IN DISBELIEF. I LONG RETURNED THE VEHICLE AFTER THE LEASE EXPIRED BUT CAN PROVIDE ME INFO SO THAT YOU GUYS CAN LOCATE THE VEHICLE AND TEST IT IF IT STILL ON THE ROAD SOMEWHERE.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**

I PURCHASED A PREVIOUSLY OWNED 2000 TOYOTA CAMRY ON 11/4/07. WHILE DRIVING FROM NORTHERN CALIFORNIA TO SOUTHERN CALIFORNIA ON THE LOSS DATE I ACTIVATED THE CRUISE CONTROL FEATURE. TRAFFIC ON THE FREEWAY BEGAN TO SLOW AND I DEPRESSED THE BRAKE PEDAL TO SLOW THE VEHICLE. TRAFFIC BEGAN MOVING AGAIN THEN SUDDENLY STOPPED. I AGAIN DEPRESSED THE BRAKE PEDAL BUT THE CAR SEEMED TO ACCELERATE EVEN THOUGH I HAD BOTH OF MY FEET ON THE BRAKE PEDAL. MY CAR CRASHED INTO THE REAR OF A VEHICLE IN FRONT OF MINE CAUSING BOTH AIR BAGS IN MY VEHICLE TO DEPLOY. THE CRASH IMPACT JAMMED THE DRIVER'S DOOR PREVENTING IT FROM OPENING, TRAPPING ME IN THE CAR WITH SMOKE POURING FROM UNDER THE HOOD. INITIALLY THE ELECTRIC WINDOW WOULD NOT OPEN BUT FINALLY DID ALLOWING ME TO EXTRICATE MYSELF FROM THE DAMAGED VEHICLE. \*TR

**NHTSA Summary:**

I AM WRITING TO YOU BECAUSE I WAS INVOLVED IN A CAR ACCIDENT IN THE FIRST YEAR OF PURCHASING MY CAR ON DECEMBER 25, 2007. I PURCHASED A TOYOTA COROLLA CE 2007 FROM DENBIGH TOYOTA (NEWPORT NEWS VA) ON JANUARY 25, 2007. I BELIEVE MY CAR ACCELERATED INTO AN ELECTRICAL POLE. I WAS ONLY TRYING TO PARK MY CAR. IT HIT SO HARD, THAT THE REPAIRS TO MY CAR WERE IN EXCESS OF \$2600, AND THERE WAS DAMAGES DONE TO THE ELECTRICAL POLE. IT WAS A VERY FRIGHTENING EXPERIENCE. THE OFFICERS THAT HELPED ME FROM THE CAR ASKED WHAT HAD HAPPEN. I TOLD HIM THAT I REALLY DIDN'T KNOW. I JUST WANTED TO PARK MY CAR. THE POLE WAS DIRECTLY IN FRONT OF ME, AND THERE WERE THICK SHRUBS BETWEEN MY CAR AND THE POLE AS WELL. MY CAR ACCELERATED SO UNBELIEVABLY FAST, THAT I HIT THE POLE THE FIRST TIME REALLY HARD. THEN, I BACKED UP AWAY FROM THE POLE AND THE SHRUBS AND STOPPED. I ATTEMPTED TO PULL INTO THE PARKING SPACE AGAIN, THE CAR ACCELERATED AND I SLAMMED INTO THE POLE AGAIN. IT WAS NOT THE FIRST MAJOR ISSUE THAT I HAD WITH THE CAR. WITHIN 6 MONTHS OF THE PURCHASE DATE, THE VEHICLE STOPPED IN THE MIDDLE OF THE ROAD, AND LOCKED UP. I HAD IT TOWED BACK TO THE DEALERSHIP, TO HAVE THEM TELL ME THAT THE COMPUTER SYSTEM WAS FAULTY AND ON RECALL. SO, I ALLOWED THEM TO REPLACE IT. TODAY, I DON'T KNOW WHAT CAUSED MY CAR TO DO WHAT IT DID ON 1225, BECAUSE IT COULD HAVE BEEN ANYTHING. I JUST DON'T WANT THIS CAR ANYMORE, AND AM A LITTLE AFRAID. I DON'T KNOW WHAT TO DO WITH IT. I HAVE MANY ISSUES WITH THE CAR, BUT AM USED TO DRIVING IT. I CAN NOT AFFORD AN EXPERT TO LOOK AT MY CAR. IT CAN BE SOLD, OR I CAN TRADE IT AS I HAVE ONLY TWO YEARS LEFT ON MY CONTRACT. BUT, IT IS NOT THE RIGHT THING TO DO. I DON'T WANT WHAT HAPPENED TO ME TO HAPPEN TO SOMEONE ELSE. BUT, I DON'T WANT IT TO HAPPEN AGAIN TO ME. MY MODEL CAR IS NOT CURRENTLY ON RECALL. MY LAWYER REFERRED ME TO YOU. IF YOU CAN HELP ME IN ANY WAY WITH MY SITUATION, I WOULD GREATLY APPRECIATE IT. I NEED PEACE OF MIND FOR ME AND MY FAMILY.

**NHTSA ODI Number:** 10220503  
**Date of Incident:** 20071229  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** HAMPSTEAD, NH

**NHTSA Summary:**

THE CAR ACCELERATED QUICKLY ON ITS OWN, WITH ENGINE RACING, AND COULD NOT BE STOPPED EASILY, RESULTING IN A COLLISION WITH A TREE. THE ENGINE CONTINUED TO RACE ON IT'S OWN, WITH NO ONE PRESSING THE THROTTLE, UNTIL THE IGNITION WAS SWITCHED OFF. THIS WAS NOT CAUSED BY A LOOSE FLOOR MAT, THE FLOOR MAT WAS SECURED AND NOT ANYWHERE NEAR THE PEDAL. IN FEBRUARY I RECEIVED A LETTER FROM TOYOTA SAYING THAT THEY BELIEVE THERE WAS NOTHING WRONG WITH THE CAR. I CALLED TOYOTA TO TALK TO THE PERSON WHO SENT THAT LETTER AND REPEATED THE FACTS AS STATED ABOVE AND SHE TOLD ME THAT I "MAY BE MISTAKEN." THE FACT THAT THE ENGINE CONTINUED TO RACE AFTER THE CRASH IS IMPORTANT, SINCE SOME MAY THINK THAT I WAS PUSHING THE THROTTLE HERSELF. ONCE I GOT OUT OF THE CAR SHE OBVIOUSLY COULDN'T BE PUSHING THE PETAL HERSELF. THE ENGINE DIDN'T STOP RACING UNTIL I TURNED THE ENGINE OFF. THEN, WHEN THE TOW TRUCK CAME, THE DRIVER RE-STARTED THE CAMRY TO POSITION IT FOR TOWING. WHEN HE DID, THE ENGINE RAN NORMALLY. WHEN A CAR TAKES OFF BY ITSELF, IT HAS A PROBLEM. THEREFORE THIS CAR, AND MAYBE ALL 2007 CAMRYS MAYBE ALL TOYOTAS, HAVE A PROBLEM. HOWEVER WE DROVE THIS CAR FOR MONTHS AND MANY MILES WITHOUT A SYMPTOM. IT APPARENTLY TAKES SOME KIND OF PARTICULAR COMBINATION OF CIRCUMSTANCES FOR THE PROBLEM TO COME OUT. NO ONE WAS INJURED IN THIS INCIDENT, BUT THIS BEHAVIOR COULD CAUSE SOMEONE TO BE SERIOUSLY INJURED OR KILLED. I BELIEVE TOYOTA SHOULD FIND OUT WHY THIS HAPPENED AND TRY TO FIX IT, INSTEAD OF TRYING TO CONVINCME THAT I AM WRONG WHEN I TELL THEM WHAT HAPPENED. \*TR UPDATED

high RPMs on '05 Tacoma  
EMAIL STS  
"Dear Sirs,  
Why is the engine racing on start up? Both dealers in our area say this is normal, however, a cold engine running at 2500 RPM's cannot be good. In addition, it can't be giving me good gas mileage. What can we do to resolve this before I start having engine problems? I purchased it new."  
END EMAIL

\*\*\* SUBCASE 200801081307-1 CREATED 01/08/2008 02:13:04 PM JSpencer

**START RESPONSE**

"Thank you for contacting Toyota Motor Sales, U.S.A., Inc.  
We apologize for your concerns with the higher than expected idle speed from your 2005 Tacoma at start up.

This is the correct operation of your vehicle as the idle speed is increased to get the engine to normal operating temperatures as quickly as possible.  
Concerns regarding running the vehicle at high RPM's when cold are no longer an issue because with most modern vehicles there is full oil circulation within 20 seconds of the engine being turned on. Also over time, a film of oil will start to develop on the internal moving parts of the engine that will not drain back to the pan, which will provide some protection right at start up.  
After waiting that first 20 seconds, you can drive your vehicle normally with out concern for abnormal wear and tear.  
Your email has been documented at our National Headquarters under file #Stincidents.c\$clariifcascnumbr.  
If we can be of further assistance, please feel free to contact us.  
Toyota Customer Experience"  
END RESPONSE

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Additional Summary:**

from Houston Press article - "On a rainy night last fall, a couple of months after Riner bought her Prius, she was driving toward the Galleria for a sales meeting. She hated driving in the rain because a car wreck in college catapulted her through the windshield and doctors almost had to amputate her leg. Traffic near the mall was congested but moving, and Riner kept the Prius pegged at 60 mph, constantly looking at the console to manage her fuel consumption. Suddenly, she felt the car hydroplaning out of control, and when she glanced at the speedometer she realized the car had shot up to 84 mph. Riner wasn't hydroplaning; quite simply, her Prius had accelerated on its own. She pushed on the brakes but they were dead. Then, just as suddenly as the car had taken off, it shut down. The console lit up with warning lights, leaving Riner fighting a stiff steering wheel as she coasted across four lanes of traffic and down an exit ramp."

**Toyota ID Number:**  
**NHTSA ODI Number:**  
**Date of Incident:** 20080000  
**Vehicle:** 1998 LEXUS GS400  
**Location of Incident:**  
**NHTSA Summary:**  
**Additional Summary:**

Saw the news about the Toyota/Lexus recall. That's happened to me twice on my 98 GS400; the last time was in summer 08 when I was turning right off of Lake Shore Drive in Chicago heading east on Roosevelt Rd. All of a sudden the car started accelerating fully (and if you know this car you'll know how fast it can go). I hit the brakes and the car was squealing and continuing forward. The next thing I did was reach down to see if the floor mat was sticking the pedal; it wasn't. I put it in neutral and shut off the car and coasted into a left turn lane. I then started the car up again and it was normal.

My thought is that it's the "drive by wire" throttle that could be the problem. I think when my car was made, it may have been one of the first that electronically changes the throttle mapping.

**Toyota ID Number:**  
**NHTSA ODI Number:**  
**Date of Incident:** 20080000  
**Vehicle:** TOYOTA LAND CRUISER  
**Location of Incident:** PATERSON, NJ  
**NHTSA Summary:**  
**Additional Summary:**

Approximately late spring, early summer 08. Pulled out of toll, accelerated, took off like a rocket to 90-100 mph. Thinks he put it in neutral, but he was in a panic. Not sure. Got on a stretch of open highway - hit the accelerator, but the brake worked. Later pushed the pedal down into the mat, and it locked into the all-weather mats. Called Toyota Customer Service, possibly e-mailed. They didn't do anything. Complaint is floor mat. Mat kept sliding forward.

CAME FROM DEALER WITH CARPET MATS AND ALL-WEATHER MATS ON TOP.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10292482  
**Date of Incident:** 20080101  
**Vehicle:** 2008 TOYOTA CAMRY HV  
**Location of Incident:** RANCHO CUCAMONGA, CA  
**NHTSA Summary:**

APPROXIMATE INCIDENT DATE IS ENTIRELY INACCURATE. I DO NOT REMEMBER WHEN THIS HAPPENED, BUT PROBABLY MORE THAN A YEAR AGO EITHER IN A 2006 CAMRY OR A 2008 CAMRY HYBRID. I BELIEVE THIS TO BE RELATED TO NHTSA CAMPAIGN ID 09V388000. I AM CONCERNED BECAUSE "TOYOTA HAS DETERMINED THAT THIS DEFECT DOES NOT EXIST IN VEHICLES IN WHICH THE DRIVER SIDE FLOOR MAT IS COMPATIBLE WITH THE VEHICLE AND IS PROPERLY SECURED" AND BELIEVE THAT MY COMPLAINT SHOULD BE INVESTIGATED CONCURRENTLY WITH THIS ONE. 1. MY COMPATIBLE AND PROPERLY SECURED CARPETED DRIVER'S SIDE FLOOR MAT SLIPPED OFF THE RETAINING HOOKS (CLIPS) AND BUNCHED UP UNDER THE PEDALS. THERE ARE ONLY TWO HOOKS, WHICH ARE REMOVABLE, AND THEY SPIN AROUND AND AROUND, ALLOWING THE MAT TO SLIP OFF. I BELIEVE THAT A SIMPLE FIX OF INSTALLING PERMANENT HOOKS THAT DO NOT SPIN, OR FOUR HOOKS, WOULD SOLVE THIS POTENTIALLY FATAL ISSUE. 2. AS I WAS DRIVING, I FOUND MYSELF UNABLE TO DEPRESS THE BRAKE PEDAL. I DISCOVERED THAT MY FLOOR MAT HAD LODGED UNDER THE BRAKE PEDAL, MAKING IT SO THAT COULD NOT PRESS IT DOWN. FORTUNATELY I WAS ABLE TO DISLODGE THE MAT AND AVOID A COLLISION. THIS INCIDENT ONLY HAPPENED ONCE, BUT THE MATS DO COME OFF THE HOOKS FREQUENTLY. THEREFORE I MUST CONSTANTLY MAKE SURE THAT MY MAT IS SECURE AND THAT THE HOOKS ARE FACING THE CORRECT WAY SO THE MAT CANNOT SLIP OFF THEM. 3. THE FAILURE WAS NOT REPORTED AND NO ACTION HAS BEEN TAKEN. \*TR

**Toyota ID Number:**  
**NHTSA ODI Number:** 10302602  
**Date of Incident:** 20080101  
**Vehicle:** 2007 TOYOTA TUNDRA  
**Location of Incident:** HAMPTON, VA  
**NHTSA Summary:**

VEHICLE HARD TO STOP WITH A/C OR HEADLIGHTS ON. ENGINE IDLES NORMALLY 5-600 RPM. UNTIL PARKING LIGHTS OR A/C IS TURNED ON. THEN IT IDLES AT 800 RPM IN GEAR. SOMETIMES IT FEELS LIKE YOU'VE BEEN REAR ENDED, AFTER COMING TO A STOP. IF DRIVING SURFACE IS SLIPPERY AND PUT INTO GEAR WITH HEAD LIGHTS ON, THE REAR TIRES WILL BEGIN TO SPIN, WITHOUT TOUCHING THE ACCELERATOR. THIS IS A DAILY OCCURENCE THAT HAS BEEN TAKEN TO DIFFERENT TOYOTA DEALERS WITH NO RELIEF. ALL THEY CAN SAY IS THAT THE COMPUTER SAYS EVERYTHING IS OKAY. TURNING THE PARKING LIGHTS ON DOES NOT CAUSE ENOUGH LOAD ON THE ENGINE TO WARRANT THE EXTRA 200 OR MORE RPM. THE OTHER DAY (01/26/2010) I WAS TURNING AROUND IN A MUDDY DRIVEWAY AND WHILE IDLING I TURNED THE STEERING WHEEL TO THE LEFT. I LET MY FOOT OFF THE BRAKE AND THE TRUCK WENT STRAIGHT, EVEN

**C-1056**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AS I APPLIED THE BRAKES, LEAVING TWO BIG RUTS THROUGH MY FRIENDS YARD. THIS WAS CAUSED BY THE GROUND BEING SLIPPERY AND THE HIGH IDLE SPEED. I AM SURE THAT THIS WILL CUT DOWN ON THE LIFE OF THE BRAKES. 4.7 V8 ENGINE \*CN

**Toyota ID Number:**  
**NHTSA ODI Number:** 10311782  
**Date of Incident:** 20080101  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** MURFREESBORO, TN

**NHTSA Summary:**  
MY 2002 CAMRY BEGAN "LURCHING" APPROX. 2 YEARS AGO. WE HAVE TAKEN IT FOR SERVICE 5 TIMES, TO NO AVAIL. WE REPLACED SPARK PLUGS, A SENSOR AND WERE TOLD BY ONE DEALER THAT IT WAS JUMPING FROM CYLINDER TO CYLINDER, BUT THEY COULD NOT FIND THE SOURCE OF THE PROBLEM. TWO OTHER VISITS TO 2 SEPARATE DEALERS WERE UNSUCCESSFUL IN EXPERIENCING THE PROBLEM DURING TEST DRIVES. THEY EVEN HAD A REGIONAL MANAGER COME AND CHECK IT OUT. THEY SAID THEY HAVE NEVER SEEN THIS PROBLEM BEFORE AND COULD NOT DIAGNOSE IT. IT HAPPENS INCONSISTENTLY WHEN CRUISING AT LOWER SPEEDS AND AGAIN AT HIGHER SPEEDS. SOMETIMES IT IS WORSE THAN OTHERS AND THEN IT GOES DAYS WITHOUT HAPPENING. I AM NOW CONCERNED THAT IT MAY BE A SAFETY ISSUE CONNECTED TO THE GAS PEDAL AND WOULD LIKE TO KNOW WHAT THE PROBLEM IS AND HAVE IT CORRECTED. I HAVE ALSO EXPERIENCED ISSUES WHEN BRAKING WHEN GOING DOWNHILL ON A BUMPY SURFACE. THIS HAS HAPPENED SINCE I HAD THE CAR. WHEN I REPORTED IT TO THE DEALER, THEY TOLD ME IT WAS JUST THE WAY THE DISC BRAKES WORK, BUT IT WAS SCARY - FEELS LIKE YOU DON'T HAVE CONTROL OVER THE CAR. WE HAVE BEEN LOYAL TOYOTA OWNERS FOR MANY YEARS DUE TO THEIR HISTORY OF QUALITY, RELIABLE CARS, BUT HAVE CONCERNS NOW. PLEASE LET ME KNOW WHAT CAN BE DONE TO HELP US WITH THESE ISSUES. THANK YOU!. APPROX. INCIDENT DATES BELOW ARE NOT ACCURATE. IT HAS BEEN AN ONGOING PROBLEM FOR 2 OR 3 YEARS. \*TR

**Vehicle:** 2006 SCION XB  
**Location of Incident:** LATHROP, MO

**NHTSA Summary:**  
ACCELERATED (TOOK OFF) WHILE DRIVING AT HIGHWAY SPEED (5 INCIDENTS)...ORIGINALLY I THOUGHT IT WAS A PROBLEM WITH MY AFTERMARKET CRUISE CONTROL. I CALLED DEALERSHIP AND REPORTED THAT THEY SHOULD NOT RECOMMEND AFTERMARKET CRUISE AT THE TIME...THEY CLAIMED NO OTHER PROBLEMS. AFTER 2ND INCIDENCE CRUISE CONTROL WAS REPLACED BY INSTALLER AND HE CALLED THE COMPANY...NONE WAS FAMILIAR WITH THE PROBLEM ON MY CRUISE MODULE (HE SHOWED ME HOW TO DISCONNECT CRUISE UNDER THE HOOD SINCE CURRENT STILL RUNS THROUGH MECHANISM SINCE CRUISE WAS IN OFF POSITION DURING 2ND INCIDENT)...THE PROBLEM THEN HAPPENED AGAIN (3 TIMES IN SAME DAY ON WAY TO AIRPORT) WITH NEW CRUISE MECHANISM. NO PROBLEMS IN LAST 2 YEARS, BUT IT'S A DAILY GAMBLE...NOW I HAVE TO WONDER IF THE CRUISE WAS EVER EVEN PART OF THE EQUATION IN THE PROBLEM WITH ALL THE ACCELERATOR AND OTHER PROBLEMS I'VE READ ONLINE. I CHECKED WITH THE DEALERSHIP AGAIN THIS YEAR AND THEY DENY ANY PROBLEM WITH SCION ACCELERATORS OR BRAKE NOT DEPRESSING (IT ALWAYS FELT LIKE MY BRAKE AND GAS WERE FIGHTING LIKE IF YOU 2 FOOTED IN A MANUEL EQUALLY, BUT I OWN A AUTOMATIC...IT'S VERY SCARY).

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

C-1060

**NHTSA Summary:**

THE VEHICLE EXPERIENCED TWO SPONTANEOUS AND UNCONTROLLED ACCELERATIONS WITHIN ABOUT TWO HOURS. THE FIRST WAS ON THE HIGHWAY. I TURNED INTO A PULLOUT TO ALLOW A FASTER CAR TO PASS ON A SNOW-SLICKED ROAD. WHILE TURNING BACK TOWARD THE HIGHWAY AT SLOW SPEED, ABOUT 5 MPH, TAPPING ON MY BRAKE PEDAL, THE CAR SUDDENLY ACCELERATED AND I WAS FORCED TO STAND ON THE BRAKES TO KEEP IT FROM RUNNING AWAY. BECAUSE OF THE ANTI-SKID BRAKES ENGAGING, THE CAR STILL MADE IT 3-4 FEET INTO THE TRAFFIC LANE BEFORE I WAS ABLE TO STOP. THE SECOND INCIDENT OCCURRED ABOUT AN HOUR LATER WHEN I ARRIVED HOME. I WAS BACKING THE TRUCK DOWN A CURVED GRAVEL DRIVEWAY TOWARD A TRUCK-UNDER GARAGE. THE TOTAL DISTANCE TO BE TRAVELED WAS ABOUT 30 FEET. EASING DOWN IN THE TURN, I HAD TRAVELED ABOUT 20 FEET WITH MY FOOT ON THE BRAKE (IDLING POWER WAS ALL THAT WAS NEEDED TO BACK DOWN AT 1-2 MPH; NO GAS WAS APPLIED). THE VEHICLE SUDDENLY LURCHED BACKWARDS. AGAIN, I HAD TO STAND ON THE BRAKES WHILE THE ENGINE REVVED AND THE REAR TIRES SPUN AND THREW GRAVEL, DIGGING 3-4 INCHES DEEP INTO THE GRAVEL SURFACE. BEFORE I WAS ABLE TO TURN OFF THE ENGINE. THE FOLLOWING MONDAY, I TOOK THE TRUCK TO MY TOYOTA DEALER. THEY WERE UNABLE TO FIND ANY DEFECT OR RECREATE THE PROBLEM, BUT SAID THEY WERE OPENING A CASE FILE WITH TOYOTA ON THE INCIDENTS AND HOPED TO GAIN MORE INFORMATION FROM THE MANUFACTURER. \*TR SEE ALSO 10216086 \*DSY CONSUMER SENT A LETTER WITH NEW INFORMATION. TL-THE CONTACT OWNS A 2008 TOYOTA TUNDRA. THE CONTACT TOOK VEHICLE IN TO AN AUTHORIZED DEALER IN 2008 AND HE STATED THAT HIS VEHICLE WAS EXPERIENCING SUDDEN SURGES FORWARD. THE DEALER STATED THAT THE ACCELERATOR PEDAL WAS SENSITIVE AND THEY DID NOT FIND ANY FAILURES WITH THE VEHICLE. THE CONTACT HAS INFORMED THE MANUFACTURER AND THEY WERE SUPPOSE TO SEND SOMEONE OUT TO PICK UP THE VEHICLE SEVERAL TIMES AND NO ONE HAS CAME OUT. THEY ALSO TOLD THE CONTACT TO FILE A COMPLAINT UNDER THE LEMON LAW. THEY REFUSED TO GIVE HIM ANY INFORMATION REGARDING THE LEMON LAW INFORMING HIM TO GET AN ATTORNEY AND FIND OUT HIMSELF. THE CONTACT HAS INFORMED HIS STATE ATTORNEY GENERAL OFFICE OF THE FAILURE ON THE VEHICLE AND THEY REFERRED HIM TO NHTSA TO FILE A COMPLAINT ALSO. THE CONTACT STATED THAT HE HAS NOW HAD TO PURCHASE ANOTHER VEHICLE BECAUSE HE DOES NOT FEEL THAT HIS VEHICLE IS SAFE FOR HIM NOR HIS FAMILY TO DRIVE IN. THE VIN WAS NOT AVAILABLE. THE APPROXIMATE FAILURE MILEAGE WAS 680 AND THE CURRENT MILEAGE WAS 7000. DF

**NHTSA Summary:**

I WAS DRIVING MY 2008 TOYOTA TACOMA WESTBOUND ON FM 1960 EAST OF HUFFMAN TEXAS WHEN I ACCELERATED TO PASS A SLOWER VEHICLE AND THE GAS PEDAL STUCK TO THE FLOOR. AFTER REACHING A SPEED OVER 90 MPH AND CLOSER TO 100MPH I BEGAN BRAKING AND MOVED TO NEUTRAL AND THEN BEGAN TO SLOW. BEING A TWO WAY, 2 LANES (TOTAL) HIGHWAY I AM FORTUNATE THERE WERE NO WESTBOUND CARS OR CARS IN MY SAME DIRECTION. MY WIFE AND FAMILY FRIEND WERE VERY UPSET AS WELL BECAUSE FOR 15 SECONDS WE COULD NOT STOP. I IMMEDIATELY REMOVED THE FLOOR MAT BELIEVING THAT WAS THE CAUSE. \*TR

**NHTSA Summary:**

ON SATURDAY 1/12/08 THE ACCELERATOR ON MY 2007 TOYOTA CAMRY STUCK TO THE FLOOR! I PUMPED THE PEDAL A FEW TIMES BUT THAT DIDN'T FREE IT. I HAD TO SLIP IT

**C-1064****Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

INTO NEUTRAL AND CUT THE ENGINE. I WAS ABLE TO SAFELY COAST INTO A PARKING LOT BUT WAS HIGHLY UPSET! I LOOKED DOWN AND DID NOT SEE ANYTHING INTERFERING WITH THE PEDAL, SO I PLACED THE VEHICLE INTO PARK AND STARTED IT UP AND PUMPED THE PEDAL AGAIN. IT SLOWLY CAME OUT. (IT FELT AS THOUGH HYDRAULIC PRESSURE HAD BEEN RELEASED.) I PUT IT INTO DRIVE AND SLOWLY PULLED FORWARD. IT SEEMED OK SO I DROVE IT SLOWLY STRAIGHT TO THE DEALER. WHEN I GOT THERE I TOLD THEM WHAT HAPPENED. (IF THIS HAD HAPPENED WHEN MY 68 YR. OLD MOTHER IN LAW WAS DRIVING MY CHILDREN TO SCHOOL IN THIS CAR AS SHE USUALLY DOES, I DONT THINK SHE WOULD HAVE REACTED AS I DID!) THE DEALERSHIP CALLED ME LESS THAN TWO HOURS LATER AND TOLD ME THAT THEY HAD ALREADY CHECKED MY CAR AND THAT THERE WAS NOTHING WAS WRONG WITH IT. THEY SAID THEY THOUGHT MY CAR MAT HAD GOTTEN STUCK ON THE ACCELERATOR (NOT ONE OF THEIRS, BUT A VERY HEAVY THICK RUBBER ONE.) I EXPLAINED I HAD LOOKED DOWN TO SEE IF ANYTHING WAS STUCK ONCE I HAD THE VEHICLE SAFELY STOPPED AND COULD SEE NOTHING INTERFERING WITH THE PEDAL! THEY TOLD ME THEY WERE BASING THIS ASSUMPTION ON THE FACT THAT THERE WAS AN OUTLINE FOR MY CAR MAT NEAR THE GAS PEDAL. I TOLD THEM, ADAMANTLY, THAT I DIDNT CARE WHERE THE OUTLINE WAS, THAT I HAD VISUALLY INSPECTED IT AND THAT NOTHING WAS STUCK! THEY INFORMED ME THAT, THAT WAS THEIR POSITION ON THE MATTER AND BASICALLY THE EXPLANATION THEY WERE STICKING TO. I DONT FEEL THIS CAR IS SAFE! I HAVE LOST MY CONFIDENCE IN TOYOTA AND SERIOUSLY DOUBT I WILL EVER PURCHASE ANOTHER.

\*TR

**Toyota ID Number:**  
**NHTSA ODI Number:** 10215501  
**Date of Incident:** 20080115  
**Vehicle:** 2005 TOYOTA AVALON  
**Location of Incident:** ELLICOTT CITY, MD

**NHTSA Summary:**

WEATHER: SUNNY ENGINE WARM - DRIVEN ABOUT 10 MILES ON THE WAY TO SMALL SHOPPING CENTER. IM IN NO HURRY, STOPPING TO BROWSE IN A FAVORITE BOUTIQUE. LOOKING FOR A PARKING SPACE, SLOWED VEHICLE TO A CRAWL. WHILE SCANNING THE LOT & THEN TURNED SLOWLY ABOUT 45 DEGREES TO DRIFT INTO AN AVAILABLE SPACE WHEN SUDDENLY THE VEHICLE LURCHED FORWARD OUT OF CONTROL RAMMING THE PARKED VEHICLE FACING THE SPACE I WAS IN. I REMEMBER A LOUD NOISE - WHICH WAS THE ENGINE ACCELERATING: AN UNFAMILIAR SOUND WHEN THE VEHICLE WAS JUST ABOUT STOPPED. THEN, THE NOISE OF THE CRASH - ABOUT 6 FT IN FRONT OF THE AVALON AT THE TIME OF THE NOISE & LURCH. THE IMPACT STOPPED THE CAR. I PUT IT IN REVERSE & BACKED AWAY, THEN TURNED OFF THE IGNITION. MY FOOT WAS NOT ON THE ACCELERATOR BY MISTAKE AS IT HAD BEEN ON THE BRAKE WHILE DRIFTING DOWN THE AISLE TOWARD THE OPEN SPACE - THERE HAD BEEN NO ACCELERATION WHILE IN THAT AISLE. TO COME TO A COMPLETE STOP IN THE SPACE I WOULD HAVE HAD TO APPLY ONLY THE SLIGHTEST PRESSURE TO THE BRAKE; THEREFORE, IF I HAD TOUCHED THE ACCELERATOR BY MISTAKE I WOULD HAVE NOT DONE SO WITH ENOUGH PRESSURE TO CAUSE THE WILD ACCELERATION. WITH MY FOOT ABOVE THE BRAKE IN THAT INSTANT WHEN I TOUCHED THE BRAKE TO STOP THE LURCH IT DIDNT AFFECT THE SPEED OF THE CAR BEFORE IMPACT. THERE WAS NOT ANY HESITATION IN THE ENGINE. NO DAMAGE TO THE OTHER VEHICLE. THE AVALON SUSTAINED SOME BUMPER DAMAGE AND A BENT HOOD - DRIVABLE, BUT I REFUSED TO DRIVE IT. WHILE WAITING FOR A TOW TRUCK I DROVE TO THE EMPTY LOT BEHIND THE STORES AND TRIED TO REPEAT THE EVENT, UNSUCCESSFULLY. I DISCOVERED THAT IN ORDER TO ACCELERATE THAT QUICKLY, I WOULD HAVE HAD TO HAVE PUSHED THE ACCELERATOR TO THE FLOOR - AN IMPOSSIBILITY AT THE 0 MILES PER HOUR I WAS DRIFTING INTO POSITION IN THE PARKING SPACE. THE CAR ACCELERATED SUDDENLY AND UNINTENTIONAL THROUGH NO ACTION ON MY PART. THE TOYOTA DEALER FOUND NOTHING WRONG WITH THE CAR.

**Date of Incident:** 20080121  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** OSHKOSH, WI

**NHTSA Summary:**

I PURCHASED A 2005 TOYOTA CAMRY XLE- 6 CYLINDER, NEW IN FALL OF 2004. AT PRESENT I HAVE UNDER 22,000 MILES ON IT. DURING MY LIMITED DRIVING OF THIS VEHICLE I HAVE EXPERIENCED AT LEAST 5 EPISODES OF UNINTENDED ACCELERATION. I RECENTLY DISCOVERED THAT ANOTHER FAMILY MEMBER HAD A SIMILAR EXPERIENCE WHILE DRIVING MY CAR. THE LAST EXPERIENCE HAPPENED ON 12/16/09. I HAD A PASSENGER IN THE CAR WITH ME AT THE TIME. EACH EPISODE IS MORE VIOLENT THAN PREVIOUS ONES. I HAVE HAD THE CAR LOOKED AT THOROUGHLY BY THE LOCAL TOYOTA DEALER. THE FIRST TIME THEY LOOKED AT IT WAS JULY 6/09. SINCE THEY CANNOT "MAKE IT HAPPEN" THEY SAID, THEY DONT KNOW HOW TO FIX IT. SINCE TOYOTA ANNOUNCED PROBLEMS I HAVE CALLED THEM ON 2 OCCASIONS AND HAVE 2 CASE NUMBERS ASSIGNED. THE CAR WAS LAST EXAMINED BY THE DEALER ON 12/22/09. I WAS TOLD TO WAIT UNTIL THE RECALL WAS OFFICIAL AND SEE IF 2005 CAMRYS WERE ADDED TO THE LIST. THEY HAVE NOT BEEN. THE CAR IS SETTING IN MY GARAGE AND HASN'T BEEN DRIVEN SINCE 12/22/09. I HATE TO THINK WHAT MIGHT HAVE HAPPENED HAD I DRIVEN THIS CAR AS MUCH AS I DID MY PREVIOUS CAMRY, A 1994 WITH WELL OVER 200,000 MILES AT PRESENT. \*TR

**Additional Summary:****Toyota ID Number:**

**NHTSA ODI Number:** 10305131  
**Date of Incident:** 20080121  
**Vehicle:** 2007 TOYOTA SIENNA  
**Location of Incident:** SARASOTA, FL

**NHTSA Summary:**

2007 TOYOTA SIENNA: TRANSMISSION TEMPORARILY FAILS TO ENGAGE THE CORRECT GEAR AFTER DECELERATING THEN RE-ACCELERATING RESULTING IN A PAUSE OR HESITATION BEFORE CONTROL IS AGAIN REGAINED. THIS OCCURS MOST FREQUENTLY WHEN SLOWING FOR TURNS AT INTERSECTIONS OR BEHIND SLOWING TRAFFIC OR ATTEMPTING A LANE CHANGE. THREE SERVICE CALLS HAVE BEEN MADE ON THE VEHICLE WHICH WERE RECORDED AS A "BAD ECU PROGRAM". SERVICE TECHNICIANS "REPROGRAMMED THE ECU" TO "RESET ADAPTIVE MEMORY AND SHIFT POINTS" HOWEVER THERE WAS NO CHANGE IN PERFORMANCE. IT WAS SUGGESTED THAT THIS WAS A DESIGN PROBLEM WHICH HAD BEEN CORRECTED IN LATER MODEL YEARS. THE POTENTIAL CONSEQUENCES OF THE TRANSMISSION'S FAILURE TO IMMEDIATELY ENGAGE IN THE CORRECT GEAR ARE THE LOSS IN ABILITY TO QUICKLY ACCELERATE OUT OF A PENDING COLLISION OR TO AVOID SLOWING IN THE MIDDLE OF AN INTERSECTION AND CAUSING OTHERS TO HAVE COLLISIONS.

**Additional Summary:****C-1069****Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C***Toyota ID Number:**

**Vehicle:** 2006 TOYOTA COROLLA

**C-1070****Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C***Location of Incident:** MILTON, WI**NHTSA Summary:**

THE ENGINE ON MY 2006 TOYOTA COROLLA HAS HAD AN ENGINE SERGE PROBLEM. WHEN THE CAR HAD ABOUT 26,000 MILES ON IT, I HAD A COUPLE OF INCIDENTS WHERE I WOULD BE STOPPED AT TRAFFIC LIGHT WITH MY FOOT ON BRAKE. THE ENGINE WOULD SERGE UP TO 4RPM'S. IT WAS ALL I COULD DO TO KEEP FROM HITTING THE CAR IN FRONT OF ME. I WAS SO SHOOK UP, I CALLED DEALER AND INSISTED THEY TAKE CAR AND CHECK IT OUT. THEY KEPT THE CAR OVERNIGHT, AND BY THE END OF THE NEXT DAY HAD DIAGNOSED THE PROBLEM. THEY TOLD ME IT WAS MY WORKBOOT. THE GAS PEDAL WAS SO CLOSE TO THE BREAK, THAT THE EDGE OF MY BOOT WAS HITTING THE GAS. I HAD A HARD TIME ACCEPTING THAT, BECAUSE I MADE A POINT TO KEEP MY FOOT ON THE BREAK WHEN THE INCIDENT WAS HAPPENING. I HAVEN'T HAD ANOTHER SERGE PROBLEM, BUT I DID HAVE A HIGH IDOL PROBLEM. TOYOTA REPLACED THE COMPUTER CHIP FREE OF CHARGE. I THOUGHT THAT WAS GREAT BECAUSE I HAD 36,895 MILES ON CAR AND MY WARRANTY HAD EXPIRED. I NOW HAVE 53,000 MILES ON CAR AND THE HIGH IDOL IS GETTING BAD AGAIN. THE RECENT RECALL ON GAS PEDAL HAS ME CONCERNED. I BELIEVE THE PROBLEM GOES BEYOND THE GAS PEDAL. I AM SENDING THIS EMAIL TO GIVE YOU MORE DATA. HOPEFULLY, OTHERS WILL DO THE SAME. \*TR

**Additional Summary:****Toyota ID Number:**

**NHTSA ODI Number:** 10318832  
**Date of Incident:** 20080124  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** BROWNSVILLE, PA

**NHTSA Summary:**

I HAVE A TOYOTA CAMRY 2007. THE ISSUE IS NOT A STICKY GASPEDAL BUT A HESITATION WHEN TRYING TO ACCELERATE. THEN OBVIOUSLY THE CAR DOES LUNGE FORWARD WHEN ACCELERATION CATCHES UP. MY CAR HAS NOT HAD AN ACCIDENT AS OF YET, BUT IT IS DISTURBING WHEN IT OCCURS WHILE IN TRAFFIC. I AM GETTING THE SO CALLED REPAIR ON MARCH 12, 2010. THIS HESITATION DOES HAPPEN OFTEN, BUT IT IS NOT CONSTANT. I JUST FEEL THAT MOST OF THE CAR OWNERS DO NOT REALIZE THAT THE HESITATION IS PART OF TOYOTA'S PROBLEM. THEREFORE NO ONE IS EXPLAINING THE REAL ISSUE. THE DATE I AM PUTTING IN IS AN APPROXIMATE DATE, SINCE THIS ISSUE HAS BEEN ON GOING FOR QUITE SOMETIME. THE SERVICE PEOPLE AT THE TOYOTA GARAGE KEPT SAYING IT WAS HOW THE COMPUTER WAS DESIGNED TO WORK, WHEN I DID INQUIRE ABOUT MY ISSUE.

**Additional Summary:****Toyota ID Number:**

**NHTSA ODI Number:** 20080126  
**Date of Incident:** 2008 LEXUS ES350  
**Vehicle:** COS COB, CT

**NHTSA Summary:**

Mr. Mast states that he had dropped off his vehicle at Lexus of Greenwich for scheduled maintenance. He was driving a 2008 Lexus ES350 loaner vehicle when he entered I-95 northbound at exit 3. He stated that he intended to get off the highway at exit 4 but for unknown reasons he could not get the vehicle to slow down. He stated that the gas pedal appeared to be stuck and the brakes did not work. He stated that the vehicle continued without stopping so he called the Lexus dealer and he was told to put the car in neutral. He put the car in neutral but it still did not slow down. He approached exit 6 and was still on the phone with the Lexus dealer and he put the vehicle in park at which time he struck the back of a tractor trailer.

**C-1071****Safety Research & Strategies***Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

After striking the tractor trailer the vehicle continued and finally stopped up ahead in the median. At the scene it also showed that the driver's side floor mat was not secured.

**NHTSA ODI Number:** 10216273  
**Date of Incident:** 20080127  
**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** PLEASANTVILLE, NY

**NHTSA Summary:**

MY 2007 TOYOTA RAV4 EXPERIENCES SUDDEN AND RANDOM INSTANCES OF UNCONTROLLABLE ACCELERATION WHEN ATTEMPTING TO STOP. UNDER FULL BRAKE PRESSURE THE ENGINE REVS TO 4000 RPM AND CONTINUES TO MOVE. WHEN I SHIFT TO NEUTRAL TO STOP THE VEHICLE, THE ENGINE REVS TO 6500 RPM. SOMETIMES IT WILL RETURN TO NORMAL IDLE AFTER A FEW SECONDS AND SOMETIMES IT IS NECESSARY TO TURN OFF THE IGNITION. IT USUALLY RESTARTS NORMALLY BUT OCCASIONALLY REPEATS THE 6500 RPM. I HAVE TAKEN IT TO THE DEALER TWICE WHO FINDS NO COMPUTER RECORD OF A MALFUNCTION AND REPORTS THAT "EVERYTHING MEETS FACTORY SPECIFICATIONS." **Date of Incident:** 20080128  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** GRANITE BAY, CA

**NHTSA Summary:**

I OWN A TOYOTA CAMRY 2007 SE. I HAVE REPEATEDLY TAKEN THE CAR BACK TO THE DEALERSHIP FOR SERVICE FOR A PROBLEM REPORTED BY OTHERS: MOMENTARY HESITATION IN ACCELERATION WHEN STEPPING ON THE GAS. I HAVE HAD THE COMPUTER REPROGRAMMED SEVERAL TIMES AND THE DEALERSHIP TELLS ME THIS IS JUST HOW IT IS MADE. IT IS DANGEROUS WHEN TRYING TO ACCELERATE AT A CRITICAL TIME. IN ADDITION, I HAD ANOTHER ODD EXPERIENCE. I HAD STARTED THE CAR WHILE IN MY GARAGE, FASTENED MY SEAT BELT, PUT MY FOOT ON THE BREAK, AND UNFORTUNATELY REACHED FOR THE OPEN CAR DOOR AT THE SAME TIME I PUT THE CAR IN REVERSE. THE CAR LEARCHED BACKWARD WHILE MY FOOT WAS STILL ON THE BREAK, THE CAR DOOR TOOK OUT SHELIVING AND MY CHEST FREEZER AND THE WHEELS WERE STILL SPINNING AND HAD TO TURN THE CAR OFF. NEEDLESS TO SAY IT CAUSED PROPERTY DAMAGE AND OVER \$3,000 DAMAGE TO MY CAR. OF COURSE I TOOK THE CAR TO THE DEALERSHIP IMMEDIATELY AND THEY CHECKED IT AND SAID THAT THERE WAS NO PROBLEM WITH THE CAR AND THAT THEY HAD NEVER HEARD OF THIS BEFORE. THERE WERE NO BULLETINS ON THIS ISSUE. THEY MADE ME FEEL STUPID AND SAID THAT OBVIOUSLY I HAD MY FOOT ON THE GAS. I KNOW THAT MY FOOT WAS ON THE BREAK. WITH ALL OF THE RECALL ISSUES, I AM BECOMING FRIGHTENED ABOUT DRIVING THIS CAR!!

**NHTSA Summary:**

WE BOUGHT OUR TOYOTA, A NEW 2007/4430C RAV4 (5-DOOR 4X2 SUV), VIN JTMDZ33V975077693, ON 9/7/07, AND HAVE NOTICED SEVERAL PROBLEMS IN THE OPERATION OF THIS VEHICLE. OUR RAV4 CURRENTLY HAS AROUND 24,000 MILES ON IT, AND THE PROBLEMS HAVE NEITHER INCREASED NOR DECREASED IN FREQUENCY. BECAUSE THESE PROBLEMS ARE INTERMITTENT, OUR DEALER, DUNNING TOYOTA OF ANN ARBOR, MICHIGAN, WAS UNABLE TO REPLICATE WHAT WE EXPERIENCE. HOWEVER, WE BELIEVE THAT DOCUMENTING THIS SITUATION IS IMPORTANT AS PROBLEMS/SOME OF WHICH SOUND SIMILAR TO WHAT WE HAVE EXPERIENCED/ARE CURRENTLY SURFACING ON OTHER TOYOTA VEHICLES. PROBLEMS WE HAVE EXPERIENCED EVER SINCE WE HAVE HAD THE VEHICLE INCLUDE: (1) INTERMITTENT ENGINE SURGES, THESE OCCUR WHEN ACCELERATING, BRAKING, OR SIMPLY COASTING. THE RPM NEEDLE VISIBLY FLUCTUATES, AND PASSENGERS CAN FEEL THE SURGING AND SHAKING OF THE ENGINE. (2) THE GAS PEDAL SOMETIMES DOES NOT SMOOTHLY ENGAGE, AND THE CAR JUMPS AHEAD WHEN THE PEDAL SEEMS TO FINALLY ENGAGE. (3) OCCASIONALLY THE CAR DOES NOT SEEM TO SLOW WHEN THE BRAKE IS APPLIED. IN THE WINTER OF 2008, I WAS TRAVELING AT A LOW SPEED (BEGINNING TO ACCELERATE FROM A STOP) ON SLICK PAVEMENT WHEN THE CAR IN FRONT OF ME UNEXPECTEDLY STOPPED IN THE MIDDLE OF AN INTERSECTION. I IMMEDIATELY APPLIED THE BRAKE BUT THE CAR DID NOT SEEM TO SLOW DOWN. THE RESULTING COLLISION RESULTED IN \$615.63 IN DAMAGE TO OUR VEHICLE. I DO NOT KNOW THE EXACT DATE OF THE ACCIDENT. THE POLICE WERE NOTIFIED BUT NO TICKETS WERE ISSUED. I JUST PUT AN

RNT # 080204-000429

Email sts: "Hi, My Toyota Tacoma 2006 crew cab will do a violent jerk when I try to drive again after slamming on the breaks. I took it to my local dealer and they say that this is normal. This does not seem right. I can't believe a company as reliable as Toyota would not try to do a recall. I checked online and found this, so it is not just me. 24th Apr 2002, 12:10 "High priced, very low in satisfaction."What things have gone wrong with the car?..."

\*\*\* NOTES 02/07/2008 04:59:54 PM NMorse

...I didn't notice it until I drove the truck for a few days and then I realized something was wrong. Every time I come to a complete stop a light the transmission will jerk, sometimes violently. I took it to the dealer to get the truck looked at and they claim that it is totally normal. I was in total shock! I paid \$27,000 for this truck, and all that they call tell me that the problem is normal and that it has been happening to Toyota trucks since 1989?"

\*\*\* NOTES 02/07/2008 05:00:37 PM NMorse

...I cannot believe the problem with the transmissions has been going on unchanged! Another thing that I noticed is that after I've been running around town. The truck doesn't like to start on the first try. Sometimes it takes at least 3 tries to get a brand new truck started? All this does not make any sense and I can't wait to sell this thing!

General comments?

This truck looks great, but it runs and operates horribly."

**Toyota ID Number:**  
**NHTSA ODI Number:** 10259437  
**Date of Incident:** 20080208  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** TAMPA, FL  
**NHTSA Summary:**

PRIOR TO THE ACCIDENT ON 2/8/2008 AT 8:55PM THERE WERE 2-3 EPISODES WITHIN A 6 YEAR PERIOD WHEN ANA LOPEZ FELT THE VEHICLE MILDLY ACCELERATE ON ITS OWN FOR ONLY A FEW SECONDS. THE EPISODES WERE SO MILD THAT SHE QUESTIONED HERSELF WHETHER THE CAR TRULY ACCELERATED AND SO SHE NEVER HAD THE CAR INSPECTED. HOWEVER, ON 2/8/2008 AT 8:55PM WHILE DRIVING HOME HEADING SOUTH ON THE VETERANS EXPRESSWAY IN TAMPA SHE EXPERIENCED WHAT SHE DESCRIBES AS THE MOST FRIGHTENING EVENT IN HER LIFE. THE FIRST SIGN THAT SOMETHING WAS GOING WRONG WAS THE DASH LIGHTS BEGAN TO FLICKER ON AND OFF SO SHE MADE AN ATTEMPT TO PULL OVER SO SHE COULD CALL HER HUSBAND AND MAKE HIM AWARE OF HOW THE CAR WAS PERFORMING. AS SHE BEGAN SLOWING DOWN AND VEERING OFF THE ROAD ON THE OUTSIDE LANE, WHICH WAS WITNESSED, THE VEHICLE MAD A VERY POWERFUL ACCELERATION ACCOMPANIED BY A LOUD ACCELERATION SOUND AND LOSS OF STEERING ABILITY AS THE CAR BEGAN TO STEER TO THE LEFT GOING BACK INTO TRAFFIC LANES. SHE FELT AS THOUGH THE VEHICLE WAS NOW CONTROLLING ITSELF AND SHORTLY AFTER BEGAN TO SPIN OUT OF CONTROL. THE VEHICLE STRUCK THE BARRIER WALL AND CAME TO A FINAL REST ON THE RIGHT SOUTHBOUND LANE. ANA LOPEZ SUFFERED MULTIPLE FRACTURES TO HER RIGHT LEG AND SPENT 2 MONTHS IN THE HOSPITAL AND REHAB UNIT WHERE SHE SUFFERED GREATLY WITH PAIN AND CONTINUES TO SUFFER FROM PAIN AND DEBILITATION. THE VEHICLE WAS INSPECTED BY A PROFESSIONAL INSPECTOR AT HER HOME AND NOTHING WAS FOUND WRONG WITH THE VEHICLE. BUT THE INSPECTION WAS A PRELIMINARY INSPECTION AND SHE FEARED THAT A MORE THOROUGH INSPECTION WOULD BE TOO COSTLY FOR HER. HER STORY ABOUT THE INCIDENT HAS NEVER CHANGED AND STILL IS TRAUMATIZING TO HER. THIS COMPLAINT WAS TRANSLATED AND WRITTEN BY ALBERTO LOPEZ, HER SON. \*TR

**NHTSA ODI Number:** 10313068  
**Date of Incident:** 20080210  
**Vehicle:** 2001 TOYOTA SIENNA  
**Location of Incident:** GROVER BEACH, CA  
**NHTSA Summary:**

OUR 2001 TOYOTA SIENNA HAS BEEN EXPERIENCING GAS PEDAL PROBLEMS FOR THE LAST TWO YEARS. FROM A STOPPED POSITION, THE GAS PEDAL STICKS UNTIL EXCESSIVE PRESSURE IS APPLIED WHEN THE ACCELERATOR ENGAGES. THE CAR LURCHES FORWARD. THIS PROBLEM MAKES THE VEHICLE FRIGHTENING TO DRIVE. THE FIRST TIME WE BROUGHT THE CAR TO THE TOYOTA SERVICE DEPARTMENT (TOYOTA OF SANTA MARIA, CALIFORNIA) ABOUT THIS ISSUE WAS FEBRUARY 2008 (ODOMETER 101,112). THE SERVICE DEPARTMENT TOLD US THEY COULD NOT DUPLICATE THE PROBLEM BUT SERVICED THE THROTTLE BODY AND LUBRICATED THE EXPOSED THROTTLE CABLES. THE GAS PEDAL RESPONDED BETTER. IN NOVEMBER 2009 WE STARTED EXPERIENCING THE PROBLEM AGAIN AND ON DECEMBER 10, 2009 WE TOOK THE VEHICLE INTO THE SERVICE DEPARTMENT (ODOMETER 111,596). WE REQUESTED A SIMILAR SERVICE TO SEE IF IT WOULD FIX THE PROBLEM BUT THE SERVICE DEPARTMENT CLAIMED TO NOT KNOW WHAT THEY HAD DONE ON THE PREVIOUS VISIT TO FIX THE STICKY GAS PEDAL. THEY COULD NOT DUPLICATE THE PROBLEM AND WE TOOK THE VEHICLE HOME. WITHIN THE SAME DAY THE ACCELERATOR WAS STICKING. WE FELT UNSAFE DRIVING OUR TWO SMALL CHILDREN IN THE VEHICLE AND PARKED IT IN THE GARAGE FOR A MONTH UNTIL WE COULD TAKE IT BACK TO THE SERVICE DEPARTMENT. ON JANUARY 11, 2010 WE BROUGHT IT BACK AND INSISTED THEY FIX THE PROBLEM. THEY COULD NOT DUPLICATE THE PROBLEM. WE WERE ASSURED THAT THERE WAS NOTHING UNUSUAL WITH OUR VEHICLE. PERHAPS JUST SOME CARBON BUILD UP ON THE THROTTLE BODY PLATE. WE DIDN'T FEEL SAFE DRIVING THE VEHICLE HOME AND LEFT IT AT THE SERVICE DEPARTMENT WHERE IT HAS REMAINED TO THIS DAY. ON JANUARY 21, 2010, TOYOTA ANNOUNCED A RECALL DUE TO A STICKING GAS PEDAL THAT, IN PART, DESCRIBES OUR ISSUE. OUR 2001 SIENNA IS NOT INCLUDED IN THIS RECALL.

**NHTSA ODI Number:** 10315960  
**Date of Incident:** 20080212  
**Vehicle:** 1996 TOYOTA CAMRY  
**Location of Incident:** EAGAN, MN

**NHTSA Summary:**  
I ENTERED THE FREEWAY ON-RAMP AND ACCELERATED. THE CAR CONTINUED TO ACCELERATE EVEN AFTER I TOOK MY FOOT OFF THE GAS PEDAL. I KICKED THE PEDAL DOWN A COUPLE TIMES TO GET IT UNSTUCK. INSTEAD OF COMING UNSTUCK, IT STUCK ALL THE WAY TO THE FLOOR. (THE ENGINE ACCELERATED TO THE MAXIMUM AMOUNT. I THINK THE ACTUAL PEDAL CAME BACK UP TO THE IDLE POSITION.) THE BRAKES SLOWED THE CAR SOME WHEN I PUSHED ON THE PEDAL WITH BOTH FEET WITH MY HANDS ON THE STEERING WHEEL AND STANDING UP SO ALL MY WEIGHT AND STRENGTH WAS ON THE BRAKE. THE BRAKES SMELLED OF BURNING AND I THOUGHT FOR A SECOND THAT MAYBE I WAS GETTING IT UNDER CONTROL. HOWEVER, WHEN I LOOKED AT THE SPEEDOMETER, IT READ 95 AND THE BRAKES WERE SMOKING AND SMELLING QUITE STRONG. I PUT THE CAR INTO NEUTRAL AND CONTINUED TO PUSH HARD ON THE BRAKE. IT SLOWED DOWN TO MAYBE TO 65 OR SO. BY THEN THE ENGINE WAS RUNNING SO FAST I THOUGHT IT WOULD BLOW UP AND IT WAS NIGHT ON A RELATIVELY DESERTED FREEWAY SO I PUT IT BACK INTO GEAR AND CONTINUED THIS PATTERN FOR APPROXIMATELY 8 MILES - SPEEDING UP TO WAY PAST 95, RIDING THE BRAKES UNTIL THEY SMOKED AND SMELLED TOO MUCH (I THOUGHT THEY WOULD BECOME USELESS IF I LET THEM BURN UP) PUTTING IT INTO NEUTRAL AND SLOWING DOWN FOR AS LONG AS I THOUGHT WAS OK BEFORE BLOWING THE ENGINE, REPEAT, ETC. JUST PRIOR TO MY EXIT, THE UNINTENDED ACCELERATION STOPPED AND I GOT OFF ONTO THE SIDE STREETS. WHEN I ACCELERATED AFTER A STOP SIGN, THE ACCELERATOR STUCK BUT I IMMEDIATELY PUT IT INTO NEUTRAL AND THEN SHUT THE KEY OFF, STOPPING THE ENGINE. IT DID THIS TWO MORE TIMES. THE REPAIR SHOP CLEANED THE THROTTLE BODY AND IT HAS NOT HAPPENED AGAIN. I WAS IN THE ARMY INFANTRY DURING THE 60'S BUT HAD NOT HAD A FLASHBACK FOR A VERY LONG TIME. I HAD FLASHBACKS OF THIS EXPERIENCE SEVERAL TIMES WHEN ENTERING A FREEWAY ENTRANCE RAMP. IT WAS A MOST TERRIFYING EXPERIENCE AND RESEARCH HAS SHOWN THAT OUR ABILITY TO RESPOND LOGICALLY IS GREATLY DIMINISHED UNDER THAT HIGH STRESS.

**NHTSA ODI Number:** 10325323  
**Date of Incident:** 20080214  
**Vehicle:** 2000 TOYOTA CAMRY  
**Location of Incident:** ST. JOHNS, 00

**NHTSA Summary:**  
ABOUT TWO YEARS AGO (2008), WHEN STARTING OFF FROM SAY A STOP LIGHT, I WOULD PRESS THE GAS PEDAL & NOTHING WOULD HAPPEN FOR A SECOND OR TWO, THEN THE CAR WOULD JERK AHEAD. THIS DID NOT HAPPEN ALL THE TIME. THIS PROBLEM OCCURED OVER A SIX MONTH PERIOD OR SO. A MECHANIC (NOT TOYOTA) TOLD ME THE HOUSING FOR THE ACCELERATOR CABLE WAS CORRODED AND NEEDED TO BE REPLACED. THIS HE DID AND I HAVE HAD NO PROBLEM SINCE. COST WAS ABOUT \$200.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10318330  
**Date of Incident:** 20080216  
**Vehicle:** 1998 TOYOTA CAMRY  
**Location of Incident:** LEXINGTON, MA

**NHTSA Summary:**  
UNDESIRED ACCELERATION, NOT RELATED WITH STICK GAS PEDAL. ON FEBRUARY 16, 2008, I DROVE MY TOYOTA CAMRY LE 1998 HOME WITH ALL MY FAMILY ON BOARD AFTER SHOPPING ACTIVITIES. I WAS DRIVING AT AROUND 35 MPH SOUTH ON WALTHAM STREET IN LEXINGTON, MA. WHEN WE WERE PASSING AN INTERSECTION OF WALTHAM/CONCORD, I STARTED TO SLOW DOWN THE VEHICLE TO AROUND 20 MPH AS OUR HOME APPROACHING. THE CAR SLOWED DOWN NORMALLY TO AROUND 20 MPH AND MAINTAINED AT THAT SPEED FOR ABOUT 100 FEET DISTANCE. AT AROUND 200-300 FEET DISTANCE FROM THE LEXINGTON DRIVE (WHERE OUR APARTMENT LOCATED), THE TOYOTA CAMRY SUDDENLY ACCELERATED BY ITSELF TO AROUND 50-60 MPH, WHILE MY FOOT WAS STILL ON THE BRAKE PEDAL. I WAS IN A COMPLETE STATE OF PANIC, AS WHOLE FAMILY WAS WATCHING (AND SCREAMING) OUR CAR SPEEDING TOWARD THE INTERSECTION OF WALTHAM ST AND LEXINGTON DRIVE, WHERE THERE WAS A TRUCK ALMOST RIGHT IN FRONT OF US. I WAS ALMOST STANDING ON THE BRAKE PEDAL, AND ALSO VERY QUICKLY PULLED THE PARKING BRAKE, AND MOVED THE GEAR SHIFT TO NEUTRAL. THE CAR SLOWED DOWN TO AROUND 40 MPH. AT THIS TIME, MY CAR WAS ALREADY 30 FEET FROM THE INTERSECTION OF WALTHAM/LEXINGTON DR, WHERE I SUPPOSED TO TURN RIGHT. WITH MY CAMRY MOVING AT AROUND 40 MPH, I DID FEEL SAFE TO MAKE THE RIGHT TURN. AND I COULDN'T MOVE FORWARD EITHER WITH A TRUCK NOW RIGHT IN FRONT OF US (THE TRUCK WAS TO MAKE A LEFT TURN FROM LEXINGTON DRIVE TO WALTHAM STREET), THE ONLY OPTION FOR ME WAS TO CRASH MY CAR INTO A STREET DIVIDE ON LEXINGTON DRIVE TO AVOID HITTING THE TRUCK IN

**C-1084**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

FRONT OF US, OR TIP OVER BY TURNING RIGHT AT HIGH SPEED. AFTER CRASHED ON THE STREET DIVIDE, HIT AND DESTROYED A LIGHT POLE ON THE STREET DIVIDE, MY CAR CAME TO A COMPLETE STOP. NO-ONE WAS INJURED PHYSICALLY (LOTS HEADACHE DUE TO PANIC SCREAMING). THE CAR SUFFERED QUITE DAMAGE UNDER AND AT FRONT. AT THIS MOMENT, MY CAR WAS STILL DRIVABLE. INTERESTINGLY, THE CAR WAS RUNNING NORMAL AGAIN THEN. CONCLUSION: THE UNDESIRE ACCELERATION WAS NOT CAUSED BY STICKING GAS PEDAL.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10318909  
**Date of Incident:** 20080216  
**Vehicle:** 2007 TOYOTA SEQUOIA  
**Location of Incident:** FREEMONT, CA

**NHTSA Summary:**

TL\* THE CONTACT OWNS A 2007 TOYOTA SEQUOIA. WHEN THE VEHICLE WOULD SIT IDLE IN THE DRIVE POSITION, IT WOULD SUDDENLY ACCELERATE WITHOUT WARNING. THE CONTACT WOULD APPLY EXTREME BRAKING PRESSURE IN ORDER TO MAINTAIN CONTROL OF THE VEHICLE. THE VEHICLE WAS TAKEN TO THE DEALERSHIP WHERE THE DRIVE SHAFT WAS SERVICED; HOWEVER THE FAILURE WOULD STILL OCCUR. THE CONTACT STATED THAT THE VEHICLE WOULD EXHIBIT INSTANCES OF UNINTENDED ACCELERATION SINCE THE DAY OF PURCHASE. THE CURRENT AND FAILURE MILEAGES WERE UNDER 54,000.

**NHTSA ODI Number:** 10345255  
**Date of Incident:** 20080216  
**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** BRADENTON, FL

**NHTSA Summary:**

TL\* THE CONTACT OWNS A 2006 TOYOTA TACOMA. THE CONTACT STATED WHILE DRIVING AT UNKNOWN SPEEDS, THE ACCELERATOR PEDAL FELL INTO THE FLOORBOARD AND BECAME STUCK IN THE OPEN THROTTLE POSITION. THE VEHICLE BEGAN TO ABNORMALLY ACCELERATE UP TO 120 MPH. THE CONTACT ATTEMPTED TO ENGAGE THE EMERGENCY BRAKE BUT TO NO AVAIL. HE THEN SHIFTED INTO NEUTRAL AND WAS ABLE TO MAINTAIN CONTROL OF THE VEHICLE UNTIL STOPPING. THE DEALER WAS UNABLE TO DUPLICATE THE FAILURE. THE FAILURE RECURRED FOUR ADDITIONAL TIMES. THE VEHICLE WAS TAKEN BACK TO THE DEALER WHERE THE ACCELERATOR PEDAL WAS REPLACED. THE FAILURE PERSISTED. THE CONTACT STATED THE VEHICLE WAS LEFT WITH THE DEALER AND HE DID NOT FEEL SAFE OPERATING THE VEHICLE AFTER THE FAILURE CONTINUED TO RECUR. THE CONTACT REFUSED TO DRIVE THE VEHICLE. THE MANUFACTURER WOULD NOT PROVIDE ANY ASSISTANCE. THE VEHICLE WAS NOT FURTHER REPAIRED. THE VIN WAS NOT AVAILABLE. THE FAILURE MILEAGE WAS APPROXIMATELY 4,000 AND THE CURRENT MILEAGE WAS APPROXIMATELY 25,000.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**

SUDDEN ACCELERATION OF MY 2007 TACOMA, MORE THEN ONCE WHEN I CAME TO A STOP, THE TRUCK WOULD SUDDENLY ACCELERATE. IT HAPPENED AT A STOP JUST BEFORE MY ACCIDENT AND A SCHOOL BUS WAS GOING THOUGH THE INTERSECTION. WHEN I GOT OUT OF MY TRUCK AT A PUBLIC STORAGE GATE A MINUTE LATTER AND GOT BACK IN AND WAITED FOR THE GATE TO OPEN I SUDDENLY HAD A UNINTENDED ACCELERATION OF MY 2007 TOYOTA TACOMA. WHEN I HIT THE BREAK IT WENT FASTER, I HAD TO PUT IT IN PARK TO STOP THE BACK WHEELS FROM SPINNING, THE GATE WAS TOTALED FROM MY TRUCK. I WAS NOT EVEN DRIVING AND IT TOOK OFF ON ITS OWN! I HAD TOYOTA INSPECT IT AND THEY COULD NOT FIND ANYTHING WRONG. I HAVE NOT HAD ANY ACCIDENTS FOR 20 YEARS, NOW MY INSURANCE RATES ARE HIGH, PLEASE INVESTIGATE THIS, IT IS NOT A WRONG PEDdle PROBLEM. IT ALSO HAPPENED ONCE BEFORE AND I HAD LESS THEN 5000 MILES ON THE TACOMA, BUT THE ROAD WAS WET SO I WAS NOT SURE IF IT WAS THE ROAD. IT WAS LESS THEN A YEAR OLD WHEN IT HAPPENED AGAIN, AND I WAS GONE TO TAKE IT TO THE DEALER AFTER I ALMOST HIT THE SCHOOL BUS, BUT DIDNT GET THE CHANCE. I HAD TO STOP AT THE STORAGE PLACE AND THAT WAS WHERE I RAN INTO THE GATE. I SINCE HAD A VOLUNTARY REPO AND GAVE IT BACK, I WOULD NOT DRIVE IT AND FEEL SAFE AGAIN. \*TR

**Location of Incident:** GLASTONBURY, CT

**NHTSA Summary:**

(02/19/2008) WAS DRIVING MY 2002 TOYOTA AVALON JUST BEFORE 9 AM SE IN THE L LANE ON RTE 2 (CT) AT 65 MPH WITH THE CRUISE CONTROL ON. THERE WAS AN OBSTRUCTION IN THE L LANE SO I PUT ON MY SIGNAL, PUSHED ON MY BRAKES AND PROCEEDED INTO THE R LANE. INSTEAD OF SLOWING DOWN, MY VEHICLE CONTINUED TO SPEED UP. I LOST CONTROL OF THE VEHICLE DEPITS HAVING BOTH FEET ON THE BRAKES AND BOTH HANDS ON THE STEERING WHEEL. I WAS SWERVING FROM LANE TO LANE IN RUSH HOUR TRAFFIC ATTEMPTING TO AVOID THE OTHER VEHICLES. AFTER ABOUT A MILE, I WAS ABLE TO STEER THE VEHICLE INTO THE R GUARDRAIL, ENABLING ME TO KEEP THE CAR STRAIGHT (AND OUT OF TRAFFIC) SO I COULD USE ONE HAND TO SHIFT INTO NEUTRAL TO STOP THE VEHICLE. THE ENTIRE PASSENGER SIDE OF MY VEHICLE WAS RIPPED OFF AND STREWN ALONG THE R SHOULDER OF THE HIGHWAY FOR ABOUT 1/4 MILE. THE VEHICLE WAS TOTALED AND I WAS FORTUNATE TO NOT HIT ANOTHER CAR NOR SUFFER ANY SERIOUS INJURY. OBVIOUSLY, THE FAILURE OCCURRED ONLY ONCE. \*TR

**Vehicle:** 2008 TOYOTA CAMRY  
**Location of Incident:** JOHNSONBURG, PA

**NHTSA Summary:**

PURCHASED 2008 TOYOTA CAMRY 2/5/08 FROM STOLTZ TOYOTA SCION OF DUBOIS PA 814-371-3333. AFTER DRIVING FOR 3 WKS I STARTED TO NOTE UNEXPECTED ACCELERATION & DECELERATION AT 20-50 MPH ALSO ACCELERATION WHEN PUTTING ON THE BRAKE AT 25-35MPH AT THESE TIME THE TACH WOULD JUMPING BACK & FORTH I FELT VERY UNSAFE & CALLED THE DEALER SVC DEPT 2/22/08 THEY SET UP AN APPT FOR 2/25 DURING THE SVC TECHS TEST DRIVE THE CAR DIDNT DO ANY OF THE ABOVE. HE SAID THEY WOULD CALL TOYOTA TECH IN CALIFORNIA TO SEE HOW TO FIX THE PROBLEM & WOULD GET BACK TO ME. I HAD NOT HEARD BACK BY 2/28 SO I CALLED FOR AN UPDATE BECAUSE THE CAR IS STILL DOING THE ABOVE & I AM FEELING MORE UNSAFE. AFTER TALKING WITH THE PERSON WHOM ANSWERED THE PHONE SHE SAID SHE WOULD TALK TO HER SVC MANAGER AS IT COULD TAKE UP TO A WEEK BEFORE CALIFORNIA WOULD GET BACK TO THEM. ON 3/3 THE ASST SVC MANAGER CALLED ME & WE DISCUSSED THE PROBLEM & HE SET UP AN APPT TO BRING IN THE CAR ON 3/7. STILL FEELING VERY UNSAFE & THAT THE DEALERSHIP DID NOT TAKE THE ISSUE SERIOUSLY I E-MAIL ON 3/5 THE SALESMAN I BOUGHT THE CAR FROM EXPRESSING HOW UNSAFE I FELT & DETAILED THE PROBLEM & ALSO THAT I WAS NOW NOTICING AT ABOUT 40MPH THAT THE CAR ACTED LIKE A MANUAL TRANSMISSION THAT NEEDED TO SHIFT DOWN THE NEXT DAY 3/5 THE ASST MANAGER CALLED ME @ & THAT HE WAS SENDING SOMEONE TO PICK UP THE CAR RIGHT NOW. THE ASST MANAGER KEPT ME UPDATE WITH PHONE CALLS ON 3/6, 3/7 THEY WHERE STILL TRYING TO FIGURE OUT WHAT WAS GOING ON AS DURING TEST DRIVES THE CAR HAD NOT ACCELERATED, BUT WOULD CONTINUE TO TEST IT. I ALSO TOLD THE ASST MANAGER ABOUT THE REVIEWS ON EDMONDS.COM THATS WHERE THE SAME PROBLEMS ON 3/12 HE CALLED AGAIN THAT ONE OF THE TEST DRIVERS HAD EXPERIENCED THE ACCELERATION & HAD IDENTIFIED OTHER SHIFTING PROBLEMS. ON 3/14 THE SERVICE MANAGER CALLED TELLING ME THAT TOYOTA DIDNT HAVE A FIX FOR THE PROBLEM & THAT THEY COULD NOT FIX MY CAMRY. THAT TOYOTA SAYS IT IS "OPERATING TO FACTORY SPECS, RIGHT NOW. \*TR

**Vehicle:** 2007 LEXUS RX350  
**Location of Incident:** YONKERS, NY

**NHTSA Summary:**

MY 2007 LEXUS RX 350 WILL OCCASSIONALLY SLOW DOWN AND FEEL AS IF IT IS GOING TO SHUT OFF WHEN I PRESS THE GAS. IT WILL THEN SUDDENLY ACCELERATE AND JOLT CAUSING ME TO DEPRESS THE BRAKES IN ORDER TO SLOW DOWN. I HAVE ADVISED LEXUS OF THE PROBLEM AND MUST BRING IT IN FOR SERVICE. THIS HAS BEEN HAPPENING SINCE I PURCHASED THE CAR IN 2008.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10219141  
**Date of Incident:** 20080225  
**Vehicle:** 2007 TOYOTA 4RUNNER  
**Location of Incident:** CALDWELL, TX

**NHTSA Summary:**

DRIVING A 2007 TOYOTA 4RUNNER SR5 V6 4 WHEEL DRIVE VEHICLE ON A HIGHWAY AT THE SPEED LIMIT OF 70 MPH IN THE LEFT LANE (4 LANE HIGHWAY). I SLOWED DOWN TO CHANGE LANES ENTERING THE RIGHT LANE, I THINK APPLYING THE BRAKES TO SLOW DOWN AND MOVE OVER. AS I BEGAN TO ACCELERATE AGAIN IN THE RIGHT LANE, I LET UP ON THE ACCELERATOR PEDAL. SO AS TO NOT EXCEED THE SPEED LIMIT BUT IT DID NOT COME BACK UP WHEN MY FOOT DID, AND THE VEHICLE DID NOT SLOW DOWN NORMALLY AS IT SHOULD BUT RACED AHEAD. I QUICKLY LOOKED TO SEE IF MY FLOOR MAT HAD CAUSED THE PEDAL TO STICK WHICH I OBSERVED IT DID NOT. I THEN APPLIED THE BRAKES TO TRY TO SLOW THE VEHICLE YET THE VEHICLE WAS STILL ATTEMPTING TO ACCELERATE. FORTUNATELY, I WAS ABLE TO SOMEWHAT SLOW DOWN AND GUIDE THE VEHICLE ONTO AN EXIT RAMP TO MY RIGHT, ALL THE WHILE HOLDING DOWN THE BRAKE AS HARD AS I COULD TO KEEP CONTROL OF THE CAR. I GUIDED IT ONTO THE RIGHT SIDE OF THE RAMP OUT OF THE TRAFFIC PATH AND QUICKLY MOVED THE GEAR FIRST TO NEUTRAL THEN TO PARK. THIS STOPPED THE VEHICLE BUT THE ENGINE CONTINUED TO RAPIDLY REV. I THEN IMMEDIATELY TURNED OFF THE IGNITION. THE WHEELS WERE POINTED STRAIGHT AHEAD, AND I AVOIDED ANY KIND OF CRASH OR INJURY. THEN I TURNED ON MY EMERGENCY LIGHTS. I LET THE VEHICLE SIT OFF FOR A MINUTE OR SO, THEN LEAVING THE VEHICLE IN PARK I TURNED ON THE IGNITION AGAIN UPON WHICH THE ENGINE REVVED AS HIGH AS BUT DID NOT MOVE. SO I TURNED OFF THE IGNITION FOR GOOD AND CALLED A NEARBY TOYOTA DEALERSHIP FOR HELP WHO SWIFTLY AND SEAMLESSLY RESPONDED TO MY VEHICLE FAILURE. THE VEHICLE IS PRESENTLY BEING EXAMINED BY THIS DEALERSHIP AND THE CAUSE AND REMEDY ARE YET TO BE DETERMINED. THE DEALERSHIP RESPONDED BY SENDING A TOW TRUCK TO BRING MY VEHICLE TO THE DEALERSHIP AND SAID THEY WOULD CONTACT THE LOCAL POLICE TO LET THEM KNOW SUCH HAD BEEN ARRANGED. \*TR

**Location of Incident:** DURHAM, NC

**NHTSA Summary:**

I WAS DRIVING ON AN INTERSTATE HIGHWAY WITH MY CRUISE CONTROL ENGAGED AND MY CAR BEGAN TO ACCELERATE BEYOND THE SPEED THAT I HAD SET. I DISENGAGED THE CRUISE CONTROL BUT THAT DID NOT SLOW THE CAR DOWN. NEXT, I TRIED BRAKING, WHICH SLOWED THE CAR DOWN A LITTLE, THOUGH I NEEDED TO USE AN UNUSUALLY LARGE AMOUNT OF FORCE TO PRESS THE BRAKE PEDAL DOWN. ONCE I RELEASED THE BRAKE, THE CAR BEGAN TO SPEED UP AGAIN. I MADE REPEATED ATTEMPTS TO BRAKE BUT, EVENTUALLY, THE BRAKE PEDAL LOCKED UP. AT THIS POINT, I PUT THE CAR INTO NEUTRAL AND THE ENGINE REVVED (I DON'T KNOW WHAT THE MAXIMUM RPM WAS, BUT I KNOW IT WAS WELL ABOVE NORMAL DRIVING RPM). I PULLED OFF ONTO THE SHOULDER AND TURNED THE CAR OFF. I TRIED TURNING THE IGNITION ON (MY FOOT WAS NOT ON THE ACCELERATOR PEDAL) BUT THE ENGINE REVVED UP SO I IMMEDIATELY TURNED THE CAR OFF. OVER THE NEXT 30 MINUTES, I TRIED TURNING THE CAR ON A FEW MORE TIMES WITH THE SAME RESULT. AFTER I HAD BEEN WAITING FOR 1-1.5 HOURS, A TOW TRUCK ARRIVED. THE DRIVER TURNED THE IGNITION ON AND THE CAR STARTED NORMALLY; SOMEHOW THE PROBLEM HAD RESOLVED ITSELF SO WE WERE UNABLE TO DETERMINE THE CAUSE. \*TR

**Location of Incident:** SHERRILLS FORD, NC

**NHTSA Summary:**

OUR 2008 TOYOTA HIGHLANDER HAS HAD THE SAME INTERMITTANT BRAKING PROBLEM SINCE WE PURCHASED IT IN 2008. WHEN WE BRAKE FOR THE FIRST SECOND OR SO OF DEPRESSING THE BRAKE PEDAL THE BRAKES WILL EITHER NOT RESPOND OR THERE WILL BE A SLIGHT SURGE IN ACCELERATION. AFTER FURTHER DEPRESSION OF THE BRAKE PEDAL, THE BRAKES WILL ENGAGE, BUT THE INITIAL ENGAGEMENT IS NOT SMOOTH. IT FEELS LIKE SOMEONE THAT HAS BRAKED THEIR VEHICLE TOO RAPIDLY. THIS ISSUE COMES AND GOES. WHEN WE TAKE IT TO THE DEALER, THEY SAY THEY CANNOT RECREATE THE ISSUE AND SAY THERE IS NOTHING WRONG WITH THE VEHICLE. THIS IS AN INTERMITTANT PROBLEM WITH ACCELERATION WE HAVE HAD WITH OUR TOYOTA HIGHLANDER SINCE WE PURCHASED THE VEHICLE. WHEN ACCELERATING, THE VEHICLE WILL PERIODICALLY OVER-REV BEFORE THE AUTOMATIC TRANSMISSION SHIFTS INTO THE APPROPRIATE GEAR. THIS RESULTS IN A MOMENTARY LACK OF ACCELERATION. AGAIN THIS IS AN INTERMITTANT PROBLEM. WHEN TAKEN TO THE TOYOTA DEALER, THEY SAY THEY CANNOT RECREATE THE PROBLEM AND THAT THERE IS NOTHING THAT THEY CAN SEE THAT IS WRONG WITH THE VEHICLE.

**NHTSA Summary:**

THE PHYSICAL PEDAL SEEMS TO STICK WHEN PRESSURE IS REDUCED (SLOWING OR DECELERATING) BUT POPS FREE ONCE MOST OF THE PRESSURE HAS BEEN RELEASED. THIS HAS HAPPENED SEVERAL TIMES IN THE PAST YEAR AND A HALF. I DID NOT RETURN IT TO THE DEALER, INSTEAD I WAS ABLE TO REMOVE THE PEDAL ASSEMBLY AND APPLY SEVERAL DROPS OF WD40 TO THE PIVOT SHAFT AND BUSHING. AFTER WORKING THE PEDAL A FEW TIMES AND RE-INSTALLING BACK INTO THE VEHICLE, THE PEDAL SEEMED TO OPERATE NORMALLY FOR UP TO 4 TO 5 MONTHS BEFORE STARTING TO STICK ONCE MORE. NOTE: THE VEHICLE NEVER ACCELERATED ON ITS OWN NOR DID THE PEDAL NOT RETURN TO THE IDLE POSITION. \*TR

**Location of Incident:** REDONDO BEACH, CA

**NHTSA Summary:**

3-4 SECOND DELAY IN RESPONSE TIME WHEN MAKING A FAST LANE CHANGE - ENOUGH TIME TO CAUSE A SERIOUS ACCIDENT. THIS HAPPENED ONCE IN HEAVY CITY TRAFFIC AND ONCE IN THE EVENING WHEN THERE WAS LITTLE TRAFFIC. THE DEALERSHIP PERFORMED AN ECM CALIBRATION ENHANCEMENT TO CORRECT ANOTHER PROBLEM OF HESITATION WITH THE ACCELERATION & THEN A QUICK SURGE FORWARD. THIS WAS PERFORMED AFTER THE FIRST INCIDENT; HOWEVER, IT DID NOT CORRECT MY CURRENT PROBLEM AS THE HESITATION HAPPENED AGAIN (THE 2ND TIME) AFTER THE CALIBRATION. DISCUSSED THIS AT LENGTH WITH THE DEALERSHIP. I WAS INFORMED THAT THE ECM CALIBRATION WAS THE ONLY "FIX" PROVIDED TO THEM AND THAT SINCE I STILL HAD THE PROBLEM, I WOULD HAVE TO BE VERY CAREFUL TO NOT PRESS THE ACCELERATOR QUICKLY TO MAKE A FAST GETAWAY AS THE COMPUTER IS NOT ABLE TO PICK UP THE SIGNAL THAT QUICKLY. THEY COULD ONLY SUGGEST THAT I NEVER PRESS THE ACCELERATOR QUICKLY - TRY THAT ONE WHEN YOU HAVE TO MOVE OUT OF THE WAY FAST. I AM NOT TRYING TO MAKE SOMETHING MORE OF THIS THAN IT

C-1090

**Location of Incident:** BANKS, OR

**NHTSA Summary:**

THE ENGINE THROTTLE CONTROLLER ON MY 07 TOYOTA TACOMA DOES NOT RELEASE THE THROTTLE WHEN THE GAS PEDAL IS LIFTED. THE ENGINE CONTINUES TO REV EXCESSIVELY. THIS IS TRUE AT STARTUP, BETWEEN GEAR CHANGES AND WHEN LETTING OFF THE THROTTLE TO SLOW OR STOP. ALSO, OF GREATER CONCERN IS THAT THE ENGINE SURGES WHEN ATTEMPTING TO SLOW THE VEHICLE. AFTER LETTING OFF THE GAS THE ENGINE INITIALLY SLOWS BUT THEN ABRUPTLY THE ENGINE RPM'S SURGE PROPELLING THE VEHICLE AHEAD. I COMPLAINED ABOUT THIS CONDITION TO MY TOYOTA DEALER AT THE 5,000 AND 10,000 MILE SERVICES. BOTH TIMES THEY ALLEGED THAT THE ENGINE WAS PERFORMING SATISFACTORILY. THE SERVICE MANAGER TRIED TO SUGGEST THE GAS PEDAL WAS BEING CAUGHT ON THE FLOOR MAT BUT THE

C-1091

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

MECHANIC DISMISSED THAT CAUSE. THE MECHANIC FURTHER INFORMED ME THAT THIS COMPLAINT WAS NOT UNCOMMON AND THAT A FIX COULD BE MADE BY PURCHASING AN AFTER-MARKET CHIP TO BE INSTALLED IN THE ENGINE CONTROLLER. TOYOTA IS TOTALLY IN DENIAL THAT THE ELECTRONICS ARE RESPONSIBLE FOR THESE ENGINE REVS AND SURGES. THE GAS PEDAL FIX IS A FARCE.

**NHTSA Summary:**

2005 TOYOTA TACOMA, 4X4, 4 DOOR, LONG BED, 4.0 L, V6, EFI. MARCH 7, 2008 TRUCK WAS TOTALED IN ROLL OVER. 3 INCIDENTS TOOK PLACE WITH 3 DIFFERENT PEOPLE. OWNER AND ACCIDENT VICTIM, POLICE OFFICERS AT THE TIMES OF EACH INCIDENT. BOTH HAD DRIVER TRAINING AND ARE EXPERIENCED DRIVERS. 3RD PERSON IS EXPERIENCED DRIVER WHO HAS DRIVER TRAINING THAT IS EXPERIENCED DRIVING CARS, TRUCKS, BUSES, SEMI TRUCKS. DRIVER HAS CDL(BUS) AND HAS BEEN DRIVING FOR MANY YEARS. OWNER HAD 1ST INCIDENT, GAS PEDAL STUCK AND DRIVER HAD TO PUT TRUCK INTO NEUTRAL AND THEN HIT GAS PEDAL. 2 TIMES WITH FOOT ABOUT 6 TO 10 TIMES TOTAL TO GET IT TO DISENGAGE ITSELF. ON THE 2ND ATTEMPT TO HIT THE GAS PEDAL, PEDAL WAS PUSHED ALL THE WAY TO THE FLOOR HARD. 2ND INCIDENT, DRIVER HAD CRUISE CONTROL SET AT ABOUT 58 MPH. DRIVER TAPPED BRAKE PEDAL TO TURN OFF THE CRUISE CONTROL AND THEN THE ENGINE STARTED TO RACE AND THE TRUCK PICKED UP SPEED. DRIVER PUT TRUCK INTO NEUTRAL AND HAD TO HIT GAS PEDAL AND DRIVE PEDAL ALL THE WAY TO THE FLOOR TO GET IT TO STOP RACING. DRIVER TOOK TRUCK TO DEALER WITH END 2 WEEKS FOR OIL CHANGE AND TOLD THEM OF INCIDENT. THEY CHECKED TRUCK AND FOUND NO CAUSE OR PROBLEM WITH THE TRUCK. 3RD INCIDENT TOOK PLACE ON MARCH 7, 2008. DRIVER HAD CRUISE CONTROL SET AT ABOUT 64 MPH. DRIVER TAPPED BRAKE PEDAL TO TURN OFF THE CRUISE CONTROL. THE TRUCK ENGINE THEN STARTED TO RACE AND THE TRUCK STARTED TO FISH TAIL. DRIVER HIT BRAKE PEDAL AGAIN AND THE TRUCK WENT FROM PASSING LANE OFF THE RIGHT SIDE INTO ROADWAY AND HIT A DITCH AND ROLLED 3 TO 5 TIMES. TRUCK CAME TO REST ON ITS ROOF. DRIVER WAS SEAT BELTED IN AND HAD TO TURN KEY OFF TO GET THE TRUCK TO STOP THE ENGINE FROM RACING. TIRES WERE IN VERY GOOD SHAPE IN 3RD INCIDENT AND IN ALL INCIDENTS FLOOR MAT WAS NOT STUCK IN GAS PEDAL AND HAD NO PART IN INCIDENTS. 3RD INCIDENT ROAD WAY WAS WET AND IT STARTED SLEETING AT THE TIME OF ROLLOVER WRECK. ROADWAY WAS NOT SNOW COVERED. ALL INCIDENTS TOOK PLACE ON 4 LANE ROADWAYS.

**Location of Incident:** CARLSBAD, CA

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2007 TOYOTA TACOMA. WHILE PREPARING TO PARK THE VEHICLE, IT SUDDENLY ACCELERATED FROM 3 MPH TO 15 MPH. THE VEHICLE CRASHED INTO THE REAR OF A SEMI-TRUCK. THE CONTACT DEPRESSED THE BRAKE PEDAL WITH BOTH FEET, BUT THE REAR WHEELS CONTINUED TO SPIN. THE VEHICLE IS CURRENTLY AT THE DEALER. THE MANUFACTURER IS ALSO PERFORMING THEIR INVESTIGATION ON THE VEHICLE. NO ONE WAS INJURED IN THE CRASH. THE CURRENT AND FAILURE MILEAGES WERE 22,000.

**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** MT. PROSPECT, IL

**NHTSA Summary:**  
I HAD TROUBLE WITH MY 2005 TOYOTA CAMRY WHILE STOPPED AT A LIGHT WHEN ALL OF A SUDDEN THE ENGINE STARTED RACING AND IT WANTED TO LUNGE FORWARD. I KEEPT MY FOOT ON THE BRAKE VERY HARD, PUT IT IN PARK AND KEPT IT IN PLACE. I HIT THE ACCELERATOR SEVERAL TIMES AND WAS AFRAID TO PUT IT BACK IN TO DRIVE WHEN THE LIGHT CHANGED. LUCKILY HIT WAS OK THEN. I AM NOT SURE IF IT WAS 2007 OR 2008 AND NOT SURE OF MONTH AND DATE BUT THIS FORM INSISTS YOU PUT ONE IN SO I PUT IN ANY DATE. I REALLY DON'T REMEMBER THE TIME FRAME. IT HAPPENED SHORTLY AFTER HAVING THE CAR IN FOR SERVICE AND THE RPM'S SEEM HIGH WHEN NOT ACCELERATING.

**NHTSA Summary:**  
ON APRIL 1, 2008 AT ABOUT 9:30 P.M., MY TWO SONS, 19 AND 16, AND MY YOUNGEST SON'S FRIEND DROVE SOUTH ON INTERSTATE 35 OUT OF DOWNTOWN MINNEAPOLIS UPON CONCLUSION OF A TWINS GAME. ABOUT THREE BLOCKS NORTH OF CROSSTOWN HIGHWAY 62, GOING 60 MPH I PASSED A CAR BY PUTTING THE ACCELERATOR ON THE FLOOR. TRAFFIC IS SOMEWHAT HEAVY OF COURSE. THE CAR CONTINUED

**C-1099**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ACCELERATING DESPITE THE FACT THAT I TOOK MY FOOT OFF OF THE ACCELERATOR. I CALMLY TOLD MY 19 YEAR OLD SON SITTING NEXT TO ME THAT THE ACCELERATOR WAS STUCK. HE SHIFTED THE CAR INTO NEUTRAL, AND THEN INTO PARK AND REVERSE WHEN THE SHIFT INTO NEUTRAL DIDN'T SEEM TO CORRECT THE PROBLEM. HE THEN SHIFTED THE CAR BACK INTO NEUTRAL, MY FOOT WAS ON THE BRAKE, AND I WAS ABLE TO SLOW THE CAR DOWN ON THE 80 DEGREE TURN ON THE CROSSTOWN 62 FROM I35. I SLOWED THE CAR DOWN TO ABOUT 45 MPH AND, LUCKILY, WAS ABLE TO GET TO THE SHOULDER. I TOOK THE CAR IN TO MY LOCAL MAINTENANCE SHOP THE NEXT DAY. THE OWNER OF THE SHOP SUGGESTED THAT I ASK THE DEALER I PURCHASED THE MINIVAN FROM, BLOOMINGTON TOYOTA, TO CHECK AT LEAST THE FOLLOWING THREE ITEMS: THROTTLE POSITION SENSOR, ENGINE CONTROL MODULE, AND IDLE CONTROL MOTOR. ON MAY 15, 2008, I BROUGHT THE MINIVAN INTO BLOOMINGTON TOYOTA AND TOLD THEM WHAT MY LOCAL SHOP OWNER SUGGESTED. AFTER TESTING THE VEHICLE, THE SERVICE MANAGER TOLD ME THAT THEY FOUND NOTHING WRONG WITH THE VEHICLE AND THAT IF THE ACCELERATOR HAD MALFUNCTIONED, THEIR COMPUTER TESTING DEVICES WOULD HAVE DETECTED IT AND HAD DETECTED NOTHING. \*TR

**NHTSA ODI Number:** 10319184  
**Date of Incident:** 20080401  
**Vehicle:** 2001 TOYOTA SOLARA  
**Location of Incident:** NEWARK, DE

**NHTSA Summary:**  
ON 4/1/08, IN THE MORNING, ON WET ROADS, I WAS DRIVING MY '01 TOYOTA SOLARA AND NEEDED TO STOP SHORT IN TRAFFIC. I HAD BOTH FEET ON THE BRAKES, THE ANTI-LOCK BRAKES NEVER KICKED IN, NOR DID THE CAR SLOW DOWN. I HAD REAR ENDED A TOYOTA SEQUOIA. I HAD MENTIONED TO THE OTHER DRIVER THAT THE CAR WOULD NOT STOP. I HAD ALSO TOLD THE POLICE OFFICER THE SAME. MY TOYOTA SOLARA WAS TOTALLED. CONVINCED THERE WAS SOMETHING WRONG WITH THE BRAKES, I HAD THE CAR TOWED TO A MACHANIC TO HAVE THE BRAKES CHECKED OUT, AND NOTHING WAS WRONG. ONLY AFTER HEARING THE RECENT WOES OF OTHER TOYOTAS' WITH THE STICKING ACCELERATOR, DID IT FINALLY CLICK AND MAKE SENSE. THIS IS WHY THE ANTI-LOCK BRAKES DID NOT ENGAGE AND WHY THE CAR DID NOT SLOW DOWN. THE REASON I AM REPORTING THIS NOW IS BECAUSE I BELIEVE TOYOTA VEHICLES HAVE HAD THIS PROBLEM FOR LONGER THAN THE RECALLS LISTS SUGGEST, AND I BELIEVE MORE INVESTIGATIONS SHOULD BE DONE ON THE HIGHER MILEAGE VEHICLES.

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BRAKE PEDAL, PULLED ON THE EMERGENCY BRAKE AND WAS FINALLY ABLE TO GET THE CAR IN PARK. AFTER THAT OCCURRED, I WAS FOLLOWED OFF THE HIGHWAY BY THE HELP TRUCK, TOOK MY CAR TO A LOCAL MECHANIC FOR INSPECTION AND NOTHING WAS FOUND...I IMMEDIATELY MADE AN APPT WITH THE DEALER BUT HAD TO WAIT UNTIL THE NEXT DAY FOR SERVICE. IN THE MEANTIME, IT HAPPENED TWICE MORE ON THE HIGHWAY BUT I WAS CAUTIOUS AND STAYED AWAY FROM CARMS AND CLOSE TO THE SHOULDER. I TOOK IT TO THE DEALER AND WAS CHARGED \$100 TO LOOK AT IT (LEXUS OF GREENWICH, CT), WAS TOLD THAT IT WAS THE FLOOR MAT. INTERESTINGLY ENOUGH, THIS HASN'T HAPPENED AGAIN AND I STILL HAVE THE CAR BUT I AM VERY WORRIED THAT IT MIGHT.

**NHTSA Summary:**

I LIVE IN CHARLESTON, SC AND I PURCHASED A 2009 TOYOTA TACOMA ON MARCH 17, 2010 WITH 12,000 MILES ON IT. I WAS EXCITED TO TAKE IT ON VACATION TO THE FLORIDA PAN HANDLE OVER THE EASTER WEEKEND. MY EXCITEMENT TURNED TO A NIGHTMARE ON SATURDAY APRIL 3RD WHEN WHILE PASSING ANOTHER VEHICLE ON A RURAL ROAD IN FLORIDA THE TACOMA GAS PEDAL PULLED AWAY FROM ME AND THE CAR ENGINE WENT TO MAXIMUM RPM. I PUT THE TACOMA IN NEUTRAL AND COASTED TO THE SIDE OF THE ROAD. THE ENGINE CONTINUED TO REV AT MAX RPM. EVEN AFTER I TURNED IT OFF AND THEN RESTARTED IT. I HAD THE TRUCK TOWED TO THE NEAREST TOYOTA DEALER WHICH WAS LOCATED IN TALLAHASSEE FL. THE SERVICE DIRECTOR AT LEGACY IMMEDIATELY STATED THAT THE FLOOR MATS CAUSED THE ACCELERATION HE PROVIDED A RENTAL CAR FOR ME FOR THE REMAINDER OF THE WEEKEND, AND TOLD ME HE WOULD HAVE THE TRUCK CHECKED OUT ON MONDAY MORNING. I RECEIVED A CALL BACK ON MONDAY AFTERNOON TELLING ME THAT TOYOTA WAS RELEASING THE CAR BACK TO ME, AND THAT IT WAS SAFE TO DRIVE. I TOLD THE DEALER THAT I FELT THE CAR HAD A PROBLEM, AND THAT I DID NOT FEEL THAT IT WAS SAFE TO DRIVE. I AM CERTAINLY NOT AN AUTOMOTIVE ENGINEER OR A MECHANIC, HOWEVER I DO HAVE A MASTER'S DEGREE IN MECHANICAL ENGINEERING, AND HAVE BEEN A LICENSED PROFESSIONAL ENGINEER FOR 20 YEARS. I RENTED ANOTHER CAR AT MY OWN EXPENSE, AND DROVE 400 MILES BACK TO SOUTH CAROLINA ON TUESDAY APRIL 6. MY 19 YEAR OLD SON WAS GRADUATING FROM MARINE BOOTCAMP AT PARRIS ISLAND ON THURSDAY APRIL 8TH. I AM CURRENTLY WITHOUT A CAR, AND MORE THAN 400 MILES AWAY FROM WHERE MY TRUCK IS CURRENTLY LOCATED.

**Additional Summary:**  
FROM NEW ORLEANS METRO NEWS ARTICLE "ONE KILLED, THREE INJURED IN I-55 CRASH" DATED APRIL 21, 2008

"The accident occurred shortly before 9 p.m. near milepost 14 when George's 2007 Toyota, traveling northbound on I-55 in the left lane, struck the rear of a vehicle that was among several stopped in the left lane because of an earlier crash that was in the process of being investigated and cleared in the State Police Troop L area, Piglia said." (State Police Troop B spokesman Joseph Piglia)

"George's vehicle struck the rear of a 1997 Nissan Pathfinder driven by Martin Davison, Piglia said. The impact forced the Nissan into the rear of a 2004 Chevrolet S-10 pick up driven by Monteleone and forced that vehicle into a 1998 Ford Expedition driven by Pittman, he said.

After the impact, the Toyota and the Nissan became engulfed in flames, Piglia said. The occupants of both vehicles were removed by several bystanders.

Martin Davison, 43, of Kenner, was pronounced dead at the scene, Piglia said."

NEWS ARTICLE FROM USA TODAY - "They died in Toyotas, leaving many questions" dated March 18, 2010:

"State Trooper Melissa matey says George was charged with vehicular homicide because his blood alcohol content was above the 0.08% state limit. The case is still being tried, Matey says.

However, the anonymous complaint filed with NHTSA alleges the Camry's floor mat trapped the accelerator pedal, causing the car to accelerate into the Pathfinder.

**NHTSA Summary:**  
2003 TOYOTA SIENNA VIN 4T3ZF13C03U555791. MY VEHICLE WAS ACCELERATING FROM A RAMP ONTO THE HIGHWAY WHEN I DISCOVERED TO MY HORROR THAT EVEN AFTER I TOOK MY FOOT OFF THE GAS PEDAL (ABOUT 60 MPH), THE VEHICLE CONTINUED TO ACCELERATE (UP TO 90 MPH), I EVEN TRIED USING MY FOOT TO HOOK THE GAS PEDAL TOWARD ME TO STOP THE CAR. WHEN THAT DID NOT SUCCEED, I PRESSED ON THE PARKING AND NORMAL BRAKES TO SLOW DOWN THE CAR AND TURNED OFF THE CAR. THE VERY NEXT DAY, I HAD MY CAR TOWED TO DIEHL TOYOTA OF YORK, 1885

C-1108

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

WHITEFORD RD, YORK, PENNSYLVANIA 17402. THEY DID NOT DISCOVER ANY ISSUES. HOWEVER IN LIGHT OF THE MASSIVE TOYOTA RECALLS, I BELIEVE THAT MY CAR IS SIMILARLY DEFECTIVE. I HAD TRIED CALLING 800 331 4331, THE PHONE NUMBER PROVIDED BY TOYOTA FOR SUCH DEFECTIVE VEHICLE ISSUES BUT NO ONE EVER PICKS UP.

**Additional Summary:**

**NHTSA ODI Number:** 10305124  
**Date of Incident:** 20080418  
**Vehicle:** 2005 TOYOTA COROLLA  
**Location of Incident:** NEW BERN, NC

**NHTSA Summary:**  
TL-THE CONTACT OWNS A 2005 TOYOTA COROLLA. THE CONTACT STATED THAT HER VEHICLE ACCELERATED SUDDENLY ON AN INTERMITTENT BASIS. THE ENGINE WOULD REV UP WHEN THE ISSUE OCCURRED. SHE STATED THAT THE ISSUE SEEMED TO SURFACE WHEN SHIFTING (THE VEHICLE HAS A MANUAL TRANSMISSION). SHE NOTED THAT THE PROBLEM WOULD OCCUR AND DISAPPEAR ON ITS OWN. SHE TOOK THE VEHICLE TO THE DEALERSHIP AND WAS TOLD THAT THEY COULD FIND NOTHING WRONG. SHE HAD NOT SPOKEN WITH THE MANUFACTURER AT THE TIME OF THE COMPLAINT. THE VEHICLE HAD NOT BEEN REPAIRED TO-DATE. THE CURRENT MILEAGE WAS 85,894. THE FAILURE MILEAGE WAS APPROXIMATELY 50,000-BK

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:**  
**Date of Incident:** 20080419  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** FLINT, MI

**NHTSA Summary:**  
**Additional Summary:**  
"On April 19, 2008, shortly after 2:00 in the afternoon, Plaintiff's Decedent GUADALUPE ALBERTO was driving the subject 2005 Toyota Camry on Copeman Boulevard in Flint, Genesee County, Michigan, when the vehicle experienced a sudden, unintended acceleration. The vehicle accelerated from an intended speed of less than twenty-five (25) miles per hour to a speed of approximately 80 miles per hour, despite Guadalupe Alberto's having vigorously and desperately applied her brakes, and traveled at that high speed for approximately one-fourth (1/4) of a mile, collided with a tree, went airborne, and then collided with another tree. Plaintiff's Decedent, despite having been properly secured in her seat belt restraint system, sustained fatal injuries in the accident."

**Toyota ID Number:**  
**NHTSA ODI Number:** 10306345  
**Date of Incident:** 20080420  
**Vehicle:** 2008 TOYOTA PRIUS  
**Location of Incident:** SYRACUSE, NY

**NHTSA Summary:**  
I WAS DRIVING MY 2008 PRIUS AT APPROXIMATELY 35 MPH AND IT BEGAN TO ACCELERATE. I TOOK MY FOOT OFF OF THE ACCELERATOR, BUT IT DIDN'T STOP. I PUMPED THE BRAKE, BUT IT HAD NO EFFECT. IT STOPPED SUDDENLY, AND THE CAR OPERATED NORMALLY. THE INCIDENT DIDN'T LAST LONG, AND HASN'T HAPPENED AGAIN. UNTIL I READ ABOUT THE OTHER, MORE SERIOUS INCIDENTS WITH THE ACCELERATOR I DIDN'T EVEN KNOW HOW TO DESCRIBE IT - I'D NEVER HEARD OF SUCH A

C-1109

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THING HAPPENING. I WOULD HAVE FELT FOOLISH TALKING TO THE GUYS AT THE SERVICE CENTER, SO I DECIDED TO WAIT TO SEE IF IT HAPPENED AGAIN.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10311099  
**Date of Incident:** 20080420  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** KNOXVILLE, TN

**NHTSA Summary:**  
ON 7/31/2007, I PURCHASED A BRAND NEW TOYOTA CAMRY SE FROM KNOXVILLE TOYOTA. ON APRIL 20, 2008, I WAS DRIVING MY TOYOTA CAMRY SE WESTBOUND ON ROUTE 26 JUST WEST OF COLUMBIA, SC, AT A SPEED OF 60MPH. I THEN HIT MY CRUISE CONTROL TO INCREASE THE SPEED TO PASS A VEHICLE, WHEN MY ACCELERATOR STUCK AND MY SPEED WENT ALMOST IMMEDIATELY TO 105 MPH. ALL EFFORTS TO UNSTICK MY ACCELERATOR FAILED ME. (I AM A 54 YR OLD RETIRED FBI SPECIAL AGENT WHO HAS OFTEN BEEN IN HIGH SPEED PURSUIT- SO I KNOW HOW TO HANDLE VEHICLES AT HIGH SPEEDS) TRAFFIC WAS RELATIVELY HEAVY, WITH A COUPLE 18 WHEELERS, AND SEVERAL CARS WITH FAMILIES IN FRONT OF ME. I RECALLED THERE BEING A FLYER OF WARNING BY TOYOTA ON RUBBER MATS, SO I REACHED DOWN, YANKED THE RUBBER MAT OFF THE FLOOR AND THREW IT INTO THE BACK SEAT, ALL THE WHILE STANDING ON THE BRAKE PEDAL, TRYING TO GET THE CAR NOT TO HIT VEHICLES IN FRONT OF ME. FINALLY I PUT THE CAR IN NEUTRAL AND COASTED THE CAR OUT OF TRAFFIC. SMOKE WAS COMING OUT OF MY FRONT BRAKES, AND ONCE ON THE RIGHT SIDE MEDIAN, I TURNED THE CAR OFF. LET IT COOL DOWN, THEN GOT BACK ON RT 26. LESS THAN FIVE MINUTES LATER, WHILE PASSING A SLOWER VEHICLE, MY ACCELERATOR STUCK AGAIN, AND THE SPEED GOT TO 95 MPH BEFORE I PUT THE CAR IN NEUTRAL AGAIN AND TURNED IT OFF. I BROUGHT MY CAR INTO THE KNOXVILLE TOYOTA DEALERSHIP 4/21/08 (COMPLAINT OF 4/21/08 WAS DOCUMENTED AT TOYOTA KNOXVILLE, PO BOX 30069, KNOXVILLE TN,)AND THEY PUT IT ON THEIR MACHINE AND SAID "NOTHING WAS WRONG." FOR THE NEXT YEAR, I EXPERIENCED SHIMMING OF MY FRONT TIRES WHEN BRAKING. ON 5/5/09, I PAID OVER \$171 TO REPAIR WARPED ROTORS. WHEN THE RE-CALL OCCURRED, I REMINDED THEM OF MY EVENT, WHICH APPEARS TO HAVE BEEN AN ELECTRONIC ISSUE INVOLVING MY CRUISE CONTROL ON THE FIRST EVENT. THEY PUT MY CAR IN TO HAVE THEIR "FIX" DONE TO MY ACCELERATOR, HOWEVER I AM NOT CONVINCED IT FIXED MY ISSUE. I AM VERY CONCERNED THAT TOYOTA HAS HIDDEN THIS PROBLEM FROM ITS CUSTOMERS, AND I AM NOT CONVINCED THIS VEHICLE IS SAFE.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10318403  
**Date of Incident:** 20080420  
**Vehicle:** 2004 TOYOTA CAMRY  
**Location of Incident:** MADISON, CT

**NHTSA Summary:**  
TL- THE CONTACT OWNS A 2004 TOYOTA CAMRY. THE CONTACT WAS DEPRESSING THE BRAKE AND THE VEHICLE SURGED INTO THE GARAGE DOOR. THE DOOR CAME COMPLETELY OFF THE HINGES AND KNOCKED DOWN THE SHEET ROCK. THE VEHICLE CRASHED INTO THE WORK BENCH. THE VEHICLE WAS DROVE TO A LOCAL MECHANIC AND THEY REPLACED THE BRAKES AND DID THE AUTO BODY WORK. THE CONTACT IS UPSET BECAUSE THIS FAILURE OCCURED TWO YEARS AGO WHICH MADE HER INSURANCE GO UP TREMENDOUSLY. THE CONTACT DID INFORM THE MANUFACTURER

C-1110

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

AND THEY STATED THAT SHE WAS NOT ON THE RECALL LIST. THEY JUST TOOK THE FLOOR MATS OUT THE VEHICLE AND STATED THE PEDAL SHOULD NOT STICK ANYMORE. THE CONTACT STATED THAT THE PEDAL NEVER WAS STICKING HER FOOT WAS ON THE BRAKE THE VEHICLE JUST SURGED FORWARD. THE APPROXIMATE FAILURE MILEAGE WAS 33038 AND THE CURRENT MILEAGE WAS 43000. DF

**Vehicle:** 2008 TOYOTA HIGHLANDER  
**Location of Incident:** PHOENIX, AZ

**NHTSA Summary:**  
IN FEBRUARY 2008, I PURCHASED A 2008 TOYOTA HIGHLANDER. ON TWO SEPARATE OCCASIONS SINCE PURCHASING THE VEHICLE, WHEN SLOWLY PULLING INTO A PARKING SPACE THE VEHICLE UNEXPECTEDLY ACCELERATED. ON THE FIRST OCCASION (APRIL 2008), THE INCIDENT ENDED IN AN ACCIDENT AS THE VEHICLE SLAMMED INTO A WALL. THE SECOND INCIDENCE OCCURRED APPROXIMATELY 3 MONTHS LATER AND NEARLY CAUSED ANOTHER ACCIDENT. AGAIN, AS I WAS PULLING INTO A PARKING SPACE THE VEHICLE UNEXPECTEDLY ACCELERATED. HOWEVER, THE VEHICLE WAS STOPPED BY A PARKING PYLON BEFORE HITTING A WALL. I HAVE HAD THE VEHICLE INSPECTED BY THE LOCAL DEALERSHIP AND THEY CLAIM THAT THEY CAN NOT FIND ANY ISSUES WITH VEHICLE. BASED ON MY RESEARCH, THIS DOES NOT APPEAR TO BE AN ISOLATED PROBLEM AS OTHER TOYOTA VEHICLES ARE NOTED AS HAVING THE SAME ISSUE. I FEEL THAT THIS VEHICLE IS THREAT NOT ONLY TO THE SAFETY OF MY FAMILY, BUT TO OTHERS ON THE ROAD. UPDATED 08/08/08. \*JB

**Vehicle:** 1995 LEXUS ES300  
**Location of Incident:** CAMARILLO, CA

**NHTSA Summary:**  
IN APRIL 2008, DRIVER WAS DRIVING HOME IN A 95 LEXUS ES300 AND WAS ABOUT TO ENTER THE GARAGE. AS SHE PULLED UP TOWARDS THE GARAGE WHILE WAITING FOR THE GARAGE TO OPEN THE CAR SUDDENLY ACCELERATED AND CRASHED THROUGH THE GARAGE DOOR. IT CONTINUED RACING FORWARD AND HIT THE OTHER VEHICLE THAT WAS PARKED IN THE GARAGE. DRIVER TRIED TO BRAKE BUT THAT SEEMED TO HAVE NO EFFECT AND THE ENGINE WAS RUNNING AT A HIGHER THAN NORMAL RPM. DRIVER THEN TRIED TO GET THE GEAR FROM DRIVE INTO PARK, UNFORTUNATELY, IT ENGAGED IN REVERSE AND THE CAR SPUN OUT OF CONTROL BACKWARDS AND INTO THE STREET, AS IT REVERSING OUT OF CONTROL AFTER HITTING THE FIRST PARKED VEHICLE IT SEVERELY DAMAGED A MAIN COLUMN OF THE HOUSE ON ITS WAY OUT AND HIT ANOTHER CAR THAT WAS PARKED IN THE STREET. AFTER WHICH IT CAME TO A STOP. THIS INCIDENT WAS REPORTED THIS TO THE AUTO INSURANCE COMPANY (GEICO) AND HOMEOWNERS INSURANCE COMPANY (RESIDENTIAL MUTUAL). GEICO RULED THAT BOTH OF THE VEHICLES WE OWNED AT THE TIME THE LEXUS ES300 AND THE PARKED VAN IN THE GARAGE THAT WAS HIT WERE A TOTAL LOSS. IN ADDITION, THE NEIGHBOR'S CAR WAS ALSO BADLY DAMAGED BUT THE EXACT DISPOSITION OF THAT VEHICLE IS NOT KNOWN. THE POLICE WAS CALLED BUT THEY DID NOT CREATE A REPORT BECAUSE THE WAY THIS INCIDENT TOOK PLACE IT WAS NOT CONSIDERED A POLICE MATTER.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Vehicle:** 2003 TOYOTA HIGHLANDER  
**Location of Incident:** ARNOLD, MO

**NHTSA Summary:**  
ON MONDAY, APRIL 28, 2008 AT APPROXIMATELY 7:45 A.M. CDT, I DROVE MY 2003 TOYOTA HIGHLANDER ON TO THE EMPLOYEE PARKING LOT AT UNIGROUP, INC. AS I ALWAYS DID, I PULLED UP PAST MY ASSIGNED PARKING SPOT, STOPPED, AND PUT THE VEHICLE IN REVERSE TO BACK INTO MY SPACE. WHEN I MOVED MY FOOT FROM THE BRAKE TO THE ACCELERATOR AND TURNED THE STEERING WHEEL TO BACK INTO SPACE 304, THE SUV SUDDENLY ACCELERATED AT A TREMENDOUS SPEED, HIT AND BOUNCED OFF THE FORD EXPLORER PARKED IN SPACE 305 AND THEN HIT THE SUBARU LEGACY WAGON PARKED IN SPACE 317 IMMEDIATELY BEHIND SPACE 304. ONE WITNESS WHO WAS IN THE PARKING LOT AT THE TIME LATER TOLD ME THAT WHILE HE DID NOT SEE THE CRASH, HE HEARD A HUGE ROAR OF A MOTOR AND THE CRASHING NOISE OF THE IMPACT. THE OWNER OF THE SUBARU ALSO DID NOT SEE THE INITIAL ACCELERATION OF THE SUV, BUT HEARD THE TIRES SCREECHING AND TURNED IN TIME TO SEE MY SUV HIT HIS SUBARU. BOTH OF THE TWO WITNESSES HELPED ME LOAD THE BACK BUMPER OF MY HIGHLANDER INTO THE CARGO AREA. PRIOR TO GOING INTO THE OFFICE, I CHECKED THE FLOOR MAT UNDER THE STEERING WHEEL, BUT COULD NOT SEE ANY INDICATION THAT IT IN ANY WAY HAD MOVED. I AM CONVINCED THAT THE ONLY THING THAT STOPPED MY HIGHLANDER WAS THE FACT THAT IT HIT THE TWO VEHICLES IN SPACES 305 AND 317. LATER THAT DAY (4.28.2008), I CALLED TOYOTA TO REPORT THE INCIDENT. I WAS TOLD BY A REPRESENTATIVE BY THE NAME OF BARBARA THAT THERE WERE NO PROBLEMS OR RECALLS ON THE HIGHLANDER. ONLY THE CAMRY (THIS ACCORDING TO THE NHTSA.) MY REPORT WAS GIVEN THE CASE # 200804281090. THERE WAS EXTENSIVE DAMAGE TO MY SUV AND THE TWO OTHER VEHICLES THAT WERE HIT. STATE FARM INSURANCE CLAIM # 25 6288 6 182. THUS FAR, TOYOTA HAS NOT ACKNOWLEDGED THAT MY VEHICLE (2003 HIGHLANDER) IS INCLUDED IN THE RECALL AND SINCE THE VIN # BEGINS WITH A 6J6, I AM TOLD THAT THERE IS NO PROBLEM WITH ANY VEHICLE MADE IN JAPAN. THEREFORE, I CANNOT EVEN TAKE IT TO A DEALERSHIP FOR REPAIRS. I AM LEFT IN LIMBO WITH A DEFECTIVE TOYOTA

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10227481  
**Date of Incident:** 20080429  
**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** CAMARILLO, CA

**NHTSA Summary:**  
SUDDEN ACCELERATION IN 2004 TOYOTA SIENNA VAN: AT 0830AM PST, APRIL 29TH 2008 I WAS DRIVING TO WORK AT MY SCHOOL WHERE I WORK AS A TEACHER. WHILE MAKING A SLOW U-TURN, WITH MY FOOT LIGHTLY ON THE BRAKE PEDAL, MY 2004 TOYOTA SIENNA LE VAN SUDDENLY TOOK OFF AND ACCELERATED UNCONTROLLABLY LIKE A ROCKET AT MAXIMUM VELOCITY. THE ACCELERATOR PEDAL WAS NEVER PRESSED DURING THIS INCIDENT. I HAD JUST A SPLIT SECOND TO REMOVE MY FOOT COMPLETELY OFF THE BRAKE PEDAL TO LOOK DOWN AT THE FLOOR BOARD TO ENSURE NOTHING WAS PINNING THE PEDAL DOWNWARD, NOTHING WAS THERE AND THE VAN WAS STILL ACCELERATING LOOKED UP IN HORROR AS VEHICLE WAS CONTINUING TO ACCELERATE AT AN EXTREMELY HIGH RATE OF SPEED AND CONTINUING TO ACCELERATE. I QUICKLY STEERED THE VEHICLE AND DODGED A SCREENED CHAIN-LINK FENCE TO AVOID AN AREA WHERE CHILDREN USUALLY STAND WAITING FOR PARENTS. WITH VEHICLE STILL ACCELERATING AT FULL POWER I QUICKLY PASSED THE FENCE AREA, APPLIED THE BRAKES WITH GREAT FORCE, BUT THEY FELT UNRESPONSIVE TO THE ACCELERATION FORCES. WITH VEHICLE MOVING AT A VERY HIGH RATE OF SPEED AND STILL ACCELERATING, I SAW A PARKED VEHICLE RIGHT IN FRONT OF ME AND COULD NO

C-1114

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

LONGER CONTROL THE VEHICLE, I BRACED FOR IMPACT. THE VAN VIOLENTLY SMASHED INTO AN UNATTENDED FORD EXPEDITION VEHICLE. ENGINE BRIEFLY REVVED HIGH AND THEN FINALLY SHUT DOWN. HAD THERE NOT BEEN A PARKED VEHICLE THERE I WOULD HAVE GONE DIRECTLY INTO THE RESIDENTIAL HOUSE ABOUT 50 FEET AWAY. IT ONLY TOOK ABOUT 3 OR 4 SECONDS FOR THE VAN TO TRAVEL THE 22 YARDS FROM WHERE THE ACCELERATOR MALFUNCTION STARTED TO THE IMPACT AREA OF THE OTHER VEHICLE. THERE IS NO DOUBT THAT THIS SITUATION WILL OCCUR AGAIN TO SOMEONE ELSE. LIVES WILL BE LOST AND DRIVERS WILL BE FALSELY HELD ACCOUNTABLE. I STRONGLY RECOMMEND THAT THE NHSTA INVESTIGATE THIS SERIOUS ISSUE. I AM SO CONCERNED ABOUT THIS ISSUE THAT I AM SENDING A COMPLETE DISSERTATION TO ALL TV NETWORKS (20/20, ETC) HOPING THAT SOME AGENCY WILL EXPOSE THIS TO A HIGH LEVEL OF PUBLIC AWARENESS. \*TR

**Location of Incident:** STOUGHTON, MA

**NHTSA Summary:**

ON MAY 3RD, 2008 I HAD AN INCIDENT WITH MY 2000 CELICA GTS. I WAS USING CRUISE CONTROL AT 65MPH. I TAPPED MY BRAKES TO DISENGAGE THE CRUISE CONTROL AS I EXITED ONE HIGHWAY ONTO ANOTHER. WHEN I CLICKED RESUME ON MY CRUISE CONTROL MY CAR ACCELERATED PAST 65MPH AND CONTINUED CLIMBING. I TAPPED MY BRAKES BUT MY CAR CONTINUED TO ACCELERATE. I TURNED OFF THE CRUISE CONTROL BUT THE CAR CONTINUED TO ACCELERATE PAST 85MPH. I PUSHED MY CLUTCH PETAL IN AND THE ENGINE REV'ED NEAR REDLINE. I RELEASED THE CLUTCH AND TURNED OFF THE ENGINE IN THE MIDDLE OF THE HIGHWAY. TOYOTA TOLD ME THAT THE THROTTLE CABLE HAD RUST AND STUCK OPEN WHEN THE CRUISE CONTROL REQUESTED ACCELERATION. IN TURN MY CLUTCH/TRANSMISSION WERE BLOWN. I BELIEVE THIS FAILURE MODE IS A SERIOUS SAFETY ISSUE. THE CAR CONTINUOUSLY ACCELERATING AND THE ONLY WAY TO REMEDY IS TO TURN THE CAR OFF AT HIGH SPEED ON A HIGHWAY

**Additional Summary:**

**NHTSA ODI Number:** 10331290  
**Date of Incident:** 20080503  
**Vehicle:** 2006 TOYOTA AVALON  
**Location of Incident:** CINCINNATI, OH

**NHTSA Summary:**

MY VEHICLE 2006 TOYOTA AVALON, SINCE I HAD BOUGHT IT HAS ALWAYS EXCELERATED SO I WOULD JUST SLOW IT DOWN (TAPPING ON THE BRAKES). I ASSUMED THIS WAS NORMAL SINCE I DID BRING IT TO THE DEALERSHIP TELLING THEM, MAY 3, 2008 I WAS IN A BAD CAR ACCIDENT ON 75 NORTH. AT THAT TIME THE VEHICLE ACCELERATED AND WHEN I WENT TO SLOW DOWN THE CAR IT WENT INTO THE GUARD RAIL AND AFTER THAT WHEN I WOKE UP MY CAR SPLATTERED ALL OVER THE FREEWAY. I WAS FINED BY THE POLICE UNABLE TO CONTROL MY CAR. WENT TO COURT TO FIGHT IT AND I HAD TO PAY \$140,000 PLUS THEY WANTED ME TO PAY FOR THE DAMAGE ON THE FREEWAY \$3,000.00. I HAD TO BE CUT OUT OF THE CAR AND MY VEHICLE WAS TOTTALED.

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ON MAY 2008 I WAS IN A ONE CAR ACCIDENT ON THE MAJOR FREEWAY, DETERMINED BY THE POLICE AND SITED A TICKET FOR NOT BEING ABLE TO CONTROL THE CAR. ALL I REMEMBER IS MY CAR ACCELERATED AND I WENT TO SLOW DOWN AND LOST CONTROL. MY CAR WAS TOTALLED AND IN PIECES ON THE FREEWAY. THIS VEHICLE HAD ALWAYS ACCELERATED SINCE I HAD PURCHASED IT AND DETERMINE THAT IT WAS THE TYPE OF CAR AND WAS NORMAL. I NEVER RECEIVED A RECALL ON THIS VEHICLE UNTIL WHEN I WENT TO TAKE ANOTHER VEHICLE TO GET REPAIRD I ASKED THEM IF THEY HAD A RECALL WITH ALL OF THE MEDIA EXPOSURE. AT THAT TIME THEY INFORMED ME THAT THEY DID HAVE A RECALL AND I ASKED AND WAS TOLD.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10294005  
**Date of Incident:** 20080504  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** SANTA MONICA, CA

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2007 LEXUS ES350. WHILE DRIVING 40 MPH SHE ENGAGED THE ACCELERATOR PEDAL AND NOTICED THAT THE PEDAL WAS STUCK WHICH CAUSED THE VEHICLE TO ACCELERATE UNCONTROLLABLY. THE BRAKES BRIEFLY FAILED TO STOP THE VEHICLE. THE DEALER STATED THAT THE FAILURE WAS CAUSED BY THE FLOOR MATS. THERE WERE NO PRIOR WARNINGS. THE CURRENT MILEAGE WAS 28,000 AND THE FAILURE MILEAGE WAS 15,000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10314386  
**Date of Incident:** 20080504  
**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** SIOUX CITY, IA

**NHTSA Summary:**

IN MAY OF 2008, I WAS ATTEMPTING TO PULL MY 2004 TOYOTA SIENNA INTO THE GARAGE. I WAS IDLING WHEN SUDDENLY THE VEHICLE TOOK OFF. I WAS STANDING WITH BOTH FEET ON THE BRAKE AND COULD NOT STOP. I CRASHED THROUGH THE REAR OF THE GARAGE AND HIT A TREE WHICH RIPPED THE RIGHT TIRE AND AXLE FROM THE DRIVE SHAFT. AT THAT POINT, I CAN TO A STOP HOWEVER THE ENGINE CONTINUED TO RACE UNTIL I TURNED OFF THE VEHICLE. MY 2 YEAR OLD DAUGHTER HAD BEEN RIGHT OUTSIDE THE BACK DOOR OF THE GARAGE WHEN I CRASHED THROUGH. SHE WAS SOMEHOW PUSHED OFF TO THE SIDE. THE BACK PORTION OF THE WALL AND THE BACK DOOR WENT ABOUT 30 FEET INTO THE BACKYARD. THE TREE I HIT WAS ABOUT 45 FEET BEHIND THE GARAGE. I TRAVELED FOR ANOTHER 50 FEET AFTER HITTING THE TREE AND LOSING MY RIGHT FRONT TIRE. WHEN WE HAD THE VEHICLE LOOKED AT BY THE TOYOTA DEALERSHIP IN SIOUX CITY, IA, THEY SAID NOTHING WAS WRONG WITH THE VEHICLE. SINCE IT HAS BEEN REPAIRED, THE ELECTRONIC SPEED CONTROL WILL QUIT WORKING AT TIMES AND THERE ARE ERROR LIGHTS THAT SHOW UP ON THE DASHBOARD. I BELIEVE IT IS AN ESC LIGHT AND THE CHECK ENGINE LIGHT THAT SHOW UP WHEN THE SPEED CONTROL QUILTS WORKING. ONCE THESE LIGHTS GO AWAY, THE SPEED CONTROL WILL CONTINUE WORKING AGAIN.

**NHTSA Summary:**

C-1120

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

IN 2007 OR 2008 THE ACCELERATOR ON MY LEXUS GX 470 STUCK IN THE WIDE OPEN POSITION. I HAD FLOORED THE ACCELERATOR TO PASS A TRUCK AND WHEN TAKING MY FOOT OFF THE ACCELERATOR THE CAR WOULD NOT SLOW DOWN. I WAS ABLE TO APPLY THE BRAKES WITH MUCH EFFORT AND TURN OF THE IGNITION. THE FLOOR MAT WAS NOT PART OF THE PROBLEM. I THEN RESTARTED THE CAR AND IT DROVE NORMAL. I TOOK THE CAR TO THE LEXUS DEALERSHIP WHERE I PURCHASED THE CAR NEW, WHICH IS LEXUS OF MISHAWAKA, INDIANA. THEY INSPECTED THE CAR AND SAID THEY COULD FIND NOTHING WRONG AND THAT IT WAS PROBABLY THE FLOOR MAT. IT WAS NOT THE FLOOR MAT. I TRADED THE CAR IN AT LEXUS OF MISHAWAKA IN NOVEMBER OF 2008. I NO LONGER OWN THE CAR.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10227666  
**Date of Incident:** 20080507  
**Vehicle:** 2008 LEXUS RX350  
**Location of Incident:** HOUSTON, TX  
**NHTSA Summary:**

AS I PUT THE VEHICLE IN REVERSE, IT RAPIDLY AND SUDDENLY ACCELERATED OUT OF CONTROL AND HIT A LIGHT POST. TRYING TO REGAIN CONTROL, I PUT ON THE BRAKE AND SHIFTED TO DRIVE, WHERE IT SUDDENLY AND VERY RAPIDLY SPED FORWARD AND HIT A FENCE BEFORE I COULD STOP THE VEHICLE. WHEN THIS OCCURRED, THE COUPLE I WAS DINING WITH HEARD THE CAR BACKFIRE TWICE WHICH CAUGHT THEIR ATTENTION. I COULD NOT HEAR THE BACKFIRE INSIDE OF THE VEHICLE. THE ACCELERATION WAS EXTREMELY RAPID AND DANGEROUS. THE VEHICLE DID THIS ON ITS OWN. THIS IS NOT A CASE OF WHERE I ACCIDENTALLY HIT THE GAS PEDAL INSTEAD OF THE BRAKE. IN THIS PARTICULAR SITUATION, NO ONE WAS HURT, AND THE VEHICLE ONLY HAS MINOR SCRATCHES. HOWEVER, AS YOU MIGHT SURMISE, THIS COULD HAVE BEEN A POTENTIALLY DANGEROUS AND DEADLY SITUATION HAD SOMEONE BEEN IN THE PATH OF THE CAR. VEHICLE WAS BROUGHT TO WESTSIDE LEXUS TO CHECK ON 5.13.2008. THEY WERE UNABLE TO IDENTIFY THE PROBLEM AND SAID THE VEHICLE WAS SAFE TO DRIVE. \*TR

**Additional Summary:**

**NHTSA ODI Number:** 10316309  
**Date of Incident:** 20080508  
**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** WARWICK, RI  
**NHTSA Summary:**

I OWN A 2007 TOYOTA CAMRY 4 DOOR, 4 CYLINDER, AUTOMATIC. MY WIFE AND TWO DAUGHTERS ALSO DRIVE THIS VEHICLE. I HAVE HAD THE RECALL FOR THE MAT, GAS PEDAL, AND THE COMPUTER REPROGRAMMED AND SERVICED BY THE DEALER. OUR PROBLEM IS, WE START UP THE CAR AND MOVE INTO TRAFFIC, WE TURN THE AIR-CONDITIONING ON HIGH, WE PULL UP TO A RED LIGHT AND STOP. WE PUSH DOWN THE ACCELERATOR AND HAVE TO PUSH A LITTLE HARDER TO GET THE VEHICLE MOVING. WE ENTER THE INTERSECTION AND GO TO MAKE A LEFT TURN, WE ARE MOVING AT APPROXIMATELY 3 - 6 M.P.H. THE TRANSMISSION IS IN 1ST GEAR AND THEN NOTHING. THE CAR HESITATES AND WILL NOT SHIFT INTO THE NEXT GEAR. MY NEXT REACTION IS TO PRESS THE ACCELERATOR HARDER, NO RESPONSE, PUSH HARDER AND THEN THE CAR WILL ACCELERATE. THIS HESITATION IS DANGEROUS. IT IS LONG ENOUGH TO CAUSE A COLLISION. I KNOW AND EXPECT POWER TO BE DRAINED OFF THE ENGINE WHEN AIR CONDITIONING IS USED. WE HAVE HAD OTHER VEHICLES WITH AC. THIS IS

C-1121

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

UNLIKE ANY OTHER HESITATION OR SLUGGISH ACCELERATION, I REPEAT: IT IS DANGEROUS! I HAVE TOLD THE DEALER THREE TIMES ABOUT THIS BUT THEY DO NOT RECOGNIZE THE IMPORTANCE.

**NHTSA ODI Number:** 10303507  
**Date of Incident:** 20080515  
**Vehicle:** 2007 TOYOTA PRIUS  
**Location of Incident:** SHERMAN OAKS, CA

**NHTSA Summary:**

UNEXPLAINED SPONTANEOUS ACCELERATION IN 2007 TOYOTA PRIUS. IN MID-MAY OF LAST YEAR I WAS DRIVING ALONE ON THE HOLLYWOOD FREEWAY IN APPROXIMATELY 45 MPH TRAFFIC. SUDDENLY THE CAR ACCELERATED DRAMATICALLY, AS IF I HAD PUNCHED THE ACCELERATOR, OR THE CRUISE CONTROL SUDDENLY KICKED IN BUT AT FULL SPEED (THE CRUISE WAS NOT ON). I WAS SHOCKED AND SCARED, AND I HIT THE BRAKES, NOTHING HAPPENED, AND THE CAR KEPT ACCELERATING. I THOUGHT ABOUT THE MAT AND HOOKED MY FOOT AROUND THE PEDAL TO SEE BUT THE PEDAL WAS UP. I KEPT HITTING THE BRAKES AGAIN, AND ALSO PUMPED THE ACCELERATOR TO MAKE SURE IT WASN'T STUCK AND THEN THE CAR STOPPED ACCELERATING. THE WHOLE THING LASTED LESS THAN 10 SECONDS, BUT WAS PRETTY SCARY AS I GOT PRETTY CLOSE TO TRAFFIC IN FRONT OF ME. IT IMMEDIATELY OCCURRED TO ME THAT IT COULD HAVE BEEN THE MAT AS THAT HAD HAPPENED IN ANOTHER CAR, BUT THE MAT WAS CLIPPED TO THE FLOOR, AND WAS NOT IN ANY WAY INTERFERING WITH THE GAS PEDAL. ALSO, BEAR IN MIND, AS I'M WRITING ABOUT THIS IT SOUNDS AS IF I WAS ANALYTICAL AND METHODOICAL, BUT ACTUALLY I WAS PRETTY FRANTIC AND MY FEET WERE FLYING ON THE PEDALS... I TOLD MY PARTNER MARK ABOUT IT, TOLD HIM TO WATCH OUT FOR IT, BUT THEN IN JUNE WE BOUGHT ANOTHER CAR AND MARK PRIMARILY DROVE THE PRIUS AFTER THAT. I THEN I FORGOT ABOUT IT, AS I THOUGHT IT WAS JUST AN ANOMALY AND BASED ON WHAT WE PAID FOR THE CAR AND TOYOTA'S REPUTATION FOR SAFETY. I HAD NOT HEARD OF ANY ACCELERATION ISSUES AT THE TIME, AND IN FACT DIDN'T UNTIL MUCH LATER AFTER THE CHP OFFICER'S CRASH IN THE LEXUS. I'M ACTUALLY NOW PRETTY FREAKED OUT ABOUT IT IN HINDSIGHT, AND WE HAVE GONE OVER THE DRILL REPEATEDLY TO MAKE SURE MARK KNOWS WHAT TO DO IF IT HAPPENS AGAIN. I SINCERELY DOUBT IT HAD ANYTHING TO DO WITH THE PEDAL OR THE MAT, AND IN MY GUT I SUSPECT IT IS ELECTRONIC IN NATURE. I AM PRETTY NERVOUS ABOUT IT. \*TR

**Location of Incident:** PRINCETON, NJ

**NHTSA Summary:**

MY TOYOTA HIGHLANDER LIMITED [2007] HAS A PROBLEM WITH ACCELERATION. IT IS NOT IN THE CURRENT RECALL. I REPORTED THE PROBLEM 6/5/08. WHEN I AM IN CRUISE CONTROL, THEN BRAKE, THEN PRESS THE CRUISE CONTROL MECHANISM TO RETURN TO

C-1127

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

CRUISE CONTROL. THE CAR SOMETIMES SURGES AHEAD AT SPEEDS MUCH FASTER THAN THE SET CRUISE CONTROL SPEED. I DO NOT TOUCH THE ACCELERATOR PEDAL AT ALL WHEN THIS HAPPENS. HAS HAPPENED 10 - 15 TIMES. THE CAR CURRENTLY HAS ABOUT 19,500 MILES. THE TOYOTA DEALER WENT ON A TEST DRIVE WITH ME IN JUNE 2008 BUT THE SURGING DID NOT HAPPEN ON THE TEST DRIVE. I MENTIONED IT TO THE DEALER AGAIN BUT SINCE IT WAS NOT HAPPENING AT THE TIME I BROUGHT THE CAR IN FOR SERVICE, I WAS NOT WRITTEN UP. HAS ONLY HAPPENED WHEN I USE CRUISE CONTROL TO RESUME SPEED. ALL INSTANCES HAVE BEEN IN HIGHWAY DRIVING AT HIGHWAY SPEEDS. IT SEEMS ELECTRONIC TO ME. OCCURENCE IS ERRATIC.

**NHTSA Summary:**

MARCH 24, 2010 530 E. AMBER PLACE SAN ANTONIO, TX 78221 NATIONAL TRANSPORTATION HIGHWAY SAFETY ADMINISTRATION WASHINGTON, DC RE: TOYOTA ACCELERATION COMPLAINT TO WHOM IT MAY CONCERN: THIS COMPLAINT INVOLVES MY WIFE'S 2006 TOYOTA CAMRY LE VEHICLE. THE COMPLAINT IS ABOUT A SAFETY ISSUE. THE VEHICLE'S ENGINE WILL REV UP AND LURCH FORWARD WHILE AT A DEAD STOP. THIS IS AN ONGOING PROBLEM WITH THIS VEHICLE. WHEN I DRIVE HER VEHICLE AND AM AT A DEAD STOP ON LEVEL GROUND THE VEHICLE WILL ENGINE WILL ACCELERATE AND INADVERTENTLY MOVE FORWARD. AT TIMES IT EVEN APPEARS AS IF THERE IS ANOTHER VEHICLE RIGHT BEHIND THAT IS PUSHING OUR AUTOMOBILE. THE VEHICLE'S TIMING AND AIR AND FUEL CARBURIZATION SETTING ARE CORRECT AND HAVE NOT BEEN CHANGED. THIS PROBLEM IS ALSO APPARENT WHEN DRIVING AT LOW SPEED I.E. LESS THAN THIRTY MILES PER HOUR. THIS PROBLEM HAS ALWAYS BEEN PRESENT WITH THIS VEHICLE. IN ADDITION, MY WIFE WAS AT A DEAD STOP AT AN INTERSECTION WITH A TRAFFIC STOP SIGN. SHE WAS WAITING TO MAKE A RIGHT HAND TURN AND ENTER INTO A MAIN THOROUGHFARE. WHILE STOPPED A BICYCLIST BEGAN CROSSING THE STREET FROM LEFT TO RIGHT. HE WAS RIDING UPON HIS BIKE AND AT APPROXIMATELY THE TIME HE WAS IN FRONT OF MY WIFE'S VEHICLE IT LURCHED FORWARD AND KNOCKED HIM DOWN. THIS INCIDENT TRAUMATIZED MY WIFE. SHE IMMEDIATELY TURNED THE VEHICLE OFF AND WENT TO ATTEND TO THE FALLEN BICYCLIST. HE PICKED UP HIS BIKE AND WALKED IT OFF THE STREET ONTO THE RIGHT SIDE OF THE STREET SIDEWALK. AT THIS TIME MY WIFE REENTERED HER VEHICLE AND BACKED THE VEHICLE FAR ENOUGH SO IT WOULD NOT OBSTRUCT THE STOP TRAFFIC SIGN AND AGAIN EXITED THE VEHICLE. SHE ASKED THE TOYOTA BICYCLIST IF HE WAS INJURED, DID HE NEED AN AMBULANCE, AND ALSO THAT SHE WAS GOING TO CONTACT THE SAN ANTONIO POLICE DEPARTMENT TO MAKE A REPORT OF THE INCIDENT. MY WIFE HAD HER MOBILE TELEPHONE OUT AND WAS READY TO MAKE THE NECESSARY CALLS THAT ACCOMPANY A TRAFFIC ACCIDENT. THE BICYCLIST

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TL\*THE CONTACT OWNS A 2008 TOYOTA CAMRY. WHILE DRIVING 60 MPH TO PASS ANOTHER VEHICLE, THE CONTACT'S VEHICLE SURGED TO 80 MPH. SHE DEPRESSED THE BRAKE PEDAL, BUT THE VEHICLE WOULD ONLY DECELERATE TO 60 MPH. SHE ATTEMPTED TO SHIFT THE VEHICLE INTO NEUTRAL, WHICH ALSO DID NOT HELP SLOW THE VEHICLE DOWN. SHE THEN ATTEMPTED TO SHIFT INTO SECOND GEAR, BUT THIS FAILED AS WELL. WHENEVER SHE RELEASED THE BRAKE PEDAL, THE VEHICLE WOULD SURGE BACK TO 80 MPH. SHE PULLED OVER AND ACTIVATED THE HAZARD LIGHTS WHILE ATTEMPTING TO MANEUVER THROUGH OTHER GEARS. SHE PLACED BOTH FEET ON THE BRAKE PEDAL, WHICH SLOWED THE VEHICLE DOWN TO 40 MPH, BUT DID NOT STOP THE VEHICLE. THE CONTACT DROVE AROUND THE CORNER TO ANOTHER HIGHWAY AND ATTEMPTED SOME SHIFTING MANEUVERS, BUT THE FAILURE PERSISTED. SHE CALLED 911 FOR ASSISTANCE AND THEY INSTRUCTED HER TO SHIFT THE VEHICLE INTO PARK AND TURN OFF THE IGNITION, WHICH ABRUPTLY STOPPED THE VEHICLE. SMOKE THEN FLOWED INTO THE VEHICLE. THE CONTACT EXITED THE VEHICLE AND NOTICED THAT ALL FOUR TIRES WERE SMOKING. SHE WAITED FOR 911, WHO INFORMED HER THAT THE VEHICLE WAS NOT SAFE TO DRIVE. A POLICE REPORT WAS FILED. THE HUBCAPS ON THE VEHICLE WERE HOT. SOMEONE IN THE SERVICE DEPARTMENT AT THE DEALER SUGGESTED THAT SHE MUST HAVE HAD THE FLOORMATS UNDER THE ACCELERATOR PEDAL. THE CONTACT INSPECTED THE VEHICLE AND STATED THAT THE MATS WERE NOT UNDER THE PEDAL. THE VEHICLE WAS TOWED TO THE DEALER AND THEY CHECKED THE MOTOR. THEY INFORMED THE CONTACT THAT NOTHING WAS WRONG WITH THE VEHICLE, AND INSISTED THAT THE FAILURE WAS CAUSED BY THE MATS. THE CURRENT AND FAILURE MILEAGES WERE APPROXIMATELY 6,300.

**Date of Incident:** 20080521  
**Vehicle:** 2006 TOYOTA SIENNA  
**Location of Incident:** PASADENA, MD

**NHTSA Summary:**  
 WE HAVE A TOYOTA 2006 THAT WILL INCREASE SURGES IN ENGINE SPEED WHEN STOOPEED WHICH HAS ALL MOST CAUSED THREE ACCIDENTS ONE GOING INTO A BUILDING, ALSO THE VEHICLE HESITATES WHEN THE ACCELERATOR IS PRESSED ON START. WHEN SITTING IN TRAFFIC YOU HAVE TO HOLD YOUR FOOT ON THE BRAKE BECAUSE YOU WILL GET AN ENGINE SURGE WHICH RUNS THE RPM'S UP TO 5,000 THEN IT DROPS OFF. IT IS VERY DANGEROUSLY BECAUSE YOU DON'T KNOW WHEN IT WILL HAPPEN AND CONTROLLING THE VAN IS VERY UPREDICTABLE.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I WAS WAITING IN LINE OF TRAFFIC TO PICK UP MY DAUGHTER AT SCHOOL. CAR WAS IN DRIVE, MY FOOT WAS FIRMLY ON THE BRAKE PEDAL. WHEN THE ENGINE SUDDENLY RACED AND THE CAR LURCHED FORWARD ABOUT 10 FEET. I STOMPED HARDER ON THE BRAKES AND THE CAR DID STOP, BUT AT NO TIME HAD MY FOOT EVER LEFT THE BRAKE PEDAL, AND WAS NOT EVEN REMOTELY TOUCHING THE GAS. AT FIRST I THOUGHT THE CAR HAD BEEN HIT FROM BEHIND, BUT WHEN THE INCIDENT WAS OVER, I REALIZED THAT WAS NOT THE CASE. MY WIFE OBSERVED THE INCIDENT FROM THE PASSENGER SEAT AND CONCURS THAT MY FOOT WAS ON THE BRAKE THE WHOLE TIME. SHE LATER CHECKED TO MAKE SURE THAT THE MAT HAD NOT SHIFTED TO PRESS ON THE GAS, BUT CONFIRMED THAT NOTHING WAS IN CONTACT, OR EVEN NEAR THE GAS PEDAL. MY WIFE TOOK THE CAR TO THE DEALER THE SAME DAY TO CHECK THE COMPUTER CODES, BUT NOTHING WAS RECORDED IN THE HISTORY. DEALER WAS UNABLE TO OBSERVE THE PHENOMENON. THE CHECK ENGINE LIGHT DID NOT COME ON. I PURCHASED THE CAR NEW IN OCTOBER 2007. MILEAGE AT THE TIME OF THE INCIDENT WAS 19,912. \*TR

**Location of Incident:** SUTTON, MA

**NHTSA Summary:**  
 REPORTED: 27-MAY-2008 (INCIDENCE MEMORIAL DAY WEEKEND 25 MAY 2008) PROBLEM: RUNAWAY ACCELERATION; EVIDENCE OF MALFUNCTIONING CRUISE CONTROL. CAR WAS NEARING END OF 200 MILE TRIP. CRUISE CONTROL HAD BEEN ENGAGED ON AND OFF FOR LAST HOUR. DRIVER STOPPED AT ENTRANCE ONTO OLD-DESIGNED FAST-MOVING HIGHWAY (RTE4) WITH OLD-FASHIONED SHORT ACCESS AND NO BREAKDOWN LANES. CRUISE CONTROL GREEN LIGHT ON, BUT SYSTEM SUPPOSEDLY DISENGAGED. CAR BEGAN TO EXHIBIT STRONG ENGINE NOISE AND RUNAWAY ACCELERATION. DRIVER SHUT OFF CRUISE CONTROL, PASSENGER OBSERVED THE LIGHT GO OFF AND THEN BACK ON SEVERAL TIMES. DRIVER FIRMLY STEPPED ON BRAKES. THE BRAKES SMOKED AND SMELLED OF BURNING. WHEN CAR SLOWED DOWN, DRIVER PULLED TO SMALL INDENTATION AT SIDE AND PRESSED IGNITION BUTTON FOR SEVERAL SECONDS. CAR STOPPED WITH JOLT. DRIVER STARTED CAR IN PARK. ENGINE MADE SAME LOUD BLOW-OUT SOUND. RE-SHUT DOWN CAR. DRIVER RESTARTED CAR TO MOVE TO EXIT ABOUT 50 YDS AHEAD. CAR BEGAN RUN-AWAY ACCELERATION AGAIN. DRIVER REPEATED STEPS PUSHING HARD ON BRAKES (SMELL AND SMOKE) AND SHUTTING CAR OFF BY PRESSING IGNITION BUTTON. OFF-DUTY POLICE (CHIEF OF FORCE) SMELLED BRAKES AND SAID LOUD ENGINE NOISE MADE CAR A HAZARD; TOW DRIVER WOULD ALSO TESTIFY TO LOUD ENGINE NOISE WHEN CAR TURNED ON AGAIN TO BE PLACED ON HIS TRUCK. BECAUSE SPILL OF ICE-COFFEE DURING INCIDENT, MATS WERE INSPECTED BY BOTH DRIVER AND PASSENGER BEFORE CAR WAS TOWED. BOTH NOTED THAT MATS WERE

C-1132

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

INTACT AND IN THEIR PROPER PLACE. DRIVER NOTED CLIPS WERE IN PLACE. (THE CAR WAS IN COMPLIANCE WITH LEXUS RECALL OF MATS HAVING BEEN SERVICED TWO MONTHS PRIOR TO INCIDENT.) IMPROPER MATS ARE STILL LEXUS: STATED CAUSE; HOWEVER, DRIVER AND PASSENGER SAY THIS IS NOT CASE. CRUISE CONTROL MALFUNCTIONING SEEMS LIKELY CAUSE OF RUNAWAY-ACCELERATION. WHILE OUR DEALER IS RESPONSIVE, NATIONAL LEXUS HAS BEEN MOST NEGLECTFUL; AGENT DOES NOT RETURN CALLS; AND THIS IS ALMOST THREE WEEKS AFTER INCIDENT.; IT WASN'T THE MATS!!!! RUNAWAY ACCELERATION IN OUR LEXUS ES 350. DATE OF INCIDENT WAS 05/25/08, MEMORIAL DAY WEEKEND. MY HUSBAND WAS DRIVING AND I WAS IN THE PASSENGER SEAT. WE BOTH SURMISED THAT THE CRUISE CONTROL HAD APPARENTLY TAKEN OVER THE ENGINE AND CAUSED THE ACCELERATION. (MY CRUISE CONTROL HAD ALWAYS BEEN A FLUKE, ONE WEEK PRIOR I HAD EXPERIENCED AND DISMISSED A BRIEF EPISODE WITH MY CRUISE CONTROL.) ONLY GOOD BRAKES AND MY HUSBAND'S SKILL SAVED US FROM A HORRIFIC OUTCOME. I REPORTED THE INCIDENT ON THIS SITE 3/27/08. THE VEHICLE WAS TOWED TO ENGLEWOOD (NJ) LEXUS. YESTERDAY, THE SERVICE MANAGER THERE GAVE CONTRADICTIONARY EVIDENCE THAT IT WAS THE MATS. SINCE A LARGE ICE-COFFEE SPILLED DURING THE INCIDENT, MY HUSBAND AND I EXAMINED THE MATS TO MOP UP THE SPILL BEFORE THE CAR WAS TOWED AWAY AND SAW THAT THE MATS WERE IN THEIR CORRECT POSITION. IN NO WAY WERE THEY STUFFED UNDER THE BRAKES AND LODGED ON THE ACCELERATOR AS HE STATED AT FIRST. IT IS UNCONSCIONABLE TO ME THAT AN EXTENSIVE EXAMINATION OF THE CRUISE CONTROL MECHANISM HAS NOT PERFORMED. INSKIP LEXUS (RI), WHERE WE BOUGHT THE CAR, HAS AGREED TO HAVE CAR TOWED AND WILL EXAMINE PROBLEM. I AM TERRIFIED TO DRIVE THE CAR AGAIN UNLESS THE PROBLEM IS RESOLVED. THE PROBLEM OF RUNAWAY ACCELERATION HAS BEEN REPORTED IN NUMEROUS CASES ON THIS SITE AND OTHER CONSUMER SITES ABOUT TOYOTA/LEXUS. MANY OWNERS DO NOT AGREE WITH DIAGNOSIS OF MATS BEING THE CULPRIT. ???QUESTION: IS TOYOTA/LEXUS THE NEW AUDI???? \*TR

C-1133

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TL\*THE CONTACT OWNS A 2008 TOYOTA TACOMA. ON MAY 28, 2008, WHILE PULLING INTO A PARKING SPACE AT 2 MPH, THE CONTACT DEPRESSED THE BRAKE PEDAL, BUT THE VEHICLE CONTINUED TO ACCELERATE UP AN EMBANKMENT. THE VEHICLE CAME TO A COMPLETE STOP AFTER SEVEN FEET. THE VEHICLE HAS BEEN WITH THE DEALER SINCE MAY OF 2008, BUT THEY HAVE BEEN UNABLE TO DUPLICATE THE FAILURE. AS A RESULT, THEY WILL NOT REPLACE ANY PARTS. THE MANUFACTURER STATED THAT THEY WILL SEND AN ENGINEER TO THE DEALER IN APPROXIMATELY ONE MONTH TO DIAGNOSE THE FAILURE. IN THE INTERIM, THE CONTACT MUST EITHER PAY FOR THE RENTAL VEHICLE THE DEALER HAS PROVIDED OR DRIVE HIS OWN VEHICLE. HE STATED THAT HE WILL NOT DRIVE HIS VEHICLE BECAUSE HE MAY NOT BE AS LUCKY WHEN THE NEXT FAILURE OCCURS. THE CURRENT AND FAILURE MILEAGES WERE 500.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10318165  
**Date of Incident:** 20080529  
**Vehicle:** 2009 TOYOTA COROLLA  
**Location of Incident:** CAMPBELL, CA

**NHTSA Summary:**

I PURCHASED A NEW 2009 TOYOTA COROLLA LE FROM SUNNYVALE TOYOTA ON 9 MARCH 2008. THE VIN IS # JTDBL40589J006302. THIS IS THE THIRD NEW TOYOTA COROLLA / GEO PRISM THAT I'VE PURCHASED; ALL SIMILARLY EQUIPPED WITH AUTOMATIC TRANSMISSION AND CRUISE CONTROL. ON MAY 29, 2008, WHILE ATTEMPTING TO PULL INTO A PARKING SPOT, THE 09 COROLLA SUDDENLY AND UNEXPECTEDLY ACCELERATED WHILE I WAS BRAKING IN ORDER TO COME TO A STOP IN A PARKING LOT. THE VEHICLE JUMPED THE "PARKING BERM" AND ALMOST HIT A TREE BEFORE I COULD COME TO A COMPLETE STOP, SLAM THE GEARSHIFT INTO PARK AND TURN THE KEY TO THE OFF POSITION. SEVERE SURGING HAS OCCURRED IN NORMAL IN TURN TRAFFIC, WITH THE CRUISE CONTROL DISENGAGED, THREE OR FOUR TIMES SINCE THE INITIAL INCIDENT OCCURRED. THERE IS NO FOREWARNING OR CONSISTENCY IN THIS PATTERN OF SUDDEN AND UNEXPECTED ACCELERATION. ACCORDING TO THE TOYOTA, THE VIN FALLS OUTSIDE OF THE CURRENT RECALL RANGE AND THEREFORE DOES NOT WARRANT INVESTIGATION INTO THE CAUSE FOR THESE INCIDENTS. I FEEL THAT THIS VEHICLE POSES A SAFETY THREAT TO MYSELF, AS WELL AS OTHER DRIVERS, AND THAT THE CAUSE OF THE SUDDEN ACCELERATION SHOULD BE DIAGNOSED AND REPAIRED PRIOR TO ANYONE BEING INJURED OR WORSE.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10310090  
**Date of Incident:** 20080530  
**Vehicle:** 2006 TOYOTA CAMRY  
**Location of Incident:** MINNEAPOLIS, MN

**NHTSA Summary:**

TL- THE CONTACT OWNS A 2006 TOYOTA CAMRY. WHILE DRIVING UP A HILL AT APPROXIMATELY 5MPH AND MAKING A RIGHT TURN INTO A DRIVE WAY SHE FELT THE VEHICLE RACING AND LEFT THAT IS WAS GOING OVER 80MPH AND WITHIN SECONDS THE VEHICLE WENT AIR BOURNE OVER A RETAINING WALL AND INTO A YARD AND THE TIRES BLEW WHEN THE VEHICLE LANDED ON THE GROUND THE VEHICLE CONTINUED TO RACE UNTIL SHE TURNED THE ENGINE OFF. SHE RECEIVED INJURIES TO THE RIGHT KNEE AND ANKLE, CUTS AND BRUISES. THE INSURANCE COMPANY INVESTIGATED AND CONCLUDED THAT THE FLOOR MAT WAS THE CAUSE OF FAILURE BECAUSE IT WAS NOT HOOKED TO THE FLOOR. THE WAS NOT TOTAL BY THE INSURANCE COMPANY, BUT SHE

C-1134

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

SOLD THE VEHICLE TO THE SALVAGE YARD. SHE CONTACTED TOYOTA. TOYOTA CONCLUDED THAT HER VIN WAS NOT INCLUDED IN THE RECALL, THEREFORE THEY WILL NOT ASSIST WITH THE COST OF DAMAGE. THE CURRENT AND THE FAILURE MILEAGE WERE 19,773. LI

**Additional Summary:**

I had a motor vehicle accident on May 30, 2008 in the city of Minneapolis when my 2006 Toyota Camry suddenly surged and took off on me when I was barely pressing the gas pedal in a driveway. I had no time to react and went airborne off a retaining wall landing in a friends yard totaling my vehicle and causing injury to myself.

My own insurance company investigation indicated they could find no data to indicate there were problems with the Camry that would cause this sudden acceleration and decided it was the floor mat that even though was not jamming the pedal at inspection, it was not hooked(unknown to me)and therefore was my responsibility. They applied my deductible and a three year surcharge. I have fought this over the last year and half to no avail.

I made a claim directly to Toyota after the floor mat recall for these out of pocket expenses and was denied because my vehicle year did not fall in the recall and because they were unable to inspect it at the time. When I emailed for a manager's name, I was emailed back "You will not receive an email from my manager or anyone else in the company".

I feel that I have fallen through the cracks with this incident and feel Toyota is responsible and my own Insurance Company has dropped the ball. Incidentally, I am a 40 year accident free customer with my company and a 15 year Toyota customer purchasing a new vehicle every three years and servicing exclusively at Toyota and to add more insult to this, I replaced the 2006 with a 2009 Camry listed in both recalls.

**NHTSA ODI Number:** 10303258  
**Date of Incident:** 20080530  
**Vehicle:** 2002 TOYOTA HIGHLANDER  
**Location of Incident:** CHANDLER, AZ

**NHTSA Summary:**

I BOUGHT A 2002 TOYOTA HIGHLANDER LIMITED IN MAY 2008. THE CAR HAD JUST UNDER 60,000 MILES ON THE ODOMETER. THIS CAR IS MY SECOND CAR, MAINLY TO BE USED TO TOW MY HORSE TRAILER. WITHIN A MONTH OF OWNING THE CAR IT SHOWED THE SUDDEN UNEXPECTED ACCELERATION. THIS WAS NOT UNFAMILIAR TO ME BECAUSE I ALSO OWN A 2002 TOYOTA CAMRY. I HAVE OWNED THE HIGHLANDER NOW FOR 1 AND 3/4 YEAR AND THE CAR HAS SHOWED THE DESCRIBED BEHAVIOR OFF AND ON. IT HAPPENS MOSTLY ON THE FREEWAY AND MOSTLY WHEN I AM NOT TOWING. IT DOES NOT HAVE ANYTHING TO DO WITH FLOORMATS OR STICKY GASPEDALS. SINCE THE SAME BEHAVIOR HAPPENS IN BOTH TOYOTA'S I OWN, IT IS TIME THAT TOYOTA STARTS LOOKING AT SOMETHING ELSE THAN THE SILLY EXPLANATIONS OF FLOORMATS AND STICKY GASPEDALS. IT IS THE ENGINE WHICH RUNS AWAY, LEAVING THE DRIVER NO CONTROL OVER THE SPEED. I HAD NOT EXPECT THIS FROM TOYOTA. I BOUGHT TOYOTAS BECAUSE OF THEIR RELIABILITY AND BECAUSE I TRUSTED THE COMPANY (AS OPPOSED TO FORD, WHICH I ALSO OWNED AND EXPERIENCED A PROBLEM WHICH TURNED OUT THE COMPANY KNEW A LONG TIME ABOUT AND DID NOT DO ANYTHING ABOUT). I GUESS TOYOTA IS NOT DIFFERENT. ALSO, IT IS TIME THAT THE RECALL GOES FURTHER BACK THEN THE 3-4 YEARS. I EVEN HAVE A COPY OF A PROFESSIONAL CAR REVIEW OF THE CAMRY WHO EXPERIENCED THE PROBLEM IN 2002. \*TR

**Vehicle:** 2006 TOYOTA PRIUS  
**Location of Incident:** , OK

**NHTSA Summary:**

**Additional Summary:**

PER NEWS ARTICLE - VUJASINOVIC & BECKCOM LAW FIRM HAS FILED A PRODUCT LIABILITY LAWSUIT IN HOUSTON, TEXAS ON BEHALF OF AN OKLAHOMA SPECIAL EDUCATION TEACHER WHO SUFFERED A BRAIN INJURY WHEN HER 2006 TOYOTA PRIUS RAN OFF A CURVING ROAD AND CRASHED INTO AN ELECTRICAL BOX IN BRIGGS,OKLAHOMA.

ACCORDING TO THE LAWSUIT, ON MAY 31, 2008, MS. BISHOP WAS ON HER WAY TO SCHOOL TO TEACH WHEN HER PRIUS ACCELERATED UNCONTROLLABLY AND CRASHED.

ACCORDING TO MR. VUJASINOVIC, TOYOTA SENT MS. BISHOP A LETTER AFTER THE CRASH INDICATING HER CAR WAS ON A RECALL DUE TO A DEFECT THAT COULD CAUSE UNINTENDED ACCELERATION. "THIS APPEARS TO BE YET ANOTHER CRASH THAT WOULD HAVE BEEN PREVENTED IF TOYOTA HAD ACTED SOONER IN RECALLING ITS CARS FOR ACCELERATION CONTROL PROBLEMS."

**Location of Incident:** COLUMBUS, GA

**NHTSA Summary:**

HAVE NOTED INTERMITTANT INSTANCES OF SURGING ACCELERATION FROM A STOP, AND AT HIGHWAY SPEEDS UNDER LOAD. OCCURS 5-10 TIMES A WEEK. STARTED AT ABOUT 8K MILES. DEALER "SAYS" UNABLE TO DUPLICATE. FREQUENCY INCREASING AS MILEAGE INCREASES. RECEIVED RECALL NOTICE IN MAIL LAST WEEK. WENT OVER 36,000 MILES TWO WEEKS AGO. RECALL PLUS SURGING MAKES ONE QUESTION SAFETY OF TUNDRA.

**Vehicle:** 2007 TOYOTA AVALON  
**Location of Incident:** WEST HILLS, CA

**NHTSA Summary:**

1) WHILE DRIVING APPROX 30 MPH EXPERIENCED UNINTENDED ACCELERATION. I WAS ABLE TO TAKE CONTROL AND STOP VEHICLE 2) UPON ENTERING HIGHWAY FELT LIKE CAR SHUT OFF, THEN ACCELERATED BY ITSELF. SERVICE ADVISOR TRIED TO TELL US IT HAPPENED BECAUSE THERE ARE TWO DIFFERENT DRIVERS USING THE CAR. FINALLY A TECHNICIAN CAME IN AND TOLD THE SERVICE ADVISOR THAT THERE WAS A SERVICE BULLETIN TO CORRECT SUCH PROBLEMS. THE CORRECTION WAS "PERFORMED ECM RECALIBRATION TO IMPROVE SHIFTING". I DIDN'T KNOW TO REPORT IT AT THE TIME, BUT I THINK OUR PROBLEM SHOULD BE COUNTED. THE DEALER DOWNPLAYED OUR COMPLAINT SAYING IT WAS HOW WE WERE DRIVING THE CAR, AND THAT THE CAR COULDN'T TELL WHICH OF US WAS DRIVING. THAT IS THE MOST RIDICULOUS THING I HAVE HEARD. TO DATE, WE STILL HAVE NOT RECEIVED A RECALL NOTICE ON THE GAS PEDAL. WE DID RECEIVE ONE ON THE MATS WHICH WE CHECKED AND WERE OKAY.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10320214  
**Date of Incident:** 20080601  
**Vehicle:** 2006 LEXUS GS430  
**Location of Incident:** ORO VALLEY, AZ

**NHTSA Summary:**

I REPORTED THREE SEPARATE INSTANCES OF MY 2006 LEXUS GS430 ACCELERATING ON ITS OWN AFTER I ACCELERATED TO ENTER A FREEWAY AND THEN REDUCED ACCELERATOR PRESSURE TO MAINTAIN A SPEED WITH TRAFFIC. ALL THREE OCCURRENCES WERE EARLY IN THE MORNING WHILE TRAVELING TO THE TUCSON AIRPORT. I REPORTED ALL THREE OCCURRENCES TO THE TUCSON AZ LEXUS DEALER. THEY KEPT THE CAR TO DRIVE AND STATED THAT THEY COULD FIND NO PROBLEM AND HAD HEARD NO OTHER COMPLAINTS OF RUN AWAY ACCELERATION IN ANY LEXUS VEHICLES. THIS WAS APPROXIMATELY 18 MONTHS AGO, AS I SEVERELY LIMITED MY DRIVING OF THE VEHICLE DURING THE FINAL YEAR OF MY LEASE DO TO THE FEAR OF THE ACCELERATION PROBLEM AND TURNED THE CAR IN WITH AN UNUSED 12,000 MILES ON THE LEASE. THE VEHICLE HAD OTHER ELECTRICAL ISSUES AS WELL AND KEPT BURNING OUT THE SERIUS/XM RECEIVER AND WOULD OFTER FLASH THE DASH LIGHTS.

**Vehicle:** 2007 TOYOTA AVALON  
**Location of Incident:** FREDERICK, MD

**NHTSA Summary:**

2007 TOYOTA AVALON PROBLEMS WITH CRUISE CONTROL. CONSUMER STATES THAT WHEN USING THE CRUISE CONTROL WHEN THE ROAD CONDITION CHANGES AND HE PUTS THE CRUISE CONTROL BACK ON IT WILL JUMP AND THE RPM'S WILL JUMP FROM 2100 TO 4800. \*KB THE CONSUMER STATED THE CRUISE CONTROL WORKED WELL UNTIL THE ROAD CONDITIONS CHANGED. IF THE ROAD CONDITIONS CHANGED THE CONSUMER HAD TO TOUCH THE BRAKE AND TAKE THE VEHICLE OFF CRUISE CONTROL TEMPORARLY. WHEN THE ROAD CONDITIONS CHANGED AGAIN, AND THE SPEED WAS NO MORE THAN 6-7 MPH BELOW THE SPEED SET ON THE CRUISE CONTROL THE TACHOMETER READING WAS 2,100 THE CONSUMER RESTORED THE CRUISE CONTROL TO THE SETTING BEING USED. THE VEHICLE SUDDENLY JOLTED AHEAD AS IF THE CONSUMER PRESSED THE

C-1137

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ACCELERATOR TO THE FLOOR. THE TACHOMETER SUDDENLY JUMPED FROM 2,100 TO 4,800 RPM TO RAISE THE VEHICLE SPEED 6 OR 7 MPH. THE DEALER INFORMED THE CONSUMER IT WAS A NORMAL OPERATION OF THE VEHICLE. \*JB

**NHTSA ODI Number:** 10312203  
**Date of Incident:** 20080602  
**Vehicle:** 2008 TOYOTA PRIUS  
**Location of Incident:** PORT CHARLOTTE, FL

**NHTSA Summary:**

ON JUNE 2, 2008 MY WIFE BROUGHT HER NEW PRIUS INTO THE GARAGE TO PARK IT AND SUDDENLY IT JUST ACCELERATED AND WENT THROUGH THE GARAGE DOOR AND WALL. DAMAGES TO THE CAR, HOUSE, AND INSURANCE INCREASES TOTALED CLOSE TO \$10,000. TOYOTA REPAIRED THE PRIUS AND WE TOLD THEM VERBALLY HOW THE VEHICLE SUDDENLY ACCELERATED AND THEY SHRUGGED IT OFF. WE HAD BEEN SENT AT ONE TIME A LETTER THAT SAID WE MAY IN THE FUTURE RECEIVE A RECALL NOTICE BUT NEVER DID. THEREFORE WE WOULD HOPE TOYOTA TAKES CARE OF THESE ISSUES SO WE DON'T NEED TO TAKE FURTHER ACTION SEEING IT WAS A MANUFACTURING DEFAULT. WE SENT TOYOTA TWO COMPLAINTS ALREADY AND NOT EVEN ONE WAS ACKNOWLEDGED AND BEING A FAITHFUL BUYER OF TOYOTA'S, WITHOUT ACTION ON THIS ISSUE WE MAY BE FORCED TO PURCHASE OTHER MAKE VEHICLES AND WE WILL REFUSE TO FURTHER PROMOTE TOYOTA UNLESS THE ISSUES ARE REMEDIED TO INCLUDE THE HOME DAMAGE AND OUR INSURANCE SURCHARGE. YOUR ASSISTANCE IN THIS ACCELERATION MANUFACTURING ISSUE WHICH HAS COST US ALMOST \$10,000 IS UNCALLED FOR AND TOYOTA SHOULD HAVE BEGUN THE PROCESS OF RECALLS QUITE SOME TIME AGO. THANKING YOU IN ADVANCE FOR ANY ASSISTANCE YOU MAY BE ABLE TO GET FOR US SO WE DON'T HAVE TO SEEK FURTHER ASSISTANCE TO GET THESE ISSUES TAKEN CARE OF AND MY WIFE SUFFERING WITH THE CONCERN THAT THIS ISSUE COULD HAPPEN AGAIN. I HAVE ADVISED HER THAT IN SUCH SITUATION IF IT WERE TO OCCUR SHE IS TO SHUT THE VEHICLE OFF IMMEDIATELY AS WELL AS PUT IT IN NEUTRAL AND PUT ON THE EMERGENCY BREAK. UNFORTUNATELY OUR LONG STANDING MARRIAGE WITH TOYOTA MAY BE OVER WITH UNLESS WE ARE ASSISTED.

**Date of Incident:** 20080610  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** FISHERS, IN

**NHTSA Summary:**

ON JUNE 10, 2008 ABOUT 11:00PM, I WAS ON MY WAY FROM INDIANAPOLIS, IN TO COLUMBUS, OH. I WAS USING CRUISE CONTROL AND WENT TO REDUCE MY CRUISE SPEED WITH THE SWITCH ON THE STEERING COLUMN. MY 2007 ES350 IMMEDIATELY BEGAN TO ACCELERATE UNDER FULL POWER. I SWITCHED MY CRUISE CONTROL OFF, BUT IT WOULD NOT DISENGAGE. MY SPEED WAS INCREASING STILL. I HIT MY BRAKES AS HARD AS POSSIBLE, BUT THEY WOULD BARELY KEEP THE CAR AT IT'S SPEED ABOVE 80 AS I WAS DODGING TRAFFIC ON I-70 EASTBOUND. AFTER 2 MILES OF TRYING TO GAIN CONTROL OF THE CAR, FULL BRAKES AND MUCH LESS BRAKE PAD FOR THE EXPERIENCE, I WAS ABLE TO GET THE CAR TO STOP AND THE CRUISE CONTROL DID FINALLY DISENGAGE ONCE THE VEHICLE WAS STOPPED  $\gamma$  BUT NOT BEFORE. ALL MATS WERE LOCKED IN PLACE WITH CLIPS. NO VEHICLE ERRORS TO REPORT. THIS IS A DEADLY SITUATION. I AM 6 $\gamma$ 4 $\gamma$ , 250 LBS AND IT TOOK EVERYTHING I HAD TO STOP THE CAR. HAD THIS BEEN IN A MORE CONGESTED AREA, THE RESULTS COULD HAVE BEEN FAR WORSE. \*TR

**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** MINDEN, NV

**NHTSA Summary:**  
I HAVE A 2006 TOYOTA TACOME. IT HAS UNCOMMANDED ENGINE SURGES. IT IS MOST NOTEABLE AT A STOP. ONCE THE VEHICLE STOPS ENGINE RPM REDUCES TO 500 RPMS AND SECONDS LATER IT SURGES TO 800RPM. I NOTICED THIS WHEN I BOUGHT THE CAR BUT THOUGHT THAT WAS "NORMAL". IN 2008 IT CAUSED ME TO HAVE A MINOR TRAFFICE ACCIDENT AND REALIZED IT WAS NOT NORMAL. AT HIGHER RPMS ABOVE 35 MPH THE VEHICLE FEELS LIKE IT IS IN A HIGH GEAR AS IT QUICKLY REDUCES SPEED WHEN YOU TAKE YOUR FOOT OFF THE PEDAL. AGAIN I THOUGHT THIS NORMAL PRIOR TO THIS CURRENT ROUND OF RECALLS. I WAS AMAZED THE TACOMA'S ARE NOT BEING RECALLED. SOMETHING IS DEFINITELY WRONG WITH THE ENGINE COMPUTER.

**Location of Incident:** NEW ORLEANS, LA

**NHTSA Summary:**  
THE LOUISIANA RECORD REPORTS THAT

"Two New Orleans residents have filed suit against Toyota, saying a stuck accelerator caused them to crash into a store.

Claudia H. Taylor and Shenita Walker filed suit against Toyota Motor North America, Toyota Motor Engineering & Manufacturing North America and Toyota Motor Sales, U.S. A. June 3 in federal court in New Orleans. The two women were inside a Toyota Camry that crashed into the back of a Dollar General Store in New Orleans June 13, 2008.

Taylor says she was driving her 2006 Camry into the parking lot of the Dollar General Store when the accelerator became stuck, causing the car to run into the back facade of the store. Walker was a passenger in the vehicle. Both women say they suffered multiple injuries as a result of the incident and the vehicle was declared a total loss."

**NHTSA Summary:**  
TOYOTA ACCELERATION CAUSED MVA/NO INJURIES  
Rebecca was driving and her mom was the passenger in the car. She has a 2006 ISF 250 Lexus. They were leaving Connecticut and were getting on to I 84 west and the car accelerated by itself and she was putting on the brakes. She tried to turn the car off and put the emergency brake on. They called 911 and they could not get the car into neutral. They were going 40 to 50 miles an hour. They kept bouncing off the guard rail into traffic. She grabbed the gas pedal and ripped it off the car. Neither one of them were hurt. Suzanne called Lexus and they said they had to send out a product investigator. They then told her it was not Lexus fault and apologized. When the recall happened, she called them again and about a month ago the legal department called her and said that they had an engineer check out what happened and they concluded it was their fault. They said they would pay her insurance back and give her deductible back. She wants Lexus to give her the money back for the car. Lexus' attorney is calling her back today to see if she will just settle for them giving the money back to her insurance and paying her deductible.

**NHTSA Summary:**  
TO WHOM IT MAY BE OF SOME INTEREST, JUNE 19, 2008 I HAD A HORRIFIC EXPERIENCE WITH MY SEQUOIA. I OWN A 2007 SEQUOIA AND IT ONLY HAS 4200 MILES ON IT. THIS PAST SUNDAY I WAS STARTING FROM TRAFFIC WHEN I GENTLY STEPPED ON THE BRAKE PEDAL TO SLOW DOWN IN TRAFFIC WHEN ALL OF A SUDDEN THE SEQ. JUMPED FROM 0 TO 60 OR 70 MPH. IT TOOK ME OFF GUARD, I THEN PRESSED ON THE BREAK AGAIN TRYING TO STOP THE VEHICLE OR AT LEAST SLOW IT DOWN A BIT BUT EVERY TIME I

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TOOK MY FOOT OFF THE BRAKE THE TRUCK JUST WANTED TO TAKE OFF TOTALLY OUT OF CONTROL. IT KEPT DOING THIS FOR ABOUT A GOOD MINUTE. I THOUGHT FOR SURE I WAS GOING TO HIT SOMEONE OR SOMETHING AND INJURE MY KIDS WHO WERE WITH ME AT THE TIME. IT WAS A FRIGHTENING EXPERIENCE. I CALLED FOR A SERVICE APPT. AT TOYOTA OF MANHATTAN WHERE I PURCHASED THE VEHICLE WHICH WAS ON SAID DATE AND IT HAPPENED AGAIN ON THE WAY TO THE DEALERSHIP. I WAS 5MINS FROM THE DEALERSHIP AND THEY COULD SMELL THE BRAKES. I EXPLAINED THE PROBLEM AND THEY MECHANICS INSISTED IT WAS THE RUGS OF COURSE I DISPUTE IT THEY SAID THE RUG PROBABLY GOT CAUGHT ON THE PEDAL. WHEN I SHOWED THEM HOW FAR THE TWO WERE FROM EACHOTHER THEY THEN SAID IT WOULD GET A DIAGNOSTIC CHECK. 4 HOURS LATER I WAS TOLD IT WAS THE "BRAKE BOOSTER". MY PROBLEM WAS NOT THE ACCELERATOR, BUT THE BRAKE ITSELF. HERE I THOUGHT EVERY TIME I STEPPED ON THE BREAK I THOUGHT THE ANTI-LOCKS WERE KICKING IN WHEN IN FACT THE BRAKES WAS TREMBLING, A TOTAL MALFUNCTION. I WAITED SEVERAL DAYS FOR THE PART TO SHIP FROM JAPAN. I WOULD LIKE WARN OTHER SEQUOIA OWNERS OF THE POSSIBILITIES OF THIS HAPPENING TO THEM. THANK YOU, ABOVE IS THE SAME LETTER I SENT TO TOYOTA USA ON JUNE 2008

**Date of Incident:** 20080628  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** LOS ALTOS, CA

**NHTSA Summary:**  
I WAS GETTING ON HWY 101 RAMP ON A SATURDAY MORNING AROUND 10:45 AM WHERE TRAFFIC WAS MODERATE, SUDDENLY FELT THE CAR BEGAN ACCELERATING BY ITSELF SO I EASED UP ON THE ACCELERATOR. CAR CONTINUED TO ACCELERATE UNCONTROLLABLY ON ITS OWN. I THEN STEPPED HARD ON THE BRAKE BUT THE CAR DIDN'T SLOW DOWN. SAW THE CRUISE CONTROL LIGHT WAS ON BY ITSELF, TURNED IT OFF BUT THE CAR WAS STILL ACCELERATING. MEANWHILE, THE VEHICLE ACCELERATED TO 105 MPH. MIRACULOUSLY MANAGED TO MOVE OVER TO THE SHOULDER WITHOUT HITTING ANY CARS BUT THE VEHICLE WAS STILL MOVING AT 100+ MPH. FINALLY MY HUSBAND HAD TO FORCE THE GEAR BOX TO PARK AND I APPLIED THE EMERGENCY PARKING BRAKE BEFORE THE VEHICLE FINALLY STARTED TO SLOW DOWN AND EVENTUALLY STOPPED NEAR EXIT #389. IT WAS A 3.5 MILES JOURNEY AT OVER 100 MPH WITH MANY CLOSE CALLS OF SERIOUS ACCIDENTS. VEHICLE WAS TOWED TO LEXUS DEALERSHIP. DEALER LATER INFORMED US THAT THE SUDDEN ACCELERATION WAS CAUSED BY THE ALL WEATHER FLOOR MAT AND THEIR EXPLANATION ON WHY THE BRAKE DID NOT WORK WAS WHEN THE GAS THROTTLE WAS OPEN, THE HORSEPOWER OF THE CAR WAS SO GREAT THAT THE BRAKE WASN'T ABLE TO STOP IT. WE WERE NOT CONVINCED AND DEMAND TO HAVE LEXUS CORPORATION SEND A MASTER TECHNICIAN OR HAVE AN INDEPENDENT AND QUALIFIED TECHNICIAN FOR A FULL AND COMPLETE DIAGNOSIS. REQUEST WAS REFUSED BY THE DEALERSHIP SERVICE DEPARTMENT MANAGER. BASED ON THEIR COMPUTER DIAGNOSIS, THERE WAS NO ERROR CODE CAME UP AND THEREFORE WE HAVE TO TRUST THEM THAT THE PROGRAM HAS BEEN RESOLVED BY THE REPLACEMENT OF THE FLOOR MAT. OUR RESEARCH FOUND THIS PROBLEM HAS HAPPENED IN A LOT OF DIFFERENT MODELS OF VEHICLES OF TOYOTA AND LEXUS. SUSPICION IS THAT THERE IS SOME OTHER BIGGER SAFETY ISSUES BEHIND AND TOYOTA IS USING THE FLOOR MAT ISSUE AS AN EXCUSE TO COVER UP MORE SERIOUS SAFETY PROBLEM. \*TR

**Vehicle:** 2007 TOYOTA TACOMA  
**Location of Incident:** ERWIN, TN

**NHTSA Summary:**  
I BOUGHT A NEW TOYOTA TACOMA IN 2007. ABOUT A YEAR AGO, I NOTICED THAT THE ACCELERATOR PEDAL WOULD BECOME HARD TO DEPRESS OR WOULD TRAVEL AN INCH OR MORE BEFORE ANY RESULT IN ACCELERATION. I TOOK THE VEHICLE TO THE TOYOTA DEALER WHERE I BOUGHT IT. THEY INFORMED ME THAT THERE WAS NOTHING WRONG WITH THE VEHICLE. SINCE THAT TIME, IT HAPPENS ON A RANDOM BASIS BUT VIRTUALLY EVERY DAY. NO INCIDENTS HAVE OCCURRED. HOWEVER, SOMETIMES, AS A RESULT OF THE ACCELERATOR PEDAL TRAVEL AS IT IS DEPRESSED DOWN, THE ENGINE WILL KICK IN, RESULTING IN A SURGE FORWARD. ADDITIONALLY, WHEN I AM TRAVELING ALONG AND HAVE TO LET UP ON THE ACCELERATOR PEDAL, WHEN I PRESS IT DOWN AGAIN, IT DOES NOT RESPOND UNTIL IT IS PUSHED DOWN ABOUT AN INCH OR SO, MAKING IT DIFFICULT TO MAINTAIN TRAVELING SPEEDS CONSISTENTLY.

**Location of Incident:** WEBSTER, MA

**NHTSA Summary:**

C-1151

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

DRIVING SLOWLY IN A PARKING LOT, LOOKING FOR A PARKING SPACE IN A SHOPPING PLAZA, MY 2004 TOYOTA CAMRY SUDDENLY ACCELERATED RAPIDLY TO A HIGH SPEED FOR NO APPARENT REASON. THE AIR CONDITIONER, WHICH WAS ON LOW, WENT ON FULL BLAST WITHOUT TOUCHING THE AC CONTROLS AND SIMULTANEOUSLY, THE CAR ACCELERATED. IN SPITE OF THE FULL APPLICATION OF MY BRAKES, THE CAR WOULD NOT STOP. I WAS IN SHOCK AND PANIC. I HIT A HANDICAP SIGN THAT FELL OVER AND DAMAGED TWO PARKED CARS. I NEARLY STRUCK A PEDESTRIAN, NOT TO MENTION ALMOST INJURING OR KILLING MYSELF. AFTER TRAVELLING 372 FEET, I ENDED UP CRASHING INTO PALLETS OF FENCE MATERIAL. THE CAR WAS TOWED AND REPAIRED. COST OF ACCIDENT, INCLUDING MEDICAL EXPENSES WAS APPROXIMATELY \$22,000. (THE PEDESTRIAN WAS TAKEN TO HOSPITAL FOR MINOR INJURIES AND I, ALSO, WENT TO HOSPITAL TO BE CHECKED.) SADLY ENOUGH, MY LICENSE TO DRIVE WAS REVOKED AS A RESULT OF THIS ORDEAL.

**Additional Summary:**

On July 3, 2008, I was driving slowly in a parking lot of a shopping plaza in Dudley, MA, looking for a parking space when my 2004 Toyota Camry suddenly accelerated to a high speed for no apparent reason. Strangely, the air conditioner that was already running (it was a hot day) went into full blast and simultaneously, my car accelerated rapidly, to my shock and surprise. Even though I applied my brakes fully, I could not stop the car.

I hit a concrete barrier in the parking lot and the pole sitting on top of it fell over and hit 2 parked cars. I finally ended up crashing into a barrier of fencing material. During this unexpected, sudden acceleration incident, I nearly hit a pedestrian in the parking lot, not to mention almost killing or injuring myself and this person who was in the way of my path.

My car was repaired for the severe damage it incurred from the accident and I, fortunately, did not get hurt or injure the other person terribly. However, this problem happens to be an intermittent one whereby this sudden acceleration apparently could reoccur. I want to make certain this does not happen again and that my car is safe to drive.

To my great disappointment, I have been told for a long time that nothing could be done for my 2004 Camry because that year model was not on the recall list of Toyota Camrys. However, I believe this sudden acceleration that happened with my Camry is another example of Toyota denying responsibility.

**NHTSA ODI Number:** 10326825  
**Date of Incident:** 20080703  
**Vehicle:** 2007 LEXUS IS250  
**Location of Incident:** BOSTON, MA

**NHTSA Summary:**

I WAS DRIVING TO THE GYM AT 5:30 AM ON JULY 3, 2008 IN MY LEXUS IS 250. I PRESSED ON THE ACCELERATOR AFTER A LIGHT TURNED GREEN AND THE CAR TOOK OFF, SPEEDING FASTER AND FASTER. I TRIED USING THE BRAKES AND THAT DIDN'T HELP. I ENGAGED THE EMERGENCY BRAKE AND THAT DIDN'T WORK. MY CAR CONTINUED TO GO FASTER AND FASTER. I WAS SCARED TO DEATH AND DIDN'T KNOW WHAT ELSE TO DO. THANKFULLY THERE WAS VERY LITTLE TRAFFIC DUE TO THE TIME OF DAY. I PRESSED THE ELECTRONIC IGNITION BUTTON AND THAT DIDN'T WORK. I WAS PREPARING JUMP OUT OF THE CAR THAT WAS NOW SPEEDING AT ABOUT 60MPH OR SO WHEN I THOUGHT TO PUT THE CAR IN PARK. THAT FINALLY STOPPED THE CAR. I JUMPED OUT OF THE CAR AND A PEDESTRIAN LENT ME HIS CELL PHONE TO CALL MY HUSBAND. THE CAR WAS IN THE MIDDLE OF THE STREET "BUCKING" ( THE ENGINE WAS STILL REVING AND THE CAR WAS IN PARK - STILL RUNNING) FOR ABOUT 10 MINUTES UNTIL MY HUSBAND ARRIVED. HE OPENED THE DOOR, CHECKED THE MAT - IT WAS NOT ON THE ACCELERATOR PEDAL. HE TURNED OFF THE CAR AND WE CALLED LEXUS TO HAVE THEM COME TOW THE CAR

C-1152

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TO THE DEALERSHIP. THE DEALERSHIP (LEXUS OF WATERTOWN, MA) CHECKED THE CAR AND TOLD ME THERE WAS NOTHING THE MATTER WITH IT. THAT I WAS THE PROBLEM, THAT THE MAT WAS ON THE ACCELERATOR. THIS WAS NOT TRUE. BOTH MY HUSBAND AND I SAW THE MAT WAS NOT ON THE ACCELERATOR. THEY COMPLETELY DISMISSED THE ENTIRE EVENT. I ALMOST DIED DRIVING THEIR CAR AND THEY BLAMED ME (ALL THE TIME KNOWING ABOUT THE PROBLEM).

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ANOTHER NEW TRUCK WHILE ONE OF THE 1EXPERTS1 DRIVES HIS KIDS AROUND, WAITING FOR MY TRUCK TO CRASH AND KILL SOMEONE. PLEASE, JUST EMAIL ME AND WE CAN MAKE THE EXCHANGE RIGHT AWAY. BEFORE THAT HAPPENS, ALLOW ME TO EXPLAIN WHAT HAS HAPPENED. I JUST MOVED THIS TRUCK OUT FROM SOUTHERN CALIFORNIA WHERE ONCE I REMEMBER THE TRUCK LURCHING FORWARD AS I WAS COMING TO A STOP, ENTERING A DRIVEWAY. NOT REALLY FAMILIAR WITH THE TRUCK THEN, I CHALKED IT UP TO MY DRIVING AND DIDN'T GIVE IT MUCH THOUGHT. LAST MONTH HERE IN LOUISIANA I DROVE MY CRUISE CONTROL ALONG A 10 MILE HIGHWAY KNOWN FOR FAST CARS AND FASTER TICKETS. IT IS HOT HERE IN LOUISIANA. I HAD THE AC ON AND LEFT IT TURNED IT ON WHEN I WENT INTO THE STORE. THE TRUCK WAS TURNED OFF OF COURSE. WHEN I RETURNED FROM SHOPPING AND BACK INTO MY TRUCK, I TURNED ON THE KEY AND THREW THE TRUCK INTO REVERSE. THE PETAL PULLED ITSELF TO THE FLOOR. IT LEFT MY FOOT AND WENT ALL THE WAY FORWARD. I HIT THE BRAKE AND IT WOULD NOT STOP, SO IN MY CONFUSION, I THREW IT INTO DRIVE AND IT LURCHED FORWARD EVEN WITH MY FOOT ON THE BRAKE. THE WHEELS WERE JUMPING AND THE TRUCK WAS INCHING FORWARD. EVERYONE AROUND ME WAS SCRAMBLING AWAY AS IT SOUNDED AS IF I HAD LITTLE TO NO CONTROL OVER THE ROARING ENGINE; YOU KNOW, SENSING SOMETHING WAS WRONG. ALL OF THIS HAPPENED WITHIN SECONDS AND I HAD ALL MY WEIGHT ON THE BRAKE. I FINALLY HAD THE SENSE TO TURN OFF THE ENGINE AND IT STOPPED, THEN I SAT THERE FOR A SECOND TRYING TO FIGURE OUT WHAT I HAD DONE WRONG. I LOOK FOR PART 2 AND 3 TO FOLLOW. \*TR: PART 2: I STARTED UP THE ENGINE. IT ACTED NORMAL, NO ACCELERATION AND IT EASILY BACKED OUT OF THE SPACE. RELIEVED, I DROVE BACK TO MY BOYFRIEND1S HOUSE. I TURNED IT OVER AND OVER IN MY MIND WHAT HAD HAPPENED, TRYING NOT TO MISS A STEP. MY BOYFRIEND IS VERY FAMILIAR WITH THE MECHANICS OF A CAR, SO AS I EXPLAINED WHAT TOOK PLACE TO HIM AND HE SAID OVER AND OVER THAT IT DIDN'T MAKE ANY SENSE. I WAS SURE I HAD NOT MISTAKENLY HIT THE ACCELERATOR AND THE FLOOR MAT WAS CLEARLY UNDER, NOT OVER THE PETAL. I CHALKED IT UP, ONCE AGAIN TO A MYSTERY BECAUSE NEITHER OF US COULD MAKE SENSE OF IT. SEVERAL DAYS AGO, WE DROVE TO DOWNTOWN NEW ORLEANS. I WAS DRIVING AND I HAD THE CRUISE CONTROL AVOIDING THE SPEED TRAP. WE DROVE ABOUT 15 MILES AND PARKED IN A LARGE OUTDOOR PARKING LOT. WE WERE GONE FOR SEVERAL HOURS. WHEN WE GOT BACK TO THE TRUCK, HE DROVE. ABOUT ONE MINUTE OR LESS INTO DRIVE AND WHILE STILL GOING THROUGH THE PAID LOT JUST COMING UP TO RAILROAD TRACKS, HE PUT HIS FOOT ON THE BRAKE AND THE TRUCK ACCELERATED FORWARD, THE PETAL ONCE AGAIN PULLING ITSELF TO THE FLOOR AND THE TRUCK TAKING OFF LIKE A JET. HE HIT THE BRAKE AND I BELIEVE THREW THE TRUCK INTO PARK. I WAS SCARED TO DEATH AND THEN I FELT THAT I HAD BEEN VINDICATED! HE LOOKED AT ME AND SAID, 1w0w1 AND AGAIN I TOLD HIM THAT IT WAS NEARLY THE SAME SCENARIO THAT HAPPENED TO ME. HE SAID, YOU HAVE BETTER CALL TOYOTA. WE HAD ONE PASSENGER WHO LOOKED AS SHOCKED AS MY BOYFRIEND AND WE ALL PONDERED THE POSSIBILITY OF WHAT WOULD HAVE HAPPENED IF A TRAIN HAD BEEN GOING BY AT THAT VERY MINUTE. PART 3 TO FOLLOW. \*TR: PART 3 THIS IS A SERIOUS PROBLEM AND MY NEXT STOP IS TO NOTIFY MY INSURANCE COMPANY AND MY LENDER. I AM WAITING FOR A CASE MANAGER TO CALL ME FROM TOYOTA, BUT IT LOOKS LIKE TOYOTA DOESN'T WANT TO BELIEVE THOSE OF US WHO HAVE HAD THE SAME PROBLEM. IT WAS VERY REAL, PERSONALLY, I BELIEVE IT HAS TO DO WITH THE CRUISE CONTROL OR WHATEVER WOULD MAKE THE ACCELERATOR SUDDENLY PULL ITSELF TO THE FLOOR MAKING THE TRUCK TAKE OFF! I AM NO MECHANIC, BUT I HAVE BEEN A DRIVER FOR 35 YEARS AND THIS HAD NEVER HAPPENED TO ME IN ANY OTHER VEHICLE. MY TRUCK HAS ABOUT 30K MILES ON IT. IT'S BEEN IN AN ACCIDENT, (SOME RAN A RED LIGHT AND THE CAR THEY HIT CRASHED INTO MY PARKED TRUCK), BUT MOST OF THE WORK WAS BODY WORK AND IT WAS RECENTLY MOVED TO A MORE HUMID CLIMATE, RATHER THAN MOSTLY DRY SAN DIEGO. IT'S A 4X4, DOUBLE CAB AND OTHERWISE AND

C-1155

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

WELL RUNNING MACHINE. I LEASED IT FOR THE FIRST 3 YEARS AND JUST PURCHASED IT FROM THE LEASING AGENCY BECAUSE I HAD VERY LOW MILEAGE AND IT WAS IN GREAT SHAPE. NOW I AM CONCERNED THAT NO ONE IS GOING TO TAKE ME SERIOUSLY. MY PLAN BY WEEKS-END IF I DON'T HEAR BACK SOMETHING POSITIVE, IS TO GO TO THE LOCAL AND THEN PERHAPS NATIONAL PRESS. A STORY WAS DONE OUT OF NASHVILLE LAST OCTOBER ABOUT THE SAME PROBLEM OTHER TACOMA OWNERS ARE HAVING. I HAVE CONTACTED THEM WITH QUESTIONS ABOUT THEIR STORY AND ADDITIONAL INFORMATION. MY GUT FEELING IS THAT I NEED TO STAY ONE STEP AHEAD OF TOYOTA AND THE NHTSA. LET THEM BE ON THE DEFENSIVE LIKE I AM DRIVING AROUND IN A DEATH TRAP! I UNDERSTAND THAT A RECALL IS EXPENSIVE. I VALUE MY LIFE HOWEVER FAR BEYOND WHAT TOYOTA COULD LOOSE AND I WILL NOT TAKE A SHRUG OF SOMEONE'S SHOULDERS FOR AN ANSWER, NOT BEFORE I DIE ANYWAY. EITHER BY NATURAL CAUSES OR IN THE TRUCK, PERHAPS WRAPPED AROUND A TREE. SO, HERE IS MY LONG STORY IN DETAIL AND I EXPECT SOMEONE WITH SOME GOOD SENSE WILL CALL ME AND MAKE ME A TRADE, THEIR NICE NEW TRUCK FOR MINE. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10314589  
**Date of Incident:** 20080707  
**Vehicle:** 2002 TOYOTA CAMRY  
**Location of Incident:** SPRINGFIELD, OH

**NHTSA Summary:**  
TL\*THE CONTACT OWNED A 2002 TOYOTA CAMRY LE. WHILE DRIVING 60 MPH THE VEHICLE ACCELERATED, SWERVED TO THE SIDE AND HE ENGAGED THE BRAKE PEDAL. THE CONTACT CRASHED INTO THE MEDIAN AND BECAME UNCONSCIOUS. THE VEHICLE ALSO ROLLED OVER MULTIPLE TIMES. THE CONTACT WAS HOSPITALIZED FOR SEVERAL WEEKS AND SUSTAINED MULTIPLE INJURIES. THE CONTACTS INJURIES HAVE CONFINED HIM TO A WHEELCHAIR FOR SEVERAL MONTHS. THE VEHICLE WAS DESTROYED. THE CONTACT HAS NOT NOTIFIED THE MANUFACTURER. THE INSURANCE COMPANY WAS CONTACTED IMMEDIATELY. A POLICE REPORT WAS FILED. THE CURRENT AND FAILURE MILEAGES WERE 74,000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10310800  
**Date of Incident:** 20080708  
**Vehicle:** 2008 LEXUS RX400H  
**Location of Incident:** LOS ANGELES, CA

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2006 LEXUS RX400H. WHILE DRIVING 40 MPH, THE CONTACT APPLIED THE BRAKES TO SLOW DOWN THE VEHICLE AND IT RAPIDLY ACCELERATED WHICH CAUSED THE CONTACT CRASH INTO A PARKED VEHICLE. THE VEHICLE WAS DESTROYED. ONE OF THE PASSENGERS SUFFERED A FRACTURED A STERNUM AND THE OTHER PASSENGER WAS KNOCKED UNCONSCIOUS AND SUFFERED A BROKEN COLLAR BONE. THE CONTACT SUSTAINED MAJOR BRUISES. THE CONTACT STATED THAT THE ACCELERATOR PEDAL BECAME STUCK AND CAUSED THE CRASH TO OCCUR. THE FAILURE MILEAGE WAS 15,000.

**Date of Incident:** 20080711  
**Vehicle:** 2001 LEXUS ES300  
**Location of Incident:** NUTLEY, NJ

**NHTSA Summary:**  
I HAVE A 2001 LEXUS 300. I HAVE NEVER EVER EVER HAD ISSUES WITH IT-EXCEPT FOR 12-18 MONTHS AGO- MY MAT GOT STUCK, AS I DROVE IT KEEP AT HIGH SPPED AND KEPT GOING FASTER- THE BRAKE PETAL WOULD NOT MOVE AS I PUSHED DOWN. I PIT MY HEAD DOWN AND PULLED AT THE MATT & UNHOOKED THE FRONT HOOK UNDER THE SEAT. I THANK GOD I WAS ABLE TO REMOVE MY MAT- AS OF THAT DAY-I REMOVE DMY MAT & HAVE RUNIED MY CARPET, BUT THAT IS FINE. I AM SURPRISED THIS RECALL IS NOT FOR MY MAKE & MODEL- WHEN I HEARD THE ISSUES WITH THE PEDAL...IT BROUGHT BACK THAT DAY- IF I WAS UNABLE TO FREE THE PEDAL, I DO NOT KNOW WHAT WOULD HAVE HAPPEND- I WOULD NEVER HAD THOUGHT TO HIT THE ER BRAKE OR SHUT CAR DOWN- AND I PUT ALL MY POWER ON THE BRAKE & IT WOULD NOT WORK. ALL IN ALL IT IS AN EXCELLANT CAR!

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2008 TOYOTA SOLARA. THE CONTACT WAS DRIVING APPROXIMATELY 80 MPH WITH THE SPEED CONTROL ACTIVATED. THERE WAS A SUDDEN INCREASE IN ACCELERATION. THE DRIVER WAS ABLE TO MAINTAIN CONTROL OF THE VEHICLE. THERE WAS EXCESSIVE FORCE APPLIED TWICE TO THE BRAKE PEDAL, AND

C-1157

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

DEACTIVATION OF THE SPEED CONTROL. THE VEHICLE BEGAN TO SLOW DOWN. THE VEHICLE WAS TAKEN TO THE DEALER. THE VEHICLE HAS NOT BEEN REPAIRED. THE CONTACT WAS UNABLE TO REACH THE MANUFACTURER TO REPORT THE FAILURES. THE FAILURE MILEAGE WAS 1,000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316600  
**Date of Incident:** 20080711  
**Vehicle:** 1997 TOYOTA CAMRY  
**Location of Incident:** WINSTON-SALEM, NC

**NHTSA Summary:**  
MY 1997 TOYOTA CAMRY EXPERIENCED A SUDDEN ACCELERATION PROBLEM. I AM CONVINCED IT WAS NOT THE PEDAL BECOMING STUCK. I FELT THE PEDAL DEPRESS FROM MY FOOT AND THE CAR BEGAN TO RAPIDLY ACCELERATE. I HIT THE BRAKES, BUT COULD NOT STOP THE CAR FROM ACCELERATING SO I SHIFTED IT TO NEUTRAL AT WHICH POINT THE ENGINE BLEW. SMOKE BEGAN POURING OUT OF THE HOOD BUT THE BRAKES WERE ABLE TO STOP THE CAR AT THIS POINT SO I PULLED OVER AND GOT OUT OF THE CAR. THE CHARLOTTEVILLE/ALBEMARLE FIRE DEPARTMENT WAS CALLED BUT WHEN THEY ARRIVED THE FIRE HAD GONE OUT. THE POLICE DEPARTMENT ALSO ARRIVED ON SCENE, BUT APPARENTLY THEY DID NOT FILE A REPORT BECAUSE THERE WERE NO INJURIES AND THERE WAS NO ACCIDENT. AS I WAS WAITING FOR A TOW TRUCK A DRUNK DRIVER CRASHED ABOUT 50 FEET FROM MY CAR, BUT THAT'S A DIFFERENT MATTER ALTOGETHER.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10243444  
**Date of Incident:** 20080712  
**Vehicle:** 2007 TOYOTA TUNDRA  
**Location of Incident:** RANGELEY, ME

**NHTSA Summary:**  
WHILE DRIVING AT APPROX. 55MPH THE ACCELERATOR PEDAL ON MY 2007 TOYOTA TUNDRA SUDDENLY DROPPED TO THE FLOOR BELOW MY RIGHT FOOT. MY TRUCK ACCELERATED TO FULL THROTTLE. THE CRUISE CONTROL WAS NOT ON. THE ACCELERATOR WAS NOT STUCK TO THE FLOOR MAT. THE TRUCK ACCELERATED AT A RAPID PACE AND NEARLY RAN INTO THE REAR OF THE VEHICLE IN FRONT OF ME ON THE ROADWAY. I ATTEMPTED TO STOP THE VEHICLE BY TAPPING ON THE BRAKES, THEN THE ACCELERATOR AND TURNING THE CRUISE CONTROL BUTTON OFF EVEN THOUGH THE CRUISE WAS ALREADY OFF. NOTHING RESPONDED AND THE TRUCK CONTINUED TO ACCELERATE TO A DANGEROUS SPEED. THE ACCELERATOR WAS "FLOORED" AND WOULD NOT MOVE. I HAD TO MANUEVER AROUND THE VEHICLE IN FRONT OF ME AND SEVERAL THAT PASSED GOING THE OPPOSITE DIRECTION QUICKLY. THE TRUCK WAS GAINING SPEED AT AN INCREDIBLY RAPID PACE. I CONTINUED TO BRAKE THE TRUCK IN AN ATTEMPT TO STOP THE VEHICLE AND PREVENT LOOSING CONTROL. I THEN ATTEMPTED TO DOWN-SHIFT THE TRANSMISSION. THIS CAUSED THE ENGINE TO REV UNCONTROLLABLY. THE SAME HAPPENED WHEN SHIFTED INTO NEUTRAL IN AN ATTEMPT TO TURN THE ENGINE OFF WITH THE KEY. THE RPM'S WERE REVVING SO HIGH THAT I FEARED THE ENGINE WOULD BLOW UP. I PULLED MY TRUCK INTO A BOAT PARKING AREA ON THE ROADSIDE AND SLAMMED ON THE BRAKES WHILE PUTTING THE TRUCK INTO NEUTRAL AND TURNING THE ENGINE KEY TO OFF. THE ENGINE, BRAKES AND TRANSMISSION WERE ALL SMOKING FROM THE STRESS AND HIGH RPM'S. I HAD EXPERIENCED A SIMILAR UNCONTROLLABLE ACCELERATION ABOUT SIX MONTHS PRIOR

C-1158

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

(JAN. 2008) TO THIS ONE BUT WAS ABLE TO RECOVER QUICKLY BY HITTING THE BRAKES AND PRESUMED THAT IT WAS SOMETHING WRONG WITH THE CRUISE CONTROL. TOYOTA REPLACED THE ACCELERATOR PEDAL SENSOR ASSY BUT WOULD NOT SAY WHETHER THIS WAS THE CAUSE OF THE UNCONTROLLABLE ACCELERATION. THEY SAID THAT IT WAS POSSIBLY CAUSED BY THE AFTERMARKET FLOOR MATS THAT I PURCHASED AT THE DEALERSHIP. UNFORTUNATELY, THE PEDAL DROPPED FROM UNDER MY FOOT WITHOUT MY INTERVENTION. TOYOTA HAS NOT RESPONDED TO MY CALLS. \*TR  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10304086  
**Date of Incident:** 20080715  
**Vehicle:** 2008 TOYOTA COROLLA  
**Location of Incident:** MARLBOROUGH, MA

**NHTSA Summary:**  
A RUN AWAY FULL THROTTLE ENGINE IN A 2008 TOYOTA CAROLLA (PURCHASED IN FALL OF 2007). I ACCIDENTALLY BACKED UP INTO A TREE AT 2 TO 3 MPH. THE REAR BUMPER OF THE CAR HIT THE TREE SQUARLY CAUSING NO VISIBLE DAMAGE TO CAR. THE ENGINE OF THE CAR DID NOT DIE OUT AFTER THE IMPACT. UPON SHIFTING FROM REVERSE TO DRIVE -- THE CAR LURCHED FULL SPEED FORWARD (WITH FULL ACCELERATION) DISPITE FULL APPLICATION OF THE FOOT BRAKE AND NO APPLICATION OF THE ACCELERATOR. I QUICLY PLACED THE CAR IN NEUTRAL AND SHUT OFF THE ENGINE TO AVOID RUNNING INTO PEDESTRIANS, BUILDING AND TREES. AFTER INSPECTING THE CAR FOR DAMAGE AND ANY CAREFULLY PLACING THE CAR IN PARK WITH PARKING BRAKE AND FOOT BRAKE ENGAGE I RESTARTED THE ENGINE. THE CAR HAS RUN NORMALLY SINCE THIS INCIDENT WHICH TOOK PLACE JULY OF 2008  
**Additional Summary:**

UNEXPECTED ACCELERATION IT HAS HAPPENED WITH TWO DIFFERENT DRIVERS. ONCE WHEN IN "PARK" AND ONCE WHILE ON THE HIGHWAY. NO DAMAGE OR INJURIES OCCURRED.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316935  
**Date of Incident:** 20080715  
**Vehicle:** 2003 TOYOTA CAMRY SOLARA  
**Location of Incident:** BLACKWOOD, NJ

**NHTSA Summary:**  
IN JULY OF 2007 OR 2008 WHILE ATTEMPTING TO PARK MY 2003 TOYOTA SOLARA IN A KOHL'S LOT THE CAR SUDDENLY ACCELERATED WHILE I HAD MY FOOT ON THE BRAKE. THE ACCELERATION WAS STRONG ENOUGH TO CAUSE MY HEAD TO BE THROWN BACK BUT I DIDN'T HAVE TIME TO CHECK THE ODOMETER FOR THE REGISTERED SPEED. I WAS PULLING INTO A PARKING STALL WITH ONE CAR DIRECTLY IN FRONT OF ME AND A CAR ON EITHER SIDE OF ME. I STOMPED ON THE BRAKE AS HARD AS I COULD AND WAS ABLE TO STOP WITHIN AN INCH OR TWO FROM THE CAR IN FRONT OF ME. THIS WAS PROBABLY THE SCARIEST THING THAT HAS EVER HAPPENED TO ME IN AN AUTOMOBILE. I CHECKED THE NHTSA WEBSITE AND FOUND THAT OTHER OWNERS OF SOLARAS HAD EXPERIENCED SIMILAR OCCURENCES WITH THEIR AUTOS AND HAD BEEN TOLD THAT IT WAS POSSIBLY A PROBLEM WITH THE ELECTRONIC THROTTLE. I FILED A REPORT AND SPOKE WITH A WOMAN FROM NHTSA WHO CALLED ME BUT I WAS NEVER NOTIFIED AGAIN. I BROUGHT MY SOLARA TO THE DEALER WHERE I HAD PURCHASED IT AND WAS TOLD THAT THEY COULD FIND NOTHING WRONG OTHER THAN THE FLOOR MAT WAS PUSHED FORWARD. THIS HAS HAPPENED ON AND OFF WHEN I'VE BEEN BRAKING TO TURN LEFT OR AM SLOWLY COMING TO A STOP AT A TRAFFIC LIGHT OR STOP SIGN AND ALWAYS WHEN I HAVE THE BRAKE PEDAL DEPRESSED. IT FEELS AS IF I'VE HIT AN OIL SLICK IN THE ROAD AND THE ONLY THING I CAN DO IS PRESS VERY HARD ON THE BRAKE TO STOP THE CAR FROM GOING FORWARD. NONE OF THESE INCIDENTS HAS EVER BEEN AS SCARY AS WHEN THE CAR ACCELERATED WHEN I WAS PARKING BUT THEY'VE ALL OCCURRED WHEN I WAS STEPPING ON THE BRAKE.  
**Additional Summary:**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I WAS DRIVING MY 2008 TOYOTA TACOMA HOME FROM WORK. I WAS ABOUT 15 MINUTES FROM HOME WHEN MY TRUCK IMMEDIATELY ACCELERATED TO 70-80 MPH (UNINTENTIONALLY!). I LIVE IN A VERY MOUNTAINOUS REGION; IT WAS VERY HARD TO KEEP MY TRUCK UNDER CONTROL IN THE CURVES. I WAS PUSHING THE BRAKE PEDAL ALL THE WAY IN, BUT IT WASN'T SLOWING MY TRUCK DOWN. I BEGAN GOING DOWN THE MOUNTAIN PRAYING THE WHOLE TIME...THERE IS A TRAFFIC LIGHT WITH 2 GAS STATIONS AT THE INTERSECTION. FORTUNATELY THERE WEREN'T ANY CARS IN FRONT OF ME AND THE LIGHT WAS GREEN. I SHIFTED GEARS (AUTOMATIC TRANSMISSION) DOWN ALL THE WAY TO 2ND. MY TRUCK WASN'T SLOWING. I WAS THINKING THE ENTIRE TIME THAT I WAS GOING TO HIT SOMEONE AND THERE WASN'T ANYTHING THAT I COULD DO ABOUT IT. NOT A GOOD FEELING TO SAY THE LEAST. I FINALLY GOT MY TRUCK STOPPED RIGHT ON THE SIDE OF THE ROAD. A LADY CAME RUNNING OUT FROM A BUILDING THAT WORKS FOR THE ATLANTA JOURNAL CONSTITUTION TO MAKE SURE I WAS OKAY. SHE SAID THAT SHE SAW SMOKE AND THOUGHT THAT MY TRUCK MIGHT BE ON FIRE. I IMMEDIATELY CALLED MY PARENTS. MY DAD STARTED TO DRIVE MY TRUCK. I WAS DRIVING BEHIND MY DAD AND IMMEDIATELY SAW MY DAD TAKE OFF IN MY TRUCK... WITH THE BRAKE LIGHTS ON! I WAS TERRIFIED THAT MY DAD WAS GOING TO WRECK. MY DAD WAS ABLE TO TURN IT OFF AND GET IT OFF THE MAIN ROAD. WE CALLED MILTON MARTIN TOYOTA AND THEY HAD A TOW TRUCK PICK IT UP THE NEXT DAY. THEY KEPT MY TRUCK FOR 5 DAYS AND GAVE ME A RENTAL CAR. THE SERVICE DEPARTMENT SAID THAT THEY PUT 50 MILES ON MY TRUCK AND IT DIDN'T DO ANYTHING OUT OF THE ORDINARY. THEY SAID THAT I NEEDED TO PICK MY TRUCK UP AND RETURN THE RENTAL CAR! THERE IS NO WAY I WOULD DRIVE IT AGAIN OR KNOWINGLY LET SOMEONE ELSE DRIVE IT WHEN IT WILL DO THE SAME THING WHEN YOU LEAST EXPECT IT! WE ARE TALKING ABOUT PEOPLES LIVES HERE. PEOPLE NEED TO KNOW ABOUT THIS ISSUE SO LIVES AREN'T LOST! SO CURRENTLY I AM WITHOUT A VEHICLE AND MY 2008 TACOMA THAT HAS 13, 400 MILES ON IT IS SITTING ON MILTON MARTIN TOYOTA'S LOT. \*TR

**Additional Summary:**

**Location of Incident:** MADISON, SD

C-1161

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**NHTSA Summary:**

I AM A RURAL MAIL CARRIER WITH WELL OVER 350,000 MILES DRIVEN ON MY ROUTE WITHOUT INCIDENT. I DRIVE IN ALL ROAD CONDITIONS ON GRAVEL AND PAVED ROADS. I WAS DRIVING MY 2006 PRIUS ON A WET BUT NOT MUDDY GRAVEL ROAD AT ABOUT 38 MPH. THE BACK END BEGAN TO SLIDE A LITTLE. I LET UP ON THE GAS WITH NO RESPONSE. I PRESSED THE BRAKE PEDAL WITH NO RESPONSE. I WENT INTO A DEEP DITCH FILLED WITH 3 FT TALL GRASS. I STEERED TO DRIVE THE CENTER OF THE DITCH AND CONTINUED WITH THE BRAKE FULLY DEPRESSED FOR ABOUT 15-20 FT, RIPPING THE TALL GRASS OUT BY THE ROOT AS I WENT. THE CAR TRAVELLED OVER A DRIVEWAY APPROACH, STILL AT 35 MPH, STRIKING THE APPROACH WITH THE LEFT FRONT CORNER WITH ENOUGH FORCE TO BEND THE FRAME AND DO OTHER SERIOUS DAMAGE, BUT WITH NO AIRBAG DEPLOYMENT. I CONTINUED OVER THE APPROACH AND DOWN THE DITCH, STILL AT 35 MPH, FOR ANOTHER 30 OR MORE FEET. I WAS PRESSING AND HOLDING THE BRAKE AND LIFTING THE GAS PEDAL WITH MY TOE. THE GAS PEDAL WAS NOT STUCK AND THE ENGINE'S RPM'S WERE LOW. ONLY WHEN I PUT THE CAR IN NEUTRAL DID IT SLOW TO STOP. IT TOOK SEVERAL ATTEMPTS TO GET THE CAR OUT OF THIS DITCH AS THE TRACTION CONTROL KEPT LURCHING AND STALLING. I WAS ABLE TO DRIVE THE CAR OUT AND HOME WITHOUT INCIDENT. IT HAD TO BE TOWED TO A DEALERSHIP FOR OVER \$4000 IN REPAIRS. THIS WAS IN MID-2008 AND I DON'T KNOW IF ANY CORRECTIONS MADE OR WERE EVEN KNOWN AT THAT TIME. THIS WAS AN ABSOLUTELY TERRIFYING SITUATION. THE CAR DID NOT RESPOND TO ANY ACTION I TOOK. I HAD NO CONTROL WHATSOEVER. THE CAR IS NO LONGER DRIVEN.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10235855  
**Date of Incident:** 20080720  
**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** ROCKAWAY, NJ

**NHTSA Summary:**

WIFE TURNED INTO OUR DRIVEWAY WHICH SLOPES DOWN (10 - 20 DEGREES) AS SHE HAS BEEN DOING FOR THE LAST 20+ YEARS WITH HER FOOT ON THE BRAKE. THE PAVEMENT WAS DRY. THE BRAKES FAILED TO STOPPED THE CAR. SHE VEERED LEFT TO AVOID GOING OVER A 20 FOOT EMBANKMENT AT THE END OF OUR DRIVEWAY AND CRASHED INTO A STONE WALL. BASED ON THE ANGLE OF IMPACT THE CAR ROLLED OVER ONTO ITS ROOF. AIR BAGS DID NOT INFLATE. MY WIFE REMAINED SUSPENDED BY THE SEAT BELT UPSIDE DOWN UNTIL EMERGENCY FORCES ARRIVED. SHE SUSTAINED MULTIPLE BRUISES AND CHEST PAINS ATTRIBUTED TO THE SEAT BELT. IF SHE HAD GONE OVER THE EMBANKMENT ONLY GOD KNOWS WHAT THE EXTENT OF HER INJURIES WOULD HAVE BEEN. NEW TIRES HAD BEEN INSTALLED ON THE CAR (FRONT WHEELS) DURING JUNE 2008 AT WHICH TIME THE FRONT BRAKES WERE ALSO CHECKED FOR WEAR BY AN AUTO MECHANIC. THE CAR WAS "TOALED" AS A RESULT OF THE ACCIDENT. SUBSEQUENTLY I CHECKED THE BRAKE FLUID IN THE CAR (AFTER THE ACCIDENT); THE BRAKE CYLINDER WAS FULL. FURTHER, THE TOYOTA CAMRY IS EQUIPPED WITH BRAKE WEAR INDICATORS. NO INDICATION (SOUND) OF EXCESS WEAR WAS GIVEN PRIOR TO THE ACCIDENT. MY WIFE IS ADAMANT SHE HAD HER FOOT ON THE BRAKE PEDAL. I SURMISE TWO THINGS COULD HAVE HAPPENED: 1. THE BRAKES FAILED COMPLETELY AND GRAVITY ACCELERATION DOWN THE DRIVEWAY CONTRIBUTED TO THE CAR'S SPEED AND SUBSEQUENT IMPACT; OR 2. THE CAR SURGED DUE TO A FAILURE OF THE ELECTRONIC THROTTLE CONTROL (ETC) IN WHICH APPLICATION OF THE BRAKES WAS INADEQUATE TO STOPPED THE CAR. BASED ON PRIOR NHTSA COMPLAINTS/ACTIONS (REF NHTSA ACTION NUMBERS PE04021; DP05002; AND DP06003) AND THE SIMILARITY OF CIRCUMSTANCES, I BELIEVE THE ETC FAILED. I RECOMMEND THE NHTSA AND TOYOTA TAKE ACTION TO REMEDY THIS UNSAFE SITUATION. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10242209  
**Date of Incident:** 20080726  
**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** MELVILLE, NY

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2004 TOYOTA SIENNA. WHILE DRIVING LESS THAN 30 MPH IN THE RIGHT LANE, THE VEHICLE SUDDENLY BEGAN VEERING TO THE RIGHT. THE VEHICLE ALMOST CRASHED INTO THE MEDIAN. THE CONTACT STEERED TO THE LEFT AND THE VEHICLE SUDDENLY BEGAN TO ACCELERATE UNEXPECTEDLY. HE ATTEMPTED TO AVOID ONCOMING TRAFFIC, BUT WAS UNABLE TO SLOW THE VEHICLE DOWN OR COME TO A COMPLETE STOP. THE CONTACT PULLED INTO A PARKING LOT AND THE VEHICLE CRASHED INTO A CAR WASH. THE CRASH OCCURRED WHILE THE BRAKE PEDAL WAS DEPRESSED. THE VEHICLE IS CURRENTLY AT A SALVAGE YARD PROVIDED BY THE INSURANCE COMPANY. THE DRIVER SUSTAINED A FRACTURED STERNUM AND THE FRONT PASSENGER NEEDED 12 STITCHES IN HER RIGHT HAND. THE TWO REAR PASSENGERS WERE UNINJURED. A POLICE REPORT WAS FILED. THE CONTACT CONDUCTED ONLINE RESEARCH, BUT FOUND NO RECALLS FOR HIS VEHICLE. HE DID, HOWEVER, FIND AN INVESTIGATION PERTAINING TO THIS FAILURE, BUT IT HAD BEEN CLOSED WITHOUT ANY RECALLS ISSUED. THE CURRENT AND FAILURE MILEAGES WERE 30,000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10313953  
**Date of Incident:** 20080728  
**Vehicle:** 2008 TOYOTA TACOMA  
**Location of Incident:** NICEVILLE, FL

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2008 TOYOTA TACOMA. WHILE DRIVING AT SPEEDS OF APPROXIMATELY 50 MPH, THE VEHICLE ABNORMALLY ACCELERATED TO SPEEDS OF OVER 100 MPH. SHE ATTEMPTED TO DEPRESS THE BRAKES, TO NO AVAIL. SHE ATTEMPTED TO MOVE THE GEAR SHIFT SELECTOR TO THE PARK POSITION, REVERSE AND NEUTRAL WHILE VIOLENTLY DEPRESSING THE BRAKES. THE VEHICLE DECLINED IN SPEED SHORTLY THEREAFTER. THE DEALER COULD NOT DUPLICATE THE FAILURE. THE FAILURE OCCURRED A SECOND TIME WHILE DRIVING ON THE HIGHWAY AT SPEEDS OF LESS THAN 55 MPH, THE VEHICLE ACCELERATED TO ABNORMALLY FAST SPEEDS. THE DEALER ADVISED THE VEHICLE WAS UNDER RECALL PERTAINING TO THE FLOOR MATS, BUT NOT THE RECALL FOR THE STICKING ACCELERATOR PEDAL (SEE NHTSA CAMPAIGN ID NUMBER: 09V388000, VEHICLE SPEED CONTROL-ACCELERATOR PEDAL) WHICH THE CONTACT BELIEVED TO BE THE CAUSE OF THE FAILURE. HE STATED THAT THERE WERE NO FLOOR MATS IN THE VEHICLE. THERE WERE NO REPAIRS MADE TO THE VEHICLE TO DATE. THE FAILURE MILEAGE WAS 10,227 AND THE CURRENT WAS 23,363.

**Additional Summary:**

NBC NEWS REPORT:

"It was a sunny Tuesday morning in July and Jake was excited that he was going to a birthday party that afternoon."

That's how Nancy Murtha of Cortlandt Manor remembers the day her 5-year-old son Jake was killed in a car accident.

Now, Murtha and her husband, Daniel, are suing Toyota, claiming a sudden acceleration problem with the company's 2008 Lexus RX350 is to blame for Jake's death.

The crash happened July 29, 2008, on Watch Hill Road in Westchester County.

Nancy Murtha says the car crashed after she tried to slow down and pull over to help Jake with something.

"As I hit the brake, the car wouldn't stop. It just kept on going," she says in a prepared statement. Instead of stopping, the Lexus slammed into a wall.

Jake was rushed to Westchester County Medical Center, but he died several hours later. According to the lawsuit filing, Murtha also suffered severe injuries to her neck, back, right knee and right hip, and doctors removed her spleen and part of her intestines. She was in a coma for six days."

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** CLINTON TOWNSHIP, MI  
**NHTSA Summary:**

I WANTED TO SHARE MY EXPERIENCE WITH MY TOYOTA CAMRY RE. THE ACCELERATION PROBLEM, FOR YOU TO SHARE WITH YOUR ENGINEERS. I LEASED MY 2007 CAMRY IN AUGUST 2007 (VIN 4T1BE46K97J694423), A 4 CYLINDER MODEL. APPROXIMATELY A YEAR LATER, I WAS ON THE FREEWAY PASSING A CAR WHEN I NEEDED A SUDDEN BURST OF SPEED, SO I FLOORED THE ACCELERATOR HARD. (I WAS USED TO A 6 CYLINDER WHICH REACTS INSTANTLY.) THE ACCELERATOR SEEMED TO STICK AND I EXPERIENCED A RACING ENGINE THAT WOULD NOT SLOW DOWN. I WAS ABLE TO SAFELY STOP THE CAR BY PUTTING IT IN NEUTRAL AND BRAKING (NEEDLESS TO SAY, A LITTLE SHAKEN). AFTER I TURNED IT OFF, I IMMEDIATELY RESTARTED THE ENGINE AND AGAIN IT RACED. I TURNED IT OFF AGAIN AND LET IT SIT FOR SEVERAL MINUTES. AFTER RESTARTING IT, IT REACTED NORMALLY. I CAREFULLY DROVE TO THE DEALERSHIP, WHERE I WAS GIVEN THE FLOOR MAT EXPLANATION WHICH I ACCEPTED. I DID IN FACT HAVE MY FLOOR MATS LOOSE AND NOT IN THE PEGS. I HAVE NEVER EXPERIENCED A RECURRENCE. MY PERCEPTION IS THAT THE PROBLEM WAS CAUSED WHEN I STOMPED ON THE ACCELERATOR, AND AFTER TURNING OFF THE ENGINE FOR SEVERAL MINUTES AND RESTARTING WITHOUT INCIDENT, I AM SPECULATING THAT THE IGNITION SYSTEM WAS ABLE TO RESET ITSELF. THAT'S WHY I SUSPECT THE PROBLEM MAY BE ELECTRICAL OR THE VEHICLE COMPUTER, AND NOT MECHANICAL.

**NHTSA Summary:**

WAS DRIVING ON THE FREEWAY. CAR HAD CRUISE CONTROL ON AND I STEPPED ON THE BRAKES AND DISENGAGED IT AND CONTINUED DRIVING. WHEN I PRESSED THE RESUME BUTTON TO GET BACK ON CRUISE CONTROL, THE CAR ACCELERATED ABOUT 7 MPH PAST THE SET SPEED AND I HAD TO SLAM ON THE BRAKES AND REPEATEDLY PRESS THE C.C. CANCEL BUTTON TO STOP EXTRA ACCELERATION. I UNDERSTAND SOME PEOPLE MAY THINK IT'S THE CAR SPEEDING UP TO GET TO THE SPEED QUICKLY, WHICH IT DID, BUT THEN IT JUST KEPT ACCELERATING AND THE MOTOR WAS WHINING LIKE IT WAS REALLY TRYING TO RACE OFF. THIS HAPPENED ABOUT A HALF A DOZEN TIMES BEFORE I STOPPED USING THE C.C. ALL TOGETHER. WHEN I CALLED THE DEALERSHIP I WAS TOLD IT WAS THAT THE CAR WAS "ZIPPY" BECAUSE IT WAS A V6 AND IT IS THE CRUISE CONTROL SPEEDING UP TO THE LAST SET SPEED. NO PARTS WERE EVER FIXED ON IT. I ENDED UP SELLING IT LAST YEAR AFTER OWNING IT AROUND 9 MONTHS.

Excerpt from news article "Man sues Toyota, alleging stuck accelerator" BY STEVE E. SWENSON, Californian staff writer

C-1170

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

"The family of a Shafter man who suffered a severe brain injury in a 2008 crash is now suing Toyota Motor Corp. alleging design flaws caused his 2007 Toyota Tacoma pickup truck to unexpectedly surge out of control.

That year and model of truck has recently been added to Toyota's recall list of vehicles that could have problems with accelerators that stick, said Bakersfield attorney Todd A. Gall, who filed the lawsuit recently in Kern County Superior Court.

The victim of the Aug. 13, 2008 accident at a curve on Elk Hills Road was Thomas Daniel Martin, the lawsuit says. Because his injuries were so severe, the lawsuit was filed on behalf of his wife, Madeline Martin, who is representing her husband's legal interests because he is unable to do so for himself.

"It's really an awful situation," Gall said.

Gall said the evidence so far that the accelerator stuck is circumstantial, but experts are reviewing the vehicle to determine what proof exists to support the contention.

Martin was a careful driver, but on the day of the crash witnesses saw him speeding around the southbound curve, Gall said.

The lawsuit says that as Martin tried to regain control, the pickup overturned and injured him. Martin was wearing a seatbelt, the lawsuit says. Toyota did not return a telephone call seeking comment. Attempts to reach Mrs. Martin were also unsuccessful."

**Location of Incident:** WAUKEE, IA  
**NHTSA Summary:**  
 I WAS ATTEMPTING TO PASS A SEMI ON AN UPHILL IN MY NEW 2008 RAV4 WHEN THE ACCELERATOR BECAME STUCK. I HAD FLOORED THE GAS PEDAL SINCE I WAS GOING UPHILL AND PASSING, BUT WHEN I EASED MY FOOT OFF THE PEDAL REMAINED PRESSED TO THE FLOOR. I HAD ENTERED A SINGLE LANE CONSTRUCTION ZONE AND WAS ACCELERATING RAPIDLY. I STOMPED ON THE ACCELERATOR HOPING TO SPRING IT LOOSE AND TRIED THE BRAKES, TO NO AVAIL. AS I WAS REACHING SPEEDS WELL INTO THE 90S AND WITHIN SECONDS OF PLOWING INTO THE TRAFFIC AHEAD OF ME I REACHED DOWN AND GRABBED THE GAS PEDAL AND PULLED UP ON IT. IT DID COME UP THEN AND I WAS ABLE TO SLOW THE CAR DOWN IN TIME TO AVOID CRASHING. I WAS TERRIFIED AND THOUGHT I WOULD DIE. I TOOK IT TO THE DEALER WE HAD PURCHASED IT FROM AND THEY INSISTED IT WAS CAUSED BY MY FLOOR MAT AND THAT IT WAS MY FAULT SINCE IT WAS NOT A TOYOTA FLOOR MAT. I TOLD THEM THERE WAS NOTHING OBSTRUCTING THE PEDAL WHEN I REACHED DOWN FOR IT, IT WAS SIMPLY STUCK. THEY CONTINUE TO BLAME THE FLOOR MAT, MY CAR HAS NOT BEEN PUT ON THE RECALL LIST AND IT SCARES ME EVERY DAY TO DRIVE IT. I NEVER, EVER FLOOR IT AND NOW KNOW TO PUT IT IN NEUTRAL SHOULD IT HAPPEN AGAIN--ALTHOUGH I HAVE HEARD SOME PEOPLE CRASHED BECAUSE THEY COULD NOT GET THE CAR IN NEUTRAL. I AM VERY UPSET THAT TOYOTA BLAMESHIFTS AND DODGES THE ISSUE BY BLAMING THE MATS AND REFUSES TO DO ANYTHING ABOUT IT. THEIR RECALL HOTLINE TOLD ME IT IS MY PROBLEM SINCE MY CAR IS NOT ON THE RECALL LIST. I DID BUY THEIR MAT AFTER THE INCIDENT, ONLY TO BE TOLD LATER THAT I SHOULD REMOVE IT SINCE IT COULD CAUSE ACCELERATOR ENTRAPMENT. MY DEALER STILL BLAMES THE WHOLE PROBLEM ON MY NON COMPLIANT MAT EVEN THOUGH THEY RECALLED THEIR OWN MATS, TOO. IT IS

C-1173

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

VERY DISTURBING TO FIND OUT THAT THIS HAS BEEN HAPPENING TO SO MANY OTHERS AND GOING ON FOR A LONG TIME. SO MANY DEATHS AND ACCIDENTS, AND I EASILY COULD HAVE BEEN ONE. WE HAVE BOUGHT 5 TOYOTAS FROM THIS DEALER AND HAVE HAD NO SUPPORT AND HAVE BEEN TREATED RUDELY.

**Date of Incident:** 20080816  
**Vehicle:** 2007 TOYOTA PRIUS  
**Location of Incident:** COLORADO SPRINGS, CO  
**NHTSA Summary:**  
 I WAS DRIVING HOME FROM WORK ON THE MORNING OF AUGUST 16TH, 2008 WHEN MY 2007 PRIUS BEGAN TO HYDROPLANE. I STRUCK THE LEFT GUARDRAIL, SPUN RIGHT AND THEN THE CAR CATAPULTED ACROSS THE INTERSTATE. I HIT A CONCRETE BARRIER AND THE CAR THEN ROLLED ONTO ITS LEFT DRIVER SIDE AND SKIDDED MAYBE 100'. I CHALKED IT UP TO THE ROADS BEING WET BUT THE ODD THING WAS THAT THE CAR ACCELERATED ONCE I HIT THE LEFT GUARD RAIL AND STARTED TO CROSS OVER THE INTERSTATE. AT THIS POINT, THE BRAKES AND STEERING WOULD NOT WORK. I CRASHED HEAD ON INTO THE CONCRETE BARRIER ON THE RIGHT SIDE OF THE INTERSTATE. MY STORY SOUNDS VERY MUCH LIKE SOME OF THE POSTS I HAVE READ. IT IS FRIGHTENING THAT SO MANY PEOPLE HAVE EXPERIENCED THE SAME ORDEAL AND THAT TOYOTA CONTINUES TO DENY IT AND BLAME IT ON THE FLOOR MATS! \*TR

**Date of Incident:** 20080816  
**Vehicle:** 2008 TOYOTA HIGHLANDER  
**Location of Incident:** MARLBORO, NJ  
**NHTSA Summary:**  
 I RECEIVED A VSC ERROR CODE, ON A 2008 TOYOTA HIGHLANDER, NOT THE HYBRID MODEL, BUT A LIMITED TOP OF THE LINE MODEL. THE VEHICLE STARTS TO ACCELERATE BY ITSELF & THEN WHEN YOU SLAM ON THE BRAKES TO TRY TO STOP IT, IT FAILS TO STOP. IN ORDER TO AVOID SLAMMING INTO THE VEHICLE IN FRONT OF ME & TO THE RIGHT OF ME, I CHOSE TO TURN LEFT HARD & RUN INTO THE CONCRETE DIVIDER. THIS WAS THE 2ND OCCASION THAT THIS TYPE OF FAILURE HAS HAPPENED TO ME. THE 1ST

C-1174

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TIME WAS ON DECEMBER 15, 2010 & I ALSO CHOSE TO TURN LEFT HARD & STRIKE THE DIVIDER INSTEAD OF REAR ENDING THE VEHICLE IN FRONT OF OR SIDE SWIPING THE VEHICLE TO THE RIGHT OF ME. ON THE 1ST OCCASION, NONE OF THE AIRBAGS DEPLOYED & BECAUSE OF THAT I ENDED UP STRIKING MY HEAD ON THE EITHER THE DRIVERS SIDE GLASS OR SOME HARD OBJECT AND LOSING MY SHORT TERM MEMORY. THE VEHICLE & THEN CROSSED 3 LANES OF TRAFFIC, FINALLY OFF OF AN EXIT RAMP & CAME TO REST AFTER STRIKING A FENCE POLE. THE 2ND TIME IT HAPPENED WAS ON AUGUST 16, 2010. I ALSO CHOSE TO STRIKE THE CONCRETE DIVIDER AS OPPOSED TO STRIKING THE VEHICLE IN FRONT OF ME OR TO THE RIGHT OF ME. THEN SOMEHOW I ALSO CROSSED 3 LANES OF HIGHWAY & FINALLY COMING TO REST AFTER STRIKING A LIGHT POLE. THE DRIVER SIDE CURTAIN AIRBAG DID DEPLOY THIS TIME SO I DID NOT LOSE CONSCIOUSNESS NOR DID I LOSE MY SHORT TERM MEMORY. IT WAS AT THAT POINT THAT I NOTICED THAT A 2ND ERROR CODE ALSO CAME UP STATING BRAKE FAILURE.

**NHTSA Summary:**

TL- THE CONTACT OWNS A 2006 LEXUS IS350. THE CONTACT WROTE THE MANUFACTURER IN 2008 ABOUT HER VEHICLE THAT IT WAS ACCELERATING BY ITSELF. LATER IN 2008 THE CONTACT WAS INVOLVED IN AN ACCIDENT AND THE MANUFACTURER SENT SOMEONE TO INSPECT THE VEHICLE AND THEY STATED THERE WAS KNOW FAILURE FOUND. NOW IN 2009 SHE HEARD ON THE NEWS THAT ALL CONSUMERS SHOULD TAKE OUT THE FLOOR MATS. THE CONTACT DID TAKE OUT THE FLOOR MATS. THE CONTACT HAS NOT EXPERIENCED THE SUDDEN ACCELERATION AS OF NOW. THE CONTACT DID ENDURE AN ACCIDENT WHILE MERGING ONTO THE HIGHWAY HER VEHICLE ACCELERATED UP 90MPH. SHE DID DEPRESS THE BRAKE TO THE FLOOR AND THEN PUT ON THE HAND BRAKE. THE VEHICLE FINALLY STARTED TO SLOW DOWN AND WENT BACK TO NORMAL. THE CONTACT WAS BACKING UP THE VEHICLE THEN ACCELERATED AND RAN INTO A TREE AND UP A CURB. THE VEHICLE WAS TOWED TO THE DEALER AND THEY STATED THAT THERE WAS KNOW FAILURES WITH HER VEHICLE. THE MANUFACTURER WAS INFORMED AND THEY DENIED THE CONTACT OF HAVING AN INSPECTOR TO COME OUT AN INSPECT THE VEHICLE AS 2010. THEY ALSO DENIED HER REIMBURSEMENT FOR HER DEDUCTIBLE THAT SHE HAD TO PAY TO HER INSURANCE COMPANY. WHEN THE CONTACT DID CONTACT THE AUTHORIZED DEALER THE CONTACT WAS INFORMED TO BRING HER VEHICLE IN SO THEY CAN PUT HER FLOOR MATS BACK IN AND WHEN SHE INFORMED THE MANUFACTURER THEY STATED THAT THEY WOULD NOT RECOMMEND THAT. SO NOW THE CONTACT FEELS THAT THE COMMUNICATION BETWEEN THE DEALER AND THE MANUFACTURER IS NOT PROFESSIONAL AND SHE DOES KNOW WHAT TO DO BECAUSE THEY ARE TELLING HER TWO DIFFERENT THINGS. THE APPROXIMATE FAILURE MILEAGE WAS 44000 AND THE CURRENT MILEAGE WAS 65000. DF

**Vehicle:** 2009 TOYOTA CAMRY  
**Location of Incident:** GARDENA, CA  
**NHTSA Summary:**

HELLO, I'M SPC LEE FROM U.S. ARMY. MY CAR, TOYOTA CAMRY 2009, HAD A SAME PROBLEM WITH THAT SUDDEN ACCELERATION BACK IN 2008. THE CAR WAS, OF COURSE, BRAND NEW, AND I HAD THAT SAME EXPERIENCE - ALL OF SUDDEN ACCELERATION. IT WAS AFTER I WAS FINISHED THE ALL DUTIES FOR THE DAY, AND I WAS HEAD TO MY HOME. WHEN I JUST DROVE ON THE HIGHWAY, THE RPM WENT UP SO QUICKLY AND SUDDENLY, AND EVEN I STEPED ON THE BRAKES SEVERAL TIMES, BUT THE RPM HAD NEVER BEEN GO DOWN AND STOP. SO I MADE THE DECISION TO MAKE THE TRANSMISSION SHIFT TO NEUTRAL, AND IT WORKED AT THAT TIME. AT THAT TIME, I WAS IN LIKE COUNTRY SIDE IN FORT GORDON, GEORGIA, AND NOW I'M IN SOUTH KOREA TO PERFORM THE DUTY HERE. AT THAT TIME OF THAT INCIDENT, I THOUGHT IT COULD HAPPEN MAYBE ONE TIME. VERY ONE TIME... HOWEVER, WHEN I READ THE CURRENT NEWSPAPER ARTICLE... I FEEL VERY TERRIBLE ABOUT THIS. BECAUSE NOW MY WIFE AND MY 3 YEAR OLD SON RIDE IN TOYOTA CAMRY.. (THAT'S THE ONLY ONE CAR IN OUR HOUSEHOLD).. WHAT IF THERE WOULD BE A SAME HAPPENING TO MY WIFE AND MY SON.. I WAS O.K. BECAUSE THE HIGHWAY I DROVE ON WAS ALMOST NO TRAFFIC.. AS I MENTIONED EARLIER, I LIVED IN COUNTRY SIDE FT. GORDON, GEORGIA. BUT AFTER I GOT THE DUTY STATION IN SOUTH KOREA, I RELOCATED MY FAMILY BACK TO LOS ANGELES COUNTY, CALIFORNIA.. (THAT'S WHERE I CAME FROM) I KNOW MY WIFE ONCE TOLD ME SHE FELT LITTLE BIT MORE ACCELERATION WHEN SHE DROVE TOWARD DOWN SLOPE. SHE HAD TO DO THE SAMETHING. PUT THE TRANSMISSION SHIFT TO THE NEUTRAL.. WHAT IF THIS KIND OF INCIDENT WOULD BE HAPPENED IN A HEAVY TRAFFIC. MAN.. I WISH THAT I WOULD HAVE A TOTAL SOLUTION FOR THIS.. I KNOW THAT I CAN'T RETURN THE CAR, RIGHT?

**Date of Incident:** 20080822  
**Vehicle:** 2008 TOYOTA COROLLA  
**Location of Incident:** SANTA BARBARA, CA  
**NHTSA Summary:**

ON AUG. 1, 2008 I BOUGHT A CERTIFIED USED 2008 TOYOTA COROLLA WITH 5,420 MILES ON IT FROM MANHATTAN BEACH TOYOTA, IN MANHATTAN BEACH, CA. AFTER DRIVING IT FOR SEVERAL WEEKS, I REALIZED THERE WAS SOMETHING TROUBLING ABOUT THE ACCELERATOR. WHENEVER I DEPRESSED THE ACCELERATOR TO MAKE A STANDING START -- WHEN A TRAFFIC SIGNAL TURNED GREEN, FOR EXAMPLE -- THE CAR WOULD OFTEN LURCH FORWARD IN AN UNCONTROLLABLE MANNER. I SOON TRACED THE PROBLEM TO THE POSITION OF MY FOOT ON THE ACCELERATOR. IF MY FOOT WAS IN JUST THE RIGHT POSITION -- LOW TO MIDWAY ON THE PEDAL, WITH MY HEEL CLOSEST TO THE FLOOR -- I HAD COMPLETE CONTROL. BUT IF I MISCALCULATED AND PLACED MY FOOT EVER SO SLIGHTLY HIGHER ON THE PEDAL, THE CAR WOULD LURCH FORWARD EVEN WHEN I APPLIED THE SAME PRESSURE. I COULD REGAIN CONTROL ONLY BY QUICKLY TAKING MY FOOT OFF THE ACCELERATOR AND/OR HITTING THE BRAKES. THE TOYOTA DEALERSHIP THAT MAINTAINS MY CAR REPEATEDLY SAID I SHOULD NOT WORRY -- THAT AS THE CAR'S COMPUTER GOT USED TO MY DRIVING HABITS, IT WOULD EVENTUALLY ADJUST THE ACTION OF THE ACCELERATOR TO MY TOUCH. BUT NOTHING CHANGED. NOW I TAKE EXTRA CARE TO TRY AND GET MY FOOT IN JUST THE RIGHT SPOT BEFORE ACCELERATING FROM A STANDING START. SOMETIMES I AM SUCCESSFUL, OTHER TIMES NOT. IN ANTICIPATION OF TROUBLE, I MAKE IT A POINT TO LEAVE PLENTY OF EXTRA SPACE BETWEEN ME AND THE CAR AHEAD OF ME, SO I WON'T REAR END IT IF THE ACCELERATOR SENDS ME LURCHING FORWARD. I HAVE BECOME RESIGNED TO THE PROBLEM, BECAUSE I AM A TOYOTA FAN AND LIKE EVERYTHING ELSE ABOUT THE CAR. I NEVER THOUGHT TO COMPLAIN ABOUT THIS UNTIL A NEW YORK TIMES STORY INDICATED THAT OTHER TOYOTA OWNERS HAVE HAD THE SAME PROBLEM, AND (I BELIEVE) HAD NOTIFIED YOUR AGENCY. (PLS IGNORE THE DATES I ENTERED BELOW; THE PROBLEM PERSISTS TO THIS DAY, BUT YOUR FORM WOULD NOT ALLOW ME TO SO INDICATE.)

**NHTSA Summary:**

MY MOTHER WAS DRIVING A 2006 TOYOTA COROLLA AND WAS PULLING INTO HER PARKING PLACE AT HER APARTMENT (ESTIMATED MOVING ONLY SEVERAL MPH). WHEN SHE TOOK HER FOOT OFF OF THE ACCELERATOR TO BRAKE, THE CAR SUDDENLY LURCHED FORWARD ACCELERATING VERY FAST, JUMPED THE CURB, AND CRASHED THROUGH THE BUILDING WALL AND INTO A NEIGHBOR'S APARTMENT. THE CAR STRUCK THE TENANT INSIDE, CAUSING EXTENSIVE INJURIES. THE POLICE SURMISED HER FOOT HIT THE ACCELERATOR, BUT SHE KEPT REPEATING  $\delta$  THE CAR SUDDENLY JUMPED FORWARD ON ITS OWN $\delta$ . LACKING EVIDENCE TO THE CONTRARY, WE HAD NO WAY TO QUESTION THE POLICE'S REPORT; HOWEVER, IN MY MOTHER'S RECOUNTING THE EXPERIENCE, IT DIDN'T SEEM TO MAKE ANY SENSE. THEN, AS WE HAVE SEEN OTHERS RECENTLY RECOUNTING SIMILAR EXPERIENCES AND WATCHING VIDEOS ACCELERATION PROBLEMS WITH TOYOTA VEHICLES, WE REALIZED THAT THIS SEEMED TO BE EXACTLY WHAT OUR MOTHER EXPERIENCED. FURTHERMORE, BOTH MY SISTER AND MY NIECE BOTH RECENTLY DROVE MY MOTHER'S CAR ON THE EXPRESSWAY AND BOTH EXPERIENCED SUDDEN RAPID ACCELERATION WHILE DRIVING WITH THE CRUISE CONTROL ENGAGED. THE PROBLEM THEY EXPERIENCED WAS SO UNSETTLING, THAT THEY WARNED MY MOTHER TO KEEP THE CRUISE CONTROL TURNED OFF. THESE EXPERIENCES COMBINED WITH REPORTS THAT PROBLEMS WITH EARLIER MODELS OF TOYOTA VEHICLES THAN THE 2009-2010 RECALLED MODELS LED US TO BELIEVE THAT OUR MOTHER'S ACCIDENT WAS CAUSED BY THIS SUDDEN ACCELERATION PROBLEM THAT HAS BEEN UNCOVERED WITH TOYOTA VEHICLES.

**Location of Incident:** PORTLAND, TX

**NHTSA Summary:**

8/25/2008-head on collision in parking lot into a pole with concrete around it. \$4,000.00 crash. 1/2009 accel stuck as I was going up a bridge-somehow it just stopped. 7/2009 happened on vacation in san antonio while my husband was driving on the highway-again, somehow just stopped. 8/2009-traveling 35 mph in a 35 mph zone, when I accelerated slightly to pass a car going under the speed limit. My car lunged out of my control. I was going over 70 mph and honking at cars and flashing my lights to get over so that I would not slam into them. I pumped the brakes over and over, and the brakes just pumped back at me and the car seemed to speed up more. Finally, I just kept slamming on the break until it suddenly began to slow down. I was so shaken up that I came back to work and looked it up online and Toyota is saying it's only the floor mats. My ankle was sore for a couple days from pressing the break so hard. They are custom mats that have cut outs for the gas pedal. The mat is definitely not the problem. I purchased the car brand new 6/26/08 from a dealership where a family member of mine runs the service department. He even told me

C-1181

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

take out the floor mat. Toyota has told all of the employees at all of the dealerships to say it's just the floormat. Even my own family is sticking to the lies. I'm paying a little over \$400.00 per month for a car that I'm afraid to drive. I have an excellent driving record and would not otherwise drive head on into anything, much less something as tall as a light pole! The local dealership says that they have really not had many calls, but I can bring the car in Thursday and they will look at it. Do I take it to a dealership? They are not going to do anything. A recall should involve replacing a defective part, not making up an excuse.

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2006 LEXUS ES330. WHILE MERGING INTO THE RIGHT LANE AT APPROXIMATELY 25 MPH, THE VEHICLE SUDDENLY ACCELERATED. THE CONTACT WAS UNABLE TO BRAKE AND STRUCK A PEDESTRIAN. THE PEDESTRIAN DIED DUE TO INJURIES. THE CONTACT ALSO REAR ENDED TWO OTHER VEHICLES AND DROVE THROUGH A FENCE. THE VEHICLE CAME TO A STOP WHEN IT CRASHED INTO A GUARD RAIL. THE MANUFACTURER STATED THAT THE CAUSE OF THE FAILURE COULD HAVE BEEN THE FLOORMAT. THE INSURANCE COMPANY CLAIMED THAT THE VEHICLE WAS DESTROYED. THE CONTACT RECEIVED INJURIES TO HER BACK, NECK, AND LEG. TWO OTHERS WERE ALSO INJURED. STATE POLICE REPORT NUMBER 5271887 WAS FILED. THE FAILURE AND CURRENT MILEAGES WERE 26,286.

**Additional Summary:**

"When I started applying my brake, it got faster. It was like possessed...runaway. All I could see is red lights," said Willette Green. Green recalls that horrifying day on August 28, 2008 when she says she thought she was going to die. She says her 2006 Lexus ES 330 wouldn't stop as she was exiting the ramp on 22nd Street in Chicago. "I plowed through 22nd Street and there were pedestrians...there was a newspaper guy there. I plowed through there and went through fences. I ended up on the guardrail and I just knew it was over with for me," said Green. Green survived with minor injuries but a pan handler was killed. Green was ticketed for hitting a pedestrian and cited for driving too fast and failure to reduce speed to avoid an accident. Green says her insurance company Allstate and Toyota inspected the car and found nothing wrong. But a letter from Toyota dated September 18, 2008 stated it is possible that the floor mat was not properly secured and could have interfered with the brake and throttle operation. Green says she knew it was something else and filed reports with the National Highway Traffic Safety Administration."

**NHTSA ODI Number:** 10314537  
**Date of Incident:** 20080828  
**Vehicle:** 2008 TOYOTA TACOMA  
**Location of Incident:** SNELLVILLE, GA

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2008 TOYOTA TACOMA. WHEN THE CONTACT ATTEMPTED TO SHIFT THE VEHICLE IN PARK, IT SURGED FORWARD. ON ANOTHER OCCASION WHILE APPROACHING A TRAFFIC LIGHT WITH HIS FOOT ON THE BRAKE PEDAL THE VEHICLE SURGED FORWARD AND SHE CONTINUED TO PRESS THE BRAKE PEDAL WITH FORCE UNTIL THE VEHICLE CAME TO A COMPLETE STOP. SHE TOOK THE VEHICLE TO THE DEALER WHO ADJUSTED THE WHEEL, HOWEVER, SHE DOES NOT REMEMBER WHICH WHEEL WAS ADJUSTED. REPORT 1001136136 WAS FILED WITH THE MANUFACTURER WHO STATED THAT THEY COULD NOT OFFER HER ANY ASSISTANCE. THE FAILURE MILEAGE WAS 9 AND THE CURRENT MILEAGE WAS NOT AVAILABLE.

**Date of Incident:** 20080829  
**Vehicle:** 2008 TOYOTA COROLLA  
**Location of Incident:** WATERTOWN, WI

**NHTSA Summary:**

ON 8/29/08 I WAS SLOWLY ACCELERATING AS I PULLED ONTO THE HIGHWAY WHEN I EXPERIENCED WHAT I HAVE COME TO UNDERSTAND WAS AN SUA, A SUDDEN UNINTENDED ACCELERATION. WITH HEAD-ON TRAFFIC COMING AT ME FAST I HAD NO CHOICE BUT TO TURN SHARPLY TO GET OFF THE ROAD. MY REAR AXLE WAS CAUGHT ON A BERM OF DIRT AT THE EDGE OF A CORNFIELD. BRAKING HAD NO EFFECT. AS I SAT THERE I REALIZED THE ENGINE WAS RACING WILDLY. THERE WAS NO OBSTRUCTION TO THE GAS PEDDL, SO I HAD TO CUT OFF THE ENGINE BY TURNING THE KEY OFF. MY CAR IS A 2008 TOYOTA COROLLA. THE ROAD WAS DRY, HOWEVER, IT WAS A DAMP MORNING AND CHILLY. I HAVE HAD NO RECURRENCES. I AM A SAFETY COMPLIANCE OFFICER WITH OSHA SO I IMMEDIATELY BEGAN INVESTIGATING THE ELECTRONIC THROTTLE SYSTEM. I DO NOT FEEL THE ADDITION OF THE PLATE BEHIND THE GAS PEDAL IS THE SOLUTION. TOYOTA TOLD ME AT THE TIME OF THE ACCIDENT THAT IT WOULD DO NO GOOD TO REPLACE THE THROTTLE SENSOR, SO I REALIZED THAT THEY HAD A DEFECT PROBLEM. I AM LOOKING INTO ADDING A SMART THROTTLE SOFTWARE PLUG-IN TO PROVIDE AN OVERRIDE TO THE THROTTLE. TOYOTA REFUSED TO TELL ME WHO MADE THE PART OR FROM WHOM THEY PURCHASED IT. PLEASE PROVIDE ME THAT INFORMATION IF POSSIBLE. PLEASE CONTINUE YOUR INVESTIGATION, AND I WOULD SUGGEST WIDENING IT TO INCLUDE ALL DRIVE-BY-WIRE SYSTEMS.

**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** KENT, OH

**NHTSA Summary:**

ON SUNDAY AUGUST 31ST, I LEFT A DEPARTMENTAL PICNIC AT A COLLEAGUE'S HOUSE AROUND 8:30 AT NIGHT TO GO HOME TO KENT OHIO. I LEFT EARLY BECAUSE I WANTED TO GET HOME BEFORE IT GETS TO DARK. I ENTERED THE I 76 RAMP AT THE LAKE

C-1183

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

MILTON/NEWTON FALLS ENTRY. AFTER DRIVING PERHAPS AROUND 35-40 MPH HOUR ON THE RAMP I STARTED TO ACCELERATE TO ENTER THE HIGHWAY. SUDDENLY I FELT THE CAR ACCELERATED BY ITSELF. I PUT MY FOOT ON THE BRAKE MAKING THE ASSUMPTION THAT I MAY HAVE STEPPED ON THE GAS PEDAL TO MUCH. HOWEVER, THE CAR CONTINUED TO ACCELERATING REACHING 80-85 MPH. I WAS GETTING CLOSER TO CARS IN FRONT OF ME. THE CAR ACCELERATED VERY FAST AND I PUT MY FOOT ON THE BRAKE TO SLOW THE CAR DOWN. THE SPEED CONTINUED TO BE EXCESSIVE IN SPITE OF ME TRYING TO BREAK THE SPEED. I THOUGHT AT FIRST THAT THE BRAKES DID NOT WORK, BUT NOTICED IMMEDIATELY THAT THIS WAS NOT THE CASE. I WAS STILL MOVING 80-85 MPH. TRYING TO AVOID CARS IN FRONT OF ME. I PUT MY BREAKDOWN LIGHT ON TO WARN OTHER DRIVERS. I MANAGED TO DRIVE OVER TO THE SHOULDER, TRYING TO AVOID HITTING ANYTHING. I PUT MY FOOT DOWN ON THE BRAKE AND KEPT IT ON THE BRAKE TO SLOW THE CAR DOWN. I WAS ABLE TO GET THE SPEED DOWN TO 40MPH WITH MY FOOT CONTINUOUSLY ON THE BRAKE. I TRIED TO LET MY FOOT GO BUT THE CAR IMMEDIATELY SPEEDED UP AGAIN. I MANAGED TO PUT MY CAR INTO NEUTRAL AND THAN IN PARK. THE CAR SLOWLY CAME TO A HOLD. THE BRAKES SMELLED AND SMOKED. IT WAS GETTING RAPIDLY DARK AND I WAS SCARED AND IN A STATE OF SHOCK. BUT ALSO RELIEVED TO BE ALIVE. AT THAT TIME A STATE TROOPER STOPPED AND I TOLD HIM WHAT HAPPEN. HE CALLED A TOWING TRUCK AND PUT RED FLARES UP TO KEEP ME SAFE ON THE HIGHWAY IN THE DARK. HE POINTED OUT TO ME THAT I WAS ON MILE MARKER 5.3 ON I 76. I HAD TO WAIT ABOUT 30 MINUTES UNTIL THE TOW TRUCK ARRIVED. THE DRIVER TOLD ME THAT MY BRAKES WERE STILL VERY HOT. \*TR

**Additional Summary:**

**Toyota ID Number:** 10246302  
**NHTSA ODI Number:** 20080901  
**Date of Incident:** 2007 TOYOTA CAMRY SOLARA  
**Vehicle:** 2007 TOYOTA CAMRY SOLARA  
**Location of Incident:** ROCHESTER, NY

**NHTSA Summary:**

ON SEPT. 1, 2008, I WAS DRIVING NORTH THROUGH PA. ON I-79. I WAS USING THE CRUISE CONTROL ON MY 2007 TOYOTA CAMRY SOLARA FOR THE FIRST TIME. I PULLED INTO A REST AREA. AS I WAS ABOUT TO PULL INTO A PARKING SPACE, I STOPPED FOR SOME PEDESTRIANS TO PASS BY. WHEN I TOOK MY FOOT OFF THE BRAKE TO PULL INTO THE PARKING SPACE, MY CAR SUDDENLY ACCELERATED AT A VERY HIGH SPEED AS IF I HAD PUT MY FOOT ON THE GAS PEDAL ALL THE WAY TO THE FLOOR. I ASSURE YOU, I BARELY TOUCHED THE GAS PEDAL. AS A CONSEQUENCE, THE CAR WENT OVER A HIGH CURB, WENT THROUGH A PICNIC AREA AND DOWN A HILL INTO SOME WEEDS BEFORE I COULD BRING IT TO A STOP. I REALLY HAD TO PUSH ON THE BRAKE WITH ALL MY STRENGTH. I HAD NO CONTROL OVER THE CAR OR ITS SPEED. AS A RESULT, I HIT A PERSON WALKING IN THE PICNIC AREA AND SHE SUSTAINED VERY SERIOUS INJURIES. I HAVE RECEIVED A CARELESS DRIVING CITATION AND MAY BE FACING A MAJOR LAWSUIT. I FEEL I HAD NO CONTROL OVER THE VEHICLE AND THAT IT IS UNSAFE TO DRIVE, AT LEAST WITH THE CRUISE CONTROL. I BELIEVE THE CRUISE CONTROL DID NOT DISENGAGE WHEN I PULLED OFF THE HIGHWAY AND PUT MY FOOT ON THE BREAK. I HAVE NOT TAKEN THE CAR TO A TOYOTA DEALERSHIP FOR FEAR THEY WOULD JUST COVER UP THE PROBLEM. \*TR

C-1184

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** OXNARD, CA

**NHTSA Summary:**  
2008 TOYOTA SIENNA--MOMENTARY MILD INADVERTENT ACCELERATION UPON APPLICATION OF BRAKE, MOSTLY NOTICED AT LOWER SPEEDS (30-40 MPH), THEN BRAKE TAKES HOLD. FOR THE 1-2 SECONDS OF ACCELERATION, IT FEELS SMOOTHER AS IF CAR IS IN HIGHER GEAR FOR THAT MOMENT. I BOUGHT THE CAR NEW, TOYOTA SAYS THIS IS A NORMAL EFFECT OF HOW THE TRANSMISSION WORKS. NO ACCIDENTS; JUST REPORTING WHAT FEELS LIKE SOMETHING'S NOT RIGHT. ONGOING.; THIS IS A FOLLOWUP TO MY 2/4/2010 REPORT (ODI #10305864) ABOUT MY 2008 TOYOTA SIENNA. EVER SINCE I BOUGHT IT NEW IN FALL 2008, THERE IS NOTICEABLE MOMENTARY UNINTENDED ACCELERATION BRIEFLY WHENEVER I PRESS THE BRAKE PEDAL AT SPEEDS OF ABOUT 30-40 MPH. THEN THE BRAKE TAKES HOLD. I HAD NOT GIVEN MY VIN #. THIS TIME I WILL DO THAT. (THIS IS AN ONGOING PROBLEM THAT TOYOTA SERVICE SAYS IS NORMAL, DUE TO THE NATURE OF SIENNA'S TRANSMISSION.)

**Additional Summary:**

**Location of Incident:** FREMONT, CA  
**NHTSA Summary:**  
SUDDEN ACCELERATION  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10321563  
**Date of Incident:** 20080901  
**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** LITCHFIELD, CT  
**NHTSA Summary:**  
I OWN A 2007 RAV4. IN FALL 2008, MY HUSBAND AND I PULLED UP TO A RED LIGHT BEHIND A PICKUP TRUCK AND STOPPED THE VEHICLE. MY HUSBAND HAD HIS FOOT ON THE BRAKE BUT, JUST AS HE STOPPED, THE CAR SUDDENLY ACCELERATED. EVEN THOUGH HE IMMEDIATELY PUT BOTH FEET ON THE BRAKE, WE ENDED UP HITTING THE TRUCK IN FRONT OF US. THE ACCIDENT CAUSED ABOUT \$1,500 DAMAGE TO THE FRONT END OF OUR CAR. THE TRUCK IN FRONT SUSTAINED NO VISIBLE DAMAGE, AND THE DRIVER SAID DON'T WORRY ABOUT IT AND WE DID NOT FILE A POLICE REPORT. AFTER THE ACCIDENT, THE VEHICLE WAS THOROUGHLY INSPECTED BY DOWLING TOYOTA OF LITCHFIELD CT. THEY DID NOT FIND ANYTHING MECHANICALLY OR ELECTRONICALLY WRONG WITH THE CAR THAT WOULD CAUSE THE UNEXPECTED AND UNSTOPPABLE ACCELERATION. THEY DID FIND SOME ACORNS UNDER THE HOOD, AND GIVEN THE LACK OF ANY OTHER IDENTIFIABLE CAUSE, THEY SUGGESTED THAT THE SUDDEN ACCELERATION MIGHT HAVE BEEN DUE TO THE INGESTION OF A NUT INTO THE ENGINE WHICH HELD THE ACCELERATOR OPEN. AT THE TIME I RELUCTANTLY ACCEPTED THIS EXPLANATION BECAUSE OUR ACCIDENT WAS AN ISOLATED INCIDENT. HOWEVER, IN LIGHT OF RECENT EVENTS CONCERNING TOYOTA VEHICLES, I CAN'ET HELP BUT WONDER IF OUR EXPERIENCE WITH OUR RAV4 WAS PART OF A LARGER PROBLEM. MY EXPERIENCE WITH OUR 2007 VEHICLE WAS EERILY SIMILAR TO THOSE OF THE AFFECTED MODELS THAT HAVE BEEN RECALLED. I AM HEARING ON THE NEWS THAT IT HAS TAKEN SEVERAL YEARS FOR TOYOTA TO ACKNOWLEDGE THE ACCELERATOR PROBLEM, AND I CAN'ET HELP BUT WONDER IF OUR ACCIDENT WAS RELATED TO A SIMILAR PROBLEM.

C-1186

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ACCELERATION PROBLEM ABOUT THIS CAR. TO PUT IT MORE PRECISELY THE CAR HAS A TENDENCY TO ACCELERATE AT DIFFERENT RATE. I AM SURE IT IS NOT BECAUSE OF CHANGING SHIFTS BECAUSE I ALSO HAVE ANOTHER COROLLA OF THE SAME YEAR AND MODEL. AT FIRST WHEN I START THE CAR AND SHIFT TO DRIVE MORE THE CAR HAS A TENDENCY TO JUMP WHICH IS MORE LIKE WHEN YOU CHANGE A MOTORCYCLE GEAR WITHOUT CLUTCHING. AND WHILE I ACCELERATE, SOMETIMES THE GAS PEDAL JUST GOES DOWN BUT THE CAR DOES NOT MOVE. WHEN I EXPERIENCED THIS I TOOK THE CAR TO THE DEALER AND AND I WAS TOLD BY THE MECHANIC THAT IT WAS NOT A PROBLEM OF THE CAR BUT IT IS HOW SOME COMPUTER CHIP IN THE CAR BEHAVES. THIS WAS IN 2008. IN 2009, I DOUBT GAINED STRENGTH WHEN I WAS TAKING MY COUSIN SISTER AND HER FRIEND TO MY COUSINS WEDDING. I WAS DRIVING THROUGH THE LEVELED ROAD IN INTESTATE HIGHWAY AND THEY EVEN RAISED THE QUESTION THAT THERE IS SOMETHING WRONG WITH THE CAR. STILL I EXPERIENCE THE PROBLEM. THOUGH I BELIEVE THAT ITS A MANUFACTURING PROBLEM BECAUSE THE EXPERIENCE WHICH I HAVE WITH ONE CAR IS UNUSUAL COMPARED TO THE OTHER.  
**Additional Summary:**

**Toyota ID Number:**

**Date of Incident:** 20080909  
**Vehicle:** 2005 TOYOTA COROLLA  
**Location of Incident:** HUMMELSTOWN, PA  
**NHTSA Summary:**

HERE I REPORT AN ACCIDENT WHICH MAY BE CAUSED BY TOYOTA UNINTENDED ACCELERATE PROBLEM. WE BOUGHT 2005 TOYOTA COROLLA SPORT ON JULY 09, 2004. WE DRIVE 2000-3000 MILES/PER YEAR. AS WE BOUGHT 5 YEARS PRE-PAID MAINTENANCE, WE HAVE REGULAR MAINTENANCE SERVICE WITH FAULKNER DEALER EVERY HALF YEAR UNTIL JULY 09, 2009. THERE HAS NO BIG PROBLEMS DURING THE FIRST 3-YEAR WARRANTY PERIOD EXCEPT ON AROUND SUMMER OF 2007, THE CHECK ENGINE LIGHT IS ON AND TOYOTA DEALER REPLACED THE COMPUTER CONTROL SYSTEM WITHOUT CHARGE (WE WERE NOT SURE THE REPLACED COMPUTER NAME AND WE THINK THE DEALER SHOULD HAVE RECORD). THE WEATHER CONDITION IS LIGHT-MEDIUM RAIN WHILE OUR CAR ACCIDENT HAPPENED. WHEN THE ACCIDENT HAPPENED, MY 5-YEAR OLD SON AND I WERE IN THE CAR. THE ROAD SPEED LIMIT IS 25 MILES PER HOUR, I DROVE UNDER THE SPEED LIMIT AT A LOCAL ROAD AND IT IS ABOUT 2-3 MILES DISTANCE TO OUR DESTINATION. I REMEMBERED THAT I REDUCED THE SPEED AROUND A CURVE TO TURN ON ANOTHER ROAD. SUDDENLY I HEARD A LOUD ROARING ENGINE SOUND CAME FROM INSIDE, EVEN I PRESSED AND PRESSED THE BRAKE PEDAL FOR SEVERAL TIMES, BUT I FEEL THAT I STEP ON THE AIR, IT DIDN'ET HELP. THE CAR AUTOMATICALLY ACCELERATED WITH THE SPEED I CAN'ET CONTROL AND I LOST THE CONTROL OF THE STEERING WHEEL. MY CAR WAS IN MALFUNCTION STATUS AND CRASHED TO THE RIGHT CURB AND THEN HIT THE BUSH WITH A HIGH SPEED AND TRAPPED IN WET MUD (THANK FOR GOD). THE ENGINE WAS STILL ROARING WITH A SCARED LOUD SOUND FOR MINUTES TILL I TURNED OFF THE IGNITION AND TOOK OFF THE KEY. OUR CAR WAS DAMAGED SERIOUSLY BY THIS ACCIDENT, OUR CAR INSURANCE COMPANY PAID FOR MORE THAN \$7,000 FOR THE REPAIR OF THIS DAMAGE AND I PAID \$1,000 FOR THIS COLLISION. WE KEPT BOTH THE POLICE AND REPAIR RECORD IN CASE YOU REQUIRED. AT THAT TIME WE DIDN'ET REALIZE THIS ACCIDENT MAY BE CAUSED BY THE UNINTENDED ACCELERATE PROBLEM WHICH RECALLED. BECAUSE OUR CAR COMPUTER SYSTEM WAS REPLACED BY DEALER IN 2007, WE MAY STILL FACED THE RECALLED PROBLEM.

**Date of Incident:** 20080910  
**Vehicle:** 2009 TOYOTA CAMRY  
**Location of Incident:** BURBANK, CA  
**NHTSA Summary:**

I PURCHASED A TOYOTA CAMRY 2009 IN AUGUST OF 2009; I NOTICE IMMEDIATELY SUDDEN ACCELERATION SEVERAL TIMES WHILE DRIVING AT AVERAGE 55 MPH IN A HIGHWAY WITH INCREASING IN SPEED WITHOUT STEPPING IN THE GAS PEDAL. I COULD HEAR A LOW PITCH SOUND LIKE A CORDLESS DRILL WILL SOUND LIKE AND EVENTUALLY THE SPEED WILL INCREASE AT FIRST GOT REALLY SCARED OF THE SUDDEN ACCELERATION SPECIALLY WHEN APPROACHING CARS IN THE HIGHWAY. SEVERAL TIMES I HAD TO STEP IN THE BREAK PEDAL WITH FORCE TO KIND OF KILL THE BOOST. I ALSO NOTICE THAT IN THE SURFACE STREET EXPERIENCE THIS JERKINGNESS KIND OF LIKE A WILD BULL THAT WANTS TO PUSH FORWARD WITHOUT INSERTING ENERGY TO MOVE FORWARD IT HAPPEN SEVERAL TIMES WHILE IN STOP SIGNS OR WAITING TO MERGE IN THE FLOW OF TRAFFIC. AGAIN WHAT I WILL DO IS FORCELY STEP IN THE BRAKE TO STOP THE SUDDEN ACCELERATION. AFTER DRIVING THE VEHICLE FOR MORE THAN 5 MONTHS I CAN PREDICT THE BEHAVIOR AND THANKLY ABORE THE SUDDEN ACCELERATION. BUT MANY TIMES IT DOES SCARES ME SPECIALLY WHEN APPROACHING CARS AHEAD. I HAVE A FAMILY OF 5 WITH 3 SMALL CHILDREN. MY SPOUSE AND KIDS DO NOT WANT TO RIDE IN THE CAR WITH ME FOR THE REASONS STATED ABOVE.

**Date of Incident:** 20080911  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** WESTWOOD, CA

**NHTSA Summary:**  
TOYOTA CAMRY 2005 V-6. AS ACCELERATED VEHICLE TO MERGE ON HIGHWAY, THE VEHICLE TOOK OFF AND I WAS UNABLE TO STOP OR CONTROL ANY STEERING. I WAS IN THE LT. LANE WITH A DIESEL TRUCK NEXT TO ME. I NEEDED TO MERGE SOON SO I LOOKED DOWN TO CUPHOLDER, GRABBED MY SLURPEE WHILE ACCELERATING, THE CAR HIT THE RT. LANE PADS AND WOULD NOT SLOW DOWN, I STEERED TO THE RIGHT TO AVOID HITTING THE TRUCK. THE CAR WAS OUT OF CONTROL. I SCREAMED "OH MY GOD, WHATS HAPPENING" HIT THE CEMENT HIGHWAY DIVIDER AT WHICH TIME I LOST CONSCIOUSNESS. THE CARE WENT INTO ONCOMING TRAFFIC AND FLEW OFF THE SOUTH BOUND FREEWAY, STOPPING IN A DITCH. I WAS WEDGED BETWEEN THE DRIVERS SEAT AND DOOR, UNABLE TO MOVE. I WAS NOW A TRAUMA PATIENT, SEVERING MY SPLEEN, FRACTURING 4 RIBS, INTERNAL BLEEDING AND A SURGICAL PATIENT FOR REMOVAL OF MY SPLEEN, TRANSFUSIONS AND A TUBE SUCKING MY INTERNAL BLEED THROUGH A PUMP WHICH DELIVERED MY BLOOD BACK INTO MY VEINS. HOSPITALIZATION FOR 7 DAYS, UNABLE TO EAT, ICE CHIPS ONLY FOR 6 DAYS, 30+ STAPLES UP MY STOMACH AND A NEW DIGESTIVE PROCESS FOREVER. I KNEW THE CAR SPED UP WHEN I ACCELERATED TO MERGE AND AS I TRIED TO STOP THE CAR BY PUSHING ON THE BRAKES, IT WOULD NOT SLOW DOWN AND IMMEDIATELY SEEMED TO GO OFF THE ROAD IN THE LT. LANE. FISH TAILING WHILE I BRAKED. FORTUNATELY I DID LOSE CONSCIOUSNESS AND DID NOT HIT ANOTHER VEHICLE DURING THE ACCIDENT. I HAVE NEVER HAD AN ACCIDENT BEFORE THIS AND HAVE DRIVEN FOR APPROX. 32 YEARS WHEN THIS HAPPENED. I KNOW THE CAR WOULD NOT STOP WHICH I TOLD THE CHP AND MY INSURANCE INVESTIGATOR WHO SENT FORENSICS TO THE AUTO YARD. WE THOUGHT MAYBE THE NEW TIRES WERE AT FAULT BUT WITH TOYOTAS RECENT TRANSPARENCY, IT BECOMES OBVIOUS THEY KNEW OF THIS ISSUE BUT FAILED TO PUT OUT A RECALL FOR ACCELERATION PROBLEMS RECENTLY BUT MORE IMPORTANTLY KNOWING OF AN ISSUE AND IT'S POTENTIAL TO LEAD TO DEATH FOR SOME OF ITS CUSTOMERS BUT LACKED THE SAFETY CONSCIOUS TO RECALL THEIR ACCELERATORS AND BRAKINGS SYSTEMS.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I HAVE A 2008 TOYOTA TUNDRA 4WD, LARGE V8. WHILE APPLYING THE BRAKE I HAVE HAD THREE INSTANCES WHERE THE VEHICLE SUDDENLY ACCELERATED. EACH TIME THIS OCCURRED AT A LOW SPEED[2-6MPH] FURTHER PRESSURE ON THE BRAKE STOPPED THE VEHICLE. THERE WAS NO WAY BOTH PEDALS WERE PRESSED. I FIND THE ACCELERATOR TO BE VERY TOUCHY. I FIND MYSELF HAVING TO ENGAGE THE AUTO DIFFERENTIAL LOCK TO CONTROL MY ACCELERATION FROM A STOPPED POSITION. IF I DON'T THE ACCELERATOR CAUSES THE VEHICLE TO SPIN THE TIRES. I CAN'T HELP FEELING THIS IS RELATED TO THE CRUISE CONTROL COMPONENTS. THANKS FOR YOUR TIME.

**Vehicle:** 2007 TOYOTA CAMRY HV  
**Location of Incident:** LOMA LINDA, CA

**NHTSA Summary:**  
I HAVE A 2007 TOYOTA CAMRY HYBRID. I WAS DRIVING ON OPEN HIGHWAY IN GREAT CONDITIONS AND MINIMAL TRAFFIC. WHEN IN CRUISE CONTROL MY CAR ACCELERATED WHEN TOGGLED TO SPEED UP BUT DID NOT STOP ACCELERATING AT THE SET SPEED (75) OR WHEN THE BRAKE WAS TAPPED. (I CAN'T REMEMBER IF I TOGGLED THE COAST ON THE CRUISE CONTROL). THE CAR ONLY STOPPED ACCELERATING WHEN I TURNED OFF THE CRUISE CONTROL BUTTON. AT THAT POINT IT WAS GOING 92 MPH THE CAR IMMEDIATELY COASTED AND THEN THE BRAKE WORKED. IT HAS NOT HAPPENED AGAIN WITH OR WITHOUT CRUISE CONTROL. THE DEALER CANNOT FIND ANYTHING WRONG.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10244053  
**Date of Incident:** 20080915  
**Vehicle:** 2007 TOYOTA TACOMA  
**Location of Incident:** MENDOCINO, CA

**NHTSA Summary:**  
THE SPEEDOMETER WILL START TO JUMP FROM YOUR CURRENT RATE OF SPEED TO ANYTHING BELOW THAT. IT STARTED ON SUNDAY LATE AFTER NOON ON SEP. 15, 2008. THEN THE CRUISE CONTROL WOULD ACCELERATE ON ITS OWN WHEN IN USE. BOTH HAVE CONTINUED TO HAPPEN SINCE THEN, ACCEPT NOW THE TRUCK IS NOT GETTING VERY GOOD GAS MILEAGE, THE GAUGES STOPPED WORKING ALL TOGETHER, AND THE CHECK ENGINE LIGHT IS NOW ON. THE TRUCK IS AT THE DEALERSHIP AS I TYPE THIS BEING LOOKED INTO. THERE IS A SERIOUS PROBLEM FROM WHAT I CAN SEE WHEN I DRIVE IT. SOMETHING ELECTRICAL FOR SURE, AND POSSIBLY ELSEWHERE INTERNALLY.

C-1190

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I AM CONCERNED TO HAVE MY FAMILY IN THE TRUCK WITH ME AT TIMES FROM THE WAY THE TRUCK DRIVES. ANOTHER CONCERN IS THE WARRANTY WILL BE UP IN A FEW THOUSAND MILES AND I AM CONCERNED THAT WHATEVER THE ELECTRICAL PROBLEM MAY BE, THEY COULD TRY TO SUGAR COAT IT SO IT LAST A COUPLE THOUSAND MILES, THEN THEY ARE NOT RESPONSIBLE FOR IT. I JUST WANT IT FIXED AND SAFE FOR MY FAMILY. \*TR

**Vehicle:** 2005 TOYOTA SIENNA  
**Location of Incident:** CHICAGO, IL

**NHTSA Summary:**  
JULY 2008 I WAS DRIVING MY 2005 TOYOTA SIENNA I WAS ON THE RAMP TO ENTER THE HIGHWAY DOING 35MPH WHEN MY CAR SUDDENLY JUMPED TO 75MPH WITHOUT ME TOUCHING THE GAS PEDAL. I STAYED CALM BECAUSE MY KIDS WERE IN THE CAR WITH AND I DIDN'T WANT TO SCARE THEM. THANK GOD I JUMPED IN THE NEXT LANE WHERE WERE NOT TO MANY CARS AND JUST PRESSED THE BRAKE PEDAL HARD THANK GOD THE CAR SLOWED DOWN. I KNEW SOMETHING WAS WRONG WITH THE CAR. I TOOK TO THE MECHANIC HE FOUND NOTHING OUT OF PLACE. IT LATER HAPPENED AGAIN MAYBE TWO WEEKS LATE THIS TIME I WAS ON CITY STREETS AND DID THE BASICALLY THE SAME THING AS BEFORE. I RECENTLY SAW REPORTS AND I WAS NOT ALONE AND WAS SOMETHING VERY WRONG WITH THE TOYOTA SYSTEM. PLEASE DO SOMETHING BEFORE ANY MORE PEOPLE GET HURT. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10302877  
**Date of Incident:** 20080915  
**Vehicle:** 2009 TOYOTA COROLLA  
**Location of Incident:** SAN DIEGO, CA

**NHTSA Summary:**  
2009 TOYOTA COROLLA - GAS PEDAL STICKING PROBLEM WHILE ON THE FAMILY DRIVEWAY TRAVELING AT ABOUT 5 MILES PER HOUR, CAR RAPIDLY ACCELERATED FORWARD AFTER I REMOVED MY FOOT FROM THE GAS PEDAL. PUSHING THE BRAKE DOWN AS HARD AS I COULD THE CAR CONTINUED TRAVELING FORWARD CRASHING INTO MY DAUGHTER'S CAR, THEN PUSHING HER CAR THROUGH THE RIGHT SIDE OF THE GARAGE DOOR & THROUGH THE HOUSE WALL COMPLETELY DAMAGING MY DAUGHTER'S CAR (TOTALLED) DESTROYING THE GARAGE DOOR WHILE SMASHING DOWN THAT PORTION OF THE HOUSE WALL. AND THEN FURTHER INSIDE COLLIDING INTO A LARGE DRYER & WASHING FINALLY COMING TO REST AGAINST AN INSIDE HOUSE WALL BEAM & CONCRETE. MY DAUGHTER WAS ALMOST HIT AS SHE WAS ON THE OTHER SIDE OF THE WALL WHEN THE CARS CRASHED THROUGH. WE'VE ALWAYS MAINTAINED THAT IT WAS TOYOTA'S FAULT AS IT WAS WITHOUT QUESTION. A CASE OF UNINTENDED ACCELERATION--THE CAR RAPIDLY ACCELERATED FORWARD ON ITS OWN, BUT TOYOTA INSISTED IT WAS NOT THE CAUSE OF THEIR CAR. TOYOTA, AT MY COST AND OUR INSURANCE COMPANY, STATE FARM, MADE ALL THE REPAIRS TO THE CAR--TOYOTA REFUSED TO TAKE LIABILITY FOR INVOLVEMENT WITH THE CAUSE OF THE ACCIDENT. SO THERE WE WERE, WHO COULD REFUTE MIGHTY TOYOTA? THEY WERE THE PREMIER CAR COMPANY & THEY MADE ALMOST PERFECT CARS. OBVIOUSLY WITH THEIR 2ND RECALL IN A MATTER OF MONTHS THAT IMAGE HAS NOW BEEN SOMEWHAT DISPLED.

C-1191

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

IN SPEAKING WITH TOYOTA TODAY I WAS ADVISED THAT MY COROLLA WOULD NOT BE INCLUDED IN THEIR RECALL AS I WAS ADVISED THAT THE PEDAL ASSEMBLY IN MY CAR WAS MANUFACTURED IN JAPAN BY NIPPO-DENSO AND NOT THE PEDAL ASSEMBLY INVOLVED WITH THE SO-CALLED STICKING GAS PEDAL PROBLEM. AS THAT ASSEMBLY, WAS MANUFACTURED IN THE UNITED STATES BY CTS. WHILE I APPRECIATE WHAT TOYOTA STATED ABOUT DIFFERENT ASSEMBLIES, I CAN STATE UNEQUIVOCALLY MY CAR ACCELERATED FORWARD EVEN THOUGH I WAS PRESSING THE BRAKE PEDAL THE HOLD TIME WHILE THE CAR RACED FORWARD NO ONE INCURS SUCH DAMAGE PRESSING THE BRAKES. I WOULD ASK FOR YOUR REVIEW AND COMMENTS \*CN

**NHTSA ODI Number:** 10314051  
**Date of Incident:** 20080920  
**Vehicle:** 2006 TOYOTA SIENNA  
**Location of Incident:** CANTON, MA

**NHTSA Summary:**  
2006 TOYOTA SIENNA LE WITH BZ PACKAGE (VSA) - SAFETY ISSUE (ELECTRONICS): VEHICLE STABILITY CONTROL SYSTEM (VSA) IS UNSAFE DURING ROAD SLIPPERY CONDITIONS IF CRUISE CONTROL IS USED. THE SLIPPERY CONDITION COULD BE RAINY DAY OR SNOWING OR ICY ROAD CONDITIONS. THE INCIDENT OCCURED SEVERAL TIME. THE FIRST TIME I NOTICED THE ISSUE IS AROUND SEPTEMBER OF 2008. IT WAS HEAVY RAIN, I WAS DRIVING ON A HIGHWAY WITH NORMAL SPEED. THE VAN WAS SET TO CRUISE AT 65 MPH. I RAN OVER A SMALL POT OF WATER ON THE ROAD. ONE OF THE TIRE PROBABLY SLIPPED FOR A BRIEF MILLI-SECOND. THE VSA CONTROL KICKED IN (I CAN SEE THE VSA LIGHT FLASHES), THE VAN WAS THEN RUNNING FROM SIDE TO SIDE AND THE RPM SUDDENTLY JUMP UP (VIOLATENTLY). THE VAN WAS DIFFICULT TO CONTROL. I TAP THE BREAK TO DISENGAGE THE CRUISE CONTROL. THEN THE VAN WENT BACK TO NORMAL. 2ND INIDENT, ABOUT DECEMBER OF 2008, I WAS DRIVING ON THE HIGHWAY WITH LIGHT SNOW. THE VAN WAS CRUISING AT 55 MPH. THE VAN PASSED A SLIPPERY SPOT. THE VSA KICKED IN AND CAUSED VIOLENT LEFT AND RIGHT MOVEMENT OF THE VAN AS WELL AS SUDDEN ACCELERATION. THE INCIDENT ALMOST CAUSED AN ACCIDENT. SINCE THEN, I STOPPED USING CRUISE CONTROL ON THE RAINY OR SNOWY DAYS. BUT IF ANYONE OUT THERE WITH TOYOTA MINIVAN, I WOULD LIKE THEM TO KNOW IT IS A SERIOUSE POTENTIAL PROBLEM. I TOOK MY VAN TO BE

C-1193

**Location of Incident:** JACKSON, CA

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2007 TOYOTA TUNDRA. I HAD MY TUNDRA RUN AWAY WITH ME TWICE, BOTH TIMES IT OCCURRED WHEN I WENT TO PASSING GEAR WHILE IN CRUISE CONTROL. PROSPECT MOTORS IN JACKSON CA LOOKED INTO THE PROBLEM AND SAID IT WAS THE FLOOR MAT. I ARGUED WITH THE SERVICE GUY, BUT HE WOULDN'T LISTEN. I KNOW FOR SURE THAT DURING THE FIRST OCCURENCE THAT THE FLOOR MAT WAS SECURED, AND I WOULD BET THAT IT WASN'T THE ISSUE WITH THE SECOND INCIDENT. I USE CRUISE CONTROL A LOT BUT NO LONGER LEAVE IT ON WHEN USING PASSING GEAR. THE FIRST TIME INCIDENT, I WAS ABLE TO REGAIN SPEED CONTROL BY STOMPING ON BOTH THE BRAKE AND GAS PETALES. I WAS NEVER ABLE TO REGAIN SPEED CONTROL DURING THE SECOND INCIDENT. I HAD TO STAND ON THE BRAKE PEDAL WITH BOTH FEET AND PULL AGAINST THE STEERING WHEEL WHILE TRYING TO GET OFF TO THE SIDE OF THE ROAD SAFELY. ONCE OFF THE ROAD I WAS ABLE TO TURN OFF THE ENGINE. WE ALMOST CRASHED INTO THE ONCOMING TRAFFIC. ANY INFORMATION OR HELP WOULD BE GREATLY APPRECIATED. I HAVE NO FAITH IN TOYOTA'S REMEDY FOR THIS PROBLEM. THE FAILURE MILEAGE WAS 32,000 AND THE CURRENT MILEAGE WAS 33,000. UPDATED 03/10/10 \*BF

**NHTSA Summary:**  
THIS IS A SECOND COMPLAINT OF THE ETCH-INTELLIGENT SYSTEM DEFECT OF MY 2005 TOYOTA TACOMA WHICH IS CAUSING SUDDEN ACCELERATION. I REPORTED THIS INCIDENT IMMEDIATELY AFTER IT HAPPENED BUT MY TRUCK IS NOT LISTED ON THE RECENT RECALL LIST. (IT IS ON THE RECALL LIST FOR THE FLOOR MAT BUT NOT THE MORE ACCURATE RECALL FOR THE ETCH-INTELLIGENT SYSTEM.) ON OR ABOUT OCTOBER 2008, I WAS DRIVING FROM NEW JERSEY TO NORTH CAROLINA SOUTHBOUND ON I-95 WITH MY DAUGHTER. THE SPEED LIMIT ON 95 WAS 65 MPH. I WAS DRIVING AT A STEADY PACE OF 60-65 MPH. APPROXIMATELY 5 MILES AFTER I PASSED THE DELWARE BRIDGE, THE TRUCK SUDDENLY ACCELERATED. I TRIED TO BRAKE BUT THE TRUCK WOULD NOT STOP. THE BRAKE FELT LIKE IT WAS STUCK. I TRIED THE EMERGENCY BRAKE AND IT DID NOT DO ANYTHING. THE TRUCK ACCELERATED TO 70 MPH OR SO BUT I CANNOT REMEMBER EXACTLY AND I WAS BRAKING THE WHOLE TIME. I WAS ABLE TO DRIVE THE TRUCK TO THE SIDE AND FORCE THE GEAR INTO PARK. THE ENGINE LURCHED A BIT BUT STOPPED AND THERE WAS SMELL OF BURNING ENGINE AND TIRE. THANK GOD THERE WERE NOT MANY CARS ON THE ROAD THAT DAY. PLEASE HELP ME IN ADDING 2005 TOYOTA TACOMA TO THE LIST DEFECTIVE ETCH-INTELLIGENT SYSTEM. TW\*

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10320164  
**Date of Incident:** 20081013  
**Vehicle:** 2008 TOYOTA HIGHLANDER  
**Location of Incident:** SANTA CLARA, CA  
**NHTSA Summary:**  
NOTED RECENTLY ON MYCARSTATS.COM SIX COMPLAINTS REGISTERED WITH NHTSA REGARDING 2008 HIGHLANDER BRAKE PROBLEMS AND FIVE COMPLAINTS REGISTERED WITH NHTSA REGARDING 2008 HIGHLANDER ELECTRIC PROBLEMS THAT INVOLVE BRAKES AND ELECTRONIC CONTROLS. I AM SUBMITTING THE FOLLOWING EXPERIENCES WITH MY 2008 HIGHLANDER BECAUSE THEY MIRROR MANY OF THE COMPLAINTS. THE BRAKES ON MY HIGHLANDER HAVE BEEN AN ISSUE FROM THE FIRST WEEKS OF OWNERSHIP. I HAVE TAKEN THE CAR TO A LOCAL TOYOTA DEALERSHIP AND COMPLAINED ABOUT THE BRAKES. THE DEALERSHIP DID ADJUST THE EMERGENCY BRAKE WHICH THEY INDICATED WAS OUT OF ADJUSTMENT BUT HAVE STATED THAT THE BRAKES ARE WORKING NORMALLY. MY SPECIFIC COMPLAINT IS BRAKE RESPONSE. THERE IS ROUGHLY AN INCH OF PEDAL TRAVEL BEFORE THE BRAKES BEGIN TO RESPOND. IF ONE MUST MAKE A HARD EMERGENCY STOP THE VSC CONTROL WILL ENGAGE. ON ONE OCCASION, WHILE DRIVING IN TOWN A CAR RAN THROUGH A TRAFFIC LIGHT IN FRONT OF ME. I HIT THE BRAKES HARD - THE VSC LIGHT CAME ON - AND THE CAR SLOWLY STOPPED. THERE WAS NO ACCIDENT BUT IT WAS EXTREMELY CLOSE. I HAVE FOUND THAT IF I ROUTINELY PRESS ON THE BRAKE PEDAL UNTIL THE VSC LIGHT COMES ON THAT THE PEDAL TRAVEL IS REDUCED. I TOOK THE HIGHLANDER TO AAA AUTO DIAGNOSTICS AND THEY CONFIRMED THE PEDAL/VSC. AAA WAS UNABLE TO READ THE HIGHLANDER COMPUTER BECAUSE THEY DID NOT HAVE THE PROPRIETARY TOYOTA COMPUTER INTERFACE. THE LOCAL TOYOTA DEALER HAS STATED THAT THE DEPRESSED PEDAL AND VSC LIGHT RESPONSE IS NORMAL. I ALSO NOTED COMPLAINTS OF SUDDEN ACCELERATION WHEN PUTTING THE CAR INTO GEAR. I HAVE NEVER EXPERIENCED A SURGE TO THE DEGREE MENTIONED IN THE COMPLAINTS REFERENCED ABOVE, HOWEVER, WHILE PUTTING THE CAR INTO DRIVE WITH MY FOOT ON THE BRAKE I HAVE HAD THE CAR SURGE FORWARD. I NOW ALWAYS HAVE THE EMERGENCY BRAKE ON WHILE PUTTING THE VEHICLE INTO DRIVE. THE DATE LISTED BELOW IS THAT OF MY FIRST COMPLAINT TO THE LOCAL TOYOTA DEALER.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

INCIDENTS AS FOLLOWS: 24 JULY 2008 - TRAVELING TO ROANOKE VA SOUTH ON I-81. FEMALE OWNER DRIVING. CRUISE CONTROL ON. DAYTIME. RAINING GENTLY. CAR MADE A ROARING SOUND (LIKE REVVING THE MOTOR WHILE IN NEUTRAL) AND SUDDENLY INCREASED SPEED RAPIDLY. WE GOT THE CAR STOPPED WITHOUT AN ACCIDENT. 28 AUG 2008 - TRAVELING TO ROANOKE VA SOUTH ON I-81. FEMALE OWNER DRIVING. CRUISE CONTROL ON. NIGHT. RAINING VERY HARD. CAR SUDDENLY MADE THE ROARING SOUND AND THE CAR ACCELERATED RAPIDLY. WE GOT THE CAR STOPPED WITHOUT AN ACCIDENT. 17 OCT 2008 - ON A CITY STREET IN LYNCHBURG VA. MALE OWNER DRIVING. CRUISE CONTROL OFF. DAYTIME. HAD BEEN RAINING HARD ALL DAY. DRIVING SLOWLY IN HEAVY TRAFFIC. CAR MADE ROARING SOUND AND ACCELERATED RAPIDLY. CAR HIT VEHICLE IN FRONT OF IT. NO SERIOUS DAMAGE. 14 OCT 2009 - TRAVELING ON CITY STREET IN HENRICO VA. MALE OWNER DRIVING. CRUISE CONTROL OFF. SLOWING DOWN TO MAKE A LEFT TURN. MORNING AND JUST STARTING A MISTY RAIN. CAR MADE ROARING SOUND AND CAR ACCELERATED RAPIDLY. NO ACCIDENT. MCGEORGE TOYOTA, BROAD ST., HENRICO(RICHMOND)VA HAS MADE EVERY EFFORT THEY KNOW TO TRY TO FIND OUT WHAT CAUSED THESE INCIDENTS, WITHOUT RESULTS. THEY KEPT THE CAR AND DROVE IT IN GOOD AND RAINY WEATHER AND DID NOT DUPLICATE THE PROBLEM. THEY CALLED THE ENGINEERS IN CALIFORNIA WHO DON'T HAVE ANSWERS. \*TR THIS MORNING I FILED A SAFETY COMPLAINT ABOUT MY 2003 TOYOTA CAMRY XLE DUE TO THE SUDDEN ACCELERATION WITHOUT WARNING PROBLEM. AT THAT TIME I GAVE INCORRECT FAILURE MILEAGE AS 50,000 MILES. WHEN I CHECKED MY RECORDS OF MILEAGE AT GAS FILL UPS I FOUND THE FOLLOWING: 24 JULY 2008. MILEAGE AT TIME OF INCIDENT WAS BETWEEN 58026 AND 58444. 28 AUG 2008. MILEAGE WAS BETWEEN 59090 AND 59463. 17 OCT 2008. MILEAGE WAS BETWEEN 60257 AND 60540. MILEAGE AT TIME OF ACCIDENT WAS APPROXIMATELY 60399. 14 OCT 2009. MILEAGE WAS BETWEEN 64205 AND 64532. THAT IS AS CLOSE AS I CAN PIN DOWN THE FAILURE MILEAGE. I USED THE 10/17/2008 DATE FOR APPROX. INCIDENT DATE BECAUSE THAT WAS THE ONE TIME THAT OUR CAR HIT THE VEHICLE IN FRONT OF US. THE OTHER THREE TIMES WE DID NOT HAVE AN ACCIDENT. I TRUST YOU CAN PUT THIS INFORMATION WITH THE REPORT I FILED THIS MORNING. NOTE: MY E-MAIL ADDRESS MAY CHANGE WITHIN THE NEXT WEEK OR SO AS I AM PLANNING ON HOOKING UP TO HIGH SPEED INTERNET ACCESS. THANK YOU FOR YOUR ATTENTION TO THIS MATTER. \*TR CHARLES & ALGENE ASHWORTH

SUDDEN ACCELERATION BANK DRIVE THROUGH AFTER COMPLETING BUSINESS TRANSACTION. AFTER STEPPING ON THE ACCELERATOR CAR LEAPED FORWARD SUDDENLY GOING OVER A BERMANS CRASHING INTO TWO VEHICLES AMAGING BOTH MY VEHICLE WAS TOTALLED\*CW

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10246750  
**Date of Incident:** 20081025  
**Vehicle:** 2008 TOYOTA TUNDRA  
**Location of Incident:** CHANDLER, AZ

**NHTSA Summary:**  
I HAVE A 2008 TOYOTA TUNDRA TRUCK 5.7 V8 EXTENDED CAB 4X4 MY WIFE AND I DROVE FROM CHANDLER AZ TO IDAHO ,THEN TO YELLOWSTONE, THEN BACK TO SALT LAKE AND THEN TO PHOENIX AZ TILL THEN EVER THING WAS GREAT THE TRUCK RAN VERY WELL. WE COMING DOWN INTERSTATE 17 FROM FLAGSTAFF TO PHOENIX ABOUT 3/4 OF THE TO PHOENIX. I WAS TRAVELING AT THE SPEED LIMIT AT 75 MPH AND HAD JUST PUNCHED THE ACCELERATOR PEDAL TO PASS A CAR WHILE GOING UP HILL. THE ACCELERATOR PEDAL WENT DOWN TO THE FLOOR AND WOULD NOT RELEASE BACK AS NORMAL. THE TRUCK PROCEED TO ACCELERATE TO 90 MPH AND AT THIS POINT I AGAIN PUSHED 5-6 TIMES ON THE ACCELERATOR PEDAL TO HAVE IT RELEASE BUT IT CONTINUED TO GO FASTER TO 100 MPH AT THIS POINT I KNEW WE IN DEEP TROUBLE AND DANGER. I WAS PUSHING HARD ON THE BRAKE AND TRYING TO MOVE FROM THE LEFT LANE IN TRAFFIC AT NIGHT TO THE RIGHT LANE TO TRY AND STOP THE TRUCK. I GOT TO THE RIGHT LANE AND TO THE SHOULDER AND HIT THE EMERGENCY BRAKE AND WAS STAMPING HARD ON THE BREAK PEDAL AND TRYING TO SHIFT OUT OF GEAR TO NEUTRAL. IN THE PANIC I AM NOT SURE WHAT ALL HAPPENED BUT THE TRUCK LUNGED FORWARD VERY HARD THEN DIED / ENGINE STOPPED. I STARED THE ENGINE AND TESTED THE ACCELERATOR PEDAL AND IT SEEMED TO BE FINE. I CHECKED FOR THE LOGICAL THINGS LIKE THE HEAVY RUBBER FLOOR MAT. HAD IT GOT PUSHED UP ON THE PEDAL BUT THIS WAS NOT THE CASE AS IT WAS 4 INCHES AWAY AND IT HAS RUBBER KNOBS OR STUDS THAT PUSH INTO THE CARPET AND WILL NOT SLIDE ALSO MY LEFT FOOT WAS FIRMLY PLANTED ON THE MAT AT ALL TIMES. NO WAY THAT MAT WAS THE PROBLEM. THERE WAS NO DIRT ETC AS THE ACCELERATOR HAS A HEAVY SPRING AND THE PEDAL IS 3-4 INCHES OFF THE CARPET. I DO NOT FEEL SAFE DRIVING THIS AS IT SCARED US A LOT AND WE HAVE LOST CONFIDENCE IN THIS TRUCK AND TOYOTA. \*TR

**Additional Summary:**

**Toyota ID Number:**

**NHTSA ODI Number:** 10246873  
**Date of Incident:** 20081027  
**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** ANCHORAGE, AK

**NHTSA Summary:**  
ACCELERATOR WAS "FLOORED" AT ABOUT 30 MPH TO PASS A CAR. THE AUTOMATIC TRANSMISSION SHIFTED DOWN AND THE TRUCK ACCELERATED TO ABOUT 45. WHEN I RELEASED THE THROTTLE, THE THROTTLE REMAINED WIDE OPEN WHEN I LIFTED MY FOOT AND DIDN'T RELEASE WHEN I KICKED IT SEVERAL TIMES. I SLOWED WITH MY BRAKES, BUT THEY SOON FADED AND I FOUND MYSELF OUT OF CONTROL UNTIL I FOUND THE PRESENCE OF MIND TO TURN THE IGNITION TO THE OFF POSITION. I COASTED OFF OF THE ROAD AT A FAIRLY HIGH RATE OF SPEED TO MISS OTHER TRAFFIC AND CAME TO A STOP WITH MY BRAKES SMOKING. AFTER A FEW MINUTES, I RESTARTED THE TRUCK AND FOUND THAT THE THROTTLE HAD RETURNED TO NORMAL. THIS HAS NEVER HAPPENED BEFORE AND I HAVE CALLED THE DEALER SEEKING AN APPOINTMENT TO EXAMINE THE TRUCK. THE TRUCK IS STILL UNDER WARRANTY. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316020  
**Date of Incident:** 20081027  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** NEWTOWN, PA

**NHTSA Summary:**  
THE CAR REVS FOR NO APPARENT REASON AND THE RPM'S GO VERY HIGH. FIRST TIME IN OCT 2008 BACKING OUT OF A PARKING THE REVS SHOT UP. TOYOTA SERVICE FOUND NOTHING. SECOND OCCASSION JULY 2009 WHILE AT A LIGHT THE RPM'S SHOT UP FOR NO APPARENT REASON. FORTUNTLY FOOT WAS ON THE BRAKE, SO NO DAMAGE DONE. ALSO NOTICED THAT EVEN AFTER LETTING FOOT OFF THE GAS PEDAL THE REVS WOULD NOT COME DOWN FOR SOME TIME. NON TOYOTA SERVICE STATION LOOKED AT IT, AND CLEANED THE THROTTLE PLATE. THIRD OCCASSION IN JAN 2010 MY WIFE WAS DRIVING DOWNHILL WHEN SUDDENLY THERE WAS A SURGE AND THE CAR RPM'S SHOT UP FOR NO APPARENT REASON. SHE BRAKED HARD AND EVERYTHING WENT BACK TO NORMAL. I TOOK THE CAR TO TOYOTA AND THEY COULD NOT FIND ANYTHING. THEY BLAMED IT ON THE FLOOR MATS, WHICH I DISAGREED WITH AS THERE IS A REASONABLE CLEARANCE GAP BETWEEN THE GAS PEDAL AND THE MATS. A WEEK LATER I LEFT THE CAR WITH TOYOTA FOR 3 DAYS AND THEY DROVE IT FOR TWO TEST RUNS AND THE MANAGER TOOK IT HOME (158 MILES) AND THEY COULD NOT RECREATE THE PROBLEM. TOYOTA HAVE TOLD ME THERE IS NOT A PROBLEM WITH MY 2005 CAMRY AS IT'S NOT ON THE RECALL LIST. I DISAGREE WITH THIS STATEMENT.

**NHTSA Summary:**  
I HAVE FILED A COMPLAINT WITH CONSUMER AFFAIRS AS WELL AS TOYOTA EXPERIENCE REGARDING THE GAS PEDAL / FLOOR MAT ISSUE. THIS HAS OCCURRED TWO TIMES TO MYSELF AS WELL AS THREE TIMES TO MY HUSBAND, THANKFULLY IT DID NOT RESULT IN ANY INJURIES. I WANT MY FLOOR MATS REPLACED AT THE LEAST, MY FLOOR IS DAMAGED BY NOT BEING ABLE TO USE MATS AND THE FEAR OF IT TALKING OFF REALLY PREVENTS ME FROM DRIVING IT WITHOUT EXTREME CAUTION AND CONSTANT WORRYING. I WAS GIVEN A CUSTOMER CASE # 1002131342 AND WAS TOLD TO SPEAK WITH MARISOL BETANCOURT BECAUSE THEY WERE UNDER THE IMPRESSION THAT THERE WERE SOME NEW MATS AVAILABLE BUT THIS WAS THE RESPONSE I RECEIVED FROM: ---- MARISOL BETANCOURT <MBETANCOURT@TOYOTACV.COM> WRITE: HELLO TONY GONZALES, I SPOKE TO YOU ON THE PHONE REGARDING

**Location of Incident:** HOLLAND, PA

**NHTSA Summary:**

A DRIVER OF THE LS460 SERIES FOR 16 YEARS. NEW CAR EVERY 3 YEARS. MY 2007 LS460 WAS THE 3RD CAR AT A RED LIGHT WHEN IT BEGAN TO ACCELERATE WITH MY FOOT ON THE BRAKE. MILD 2ND EPISODE 2/7/2009 TOOK ALL OF MY ENERGY TO HOLD THE CAR FROM SMASHING INTO THE 2 CARS AHEAD OF ME. SHIFTED IN NEUTRAL AND THEM PARK. CAR FINALLY STOPPED. TOOK THE CAR TO MY HOSPITAL PARKING LOT. LEXUS DEALER PICKED-UP THE CAR AND KEPT IT FOR 2 WEEKS. TOLD NOTHING WRONG. WAS THEN SENT TO A HEARING WITH THE NATIONAL CENTER FOR DISPUTE SETTLEMENT. THE LEXUS ENGINEER STATED THAT NO ELECTRICAL FAULT WAS DOCUMENTED ON THE COMPUTER. THE RULING WAS AGAINST ME AS "IT ONLY HAPPENED ONCE". I WROTE TO THE PRESIDENT OF LEXUS OFFERING TO SWITCH CARS WITH HIM. NO RESPONSE. I DO NOT ALLOW MY WIFE TO DRIVE THIS CAR. DO NOT DRIVE WITH MY GRANDCHILDREN IN THIS CAR. I LIMIT MY DRIVING IN THIS CAR AND STAY A GREAT DISTANCE BEHIND VEHICLES IN FRONT OF ME. HAVE CALLED THE MANAGER OF MY DEALERSHIP 11 TIMES TO GET A FINAL ANSWER- THAT "HE COULD DO NOTHING FOR ME". THE LEXUS PEOPLE ARE WELL AWARE OF MY INCIDENT HAVE LETTERS FROM THEM.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ON NOVEMBER 4, 2008 AS I WAS ATTEMPTING TO PARK MY CAR AT THE WILLIAMSBURG, VA POST OFFICE AND WAS ABOUT 2/3 OF THE WAY INTO THE PARKING SPOT WITH MY FOOT ON THE BRAKE. THE ENGINE ROARED, THE CAR ACCELERATED, JUMPED THE CURB AND HIT THE SIDE OF THE BRICK BUILDING. FORTUNATELY THERE WERE NO PEDESTRIANS IN MY PATH. WE HAD THE CAR TOWED TO CASEY TOYOTA IN WILLIAMSBURG WHERE THEY INSPECTED THE BRAKES AND FOUND THAT THEY WERE WORKING PROPERLY. WE THEN REQUESTED THAT TOYOTA SEND A REPRESENTATIVE TO INSPECT THE CAR TO DETERMINE WHAT MIGHT HAVE CAUSED THIS ACCIDENT. THE INSPECTOR'S REPORT STATES THAT HE FOUND NOTHING WRONG WITH THE CAR. (THIS OF COURSE ALL TOOK PLACE PRIOR TO THE RECENT RECALLS). WE INCURRED EXPENSES TOTALING OVER \$600. BECAUSE OF THIS ACCIDENT. SINCE WE FELT THIS CAR WAS UNSAFE TO DRIVE, WE DECIDED TO TRADE IT IN AND HAD TO ACCEPT A REDUCED TRADE-IN BECAUSE IT WAS INVOLVED IN AN ACCIDENT AND ALSO INCURRED GREAT EXPENSE IN PURCHASING A NEW CAR. RESEARCH HAS SHOWN THAT THIS WAS NOT AN ISOLATED INCIDENT AS THE RECENT RECALLS HAVE SHOWN.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10252860  
**Date of Incident:** 20081105  
**Vehicle:** 2008 LEXUS ES350  
**Location of Incident:** CHARLOTTE, NC

**NHTSA Summary:**

ON NOVEMBER 5, 2008 I WAS DRIVING ON A FREEWAY IN MY 2008 LEXUS ES 350 WITH THE CRUISE CONTROL ON. I GAVE THE CAR A LITTLE EXTRA GAS TO PASS ANOTHER CAR AND THE CAR JUST TOOK OFF. I TRIED TO DISENGAGE THE ACCELERATOR BY TRYING TO TURN OFF THE CRUISE CONTROL SWITCH AS WELL AS TAPPING ON THE BRAKE PEDAL, BUT IT WOULD NOT DISENGAGE. I TRIED TO TURN OFF THE ENGINE BY PUSHING THE KEYLESS IGNITION BUTTON, BUT IT WOULD NOT TURN OFF. I CHECKED THE FLOOR TO MAKE SURE THAT THERE WASNT ANYTHING ON THE ACCELERATOR, AND THERE WASNT. I THEN PUT THE CAR IN NEUTRAL, BUT WHEN I DID THIS, THE ENGINE SOUNDED AS IF IT WERE GOING TO EXPLODE, SO I PUT IT BACK IN GEAR. BY THIS TIME, I WAS GOING WELL OVER 100 MPH. MY ONLY CHOICE WAS TO STAND ON THE BRAKES. WITHIN SECONDS, THE CAR WAS IN A CLOUD OF SMOKE COMING FROM THE 4 WHEELS/BRAKES. THE CAR BEGAN TO SLOW AS THANKFULLY THE BRAKES WERE STRONGER THAN THE ENGINE WHICH WAS GOING AT ITS MAXIMUM RPM'S. THE CAR WENT OVER A MILE BEFORE FINALLY COMING TO A STOP. I WAS THEN ABLE TO PUT THE CAR IN PARK AND STOP THE ENGINE. AFTER A FEW MOMENTS, WHEN I HAD CALMED DOWN A BIT, I STARTED THE ENGINE AGAIN AND IT IMMEDIATELY START RACING AT MAXIMUM RPM'S AGAIN, SO I SHUT IT OFF AND CALLED HENDRICK LEXUS. THEY SENT A TOW TRUCK TO TOW THE CAR IN. WHEN WE GOT TO THE DEALERSHIP, I TOLD THE SERVICE DIRECTOR THAT I WAS LUCKY THAT I WASNT KILLED AND I DID NOT WANT TO EVER GET IN THAT CAR AGAIN. HE STATED THAT HE UNDERSTOOD THE SERIOUSNESS OF THE EVENT. LEXUS INVESTIGATED AND SAID THAT THERE MUST HAVE BEEN SOMETHING HEAVY ON THE ACCELERATOR. THIS IS SIMPLY NOT TRUE. THE "EXPERTS" THAT LEXUS BROUGHT IN FROM OUT TO DO AN INVESTIGATION NEVER EVEN ACKNOWLEDGED THAT I WAS UNABLE TO DISENGAGE THE CRUISE CONTROL DURING THIS LIFE THREATENING SITUATION. AN INTERNET SEARCH HAS DETERMINED THAT THERE ARE MORE THAN 40 CASES OF "RUNAWAY ACCELERATOR" REPORTED TO THE NHTSA ON THE ES350, AND MANY OF THESE INCIDENTS HAVE RESULTED IN SERIOUS CRASHES AND PERSONAL INJURIES. \*TR

**Date of Incident:** 20081105  
**Vehicle:** 2005 SCION XB  
**Location of Incident:** PORTALES, NM

**NHTSA Summary:**

I WAS DRIVING MY 2005 SCION XB TO MY OFFICE. AS I SLOWED DOWN AND TURNED INTO A PARKING SPACE WHEN I APPLIED THE BREAKS THE ENGINE ACCELERATED TO 3000 RPM'S JUMPED THE CURB AND RAN INTO THE BACK OF THE BUILDING. WHEN I REPORTED THESE FACTS TO A TOYOTA DEALER THEY SAID THEY HAVE NEVER HEARD OF A CAR DOING THAT AND IT MUST HAVE BEEN A MISTAKE ON MY PART. SINCE THE REPAIR OF THE CAR IN A PERIOD OF TWO YEARS THE ENGINE HAS DONE THIS FOUR OTHER TIMES THE REPAIR PEOPLE SAY THEY CANT FIX IT UNLESS IT HAPPENS WHEN THEY ARE WORKING ON THE CAR. I BELIEVE THE PROBLEM IS IN THE ELECTRONIC CONTROLS FOR THE ACCELERATOR. I GET NO RESPONSE FROM TOYOTA.

**NHTSA Summary:**  
TL\* THE CONTACT OWNS A 2006 TOYOTA TACOMA PRE-RUNNER. THE CONTACT STATED THE ACCELERATOR PEDAL FAILURE HAPPENED ON TWO OCCASIONS WITHIN ONE MONTH SINCE HE HAS OWNED THE VEHICLE. THE FIRST INCIDENT THE CONTACT STATED HAPPENED ON NOVEMBER 8, 2008. THE CONTACT WAS DRIVING APPROXIMATELY 35 MPH AND CAME TO A ROLLING STOP. THE CONTACT STATED THAT WHEN HIS FOOT WAS ON THE BRAKE THE VEHICLE ACCELERATED THEN THE CONTACT PRESSED MORE FIRMLY, BUT THE BACK TIRES STARTED TO SPIN IN ACCELERATION. THE CONTACT WAS ABLE TO PUT THE VEHICLE IN NEUTRAL THEN SHUTTING THE VEHICLE OFF. THE SECOND INCIDENT OCCURRED ON DECEMBER 7, 2008. THE CONTACT STATED WHILE PULLING INTO HIS GARAGE, HE PLACED HIS FOOT ON THE BRAKES, AND THE BACK TIRES OF THE VEHICLE SPUN INTO ACCELERATION ONTO HIS CONCRETE DRIVEWAY. THE CONTACT STATED THAT SMOKE CAME FROM THE TIRES. THE VEHICLE WAS TAKEN TO THE DEALER FOR DIAGNOSTIC AND TESTING. THE DEALER COULD NOT DUPLICATE THE PROBLEM. THE DEALER STATED THE CONTACT MUST OF HAD HIS FOOT ON THE BRAKE AND THE ACCELERATOR PEDAL AT THE SAME TIME. THE CONTACT STATED THAT THE FLOOR MAT WAS NOT AGAINST THE ACCELERATOR, BUT SECURED ON THE FLOOR TABS. THE CONTACT STATED THAT THE VEHICLE HAS NOT ACCELERATED SINCE 2008. THE APPROXIMATE FAILURE MILEAGE WAS 15000. THE CURRENT MILEAGE WAS 25,000.

**NHTSA Summary:**  
I WAS INITIALLY TRAVELING ON A TWO LANE COUNTRY ROAD AND HAD THE CRUISE CONTROL SET AT 55 MPH. AS I APPROACHED A FOUR LANE DIVIDED HIGHWAY AHEAD I WAS REQUIRED TO STOP, THUS DISENGAGING THE CRUISE CONTROL. I PULLED ONTO THE FOUR LANE HIGHWAY AND FLOORED THE ACCELERATOR TO QUICKLY REACH THE 65 MPH SPEED LIMIT. WHEN I WAS AT THE SPEED LIMIT I EASED OFF OF THE PEDAL IN ORDER TO CRUISE AT 65. THE VEHICLE CONTINUED TO ACCELERATE. AT THIS POINT I REALIZED THAT THE ACCELERATOR PEDAL WAS "GLUED" TO THE FLOOR. THINKING IT WAS STUCK, I STOMPED ON IT A COUPLE OF TIMES HOPING TO FREE IT. THIS WAS TO NO AVAIL. IN THESE FEW SECONDS I HAD REACHED APPROXIMATELY 95 MPH. I HAD FORGOTTEN THAT THE CRUISE CONTROL WAS STILL ON BUT NOT SET. I TURNED OFF THE IGNITION AND COASTED TO THE SIDE OF THE ROAD. I HAVE NO IDEA IF THE CRUISE CONTROL WAS THE CULPRIT, HOWEVER, MY IMPRESSION WAS THAT THE THROTTLE LINKAGE WAS NOT BINDING, BUT AGAIN, I DO NOT REALLY KNOW. I CAN THINK OF NO CIRCUMSTANCES WHERE THIS COULD BE CONSIDERED NORMAL. I TRIED TO DUPLICATE THE CONDITION WITH THE CRUISE BOTH ON AND OFF BUT WAS UNABLE TO. I PLAN ON NOTIFYING TOYOTA ALSO. \*TR

**Vehicle:** 2009 TOYOTA CAMRY  
**Location of Incident:** BOGART, GA

**NHTSA Summary:**  
DURING THE FALL OF 2008 I PURCHASED A NEW 2009 CAMRY. NOVEMBER OF 2008 I WAS DRIVING AT 70 MPH WHEN THE CAR BEGAN TO ACCELERATE FASTER WITHOUT PRESSING THE ACCELERATOR. WHEN I RETURNED HOME I TOOK THE CAR TO THE LOCAL TOYOTA DEALER AND EXPLAINED THE PROBLEM. THEY CHECKED IT, DROVE IT AND SAID THEY DIDNT SEE ANYTHING WRONG WITH THE VEHICLE. IVE HAD SEVERAL OTHER INCIDENTS OF ACCELERATION OVER THE NEXT YEAR. IVE REMOVED THE FLOOR MAT. LAST WEEK I WAS AT THE A SHOPPING MALL AND WAS WAITING TO TURN DOWN A LANE WHEN THE CAR ACCELERATED. I WOULD HAVE HURT SOMEONE IF ANYONE HAD BEEN STANDING THERE. I CALLED THE TOYOTA COMPANY AGAIN AND THEY SAID THE RECALL ONLY REFERS TO FLOOR MAT PROBLEMS. \*TR

CRASHED INTO A BUILDING. \*JB, LOST BRAKING POWER AND THERE WAS A CRUNCHING SOUND, HAD BOTH FEET ON BREAKING PEDAL & TRUCK WOULDN'T STOP. IT WAS STILL ACCELERATING AND ABS/ANTI SKID LIGHT CAME ON. \*TR

**Additional Summary:**

On November 24, 2008 I was driving the above listed automobile and an unusual accident occurred. I was traveling down an arterial street in Denver, Colorado at 4:30 P.M. when this car suddenly sped forward for about one quarter of a city block, veering to the left and demolished one car. The Toyota then continued another quarter of a block and destroyed another car. Then the Toyota turned completely in the other direction and demolished a parked car another quarter of a block away. The car then continued its journey and only came to a stop after it had run into a building another quarter of a block away.

The only words I uttered to the person who opened the door to help me out of the Toyota were: "Turn off the engine, the gas pedal is stuck."

**Location of Incident:** LONG BEACH, CA

**NHTSA Summary:**

ON SEPT 25, 2007 WE PURCHASED FOR MY WIFE A NEW 2008 CAMRY HYBRID AT LONGO TOYOTA, EL MONTE, CA. SHE EXPERIENCED SEVERAL PROBLEMS (DEAD STARTER BATTERY FROM HEADLIGHTS STAYING ON OR COMING ON AFTER PARKING, CAR NOT DECELERATING WHEN FOOT TAKEN OFF ACCELERATOR, ODD THINGS WITH AUTO DOOR LOCKS) THE FIRST MONTH, AND WHEN WE CALLED THE DEALER THEY TALKED US INTO ATTENDING A NEW OWNERS MEETING, SO WE COULD BECOME MORE FAMILIAR WITH THE CAR. WHEN WE BROUGHT THESE THING UP DURING THE MEETING, MOST OF IT WAS EXCUSED AS BEING UNFAMILIAR WITH THE CAR FEATURES, ALTHOUGH THEY TOOK THE CAMRY AND AFTER 15 MINUTES TOLD US NOTHING WAS WRONG WITH THE HEADLIGHTS. A SUPPOSED TOYOTA HEADQUARTERS REP STATED TO ME, "THE LITTLE WOMAN ISN'T THAT TECHO, IS SHE?" A MONTH LATER SHE WAS STOPPED GOING TO WORK IN THE EARLY MORNING BY CHP, FOR DRIVING WITHOUT HEADLIGHTS BEING ON, BUT WAS NOT TICKETED BECAUSE THE OFFICER WITNESSED THE HEADLIGHT SWITCH WAS ON. (WE STILL NOTICE THE HEADLIGHT DOING ODD THINGS, AND THE SWITCH IS IN THE ON POSITION, NOT THE AUTO POSITION). BACK TO THE DEALER, NO PROBLEM FOUND. EARLY NOVEMBER 2009 WE RECEIVED FROM TOYOTA MOTOR SALES USA A "POTENTIAL FLOOR MAT INTERFERENCE WITH ACCELERATOR PEDAL SAFETY RECALL CAMPAIGN (INTERM NOTICE)" WHICH STATED "WE WILL NOTIFY YOU AGAIN AS SOON AS A CAMPAIGN REMEDY IS AVAILABLE FOR YOUR VEHICLE". WE HAVE HEARD NOTHING SINCE THAT TIME, EXCEPT FOR A SEALED OVERSIZED BUSINESS ENVELOPE LAST WEEK, WHICH WAS NOT ABOUT A FIX TO THE VEHICLE PROBLEMS, BUT SALES MATERIALS ON THE NEW 5TH GENERATION 4RUNNER. TOYOTA IS STILL NOT OWNING UP TO ALL THE DEFECTS IN THE CAMRY HYBRID.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10318193  
**Date of Incident:** 20081201  
**Vehicle:** 2005 TOYOTA AVALON  
**Location of Incident:** BALTIMORE, MD  
**NHTSA Summary:**

WE PURCHASED A 2005 TOYOTA AVALON. SINCE 2007, WE COMPLAINED OF ERRATIC ACCELERATION AND DOWNSHIFTING PROBLEMS. WE ALSO REPORTED ELECTRICAL ISSUES INVOLVING THE DASHBOARD LIGHTS BLINKING ON AND OFF. EACH RESPONSE WAS 6 YOUR CAR PASSED ALL OF OUR DIAGNOSTIC TESTS. LAST YEAR, WHILE ACCELERATING FOR A TRAFFIC LIGHT, OUR CAR SURGED FORWARD HITTING A VEHICLE. LUCKILY, NO ONE WAS HURT. ON JANUARY 25, 2010, WHILE ACCELERATING ON A BRIDGE INCLINE, THE CAR DID NOT SLOW WHEN THE GAS PEDAL WAS RELEASED. I APPLIED THE BRAKES AND STERED OFF THE ROAD HITTING A CURB. I CONTACTED OUR LOCAL DEALER. AFTER PERFORMING DIAGNOSTIC TESTS, WE WERE INFORMED THE VEHICLE WAS FINE. THE SURGING COULD NOT BE EXPLAINED. WHEN ASKED IF THE CAR HAD THE CTS GAS PEDAL, THE SERVICE MANAGER WASN'T SURE. AFTER CHECKING, HE CONFIRMED IT DID HAVE THE RECALLED PEDAL. WE EXPRESSED CONCERN ABOUT DRIVING THE VEHICLE. THE SERVICE MANAGER ASSURED US THEY FOUND NO PROBLEMS AND SAID THE TWO INCIDENTS WERE NOT RELATED TO THE FAULTY GAS PEDAL BECAUSE THEY TOOK PLACE TOO FAR APART. AFTER CONTACTING TOYOTA CORPORATE (REPEATEDLY) WE FINALLY HAD THE PEDAL FIX TAKEN CARE OF YESTERDAY. FROM THE START, WE FELT THE DEALER IGNORED US. ONE EMPLOYEE TOLD US IF IT IS RELATED TO THE GAS PEDAL, IT WILL BE THE FIRST COMPLAINT ON THE EAST COAST. WE HAVE OWNED TOYOTAS FOR OVER 25 YEARS. WE FULLY UNDERSTAND RECALLS. IT IS DIFFICULT TO UNDERSTAND DOWNPLAYING THE CONCERNS OF CUSTOMERS. TRUTHFULLY, WE FEEL NO SAFER AFTER THE NEW PART WAS INSTALLED. THIS DOES NOT SEEM AS IF IT WILL TAKE CARE OF THE PROBLEM ANY MORE THAN THE FLOOR MAT RECALL. WE ALSO CONTINUE TO HAVE PROBLEMS WITH THE ELECTRICAL SYSTEM (DASHBOARD LIGHTS BLINK ON AND OFF).

**Location of Incident:** CINCINNATI, OH

**NHTSA Summary:**  
MY HUSBAND WAS WORKING OUT OF TOWN ON BUSINESS IN FT. WORTH, TX. WE LIVE IN CINCINNATI, OH. ON DEC 4 2008, MY HUSBAND IN HIS 2007 TOYOTA RAV4, ACCELERATED AT A HIGH RATE OF SPEED FOR ABOUT 1/4 MILE INTO HIS HOTEL BUILDING. THIS WAS REPORTED BY TWO EYE WITNESSES (PER POLICE REPORT). MY HUSBAND HAS NO MEMORY OF THE EVENT. HE SPENT 7 DAYS IN THE ICU AND WAS DISCHARGED AFTER 10 DAYS FROM THE HOSPITAL. HE HAD ONE ADDITIONAL SURGERY AND SEVERAL FOLLOW UP CONSULTATIONS WITH SEVERAL DCTORS SINCE TO DETERMINE WHAT CAUSED THE ACCIDENT. NOTHING WAS EVER DETERMINED. SINCE THE TOYOTA RECALL WAS ANNOUNCED, IT MAY OFFER AN ANSWER AS TO WHAT HAPPENED. HIS CAR WAS DESTROYED IN THE ACCIDENT, BUT WE STILL HAVE ALL THE INFORMATION.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10323130  
**Date of Incident:** 20081207  
**Vehicle:** 2005 TOYOTA MATRIX  
**Location of Incident:** WESTFIELD, MA

**NHTSA Summary:**  
2005 TOYOTA MATRIX. CONSUMER STATES UNINTENDED ACCELERATION. \*TGW THE CONSUMER STATED AS HE WAS APPROACHING A RED TRAFFIC SIGNAL TO A LOCAL SHOPPING CENTER, THE VEHICLE STARTED TO ACCELERATE. SINCE HE WAS NEARING A RED LIGHT, HE ALREADY HAD HIS FOOT ON THE BRAKE PEDAL. THE CONSUMER STATED IT WAS OBVIOUS SOMETHING WAS WRONG, SO HE IMMEDIATELY PLACED THE TRANSMISSION IN NEUTRAL. THE RPM OF THE VEHICLE'S TACHOMETER RACED BETWEEN 3,000 AND 4,000. WHEN THE TRAFFIC LIGHT TURNED GREEN, HE PLACED THE GEAR IN DRIVE, KEPT HIS FOOT FIRMLY ON THE BRAKE AND MANEUVERED THE VEHICLE INTO THE PARKING LOT AND INTO A PARKING SPACE. HE PLACED THE GEAR INTO PARK,

C-1230

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BUT THE ENGINE CONTINUED TO REV BETWEEN 3,000 AND 4,000. HE KICKED THE ACCELERATOR PEDAL IN AN ATTEMPT TO POSSIBLY LOWER THE RPM, BUT TO NO AVAIL. THE CONSUMER TURNED OFF THE ENGINE, EXITED THE VEHICLE AND PROCEEDED TO INSPECT THE ACCELERATOR PEDAL AREA FOR POSSIBLE SIGNS OF OBSTRUCTION ON THE FLOOR, IN THE CARPET AREA OR ON THE FLOOR MAP. THERE WAS NONE. HE OPENED THE HOOD OF THE CAR AND LOOKED IN THE ENGINE COMPARTMENT FOR POSSIBLE SIGNS OF DEBRIS, BUT THERE WAS NONE. THE CONSUMER STATED IT IS OBVIOUS THERE IS AN ELECTRONIC/COMPUTER GLITCH AND NOT A PROBLEM WITH A STICKING GAS PEDAL. \*JB

**NHTSA ODI Number:** 10303385  
**Date of Incident:** 20081208  
**Vehicle:** 2004 TOYOTA CAMRY  
**Location of Incident:** MILLERSVILLE, MD

**NHTSA Summary:**  
MY HUSBAND HAD JUST PULLED HIS 2004 TOYOTA CAMRY INTO A SCHOOL PARKING LOT AT A SLOW RATE OF SPEED. HE STOPPED WITH FOOT ON THE BRAKE, AND SHIFTED INTO REVERSE AS HE WAS GOING TO BACK INTO A PARKING SPACE. SUDDENLY, THE ACCELERATOR SURGED AT A HIGH RATE OF SPEED WITHOUT WARNING AND HE HIT THE BACK OF THE SCHOOL BUILDING AT A GREAT RATE OF FORCE. THE ENGINE STOPPED BUT THE AIR BAG FAILED TO DEPLOY. EXTENSIVE DAMAGE WAS DONE TO THE SCHOOL BUILDING (\$19,000) AND TO HIS VEHICLE (\$9000.) CAR HAD TO BE TOWED TO AUTO BODY DEALERSHIP. THIS WAS THE FIRST INCIDENT THAT THE CAR'S ACCELERATOR SURGED. AUTO BODY SHOP REPAIRED THE BODY OF THE CAR, BUT NO REPAIR TO ACCELERATOR AT ALL. WE HAD NO EXPLANATION AS TO WHY THE CAR ACCELERATED AT SUCH A HIGH RATE OF SPEED. NOW THAT WE HAVE BECOME AWARE OF ALL THE OTHER TOYOTAS THAT HAVE HAD ACCELERATION FAILURES, WE ARE NOW FILING THIS COMPLAINT. THIS ACCIDENT COULD HAVE BEEN MUCH MORE SERIOUS, AS CHILDREN WERE COMING IN AND OUT OF THE BUILDING FROM A SPORTS EVENT. THANKFULLY NO ONE WAS HURT. WE BELIEVE THAT TOYOTA NEEDS TO GO BACK MUCH FURTHER ON THEIR RECALLS ON TOYOTA CAMRYS THAN 2007, SINCE CLEARLY TOYOTA CAMRYS HAVE HAD THIS ACCELERATION PROBLEM AT LEAST AS FAR BACK AS 2004, PROBABLY EARLIER.

**Vehicle:** 2006 TOYOTA COROLLA  
**Location of Incident:** GREENBELT, MD

**NHTSA Summary:**  
THE FOLLOWING DESCRIPTION IS FROM A NARRATIVE WRITTEN WITHIN 3 HOURS AFTER THE ACCIDENT. AROUND 5:30PM ON 12/10/2008 I WAS DRIVING HOME AROUND 2-3 MILES PER HOUR DUE TO TRAFFIC CONGESTION. THE SKY WAS DARK AND IT WAS LIGHTLY RAINING. THE TEMPERATURE WAS AROUND 60-65 DEGREES FAHRENHEIT, SO ICE WAS NOT PRESENT ON THE ROAD. THE LARGE SEMI TRUCK DIRECTLY AHEAD OF ME SLOWED DOWN TO A STOP, SO I ATTEMPTED TO BRAKE. MY BRAKES DID NOT SEEM TO HAVE AN EFFECT, SO I PUSHED ON THE BRAKES HARDER. THE BRAKES STILL HAD NO EFFECT. I IMMEDIATELY SHIFTED THE CAR INTO THE SPARK GEAR AND APPLIED THE EMERGENCY BRAKE. NEITHER THE SHIFTING THE GEARS NOR THE EMERGENCY BRAKE HAD ANY EFFECT ON THE CAR'S MOTION, MY CAR KEPT MOVING FORWARD. I EVENTUALLY STOPPED WHEN I SMASHED INTO THE BACK OF THE TRUCK, WHICH CAUSED ABOUT \$5K OF FRONT END DAMAGE FOR MY CAR AND NO APPARENT DAMAGE TO THE TRUCK. THE TIME BETWEEN WHEN I NOTICED THE CAR WAS NOT STOPPING TO WHEN MY CAR HIT THE TRUCK WAS AROUND 2-3 SECONDS. AFTER THINKING ABOUT THESE EVENTS AFTERWARD, I DIDN'T REMEMBER HEARING THE TRANSMISSION GRIND DUE TO THE

C-1232

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

FACT THE CAR WAS IN THE 6PARK6, BUT CONTINUED TO MOVE FORWARD. AFTER THE COLLISION, THE TRUCK AHEAD OF ME LEFT AS IF NOTHING HAD HAPPENED. MY CAR STAYED STATIONARY NOW THAT ITS MOMENTUM WAS LOST. I SHIFTED THE CAR BACK INTO 6DRIVE6 AND SLOWLY DROVE HOME (AROUND 20-25 MPH). THE BRAKES WORKED LIKE NORMAL AND I DIDN'ET HEAR ANY NOISE WHEN I APPLIED THE BRAKES. I TOOK THE CAR INTO THE DEALERSHIP ON 01/10/2009. THE MECHANIC INSPECTED THE CAR AND FOUND THE BRAKES WERE IN 6NORMAL WORKING CONDITION6. THE MECHANIC HYPOTHESIZED THAT THE CAUSE FOR THE BRAKE FAILURE WAS EITHER THE BRAKE FLUID OVERHEATED OR DRIVER ERROR. HOWEVER, THERE WAS NO EVIDENCE TO SUPPORT EITHER HYPOTHESIS. NO REPAIR WAS RECOMMENDED AND NO PARTS WERE REPLACED. I AM CONFIDENT I DEPRESSED THE BRAKES AND NOT THE ACCELERATOR, SO I SUSPECT THERE MIGHT BE SOME OTHER PROBLEM WITH MY BRAKES. THE BRAKES HAVE NOT FAILED SINCE THIS INCIDENT.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10339915  
**Date of Incident:** 20081210  
**Vehicle:** 2002 TOYOTA RAV4  
**Location of Incident:** PEARL, MS

**NHTSA Summary:**

I WAS COMING HOME AND WAITING FOR MY GARAGE DOOR TO OPEN WHEN MY 2002 TOYOTA RAV4 SUDDENLY ACCELERATED (EVEN THOUGH I QUICKLY PUT MY FOOT ON THE BRAKE) AND CRASHED THROUGH THE BOTTOM HALF OF THE GARAGE DOOR SIDE-SWINGING ANOTHER VEHICLE IN THE GARAGE. I TOOK THE VEHICLE TO A BODY SHOP TO GET FIXED AND ALSO TOOK IT TO A SERVICE SHOP, AND NEITHER PLACE COULD FIND ANYTHING WRONG WITH THE CAR. SINCE THEN, I HAVE NOTICED ON A FEW RARE OCCASIONS THAT, UPON SHIFTING THE CAR INTO REVERSE, THERE IS A SUDDEN JERKING ACTION. I AM BEGINNING TO THINK THAT THIS ALL MY BE RELATED TO THE ECM TRANSMISSION MODULE THAT I'VE BEEN READING ABOUT LATELY.

C-1234

I HAVE TOYOTA HIGHLANDER 2008 FROM AUG 2008. THIS CAR HAS A PROBLEM WITH BRAKING. FIRST WINTER IT WAS UNSAFE TO PARK CAR ON SHOPPING PARKINGS, BECAUSE OF CLOSE PROXIMITY TO OTHER CARS. HIGHLANDER WAS NOT STOPPING, IT CONTINUED MOVING WITH MY LEG ON THE BRAKE PEDAL. THIS CAR WAS NOT SLOWING DOWN. I DROVE MANY DIFFERENT SUVs FROM RENTAL COMPANIES, LIKE CHEVY TRAIL BLASER, GMC ACADIA, JEEP TWO DIFFERENT MODELS, BUT NEVER HAD ANY PROBLEMS WITH BRAKES. I WENT TO THE DEALERSHIP THREE TIMES AND EACH TIME THEY TOLD ME THEY CANNOT DO ANYTHING. I'M USED TO THIS CAR NOW, BUT BRAKING STILL NOT GOOD. IT REQUIRES DEEP PRESSURE ON THE PEDAL AND CAR IS STOPPING LONGER.

**Additional Summary:**  
INFO FROM NEWS ARTICLES:

"Two sisters from Contra Costa County have sued Toyota for injuries they suffered in a 2008 car accident, claiming their Camry suddenly accelerated and sent them crashing into a brick wall.

Gloria Flores, of Concord, and Rosalinda Carranza, of Bay Point, were in Flores' 2002 Camry on Dec. 21, 2008, when the crash happened, according to the suit, that seeks unspecified damages for physical suffering and emotional pain and distress.

Flores, who was driving, was making a turn near Canal and Bailey roads when the car "went out of control and accelerated uncontrollably" and hit the wall, according to the complaint.

The suit further claims that a recall of that Camry model would have prevented the accident. Attorneys cited a technical services bulletin filed with the National Highway and Traffic Safety Administration on Aug. 30, 2002, noted that some of the vehicles "may exhibit a surging during light throttle input at speeds between 38-42 mph."

BRAKES. CAROLINA WAS UNABLE TO SLOW THE TOYOTA, AND BECAUSE OF THE HIGH RATE OF SPEED WAS UNABLE TO CONTROL THE TOYOTA. CAROLINA COLLIDED WITH A LIGHT POST ON RAINBOW DRIVE. AS A RESULT OF THE COLLISION, CAROLINA AND HER MOTHER, JOVITA SALVADOR, SUFFERED SEVERE INJURIES. JOVITA DIED ON JANUARY 27, 2009 AS A RESULT OF HER INJURIES.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10319420  
**Date of Incident:** 20081221  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** MANCHESTER, CT

**NHTSA Summary:**

2005 TOYOTA CAMRY - I LINDA R. JOSEY HAVE BEEN EXPERIENCING THE SAME ACCELERATION PROBLEMS AS THE 2007-2010. TWICE I HAVE BEEN IN TWO ACCIDENTS DUE TO ACCELERATION PROBLEM AND HAD TO GO THROUGH MY INSURANCE COMPANY FIX. THIS HAS BEEN HAPPENING SINCE 2007, MY DAUGHTER HAS ALMOST BEEN IN WHAT COULD HAVE BEEN TWO MAJOR COLLISIONS. I FEEL LIKE I AM DRIVING A DEATH TRAP. I HAVE WRITTEN TOYOTA REGARDING THIS MATTER WITH NO RESPONSE FROM THEM.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10306082  
**Date of Incident:** 20081222  
**Vehicle:** 2008 TOYOTA TACOMA  
**Location of Incident:** LONG BEACH, CA

**NHTSA Summary:**

ON 08/24/08, MY HUSBAND AND I PURCHASED A 2008 TOYOTA TACOMA TRUCK. ON 12/22/2008, HE WAS COMING TO A STOP AT A TRAFFIC LIGHT BEHIND ANOTHER VEHICLE. SUDDENLY, WITHOUT WARNING, THE ENGINE SEEMED TO ENGAGE AT FULL THROTTLE. HIS RIGHT FOOT WAS NOT ON THE GAS PEDAL, BUT ON THE BRAKE PEDAL AS IT SHOULD BE WHILE WAITING FOR THE LIGHT TO CHANGE TO GREEN. STARTLED, HE PUT BOTH FEET ON THE BRAKE PEDAL AS THE ACCELERATION OF THE ENGINE SEEMED TO OVERTAKE THE ABILITY TO BRAKE. THE TRUCK LURCHED FORWARD AND HIT THE CAR IN FRONT WHICH STOPPED THE MOMENTUM AND KILLED THE ENGINE. THE ACCELERATION AND POWER OF THE ENGINE WAS SO GREAT THAT THIS ALL HAPPENED IN ABOUT 3-5 SECONDS. WHEN HE RESTARTED THE ENGINE, EVERYTHING SEEMED TO BE FINE AS THE TRUCKS COMPUTER SEEMED TO RESET ITSELF. HE REPORTED THIS TO TOYOTA AND ASKED THAT THE TRUCK BE CHECKED OUT. WHEN WE WENT TO PICK UP THE TRUCK AT HOUMAN TOYOTA, WHERE A FACTORY TECH CAME TO INSPECT IT, HE WAS TOLD THAT THE BRAKING SYSTEM WAS FINE AND ACCELERATION SYSTEM (PEDAL LINKAGE) WAS FINE AS WELL. HE WAS EVEN TOLD THAT THE FLOOR MAT WAS UNHOOKED AND PROBABLY GOT STUCK ON TOP OF THE ACCELERATOR PEDAL. THE FLOOR MATS WERE NOT UNHOOKED WHEN WE DROPPED OFF THE TRUCK. MY HUSBAND TRIED THE FLOOR MAT ON TOP OF THE PEDAL WHILE STEPPING ON THE BRAKE AND THE RPM DID NOT GO UP MUCH AT ALL, CERTAINLY NOT ENOUGH TO OVERPOWER THE BRAKING SYSTEM AS THE TECH SUGGESTED. WE BELIEVE THERE WAS A COMPUTER MALFUNCTION AND NOT A MECHANICAL MALFUNCTION WHICH WAS THAT THE TECH CHECKED OUT. THE CASE MANAGER WAS INFORMED OF THIS BEFORE AND AFTER THE INSPECTION. AFTER THE RECALL NOTICE ON TV IN AUGUST, WE REMOVED THE FLOOR MATS FROM THE TRUCK. A SECOND INCIDENT OCCURRED 10/19/09 (WITH NO FLOOR MATS) WHICH DID NOT RESULT IN AN ACCIDENT. WE, AGAIN, BROUGHT THE TRUCK INTO THE DEALER AND IT WAS, ONCE AGAIN, CLEARED TO DRIVE WITH NO ISSUES.

**Vehicle:** 2008 TOYOTA PRIUS  
**Location of Incident:** JAMUL, CA

**NHTSA Summary:**

ACCELERATOR PEDAL ON VEHICLE FAILED TO RETURN TO NON ACCELERATING POSITION AFTER ACCELERATING ON FREEWAY. VEHICLE CONTINUED TO ACCELERATE EVEN WHILE BRAKING. I HAD TO WEDGE MY FOOT UNDERNEATH THE ACCELERATOR PEDAL TO LIFT IT TO THE FULL UPWARD POSITION. THIS INCIDENT OCCURRED WHILE ACCELERATING SHARPLY, AND HAS NOT OCCURRED WITH GENTLE ACCELERATION. I HAVE AVOIDED ANY SUDDEN ACCELERATION WITH THIS VEHICLE. FOR FEAR OF A RECURRENCE OF THIS PROBLEM. THERE WAS NO FLOOR MAT INTERFERENCE WHILE THIS WAS OCCURRING, IT FELT AS THOUGH THE ACCELERATOR PEDAL WAS BEING OPERATED WITHOUT FOOT CONTACT, AS I COULD FEEL THE PEDAL DEPRESS UNDERNEATH MY RESTING FOOT. I AM A VERY EXPERIENCED DRIVER AND HAVE DRIVEN COMMERCIALLY FOR 20 YEARS AND HAVE NEVER EXPERIENCED ANYTHING LIKE THIS. \*TR

**Vehicle:** 2007 TOYOTA TUNDRA  
**Location of Incident:** TALLAHASSEE, FL

**NHTSA Summary:**

CHRISTMAS EVE 2008 MY WIFE AND I WERE DRIVING OUR 2007 TOYOTA TUNDRA FROM BEL AIR MARYLAND TO LADSON, SC. JUST OUTSIDE OF COLONIAL HTS. VA. I TOOK THE TUNDRA OUT OF CRUISE CONTROL BECAUSE I WAS APPROACHING A TRACTOR TRAILER IN FRONT OF ME BUT THE TUNDRA KEPT ACCELERATING TOWARD THE SEMI. I HAD TO STAND ON THE BRAKE WITH BOTH FEET TO SLOW THE TUNDRA DOWN SO I COULD MOVE INTO THE RIGHT LANE AND EVENTUALLY STOP IT ON THE RIGHT SHOULDER OF I95. I TRIED TO CALL AAA BUT WAS UNABLE TO CORRECTLY DIAL MY CELL PHONE AS I WAS STILL TOO EXCITED DUE TO THE RUSH OF ADRENALINE I HAD EXPERIENCED. MY WIFE AND I THOUGHT THE PROBLEM WAS RELATED TO THE CRUISE CONTROL SO ONCE I CALMED DOWN WE CONTINUED OUR DRIVE TO SC. THE NEXT MORNING I TOOK THE TRUCK INTO THE LADSON OR SUMMERVILLE TOYOTA DEALER WHO KEPT IT THAT DAY AND FINALLY CALLED TO SAY NOTHING WAS WRONG. AT THE TIME I STILL THOUGHT IT WAS A CRUISE CONTROL ISSUE BUT NOW I BELIEVE IT WAS PART OF THE TOYOTA ACCELERATOR PROBLEM. I STILL HAVE THE TRUCK AND HAVE NOT EXPERIENCED ANOTHER INCIDENT SINCE THE ONE IN DECEMBER 2008\*CW

**Additional Summary:**

**Toyota ID Number:**

**Date of Incident:** 20081224  
**Vehicle:** 1998 TOYOTA TOYOTA TRUCK  
**Location of Incident:** BAYTOWN, TX

**NHTSA Summary:**

DEAR SIR OR MS, I FILED A WRITTEN COMPLAINT AND SENT MY COMPLAINT TO YOU OR ABOUT CONCERNING WHAT HAPPENED TO ME WHILE I WAS SITTING AND WAITING IN THE RIGHT LANE, THE FEEDER LANE, OFF OF BELTWAY 8, FOR THE LIGHT TO CHANGE, IN PASADENA, TEXAS ON 12/24/08. I WAS IN MY 1998 SMALL TOYOTA TRUCK AND THERE WAS A 30 TON GARBAGE TRUCK 2 CAR LENGTHS IN FRONT OF ME AND THE GARBAGE TRUCK DRIVER STARTED MOVING BACK AND FORTH TRYING TO GET AN ANGLE TO GET PERPENDICULAR, USING THE SIZE OF THE 30 TON GARBAGE TRUCK AND FORCING OR IN MY OPINION, BULLYING THE SMALLER CARS IN THE LEFT HAND LANE WITH THE SIZE OF THE 30 TON GARBAGE TRUCK BETWEEN THE CARS IN THE LEFT LANE AND MOVE INTO THE LEFT LANE. I TRIED TO MOVE INTO THE VACANT LOT TO MY RIGHT, GO OVER THE CURB INTO THE VACANT LOT TO MY RIGHT TO GET OUT OF THE 30 TON GARBAGE TRUCK'S WAS BECAUSE NO MATTER HOW I HONKED MY HORN AT THE ERRATIC DRIVER OF THE 30 TON GARBAGE TRUCK, HE KEPT GETTING CLOSER TO ME WHILE HE WAS MOVING BACK AND FORTH TRYING TO CHANGE LANES. DUE TO THE TOYOTA'S FLOOR MAT ROLLING UP UNDER MY BRAKE AND GAS PEDAL I COULD NOT MOVE AND THE TOYOTA'S FLOOR MAT HAD ROLLED UP UNDER MY BRAKE AND ACCELERATOR PEDALS AND WOULD NOT ALLOW ME TO MOVE MY TRUCK AND AVOID THE 30 TON GARBAGE TRUCK THAT BACKED UP ON ME AND CAUSED ME BRAIN AND SEVERE SPINAL INJURIES WHICH WILL REQUIRE 9 ENDOSCOPIC LASER SURGERIES AT THE BONITA SPRINGS INSTITUTE IN TAMPA, FLORIDA. NO NEUROSURGEON IN HOUSTON, TEXAS I WENT TO WOULD ATTEMPT TO PERFORM MY SPINAL SURGERIES. WHAT HAPPENED TO A REPLY FROM YOU? I AM WAITING ON MY INSURANCE COMPANY TO OKAY MY SURGERIES, ON A

WALKER, BECOMING A PARAPLEGIC. MEDICATION I HATE WHICH DOESN'T STOP THE SPINAL PAIN. I NEED TO KNOW HOW TO GET IN TOUCH WITH THE TOYOTA CAR COMPANY. ANSWER MY QUESTION. I DON'T BELIEVE THE ANSWERS TOYOTA STATED AND MY DEALERSHIP WILL NOT TALK TO ME. \*TR

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10332573  
**Date of Incident:** 20081224  
**Vehicle:** 2001 TOYOTA CELICA  
**Location of Incident:** JACKSONVILLE, FL

**NHTSA Summary:**

I PURCHASED A BRAND NEW TOYOTA CELICA IN 2001. IN 2006 IT BEGAN SOUNDING STRANGE WHEN ACCELERATING AND ALSO WHEN I WOULD BACK UP AND USE THE BRAKES. IT WOULD MAKE A VERY STRANGE SOUND AND THE BRAKES WOULD NOT WORK THE SAME AS THEY USED TO. I REPORTED THIS TO MECHANICS AT TOYOTA BUT THEY SAID THE CAR WAS FINE MECHANICALLY. ON DECEMBER 24, 2008 WHEN MERGING ON TO A EXIT SAN JOSE BLVD FROM 295 IN JACKSONVILLE FLORIDA MY CAR WOULD NOT SLOW DOWN IT ACTUALLY ACCELERATED. THE RPM GAUGE WENT UP INSTEAD OF DOWN AND THE PRESSURE WAS HIGH. MY CAR WOULD NOT SLOW DOWN OR STOP. IT WAS ACCELERATING WITHOUT MY FOOT ON THE PEDAL. I TRIED TO PUT THE BRAKES ON AND THE BRAKES WOULD NOT WORK. MY CAR WOULD NOT STOP. I WAS MERGING TO ONCOMING TRAFFIC ON A BUSY ROAD NEARING A CRASH. I THEN TRIED TO PUT MY CAR IN NEUTRAL AND IT STILL WOULD NOT STOP. I THEN PUT IT IN PARK AND IT STILL KEPT GOING DRIVING. I THEN PULLED THE KEY OUT BECAUSE IT WAS MY LAST ATTEMPT TO STOP THE CAR. AND THANK GOD MY CAR STOPPED JUST MISSING A COLLISION. SO TO SUM IT ALL UP. MY CAR ACCELERATED, HAD HIGH PRESSURE AND THE BRAKES FAILED COMPLETELY. THE ENGINE WAS REVVING. IT WAS VERY SCARY AND IF NOT FOR MY PULLING THE KEY OUT I WOULD PROBABLY BE DEAD OR SERIOUSLY INJURED AND COULD HAVE CAUSED A TERRIBLE ACCIDENT. I HAD MY CAR TOWED TO ERNIE PALMER TOYOTA. THEY CLAIMED IT WAS A FAULTY ACCELERATOR SENSOR. I SOLD MY CAR TO THEM BECAUSE I NEVER WANTED TO GET IN OR LOOK AT THAT CAR AGAIN. I STILL HAVE NIGHTMARES ABOUT IT. I DO NOT KNOW ANYTHING ABOUT HOW IT WAS FIXED BECAUSE I DID NOT HAVE IT FIXED. I SOLD IT. HOWEVER THE MECHANICS LATER AT TOYOTA TOLD ME IT WAS A FAULTY ACCELERATOR SENSOR. THERE WERE NO INJURIES OTHER THAT MY NECK BEING HURT FROM BEING THROWN TO SUCH A QUICK STOP.

**Vehicle:** 2008 TOYOTA HIGHLANDER HYBRID  
**Location of Incident:** WESTLAKE, OH

**NHTSA Summary:**

TL-THE CONTACT OWNS A 2008 TOYOTA HIGHLANDER HYBRID. THE CONTACT STATED THAT SHE HAD AN ISSUE STOPPING HER VEHICLE WITHIN A REASONABLE TIME OF DEPRESSING THE BRAKE PEDAL. SHE PUSHED DOWN ON THE BRAKES AND DID NOT NOTICE AN IMMEDIATE RESPONSE ON AT LEAST 4 DIFFERENT OCCASIONS. SHE NOTICED THE FAILURE IN ICY WEATHER CONDITIONS. SHE ALSO STATED THAT THE VEHICLE WOULD SURGE A LITTLE WHEN SHE TAPPED THE BRAKE PEDAL AT TIMES. SHE TOOK THE VEHICLE TO THE DEALERSHIP BUT THE DEALER DID NOT INSPECT THE VEHICLE. SHE HAD NOT CALLED THE MANUFACTURER TO-DATE. THE VEHICLE HAD NOT BEEN REPAIRED AT THE TIME OF THE COMPLAINT. THE CURRENT MILEAGE WAS APPROXIMATELY 45,000. THE FAILURE MILEAGE WAS APPROXIMATELY 15,000-BK

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10307319  
**Date of Incident:** 20081226  
**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** PLANO, TX

**NHTSA Summary:**

I SUSPECT THE CRUISE CONTROL OF MY 2004 MINIVAN TOYOTA SIENNA CE HAS SIMILAR ISSUE FOUND IN RECENT PRIUS REPORTS. 1. WHEN CRUISE CONTROL IS USED ON UPHILL ROAD CONDITIONS 2. THE SPEED CAN BE ACCELERATED TO OVER 5 MILES/HR MORE THAN THE CRUISE CONTROL SETTING. FOR EXAMPLE, WHEN I SET THE SPEED TO 70 MILES/HR. AT A LITTLE LONGER UPHILL ROAD, THE SPEED WILL DROP FIRST LIKE 67(MILES/HR) AND THEN ACCELERATE IN ORDER TO GET BACK TO 70MILES/HR SPEED TARGET. BUT THE CRUISE CONTROL SYSTEM CONTINUE ACCELERATING AFTER PASSING 70 MILES/HR AND COULD BE AS HIGH AS 75MILES/HR. 3. NOTHING HAD BEEN DONE, JUST BE CAUTIOUS BY MYSELF. AFTER READING SIMILAR COMPLAINTS ON PRIUS OF TOYOTA, I FEEL THIS MAY BE THE SAME ISSUE.

**Additional Summary:**

**NHTSA ODI Number:** 10310048  
**Date of Incident:** 20081230  
**Vehicle:** 2004 TOYOTA CAMRY  
**Location of Incident:** BREWSTER, NY

**NHTSA Summary:**

MY MOTHER WAS INVOLVED IN A COLLISION IN HER TOYOTA CAMRY DUE TO UNEXPECTED ACCELERATION. THE ACCIDENT HAPPENED IN HER DRIVEWAY WHILE SHE WAS LEAVING HOME. THE CAR, A 2004 MODEL, WAS REPAIRED (\$8,000) AT A NEARBY TOYOTA DEALERSHIP AND RECENTLY RETURNED. TOYOTA IS NOT ACKNOWLEDGING A PROBLEM WITH THEIR OLDER MODEL CAMRIES, SO ANY REPAIRS THAT WERE DONE TO MY MOTHER'S CAR WERE SIMPLY COSMETIC. I AM VERY CONCERNED FOR MY MOTHER'S SAFETY. THIS IS HER ONLY VEHICLE AND SHE'S NOW FORCED TO DRIVE A CAR THAT HAS DEMONSTRATED DANGEROUS AND UNEXPECTED ACCELERATION ISSUES. PLEASE ADVISE. (I AM LEAVING HER CONTACT INFO, BUT I DO NOT HAVE ACCESS RIGHT NOW TO THE VIN #. SHE CAN SUPPLY THAT INFO.)

**Date of Incident:** 20090000  
**Vehicle:** 2000 TOYOTA CAMRY  
**Location of Incident:** KANSAS CITY, MO

**NHTSA Summary:**  
**Additional Summary:**  
Per email to Sean Kane dated 11/29/09 - I've had a different problem with the throttle. I had a 2000 Camry V6.  
When using cruise control at expressway speed with a warm engine (running for at least an hour), if traction was lost, engine would start going wild - racing or trying to stall. Loss of traction usually due to a bump or change in pavement, but also happened when fighting a head wind. Most Toyota service managers I talked to were clueless, one felt that it was an anti-rev feature malfunctioning that he had experienced driving a new (less than 1,000 miles) truck. My Toyota certified mechanic felt that it was throttle related. Problem could not be predicted or recreated. No idiot lights came on or codes. Everything fine if car allowed to cool for 45 minutes to an hour. I wrote to Toyota's head man about this and have a copy of my letter plus his response. Traded the car a year ago for a Toyota hybrid.

**Date of Incident:** 20090101  
**Vehicle:** 2004 LEXUS ES330  
**Location of Incident:** PHILADELPHIA, PA

**NHTSA Summary:**  
**Additional Summary:**  
PLEASE NOTE - THIS IS OR MAY BE RELATED TO OTHER ODI I JUST REPORTED AT 10261933. I HAVE A LEXUS 2004 ES330 AND IN ADDITION TO WEIRD BRAKING PROBLEMS, I HAVE ALSO HIT THE BRAKE AND BASICALLY FELT THE CAR CONTINUE LIKE I NEVER HIT THE BRAKE AND I AM ACCELERATING OR HAVE CRUISE CONTROL ON. WHEN THIS HAS OCCURRED, I DID NOT FEEL THE ABS BRAKING SYSTEM ENGAGE OR ANY TYPE OF SLOWING DOWN OCCUR. I END UP HITTING AND RELEASING THE BRAKE QUICKLY TO TRY AND GET THE CAR TO BRAKE AND COME TO A STOP. ON ONE OCCASION I ALSO QUICKLY HIT THE GAS TO SEE IF PERHAPS THAT WOULD CLEAR THE PROBLEM, AND IT DID NOT. I PULLED OVER, CHECKED THAT NO DEBRIS OR FLOOR RUG HAD SOME HOW MADE THE GAS PEDAL STINK, AND THAT IS NOT THE PROBLEM. OTHER THAN THIS PROBLEM, AND THE PROBLEMS REPORTED UNDER ODI 10261933, I HAVE NOT HAD ANY OTHER PROBLEMS W/ ACCELERATING OR STOPPING. I HAVE BROUGHT THE ISSUE TO THE ATTENTION OF LEXUS AND THEY HAVE DENIED ANY RECALLS OR OTHER REPORTED PROBLEMS. I SUSPECT THEY ASSUME I AM A WOMAN - WHO CANNOT DRIVE. AGAIN, I HAVE OWNED FAST HIGH PERFORMANCE PORSHE AND MERCEDES PREVIOUSLY AND NEVER HAD THIS PROBLEM BEFORE. I HOPE SOMEONE WILL FIGURE THIS OUT BEFORE I AM INJURED OR PERHAPS SOMEONE ELSE IS. THANKS. PS NO DATE OF INCIDENT, SO I WILL PUT 1/1/09. THIS REFUSAL OF THE CAR TO ENGAGE THE BRAKE ETC HAS OCCURRED ABOUT 5 TIMES. \*TR  
**Additional Summary:**

**Vehicle:** 2003 TOYOTA AVALON  
**Location of Incident:** FORT WORTH, TX

**NHTSA Summary:**  
**Additional Summary:**  
OUR 2003 TOYOTA AVALON HAS EXPERIENCED SEVERAL OCCURRENCES OF SUDDEN ACCELERATION. MY WIFE TOOK THE CAR TO OUR TOYOTA DEALER AND BOTH TIMES THEY SAID THAT IT WAS DUE TO THE FLOORMAT STICKING UNDER THE GAS PEDAL. THE MAT WAS REMOVED AND IT STILL HAS THE PROBLEM. WHILE I WAS DRIVING IT DOWN THE HIGHWAY, I LET OFF THE GAS TO SLOW DOWN AND IT STARTED TO SPEED UP. I PUT THE CAR INTO NEUTRAL AND THE ENGINE STARTED TO REV UP AND DOWN FROM 1000 RPM TO 2500 RPM. THIS CONTINUED FOR A COUPLE OF MINUTES UNTIL I WAS FORCED TO PULL OVER TO THE SIDE OF THE ROAD AND TURN THE ENGINE OFF AND RESTART IT. (THIS IS ALWAYS THE FIX. TURN OFF THE ENGINE AND RESTART IT. IT SEEMS TO RESET THE COMPUTER). THIS PROBLEM STARTED OVER A YEAR AGO AND CONTINUES TO OCCUR ALMOST MONTHLY. THIS VEHICLE IS NOT INCLUDED IN THE RECALL AND EVEN IF IT WAS, I DON'T FEEL THAT THE PROBLEM HAS A FIX, YET. WE HAVE TO CONTINUE TO DRIVE THE CAR BECAUSE WE CAN'T AFFORD ANOTHER ONE AND THE RESALE VALUE HAS PLUMMETED. JUST LAST WEEK MY WIFE WAS STOPPED BY A DPS OFFICER FOR SPEEDING FROM A STOP LIGHT. SHE DID NOT EVEN HAVE HER FOOT ON THE GAS PEDAL. SHE EXPLAINED WHAT HAD HAPPENED AND WAS NOT TICKETED.

2007 TOYOTA COROLLA EXPERIENCING THROTTLE SURGING. \*KB THE CONSUMER STATED THE VEHICLE TOOK OFF SUDDENLY. HE APPLIED THE BRAKE AS HARD AS HE COULD, BUT BEFORE THE VEHICLE STOPPED IT CRASHED INTO A HEAVY TOOL BOX AND SOME OTHER CONTAINERS AND INTO THE BACK WALL OF THE GARAGE. THE BUMPER WAS DAMAGED. THE SECOND TIME, WHILE BACKING OUT OF THE GARAGE, THE VEHICLE SUDDENLY TOOK OFF AGAIN. HE IMMEDIATELY APPLIED THE BRAKE FORCEFULLY, BUT THE VEHICLE DID NOT STOP BEFORE HE REACHED THE STREET. THERE WAS NO DAMAGE. THE THIRD TIME, THE VEHICLE SUDDENLY SURGED FORWARD IN THE MIST OF STOP AND GO TRAFFIC. FORTUNATELY, THERE WAS SPACE BETWEEN IT AND THE CAR AHEAD, SO HE WAS ABLE TO STOP BEFORE CONTACT. THE CONSUMER ALSO STATED HE HAD PROBLEMS WITH THE DOOR AND IGNITION. HE HAD FOUR DIFFERENT BATTERIES IN THE VEHICLE SINCE IT WAS PURCHASED. HE WAS TOLD THAT THE FIRST TWO HAD BAD CELLS IN THEM. \*JB

**NHTSA Summary:**  
REGARDING THE ACCELERATION SURGE IN TOYOTAS. WE DO NOT BELIEVE IT WAS THE FLOOR MATS! WE HAVE A 2009 COROLLA AND LAST WINTER WHEN IT WAS 2 MONTHS OLD, THE SURGE HAPPENED TO MY SON WHEN HE WAS DRIVING THE VEHICLE. HE HAD HIS FOOT TOTALLY OFF ACCELERATOR AND NOTHING WAS CAUGHT UNDER THE ACCELERATOR. THE COROLLA DOES NOT EVEN HAVE THE TYPE OF MATS THAT ARE CONSIDERED DANGEROUS AS IN THE CAMRYS AND OTHER MODELS. THANKFULLY, HE HAD THE KNOWLEDGE PUT THE BRAKES ON HARD, SHOVE IT IN NEUTRAL AND THEN APPLIED THE BRAKES ONCE AGAIN AND TURN OFF VEHICLE. PLEASE DO NOT LET TOYOTA JUST BELIEVE THIS IS THE RESULT OF FLOORMATS. I BELIEVE IT IS MORE COMPUTER AND ACCELERATOR RELATED. IT HAS NOT OCCURRED SINCE. PLEASE CONTINUE YOUR INVESTIGATION. THANK YOU! \*TR

**NHTSA Summary:**

IT IS VERY DIFFICULT TO CONTROL ACCELERATION FROM A STOP WHILE DRIVING MY RAV4 IN STOP AND GO TRAFFIC. THIS HAS BEEN TRUE SINCE I PURCHASED THE CAR WITH ABOUT 40,000 MILES ON IT. I REMOVED THE FLOORMAT WITH NO CHANGE. I HAVE BEEN TOLD BY 2 TOYOTA DEALERSHIPS (ONE HAD THE CAR FOR EVALUATION FOR A DAY AND CHARGED ME AN DIAGNOSIS FEE AND FOR A RENTAL CAR) THAT THIS IS NORMAL. THIS IS A POTENTIALLY DANGEROUS CONDITION AND CLEARLY A SAFETY HAZARD. I HOLD A COMMERCIAL DRIVERS LICENSE AND HAVE HAD MANY YEARS OF EXPERIENCE DRIVING A WIDE VARIETY OF VEHICLES AND HAVE NEVER ENCOUNTERED THIS PROBLEM. IT IS ONLY A MATTER OF TIME BEFORE THE CAR HITS SOMETHING TOYOTA MUST ADDRESS THIS ISSUE. UNTIL THIS PROBLEM IS REMEDIED THERE IS THE REAL RISK OF SOMETHING OR SOMEONE BEING DAMAGED OR HURT (OR WORSE). UPDATE: ON MARCH 3, 2010 I DELIVERED THE CAR TO DICK DYER IN COLUMBIA, SC AT TOYOTA'S REQUEST. THE REGIONAL TECHNICIAN INSPECTED THE CAR THAT DAY. I HAVE SINCE BEEN CONTACTED BY THE GENERAL MANAGER AND INFORMED THAT TOYOTA IS FLYING A TEAM OF ENGINEERS FROM CALIFORNIA TO EVALUATE THE CAR NEXT MONDAY, MARCH 15, 2010.

**Toyota ID Number:**  
**NHTSA ODI Number:** 10301899  
**Date of Incident:** 20090115  
**Vehicle:** 2007 TOYOTA TACOMA  
**Location of Incident:** FREEDOM, NH

**NHTSA Summary:**

ACCELERATOR MOVING TO WIDE OPEN POSITION AND STICKING. INTERMITTENTLY OCCURS. TOYOTA MOTORS SENT RECALL NOTICE FOR MATS ONLY AND THE MATS AREN'T WHAT CAUSED THE PROBLEM. I HAD AND STILL HAVE DEALER INSTALLED MATS IN MY VEHICLE. THE NOTICE FOR THE MATS WAS SENT A COUPLE OF MONTHS AGO AND I HAVE YET HEARD FROM TOYOTA BUT IT APPEARS THAT THEY ARE NOT INCLUDING TACOMA'S IN THE RECALL AND MY TACOMA DID NOT ACCELERATE ON IT OWN BECAUSE OF THE MAT. IT MOVED WITHOUT ANY OUTSIDE FORCE AND IT HAS ALSO STUCK IN THE WIDE OPEN POSITION WHEN I HAVE TRIED TO PASS ANOTHER VEHICLE AT A HIGH RATE OF SPEED. \*TR

**Date of Incident:** 20090115  
**Vehicle:** 2008 TOYOTA PRIUS  
**Location of Incident:** SANTA FE, NM

**NHTSA Summary:**

ACCELERATOR STICKING ON 2008 TOYOTA PRIUS - 5 TO 10 TIMES. I TOOK IT TO THE DEALER (BEAVER TOYOTA - SANTA FE, NM). THE FIRST TIME THEY SAID THEY DID NOT KNOW WHAT IT WAS SINCE THEY COULD NOT REPRODUCE IT. THE SECOND TIME THEY SAID IT MUST HAVE BEEN BECAUSE OF THE FLOOR MATS. THE THIRD TIME I CALLED THEY SAID THE FLOOR MATS EVEN THOUGH I HAD REMOVED THEM. I AM UNSURE OF THE FIRST DATE ALTHOUGH IT SHOULD BE IN THEIR RECORDS. IT HAS NOT HAPPENED IN ABOUT 6 MONTHS. WHEN IT HAPPENED I WOULD PUT MY LEFT FOOT ON THE BRAKE AND "PRY" UP THE ACCELERATOR WITH THE FRONT OF MY RIGHT FOOT. THE FLOOR MAT NEVER SEEMED TO BE INVOLVED. MY DATES IN THIS REPORT ARE APPROXIMATE

**Location of Incident:** PALMDALE, CA

**NHTSA Summary:**

OUR 2006 LEXUS ES330 HESITATES AND STUTTERS WHEN ACCELERATING AFTER A SLOW-DOWN, STOP OR DURING A TURN. I HAVE READ VARIOUS THINGS WHICH SUGGEST IT COULD BE THROTTLE CONTROL, COMPUTER CONTROLLED ACCELERATOR, OR MASS AIR FLOW MAF SENSOR OR AIR INTAKE SENSOR AIS, ETC. ETC. BUT SOMETHING IS DEFINITELY WRONG. DEALERS NO HELP. WE TOOK THE CAR FOR THIS TROUBLE TO LEXUS OF VALENCIA AND SAW ASSISTANT SERVICE MANAGER BRYAN STOVER. HE TOLD US THAT THIS THE WAY THE CAR WAS BUILT. I THEN TRIED MY BEST TO HANDLE THIS CAR BUT IT CAUSED THE SAME PROBLEM AGAIN AND AGAIN. WE TOOK THE CAR TO THE DEALER A 2ND TIME -- VALENCIA LEXUS AND THE MANAGER TOLD US NOTHING IS WRONG WITH THIS CAR. I HAVE BEEN HAVING THIS PROBLEM SINCE I BOUGHT THE CAR IN 1/14/2009. IT HESITATES WHEN I TAKE TURNS, OR WHEN I STOP AT TRAFFIC LIGHTS AND STOP SIGNS. MANY TIMES THE ACCELERATOR GOES IDLE DURING THESE EVENTS AND CAR DOES NOT MOVE AND THAN I PUT MORE PRESSURE ON THE ACCELERATOR BUT THEN IT GOES FAST AND I ALMOST END UP HITTING THE CAR IN FRONT OF ME.

7/29/09 DRIVING ON THE FREEWAY AT 65 MPH TRANSMISSION STARTED SHIFTING GEAR AND MPH WAS MOVING FROM 60 TO 80 UP AND BACK DOWN. APPLIED EMERGENCY

C-1260

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BRAKE , SHIFTED GEAR TO NEUTRAL BUT NO ACTIONS COULD STOP THE TOYOTA TRUCK. MY NEPHEW AND I JUMPED FROM THE TRUCK WHEN I DETERMINED THAT IT WAS SLOWING DOWN AND NO CARS WERE PASSING ON THE FREEWAY. IT CAME TO A SUDDEN STOP 1/2 MILE AWAY FROM WERE WE JUMPED. THE ENGINE HAD SMOKE COMING OUT AND IT REVING UP AND DOWN. TOWED IT TO DEALER AND THEY SAID NO PROBLEM FOUND AND ACCUSED IT WAS THE FLOORMATS AFTER THEIR MASTER TECH LOOKED AT IT. NO REPAIRS WERE MADE AND THEY WANTED TO CHARGE US FOR WORN BRAKES AND BENT ROTORS WHICH WERE CAUSE BY THIS EVENT. IN-DISAGREEMENT WE TOWED TO ANOTHER TOYOTA AND THEY DETERMINED THAT THE COMPLAINT REGARDING THE SUDDEN ACCELERATION, WORN BRAKE PADS, AND BENT ROTORS CANNOT BE FOUND. WE TOOK BACK THE CAR FOR 6 MONTHS AND A SECOND INCIDENT HAPPEN 1/13/10. I WAS DRIVING ON A RESIDENTIAL STREET AND SUDDENLY THE TRUCK WAS ACCELERATED FROM 25 MPH TO 60 MPH. I PERFORMED ALL WAYS TO STOP THE TRUCK BUT IT WOULD NOT STOP. TO AVOID HITTING A BIG-RIG I HAD TO VERGE INTO AN EMBANKMENT. AGAIN POLICE AND FIRE DEPT WERE CALLED BUT NO ONE ACCIDENT OCCURED SO NO REPORTS WERE TAKEN. AGAIN WE TOWED IT TO THE DEALER STATING THE SAME SITUATION AND AGAIN NO PROBLEM HAS BEEN FOUND. THEY STILL HAVE THE TRUCK UNTIL TODAY 3/9/10 AND HAVE NOT GAVE ANY ANSWER ON WHAT IS HAD OCCURED AND NO ACTIONS HAD BEEN TAKEN. I HAVE SUFFERED TREMENDOUSLY. FEAR HAUNTS ME AT NIGHT AND I AM AFRAID TO EVEN STEP FOOT INTO THE TRUCK. I AM EMOTIONALLY DISTURBED ON THE ORDEAL AND HOW TOYOTA PERSISTED THAT NOTHING HAPPENED. MY 15 YEAR OLD NEPHEW WHO JUMPED OUT WHILE WE WERE ON THE FREEWAY HAS BEEN DRAMATIZED AND YET I CANNOT GET ANSWER.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10305394  
**Date of Incident:** 20090117  
**Vehicle:** 2003 TOYOTA SIENNA  
**Location of Incident:** SUGAR LAND, TX

**NHTSA Summary:**  
 2003 TOYOTA SIENNA MAY ALSO HAVE SUDDEN ACCELERATION PROBLEM. WHY 2003 TOYOTA SIENNA IS NOT ON TOYOTA'S RECENT RECALL LIST YET? THIS HAPPENED TO ME ONCE, I AM STILL VEY SCARED NOW, BUT I AM PUZZLED WHY 2003 TOYOTA SIENNA IS NOT ON TOYOTA'S RECENT RECALL LIST YET. PLEASE SEE THE FOLLOWING LINK FIRST. HTTP://TOWNHALL-TALK.EDMUNDS.COM/DIRECT/VIEW.F105086 I BELIEVE MY ACCIDENT HAPPENED ON SATURDAY, JANUARY 17, 2009. VERY FOTUNATELY, THERE WAS NO INJURY, AND THATS ONE OF THE REASONS WHY I DID NOT REPORT THE ACCIDENT THEN. I WAS DRIVING MY 2003 TOYOTA SIENNA FROM HOUSTON TO AUSTIN, TX. MY OLD SON WAS A FRESHMAN AT THAT TIME AND THE SPRING SEMESTER WAS ABOUT TO BEGIN. MY WIFE, MY LITTLE SON, WERE ALSO IN THE CAR AT THE TIME. THERE WERE TOTAL OF FOUR IN THE CAR. I WAS DRIVING ON HIGHWAY 71 USING THE CRUISE CONTROL. ABOUT 50 MILES (I DON'T KNOW EACTLY THE LOCATION, BUT I CAN FIND THAT LOCATION IF I DRIVE ON HIGHWAY 71 AGAIN) FROM AUSTIN, THERE WAS A TRAFFIC LIGHT. WHEN I WAS APPROACHING TO THAT TRAFFIC LIGHT, IT ALREADY TURNED TO RED, AND I IMMEDIATELY PUT MY RIGHT FOOT ON THE BRAKE TO TRY TO STOP THE CAR IN FRONT OF THE TRAFFIC LIGHT. AT THIS MOMENT, SOMETHING SCARING HAPPED. THE BRAKE DID NOT SEEM TO WORK, AND THE CAR STARTED TO ACCELERATE IN STEAD. I COULD NOT CONTROL THE CAR, AND MY CAR RUN THROUGH THE TRAFFIC LIGHT, AND EVERYONE IN THE CAR WAS VERY VERY SCARED. WE WERE VERY FORTUNATE BECAUSE THE CARS IN THE OTHER DIRECTION WERE STILL WAITING FOR THEIR GREEN LIGHT. FINALLY THE CAR WAS STOPPED APPRIMATELY 40 YARDS AFTER THE TRAFFIC LIGHT. I SLOWLY DROVE MY CAR INTO A GAS STATION NEARBY AND CHECKED THE CAR (BUT I COULD NOT FIND ANY PROBLEMS BECAUSE I AM NOT A

C-1261

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

MECHANIC). AFTER THAT, I SLOWLY DROVE THE CAR TO AUSTIN TO DROP MY SON THERE, AND I DROVE BACK TO HOUSTON THROUGH HIGHWAY 290 VERY SLOWLY. AFTER THE ACCIDENT, I TOLD THE STORY TO MY COLLEAGUES AND MY CHURCH GROUP. I TOLD THEM IT WAS THE GOD WHO STOPPED THE CARS IN OTHER DIRECTION.

**Date of Incident:** 20090119  
**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** JACKSONVILLE, FL

**NHTSA Summary:**  
 WHILE DRIVING ON I-95 SOUTH OF JACKSONVILLE FLORIDA IN MY 2006 TOYOTA TACOMA I WAS FORCED TO ACCELERATE RAPIDLY TO AVOID AN ACCIDENT. THE VEHICLE KEPT ACCELERATING UNTIL I DOING ALMOST A 100 MPH WEAVING THROUGH TRAFFIC UNTIL I COULD GET INTO THE RIGHT HAND LANE AND SHUT THE ENGINE OFF. ONCE STOPPED THE FIRST THING I CHECKED WAS THE FLOOR MAT AS I HAD A PROBLEM WITH PREVIOUS VEHICLE CAUSING THE ACCELERATOR TO STICK BUT THE FLOOR MAT WAS NO WHERE NEAR THE ACCELERATOR PEDAL. I RESTARTED THE VEHICLE BUT IT JUST REV'D WIDE OPEN SO I TURNED IT BACK OFF AND CALLED ARLINGTON TOYOTA. I WAS ADVISED TO CALL A WRECKER AS THEY SAID THEY HAD NOT EXPERIENCED THIS ISSUE BEFORE. THEY HAD IT FOR THREE DAYS BUT COULD NOT FIND ANY PROBLEMS AS IT RUN PERFECTLY WHEN OFF LOADED OFF THE WRECKER. I WAS ADVISED TO INSTALL MAT RETAINING PINS. THEN I RECEIVED A RECALL FOR THE FLOOR MATS AND WHEN I TOOK IT TO THE DEALER FOR RECALL I WAS ADVISED TO REMOVE THE DRIVERS SIDE FLOORMAT. I WAS TOLD NOTHING MORE THAT TOYOTA AS TO WHAT WAS BEING ATTEMPTED TO CORRECT THE ISSUE. IS THAT A VIABLE RECALL? I KNOW FOR A FACT IT WAS NOT THE FLOOR MAT THAT CAUSED THE ISSUE BUT WAS ADVISED BY TOYOTA THERE WAS NO DOCUMENTED INSTANCES OF UNEXPLAINED ACCELERATION WITH TACOMA'S. MY VEHICLE IS A 2006 TACOMA PRERUNNER ACCESS CAB, V6, AUTOMATIC TRANSMISSION WITH TOWING PACKAGE. I REALLY THOUGHT THAT TOYOTA WOULD RAPIDLY GET FIX IN PLACE BUT THAT HAS NOT BEEN THE CASE AND FOR THIS REASON I AM SUBMITTING THIS COMPLAINT.

**Additional Summary:**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

I WAS A FEW BLOCKS FROM WORK IN MY 1997 TOYOTA PREVIA WITH MY DAUGHTER. WE STARTED UP A STEEP HILL WHEN AT THE CREST MY VAN SUDDENLY ACCELERATED TO 50 MPH AND INCREASING. I STOOD ON THE BRAKE BUT IT HAD NO EFFECT AT ALL. THEN I TRIED TO SHIFT INTO PARK. I SUCCEEDED ONLY IN SHIFTING INTO REVERSE WHICH SENT US CAREENING BACKWARD FROM WHERE I HAD COME. THERE HAD BEEN ONLY ONE OTHER CAR ON THE STREET BECAUSE OF THE LATENESS OF THE HOUR AND IT WAS CLEAR THAT ON MY PRESENT COURSE, I WOULD HIT IT DEAD ON. I MOVED OVER ONTO THE CURB WHERE THERE WAS ABOUT A FOOT OF SNOW. EVEN SO, I RAKED HIS PASSENGER SIDE AND MY DRIVER'S SIDE. I MOVED FURTHER OVER ONTO THE YARDS, TOOK OUT A MAILBOX AND CHOSE TO GO UP A STEEP INCLINE WITH LOTS OF SNOW. THE SNOW SLOWED THE VAN DOWN, AND MY DAUGHTER STOOD UP AND FORCED THE SHIFT STICK INTO PARK. WE STOPPED. BEHIND US WERE DENSE TREES. IF WE HAD NOT STOPPED, WE WOULD SURELY HAVE BEEN KILLED. I HAD EXPERIENCED UNEXPLAINED ACCELERATION PREVIOUSLY, BUT WAS ALWAYS ABLE TO BRAKE AND STOP. SEVERAL TIMES BEFORE I HAD ASKED THE TOYOTA SERVICE TO PLEASE FIX THIS DEFECT. THEY SAID THEY COULDN'T TELL WHAT WAS WRONG IF ANYTHING AND COULD NOT FIX IT. THE INSURANCE "TOTALLED" MY VAN WITHOUT EVEN HAVING THE CAUSES CHECKED.

**Additional Summary:**

**Vehicle:** 2006 TOYOTA COROLLA  
**Location of Incident:** SAUSALITO, CA

**NHTSA Summary:**

2006 TOYOTA COROLLA "S" / 52760 MILES I WAS DRIVING ON A CITY STREET AND APPROACHING A RED STOP LIGHT, I APPLIED THE BRAKES AND WAS NEARLY AT A COMPLETE STOP (COULD NOT HAVE BEEN GOING MORE THAN 2-3MPH). ALL OF A SUDDEN WITHOUT WARNING, THE ENGINE SURGED AND THE CAR LURCHED FORWARD-- DESPITE THE FACT THAT I THE BRAKES WERE BEING PRESSED. I IMMEDIATELY PRESSED HARDER ON THE BRAKES AND GOT NO REACTION, SO I JAMMED BOTH FEET ON THE BRAKE PEDAL AS HARD AS I COULD, THE WHEELS LOCKED AND I SKID APPROXIMATELY 10 FEET! I HAD TO STEER OUT OF THE WAY OF REAR-ENDING THE STOPPED CAR AHEAD OF ME. ALL OF THIS HAPPENED IN ABOUT A THREE SECOND TIME FRAME. IT WAS LITERALLY A MIRACLE THAT I DID NOT RAM INTO THE CAR AHEAD OF ME. ONCE THE CAR CAME TO A STOP, EVERYTHING SEEMED NORMAL AGAIN, AND THE CAR DROVE FINE AS IF NOTHING EVER HAPPENED. I AM THE ORIGINAL OWNER AND SOLE DRIVER OF THIS CAR AND HAVE NEVER EXPERIENCED ANYTHING LIKE THIS. IT WAS AS IF SOME OUTSIDE FORCE HAD CONTROL OVER THE CAR AND I COULD NOT STOP IT. THIS COULD HAVE CAUSED SERIOUSLY INJURY OR DEATH. IMMEDIATELY CALLED MY TOYOTA SERVICE DEPT. AND THE TECHNICIAN I SPOKE TO TOLD ME HE "NEVER HEARD OF SUCH A THING" OR THAT "MAYBE PERHAPS THE FLOOR MAT WAS INVOLVED". I CURRENTLY HAVE NO FLOOR MATS IN THIS VEHICLE SO THAT WAS NOT THE CAUSE. I AM BRINGING THE CAR INTO TOYOTA. HOWEVER IN RESEARCHING THIS INCIDENT ONLINE, I AM NOT THE ONLY PERSON WHO HAS EXPERIENCED THIS SUDDEN LURCHING AND LOSS OF CONTROL. TOYOTA NEEDS TO ADDRESS THIS NOW! \*TR

**NHTSA Summary:**  
I WAS TRAVELING ON THE FREEWAY AND WAS CHANGING GEARS WHEN THE ACCELERATOR PEDAL SUDDENLY DROPPED TO THE FLOOR AND THE ENGINE SUDDENLY RACED UP TO REDLINE. I HAD THE CLUTCH IN AT THE TIME. I CHECKED TO MAKE SURE MY MAT WAS NOT INTERFERING WITH THE PEDAL. THIS IS THE SECOND TIME THIS HAS HAPPENED WITH THIS TRUCK. I PUMPED THE PEDAL SEVERAL TIMES BUT THE ENGINE CONTINUED TO RACE. I SWITCHED TO THIRD GEAR AND LET OUT THE CLUTCH. THIS BROUGHT THE RPM'S DOWN BUT CAUSED THE VEHICLE TO BEGIN RAPID ACCELERATION. I PUSHED IN THE CLUTCH AND THE ENGINE WENT BACK TO RACING AT REDLINE. AFTER PUMPING THE PEDAL FOR SEVERAL MORE SECONDS THE ENGINE WENT BACK TO NORMAL IDLE. I PUT IT BACK IN GEAR AND CONTINUED WITH MY TRIP. I WORRY ABOUT HOW A LESS EXPERIENCED DRIVER MIGHT HANDLE A PROBLEM LIKE THIS. I AM ALSO CONCERNED ABOUT WHAT THIS BEHAVIOR MIGHT DO TO ENGINE LIFE IF IT KEEPS REPEATING. \*TR

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** GILBERT, AZ

**NHTSA Summary:**  
MY COMPLAINT CONCERNS MY 2007 TOYOTA CAMRY WHICH SEEMS TO BE SIMILAR TO A CURRENT OPEN INVESTIGATION # DP09-001. WHILE TRYING TO EXIT THE FREEWAY MY FOOT "STUTTER STEPPED" UP AND DOWN ON THE ACCELERATOR TRYING TO MERGE TO THE PROPER LANE. I WAS "STUTTER STEPPING" BECAUSE THERE WAS A VEHICLE IN THE LANE I WAS TRYING TO CHANGE TO AND WE BOTH ACCELERATED AND DECELERATED AT THE SAME TIME IN AN ATTEMPT TO CHANGE INTO EACH OTHER'S LANE. I ACCELERATED AND DECELERATED APPROXIMATELY THREE TIME. THIS MOTION ON THE ACCELERATOR SEEMED TO CAUSE THE ACCELERATOR TO "STICK" AND MY VEHICLE WAS ACCELERATING OUT OF CONTROL. SEVERAL ATTEMPTS TO SLOW THE CAR DOWN FAILED. THE BRAKES WOULD NOT RESPOND AS I APPLIED FOOT PRESSURE. AS I APPROACHED THE INTERSECTION AT AN EXTREMELY HIGH RATE OF SPEED (AND INCREASING) I WAS ABLE TO FINALLY STOP THE CAR BY APPLYING BOTH FEET ON THE BRAKE PEDAL USING MY BACK AGAINST THE SEAT TO GAIN LEVERAGE. I AM A 6'5" MALE WEIGHING 200+ POUNDS. THE CAR WENT INTO A SKID WHEN THE BRAKES KICKED IN ALLOWING ME TO REGAIN CONTROL OF THE VEHICLE WITHOUT DAMAGE OR INJURY. THE CAR RESUMED ITS NORMAL FUNCTION AFTER THE INCIDENT. THERE WAS A PERIOD OF TIME WHEN THE VEHICLE WAS NOT RESPONDING THAT I FEARED FOR MY LIFE. I WAS MOTIVATED TO FILE THIS COMPLAINT WHEN I LEARNED ABOUT A DEADLY CRASH IN SAN DIEGO, CA INVOLVING AN OFF DUTY CHP OFFICER. HE WAS DRIVING A 2009 LEXUS ES 350. TOYOTA IS BLAMING THE "RUN-AWAY" CAR ON A DEFECTIVE FLOORMAT. BASED ON MY EXPERIENCE I BELIEVE THERE IS A MUCH MORE SERIOUS SAFETY RELATED DEFECT. I'M NOT SURE WHAT TO DO AT THIS POINT, BUT I DO NOT FEEL SAFE DRIVING THE VEHICLE. MY WIFE HAS TOLD ME THAT SHE EXPERIENCED A LESS SEVERE INCIDENT OF UNINTENDED ACCELERATION ALSO. SHE CAN PROVIDE DETAILS IF IT WILL HELP YOUR INVESTIGATION. I INTEND TO GET RID OF THE VEHICLE, BUT I NEED TO GET SOME ADVICE ON HOW BEST TO DO THAT AND ALSO HELP PREVENT OTHER POTENTIAL DEADLY CRASHES FOR OTHERS. NOTE: I AM NOT CERTAIN OF THE INCIDENT DATE. \*TR

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

DRIVING HOME FROM WORK, I EXPERIENCED A SUDDEN UNCONTROLLABLE SURGE IN ACCELERATION CAUSING MY SPEED TO INCREASE FROM ABOUT 60 MPH TO 80+ MPH. IMMEDIATELY I BEGAN TO BRAKE HARD AS I WAS RAPIDLY APPROACHING TRAFFIC JUST AHEAD OF ME. FORTUNATELY THE INSIDE LEFT LANE WAS UNOCCUPIED AND I WAS ABLE TO MAKE AN IMMEDIATE LANE CHANGE. INITIALLY I DEPRESSED THE BRAKE PEDAL AS HARD AS I COULD USING BOTH FEET BUT ONLY MANAGED TO SLOW THE VEHICLE TO 40-45 MPH. WITH MY SPEED REDUCED, I ALTERNATED BETWEEN PUMPING THE ACCELERATOR PEDAL AND PULLING UP ON IT FROM THE UNDERSIDE WITH MY RIGHT FOOT AS IT BECAME CLEAR THAT THE THROTTLE WAS STUCK IN AN OPEN POSITION. THE VEHICLE CONTINUED TO SPEED BACK UP TO OVER 65 MPH WITH LESS PRESSURE ON THE BRAKE PEDAL. WITH TRAFFIC JUST AHEAD OF ME, I MOVED OVER TO THE LEFT SHOULDER NEXT TO THE CENTER BARRIER AND CONTINUED TO TRY TO RELEASE THE OPEN THROTTLE. THERE WERE CLOUDS OF SMOKE AROUND THE VEHICLE AND THE SMELL OF BURNING MATERIALS FROM THE OVERHEATING BRAKES. AFTER FINALLY GETTING THE VEHICLE SLOWED DOWN TO ABOUT 25-30 MPH, I SHIFTED INTO  $\gamma$  NEUTRAL $\gamma$  AND DEPRESSED THE START/STOP PUSH BUTTON A NUMBER OF TIMES HOPING TO STOP THE ENGINE BUT NOTHING HAPPENED. INSTEAD THE RPM'S MOVED UP INTO THE REDLINE RANGE ON THE TACHOMETER. I QUICKLY SHIFTED BACK INTO  $\gamma$  DRIVE $\gamma$ ; THE VEHICLE JOLTED AND RAPIDLY ACCELERATED TO 60+ MPH. AS THE BRAKES WERE FADING QUICKLY, I WAS CERTAIN THAT I WOULD NEED TO SHIFT BACK INTO  $\gamma$  NEUTRAL $\gamma$  AND LET THE ENGINE BLOW UP TO STOP THE VEHICLE. SUDDENLY THE ACCELERATION SURGE STOPPED AND I WAS ABLE TO BRING THE VEHICLE TO A STOP  $\gamma$  ABOUT 1  $\mu$  TO 2 MILES FROM WHERE IT HAD STARTED. I QUICKLY SHIFTED INTO  $\gamma$  PARK $\gamma$  AND DEPRESSED THE START/STOP PUSH BUTTON TO TURN OFF THE ENGINE. THE VEHICLE SEEMED TO  $\gamma$  SHUTTER $\gamma$  AS I DID SO. UPON RESTARTING THE CAR, I DROVE CAUTIOUSLY TO LEXUS OF WAYZATA A SHORT DISTANCE AWAY FULLY PREPARED TO SHIFT INTO  $\gamma$  NEUTRAL $\gamma$  IF THE ACCELERATION REPEATED. THE CAR REMAINS THERE OVER 5 WEEKS LATER. \*TR: PETITION FOR ADDITIONAL INVESTIGATION INTO THE UNWANTED AND UNINTENDED ACCELERATION OF MODEL YEAR 2007 LEXUS ES350. \*NJ THE MANUFACTURER STATED THE UNWANTED ACCELERATION WAS A RESULT OF THE FLOOR MATS INTERFERING WITH THE THROTTLE PEDAL. THE CONSUMER EXPERIENCED UNWANTED ACCELERATION AND DOES NOT BELIEVE THE PROBLEM IS WITH THE FLOOR MATS. SEE ALSO 10261660 \*DSY.

**Vehicle:** 2008 LEXUS IS  
**Location of Incident:** GLENWOOD, MD

**NHTSA Summary:**

IN EARLY 02/09 I WAS DRIVING HOME ON INTERSTATE 695 N IN MARYLAND. I WAS TRAVELING ABOUT 50 MPH, WHEN ALL OF A SUDDEN THE CAR SUDDENLY ACCELERATED TO ABOUT 95 MPH THROUGH NO EFFORT OF MY OWN. I DID NOT ENGAGE THE ACCELERATOR PEDAL TO INCREASE THE SPEED OF THE VEHICLE. I IMMEDIATELY ENGAGED THE FOOT BRAKE TO DECELERATE AND BUT THE CAR WOULD NOT SLOW. EVENTUALLY AFTER SEVERAL ATTEMPTS I WAS ABLE TO SLOW THE CAR WITH THE BRAKE BUT THE ENGINE CONTINUED TO VIOLENTLY REV. AS I RELEASED THE FOOT BRAKE, THE CAR ONCE AGAIN ACCELERATED WITHOUT ENGAGING THE ACCELERATOR PEDAL. EVEN AFTER ENGAGING THE EMERGENCY BRAKE, THE UNAIDED ACCELERATION AND MY ATTEMPT TO DECELERATE THE CAR CONTINUED. I WAS FINALLY ABLE TO SLOW THE CAR ENOUGH TO PULL OUT OF TRAFFIC AND OVER TO THE EMERGENCY LANE AND EVENTUALLY STOP THE MOTION OF THE VEHICLE. ALTHOUGH I WAS ABLE TO BRING THE CAR TO A STOP, THE ENGINE CONTINUED TO REV VIOLENTLY, THE BACK TIRES SPUN OUT OF CONTROL AND THE BACK OF THE CAR STARTED TO FISH TAIL. I TRIED A NUMBER OF DIFFERENT TACTICS TO STOP THE CAR COMPLETELY INCLUDING, ATTEMPTING TO MANUALLY SHIFT GEARS, PUTTING THE CAR IN NEUTRAL ETC. FINALLY, AFTER SEVERAL MINUTES I WAS ABLE TO TURN OFF THE IGNITION AND BRING THE CAR TO A COMPLETE STOP AND THE ORDEAL CAME TO AN END WITHOUT DAMAGING THE CAR AND MORE IMPORTANTLY WITHOUT INJURY TO ME OR OTHERS. I HAD THE CAR TOWED TO DEALERSHIP THAT NIGHT AND EXPLAINED THE SITUATION TO THE SERVICE ORGANIZATION THE FOLLOWING DAY. THE SERVICE TEAM CONDUCTED MULTIPLE DIAGNOSTIC TESTS BUT WAS UNABLE TO DETERMINE OR EXPLAIN THE CAUSE OF THE UNINTENDED ACCELERATION TO MY SATISFACTION. ONE SERVICE REP SUGGESTED THAT THE FLOOR MAT WAS THE CAUSE BUT I HAD CHECKED IMMEDIATELY AFTER THE ORDEAL THE NIGHT BEFORE TO ENSURE THAT THE FLOOR MAT HAD NOT BECOME LODGED UNDER THE ACCELERATOR PEDAL. SINCE THE DEALERSHIP WAS NOT ABLE TO DETERMINE THE CAUSE OF THE PROBLEM, I DECIDED THAT THE BEST COURSE OF ACTION WAS TO RETURN THE CAR AND LEASE ANOTHER CAR. \*TR

**Additional Summary:**

**Date of Incident:** 20090205  
**Vehicle:** 2007 TOYOTA PRIUS  
**Location of Incident:** BURIEIN, WA

**NHTSA Summary:**

AT 4:45 PM ON 2/5/2009, I DROVE MY 2007 TOYOTA PRIUS WEST ON SW ANDOVER ST. IN SEATTLE WA. I SLOWED AS I MADE A RIGHT TURN TO PARK PERPENDICULAR TO THE STREET WITH A 6 FOOT HIGH CHAIN-LINK FENCE IN FRONT OF ME ON TOP OF A RETAINING WALL. THE BOTTOM OF THE WALL IS 6 FEET BELOW STREET LEVEL ON A PAVED PARKING AREA. AS THE PRIUS APPROACHED THE FENCE, I BRAKED TO STOP, BUT THE CAR DID NOT SLOW, SO I FLOORED THE BRAKE. THE CAR HIT A FENCE POST, PULLING IT OUT OF ITS MOUNT AND THEN THE CAR MOVED OVER THE TOP OF THE WALL PUSHING THE POLE AND FENCE OVER ITS HOOD & ROOF. THE FRONT OF THE PRIUS DROPPED TO THE AREA BELOW THE WALL WHILE THE REAR REMAINED ON THE TOP. THE FENCE MESH STRETCHED BUT SLOWED THE PRIUS'S FORWARD MOVEMENT AND KEPT THE REAR FROM GOING OVER THE WALL. THE DASHBOARD WAS STILL LIT AND I

C-1274

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

LOWERED THE ELECTRICAL WINDOWS AND YELLED FOR HELP. THE FIRST ARRIVAL TOLD ME TO "TURN OFF THE CAR". THIS IS SIGNIFICANT BECAUSE THE ONLY WAY HE COULD HAVE KNOWN THE CAR WAS RUNNING WAS IF HE HEARD THE SOUND OF THE PRIUS'S GASOLINE ENGINE THAT ONLY KICKS IN AT HIGHER SPEEDS. I OPENED THE DOOR AND JUMPED DOWN TO THE PAVEMENT. THE POLICE CAME AND MADE A REPORT. I DID NOT RECEIVE A CITATION. THE PRIUS WAS EXTRACTED BY A TOW COMPANY AND HAULED AWAY. FORTUNATELY I RECEIVED NO PHYSICAL INJURY. THE CHAIN LINK FENCE WAS TRULY A SAFETY NET. ON 2/12/2009, MY INSURANCE COMPANY, USAA, DECLARED MY PRIUS "TOTALED" AND MADE A SETTLEMENT PAYMENT. I THOUGHT PERHAPS MY BRAKES HAD FAILED. I HAD MY PRIUS RECEIVE A ROUTINE 25,000 MILE CHECK AT THE TOYOTA DEALERSHIP JUST EIGHT DAYS BEFORE THE ACCIDENT. FROM ARTICLES ON WWW.CONSUMERSAFETY.COM I LEARNED THAT SIMILAR ACCIDENTS WITH THE PRIUS HAVE HAPPENED TO OTHER PEOPLE. AFTER READING THEIR EXPERIENCES, I NOW BELIEVE THAT "UNINTENDED ACCELERATION" WAS THE MORE LIKELY CAUSE OF MY ACCIDENT. \*TR

**Date of Incident:** 20090208  
**Vehicle:** 2008 TOYOTA CAMRY  
**Location of Incident:** HAZEL CREST, IL

**NHTSA Summary:**  
I OWN A 2008 TOYOTA CAMRY. WHILE DRIVING ON THE EXPRESSWAY, THE ACCELERATOR PEDAL BECAME STUCK. THANKFULLY, IT WAS AN EARLY SUNDAY MORNING AND THERE WERE VERY FEW CARS ON THE EXPRESSWAY. I COULDN'T FIGURE OUT WHAT WAS GOING ON AT FIRST WHEN I TOOK MY FOOT OFF THE GAS AND THE CAR WOULDN'T SLOW DOWN. I THEN THOUGHT TO MOVE THE FLOOR MAT OUT OF THE WAY AND THE GAS PEDAL BECAME DISENGAGED. THIS OCCURRED AGAIN, HOWEVER, AND I TOOK THE FLOOR MAT OUT OF MY CAR. I THOUGHT IT COULD HAVE BEEN THE FLOOR MAT UNTIL I RECENTLY HEARD ABOUT THE REPORTS OF OTHER TOYOTA OWNERS AND THEIR EXPERIENCE WITH THIS PROBLEM (ESPECIALLY THE FAMILY THAT WAS KILLED AS A RESULT OF THEIR GAS PEDAL STICKING). FURTHERMORE, I NEVER RECEIVED A NOTICE FROM TOYOTA REGARDING THIS PROBLEM. A FRIEND OF MINE MADE ME AWARE OF IT. I FIND THIS APPALLING. I ALSO FIND IT APPALLING THAT TOYOTA IS EXCUSING ITSELF FROM BLAME AND IS SHIFTING IT TO THE VEHICLES' OWNERS. \*TR

**Additional Summary:**

CARPETED FLOORMAT. WHILE THE VEHICLE WAS IN MOTION, THE FLOORMATS MOVED FORWARD AND INTERFERED WITH THE ACCELERATOR PEDAL, WHICH CAUSED THE VEHICLE TO ACCELERATE TO 86 MPH. THE CONTACT RECEIVED A CITATION. SHE CALLED THE MANUFACTURER AND WAS INFORMED THAT BECAUSE HER MATS WERE CARPETED, THEY WERE EXCLUDED FROM NHTSA CAMPAIGN ID NUMBER 07E082000 (EQUIPMENT). THE MANUFACTURER WOULD NOT ASSUME ANY RESPONSIBILITY. THE FAILURE AND CURRENT MILEAGES WERE 65,000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10258438  
**Date of Incident:** 20090210  
**Vehicle:** 2008 TOYOTA TACOMA  
**Location of Incident:** OLYPHANT, PA

**NHTSA Summary:**  
I OWN A 2008 TOYOTA TACOMA 4WD 6CYL EXT CAB I WAS DRIVING DOWN THE HIGHWAY AND WAS PASSING A SLOWER MOVING VEHICLE WHEN MY TRACK STARTED ACCELERATING ON IT'S OWN IT TOOK ME FROM 60 MPH TO 78 AND WOULD HAVE CONTINUED IF I DIDN'T APPLY MY BRAKES AS HARD AS I COULD IT CONTINUED TO TRY AND PULL EVEN WITH THE BRAKES APPLIED. THE CRUISE CONTROL WAS ON AT THE TIME BUT WAS NOT ENGAGED I GOT THE TRUCK TO THE SIDE OF THE ROAD AND TURNED OFF THE KEY. I TOOK THE TRUCK TO A TOYOTA DEALER AND HAD IT CHECKED OUT THEY SAY THEY COULD NOT FIND A PROBLEM WITH IT THEY CONTACTED TOYOTA AND GAVE ME A CASE NUMBER FOR THE PROBLEM. \*TR

**Vehicle:** 2004 LEXUS RX330  
**Location of Incident:** FAIRVIEW, NJ

**NHTSA Summary:**  
I OWN A RX 330 LEXUS AND IT HAS A PROBLEM WITH THE ACCELERATOR. SOMETIMES IT GETS STUCK AT ABOUT 3 RPMS AND IT WONT COME DOWN FROM THERE UNTIL SOMETHING LETS GO OF IT AND THEN IT JERKS EVEN THOUGH I WOULD BE GOING AT A LOW SPEED SUCH 25MPH. THE ACCELERATOR FEELS RIGID AND NO MATTER HOW MUCH YOU PUSH ON IT THE SPEED DOESN'T INCREASE UNTIL IT JERKS AND LETS GO. OTHER TIMES IT TENDS TO GO FASTER EVEN THOUGH I AM NOT PRESSING ON IT. WHEN I BRAKE IT DOESN'T WANT TO STOP UNTIL I SLAM ON THE BRAKES HARD. I CAN FEEL THAT IT IS LIKE SOMETHING IS STUCK AND THE CAR DOES WHAT IT WANTS UNTIL IT IS LET GO WHICH IS WHEN IT JERKS. I HAVE NOT HAD A CRASH YET, BUT I AM CONCERNED ABOUT IT. \*TR

**Additional Summary:**

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2009 TOYOTA YARIS. THE VEHICLE HAS EXPERIENCED NUMEROUS UNEXPECTED ACCELERATION FAILURES. THE VEHICLE HAS ALSO EXCEEDED 90 MPH WHEN THE FAILURE OCCURRED. TOYOTA TOLD THE CONTACT THAT THERE WERE NO PROBLEMS WITH THE VEHICLE; HOWEVER, THE FAILURE OCCURRED EVERY TIME SHE DROVE IT. THE CONTACT HAS RECEIVED SEVERAL TICKETS BECAUSE OF THE ACCELERATION. THE VEHICLE BEGAN SHAKING PRIOR TO IT ACCELERATING. THE FAILURE MILEAGE WAS 100. THE CURRENT MILEAGE WAS 18000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 20090213  
**Date of Incident:** 20090213  
**Vehicle:** TOYOTA AURIS  
**Location of Incident:** ,

**NHTSA Summary:**  
**Additional Summary:**  
On Friday 13 February 2009, his Toyota Auris accelerated out of control, crashed through a wall and into a garden. Toyota said the vehicle was not faulty.

As I set off from my driveway, I touched the accelerator and the car shot out forward. I was lucky I didn't crash into my neighbour's car. I should probably have stopped driving right then, but I didn't. I thought: 'The trouble will probably go away if I drive on a bit'. I carried on, but the car kept racing forward every time I touched the accelerator.

As I came round a left turn, the car lurched forward like a Formula 1 vehicle. I saw a white van coming towards me. I was going too fast - we were heading for a head-on collision. I managed to steer out of the way and straight into a parked car, but at least I missed the van. When I looked out, I could see I was blocking the road, so I tried to reverse out of the way. But when I touched the accelerator, the car shot backwards. It spun in a semi circle, hit the kerb and flipped backwards over the pavement and crashed through a wall. I landed in someone's front garden, with the front wheels hanging in the air, having destroyed a small tree and a bollard.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Toyota ID Number:**  
**NHTSA ODI Number:** 10259837, 10258884  
**Date of Incident:** 20090214  
**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** ORLANDO, FL

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2006 TOYOTA TACOMA. WHILE EXITING THE HIGHWAY AT LESS THAN 15 MPH, THE VEHICLE ACCELERATED UNCONTROLLABLY WHEN THE BRAKE PEDAL WAS DEPRESSED. THE DRIVER, WEIGHING 250 LBS., COULD NOT PLACE ENOUGH FORCE ON THE BRAKE PEDAL TO STOP THE VEHICLE. HE RAN TWO RED LIGHTS AND BARELY MISSED A COMMERCIAL VEHICLE AND NUMEROUS OTHER VEHICLES WHILE THE BRAKES WERE STILL FULLY ENGAGED. HE WAS FINALLY ABLE TO STOP THE VEHICLE BY ENGAGING THE EMERGENCY BRAKE. THE DEALER STATED THAT THE FAILURE WAS CAUSED BY THE FLOOR MATS. THE CONTACT WAS CONCERNED ABOUT HOW THAT WAS LINKED TO THE UNCONTROLLABLE ACCELERATION. THE FAILURE AND CURRENT MILEAGES WERE LESS THAN 18,000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10293176  
**Date of Incident:** 20090214  
**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** FINDLAY, OH

**NHTSA Summary:**  
HAVE A 2005 TOYOTA CAMRY. THE ENGINE HAS STARTED ACCELERATING THREE TIMES, THE LAST BEING 2/14/09. EACH TIME THE BRAKES WERE ABLE TO KEEP THE CAR FROM SPEEDING UP AND, AFTER A FEW SECONDS, THE ENGINE WENT BACK TO AN IDLE. TWO TIMES I TOOK THE CAR TO THE DEALER (AND TALKED OTHER TIMES) AND THEY CHECKED IT OUT. THEY COULD NOT FIND ANY PROBLEM AND AFTER CONFERRING WITH THEIR "HEADQUARTERS" IN CALIFORNIA, SAID THAT THEY HAD NEVER HEARD OF ANYONE HAVING THIS PROBLEM. AFTER READING THE FIRST ARTICLE IN A NEWSPAPER ABOUT THIS CONCERN I CHECKED THE FLOOR MAT. THE FLOOR MAT IS NOT EVEN CLOSE TO THE ACCELERATOR PEDDLE.

**Vehicle:** 2008 TOYOTA CAMRY SOLARA  
**Location of Incident:** ADELPHI, MD

**NHTSA Summary:**  
HELLO, I HAVE A 2008 SOLARA. I JUST BOUGHT THIS CAR A LITTLE OVER A YEAR AGO. I HAD REPORTED SOME PROBLEMS WITH THE ACCELERATION. TOYOTA HAS TOLD ME THEY RECEIVED NO COMPLAINTS AND THAT I DON'T HAVE A PROBLEM AND MAKE SURE THAT I DON'T JUST PUSH THE PEDAL TO HARD IN OTHER WORDS HE SAID DON'T GUN IT. THIS ALL HAPPENED BEFORE ANY RECALL WAS DONE. THEY TOLD ME THAT THERE IS NO PROBLEMS WITH MY CAR UNLESS I CAN DUPLICATE THE PROBLEM. I DRIVE IN WASHINGTON DC AND WHEN YOU STOP AND GO AND SOMETIMES WHEN IT GOES IT PICKS UP ACCELERATION AND I HAVE TO KEEP HITTING MY BRAKES TO SLOW DOWN OR HIT FOR A HARD STOP. THIS DOESN'T HAPPEN ALOT BUT STILL I HAVE CONCERNS, SINCE AT ONE POINT THERE USED TO BE A PROBLEM WITH THIS. THIS WAS NOT DUE TO FLOOR MATS AND AS I STATED THIS WAS WELL BEFORE RECALL. NO ONE HAS BEEN HURT AND NOW I HAVE TO KEEP A GREAT DISTANCE TO MAKE SURE I DON'T HIT THE PERSON IN FRONT OF ME SINCE I NEVER KNOW WHEN IT WILL KICK IN. THIS IS AN ONGOING ISSUE WITH MY CAR. THE DATE I AM CLICKING ON BELOW IS A GUESS SINCE I AM WORKING

**NHTSA ODI Number:** 10308440  
**Date of Incident:** 20090217  
**Vehicle:** 2005 LEXUS ES330  
**Location of Incident:** JERSEY CITY, NJ

**NHTSA Summary:**  
I WAS DRIVING OUR LEXUS ES330 WITH MY WIFE FROM NJ TO CT ON A HIGHWAY. AT ONE POINT DURING THE DRIVE, REMOVED MY FOOT FROM THE GAS PEDAL, BUT INSTEAD OF SLOWING DOWN, THE CAR STARTED ACCELERATING. IN PANIC I STARTED APPLYING THE BRAKES, BUT THE CAR WOULD NOT SLOW DOWN AT ALL. FORTUNATELY, THERE WAS NO OTHER CAR RIGHT IN FRONT OF ME, OTHERWISE IT WOULD HAVE RESULTED IN A MESSY CRASH. IT WAS VERY SCARY. EVENTUALLY ACCELERATOR STOPPED WORKING COMPLETELY AND THE CAR STOPPED IN LANE OF THE HIGHWAY. I CANNOT BELIEVE TOYOTA HAS NOT INCLUDED THIS MODEL IN THEIR RECALL LIST. THIS IS RIDICULOUS. AND I CHECKED IT THEN, THE MAT ON THE DRIVER SIDE WAS NOT STUCK IN THE GAS PEDAL.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10260824  
**Date of Incident:** 20090218  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** LATHAM, NY

**NHTSA Summary:**  
THERE IS A SAFETY RECALL OUT FOR THE 2007 LEXUS ES 350 IN RESPECT TO ALL WEATHER FLOOR MATS POTENTIALLY CAUSING A JAMMED ACCELERATOR (NHTSA ACTION # EA07010). THE RECALL WAS INITIATED IN SEPT. 2007. THE LAST REPORT FILED BY LEXUS WITH YOUR OFFICE INDICATED THAT THERE WERE OVER 32,000 OWNERS OUT OF 55,000 THAT THEY WERE UNABLE TO CONTACT. MY VEHICLE WAS TAKEN IN FOR SERVICING AT THE LOCAL LEXUS DEALER BY THE PREVIOUS OWNER IN AUG. 2008 AND THE DEFECTIVE MAT WAS IN PLACE. WHEN I PURCHASED THIS VEHICLE IN JANUARY OF THIS YEAR, I IMMEDIATELY CALLED THIS SAME DEALER TO HAVE MY NAME INDICATED AS THE OWNER OF RECORD. I SPECIFICALLY ASKED IF I HAD TO DO ANYTHING ELSE FOR RECALL NOTIFICATION ETC. AND WAS TOLD NO. LAST WEEK MY WIFE EXPERIENCED THE JAMMED ACCELERATOR DUE TO THE FAULTY MAT AND WAS EXTREMELY FORTUNATE THAT SHE WAS ABLE TO BRING A RUNAWAY VEHICLE DOING 80 OR 90 MPH TO A STOP WITHOUT AN ACCIDENT. I CALLED THE LEXUS DEALER IMMEDIATELY AFTER THE INCIDENT AND WAS TOLD ABOUT THE MAT PROBLEM BUT NOT ABOUT A RECALL. I FOUND OUT ABOUT THE RECALL FROM YOUR WEBSITE. I ALSO WENT TO THE NATIONAL WEBSITE FOR LEXUS AND FOUND THAT I WAS NOT REGISTERED AS THE OWNER AND SO I REGISTERED. I LATER CALLED THE LOCAL LEXUS DEALER TO SEE ABOUT THE RECALL AND THE PERSON SAID "YOU ARE LISTED IN THE NATIONAL LIST, I AM SURPRISED SOMEONE TOOK THE TIME". (IN REALITY THAT SOMEONE WAS ME, NOT ANYONE AT THE DEALERSHIP). MY PROBLEM WITH THE MAT HAS BEEN TAKEN CARE OF BY THE LOCAL DEALER AFTER I ASKED ABOUT THE RECALL, BUT THIS ISN'T MUCH HELP TO ALL THE OTHERS OUT THERE DRIVING AROUND WITH THESE FAULTY MATS. ACCORDING TO YOUR WEBSITE, ONE PERSON HAS DIED AND SEVERAL HAVE BEEN INJURED..... SO FAR. \*TR

**Location of Incident:** TRAVERSE CITY, MI

**NHTSA Summary:**  
TL\* THE CONTACT OWNS A 2006 TOYOTA TACOMA. WHILE DRIVING APPROXIMATELY 65 MPH, THE VEHICLE SPONTANEOUSLY ACCELERATED TO 100 MPH WITHOUT VOLUNTARY APPLICATION OF THE ACCELERATOR PEDAL. WHEN THE FAILURE OCCURRED, THE RPMs ABNORMALLY INCREASED AND THE BRAKING SYSTEM BECAME INOPERATIVE. THE CONTACT HAD TO DEPRESS THE PARKING BRAKE IN ORDER TO STOP THE VEHICLE. THE VEHICLE WAS TOWED TO A DEALER BECAUSE THE TECHNICIAN COULD NOT DUPLICATE THE FAILURE OR LOCATE ANY DIAGNOSTIC ERROR CODES. THE FAILURE AND CURRENT MILEAGES WERE 65,000.

**NHTSA ODI Number:** 10323576  
**Date of Incident:** 20090222  
**Vehicle:** 2009 TOYOTA MATRIX  
**Location of Incident:** YIGO, GU

**NHTSA Summary:**  
I WAS SOLD A DEFECTIVE 2009 TOYOTA MATRIX. MY SON WAS DRIVING THE VEHICLE MERGING INTO TRAFFIC. HIS LANE WAS ENDING AND THERE WASN'T AN OPENING FOR HIM TO MERGE. HE WASN'T ABLE TO STOP THE CAR AND ENDED UP RUNNING INTO A TELEPHONE POLE WHICH FELL ON THE VEHICLE AND IT WAS TOTALED. HE SAID THAT HE DIDN'T UNDERSTAND WHY HE COULDN'T STOP AND COULDN'T EXPLAIN WHAT HAPPENED. THE POLICE OFFICER WAS UPSET AT MY SON BECAUSE HE SAID THERE MUST HAVE BEEN A REASON HE CRASHED INTO THE POLE AND SINCE NO ONE COULD FIGURE IT OUT THE POLICE OFFICERS ONLY CONCLUSION WAS TO ASSUME THAT MY SON WAS SLEEPY. IN MARCH OF THIS YEAR I RECEIVED A CALL FROM THE LOCAL TOYOTA DEALER STATING THAT OUR 2009 MATRIX IS BEING RECALLED FOR THE DEFECTIVE ACCELERATOR PEDAL AND THAT I SHOULD BRING IT IN TO BE REPAIRED. I EXPLAINED TO THEM IT WAS TOO LATE THE VEHICLE HAS BEEN TOTALED IN AN ACCIDENT. I WAS ORIGINALLY INFORMED THAT TOYOTA WOULD DO AN INVESTIGATION. THEN AFTER SEVERAL WEEKS THEY TOLD ME THAT THERE IS NOTHING THEY CAN DO BECAUSE THE VEHICLE IS NOT AVAILABLE FOR AN INVESTIGATION AND ALSO BECAUSE NO ONE ELSE HAS REPORTED PROBLEMS WITH THE MATRIX. THE FACT IS I WAS SOLD A DEFECTIVE CAR AND MY FAMILY AND I WERE IN DANGER EVERY TIME THE VEHICLE WAS DRIVEN. THE STEERING WHEEL WAS ALSO DEFECTIVE. THE AIRBAG WAS COMING OUT OF THE STEERING WHEEL AND THE WHOLE STEERING WHEEL. IT WAS REPLACED BEFORE THE ACCIDENT.

**Vehicle:** 2006 LEXUS IS250  
**Location of Incident:** FOSTER CITY, CA  
**NHTSA Summary:**  
IN LIGHT OF THE RECENTLY ANNOUNCED SAFETY RECALL FOR THIS VEHICLE, WE FELT COMPELLED TO INFORM YOU OF THE FOLLOWING INCIDENTS INVOLVING THE REFERENCED AUTOMOBILE: 1) ON OR ABOUT APRIL 2008 WE HAD JUST LEFT OUR HOUSE AND TRAVELED ABOUT TWO MILES WHEN WE STOPPED AT A RED LIGHT. WITH THE VEHICLE IN GEAR AND MY FOOT ON THE BRAKE, I FELT THE CAR ATTEMPTING TO SURGE FORWARD. I APPLIED GREATER PRESSURE ON THE BRAKE PEDAL AND WAS ABLE TO KEEP THE CAR FROM MOVING. THIS SURGING DID NOT REPEAT ITSELF AT ANY OTHER STOPS THAT DAY. 2) ON OR ABOUT FEBRUARY 27, 2009, MY WIFE HAD JUST LEFT COSTCO IN OUR CITY AND TRAVELED ABOUT 1/2 MILE WHERE SHE STOPPED AT A RED LIGHT PRIOR TO MAKING A LEFT TURN. WHILE WAITING FOR THE GREEN LIGHT, THE CAR SUDDENLY STOPPED DEAD; THE ENGINE HAD UNEXPECTEDLY SHUT ITSELF OFF WITH THE CAR IN GEAR. SHE ATTEMPTED TO RE-START THE CAR SEVERAL TIMES TO NO AVAIL. THE POLICE WAS CALLED WHO IN TURN CALLED AAA. WHILE WAITING FOR AAA TO ARRIVE, SHE ATTEMPTED TO RE-START THE VEHICLE ONE LAST TIME AND WAS SURPRISED TO FIND THAT IT DID START SUCCESSFULLY. THE APPROXIMATE TIME BETWEEN THE CAR'S ENGINE DYING AND BEING RESTARTED WAS ABOUT 15 MINUTES. THIS HAS NEVER REPEATED; HOWEVER, MY WIFE HAS NOTICED THE ENGINE IDLING FAST WHILE THE CAR WAS STOPPED ON SEVERAL OCCASIONS. WE BROUGHT THE CAR INTO PUTNAM LEXUS FOR INSPECTION ON MARCH 6, 2009, WHERE THEY WERE UNABLE TO DUPLICATE THE PROBLEM. 3) ON SEPTEMBER 2, 2009, WE HAD JUST EXITED THE FREEWAY WHEN WE STOPPED AT THE FIRST STOP LIGHT. THE CAR'S ENGINE BEGAN IDLING FAST AND THEN BEGAN IDLING ROUGH. WITH MY FOOT ON THE BRAKE PEDAL, I GLANCED AT THE TACHOMETER AND NOTICED THAT THE NEEDLE WAS NOT STEADY AS IT NORMALLY IS BUT THE RPM'S WERE FLUCTUATING BETWEEN A BIT HIGHER THAN NORMAL AND A BIT LOWER THAN NORMAL. THIS BEHAVIOR HAS REPEATED SPORADICALLY ON A NUMBER OF OCCASIONS. WE DO NOT BELIEVE THE FLOOR MAT CAUSED THE ABOVE INCIDENTS. WE HAVE ONLY USED THE LEXUS FLOOR MATS THAT CAME WITH THE VEHICLE AND THE ANCHOR. \*TR

**Location of Incident:** CUPERTINO, CA  
**NHTSA Summary:**  
I AM A SLOW DRIVER AND OBEY SPEED LIMITS. I KNEW I WAS COMING UP TO A STOP SIGN ON A 25 MPH ROAD, AND I ALWAYS DO A REAL STOP, NOT A SLOW DOWN AND CREEP FORWARD. A BLOCK OR TWO PRIOR TO THE ACCIDENT, I PASSED SEVERAL POLICE CARS AND EVEN AN UNSAFE DRIVER WOULD HAVE CAREFULLY OBEYED THE TRAFFIC LAWS. I HAVE NO MEMORY OF THE COUPLE OF SECONDS IMMEDIATELY PRIOR TO AND DURING THE ACCIDENT, AND MY FIRST MOMENT I SAW WHAT WAS HAPPENING, I HAD MY FOOT ALREADY ON THE BRAKE PUSHING DOWN HARD ON IT BUT HEADING TO THE CURB ANYWAY. I THINK THE CURB STOPPED THE CAR. MY AIR BAGS DID NOT DEPLOY AND THE OFFICER AT THE SCENE WAS SURPRISED. I BELIEVE THIS FITS THE COMPLAINTS ABOUT SUDDEN ACCELERATION. MY CAR WAS TOTALED AND I HAD TO GET A NEW CAR. I'VE ASKED MY INSURANCE COMPANY TO INVESTIGATE, BUT THEY HAVE NOT GOTTEN BACK TO ME. \*TR

**NHTSA ODI Number:** 10305506  
**Date of Incident:** 20090301  
**Vehicle:** 2008 TOYOTA FJ CRUISER  
**Location of Incident:** PISCATAWAY, NJ  
**NHTSA Summary:**  
THIS IS A SPORADIC OCCURRENCE AND CANNOT BE REPRODUCED DELIBERATELY: WHEN BRAKING SUDDENLY AT 40 MPH AND BELOW, THE VEHICLE DOES NOT SLOW DOWN NOTICEABLY. IT APPEARS ONLY MINIMAL BRAKING FORCE IS EXERTED AT THESE OCCURRENCES, DESPITE MAXIMUM BRAKE FORCE ON THE PEDAL. THIS HAPPENS ALSO ON DRY PAVEMENT, RULING OUT SKIDDING AS CAUSE OF FAILED DECELERATION. THE MASSIVELY PROLONGED BRAKING DISTANCE CAUSED TWO NEAR-MISSES. THE VEHICLE WAS PURCHASED NEW, WITH THE BRAKE DEFECT FIRST NOTICED DURING THE FIRST YEAR OF OPERATION (FIRST 15,000 MILES). THE DEALERSHIP WAS NOTIFIED, DETAILS EXPLAINED, AND AN INSPECTION OF THE BRAKING SYSTEM WAS REQUESTED. THE DEALERSHIP WAS UNABLE TO DUPLICATE THE CONCERN BECAUSE OF THE ONLY SPORADIC OCCURRENCE OF BRAKE FAILURE. NO ACTION WAS TAKEN.

**Vehicle:** 2007 TOYOTA CAMRY  
**Location of Incident:** ALOHA, OR  
**NHTSA Summary:**  
I HAVE A 2007 CAMRY 4CYLDR AUTOMATIC, THAT HAS PROBLEMS ACCELERATING. THIS USUALLY HAPPENS AT LEAST ONCE A DAY. FOR EXAMPLE IF I TAKE OFF FROM A RED LIGHT OR A STOP THE CAR WILL HESITATE LIKE IT IS STALLING AND THEN WILL PROCEED TO TAKE OFF. THIS IS AN INCONSISTENT PROBLEM THAT WHEN I COMPLAINED AT THE DEALERSHIP THEY COULDN'T REPRODUCE THE PROBLEM. THE OTHER EXAMPLE THAT THE CAR EXHIBITS IS THAT WHEN YOU TAKE YOUR FOOT OF THE GAS PEDAL THE CAR WILL SLOW DOWN BUT AS YOU REAPPLY YOUR FOOT THE CAR WILL HESITATE OR STALL UNTIL YOU REMOVE YOUR FOOT AND REAPPLY IT. I HAVE 60000 MILES ON MY CAR AND IT HAS HAD ALL THE TIMELY SERVICES DONE TO IT. IT HAS BEEN A GREAT CAR UP TILL ABOUT A YEAR AGO WHEN THE PROBLEM BEGAN. ROUGHLY 45000 MILES AGO. I FEAR THAT THIS MAY RESULT IN AN INABILITY TO DRIVE DEFENSIVELY AND RESULT IN AN ACCIDENT. NEITHER MY WIFE NOR I AM AGGRESSIVE DRIVERS, AND WE DONT FEEL THAT THIS IS AS A RESULT OF HARSH DRIVING. I DID TAKE THE CAR INTO THE DEALER TO FIND OUT IF IT WAS PART OF THE GAS PEDAL RECALL THAT IS GOING ON AND THEY SAID THAT IT WASN'T. I HOPE THAT TOYOTA WILL MAKE A TIMELY DECISION ON THIS AS I HAD HOPED TO PURCHASE ANOTHER TOYOTA IN THE FUTURE.

**Date of Incident:** 20090301  
**Vehicle:** 2007 LEXUS ES350  
**Location of Incident:** CHESTER SPRINGS, PA  
**NHTSA Summary:**  
WHILE SITTING AT A RED LIGHT WITH MY FOOT ON THE BRAKE, THE ENGINE SPEED INCREASED FROM IDLE WITHOUT TOUCHING THE ACCELERATOR PEDAL. I SLAMMED MY FOOT DOWN ON THE ACCELERATOR A FEW TIMES THINKING IT WAS LODGED. IT

C-1292

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

DEPRESSED AND RETURNED TO POSITION WITHOUT STICKING. AFTER APPROX. FIVE OR MORE SECONDS THE ENGINE SPEED RETURNED TO IDLE ON ITS OWN. I SHUT OFF THE VEHICLE AND RESTARTED IT. THE PROBLEM HASN'T OCCURRED SINCE - KNOCK ON WOOD. THE SPEED INCREASE WAS NOT MINOR AS ONE WOULD EXPECT FROM THE AIR CONDITIONING TURNING ON - THE ENGINE SPEED WAS SEVERAL THOUSAND RPM'S BUT DID NOT RED-LINE.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10316587  
**Date of Incident:** 20090301  
**Vehicle:** 2005 TOYOTA TACOMA  
**Location of Incident:** KEY WEST, FL

**NHTSA Summary:**  
WHILE DRIVING DOWN THE FREEWAY AT APPROX. 65MPH THE VEHICLE ACCELERATED, AS WE DON'T OFTEN DRIVE OUR VEHICLE IT HAS ONLY OCCURRED 2-3 TIMES(BETWEEN 2008-2009). FORTUNATELY WE HAVE ALWAYS BEEN A REASONABLE DISTANCE FROM OTHER VEHICLES WHEN THE TRUCK "TAKES OFF"(IT IS LIKE YOU GUNNED THE GAS PEDAL). AFTER THE ACCELERATION THE TRUCK JUST SLOWS BACK DOWN. WE RECEIVED A RECALL NOTICE FOR THE FLOOR MAT ISSUE, WHICH THIS IS NOT THE ISSUE, IT STATED WE WOULD BE INFORMED AS TO WHEN WE SHOULD BRING THE VEHICLE IN FOR THAT REPAIR. SO FAR NO OTHER CONTACT HAS BEEN MADE. WITH BRINGING THIS ACCELERATION CONCERN TO THE ATTENTION OF THE DEALER, WE WERE INFORMED THAT ALTHOUGH THE '95 TACOMAS ARE NOT IN THE ACCELERATOR RECALL, THEY WOULD LOOK AT THE GAS PEDAL AND REPLACE IT IF NEEDED AT OUR EXPENSE MINUS LABOR COSTS. I SEE NOW THAT THIS MAY NOT EVEN FIX THE PROBLEM. SHOULD I BOTHER HAVING THIS REPAIR DONE?

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10317048  
**Date of Incident:** 20090301  
**Vehicle:** 2003 TOYOTA CAMRY  
**Location of Incident:** TAMPA, FL

**NHTSA Summary:**  
TL\* CONTACT OWNED A 2003 TOYOTA CAMRY. THE CONTACT STATED SHE HAD SEVERAL PROBLEMS WITH THIS VEHICLE WHEN SHE HAD IT. SHE ALMOST RAN THREW HER WINDOW WHEN THE VEHICLE WAS IN PARK. SHE NO LONGER HAS THE VEHICLE BUT THOUGHT THAT FILING A COMPLAINT WAS THE RIGHT THING TO DO. THE FAILURE MILEAGE 70,000.

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10317129

**NHTSA Summary:**  
ON 2/26/10 I BROUGHT MY 2009 TOYOTA COROLLA LE TO NORTH HILLS TOYOTA/SCION SERVICE CENTER AT 711 BROWNS LANE PGH PA 15237 TO HAVE THE RECALL WORK PERFORMED. AS PER THE THE WORK ORDER #TOCS162571, THE WORK PERFORMED WAS: INSTALLING ACCELERATOR PEDAL REINFORCEMENT BAR, BRAKE INSPECTION,

C-1293

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

INSTALLING INTAKE AIR TUBE CONNECTOR KIT. UP UNTIL THAT TIME, I HAD NOT EXPERIENCED ANY PROBLEMS. ON 3/1/10 AT 10:25AM, THE 2009 TOYOTA COROLLA ABRUPTLY ACCELERATED TO OVER 7,000 RPM'S WHILE MY FOOT WAS APPLIED TO BRAKE AS I WAS COMING TO A STOP AT A RED LIGHT. THE CAR CONTINUED TO MOVE DESPITE APPLYING EXTRA PRESSURE TO THE BRAKE WITH MY FOOT. I THEN TURNED THE CAR OFF WITH THE KEY, PUT IT IN PARK, WAITED APPROX. 1 MINUTE, AND RESTARTED THE CAR. THE ACCELERATION WAS MUCH WORSE THAN THE FIRST TIME AND THE NEEDLE ON THE TACHOMETER AGAIN WENT TO OVER 7,000 RPM'S AND THE ENGINE SOUNDED LIKE A "JET ENGINE". I IMMEDIATELY TURNED TO ENGINE OFF AGAIN. THE POLICE WERE THEN CALLED AS THE CAR WAS BLOCKING TRAFFIC. THE OFFICER AND MYSELF PUSHED THE CAR TO SIDE OF ROAD WITHOUT STARTING IT. AAA EVENTUALLY TOWED THE CAR TO NORTH HILLS TOYOTA/SCION SERVICE CENTER. ON 3/2/10, DEANA HICKS OF THE SERVICE DEPT. CALLED TO SAY, UPON INSPECTION, THEY FOUND NOTHING WRONG WITH THE CAR. I ASKED THEM TO EXAMINE THE CAR FURTHER AND A SERVICE TECH. TOOK IT HOME OVER NIGHT IN AN ATTEMPT TO REPLICATE THE PROBLEM AND COULD NOT. AT THIS POINT WE WERE TOLD WE COULD TAKE THE CAR BACK.

**Date of Incident:** 20090302  
**Vehicle:** 2006 TOYOTA PRIUS  
**Location of Incident:** RANCHO MIRAGE, CA

**NHTSA Summary:**  
BACK IN 2009, I EXPERIENCED RUNAWAY ACCELERATION IN MY 2006 TOYOTA PRIUS. THE CRUISE CONTROL HAD BEEN ENGAGED FOR BETWEEN 5 AND 15 MINUTES. ALL OF A SUDDEN, THE VEHICLE STARTED TO RACE. I WAS TRAVELING IN THE 70'S (MPH), AND IT SHOT UP TO NEARLY 100 BEFORE I GOT IT UNDER CONTROL. THE DEALER CLAIMED HE HAD NO SUCH OTHER COMPLAINTS AND COULD NOT REPLICATE MY PROBLEM. I BROUGHT IT BACK AGAIN A FEW MOS. LATER BECAUSE THE CRUISE CONTROL INTERMITTENTLY FAILED TO SET. I BROUGHT IT BACK A THIRD TIME, AGAIN, A FEW MOS. LATER. THIS TIME, THEY HAD A FIX, WHICH WAS A NEW CRUISE CONTROL MODULE. THE FIRST 2 TRIPS WERE UNDER WARRANTY. THEY WANTED TO CHARGE ME THE 3RD TIME BECAUSE IT WAS THEN BEYOND THE 3 YEARS OF WARRANTY. I FOUGHT THIS BECAUSE THE CONDITION WAS OBVIOUSLY PRE-EXISTING. YESTERDAY, STEVE WOZNIAK RECEIVED TELEVISION AND PRESS ATTENTION WHEN HE REPORTED THE SAME PROBLEM, A PROBLEM THAT TOYOTA TOLD ME THEY HAD NEVER EXPERIENCED BEFORE. AS FAR AS I AM CONCERNED, THIS COMPANY IS SCAMMING THE PUBLIC. THEY ARE PLAYING WITH PEOPLE'S LIVES. IT'S GOT TO STOP. IT'S MORE THAN JUST BRAKE PEDALS AND CARPET, IT'S APPARENTLY A WAY OF LIFE FOR THIS COMPANY. (I NO LONGER HAVE THE VEHICLE. DATES AND MILEAGE ARE APPROX.)

**Date of Incident:** 20090306  
**Vehicle:** 2009 TOYOTA MATRIX  
**Location of Incident:** MELBOURNE, FL

**NHTSA Summary:**  
I PURCHASED A 09 TOYOTA MATRIX 5DR, 2WD, CUV ON 1/24/09. DURING THE FIRST WEEK IN MARCH 2009 I WAS DRIVING ON A 45 MPH CITY STREET GOING A LITTLE LESS THAN THE SPEED LIMIT WHEN ALL OF A SUDDEN MY CAR SPED UP. I GAVE THE GAS PEDAL A TAP THINKING IT HAD JUST STUCK, BUT THE MOTOR KEPT RACING AS I PICKED UP SPEED. I TOOK MY FOOT OFF THE GAS PEDAL AND PUT MY FOOT ON THE BRAKE PEDAL, BUT THE CAR WOULD NOT SLOW DOWN. I NEVER LOOKED TO SEE HOW FAST I WAS GOING, I WAS TOO BUSY, TRYING TO SLOW DOWN AND FIND A PLACE TO PULL OVER BEFORE I CAUGHT UP TO THE CAR AHEAD OF ME AND RAMMED INTO IT. LUCKILY THE TRAFFIC WAS LIGHT AND THE CAR IN FRONT OF ME A WAYS OFF. AND I WAS IN AN OUTER LANE AND FOUND A PLACE TO PULL IN, CONTINUING TO PRESS DOWN ON THE BRAKE PEDAL AS HARD AS I COULD. I IMMEDIATELY TURNED OFF THE KEY AND PUT THE CAR IN PARK. I TRIED TO START IT UP AGAIN AFTER A FEW MINUTES, BUT THE MOTOR CONTINUED TO RACE IN PARK. I TUNED THE IGNITION OFF, AND I THEN DISCOVERED THAT A FLOOR MAT HAD SLIPPED UNDER THE GAS PEDAL, SO I PULLED IT OUT AND STARTED THE CAR AGAIN. I STARTED NORMALLY. MY HEART WAS RACING AND IT TOOK ME MORE THAN AN HOUR TO GET MY EMOTIONS UNDER CONTROL BECAUSE I KNEW WHAT COULD HAVE HAPPENED HAD I BEEN DRIVING ON NEARBY RT. 95 WHERE TRAFFIC MOVES AT A FAST

C-1296

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

CLIP AND THERE IS REALLY NOWHERE TO PULL OVER. A FEW MONTHS LATER I SAW ON TV ABOUT OTHER PEOPLE HAVING THE SAME PROBLEM, BUT WITH HEART WRENCHING RESULTS. I CALLED TOYOTA HEADQUARTERS AND HAD THE INCIDENT DOCUMENTED. IT HAS ONLY BEEN A FEW DAYS THAT I SAW THE RECALL IN THE NEWSPAPER, SO I AM WAITING TO HEAR FROM TOYOTA. \*TR

**Date of Incident:** 20090306  
**Vehicle:** 2008 TOYOTA TUNDRA  
**Location of Incident:** BOYNTON BCH, FL

**NHTSA Summary:**

PURCHASED A 2008 TOYOTA TUNDRA SR5 DOUBLE CAB. FROM DAY ONE HAD PROBLEMS WITH MY ACCELERATOR WAS TOO SPRINGY AND SENSITIVE ON NUMEROUS OCCASIONS HAD DIFFICULTY KEEPING ACCELERATOR IN CONTROL. TOOK IT BACK TO THE DEALER SEVERAL TIMES WHERE THEY WOULD HOOK IT UP TO THE COMPUTER ONLY TO TELL ME THERE WAS NOTHING WRONG. ALTHOUGH I HAD TALKED TO A TOYOTA MECHANIC AND HE TOLD ME THERE WOULD PROBABLY HAVE SOMETHING COME OUT ON THIS MATTER BECAUSE HE HAS SEEN PROBLEMS LIKE THIS BEFORE. I WENT IN FOR THE RECALL AND IT SEEMS THERE IS A WORSE PROBLEM NOW. I TRULY BELIEVE THIS IS AN ELECTRONIC PROBLEM BECAUSE IT SEEMS TO COINCIDE WITH THE TRANSMISSION WHICH IS ALSO ELECTRONIC. THIS PROBLEM IS ON GOING. ESPECIALLY WHEN PROCEEDING FROM A STOPPED POSITION.

**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2008 TOYOTA TACOMA. WHILE DRIVING 65 MPH, THE CONTACT ATTEMPTED TO PASS ANOTHER VEHICLE AND THE SPEED INCREASED TO 80 MPH UNEXPECTEDLY. SHE DEPRESSED THE BRAKE PEDAL WITH BOTH FEET, BUT THE VEHICLE WOULD NOT SLOW DOWN. THE CONTACT PULLED OVER TO THE SIDE OF A GRAVEL ROAD AND PLACED THE VEHICLE INTO NEUTRAL. THE ENGINE BEGAN TO REV AND SHE HAD TO TURN OFF THE ENGINE TO MAKE IT STOP. THE VEHICLE WAS PURCHASED IN APRIL OF 2008 AND THIS WAS NOT THE FIRST TIME THE CONTACT EXPERIENCED UNINTENDED ACCELERATION. THE DEALER INFORMED HER TO HAVE THE VEHICLE TOWED TO THEM AT HER EXPENSE. THE CONTACT WAS INFORMED THAT THE FLOOR MATS CAUSED THE ACCELERATION, ALTHOUGH THEY WERE NOT IN CLOSE PROXIMITY TO THE ACCELERATOR PEDAL. THE CONTACT DOES NOT WANT TO DRIVE THE VEHICLE IN THIS CONDITION. THE FAILURE MILEAGE WAS 12,140. UPDATED 03/13/09. \*JB

**NHTSA Summary:**

I OWN A 2008 TOYOTA RAV 4 WHICH I PURCHASED NEW. ON SEVERAL OCCASIONS I HAVE HAD THE ACCELERATOR PEDAL BECOME STUCK FULLY OPEN WHEN ACCELERATING TO MERGE ONTO AN INTERSTATE HIGHWAY. I WAS TOLD SEVERAL MONTHS AGO THAT AN AFTERMARKET FLOOR MAT WAS SLIPPING FORWARD AND TRAPPING THE PEDAL. RECENTLY WHEN THIS EVENT HAPPENED I STOPPED AND LOOKED AT THE MAT MYSELF. IT WAS AT LEAST 4 TO 6 INCHES FROM CONTACTING THE ACCELERATOR PEDAL OR ANY PART OF THE DRIVE BY WIRE SWITCH. I FEEL LIKE THE DEALERSHIP IS JUST TRYING TO GET AROUND ACTUALLY INVESTIGATING MY COMPLAINT. THIS HAS HAPPENED ON SEVERAL OCCASIONS OVER THE LAST 6 TO 9 MONTHS. I FINALLY DECIDED TO FILE THIS COMPLAINT AFTER IT HAPPENED TO ME THIS MORNING (12/22/2009). \*TR

**Date of Incident:** 20090307  
**Vehicle:** 2008 TOYOTA PRIUS  
**Location of Incident:** MANHATTAN BEACH, CA

**NHTSA Summary:**

TOYOTA 2008 PRIUS SUDDEN ACCELERATION, REMOVED THE MATS PRIOR TO THE RECALL, AS WE FIGURED OUT BY LOOKING AT OTHER CARS CLEARANCE BELOW THE GAS PEDAL. I ACCELERATED BACKWARDS WHEN TRYING TO PARK MY CAR. HIT A PARKED CAR. AFTER REMOVAL OF THE MATS, MY CAR HAS ACCELERATED ON TWO OTHER OCCASIONS. I TURNED THE CAR OFF AFTER STOMPING ON BRAKE AND APPLYING PARKING BRAKE. I INFORMED JOHN ELLIWAY TOYOTA DEALERSHIP IN MANHATTAN BEACH CA AND THEY WERE DISMISSIVE. THIS HAPPENED LONG BEFORE SUDDEN ACCELERATION WAS IN THE MEDIA. THERE IS SOMETHING WRONG WITH MY CAR AND THEY REFUSE TO ACKNOWLEDGE IT. THE FIRST TIME IT HAPPENED, MY MOTHER WATCHED ME ZOOM DOWN OUR ALLEY IN REVERSE AS I WAS ATTEMPTING TO PARK MY CAR. I HAVE A WITNESS. ONE TWO OTHER OCCASIONS THIS HAS HAPPENED, THE DEALER SAYS THAT MY CAR IS NOT EFFECTED BY THE RECALL. I HAD THE ALL WEATHER CAR MATS IN MY CAR THAT I PURCHASED AT THE DEALER. I REMOVED THEM, BUT THIS STILL HAS HAPPENED. IF SOMETHING HAPPENS TO ME I WANT THIS TO BE A RECORD OF MY COMPLAINT.

**Vehicle:** 2009 TOYOTA COROLLA  
**Location of Incident:** LOS ANGELES, CA

**NHTSA Summary:**

FROM CHICAGO TRIBUNE NEWS ARTICLE - "Crash reports tell of horror":

"Jose Madrigal, a Mexican immigrant and devoted Catholic, made the sign of the cross each time he took a drive.

"My father was not very comfortable getting in a car," Adelina Aguilera, his daughter, said recently.

C-1299

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

On March 9, 2009, Madrigal was a passenger in a 2009 Corolla driven by his wife of 50 years, Adelina Madrigal.

His wife said she was driving on Florence Avenue when the car suddenly accelerated, even as she applied pressure to the brakes. In order to avoid approaching cars, she swerved onto the wrong side of the road, struck a car and then crashed into a concrete wall beneath the 605 Freeway, according to a Downey police accident report.

Jose Madrigal, 89, was critically injured. He died March 25 from internal injuries.

"My dad was in wonderful health. He still mowed the lawn, had a great appetite, was very active," Aguilera said. "I expected to have my father around for a long, long time."

Downey police Officer Sean Penrose did not believe Adelina Madrigal's account of the accident. He issued the 71-year-old woman a ticket for speeding and wrote in his report that she must have applied the gas pedal instead of the brakes.

On April 15, three weeks after her husband's death, she paid a fine for speeding and the case was closed, according to DMV records. It was the first ticket Madrigal ever received, her daughter said."

**NHTSA ODI Number:** 10312756  
**Date of Incident:** 20090310  
**Vehicle:** 2006 TOYOTA PRIUS  
**Location of Incident:** MAITLAND, FL

**NHTSA Summary:**

MY TOYOTA PRIUS 2006 ACCELERATED ON ITS OWN. I CALLED SERVICE AND WAS TOLD TO DRIVE TO NEAREST DEALER. BUT ACCELERATION WAS SCARILY OUT OF MY CONTROL OTHER THAN BY FIERCE BRAKING. I HAVE NO IDEA HOW FAST I WAS GOING, BUT HAD TO PUT SOMETHING IN THE BOX SO I PUT 80MPH. I STOPPED AS SOON AS I COULD SAFELY AND WHERE I COULD GET SIGNAL TO CALL (BEING IN THE COUNTRY) AS SOON AS I STOPPED THE BRAKE PADS BURNT UP. I HAD TO TICK SOMETHING ON THE "COMPLAINT TYPE" BUT NONE OF THE CATEGORIES QUITE FIT. I WAS TOLD THAT THIS OCCURED BECAUSE OF OEM BATTERY FAILURE CAUSING THIS PROBLEM. IT WAS TIME FOR SERVICE BUT OTHERWISE HAD NO INDICATION THE BATTERY WAS LOW. I ACCEPTED THIS AND PAID THE \$903.42 BILL FOR NEW BATTERY, BRAKES. THIS PROBABLY ALSO INCLUDED A REGULAR BASIC SERVICE AND OIL CHANGE. NOW I WONDER IF THIS IS A PART OF A LARGER PICTURE. AND WHAT INDICATION COULD THERE BE SO THIS DOESN'T HAPPEN AGAIN. I WAS VERY FORTUNATE THAT THIS WAS ALL THAT HAPPENED AND THAT I WAS ON AN EMPTY COUNTRY ROAD AT THE TIME. THANKS FOR LISTENING

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

HAPPENED AND THE CAR WAS HEADING TOWARD THE ROAD (RTE 3), I MUST'VE PANICKED BECAUSE I TRIED TO SHIFT OUT OF THE DRIVE WHEN THE CAR ZOOMED BACKWARDS (I'VE NEVER KNEW THE COROLLA HAD THAT MUCH POWER) I DIDN'T HAVE THE TIME TO COMPREHEND WHAT HAPPENED WHEN THE CAR SLAMMED IN SUCH FORCE IN THE CORNER WALL OF THE STALL. THE CAR WAS IN SUCH A SHAPE NO ONE COULD UNDERSTAND WHAT HAPPENED. THE DRIVER'S SEAT WAS TOTALLY DAMAGED, IT WILL NO LONGER STAND UPRIGHT. I REALLY COULDN'T UNDERSTAND WHAT HAPPENED, NO SERIOUS INJURIES HAPPENED TO ME AND I THANK THE LORD I DIDN'T HURT ANYBODY. THIS HAPPENED ABOUT A YEAR AGO, I DONATED THE CAR TO AMERIC CAN! CARS FOR KIDS ON JULY 13 2009. THE CAR HAD ABOUT 80,000 MILES. IT BELONGED TO MY WIFE'S GRAND FATHER WHO RARELY USED IT. AFTER HIS DEATH, WE TOOK THE CAR FOR A TUNEUP BEFORE WE PUT IT BACK ON THE ROAD. I BELIEVE THE CAR WAS IN THE GARAGE FOR ABOUT 2 YEARS PRIOR TO THE TUNE UP. I AM NOT ASKING FOR ANYTHING I DON'T KNOW WHETHER IT WILL HELP YOU IN YOUR INVESTIGATION FOR OLDER CARS. AGAIN, I COULDN'T MAKE SENSE OF WHAT HAPPENED BUT WHEN I READ ABOUT THE MATS THAT'S WHEN EVERYONE IN MY FAMILY AND FRIENDS CALLED TO SAY I NEEDED TO LET YOU KNOW. \*TR

**NHTSA ODI Number:** 10307631  
**Date of Incident:** 20090313  
**Vehicle:** 2004 TOYOTA COROLLA  
**Location of Incident:** CINCINNATI, OH

**NHTSA Summary:**

I WAS DRIVING MY 2004 TOYOTA COROLLA LAST MARCH 13, 2009 AT NOON IN A CROWDED PARKING LOT IN MASON, OHIO, A SUBURB OF CINCINNATI. I WAS STOPPING AT A STOP SIGN AND AFTER THAT, I PUSHED ON MY GAS PEDAL WHEN THE CAR TOOK OFF, GOING FROM A DEAD STOP TO 60 MPH, CROSSING THE LOT SO FAST THAT I WOULD I DID NOT KILL ANYONE THAT DAY. I COULD NOT CONTROL THE CAR AT ALL. IT WAS AS IF I WAS ON A DRAGSTRIP TRYING TO RACE! I WAS SURROUNDED BY MINIVANS AND THERE WAS A BURGER KING RESTAURANT ON THE ONE SIDE OF ME WITH A BUSY KOHL'S NEXT TO MY CAR. I WAS TERRIFIED BECAUSE I COULD NOT STOP THE CAR! THE BRAKES DID NOT WORK FOR ME. AT ALL!!!!!!!!!!!!!!!!!!!! I HAD TO STOP THE CAR AS I HAD ONLY A FEW MINUTES TO STOP OR I WOULD HAVE JUMPED OVER A 4 FOOT GRASSY PARTITION BEFORE I WENT INTO A 4-LANE INTERSECTION FULL OF TRAFFIC!!!!!!!!!!!! I WOULD HAVE CAUSED A NICE ACCIDENT AND KILLED SOMEONE OR MANY!!!!!!!!!!!! I THREW THE CAR INTO "PARK AND TURNED OFF THE IGNITION RIGHT THEN" THE CAR DID A 180 DEGREE TURN LANDING NEAR THE GRASSY PARTITION!!!!!!!!!!!! I WAS FINE BUT SO SCARED!!!!!!!!!!!!!!!!!!!! HAD NO IDEA WHAT TO DO TO STOP BUT IT WORKED. I WENT TO KING'S TOYOTA AFTER THAT WHICH WAS ACROSS THE STREET. THEY CHECKED THE CAR AND SAID IT WAS A BUILDUP OF GASES IN THE CAR!!!!!!!!!!!! SUCH A LIE!!!!!!!!!!!! WHY DID THEY NOT KNOW WHAT WAS IT WAS??? THEY HAVE HAD COMPLAINTS SINCE 1999???????????? MY QUESTION IS WHY IS MY CAR NOT PART OF THE RECALL SINCE I HAVE HAD A SUDDEN ACCELERATION PROBLEM???????????????????? KING'S WILL LOOK AT MY CAR NEXT WEEK BUT THEY WILL MAKE ME PAY FOR REPAIRS WHEN IT'S THEIR FAULT AND IT'S NOT ON THE LIST. PLEASE HAVE THEM EXPAND THE RECALL SO THAT PEOPLE LIKE ME CAN TRUST THEIR CARS AGAIN.

**Date of Incident:** 20090316  
**Vehicle:** 2004 TOYOTA SIENNA  
**Location of Incident:** WOODBRIDGE, VA

**NHTSA Summary:**

I HAVE A 2004 TOYOTA SIENNA. IT IS NOT RECALLED. MY TOYOTA VAN WOULD STRUGGLE TO GET MOVING ESPECIALLY GOING UP A SMALL INCLINE I WOULD HAVE TO PUSH THE GAS PEDDLE TO THE FLOOR(THE CARS RPMS WOULD RACE) IN ORDER FOR IT TO MOVE, IT WAS LIKE GASPING FOR AIR. I BROUGHT IT TO TOYOTA AND THEY RAN THE TESTS AND SAID NOTHING WAS WRONG, IN THE END THEY CLAIMED IT WAS THE FLOOR MAT PREVENTING THE GAS PEDDLE FROM OPERATING PROPERLY. NOT POSSIBLE THE FLOOR MAT WAS NOT OUT OF PLACE BECAUSE OF STAINS ON THE FLOOR. THE FLOOR MAT IS HEAVY AND DOES NOT SLIDE AROUND. NOW I AM FRUSTRATED SO BROUGHT IT TO COTTMANS AUTOMOTIVE AND THEY RAN THE COMPUTER ON IT AND SAID NOTHING CAME UP ON THE COMPUTER AS NOT WORKING, IF IT KEEPS DOING IT BRING IT BACK. WELL NOW I KNOW WHETHER IT COMES OUT OR NOT THIS IS A COMPUTER PROBLEM. IT DOES NOT SHOW UP ON THE COMPUTER TESTS THEY RUN AND YOU CAN NOT DUPLICATE THE PROBLEM ON DAMAND. WITH ALL THE TROUBLES OCCURRING WITH TOYOTA, THEY ARE TRYING TO BLAME IT ALL ON FLOOR MATS, A COMPUTER PROBLEM WOULD BE MUCH MORE COSTLY TO REPAIR SOMETIMES COMPUTERS CAN TAKE CONTROL. I FIND IT VERY INTERESTING MY PROBLEM AND NOW THE PROBLEM WITH ACCELERATION IS ALL BLAMED ON FLOOR MATS? MY SIENNA IS STILL HAVING THE SMAE PROBLEM NOT ABLE TO ACCELERATE AND JERKS WHEN IT DOES GET GOING. THIS IS OUR 4TH TOYOTA AND WE HAVE NEVER HAD ANY TROUBLE. IN ALL MY YEARS AS L LOYAL TOYOTA CUSTOMER I FIND THIS VERY SAD. THANK YOU

**NHTSA Summary:**

WE PURCHASED A 2009 PRIUS, 11/08. IN 3/16/09 IT ACCELERATED UNEXPECTEDLY ON THE NJ TURNPIKE NEAR NEWARK AIRPORT, A SPEED JUDGED AT 85 MILES/HOUR. I WAS THE DRIVER, THERE WERE 4 PASSENRGERS, CLEARLY UNATTENDED ACCELERATION NOT CAUSED BY A FLOOR MAT. SCENARIO: TRAVELING IN RIGHT LANE, CAME UP BEHIND CEMENT MIXER TRAVELING AT 45-50 MI/HOUR; ACCELERATED QUICKLY TO GET INTO MIDDLE LANE; MIDDLE LANE TRAFFIC CONSTANT, TRAVELING MIN. 70 MI/HOUR; ONCE IN MIDDLE LANE, DE-ACCELERATED. INSTEAD OF DE-ACCELERATING, THE CAR ENGINE ROARED, TAKING OFF AT AN UNBELIEVABLE SPEED. TURNED ON FLASHERS, PUT FOOT ON BRAKE. ABLE TO CONTROL SPEED OF CAR. BREAKING ALL THE TIME. ENGINE ROARING. NO PLACE TO PULL OVER. ONLY THOUGHT: GET TO TOLL BOOTH, HOPE I COULD STOP IT COMPLETELY WITH BRAKE; SUDDENLY, AFTER ABOUT 5 MIN., THERE WAS A SOUND IN THE ENGINE (?) LIKE A THUD. CAR RESUMED NORMAL OPERATIONS. FOLLOW-UP: WENT INTO NYC, DROVE CAR HOME THAT EVENING, 3 HOUR DRIVE; HUSBAND TOOK CAR TO VINELAND TOYOTA DEALER WHERE BOUGHT; THEY SAID BLACK BOX SHOWED THAT, IN ADDITION TO MOST RECENT ACCELERATION, THERE WERE PRIOR ACCELERATIONS; WE NEVER NOTICED THEM; THEY COULD FIND NOTHING WRONG WITH IT; SAID MAT HAD BEEN THE PROBLEM; HUSBAND, FORMER CEO/AMER. LUNG ASSOC., CONTACTED TOYOTA REGIONAL, SAYING THAT HE WAS NOT SATISFIED WITH DIAGNOSIS OF PROBLEM - WE WERE AFRAID TO DRIVE THE CAR. KNEW MANAGEMENT BECAUSE OF TOYOTA'S SUPPORT OF ALA. IN FACT, AFTER HIS RETIREMENT, ENDORSED '02 PRIUS IN TOYOTA BROCHURE, AND WAS FEATURED IN 2 TOYOTA VIDEOS; MANAGEMENT SENT TECHS FROM REG. OFFICE; REPS CONCURRED WITH DEALER; PROBLEM WAS FLOOR MAT. OUTCOME: NO WORK WE KNOW OF WAS DONE TO RECTIFY ACCELERATION; MAT REMOVED, BUT COULDN'T SEE HOW IT INTERFERED WITH PEDAL. COULDN'T REPLICATE THE EVENT BY MOVING MAT AROUND. NO EXPLANATION FOR THUD; LITTLE LIKELIHOOD THAT THE MAT COULD SLIP BACK IN PLACE. DON'T TRUST CAR! PLEASE ADVISE US OF YOUR INTENT ON THIS MATTER. THANK YOU.

**NHTSA Summary:**

TWICE THIS HAS HAPPENED WITH IN A WEEK. THE FIRST TIME THE ENGINE ACCELERATED WHILE COMING TO A STOP BUT I HAD TIME TO PUMP THE BRAKE AND THE ACCELERATION STOPPED AND I DISMISSED IT AS A FLUKE OCCURRENCE BUT TODAY COMING TO WORK IT WAS WORSE AND I WAS GOING THROUGH A SCHOOL DISTRICT, I WAS COMING TO A STOP SIGN, BRAKES WERE APPLIED BUT THE 2006 TOYOTA TACOMA ACCELERATED OUT OF CONTROL. I COULD NOT PUT ENOUGH FORCE ON THE BRAKE PEDAL TO STOP MY VEHICLE. MY BACK TIRES WERE SQUEAL. I BARELY MISSED A VAN WHILE HAVING TO TURN RIGHT AS THE BACK END PEELLED OUT UNCONTROLLABLE ACCELERATION OF THE ENGINE EVEN WHILE THE BRAKES WERE FULLY ENGAGED BY ME. I WAS ABLE FINALLY STOP SOME HOW. I WOULD LIKE TO HAVE AN AGENCY OF THE FEDERAL GOVERNMENT INSPECT THIS TRUCK BEFORE I EVEN ATTEMPT TO HAVE MY LOCAL TOYOTA DEALERSHIP INSPECT IT. I AM CONCERNED THAT THE DEALERSHIP AND/OR TOYOTA INC. WILL COVER-UP AND/OR DECLINE TO ADMIT THERE IS A PROBLEM WITH THIS PARTICULAR TRUCK AND OTHERS WITH THE SAME COMPLAINT; THIS ABSOLVING THEMSELVES OF ANY LIABILITY AND/OR RESPONSIBILITY OF THIS ISSUE/CONCERN THAT HAS BEEN EXPERIENCED BY MORE THAN 1 TOYOTA TACOMA OWNER. IN THIS INCIDENT, THERE WAS NEITHER AN ACCIDENT NOR ANY FATALITIES INVOLVED, LUCKILY, BUT IS THAT WHAT IT TAKES, FATALITIES, BEFORE TOYOTA AND/OR THE APPROPRIATE GOVERNMENT AGENCY TAKES THIS ISSUE SERIOUSLY? THANK YOU, ANDREW W. MASTALERZ \*TR

**NHTSA Summary:**

THIS COMPLAINT IS BEING FILED ONBY ME AS A RESULT OF THE TERRIBLE SAFETY PROBLEMS I HAVE ENCOUNTERED SINCE PHURSCING MY 2009 TOYOTA COROLLA NEW FROM PERFORMANCE TOYOTA DEALERSHIP IN FAIRFIELD, OHIO. ON 3/27/2009 MY COROLLA SPED UP ON ITS ON CAUSING ME TO STRIKE A PARKED VEHICLE, AND INJURING MYSELF. I CALLED THE WALTON, KENTUCKY PLANT ABOUT THIS THE FOLLOWING DAY. THEIR ADVISE TO ME WAS TO TAKE MY VEHICLE TO THE DEALERSHIP WHERE I HAD BOUGHT IT FOR AN INSPECTION. ON APRIL 1, 2009 I DID THIS VERY THING AND I WAS TOLD BY THEIR MECHANICS THAT EVERY THING ON MY CAR WAS FINE AND THAT IT WAS PROBABLY JUST OPERATOR OF THE VEHILES FAULT. LEAVING THE DEALERSHIP WORRIED, AND CONCERNED I PUT MY TOYOTA COROLLA IN THE BODY SHOP FOR REPAIRS. TEN DAYS LATER AFTER HAVING MY VEHICLE INSPECTED BY THEIR MECHANICS

**NHTSA ODI Number:**  
**Date of Incident:** 20090324  
**Vehicle:** 2004 TOYOTA PRIUS  
**Location of Incident:** CALABASAS, CA

**NHTSA Summary:**

**Additional Summary:**

Per phone call from complainant on 11/10/09 - he and his wife Melanie experienced sudden unintended acceleration on March 24, 2009 in their 2004 Prius. Vehicle surged while going down small incline leaving a restaurant. Traveling at about 10 mph, had foot on brake because the incline was steep. Approached PCH and took foot off brake and put foot on brake again when it lurched forward. Thought he had foot on brake and didn't understand why it was surging, began pumping the brakes, seemed to lose power steering. Lost braking, then brakes locked. Dealer asked about floor mat - it is a carpeted floor mat that came with the car. No floor mat interference. Following that the dealer told him it was the battery. Complainant says he is certain that it was not the floor mat. Dealer replaced radio and other parts - had a \$1500 bill.

**NHTSA Summary:**  
I OWN A 2009 TOYOTA CAMRY HYBRID PURCHASED NEW 4/3/2008. AT THE END OF MARCH, 2009, I HAD THE FIRST OF FOUR (THUS FAR) ACCELERATOR RUNAWAY EVENTS. I WAS ABLE TO STOP THE CAR BY APPLYING EXTREMELY HARD BRAKE PRESSURE WITH BOTH FEET, TAKING SEVERAL SECONDS TO STOP THE CAR AS IT FISH-TAILED WILDLY ON THE ROAD. A COUPLE OF DAYS LATER, IT HAPPENED AGAIN. MY CAR WAS AT THE DEALERSHIP 4/3/2009. THEY TOLD ME THIS ACCELERATOR RUNAWAY WAS CAUSED BY MY FLOOR MAT CAUSING THE GAS PEDAL TO STICK. I REMOVED THE FLOOR MAT. APPROXIMATELY 6 WEEKS LATER, THE ACCELERATOR RUNAWAY EVENT HAPPENED TWICE MORE. THE FLOOR MAT WAS NOT IN THE CAR. I HAVE CALLED TOYOTA, BEEN TREATED LIKE I WAS DELUSIONAL AND THEN AS THE PUBLIC OUTCRY/PRESS RELEASES BEGAN LATER IN 2009, CONTACTED TOYOTA AGAIN. I FINALLY GOT MY SCHEDULED RECALL (AT MY PERSISTANCE--THE DEALERSHIPS NEVER CALLED ME TO SCHEDULE THIS) THEN AFTER I REQUESTED DETAILS OF THE PLANNED RECALL CHANGES, I FOUND OUT AFTER MY APPOINTMENT THEY SAID MY VEHICLE QUALIFIED ONLY FOR THEM TO CUT DOWN MY GAS PEDAL. NO SHIM ASSEMBLY TO THE GAS PEDAL AND NO SOFTWARE UPDATE AS I WAS TOLD "YOU ALREADY HAVE THE MOST CURRENT SOFTWARE". REALLY?? MY NOW MUTILATED GAS PEDAL ALLOWS MY FOOT TO CONSTANTLY SLIP OFF OF IT WHILE DRIVING AS IT IS SO SMALL. I AM SCARED OF MY VEHICLE AS THERE WAS NEVER A WARNING PRE-ACCELERATOR RUNAWAY & THERE IS NO "FIX" EITHER. NOT THAT I WOULD TRUST TOYOTA AT THIS POINT. I HAVE COPIES OF ALL SERVICE TICKETS, INCLUDING THE 4/3/2009 TICKET WITH MY COMPLAINT OF THE GAS PEDAL STICKING" WRITTEN ON IT. THIS IS AVAILABLE TO YOU AS WELL AS A DETAILED FOUR PAGE LETTER OUTLINING EVERY STEP OF MY EVENTS. I SENT AN EMAIL & REC'D A RESPONSE FROM YOU, TITLED NOTIFICATION OF CASE CHANGE/CASE ESCALATION, CASE NO. 245586. I CALLED IN & SPOKE WITH A REPRESENTATIVE AND HE GAVE ME A CASE NO. TOO. TELEPHONE CALL CASE #10320545. PLEASE ADVISE MY NEXT STEP. THANK YOU.

**Vehicle:** 2008 TOYOTA HIGHLANDER  
**Location of Incident:** WESTFORD, VT  
**NHTSA Summary:**  
DRIVING MY NEW 2008 TOYOTA HIGHLANDER LEASED DEC. 2008. ON 4-5 SEPARATE OCCASIONS WHILE DRIVING WITH THE CRUISE CONTROL, ON 1 ACCELERATED AND THE VEHICLE IMMEDIATELY WENT TO FULL RACE. PEDAL WAS NOT STUCK. COULD NOT TURN OFF THE CRUISE CONTROL. SHIFTING INTO NEUTRAL CAUSED UNCONTROLLED MAXIMUM RPM'S. TURNING THE KEY OFF AND BACK ON NUMEROUS TIMES DID NOT FIX THE PROBLEM. EVENTUALLY AFTER ABOUT 20-30 SECONDS THE PROBLEM RESOLVED, ENGINE SLOWED WITH NO SIGN THERE HAD EVER BEEN A PROBLEM. THIS HAS NOT HAPPENED AGAIN SINCE SPRING 2009 BUT THAT SPRING THE 4-5 EPISODES HAPPENED WITHIN A FEW WEEKS.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BRAKES WERE PRESSED TO THE FLOOR BUT IT DIDN'T SLOW THE CAR BUT DID HELP SO THAT CAR DIDN'T ACCELERATE MORE THAN THE 75+MPH. (IT HAD ACCELERATED TO FROM 60-65MPH.) WE TRIED TO TURN THE CRUISE CONTROL ON AND OFF THINKING IT WAS A COMPUTER ISSUE BUT IT DIDN'T HELP AND IT WAS OFF WHEN THE INCIDENT BEGAN. WE TRIED GOING INTO NEUTRAL BUT IT JUST REVVED THE ENGINE UP INTO THE RED, BUT FROM THERE WE WERE GOING TO PUT IT IN PARK, BUT GOING FROM NEUTRAL TO PARK WE PASSED THROUGH REVERSE AND SINCE THE CAR WAS ACCELERATING WE STARTED TAKING OFF IN REVERSE. WE ENDED UP PERPENDICULAR TO ONCOMING TRAFFIC COMING AROUND THE MOUNTAIN, BUT GOT THE ENGINE TURNED OFF. WE WERE TOLD THAT THE THROTTLE GOT STUCK. (THE WIRE OVER THE SPRING MECHANISM THAT PULLS THE THROTTLE WIRE BACK IF YOU TAKE YOUR FOOT OFF THE PEDAL.) IT WAS TAKEN OFF THE RETRACTING MECHANISM AND I HAVEN'ET HAD ANY INCIDENTS SINCE. I HAD NOTICED THE RECALL OF MORE RECENT CAMERYS NOTING THE FLOORMATS TO EXPLAIN UNEXPECTED ACCELERATION. I DON'T HAVE A FLOORMAT IN THE DRIVER'S FOOTWELL. I'VE NOTICED OTHER ACCOUNTS ON THE TOYOTA DISCUSSION BOARD OF PEOPLE HAVING UNINTENTIONAL ACCELERATION AND NOT HAVING FLOORMATS EITHER.

1. TOYOTA SIENNA CE DRIVER'S DOOR WELDED PART (INSIDE DOOR) SNAP OFF CAUSING LOUD THUD SOUND WHEN OPENING & CLOSING THE DOOR. I FOUND OUT IN THE INTERNET THAT BEFORE THERE WAS A LOT OF COMPLAINT ABOUT IT BUT TOYOTA DID NOT ORDER A RECALL & NOW THEY WANT ME FIX IT IN A SHOP AT MY OWN EXPENSE. 2. SUDDEN ACCELERATION FROM IDLING DURING TRAFFIC CRUISING.

**Vehicle:** 2008 TOYOTA PRIUS  
**Location of Incident:** POUGHKEEPSIE, NY  
**NHTSA Summary:**

ON TWO SEPARATE OCCASIONS MY 2008 TOYOTA PRIUS HAS DONE THE AUTOMATIC ACCELERATION PROBLEM. THESE WERE BOTH LONG BEFORE RECENT REPORTS IN APRIL OF LAST YEAR. THE FIRST TIME WAS ON ROUTE 84 BETWEEN THE WHITE PLAINS AND CARMEL EXITS. MY VEHICLE ACCELERATED TO BETWEEN 80 -85 MPH. I WAS IN SOME TRAFFIC AND FLASHED MY LIGHTS AT OTHER VEHICLES IN THE PASSING LANE BECAUSE I COULD NOT STOP! WHEN I REGAINED CONTROL OF MY VEHICLE SEVERAL MINUTES LATER, I CALLED MY DEALERSHIP AND THEY HAD ME BRING THE CAR RIGHT IN AND THEN TOLD ME NOTHING WAS WRONG WITH IT. THEY TOLD ME IT WAS A BRAKE PROBLEM. I HAD TWO WITNESSES MY 16 AND 19 YEAR OLD CHILDREN. A FEW MONTHS LATER, THE ACCELERATION HAPPENED AGAIN WITH MY 49 YEAR OLD FINANCE IN THE CAR. IT WAS AN IN TOWN ACCELERATION ON THE ROAD IN FRONT OF MY HOUSE (HOOKER AVENUE). AGAIN, I REGAINED CONTROL IN A FEW MINUTES, BUT PARTIALLY WENT THROUGH A RED LIGHT BECAUSE OF INABILITY TO STOP. AGAIN, I HAD IT CHECKED AT THE DEALERSHIP. AGAIN, THEY PUT IT DOWN AS BRAKE RELATED INSTEAD OF ACCELERATION. THEY CHECKED THE CAR AND SAID IT WAS FINE. I CALLED THEM AFTER THIS 2008 TOYOTA INCIDENT AND THEY ARE SAYING THIS DOESNT HAPPEN ON MY MODEL. IT DOES! THEY RAN ANOTHER CHECK THIS MORNING AND AGAIN NOTHING WRONG. PLEASE DO SOMETHING BEFORE SOMEONE IS KILLED!

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

**Location of Incident:** BEAUMONT, TX  
**NHTSA Summary:**

2007 TOYOTA FJ CRUISER. I'VE HAD ACCELERATION ISSUES WITH MY TOYOTA FJ CRUISER, AS MENTIONED IN THE CURRENT RECALLED MODELS. WHILE ATTEMPTING TO COME TO A STOP, THE ENGINE REVS AND "ACCELERATES" AT AN UNCONTROLLABLE LEVEL THROWING THE CAR OUT OF CONTROL. THIS HAS HAPPENED A MINIMUM OF 3 TIMES ALREADY AND POSSIBLY MORE THAT I WROTE OFF AS OTHER ISSUES. 2 OF THE 3 TIMES I TURNED SHARPLY TO THE RIGHT AND OFF THE ROAD WITHOUT HITTING ANYONE OR ANYTHING, APPLYING THE BRAKE UNTIL THE ENGINE SLOWED DOWN AND I COULD COME TO A FULL STOP. I CALLED TOYOTA, (MAY 2009) AND THEY THOUGHT IT MIGHT BE A COMPUTER ISSUES AFFECTING ACCELERATION, OF COURSE THIS WAS BEFORE THE WIDESPREAD RECALL. THESE ISSUES WERE NOT DUE TO FLOOR MATS OR STICKY ACCELERATORS. I UNDERSTAND THAT MY CAR, 2007 FJ, IS NOT PART OF THE RECALL, BUT HAS THE SAME ISSUES AS THE RECALLED MODELS.

**NHTSA ODI Number:** 10312789  
**Date of Incident:** 20090415  
**Vehicle:** 2004 LEXUS RX330  
**Location of Incident:** CLIFTON, VA  
**NHTSA Summary:**

I BOUGHT A USED 2004 LEXUS RX IN DECEMBER OF 2008. EVER SINCE OWNING THE VEHICLE, AT RANDOM TIMES WHEN ACCELERATING FROM A STOP OR SLOW MOVEMENT, IT WILL HESITATE AND THEN REVS UP AND THRUSTS FORWARD. I TOLD MY MECHANIC (A CERTIFIED LEXUS MECHANIC) ABOUT IT AND HE SAID THAT I SHOULD TAKE IT TO THE LEXUS DEALER TO HAVE THE "COMPUTER PROGRAM UPDATED". I TOOK IT TO THEM LAST SPRING AND THEY MADE ME DRIVE IT WITH THEM TO FEEL THE HESITATION AND THRUSTING FORWARD AND THEN TOOK IT INTO THE SHOP TO COMPLETE THE REPROGRAMMING OF IT. BUT THEN THEY LOOKED AT THE CAR'S RECORDS AND IT SAID THAT THE CAR HAD ALREADY BEEN REPROGRAMMED AND THEY TOLD ME THAT THEY COULDN'T REPROGRAM IT AGAIN. THE MECHANIC SAID HE WOULD SEND NOTICE OF THE PROBLEM TO LEXUS, BUT I NEVER HEARD ANYTHING BACK FROM THE DEALER OR LEXUS. MY CAR STILL DOES THIS REVING UP AND THRUSTING FORWARD. THERE HAS BEEN NO ACCIDENT, BUT I THOUGHT YOU MIGHT WANT TO KNOW ABOUT A PROBLEM WITH A LEXUS ACCELERATOR AND ITS COMPUTER SYSTEM, THAT THEY EITHER IGNORED OR CAN'T FIX. DO YOU THINK THIS COULD BE A PRECURSOR TO A SERIOUS PROBLEM AND MAYBE AN ACCIDENT IN THE FUTURE? I AM NERVOUS NOW THAT I HAVE HEARD ALL ABOUT THE PROBLEMS WITH LEXUS ACCELERATORS AND ACCUSATIONS OF COVER-UPS. I TOOK IT TO THE DEALER AND NOTHING WAS FIXED AND NO ONE HAD THE COURTESY TO LET ME KNOW WHY NOT. WHO SHOULD I TRUST TO TAKE IT TO NOW? AM I IN DANGER IN THE FUTURE? HAVE YOU HAD OTHER COMPLAINTS ABOUT THE LEXUS ACCELERATOR COMPUTER SYSTEM?

**Location of Incident:** MOUNT DORA, FL

**NHTSA Summary:**  
ON AN EARLY SATURDAY APRIL 18, 2009 TRIP TO THE AIRPORT THE CRUISE CONTROL STUCK WHILE ACCELERATING AND WOULD NOT DISENGAGE BY PRESSING THE BRAKE PEDAL OR BY PULLING THE CRUISE CONTROL LEVER (LOCATED ON THE STEERING COLUMN) TOWARDS THE DRIVER. I HAD JUST GONE THROUGH AN AUTOMATIC  
**Additional Summary:**

**C-1330**

**Safety Research & Strategies**

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

TOLLGATE IN THE FAR LEFT LANE AND BEGAN ACCELERATING (AND PROBABLY HIT THE RESUME/FEATURE OF THE CRUISE CONTROL LEVER) IN ORDER TO GET IMMEDIATELY OVER TO THE FAR RIGHT LANE TO EXIT. WITHIN SECONDS I WAS UP TO AN ADEQUATE SPEED AND TOUCHED THE BRAKE. THE CAR CONTINUED ACCELERATING. I PRESSED THE BRAKE MORE FIRMLY AND PULLED THE CRUISE CONTROL LEVER TOWARDS ME. NEITHER ACTION DISENGAGED THE CRUISE CONTROL. I WAS ABLE TO AVOID TRAFFIC AND POINT THE CAR TOWARDS THE RIGHT SHOULDER. I THEN PUSHED THE GEAR SHIFT INTO NEUTRAL AND THE CAR ENGINE SLOWED DOWN, THE CAR STOPPED ACCELERATING, AND THE CRUISE CONTROL DISENGAGED. ON MY RETURN TRIP I TRIED TO DUPLICATE THE ACTIONS WHICH PRECEDED THE PROBLEM BUT WAS NOT SUCCESSFUL. (I HAVE DRIVEN THE CAR ABOUT 5600 MILES AND THIS WAS THE FIRST TIME THIS PROBLEM HAS OCCURRED.) THE SAME DAY I TOOK THE CAR TO A LARGE TOYOTA DEALER. THEY DROVE THE CAR SEVERAL MILES AND DID NOT HAVE THE PROBLEM OCCUR. SO THEY WERE NOT ABLE TO FIND A PROBLEM. THEY SAID THEY COULD ONLY FIX A PROBLEM IF THEY COULD EXPERIENCE IT. AND, THEY SUGGESTED I TAKE THE CAR TO THE TOYOTA DEALER THAT SOLD IT TO ME. LATER THE SAME DAY I DID RETURN THE CAR TO THE TOYOTA DEALER THAT SOLD IT TO ME. THEY WERE GOOD LISTENERS AND KEPT THE CAR FOR SEVERAL DAYS OF DRIVING, DIAGNOSTICS, AND PHONE CALLS TO TOYOTA. BUT, IN THE END THEY TOO, COULD NOT LOCATE A PROBLEM AND RETURNED THE CAR TO ME UNCHANGED. MY CONFIDENCE IN THIS VEHICLE IS GREATLY DIMINISHED. WHILE I WAS SUCCESSFUL IN DISENGAGING THE ACCELERATING CRUISE CONTROL BY PUTTING THE CAR INTO NEUTRAL I DO NOT WANT TO HAVE TO DEPEND ON THAT ESPECIALLY IN A HEAVY TRAFFIC SITUATION. \*TR, IN APRIL 2009 THE ACCELERATOR STUCK ON MY 2009 TOYOTA SIENNA VAN. THE DEALER FAILED TO REPLICATE THE PROBLEM AND NEITHER THE DEALER NOR TOYOTA HAS MADE ANY PROGRESS TO RESOLVING. NOW I SEE WHERE A VAST NUMBER OF OTHER TOYOTA VEHICLES ARE SIMILARLY PLAGUED AND MY CONFIDENCE IN THE SIENNA IS FURTHER ERODED. PLEASE HELP! TW\*

**NHTSA Summary:**

I WAS IN A 2009 TOYOTA CAMRY THAT WAS INVOLVED IN A CRASH. I WAS IN A 35 MILES ZONE, GOING UPHILL AND WELL WITHIN THE LIMIT, BUT WHEN I APPLIED THE BRAKES, THE CAR DIDN'T REALLY SLOW DOWN ENOUGH TO NOT CRASH INTO THE VEHICLE THAT DIDN'T YIELD AT THE TRAFFIC SIGNAL. I DIDN'T THINK MUCH ABOUT IT THEN, SINCE THE OTHER DRIVER ADMITTED FAULT, BUT IT COULD POSSIBLY HAVE BEEN BECAUSE OF A DEFECT WITH THE CAR'S ACCELERATION. THANKFULLY NO ONE SUSTAINED ANY SIGNIFICANT INJURIES SINCE THE AIRBAGS GOT DEPLOYED IN THE CAMRY. I WOULDN'T HAVE THOUGHT MUCH OF THE INCIDENT, BUT THE NEWS OF THE RECALLS JUST MAKES ME BELIEVE THAT THE PROBLEM WAS WITH THE CAR'S ACCELERATION AND NOTHING ELSE.

**Date of Incident:** 2000 TOYOTA CAMRY  
**Location of Incident:** LOUISVILLE, KY

**NHTSA Summary:**

PER NEWS ARTICLES:

On April 27, 2009, a Toyota Camry driven by Nicolas Petit-Frere, "suddenly and unexpectedly accelerated, causing the driver to lose control, strike a wall, then a large tree", injuring the driver, two passengers and killing 15 year old Nathaniel Stuckey. An investigation was not able to substantiate any fault on the part of the driver, so no charges were filed against him.

Nathaniel Stuckey's mother, Tina Stuckey, has filed suit against Toyota.

**Date of Incident:** 20090429  
**Vehicle:** 2008 LEXUS IS250  
**Location of Incident:** CUPERTINO, CA

**NHTSA Summary:**

I LIKE TO REPORT AN INCIDENT OF A POSSIBLE MANUFACTURE MALFUNCTION ON MY 2008 LEXUS IS250. THE INCIDENT HAPPENED ON 4/29/2010. I WAS FIRST STOPPED FOR RED LIGHT IN THE NEUTRAL GEAR. AS I WAS READY TO MOVE FORWARD ON GREEN LIGHT, I SWITCHED THE AUTOMATIC TRANSMISSION TO "DRIVE," HOWEVER THE CAR JUST ACCELERATED UNCONTROLLABLE FORWARD. I IMMEDIATELY STEPPED THE BREAK PADDLE REPEATLY (~3 TIMES), BUT THE BREAK DIDN'T WORK UNTIL MY CAR HIT THE CAR IN FRONT OF ME. AFTER COLLIDING WITH THE CAR IN FRONT OF ME, MY LEXUS ENGINE SHUT DOWN BY ITSELF. I TOOK MY CAR TO MAGNUSSEN'S LEXUS DEALERSHIP IN FREMONT, CA, BUT THEY COULD NOT FIND A PROBLEM. IN LIGHT OF SO MANY PROBLEMS REPORTED BY OTHER DRIVERS AGAINST TOYOTA AND LEXUS, I STARTED TO THINK MY INCIDENT IS NOT AN ISOLATED CASE AND MAY BE SIGNIFICANT FOR FURTHER INVESTIGATION. I WOULD LIKE TO MAKE AN OFFICIAL REPORT TO THE INCIDENT THAT HAPPENED TO ME AND ASK YOU TO ADDRESS THE POSSIBLE SAFETY ISSUE. BEST REGARDS,

**Additional Summary:**  
Last May, I was pulling slowly, coming to a stop in front of my dry cleaners when my auto accelerated and I went into the building. The police said I stepped on the gas, my sandal was stuck on the gas pedal etc. I truly did not know what happened. My foot was on the brake, I was almost stopped when it happened. I have relived this a million times. They totaled my auto and nothing was checked out.

**NHTSA Summary:**

S10 APPROPRIATE HANDLING - LETTER TO THE SECRETARY FROM MRS. JUDY HALEY GIZMO DISPUTING CLAIM BY TOYOTA THAT UNINTENDED ACCELERATION OF TOYOTA VEHICLES DUE TO FAULTY FLOOR MATS. \*NJ THE CONSUMER DISPUTED TOYOTA'S CLAIM THAT THE MANY CASES OF UNINTENDED ACCELERATION WERE DUE TO FAULTY FLOOR MATS. THE CONSUMER STATED THE CRASH SHE HAD WAS NOT DUE TO FAULTY FLOOR MATS WHICH WERE LATCHED DOWN, BUT WAS DUE TO ACCELERATION/BRAKE PROBLEMS IN THE COMPUTER AND ELECTRICAL SYSTEMS OF THE VEHICLE. THE CONSUMER STATED SHE BACKED THE VEHICLE OUT OF THE DRIVEWAY, SHE EXITED THE GARAGE AND PRESSED THE BUTTON TO CLOSE THE GARAGE DOOR. AFTER CLOSING THE GARAGE DOOR, SHE SAID SHE WASNT SURE IF SHE PLACED THE GEAR IN DRIVE OR NEUTRAL, BUT SUDDENLY THE VEHICLE LUNGED FORWARD GOING UP TO 15-20 MPH. WITHIN 5 SECONDS THE CONSUMER CRASHED INTO THE GARAGE DOOR, RAMMED INTO THE INSIDE KITCHEN WALL CAUSING EXTENSIVE DAMAGE. THE AIR BAGS DIDNT DEPLOY. THE CONSUMER SUFFERED INJURIES.

**Vehicle:** 2005 TOYOTA SIENNA  
**Location of Incident:** SILVER SPRING, MD

**NHTSA Summary:**

2009: ONE INCIDENT SEVERAL MONTHS TO A YEAR AGO IF I AM NOT MISTAKEN THAT MY CAR ACCELERATED. IT FELT LIKE MY CAR HAD INCREASED BY A SIGNIFICANT AMOUNT IN MPH. I THOUGHT I PRESSED THE GAS. I ATTEMPTED TO ACCELERATED A BIT BUT THE CAR APPEARED TO ACCELERATE ON ITS OWN. I BELIEVE I STEPPED ON THE BRAKE AT SOME POINT BUT IT DID NOT CHANGE THE ACCELERATION. I CANT SAY IF I PUT ON BRAKES FIRST TO SLOW MYSELF DOWN OR ACCELERATED. HOWEVER, I DO KNOW NEITHER ONE AFFECTED THE CAR FROM THE ACCELERATION. THE ACCELERATION STOPPED ON ITS OWN. I HAVE NOT HAD ANY OTHER INCIDENT BUT I AM ACUTELY CAUTIOUS WHEN DRIVING BECAUSE THAT INCIDENT DID SEEM UNUSUAL AND WORRISOME AT THE TIME. I DID NOT REPORT B/C I PLACED IT AS ISOLATED. I, HOWEVER, WANT TO ENSURE THE SAFETY OF OTHERS AND MY FAMILY. I AM SURE OF THIS EXPERIENCE AS AN OCCURRENCE THAT SHOULD BE REPORTED. \*TR

**Vehicle:** 2005 TOYOTA CAMRY  
**Location of Incident:** DERBY, VT

**NHTSA Summary:**

I HAVE A 2005 TOYOTA CAMRY XLE. I HAD TWO INSTANCES OF SPONTANEOUS ACCELERATION. BOTH HAPPENED WHEN MY FOOT WAS ON THE BRAKE PEDAL AND HAD BEEN ON THE BRAKE PEDAL. THERE WAS NO STICKING ACCELERATOR INVOLVED. WE BROUGHT THE CAR TO THE TOYOTA DEALERSHIP IN BERLIN VT. THE MECHANICS HOOKED THE CAR TO THEIR COMPUTER DIAGNOSTICS AND REPLACED AN "ELECTRONIC SENSOR" AND I HAVE NEVER HAD THE PROBLEM SINCE. THIS HAPPENED AROUND JUNE OF 09. I WOULD THINK THAT THE DEALERSHIP SHOULD HAVE RECORDS OF THIS REPAIR. IT IS HARD TO BELIEVE THAT THAT THIS IS UNRELATED TO THE PRESENT PROBLEM. MY CAR YEAR WAS NOT IN THE RECALL.

**NHTSA Summary:**

S10 APPROPRIATE HANDLING RE TOYOTA SAFETY RECALL FOR SUDDEN ACCELERATION. \*TGW DURING THE MONTHS OF MAY THROUGH JULY 2009, THE CONSUMER EXPERIENCED PROBLEMS WITH THE BRAKES. OFF AND ON, THE BRAKE PEDAL WOULD GO ALL THE WAY TO THE FLOOR. THE VEHICLE WOULD NOT STOP, UNTIL THE IGNITION WAS TURNED OFF. THERE WAS A STRANGE ODOR COMING FROM UNDER THE HOOD. HOWEVER, THE CONSUMER WAS ABLE TO CONTROL THE VEHICLE. IT WOULD GENERALLY HAPPEN WHEN ATTEMPTING A ROUTINE STOP. THE VEHICLE WAS TAKEN TO A REPAIR SHOP, BUT THEY COULDN'T FIND ANYTHING WRONG WITH THE VEHICLE. THEN ON AUGUST 19, 2009, THE VEHICLE SUDDENLY ACCELERATED; THE BRAKES DID NOT WORK AND THE VEHICLE WAS ACCELERATING AT A HIGH RATE OF SPEED. AS THE CONSUMER DESPERATELY SHIFTED FROM NEUTRAL, SECOND AND THIRD GEAR, SHE WAS UNABLE TO CONTROL THE VEHICLE. SHE WAS ABLE TO WEAVE IN BETWEEN CARS AS THERE WAS NO PLACE FOR HER TO PULL OVER WITHOUT CRASHING. SHE PUT ON HER HAZARD LIGHTS AND BEEPED THE HORN TO WARN OTHER DRIVERS. SHE THEN SWUNG INTO A WIDE PARKING LOT ENTRANCE AND SLAMMED THE GEAR INTO PARK AND CAME TO AN ABRUPT HALT. \*JB

**Location of Incident:** CHAPEL HILL, NC

**NHTSA Summary:**

I HAVE A 2006 TOYOTA TACOMA PICKUP TRUCK THAT HAS HAD NUMEROUS INCIDENTS OF AUTOMATIC RAPID ACCELERATION. THESE HAVE ALL OCCURRED DURING HIGHWAY DRIVING AND WITH MULTIPLE DRIVERS. INITIALLY, I THOUGHT THIS WAS RELATED TO A CRUISE CONTROL PROBLEM SINCE THEY OCCURRED DURING HIGHWAY DRIVING. HOWEVER, THE CRUISE CONTROL WAS REPLACED IN 2008 AND I AM STILL HAVING ACCELERATION PROBLEMS. AT PRESENT TIME TOYOTA HAS THE VEHICLE LISTED FOR THE 90L FLOOR MAT ENTRAPMENT RECALL ONLY AND NOT THE ACCELERATOR PEDAL RECALL. I DO NOT THINK THIS IS A FLOOR MAT PROBLEM, BUT RATHER IT IS AN ACCELERATOR PEDAL PROBLEM. I HAVE ATTEMPTED TO CALL AND EMAIL TOYOTA

**NHTSA Summary:**  
I HAVE BEEN DRIVING A TOYOTA TACOMA 2006 FOR A YEAR AND IT HAS HAD TWO OCCURRENCES WHERE THE CAR GOES OUT OF CONTROL. I JUST PRESS THE GAS PEDAL AND IT CREATES THIS WEIRD SCREECHING NOISE AND ALL A SUDDEN IT JERKS FORWARD AND IT STARTS TO RUN FULL FORCE. IT HAS HAPPENED WHEN THE CAR IS GOING 5 MPH. THE FIRST TIME I HAD STOPPED IN AN INTERSECTION WHEN IT WAS MY TURN TO GO I PRESSED THE GAS PEDAL AND THERE WAS THIS SCREECHING NOISE. ALL OF A SUDDEN IT WENT FORWARD AT FULL SPEED AND IT HIT A CAR IN FRONT OF IT. THE NEXT TIME I WAS DRIVING IN A PARKING STRUCTURE 5MPH WHEN ALL OF A SUDDEN IT STARTED DOING THE SAME NOISE AND IT WENT FULL FORCE AND HIT THE WALL. I CHECKED IF THERE WAS ANYTHING UNDER THE FLOOR IF THE MAT WAS LOOSE OR THERE WAS DEBRIS AND NOTHING WAS AROUND THE PEDALS. I GOT BRUISES IN MY NECK AND CHEST BECAUSE OF THE SAFETY BELT. \*TR

**Location of Incident:** PLEASANT VILLE, CA

**NHTSA Summary:**  
TL- THE CONTACT RENTED A 2010 TOYOTA COROLLA. THE CONTACT WAS DRIVING APPROXIMATELY 5 MPH IN REVERSE DOWN HIS DRIVEWAY, WHEN THE VEHICLE ACCELERATED INTO A BUILDING. THE CONTACT STATED THAT HE HAD A CONCUSSION AND A STIFF NECK, BUT DID NOT GO TO THE HOSPITAL. THE VEHICLE WAS TAKEN TO THE RENTAL AGENCY. THE CONTACT DOES NOT KNOW, BUT PRESUMES THAT THE VEHICLE WAS TAKEN TO THE DEALER FOR DIAGNOSTIC, TESTING, AND REPAIRS. THE CONTACT HAS NOT SEEN THE VEHICLE SINCE IT WAS DRIVEN AWAY BY THE RENTAL AGENCY. THE CONTACT STATED THAT THE WEATHER WAS NOT A FACTOR, THE APPROXIMATE FAILURE MILEAGE WAS 3,958. THE APPROXIMATE CURRENT MILEAGE WAS 3,958. RG

**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10303397  
**Date of Incident:** 20090510  
**Vehicle:** 2001 TOYOTA RAV4  
**Location of Incident:** GRANVILLE, OH

**NHTSA Summary:**  
ENGINE CONTROL MODULE AND AUTO TRANSMISSION FAILURE. BOUGHT RAV USED JULY 2007 WITH 109,230 MI. CHECK ENGINE LIGHT WAS ON (HAS REMAINED ON) BUT WAS DIAGNOSED AS O2 SENSOR & RAV OPERATED PERFECTLY (LIVE WHERE EMISSIONS CHECK NOT REQUIRED). MAY 2009 TRANNY STARTED ALTERNATING BETWEEN WORKING GOOD, SHIFTING ROUGH, SLIPPING BETWEEN GEARS, AND NOT DOWNSHIFTING AT SLOW DOWN OR STOP. HAD MECHANIC WITH OVER 15 YRS EXPERIENCE AT TOYOTA DEALERSHIP CHECK IT (AFTER HOURS). HE WAS UNAWARE OF CONNECTION TO FAULTY ECM SO WE THOUGHT TRANNY WAS BAD & HE FLUSHED TRANNY. THAT REDUCED FREQUENCY OF SYMPTOMS BUT DID NOT STOP THEM. WE STILL THOUGHT PROBLEM WAS MECHANICAL & TRANNY REBUILD/REPLACE WAS INEVITABLE & I DROVE IT LONGER TO SAVE UP MONEY FOR REPAIRS. I LIVE ON A SEMI-RURAL OHIO STATE ROUTE WITH 55MPH POSTED LIMIT & 65MPH AVERAGE SPEED. I HAD NUMEROUS NEAR MISSES WHEN THE VEHICLE WOULD NOT ACCELERATE PROPERLY OR BEGAN TO ACCELERATE NORMALLY THEN SLIPPED, HESITATED, OR REFUSED TO SHIFT. MY 18YR OLD SON DROVE THE RAV IN DEC & PULLED OUT OF OUR DRIVEWAY IN FRONT OF A SEMI TRACTOR TRAILER RIG WITH WHAT WOULD HAVE BEEN SAFE DISTANCE EXCEPT THAT THE RAV DECIDED NOT TO ACCELERATE. THE TRUCK WAS ABLE TO PASS, BUT HAD THERE BEEN ONCOMING TRAFFIC, IT WOULD NOT HAVE BEEN ABLE TO SLOW ENOUGH IN TIME. INTERMITTENT SYMPTOMS CONTINUED UNTIL 12/14/09 WHEN 2ND & 3RD GEAR BURNED OUT & I DROVE HOME 20 MILES IN 1ST. JUST PARTS THRU TOYOTA WILL COST \$2000 FOR REBUILD TRANNY PLUS \$1000 FOR ECM. INDEPENDENT REPAIRMEN CAN FIX THE ECM FOR \$65. HAD 1 AT LEAST KNOWN ROOT CAUSE OF THE SYMPTOMS WAS ECM NOT TRANNY (TOYOTA'S KNOWN SINCE 2006 OR BEFORE) I COULD HAVE SAVED \$4-5K & AVOIDED 7 MONTHS OF RISKY DRIVING. I CHALLENGE ANYONE WHO THINKS THIS IS NOT A SAFETY ISSUE TO DRIVE ONE OF THESE AND RELY ON IT WHEN IT FAILS IN 65MPH TRAFFIC. OR WE CAN WAIT UNTIL SOMEONE IS KILLED WHERE THERE IS ENOUGH EVIDENCE TO SHOW THIS PROBLEM WAS THE CAUSE OF THE ACCIDENT AND NOT POOR DRIVER JUDGMENT. \*TR

**Vehicle:** 2006 LEXUS IS350  
**Location of Incident:** LA QUINTA, CA

**NHTSA Summary:**  
I OWN A 2006 LEXUS IS 350. I HAVE HAD TWO INCIDENTS OF "UNATTENDED ACCELERATION" BUT WAS FORTUNATE THAT BOTH OCCURRED ON THE FREEWAY AND I WAS ABLE TO GET THE VEHICLE TO STOP ACCELERATING. MY QUESTION IS THIS; I RECEIVED A NOTICE FROM LEXUS, ABOUT SIX MONTHS AGO, THAT THERE WAS A PROBLEM WITH THE VEHICLE; HOWEVER THEY WERE GOING TO LET ME KNOW WHEN THEY HAD A FIX FOR THE PROBLEM. I'VE CALLED SEVERAL TIMES, THE LAST TIME WAS THIS WEEK 3-9-10, AND WAS TOLD AGAIN THAT THEY DO NOT HAVE A FIX AND I NEED TO WAIT AND THEY WOULD LET ME KNOW WHEN TO BRING THE VEHICLE IN. THIS SEEMS DANGEROUS, AND I WOULD LIKE TO COMPLAIN THAT LEXUS IS NOT DOING ENOUGH TO EITHER GET ME A REPLACEMENT VEHICLE TO DRIVE UNTIL THEY FIX THE CAR, OR FIX IT. THANKS

**NHTSA ODI Number:** 10286018  
**Date of Incident:** 20090512  
**Vehicle:** 2004 TOYOTA 4RUNNER  
**Location of Incident:** EUREKA, CA

**NHTSA Summary:**  
I HAVE A 2004 TOYOTA 4RUNNER AND A FEW MONTHS AGO THE ACCELERATOR PEDAL GOT STUCK UNDER THE RUBBER FLOOR MAT. I PURCHASED THE RUBBER FLOOR MAT FROM A TOYOTA DEALER AND IT WAS MADE SPECIFICALLY FOR THE 4 RUNNER. WHEN THE PEDAL GOT STUCK, THE ENGINE WAS RUNNING WIDE OPEN. I MANAGED TO GET THE VEHICLE IN NEUTRAL AND STOPPED BEFORE HITTING ANYTHING. IT WAS VERY FRIGHTENING. IT APPEARS LIKE THE MAT SLID FORWARD AND THAT WAS WHAT CAUSED THE PEDAL TO GET STUCK. I HAD RECENTLY CLEANED THE MAT AND MAY NOT HAVE HAD IT POSITIONED PROPERLY WHEN I REINSTALLED IT. I THINK THE DESIGN OF THE MAT IS NOT SAFE DUE TO THE THICKNESS OF THE MAT AT THE FRONT NEAR THE PEDAL. FUTURE INCIDENTS ARE LIKELY IF THE MAT IS LOOSE AND SLIDES FORWARD. I DID HAVE A CARPETED MAT UNDER THE RUBBER MAT. THE CARPETED MAT CAME WITH THE 4RUNNER WHEN I BOUGHT THE VEHICLE. THIS LIKELY CONTRIBUTED TO THE RUBBER MAT COMING LOOSE AND SLIDING FORWARD. IF NOT INSTALLED PROPERLY, IT APPEARS LIKE THE CARPETED MAT COULD ALSO SLIDE FORWARD AND MAY CAUSE THE ACCELERATOR TO GET STUCK. \*TR

CONCERN WITH THE PERFORMANCE OF YOUR 2003 CAMRY, AND WE APPRECIATE YOU TAKING THE TIME TO LET US KNOW UNINTENDED ACCELERATION INVOLVING TOYOTA AND LEXUS VEHICLES HAS BEEN THOROUGHLY INVESTIGATED ON SEVERAL OCCASIONS OVER THE LAST FEW YEARS. NONE OF THESE STUDIES HAS FOUND THAT AN ELECTRONIC THROTTLE CONTROL SYSTEM MALFUNCTION IS THE CAUSE OF UNINTENDED ACCELERATION. ELECTRONIC THROTTLE CONTROL, ADOPTED IN SOME FORM BY NEARLY ALL AUTOMAKERS, HAS SEVERAL FAIL-SAFE FEATURES AND ENHANCES SAFETY BY MAKING POSSIBLE FUNCTIONS SUCH AS TRACTION CONTROL, STABILITY CONTROL AND ADAPTIVE LASER CRUISE CONTROL. TOYOTA VALUES THE SAFETY OF OUR OWNERS AND THE PUBLIC. IT IS OUR UTMOST CONCERN AND TOYOTA HAS AND WILL CONTINUE TO TAKE APPROPRIATE MEASURES TO ADDRESS ANY DEFECT TRENDS THAT ARE IDENTIFIED. WE HAVE DOCUMENTED YOUR EMAIL AT OUR NATIONAL HEADQUARTERS UNDER FILE #1001141725. IF WE CAN BE OF FURTHER ASSISTANCE, PLEASE CLICK ON THE FOLLOWING LINK: [HTTP://WWW.TOYOTA.COM/HELP/CONTACTUS.HTML](http://www.toyota.com/help/contactus.html), TO CONTACT US. SINCERELY, KYM WILSON TOYOTA CUSTOMER EXPERIENCE CUSTOMER (PHYLLIS DUNCAN) - 01/22/2010 06:21 AM I HAVE BEEN CONCERNED ABOUT MY VEHICLE VIN #4T1B32K6U773526 - SINCE AN EXPERIENCE I HAD IN MAY OF 2009 IN NICHOLS, SC I WAS DEPARTING MY SISTER'S FARM - HAD MY CAR IN REVERSE - WHEN IT ACCELERATED AT A HIGH RATE OF SPEED IN REVERSE. THE ENGINE HAD A VERY LOUD WHINE AND IN A MATTER OF SECONDS WENT FROM 0 TO 60 MPH (MY GUESS) IT WENT IN REVERSE & ALMOST CAUSING A COLLISION WITH HORSES AND BARN. I APPLIED BRAKES & SHIFTED GEARS & ALL IN VAIN. ONLY WHEN I TURNED THE KEY OFF & DID THE CAR STOP. MY CAR RECEIVED SUPERFICIAL DAMAGE. MY CAR WAS EXAMINED BY HARRELSON TOYOTA, ROCK HILL, SC. & NOTHING WAS FOUND WRONG. AN INCIDENT REPORT WAS FILED.

**Vehicle:** 2009 TOYOTA PRIUS  
**Location of Incident:** PHILADELPHIA, PA

**NHTSA Summary:**

MY 2009 TOYOTA PRIUS WAS LESS THAN 4 MONTHS OLD. AS I WAS PARKING IN FRONT OF MY APARTMENT, I COULD FEEL THE CAR STILL ACCELERATING WHILE I HAD ALREADY MOVED MY FOOT TO THE BRAKE. BRAKING AS HARD AS I CAN I REALIZED MY CAR WASN'T RESPONDING AT ALL. THE CAR CLIMBED ON TO THE CURB INTO THE GRASS, HIT A LIGHT POLE, TILTED TO ITS RIGHT SIDE (I WAS PARKING TO MY RIGHT) AND FELL DOWN ON ITS SIDE. I TRIED TO TURN THE CAR OFF, BUT WONT TURN OFF. THE WHEELS WERE STILL ACCELERATING AS I WAS TRYING TO GET OUT OF THE SEAT BELT. CALLED OUT FOR HELP AND GOT OUT THROUGH THE DRIVER SIDE WINDOW. I CALLED 911. POLICE HELPED ME TURN OFF THE VEHICLE. UNTIL THAT TIME, THE CAR WAS STILL ACCELERATING ON ITS OWN. THIS SEEMS TO BE A COMMON ISSUE WITH THE TOYOTA PRIUS 2ND GENERATION. THIS HAPPENS WHEN THE CAR IS AT VERY LOW SPEED (LIKE IN MY CASE, WHILE PARKING) OR WHEN ITS FLOORED ALL THE WAY. THIS SHOULD BE THOROUGHLY INVESTIGATED. THE CAR IS WITH GEICO, MY INSURANCE COMPANY FOR FURTHER INVESTIGATION. \*TR

**Date of Incident:** 20090514  
**Vehicle:** 2009 TOYOTA 4RUNNER  
**Location of Incident:** BEAUMONT, TX

**NHTSA Summary:**

I AM FILING THIS CLAIM TO REPORT A POTENTIAL SAFETY PROBLEM WITH THE TRANSMISSION IN THE 2009 TOYOTA 4RUNNER. I BOUGHT MY 2009 4RUNNER NEW IN MAY OF 2009 AND FROM THE FIRST WEEK NOTICED A PROBLEM WITH THE TRANSMISSION SLIPPING, AND IT IS PROGRESSIVELY GETTING WORSE. IT HAPPENS CONSISTENTLY EACH TIME I SLOW DOWN (BUT DON'T STOP COMPLETELY) TO TURN CORNERS AND THEN CONTINUE TO ACCELERATE. THE TRANSMISSION DOESN'T RESPOND, THE CAR JUST SITS THERE, AND THE ENGINE GOES FROM 1500 RPM'S TO UP TO 2500 RPM'S BEFORE THE TRANSMISSION CATCHES UP WITH THE ENGINE AGAIN AND THE CAR THEN MOVES. I AM CONCERNED EACH TIME THIS HAPPENS, ESPECIALLY WHEN THERE IS TRAFFIC FOLLOWING BEHIND ME IN THE TURN. I BROUGHT IT IN TO THE DEALERSHIP TO CHECK IT OUT RIGHT AFTER WE BOUGHT IT. THEY RAN A DIAGNOSTIC AND TOLD US THAT EVERYTHING CHECKED OUT OK. I HAD THE TECHNICIAN DRIVE IT, AND I WENT WITH HIM. HE SAID THAT HE COULDN'T FEEL WHAT I WAS TALKING ABOUT. EVEN THOUGH I FELT IT WHEN HE SLOWED TO MAKE A TURN, HE THEN TOLD ME THAT IT WAS PROBABLY BECAUSE IT TOOK THE NEW ELECTRONIC TRANSMISSION A FEW SECONDS TO COMMUNICATE WITH THE CAR'S COMPUTER. SOUNDED LIKE HE WAS GUESSING AT WHAT MIGHT BE CAUSING THE PROBLEM. I HAVE SINCE CONTACTED CUSTOMER CARE AT TOYOTA, AND RECEIVED A RESPONSE IN E-MAIL TELLING ME TO CONTACT THE DEALERSHIP IN MY AREA, AND THAT TOYOTA HAD ALREADY DONE SO ON MY BEHALF. HE SAID IF I DIDN'T HEAR FROM THE MANAGER AT MY DEALERSHIP BY FEB. 11, 2010, TO CONTACT TOYOTA AGAIN. I HAVEN'T HEARD FROM MY DEALERSHIP AS OF FEB 13. I HAVE TALKED WITH OTHER OWNERS OF THIS MODEL, AND THEY EXPERIENCE THE SAME THING, AND THEY HAVE GOTTEN THE SAME RUNAROUND FROM THE COMPANY.

**NHTSA ODI Number:** 10317539  
**Date of Incident:** 20090515  
**Vehicle:** 2008 TOYOTA SEQUOIA  
**Location of Incident:** CAMP SPRINGS, MD

**NHTSA Summary:**  
2008 TOYOTA SEQUOIA. PRIOR TO NATIONWIDE RECALL I HAVE COMPLAINED TO TOYOTA CONCERNING UNRESPONSIVENESS OF THE ACCELERATOR PEDAL, AS WELL AS OTHER DEFECTS IN VEHICLE AND I CONTINUE TO BE IGNORED BY BOTH MANUFACTURER AND DEALERSHIP. WITH DEALERSHIP MAKING EXCUSES BY SAYING THINGS LIKE DIFFERENT PARTS OF THE BODY WHERE MADE IN DIFFERENT FACTORIES CAUSING THERE TO BE VARIANTS IN THE COLOR OF THE VEHICLE BUMPER FROM THE REST OF THE BODY, AND THAT THEY ARE NOT THAT FAMILIAR WITH THE NEW MODEL SEQUOIA SINCE THEY HAVENT HAD THEM IN THE SHOP YET (EXCUSE MADE IN 2009). I MADE A WRITTEN REQUEST IN NOVEMBER IN REGARDS TO WHAT I CALL UNRESPONSIVENESS OF THE ACCELERATOR PEDAL, WHEN I PUSH THE PEDAL SOME TIMES THE CAR WILL ACCELERATE RAPIDILY OTHER TIMES IT WOULD DO NOTHING THEN JUMP AND ACCELERATE WITHOUT ME PUTTING ACCESS PRESSURE ON THE PEDAL. I ALSO REPORTED ON DEFECTS IN LEATHER SEATS AND BODY COLOR WHICH IS TWO TONED BY DEFECT TO NAME A FEW OF THE ISSUES. THE MANUFACTURER CALLED ME, REFERRED ME BACK TO THE DEALERSHIP AND AGAIN THE DEALERSHIP WILL NOT DO ANYTHING ABOUT THE ISSUES AS MINIMIZES THEM. HERE WE ARE IN 2010 MY CAR STILL ACCELERATES WHEN IT WANTS TO INSTEAD OF WHEN I WANT IT TO, I STILL HAVE A CAR WITH EXTERIOR AND INTERIOR DEFECTS AND POOR WORKMANSHIP. AND WAS INSULTED WHEN THE ONLY THING I HAVE RECEIVED FROM TOYOTA WAS A POST CARD ASKING ME TO PAY OVER \$200 FOR A DVD TO UPDATE MY NAVIGATION CENTER, WHICH IS ADDING SALT TO THE WOUND THAT TOYOTA HAS DUG IF ANYTHING TOYOTA SHOULD BE DOING MORE THEN A TEMPORARY FIX FOR CUSTOMERS AND MAKING US PAY MORE MONEY TO FIX THEIR ISSUES. THE UNPREDICTABLE ACCELERATION IS NOT FROM A STICKY PEDAL I BELIEVE ITS ELECTRICAL, POSSIBLY FROM OTHER ELECTRICAL DEVICES, SUCH AS CELL PHONE, GARAGE DOOR OPENER REMOTE, GATE REMOTES OR DOOR ACCESS REMOTES, ALL WHICH I CARRY FROM TIME TO TIME IN MY VEHICLE, HOWEVER I CANT PUT MY LIFE IN DANGER TESTING OUT MY THEORY. SOMETHING NEEDS TO BE DONE SOON, EITHER REPLACE THE CARS OR PAY UP.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

ACCELERATION. BRAKING ONLY HAD A SLIGHT INITIAL EFFECT AND THEN OVERHEATED AND FADED. AFTER A LUCKY 4 MILES I SHIFTED TO NEUTRAL AND THE PROBLEM RESOLVED. THIS BEGAN AROUND 60MPH AND MAXED AROUND 107. DURING THE 4 MILES I ACTIVATED AND DEACTIVATED MY CRUISE SEVERAL TIMES. THE BRAKES, REACHED DOWN AND PULLED ON THE PEDDAL AND THE MAT. THE RECENT TOYOTA EXPLANATIONS OF STICKING PEDDEL AND MAT ISSUES DID NOT APPLY AND I FIND THEM LUDICROUS. IT IS AN EERIE FEELING TO HAVE YOUR ACCELERATOR LEAVE YOUR FOOT ON ITS OWN. TRUCK HAD 36,500 MILES, NEVER IN AN ACCIDENT, WAS IN GOOD REPAIR WITH REGULAR MAINTENANCE AND WAS STOCK EXCEPT FOR A SHELL. WHILE OWNED THE TRUCK HAD EXPERIENCED THE AT STOP SURGE DESCRIBED BY MANY OTHERS WHERE IT FELT LIKE SOMEONE TAPPED THE BACK OF THE TRUCK WHILE WAITING IN AN INTERSECTION. LOVED THE TRUCK UNTIL THAT DAY, AND RESPECTED TOYOTA. HAD THIS HAPPENED ON ANOTHER ROAD OR WITH HEAVIER TRAFFIC IT WOULD HAVE HAD A DIFFERENT OUTCOME. TRADED THE VEHICLE TWO WEEKS LATER AT GREAT LOSS OF EQUITY. SOMEONE ELSE NOW OWNS THIS VEHICLE.

**NHTSA ODI Number:** 10269578  
**Date of Incident:** 20090519  
**Vehicle:** 2009 TOYOTA VENZA  
**Location of Incident:** WINNIPEG, MANITOBA, CANADA, 00

**NHTSA Summary:**  
FIRST HIGHWAY TRIP WITH A BRAND NEW 2009 TOYOTA VENZA AUTOMATIC 4 CYLINDER AWD. MAINTAINED SPEED LIMIT 100 KILOS/HR. WENT TO PASS A SEMI AND GAS PEDAL STUCK AT 120 KILOMETERS ON NARROW TWO WAY HIGHWAY WITH SOFT SHOULDERS POST MAJOR SNOW FALL LAST FRIDAY(NORMALLY NOT SPEED). WAS UNABLE TO DEPRESS THE GAS PEDAL AND APPLY FULL PRESSURE ON BRAKES THE VEHICLE DID NOT SLOW DOWN ENGINE WAS STILL RACING. FINALLY WAS ABLE TO PUT TRANSMISSION INTO NEUTRAL. STILL WITH FULL BRAKES BARELY WORKING WITH RACING ENGINE. ENGINE SMELLS BEGAN, ABLE TO WRESTLE CAR TO GRAVEL SHOULDER. THROW INTO PARK AND IMMEDIATELY KILLED ENGINE. ONCE SEMI CALMED DOWN, TRIED TO INSPECT GAS PEDAL. YANKED OUT TOYOTA MANUFACTURED INSTALLED RUBBER MAT WHICH HAD BEEN IMPROPERLY INSTALLED ON TOP OF EXISTING FACTORY CARPET MAT WHICH WAS CLIPPED IN PLACE. READ ABOUT THIS BEING IMPROPER - IN CAR MANUAL WHILE WAITING TO HEAR BACK FROM DEALERSHIP FOR SAFETY INSTRUCTIONS GIVEN SYSTEM WARNING THAT MAJOR BRAKE FAILURE MAY HAVE ALSO OCCURRED. CAREFULLY DID SOME CHECKS OF BRAKES. HARD PRESSURE ON PEDAL RESULTED IN TRACTION SIGNAL REAPPEARING. SOFT PRESSURE THERE WAS NO TRACTION SIGN. VERY CAUTIOUSLY AND SLOWLY 90 - 95 KILOMETERS/HR. CONTINUED HOME ON LAST LEG OF TRIP WITH NO PASSING. ONCE HOME, RE-INSPECTED GAS PEDAL AREA AND NOTED A CORRESPONDING LINE INDENT TO WHERE RUBBER MATT MAY HAVE DUG INTO CARPET ON RIGHT SIDE OF GAS PEDAL. THOUGH NOT A MECHANIC, DEDUCTIVELY, RUBBER MAT IMPROPER INSTALL MAY LIKELY HAVE CAUSED GAS PEDAL STICK. RUBBER MAT CLEARLY WARNED NOT TO INSTALL ON TOP OF CARPET MAT! WHY DEALER DID. NO IDEA! WHY BRAKING SYSTEM NOT WORK WHILE ENGINE RACED IN DRIVE... I HAVE NO IDEA! FEEL VERY VERY VERY LUCKY TO BE ALIVE! COULD HAVE EASILY ENDED IN DEATH BUT FOR MY MANY YEARS OF SPORT CAR DRIVING WITH STANDARDS TRANSMISSION, AND HIGHWAY DRIVING SKILLS! MARKED ON THE MAT "DO NOT INSTALL." \*TR

**NHTSA ODI Number:** 10306463  
**Date of Incident:** 20090519  
**Vehicle:** 2010 TOYOTA CAMRY  
**Location of Incident:** SUMMERVILLE, SC  
**NHTSA Summary:**  
I BOUGHT A 2010 TOYOTA CAMRY THAT HAS THE NEW SIX SPEED AUTOMATIC TRANSMISSION. WHEN I WAS COASTING TO SLOW DOWN THE TRANSMISSION SEEMED TO DISENGAGE AND DID NOT HOLD BACK ANYMORE. I CAME WITHIN A FOOT OF RUNNING INTO THE REAR OF THE CAR IN FRONT OF ME WHICH WAS STOPPED AT A RED LIGHT. THIS HAD HAPPENED MANY TIMES BEFORE BUT NEVER THIS CLOSE TO AN ACCIDENT WHEN THE CAR REACHES AROUND 20MPH THE TRANSMISSION DOESN'T HOLD BACK ANY LONGER AND YOU HAVE TO PUT YOUR FOOT ON THE BRAKE HARD. IT IS NOT A GOOD FEELING. ON MAY 22, 2009 I CALLED THE SALESMAN AND HE TOLD ME TO COME IN AND DRIVE ANOTHER 2010 CAMRY TO SEE IF THAT TRANSMISSION ACTED THE SAME SINCE THIS WAS THE FIRST YEAR FOR THE NEW SIX SPEED AUTOMATIC. I TOOK IT IN ON THE 22ND AND THE SALESMAN AND I TOOK A NEW 2010 CAMRY OUT FOR A DRIVE AND IT ACTED THE SAME WAY. SO THE CONCLUSION WAS THAT ALL THE 2010 CAMRYS WERE THE SAME AND I WOULD HAVE TO LIVE WITH IT. MY WIFE IS VERY LEARY ABOUT DRIVING THIS CAR AND AFRAID SHE WILL RUN INTO SOMEONE. WE HAVEN'T HAD A PROBLEM WITH THE ACCELERATOR, BUT THE TRANSMISSION SEEMS TO BE A PROBLEM WE ARE VERY CONCERNED NOW THAT THE OTHER PROBLEMS HAVE ARISEN ABOUT THE CAMRY.

**Vehicle:** 2006 TOYOTA TACOMA  
**Location of Incident:** MT. PLEASANT, SC  
**NHTSA Summary:**  
LAST SPRING, MY HUSBAND AND I FILED A COMPLAINT AGAINST TOYOTA FOR STUCK ACCELERATOR PEDAL IN OUR 2006 TACOMA PICK-UP TRUCK. WE HAD ABOUT 4 INCIDENTS WHERE THE PEDAL WAS STUCK, DURING SPEEDS RANGING FROM 30-60 MILES PER HOUR. THE FLOOR MATS WERE NOT THE ISSUE. TOYOTA DENIED ANY PROBLEMS AT THE TIME AND OUR ONLY CHOICE WAS TO LEAVE OUR TRUCK AT THE DEALERSHIP BECAUSE WE WERE AFRAID TO DRIVE IT HOME OR SELL IT TO SOMEONE ELSE. THEY SUGGESTED WE TRADE IN THE VEHICLE FOR A NEW TRUCK, WHICH WE DID, FOR A 2009 TACOMA. I AM VERY DISBURBED THAT TOYOTA DID NOT INCLUDE THE TACOMA ON THE RECALL LIST WHEN WE KNOW FOR A FACT IT HAS THE ISSUE, AT LEAST THE 2006 MODEL DID. I FEAR THAT THE RECALL LIST IS INCOMPLETE (ALL 2006 TACOMAS ON THE ROAD ARE A HAZARD) AND FEAR THAT MY TRUCK MIGHT HAVE THE ISSUE TOO.\*CW

**NHTSA Summary:**  
TL\*THE CONTACT OWNS A 2009 TOYOTA COROLLA. THE CONTACT NOTICED A GRINDING NOISE MOST OF THE TIME WHEN SHE DEPRESSED THE BRAKE PEDAL. SHE TOOK THE VEHICLE TO THE DEALER WHO STATED THAT THEY COULD NOT FIND ANYTHING WRONG WITH IT. THE FAILURE CONTINUED TO OCCUR AND THE DEALER TURNED THE ROTORS TO REMEDY THE PROBLEM. HOWEVER, SHE CONTINUED HEARING THE GRINDING NOISE. IN SEPTEMBER 2009, SHE TOOK THE VEHICLE TO THE DEALER WHO REPLACED THE BRAKE PADS AND ROTORS. SHE NO LONGER NOTICED THE NOISE. YET, THE BRAKE PEDAL EXTENDED TO THE FLOOR WITH A SUDDEN PULLING AND GRABBING MOTION. THE DEALER TOLD HER THAT THE ABS ACTIVATED WHICH CAUSED THAT FEELING. SHE ALSO STATED THAT THE VEHICLE WOULD SUDDENLY ACCELERATE ON AN INTERMITTENT BASIS. IN DECEMBER 2009, THE DRIVER CRASHED INTO A BRICK WALL WHEN THE VEHICLE SUDDENLY ACCELERATED. THERE WERE NO INJURIES. THE DEALER TOOK PICTURES AND TOLD HER THAT THERE WAS NOTHING WRONG WITH THE VEHICLE. FURTHERMORE, THE GEAR SHIFT BROKE AND THE DEALER DID NOT REPAIR THE VEHICLE FOR SIX MONTHS. SHE CALLED THE MANUFACTURER AND WAS UNABLE TO SPEAK WITH A REPRESENTATIVE. THE CURRENT MILEAGE WAS APPROXIMATELY 17,000. THE FAILURE MILEAGE WAS APPROXIMATELY 1,000.

**Location of Incident:** HOLLY SPRINGS, NC  
**NHTSA Summary:**  
WITH THE MEDIA COVERAGE OF TOYOTA PROBLEMS, I SAW A WOMAN INTERVIEWED WHO COMPLAINED OF "SUDDEN ACCELERATION" WITH HER TOYOTA WHILE BRAKING. I RECOGNIZED THAT IT IS SOMETHING I HAVE EXPERIENCED FREQUENTLY WITH OUR 2009 CAMRY XLE V6 W. 6 SPEED AUTO TRANS. IT IS NOT A "SUDDEN ACCELERATION" PROBLEM, BUT A SUDDEN FREE-WHEELING PROBLEM, MOST NOTICEABLE WHEN DRIVING ON LEVEL OR DOWNHILL ROADS. AS YOU BRAKE TO COME TO A STOP, THE AUTO TRANS. DOWNSHIFTS INTO A LOWER GEAR, BUT IT DOESN'T DO IT FAST ENOUGH, SO IT MOMENTARILY GOES THROUGH NEUTRAL CREATING A MOMENTARY FREE-WHEELING SITUATION THAT DOES ACCELERATE THE CAR JUST AS YOU ARE WANTING TO COME TO A STOP. IT IS PARTICULARLY DISCONCERTING WHEN BRAKING INTO AN INTERSECTION WHILE GOING DOWN HILL. I CALLED THE TOYOTA CUSTOMER CARE NUMBER ON 5/21/09 TO REPORT IT, HOPING THERE MIGHT HAVE BEEN A SOFTWARE UPGRADE. THEY SAID IT WAS NOT NORMAL AND CREATED CASE # 0905126552 AND TOLD ME TO TAKE THE CAR TO MY DEALER, WHICH I DID ON 06/01/09. THE DEALER RESET THE AUTOMATIC TRANSMISSION COMPUTER, BUT THAT DID NOT CORRECT THE PROBLEM. I LATER REPORTED IT AGAIN TO TOYOTA ON A 07/22/09 CUSTOMER SURVEY. WE HAVE BEEN LIVING WITH IT, BUT ARE CAREFUL WHEN BRAKING INTO AN INTERSECTION.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

THE INCIDENT OCCURRED IN A 2006 TOYOTA TACOMA DOUBLE CAB (AUTOMATIC TRANSMISSION) ON DRY PAVEMENT DURING CONGESTED EVENING RUSH-HOUR TRAFFIC IN REDMOND, WASHINGTON, USA. THE VEHICLE WAS COASTING (DECELERATING) UP A GENTLE RIGHT-BENDING GRADE TO A YIELD SIGN FROM SOUTHBOUND 148TH AVE TO WESTBOUND REDMOND WAY (RTE 908). AS THE VEHICLE COASTED TO THE YIELD SIGN SLOWING THROUGH A SPEED OF APPROXIMATELY 25-30 MPH, THE VEHICLE SUDDENLY AND UNEXPECTEDLY ACCELERATED AT FULL POWER WITH THE TACHOMETER NEEDLE INDICATING APPROXIMATELY 5000-6000 RPM. THE DRIVER STATES WITH UTMOST CERTAINTY THAT HIS FOOT WAS NOT IN CONTACT WITH THE ACCELERATOR PEDAL IMMEDIATELY PRIOR TO OR DURING THE ACCELERATION. THE VEHICLE'S CRUISE CONTROL WAS TURNED ON BUT THE DRIVER STATES WITH UTMOST CERTAINTY THAT THE CRUISE CONTROL WAS NOT SET/ENGAGED IMMEDIATELY PRIOR TO OR DURING THE INCIDENT. WITHIN APPROXIMATELY 2 SECONDS OF THE ONSET OF THE RAPID UNEXPECTED ACCELERATION, THE DRIVER APPLIED HEAVY BRAKING AND THE ACCELERATION CEASED. THE VEHICLE OPERATED NORMALLY IMMEDIATELY AFTER THE APPLICATION OF BRAKES. THE DRIVER STATES THAT NO SUBSEQUENT UNEXPECTED ACCELERATIONS HAVE OCCURRED SINCE THE REPORTED INCIDENT.

**NHTSA Summary:**

LEXUS FAST ACCELERATION IN MY CAR. IT HAS HAPPENED 4 OR 5 TIMES IN MY 2006 LEXUS IS 250, WHICH I BOUGHT NEW. AT FIRST, I THOUGHT IT WAS MY FAULT SINCE I USUALLY WEAR WIDE ATHLETIC SHOES. I THOUGHT THAT I WAS TOUCHING BOTH THE BRAKE AND ACCELERATOR AND MENTIONED IT TO MY SISTER, WHO WORKS FOR A LEXUS DEALER. SHE TOLD ME THAT THEY WERE COMING OUT WITH A LETTER ABOUT THE FLOOR MATS CAUSING THE PROBLEM. I TOOK THE DRIVER'S SIDE FLOOR MAT OUT OF MY CAR. I CHECKED THE CLEARANCE AND IT WAS ABOUT 2 INCHES. MY BROTHER, WHO WAS THE FORMER CHAIRMAN OF THE BOARD OF ENGINEERS AT WESTINGHOUSE, TOLD ME THAT IT SOUNDED LIKE A COMPUTER PROBLEM. I CHANGED MY DRIVING SHOES TO GET SOME THIN SOLE, NARROW PUMAS. IT HAS HAPPENED ONCE SINCE THEN. I USUALLY ONLY USE THE LEXUS FOR LONG TRIPS, AND MOST OF THE PROBLEMS HAPPENED WHEN I WAS PARKING THE CAR AFTER DRIVING A LONG WAY. WITHOUT THINKING WHAT TO DO, I JUST PUT THE CAR INTO NEUTRAL OR IF I WASN'T MOVING, I'D SHIFT IT INTO PARK. TURN THE ENGINE OFF. THEN, I WOULD RESTART IT AND IT WAS OK. I WAS A BIT SHAKY AND MY WIFE THOUGHT I WAS NUTS. AROUND TOWN, I DRIVE MY OLD 1996 TOYOTA TACOMA TRUCK. NEVER HAD A PROBLEM WITH IT. I BOUGHT IT NEW AND STILL USE IT EVERY DAY.

*Update Report: Toyota Sudden Unintended Acceleration: Appendix C*

BACK ON MAY 21, 2009, I PULLED OUT OF MY DRIVEWAY IN MY 2006 LEXUS IS250 AND THE ACCELERATOR IMMEDIATELY BECAME STUCK DOWN FORCING MY CAR TO GO ALMOST 55 MPH DOWN A WINDING HILL. AT THIS POINT THE BRAKE ALSO DID NOT WORK AND I SIMPLY HAD TO WAIT FOR EVERYTHING TO BEGIN WORKING AGAIN. I WAS EXTREMELY LUCKY THIS HAPPENED AT NIGHT AND NOBODY WAS IN FRONT OF ME BECAUSE THIS IS A MAIN ROAD. I CONTACTED LEXUS THE NEXT DAY WHO INFORMED IT WAS JUST MY FLOOR MAT AND TO REMOVE THE EXTRA MAT IMMEDIATELY. WHILE I DID NOT AGREE DUE TO THE WAY BOTH THE ACCELERATOR PEDAL AND BRAKES FELT COMPLETELY LOCKED IN PLACE, I DID AS THEY SAID. NOW WITH THE RECENT RECALL ON TOYOTA MODELS, I CALLED LEXUS AGAIN WHO INFORMED ME THAT IN ABOUT 3 MONTHS I WILL RECEIVE A RECALL NOTICE AND THAT IN THE MEAN TIME I CAN COME IN AND HAVE A TECH TEST DRIVE IT WITH ME FOR "PEACE OF MIND". I WOULD LIKE TO UNDERSTAND WHY THIS CAR HAS NOT BEEN INCLUDED AND PUBLICLY ANNOUNCED IN THE RECALL WHEN THEY ARE FULLY AWARE OF THE DANGERS! BEING TOLD THE "PART" NEEDED TO TO CORRECT THE PROBLEM (BOTH THE ACCELERATOR AND THE BRAKE SYSTEM) IS NOT YET BEING MANUFACTURED FOR MY MODEL IS UNACCEPTABLE AND IN THE MEANTIME I AM TRYING TO NOT DRIVE MY VEHICLE AND HAVE THIS EXPERIENCE AGAIN.

**NHTSA Summary:**

WHILE DRIVING ON I10 IN CA, MY MOTHER ACCELERATED TO PASS A TRUCK AND WHEN SHE EASED UP ON THE ACCELERATOR NOTHING HAPPENED. IN FACT, SHE STARTED TO ACCELERATE. SHE TRIED TO BRAKE AND PUT THE EMERGENCY BRAKE ON AND SHE KEPT GOING IN EXCESS OF 90 MPH. SHE DROVE THROUGH A REST AREA BUT WAS UNABLE TO STOP. FINALLY SHE HIT THE GAS PEDAL AGAIN AND THAT DID IT - SHE FINALLY HAD CONTROL AND SLOWED WAY DOWN. SHE DID SO MUCH DAMAGE TO THE ENGINE WHILE TRYING TO GET IT TO STOP THAT CATHEDRAL CITY LEXUS REPLACED THE WHOLE ENGINE. SHE WAS TOLD THE PROBLEM WAS CAUSED BY HER ALL WEATHER FLOOR MAT. SHE WAS NOT AWARE OF ANY RECALL ON FLOOR MATS NOR HAD TUSTIN LEXUS, WHO ALWAYS SERVICES HER CAR, EVER SAID ANYTHING TO HER AND THE MATS HAVE BEEN IN THE CAR SINCE SHE PURCHASED IT. \*TR

**Vehicle:** 2009 TOYOTA CAMRY  
**Location of Incident:** ANN ARBOR, MI

**NHTSA Summary:**

MY BOYFRIEND AND I WERE ON I-94 IN MICHIGAN WHEN MY PARENTS' 2009 CAMRY ACCELERATED OUT OF CONTROL. A SEMI TRUCK WAS MERGING ONTO THE EXPRESSWAY, SO MY BOYFRIEND HIT THE ACCELERATOR TO GIVE THE TRUCK ENOUGH ROOM. WE WERE USING CRUISE CONTROL AT THE TIME GOING ABOUT 70 MPH, BUT THE CAR CONTINUED TO ACCELERATE AT A SPEED IN EXCESS 90 MPH AFTER THE BRAKE WAS APPLIED ONCE WE GOT AROUND THE TRUCK. THE ENGINE WAS REVVING VERY LOUDLY AT THIS POINT. THE BREAK DID NOT OVERRIDE THE CAR'S ACCELERATION OR CRUISE CONTROL EVEN WHEN MY BOYFRIEND STOOD WITH ALL OF HIS WEIGHT ON THE BREAK. AFTER SEVERAL MINUTES, THE CAR FINALLY STOPPED ACCELERATING. I TOOK THE CAR TO MY LOCAL TOYOTA DEALER, ASSUMING THE PROBLEM WAS WITH THE CRUISE CONTROL. THE DEALER TRIED TO RECREATE THE LOSS OF ACCELERATION CONTROL I EXPERIENCED, BUT SAID THEY WERE UNABLE TO DO SO. THE DEALER MECHANICS INSPECTED THE CRUISE CONTROL WIRING SYSTEM, BUT CLAIMED THEY FOUND NOTHING WRONG WITH THE CAR. THIS EVENT HAPPENED IN MAY 2009, WELL BEFORE THE RECENT INCREASE IN PRESS COVERAGE RELATING TO SIMILAR INCIDENTS. \*TR

**Vehicle:** 2000 TOYOTA AVALON  
**Location of Incident:** GIG HARBOR, WA  
**NHTSA Summary:**  
 ON MAY 22, 2009, I BACKED MY 2000 TOYOTA AVALON INTO A PARKING AREA NEXT TO A SHORT PRIVATE ROAD LOCATED ABOUT HALFWAY DOWN A HIGH CLIFF ABOVE A BEACH. AFTER GETTING OUT OF THE CAR, I DECIDED TO MOVE IT ABOUT A FOOT FURTHER OFF THE ROAD, SO I BACKED UP VERY SLOWLY UNTIL THE BUMPER JUST TOUCHED THE CLIFF BEHIND ME. I BRAKED, THE CAR STOPPED, AND THEN I STEPPED VERY LIGHTLY ON THE GAS PEDAL, INTENDING TO BRAKE IMMEDIATELY AFTER MOVING FORWARD A FEW INCHES. TO MY HORROR, THE CAR SHOT FORWARD RAPIDLY, AND I WAS UNABLE TO STOP IT, NO MATTER HOW HARD I PUMPED THE BRAKE PEDAL. I SOMEHOW MANAGED TO TURN IT TO THE LEFT AND THUS AVOIDED PLUNGING OVER THE CLIFF BELOW ME. THE CAR CONTINUED TO ACCELERATE, FISH-TAILING UP A SLIGHT GRADE. THEN IT HIT A PARKED CAR AND TURNED UPSIDE-DOWN ON THE ROAD. I SUFFERED BROKEN VERTEBRAE IN MY BACK AND NECK AND HAD TO BE HOSPITALIZED FOR 12 DAYS AND WEAR A HEAD-NECK BRACE FOR TWO MONTHS. THE CAR WAS TOTALED. \*TR

**Vehicle:** 2006 TOYOTA PRIUS  
**Location of Incident:** MILWAUKEE, WI  
**NHTSA Summary:**  
 WHEN PULLING INTO A PARKING SPACE IN A PARKING GARAGE, MY CAR SURGED FORWARD AND CRASHED INTO THE CONCRETE WALL CAUSING OVER \$8,000.00 WORTH OF DAMAGE AND HURTING MY NECK. A FEW MONTHS AGO, I GOT A LETTER FROM TOYOTA STATING THAT THE FLOOR MAT WAS THE PROBLEM, SO I REMOVED THE MAT. HOWEVER, LAST WEEK WHILE I WAS PULLING INTO A DRIVEWAY THE CAR SURGED FORWARD AGAIN. I WAS GOING SLOW AND PUSHED ON THE BRAKE HARD AND WAS ABLE TO STOP BEFORE I HIT ANYTHING. THE CAR ACTUALLY FEELS AND SOUNDS LIKE IT IS ACCELERATING. ALSO, ABOUT 3 YEARS AGO WHEN I FIRST BROUGHT THE PRIUS IN FOR ROUTINE MAINTENANCE I INFORMED THE TOYOTA DEALER AT 5727 S 27TH ST. MILWAUKEE WISCONSIN. THAT THE CAR FEELS LIKE IT IS SKIDDING WHEN I APPLY THE BRAKES WHILE DRIVING ON A BUMPY ROAD. THE SKID LIGHT IN THE DASH ACTUALLY COMES ON. THEY SAID THAT THERE WAS NO RECALL FOR THIS PROBLEM SO THEY DIDN'T EVEN LOOK AT IT. THIS IS AN ONGOING OCCURANCE. I HAVEN'T HAD AN ACCIDENT YET FROM THIS PROBLEM BUT I THINK THAT YOU SHOULD LOOK INTO THIS ALSO SINCE I SEE THAT THEY ARE SAYING THAT ONLY THE 2010 PRIUSES HAVE THIS PROBLEM. MY CAR IS A 2006 TOYOTA PRIUS VIN:JTDKB20U967501969.

**Vehicle:** 2009 TOYOTA TACOMA  
**Location of Incident:** KINGSHILL, VI  
**NHTSA Summary:**  
 MY HUSBAND AND I PURCHASE A TOYOTA TACOMA DOUBLE CAB 4X4 2009, ON FRIDAY MAY 22, 2009, AND WE ARE HAVING PROBLEMS WITH THE TRANSMISSION AND THE RADIO. WHEN WE ARE SLOWING DOWN TO TURN ON A CURVE AND WHEN WE DEPRESS THE ACCELERATOR THE TRANSMISSION DOWNSHIFTS INTO WHAT APPEARS TO BE THE 1ST GEAR. THE ENGINE WILL RACE UP TO A HIGHER RMP AS THE CAR SUDDENLY SLOWS DOWN. THIS IS DEFINITELY A SAFETY HAZARD. THIS POSSES A POSSIBILITY OF AN ACCIDENT AS OUR VEHICLE SLOWS DOWN QUICKLY AS WE ARE COMING OUT OF THE CURVE, LIGHT INTERSECTION OR ENTERING INTO AN INTERSECTION. THIS HAS BEEN OCCURRING SINCE WE PURCHASED BOTH VEHICLE. WE TOOK IT TO THE DEALER TO BE CHECKED, BUT CANNOT SEE ANYTHING WRONG WITH IT. THEY TOLD ME THEY CAN'T DO ANYTHING TO CORRECT THE ISSUE.(TOYOTA OF ST. CROIX,US VIRGIN ISLANDS). RADIO HAS BEEN ORDERED BECAUSE IN BOTH VEHICLES THE RADIO DOESN'T WORK. IT SHUTS OFF, AND IN THE OTHER ONE WHEN YOU ACCELERATE (GAS PEDAL) THE VOLUME GOES DOWN AND SOMETIMES UP. WHAT CAN YOU DO TO ASSIST US. THANK YOU. \*TR

**Location of Incident:** EAGLEVILLE, PA  
**NHTSA Summary:**  
 I HAVE A 2006 LEXUS RX 400 H. A LEXUS CERTIFIED USED VEHICLE. THE VEHICLE WAS NEW TO ME LAST SUMMER. IT ACCELERATES SLIGHTLY WHEN I INITIATE BRAKING 2 OR 3 TIMES OUT OF 20 TIMES. I THOUGHT IT WAS "NORMAL" FOR A CAR WITH REGENERATIVE BRAKING. IT STARTLES YOU WHEN IT HAPPENS BUT HARD PRESSURE ON THE BRAKE STOPS THE CAR. YOU HAVE TO PAY ATTENTION EACH TIME YOU BRAKE. WHAT IS SCARY IS IT ACCELERATES A LOT IN ABOUT 1 OF 100 TIMES WHEN I BRAKE. AT FIRST I THOUGHT I WAS HITTING BOTH THE GAS AND THE ACCELERATOR... BUT I AM SURE I AM NOT. THE CAR WILL ACCELERATE TWO CAR LENGTHS BEFORE YOU CAN BRAKE IT. I THOUGHT IT WAS DANGEROUS AND BROUGHT IT TO THE DEALER LAST YEAR. WE WENT FOR A TEST DRIVE AND THE PROBLEM DID NOT OCCUR. THE DEALERSHIP RECORDED THE COMPLAINT AND TOLD ME TO KEEP AN EYE ON IT. THE 2 CAR LENGTH ACCELERATION PROBLEM WAS WORSE IN THE HOT MONTHS AND IT DID NOT SEEM TO OCCUR IN THE WINTER MONTHS. THE SLIGHT ACCELERATION PROBLEM HAS NOT CHANGED IN

**Toyota ID Number:**  
**NHTSA ODI Number:** 10314460  
**Date of Incident:** 20090524  
**Vehicle:** 2007 TOYOTA RAV4  
**Location of Incident:** MOUNT DESERT, ME  
**NHTSA Summary:**

ABOUT 8 OR 9 MONTHS AGO, I WAS DOING MAYBE 45 MILES PER HOUR WHEN ALL OF A SUDDEN THE RPM'S WENT WILD, THE ENGINE HOWLED, AND MY 2007 TOYOTA RAV4 LIMITED SPED OFF AS IF SOMEONE HAD DUMPED A BOULDER ON THE ACCELERATOR PEDAL. MY HEART WAS IN MY THROAT AS I TRIED TO STOP THE CAR. PRESSING THE BRAKE HARD DIDN'T DO IT. I THEN STUCK MY FOOT UNDERNEATH THE ACCELERATOR PEDAL AND PUSHED UP WITH THE TOE OR MY SHOE A FEW TIMES. THAT WORKED AND SUBSEQUENTLY I COULD DEPRESS THE BRAKE AND THE CAR RESPONDED NORMALLY. I ASSUMED AT THE TIME THAT MAYBE THE DRIVER'S-SIDE FLOOR MAT HAD SOMEHOW CREPT UP AND IMPEDED THE FREE OPERATION OF THE PEDAL. A THEORY THAT TOYOTA HEADQUARTERS ALSO SEEMED TO FIND PLAUSIBLE (THOUGH NOT FOR THE RAV4, APPARENTLY). SO I THREW OUT THE MAT AND DIDN'T REPLACE IT WITH ANYTHING. WE HAVE DIRTY CARPETING NOW, BUT WE ARE ALIVE. OF COURSE, IN RECENT WEEKS, THE WORLD HAS LEARNED THAT MILLIONS OF TOYOTAS ARE POTENTIALLY AFFLICTED WITH A STICKY ACCELERATOR PEDAL. TWO WEEKS AGO, WE DROVE OUR CAR TO THE DEALER, DOWNEAST TOYOTA IN BREWER, MAINE, WHEN IT WAS TIME FOR ITS 60,000-MILE SERVICE ANYWAY, AND WE INSISTED THAT THE ACCELERATOR BE REPLACED. WE DISCOVERED LATER THAT THEY HADN'T DONE SO, EVEN THOUGH WE ADVISED THEM CLEARLY THAT WE'D HAD A POTENTIALLY LIFE-THREATENING INCIDENT INVOLVING THE ACCELERATOR. THE REASON THEY WILL NOT REPLACE THE ACCELERATOR, THEY TOLD MY WIFE, IS BECAUSE TOYOTA BELIEVES THAT THE 2007 RAV4 HAS NO ACCELERATOR PROBLEMS. IN OTHER WORDS, OUR CAR IS NOT PART OF THE RECALL, SO WE'RE OUT OF LUCK NO MATTER WHAT LEVE PERSONALLY EXPERIENCED.

**Vehicle:** 2005 TOYOTA SIENNA  
**Location of Incident:** LAGUNA WOODS, CA  
**NHTSA Summary:**

WHILE DRIVING FROM CA TO VA IN MAY OF 2009 I EXPERIENCED AN UNINTENDED ACCELERATION WHILE IN CRUISE CONTROL. THIS OCCURRED AFTER I WOULD SLOW DOWN FOR TRAFFIC AND THEN ACTIVATE THE RESUME CONTROL. THIS HAPPENED ON SEVERAL OCCASIONS DURING THE TRIP EAST AND ON THE RETURN TRIP BACK TO CA. THE SPEEDS WITH THE UNINTENDED ACCELERATION REACHED 95MPH ON THE FIRST OCCASION AND STOPPED ONCE I APPLIED THE BRAKES. AFTER THE FIRST INCIDENT I WAS ABLE TO KEEP THE ACCELERATION FROM REACHING MORE THAN 10 TO 15 MPH OVER THE ASSIGNED CRUISE CONTROL SPEED.  
**Additional Summary:**

**Toyota ID Number:**  
**NHTSA ODI Number:** 10272579, 10306155  
**Date of Incident:** 20090526  
**Vehicle:** 2002 LEXUS RX300  
**Location of Incident:** CRESTWOOD, KY  
**NHTSA Summary:**

TL\*THE CONTACT OWNS A 2002 LEXUS RX300. WHEN THE CONTACT ATTEMPTED TO START THE VEHICLE, SHE NOTICED THAT THE ENGINE ATTEMPTED TO START ITSELF BEFORE THE KEY WAS TURNED ALL THE WAY IN THE IGNITION. SHE PROCEEDED TO SHIFT THE VEHICLE FROM PARK INTO DRIVE. THE VEHICLE ACCELERATED QUICKLY AND WOULD NOT STOP, EVEN WHEN THE BRAKES WERE APPLIED. THE VEHICLE CRASHED THROUGH THE GARAGE DOOR AND, APPROXIMATELY TEN FEET FURTHER, STRUCK A RETAINING WALL, HER NEIGHBOR'S HOME, AND A GAS METER. THE CONTACT PLACED THE VEHICLE INTO REVERSE AND IT SPED BACK THROUGH HER RETAINING WALL AND STRUCK HER HOME. THE AIR BAGS DID NOT DEPLOY AND THERE WERE NO INJURIES. A POLICE REPORT WAS FILED AND THE VEHICLE WAS DESTROYED. THE DEALER STATED THAT THEY HAD NEVER HEARD OF THIS TYPE OF FAILURE. SHE ATTEMPTED TO NOTIFY THE MANUFACTURER, BUT WAS UNABLE TO REACH ANYONE. THE CURRENT AND FAILURE MILEAGES WERE 61,232. I OWNED A 2002 LEXUS RX300, WHICH WAS TOTALED IN MAY OF 2009 DUE TO A STICKING ACCELERATOR. AFTER I STARTED IT IN MY GARAGE, THE VERY SECOND, I ENGAGED THE DRIVE GEAR, WITH MY FOOT SECURELY PLANTED ON THE BRAKE, MY VEHICLE TOOK OFF LIKE A ROCKET. IT CRASHED THRU MY GARAGE DOOR, PROCEEDED ABOUT 20 FEET ACROSS MY DRIVING PAD, CRASHED THRU A BRICK RETAINING WALL AND DID NOT STOP UNTIL IT HIT MY NEIGHBOR'S HOUSE NEXT DOOR. MY VEHICLE WAS TOTALED AND COLLISION RESULTED IN MASSIVE DAMAGE TO MY HOME AND MY NEIGHBOR'S HOME. TOYOTA INSPECTED MY VEHICLE AND ADVISED THAT MY INCIDENT WAS NOT THE RESULT OF A MANUFACTURING DEFECT AND THAT THEY WERE UNABLE TO DETERMINE THE CAUSE. MY VEHICLE HAD 61,000 MILES AND WAS IN MINT CONDITION AT THE TIME OF THE CRASH. I REPORTED THIS INCIDENT TO NHTSA ON 6/1/09. THERE HAS BEEN NO MENTION OF LATER MODEL LEXUS IN ANY OF THE CONVERSATIONS. I'D LIKE FOR SOMEONE TO ADDRESS MY ISSUE AS WELL. THANK YOU. \*JB

**Date of Incident:** 20090526  
**Vehicle:** 2004 TOYOTA CAMRY  
**Location of Incident:** BEVERLY, MA

**NHTSA Summary:**  
I EXPERIENCED THE SUDDEN ACCELERATION PROBLEM (WHICH HAS BEEN IN THE NEWS) IN MAY OF LAST YEAR. I WAS ABLE TO STOP THE CAR AFTER PUTTING IT INTO NEUTRAL AND SHUT OFF THE ENGINE. WHEN I RESTARTED IT, IT PERFORMED NORMALLY. I THEN DROVE IT DIRECTLY TO MY REPAIR SHOP WHERE THEY COULD FIND NOTHING WRONG. IT HAS NOT REOCCURRED SINCE. I OWN A 2004 TOYOTA CAMRY WITH ABOUT 72000 MILES ON IT.

**Additional Summary:**  
I own a 2004 Camry which I have had since 2005. About 4 months ago the car took off suddenly on Rte 62 in Danvers. I hit the accelerator a few times thinking that it may be stuck. That didn't work, so I tried to brake and that didn't work either. I put the car into neutral and then was able to stop the car. I shut off the engine and when I started it again it performed normally. I drove it directly to Autodyne in Beverly where I have my repairs done. Rob checked it out and couldn't find anything wrong.

**Location of Incident:** MENDHAM, NJ

**NHTSA Summary:**  
**Additional Summary:**  
FROM USA TODAY NEWS ARTICLE "The died in Toyotas, leaving many questions"

"During the past 12 months, Alfred Anzalone has had to cope with two losses. His daughter, Nancy, died in a car crash in May. His wife, Helen, passed away in January. She had a heart attack the morning of her daughter's funeral and never recovered, Anzalone says.

The NHTSA complainant, an anonymous relative, acknowledged in the filing that Nancy Anzalone suffered from bipolar disorder and was on the way to the hospital but insisted she was not suicidal.

Her father, who says he is convinced his daughter died because of Toyota's sudden-acceleration problems, disagrees with the complaint. He says his daughter was heading to work that morning and that witnesses say she sped through a red light with her emergency flashers on. A truck driver who saw the crash in his rearview mirror says the car swerved to miss him and crashed into a tree.

Police found the car burning and in two pieces."

**Date of Incident:** 20090528  
**Vehicle:** 2009 TOYOTA CAMRY  
**Location of Incident:** MISSOURI CITY, TX

**NHTSA Summary:**  
I HAVE A 2009 CAMRY. I KNOW ABOUT THE RECALL FOR THE ACCELERATION PROBLEM. THIS IS A SIMILAR PROBLEM THAT IS DIFFERENT, BUT ACTUALLY COULD BE RELATED PERHAPS. IF I SET MY CRUISE CONTROL FOR EXAMPLE AT 65 (OR ANY SPEED) AND I BRAKE THE CRUISE CONTROL DEACTIVATES. IF I SLOW TO LETS SAY 35 TO GO THROUGH TOWN, AND THEN HIT RESUME, THE CAR ACCELERATES VERY FAST UNTIL IT GETS TO 65 AGAIN. THIS ACCELERATION IS SO FAST THAT YOU OFTEN NEED TO RE-BRAKE TO RE ESTABLISH CONTROL OF THE CAR. THIS HAS BEEN A CONSTANT PROBLEM WITH THE 2009 CAMRY. I HAVE ANOTHER VEHICLE DODGE THAT GRADUALLY GAINS SPEED WHEN I HIT RESUME AND HAVE HAD A 96 CAMRY WITH CRUISE THAT HAD A GRADUAL RETURN TO THE PRESET SPEED. THE CRUISE CONTROL ON THE CAMRY IS DANGEROUS AND FAR FASTER THAN I WOULD EVER ACCELERATE FROM 35 TO 65 ON MY OWN.
